KESTER SOLDER COMPANY (Continued) **1000401428**

Address:	1730 NORTH ORANGETHORPE PARK
City,State,Zip:	ANAHEIM, CA 92801
Region:	STATE
Facility Status:	**Open - Assessment & Interim Remedial Action**
Status Date:	12/17/2010
Global Id:	T0605939958
Lead Agency:	SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number:	Not reported
Latitude:	33.860926
Longitude:	-117.909298
Case Type:	Cleanup Program Site
Case Worker:	MG
Local Agency:	Not reported
RB Case Number:	2080055
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Alcohols, 1,1,1-Trichloroethane (TCA), Acetone, Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	The Kester Solder facility manufactured solder alloys and fluxes from 1968 to 2002, when operations ceased. The facility stored hazardous materials in containers, aboveground storage tanks (ASTs), and four underground storage tanks (USTs). The building housed a manufacturing area, offices, warehouse, shipping and receiving room, laboratory, and chemical mixing and storage room. An NFA for soil was issued to Northrop Grumman on December 17, 2010. Northrop Grumman is preparing a work plan for an ISCO injection pilot test (2018) to remediate the 1,4-dioxane hot spots at the Site.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Document Type: Site Screening
Completed Date: 02/08/1991
Comments: The PA Report was reviewed by Region 4 staff. Pacific Tank Ltd. manufactures custom fiberglass tanks in the City of Fullerton. All operations are permitted by the So. Coast AQMD. The acetone tank was removed in 1989 under county oversight. Verification samples revealed no contamination. Staff recommends NFA by DTSC.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-13-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine tiered permitting inspection for the conditionally exempt tier. The inspection and document review were conducted with Jose Salas. James Hendron (OCHCA) was also present for the inspection. Facility generates waste water and filter cake that is hazardous for copper. The facility conducts treatment of the waste water which is disposed of to the sewer under permit. Facility sends approximately 50 gallons of hazardous waste (spent etch bath) per month to the treatment system. The filter cake is processed approximately once per year and hauled as a hazardous waste. The following documents are available for review: inspection log, and treatment log. The written operating instructions were not available. Please send a copy of these instructions to this Agency.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-13-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Inspection was conducted with Jose Salas who gave permission to conduct the inspection. James Hendron (OCHCA) was also present at the inspection. Facility generates filter cake containing copper and waste tin and lead. The tin and lead are sent for recycling by Salvage One. Hazardous waste container was not labeled (see violation). A label was placed on the container at the inspection. This violation is abated and no further action is required. Facility sends the spent etchant through the treatment system. The sludge from the system is processed approximately once per year and the waste hauled at that time. Manifests were available for review. Facility is assigned and using EPA ID# CAR000163709. Facility?s number is inactive per DTSC website. Discussed this with the operator. Mr. Salas states that they recently sent information to reactivate their number. Please note, facility?s hazardous waste hauler has [Truncated]

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-13-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine tiered permitting inspection for the conditionally exempt tier. The inspection and document review were conducted with Jose Salas. James Hendron (OCHCA) was also present for the inspection. Facility generates waste water and filter cake that is hazardous for copper. The facility conducts treatment of the waste water which is disposed of to the sewer under permit. Facility sends approximately 50 gallons of hazardous waste (spent etch bath) per month to the treatment system. The filter cake is processed approximately once per year and hauled as a hazardous waste. The following documents are available for review: inspection log, and treatment log. The written operating instructions were not available. Please send a copy of these instructions to this Agency.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-13-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Inspection was conducted with Jose Salas who gave permission to conduct the inspection. James Hendron (OCHCA) was also present at the inspection. Facility generates filter cake containing copper and waste tin and lead. The tin and lead are sent for recycling by Salvage One. Hazardous waste container was not labeled (see violation). A label was placed on the container at the inspection. This violation is abated and no further action is required. Facility sends the spent etchant through the treatment system. The sludge from the system is processed approximately once per year and the waste hauled at that time. Manifests were available for review. Facility is assigned and using EPA ID# CAR000163709. Facility?s number is inactive per DTSC website. Discussed this with the operator. Mr. Salas states that they recently sent information to reactivate their number. Please note, facility?s

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations Found:	No
Eval Type:	Routine done by local agency

HI TECH SOLDER (Continued) **1008388697**

Eval Notes: On site for routine tiered permitting inspection for the conditionally exempt tier. The inspection and document review were conducted with Jose Salas. James Hendron (OCHCA) was also present for the inspection. Facility generates waste water and filter cake that is hazardous for copper. The facility conducts treatment of the waste water which is disposed of to the sewer under permit. Facility sends approximately 50 gallons of hazardous waste (spent etch bath) per month to the treatment system. The filter cake is processed approximately once per year and hauled as a hazardous waste. The following documents are available for review: inspection log, and treatment log. The written operating instructions were not available. Please send a copy of these instructions to this Agency.
Eval Division: Orange County Environmental Health
Eval Program: CE
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-13-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Inspection was conducted with Jose Salas who gave permission to conduct the inspection. James Hendron (OCHCA) was also present at the inspection. Facility generates filter cake containing copper and waste tin and lead. The tin and lead are sent for recycling by Salvage One. Hazardous waste container was not labeled (see violation). A label was placed on the container at the inspection. This violation is abated and no further action is required. Facility sends the spent etchant through the treatment system. The sludge from the system is processed approximately once per year and the waste hauled at that time. Manifests were available for review. Facility is assigned and using EPA ID# CAR000163709. Facility?s number is inactive per DTSC website. Discussed this with the operator. Mr. Salas states that they recently sent information to reactivate their number. Please note, facility?s hazardous waste hauler has [Truncated]

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 02/11/2019
Date Data Arrived at EDR: 02/12/2019
Date Made Active in Reports: 03/04/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

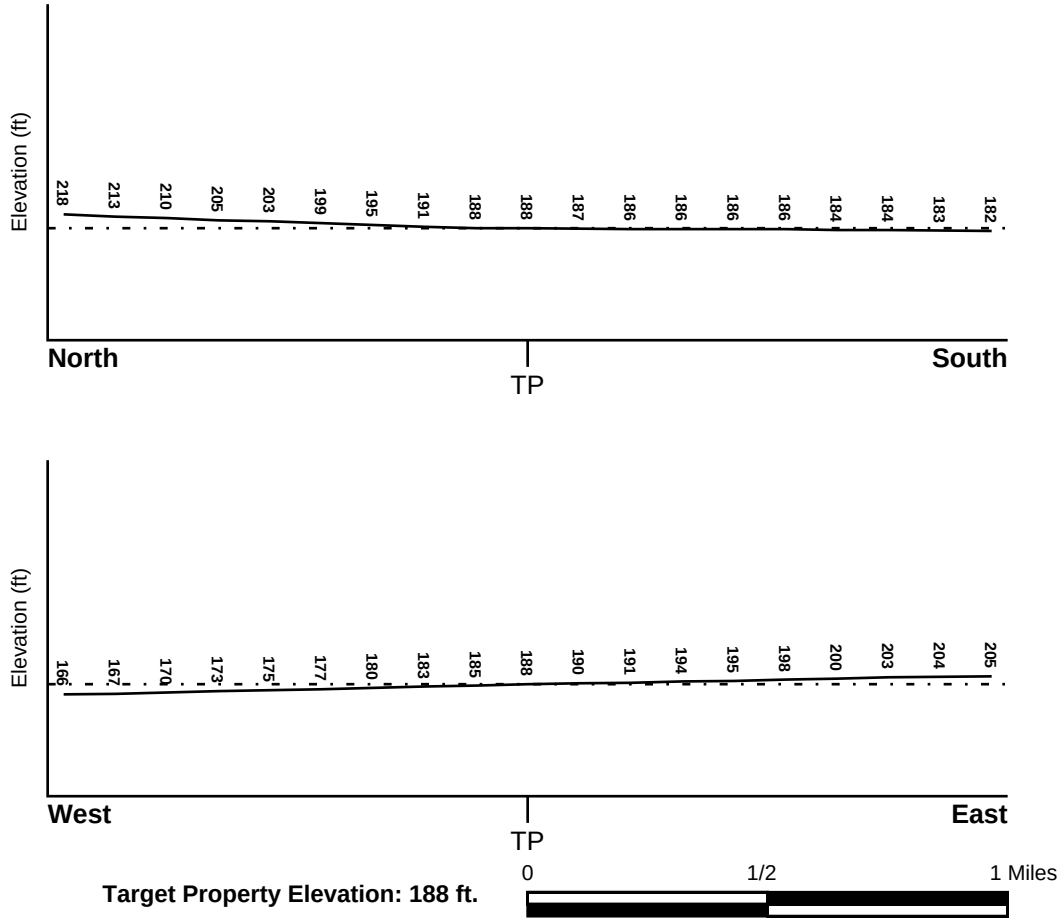
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0132J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1875F	FEMA FIRM Flood data
06059C0044J	FEMA FIRM Flood data
06059C0131J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
ANAHEIM	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles WSW
Site Name:	Mlodzik Corp Monitor Plating
Site EPA ID Number:	CAD041325143
Groundwater Flow Direction:	SW IN THE VICINITY OF THE SITE.
Measured Depth to Water:	not available.
Hydraulic Connection:	Information is not available about the hydraulic connection between aquifers underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
B6	1/4 - 1/2 Mile SE	Not Reported

10G	1/4 - 1/2 Mile SE	Not Reported
11G	1/4 - 1/2 Mile SE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

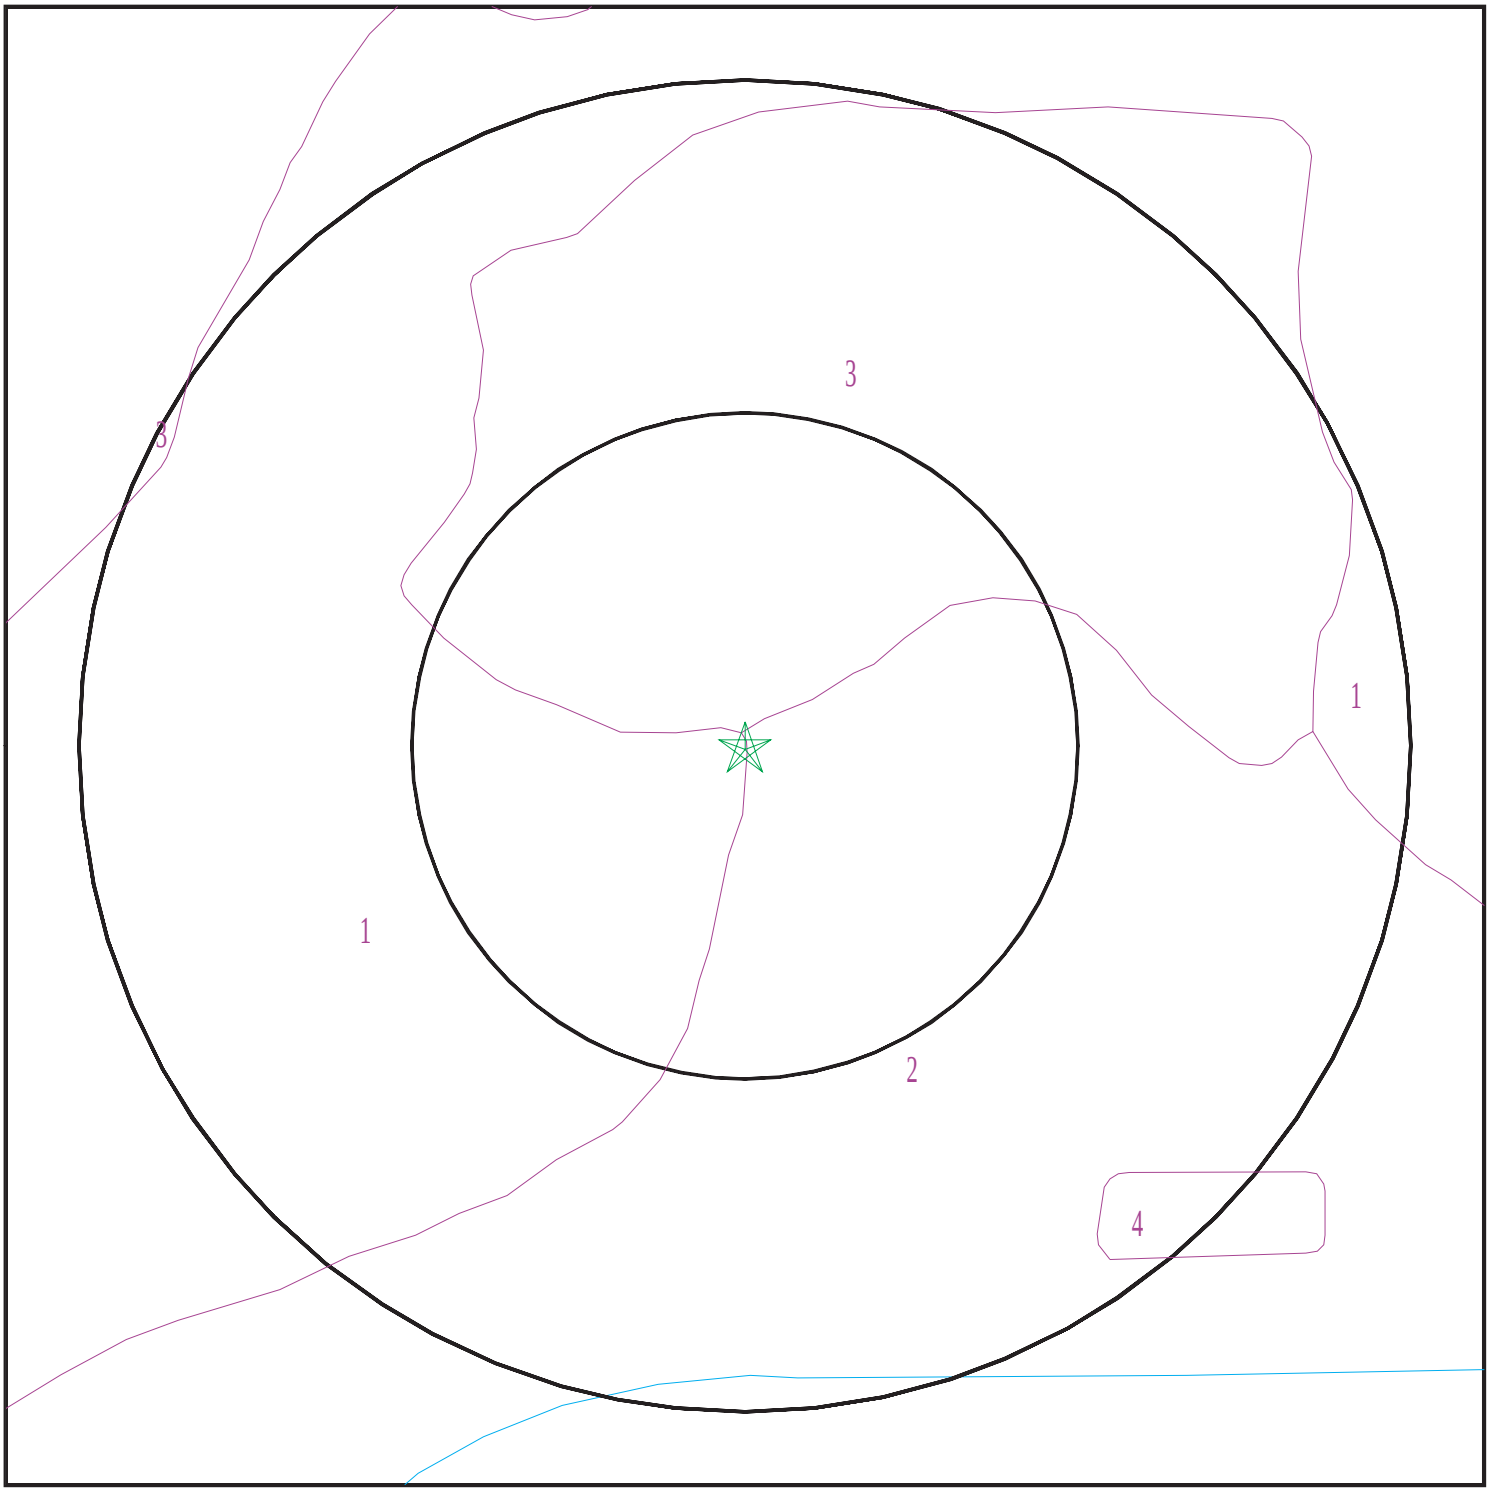
GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT



Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: SAN EMIGDIO

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9
2	7 inches	61 inches	stratified gravelly loamy coarse sand to very fine sandy loam	Not reported	Not reported	Max: 42 Min: 14	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: METZ

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6
2	16 inches	62 inches	stratified sand to fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: MOCHO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	31 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	31 inches	61 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 4

Soil Component Name: Water

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

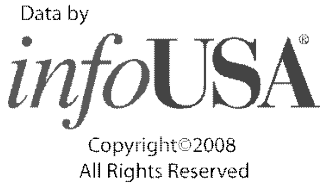
EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.



Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILDFAX® PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Stantec on Jul 15, 2019.

TARGET PROPERTY

2001 E. Orangethorpe Ave
Fullerton, CA 92831

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

TARGET PROPERTY FINDINGS

TARGET PROPERTY DETAIL

2001 E. Orangethorpe Ave
Fullerton, CA 92831

2001 E ORANGETHORPE AVE

Date:	**2/15/2018**
Permit Type:	**ENG**
Description:	**Remove & replace spur track on Kimberly between Acacia & St. College. Provide a clean sawcut line in the A.C. Limits of A.C. removal shall be finalized by City's inspector. See page 2 for Supplemental Conditions (attached).**
Permit Description:	**ENGINEERING**
Work Class:	
Proposed Use:	
Permit Number:	ENG18-00065
Status:	FINALLED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	RAY THOMAS

Date:	**11/23/2015**
Permit Type:	**ENG**
Description:	**Construct new driveway approach on Kimberly west of State College Blvd (south side) per City Std. 121 B and approved plan (attached).**
Permit Description:	**ENGINEERING**
Work Class:	
Proposed Use:	
Permit Number:	ENG15-00546
Status:	FINALLED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	RCMC RV & BOAT STORAGE

TARGET PROPERTY FINDINGS

Date:	**9/14/2015**
Permit Type:	**FIR**
Description:	**COMMERICAL FIRE PERMIT - ADD (3) SPRINKLERS TO EXISTING BUILDINGPER APPROVED PLANS**
Permit Description:	**FIRE**
Work Class:	
Proposed Use:	
Permit Number:	FIR15-00169
Status:	ISSUED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	VFS FIRE & SECURITY SERVICES

Date:	**4/9/2015**
Permit Type:	**PLM**
Description:	**COMMERCIAL PLUMBING PERMIT - CHANGE (E) IRRIGATION TO DRIP IRRIGATION**
Permit Description:	**PLUMBING**
Work Class:	
Proposed Use:	
Permit Number:	PLM15-00215
Status:	ISSUED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	PARK WEST LANDSCAPE MAINTENANCE INC

Date:	**8/20/2013**
Permit Type:	**PLM**
Description:	**COMMERCIAL PLUMBING PERMIT - PLUMBING FOR LANDSCAPE FOR KIMBERLY CLARK REF: LND12-00010**
Permit Description:	**PLUMBING**
Work Class:	
Proposed Use:	
Permit Number:	PLM13-00444
Status:	FINALLED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	C R MEYER AND SONS COMPANY

TARGET PROPERTY FINDINGS

Date:	**8/1/2013**
Permit Type:	**ELE**
Description:	**INSTALL 4.16KV SOLID STATE STARTER FOR PERMITED 550 TONS CHILLER (MEC13-00080).(1) 0.5 HP(1) 550 TON CHILLER**
Permit Description:	**ELECTRICAL**
Work Class:	
Proposed Use:	
Permit Number:	ELE13-00356
Status:	FINALLED
Valuation:	$0.00

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Spoke to Kimberly Clark/Madden. The violation (I310, no emergency notification equipment) listed on the 8-7-15 inspection has been rectified. When tested, the phone on the outside of the HW storage building did not work. Madden confirmed that the phone did in fact work but that the "volume" button on the phone was in the low volume setting. Once the volume button was increased, both parties could hear via the phone.

Abate violation # I310 listed on the 8-7-15 inspection.

No outstanding violations.

I declare that I have examined and received a copy of this inspection report.

THE ITEMS NOTED BELOW WERE OBSERVED DURING COURSE OF THE SITE VISIT. ANY VIOLATIONS OBSERVED MUST BE CORRECTED

I310 - Generator maintains at the facility the required emergency equipment or equivalents Failure of the facility to maintain the following emergency equipment or equivalents:
1) An internal communications or alarm system capable of providing immediate emergency instruction (voice or signal) to facility personnel;
2) A device, such as a telephone (immediately available at the scene of Operations/ Maintenance) or a hand-held two-way radio, capable of summoning emergency assistance from local police departments, fire departments, or State or local emergency response teams;
3) Portable fire extinguishers, fire control equipment (including special extinguishing equipment, such as that using foam, inert gas, or dry chemicals), spill control equipment, and decontamination equipment; and
4) Water at adequate volume and pressure to supply water hose streams, or foam producing equipment, or automatic sprinklers, or water spray systems. 22 CCR 12 66262.34(d)(2); 40 CFR 1 265.32
The emergency response phone located outside the HW storage area worked but communication between the HW area and the operator was barely audible. Have this phone (emergency response notification system) repaired to allow for easy notification. Send verification that this system has been repaired in order to abate the violation.

On site for the Triennial Hazardous Waste (HW) inspection report. Permission to inspect granted by Kimberly Clark/Madden.

This facility is a California only Large Quantity Generator (LQG). They are having all their HW disposed on a 1-2 month schedule.

EPA ID #. OK.

All HW drums were properly labeled with beginning accumulation dates. Satellite accumulation areas are located throughout the facility. All are properly labeled and moved to the HW storage area several times per year. All are stored closed with self sealing lids.

All HW drums/containers were stored closed.

Weekly inspection logs for the HW and satellite accumulation areas were maintained.

Annual HW training. Reviewed the training program. OK.

Reviewed the last 3 years of HW manifests. OK. Matched the California WTMS database.

HW is stored in secondarily contained shed.

Review of the municipal trash and perimeter showed no disposal of HW.

Business Owner/Operator Identification

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information.) Please number all pages of your submittal. This helps Unified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at www.dnb.com.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

    SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.
137. TITLE OF SIGNER - Enter the title of the person signing the page.

UNIFIED PROGRAM CONSOLIDATED FORM

FACILITY INFORMATION

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # (Agency Use Only) 3 0 [1]	EPA ID # (Hazardous Waste Only) CAD009547373	[2]
BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) Kimberly-Clark Worldwide Inc., Fullerton		[3]
BUSINESS SITE ADDRESS 2001 E. Orangethorpe Ave.,		[103]
BUSINESS SITE CITY Fullerton [104]	CA ZIP CODE 92831	[105]

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility				If Yes, please complete these pages of the UPCF
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	☐ NO	4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☒ YES	☐ NO	4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	☒ NO	5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☒ YES	☐ NO	8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	☐ NO	9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	☒ NO	10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	☒ NO	11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	☒ NO	12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	☒ NO	13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	☒ NO	14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	☒ NO	14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	☒ NO	14b	See CUPA for required forms.

F. LOCAL REQUIREMENTS [15]

(You may also be required to provide additional information by your CUPA or local agency.)

RECEIVED HCA

DEC 30 2011

ENVIRONMENTAL HLTH

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters □CA□. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms □Facility Name□ or □DBA - Doing Business As□ that might have been used in the past.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

4. HAZARDOUS MATERIALS –

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer □YES□ to this question if you exceed only a local threshold, but do not exceed the state threshold.

4a. REGULATED SUBSTANCES – Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) 25316. If □YES□, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.

8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC 25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC 25270.2 (k)) is not subject to this act and is exempt:

- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.

9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC 25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.

10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC 25143.2. Check □YES□ and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check □NO□ if you only send recyclable materials to an offsite recycler. You do not need to report.

11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of □treatment□ for certain processes under specific, limited conditions. Refer to HSC 25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC 25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.

12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR 67450.13 (b) and HSC 25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.

13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer □YES□ if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC 25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.

14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Inability to remove hazardous materials stored in the tank.
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.

If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

IV. Signature

I certify under penalty of law that the information submitted is accurate and complete to the best of my knowledge.

Signature of owner or tank facility operator	Printed name of owner or tank facility operator 136	Date (M/d/yyyy) 134
F. Vicino	F. Vicino for Stewart VanHorn	12/29/2011

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment
#1	**Gasoline**	**2,000**	north	**n/a**	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☒Vehicle ☐Other:	☐Yes ☒ No
Waste oil (#22 A)	**Used oil**	**550**	east	**2001**	☒Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No
Atf	**Automatic transmission fluid**	**220**	west	**n/a**	☐Steel ☐Fiberglass/Plastic ☒Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

Business Owner/Operator Identificatio

Please submit the Business Activities page, the Busine[illegible]ner/Operator Identification page, and Hazardous Materials Invento[illegible] - Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be consi[illegible] complete this page must be signed by the appropriate individual. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information.) Please number all pages of your submittal. This helps Unified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at www.dnb.com.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.
SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.
137. TITLE OF SIGNER - Enter the title of the person signing the page.

UNIFIED PROGRAM CONSOLIDATED FORM

FACILITY INFORMATION

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # (Agency Use Only) 3 0 [1]	EPA ID # (Hazardous Waste Only) CAD009547373	[2]
BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) Kimberly-Clark Worldwide Inc., Fullerton		[3]
BUSINESS SITE ADDRESS 2001 E. Orangethorpe Ave.,		[103]
BUSINESS SITE CITY Fullerton [104]	CA ZIP CODE 92831	[105]

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility		If Yes, please complete these pages of the UPCF
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☒ YES ☐ NO 4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES ☒ NO 5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☒ YES ☐ NO 8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES ☐ NO 9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES ☒ NO 10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES ☒ NO 11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES ☒ NO 14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES ☒ NO 14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES ☒ NO 14b	See CUPA for required forms.

F. LOCAL REQUIREMENTS [15]

(You may also be required to provide additional information by your CUPA or local agency.)

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters □CA□. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms □Facility Name□ or □DBA - Doing Business As□ that might have been used in the past.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

4. HAZARDOUS MATERIALS –

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer □YES□ to this question if you exceed only a local threshold, but do not exceed the state threshold.

4a. REGULATED SUBSTANCES – Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) □25316. If □YES□, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.

8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC □25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC □25270.2 (k)) is not subject to this act and is exempt:

- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.

9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC □25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.

10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC □25143.2. Check □YES□ and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check □NO□ if you only send recyclable materials to an offsite recycler. You do not need to report.

11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of □treatment□ for certain processes under specific, limited conditions. Refer to HSC □25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC □25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.

12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR □67450.13 (b) and HSC □25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.

13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer □YES□ if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC □25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.

14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Inability to remove hazardous materials stored in the tank.
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.

If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment
#1	Gasoline	2,000	north	n/a	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☒Vehicle ☐Other:	☐Yes ☒ No
Waste oil (#22 A)	Used oil	550	east	2001	☒Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No
Atf	Automatic transmission fluid	220	west	n/a	☐Steel ☐Fiberglass/Plastic ☒Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No
CNC Machine #15	Trim sol coolant	75	west	1994	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☒Other: machine	☐Yes ☒ No
Hydraulic lift	Hydraulic oil	150	east	1998	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☒Other: hydraulic lift	☒Yes ☐ No
#1A	Diesel	2,000	north	2005	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☒Generator ☐Vehicle ☐Other:	☒Yes ☐ No

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment
#1	Gasoline	2,000	north	n/a	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☒Vehicle ☐Other:	☐Yes ☒ No
Waste oil (#22 A)	Used oil	550	east	2001	☒Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No
Atf	Automatic transmission fluid	220	west	n/a	☐Steel ☐Fiberglass/Plastic ☒Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No
CNC Machine #15	Trim sol coolant	75	west	1994	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☒Other: machine	☐Yes ☒ No
Hydraulic lift	Hydraulic oil	150	east	1998	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☒Other: hydraulic lift	☒Yes ☐ No
#1A	Diesel	2,000	north	2005	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☒Generator ☐Vehicle ☐Other:	☒Yes ☐ No

Business Owner/Operator Identification

ase submit the Business Activities page, the Business [illegible]er/Operator Identification page, and Hazardous Materials Inve[illegible]y - Chemical Description pages for all hazardous terials inventory submissions. For the inventory to be co[illegible]red complete this page must be signed by the appropriate indiv[illegible] (Note: the numbering of the instructions follows e data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are use[illegible] for electronic submission and are the same as the mbering used in Division 3, Electronic Submittal of Information.) Please number all pages of your submittal. This helps Unified Program Agency (UPA) identify whether the bmittal is complete and if any pages are separated.

. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.

. BUSINESS NAME - Enter the doing business as name.

00. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)

01. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)

102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.

102a. BUSINESS FAX – Enter the business fax number, area code first.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at www.dnb.com.

107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.

107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.

108. COUNTY - Enter the county in which the business site is located.

108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.

108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.

108c. STATE - Enter the two character abbreviation of the state for the business mailing address.

108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.

109. BUSINESS OPERATOR NAME - Enter the name of the business operator.

110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.

111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.

112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.

113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.

114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.

115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.

116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.

117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.

118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.

119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.

119a. CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.

120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.

121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.

122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.

123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.

124. TITLE - Enter the title of the primary emergency contact.

125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.

126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.

127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.

128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.

129. TITLE - Enter the title of the secondary emergency contact.

130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.

131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.

132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.

133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.

134. DATE - Enter the date that the document was signed. (YYYYMMDD)

135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.

136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.

137. TITLE OF SIGNER - Enter the title of the person signing the page.

UNIFIED PROGRAM CONSOLIDATED FORM

FACILITY INFORMATION

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # (Agency Use Only) 1	3 0	EPA ID # (Hazardous Waste Only) 2	CAD009547373
BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) 3	KIMBERLY-CLARK WORLDWIDE INC., FULLERTON MILL		
BUSINESS SITE ADDRESS 103	2001 E. ORANGETHORPE AVENUE,		
BUSINESS SITE CITY 104	FULLERTON	CA ZIP CODE 105	92831

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility			If Yes, please complete these pages of the UPCF
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	☐ NO 4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION SUBMITTED TO CITY of FUL FFD CUPA
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☒ YES	☐ NO 4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	☒ NO 5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☒ YES	☐ NO 8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	☐ NO 9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	☒ NO 10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	☒ NO 11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	☒ NO 12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	☒ NO 13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	☒ NO 14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste. (1 Time)	☒ YES	☐ NO 14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	☒ NO 14b	See CUPA for required forms.

F. LOCAL REQUIREMENTS 15

(You may also be required to provide additional information by your CUPA or local agency.)

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters □CA□. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms □Facility Name□ or □DBA - Doing Business As□ that might have been used in the past.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

4. HAZARDOUS MATERIALS –

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer □YES□ to this question if you exceed only a local threshold, but do not exceed the state threshold.

4a. REGULATED SUBSTANCES – Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) 25316. If □YES□, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.
8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC 25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC 25270.2 (k)) is not subject to this act and is exempt:

- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.

9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC 25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC 25143.2. Check □YES□ and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check □NO□ if you only send recyclable materials to an offsite recycler. You do not need to report.
11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of □treatment□ for certain processes under specific, limited conditions. Refer to HSC 25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC 25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.
12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR 67450.13 (b) and HSC 25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer □YES□ if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC 25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Inability to remove hazardous materials stored in the tank.
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.

If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

Aboveground Storage Tank Facil Statement

3 FACILITY NAME - Enter the doing business as name.

103 FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.

104 CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.

105 ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.

111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.

113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.

114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.

115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.

116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.

117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.

118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.

112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.

119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.

920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.

921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.

922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.

923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.

924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)

925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.

926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.

927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.

928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.

APPLICANT SIGNATURE – The application form must be signed, in the space provided

136. APPLICANT NAME – Print or type the full name of the person signing the form.

134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment
#1	Gasoline	2,000	north	n/a	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☒Vehicle ☐Other:	☐Yes ☒ No

Aboveground Storage Tank Facility Statement

3 FACILITY NAME - Enter the doing business as name.

103 FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.

104 CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.

105 ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.

111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.

113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.

114 BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.

115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.

116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.

117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.

118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.

112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.

119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.

920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.

921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.

922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.

923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.

924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)

925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.

926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.

927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.

928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.

APPLICANT SIGNATURE – The application form must be signed, in the space provided

136. APPLICANT NAME – Print or type the full name of the person signing the form.

134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

Business Owner/Operator Identification

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information.) Please number all pages of your submittal. This helps Unified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at www.dnb.com.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a. CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.

137. TITLE OF SIGNER - Enter the title of the person signing the page.

BUSINESS NAME (Same as Facility Name of DBA-Doing Business As)	KIMBERLY CLARK WORLDWIDE INC. FUL. MILL	3
BUSINESS SITE ADDRESS	2001 E. ORANGETHORPE AVE.,	103
BUSINESS SITE CITY	FULLERTON 104	CA ZIP CODE 92831 105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility			If Yes, please complete these pages of the UPCF
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	☐ NO 4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION SUBMITTED TO CITY OF FUL FFD CUPA
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☒ YES	☐ NO 4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	☒ NO 5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☒ YES	☐ NO 8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	☐ NO 9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	☒ NO 10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	☒ NO 11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	☒ NO 12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	☒ NO 13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	☒ NO 14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☒ YES	☐ NO 14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	☒ NO 14b	See CUPA for required forms.
F. LOCAL REQUIREMENTS (You may also be required to provide additional information by your CUPA or local agency.)			15

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters □CA□. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 81-TOXIC or (800) 81-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms □Facility Name□ or □DBA - Doing Business As□ that might have been used in the past.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

4. HAZARDOUS MATERIALS –

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer □YES□ to this question if you exceed only a local threshold, but do not exceed the state threshold.

4a. REGULATED SUBSTANCES – Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) 25316. If □YES□, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.

8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 80 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC 25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC 25270.2 (k)) is not subject to this act and is exempt:

- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.

9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC 25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.

10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC 25143.2. Check □YES□ and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check □NO□ if you only send recyclable materials to an offsite recycler. You do not need to report.

11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of □treatment□ for certain processes under specific, limited conditions. Refer to HSC 25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC 25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.

12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR 67450.13 (b) and HSC 25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.

13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer □YES□ if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC 25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.

14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Inability to remove hazardous materials stored in the tank.
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 281.32.

If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

IV. Signature

I certify under penalty of law that the information submitted is accurate and complete to the best of my knowledge.

Signature of owner or tank facility operator	Printed name of owner or tank facility operator 136	Date (M/d/yyyy) 134
[signature]	STEWART VAN HORN	12/30/2008

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment
#1	Gasoline	2,000	north	n/a	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☒Vehicle ☐Other:	☐Yes ☒ No
Waste oil (#22 A)	Used oil	550	east	2001	☒Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No
Atf	Automatic transmission fluid	220	west	n/a	☐Steel ☐Fiberglass/Plastic ☒Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No
CNC Machine #15	Trim sol coolant	75	west	1994	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☒Other: machine	☐Yes ☒ No
Hydraulic lift	Hydraulic oil	150	east	1998	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☒Other: hydraulic lift	☒Yes ☐ No
#1A	Diesel	2,000	north	2005	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☒Generator ☐Vehicle ☐Other:	☒Yes ☐ No

COORDINATOR

This Facility

Facilities with a single tank or cumulative storage capacities of 1,320 gallons or greater of petroleum are required to prepare an SPCC plan. Exceptions include farms, nurseries, logging and construction sites if these businesses have a storage capacity of less than 100,000 gallons or if the individual storage tanks are less than 20,000 gallons.

More information regarding the APST program will follow as regulations are still being written by the State.

I declare that I have examined and received a copy of this inspection report.

Business Owner/Operator Identification

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory – Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information.) Please number all pages of your submittal. This helps Unified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at www.dnb.com.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.

137. TITLE OF SIGNER - Enter the title of the person signing the page.

UNIFIED PROGRAM CONSOLIDATED FORM

FACILITY INFORMATION

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # (Agency Use Only)	3	0												1	EPA ID # (Hazardous Waste Only) CAD009547373		2

BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) Kimberly-Clark Worldwide Inc., Fullerton 3

BUSINESS SITE ADDRESS 2001 E. Orangethorpe Ave., 103

BUSINESS SITE CITY Fullerton 104 | CA | ZIP CODE 92831 105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility				If Yes, please complete these pages of the UPCF
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	☐ NO	4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☒ YES	☐ NO	4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	☒ NO	5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☒ YES	☐ NO	8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	☐ NO	9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	☒ NO	10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	☒ NO	11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	☒ NO	12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	☒ NO	13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	☒ NO	14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	☒ NO	14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	☒ NO	14b	See CUPA for required forms.
F. LOCAL REQUIREMENTS (You may also be required to provide additional information by your CUPA or local agency.)			15	

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters □CA□. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms □Facility Name□ or □DBA - Doing Business As□ that might have been used in the past.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

4. HAZARDOUS MATERIALS –

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer □YES□ to this question if you exceed only a local threshold, but do not exceed the state threshold.

4a. REGULATED SUBSTANCES – Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) □25316. If □YES□, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.

8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC □25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC □25270.2 (k)) is not subject to this act and is exempt:

- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.

9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC □25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.

10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC □25143.2. Check □YES□ and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check □NO□ if you only send recyclable materials to an offsite recycler. You do not need to report.

11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of □treatment□ for certain processes under specific, limited conditions. Refer to HSC □25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC □25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.

12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR □67450.13 (b) and HSC □25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.

13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer □YES□ if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC □25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.

14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Inability to remove hazardous materials stored in the tank.
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.

If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

IV. Signature

I certify under penalty of law that the information submitted is accurate and complete to the best of my knowledge.

Signature of owner or tank facility operator	Printed name of owner or tank facility operator 136	Date (M/d/yyyy) 134
J Roeder	James Roeder	12/23/2015

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment
#1	Gasoline	2,000	north	n/a	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☒Vehicle ☐Other:	☐Yes ☒ No
Waste oil (#22 A)	Used oil	550	east	2001	☒Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

Subject: Completion and Recertification of the Revised SPCC to Reflect the two new Tank 9B containments

Dear Mr. Baitx:

The SPCC revision was completed, reviewed and recertified by the PE on September 1, 2015 to reflect the tank 9B containments. Please find attached, as requested, the technical revision page and recertification page of the plan. I also emailed the information earlier.

This completes our activities for the new containments and the SPCC plan revision. If you need additional information, I can be reached at 714.773.7500 ext. 7677 or via email at gmadden@kcc.com. Thank you for your expert assistance.

Sincerely,

Grace Madden

September 2015

1.5 Requirements to Prepare Plan (40 CFR §112.3)

1.5.1 Facilities Operational on or before August 16, 2002 [40 CFR§112.3(a)]

The Facility has been operational since on or before August 16, 2002 and has prepared this Plan to meet and comply with the requirements of 40 CFR 112.

1.5.2 Facilities Operational after July 1, 2009 [40 CFR§112.3(b)]

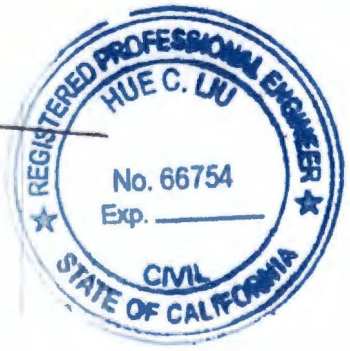
The Facility has been operational since on or before August 16, 2002 and has prepared this Plan to meet and comply with the requirements of 40 CFR 112.

1.5.3 Mobile Facilities [40 CFR§112.3(c)]

This section is not applicable to the Facility.

1.6 Professional Engineer's Certification [40 CFR§112.3(d)]

I, Hue C. Liu, a Licensed Professional Engineer, having reviewed this Spill Prevention Control and Countermeasures Plan (Plan) do hereby certify and attest: that I am familiar with the requirements of 40 CFR Part 112 - Oil Pollution Prevention; that I or my agent have visited and examined the Facility; that the Plan has been prepared in accordance with good engineering practice, including consideration of applicable industry standards, and with the requirements of Part 112; that procedures for required inspections and testing have been established; and that the Plan is adequate for the Facility.



Engineer: Hue C. Liu

Registration Number: C66754

Signature:

State: California

Expiration Date: 9/2016

1.7 Plan Availability for Inspection [40 CFR§112.3(e)]

The Facility may be subject to possible inspections by the EPA's Regional Administrator regarding the measures outlined in this Plan. A complete copy of the Plan, including necessary attachments such as completed forms, records of inspections and/or testing, repairs and/or replacement, and any amendments to the Plan will be maintained on-site for review by the EPA during normal working hours.

Secondary Containment:	Basement Sump
Secondary Containment Capacity (gal):	~5,400 gallons

Tank #8A, Tank #8B, Tank #8C– Building #1	
Type of Failure:	Leaks; excess drippings from use; tipping
Potential Discharge Volume (gal):	<55 gallon per drum
Direction of Uncontained Discharge:	Discharged fluids will accumulate in the spill pallets that the drums are stored atop. Should leak overcome spill pallet, fluids will disperse around the pallet.
Secondary Containment:	Spill Pallets; Building interiors
Secondary Containment Capacity (gal):	>14,000 gallons

Tank #9A – North Gate Fire Pump	
Type of Failure:	Leaks; excess drippings from use
Potential Discharge Volume (gal):	<275 gallon
Direction of Uncontained Discharge:	Leaks or spills from the diesel storage tanks located in the fire pump should collect in the engine frame or disperse within the building interior.
Secondary Containment:	Engine enclosure; building interior
Secondary Containment Capacity (gal):	~650 gallons

MR. KEVIN

Tank #9B – Acacia Fire Pump	
Type of Failure:	Leaks; excess drippings from use
Potential Discharge Volume (gal):	<250 gallon
Direction of Uncontained Discharge:	Leaks or spills from the diesel storage tanks located in the fire pump should collect under the bermed tank containment. The building interior will provide further containment.
Secondary Containment:	Bermed tank containment; building interior
Secondary Containment Capacity (gal):	~ 408 gallons (bermed tank containment) – L (7.08 ft) x W (3.083 ft) x H (2.5 ft) ~ 478 gallons (building interior) – L (16.9 ft) x W(13.4 ft) x H (0.33 ft)

Tank #9C – Emergency Generator – Building #1	
Type of Failure:	Leaks; excess drippings from use
Potential Discharge Volume (gal):	<175 gallon

RECORD OF AMENDMENTS
Log of Revisions to Plan

In accordance with 40 CFR§112.5(a), the Plan must be amended when there is a change in the Facility design, construction, operation, or maintenance that materially affects its potential for a discharge as described in 40 CFR§112.1(b). Any amendments must be implemented as soon as possible but no later than six months.

Subject: Update on the Acacia Fire Pump SPCC Tank 9B containments have been completed on August 20 and August 26, 2015

Dear Mr. Baitx:

We completed installing two containments for Tank 9B. The "under the tank" containment was completed on August 20. The new "under the tank" concrete containment provides approximately 165% containment for the 250 gallon tank. Please refer to picture 1. The second containment spans the entire room's interior perimeter including the two doorways. The new room containment is approximately four inches deep and five inches high and it spans the entire room's dimensions: 16.9 feet x 13.4 feet = 226.46 square feet. It provides an approximate containment of 478 gallons or 191% containment. Please refer to pictures 2 through 5. The containment berm will be painted to enhance visibility and to prevent tripping hazards.

We will send you a copy of the SPCC once the technical correction is reviewed and approved by the SPCC engineer. If you need additional information, I can be reached at 714.773.7500 ext. 7677 or via email at gmadden@kcc.com. Thank you for your expert assistance.

2.6 Types of Oil [40 CFR§112.7(a)(3)(i)]

2.6.1 Summary of Containers

In addition to the facility plot diagram provided, the Facility is required to indicate the type of oil stored on-site and the corresponding container information and storage capacity for each oil. The following table provides a complete list of all the oil storage containers with the capacity of 55 U.S. gallons or more, unless otherwise exempt from the rule.

Table 2-1 Types of Oils and Containers

TANK NUMBER	LOCATION	CONTAINER CONTENTS	CONTAINER CAPACITY (GAL)	NUMBER OF CONTAINERS	SECONDARY CONTAINMENT	CONTAINER CONSTRUCTION
1	Bldg. #8 Lift Room	Mineral Oil	275 (Plastic Tote)	1	Interior of Building	Plastic
2	Bldg. #8 Lift Room	Mineral Oil	275 (Metal Tank)	1	Interior of Building	Stainless Steel
3	Bldg. #3 - TC Oiler Area	Gear/Lube Oils	275 (55-Gal Drums)	5	Spill Pallets	Steel Drums
4	Building #3 - TC Oiler Area	Gear/Lube Oils	55	1	Spill Pallet	Steel Drum
5A	Building #3 - Compressor Room	Gear/Compressor Oils	165 (55-Gal Drums)	3	Spill Pallets	Steel Drums
5B	Building #10 - Tractor Area	Gear/Compressor Oils	220 (55-Gal Drums)	4	Spill Pallet	Steel Drum
6	Building #1 – Basement	Lube/Mineral Oils	275 (55-Gal Drums)	5	Spill Pallets	Steel Drums
7 (A,B,C, D,E,F)	Bldg. #1 – Basement Bowsers	Hydraulic Oil / Lube Oil	4,251 (5-800-Gal Tanks; 1-251-Gal Tank)	5	Basement Interior	Steel Tanks
8A	Building #1 TM Oiler Area	Lube Oil	330 (55-Gal Drums)	6	Spill Pallets; Building Interior	Steel Drums

Type of Failure.	Leaks; excess drippings from use; tipping
Potential Discharge Volume (gal):	<55 gallon per drum
Direction of Uncontained Discharge.	Discharged fluids will accumulate in the spill pallets that the drums are stored atop. Should leak overcome spill pallet, fluids will disperse around the pallet
Secondary Containment.	Spill Pallets; Building interiors
Secondary Containment Capacity (gal).	>14,000 gallons

Tank #9A – North Gate Fire Pump	
Type of Failure·	Leaks; excess drippings from use
Potential Discharge Volume (gal):	<275 gallon
Direction of Uncontained Discharge·	Leaks or spills from the diesel storage tanks located in the fire pump should collect in the engine frame or disperse within the building interior.
Secondary Containment:	Engine enclosure; building interior
Secondary Containment Capacity (gal):	~650 gallons

Tank #9B – Acacia Fire Pump	
Type of Failure.	Leaks; excess drippings from use
Potential Discharge Volume (gal).	<250 gallon
Direction of Uncontained Discharge:	Leaks or spills from the diesel storage tanks located in the fire pump should collect under the bermed tank containment The building interior will provide further containment
Secondary Containment:	Bermed tank containment, building interior
Secondary Containment Capacity (gal)·	~ 408 gallons (bermed tank containment) – L (7.08 ft) x W (3 083 ft) x H (2.5 ft) ~ 478 gallons (building interior) – L (16 9 ft) x W(13 4 ft) x H (0 33 ft)

MR. KEVIN

Tank #9C – Emergency Generator – Building #1	
Type of Failure:	Leaks; excess drippings from use
Potential Discharge Volume (gal)·	<175 gallon

RECORD OF AMENDMENTS
Log of Revisions to Plan

In accordance with 40 CFR§112.5(a), the Plan must be amended when there is a change in the Facility design, construction, operation, or maintenance that materially affects its potential for a discharge as described in 40 CFR§112.1(b). Any amendments must be implemented as soon as possible but no later than six months.

I391 - Tech amendments have been certified when there has been a change in facility design/operations
Technical amendments to the SPCC have been certified when there has been a change in facility design, construction, operation or maintenance that may affect its potential for a discharge. (40 CFR 112.6(a)(2)) 40 CFR 112.6(a)(2) HSC 6.67 25270.4.5(a)
The "tank 9B" has been secondarily contained. The SPCC now needs a "technical amendment" to address this change. Once the PE has reviewed and approved the amendment, please send a copy of the amendment page to this Agency in order to abate the violation.

The "tank 9B" has been secondarily contained. Abate violation # I192 listed on the 8-7-15 inspection report.

See violations for the need of a "technical amendment". Please correct on/before 10-1-15.

I declare that I have examined and received a copy of this inspection report.

Subject: Update on the Acacia Fire Pump SPCC Tank 9B containments have been completed on August 20 and August 26, 2015

Dear Mr. Baitx:

We completed installing two containments for Tank 9B. The "under the tank" containment was completed on August 20. The new "under the tank" concrete containment provides approximately 165% containment for the 250 gallon tank. Please refer to picture 1. The second containment spans the entire room's interior perimeter including the two doorways. The new room containment is approximately four inches deep and five inches high and it spans the entire room's dimensions: 16.9 feet x 13.4 feet = 226.46 square feet. It provides an approximate containment of 478 gallons or 191% containment. Please refer to pictures 2 through 5. The containment berm will be painted to enhance visibility and to prevent tripping hazards.

We will send you a copy of the SPCC once the technical correction is reviewed and approved by the SPCC engineer. If you need additional information, I can be reached at 714.773.7500 ext. 7677 or via email at gmadden@kcc.com. Thank you for your expert assistance.

Sincerely,

Grace Madden

THE ITEMS NOTED BELOW WERE OBSERVED DURING COURSE OF THE SITE VISIT. ANY VIOLATIONS OBSERVED MUST BE CORRECTED

I192 - Adequate secondary containment provided and maintained Failure to provide and maintain adequate secondary containment. 40 CFR 112.8(c)(2); HSC 6.67 25270.4.5(a)
The AST located in the "Acacia fire pump room" (tank 9B) is listed on the SPCC as a single walled tank with the room as the secondary containment. The on site review showed that the fire room does not meet secondary containment and it could not be determined if the AST was single or double walled. A review of the 9-2012 tank integrity testing lists this AST as single walled.

If the AST is in fact single walled and the SPCC claims the building as secondary containment, which it is not, the tank will have to be secondarily contained (tank or building) and have a "technical amendment" to the SPCC by the SPCC PE. If, in fact the AST is double walled, submit verification in order to abate the violation.

On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Permission to inspect granted by Kimberly Clark/Madden.

The facility has the following regulated petroleum tanks/containers:

~ 275 gallon totes (buildings as secondary containment, visual Overfill Prevention (OFP).
~55 gallon drums (building or pallets as secondary containment).
(5) 850 gallon ASTs (basement as secondary containment).
(1) 175 gallon generator (building as secondary containment, visual OFP).
(1) 1,100 gallon lube oil in the CoGen plant, berm as secondary containment.
(3) fire pump generators, DWT.

Approximate total of 13,006 gallons.

The SPCC was on site and available for review.

The SPCC was written 9-2012 and is due to revalidation by 9-2017.

The SPCC was singed by a PE.

Annual training reports OK. Training program includes SPCC specific items.

Most of the tanks/totes/drums were secondarily contained by pallets or the buildings.

See violations for the "Acacia fire pump" AST. Have this violation abated on/before 9-7-15.

I declare that I have examined and received a copy of this inspection report.

Received E-mail from Kimberly/Madden. The AST in question (Acacia fire pump) was reviewed by a tank tester and is single walled. They have put a temporary secondary drip pan and will start true secondary containment (bermed floor) on 8-17-15.

Please notify this Agency once the construction is completed. Be sure to have your SPCC/PE sign off that this new secondary containment is a "technical amendment" and is approved.

I declare that I have examined and received a copy of this inspection report.

Subject: Kimberly-Clark Acacia Fire Pump Tank Verification / Inspection will be performed on August 13, 2015
Attachments: AcaciaFirePump:Pls.installtemp.cont: Notification 506876200 saved

Sensitivity: Confidential

Hi Mr. Kevin,

The August 13 inspection confirmed that the tank is a Single-lined tank. I will forward the report as soon as it is received.

Based on this information, we are proposing to:

1. Install a secondary containment underneath the tank. The project will start on Aug 17. The tank containment will be a concrete berm that will get coated. The uncoated berm should be completed by Aug. 20. However, the poured concrete needs to cure to 4% moisture (7-10 days) before a coating can be installed. The coating is projected to be installed around Sept. 2. I will update you on our progress.
2. Install a containment berm around the perimeter wall. The quote will be issued on Aug 17. I will update you on our progress.
3. In the interim, a temporary containment will be installed by the Fire Chief tomorrow, August 15.
4. I also left a voicemail earlier.
5. Please advise if the above is acceptable to you. Thank you. Have a great weekend!

Sincerely,

Grace Madden

Business Owner/Operator Identification

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information.) Please number all pages of your submittal. This helps Unified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at www.dnb.com.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.

137. TITLE OF SIGNER - Enter the title of the person signing the page.

UNIFIED PROGRAM CONSOLIDATED FORM
FACILITY INFORMATION
BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # (Agency Use Only) 3 0	1	EPA ID # (Hazardous Waste Only) CAD009547373	2
BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) Kimberly-Clark Worldwide Inc., Fullerton	3		
BUSINESS SITE ADDRESS 2001 E. Orangethorpe Ave.,	103		
BUSINESS SITE CITY Fullerton	104	CA ZIP CODE 92831	105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility				If Yes, please complete these pages of the UPCF
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	☐ NO	4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☒ YES	☐ NO	4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	☒ NO	5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☒ YES	☐ NO	8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	☐ NO	9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	☒ NO	10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	☒ NO	11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	☒ NO	12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	☒ NO	13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	☒ NO	14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	☒ NO	14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	☒ NO	14b	See CUPA for required forms.
F. LOCAL REQUIREMENTS (You may also be required to provide additional information by your CUPA or local agency.)			15	

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters □CA□. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms □Facility Name□ or □DBA - Doing Business As□ that might have been used in the past.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

4. HAZARDOUS MATERIALS –

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer □YES□ to this question if you exceed only a local threshold, but do not exceed the state threshold.

4a. REGULATED SUBSTANCES – Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) □25316. If □YES□, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.

8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC □25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC □25270.2 (k)) is not subject to this act and is exempt:

- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.

9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC □25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.

10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC □25143.2. Check □YES□ and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check □NO□ if you only send recyclable materials to an offsite recycler. You do not need to report.

11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of □treatment□ for certain processes under specific, limited conditions. Refer to HSC □25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC □25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.

12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR □67450.13 (b) and HSC □25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.

13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer □YES□ if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC □25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.

14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Inability to remove hazardous materials stored in the tank.
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.

If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

IV. Signature

I certify under penalty of law that the information submitted is accurate and complete to the best of my knowledge.

Signature of owner or tank facility operator	Printed name of owner or tank facility operator 136	Date (M/d/yyyy) 134
Deb Gravely	Deborah A. Gravely	12/30/2014

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment
#1	**Gasoline**	**2,000**	north	**n/a**	☐Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☒Vehicle ☐Other:	☐Yes ☒ No
Waste oil (#22 A)	**Used oil**	**550**	east	**2001**	☒Steel ☐Fiberglass/Plastic ☐Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No
Atf	**Automatic transmission fluid**	**220**	west	**n/a**	☐Steel ☐Fiberglass/Plastic ☒Drum(s) ☐Generator ☐Vehicle ☐Other:	☒Yes ☐ No

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

Business Owner/Operator Identification

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information.) Please number all pages of your submittal. This helps Unified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at www.dnb.com.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

    SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.
137. TITLE OF SIGNER - Enter the title of the person signing the page.

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

IV. Signature

I certify under penalty of law that the information submitted is accurate and complete to the best of my knowledge.

Signature of owner or tank facility operator	Printed name of owner or tank facility operator 136	Date (M/d/yyyy) 134
	F. Vicino for Richard J.Tucker	12/27/2013

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

UNIFIED PROGRAM CONSOLIDATED FORM

FACILITY INFORMATION

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # (Agency Use Only)	3	0												1	EPA ID # (Hazardous Waste Only) CAD009547373	2

BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) Kimberly-Clark Worldwide Inc., Fullerton 3

BUSINESS SITE ADDRESS 2001 E. Orangethorpe Ave., 103

BUSINESS SITE CITY Fullerton 104 | CA | ZIP CODE 92831 105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility				If Yes, please complete these pages of the UPCF
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	☐ NO	4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☒ YES	☐ NO	4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	☒ NO	5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☒ YES	☐ NO	8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	☐ NO	9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	☒ NO	10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	☒ NO	11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	☒ NO	12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	☒ NO	13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	☒ NO	14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	☒ NO	14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	☒ NO	14b	See CUPA for required forms.

F. LOCAL REQUIREMENTS 15

(You may also be required to provide additional information by your CUPA or local agency.)

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters □CA□. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms □Facility Name□ or □DBA - Doing Business As□ that might have been used in the past.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

4. HAZARDOUS MATERIALS –

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer □YES□ to this question if you exceed only a local threshold, but do not exceed the state threshold.

4a. REGULATED SUBSTANCES – Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) □25316. If □YES□, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.

8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC □25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC □25270.2 (k)) is not subject to this act and is exempt:

- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.

9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC □25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.

10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC □25143.2. Check □YES□ and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check □NO□ if you only send recyclable materials to an offsite recycler. You do not need to report.

11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of □treatment□ for certain processes under specific, limited conditions. Refer to HSC □25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC □25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.

12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR □67450.13 (b) and HSC □25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.

13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer □YES□ if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC □25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.

14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Inability to remove hazardous materials stored in the tank.
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.

If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Prog[illegible]Consolidated Form (UPCF) pages. These data element numbers [illegible]sed for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal [illegible]ormation.) Please number all pages of your submittal. This he[illegible]nified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at www.dnb.com.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

    SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.
137. TITLE OF SIGNER - Enter the title of the person signing the page.

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the [illegible] business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the [redacted]g business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

I certify under penalty of law that the information submitted is accurate and complete to the best of my knowledge.

Signature of owner or tank facility operator	Printed name of owner or tank facility operator (136)	Date (M/d/yyyy) (134)
	F. Vicino for Richard J.Tucker	12/26/2012

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the [illegible]g business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

BUSINESS SITE CITY Fullerton 104 | CA | ZIP CODE 92831 105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility				If Yes, please complete these pages of the UPCF
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	☐ NO	4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☒ YES	☐ NO	4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	☒ NO	5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☒ YES	☐ NO	8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	☐ NO	9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	☒ NO	10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	☒ NO	11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	☒ NO	12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	☒ NO	13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	☒ NO	14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	☒ NO	14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	☒ NO	14b	See CUPA for required forms.

F. LOCAL REQUIREMENTS 15

(You may also be required to provide additional information by your CUPA or local agency.)

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters □CA□. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms □Facility Name□ or □DBA - Doing Business As□ that might have been used in the past.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

4. HAZARDOUS MATERIALS –

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer □YES□ to this question if you exceed only a local threshold, but do not exceed the state threshold.

4a. REGULATED SUBSTANCES – Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) □25316. If □YES□, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.

8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC □25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC □25270.2 (k)) is not subject to this act and is exempt:

- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.

9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC □25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.

10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC □25143.2. Check □YES□ and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check □NO□ if you only send recyclable materials to an offsite recycler. You do not need to report.

11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of □treatment□ for certain processes under specific, limited conditions. Refer to HSC □25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC □25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.

12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR □67450.13 (b) and HSC □25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.

13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer □YES□ if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC □25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.

14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Inability to remove hazardous materials stored in the tank.
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.

If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

Subject **: Kimberly-Clark Fullerton Mill SPCC Integrity Testing for metal, fuel tanks (2 fire pumps and 1 emergency generator) was completed on 31 October 2012**

Dear Mr. Baitx:

Please find attached for your review the tank integrity testing data for the two fire pump tanks and one emergency generator tank. Dennis D. Rock and Dana Rock of Dennis D. Rock Construction and First Alert performed the testing on October 31, 2012.

If you have any questions or need additional information, I can be reached at tel.: 714.773.7500 or via email at gmadden@kcc.com . Thank you for your expert assistance.

Sincerely,

GMadden

THE ITEMS NOTED BELOW WERE OBSERVED DURING COURSE OF THE SITE VISIT. ANY VIOLATIONS OBSERVED MUST BE CORRECTED

AT50 - FACILITY Failed to: test each aboveground container for integrity on a regular schedule or when repairs were made; inspect containers and container supports; or keep records of inspections and tests, or provide equivalence as allowed by CFR 112.7(a)(2) (Code of Fed Regulations 112.8(c)(6))
The SPCC states that the metal, fuel tanks (2 fire pump diesel ASTs and 1 diesel emergency generator) are to be integrity tested every 10 years. There were no records of such testing. Either locate the date when these diesel tanks were installed (if less than 10 years ago) or submit tank integrity testing data in order to meet this SPCC requirement. Please submit the information to this Agency by 1-2-13 for review.

COMMENTS

ZZZ9 - INSPECTOR COMMENTS
On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. SPCC was on site and available for review:

SPCC was conducted on 9-2010 and is due for recertification by 9-2015.

PE certified. Discussed the 2015 recertification and need/no need for PE (based on any changes to the SPCC).

The tanks subject to SPCC are in the following groups:

55 gallon drums (~100 drums throughout the facility).
Hydraulic oil tanks associated with machines (Oil Filled Operational Equipment = OFOE). ~5.
Oil totes ~10.
Diesel ASTs ~ 3.

All tanks have secondary containment via berms, true secondary containment or use the "building" as secondary containment (calculations completed).

The emergency contact list was complete but incorrectly listed the Orange County Fire Authority as the local fire agency. This was corrected to the Fullerton Fire Department during the inspection.

Spill kits throughout the facility to meet general secondary containment for loading areas and OFOE.

Facility conducts daily visual inspections of the tanks and monthly inspections of the drums. Records reviewed.

Annual training, reviewed.

The SPCC has a rainwater evaluation/release log. It is not used since no rainwater is released to the storm drain. All on site water (and any oil if released) is plumbed to the water plant for recycling.

The entire facility has a storm water low point in the NE corner of the site. It has a locked valve.

UNIFIED PROGRAM CONSOLIDATED FORM

FACILITY INFORMATION

BUSINESS ACTIVITIES

I. FACILITY IDENTIFICATION

FACILITY ID # (Agency Use Only) 3 0	1	EPA ID # (Hazardous Waste Only) CAD009547373	2
BUSINESS NAME (Same as Facility Name of DBA-Doing Business As) Kimberly-Clark Worldwide Inc., Fullerton	3		
BUSINESS SITE ADDRESS 2001 E. Orangethorpe Ave.,	103		
BUSINESS SITE CITY Fullerton	104	CA ZIP CODE 92831	105

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page.

Does your facility				If Yes, please complete these pages of the UPCF
A. HAZARDOUS MATERIALS Have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES	☐ NO	4	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION
B. REGULATED SUBSTANCES Have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	☒ YES	☐ NO	4a	Coordinate with your local agency responsible for CalARP.
C. UNDERGROUND STORAGE TANKS (USTs) Own or operate underground storage tanks?	☐ YES	☒ NO	5	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
D. ABOVE GROUND PETROLEUM STORAGE Own or operate ASTs above these thresholds: Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	☒ YES	☐ NO	8	NO FORM REQUIRED TO CUPAs
E. HAZARDOUS WASTE Generate hazardous waste?	☒ YES	☐ NO	9	EPA ID NUMBER – provide at the top of this page
Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	☐ YES	☒ NO	10	RECYCLABLE MATERIALS REPORT (one per recycler)
Treat hazardous waste on-site?	☐ YES	☒ NO	11	ON-SITE HAZARDOUS WASTE TREATMENT – FACILITY ON-SITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit)
Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES	☒ NO	12	CERTIFICATION OF FINANCIAL ASSURANCE
Consolidate hazardous waste generated at a remote site?	☐ YES	☒ NO	13	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION
Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	☐ YES	☒ NO	14	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION
Generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	☐ YES	☒ NO	14a	Obtain federal EPA ID Number, file Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA Large Quantity Generator.
Household Hazardous Waste (HHW) Collection site?	☐ YES	☒ NO	14b	See CUPA for required forms.

F. LOCAL REQUIREMENTS 15

(You may also be required to provide additional information by your CUPA or local agency.)

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all submissions. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information). Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER - Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) or Administering Agency (AA). This is the unique number which identifies your facility.
2. EPA ID NUMBER - If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters □CA□. If you do not have a number, contact the Department of Toxic Substances Control (DTSC) Telephone Information Center at (916) 324-1781, (800) - 61-TOXIC or (800) 61-86942, to obtain one.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms □Facility Name□ or □DBA - Doing Business As□ that might have been used in the past.

103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.

104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.

105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.

4. HAZARDOUS MATERIALS –

Check the box to indicate whether you have a hazardous material onsite. You have a hazardous material onsite if:

- It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of compressed gas (calculated at standard temperature and pressure),
- It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
- Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have a hazardous material onsite, then you must complete the Business Owner/Operator Identification page and the Hazardous Materials Inventory - Chemical Description page, as well as an Emergency Response Plan and Training Plan.

Do not answer □YES□ to this question if you exceed only a local threshold, but do not exceed the state threshold.

4a. REGULATED SUBSTANCES – Refer to 19 CCR 2770.5 for regulated substances. Check the box to indicate whether your facility has CalARP regulated substances stored onsite.

5. OWN OR OPERATE UNDERGROUND STORAGE TANK (UST) - Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) 25316. If □YES□, then you must complete one UST Facility page and UST Tank pages for each tank. You must also submit a plot plan and a monitoring program plan.

8. OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK OR CONTAINER - Check the appropriate box to indicate whether there are ASTs onsite which exceed the regulatory thresholds. (There is no UPCF page for ASTs.) This program applies to all facilities storing petroleum in aboveground tanks. Petroleum means crude oil, or any fraction thereof, which is liquid at 60 degrees Fahrenheit temperature and 14.7 pounds per square inch absolute pressure (HSC 25270.2 (g)). The facility must have a cumulative storage capacity greater than 1,320 gallons for all ASTs. NOT Subject to the Act (exemptions):

An aboveground petroleum storage tank (AST) facility with one or more of the following (see HSC 25270.2 (k)) is not subject to this act and is exempt:

- A pressure vessel or boiler which is subject to Division 5 of the Labor Code,
- A storage tank containing hazardous waste if a hazardous waste facility permit has been issued for the storage tank by DTSC,
- An aboveground oil production tank which is regulated by the Division of Oil and Gas,
- Certain oil-filled electrical equipment including but not limited to transformers, circuit breakers, or capacitors.

9. HAZARDOUS WASTE GENERATOR - Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA Identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC 25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, the term "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.

10. RECYCLE - Check the appropriate box to indicate whether you recycle more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC 25143.2. Check □YES□ and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check □NO□ if you only send recyclable materials to an offsite recycler. You do not need to report.

11. ONSITE HAZARDOUS WASTE TREATMENT - Check the appropriate box to indicate whether your facility engages in onsite treatment of hazardous waste. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of □treatment□ for certain processes under specific, limited conditions. Refer to HSC 25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC 25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility engages in onsite treatment of hazardous waste then complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages with waste and treatment process information for each unit.

12. FINANCIAL ASSURANCE - Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR 67450.13 (b) and HSC 25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.

13. REMOTE WASTE CONSOLIDATION SITE - Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer □YES□ if you are a hazardous waste generator that collects hazardous waste initially at remote sites and subsequently transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC 25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.

14. HAZARDOUS WASTE TANK CLOSURE - Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on:

- Your knowledge of the tank and its contents
- Testing of the tank
- Inability to remove hazardous materials stored in the tank.
- The mixture rule
- The listed wastes in 40 CFR 261.31 or 40 CFR 261.32.

If the tank being closed would be classified as hazardous waste after its contents are removed, then you must complete the Hazardous Waste Tank Closure Certification page.

14a. RCRA LQG - Check the appropriate box to indicate whether your facility is a Large Quantity Generator. If YES, you must have or obtain a US EPA ID Number.

14b. HOUSEHOLD HAZARDOUS WASTE COLLECTION - Check the appropriate box to indicate whether your facility is a HHW Collection site.

15. LOCAL REQUIREMENTS - Some CUPAs or AAs may require additional information. Check with your CUPA before submitting the UPCF to determine if any supplemental information is required.

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

922 Tank/Container ID# (e.g. 1, 2, etc.)	923 Contents (Gas, Diesel, etc.)	924 Capacity In gallons	925 Location of Tank/Container	926 Year Installed	927 Tank type:	928 Secondary Containment

Aboveground Storage Tank Facility Statement

3. FACILITY NAME - Enter the doing business as name.
103. FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to locate the facility geographically.
104. CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
105. ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from Facility Name.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business address. The extra 4 digit zip may also be added.
117a. CONTACT NAME - Enter the name of the person, who receives Aboveground Storage Tank correspondence.
118a. CONTACT PHONE - Enter the phone number, area code first, and any extension.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
119a CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
920. DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention Control and Countermeasure (SPCC) plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at http://www.epa.gov/oilspill/spcc.htm. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site.
921 TOTAL FACILITY CAPACITY – Enter the facility's total petroleum aboveground storage tank/container capacity (in gallons). Aboveground storage tank means a tank/container that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground.
922 TANK/CONTAINER ID# - Enter a unique tank/container identification number. You may create your own numbering or naming system.
923. CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, OIL, etc.) of the aboveground petroleum storage tank/container.
924. CAPACITY – Enter the aboveground storage tank/container's capacity (in gallons). For drums with identical contents enter the aggregate total for all drums (e.g. 4 X 55 gallon drums= 220 gallons)
925 TANK/CONTAINER LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank/container at your facility.
926 YEAR INSTALLED – Enter the year the aboveground storage tank/container was installed.
927. TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank.
928. SECONDARY CONTAINMENT – Check the appropriate box if the tank/container has secondary containment.
APPLICANT SIGNATURE – The application form must be signed, in the space provided
136. APPLICANT NAME – Print or type the full name of the person signing the form.
134. DATE – Enter the date (M/d/yyyy) the form was signed.

EXAMPLE:

Business Owner/Operator Identification

Please submit the Business Activities page, the Business Owner/Operator Identification page, and Hazardous Materials Inventory - Chemical Description pages for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual. (Note: the numbering of the instructions follows the data element numbers that are on the Unified Program Consolidated Form (UPCF) pages. These data element numbers are used for electronic submission and are the same as the numbering used in Division 3, Electronic Submittal of Information.) Please number all pages of your submittal. This helps Unified Program Agency (UPA) identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER – Leave this blank. This number is assigned by the UPA. This is the unique number which identifies your facility.
3. BUSINESS NAME - Enter the doing business as name.
100. BEGINNING DATE - Enter the beginning year and date of the report. (YYYYMMDD)
101. ENDING DATE - Enter the ending year and date of the report. (YYYYMMDD)
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
102a. BUSINESS FAX – Enter the business fax number, area code first.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
104. BUSINESS SITE CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4 digit zip may also be added.
106. DUN & BRADSTREET – If subject to EPCRA, enter the Dun & Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 882-7748 or on the web at www.dnb.com.
107. SIC NUMBER - Enter the primary Standard Industrial Classification System Number. Required for EPCRA.
107a. NAICS NUMBER - Enter the primary North American Industrial Classification System Number.
108. COUNTY - Enter the county in which the business site is located.
108a. BUSINESS MAILING ADDRESS – Enter the mailing address to be used for all official business correspondence. This mailing address must be filled in.
108b. BUSINESS MAILING CITY - Enter the name of the city for the business mailing address.
108c. STATE - Enter the two character abbreviation of the state for the business mailing address.
108d. ZIP CODE - Enter the zip code for the business mailing address. The extra 4 digit zip may also be added.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. BUSINESS OWNER NAME - Enter name of business owner, if different from business operator.
112. BUSINESS OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address, if different from business mailing address.
114. BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address, if different from business mailing address.
115. BUSINESS OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address, if different from business mailing address.
116. BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address, if different from business mailing address. The extra 4 digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, who receives all environmental correspondence.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, for the environmental contact, area code first, and any extension.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
119a. CONTACT EMAIL – Enter the email address of the environmental contact in 117, if the contact has one.
120. CONTACT MAILING CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4 digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative to be contacted in case there is an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for UPA to collect any additional information necessary to meet the requirements of their individual programs. Contact UPA for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

    SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the signer's belief that the submitted information is true, accurate and complete.
137. TITLE OF SIGNER - Enter the title of the person signing the page.

COPY MAILED TO OWNER
AND/OR
FACILITY OPERATOR

The Orange County Certified Unified Program Agency (OCHCA) has received your facility's Aboveground Petroleum Storage Tank Facility Statement. The documents submitted are administratively complete.

The following corrections were made to the forms:

1) The "Total Facility Capacity" in gallons was added to Section II (block 921). A copy of this corrected form is attached to this inspection for your records.

OCHCA plans to conduct an inspection at your facility to verify this information before December 31, 2010.

A spill prevention control and counter measure plan (SPCC) must be developed for the aboveground storage at your facility. For more information on the SPCC please visit http://www.calepa.ca.gov/CUPA/Aboveground/FactSheetSPCC.pdf.

The current deadline for the preparation and implementation of SPCC plans is July 1, 2009. This deadline is expected to be moved back to November 20, 2009.

--Facilities with less than 10,000 gallons of petroleum storage on-site and no one single container more than 5,000 gallons can complete and self certify an SPCC template which can be found at http://www.epa.gov/fedrgstr/EPA-WASTE/2008/December/Day-05/f28159.pdf (appendix G).

--Facilities with less than 10,000 gallons on-site and have individual containers more than 5,000 gallons can prepare and self certify SPCC in accordance with 40 CFR 112.6, 112.7 and subpart B.

--Facilities with greater than 10,000 gallons of petroleum storage on-site are required to prepare an SPCC and have a Professional Engineer certify the plan.

COPY MAILED TO OWNER
AND/OR
FACILITY OPERATOR

I declare that I have examined and received a copy of this inspection report.

Fullerton, CA 92634

Dear Mr. Cordell:

KIMBERLY CLARK CORPORATION, ANAHEIM, CALIFORNIA (EPA ID NO. CAD009547373)

A review of our file for your hazardous waste storage facility indicates the following:

1. An Interim Status Document was issued to you on March 30, 1981.

2. You submitted a Closure Plan on January 12, 1983 and implemented it in 1983.

3. An inspection conducted by the Department of Health Services (DHS) on November 14, 1988, confirmed that you are not engaged in any storage, treatment, or disposal on site activities.

Based on the above information, DHS now considers you as a closed hazardous waste facility. You will no longer be regulated as a treatment, storage and disposal facility, but as a generator of hazardous wastes subject to all generator requirements for management of hazardous wastes.

Should you have any questions on this matter, please contact Elizabeth Gonzalez at (213) 590-4907.

Sincerely,

Mohinder S. Sandhu, P.E., Chief

INTERIM PERMIT
TO OPERATE UNDERGROUND STORAGE TANKS

PERMIT NUMBER:	TANK COUNT AT THIS FACILITY:	ISSUANCE DATE:	EXPIRATION DATE:
4640	6	18 APR 1986	01 SEP 1986

FACILITY	OWNER	OPERATOR
KIMBERLY CLARK CORP 2001 E ORANGETHORPE AV FULLERTON, 92634		

THIS IS AN INTERIM PERMIT TO OPERATE

You have selected monitoring alternative #8.

Interm Monitoring (Tank Testing and Inventory Reconciliation or Tank Gauging)

The following must be submitted to this office:

A.) Documentation (ie certified copy) that a Precision test (per NFPA 329) has been performed or the tank indicating a leak rate of less than .05 gallons per hour per tank.

B.) A copy of the inventory reconciliation and excess variation procedures that are to be implemented at this facility. These procedures must conform to the requirements of Section 2644, Subchapter 16, Title 23, California Administrative Code.

C.) A copy of the method to be utilized for gauging the tank(s) and the procedures that are to be followed when an excess variation occurs.

D.) One of the following:

1.) For Small Business (as defined in Subsection 11342(e) of the Government Code) or Non-profit Organizations - A statement provided by the owner that sufficient funds will be available to close the tank or to implement an approved monitoring alternative prior to August 12, 1988; or

2.) All Underground Tank Owners. A written statement indicating that the underground storage tank will be closed or replaced with a new underground storage tanks by September 1, 1989; or

3.) Governmental Agencies. Written documentation that, due to budgetory constraints, the governmental agency needs additional time to close or replace the underground storage tank or implement an approved monitoring alternative.

All of the above material must be submitted to this office prior to September 1, 1986.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**Yes**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**Yes**

Additional Information

No additional comments provided.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**No**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**No**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**No**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

1.0 INTRODUCTION

This report presents the results of a subsurface investigation for the tank farm of Kimberly Clark Plant located at 2001 E. Orangethrope Ave., Fullerton, CA (see Figure 1), conducted by Western Environmental Engineers Company (WEECO) on December 15 & 16, 1997. This site investigation was completed at the request of Ms. Grace Madden.

The purpose of this site investigation was to gather detailed information about the contaminants in the existing tank farm area which are used to store Sodium Hypochlorite (NaOCl), and to determine the contaminants existing on site and to approximate the volume of the contaminants plumes. From this information, a preliminary cost estimate to remediate this site, if necessary, could be provided to the owner. This Environmental Site Investigation report contains a brief history of the existing site characteristics, sample collection procedures, analytical results, conclusions and recommendations.

2.0 BACKGROUND

Kimberly-Clark Company has a factory at 2001 E. Orangethrope Avenue in City of Fullerton, California. Figure (2) show the layout of the factory located in City of Fullerton. There is a tank farm on the east site of the factory as indicated in Figure (2). Tank farm has five tanks as described below:

- Tank No.1 - destroyed
- Tank No.2 - exsiting
- Tank No.3 - existing
- Tank No. 4 - existing
- Tank No.5 - existing

On September 29 and October 6, 1997, ten (10) borings were drilled by *Western Environmental Engineers Company* in order to detect any contamination associated with the Sodium Hypochlorite (NaOCl). At that time, *Western Environmental Engineers Company* found that **Sodium Hypochlorite (NaOCl)** contamination has been detected in the subsurface soils in the vicinity of the tank farm area. They submitted the "Preliminary Phase II Site Assessment Report" to Ms. Grace Madden.

In response to *WEECO's* "Preliminary Site Assessment Report" dated October 20, 1997, Ms. Grace Madden was requested to perform additional work.

A summary of laboratory analysis collected to date (September 29 and October 6, 1997) is depicted in Table 1

3.0 GEOLOGY AND DEPTH TO GROUNDWATER

A. *GEOLOGY*

The project site is located in the Fullerton area of the central basin comprised of alluvium and associated deposit of recent Pleistocene age. Jefferson Aquifer, which is the second aquifer in downward succession within the San Pedro Formation, extends over most of the Central Basin, although it is not known to reach the surface. Within the boundaries of the aquifer, some irregular areas exist where the aquifer has not been identified. The Jefferson Aquifer occurs in sinuous courses extending from both Los Angels and Whittier Narrow into Orange County. Lithologically, the sediments comprising this aquifer (based on drilling logs of water wells in the area) are for the most part, fine-grained. Gravels are most extensive in the Whittier Narrows area but also occur in scattered patches throughout the rest of the Central Basin. The reminder of the aquifer consists primarily of sand with some gravely and clayey lenses.

The thickness of the aquifer varies from a few feet to maximum of 140-feet along the Los Alamitos Fault. This aquifer is considerably folded and its base varies in elevation from 700-feet below sea level to 50-feet above sea level.

Artificial recharge within the Whittier Narrows has some effect on this aquifer. Since less than 10% of the wells in the Central Basin are perforated in this horizon and then only in the areas where coarse sandy and gravel zones are encountered, it is generally not considered an important water producing aquifer.

The movement of groundwater across the Los Angeles and Orange County line is entirely dependent on the hydraulic gradient in the area since no physical barrier to groundwater movement exists. Due to the continuity of the hydraulic gradient which slopes in the southerly direction, the general direction of the groundwater in the confined Central Basin is from the north to the south. Groundwater conditions in the overlying shallow semi-perched aquifer do not necessarily follow this trend.

B. GROUNDWATER LEVEL

The depth to groundwater at the subject site area was obtained by contacting the Orange County Water District Water Quality Department. The depth to groundwater in the subject site is approximately within 110 - 130 feet below the surface as depicted by the neighborhood well technical data. It is believed that the direction of the groundwater in the vicinity is from the north to the south.

4.0 SUBSURFACE EXPLORATION

4.1 RATIONALE FOR THE SAMPLING LOCATIONS

On December 15 & 16, 1997, four (4) borings were drilled from the surface to forty (40) feet, as indicated on the Facility Map (Figure 2). Bulk samples were obtained at ten (10) feet intervals, and tube samples were taken every ten (10) feet. Boring locations were selected in order to further define the vertical and horizontal extent of the subsurface contamination. The borings were drilled at four (4) locations adjacent to the previous Sodium Hypochlorite (NaOCl) contaminated area.

4.2 SOIL DRILLING AND SAMPLING

On December 15 & 16, 1997, a total of thirteen (13) soil samples were collected from the four (4) borings (labeled B-3, B-6, B-7, and TK-1). A B-47 drill rig was used, which was equipped with 3-inch diameter hollow-stem augers, and sampled by a California Split Spoon sampler. Maximum depth of borings ranged up to 40 feet below the surface. Groundwater was not encountered at the time of drilling. Tube soil samples were taken at B-3-20, B-3-30 & B-3-40, B-6-20, B-6-30 & B-6-40, B-7-20, B-7-30 & B-7-40, and TK-1-10, TK-1-20, TK-1-30 & TK-1-40. For each boring, soil descriptions, sample type and depth, and related drilling information were summarized and recorded on a boring log, which were reviewed by a Registered Civil Engineer. Logs of Borings are found in Attachment A. Soil cuttings were backfilled in the original place.

4.3 SAMPLING PROCEDURES FOR SOIL SAMPLE COLLECTION

Tube soil samples were obtained from the borings using a split barrel modified California sampler, which contained three (3) 1.5-inch ID by 6.0-inch long brass sampling tubes. The sampler was driven into the soil using a 140-pound downhole hammer, dropping approximately 30 inches. The number of blows required to advance the sampler by 18 inches was recorded on each boring log for each 6-inch increment, when possible. All soil samples were completely driven and filled; no head space nor hand-packing was allowed. The soil samples were retained in the brass tubes, which were sealed at both ends with Teflon sheeting and tight-fitting plastic caps. Each sample was labeled (with the sample number, sample depth, date, time, and project number), placed in a bag, stored in an ice chest, and cooled using ice and refrigerated blue ice packets. Chain-of-custody forms were filed to document the handling, transport, and delivery of samples to a California State Certified laboratory (See Attachment C).

All sampling equipment and sampling tubes were decontaminated prior to each sampling by repeated washing using a brush and Liquinox solution, a tap water rinse, and finally a deionized water rinse. The sampler and sampling tubes were either air-dried or dried with a clean towel. Clean augers were used for each boring.

Vapor readings were obtained at ten (10) feet intervals from the bulk samples collected. The soil was collected in a plastic ZIPLOC™ bag and placed in a warm area to allow for the volatilization of hydrocarbons. After volatilization, a Bacharach TLV Sniffer™ was calibrated for 600 ppm hexane.

5.0 LABORATORY ANALYSIS

All soil samples were delivered to CHEMTEK Inc. Environmental Laboratories, a California State-certified laboratory whose certification by California Department of Health Services is found in Attachment C. The following laboratory analyses were performed on the soil samples:

- Chemicals for Sodium Hypochlorite (NaOCl).

These laboratory analyses were performed in accordance with the United States Environmental Protection Agency (U.S.E.P.A.) Region 9 site assessment requirements. Certificates of Analysis for soil samples during this portion of the site assessment are found in Attachments D. A summary of all site assessment laboratory results is shown in Table 2.

TABLE 2: SUMMARY OF LABORATORY RESULTS

6.0 CONCLUSIONS AND RECOMMENDATIONS

The laboratory analytical results were compared to the maximum allowable levels as defined by the United States Environmental Protection Agency (U.S.E.P.A.) Region 9, "Preliminary Remediation Goals (PRGs) 1996 (see Attachment D).

TABLE 3: ***Maximum Allowable Levels based on the Guidance for Chlorine: Preliminary Remedial Goals (PRGs)***

CONSTITUENT	CONCENTRATION	AS REQUIRED BY:
Chlorine	1.7E+05 ppm	USEPA Region 9

This subsurface soil investigation revealed slightly elevated levels of chlorine at sample locations B-1 through B-10 and TK-1. Measured concentrations were found to be extremely low and well within the maximum allowable limits of chlorine constituent. This concentration can be considered as clean, based on the United States Environmental Protection Agency (U.S.E.P.A.) Region 9, "Preliminary Remediation Goals (PRGs) 1996. Based on these analytical results, we believe groundwater contamination is extremely unlikely.

Based on these analytical results, WEECO and Mr. Luis Lodrigueza (Orange County Health Care Agency) conclude that no further subsurface investigation is necessary for the site. At this time, WEECO recommends that Ms. Grace Madden does not need additional site assessment

7.0 LIMITATIONS

The services performed, all findings obtained, all soil and groundwater samples obtained and analyzed, and all conclusions and recommendations made, are in accordance with generally and currently accepted engineering and technical principles and practices. The conclusions made in this report ONLY reflect the findings of the chemical analyses performed on the soil samples taken at the specified locations, as indicated by bore-hole numbers and the depths of borings. The areas, where soil and groundwater sampling and analyses were not performed, are not covered in the conclusions and recommendations of this report. No warranties, expressed or implied, are made or intended in connection with this report, by furnishing this report, or by any oral or written statement.

OPERATION OF FIRE ALARM SYSTEM

Automatic Alarm
Alarm electric horns automatically sound throughout the entire mill and surrounding grounds when the code transmitter in a fire area is switched on by:

1) Water flow in a fire sprinkler system from an open sprinkler head or broken sprinkler line
2) Glass broken on a fire alarm box

Manual Alarm Sounded by Security Guard
Guard in front lobby will set code and sound alarm signal, based on the location described by caller when a fire is reported by phone.

How To Read Fire Alarm Code
Example: [redacted] – North End Building #11 (Palm Storage Dock), with sprinkler system as follows:

Area Code [redacted] – (three strokes) 1 Stroke (Area), Pause, 2 Strokes (Tens/ones), Pause, 3 Strokes (Area), Pause.

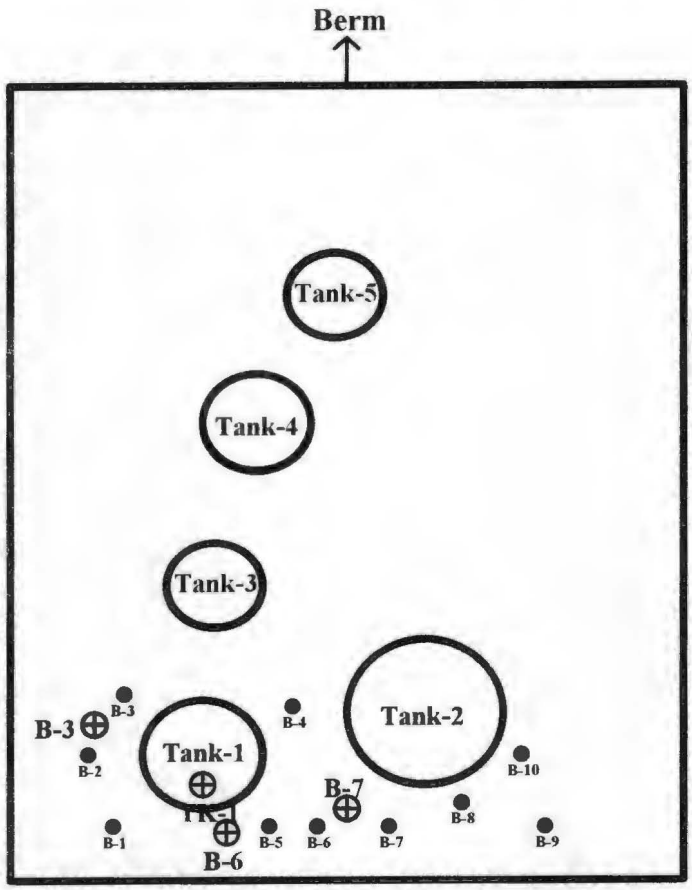
Alarm will normally repeat six (6) times, each time sounding the 3 part Area Code.

LEGEND OF SYMBOLS

- ALARM BOX - BREAK GLASS
- BAME - ON ROOF OR OUTDOOR
- BAME - LOCATED IN BASEMENT
- RISER WATER FLOW TRANSMITTER
- PIV SPRT CUT VALVE
- SECTION CONTROL VALVE
- FIRE DEPT. PUMPER CONNECTION
- FIRE HYDRANT CONNECTION
- HOSE HOUSE
- COMBUSTIBLE LIQUID
- MANUAL GAS SHUT OFF

DATE PRINTED: JANUARY 28, 1997

TO REPORT A FIRE



1. BREAK GLASS OR NEAREST FIRE ALARM BOX (IF LOCATED IN SAME AREA AS FIRE) AND LISTEN. IF ALARM DOES NOT SOUND, DIAL 7911 AND STATE LOCATION OF FIRE.
2. IF PHONE IS CLOSER TO FIRE THAN BOX, DIAL 7911 AND STATE LOCATION OF FIRE.
3. DIRECT FIRE BRIGADE TO THE FIRE.
4. REPORT ALL FIRES

U.S.E.P.A. REGION 9
PRELIMINARY REMEDIATION GOALS (PRGs) 1996

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION IX
75 Hawthorne Street
San Francisco, CA 94105-3901

August 1, 1996

Subject: Region 9 Preliminary Remediation Goals (PRGs) 1996

From: Stanford J. Smucker, Ph.D.
Regional Toxicologist (H-9-3)
Technical Support Team

To: PRG Table Mailing List

Please find the annual update to the Region 9 PRG table. The table has been revised to reflect the most current EPA toxicological and risk assessment information. Updates to EPA toxicity values were obtained from IRIS through July 1996, HEAST through May 1995, and EPA's National Center for Environmental Assessment (NCEA, formerly ECAO).

Region 9 PRGs are "evergreen" and have evolved as new methodologies and parameters have been developed. In several cases the models, equations, and assumptions presented in RAGS HHEM, *Part B, Development of Risk-Based Preliminary Remediation Goals* (1991) have been replaced with new information that is consistent with the document, *Soil Screening Guidance*, recently issued by the Office of Solid Waste and Emergency Response (OSWER), dated April 1996.

The updated PRG table also contains soil screening levels (SSLs) for protection of groundwater. The SSLs were obtained directly from EPA/OSWER's *Soil Screening Guidance* document which is available from NTIS as EPA/540/R-96/018 and EPA/540/R-95/128. Please note that because R 9 PRGs currently evaluate intermedia transfer of volatile organic chemicals (VOCs) and heavy metals from soil to air, the PRG table does not include a separate list of SSLs for the air pathway.

To help users rapidly identify substances with new PRGs, these contaminants are printed in boldface type. Changes in PRG values are either due to new toxicity constants or new physico-chemical information. This version of the table contains revised toxicity values for acetaldehyde, chlorine cyanide, 1,3-dichlorobenzene, 2-dichloroethane, endosulfan, manganese, phosphoric acid, and 1,1,1-trichloroethane. Also, 23 additional VOCs have been identified and evaluated for inhalation exposures resulting from intermedia transfer from soil and water to air.

EPA Region 9 has established a homepage on the World Wide Web which you can find at http://www.epa.gov/region 9/. Our homepage will soon include the PRG table in downloadable form. The electronic table contains additional information not presented in the printed table (e.g. physico-chemical constants, non-cancer PRGs for carcinogens, pathway-specific PRGs, and volatilization factors for VOCs). Meanwhile, we still provide the electronic PRG table (PRG96.zip) on California Regional Water Board's BBS (510.286.0404) for those of you who have a modem.

Before relying on any number in the table, it is recommended that the user verify the numbers with an agency toxicologist or risk assessor because the toxicity / exposure information in the table may contain errors or default assumptions that need to be refined based on further evaluation. If you find an error please send me a note via email at Smucker.Stan@epamail.epa.gov or fax at 415.744.1916.

Printed on Recycled Paper

DISCLAIMER

Preliminary remediation goals (PRGs) focus on common exposure pathways and may not consider all exposure pathways encountered at CERCLA / RCRA sites (Exhibit 1-1). PRGs do not consider impact to groundwater or address ecological concerns. PRGs are specifically not intended as a (1) stand-alone decision-making tool, (2) as a substitute for EPA guidance for preparing baseline risk assessments, or (3) a rule to determine if a waste is hazardous under RCRA.

The guidance set out in this document is not final Agency action. It is not intended, nor can it be relied upon to create any rights enforceable by any party in litigation with the United States. EPA officials may decide to follow the guidance provided herein, or act at variance with the guidance, based on an analysis of specific circumstances. The Agency also reserves the right to change this guidance at any time without public notice.

1.0 INTRODUCTION

The Region 9 PRG table combines current EPA toxicity values with "standard" exposure factors to estimate contaminant concentrations in environmental media (soil, air, and water) that are protective of humans, including sensitive groups, over a lifetime. Chemical concentrations above these levels would not automatically designate a site as "dirty" or trigger a response action. However, exceeding a PRG suggests that further evaluation of the potential risks that may be posed by site contaminants is appropriate. Further evaluation may include additional sampling, consideration of ambient levels in the environment, or a reassessment of the assumptions contained in these screening-level estimates (e.g. appropriateness of route-to-route extrapolations).

The PRG concentrations presented in the table can be used to screen pollutants in environmental media, trigger further investigation, and provide an initial cleanup goal if applicable. When considering PRGs as preliminary goals, residential concentrations should be used for maximum beneficial uses of a property. Industrial concentrations are included in the table as an alternative cleanup goal for soils, but it is not recommended that industrial concentrations be used for screening sites.

Before applying PRGs as screening tools or initial goals, the user of the table should consider whether the exposure pathways and exposure scenarios at the site are fully accounted for in the PRG calculation. Region 9 PRG concentrations are based on exposure pathways for which generally accepted methods, models, and assumptions have been developed (i.e. ingestion, dermal contact, and inhalation) for specific land-use conditions and do not consider impact to groundwater or ecological receptors (see Developing a Conceptual Site Model below).

2.0 READING THE PRG TABLE

2.1 General Considerations

With the exceptions described below, PRGs are chemical concentrations that correspond to fixed levels of risk (i.e.either a one-in-one million [10^{-6}] cancer risk or a noncarcinogenic hazard quotient of one, whichever occurs at a lower concentration) in soil, air, and water. In most cases, where a substance causes both cancer and noncancer or systemic effects, the 10^{-6} cancer risk will result in a more stringent criteria and consequently this value is presented in the table. PRG concentrations based on cancer risk are indicated by "ca". PRG concentrations based on noncarcinogenic health threats are indicated by "nc".

If the risk-based concentrations are to be used to screen sites, it is recommended that both cancer and noncancer-based PRGs be obtained even though the printed list contains only the more restrictive of the two values. To obtain additional values (e.g. noncancer PRGs for a carcinogenic substance), the user has the following options:

- download an electronic copy of the PRG table from EPA Region 9's homepage at http://www.epa.gov/region 9/
- download the file (PRG96.zip) from California Regional Water Board's BBS at 510.286.0404
- use the equations presented in Section 4.0 to calculate additional PRG values

It has come to my attention that some users have been multiplying the cancer PRG concentrations by 10 or 100 to set "action levels" for triggering remediation or to set less stringent cleanup levels for a specific site after considering non-risk-based factors such as (ambient levels, detection limits, or technological feasibility). This practice recognizes that there may be a range of values that may be "acceptable" for carcinogenic risk (EPA's cancer risk range is from 10^{-6} to 10^{-4}). However, this practice could lead one to overlook serious noncancer health threats and it is strongly recommended that the user consult with a toxicologist or Regional risk assessor before doing this. For carcinogens, I have indicated by asterisk ("ca*") in the PRG table where the noncancer PRGs would be exceeded if the cancer value that is listed is multiplied by 100. Two stars ("ca**") indicate that the noncancer values would be exceeded if the cancer PRG were multiplied by 10. There is no range of "acceptable" noncarcinogenic "risk" so that under no circumstances should noncancer PRGs be multiplied by 10 or 100, when setting final cleanup criteria.

In general, PRG concentrations in the table are risk-based but for soil there are two important exceptions: (1) for several volatile chemicals, PRGs are based on the soil saturation equation ("sat") and (2) for relatively less toxic inorganic and semivolatile contaminants, a non-risk based "ceiling limit" concentration is given as 10^{+5} mg/kg ("max"). PRG concentrations that are not risk-based (i.e. either "sat" or "max") should be segregated before screening multiple

pollutant risks.

In addition to Region 9 PRGs, the PRG table also includes California EPA PRGs ("CAL-Modified PRGs") for specific chemicals where CAL-EPA values may be more restrictive than the federal values; and, soil screening levels (SSLs) for protection of groundwater (see Section 2.3 below).

2.2 Toxicity Values

EPA toxicity values, known as noncarcinogenic reference doses (RfD) and carcinogenic slope factors (SF) were obtained from IRIS through July 1996, HEAST through May 1995, and EPA's National Center for Environmental Assessment (NCEA, formerly ECAO). The priority among sources of toxicological constants used are as follows: (1) IRIS (indicated by "i"), (2) HEAST ("h"), (3) NCEA ("n"), and (4) withdrawn from IRIS or HEAST and under review ("x").

Route-to-route extrapolations ("r") were frequently used when there were no toxicity values available for a given route of exposure. Oral cancer slope factors ("SFo") and reference doses ("RfDo") were used for both oral and inhaled exposures for organic compounds lacking inhalation values. Inhalation slope factors ("SFi") and inhalation reference doses ("RfDi") were used for both inhaled and oral exposures for organic compounds lacking oral values. An additional route extrapolation is the use of oral toxicity values for evaluating dermal exposures. **Although route-to-route methods are a useful screening procedure, the appropriateness of these default assumptions for specific contaminants should be verified by a toxicologist.**

To help users rapidly identify substances with new PRGs, these contaminants are printed in boldface type. This version of the table contains revised toxicity values for acetaldehyde, chlorine cyanide, 1,3-dichlorobenzene, 2-dichloroethane, endosulfan, manganese, phosphoric acid, and 1,1,1-trichloroethane.

2.3 Soil Screening Levels

Generic soil screening levels (SSLs) for the protection of groundwater have been included in the PRG table for 100 of the most common contaminants at Superfund sites. Generic SSLs are derived using default values in standardized equations presented in *Soil Screening Guidance* (available from NTIS as document numbers PB96-963502 and PB96-963505 or EPA/540/R-95/128 and EPA/540/R-96/018).

The SSLs were developed using a default dilution-attenuation factor (DAF) of 20 to account for natural processes that reduce contaminant concentrations in the subsurface. Also included are generic SSLs that assume no dilution or attenuation between the source and the receptor well (i.e., a DAF of 1). These values can be used at sites where little or no dilution or attenuation of soil leachate concentrations is expected at a site (e.g., sites with shallow water

tables, fractured media, karst topography, or source size greater than 30 acres).

Generally, if an SSL is not exceeded for the migration to groundwater pathway, the user may eliminate this pathway from further investigation.

2.4 Miscellaneous

Volatile organic chemicals (VOCs) are indicated by "1" in the VOC column of the table and are defined as those chemicals having a Henry's Law constant greater than 10^{-5} (atm-m^3/mol) and a molecular weight less than 200 g/mole). These contaminants are evaluated for potential volatilization from soil / water to air using volatilization factors (see Section 4.1). Since the 1995 PRG table, 23 additional VOCs have been identified and evaluated for inhalation exposures resulting from intermedia transfer from soil and water to air. These are indicated in boldface type.

Chemical-specific dermal absorption values for contaminants in soil and dust are presented for arsenic, cadmium, pentachlorophenol, PCBs, and dioxin as recommended by EPA's Office of Research and Development (USEPA 1992a). Otherwise, default skin absorption fractions are assumed to be 0.01 and 0.10, for inorganics and organics, respectively.

3.0 USING THE PRG TABLE

The decision to use PRGs at a site will be driven by the potential benefits of having generic risk-based concentrations in the absence of site-specific risk assessments. The original intended use of PRGs was to provide initial cleanup goals for individual chemicals given specific medium and land-use combinations (see RAGS Part B, 1991), however risk-based PRGs actually have several uses in addition to providing initial goals. These include:

- Screening sites to determine further evaluation
- Prioritizing areas of concern at megasites (e.g. federal facilities)
- Calculating risks associated with multiple contaminants

A few basic procedures are recommended for using PRGs properly. These are briefly described below. Potential problems with the use of PRGs are also identified.

3.1 Developing a Conceptual Site Model

The primary condition for use of PRGs is that exposure pathways of concern and conditions at the site match those taken into account by the PRG framework. Thus, it is always necessary to develop a conceptual site model (CSM) to identify likely contaminant source areas, exposure pathways, and potential receptors. This information can be used to determine the applicability of PRGs at the site and the need for additional information. For those pathways not covered by PRGs, a risk assessment specific to these additional pathways may be necessary. Nonetheless, the PRG lookup values will still be useful in such situations for focusing further investigative efforts on the exposure pathways not addressed.

To develop a site-specific CSM, perform an extensive records search and compile existing data (e.g. available site sampling data, historical records, aerial photographs, and hydrogeologic information). Once this information is obtained, CSM worksheets such as those provided in ASTM's *Standard Guide for Risk-Based Corrective Action Applied at Petroleum Release Sites* (1995) can be used to tailor the generic worksheet model to a site-specific CSM. The final CSM diagram represents linkages among contaminant sources, release mechanisms, exposure pathways and routes and receptors. It summarizes our understanding of the contamination problem.

As a final check, the CSM should answer the following questions:

- Are there potential ecological concerns?
- Is there potential for land use other than those covered by the PRGs (that is, residential and industrial)?
- Are there other likely human exposure pathways that were not considered in development of the PRGs (e.g. impact to groundwater, local fish consumption; raising beef, dairy, or other livestock)?
- Are there unusual site conditions (e.g. large areas of contamination, high fugitive dust levels, potential for indoor air contamination)?

If any of these four conditions exist, the PRG may need to be adjusted to reflect this new information. Suggested references for evaluating pathways not currently evaluated by Region 9 PRG's are presented in Exhibit 3-1.

EXHIBIT 3-1
SUGGESTED READINGS FOR EVALUATING SOIL CONTAMINANT PATHWAYS NOT CURRENTLY ADDRESSED BY REGION 9 PRGs

EXPOSURE PATHWAY	REFERENCE
Migration of contaminants to an underlying potable aquifer	*Soil Screening Guidance: User's Guide and Technical Background Document* (USEPA 1996a,b)
Ingestion via plant uptake	*Technical Support Document for Land Application of Sewage Sludge (USEPA 1992a)*
Ingestion via meat or dairy products	*Estimating Exposure to Dioxin-Like Compounds - Review Draft* (1994a)
Inhalation of volatiles that have migrated into basements	*Soil Screening Guidance: User's Guide and Technical Background Document* (USEPA 1996a,b)
Terrestrial environmental pathways	*Role of the Ecological Risk Assessment in the Baseline Risk Assessment* (USEPA 1994b)

3.2 Background Levels Evaluation

A necessary step in determining the usefulness of Region 9 PRGs is the consideration of background contaminant concentrations. EPA may be concerned with two types of background at sites: naturally occurring and anthropogenic. Natural background is usually limited to metals whereas anthropogenic (i.e. human-made) background includes both organic and inorganic contaminants. Before embarking on an extensive sampling and analysis program to determine local background concentrations in the area, one should first compile existing data on the subject. Far too often there is pertinent information in the literature that gets ignored, resulting in needless expenditures of time and money.

Generally EPA does not clean up below natural background. If natural background concentrations are higher than the PRGs, the generic PRGs may not be the best tool for site decisionmaking. Or, an adjustment of the PRG may be needed. For example, naturally occurring arsenic frequently is higher than the soil PRG set equal to a one-in-one-million cancer risk (the point of departure), thus an alternative PRG for arsenic is provided in the lookup tables based on non-cancer endpoints that is still protective of cancer risks as well (i.e. falls within EPA's "acceptable" risk range). Because of the problems associated with adjusting PRGs to an alternate risk level, this procedure is not recommended without first

consulting a staff toxicologist at state and / or federal regulatory agencies.

Where anthropogenic background levels exceed PRGs and EPA has determined that a response action is necessary and feasible, EPA's goal will be to develop a comprehensive response to the widespread contamination. This will often require coordination with different authorities that have jurisdiction over the sources of contamination in the area.

3.3 Risk Screening

A suggested stepwise approach for screening sites with PRGs is as follows:

- Perform an extensive records search and compile existing data.

- Identify site contaminants in the PRG Table. Record the PRG concentrations for various media and note whether PRG is based on cancer risk (indicated by "ca") or noncancer hazard (indicated by "nc"). Segregate cancer PRGs from non-cancer PRGs and exclude (but don't eliminate) non-risk based PRGs ("sat" or "max").

- For cancer risk estimates, take the site-specific concentration (maximum or 95 UCL) and divide by the PRG concentrations that are designated for cancer evaluation ("ca"). Multiply this ratio by 10^{-6} to estimate chemical-specific risk. For multiple pollutants, simply add the risk for each chemical :

$$Risk = \left[\left(\frac{conc_x}{PRG_x}\right) + \left(\frac{conc_y}{PRG_y}\right) + \left(\frac{conc_z}{PRG_z}\right)\right] \times 10^{-6}$$

- For non-cancer hazard estimates. Divide concentration term by its respective non-cancer PRG designated as "nc" and sum the ratios for multiple contaminants. [Note that carcinogens may also have an associated non-cancer PRG that is not listed in the printed copy of the table and these will also need to be obtained in order to complete the non-cancer evaluation.] The non-cancer ratio represents a hazard index (HI). A hazard index of 1 or less is generally considered safe . A ratio greater than 1 suggests further evaluation:

$$Hazard\ Index = \left[\left(\frac{conc_x}{PRG_x}\right) + \left(\frac{conc_y}{PRG_y}\right) + \left(\frac{conc_z}{PRG_z}\right)\right]$$

For more information on screening site risks, the reader should contact EPA Region 9's Technical Support Team.

3. 4 Potential Problems

As with any risk-based tool, the potential exists for misapplication. In most cases the root cause will be a lack of understanding of the intended use of Region 9 PRGs. In order to prevent misuse of PRGs, the following should be avoided:

- Applying PRGs to a site without adequately developing a conceptual site model that identifies relevant exposure pathways and exposure scenarios,
- Not considering background concentrations when choosing PRGs as cleanup goals,
- Use of PRGs as cleanup levels without the nine-criteria analysis specified in the National Contingency Plan (or, comparable analysis for programs outside of Superfund),
- Use of PRGs as cleanup levels without verifying numbers with a toxicologist,
- Use of antiquated PRG tables that have been superseded by more recent publications,
- Not considering the effects of additivity when screening multiple chemicals, and
- Adjusting PRGs upward by factors of 10 or 100 without consulting a toxicologist.

4.0 TECHNICAL SUPPORT DOCUMENTATION

Region 9 PRGs consider human exposure hazards to chemicals from contact with contaminated soils, air, and water. The emphasis of the PRG equations and technical discussion are aimed at developing initial goals for soils, since this is an area where few standards exist. For air and water, additional reference concentrations or standards are available for many chemicals (e.g. non-zero MCLGs, AWQC, and NAAQS) and consequently the discussion of these media are brief.

4.1 Inhalation of Volatiles and Fugitive Dusts

Agency toxicity criteria indicate that risks from exposure to some chemicals via inhalation far outweigh the risk via ingestion; therefore soil PRGs have been designed to address this pathway as well. The models used to calculate PRGs for inhalation of volatiles / particulates are updates of risk assessment methods presented in RAGS Part B (USEPA 1991a) and are consistent with the *Soil Screening Guidance: User's Guide and Technical Background*

Document (USEPA 1996a,b).

To address the soil-to-air pathways the PRG calculations incorporate volatilization factors (VF_s) for volatile contaminants and particulate emission factors (PEF) for nonvolatile contaminants. These factors relate soil contaminant concentrations to air contaminant concentrations that may be inhaled on-site. The VF_s and PEF equations can be broken into two separate models: an emission model to estimate emissions of the contaminant from the soil and a dispersion model to simulate the dispersion of the contaminant in the atmosphere.

It should be noted that the box model in RAGS Part B has been replaced with a dispersion term (Q/C) derived from a modeling exercise using meteorological data from 29 locations across the United States because the box model may not be applicable to a broad range of site types and meteorology and does not utilize state-of-the-art techniques developed for regulatory dispersion modeling. The dispersion model for both volatiles and particulates is the AREA-ST, an updated version of the Office of Air Quality Planning and Standards, Industrial Source Complex Model, ISC2. However, different Q/C terms are used in the VF and PEF equations. Los Angeles was selected as the 90th percentile data set for volatiles and Minneapolis was selected as the 90th percentile data set for fugitive dusts (USEPA 1996 a,b). A default source size of 0.5 acres was chosen for the PRG calculations. This is consistent with the default exposure area over which Region 9 typically averages contaminant concentrations in soils. If unusual site conditions exist such that the area source is substantially larger than the default source size assumed here, an alternative Q/C could be applied (see USEPA 1996a,b).

Volatilization Factor for Soils

Volatile chemicals, defined as those chemicals having a Henry's Law constant greater than 10^{-5} (atm-m^3/mol) and a molecular weight less than 200 g/mole, were screened for inhalation exposures using a volatilization factor for soils (VF_s). Please note that VF_s's are available in the electronic version of the PRG table.

The emission terms used in the VF_s are chemical-specific and were calculated from physical-chemical information obtained from a number of sources including *Superfund Exposure Assessment Manual* (SEAM, EPA 1988), *Subsurface Contamination Reference Guide* (EPA 1990a), *Fate and Exposure Data* (Howard 1991), and *Superfund Chemical Data Matrix* (USEPA 1994c). In those cases where Diffusivity Coefficients (Di) were not provided in existing literature, Di's were calculated using Fuller's Method described in SEAM. A surrogate term was required for some chemicals that lacked physico-chemical information. In these cases, a proxy chemical of similar structure was used that may over- or under-estimate the PRG for soils. Physico-chemical information is available in the electronic version of the PRG table. To access this information, the user should display the hidden columns in the table.

Equation 4-9 forms the basis for deriving generic soil PRGs for the inhalation pathway. The following parameters in the standardized equation can be replaced with specific site data to

develop a simple site-specific PRG

- Source area
- Average soil moisture content
- Average fraction organic carbon content
- Dry soil bulk density

The basic principle of the VF_s model is applicable only if the soil contaminant concentration is at or below soil saturation. Above this level, the model cannot predict an accurate VF_s. If the PRG calculated using VF_s was greater than the calculated "sat" (Equation 4-10), the PRG was set equal to "sat" in accordance with *Soil Screening Guidance* (USEPA 1996 a,b).

Volatilization Factor for Tap Water

For tap water, an upperbound volatilization constant (VF_w) is used that is based on all uses of household water (e.g showering, laundering, and dish washing). Certain assumptions were made. For example, it is assumed that the volume of water used in a residence for a family of four is 720 L/day, the volume of the dwelling is 150,000 L and the air exchange rate is 0.25 air changes/hour (Andelman in RAGS Part B). Furthermore, it is assumed that the average transfer efficiency weighted by water use is 50 percent (i.e. half of the concentration of each chemical in water will be transferred into air by all water uses). Note: the range of transfer efficiencies extends from 30% for toilets to 90% for dishwashers.

Particulate Emission Factor for Soils

Inhalation of chemicals adsorbed to respirable particles (PM_{10}) were assessed using a default PEF equal to 1.316×10^9 m^3/kg that relates the contaminant concentration in soil with the concentration of respirable particles in the air due to fugitive dust emissions from contaminated soils. The generic PEF was derived using default values in Equation 4-11, which corresponds to a receptor point concentration of approximately 0.76 ug/m^3. The relationship is derived by Cowherd (1985) for a rapid assessment procedure applicable to a typical hazardous waste site where the surface contamination provides a relatively continuous and constant potential for emission over an extended period of time (e.g. years). This represents an annual average emission rate based on wind erosion that should be compared with chronic health criteria; it is not appropriate for evaluating the potential for more acute exposures.

The impact of the PEF on the resultant PRG concentration (that combines soil exposure pathways for ingestion, skin contact, and inhalation) can be assessed by downloading the PRG tables and displaying the hidden columns. With the exception of specific heavy metals, the PEF does not appear to significantly affect most soil PRGs. Equation 4-11 forms the basis for deriving a generic PEF for the inhalation pathway. For more details regarding specific parameters used in the PEF model, the reader is referred to *Soil Screening Guidance: Technical Background Document* (USEPA 1996a).

Note: the generic PEF evaluates windborne emissions and does not consider dust emissions from traffic or other forms of mechanical disturbance that could lead to greater emissions than assumed here.

4.2 Dermal Contact with Contaminants in Soil

Much uncertainty surrounds the determination of hazards associated with skin contact with soils. One important data gap is the lack of EPA verified toxicity values for the dermal route. For screening purposes it is assumed that dermal toxicity values can be route-to-route extrapolated from oral values but this may not always be an appropriate assumption and should be checked.

Thus far, chemical-specific absorption values for skin have been recommended for only five chemicals (arsenic, cadmium, pentachlorophenol, PCBs, and dioxin) by EPA's Office of Research and Development. For all other chemicals, default absorption values for inorganics and organics are assumed to be 1 and 10 percent, respectively. At 10 % skin absorption, the dermal dose is estimated to equal an ingestion dose for adults, using the best estimate default values in *Dermal Exposure Assessment: Principles and Applications* (EPA 1992). At 1 % absorption, the dermal dose is estimated to be 10% of the oral dose (i.e. based on an adult ingestion rate of 100 mg per day). Note: worker and children intake rates (50 and 200 mg per day, respectively) yield somewhat different results.

dermal dose = ingestion dose

$$C_{SOIL} \times ABS \times AF \times SA = C_{SOIL} \times IR$$

$$ABS = \frac{(100 mg/day)}{[(0.2 mg/cm^2\text{-}day)\,(5000 cm^2)]} = 0.10$$

4.3 SSLs for the Migration to Groundwater Pathway

The methodology for calculating SSLs for the migration to groundwater was developed to identify chemical concentrations in soil that have the potential to contaminate groundwater. Migration of contaminants from soil to groundwater can be envisioned as a two-stage process: (1) release of contaminant in soil leachate and (2) transport of the contaminant through the underlying soil and aquifer to a receptor well. The SSL methodology considers both of these fate and transport mechanisms.

SSLs are backcalculated from acceptable ground water concentrations (i.e. nonzero MCLGs, MCLs, or risk-based PRGs). First, the acceptable groundwater concentration is multiplied by a dilution factor to obtain a target leachate concentration. For example, if the dilution factor

is 10 and the acceptable ground water concentration is 0.05 mg/L, the target soil leachate concentration would be 0.5 mg/L. The partition equation (presented in the *Soil Screening Guidance* document) is then used to calculate the total soil concentration (i.e. SSL) corresponding to this soil leachate concentration.

The SSL methodology was designed for use during the early stages of a site evaluation when information about subsurface conditions may be limited. Because of this constraint, the methodology is based on conservative, simplifying assumptions about the release and transport of contaminants in the subsurface. For more on SSLs, and how to calculate site-specific SSLs versus generic SSLs presented in the PRG table, the reader is referred to the *Soil Screening Guidance* document (USEPA 1996a,b).

4.4 Exposure Factors

Default exposure factors were obtained primarily from RAGS Supplemental Guidance Standard Default *Exposure Factors* (OSWER Directive, 9285.6-03) dated March 25, 1991 and more recent information from U.S. EPA's Office of Solid Waste and Emergency Response, U.S. EPA's Office of Research and Development, and California EPA's Department of Toxic Substances Control (see Exhibit 4-1).

Because contact rates may be different for children and adults, carcinogenic risks during the first 30 years of life were calculated using age-adjusted factors ("adj"). Use of age-adjusted factors are especially important for soil ingestion exposures, which are higher during childhood and decrease with age. However, for purposes of combining exposures across pathways, additional age-adjusted factors are used for inhalation and dermal exposures. These factors approximate the integrated exposure from birth until age 30 combining contact rates, body weights, and exposure durations for two age groups - small children and adults. Age-adjusted factors were obtained from RAGS PART B or developed by analogy (see derivations next page).

For soils only, noncarcinogenic contaminants are evaluated in children separately from adults. No age-adjustment factor is used in this case. The focus on children is considered protective of the higher daily intake rates of soil by children and their lower body weight. For maintaining consistency when evaluating soils, dermal and inhalation exposures are also based on childhood contact rates.

(1) ingestion([mg•yr]/[kg•d]:

$$IFS_{adj} = \frac{ED_c \times IRS_c}{BW_c} + \frac{(ED_r - ED_c) \times IRS_a}{BW_a}$$

(2) skin contact([mg•yr]/[kg•d]:

$$SFS_{adj} = \frac{ED_c \times AF \times SA_c}{BW_c} + \frac{(ED_r - ED_c) \times AF \times SA_a}{BW_a}$$

(3) inhalation ([m^3•yr]/[kg•d]):

$$InhF_{adj} = \frac{ED_c \times IRA_c}{BW_c} + \frac{(ED_r - ED_c) \times IRA_a}{BW_a}$$

4.5 PRG Equations

The equations used to calculate the PRGs for carcinogenic and noncarcinogenic contaminants are presented in Equations 4-1 through 4-8. The PRG equations update RAGS Part B equations. Briefly, PRGs are risk assessments run in reverse. The methodology backcalculates a soil, air, or water concentration level from a target risk (for carcinogens) or hazard quotient (for noncarcinogens). For completeness, the soil equations combine risks from ingestion, skin contact, and inhalation simultaneously. Note: the electronic version of the table also includes pathway-specific PRGs, should the user decide against combining specific exposure pathways; or, the user wants to identify the relative contribution of each pathway to exposure.

To calculate PRGs for volatile chemicals in soil, a chemical-specific volatilization factor is calculated per Equation 4-9. Because of its reliance on Henry's law, the VF_s model is applicable only when the contaminant concentration in soil is at or below saturation (i.e. there is no free-phase contaminant present). Soil saturation ("sat") corresponds to the contaminant concentration in soil at which the adsorptive limits of the soil particles and the solubility limits of the available soil moisture have been reached. Above this point, pure liquid-phase contaminant is expected in the soil. If the PRG calculated using VF_s was greater than the calculated sat, the PRG was set equal to sat, in accordance with *Soil Screening Guidance* (USEPA 1996 a,b). The updated equation for deriving sat is presented in Equation 4-10.

EXHIBIT 4-1
STANDARD DEFAULT FACTORS

Symbol	Definition (units)	Default	Reference
CSFo	Cancer slope factor oral (mg/kg-d)-1	--	IRIS, HEAST, or NCEA
CSFi	Cancer slope factor inhaled (mg/kg-d)-1	--	IRIS, HEAST, or NCEA
RfDo	Reference dose oral (mg/kg-d)	--	IRIS, HEAST, or NCEA
RfDi	Reference dose inhaled (mg/kg-d)	--	IRIS, HEAST, or NCEA
TR	Target cancer risk	10^{-6}	--
THQ	Target hazard quotient	1	--
BWa	Body weight, adult (kg)	70	RAGS (Part A), EPA 1989 (EPA/540/1-89/002)
BWc	Body weight, child (kg)	15	Exposure Factors , EPA 1991 (OSWER No. 9285.6-03)
ATc	Averaging time - carcinogens (days)	25550	RAGS(Part A), EPA 1989 (EPA/540/1-89/002)
ATn	Averaging time - noncarcinogens (days)	ED*365

SFSadj	Skin contact factor, soils ([mg•yr]/[kg•d])	503	By analogy to RAGS (Part B)
InhFadj	Inhalation factor ([m^3•yr]/[kg•d])	11	By analogy to RAGS (Part B)
IFWadj	Ingestion factor, water ([l•yr]/[kg•d])	1.1	By analogy to RAGS (Part B)
VFw	Volatilization factor for water (L/m^3)	0.5	RAGS(Part B) , EPA 1991 (OSWER No. 9285.7-01B)
PEF	Particulate emission factor (m^3/kg)	See below	Soil Screening Guidance (EPA 1996a,b)
VFs	Volatilization factor for soil (m^3/kg)	See below	Soil Screening Guidance (EPA 1996a,b)
sat	Soil saturation concentration (mg/kg)	See below	Soil Screening Guidance (EPA 1996a,b)

Footnote:
*Exposure duration for lifetime residents is assumed to be 30 years total. For carcinogens, exposures are combined for children (6 years) and adults (24 years) .

PRG EQUATIONS

Soil Equations: For soils, equations were based on three exposure routes (ingestion, skin contact, and inhalation).

Equation 4-1: Combined Exposures to Carcinogenic Contaminants in Residential Soil

$$C(mg/kg) = \frac{TR \times AT_c}{EF_r \left[\left(\frac{IFS_{adj} \times CSF_o}{10^6 mg/kg}\right) + \left(\frac{SFS_{adj} \times ABS \times CSF_o}{10^6 mg/kg}\right) + \left(\frac{InhF_{adj} \times CSF_i}{VF_s^a}\right)\right]}$$

Equation 4-2: Combined Exposures to Noncarcinogenic Contaminants in Residential Soil

$$C(mg/kg) = \frac{THQ \times BW_c \times AT_n}{EF_r \times ED_c \left[\left(\frac{1}{RfD_o} \times \frac{IRS_c}{10^6 mg/kg}\right) + \left(\frac{1}{RfD_o} \times \frac{SA_c \times AF \times ABS}{10^6 mg/kg}\right) + \left(\frac{1}{RfD_i} \times \frac{IRA_c}{VF_s^a}\right)\right]}$$

Equation 4-3: Combined Exposures to Carcinogenic Contaminants in Industrial Soil

$$C(mg/kg) = \frac{TR \times BW_a \times AT_c}{EF_o \times ED_o \left[\left(\frac{IRS_o \times CSF_o}{10^6 mg/kg}\right) + \left(\frac{SA_a \times AF \times ABS \times CSF_o}{10^6 mg/kg}\right) + \left(\frac{IRA_a \times CSF_i}{VF_s^a}\right)\right]}$$

Equation 4-4: Combined Exposures to Noncarcinogenic Contaminants in Industrial Soil

$$C(mg/kg) = \frac{THQ \times BW_a \times AT_n}{EF_o \times ED_o \left[\left(\frac{1}{RfD_o} \times \frac{IRS_o}{10^6 mg/kg}\right) + \left(\frac{1}{RfD_o} \times \frac{SA_a \times AF \times ABS}{10^6 mg/kg}\right) + \left(\frac{1}{RfD_i} \times \frac{IRA_a}{VF_s^a}\right)\right]}$$

Footnote:

[a] Use VF_s for volatile chemicals (defined as having a Henry's Law Constant [atm-m^3/mol] greater than 10^{-6} and a molecular weight less than 200 grams/mol) or PEF for non-volatile chemicals.

Tap Water Equations:

Equation 4-5: Ingestion and Inhalation Exposures to Carcinogenic Contaminants in Water

$$C(ug/L) = \frac{TR \times AT_c \times 1000ug/mg}{EF_r \left[(IFW_{adj} \times CSF_o) + (VF_w \times InhF_{adj} \times CSF_i)\right]}$$

Equation 4-6: Ingestion and Inhalation Exposures to Noncarcinogenic Contaminants in Water

$$C(ug/L) = \frac{THQ \times BW_a \times AT_n \times 1000ug/mg}{EF_r \times ED_r \left[\left(\frac{IRW_a}{RfD_o}\right) + \left(\frac{VF_w \times IRA_a}{RfD_i}\right)\right]}$$

Air Equations:

Equation 4-7: Inhalation Exposures to Carcinogenic Contaminants in Air

$$C(ug/m^3) = \frac{TR \times AT_c \times 1000ug/mg}{EF_r \times InhF_{adj} \times CSF_i}$$

Equation 4-8: Inhalation Exposures to Noncarcinogenic Contaminants in Air

$$C(ug/m^3) = \frac{THQ \times RfD_i \times BW_a \times AT_n \times 1000ug/mg}{EF_r \times ED_r \times IRA_a}$$

SOIL-TO-AIR VOLATILIZATION FACTOR (VF_s)

Equation 4-9: Derivation of the Volatilization Factor

$$VF_s\,(m^3/kg) = (Q/C) \times \frac{(3.14 \times D_A \times T)^{1/2}}{(2 \times \rho_b \times D_A)} \times 10^{-4}\,(m^2/cm^2)$$

where:

$$D_A = \frac{[\,(\Theta_a^{10/3} D_i H' + \Theta_w^{10/3} D_w)\,/n^2]}{\rho_B K_d + \Theta_w + \Theta_a H'}$$

Parameter	Definition (units)	Default
VF_s	Volatilization factor (m^3/kg)	–
D_A	Apparent diffusivity (cm^2/s)	–
Q/C	Inverse of the mean conc. at the center of a 0.5-acre square source (g/m^2-s per kg/m^3)	68.81
T	Exposure interval (s)	9.5×10^8
ρ_b	Dry soil bulk density (g/cm^3)	1.5
Θ_a	Air filled soil porosity (L_{air}/L_{soil})	0.28 or n-Θ_w
n	Total soil porosity (L_{pore}/L_{soil})	0.43 or 1 - (ρ_b/ρ_s)
Θ_w	Water-filled soil porosity (L_{water}/L_{soil})	0.15
ρ_s	Soil particle density (g/cm^3)	2.65
Di	Diffusivity in air (cm^2/s)	Chemical-specific
H	Henry's Law constant (atm-m^3/mol)	Chemical-specific
H'	Dimensionless Henry's Law constant	Calculated from H by multiplying by 41 (USEPA 1991a)
D_w	Diffusivity in water (cm^2/s)	Chemical-specific
K_d	Soil-water partition coefficient (cm^3/g) = $K_{oc}f_{oc}$	Chemical-specific
K_{oc}	Soil organic carbon-water partition coefficient (cm^3/g)	Chemical-specific
f_{oc}	Fraction organic carbon in soil (g/g)	0.006 (0.6%)

SOIL SATURATION CONCENTRATION (sat)

Equation 4-10: Derivation of the Soil Saturation Limit

$$sat = \frac{S}{\rho_b}\left(K_d \rho_b + \Theta_w + H' \Theta_a\right)$$

Parameter	Definition (units)	Default
sat	Soil saturation concentration (mg/kg)	–
S	Solubility in water (mg/L-water)	Chemical-specific
ρ_b	Dry soil bulk density (kg/L)	1.5
n	Total soil porosity (L_{pore}/L_{soil})	0.43 or 1 - (ρ_b/ρ_s)
ρ_s	Soil particle density (kg/L)	2.65
K_d	Soil-water partition coefficient (L/kg)	K_{oc} x f_{oc} (chemical-specific)
k_{oc}	Soil organic carbon/water partition coefficient (L/kg)	Chemical-specific
f_{oc}	Fraction organic carbon content of soil (g/g)	0.006 or site-specific
Θ_w	Water-filled soil porosity (L_{water}/L_{soil})	0.15
Θ_a	Air filled soil porosity (L_{air}/L_{soil})	0.28 or n-Θ_w
w	Average soil moisture content (kg_{water}/kg_{soil} or L_{water}/kg_{soil})	0.1
H	Henry's Law constant (atm-m^3/mol)	Chemical-specific
H'	Dimensionless Henry's Law constant	H x 41, where 41 is a units conversion factor

SOIL-TO-AIR PARTICULATE EMISSION FACTOR (PEF)

Equation 4-11: Derivation of the Particulate Emission Factor

$$PEF(m^3/kg) = Q/C \times \frac{3600 s/h}{0.036 \times (1-V) \times (U_m/U_t)^3 \times F(x)}$$

Parameter	Definition (units)	Default
PEF	Particulate emission factor (m^3/kg)	1.316×10^9
Q/C	Inverse of the mean concentration at the center of a 0.5-acre-square source (g/m^2-s per kg/m^3)	90.80
V	Fraction of vegetative cover (unitless)	0.5
U_m	Mean annual windspeed (m/s)	4.69
U_t	Equivalent threshold value of windspeed at 7 m (m/s)	11.32
F(x)	Function dependent on U_m/U_t derived using Cowherd (1985) (unitless)	0.194

Kimberly-Clark
2001 E. Orangethorpe Avenue
Fullerton, CA. 92631

Nov. 13, 1997

RE: Soil Contamination Analysis for Tank Farm

Dear Ms. Madden:

Attached please find the copy of the report for the soil contamination analysis performed by WEECO regarding the spill of Sodium Hypochlorite(NaOCl) in the tank farm area.

This report concludes that the soil samples taken in the soils underneath the tank farm area revealed sizable contamination.

Further boring/sampling/analysis will be required in order to completely define the horizontal and the vertical extents of the soil contamination with NaOCl.

After the further soil contamination analysis is performed, it will be known how much of the soil should be removed or remediated in order to resolve the problem.

The method of soil remediation shall be discussed in the report that will be made after the further boring/sampling/analysis is finished.

If you have any questions, please feel free to call us.

Attachment: Soil Testing Report

Sincerely, Charles Choi

1.0 INTRODUCTION

This report presents the findings of an initial site assessment investigation conducted at the tank farm of Kimberly Clark factory located at 2001 E. Orangethorpe Avenue, Fullerton, California. There are five tanks at this tank farm which are used to store fuel oil and chemicals such as Sodium Hypochlorite(NaOCl). Western Environmental Engineers Company(WEECO) was retained by Kimberly-Clark Company to conduct an initial site-environmental assessment in order to find the horizontal and vertical extent of soil contamination due to the potential leak of sodium hypochlorite material around the tank farm area.

This report summarizes the drilling, soil sampling, analysis, and evaluation of the analytical results to determine whether it will be necessary to conduct any further site characterization study and site cleanup and remediation for this area.

2.0 SITE DESCRIPTION

Kimberly-Clark Company has a factory at 2001 E. Orangethorpe Avenue in Fullerton. Figure (2) shows the layout of the factory located in Fullerton. There is a tank farm on the east site of the factory as indicated in Figure (2). The tank farm has five tanks as described below:

(Tank No. 1)
(Tank No. 2)
(Tank No. 3)
(Tank No. 4)
(Tank No. 5)

These tanks contain chemicals such as sodium hypochlorite(NaOCl), which is used as a breaching solution for pulp processing. This sodium hypochlorite is purchased from the manufacturer(Jones Chemical Co.) as the brand name of "Sunny Sol-150". Figure (3) shows the layout of the tank farm including the above five tanks. As shown in the Figure (3), the five tanks are located in a berm area, whose size is 120-feet by 110-feet. It was understood that there was a leak in the Tank No. 3 which used to contain Sunny Sol-150 which is a solution of sodium hypochlorite(15.6% solution).

3. Site Background Conditions

(Site Geology)

The project site is located in the Fullerton area of the central basin comprised of alluvium and associated deposit of recent Pleistocene age. Jefferson Aquifer, which is the second aquifer in downward succession within the San Pedro Formation, extends over most of the Central Basin, although it is not known to reach the surface. Within the boundaries of the aquifer, some irregular areas exist where the aquifer has not been identified. The Jefferson Aquifer occurs in sinuous courses extending from both the Los Angeles and Whittier Narrows into Orange County. Lithologically, the sediments comprising this aquifer (based on drilling logs of water wells in the area) are for the most part, fine-grained. Gravels are most extensive in the Whittier Narrows area but also occur in scattered patches throughout the rest of the Central Basin. The remainder of the aquifer consists primarily of sand with some gravely and clavey lenses.

The thickness of the aquifer varies from a few feet to a maximum of 140-feet along the Los Alamitos fault. This aquifer is considerably folded and its base varies in elevation from 700-feet below sea level to 50-feet above sea level.

Artificial recharge within the Whittier Narrows has some effect on this aquifer. Since less 10% of the wells in the Central Basin are perforated in this horizon and then only in the areas where coarse sandy and gravel zones are encountered, it is generally not considered an important water producing aquifer.

The movement of groundwater across the Los Angeles and Orange County line is entirely dependent on the hydraulic gradient in the area since no physical barrier to groundwater movement exists. Due to the continuity of the hydraulic gradient which slopes in the southerly direction, the general direction of the groundwater in the confined Central Basin is from the north to the south. Groundwater conditions in the overlying shallow semi-perched aquifer do not necessarily follow this trend.

(Groundwater Level)

The depth-to-groundwater at the subject site area is obtained by contacting the Orange County Water District Water Quality Department. As shown in Attachment (D), the OCWD sent us the information regarding the depth-to-groundwater and the ground-surface elevation.

As shown in Attachment (D), the depth-to-groundwater in the subject area is around 110-130 feet below the surface as depicted by the neighborhood well technical data. It is believed that the direction of the groundwater in the vicinity is from the north to the south.

4. Drilling and Soil Sampling

WEECO used manual drilling devices in order to drill and take soil samples from the subject site because there was not enough room for bringing in a large drilling machine mounted on a truck. The manual drilling was performed using a 2.5-inch hand-auger and a 1.5-inch sampling device. After a hole was drilled with the 2.5-inch drilling auger, a 1.5-inch sampling device was introduced into the hole and the soil samples were taken by pounding in the 1.5-inch sampling rings into the soil at the bottom of the holes. The sample rings were retrieved from the bottom of the holes and the ring samples were kept in an ice box until they were delivered to the lab. certified by the State of California.

From each hole, five soil samples were taken: one each from 2, 4, 6, 8, and 10-feet below the surface. The chain-of-custody for the soil samples are shown in Attachment (A).

The log sheets for soil boring are shown in Attachment (B). As shown in these log sheets, the nature of the soil in the bored areas can be described as "sandy-silt" and or silty sand.

5.Chemical Analysis for The Soil Samples

Since the main concern of soil contamination for this tank farm was the leak of sodium hypochlorite from the Tank No.-1, only chemical component that was analyzed for the soil samples taken was "Sodium Hypochlorite, NaOCl". The laboratory where these soil samples were analyzed was Chemtek Environmental Laboratory located in Santa Fe Springs, California. This laboratory is approved by the State of California to test these types of chemical contaminants in soil samples.

The results of the chemical analysis are shown in Attachment (C). As shown in this Attachment, the sodium hypochlorite concentrations in the soil samples turned out to be less than 13 WPPM(mg/kg NaOCl in soil). The highest concentration of NaOCl was found at B-5-2 sample which was taken from 2-feet below surface at B-1 drilling location.

All of the ten soil borings(B-1 through B-10) were made to a maximum depth of 10-ft below surface. Most of the ten soil samples taken at the bottom of the hole(10-feet depth) showed some NaOCl contamination. This reveals that the soils located further below than 10-feet may be also contaminated. Therefore, it will be necessary to drill further down below 10-feet level in order to find out the maximum depth of the soil contamination in the subject area.

6. Sodium Hypochlorite as Hazardous Chemical

According to Appendix X (List of Chemical Names and Common Names for Hazardous Wastes and hazardous Materials) of Division 4.5 (Environmental Health Standards for the management of Hazardous Waste) of Title 22 of the California Code of Regulations indicates that sodium hypochlorite is considered a hazardous material. The Appendix X is listed in Chapter 11 of Article 5 of the Division 4.5.

A portion of the Article 5 of the Division 4.5 of the California Code of Regulations including Chapter 11 and Appendix X is shown in Attachment (F). On Page 687 of the California Code of Regulations(CCR), Sodium Hypochlorite is listed as the hazardous material number (#678). This chemical compound exhibits characteristics of toxicity, ignitability, and reactivity.

7. Conclusions

The results of the soil samples analyzed showed that the soil in the tank farm area down to a depth of 10-feet below surface is contaminated with Sodium Hypochlorite material. The range of the contamination is from less than 1.0 wppm to 13.0 wppm.

A high concentration of sodium hypochlorite in soil was found in the soil sampling area around B-5. The concentrations of sodium hypochlorite were found to be somewhat higher at the shallow ground areas such as 2-4 feet below the surface. As the depth of the soil goes deeper, the concentration of sodium hypochlorite becomes lower. This indicates that this hazardous chemical spill is concentrated in the shallow ground areas.

However, since the bottom of the bored holes (10-feet below surface) showed still significant contamination; for example, B-3-10 sample showed 4.0 wppm, B-6-10 showed 3.57 wppm, and B-7-10 showed 4.62 wppm.

The depth-to-groundwater in the subject area is in excess of 100- feet below surface. Since the NaOCl contamination appears to be confined in the shallow area such as within 10-20 feet below surface, the possibility of NaOCl contamination extending into the groundwater at the subject site is considered unlikely at this time.

Since the contaminant(NaOCl, Sodium Hypochlorite) is known as a hazardous chemical(toxic, ignitable, and reactive), it should be warned to the plant operation and maintenance people that no direct exposure to human beings to the NaOCl chemical or NaOCl-contaminated soil be allowed at the subject site area until after a thorough contamination assessment is made and the site is remediated, if necessary.

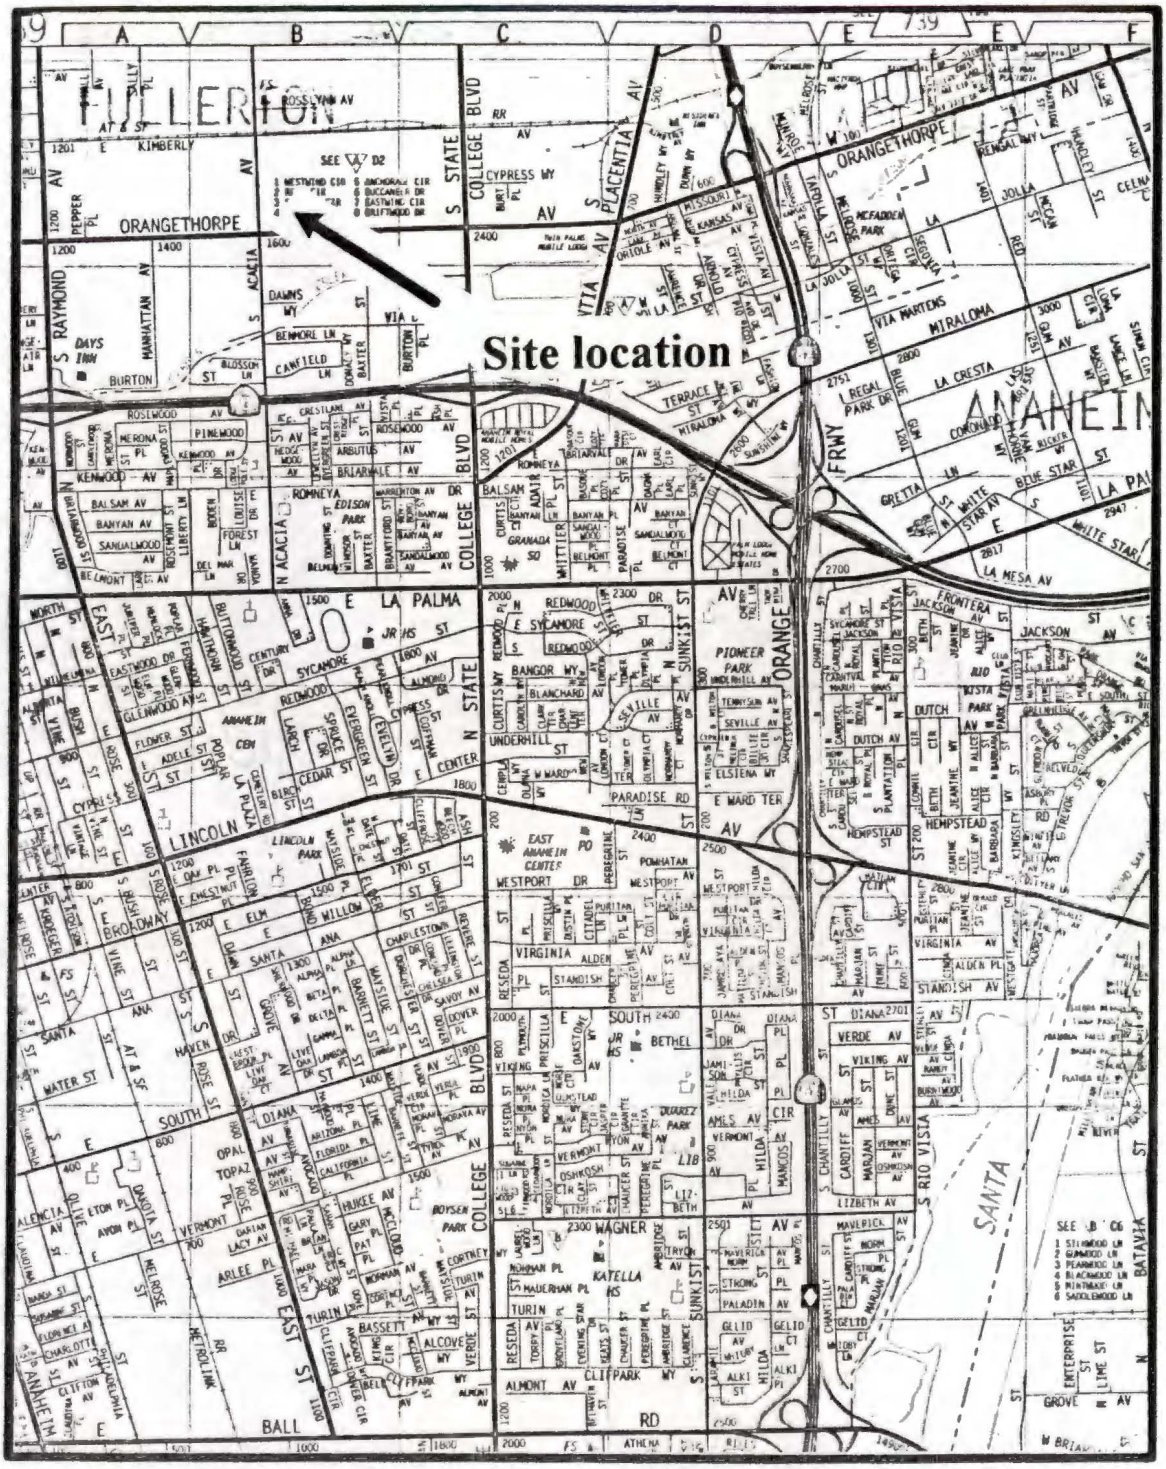
8. Recommendations

Since the chemical spilled onto the ground is a hazardous material(Sodium Hypochlorite) and the bottoms of the bored holes are still shown contaminated, a further boring/sampling/testing is recommended in order to delineate the vertical and the horizontal extent of the plume of the contamination.

Further boring below 10-feet depth is recommended especially in the area of B-3, B-6, and B-7 area where the soil samples at the bottom of the 10-feet borings showed more than 1.0 wppm of sodium hypochlorite contamination. The future borings at these locations should be drilled and sampled until the soil sample analysis shows less than 1.0 wppm of sodium hypochlorite. The maximum level of contaminants to be left at the site was chosen at 1.0 wppm, because the current detection limit of the NaOCl is 1.0 wppm.

The technical and economic feasibility for soil remediation will be studied after the second phase of the soil sampling and analysis work is finished. By that time, we shall know how deep and how wide the size of the soil contamination is at the site. Some of the possible methods of remediation that will be studied are as follows:

(l). Excavation and Treatment At An Off-site Location

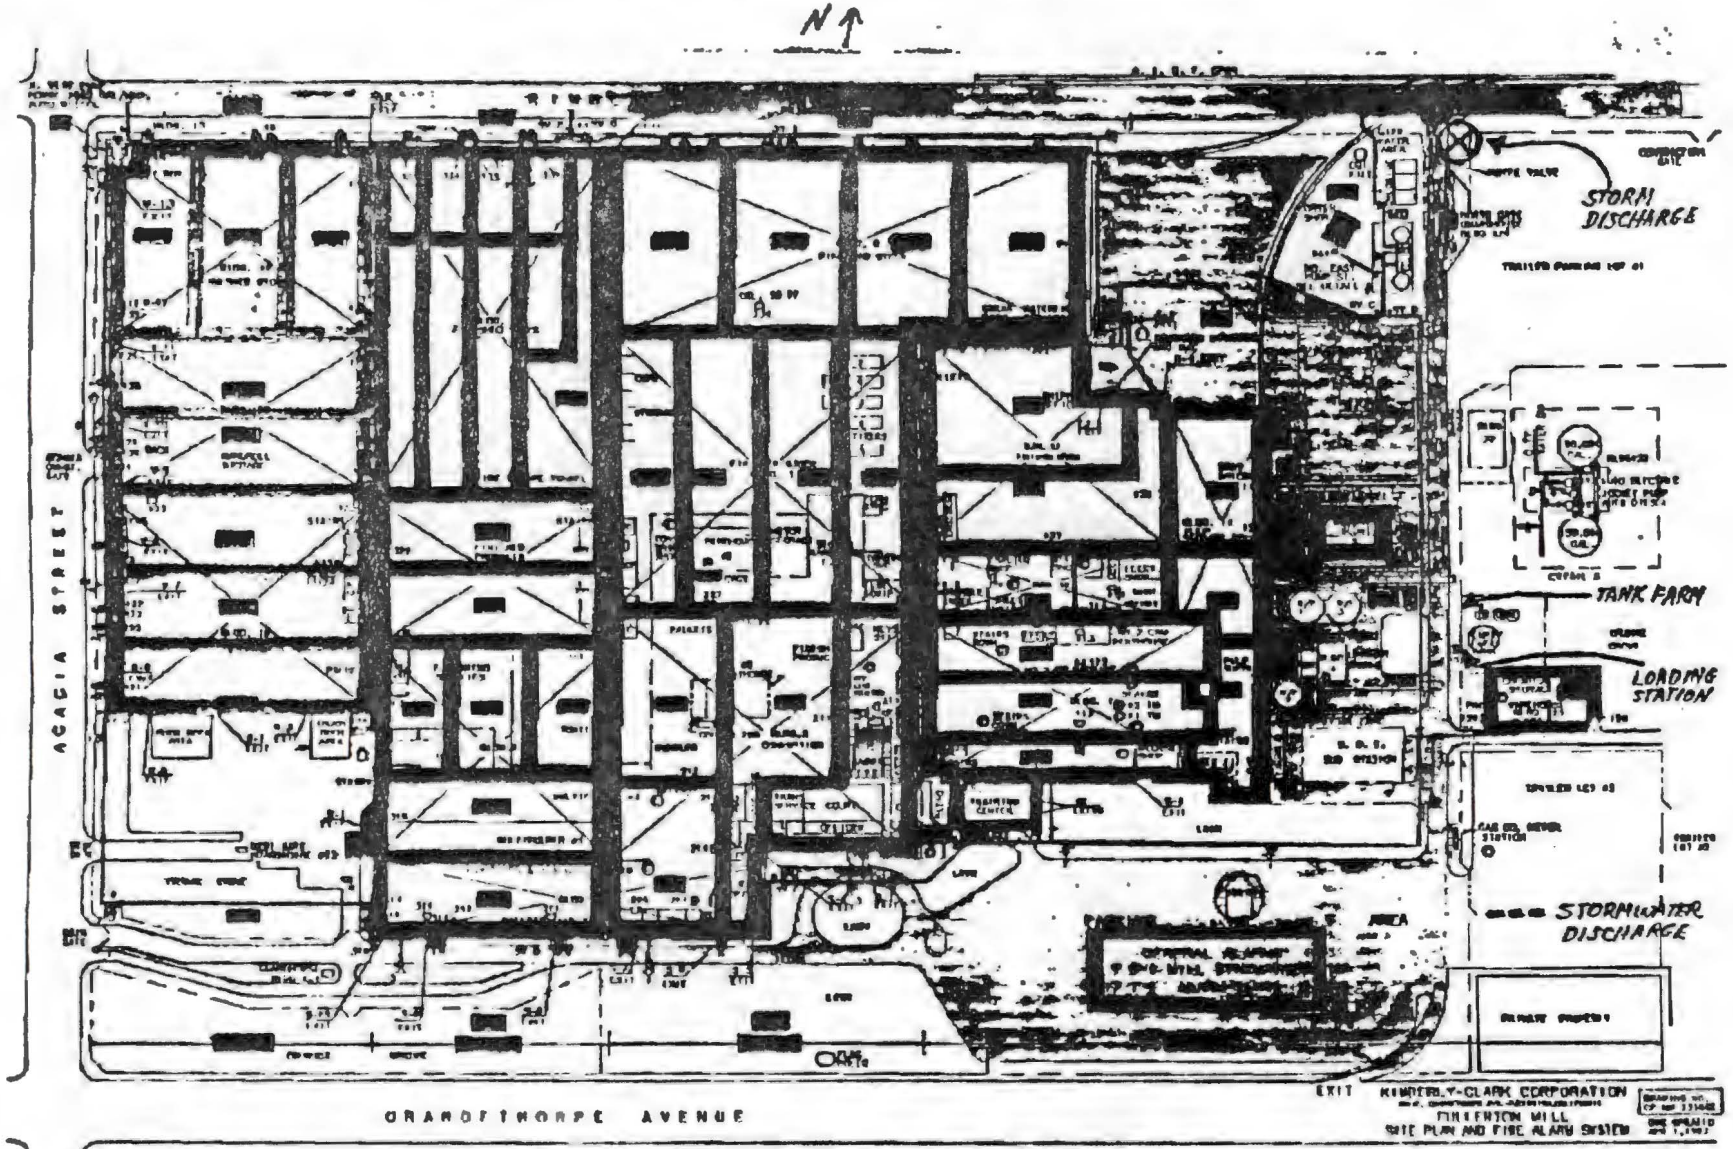


-Treatment may include passive aeration for NaOCl decomposition.

-Or, Treatment may include active aeration with air injection method.

-Or, Treatment may include spraying a neutralization chemical in order to convert NaOCl into NaCl salt. NaCl salt is a non-hazardous chemical, and thus will be satisfactory to leave in the soil. Some of the chemicals that can be used as neutralization-chemical is sodium bisulfite and ferrous salt solutions.

(2). On-site Air Injection Method



-If excavation and disposal is not feasible, air injection wells will be drilled and installed so that air may be injected into the underground site for neutralization of NaOCl into NaCl.

CERTIFICATE OF ANALYSIS

Job No. 709065 **Date: 10-07-97**

This is the Certificate of Analysis for the following samples:

Client	: Western Environmental Eng. Co
Contact person	: Jack Liu
Project No.	:
Project	:
Project site	:
Date of sample	: 09-29-97
Date Received	: 09-29-97
Number of Samples	: 33
Sample Type:	: Soil

Samples were labeled as follows:

SAMPLE IDENTIFICATION	LABORATORY NUMBER
B-1-2'	709065-01A
B-1-4'	709065-02A
B-1-6'	709065-03A
B-1-8'	709065-04A
B-1-10'	709065-05A
B-2-2'	709065-06A

CERTIFICATE OF ANALYSIS

Job No. 710012 Date: 10-08-97

This is the Certificate of Analysis for the following samples:

Client	: Western Environmental Eng. Co
Contact person	: Jack Liu
Project	:
Date of sample	: 10-06-97
Date Received	: 10-06-97
Number of Samples	: 15
Sample Type:	: Soil

Samples were labeled as follows:

SAMPLE IDENTIFICATION	LABORATORY NUMBER
B-8-2'	710012-01A
B-8-4'	710012-02A
B-8-6'	710012-03A

Sodium Hypochlorite as Hazardous Material

"FIA"	means Federal Insurance Administration;
"FR"	means Federal Register;
"H"	means hazard code for Acute Hazardous Waste;
"HSC"	means Health and Safety Code;
"HWCA"	means Hazardous Waste Control Act (chapter 6.5 (commencing with section 25100) of division 20 of the Health and Safety Code);
"I"	means hazard code for ignitable waste and the potential hazardous property of being ignitable;
"Kg"	means the unit of measure, kilogram;
"NACE"	means National Association of Corrosion Engineers;
"NPDES"	means National Pollutant Discharge Elimination System;
"POHC"	means Principal Organic Hazardous Constituent;
"POTW"	means Publicly Owned Treatment Works;
"R"	means hazard code for reactive waste and the potential hazardous property of being reactive;
"RCRA"	means Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. section 6901 et seq.);
"SAE"	means Society of Automotive Engineers;
"SAE steel"	means a grade or type of steel;
"SDWA"	means Safe Drinking Water Act of 1976, as amended (42 U.S.C. section 300 f et seq.);
SIC"	means Standard Industrial Classification;
"SQG"	means Small Quantity Generator;
"STLC"	means Soluble Threshold Limit Concentration;
"SW–846"	means "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods";
"SWMU"	means Solid Waste Management Unit;
"T"	means hazard code for Toxic Waste with a constituent or constituents listed in Appendix VIII of chapter 11;
"TC"	means Toxicity Characteristic;
"TCLP"	means Toxicity Characteristics Leaching Procedure;
"TTLC"	means Total Threshold Limit Concentration;
"TTU"	means Transportable Treatment Unit;
"UIC"	means Underground Injection Control;
"U.S.C."	means United States Code;
"USDW"	means Underground Source of Drinking Water;
"USEPA"	means United States Environmental Protection Agency;
"WET"	means Waste Extraction Test;
"X"	means the potential hazardous property of being toxic by any of the parameters in section 66261.24;

NOTE: Authority cited: Sections 208, 25150 and 25159, Health and Safety Code. Reference: Sections 25141 and 25159, Health and Safety Code.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

Article 3. Variances

§ 66260.21. Petitions for Equivalent Testing or Analytical Methods.

(a) The Department shall only grant a variance from the provisions of this chapter to allow use of a test method or analytical method alternative to that prescribed in chapter 11 of this division for use in classifying a specific non–RCRA hazardous waste or a RCRA hazardous waste if the proposed testing or analytical method has been added to 40 CFR Parts 261, 264, or 265 per 40 CFR section 260.21. For the variance to be granted, the applicant must show to the satisfaction of the Department that the proposed alternative test method or analytical method is equal or superior to the appropriate corresponding method in chapter 11 of this division, when applied to the specific waste with respect to accuracy, precision, sensitivity and stringency.

(b) An application for a variance pursuant to section 66260.21(a) shall include all of the following:

(1) the name and address of the generator of the waste and where the waste is located;

(2) a complete description of the waste, including its composition and source or process of generation;

(3) a complete description of the proposed alternative test method or analytical method, including all equipment and procedural steps used;

(4) a comparison of results obtained from a statistically significant number of replicate trials with the proposed alternative test method or analytical method with those results obtained from use of the appropriate corresponding method prescribed in chapter 11 of this division when both methods are applied simultaneously to the applicant's waste;

(5) an assessment of any factors which might interfere with or limit the applicability of the proposed test method or analytical method;

(6) a description of the quality control and quality assurance procedures to be followed to ensure the accuracy, precision, sensitivity and stringency of the proposed test method or analytical method.

(c) The Department shall, within 60 days after receipt of an application for a variance pursuant to section 66260.21(a), notify the applicant that the application is complete and accepted for processing by the Department or that the application is incomplete and what further information is required.

(d) The Department shall, within 180 days of receipt of a complete application for a variance pursuant to section 66260.21(a), notify the applicant that the request for a variance is granted or denied.

(e) If the variance requested pursuant to section 66260.21(a) is denied, the Department shall provide to the applicant in writing the reason for the denial.

NOTE: Authority cited: Sections 208 and 25159, Health and Safety Code and Section 15376, Government Code. Reference: Sections 25141, 25143 and 25159.5, Health and Safety Code and Section 15376, Government Code.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66260.200. Classification of a Waste as Hazardous or Nonhazardous.

(a) A waste shall be classified a hazardous waste if it meets the definition of a hazardous waste in section 66261.3.

(b) No person shall deviate from the provisions of this chapter in the management of a hazardous waste, except as provided for in section 66260.200(f) or section 66260.210.

(c) It shall be the generator's responsibility to determine if the waste is classified as a hazardous waste pursuant to section 66260.200(a). If the generator determines that the waste is hazardous, the waste shall be managed pursuant to the provisions of this division. If the generator determines that the waste is nonhazardous, the generator, except as provided for in section 66260.200(f), may either proceed to manage the waste as nonhazardous or apply to the Department for concurrence with the nonhazardous determination through the notification procedure set forth in section 66260.200(d) before managing the waste as nonhazardous. A generator who incorrectly determines that a hazardous waste is nonhazardous and fails to manage the waste pursuant to the provisions of this division is in violation of the requirements of this division and is subject to enforcement action.

(d) If a person chooses to obtain departmental concurrence with the nonhazardous waste determination, a notification shall be submitted to the Department which includes all information required by section 66260.200(m). Pending concurrence by the Department pursuant to section 66260.200(e), that person shall manage the waste as hazardous waste.

(e) The Department, within 30 days of receipt of a notification pursuant to section 66260.200(d), shall acknowledge in writing receipt of the notification. Within 60 days of receipt of a notification, the Department shall notify the sender of the notification in writing that concurrence with that person's classification of the waste as nonhazardous is approved, disapproved, or that the notification is incomplete or inadequate and what additional information is needed. Upon receipt of the additional information, the Department, within 60 days of receipt of the additional information, shall notify the sender of the notification in writing that concurrence of that person's classification of the waste as nonhazardous is approved or disapproved. The notification shall be considered disapproved if the sender of the notification fails to provide the additional information with-

NOTE: Authority cited: Section 208, Health and Safety Code. Reference: Sections 25245 and 25246, Health and Safety Code.

HISTORY

1. New section filed 1–3–85; effective thirtieth day thereafter (Register 85, No. 2).
2. Repealer filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66015. Cargo Tank.

NOTE: Authority cited: Sections 208, 25150 and 25168.1, Health and Safety Code. Reference: Sections 25163(d), 25168, 25168.2, 25168.3 and 25169.1, Health and Safety Code.

HISTORY

1. New section filed 10–6–81 as an emergency; effective upon filing (Register 81, No. 42). A Certificate of Compliance must be transmitted to OAL within 120 days or emergency language will be repealed on 2–3–82.
2. Certificate of Compliance transmitted to OAL 2–2–82 and filed 3–8–82 (Register 82, No. 11).
3. Repealer filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

in 90 days from the date the information was requested. However, that person may request in writing an extension, up to 90 days, within which the information shall be submitted or the notification shall be considered disapproved.

(f) If a person wishes to classify and manage as nonhazardous a waste which would otherwise be a non–RCRA hazardous waste because it has mitigating physical or chemical characteristics which render it insignificant as a hazard to human health and safety, livestock and wildlife, that person shall apply to the Department for its approval to classify and manage the waste as nonhazardous. The application for approval shall include the information required by section 66260.200(m). The Department, within 30 days of receipt of the application, shall acknowledge in writing receipt of the application. Pending written approval by the Department, the applicant shall manage the waste as hazardous waste. Within 60 days of receipt of an application, the Department shall notify the applicant in writing that the application for classification and management of the waste as nonhazardous is approved, disapproved, or that the application is incomplete or inadequate and what additional information is needed. Upon receipt of the additional information, the Department, within 60 days of receipt of the additional information, shall notify the applicant in writing that the application for classification and management of the waste as nonhazardous is approved or disapproved. The application shall be considered disapproved if the applicant fails to provide the additional information in writing 90 days from the date the information was requested. However, the applicant may request, in writing, an extension up to 90 days, within which the information shall be submitted or the application shall be considered disapproved.

(g) The Department may find that the notification submitted by a person pursuant to section 66260.200(d) or the application submitted pursuant to section 66260.200(f) is incomplete or inadequate for reasons which may include any of the following:

(1) the application is not complete or there is insufficient information on which to classify the waste; or

(2) the methods used in testing or analyzing the waste are not those prescribed in chapter 11 of this division, or have not been approved by the Department pursuant to section 66260.21(a) as alternative methods; or

(3) sampling and sample management were not in accord with Appendix I of chapter 11 and Table 3 of Appendix III of chapter 11; or

(4) representative samples of the waste are required pursuant to section 66260.200(k) in order that the Department may independently assess the properties of the waste.

(h) If the Department disapproves of a person's determination that a waste is nonhazardous or a person's application to manage as nonhazardous a waste which would otherwise be a non–RCRA hazardous waste, the Department shall give in writing the reason for the disapproval.

(i) If the Department at any time finds that the information submitted or generated for a determination pursuant to section 66260.200(c), a concurrence pursuant to section 66260.200(d) or an approval pursuant to 66260.200(f) was erroneous for any of the following reasons, the Department may notify that person in writing of the deficiencies:

(1) the results given in the laboratory report or other submitted data demonstrate that the waste is hazardous pursuant to the criteria given in chapter 11 of this division; or

(2) fraudulently derived information is utilized or included; or

(3) analysis or testing of the waste performed by the Department or other agencies or information available to the Department demonstrates that the waste is hazardous according to the criteria given in chapter 11 of this division.

(j) A waste person, upon receipt of such notice under section 66260.200(i), shall immediately cease managing the subject waste as a nonhazardous waste and shall manage the waste as hazardous waste.

That person may submit to the Department an amended notification or application. Within 30 days of receipt of an amended notification or application, the Department shall acknowledge in writing receipt of the amended notification or application. Within 60 days of receipt of an amended notification or application, the Department shall notify the sender of the notification or the applicant in writing that the notification or application is approved, disapproved, or that the notification or application is incomplete or inadequate and what additional information is needed. Upon receipt of the additional information, the Department, within 60 days of receipt of the additional information, shall notify the sender of the notification or the applicant in writing that the notification or application is approved or disapproved. The notification or application shall be considered disapproved if the additional information is not provided within 90 days from the date the information was requested. However, the sender of the notification or the applicant may request in writing an extension, up to 90 days, within which the information shall be submitted or the notification or application shall be considered disapproved.

(k) Not later than 60 days after receipt of an adequate notification or application under section 66260.200(d) or (f), the Department may request representative samples of wastes. The sender of the notification or the applicant shall maintain representative samples for that period of time. The quantity of sample submitted shall be adequate to conduct verification tests. Samples shall be collected, packaged, transported and stored in accordance with the sample management procedures in "Test Methods for Evaluating Solid Waste, Physical and Chemical Methods" (SW–846), Third Edition, incorporated by reference in section 66260.11.

(l) If the waste changes so that the prior notification or application as nonhazardous no longer adequately assesses the waste by the criteria which may render it hazardous, the waste shall be managed as hazardous.

(m) A person seeking Department concurrence with a nonhazardous determination or approvalto classify and manage as nonhazardous a waste which would otherwise be a non–RCRA hazardous waste shall supply the following information to the Department:

(1) name, mailing and billing address, location, contact person and phone number for the generating facility;

(2) A description of the waste including a physical description, quantities produced per unit time, a detailed description of the generating process and current waste disposal method;

(3) information on the sampling of the waste including the name and address of the firm sampling the waste, the name(s) of the person(s) sampling the waste, dates and locations of sample collection and a description of the sampling methodology and sample handling and preservation procedures;

(4) testing laboratory information including the name, address, and certification number of the testing laboratory, the test methods used and references for locating these methods, the name(s) and qualifications of the person(s) testing the waste, the method for preparation of laboratory samples from field samples and information needed to identify each sample;

(5) laboratory results including results from all tests required by chapter 11 of this division and a listing of the waste's constituents. Results shall include analyses from a minimum of four representative samples as specified in chapter 9 of "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," SW–846, 3rd Edition, U.S. Environmental Protection Agency, 1986 (incorporated by reference in section 66260.11 of this chapter);

(6) certification of the veracity of the information submitted, signed and dated by a person who is the responsible manager of the facility.

(n) Notwithstanding the timeframes specified above, the Department shall not notify the applicant of the Department's decision regarding a notification submitted pursuant to subsection (d) of this section or an application submitted pursuant to subsection (f) of this section until the California Board of Equalization receives the fee assessed pursuant to Health and Safety Code section 25205.8.

NOTE: Authority cited: Sections 208, 25141 and 25150, Health and Safety Code and Section 15376, Government Code. Reference: Sections 25205.8, 25141 and 25143, Health and Safety Code and Section 15376, Government Code.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66260.210. Variances.

(a) The department may grant a variance from one or more of the requirements of this division and chapter 6.5 of division 20 of the Health and Safety Code pursuant to Health and Safety Code section 25143.

(b) The Department shall within 60 calendar days after receipt of an application for a variance inform the applicant in writing that the application is complete and accepted for filing, or that the application is incomplete and what specific information is required for the application to be submitted in a complete form. The Department shall, within 60 days of determining that an application is complete, inform the applicant in writing that variance is granted or denied.

(c) If the variance requested is denied, the Department shall provide to the applicant in writing the reason for the denial.

NOTE: Authority cited: Sections 208, 25141 and 25150, Health and Safety Code and Section 15376, Government Code. Reference: Sections 25141 and 25143, Health and Safety Code and Section 15376, Government Code.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

Chapter 11. Identification and Listing of Hazardous Waste

Article 1. General

§ 66261.1. Purpose and Scope.

(a) This chapter identifies those wastes which are subject to regulation as hazardous wastes under this division and which are subject to the notification requirements of Health and Safety Code section 25153.6. In this chapter:

(1) article 1 defines the terms "waste" and "hazardous waste," identifies those wastes which are excluded from regulation under this division, and establishes special management requirements for hazardous waste which is recycled and establishes rules for classifying and managing contaminated containers;

(2) article 2 sets forth the criteria used by the Department to identify characteristics of hazardous waste;

(3) article 3 identifies characteristics of hazardous waste;

(4) article 4 lists particular hazardous wastes;

(5) article 5 identifies categories of hazardous waste including RCRA hazardous waste, non–RCRA hazardous waste, extremely hazardous waste, and special waste, and establishes criteria and management standards for special waste and extremely hazardous waste;

(b)(1) The definition of waste contained in this chapter applies only to wastes that also are hazardous pursuant to this division and chapter 6.5 of division 20 of the Health and Safety Code. It does not apply to materials (such as non–hazardous scrap, paper, textiles, or rubber) that are not otherwise hazardous wastes.

(2) This chapter identifies only some of the materials which are wastes and hazardous wastes for the purposes of Health and Safety Code sections 25185 and 25187.1. A material which is not defined as a waste or identified as a hazardous waste pursuant to this chapter, is still a waste and a hazardous waste for purposes of Health and Safety Code sections 25185 and 25187.1, if the Department has reason to believe that a material may be a waste within the meaning of Health and Safety Code section 25124 and a hazardous waste within the meaning of Health and Safety Code section 25117.

NOTE: Authority cited: Sections 208, 25141, 25150 and 25159, Health and Safety Code. Reference: Sections 25117, 25124, 25141, 25159, 25159.5, 25185 and 25187.1, Health and Safety Code and 40 CFR Section 261.1.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66261.2. Definition of Waste.

(a) "Waste" means any discarded material of any form (for example, liquid, semi–solid, solid or gaseous) that is not excluded by section 66261.4(a) or that is not excluded by Health and Safety Code section 25143.2(b) or Health and Safety Code section 25143.2(d).

(b) A discarded material is any material which is any of the following:

(1) relinquished as explained in subsection (c) of this section; or

(2) recycled, as explained in subsection (d) of this section; or

(3) considered inherently waste–like, as explained in paragraph (e) of this section.

(c) A material is a waste if it is relinquished by being any of the following:

(1) disposed of;

(2) burned or incinerated;

(3) accumulated, stored or treated, but not recycled, before or in lieu of, being relinquished by being disposed of, burned or incinerated.

(d) A material is a waste if it is recycled, or accumulated, stored or treated before recycling, by being managed:

(1) through being used in a manner constituting disposal:

(A) materials noted with an "*" in column 1 of Table I are wastes when they are:

1. applied to or placed on the land in a manner that constitutes disposal; or

2. used to produce products that are applied to or placed on the land or are otherwise contained in products that are applied to or placed on the land (in which cases the product itself is a waste);

(B) however, commercial chemical materials listed in section 66261.33, which are discarded commercial chemical products, off–specification species, container residues, or spill residues thereof, and which are applied to the land and application to the land is their ordinary manner of use are non–RCRA hazardous wastes. Commercial chemical products which are "retrograde materials" as defined in section 66260.10 are not wastes until they become "recyclable materials" pursuant to subsection (e) of the definition of "recyclable materials" in section 66260.10;

(2) through being burned for energy recovery:

(A) materials noted with an "*" in column 2 of Table 1 are wastes when they are:

1. burned to recover energy;

2. used to produce a fuel or are otherwise contained in fuels (in which cases the fuel itself is a waste);

(B) however, commercial chemical materials listed in section 66261.33, which are discarded commercial chemical products, off–specification species, container residues, or spill residues thereof, and which are fuels are non–RCRA hazardous wastes. Commercial chemical products which are "retrograde materials" as defined in section 66260.10 are not wastes until they become "recyclable materials" pursuant to subsection (e) of the definition of "recyclable materials" in section 66260.10;

(3) through being reclaimed: materials noted with an "*" or "**" in column 3 of Table 1 are wastes when reclaimed;

(4) through being accumulated speculatively: materials noted with an "*" or "**" in column 4 of Table 1 are wastes when accumulated speculatively.

TABLE 1

Column	*Use Constituting Disposal 66261.2(d)(1)* (1)	*Energy Recovery/Fuel 66261.2(d)(2)* (2)	*Reclamation 66261.2(d)(3)* (3)	*Speculative Accumulation 66261.2(d)(4)* (4)
Spent Materials	*	*	*	*
Sludges (listed in section 66261.31 or 66261.32)	*	*	*	*
Sludges exhibiting a characteristic of hazardous waste	*	*	**	*
By–products (listed in section 66261.31 or 66261.32)	*	*	*	*
By–products exhibiting a characteristic of hazardous waste	*	*	**	*
Commercial chemical products (listed in section 66261.33)	*	*	**	**

Note: The terms "spent materials," "sludges," and "by–products" are defined in section 66260.10.

* Except as provided in sections 66261.2(d)(1)(B) and 66261.2(d)(2)(B), a material designated by a single asterisk in Column (1), (2), (3), or (4) is a waste which is not eligible to be classified as a non–RCRA hazardous waste.

** Unless exempt pursuant to Health and Safety Code section 25143.2(d), a material designated with a double asterisk in Column (3) or (4) which is identified as a hazardous waste pursuant to section 66261.3 is a non–RCRA hazardous waste. Commercial chemical products which are "retrograde materials" as defined in section 66260.10 are not wastes until they become "recyclable materials" pursuant to subsection (e) of the definition of "recyclable materials" in section 66260.10.

(e) A material is a waste if it is inherently waste–like when it is recycled. The following materials are wastes when they are recycled: hazardous Waste Nos. F020, F021 (unless used as an ingredient to make a product at the site of generation), F022, F023, F026 and F028.

(f) A material is a waste if it poses a threat to human health or the environment and meets either, or both, of the following:

(1) it is mislabeled or not adequately labeled, unless the material is correctly labeled or adequately labeled within 10 days after the material is discovered to be mislabeled or inadequately labeled;

(2) it is packaged in deteriorated or damaged containers, unless the material is contained in sound or undamaged containers within 96 hours after the containers are discovered to be deteriorated or damaged.

NOTE: Authority cited: Sections 208, 25141, 25150, and 25159, Health and Safety Code. Reference: Sections 25120.5, 25121, 25124, 25143.2, 25159 and 25159.5, Health and Safety Code and 40 CFR Section 261.2.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66261.3. Definition of Hazardous Waste.

(a) A waste, as defined in section 66261.2, is a hazardous waste if:

(1) it is not excluded from classification as a waste or a hazardous waste under Health and Safety Code section 25143.2(b) or 25143.2(d) or section 66261.4; and

(2) it meets any of the following criteria:

(A) it exhibits any of the characteristics of hazardous waste identified in article 3 of this chapter;

(B) it is listed in article 4 of this chapter and has not been excluded by the USEPA Administrator from 40 CFR Part 261 Subpart D pursuant to 40 CFR sections 260.20 and 260.22;

(C) it is listed in or contains a constituent listed in Appendix X to this chapter. However, the waste is not a hazardous waste if:

1. it is determined that the waste does not meet the criteria of subsection (a)(2)(B) of this section; and

2. it is determined that the waste does not meet the criteria of subsection (a)(2)(A) of this section by:

i. testing the waste according to the methods set forth in article 3 of this chapter, or according to an equivalent method approved by the Department pursuant to section 66260.21; or

ii. applying knowledge of the hazardous properties of the waste in light of the materials or the processes used and the characteristics set forth in article 3 of this chapter;

(D) it is a mixture of a hazardous waste that is listed in article 4 of this chapter other than a hazardous waste listed with hazard code (T) or (H), and another waste, unless the resultant mixture no longer exhibits any characteristic of hazardous waste identified in article 3 of this chapter;

(E) it is a mixture of a waste and one or more hazardous wastes listed in article 4 of this chapter which has not been excluded by the USEPA Administrator from 40 CFR Part 261 Subpart D pursuant to 40 CFR sections 260.20 and 260.22. However, the following mixtures of wastes and hazardous wastes listed in article 4 of this chapter are not hazardous wastes (except by application of subsection (a)(2)(A) or (a)(2)(B) of this section) if the generator can demonstrate that the mixture consists of wastewater, the discharge of which is subject to regulation under either section 402 or section 307(b) of the Clean Water Act (including wastewater at facilities which have eliminated the discharge of wastewater), and:

1. one or more of the following spent solvents listed in section 66261.31 — carbon tetrachloride, tetrachloroethylene, trichoroethylene — provided, that the maximum total weekly usage of these solvents (other than the amounts that can be demonstrated not to be discharged to wastewater) divided by the average weekly flow of wastewater into the headworks of the facility's wastewater treatment or pretreatment system does not exceed 1 part per million; or

2. one or more of the following spent solvents listed in section 66261.31 — methylene chloride, 1,1,1–trichloroethane, chlorobenzene, o–dichlorobenzene, cresols, cresylic acid, nitrobenzene, toluene, methyl ethyl ketone, carbon disulfide, isobutanol, pyridine, spent chlorofluorocarbon solvents — provided that the maximum total weekly usage of these solvents (other than the amounts that can be demonstrated not to be discharged to wastewater) divided by the average weekly flow of wastewater into the headworks of the facility's wastewater treatment or pretreatment system does not exceed 25 parts per million; or

3. heat exchanger bundle cleaning sludge from the petroleum refining industry (EPA Hazardous Waste No. K050); or

4. a discarded commercial chemical product, or chemical intermediate listed in section 66261.33 arising from "de minimis" losses of these materials from manufacturing operations in which these materials are used as raw materials or are produced in the manufacturing process. For purposes of this subsection, "de minimis" losses include those from normal material handling operations (e.g., spills from the unloading or transfer of materials from bins or other containers, leaks from pipes, valves or other devices used to transfer materials); minor leaks of process equipment, storage tanks or containers; leaks from well–maintained pump packings and seals; sample purgings; relief device discharges; discharges from safety showers and rinsing and cleaning of personal safety equipment; and rinsate from empty containers or from containers that are rendered empty by that rinsing; or

5. wastewater resulting from laboratory operations containing toxic (T) wastes listed in article 4 of this chapter, provided that the annualized average flow of laboratory wastewater does not exceed one percent of total wastewater flow into the headworks of the facility's wastewater treatment or pretreatment system, or provided the wastes, combined annualized average concentration does not exceed one part per million in the headworks of facility's wastewater treatment or pretreatment facility. Toxic (T) wastes used in laboratories that are demonstrated not to be discharged to wastewater are not to be included in this calculation;

(F) it is not classified as a hazardous waste by application of the criteria in subsections (a)(2)(A) through (a)(2)(E) of this section, but has been classified as a hazardous waste by the Department because it otherwise conforms to the definition of hazardous waste set forth in Health and Safety Code section 25117.

(b) A waste which is not excluded from classification as a waste or hazardous waste under the provisions of section 66261.4(b) or Health and Safety Code section 25143.2(b) or 25143.2(d) becomes a hazardous waste when any of the following events occur:

(1) in the case of a waste listed in article 4 of this chapter, when the waste first meets the listing description set forth in article 4 of this chapter;

(2) in the case of a mixture of waste and one or more hazardous wastes listed in article 4 of this chapter, when the hazardous waste listed in article 4 of this chapter is first added to the waste.

(3) In the case of any other waste (including a waste mixture), when the waste exhibits any of the characteristics identified in article 3 of this chapter.

(c)(1) A hazardous waste will remain a hazardous waste unless and until it meets the criteria of subsection (d) of this section. Except as otherwise provided in subsection (c)(2) of this section, any waste generated from the treatment, storage, or disposal of a hazardous waste, including any sludge, spill residue, ash, emission control dust or leachate including precipitation run–off is a hazardous waste. (However, materials that are reclaimed from wastes and that are used beneficially are not wastes and hence are not hazardous wastes under this provision unless the reclaimed material is burned for energy recovery or used in a manner constituting disposal.)

(c)(2) Waste pickle liquor sludge generated by lime stabilization of spent pickle liquor from the iron and steel industry (SIC Codes 331 and 332) is not hazardous even though it is generated from the treatment, storage, or disposal of a hazardous waste, unless it exhibits one or more of the characteristics of hazardous waste.

(d) Except as provided in subsection (e) of this section, any waste described in subsection (c) of this section is not a hazardous waste if it meets both of the following criteria:

(1) the waste does not exhibit any of the characteristics of hazardous waste identified in article 3 of this chapter; and

(2) in the case of a waste which is a waste listed in article 4 of this chapter, contains a waste listed under article 4 of this chapter or is derived from a waste listed in article 4 of this chapter (but not including precipitation run off), the waste also has been excluded by the USEPA Administrator from the lists of hazardous wastes in 40 CFR Part 261 Subpart D pursuant to 40 CFR sections 260.20 and 260.22.

NOTE: Authority cited: Sections 208, 25141, 25150 and 25159, Health and Safety Code. Reference: Sections 25117, 25141, 25159 and 25159.5, Health and Safety Code and 40 CFR Section 261.3.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66261.4. Exclusions.

(a) Materials which are not wastes. The following materials are not wastes for the purpose of this chapter:

(1) industrial wastewater discharges that are point source discharges subject to regulation under section 402 of the federal Clean Water Act, as amended (33 U.S.C. section 1342). This exclusion applies only to the actual point source discharge. It does not exclude industrial wastewaters while they are being collected, stored or treated before discharge, nor does it exclude sludges that are generated by industrial wastewater treatment;

(2) source, special nuclear or by–product material as defined by the federal Atomic Energy Act of 1954, as amended, (42 U.S.C. section 2011 et seq);

(3) spent sulfuric acid used to produce virgin sulfuric acid, unless it is accumulated speculatively as defined in section 66260.10.

(b) Wastes which are not hazardous wastes. The following wastes are not hazardous wastes:

(1) infectious waste which consists solely of the carcasses of animals, which is not otherwise hazardous, and which is handled, stored and disposed of according to all applicable requirements established by the Department of Food and Agriculture pursuant to provisions of chapter 1, part 1, division 5 (commencing with section 9101) and of chapter 5, part 3, division 9 (commencing with section 19200) of the Food and Agricultural Code;

(2) materials which are exempted or excluded from classification as solid waste or hazardous waste pursuant to 40 CFR section 261.4 if they do not exhibit a characteristic of a hazardous waste as set forth in article 3 of this chapter;

(c) hazardous wastes which are exempted from certain regulations. A hazardous waste which is generated in a product or raw material storage tank, a product or raw material transport vehicle or vessel, a product or raw material pipeline, or in a manufacturing process unit or an associated non–waste–treatment–manufacturing unit, is not subject to regulation under this division or to the notification requirements of Health and Safety Code section 25153.6 until it exits the unit in which it was generated, unless the unit is a surface impoundment, or unless the hazardous waste remains in the unit more than 90 days after the unit ceases to be operated for manufacturing, or for storage or transportation of product or raw materials;

(d) samples;

(1) except as provided in subsection (d)(2) of this section, a sample of solid waste or a sample of water, soil, or air, which is collected for the sole purpose of testing to determine its characteristics or composition, is not subject to any requirements of this division or to the notification requirements of Health and Safety Code section 25153.6 when:

(b) A container, or an inner liner removed from a container, which previously held a hazardous waste or a hazardous material is empty if it meets the criteria below:

(1) The container or the inner liner removed from a container is empty as defined in 40 CFR section 261.7(b) (revised as of 7/1/90), and

(2) The container or the inner liner removed from a container has been emptied by the generator as much as possible using methods commonly employed to remove waste or material from containers or inner liners, so that:

(A) If the material which the container or inner liner held is pourable, no material can be poured or drained from the container or inner liner when the container or inner liner is held in any orientation (e.g., tilted, inverted, etc.); or

(B) If the material which the container or inner liner held is not pourable, no material or waste remains in the container or inner liner that can feasibly be removed by scraping and chipping.

(c) To qualify for exemption under this section, an empty container or an inner liner removed from a container must be managed by one of the following methods:

(1) For a container of five gallons or less in capacity, or inner liner removed from a container of five gallons or less in capacity, by puncturing, shredding, crushing, or otherwise changing the container or inner liner to prevent subsequent use or reuse, and disposing of it at a solid waste facility, so long as the container or inner liner is packaged and transported in accordance with applicable U.S. Department of Transportation regulations; or

(2) For any container or inner liner, by puncturing, shredding, crushing, or otherwise changing the container or inner liner to prevent subsequent use or reuse, and reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value, so long as the container or inner liner is packaged and transported in accordance with applicable U.S. Department of Transportation regulations; or

(3) For any container or inner liner, by reconditioning or remanufacturing the container or inner liner onsite pursuant to 49 CFR section 173.28 (c) and (d) (revised at 55 FR 52402 – 52729) for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner pursuant to 49 CFR section 173.28 (c) and (d) (revised at 55 FR 52402 – 52729).

(d) Except as provided in subsections (f)(2) and (f)(3) of this section, emptied household hazardous material and pesticide containers of one gallon or less in capacity, which are drained until there is no continuous flow of liquid, are not subject to the provisions of this chapter.

(e) Except as provided in subsection (f), a compressed gas cylinder is exempt from regulation under this chapter and chapter 6.5 of division 20 of the Health and Safety Code when the pressure in the container approaches atmospheric pressure if the container is handled and reused in compliance with applicable State and federal law.

(f) The following containers are not exempt from regulation under this chapter or chapter 6.5 of division 20 of the Health and Safety Code pursuant to this section:

(1) Containers made of wood, paper, cardboard, fabric, or any other similarly absorptive material if the container was in direct contact with a hazardous waste or a hazardous material;

(2) Spent aerosol containers;

(3) Compressed gas cylinders which cannot be reused or whose reuse is prohibited.

(g) Any container, or inner liner removed from a container, which previously held a hazardous waste or hazardous material and which is not empty as defined in subsection (b) of this section, or otherwise exempt from regulation as a hazardous waste under this chapter or chapter 6.5 of division 20 of the Health and Safety Code (commencing with section 25100), shall be managed as a hazardous waste in accordance with this chapter and chapter 6.5 of division 20 of the Health and Safety Code (commencing with section 25100).

NOTE: Authority cited: Sections 208, 25141, and 25150, Health and Safety Code. Reference: Sections 25141, 25150, 25159.5, and 25143.2(d), Health and Safety Code; 40 CFR Section 261.7.

HISTORY

1. Renumbering and amendment of former section 66730 to section 66261.7(a)–(g) and new subsection (h) filed 5–24–91; operative 7–1–91 (Register 91, No. 22). A Certificate of Compliance must be transmitted to OAL by 6–28–91 or emergency language, subsections (a)–(g) will be repealed by operation of law on the following day.
2. New section refiled 6–28–91 as an emergency; operative 6–28–91 (Register 91, No. 41). A Certificate of Compliance must be transmitted to OAL by 10–28–91 or emergency language will be repealed by operation of law on the following day.

Article 2. Criteria for Identifying the Characteristics of Hazardous Waste

§ 66261.10. Criteria for Identifying the Characteristics of Hazardous Waste.

(a) The Department shall identify and define a characteristic of hazardous waste in article 3 of this chapter only upon determining that:

(1) a waste that exhibits the characteristic may:

(A) cause, or significantly contribute to, an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or

(B) pose a substantial present or potential hazard to human health or the environment when it is improperly treated, stored, transported, disposed of or otherwise managed; and

(2) the characteristic can be:

(A) measured by an available standardized test method which is reasonably within the capability of generators of waste or private sector laboratories that are certified by the Department pursuant to Chapter 44 of this division and available to serve generators of waste; or

(B) reasonably detected by generators of waste through their knowledge of their waste.

NOTE: Authority cited: Sections 208, 25141 and 25159, Health and Safety Code. Reference: Sections 25117, 25141, 25159 and 25159.5, Health and Safety Code and 40 CFR Section 261.10.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

Article 3. Characteristics of Hazardous Waste

§ 66261.20. General.

(a) A waste, as defined in section 66261.2, which is not excluded from regulation as a hazardous waste pursuant to section 66261.4(b), is a hazardous waste if it exhibits any of the characteristics identified in this article.

(b) A waste which is identified as a hazardous waste pursuant to one or more of the characteristics set forth in section 66261.21, 66261.22(a)(1), 66261.22(a)(2), 66261.23 or 66261.24(a)(1) is assigned the EPA Hazardous Waste Number set forth in this article for each characteristic that is applicable to that waste. These numbers shall be used in complying with the notification requirements of Health and Safety Code section 25153.6 and, where applicable, in the recordkeeping and reporting requirements under chapters 12 through 15, 18 and 20 of this division.

(c) Sampling and sample management of wastes and other materials for analysis and testing pursuant to this article shall be in accord with the sampling planning, methodology and equipment, and the sample processing, documentation and custody procedures specified in chapter nine of "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," SW–846, 3rd edition, U.S. Environmental Protection Agency, 1986 (incorporated by reference, see section 66260.11 of this chapter).

In addition to the sampling methods in chapter nine of SW–846, the Department will consider samples obtained using any of the other applicable sampling methods specified in Appendix I of this chapter to be representative samples.

NOTE: Authority cited: Sections 208, 25141 and 25159, Health and Safety Code. Reference: Sections 25141, 25159 and 25159.5, Health and Safety Code and 40 CFR Section 261.20.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66261.21. Characteristic of Ignitability.

(a) A waste exhibits the characteristic of ignitability if representative samples of the waste have any of the following properties:

(1) it is a liquid, other than an aqueous solution containing less than 24 percent alcohol by volume, and has a flash point less than 60°C (140°F), as determined by a Pensky–Martens Closed Cup Tester, using the test method specified in ASTM Standard D–93–79 or D–93–80 (incorporated by reference, see section 66260.11), or a Setaflash Closed Cup Tester, using the test method specified in ASTM Standard D–3278–78 (incorporated by reference, see section 66260.11), or as determined by an equivalent test method approved by the Department pursuant to section 66260.21;

(2) it is not a liquid and is capable, under standard temperature and pressure, of causing fire through friction, absorption of moisture or spontaneous chemical changes and, when ignited, burns so vigorously and persistently that it creates a hazard;

(3) it is an ignitable compressed gas as defined in 49 CFR section 173.300 (as amended September 30, 1982) and as determined by the test methods described in that regulation or equivalent test methods approved by the Department pursuant to section 66260.21;

(4) it is an oxidizer as defined in 49 CFR section 173.151 (as amended May 31, 1979).

(b) A waste that exhibits the characteristic of ignitability has the EPA Hazardous Waste Number of D001.

NOTE: Authority cited: Sections 208, 25141 and 25159, Health and Safety Code. Reference: Sections 25117, 25120.2, 25141, 25159 and 25159.5, Health and Safety Code and 40 CFR Section 261.21.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66261.22. Characteristic of Corrosivity.

(a) A waste exhibits the characteristic of corrosivity if representative samples of the waste have any of the following properties:

(1) it is aqueous and has a pH less than or equal to 2 or greater than or equal to 12.5, as determined by a pH meter using either the EPA test method for pH or an equivalent test method approved by the Department pursuant to section 66260.21. The EPA test method for pH is specified as Method 9040 in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," SW–846, 3rd edition, U.S. Environmental Protection Agency, 1986 (incorporated by reference, see section 66260.11);

(2) it is a liquid and corrodes steel (SAE 1020) at a rate greater than 6.35 mm (0.250 inch) per year at a test temperature of 55°C (130°F) as determined by the test method specified in NACE Standard TM–01–69 as standardized in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," SW–846, 3rd edition, U.S. Environmental Protection Agency, 1986 (incorporated by reference, see section 66260.11) or an equivalent test method approved by the Department pursuant to section 66260.21;

(3) it is not aqueous and, when mixed with an equivalent weight of water, produces a solution having a pH less than or equal to 2 or greater than or equal to 12.5, as determined by a pH meter using either Method 9040 in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," SW–846, 3rd edition, U.S. Environmental Protection Agency, 1986 (incorporated by reference, see section 66260.11) or an equivalent test method approved by the Department pursuant to 66260.21;

(4) it is not a liquid and, when mixed with an equivalent weight of water, produces a liquid that corrodes steel (SAE 1020) at a rate greater than 6.35 mm (0.250 inch) per year at a test temperature of 55°C (130°F) as determined by the test method specified in NACE Standard TM–01–69 as standardized in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," SW–846, 3rd edition, U.S. Environmental Protection Agency, 1986 (incorporated by reference, see section 66260.11) or an equivalent test method approved by the Department pursuant to 66260.21.

(b) A waste that exhibits the characteristic of corrosivity specified in subsection (a)(1) or (a)(2) of this section has the EPA Hazardous Waste Number of D002.

NOTE: Authority cited: Sections 208, 25141 and 25159, Health and Safety Code. Reference: Sections 25117, 25120.2, 25141, 25159 and 25159.5, Health and Safety Code and 40 CFR Section 261.22.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66261.23. Characteristic of Reactivity.

(a) A waste exhibits the characteristic of reactivity if representative samples of the waste have any of the following properties:

(1) it is normally unstable and readily undergoes violent change without detonating;

(2) it reacts violently with water;

(3) it forms potentially explosive mixtures with water;

(4) when mixed with water, it generates toxic gases, vapors or fumes in a quantity sufficient to present a danger to human health or the environment;

(5) it is a cyanide or sulfide bearing waste which, when exposed to pH conditions between 2 and 12.5, can generate toxic gases, vapors or fumes in a quantity sufficient to present a danger to human health or the environment;

(6) it is capable of detonation or explosive reaction if it is subjected to a strong initiating source or if heated under confinement;

(7) it is readily capable of detonation or explosive decomposition or reaction at standard temperature and pressure;

(8) it is a forbidden explosive as defined in 49 CFR section 173.51 (as amended April 20, 1987), or a Class A explosive as defined in 49 CFR section 173.53 (as amended April 5, 1967) or a Class B explosive as defined in 49 CFR section 173.88 (as amended May 19, 1980).

(b) A waste that exhibits the characteristic of reactivity has the EPA Hazardous Waste Number of D003.

NOTE: Authority cited: Sections 208, 25141 and 25159, Health and Safety Code. Reference: Sections 25117, 25120.2, 25141, 25159 and 25159.5, Health and Safety Code and 40 CFR Section 261.23.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66261.24. Characteristic of Toxicity.

(a) A waste exhibits the characteristic of toxicity if representative samples of the waste have any of the following properties:

(1) when using the Toxicity Characteristic Leaching Procedure (TCLP) in Appendix I of chapter 18 of this division or equivalent methods approved by the Department under the procedures set forth in section 66260.21, the extracts from representative samples of the waste contain any of the contaminants listed in Table I of this section at a concentration equal to or greater than the respective value given in that table unless the waste is excluded from classification as a solid waste or hazardous waste or is exempted from regulation pursuant to 40 CFR section 261.4. Where the waste contains less than 0.5 percent filterable solids, the waste itself, after filtering, is considered to be the extract for the purposes of this section;

(A) a waste that exhibits the characteristic of toxicity pursuant to subsection (a)(1) of this section has the EPA Hazardous Waste Number specified in Table I of this section which corresponds to the toxic contaminant causing it to be hazardous;

(B) Table I – Maximum Concentration of Contaminants for the Toxicity Characteristic:

Common Name	Chemical Abstracts Name	Chemical Abstracts No.	EPA Haz. Waste No.
Silver compounds, N.O.S.[1]			
Silver cyanide	Silver cyanide Ag(CN)	506–64–9	P104
Silvex (2,4,5–TP)	Propanoic acid, 2–(2,4,5–trichlorophenoxy)–	93–72–1	See F027
Sodium cyanide	Sodium cyanide Na(CN)	143–33–9	P106
Streptozotocin	D–Glucose, 2–deoxy–2–[[(methylnitrosoamino) carbonyl]amino]–	18883–66–4	U206
Strontium sulfide	Strontium sulfide SrS	1314–96–1	P107
Strychnine	Strychnidin–10–one	57–24–9	P108
Strychnine salts			P108
TCDD	Dibenzo[b,e][1,4]dioxin, 2,3,7,8–tetrachloro–	1746–01–6	
1,2,4,5–Tetrachlorobenzene	Benzene, 1,2,4,5–tetrachloro	95–94–3	U207
Tetrachlorodibenzo–p–dioxins			
Tetrachlorodibenzofurans			
Tetrachloroethane, N.O.S.[1]	Ethane, tetrachloro–, N.O.S.	25322–20–7	
1,1,1,2–Tetrachloroethane	Ethane, 1,1,1,2–tetrachloro	630–20–6	U208
1,1,2,2–Tetrachloroethane	Ethane, 1,1,2,2–tetrachloro	79–34–5	U209
Tetrachloroethylene	Ethene, tetrachloro–	127–18–4	U210
2,3,4,6–Tetrachlorophenol	Phenol, 2,3,4,6–tetrachloro–	58–90–2	See F027
Tetraethyldithiopyropyrophosphate	Thiodophosphoric acid, tetraethyl ester	3689–24–5	P109
Tetranitromethane	Methane, tetranitro–	509–14–8	P112
Thallium	Same	7440–28–0	
Thallium compounds, N.O.S.[1]			
Thallic oxide	Thallium oxide Tl_2O_3	1314–32–5	P113
Thallium (I) acetate	Acetic acid, thallium (1+) salt	563–68–8	U214
Thallium (I) carbonate	Carbonic acid, dithallium (1+) salt	6533–73–9	U215
Thallium (I) chloride	Thallium chloride TlCl	7791–12–0	U216
Thallium (I) nitrate	Nitric acid, thallium (1+) salt	10102–45–1	U217
Thallium selenite	Selenious acid, dithallium (1+) salt	12039–52–0	P114
Thallium (I) sulfate	Sulfuric acid, dithallium (1+) salt	7446–18–6	P115
Thioacetamide	Ethanethioamide	62–55–5	U218
Thiofanox	2–Butanone, 3,3–dimethyl–1–(methylthio)–,O–[(methylamino)carbonyl]oxime	39196–18–4	P045
Thiomethanol	Methanethiol	74–93–1	U153
Thiophenol	Benzenethiol	108–98–5	P014
Thiosemicarbazide	Hydrazinecarbothioamide	79–19–6	P116
Thiourea	Same	62–56–6	U219
Thiram	Thioperoxydicarbonic diamide $[(H_2N)C(S)]_2S_2$, tetramethyl–	137–26–8	U244
Toluene	Benzene, methyl–	108–88–3	U220
Toluenediamine	Benzenediamine, ar–methyl–	25376–45–8	U221
Toluene–2,4–diamine	1,3–Benzenediamine, 4–methyl	95–80–7	
Toluene–2,6–diamine	1,3–Benzenediamine, 2–methyl	823–40–5	
Toluene–3,4–diamine	1,2–Benzehediamine, 4–methyl	496–72–0	
Toluene diisocyanate	Benzene, 1,3–diisocyanatomethyl–	26471–62–5	U223
o–Toluidine	Benzenamine, 2–methyl–	95–53–4	U328
o–Toluidine hydrochloride	Benzenamine, 2–methyl–, hydrochloride	636–21–5	U222
p–Toluidine	Benzenamine, 4–methyl	106–49–0	U353
Toxaphene	Same	8001–35–2	P123
1,2,4–Trichlorobenzene	Benzene, 1,2,4–trichloro	120–82–1	
1,1,2–Trichloroethane	Ethane, 1,1,2–trichloro	79–00–5	U227
Trichloroethylene	Ethene, trichloro	79–01–6	U228
Trichloromethanethiol	Methanethiol, trichloro–	75–70–7	P118
Trichloromonofluoromethane	Methane, trichlorofluoro–	75–69–4	U121
2,4,5–Trichlorophenol	Phenol, 2,4,5–trichloro–	95–95–4	See F027
2,4,6–Trichlorophenol	Phenol, 2,4,6–trichloro–	88–06–2	See F027
2,4,5–T	Acetic acid, (2,4,5–trichlorophenoxy)–	93–76–5	See F027
Trichloropropane, N.O.S.[1]		25735–29–9	
1,2,3–Trichloropropane	Propane, 1,2,3–trichloro–	96–18–4	
O,O,O–Triethyl phosphorothioate	Phosphorothioic acid, 0,0,O–triethyl ester	126–68–1	
1,3,5–Trinitrobenzene	Benzene, 1,3,5,–trinitro	99–35–4	U234
Tris(1–aziridinyl) phosphine sulfide	Aziridine, 1,1′,1′–phosphinothioylidynetris–	52–24–4	
Tris(2,3–dibromopropyl) phosphate	1–Propanol, 2,3–dibromo–, phosphate (3:1)	126–72–7	U235
Trypan blue	2,7–Naphthalenedisulfonic acid, 3,3′–[(3,3′–dimethyl[1,1′–biphenyl]–4,4′–diyl)bis(azo)]bis [5–amino–4–hydroxy–, tetrasodium salt]	72–57–1	U236
Uracil mustard	2,4–(1H,3H)–Pyrimidinedione,5–[bis(2–chloroethyl) amino]–	66–75–1	U237
Vanadium pentoxide	Vanadium oxide V_2O_5	1314–62–1	P120
Vinyl chloride	Ethene, chloro–	75–01–4	U043
Warfarin	2H–1–Benzopyran–2–one, 4–hydroxy–3–(3–oxo–1–phenylbutyl)–, when present at concentrations of 0.3 or less	81–81–2	U248
Warfarin	2H–1–Benzopyran–2–one, 4–hydroxy–3–(3–oxo–1–phenylbutyl)–, when present at concentrations greater than 0.3	81–81–2	P001
Warfarin salts when present at concentrations of 0.3% or less			U248
Warfarin salts when present at concentrations greater than 0.3			P001
Zinc cyanide	Zinc cyanide $Zn(CN)_2$	557–21–1	P121
Zinc phosphide	Zinc phosphide Zn_3P_2, when present at concentrations greater than 10	1314–84–7	P122
Zinc phosphide	Zinc phosphide Zn_3P_2 when present at concentrations of 10% or less	1314–84–7	U249

[1]The abbreviation N.O.S. (not otherwise specified) signifies those members of the general class not specifically listed by name in this appendix.

Appendix X

List of Chemical Names and Common Names for Hazardous Wastes and Hazardous Materials

(a) This subdivision sets forth a list of chemicals which create a presumption that a waste is a hazardous waste. If a waste consists of or contains a chemical listed in this subdivision, the waste is presumed to be a hazardous waste unless it is determined that the waste is not a hazardous waste pursuant to the procedures set forth in section 66262.11. The hazardous characteristics which serve as a basis for listing the chemicals are

indicated in the list as follows:(X) toxic, (C) corrosive, (I) ignitable and (R) reactive. A chemical denoted with an asterisk is presumed to be an extremely hazardous waste unless it does not exhibit any of the criteria set forth in section 66261.110 and section 66261.113. Trademark chemical names are indicated by all capital letters.

1. Acetaldehyde (X,I)
2. Acetic acid (X,C,I)
3. Acetone, Propanone (I)
4. Acetone cyanohydrin (X)
5. Acetonitrile (X,I)
6. *2–Acetylaminofluorene, 2–AAF (X)
7. Acetyl benzoyl peroxide (X,I,R)
8. *Acetyl chloride (X,C,R)
9. Acetyl peroxide (X,I,R)
10. Acridine (X)
11. *Acrolein, Aqualin (X,I)
12. *Acrylonitrile (X,I)
13. *Adiponitrile (X)
14. *Aldrin; 1,2,3,4,10,10–Hexachloro–1,4,4a,5,8,8a–hexahydro–1,4,5,8–endo–exodimethanonaphthalene (X)
15. *Alkyl aluminum chloride (C,I,R)
16. *Alkyl aluminum compounds (C,I,R)
17. Allyl alcohol, 2–Propen–1–ol (X,I)
18. Allyl bromide, 3–Bromopropene (X,I)
19. Allyl chloride, 3–Chloropropene (X,I)
20. Allyl chlorocarbonate, Allyl chloroformate (X,I)
21. *Allyl trichlorosilane (X,C,I,R)
22. Aluminum (powder) (I)
23A. Aluminum chloride (X,C)
23B. *Aluminum chloride (anhydrous) (X,C,R)
24. Aluminum fluoride (X,C)
25. Aluminum nitrate (X,I)
26. *Aluminum phosphide, PHOSTOXIN (X,I,R)
27. *4–Aminodiphenyl, 4–ADP (X)
28. *2–Aminopyridine (X)
29. *Ammonium arsenate (X)
30. *Ammonium bifluoride (X,C)
31. Ammonium chromate (X,I)
32. Ammonium dichromate, Ammonium bichromate (X,C,I)
33. Ammonium fluoride (X,C)
34. Ammonium hydroxide (X,C)
35. Ammonium molybdate (X)
36. Ammonium nitrate (I,R)
37. Ammonium perchlorate (I,R)
38. Ammonium permanganate (X,I,R)
39. Ammonium persulfate (I,R)
40. Ammonium picrate (I,R)
41. Ammonium sulfide (X,C,I,R)
42. n–Amyl acetate, 1–Acetoxypentane (and isomers) (X,I)
43. n–Amylamine, 1–Aminopentane (and isomers) (X,I)
44. n–Amyl chloride, 1–Chloropentane (and isomers) (X,I)
45. n–Amylene, 1–Pentene (and isomers) (X,I)
46. n–Amyl mercaptan, 1–Pentanethiol (and isomers) (X,I)
47. n–Amyl nitrite, n–Pentyl nitrite (and isomers) (X,I)
48. *Amyl trichlorosilane (and isomers) (X,C,R)
49. Aniline, Aminobenzene (X)
50. Anisoyl chloride (X,C)
51. Anthracene (X)
52. Antimony (X)
53. Antimony compounds (X)
54. *Antimony pentachloride (X,C,R)
55. *Antimony pentafluoride (X,C,R)
56. Antimony pentasulfide (X,I)
57. Antimony potassium tartrate (X)
58. Antimony sulfate, Antimony trisulfate (X,I)
59. Antimony trichloride, Antimony chloride (X,C)
60. Antimony trifluoride, Antimony fluoride (X,C)
61. Antimony trioxide, Antimony oxide (X)
62. Antimony trisulfide, Antimony sulfide (X,I,R)
63. *Arsenic (X)
64. *Arsenic acid and salts (X)
65. *Arsenic compounds (X)
66. *Arsenic pentaselenide (X)
67. *Arsenic pentoxide, Arsenic oxide (X)
68. *Arsenic sulfide, Arsenic disulfide (X)
69. *Arsenic tribromide, Arsenic bromide (X)
70. *Arsenic trichloride, Arsenic chloride (X)
71. *Arsenic triiodide, Arsenic iodide (X)
72. *Arsenic trioxide, Arsenious oxide (X)
73. *Arsenious acid and salts (X)
74. *Arsines (X)
75. Asbestos (including chrysotile, amosite, crocidolite, tremolite, anthophyllite, and actinolite) (X)
76. *AZODRIN, 3–Hydroxy–N–cis–crotonamide (X)
77. Barium (X,I)
78. Barium azide (I,R)
79. Barium bromide (X)
80. Barium carbonate (X)
81. Barium chlorate (X,C,I,R)
82. Barium chloride (X)
83. Barium chromate (X)
84. Barium citrate (X)
85. Barium compounds (soluble) (X)
86. *Barium cyanide (X)
87. Barium fluoride (X)
88. Barium fluosilicate (X)
89. Barium hydroxide (X)
90. Barium iodide (X)
91. Barium manganate (X)
92. Barium nitrate (X,I)
93. Barium oxide, Barium monoxide (X)
94. Barium perchlorate (X,I,R)
95. Barium permanganate (X,I,R)
96. Barium peroxide (X,I,R)
97. Barium phosphate (X)
98. Barium stearate (X)
99. Barium sulfide (X)
100. Barium sulfite (X)
101. Benzene (X,I)
102. *Benzene hexachloride, BHC; 1,2,3,4,5,6–Hexachloro-cyclohexane (X)
103. *Benzenephosphorous dichloride (I,R)
104. Benzenesulfonic acid (X)
105. *Benzidine and salts (X)
106. *Benzotrifluoride, Trifluoromethylbenzene (X,I)
107. *Benzoyl chloride (X,C,R)
108. Benzoyl peroxide, Dibenzoyl peroxide (X,I,R)
109. Benzyl bromide, alpha–Bromotoluene (X,C)
110. Benzyl chloride, alpha–Chlorotoluene (X)
111. *Benzyl chlorocarbonate, Benzyl chloroformate (X,C,R)
112. *Beryllium (X,I)
113. *Beryllium chloride (X)
114. *Beryllium compounds (X)
115. *Beryllium copper (X)
116. *Beryllium fluoride (X)
117. *Beryllium hydride (X,C,I,R)
118. *Beryllium hydroxide (X)
119. *Beryllium oxide (X)
120. *BIDRIN, Dicrotophos, 3–(Dimethylamino)–1–methyl–3–oxo–1–propenyldimethyl phosphate (X)
121. *bis (Chloromethyl) ether, Dichloromethylether, BCME (X)
122. Bismuth (X,I)
123. *bis (Methylmercuric) sulfate, CEREWET, Ceresan liquid (X)
124. Bismuth chromate (X)
125. *BOMYL, Dimethyl 3–hydroxyglutaconate dimethyl phosphate (X)
126. *Boranes (X,I,R)
127. *Bordeaux arsenites (X)
128. *Boron trichloride, Trichloroborane (X,C,R)
129. *Boron trifluoride (X,C,R)
130. Bromic acid (X)
131. *Bromine (X,C,I)
132. *Bromine pentafluoride (X,C,I,R)
133. *Bromine trifluoride (X,C,I,R)
134. *Brucine, Dimethoxystrychnine (X)
135. 1,2,4–Butanetriol trinitrate (R)
136. n–Butyl acetate, 1–Acetoxybutane (and isomers) (X)
137. n–Butyl alcohol, 1–Butanol (and isomers) (X)
138. n–Butyl amine, 1–Aminobutane (and isomers) (X)
139. n–Butyl formate (and isomers) (X)

140. tert–Butyl hydroperoxide (and isomers) (X,I)
141. *n–Butyllithium (and isomers) (X,C,I,R)
142. n–Butyl mercaptan, 1–Butanethiol (and isomers) (X,I)
143. tert–Butyl peroxyacetate, tert–Butyl peracetate (I,R)
144. tert–Butyl peroxybenzoate, tert–Butyl perbenzoate (I,R)
145. tert–Butyl peroxypivalate (I,R)
146. *n–Butyltrichlorosilane (C,I,R)
147. para–tert–Butyl toluene (X)
148. n–Butyraldehyde, n–Butanal (and isomers) (X,I)
149. *Cacodylic acid, Dimethylarsinic acid (X)
150. *Cadmium (powder) (X,I)
151. Cadmium chloride (X)
152. *Cadmium compounds (X)
153. *Cadmium cyanide (X)
154. Cadmium fluoride (X)
155. Cadmium nitrate (X,I,R)
156. Cadmium oxide (X)
157. Cadmium phosphate (X)
158. Cadmium sulfate (X)
159. *Calcium (I,R)
160. *Calcium arsenate, PENSAL (X)
161. *Calcium arsenite (X)
162. *Calcium carbide (C,I,R)
163. Calcium chlorate (I,R)
164. Calcium chlorite (I)
165. Calcium fluoride (X)
166. *Calcium hydride (C,I,R)
167. Calcium hydroxide, Hydrated lime (C)
168. *Calcium hypochlorite, Calcium oxychloride (dry) (X,C,I,R)
169. Calcium molybdate (X)
170. Calcium nitrate, Lime nitrate, Nitrocalcite (I,R)
171. Calcium oxide, Lime (C)
172. Calcium permanganate (X,I)
173. Calcium peroxide, Calcium dioxide (C,I)
174. *Calcium phosphide (X,I,R)
175. Calcium resinate (I)
176. Caprylyl peroxide, Octyl peroxide (I)
177. *Carbanolate, BANOL, 2–Chloro–4,5–dimethylphenyl methylcarbamate (X)
178. Carbon disulfide, Carbon bisulfide (X,I)
179. Carbon tetrachloride, Tetrachloromethane (X)
180. *Carbophenothion, TRITHION, S[[(4–Chlorophenyl) thio]methyl] 0,0–diethyl phosphorodithioate (X)
181. Chloral hydrate, Trichloroacetaldehyde (hydrated) (X)
182. *Chlordane; 1,2,4,5,6,7,8,8–Octachloro–4,7–methano–3a,4,7,7a–tetra– hydro– indane; (X)
183. *Chlorfenvinphos, Compound 4072, 2–Chloro–1–(2,4–dichlorophenyl) vinyl diethyl phosphate (X)
184. *Chlorine (X,C,I,R)
185. *Chlorine dioxide (X,C,I,R)
186. *Chlorine pentafluoride (X,C,I,R)
187. *Chlorine trifluoride (X,C,I,R)
188. *Chloroacetaldehyde (X,C)
189. *alpha–Chloroacetophenone, Phenyl chloromethyl ketone (X)
190. *Chloroacetyl chloride (X,C,R)
191. Chlorobenzene (X,I)
192. para–Chlorobenzoyl peroxide (I,R)
193. *ortho–Chlorobenzylidene malonitrile, OCMB (X)
194. Chloroform, Trichloromethane (X)
195. *Chloropicrin, Chlorpicrin, Trichloronitromethane (X)
196. *Chlorosulfonic acid (X,C,I,R)
197. Chloro–ortho–toluidine, 2–Amino–4–chlorotoluene (X)
198. Chromic acid, Chromium trioxide, Chromic anhydride (X,C,I)
199. Chromic chloride, Chromium trichloride (X)
200. Chromic fluoride, Chromium trifluoride (X)
201. Chromic hydroxide, Chromium hydroxide (X)
202. Chromic oxide, Chromium oxide (X)
203. Chromic sulfate, Chromium sulfate (X)
204. Chromium compounds (X,C,I)
205. *Chromyl chloride, Chlorochromic anhydride (X,C,I,R)
206. Cobalt (powder) (X,I)
207. Cobalt compounds (X)
208. Cobaltous bromide, Cobalt bromide (X)
209. Cobaltous chloride, Cobalt chloride (X)
210. Cobaltous nitrate, Cobalt nitrate (X,I)
211. Cobaltous resinate, Cobalt resinate (X,I)
212. Cobaltous sulfate, Cobalt sulfate (X)
213. Cocculus, Fishberry, Picrotoxin (X)
215. *Copper acetoarsenite, Paris green (X)
216. Copper acetylide (I,R)
217. *Copper arsenate, Cupric arsenate (X)
218. *Copper arsenite, Cupric arsenite (X)
219. Copper chloride, Cupric chloride (X)
220. Copper chlorotetrazole (I,R)
221. Copper compounds (X)
222. *Copper cyanide, Cupric cyanide (X)
223. Copper nitrate, Cupric nitrate (X,I,R)
224. Copper sulfate, Cupric sulfate, Blue vitriol (X)
225. *Coroxon; ortho,ortho–Diethyl–ortho–(3–chloro–4–methylcoumarin–7–yl) phosphate (X)
226. *Coumafuryl, FUMARIN, 3–[1–(2–Furanyl)–3–oxobutyl] 1–4–hydroxy–2H–1–benzopyran–2–one (X)
227. *Coumatetralyl, BAYER 25634, RACUMIN 57, 4–Hydroxy–3–(1,2,3,4–tetrahydro–1–naphthalenyl)–2H–1–benzopyran–2–one (X)
228. *Crimidine, CASTRIX, 2–Chloro–4–dimethylamino–6–methyl–pyrimidine (X)
229. *Crotonaldehyde, 2–Butenal (X)
230. Cumene, Isopropyl benzene (X,I)
231. Cumene hydroperoxide; alpha,alpha–Dimethylbenzyl hydro–peroxide (X,I)
232. Cupriethylene diamine (X)
233. *Cyanide salts (X)
234. Cyanoacetic acid, Malonic nitrile (X)
235. *Cyanogen (X,I,R)
236. Cyanogen bromide, Bromine cyanide (X)
237. Cyanuric triazide (I,R)
238. Cycloheptane (X,I)
239. Cyclohexane (X,I)
240. Cyclohexanone peroxide (I)
241. *Cyclohexenyltrichlorosilane (X,C,R)
242. *Cycloheximide, ACTIDIONE (X)
243. *Cyclohexyltrichlorosilane (X,C,R)
244. Cyclopentane (X,I)
245. Cyclopentanol (I)
246. Cyclopentene (X,I)
247. DDT; 1,1,1–Trichloro–2,2–bis(chlorophenyl) ethane (X)
248. *DDVP, Dichlorvos, VAPONA, Dimethyl dichlorovinyl phosphate (X)
249. *Decaborane (X,I,R)
250. DECALIN, Decahydronaphthalene (X)
251. *Demeton, SYSTOX (X)
252. *Demeton–S–methyl sulfone, METAISOSYSTOX–SULFON, S–[2–(ethyl–sulfonyl) ethyl] O,O–dimethyl phosphorothioate (X)
253. Diazodinitrophenol, DDNP, 2–Diazo–4,6–dinitrobenzene–1–oxide (I,R)
254. *Diborane, Diboron hexahydride (I,R)
255. *1,2–Dibromo–3–chloropropane, DBCP, Fumazone, nemagon (X)
256. n–Dibutyl ether, Butyl ether (and isomers) (X,I)
257. Dichlorobenzene (ortho, meta, para) (X)
258. *3,3–Dichlorobenzidine and salts, DCB (X)
259. 1,2–Dichloroethylene; 1,2–Dichloroethene (X,I)
260. Dichloroethyl ether, Dichloroether (X,I)
261. Dichloroisocyanuric acid, Dichloro–S–triazine–2,4,6–trione (X,I)
262. Dichloromethane, Methylene chloride (X)
263. *2,4–Dichlorophenoxyacetic acid; 2,4–D (X)
264. 1,2–Dichloropropane, Propylene dichloride (X,I)
265. 1,3–Dichloropropylene; 1,3–Dichloropropene (X,I)
266. Dicumyl peroxide (I,X)
267. *Dieldrin; 1,2,3,4,10,10–Hexachloro–6,7–epoxy–1,4,4a,5,6,7,8,8a–octahydro–1,4–endo, exo–5,8–dimethanonaphthalene (X)
268. *Diethylaluminum chloride, Aluminum diethyl monochloride, DEAC (I,R)
269. Diethylamine (X,I)
270. *Diethyl chlorovinyl phosphate, Compound 1836 (X)
271. *Diethyldichlorosilane (X,C,I,R)
272. Diethylene glycol dinitrate (I,R)
273. Diethylene triamine (X)

274. * O,O–Diethyl–S–(isopropylthiomethyl) phosphorodithioate (X)
275. * Diethylzinc, Zinc ethyl (C,I,R)
276. * Difluorophosphoric acid (X,C,R)
277. * Diglycidyl ether, bis(2,3–Epoxypropyl) ether (X)
278. Diisopropylbenzene hydroperoxide (X,I)
279. Diisopropyl peroxydicarbonate, Isopropyl percarbonate (X,C,I,R)
280. * Dimefox, Hanane, Pextox 14, Tetramethylphosphorodiamidic fluoride (X)
281. Dimethylamine, DMA (X,I)
282. * Dimethylaminoazobenzene, Methyl yellow (X)
283. * Dimethyldichlorosilane, Dichlorodimethylsilane (X,C,I,R)
284. 2,5–Dimethylhexane–2,5–Dihydroperoxide (I)
285. * 1,1–Dimethylhydrazine, UDMH (X,I)
286. * Dimethyl sulfate, Methyl sulfate (X)
287. * Dimethyl sulfide, Methyl sulfide (X,I,R)
288. 2,4–Dinitroaniline (X)
289. * Dinitrobenzene (ortho, meta, para) (I,R)
290. Dinitrochlorobenzene, 1–Chloro–2,4–dinitrobenzene (I,R)
291. * 4,6–Dinitro–ortho–cresol, DNPC, SINOX, E
292. * Dinitrophenol(2,3–;2,4–;2,6–isomers) (I,R)
293. 2,4–Dinitrophenylhydrazine (X,I,R)
294. Dinitrotoluene (2,4–;3,4–;3,5–isomers) (X,I,R)
295. * DINOSEB; 2,4–Dinitro–6–sec–butylphenol (X)
296. 1,4–Dioxane; 1,4–Diethylene dioxide (X,I,R)
297. * Dioxathion, DELNAV; S,S–1,4–dioxane–2,3–diyl bis(O,O–diethyl phosphorodithioate) (X)
298. Dipentaerythritol hexanitrate (R)
299. * Diphenyl, Biphenyl, Phenylbenzene (X)
300. Diphenylamine, DPA, N–Phenylaniline (X)
301. * Diphenylamine chloroarsine, Phenarsazine chloride (X)
302. * Diphenyldichlorosilane (X,C,R)
303. Dipicrylamine, Hexanitrodiphenyl amine (I,R)
304. Dipropyl ether (X,I)
305. * Disulfoton, DI–SYSTON; O,O–Diethyl S–[2–(ethylthio) ethyl] phosphorodithioate (X)
306. * Dodecyltrichlorosilane (X,C,R)
307. * DOWCO–139, ZECTRAM, Mexacarbate, 4–(Dimethylamino)–3,5–dimethylphenyl methylcarbamate (X)
309. * DYFONATE, Fonofos, O–Ethyl–S–phenylethyl phosphonodithioate (X)
310. * Endosulfan, THIODAN; 6,7,8,9,10,10–Hexachlor–1,5,5a,6,9, 9a–hexa–hydro–6,9–methano–2,4,3–benzo–dioxathiepin–3–oxide (X)
311. * Endothal, 7–Oxabicyclo[2.2.1]heptane–2,3–dicarboxylic acid (X)
312. * Endothion, EXOTHION, S–[(5–Methoxy–4–oxo–4H–pyran–2–yl)–methyl] O,O–dimethyl phosphorothioate (X)
313. * Endrin; 1,2,3,4,10,10–Hexachloro–6,7–epoxy–1,4,4,4a,5,6,7, 8,8a–octahydro–1,4–endo–endo–5,8–dimethanonaphthalene (X)
314. Epichlorohydrin, Chloropropylene oxide (X,I)
315. * EPN; O–Ethyl O–para–nitrophenyl phenylphosphonothioate (X)
316. * Ethion, NIALATE; O,O,O′,O′–Tetraethyl–S,S–methylenediphos–phorodithioate (X)
317. Ethyl acetate (X,I)
318. Ethyl alcohol, Ethanol (X,I)
319. Ethylamine, Aminoethane (X,I)
320. Ethylbenzene, Phenylethane (X,I)
321. Ethyl butyrate, Ethyl butanoate (I)
322. Ethyl chloride, Chloroethane (X,I)
323. * Ethyl chloroformate, Ethyl chlorocarbonate (X,C,I,R)
324. * Ethyldichloroarsine, Dichloroethylarsine (I,R)
325. * Ethyldichlorosilane (X,C,I,R)
326. * Ethylene cyanohydrin, beta–Hydroxypropionitrile (I,R)
327. Ethylene diamine (X)
328. Ethylene dibromide; 1,2–Dibromoethane (X)
329. Ethylene dichloride; 1,2–Dichloroethane (X,I)
330. * Ethyleneimine, Aziridine, EI (X,I,R)
331. Ethylene oxide, Epoxyethane (X,I,R)
332. Ethyl ether, Diethyl ether (I,R)
333. Ethyl formate (X,I)
334. * Ethyl mercaptan, Ethanethiol (X,I,R)
335. Ethyl nitrate (I,R)
336. Ethyl nitrite (I,R)
337. * Ethylphenyldichlorosilane (X,C,R)
338. Ethyl propionate (I)
339. * Ethyltrichlorosilane (I,R)
340. * Fensulfothion, BAYER 25141, DASANIT, O,O–Diethyl–0–[4–(methyl—sulfinyl)phenyl] phosphorothioate (X)
341. * Ferric arsenate (X)
342. Ferric chloride, Iron (III) chloride (X,C)
343. * Ferrous arsenate, Iron arsenate (X)
344. * Fluoboric acid, Fluoroboric acid (X,C)
345. Fluoride salts (X)
346. * Fluorine (X,C,R)
347. * Fluoroacetanilide, AFL 1082 (X)
348. * Fluoroacetic acid and salts, Compound 1080 (X)
349. * Fluorosulfonic acid, Fluosulfonic acid (X,C,R)
350. Formaldehyde, Methanal (X,I)
351. Formic acid, Methanoic acid (X,C)
352. Fulminate of mercury, Mercuric cyanate (I,R)
353. * FURADAN, NIA 10,242, Carbofuran; 2,3–Dihydro–2,2–dimethyl–7–benzofuranylmethylcarbamate (X)
354. Furan, Furfuran (X,I,R)
355. Gasoline (I)
356. * GB, O–Isopropyl methyl phosphoryl fluoride (X)
357. Glutaraldehyde (X)
358. Glycerolmonolactate trinitrate (R)
359. Glycol dinitrate, Ethylene glycol dinitrate (R)
360. Gold fulminate, Gold cyanate (R)
361. Guanidine nitrate (I,R)
362. Guanyl nitrosaminoguanylidene hydrazine (R)
363. * Guthion; O,O–Dimethyl–S–4–oxo–1,2,3–benzotriazin–3(4H)–ylmethyl phosphorodithioate (X)
364. Hafnium (I,X,R)
365. * Heptachlor; 1,4,5,6,7,8,8–Heptachloro–3a,4,7,7a–tetra–hydro–4,7–methanoindene (X)
366. n–Heptane (and isomers) (X,I)
367. 1–Heptene (and isomers) (X,I)
368. * Hexadecyltrichlorosilane (X,C,R)
369. Hexaethyl tetraphosphate, HETP (X)
370. Hexafluorophosphoric acid (X,C)
371. Hexamethylenediamine; 1,6–Diaminohexane (X)
372. n–Hexane (and isomers) (X,I)
373. 1–Hexene (and isomers) (X,I)
374. n–Hexylamine, 1–Aminohexane (and isomers) (X,I)
375. * Hexyltrichlorosilane (X,C,R)
376. * Hydrazine, Diamine (X,I)
377. Hydrazine azide (I,R)
378. Hydrazoic acid, Hydrogen azide (I,R)
379. * Hydriodic acid, Hydrogen iodide (X,C,R)
380. * Hydrobromic acid, Hydrogen bromide (X,C,R)
381. * Hydrochloric acid, Hydrogen chloride, Muriatic Acid (X,C,R)
382. * Hydrocyanic acid, Hydrogen cyanide (X,I,R)
383. * Hydrofluoric acid, Hydrogen fluoride (X,C,R)
384. Hydrofluosilicic acid, Fluosilicic acid (X,C)
385. Hydrogen peroxide (X,C,I,R)
386. * Hydrogen selenide (X,I)
387. * Hydrogen sulfide (X,I)
388. * Hypochlorite compounds (X,C,I,R)
389. Indium (X)
390. Indium compounds (X)
391. Iodine monochloride (X,C,R)
392. Isooctane; 2,2,4–Trimethylpentane (X,I)
393. Isooctene (mixture of isomers) (I)
394. Isopentane, 2–Methylbutane (I)
395. Isoprene, 2–Methyl–1,3–butadiene (X,I,R)
396. Isopropanol, Isopropyl alcohol, 2–Propanol (X,I)
397. Isopropyl acetate (X,I)
399. Isopropylamine, 2–Aminopropane (X,I)
400. Isopropyl chloride, 2–Chloropropane (I)
401. Isopropyl ether, Diisopropyl ether (I,R)
402. Isopropyl mercaptan, 2–Propanethiol (X,I)
404. * meta–Isopropylphenyl–N–methylcarbamate, Ac 5,727 (X)

405A. *Kepone; 1,1a,3,3a,4,5,5,5a,5b,6–Decachloro-octahydro–1,2,4–metheno–2H–cyclobuta (cd) pentalen–2–one, Chlorecone (X)
405B. Lauroyl peroxide, Di–n–dodecyl peroxide (X,C,I,R)
406. Lead compounds (X)
407. Lead acetate (X)
408. *Lead arsenate, Lead orthoarsenate (X)
409. *Lead arsenite (X)
410. Lead azide (I,R)
411. Lead carbonate (X)
412. Lead chlorite (I,R)
413. *Lead cyanide (X)
414. Lead 2,4–dinitroresorcinate (I,R)
415. Lead mononitroresorcinate (I,R)
416. Lead nitrate (X,I)
417. Lead oxide (X)
418. Lead styphnate, Lead trinitroresorcinate (I,R)
419. *Lewisite, beta–Chlorovinyldichloroarsine (X)
420. *Lithium (C,I,R)
421. *Lithium aluminum hydride, LAH (C,I,R)
422. *Lithium amide (C,I,R)
423. *Lithium ferrosilicon (I,R)
424. *Lithium hydride (C,I,R)
425. *Lithium hypochlorite (X,C,I,R)
426. Lithium peroxide (C,I,R)
427. Lithium silicon (I,R)
428. *London purple, Mixture of arsenic trioxide, aniline, lime, and ferrous oxide (X)
429. *Magnesium (I,R)
430. *Magnesium arsenate (X)
431. *Magnesium arsenite (X)
432. Magnesium chlorate (I,R)
433. Magnesium nitrate (I,R)
434. Magnesium perchlorate (X,I,R)
435. Magnesium peroxide, Magnesium dioxide (I)
436. *Maleic anhydride (X)
437. Manganese (powder) (I)
438. Manganese acetate (X)
439. *Manganese arsenate, Manganous arsenate (X)
440. Manganese bromide, Manganous bromide (X)
441. Manganese chloride, Manganous chloride (X)
442. Manganese methylcyclopentadienyl tricarbonyl (X)
443. Manganese nitrate, Manganous nitrate (X,I)
444. Mannitol hexanitrate, Nitromannite (R)
445. *MECARBAM; O,O–Diethyl S–(N–ethoxycarbonyl N–methylcarba–moyl–methyl) phosphorodithioate (X)
446. *Medinoterb acetate, 2–tert–Butyl–5–methyl–4,6–dinitro–phenyl acetate (X)
447. para–Menthane hydroperoxide, Paramenthane hydroperoxide (I)
448. Mercuric acetate, Mercury acetate (X)
449. Mercuric ammonium chloride, Mercury ammonium chloride (X)
450. Mercuric benzoate, Mercury benzoate (X)
451. Mercuric bromide, Mercury bromide (X)
452. *Mercuric chloride, Mercury chloride (X)
453. *Mercuric cyanide, Mercury cyanide (X)
454. Mercuric iodide, Mercury iodide (X)
455. Mercuric nitrate, Mercury nitrate (X,I)
456. Mercuric oleate, Mercury oleate (X)
457. Mercuric oxide (red and yellow) (X,I)
458. Mercuric oxycyanide (I,R)
459. Mercuric–potassium iodide, Mayer's reagent (X)
460. Mercuric salicylate, Salicylated mercury (X)
461. Mercuric subsulfate, Mercuric dioxysulfate (X)
462. Mercuric sulfate, Mercury sulfate (X)
463. Mercuric thiocyanide, Mercury thiocyanate (X)
464. Mercurol, Mercury nucleate (X)
465. Mercurous bromide (X)
466. Mercurous gluconate (X)
467. Mercurous iodide (X)
468. Mercurous nitrate (I,R)
469. Mercurous oxide (X)
470. Mercurous sulfate, Mercury bisulfate (X)
472. *Mercury (X)
473. *Mercury compounds (X)
474. Metal carbonyls (X)
475. *Metal hydrides (I,R)
476. Metal powders (X,I)
477A. *Methomyl, LANNATE, S–Methyl–N–((methyl–carbamoyl) oxy) thioacetimidate (X)
477B. *Methoxychlor; 1,1,1–Trichloro–2, –bis(p–methoxyphenyl) ethane, CHEMFLORM, MARLATE (X)
478. *Methoxyethylmercuric chloride, AGALLOL, ARETAN (X)
479. Methyl acetate (X,I)
480. Methyl acetone (Mixture of acetone, methyl acetate, and methyl alcohol) (X,I)
481. Methyl alcohol, Methanol (X,I)
482. *Methylaluminum sesquibromide (I,R)
483. *Methylaluminum sesquichloride (I,R)
484. Methylamine, Aminomethane (X,I)
485. n–Methylaniline (X)
486. *Methyl bromide, Bromomethane (X)
487. 2–Methyl–1–butene (I)
488. 3–Methyl–1–butene (I)
489. Methyl butyl ether (and isomers) (X,I)
490. Methyl butyrate (and isomers) (X,I)
491. Methyl chloride, Chloromethane (X,I)
492. *Methyl chloroformate, Methyl chlorocarbonate (X,I,R)
493. *Methyl chloromethyl ether, CMME (X,I)
494. Methylcyclohexane (X,I)
495. *Methyldichloroarsine (X)
496. *Methyldichlorosilane (X,I,R)
497. *4,4–Methylene bis(2–chloroaniline), MOCA (X)
498. Methyl ethyl ether (X,I)
499. Methyl ethyl ketone, 2–Butanone (X,I)
500. Methyl ethyl ketone peroxide (X,I)
501. Methyl formate (X,I)
502. *Methyl hydrazine, Monomethyl hydrazine, MMH (X,I)
503. *Methyl isocyanate (X,I)
504. Methyl isopropenyl ketone, 3–Methyl–3–butene–2–one (X,I)
505. *Methylmagnesium bromide (C,I,R)
506. *Methylmagnesium chloride (C,I,R)
507. *Methylmagnesium iodide (C,I,R)
508. Methyl mercaptan, Methanethiol (X,I)
509. Methyl methacrylate (monomer) (X,I)
510. *Methyl parathion; O,O–Dimethyl–O–para–nitrophenyl-phosphorothioate (X)
511. Methyl propionate (I)
512. *Methyltrichlorosilane (X,C,I,R)
513. Methyl valerate, Methyl pentanoate (and isomers) (I)
514. Methyl vinyl ketone, 3–Butene–2–one (X,I)
515A. *Mevinphos, PHOSDRIN, 2–Carbomethoxy–1–methylvinyl dimethylphosphate (X)
515B. *Mirex; 1,1a,2,2,3,3a,4,5,5,5a,5b,6–Dodecachlorooctahydro–1,3,4–metheno–1H–cyclobuta (cd) pentalene, Dechlorane (X)
516. *MOCAP, O–Ethyl–S,S–dipropyl phosphorodithioate (X)
517. Molybdenum (powder) (I)
518. Molybdenum trioxide, Molybdenum anhydride (X)
519. Molybdic acid and salts (X)
520. Monochloroacetic acid, Chloracetic acid, MCA (X,C)
521. Monochloroacetone, Chloroacetone, 1–Chloro–2–propanone (X)
522. Monofluorophosphoric acid (X,C)
523. Naphtha (of petroleum or coal tar origin), Petroleum ether, Petroleum naphtha (X,I)
524. Naphthalene (X)
525. *alpha–Naphthylamine, 1–NA (X)
526. *beta–Naphthylamine, 2–NA (X)
527. Neohexane; 2,2–Dimethylbutane (X,I)
528. Nickel (powder) (X,I)
529. Nickel acetate (X)
530. Nickel antimonide (X)
531. *Nickel arsenate, Nickelous arsenate (X)
532. *Nickel carbonyl, Nickel tetracarbonyl (X)
533. Nickel chloride, Nickelous chloride (X)
534. *Nickel cyanide (X)
535. Nickel nitrate, Nickelous nitrate (X,I,R)
536. Nickel selenide (X)
537. Nickel sulfate (X)
538. Nicotine, beta–pyridyl–alpha–N–methyl pyrrolidine (X)

539. Nicotine salts (X)
540. Nitric acid (X,C,I)
541. Nitroaniline, Nitraniline (ortho, meta, para) (I,R)
542. *Nitrobenzol, Nitrobenzene (X)
543. *4–Nitrobiphenyl, 4–NBP (X)
544. Nitro carbo nitrate (I,R)
545. Nitrocellulose, Cellulose nitrate, Guncotton, Pyroxylin, Collodion, Pyroxylin (nitrocellulose) in ether and alcohol (I,R)
546. Nitrochlorobenzene, Chloronitrobenzene (ortho,meta,para) (X)
547. Nitrogen mustard (X,C)
548. Nitrogen tetroxide, Nitrogen dioxide (X,I)
549. Nitroglycerin, Trinitroglycerin (X,I,R)
550. Nitrohydrochloric acid, Aqua regia (X,C,I)
551. *Nitrophenol (ortho, meta, para) (X)
552. *N–Nitrosodimethylamine, Dimethyl nitrosoamine (X)
553. Nitrosoguanidine (R)
554. Nitrostarch, Starch nitrate (I,R)
555. Nitroxylol, Nitroxylene, Dimethylnitrobenzene (2,4–;3,4–; 2,5–isomers) (X)
556. 1–Nonene, 1–Nonylene (and isomers) (X,I)
557. *Nonyltrichlorosilane (I,R)
558. *Octadecyltrichlorosilane (I,R)
559. n–Octane (and isomers) (X,I)
560. 1–Octene, 1–Caprylene (X,I)
561. *Octyltrichlorosilane (I,R)
563. *Oleum, Fuming sulfuric acid (X,C,R)
565. Osmium compounds (X)
566. Oxalic acid (X)
567. *Oxygen difluoride (X,C,R)
568. *Para–oxon, MINTACOL; O,O–Diethyl–O–para–nitrophenyl phosphate (X)
569. *Parathion; O,O–Diethyl–O–para–nitrophenyl phosphorothioate (X)
570A. *Pentaborane (X,I,R)
570B. Pentachlorophenol, PCP, DOWICIDE 7 (X)
571. Pentaerythrite tetranitrate, Pentaerythritol tetranitrate (R)
572. n–Pentane (and isomers) (X,I)
573. 2–Pentanone, Methyl propyl ketone (and isomers) (X,I)
574. Peracetic acid, Peroxyacetic acid (X,C,I,R)
575. Perchloric acid (X,C,I,R)
576. Perchloroethylene, Tetrachloroethylene (X)
577. *Perchloromethyl mercaptan, Trichloromethylsulfenyl chloride (X)
578. Perchloryl fluoride (X,C,I)
580. Phenol, Carbolic acid (X,C)
581. *Phenyldichloroarsine (X)
582. Phenylenediamine, Diaminobenzene (ortho,meta,para) (X)
583. Phenylhydrazine hydrochloride (X)
584. *Phenylphenol, Orthozenol, DOWICIDE 1 (X)
585. *Phenyltrichorosilane (I,R)
586. *Phorate, THIMET; O,O–Diethyl–S–[(Ethylthio)methyl] phosphorodithioate (X)
587. *Phosfolan, CYOLAN, 2–(Diethoxyphosphinylimino)–1,3–dithio–lane (X)
588. *Phosgene, Carbonyl chloride (I,R)
589. *Phosphamidon, DIMECRON, 2–Chloro–2–diethyl-carbamoyl–1–methylvinyl dimethyl phosphate (X)
590. *Phosphine, Hydrogen phosphide (X,I)
591. Phosphoric acid (C)
592. Phosphoric anhydride, Phosphorus pentoxide (C,I)
593. Phosphorus (amorphous, red) (X,I,R)
594. *Phosphorus (white or yellow) (X,I,R)
595. *Phosphorus oxybromide, Phosphoryl bromide (X,C,R)
596. *Phosphorus oxychloride, Phosphoryl chloride (X,C,R)
597. *Phosphorus pentachloride, Phosphoric chloride (X,C,I,R)
598. *Phosphorus pentasulfide, Phosphoric sulfide (X,C,I,R)
599. *Phosphorus sesquisulfide, tetraphosphorus trisulfide (X,C,I,R)
600. *Phosphorus tribromide (X,C,R)
601. *Phosphorus trichloride (X,C,R)
602. Picramide, Trinitroaniline (I,R)
603. Picric acid, Trinitrophenol (I,R)
604. Picryl chloride, 2–Chloro–1,3,5–trinitrobenzene (I,R)
605. *Platinum compounds (X)
606. *Polychlorinated biphenyls, PCB, Askarel, aroclor, chlorextol, inerteen, pyranol (X)
607. Polyvinyl nitrate (I,R)
608. Potasan; O,O–Diethyl–0–(4–methylumbelliferone) phosphoro–thioate (X)
609. *Potassium (C,I,R)
610. *Potassium arsenate (X)
611. *Potassium arsenite (X)
612. *Potassium bifluoride, Potassium acid fluoride (X,C)
613. Potassium binoxalate, Potassium acid oxalate (X)
614. Potassium bromate (X,I)
615. *Potassium cyanide (X)
616. Potassium dichloroisocyanurate (X,I)
617. Potassium dichromate, Potassium bichromate (X,C,I)
619. Potassium fluoride (X)
620. *Potassium hydride (C,I,R)
621. Potassium hydroxide, Caustic potash (X,C)
622. Potassium nitrate, Saltpeter (I,R)
623. Potassium nitrite (I,R)
624. Potassium oxalate (X)
625. Potassium perchlorate (X,I,R)
626. Potassium permanganate (X,C,I)
627. Potassium peroxide (C,I,R)
628. Potassium sulfide (X,I)
629. *Propargyl bromide, 3–Bromo–1–propyne (X,I)
630. *beta–Propiolactone, BPL (X)
631. Propionaldehyde, Propanal (X,I)
632. Propionic acid, Propanoic acid (X,C,I)
633. n–Propyl acetate (X,I)
634. n–Propyl alcohol, 1–Propanol (X,I)
635. n–Propylamine (and isomers) (X,I)
636. *Propyleneimine, 2–Methylaziridine (X,I)
637. Propylene oxide (X,I)
638. n–Propyl formate (X,I)
639. n–Propyl mercaptan, 1–Propanethiol (X,I)
640. *n–Propyltrichlorosilane (X,C,I,R)
641. *Prothoate, FOSTION, FAC; O,O–Diethyl–S–carboethoxy-ethyl phosphorodithioate (X)
642. Pyridine (X,I)
643. *Pyrosulfuryl chloride, Disulfuryl chloride (X,C,R)
644. *Quinone; 1,4–Benzoquinone (X)
645. Raney nickel (I)
646. *Schradan, Octamethyl pyrophosphoramide, OMPA (X)
647A. *Selenium (X)
647B. *Selenium compounds (X)
648. *Selenium fluoride (X)
649. *Selenous acid, Selenious acid and salts (X)
650. *Silicon tetrachloride, Silicon chloride (X,C,R)
651. *Silver acetylide (I,R)
652. Silver azide (I,R)
653. Silver compounds (X)
654. Silver nitrate (X)
655. Silver styphnate, Silver trinitroresorcinate (I,R)
656. Silver tetrazene (I,R)
657. *Sodium (C,I,R)
658. Sodium aluminate (C)
659. *Sodium aluminum hydride (C,I,R)
660. *Sodium amide, Sodamide (C,I,R)
661. *Sodium arsenate (X)
662. *Sodium arsenite (X)
663. Sodium azide (I,R)
664. *Sodium bifluoride, Sodium acid fluoride (X,C)
665. Sodium bromate (X,I)
666. *Sodium cacodylate, Sodium dimethylarsenate (X)
667. Sodium carbonate peroxide (I)
668. Sodium chlorate (X,I)
669. Sodium chlorite (X,I)
670. Sodium chromate (X,C)
671. *Sodium cyanide (X)
672. Sodium dichloroisocyanurate (I)
673. Sodium dichromate, Sodium bichromate (X,C,I)
674. Sodium fluoride (X)
675. *Sodium hydride (X,C,I,R)
676. Sodium hydrosulfite, Sodium hyposulfite (I)
677. Sodium hydroxide, Caustic soda, Lye (X,C)
678. *Sodium hypochlorite (X,I,R)

679. * Sodium methylate, Sodium methoxide (C,I,R)
680. Sodium molybdate (X)
681. Sodium nitrate, Soda niter (X,I,R)
682. Sodium nitrite (X,I,R)
683. Sodium oxide, Sodium monoxide (X,C)
684. Sodium perchlorate (X,I,R)
685. Sodium permanganate (X,I)
686. * Sodium peroxide (X,I,R)
687. Sodium picramate (X,I,R)
688. * Sodium potassium alloy, NaK, Nack (C,I,R)
689. * Sodium selenate (X)
690. Sodium sulfide, Sodium hydrosulfide (X,I)
691. Sodium thiocyanate, Sodium sulfocyanate (X)
692. Stannic chloride, Tin tetrachloride (X,C)
693. * Strontium arsenate (X)
694. Strontium nitrate (X,I,R)
695. Strontium peroxide, Strontium dioxide (I,R)
696. * Strychnine and salts (X)
697. Styrene, Vinylbenzene (X,I)
698. Succinic acid peroxide (X,I)
699. Sulfide salts (soluble) (X)
700. * Sulfotepp, DITHIONE, BLACAFUM, Tetraethyldithio-pyrophosphate, TEDP (X)
701. * Sulfur chloride, Sulfur monochloride (X,C,R)
702. * Sulfur mustard (X,C,R)
703. * Sulfur pentafluoride (X,C)
704. Sulfur trioxide, Sulfuric anhydride (X,C,I)
705. Sulfuric acid, Oil of vitriol, Battery acid (X,C)
706. Sulfurous acid (X,C)
707. * Sulfuryl chloride, Sulfonyl chloride (X,C,R)
708. * Sulfuryl fluoride, Sulfonyl fluoride (X,C,R)
709. * SUPRACIDE, ULTRACIDE, S-[(5-Methoxy-2-oxo-1,3,4-thia-diazo13(2H)-yl) methyl] -O,O-dimethyl phosphorodithioate (X)
710. * SURECIDE, Cyanophenphos, O-para-Cyanophenyl-O-ethyl phenyl phosphonothioate (X)
711. * Tellurium hexafluoride (X,C)
712. * TELODRIN, Isobenzan; 1,3,4,5,6,7,8,8-Octachloro-1,3,3a,4, 7,7a-hexahydro-4,7-methanoisobenzofuran (X)
713. * TEMIK, Aldicarb, 2-Methyl-2(methylthio) propionaldehyde-O-(methylcarbamoyl) oxime (X)
714. * 2,3,7,8-Tetrachlorodibenzo-para-dioxin, TCDD, Dioxin (X)
715. sym-Tetrachloroethane (X)
717. * Tetraethyl lead, TEL (and other organic lead) (X,I)
718. * Tetraethyl pyrophosphate, TEPP (X)
719A. Tetrahydrofuran, THF (X,I)
719B. Tetrahydrophthalic anhydride, Memtetrahydrophthalic anhydride (X)
720. TETRALIN, Tetrahydronaphthalene (X)
721. Tetramethyl lead, TML (X,I)
722. * Tetramethyl succinonitrile (X)
723. * Tetranitromethane (X,I,R)
724. * Tetrasul, ANIMERT V-101, S-para-Chlorophenyl-2,4,5-trichlorophenyl sulfide (X)
725. Tetrazene, 4-Amidino-1-(nitrosamino-amidino)-1-tetra-zene (I,R)
726. * Thallium (X)
727. * Thallium compounds (X)
728. * Thallous sulfate, Thallium sulfate, RATOX (X)
729. * Thiocarbonylchloride, Thiophosgene (X,C,R)
730. * Thionazin, ZINOPHOS; O,O-Tetramethylthiuram monosulfide (X)
731. * Thionyl chloride, Sulfur oxychloride (X,C,R)
732. * Thiophosphoryl chloride (X,C,R)
733. Thorium (powder) (I)
734. Tin compounds (organic) (X)
735. Titanium (powder) (I)
736. Titanium sulfate (X)
737. * Titanium tetrachloride, Titanic chloride (X,C,R)
738. Toluene, Methylbenzene (X,I)
739. * Toluene-2,4-diisocyanate, TDI (I,R)
740A. Toluidine, Aminotoluene (ortho,meta,para) (X)
740B. * Toxaphene, Polychlorocamphene (X)
741. * TRANID, exo-3-Chloro-endo-6-cyano-2-norbornanone-O- (methylcarbamoyl) oxime (X)
743. 1,1,2-Trichloroethane (X)
744. Trichloroethylene; Trichlorethene (X)
745. Trichloroisocyanuric acid (X,I)
746. * 2,4,5-Trichlorophenoxyacetic acid; 2,4,5-T (X)
747. * Trichlorosilane, Silicochloroform (X,C,I,R)
748. Trimethylamine, TMA (X,I)
749. Trinitroanisole; 2,4,6-Trinitrophenyl methyl ether (I,R)
750. 1,3,5-Trinitrobenzene, TNB (I,R)
751. 2,4,6-Trinitrobenzoic acid (I,R)
752. Trinitronaphthalene, Naphtite (I,R)
753. 2,4,6-Trinitroresorcinol, Styphnic acid (I,R)
754. 2,4,6-Trinitrotoluene, TNT (X,I,R)
755. * tris(1-Aziridinyl) phosphine oxide, Triethylenephospho-ramide, TEPA (X)
756. Tungstic acid and salts (X)
757. Turpentine (X,I)
758. Uranyl nitrate, Uranium nitrate (X,I,R)
759. Urea nitrate (X,I,R)
760. n-Valeraldehyde, n-Pentanal (and isomers) (X,I)
761. Vanadic acid salts (X)
762. Vanadium oxytrichloride (X,C)
763. * Vanadium pentoxide, Vanadic acid anhydride (X)
764. Vanadium tetrachloride (X,C)
765. Vanadium tetraoxide (X)
766. Vanadium trioxide, Vanadium sesquioxide (X)
767. Vanadyl sulfate, Vanadium sulfate (X)
768. Vinyl acetate (I,X)
769. * Vinyl chloride (X,I)
770. Vinyl ethyl ether (I)
771. Vinylidene chloride, VC (X,I)
772. Vinyl isopropyl ether (I)
773. * Vinyltrichlorosilane (X,C,I,R)
774. VX, O-Ethyl methyl phosphoryl N,N-diisopropyl thiocholine (X)
775. * WEPSYN 155, WP 155, Triamiphos, para-(5-Amino-3-phenyl-1H-1,2,4-triazol-1-yl)-N,N,N′,N′-tetramethyl phosphonic diamide (X)
776. Xylene, Dimethylbenzene (ortho,meta,para) (X,I)
777. Zinc (powder) (I)
778. Zinc ammonium nitrate (X,I)
779. * Zinc arsenate (X)
780. * Zinc arsenite (X)
781. Zinc chloride (X,C)
782. Zinc compounds (X)
783. * Zinc cyanide (X)
784. Zinc nitrate (X,I,R)
785. Zinc permanganate (X,I)
786. Zinc peroxide, Zinc dioxide (X,I,R)
787. * Zinc phosphide (X,I,R)
788. Zinc sulfate (X)
789. Zirconium (powder) (I)
790. * Zirconium chloride, Zirconium tetrachloride (X,C,R)
791. Zirconium picramate (I)

(b) This subdivision sets forth a list of common names of wastes which are presumed to be hazardous wastes unless it is determined that the waste is not a hazardous waste pursuant to the procedures set forth in section 66262.11. The hazardous characteristics which serve as a basis for listing the common names of wastes are indicated in the list as follows:

(X) toxic, (C) corrosive, (I) ignitable and (R) reactive.

Acetylene sludge (C)
Acid and water (C)
Acid sludge (C)
AFU Floc (X)
Alkaline caustic liquids (C)
Alkaline cleaner (C)
Alkaline corrosive battery fluid (C)
Alkaline corrosive liquids (C)
Asbestos waste (X)
Ashes (X,C)
Bag house wastes (X)
Battery acid (C)
Beryllium waste (X)

(c) List of California Hazardous Waste Codes arranged alphabetically within each numbered category in this subdivision:

Waste Code Number	*Waste Description*
	(1) Inorganics:
121	Alkaline solution (pH ≥ 12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)
122	Alkaline solution without metals (pH ≥ 12.5)
131	Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)
133	Aqueous solution with 10% or more total organic residues
134	Aqueous solution with less than 10% total organic residues
132	Aqueous solution with metals (restricted levels and see waste code 121 for a list of metals)
151	Asbestos–containing waste
161	Fluid–cracking catalyst (FCC) waste
172	Metal dust (see 121) and machining waste
171	Metal sludge (see 121)
141	Off–specification, aged, or surplus inorganics
181	Other inorganic solid waste
162	Other spent catalyst
123	Unspecified alkaline solution
135	Unspecified aqueous solution
	(2) Organics:
281	Adhesives
322	Biological waste other than sewage sludge
211	Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)
213	Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)
291	Latex waste
331	Off–specification, aged, or surplus organics
222	Oil/water separation sludge
341	Organic liquids (nonsolvents) with halogens
342	Organic liquids with metals (see 121)
271	Organic monomer waste (includes unreacted resins)
351	Organic solids with halogens
352	Other organic solids
252	Other still bottom waste
212	Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
231	Pesticide rinse water
232	Pesticides and other waste associated with pesticide production
311	Pharmaceutical waste
261	Polychlorianted biphenyls and material containing PCBs
272	Polymeric resin waste
321	Sewage sludge
251	Still bottoms with halogenated organics
241	Tank bottom waste
223	Unspecified oil–containing waste
343	Unspecified organic liquid mixture
214	Unspecified solvent mixture
221	Waste oil and mixed oil
	(3) Sludges:
411	Alum and gypsum sludge
451	Degreasing sludge
421	Lime sludge
461	Paint sludge
471	Paper sludge/pulp
431	Phosphate sludge
441	Sulfur sludge
481	Tetraethyl lead sludge
491	Unspecified sludge waste
	(4) Miscellaneous:
613	Auto shredder waste
591	Baghouse waste
531	Chemical toilet waste
611	Contaminated soil from site clean–ups
561	Detergent and soap
521	Drilling mud
513	Empty containers less than 30 gallons
511	Empty pesticide containers 30 gallons or more
571	Fly ash, bottom ash, ad retort ash
581	Gas scrubber waste
612	Household waste
551	Laboratory waste chemicals
512	Other empty containers 30 gallons or more
541	Photochemical/photoprocessing waste
	(5) California Restricted Wastes:
721	Liquids with arsenic ≥ 500 mg/l
722	Liquids with cadmium ≥ 100 mg/l
723	Liquids with chromium (VI) ≥ 500 mg/l)
711	Liquids with cyanides ≥ 1000 mg/l
741	Liquids with halogenated organic compounds ≥ 1000 mg/l
724	Liquids with lead ≥ 500 mg/l
725	Liquids with mercury ≥ 20 mg/l
726	Liquids with nickel ≥ 134 mg/l
791	Liquids with pH ≤ 2
792	Liquids with pH ≤ 2 with metals
731	Liquids with polychlorinated biphenyls ≥ 50 mg/l
727	Liquids with selenium ≥ 100 mg/l
728	Liquids with thallium ≥ 130 mg/l
751	Solids or sludges with halogenated organic compounds ≥ 1000 mg/l
801	Waste potentially containing dioxins

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

Chapter 12. Standards Applicable to Generators of Hazardous Waste

Article 1. Applicability

§ 66262.10. Purpose, Scope, and Applicability.

(a) This chapter establishes standards for generators of hazardous waste located in California.

(b) A generator who treats, stores, or disposes of hazardous waste on–site shall only comply with the following sections of this chapter with respect to that waste: section 66262.11 for determining whether or not the generator has a hazardous waste, section 66262.12 for obtaining an identification number, section 66262.34 for accumulation of hazardous waste, section 66262.40(c) and (d) for recordkeeping, section 66262.43 for additional reporting and if applicable, section 66262.70 for farmers.

(c) Any person who imports hazardous waste into the State to a designated facility within the State from outside the United States shall comply with the standards applicable to generators established in this chapter.

(d) A farmer who generates waste pesticides which are hazardous waste and who complies with of the requirements of section 66262.70 is not required to comply with other standards in this chapter or chapters 2014, 15, or 18 of this division with respect to such pesticides.

(e) A person who generates a hazardous waste as defined by chapter 11 of this division is subject to the compliance requirements and penalties prescribed in chapter 6.5 of division 20 of the Health and Safety Code (commencing with section 25100) if the generator does not comply with the requirements of this chapter.

(f) An owner or operator who initiates a shipment of hazardous waste from a treatment, storage, or disposal facility shall comply with the generator standards established in this chapter. The provisions of section 66262.34 shall be applicable to the on–site accumulation of hazardous waste by generators. Therefore, the provisions of section 66262.34 shall only apply to owners or operators who are shipping hazardous waste which they generated at that facility.

(g) A generator who treats, stores, or disposes of hazardous waste on–site shall comply with the applicable standards and permit requirements set forth in chapters 14, 15, 16, and 20 of this division.

(h) This article does not apply to generators handling only hazardous waste produced incidental to owning and maintaining their own place of residence.

NOTE: Authority cited: Sections 208, 25150 and 25159, Health and Safety Code. Reference: Sections 25150, 25159 and 25159.5, Health and Safety Code; 40 CFR Section 262.10.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66262.11. Hazardous Waste Determination.

A person who generates a waste, as defined in section 66261.2, shall determine if that waste is a hazardous waste using the following method:

(a) the generator shall first determine if the waste is excluded from regulation under section 66261.4 or section 25143.2 of the Health and Safety Code;

(b) the generator shall then determine if the waste is listed as a hazardous waste in article 4 of chapter 11 or in Appendix X of chapter 11 of this division. If the waste is listed in Appendix X and is not listed in article 4 of chapter 11, the generator may determine that the waste from his particular facility or operation is not a hazardous waste by either:

(1) testing the waste according to the methods set forth in article 3 of chapter 11 of this division, or according to an equivalent method approved by the Department pursuant to section 66260.21; or

(2) applying knowledge of the hazard characteristic of the waste in light of the materials or the processes used and the characteristics set forth in article 3 of chapter 11 of this division.

(c) For purposes of compliance with chapter 18 of this division (commencing with section 66268.1), or if the waste is not listed as a hazardous waste in article 4 (commencing with section 66261.30) or in Appendix X of chapter 11 of this division, the generator shall determine whether the waste exhibits any of the characteristics set forth in article 3 of chapter 11 of this division by either:

(1) testing the waste according to the methods set forth in article 3 (commencing with section 66261.20) of chapter 11 of this division, or according to an equivalent method approved by the Department under section 66260.21; or

(2) applying knowledge of the hazard characteristic of the waste in light of the materials or the processes used.

(d) If the waste is determined to be hazardous, the generator shall refer to chapters 14, 15, and 18 of this division for possible exclusions or restrictions pertaining to management of the specific waste.

NOTE: Authority cited: Sections 208, 25150 and 25159, Health and Safety Code. Reference: Sections 25115, 25117, 25159 and 25159.5, Health and Safety Code; 40 CFR Section 262.11.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66262.12. Identification Numbers for the Generator.

(a) A generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without having received an Identification Number.

(b) A generator who has not received an Identification Number may obtain one by applying to the Administrator or to the Department using EPA form 8700–12 (Revised 1/90). Following receipt of the request, the generator will be assigned an identification number.

(c) A generator shall not offer the hazardous waste to transporters or to transfer, treatment, storage or disposal facilities that have not received an Identification Number.

NOTE: Authority cited: Sections 208, 25150 and 25159, Health and Safety Code. Reference: Sections 25159 and 25159.5, Health and Safety Code; 40 CFR Section 262.12.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

Article 2. The Manifest

§ 66262.20. General Requirements.

(a) A generator who transports, or offers for transportation, hazardous waste for off–site transfer, treatment, storage, or disposal shall prepare a Manifest, DHS Form 8022A, and if necessary, the EPA continuation Form 8700–22A, according to the instructions included in the Appendix to chapter 12 of this division before the waste is transported off–site. All manifest requests should be submitted to the following agency:

DEPARTMENT OF GENERAL SERVICES
DOCUMENTS AND PUBLICATIONS
P.O. BOX 1015
NORTH HIGHLANDS, CA 95660

For further information with regard to manifest ordering and associated fees, contact the Department of General Services' Customer Service Office at (916) 973–3700.

(b) A generator shall designate on the manifest one facility which is permitted to handle the waste described on the manifest.

(c) A generator may also designate on the manifest one alternate facility which is permitted to handle the waste in the event an emergency prevents delivery of the waste to the primary designated facility.

(d) If the transporter is unable to deliver the hazardous waste to the designated facility or the alternate facility, the generator shall either designate another facility or instruct the transporter to return the waste.

NOTE: Authority cited: Sections 208, 25150, 25159 and 25161, Health and Safety Code. Reference: Sections 25159, 25159.5 and 25160, Health and Safety Code; 40 CFR Section 262.60.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66262.21. Acquisition of Manifests.

(a) If the state to which the shipment is manifested (consignment state) supplies the manifest and requires its use, then the generator shall use that manifest.

(b) If the consignment state does not supply the manifest, thegenerator shall use the California Uniform Hazardous Waste manifest, EPA 8700–22/DHS 8022A (6–89).

NOTE: Authority cited: Sections 208, 25150, 25159 and 25161, Health and Safety Code. Reference: Sections 25159, 25159.5 and 25160, Health and Safety Code; 40 CFR Section 262.21.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66262.22. Number of Copies.

The manifest consists of at least six copies which will provide the generator with two copies, the transporter with one copy, the owner or operator of the designated facility with one copy and the Department with two copies.

NOTE: Authority cited: Sections 208, 25150, 25159 and 25161, Health and Safety Code. Reference: Sections 25159, 25159.5 and 25160, Health and Safety Code; 40 CFR Section 262.22.

HISTORY

1. New section filed 5–28–91; operative 7–1–91 (Register 91, No. 22).

§ 66262.23. Use of the Manifest.

(a) The generator of any hazardous or extremely hazardous waste to be transported off–site shall:

(1) complete the generator and waste section and sign the manifest certification according to the instructions in the Appendix to this chapter; and

(2) obtain the handwritten signature of the initial transporter and date of acceptance on the manifest; and

(3) retain two copies, in accordance with section 66262.40(a); and

(4) within 30 days of each shipment of hazardous waste submit to the Department a legible copy of each manifest used.

(b) The generator shall give the transporter the remaining copies of the manifest.

(c) For shipments of hazardous waste within the United States solely by water (bulk shipments only), the generator shall send three copies of the manifest dated and signed in accordance with this section to the owner or operator of the designated facility or the last water (bulk shipment) transporter to handle the waste in the United States if exported by water. Copies of the manifest are not required for each transporter.

(d) For rail shipments of hazardous waste within the United States which originate at the site of generation, the generator shall send at least three copies of the manifest dated and signed in accordance with this section to:

(1) the next non–rail transporter, if any; or

(2) the designated facility if transported solely by rail; or

(3) the last rail transporter to handle the waste in the United States if exported by rail.

NOTE: Authority cited: Sections 208, 25150, 25159 and 25161, Health and Safety Code. Reference: Sections 25159, 25159.5 and 25160, Health and Safety Code; 40 CFR Section 262.23.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

Article 3. Pre–Transport Requirements

§ 66262.30. Packaging.

Before transporting hazardous waste or offering hazardous waste for transportation off–site, a generator shall package the waste in accordance with the applicable Department of Transportation regulations on packaging under Title 49 CFR Parts 173, 178, and 179.

NOTE: Authority cited: Sections 208, 25150, 25159 and 25161, Health and Safety Code. Reference: Sections 25159, 25159.5 and 25160, Health and Safety Code; 40 CFR Section 262.30.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66262.31. Labeling.

Before transporting or offering hazardous waste for transportation off–site, a generator shall label each package in accordance with the applicable Department of Transportation regulations on hazardous materials under Title 49 CFR Part 172.

NOTE: Authority cited: Sections 208, 25150, 25159 and 25161, Health and Safety Code. Reference: Sections 25159, 25159.5 and 25160, Health and Safety Code; 40 CFR Section 262.31.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66262.32. Marking.

(a) Before transporting or offering hazardous waste for transportation off–site, a generator shall mark each package of hazardous waste in accordance with the applicable Department of Transportation regulations on hazardous materials under Title 49 CFR Part 172;

(b) Before transporting hazardous waste or offering hazardous waste for transportation off–site, a generator shall mark each container of 110 gallons or less used in such transportation with the following words and information displayed in accordance with the requirements of Title 49 CFR 172.304:

HAZARDOUS WASTE–State and Federal Law Prohibit Improper Disposal. If found, contact the nearest police or public safety authority, the U.S. Environmental Protection Agency or the California Department of Health Services.

Generator's Name and Address_____.

Manifest Document Number_____.

NOTE: Authority cited: Sections 208, 25150, 25159 and 25161, Health and Safety Code. Reference: Sections 25159, 25159.5 and 25160, Health and Safety Code; 40 CFR Section 262.32.

HISTORY

1. New section filed 5–28–91; operative 7–1–91 (Register 91, No. 22).

§ 66262.33. Placarding.

Before transporting hazardous waste or offering hazardous waste for transportation off–site, a generator shall ensure that the transport vehicle is correctly placarded according to Department of Transportation regulations for hazardous materials under Title 49 CFR Part 172, Subpart F.

NOTE: Authority cited: Sections 208, 25150. 25159 and 25161, Health and Safety Code. Reference: Sections 25159, 25159.5 and 25160, Health and Safety Code; 40 CFR Section 262.33.

HISTORY

1. New section filed 5–24–91; effective 7–1–91 (Register 91, No. 22).

§ 66262.34. Accumulation Time.

(a) Except as provided in subsection (d) of this section, a generator may accumulate hazardous waste on–site for 90 days or less without a permit or grant of interim status, provided that:

(1) the waste is placed in containers and the generator complies with article 9 of chapter 15 of this division, or the waste is placed in tanks and the generator complies with article 10 of chapter 15 of this division, except sections 66265.197(c) and 66265.200. In addition, such a generator is exempt from all the requirements in articles 7 and 8 of chapter 15 of this division, except for sections 66265.111 and 66265.114; and

(2) the generator complies with the requirements of subsection (f) of this section; and

(3) the generator complies with the requirements for owners or operators in articles 3 and 4 of chapter 15 of this division and with section 66265.16;

(4) the generator complies with the requirements for owners or operators in article 3 (commencing with section 66265.30) and 4 (commencing with section 66265.50) of chapter 15 of this division and with section 66265.16.

(b) The beginning of the 90 day period specified in subsections (a) and (c) of this section is determined as follows:

(1) if the generator does not generate more than 100 kilograms of hazardous waste or one kilogram of acutely hazardous waste (listed in section 66261.33(e)) or one kilogram of extremely hazardous waste during any calendar month, the 90 day period begins on the date the generator has accumulated 100 kilograms of hazardous waste or one kilogram of acutely hazardous waste or one kilogram of extremely hazardous waste;

(2) if the generator generates more than 100 kilograms of hazardous waste or one kilogram of acutely hazardous waste or one kilogram of extremely hazardous waste during any calendar month, the 90–day period begins on the first date on which any amount of hazardous waste begins to accumulate during that month.

(c) A generator who accumulates hazardous waste for more than 90 days is an operator of a storage facility and is subject to the requirements of chapters 14 and 15 of this division and the permit requirements of chapter 20 of this division, unless the generator has been granted an extension to the 90–day period or meets the requirements of subsection (e) of this section. An extension may be granted by the Department if hazardous wastes must remain on–site for longer than 90 days due to unforeseen, temporary, and uncontrollable circumstances. An extension of up to 30 days may be granted at the discretion of the Department on a case–by–case basis.

(d) A generator who stores more than 5000 U.S. gallons or 45,000 pounds, whichever is greater, of hazardous waste onsite in a tank for any period of time is an operator of a storage facility, and is subject to the requirements of chapters 14 and 15 of this division and the permit requirements of chapter 20 of this division.

(1) For purposes of this subsection, tank does not include a portable tank marked or labeled in compliance with subsection (f) of this section and meeting either of the following conditions:

(A) the portable tank is used to store hazardous waste onsite which has been generated from onsite maintenance operations which occur less frequently than annually; or

COMMENTS: Per your request, we are transmitting a November 1996 groundwater contour map, and instructions on how to obtain water quality information. To determine if a city or address is within our District boundaries, you may check the attached guide or map.

When you submit the enclosed *Information Request Form,* please complete all the sections and mail it with your payment.

Thank you.

GUIDE TO INFORMATION REQUESTS

The Orange County Water District provides ground water information for the following cities:

Anaheim	Irvine	Santa Ana
Buena Park	La Palma	Seal Beach
Costa Mesa	Los Alamitos	Stanton
Cypress	Midway City	Tustin
Fountain Valley	Newport Beach	Villa Park
Fullerton	Orange	Westminster
Garden Grove	Placentia	Yorba Linda
Huntington Beach		

We suggest that you copy your letterhead onto the Information Request Form to provide us with your address and phone number. Add your name, site address, major cross streets, Thomas guide coordinates, and the reason that you are conducting the site investigation. Please note that Information Requests are processed through a database that requires exact information.

All requests require a two to three weeks turnaround time. The processing fee is a minimum of $10.00. Make checks payable to the Orange County Water District.

Please ensure that your request is complete before mailing it. Incomplete requests may further delay the inquiry.

NOTE: *Driller's logs or well logs are confidential according to the State Water Code, hence the public may not access such information.*

MATERIAL SAFETY DATA SHEET

Jones Chemicals, Inc.
80 Munson Street
LeRoy, New York 14482
(and Principal Cities)

For information, please contact the Jones Chemicals facility in your area at ( ) - or the Jones Chemicals Corporate Laboratory in Caledonia, New York at (716) 538-2311.

In the event of a transportation emergency,
Call CHEMTREC: (800) 424-9300

SECTION I - IDENTIFICATION

TRADE NAME: Sunny Sol 150®
CHEMICAL NAME: Sodium Hypochlorite
FORMULA: NaOCl
DOT SHIPPING NAME: Hypochlorite Solution
DOT HAZARD CLASS: Corrosive Material
UN/NA NUMBER: UN 1791
DOT LABEL: Corrosive
DOT PLACARD: Corrosive
PACKING GROUP: III
REPORTABLE QUANTITY: Sodium Hypochlorite: 100 Pounds/45.4 Kilograms
CAS NUMBER: 7681-52-9

NFPA DESIGNATION: The NFPA has not rated sodium hypochlorite.

SECTION II - HAZARDOUS INGREDIENTS

MATERIAL	% BY WEIGHT	CAS NO.	OSHA PEL	ACGIH TLV
Sodium Hypochlorite	12.5-15.6	7681-52-9	Not Applicable	Not Applicable
Sodium Hydroxide	0.1-2.0	1310-73-2	2mg/m³ ceiling	STEL/CEIL(c) 2mg/m³ ceiling
Inert Ingredients	Balance	Not Applicable	Not Applicable	Not Applicable

CARCINOGENICITY STATUS: NTP - No, IARC - No, OSHA - No.

SECTION III - PHYSICAL DATA

APPEARANCE: Yellow-green liquid
BOILING POINT: 219°F (104°C) for 12.5% NaOCl by wt.
FREEZING POINT: - 11°F (- 24°C) for 12.5% NaOCl by wt.
ODOR: Chlorine
pH: 12.5 - 13.5 s.u. @ 25°C
VISCOSITY (Cs): 2.15 @ 23°C for 12.5% NaOCl by wt.
PERCENT VOLATILE BY VOLUME: Variable water plus products of decomposition
SOLUBILITY IN WATER: Complete
SPECIFIC GRAVITY (Water=1): 1.218 @ 20°C for 13.79 % NaOCl by wt.
VAPOR DENSITY (AIR=1): Not available
VAPOR PRESSURE (mm Hg): Variable water plus products of decomposition.

SECTION IV - FIRE AND EXPLOSION DATA

FLASH POINT (Test method): Not applicable
AUTO IGNITION TEMPERATURE: Not applicable
FLAMMABLE LIMITS IN AIR (Volume %): Not applicable
EXTINGUISHING MEDIA: Flood with water or carbon dioxide (CO2)
SPECIAL FIRE FIGHTING PROCEDURES: Use National Institute of Occupational Safety & Health (NIOSH) approved respirator with acid type canister or use self-contained breathing apparatus. Unusual fire and explosion hazards: material is a strong oxidizer. Contact with combustibles may initiate or promote combustion. Acid and heat accelerate decomposition. Decomposition products may include chlorine.

SECTION V - HEALTH HAZARD INFORMATION

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

No medical conditions are known to be aggravated by exposure.

ROUTES OF EXPOSURE

INHALATION: Fumes from spills can cause severe irritation and chemical burns to the nose, throat, and lungs. Very little hazard from properly stored solution.
SKIN CONTACT: Severe irritant, reddening of skin, can cause chemical burns to skin.
SKIN ABSORPTION: Same as skin contact.
EYE CONTACT: Severe irritant, corrosive, can severely burn eyes.
INGESTION: Causes irritation of membranes of the mouth, throat, and stomach pain and possible ulceration. LD50 (oral, rat) for 12.5% NaOCl is approximately 5 g/kg body weight.

EFFECTS OF OVEREXPOSURE

ACUTE OVEREXPOSURE (see Routes of Exposure above)

SWALLOWING: See "ingestion" under routes of exposure.
SKIN CONTACT: severe Irritant, reddening of skin, skin damage, chemical burns.
INHALATION: Fumes from spills are very irritating to mucous membranes.
EYE CONTACT: Extreme irritant, corrosive.

CHRONIC OVEREXPOSURE (see Routes of Exposure above)

EYE: Can cause damage.
SKIN: Can cause damage, chemical burns.

EMERGENCY AND FIRST AID PROCEDURES

IF CONTACT WITH EYES OCCURS: flush with water for at least fifteen (15) minutes. Get medical attention.
IF CONTACT WITH SKIN OCCURS: wash with plenty of soap and water.
INHALATION: Remove to fresh air. Call a physician if exposure is severe.
IF SWALLOWED: drink large amounts of water. Do NOT induce vomiting. Call a physician or poison control center immediately.

SECTION VI - REACTIVITY DATA

CONDITIONS CONTRIBUTING TO INSTABILITY

Solutions are fairly stable in concentrations below 10%. Stability decreases with concentration, heat, light, exposure, decrease in pH, and contamination with heavy metals, such as nickel, cobalt, copper, and iron.

INCOMPATIBILITY

Acids, alcohols, amines, ammonia, chlorinated isocyanurates, combustibles, cyanides, detergents, ethers, hydrocarbons, oxidizable materials, reducing agents. Corrosive to most metals.

DECOMPOSITION PRODUCTS

Hypochlorous Acid (HOCl), chlorine, hydrochloric acid. Composition depends upon temperature and decrease in pH. Additional decomposition products, which depend upon pH, temperature and time, are sodium chloride, sodium chlorate and oxygen.

CONDITIONS CONTRIBUTING TO HAZARDOUS POLYMERIZATION

Will not occur.

SECTION VII - SPILL OR LEAK PROCEDURES

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED

Cleanup personnel must wear proper protective equipment (See Section VIII). Contain in diked area. Neutralize with sodium bisulfite or ferrous salt solutions. Place neutralized material in DOT specification approved container(s). Flush area with large amounts of water. Comply with all Federal, State and Local reporting requirements.

WASTE DISPOSAL

Contact Federal, State, County, and Local environmental regulators for guidance regarding proper disposal.

SECTION VIII - SPECIAL PROTECTION INFORMATION

VENTILATION REQUIREMENTS

Local exhaust is recommended.

SPECIFIC PERSONAL PROTECTIVE EQUIPMENT

RESPIRATORY: Use National Institute of Occupational Safety and Health (NIOSH) or Mine Safety and Health Administration (MSHA) approved respirator appropriate for this product when permissible exposure limits are exceeded.
EYES: Use chemical goggles and face shield.
GLOVES: Use chemical resistant rubber, plastic, or neoprene gloves.
OTHER: Use chemical resistant splash apron and boots. Safety shower and eye wash fountain should be located nearby.

SECTION IX - SPECIAL PRECAUTIONS

PRECAUTIONS TO BE TAKEN IN HANDLING

DANGER: This product is corrosive and may cause severe skin irritation or chemical burns to broken skin. Causes eye damage. Do not get in eyes, on skin or on clothing. Wear goggles and face shield and chemical resistant gloves when handling this product. Wash after handling. Avoid breathing vapors. Vacate poorly ventilated areas as soon as possible. Do not return until odors have dissipated.

PROPER STORAGE AND DISPOSAL REQUIREMENTS

Store this product in a cool, dry area away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water.

Disposal for domestic use: Do not reuse container. Rinse thoroughly before discarding in trash.

Disposal for all other uses: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Do not contaminate water, food, or feed by storage, disposal or cleaning of equipment.

STORE IN AN UPRIGHT POSITION

OTHER PRECAUTIONS

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc., or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

ADDITIONAL REGULATORY CONCERNS

EPA: May not be used for disinfection or sanitization without prior approval by EPA. Repackagers must obtain EPA registration and establishment numbers.
FIFRA: This product is regulated under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) if used as a disinfectant or sanitizer.
TSCA: Included in the Toxic Substances Control Act (TSCA) Inventory Of Chemical Substances.

Subject: **Case Closure**

Re: Kimberly-Clark
2001 E. Orangethorpe Avenue
Fullerton, CA 92831
OCHCA Case # 98IC9

Dear Mr. Choi:

This letter confirms the completion of remedial investigation at the above-referenced site. With the provision that the information provided to this Agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

This confirmation of completion is limited in scope. It is limited to site conditions made known to this Agency under the above-referenced case number. It is based on an evaluation of the health threat presented by the inhalation, ingestion, or dermal absorption of the residual contaminants. In addition, this evaluation considered the present and proposed use of the property. Changes in the present or proposed land use may require further site characterization and/or site mitigation activity.

The presence of sodium hypochlorite (NaOCl) and the potential for residual contamination present at this site to cause groundwater contamination was discussed with Robert Holub and Kamron Saremi of the Santa Ana Regional Water Quality Control Board. Regional Board staff concurred that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health. It is the property owner's responsibility to notify this Agency of any changes in future contamination findings or site usage.

If you have any questions regarding this matter, please contact Luis Lodrigueza at (714) 667-3717.

Sincerely,

Karen L. Hodel

Closure Rationale

OCHCA Case No.: **98IC9**

April 14, 1998

DBA: **Kimberly-Clark**
2001 E. Orangethorpe Avenue
Fullerton, CA 92831

Responsible Party: Kimberly-Clark
c/o Charles Choi/WEECO

Current Land Use: Commercial Future Land Use: Commercial
Adjacent Land Use: Commercial

Contaminant	Concentrations in Soil: Maximum	Concentrations in Soil: Deepest Known	US EPA PRG (Ind**) (mg/kg)
Sodium hypochlorite (NaOCl)	13 ppm (2')	0.80 ppm (40')*	1.7E+05 (170,000)

*Depth in feet below grade **Industrial setting

Soil types: Sandy silt to silt, with occasional pea gravel

Depth to groundwater: 100-110 ft below grade (bg), estimated

This rationale pertains to the bermed 120 ft by 110 ft tank farm area at the mid-eastern edge of the property. Five aboveground tanks containing fuel oil and chemicals are situated in this farm. A site investigation was conducted in this location after two spill incidents of sodium hypochlorite (12.5-15.6% NaOCl solution) occurred in the tank farm. The first incident was discovered on August 6, 1997 when NaOCl solution leaked from an aboveground tank (No. 1) and wet about 177 square feet of soil on its way to a 250-gallon capacity concrete-lined collection sump situated in a relatively depressed area. The contaminated soil was removed and placed in thirteen (13) 50-gallon drums on site. The tank was decommissioned and replaced with a temporary storage tank. The second incident happened about 7 months later. The vacuum hose connected to the temporary storage tank ruptured, spilling some 270 gallons of NaOCl: most collected in the concrete sump, but about 20 gallons of the liquid spilled into the ground. No soil removal was undertaken at this time. In both instances, the leakage was confined to the bermed area of the tank farm, and there was no known discharge to any sewer, storm drain or waterway.

Kimberly Clark contracted WEECO to determine the extent of contamination resulting from the spillage. WEECO installed 10 hand auger borings on site because of accessibility problems with a mechanized drill rig. The boreholes were drilled in the immediate vicinity of Tank No.1 and nearby Tank No. 2. Soil samples were collected from depths of 2, 4, 6, 8 and 10 ft below grade (bg) and sent to a State-certified laboratory for NaOCl analysis. Results showed the presence of significant NaOCl in all boreholes. The contamination extended from the surface to various depths of 4 ft to 10 ft bg and NaOCl concentrations ranged from below detection (1 ppm method detection limit) to a maximum of 13 ppm.

The presence of NaOCl at depth prompted the installation of 4 additional boreholes in locations that had the deepest known impact. A mechanical rig was used this time and the borings extended to a maximum depth of 40 ft bg. Two off-path boreholes showed detectable (>0.5 ppm NaOCl) contamination down to only 20 ft bg, while two others (one at the location of the removed leaking tank and another directly downgradient of the spill flow) showed contamination of up to 0.8 ppm at the maximum drill depth of 40 ft bg.

WEECO submitted to OCHCA a report on the investigation and requested an evaluation of the need for any additional work and/or mitigation of the contamination.

Sodium hypochlorite aqueous solution (12.5%-15.6% by weight) is used by Kimberly Clark as a bleaching agent for its paper (pulp); it is also generally used as a swimming pool disinfectant, fungicides

and in laundering. Its corrosive and irritant properties especially make it hazardous, aside from its being an oxidizing agent. The concentration of the solution and the duration of exposure affect the degree of sodium hypochlorite's toxicity.

A comparison between the amount of sodium hypochlorite used in swimming pool disinfection and the concentration of NaOCl solution spilled at this site was made to determine the impact of human exposure to the contamination at this site. Sodium hypochlorite is one of 4 common disinfecting chemicals used in swimming pools (chlorine gas, lithium and calcium hypochlorite are the other three). OCHCA staff responsible for swimming pool inspections said that normally 5-7 ppm of available chlorine is considered acceptable as residual chlorine concentration in a pool and a maximum of 10 ppm chlorine had been accepted in several cases. Although no formal policy so dictates, this 10 ppm maximum chlorine residual is the current standard used by HCA staff. [Compare: Per HCA Water Quality Unit staff, the acceptable chlorine level at the drinking water distribution system (tap) is currently 0.02 ppm; there is no maximum value for drinking water at the tap, but odor and taste thresholds would be taken into account to determine acceptability.]

The NaOCl solution used by Kimberly Clark is supplied by Jones Chemicals, Inc. under the brand name of "Sunny Sol 150" and contains 12.5%-15.6% NaOCl by weight. Based on industry standards, this would contain about 10% to 12% (100,000–120,000 ppm) available chlorine. The maximum detected NaOCl concentration in the soil within the tank farm was 13 ppm, which would equate to 10.8 ppm available chlorine—a concentration only slightly above the accepted chlorine standard used for swimming pools. Compared to the swimming pool environment where pool water is in direct contact with users and could be easily ingested, the tank farm is fenced off and not easily accessible to workers in this industrial setting. [It is to be noted that of the NaOCl spilled, some would have decomposed to free chlorine and hypochlorous acid, the latter likely reacting with waste matter to produce chloramines, both of which would effectively reduce the available chlorine. Furthermore, given time, the NaOCl would be converted to non-toxic sodium chloride, sodium chlorite and oxygen.] Given the amount of rainfall that the county had received in the last quarter of 1997 and the first quarter of 1998, the concentration of NaOCl should be expected to have been drastically diminished to insignificant levels.

In view of the very low levels of NaOCl in soil beneath the tank farm within this industrial facility, which is comparable to the amount of exposure acceptable in a more sensitive locale (swimming pool)--and which is only a tiny fraction of the amount (in terms of chlorine) considered by the US EPA to be safe to be left in place [10.8 ppm (soil concentration) vs. 170,000 ppm (PRG)]--the contamination at this site is not deemed to be of any significant threat to human health or the environment. Water quality beneath this site is also unlikely to be impacted because of the deep water table and the progressive decrease in NaOCl concentration with depth, reaching less than 1 ppm some 60 ft away from the water table. Since no further action appears necessary at this location; it is recommended that this case be closed. Kamron Saremi of the Santa Ana Regional Water Quality Board was contacted regarding this and he concurred with closure.

TREATMENT

INTRODUCE 15 PPM NEW CHLORINE TO THE POOL TO ACHIEVE BREAKPOINT.

AMOUNT OF CHLORINE COMPOUND TO INTRODUCE ONE PPM

% AVAILABLE CHLORINE	GALLONS IN POOL					
	1,000	5,000	10,000	15,000	20,000	25,000
10%	1/5 C.	8/10 C.	1 6/10 C.	1 2/10 pts.	1 6/10 pts.	1 qt.
35%	0.024 lbs.	0.119 lbs.	0.238 lbs.	0.356 lbs.	0.477 lbs.	0.596 lbs.
60%	0.014 lbs.	0.070 lbs.	0.139 lbs.	0.209 lbs.	0.278 lbs.	0.348 lbs.
65%	0.013 lbs.	0.064 lbs.	0.128 lbs.	0.192 lbs.	0.257 lbs.	0.321 lbs.

1 Cup = 8 oz. liquid

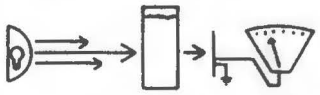
10% as liquid bleach (sodium hypochlorite)

35% as lithium hypochlorite

60% as sodium dichloroisocyanurate

65% as calcium hypochlorite

From the table — 20,000 gal. — 65% Available Chlorine
1 ppm = 0.257 lbs.
0.257 x 15 ppm = 3.855 lbs.



TEST METHODS FOR CHLORINE

1. DPD

Diethyl-p-phenylene diamine (DPD) is the accepted method because of color stability, accuracy and reproducibility.

MEASURES: 1. Free Available Chlorine (FAC)
2. Total Available Chlorine (TAC)

2. COLORIMETRY —

Colorimetry incorporates a monochromatic (single color) light source to electronically (photometrically) measure the chlorine residual.

MEASURES: 1. Free Available Chlorine (FAC)

3. OTO

Orthotolidine (OTO) is vunerable to many interfering agents. Because of this, OTO has poor accuracy and reproducibility. Furthermore, OTO could be a potential cause of cancerous tumors in the urinary tract. It has been placed on the EPA list of carcinogenic agents.

MEASURES: 1. Total Available Chlorine (FAC)

BREAKPOINT CHLORINATION

Breakpoint chlorination is the process of adding sufficient chlorine to chemically convert chloramines to inert nitrogen gas. The terms shocking and superchlorination have oftentimes been confused with breakpoint chlorination.

$$2NH_2Cl + Cl_2 \longrightarrow N_2\uparrow + 4HCl$$

(Monochloramine) (Nitrogen Gas)

FREE AVAILABLE CHLORINE (FAC) DPD #1
COMBINED AVAILABLE CHLORINE (CAC)
TOTAL AVAILABLE CHLORINE (TAC) DPD #1 + DPD #3

Mathematical Relationship

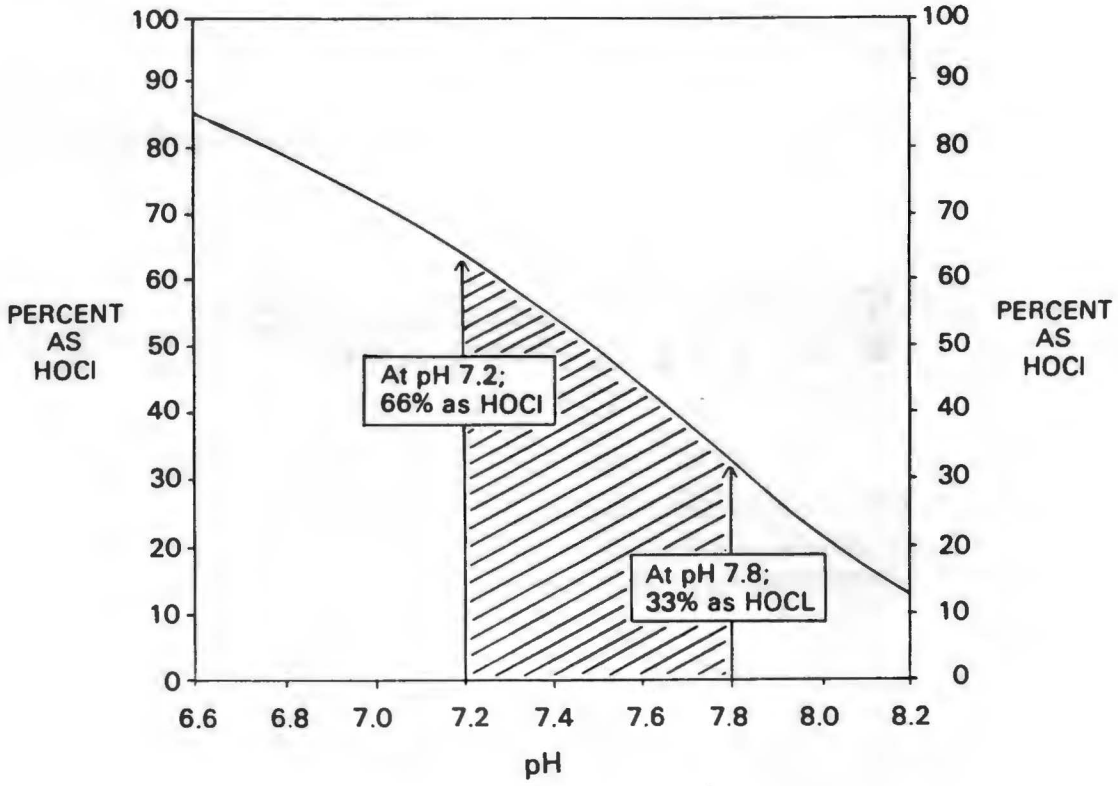
TAC = FAC + CAC
CAC = TAC – FAC

ppm chlorine required to achieve breakpoint = CAC x 10

EXAMPLE OF BREAKPOINT CHLORINATION

20,000 gal. pool - 65% available chlorine in the form of calcium hypochlorite on hand.

Testing shows FAC = 0.5 ppm; and TAC = 2.0 ppm; pH = 7.5



Complaint — Eye irritation and strong "chlorine odor."

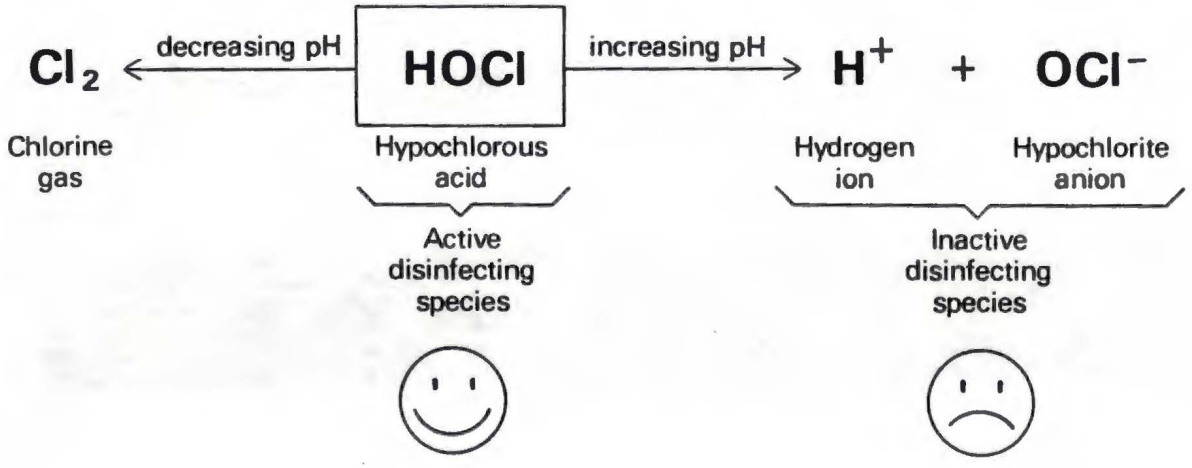
Analysis:

$$\begin{array}{r} TAC = 2.0 \text{ ppm} \\ -FAC = 0.5 \text{ ppm} \\ \hline CAC = 1.5 \text{ ppm} \end{array}$$

Using Formula: 1.5 ppm x 10 = 15 ppm of new chlorine must be added to remove chloramines.

ACID DISSOCIATION CURVE FOR HOCl

$$HOCl \underset{\text{decreasing pH}}{\overset{\text{increasing pH}}{\rightleftharpoons}} H^+ + OCl^-$$

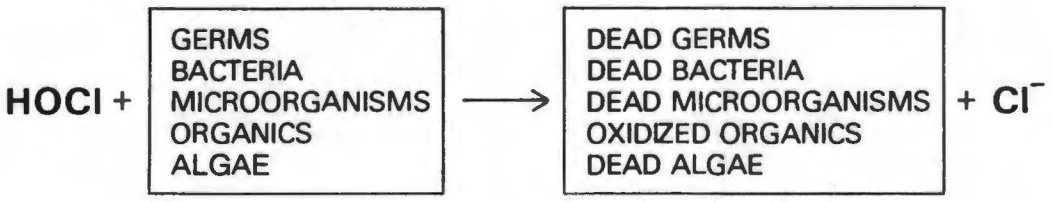


pH	PERCENT AS ACTIVE HOCl	PERCENT AS INACTIVE OCl^-
5.0	100	0
6.0	96	4
7.0	75	25
7.2	66	34
7.5	48	52
7.8	33	67
8.0	22	78

HOW DOES HYPOCHLOROUS ACID KILL GERMS AND DESTROY BACTERIA?

I. Chemical interference of a vital, life-supporting enzymatic reaction.
II. Direct attack and rupture of the cell wall.

HYPOCHLOROUS ACID AND pH

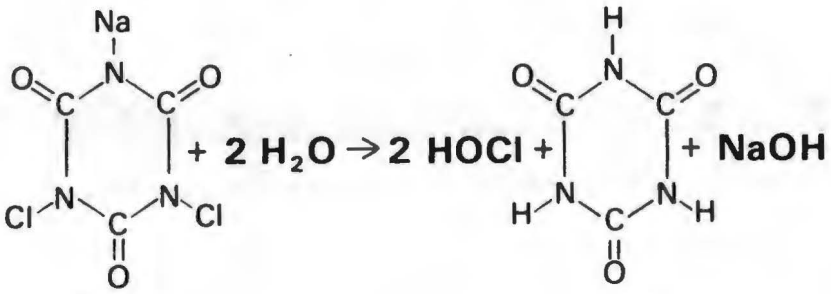


Hypochlorous acid (HOCl) dissociates (separates) or ionizes at higher pH's to form inactive hydrogen (H^+) ion and hypochlorite (OCl^-) anion. These chemical species have virtually zero disinfecting properties.

CHEMISTRY OF HYPOCHLOROUS ACID

HOCl

Hypochlorous acid is the active chlorine species that kills bacteria, deactivates microorganisms, oxidizes organic and nitrogen compounds and destroys algae. The sanitizing and oxidizing power of hypochlorous acid is due to the fact that the chlorine atom of the hypochlorous acid molecule is present in an UNSTABLE (+1) oxidation state. When reacting with germs, bacteria, microorganisms, organics and algae, the chlorine atom is converted to chloride ion (Cl^-).



NOTE: The chloride ion (Cl^-) has no disinfection or oxidizing power.

Equivalent Sanitizing Quantities of Pool Chlorine Products

1 GALLON (U.S.) EQUIVALENT TO	1 POUND EQUIVALENT TO	1 POUND EQUIVALENT TO	1 POUND EQUIVALENT TO	1 POUND EQUIVALENT TO	1 POUND EQUIVALENT TO

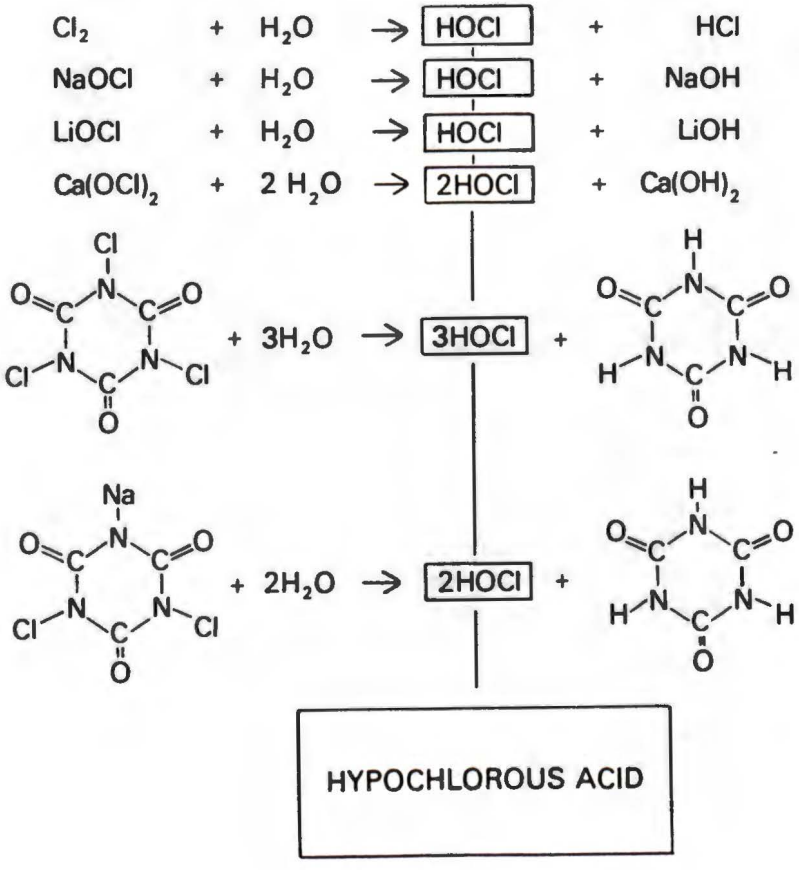
SODIUM DICHLOROISOCYANURATE

Dichloro

Cyanuric acid

ACTIVE STRENGTH — 100%
AVAILABLE CHLORINE CONTENT — 62%
pH — 6.7

Advantages

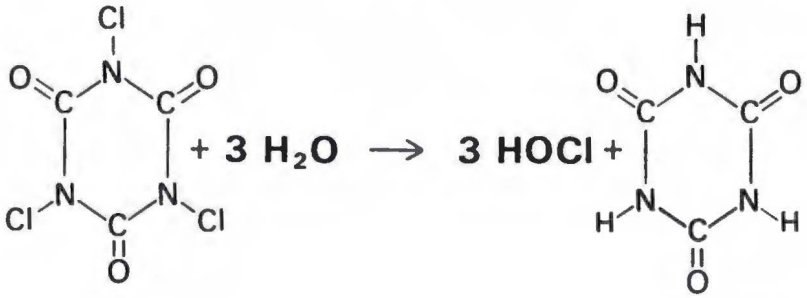


- Easy to handle
- Fast dissolving
- Neutral pH
- Stabilized against U.V. degradation

Disadvantages

- Most expensive chlorine sanitizer

CONCLUSION



No matter which form of chlorine sanitizer is used, the result is the formation of hypochlorous acid (HOCl).

Amount of Stabilizer Required to Accomplish the Desired Increases Listed Below.

Desired Increase \ Pool Volume (gallons)	1,000	5,000	10,000	20,000	50,000	100,000
10 ppm	0.083 lb	0.42 lb	0.83 lb	1.7 lb	4.2 lb	8.3 lb
20 ppm	0.17 lb	0.84 lb	1.6 lb	3.4 lb	8.4 lb	16.6 lb
30 ppm	0.25 lb	1.3 lb	2.5 lb	5.1 lb	12.6 lb	24.9 lb
40 ppm	0.33 lb	2.1 lb	3.3 lb	6.8 lb	16.8 lb	33.2 lb
50 ppm	0.42 lb	2.9 lb	4.2 lb	8.5 lb	21.0 lb	41.5 lb

TRICHLOROISOCYANURIC ACID

Trichlor

Cyanuric acid

ACTIVE STRENGTH — 90 - 100%
AVAILABLE CHLORINE CONTENT — 90%
pH — 2.8

Advantages

- Easily handled
- Dissolves slowly
- Ideal for erosion chlorinators
- Stabilized against U.V. degradation

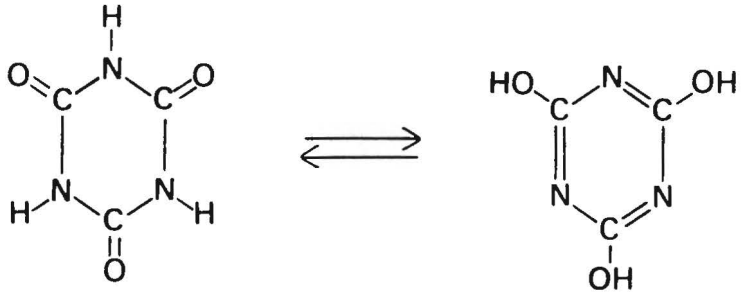
Disadvantages

- Low pH
- Reduces total alkalinity
- Elevated cyanuric acid levels

CALCIUM HYPOCHLORITE
$Ca(OCl)_2$

$$Ca(OCl)_2 + H_2O \rightarrow \underset{\text{Hypochlorous Acid}}{2HOCl} + \underset{\text{Calcium Hydroxide}}{Ca(OH)_2}$$

ACTIVE STRENGTH — 65%
AVAILABLE CHLORINE CONTENT — 65%
pH — 11



Advantages

- Easily handled
- No significant decomposition if stored properly

Disadvantages

- Can cause cloudy water, scale or clogged filters if pH and total alkalinity are not properly maintained
- Raises pH
- Slow to dissolve

STABILIZATION
(CONDITIONING)

Isocyanuric Acid Cyanuric Acid

Characteristics

- Cyanuric acid protects the free available chlorine residual from the destructive properties of ultraviolet radiation (SUNLIGHT)
- Proper range: 25 to 50 ppm
- pH: 6.3
- Slow dissolving
- Not degraded by any pool chemicals, therefore cyanuric acid is diluted by draining and refilling

SODIUM HYPOCHLORITE (NaOCl)

$$NaOCl + H_2O \rightarrow \underset{\text{Hypochlorous Acid}}{HOCl} + \underset{\text{Sodium Hydroxide}}{NaOH}$$

ACTIVE STRENGTH — 10.8%
AVAILABLE CHLORINE CONTENT — 10.3%
pH — 13

Advantages

- Next to chlorine gas, this liquid chlorine compound is the cheapest form of chlorine.
- No dissolving required; goes into action immediately.

Disadvantages

- Bulky and heavy.
- Requires large storage areas.
- Raises pH dramatically
- Not stable in storage except at very low temperatures.
- Bleaches any colored materials (i.e., clothes, bathing suits, etc.).

LITHIUM HYPOCHLORITE (LiOCl)

$$LiOCl + H_2O \rightarrow \underset{\text{Hypochlorous Acid}}{HOCl} + \underset{\text{Lithium Hydroxide}}{LiOH}$$

ACTIVE STRENGTH — 29%
AVAILABLE CHLORINE CONTENT — 35%
pH — 10

Advantages

- Very soluble
- Safe and easily handled
- No significant decomposition if properly stored
- No predissolving required

Disadvantages

- Similar in price to calcium hypochlorite, however it requires 1.8 times as much to achieve the same activity
- Raises pH

BREAKING THE CONFUSION BARRIER BETWEEN:

- **ACTIVE STRENGTH**
  Refers to the actual percentage by weight of the sanitizer.

  Example: Calcium Hypochlorite - $Ca(OCl)_2$
  Active Strength: 65%
  Inert Ingredients: 35%

- **AVAILABLE CHLORINE CONTENT (ACC)**

  Refers to the relative sanitizing and oxidizing strength when referenced to gas chlorine which is 100% available chlorine.

CHLORINE GAS - Cl_2

$$Cl_2 + H_2O \rightarrow \underset{\text{Hypochlorous Acid}}{HOCl} + \underset{\text{Hydrochloric Acid}}{HCl}$$

ACTIVE STRENGTH — 100%
AVAILABLE CHLORINE CONTENT — 100%
pH — Very low

Advantages

- Cheapest source of chlorine sanitizer.

Disadvantages

- Requires expensive feed equipment
- Chlorine gas is very toxic and dangerous to handle.
- Lowers pH.
- Experienced chlorine gas operator required to change gas cylinders and make adjustments.
- Requires soda ash (Na_2CO_3) feed equipment to compensate for the low pH of gas chlorine.

CHLORINE DISINFECTION

THE TWO MAJOR CLASSES OF POOL CHLORINES ARE:

(A). UNSTABILIZED (INORGANIC)

1. Gas Chlorine
2. Sodium Hypochlorite
3. Lithium Hypochlorite
4. Calcium Hypochlorite

(B). STABILIZED (ORGANIC)

1. Trichloro-s-Triazinetrione (TRICHLOR)
2. Sodium Dichloro-s-Triazinetrione (DICHLOR)

POPULAR METHODS OF POOL DISINFECTION

Method	Active Agent
Chlorine	Hypochlorous Acid (HOCl)
Bromine	Hypobromous Acid (HOBr) Bromamines
Iodine	Hypoiodous Acid (HOI) Free Iodine (I_2)
Ozone	Ozone (O_3)
Ultraviolet Radiation	U.V./Hydrogen Peroxide

SWIMMING POOL DISINFECTION

IMPORTANT DEFINITIONS

- **DISINFECTION** is the process of destroying living organisms and bacteria in sufficient numbers (99.9%) to prevent disease. **Disinfection** does not necessarily imply complete destruction of all living organisms.
- **STERILIZATION** is the complete (100%) destruction of all living organisms and bacteria.
- **OXIDATION** is the process of cleansing or purging the pool of organic and nitrogen contaminants such as dust, algae and human wastes. **Oxidation** is the burning out process to convert complex organic molecules to simple compounds that can eventually escape as a harmless gas (i.e., carbon dioxide, elemental nitrogen and others).
- **HALOGEN** is the general term describing any of the five (5) elements of group VII of the periodic chart.

Group VII	Molecular Form	Physical State
Fluorine	F_2	Gas
Chlorine	Cl_2	Gas
Bromine	Br_2	Liquid
Iodine	I_2	Solid
Astatine	At_2	Solid

FAXED

RE: Kimberly-Clark Factory NaOCl Spill Problem

Dear Mr. Lodrigueza:

Here are the answers to your question of your fax of March 24, 1998.

(l). There were two occasions of NaOCl leaks at the tank farm of the Kimberly-Clark factory.

(The first incident) August 5, 1997 at 7:30 AM (See Attached report from Kimberly-Clark to O.C. HCA/Environmental Health)

A unknown amount of NaOCl solution was found leaked from the Tank No. 1 shown in Figure (l).
The NaOCl solution leak was found inside the bermed tank farm area. The liquid had gone into a lined concrete sump. Approximately 197 square-feet of soil was found contaminated. There was no discharge to the waterways.
The cause of the spill was not known at that time.
The spill was stopped, cleaned up, and contained. The leaked tank (No. 1) was emptied, and not used.

A temporary tank was brought inside the tank farm, and was used to store NaOCl solution.

(Second Incident) Sept. 21, 1997, at 12:45 AM (See Kimberly-Clark Report to O.C. HCA/Environmental Health)

A leak was found in the vacuum hose that was connected to a temporary NaOCl tank which was located inside the tank farm. Around 270-gallons of NaOCl solution (15.6% solution) was found to have leaked. Around 250-gallons of NaOCl went into the concrete sump, and the

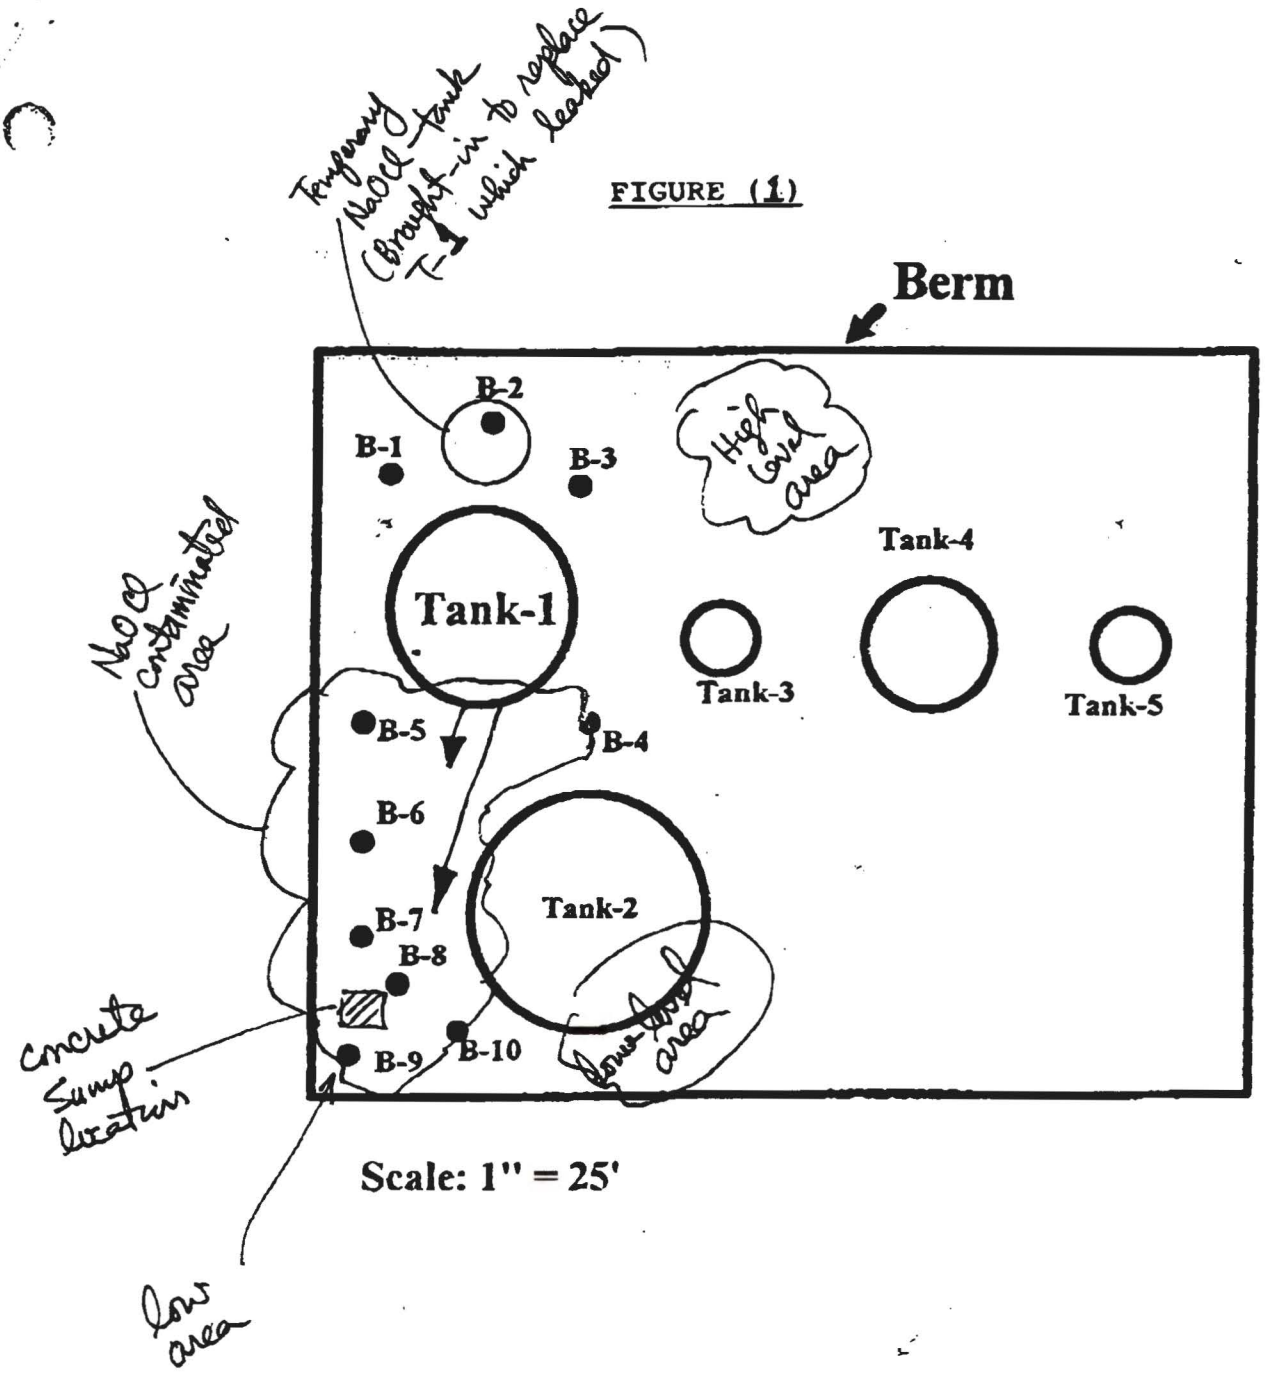
RECEIVED
APR 2 1998
HEALTH CARE AGENCY
ENVIRONMENTAL HEALTH

remainder of 20-gallons was believed to have spilled onto the soil inside the tank farm. There was no discharge into the storm drain waterways.

(2). Figure (l) shows the tank locations and the spill locations.

As shown in this figure, the NaOCl spill occurred from the Tank No.1. The lower point in the bermed tank farm is at the bottom of the left-hand side(Southwest corner). All leaked liquid was flown to the southwest direction from the point of leak.

As shown in Figure (l), man borings were drilled in the west and the southwest areas of the tank farm where the leaked NaOCl solution was found to migrated.



If you have any more questions, please call me at any time.

Best regards,

Charles Choi

Prop 65 ID# _____

ORANGE COUNTY
HCA/ENVIRONMENTAL HEALTH
Proposition 65 Notification Report Form

Any designated government employee who obtains information in the course of his official duties revealing the illegal discharge or threatened illegal discharge of a hazardous waste, that is likely to cause substantial injury to the public health and safety, must report such information within 72 hours to the Board of Supervisors and Health Officer or face up to $26,000 in fines and/or up to three years in jail (pursuant to § 25180.7 of the Health and Safety Code). The information submitted in this report is based upon the best available information at the time the report was completed.

Provide the following information to the Health Care Agency at (714) 667-3765 (24 hours)

1. Date Reported: 8-6-97 Time: 1:13 PM Designated Employee Reporting: GRACE MADDEN
2. Report submitted on behalf of all designated employees of what agency: KIMBERLY CLARK CORP.
3. Date of Incident: 8-5-97 Time: 7:30 AM Source of Information (report 6): DIRECT OBSERVATION
4. Incident Location/ Name of Business (DBA): KIMBERLY CLARK
   Address: 2001 E. ORANGETHORPE AVE., City: FULLERTON, CA Zip: 92831
5. Site Telephone: (714) 773-7500 Company Contact Person: GRACE MADDEN (EXT 7677)
6. Description/Cause of Incident (What, where, and how did it happen?):
   A SODIUM HYPOCHLORITE SOLUTION SPILL WAS FOUND ON AUGUST 5TH AROUND 7:30 AM IN THE KIMBERLY CLARK TANK FARM. SPILL WAS INSIDE AN EARTHEN BERM. THE LIQUID HAD GONE TO A LINED CONCRETE SUMP (2500 GAL CAPACITY). APPROX. 1975 SQ FT OF SOIL WAS WET OR CONTAMINATED. THERE WAS NO DISCHARGE TO THE WATERWAYS. AT THIS TIME, CAUSE OF SPILL HAS NOT BEEN IDENTIFIED. THE TANK CONTRACTOR SHOULD BE HERE ON AUG. 8. THE SPILL WAS STOPPED, CONTAINED, CLEANED UP, TANK WAS EMPTIED & IS CURRENTLY BEING USED. [SEE QUESTION #16 FOR MORE INFO.]
7. Responsible Party Name: KIMBERLY CLARK Telephone: 714-773-7500
   (Business or Company names. Do not identify private citizens)
8. Identification of Discharged Waste

Chemical Name/ Common Name	Solid/Liquid/Gas	Quantity	Hazardous Properties
SODIUM HYPOCHLORITE SOLUTION (CAS# 7681-52-9)	LIQUID	100 - 200 LBS; MAXIMUM = 1650 GALLONS MINIMUM = 110 GALLONS OR LESS	CORROSIVE ; RQ = 100 LBS.

9. Field Data or Lab Result (Indicate Soil, Groundwater, etc.): LAB RESULTS ARE NOT YET IN. 3 SAMPLES WERE COLLECTED : SAMPLE A = DRUMMED MATERIAL ; SAMPLE B = GROUND SOIL SAMPLES AFTER CLEAN-UP; SAMPLE C = LIQUID FROM THE SUMP
10. Environment Affected (check all that apply): ☐ Roadway ☐ Groundwater ☐ Sewer ☐ Storm Drain ☐ Lake ☐ Stream ☐ River ☐ Bay ☐ Ocean ☐ Air ☒ Soil ☐ Flood Channel ☐ Paved Ground ☐ Other: _____
11. Locale: ☐ Residential ☐ Commercial ☒ Industrial ☐ Open Area ☐ Rural
12. Property: ☒ Private Property ☐ Public Property

Report: 8-6-97 (p3of5)

13. Describe the Extent of Contamination (How much of how large of an area was contaminated): THE SODIUM HYPOCHLORITE SOLUTION TRAVELLED APPROX. 50 FT. TOWARD THE SUMP (LINED + CONCRETE MAT'L). APPROX. 177 SQ FT OF SOIL WAS WET OR GOT CONTAMINATED.

14. Number of Injuries (As a result of the release): ZERO

Number of persons receiving medical treatment: ZERO Where: N/A

15. Agencies at the scene of incident: NONE

16. Was the Incident Mitigated?: ☒ Yes ☐ No Does further action need to be taken?: ☒ Yes ☐ No

Action (How was the situation mitigated? If not mitigated, what action should be taken to mitigate?):
① LEAKAGE WAS STOPPED AND CONTAINED. THE ABOVE GROUND STORAGE TANK WAS EMPTIED. [TANK IS NOT IN SERVICE – WE BROUGHT IN A PORTABLE TANKER].
② THE WET SOIL WAS REMOVED. THE SOIL CONTAMINATED W WITH NaOCl WAS PLACED IN 13 HAZARDOUS WASTE DRUMS (TOTAL = 9,087 LBS OF CONTAMINATED SOIL).
③ SOIL SAMPLES AND LIQUID (FROM SUMP) SAMPLES WERE SENT TO LAB FOR ANALYSIS.
④ LAB RESULTS TO DETERMINE DISPOSITION OF HAZARDOUS WASTE AND GROUND SOIL SAMPLE WILL DETERMINE IF THERE EXISTED A RELEASE OF CONTAMINANTS.
⑤ CAUSE OF THE SPILL (TANK) NEEDS TO BE IDENTIFIED AND FIXED.
⑥ SOIL WAS PREPARED TO BE SHIPPED OFF SITE.

Prop 65 ID#

ORANGE COUNTY
HCA/ENVIRONMENTAL HEALTH
Proposition 65 Notification Report Form

Any designated government employee who obtains information in the course of his official duties revealing the illegal discharge or threatened illegal discharge of a hazardous waste, that is likely to cause substantial injury to the public health and safety, must report such information within 72 hours to the Board of Supervisors and Health Officer or face up to $25,000 in fines and/or up to three years in jail (pursuant to § 25180.7 of the Health and Safety Code). The information submitted in this report is based upon the best available information at the time the report was completed.

Provide the following information to the Health Care Agency at (714) 667-3765 (24 hours)

1. Date Reported: 9-21-97 Time: 2:22PM. Designated Employee Reporting: GRACE MADDEN
2. Report submitted on behalf of all designated employees of what agency: KIMBERLY CLARK
   NRC REPORT # : 504497
3. Date of Incident: 9-21-97 Time: 12:45AM. Source of information (report #): OES CONTROL #: 97-3709
4. Incident Location/ Name of Business (DBA): KIMBERLY CLARK
   Address: 2001 E. ORANGETHORPE AVE., City: FULLERTON, CA Zip: 92831
5. Site Telephone: (714) 773-7500 Company Contact Person: GRACE MADDEN (EXT. 7677)
6. Description/Cause of Incident (What, where, and how did it happen?): ON SEPT 21 AT 12:45 AM, A BOILER OPERATOR (REGULAR) WAS DOING HIS ROUNDS IN THE KIMBERLY CLARK TANK FARM WITHIN EARTHEN BERM WHEN HE SMELLED AND FOUND THE LEAK/SPLIT ON A 2" DIAMETER VINYL HOSE THAT CONNECTS THE TEMPORARY MOBILE LOADED TANKER (SOURCE). THE OPERATOR DID AN EARLIER CHECK AT 12:00 MIDNIGHT. IN 45 MINUTES, 2706 GALLONS OF 15.6% SODIUM HYPOCHLORITE SOLUTION WAS SPILLED. 20 GAL. WENT TO A CONCRETE/LINED SUMP. 20 GALLONS OR 32.12 LBS. OF SODIUM HYPOCHLORITE WAS RELEASED TO THE SOIL. THE RQ FOR NaOCl = 100 POUNDS. THERE WAS NO DISCHARGE TO THE WATERWAYS (STORMDRAIN). THE TANKER WAS TURNED OFF.
7. Responsible Party Name: KIMBERLY CLARK Telephone: 714.773.7500
   (Business or Company names. Do not identify private citizen)
8. Identification of Discharged Waste

Chemical Name/ Common Name	Solid/Liquid/Gas	Quantity	Hazardous Properties
SODIUM HYPOCHLORITE SOLUTION 15.6% (CAS # 7681-52-9)	LIQUID	20 GAL OR 32.12 POUNDS RELEASED WAS RELEASED TO THE SOIL.	CORROSIVE; RQ = 100 LBS.

9. Field Data or Lab Results (Indicate Soil, Groundwater, etc.): SOIL SAMPLES WILL BE PULLED TO DETERMINE FREE CHLORINE CONTENT. THIS WILL DETERMINE SOIL TREATMENT/REMEDIATION DISPOSITION.
10. Environment Affected (check all that apply): ☐ Roadway ☐ Groundwater ☐ Sewer ☐ Storm Drain ☐ Lake ☐ Stream ☐ River ☐ Bay ☐ Ocean ☐ Air ☒ Soil ☐ Flood Channel ☐ Paved Ground ☐ Other:
11. Locale: ☐ Residential ☐ Commercial ☒ Industrial ☐ Open Area ☐ Rural
12. Property: ☒ Private Property ☐ Public Property

Report : 9-21-97 (P.5/5)

13. Describe the Extent of Contamination (How much) or how large of an area was contaminated): THE SODIUM HYPOCHLORITE SOLUTION (15.6%) TRAVELLED APPROXIMATELY 50FT TOWARD THE SUMP. APPROXIMATELY 25 SQ.FT. OF SOIL GOT CONTAMINATED IN 45 MINUTES. LINED

14. Number of Injuries (As a result of the release): ZERO

Number of persons receiving medical treatment: ZERO Where: N/A

15. Agencies at the scene of Incident: NONE

16. Was the Incident Mitigated?: ☒ Yes ☐ No Does further action need to be taken?: ☒ Yes ☐ No

Action (How was the situation mitigated? If not mitigated, what action should be taken to mitigate?):
① LEAKAGE WAS STOPPED AND CONTAINED. THIS TEMPORARY TANKER WILL BE REPLACED BY A BETTER, SAFER ABOVE GROUND TANK. SEPTIC NEW SETUP SHOULD BE IN PLACE BY THE END OF THIS WEEK OR EARLY NEXT WEEK. PERMANENT REPLACEMENT ABOVE-GROUND STORAGE TANK SHOULD BE IN PLACE WITHIN 4 MONTHS OR SO.
② THE CONTAMINATED SOIL WILL BE REMOVED. THE SUMP WILL BE PUMPED OUT & THE LIQUID WILL BE RECYCLED. CLEAN-UP STARTED ON SEPT 22 AT 2:00 PM.
③ SOIL SAMPLES WILL BE SENT FOR ANALYSIS. RESULTS WILL DETERMINE DISPOSITION OF HAZARDOUS WASTE AND GROUND SOIL SAMPLE WILL DETERMINE IF THE GROUND IS FREE OF CONTAMINANTS
④ THE SPILL WAS REPORTED TO NRC : REPORT #: 504997 & TE : CONTROL # : 97-3709
HRS COAST GUARD : REPORT # 504997 9-21-97 2:22 PM

17. Incident referred to (Person/Agency): OES : CONTROL # : 97-3709 Date: 9-21-97 Time: 2:30 PM.

18. Cleanup Conducted by (Name of Agency, Consultant, etc.): HAZ PAK ENVIRONMENTAL SERVICES

19. Is this the subject of an ongoing legal investigation?: ☐ Yes ☒ No

20. Is the area physically accessible to the public?: ☐ Yes ☒ No Explain: THANK FARM IS FENCED. IT IS APPROXIMATELY 6000 FT. Subject: Request for Oversight

Re: Kimberly-Clark
2001 E. Orangethorpe Avenue
Fullerton, CA 92831
O.C.H.C.A. Case # 98IC9

Dear Mr. Choi:

Based on information received by this Agency, it has been determined that a release of sodium hypochlorite has occurred at the location referenced above, and that the company you represent is responsible for the property at which this release occurred. Due to concerns that this release may represent a public health or environmental hazard, you have requested this Agency to review reports of site investigation and oversee whatever corrective action may be required for the above-referenced location.

The documentation of this release has become a part of this Agency's records, and as such is now part of the public record. Be advised that in addition to local, state and federal hazardous substance release reporting requirements, any owner of nonresidential real property who knows, or has reasonable cause to believe, that any release of a hazardous substance has come to be located on or beneath that real property shall, prior to sale, lease, or rental of the real property, give written notice of that condition to each buyer, lessee, or renter of the real property (California Health and Safety Code [H&SC], Division 20, Chapter 6.8, Section 25359.7[a]). Also any lessee or renter of real property who knows or has reasonable cause to believe that any release of a hazardous substance has come or will come to be located on or beneath that real property shall, following its discovery, give written notice of that condition to the owner of the real property or the lessor (H&SC 25359.7[b]).

This Agency will provide governmental oversight at contaminated sites where State or Federal law does not require oversight by another governmental agency, or where an order to investigate or mitigate a site has not already been issued by an empowered State or Federal Agency. You may elect to have this Agency provide oversight at the above referenced site to satisfy possible city or county land use concerns; lender, buyer, lessee, or renter concerns; or your own concerns. Upon

the satisfactory completion of a site investigation and any necessary soil remediation, this Agency will write a letter of completion. Where the site investigation reveals a possible threat to groundwater resources, your site will be referred to the appropriate Regional Water Quality Control Board (RWQCB) for review. When the RWQCB requires soil remedial action you will be requested to submit remedial action plans to both Agencies for review and concurrence.

You may also request governmental oversight from the California's Environmental Protection Agency, Department of Toxic Substances Control (DTSC). This Agency may request that the DTSC review case documentation for the purpose of determining whether mandatory case oversight will be required, when the responsible party does not request voluntary governmental case oversight.

As you have acknowledged in your letter, a service fee will be assessed for the actual time Health Care Agency (HCA) staff expends in overseeing this case. Per resolution of the County Board of Supervisors, the current site cleanup oversight fee is $123 per hour.

A site investigation work plan will have to be submitted to this office for review and concurrence prior to implementation. The work plan should include the proposed methods used to obtain the following information:

1. An identification of the lateral and vertical extent of soil contamination and the concentration of contaminants.
2. The depth to groundwater.
3. A description of soil profile.

The plan must include:

1. A site history that will serve as rationale for the selection of the locations of soil samples and soil borings and laboratory methods.
2. The proposed number and locations of soil samples and soil borings, and sampling methodology.
3. The proposed laboratory analysis and methods
4. A health and safety plan where assessment activities pose a threat to public health.

All required permits must be obtained prior to beginning exploratory borings and construction of wells. All borings and abandoned wells must be properly sealed. Wells should be secured to prevent unauthorized access. For further information regarding required well permits and well abandonment, call (714) 667-3750. Drilling procedures, well design and construction. Design and procedures should be developed by a registered professional (R.G., C.E.G., R.C.E., or equivalent) with expertise in subsurface investigations. Reports that include logs of soil borings or any findings or conclusions relating to subsurface information must be signed by a properly registered professional (R.G., C.E.G., or equivalent).

Site assessment can begin as soon as possible after review and concurrence of the work plan by HCA staff. Be sure to notify this office 48 hours in advance of any site sampling activity.

The next step after completion of site investigation is the submittal to HCA for review and concurrence of a report that outlines the findings of the site investigation and presents a proposed remedial action plan. Possible proposals include:

1. Leaving contaminated soil in place
2. Reducing contamination to acceptable level
3. Monitoring of contaminant fate and movement
4. Removal of contaminated soil to background or non-detectable levels.

The remedial action plan should be implemented as soon as possible after review and concurrence by HCA staff. After the remedial action plan has been fully implemented, remediation completion will be determined by site sampling overseen by HCA staff.

If any material to be removed is hazardous waste as defined in the California Health & Safety Code, Chapter 6.5 or as identified n the California Code of Regulations, Title 22, Division 4.5, Chapter 30, the use of a registered hazardous waste hauler is required and a photocopy of every manifest, signed by the receiving facility, must be forwarded tot his office for verification of proper disposal. Contaminated soil not meeting hazardous waste criteria should not be removed and placed at other than a Class I hazardous waste landfill without verification by this Agency and approval of the appropriate Regional Water Quality Control Board.

This office will review the reports of investigation you submitted and will provide appropriate comments/recommendations as soon as possible.

If you have any questions regarding this matter, please contact me at (714) 667-3717.

Sincerely,

Luis Lodrigueza

Material Safety Data Sheets Collection:

Sheet No. 115
Sodium Hypochlorite Aqueous Solution

Issued: 2/83 Revision: A, 11/90

Section 1. Material Identification 33

Sodium Hypochlorite (NaOCl) Aqueous Solution Description: Sodium hypochlorite is derived by addition of chlorine to cold dilute solution of sodium hydroxide. Used as a swimming pool disinfectant; as an intermediate and a reagent; in bleaching paper pulp and textiles; in organic chemicals; in medicine, fungicides, germicides; and in laundering.
Other Designations: CAS No. 7681-52-9; Antiformin;® B-K Liquid;® bleach; Chloros;® chlorox; Clorox;® Dakin's Solution;® Hychlorite;® hypochlorite solution; hypochlorous acid, sodium salt; Milton;® soda bleach liquor.
Manufacturer: Contact your supplier or distributor. Consult the latest *Chemicalweek Buyers' Guide*[73] for a suppliers list.

R 1
I -

K 0

Genium

HMIS
H 3
F 0
R 0
PPG*
* Sec. 8

Cautions: Sodium hypochlorite is a strong eye, skin, and mucous membrane irritant. The extent of irritation depends on concentration of sodium hypochlorite and the duration of exposure. Although nonflammable, sodium hypochlorite presents a *dangerous fire and explosion hazard* since it may cause ignition when in contact with organic materials such as paper, wood, or oil.

Section 2. Ingredients and Occupational Exposure Limits

Sodium hypochlorite aqueous solution*

1989 OSHA PEL	1990-91 ACGIH TLV	1988 NIOSH REL	1985-86 Toxicity Data†
None established	None established	None established	Human, cytogenetic analysis, lymphocyte:100 ppm/24 hr Rabbit, eye: 10 mg produces moderate irritation Rat, oral (12% solution), LD_{50}: ca 12 mg/kg

* The usual composition of an industrial sodium hypochlorite solution is 10.5% sodium hypochlorite and 0.8 to 2.4% sodium hydroxide. The available chlorine is ~10.0%. Solutions containing excess sodium hydroxide (NaOH) pose an increased alkalinity hazard.
† See NIOSH, *RTECS* (NH3486300), for additional mutative data.

Section 3. Physical Data

Boiling Point: Decomposes
Melting Point: Decomposes
Vapor Pressure: 17.5 mm Hg at 20 °C
pH: 9 to 10*
Molecular Weight: 75.45

Specific Gravity (20 °C/4 °C): 5.25%NaOCl (household bleach): 1.09
8.0%NaOCl: 1.15
12.0%NaOCl: 1.21

Water Solubility: Complete solubility

Appearance and Odor: Sodium hypochlorite is a white, crystalline solid. The aqueous solution is a clear, pale yellow or greenish liquid with a chlorine odor.

* This is the pH of a neutral solution. Some products may contain an excess of NaOH and have a higher pH.

Section 4. Fire and Explosion Data

Flash Point: None reported	Autoignition Temperature: None reported	LEL: None reported	UEL: None reported

Extinguishing Media: Use dry chemical, CO_2, halon, water spray, or standard foam. Use water spray from a safe distance to cool fire-exposed containers, dilute liquid, and control vapors.
Unusual Fire or Explosion Hazards: Sodium hypochlorite is an oxidizing agent and vigorous reactions can occur with oxidizable materials in a fire situation.
Special Fire-fighting Procedures: Since fire may produce toxic fumes, wear a self-contained breathing apparatus (SCBA) with a full facepiece operated in the pressure-demand or positive-pressure mode and full protective gear. If feasible, remove containers from fire area to prevent pressure rupture. Be aware of runoff from fire control methods. Do not release to sewers or waterways.

SHC

SODIUM HYPOCHLORITE

Common Synonyms
Clorox
Liquid bleach

Watery liquid | Green to yellow | Bleaching liquid odor

Sinks and mixes with water.

Stop discharge if possible.
Avoid contact with liquid.
Isolate and remove discharged material.
Notify local health and pollution control agencies.

Fire

Not flammable.

Cool exposed containers with water.

Exposure

CALL FOR MEDICAL AID.
LIQUID
Irritating to skin and eyes.
Harmful if swallowed.

Remove contaminated clothing and shoes.
Flush affected areas with plenty of water.
IF IN EYES, hold eyelids open and flush with plenty of water.
IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk, and have victim induce vomiting.
IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

Water Pollution

Harmful to aquatic life in very low concentrations.
May be dangerous if it enters water intakes.

Notify local health and wildlife officials.
Notify operators of nearby water intakes.

RE: Site Closure Certificate for the Soil Contamination Problem at Kimberly-Clark Paper Factory at 2001 E. Orangethorpe Ave., Fullerton, CA.

Dear Mr. Lodrigueza:

This letter is to authorize you to spend up to 10 hours maximum of your time to review and evaluate the soil-test reports submitted to your office in regards with the soil contamination problem that was found due to the accidental spill of Sodium Hypochlorite (NaOCl) solution at the tank farm of the factory.

It is understood that the rate of payment to your organization for this oversight work will be at $123/hour. WEECO will guarantee this payment to you.

Since it has passes a long time since the spill was found, Kimberly-Clark Company would like to obtain a site closure letter from you as soon as possible.

Would you please start to review and evaluate the reports submitted by WEECO for this project as soon as possible?

Also, please let us know roughly when you may finish the review and you will be able to write a site closure letter to Kimberly-Clark. The final site closure report should be sent to the attention of the following person in Kimberly-Clark.

RE: Site Closure Application for The Sodium Hypochlorite Spill at the Tank Farm of Kimberly-Clark Plant(2001 E. Orangethorpe Ave., Fullerton)

Dear Gentlemen:

It was reported that there were chemical spills occurred at the tank farm of Kimberly-Clark Paper Plant at 2001 E. Orangethorpe Avenue, Fullerton, in 1997. The chemical that was spilled in the tank farm was "Sodium Hypochlorite, NaOCl" which is normally used as a breaching solution for paper industries.

Our company(WEECO) was retained as their consulting company and has conducted soil sampling/testing works at two occasions for this site and produced two reports after the two occasions of soil testing : the first report was issued as of Nov. 13, 1997, and the second report was issued as of January 19, 1998.

As delineated in this report, the horizontal and the vertical extent of spill were found to be minor, and are not considered to have adverse effects to the quality of the groundwater and to the human-beings in the subject area.

Would you please review the enclosed reports and please write a letter of site closure to the following person in Kimberly-Clark Company?

Attn: Ms. Grace Madden
Kimberly-Clark Company
2001 E. Orangethorpe Avenue
Fullerton, CA. 92631

If you have any questions, please feel free to call us at any time.

Enclosed: Two Reports

Sincerely,

Charles Choi

Fullerton, CA 92634

Subject: Clean-up Case Closure for Site at 2001 East Orangethorpe Ave., Fullerton, CA

Dear Ms. Alasti:

This letter confirms the completion of site investigation and remedial action at the above address. With the provision that the information provided to this department was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

The contents of these reports have also been discussed with staff of the Regional Water Quality Control Board (RWQCB). Based on the information submitted and current requirements, the RWQCB concurs with the determination of this Department that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this Department of any changes in report content, further contamination findings or site usage.

If you have any questions regarding this matter, please contact me at (714) 738-6508.

Sincerely,

John White

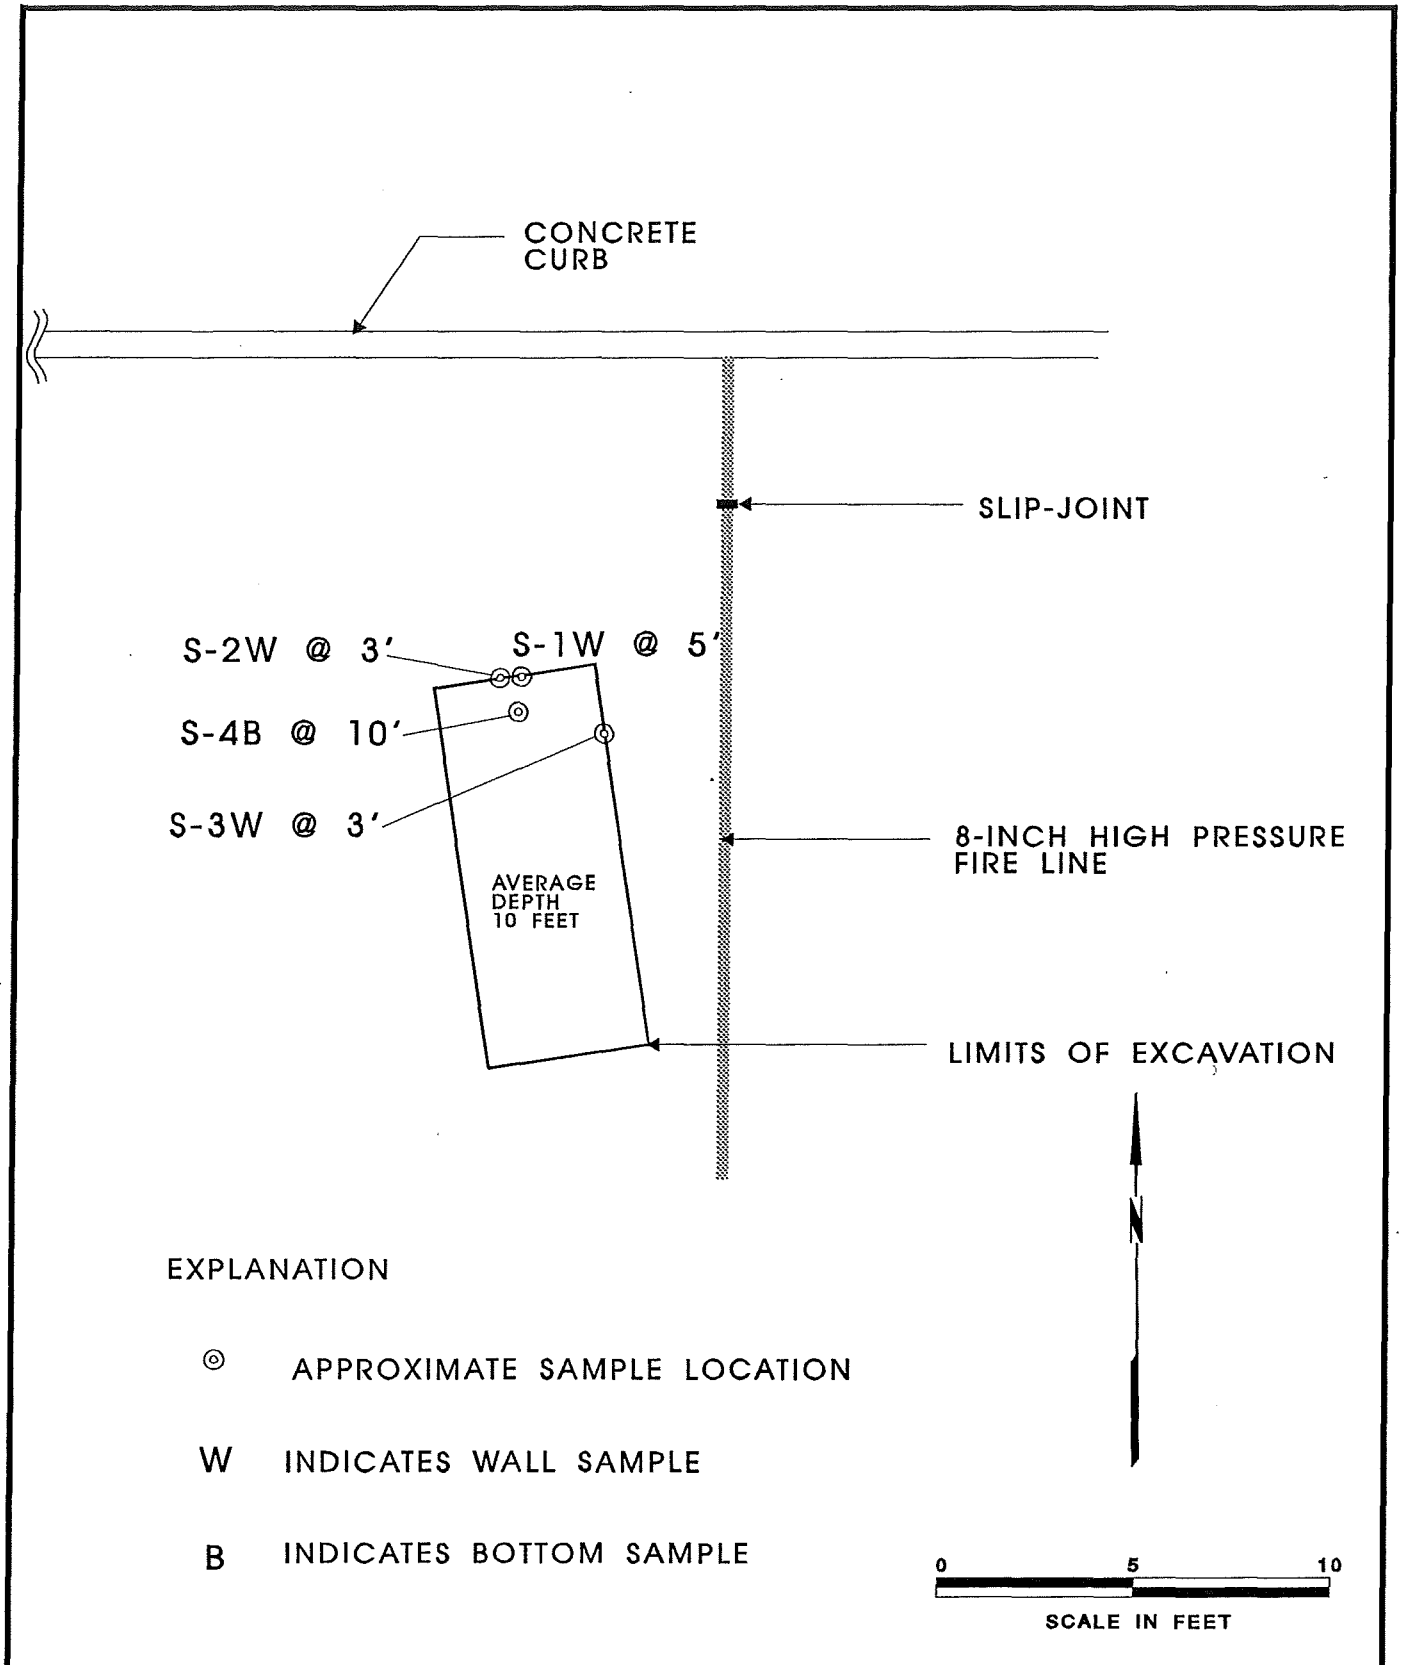
INTRODUCTION

This Closure Report is for the remediation of petreoluem contaminated soil remaining on site from a previous underground storage tank removal project at the Kimberly Clark Corporation facility, 2001 East Orangethorpe Avenue in Fullerton, California. The tanks were removed in May 1986 by Crosby & Overton, under Fullerton Fire Department, Underground Tanks Division, permit #P070-86151. Remediation of the remaining soil was conducted in February 1992, under Fullerton Fire Department permit # 92-T-001.

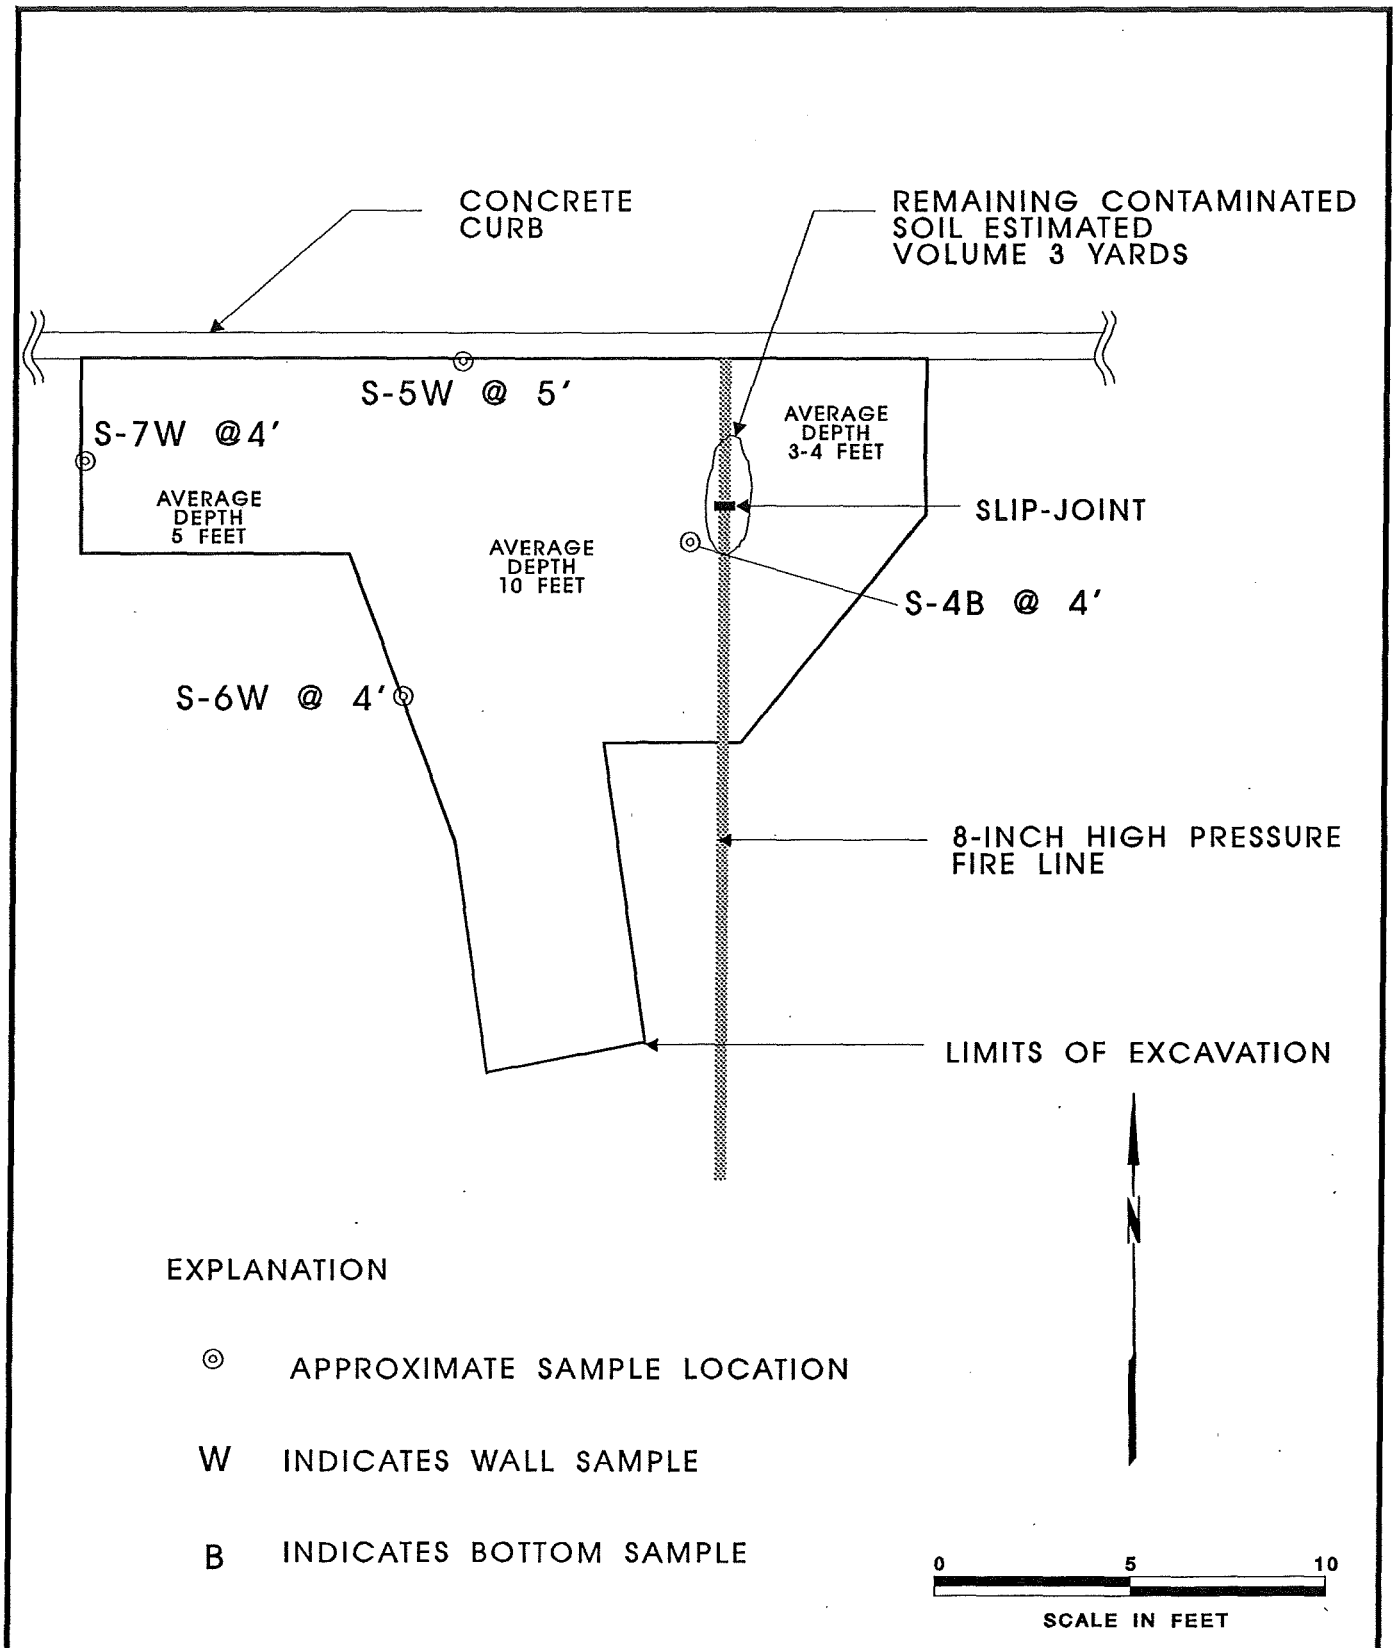


Sample Location Plot Plan (Figure 1) shows initial excavation limits and location of samples for work done on February 5, 1992. Sample Location Plot Plan (Figure 2) shows final excavation limits and location of samples for work done on February 10, 1992 and the arrangement of fire line in relation to excavation. A site vicinity map is provided as Figure 3.

FIELD WORK

INITIAL EXCAVATION

LCI started initial excavation on 2/5/92, see Figure #1. Soils exposed in the excavation consisted of 1.5 feet of moist, dark brown clayey silt, with silty medium to coarse sand, underlain by 8.5 feet of brown/gray coarse sand (sugar sand) followed by a clayey silt/medium sand at the bottom of the excavation. All soils in the northern portion of the excavation had noticeable odor and discoloration. Excavated soils were stockpiled on the northwest side of the excavation.



When sugar sand was encountered, excavation ceased and LCI notified Kimberly-Clark Corporation representative Isabella Alasti that the presence of sugar sand made continued excavation vertually impossible without undermining the sourrounding areas. The areas of concern were the 8" high pressure fire line, east of the excavation, the roadway, north of the excavation and the Kimberly Clark equipment stagging area, west of the excavation. It was agreed by Kimberly Clark and LCI that the excavation would be stopped until Mr. John White of the Fullerton Fire Department could evaulate the situation and suggest the proper procedure for continued excavation. Upon Mr. White's suggestion, four samples were obtained, under his direction (see Figure 1) and analyzed, see Attachment A, Analytical Results. For safety concerns, the excavation was lined with plastic sheeting and temporarly backfilled while evaulating the analytical results.

SOIL SAMPLING

A backhoe was used to remove soil from sampling points in the excavation. Sample #1 was obtained approximately 5 feet below grade from the north wall of the excavation. Sample #2 was obtained approximately 3 feet below grade from the north wall of the excavation. Sample #3 is an east wall sample, obtained approximately 3 feet below grade and 2 foot south of the north wall. Sample #4 was obtained from the bottom of the excavation at approximately 10 feet below grade. Because of obvious gross contamination on the northern half of the west wall, it was agreed by Kimberly Clark, Fullerton Fire Department and LCI representatives that no sampling was necessary at this location. Removal of this material will take place when excavation resumes.

Samples were obtained from the bucket of the excavator and placed into eight (8) ounce glass jars without headspace. The jars were sealed with Teflon-lined lids, marked with sample point identification, date and time sampled and delivered to the Smith-Emery Company (SECO) on-site laboratory. Chain of Custody documentation is included in Attachment A.

DEPTH TO GROUNDWATER

The Orange County Water District, Water Quality Department was contacted for information regarding depth to groundwater in the vicinity of the site. According to Esmeralda Steffen, the nearest well is Kimberly No. 2, state well #3S/10W-35R1. Depth to groundwater in the well was 140 feet on January 9, 1992. Groundwater was not encountered during any of the excavation activities.

ANALYTICAL TESTING

Soil samples obtained were analyzed at SECO's on-site mobile laboratory utilizing EPA method 8015m for diesel constituents and EPA method 8020 for benzene, toluene, ethylbenzene and xylenes (BTEX). The test results of all samples analyzed on 2/5/92 are recorded in Table A. A copy of the analytical laboratory report is included in Attachment A.

TABLE A

Sample #	Method		Results
1	8015M	TPH	290 MG/KG
1	8020	Benzene	ND
		Toluene	ND
		Ethylbenzene	ND

		Ethylbenzene	ND
		Xylenes	ND
4	8015M	TPH	150 MG/KG
4	8020	Benzene	ND
		Toluene	ND
		Ethylbenzene	ND
		Xylenes	ND

FIELD WORK FOR SECOND PHASE OF EXCAVATION

LCI began the second phase of excavation on February 10, 1992, by re-excavating the temporary backfill material from the original excavation, then concentrated its efforts in the northern portion of this area with a widening of the excavation limits to the east and west, see Figure #2. Soils exposed in this excavation consisted of like materials as those identified in the initial excavation. LCI stopped excavating once no more visual contamination was present in all but one area; this exception was in the area of the 8" high pressure fire line.

LCI notified Ms. Alasti that the excavation was ready for sampling. Mr. White returned to the site and deturmined that four more samples should be taken. Under his direction, samples were obtained and analyized, see Figure #2 and Attachment A, Analytical Results, dated 2/10/92. It was deturmined that, for safety concerns, the minor amount (estimated to be 3 to 5 cubic yards) of contaminated soil around the high pressure fire line slip joint connector would not be required to be removed because removal of this material could result in the loss of the entire fire protection system, see Figure #2.

SOIL SAMPLING

Samples were obtained utilizing a California hand auger with 2" brass tubes. The ends were plastic capped, taped without headspace, marked with sample point identification, date and time sampled and delivered to SECO's on-site laboratory. Chain of Custody documentation is included in Attachment A, Analytical Report, dated February 20, 1992.

A backhoe was used to remove soil from sampling points in the excavation. Sample #4 was obtained approximately 4 foot below grade, 10 foot south of the north wall and 1 foot west of the high pressure fire line. Sample #5 was obtained approximately 5 foot below grade from the north wall of the excavation. Sample #6 is a west wall sample, obtained approximately 4 foot below grade and 8 foot south of the north wall. Sample #7 was obtained from the west wall cut back, at a depth of 4 foot, approximately 2 foot south of the north wall.

ANALYTICAL TESTING

Soil samples obtained were analyzed at SECO's on-site mobile laboratory utilizing EPA method 8015m for diesel constituents and EPA method 8020 for benzene, toluene, ethylbenzene and xylenes (BTEX). The test results of all samples analyzed on 2/10/92 are recorded in Table B. A copy of the analytical laboratory report is included in Attachment A.

TABLE B

Sample #	Method		Results
4	8015M	TPH	180 MG/KG
4	8020	Benzene	ND
		Toluene	ND
		Ethylbenzene	ND
		Xylenes	ND

		Toluene	ND
		Ethylbenzene	ND
		Xylenes	ND
6	8015M	TPH	71 MG/KG
6	8020	Benzene	ND
		Toluene	ND
		Ethylbenzene	ND
		Xylenes	ND
7	8015M	TPH	100 MG/KG
7	8020	Benzene	ND
		Toluene	ND
		Ethylbenzene	ND
		Xylenes	ND

BACKFILLING OF EXCAVATION

The excavation was backfilled on Feburary 10 and 18, 1992 by LCI per ASTM D1557-78 standards, see Attachment C, Geobase Report, Dated 2/20/92. When backfill was complete, the excavation was covered with 4" thick asphalt; edges were sealed and surface was fog sealed.

CONCLUSION AND RECOMMENDATIONS

Based on LCI's field observations and the results of analytical testing, there is no evidence of contamination in excess of the 1000 ppm guide lines established by the city of Fullerton, Fire Department, Division of Underground Storage Tanks. Considering the low levels of contamination and the asphalt cover, which extends well beyond the limits of the excavation and acts as a barrier to prohibit the possibility of surface water acting as a hydraulic force in relation to the remaining contamination and ground water, it is LCI's opinion that further environmental assessment of soil or groundwater is not warranted. Closure of the excavation is recommended according to the guidelines established by the city of Fullerton Fire Department, Division of Underground Tanks.

LIMITATIONS

The analyses, conclusions, and recommendations contained in this report are based on site conditions as they existed at the time of LCI's investigation. The factual data and interpretations pertain to the specific project described in this report and are not applicable to any other project or site. LCI's investigation was performed using the standard of care and level of skill ordinarily exercised under similar circumstances by reputable environmental assessors and geologists currently practicing in these or similar locations. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this report.

Please call if you have any questions reguarding this report.

Sincerely,

Type of Permit ANNUAL PERMIT - trench/EXCAVATION

Pursuant to Labor Code Sections 6500 and 6502, this Permit is issued to the above-named employer for the projects described below.

State Contractor's License Number A-527194-HAZ		Permit Valid through 12/31/92		
Description of Project	Location Address	City and County	Anticipated Dates	
			Starting	Completion
TRENCH/EXCAVATION	Various	Statewide	1/1/92	12/31/92
THIS PERMIT IS ISSUED SUBJECT TO THE CONDITION THAT THE WORK IS PERFORMED BY THE SAME EMPLOYER. THE APPROPRIATE DISTRICT OFFICE SHALL BE NOTIFIED IN WRITING OF LOCATION OF JOB SITE PRIOR TO COMMENCEMENT.				
SEE ATTACHED NOTICE PERTAINING TO THE EXCAVATION STANDARD WITH ITS COMPETENT PERSON REQUIREMENTS.				

This Permit is issued upon the following conditions:

1. That the work is performed by the same employer. If this is an annual permit the appropriate District Office shall be notified, in writing, of dates and location of job site prior to commencement.
2. That employer will comply with all occupational safety and health standards or orders applicable to the above projects, and any other lawful orders of the Division.
3. That if any unforeseen condition causes deviation from the plans or statements contained in the Permit Application Form the employer will notify the Division immediately.
4. Any variation from the specification and assertions of the Permit Application Form or violation of safety orders may be cause to revoke the permit.
5. This permit shall be posted at or near each place of employment as provided in 8 CAC 341.4.

NOTICE

(Attachment)

LATER THIS YEAR (1992), CAL/OSHA EXPECTS TO BEGIN ENFORCING THE NEW FEDERAL TRENCHING AND EXCAVATION STANDARDS THAT WERE RECENTLY ADOPTED BY THE CAL/OSHA STANDARDS BOARD.

THESE STANDARDS, IN PART, CALL FOR DAILY INSPECTION OF ALL EXCAVATIONS AND TRENCHES BY A "COMPETENT PERSON".

TO BE A "COMPETENT PERSON", ONE MUST HAVE:

1. KNOWLEDGE OF SOIL ANALYSIS AS DETAILED IN THE STANDARD
2. AUTHORITY TO TAKE PROMPT CORRECTIVE ACTION ON THE JOB AS CONDITIONS WARRANT
3. KNOWLEDGE OF THIS NEW STANDARD
4. KNOWLEDGE OF THE USE OF PROTECTIVE SYSTEMS

THIS PERMIT IS BEING ISSUED UNDER THE EXISTING AND UNREVISED STANDARDS FOR EXCAVATION WORK. WHEN THE NEW STANDARD TAKES EFFECT, YOUR COMPANY WILL BE EXPECTED TO PROVIDE A "COMPETENT PERSON" ON EACH PERMITTED JOB. ALSO, PERMITS ISSUED AFTER THE EFFECTIVE DATE OF THE NEW STANDARD WILL REQUIRE ON THE PERMIT APPLICATION THE NAME(S) OF THE "COMPETENT PERSON(S)" FOR YOUR COMPANY.

Compaction Report

GEOBASE

SOIL/ROCK MECHANICS AND FOUNDATION ENGINEERING

LEDSAM CONTRACTING INCORPORATED
2702 California Avenue
Signal Hill, California 90806

February 20, 1992

Project No: C.191.16.00

Attention: Mr. S. Ledsam

Dear Mr. Ledsam

SUBJECT: **COMPACTION REPORT ON BACKFILL OF AN EXCAVATION**
2001 East Orangethorpe Avenue
Fullerton, California

This report summarizes observations and compaction testing performed during the backfilling of an excavation at the subject site. The Partial Site Plan is given as Figure 1, attached.

FIELD TESTING

Field density tests were compared to laboratory tests of the same soil type. Maximum dry density/optimum moisture content relationships for the backfill soils used are presented on Table I, attached, Laboratory Test Results. The laboratory standard of compaction used was ASTM D1557-78, Five-Layer Method.

Approximate locations of in-place density tests are shown on the Partial Site Plan, Figure 1, attached. These in-place density tests were performed in accordance with ASTM D2922-81 and D3017-88 (Nuclear Method) and ASTM D1556-82 (Sand Cone Method). The fill soils placed were a minimum of 90 percent of the laboratory standard at the locations tested. The test results are presented on Table II, Results of Compaction Tests, attached. Fill soils were also probed between test locations.

EXCAVATION

The excavation at this site consisted of a irregular shaped pit approximately twenty-two (22) feet long, eleven (11) feet wide, and seven (7) feet deep. A plan view of the excavation is shown on Figure 1, attached.

SOIL TYPES

The backfill soils consisted of light brown to brown, silty, gravelly sands and crushed aggregate base material.

FILL PLACEMENT

Backfill operations were carried out on February 10 and February 18, 1992. Fill material was placed on February 10, 1992 to an approximate depth of three (3) feet below grade. On February 18, 1992, two (2) feet of wet material were removed prior to placement of fill. Approximately six (6) inches of base material was also placed at the surface.

Subsequent to removal, suitable fill soils were placed in approximately 8-inch lifts, brought to near optimum moisture content and compacted to a minimum of 90 percent of the maximum density, where tested, as determined by ASTM D1557-78. Compaction of the backfill soils was achieved by rolling with an excavator equipped with a sheepsfoot wheel.

SUMMARY

The backfill operations, as well as observations and testing services described herein, have been limited to those operations, as noted above, performed on February 10 and February 18, 1992. These testing services allow the testing of only a small percentage of the fill placed at the site. Therefore, testing during grading does not relieve the contractor of his primary responsibility to perform all work in accordance with the specifications.

The conclusions and recommendations contained herein have been based upon our observations and testing as noted. Based on our observations and testing, it is our opinion that

GEOBASE

the grading operations were performed in accordance with the requirements of the regulating agencies.

Services performed by GEOBASE, INC. were prepared in accordance with generally accepted geotechnical engineering principles and practices. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this report.

This letter report is subject to review by the appropriate regulating agencies.

Respectfully submitted
GEOBASE, INC.

RE: Soil Contamination Analysis for Tank Farm

Dear Ms. Madden:

Attached please find the copy of the report for the soil contamination analysis performed by WEECO regarding the spill of Sodium Hypochlorite(NaOCl) in the tank farm area.

This report concludes that the soil samples taken in the soils underneath the tank farm area revealed sizable contamination.

Further boring/sampling/analysis will be required in order to completely define the horizontal and the vertical extents of the soil contamination with NaOCl.

After the further soil contamination analysis is performed, it will be known how much of the soil should be removed or remediated in order to resolve the problem.

The method of soil remediation shall be discussed in the report that will be made after the further boring/sampling/analysis is finished.

If you have any questions, please feel free to call us.

1.0 INTRODUCTION

This report presents the findings of an initial site assessment investigation conducted at the tank farm of Kimberly Clark factory located at 2001 E Orangethorpe Avenue, Fullerton, California There are five tanks at this tank farm which are used to store fuel oil and chemicals such as Sodium Hypochlorite(NaOCl) Western Environmental Engineers Company(WEECO) was retained by Kimberly-Clark Company to conduct an initial site-environmental assessment in order to find the horizontal and vertical extent of soil contamination due to the potential leak of sodium hypochlorite material around the tank farm area

This report summarizes the drilling, soil sampling, analysis, and evaluation of the analytical results to determine whether it will be necessary to conduct any further site characterization study and site cleanup and remediation for this area

2.0 SITE DESCRIPTION

Kimberly-Clark Company has a factory at 2001 E Orangethorpe Avenue in Fullerton Figure (2) shows the layout of the factory located in Fullerton There is a tank farm on the east site of the factory as indicated in Figure (2) The tank farm has five tanks as described below

(Tank No 1)
(Tank No 2)
(Tank No 3)
(Tank No 4)
(Tank No 5)

These tanks contain chemicals such as sodium hypochlorite(NaOCl), which is used as a breaching solution for pulp processing This sodium hypochlorite is purchased from the manufacturer(Jones Chemical Co) as the brand name of "Sunny Sol-150". Figure (3) shows the layout of the tank farm including the above five tanks As shown in the Figure (3), the five tanks are located in a berm area, whose size is 120-feet by 110-feet It was understood that there was a leak in the Tank No 3 which used to contain Sunny Sol-150 which is a solution of sodium hypochlorite(15 6% solution)

3. Site Background Conditions

(Site Geology)

The project site is located in the Fullerton area of the central basin comprised of alluvium and associated deposit of recent Pleistocene age Jefferson Aquifer, which is the second aquifer in downward succession within the San Pedro Formation, extends over most of the Central Basin, although it is not known to reach the surface Within the boundaries of the aquifer, some irregular areas exist where the aquifer has not been identified The Jefferson Aquifer occurs in sinuous courses extending from both the Los Angeles and Whittier Narrows into Orange County. Lithologically, the sediments comprising this aquifer (based on drilling logs of water wells in the area) are for the most part, fine-grained Gravels are most extensive in the Whittier Narrows area but also occur in scattered patches throughout the rest of the Central Basin The remainder of the aquifer consists primarily of sand with some gravely and clavey lenses

The thickness of the aquifer varies from a few feet to a maximum of 140-feet along the Los Alamitos fault This aquifer is considerably folded and its base varies in elevation from 700-feet below sea level to 50-feet above sea level

Artificial recharge within the Whittier Narrows has some effect on this aquifer Since less 10% of the wells in the Central Basin are perforated in this horizon and then only in the areas where coarse sandy and gravel zones are encountered, it is generally not considered an important water producing aquifer

The movement of groundwater across the Los Angeles and Orange County line is entirely dependent on the hydraulic gradient in the area since no physical barrier to groundwater movement exists Due to the continuity of the hydraulic gradient which slopes in the southerly direction, the general direction of the groundwater in the confined Central Basin is from the north to the south Groundwater conditions in the overlying shallow semi-perched aquifer do not necessarily follow this trend

(Groundwater Level)

The depth-to-groundwater at the subject site area is obtained by contacting the Orange County Water District Water Quality Department As shown in Attachment (D), the OCWD sent us the information regarding the depth-to-groundwater and the ground-surface elevation

As shown in Attachment (D), the depth-to-groundwater in the subject area is around 110-130 feet below the surface as depicted by the neighborhood well technical data It is believed that the direction of the groundwater in the vicinity is from the north to the south

4. Drilling and Soil Sampling

WEECO used manual drilling devices in order to drill and take soil samples from the subject site because there was not enough room for bringing in a large drilling machine mounted on a truck The manual drilling was performed using a 2.5-inch hand-auger and a 1 5-inch sampling device After a hole was drilled with the 2 5-inch drilling auger, a 1.5-inch sampling device was introduced into the hole and the soil samples were taken by pounding in the 1 5-inch sampling rings into the soil at the bottom of the holes The sample rings were retrieved from the bottom of the holes and the ring samples were kept in an ice box until they were delivered to the lab certified by the State of California

From each hole, five soil samples were taken one each from 2, 4, 6, 8, and 10-feet below the surface The chain-of-custody for the soil samples are shown in Attachment (A)

The log sheets for soil boring are shown in Attachment (B) As shown in these log sheets, the nature of the soil in the bored areas can be described as "sandy-silt" and or silty sand

5.Chemical Analysis for The Soil Samples

Since the main concern of soil contamination for this tank farm was the leak of sodium hypochlorite from the Tank No -1, only chemical component that was analyzed for the soil samples taken was "Sodium Hypochlorite, NaOCl" The laboratory where these soil samples were analyzed was Chemtek Environmental Laboratory located in Santa Fe Springs, California This laboratory is approved by the State of California to test these types of chemical contaminants in soil samples

The results of the chemical analysis are shown in Attachment (C) As shown in this Attachment, the sodium hypochlorite concentrations in the soil samples turned out to be less than 13 WPPM(mg/kg NaOCl in soil) The highest concentration of NaOCl was found at B-5-2 sample which was taken from 2-feet below surface at B-1 drilling location

All of the ten soil borings(B-1 through B-10) were made to a maximum depth of 10-ft below surface Most of the ten soil samples taken at the bottom of the hole(10-feet depth) showed some NaOCl contamination This reveals that the soils located further below than 10-feet may be also contaminated Therefore, it will be necessary to drill further down below 10-feet level in order to find out the maximum depth of the soil contamination in the subject area

6. Sodium Hypochlorite as Hazardous Chemical

According to Appendix X (List of Chemical Names and Common Names for Hazardous Wastes and hazardous Materials) of Division 4.5 (Environmental Health Standards for the management of Hazardous Waste) of Title 22 of the California Code of Regulations indicates that sodium hypochlorite is considered a hazardous material The Appendix X is listed in Chapter 11 of Article 5 of the Division 4 5

A portion of the Article 5 of the Division 4 5 of the California Code of Regulations including Chapter 11 and Appendix X is shown in Attachment (F) On Page 687 of the California Code of Regulations(CCR), Sodium Hypochlorite is listed as the hazardous material number (#678) This chemical compound exhibits characteristics of toxicity, ignitability, and reactivity

7. Conclusions

The results of the soil samples analyzed showed that the soil in the tank farm area down to a depth of 10-feet below surface is contaminated with Sodium Hypochlorite material The range of the contamination is from less than 1 0 wppm to 13.0 wppm

A high concentration of sodium hypochlorite in soil was found in the soil sampling area around B-5 The concentrations of sodium hypochlorite were found to be somewhat higher at the shallow ground areas such as 2-4 feet below the surface As the depth of the soil goes deeper, the concentration of sodium hypochlorite becomes lower. This indicates that this hazardous chemical spill is concentrated in the shallow ground areas

However, since the bottom of the bored holes (10-feet below surface) showed still significant contamination, for example, B-3-10 sample showed 4 0 wppm, B-6-10 showed 3 57 wppm, and B-7-10 showed 4 62 wppm

The depth-to-groundwater in the subject area is in excess of 100- feet below surface Since the NaOCl contamination appears to be confined in the shallow area such as within 10-20 feet below surface, the possibility of NaOCl contamination extending into the groundwater at the subject site is considered unlikely at this time

Since the contaminant(NaOCl, Sodium Hypochlorite) is known as a hazardous chemical(toxic, ignitable, and reactive), it should be warned to the plant operation and maintenance people that no direct exposure to human beings to the NaOCl chemical or NaOCl-contaminated soil be allowed at the subject site area until after a thorough contamination assessment is made and the site is remediated, if necessary

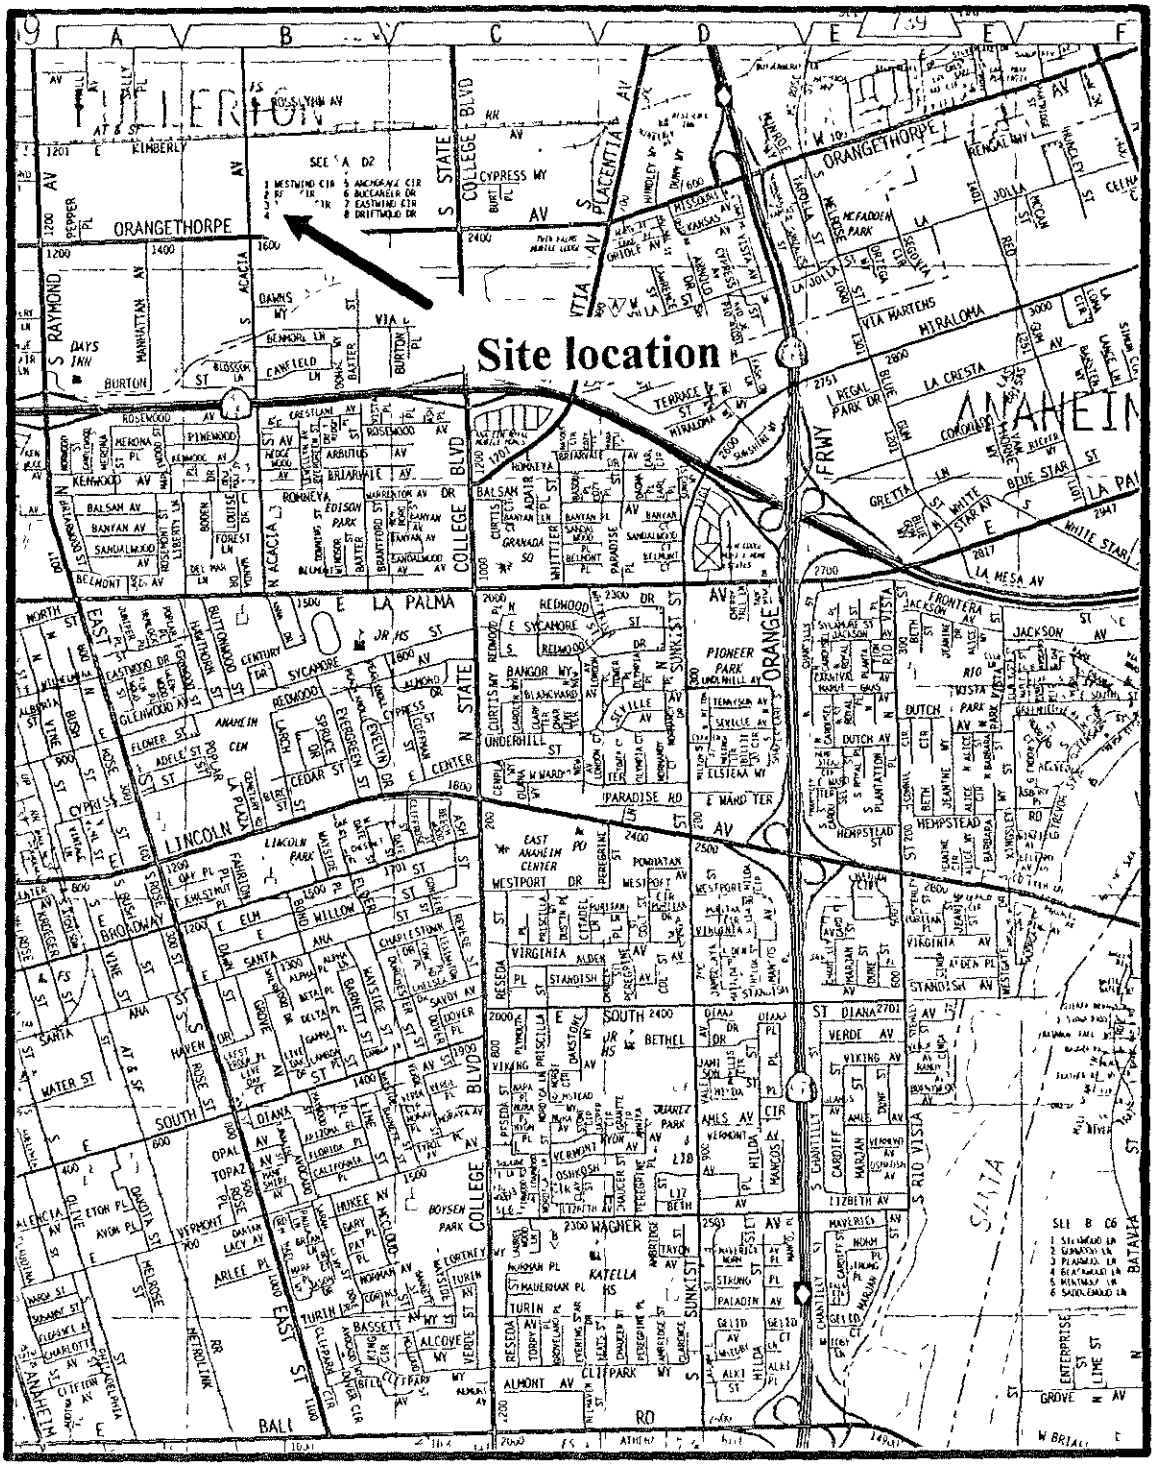
8. Recommendations

Since the chemical spilled onto the ground is a hazardous material(Sodium Hypochlorite) and the bottoms of the bored holes are still shown contaminated, a further boring/sampling/testing is recommended in order to delineate the vertical and the horizontal extent of the plume of the contamination

Further boring below 10-feet depth is recommended especially in the area of B-3, B-6, and B-7 area where the soil samples at the bottom of the 10-feet borings showed more than 1 0 wppm of sodium hypochlorite contamination The future borings at these locations should be drilled and sampled until the soil sample analysis shows less than 1 0 wppm of sodium hypochlorite The maximum level of contaminants to be left at the site was chosen at 1 0 wppm, because the current detection limit of the NaOCl is 1 0 wppm

The technical and economic feasibility for soil remediation will be studied after the second phase of the soil sampling and analysis work is finished By that time, we shall know how deep and how wide the size of the soil contamination is at the site Some of the possible methods of remediation that will be studied are as follows

(l). Excavation and Treatment At An Off-site Location



-Treatment may include passive aeration for NaOCl decomposition

-Or, Treatment may include active aeration with air injection method

-Or, Treatment may include spraying a neutralization chemical in order to convert NaOCl into NaCl salt NaCl salt is a non-hazardous chemical, and thus will be satisfactory to leave in the soil Some of the chemicals that can be used as neutralization-chemical is sodium bisulfite and ferrous salt solutions

(2). On-site Air Injection Method

-If excavation and disposal is not feasible, air injection wells will be drilled and installed so that air may be injected into the underground site for neutralization of NaOCl into NaCl

COMMENTS: Per your request, we are transmitting a November 1996 groundwater contour map, and instructions on how to obtain water quality information. To determine if a city or address is within our District boundaries, you may check the attached guide or map.

When you submit the enclosed *Information Request Form,* please complete all the sections and mail it with your payment.

Thank you.

GUIDE TO INFORMATION REQUESTS

The Orange County Water District provides ground water information for the following cities:

Anaheim	Irvine	Santa Ana
Buena Park	La Palma	Seal Beach
Costa Mesa	Los Alamitos	Stanton
Cypress	Midway City	Tustin
Fountain Valley	Newport Beach	Villa Park
Fullerton	Orange	Westminster
Garden Grove	Placentia	Yorba Linda
Huntington Beach		

We suggest that you copy your letterhead onto the Information Request Form to provide us with your address and phone number. Add your name, site address, major cross streets, Thomas guide coordinates, and the reason that you are conducting the site investigation. Please note that Information Requests are processed through a database that requires exact information

All requests require a two to three weeks turnaround time. The processing fee is a minimum of $10.00. Make checks payable to the Orange County Water District.

Please ensure that your request is complete before mailing it Incomplete requests may further delay the inquiry.

NOTE *Driller's logs or well logs are confidential according to the State Water Code, hence the public may not access such information.*

Call CHEMTREC: (800) 424-9300

SECTION I - IDENTIFICATION

TRADE NAME: Sunny Sol 150®
CHEMICAL NAME: Sodium Hypochlorite
FORMULA: NaOCl
DOT SHIPPING NAME: Hypochlorite Solution
DOT HAZARD CLASS: Corrosive Material
UN/NA NUMBER: UN 1791
DOT LABEL: Corrosive
DOT PLACARD: Corrosive
PACKING GROUP: III
REPORTABLE QUANTITY: Sodium Hypochlorite: 100 Pounds/45.4 Kilograms
CAS NUMBER: 7681-52-9

NFPA DESIGNATION: The NFPA has not rated sodium hypochlorite.

SECTION II - HAZARDOUS INGREDIENTS

MATERIAL	% BY WEIGHT	CAS NO.	OSHA PEL	ACGIH TLV
Sodium Hypochlorite	12.5-15.5	7681-52-9	Not Applicable	Not Applicable
Sodium Hydroxide	0.1-2.0	1310-73-2	2mg/m³ ceiling	STEL/CEIL(c) 2mg/m³ ceiling
Inert Ingredients	Balance	Not Applicable	Not Applicable	Not Applicable

CARCINOGENICITY STATUS: NTP - No, IARC - No, OSHA - No.

SECTION III - PHYSICAL DATA

APPEARANCE: Yellow-green liquid
BOILING POINT: 219°F (104°C) for 12.5% NaOCl by wt.
FREEZING POINT: - 11°F (- 24°C) for 12.5% NaOCl by wt.
ODOR: Chlorine
pH: 12.5 - 13.5 s.u. @ 25°C
VISCOSITY (Cs): 2.15 @ 23°C for 12.5% NaOCl by wt.
PERCENT VOLATILE BY VOLUME: Variable water plus products of decomposition
SOLUBILITY IN WATER: Complete
SPECIFIC GRAVITY (Water=1): 1.218 @ 20°C for 13.79 % NaOCl by wt.
VAPOR DENSITY (AIR=1): Not available
VAPOR PRESSURE (mm Hg): Variable water plus products of decomposition.

SECTION IV - FIRE AND EXPLOSION DATA

FLASH POINT (Test method): Not applicable
AUTO IGNITION TEMPERATURE: Not applicable
FLAMMABLE LIMITS IN AIR (Volume %): Not applicable
EXTINGUISHING MEDIA: Flood with water or carbon dioxide (CO2)
SPECIAL FIRE FIGHTING PROCEDURES: Use National Institute of Occupational Safety & Health (NIOSH) approved respirator with acid type canister or use self-contained breathing apparatus. Unusual fire and explosion hazards: material is a strong oxidizer. Contact with combustibles may initiate or promote combustion. Acid and heat accelerate decomposition. Decomposition products may include chlorine.

SECTION V - HEALTH HAZARD INFORMATION

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE

No medical conditions are known to be aggravated by exposure.

ROUTES OF EXPOSURE

INHALATION: Fumes from spills can cause severe irritation and chemical burns to the nose, throat, and lungs. Very little hazard from properly stored solution.
SKIN CONTACT: Severe irritant, reddening of skin, can cause chemical burns to skin.
SKIN ABSORPTION: Same as skin contact.
EYE CONTACT: Severe irritant, corrosive, can severely burn eyes.
INGESTION: Causes irritation of membranes of the mouth, throat, and stomach pain and possible ulceration. LD50 (oral, rat) for 12.5% NaOCl is approximately 5 g/kg body weight.

EFFECTS OF OVEREXPOSURE

ACUTE OVEREXPOSURE (see Routes of Exposure above)

SWALLOWING: See "ingestion" under routes of exposure.
SKIN CONTACT: severe Irritant, reddening of skin, skin damage, chemical burns.
INHALATION: Fumes from spills are very irritating to mucous membranes.
EYE CONTACT: Extreme irritant, corrosive.

CHRONIC OVEREXPOSURE (see Routes of Exposure above)

EYE: Can cause damage.
SKIN: Can cause damage, chemical burns.

EMERGENCY AND FIRST AID PROCEDURES

IF CONTACT WITH EYES OCCURS: flush with water for at least fifteen (15) minutes. Get medical attention.
IF CONTACT WITH SKIN OCCURS: wash with plenty of soap and water.
INHALATION: Remove to fresh air. Call a physician if exposure is severe.
IF SWALLOWED: drink large amounts of water. Do NOT induce vomiting. Call a physician or poison control center immediately.

SECTION VI - REACTIVITY DATA

CONDITIONS CONTRIBUTING TO INSTABILITY

Solutions are fairly stable in concentrations below 10%. Stability decreases with concentration, heat, light, exposure, decrease in pH, and contamination with heavy metals, such as nickel, cobalt, copper, and iron.

INCOMPATIBILITY

Acids, alcohols, amines, ammonia, chlorinated isocyanurates, combustibles, cyanides, detergents, ethers, hydrocarbons, oxidizable materials, reducing agents. Corrosive to most metals.

DECOMPOSITION PRODUCTS

Hypochlorous Acid (HOCl), chlorine, hydrochloric acid. Composition depends upon temperature and decrease in pH. Additional decomposition products, which depend upon pH, temperature and time, are sodium chloride, sodium chlorate and oxygen.

PROPER STORAGE AND DISPOSAL REQUIREMENTS

Store this product in a cool, dry area away from direct sunlight and heat to avoid deterioration. In case of spill, flood areas with large quantities of water.

Disposal for domestic use: Do not reuse container. Rinse thoroughly before discarding in trash.

Disposal for all other uses: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Do not contaminate water, food, or feed by storage, disposal or cleaning of equipment.

STORE IN AN UPRIGHT POSITION

OTHER PRECAUTIONS

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with gross filth such as feces, urine, etc.; or with ammonia, acids, detergents or other chemicals may release hazardous gases irritating to eyes, lungs and mucous membranes.

ADDITIONAL REGULATORY CONCERNS

EPA: May not be used for disinfection or sanitization without prior approval by EPA. Repackagers must obtain EPA registration and establishment numbers.
FIFRA: This product is regulated under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) if used as a disinfectant or sanitizer.
TSCA: Included in the Toxic Substances Control Act (TSCA) Inventory Of Chemical Substances.

1.0 INTRODUCTION

This report presents the results of a subsurface investigation for the tank farm of Kimberly Clark Plant located at 2001 E. Orangethrope Ave., Fullerton, CA (see Figure 1), conducted by Western Environmental Engineers Company (WEECO) on December 15 & 16, 1997. This site investigation was completed at the request of Ms. Grace Madden.

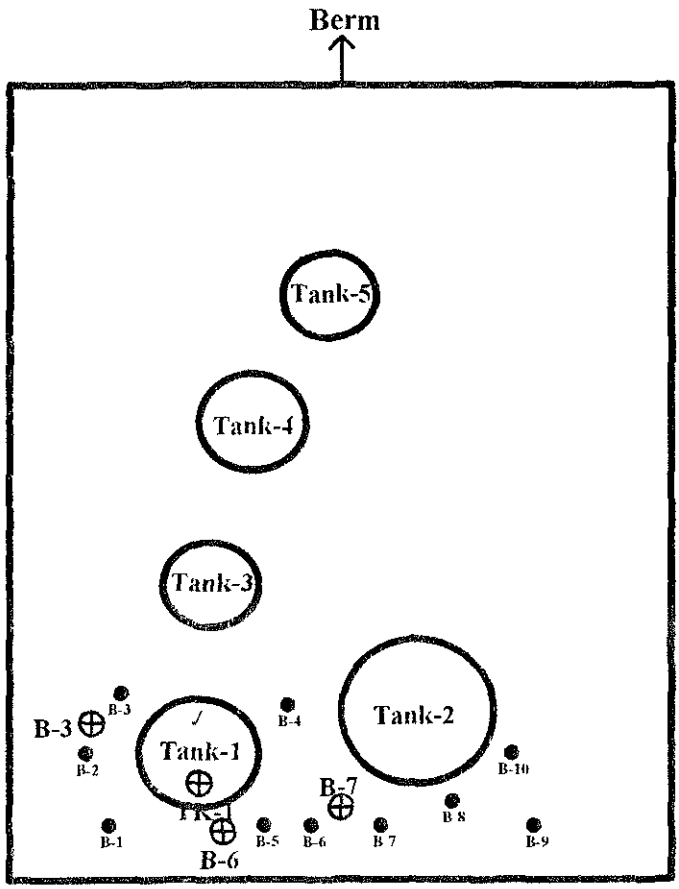
The purpose of this site investigation was to gather detailed information about the contaminants in the existing tank farm area which are used to store Sodium Hypochlorite (NaOCl), and to determine the contaminants existing on site and to approximate the volume of the contaminants plumes. From this information, a preliminary cost estimate to remediate this site, if necessary, could be provided to the owner. This Environmental Site Investigation report contains a brief history of the existing site characteristics, sample collection procedures, analytical results, conclusions and recommendations.

2.0 BACKGROUND

Kimberly-Clark Company has a factory at 2001 E. Orangethrope Avenue in City of Fullerton, California. Figure (2) show the layout of the factory located in City of Fullerton. There is a tank farm on the east site of the factory as indicated in Figure (2). Tank farm has five tanks as described below:

- Tank No.1 - destroyed
- Tank No.2 - exsiting
- Tank No.3 - existing
- Tank No. 4 - existing
- Tank No.5 - existing

On September 29 and October 6, 1997, ten (10) borings were drilled by *Western Environmental Engineers Company* in order to detect any contamination associated with the Sodium Hypochlorite (NaOCl). At that time, *Western Environmental Engineers Company* found that **Sodium Hypochlorite (NaOCl)** contamination has been detected in the subsurface soils in the vicinity of the tank farm area. They submitted the "Preliminary Phase II Site Assessment Report" to Ms. Grace Madden.



In response to *WEECO's* "Preliminary Site Assessment Report" dated October 20, 1997, Ms. Grace Madden was requested to perform additional work.

Mr. Steve Long
Fullerton Fire Dept.
Hazardous Materials Specialist
Fullerton Fire Department
312 E. Commonwealth Ave.,
Fullerton, CA 92832-2099

Dear Mr Long:

Please find attached on page 2 a draft copy of the UST Unauthorized Release Report for your review and reporting. Per my phone message, the two 10,000 gallons each fuel oil tanks (National tank, single-walled, carbon-steel tanks) were built in 1955 and installed in 1956. The tanks were removed in May 1986 by Crosby & Overton (Permit # P070-86151). The remaining soil was remediated and closure was obtained in January/February 1992 (Permit # 92-T-001).

I am also enclosing a copy of the tank registration and the closure report. We are also scheduled to start borings again on Friday, Feb. 22. A mobile lab will also be onsite. Fleming Environmental (Terry Fleming – tel : 714.228.0935) is the consultant for this activity. We hope to see you then. If you need additional information, please call or email me.

Thanks again for your help.

Sincerely :

Grace Madden

Subject: Clean-up Case Closure for Site at 2001 East Orangethorpe Ave., Fullerton, CA

Dear Ms. Alasti:

This letter confirms the completion of site investigation and remedial action at the above address. With the provision that the information provided to this department was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

The contents of these reports have also been discussed with staff of the Regional Water Quality Control Board (RWQCB). Based on the information submitted and current requirements, the RWQCB concurs with the determination of this Department that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this Department of any changes in report content, further contamination findings or site usage.

If you have any questions regarding this matter, please contact me at (714) 738-6508.

Sincerely,

John White
Underground Tank Specialist

13. Describe the Extent of Contamination (How much or how large of an area was contaminated): APPROX. 20FT (L) X 10FT (W) X 6FT DEEP (RANDOM AREAS OF SOIL STAINING)

14. Number of Injuries (As a result of the release): 0

Number of persons receiving medical treatment: 0 Where: N/A

15. Agencies at the scene of incident: NONE - NOT IDLH SITUATION; NOT AN EMERGENCY. NOTIFIED STEVE LONG & CORRIE ALLEN, CITY OF FUL FIRE DEPT. HAZMAT DIVISION.

16. Was the Incident Mitigated? ☒ Yes ☐ No Does further action need to be taken? ☒ Yes ☐ No

Action (How was the situation mitigated? If not mitigated, what action should be taken to mitigate?): CONTAMINATED SOIL HAS BEEN REMOVED. STEVE LONG TO VISIT THE SITE ON MONDAY, FEB. 18 at 9AM. A SMALL AMOUNT OF STAINING UNDER BLDG. WILL BE REMOVED WHEN MR. LONG IS ON-SITE.

17. Incident referred to (Person/Agency): NRC-594161 BROWN OES-02-0887 KEVIN Date: 2-15-02 Time: 2:10pm 2:20 PM

18. Clean-up Conducted by (Name of Agency, Consultant, etc.): FLEMING ENVIRONMENTAL INC. 714.228.0935

19. Is this the subject of an ongoing legal investigation? ☐ Yes ☒ No

20. Is the area physically accessible to the public? ☐ Yes ☒ No Explain: THE SOIL IS IN THE MIDDLE OF A 67 ACRE FACILITY. THE FACILITY IS FENCED AND HAS 24 HOUR SECURITY PERSONNEL.

21. Proximity to public (Distance/direction to homes, schools, etc.): APPROX. 1/2 MILE

22. Factors that are likely to cause substantial injury to the public Health and Safety: NONE

23. Additional Comments: NRC # 594161 (MS. BROWN) REPORTED ON FEB 15, 2002 2:10pm; OFF-SITE WASTE DISPOSAL TO START AFTER RECEIPT OF LAB TEST RESULTS. OES # 02-0887 (MR. Official Registration Form

California Water Resources Control Board

Hazardous Substance Storage Statement

Who Must File: Each person storing hazardous substances in any underground container must file this form no later than July 1, 1984 (After October 1, 1984 and no later than January 1, 1985 for tanks used on farms).

Definition of Underground Containers: The law applies to "concrete sumps, nonvaulted buried tanks or other underground containers." (Water Code section 13173) All containers, including earthen walled pits, ponds, lagoons and sumps, that are below the normal ground surface level must register. A tank sitting on the ground is not included. Containers partially beneath the surface are included. Lined or unlined pits, ponds and lagoons are covered if earth has been removed from the storage area to construct the facility. Normal grading is not considered construction below ground level.

Definition of Hazardous Substance: Any substance listed in Section 6382 of the Labor Code or in Section 25316 of the Health and Safety Code. This includes gasoline, diesel fuel, all industrial solvents, pesticides, herbicides and fumigants. If the material must be carried by a registered hauler, disposed of at a hazardous waste site, is explosive, generates pressure due to heat or decomposition or would harm humans or wildlife you must register the tank. Wastes are included.

Fee: For each tank registered a $10 fee must be paid, except that retail gasoline stations pay $5 per tank.

Penalties: For failure to file, the penalty is $500-$5,000 per day. If you falsify information, you can be fined up to $20,000 for each day the information is incorrect and has not been corrected.

Confidentiality: If you have information protected by trade secret laws, please attach a list of the information on this form that is confidential and the justification for confidentiality, including specific citations of relevant statutory and case law.

Multiple Containers: Fill I and II on one form and leave it blank on all the remaining forms. Attach all forms together securely. If you own more than 50 tanks you can file information on computer tape. Call 916/324-1262 for information.

This is not a Permit Application. All Underground Tanks will be subject to local regulation. Some jurisdictions have already begun programs. Check with your local county government for further information.

NOTE: ALL UNDERGROUND CONTAINERS MUST REGISTER EVEN IF STATE AND/OR LOCAL PERMITS ARE IN FORCE.

EXECUTIVE SUMMARY

Diesel-affected soil was encountered during construction excavation for a planned new building. The Fullerton Fire Department was notified and Inspector Steve Long was present at the site to witness the soil excavation and associated soil sampling. Samples were obtained to document the complete removal of affected soil from the site. An on-site mobile laboratory was used to test the samples for the presence of diesel- and fuel-range hydrocarbons. All of the soil that was possible to excavate was removed. However, due to the presence of the existing boiler room building adjacent to the west, some residual diesel-range hydrocarbons remain at the site that could not be excavated because of the possibility of undermining the existing building. It is estimated that from 500 to 600 tons of diesel-affected soil was excavated and is temporarily stockpiled at the site pending offsite disposal by Kimberly-Clark at an appropriate disposal facility.

Because all of the affected soil could not be removed, the Fullerton Fire Department required drilling of a soil boring at the west side of the excavated area, as near to the area of residual hydrocarbons as possible. This boring was drilled, soil samples were obtained every five feet, and the samples were analyzed by an onsite mobile laboratory. The analysis of the samples from the boring confirm that residual diesel-range hydrocarbons are present in the soil beneath the existing boiler room building.

During drilling of the boring, groundwater was encountered at a depth of 70 feet. Drilling was halted and a groundwater sample was obtained using a bailer lowered through the drilling augers. The sample was tested for TPH as diesel, BTEX, MTBE, and the common fuel oxygenates. The results of the groundwater testing indicate that low concentrations of TPH-d (0.86 mg/L) and total xylenes (7.9 µg/L) were detected in the sample. These concentrations are every low. Although there is no drinking water standard for TPH as a distinct compound, there is a maximum contaminant level (MCL) for total xylenes which is 1,750 µg/L. The detected xylenes are significantly below the MCL. All of the other tested oxygenates were not detected. Although the sample was obtained through the drilling augers, the results indicate that there has not been a significant impact to the groundwater beneath the site.

REPORT OF SOIL EXCAVATION and SAMPLING
for the
KIMBERLY-CLARK FACILITY
2001 EAST ORANGETHORPE AVENUE
FULLERTON, CALIFORNIA

1.0 SITE HISTORY

The subject site is located at 2001 East Orangethorpe Avenue in the City of Fullerton, California. The site is occupied by a paper product manufacturing and packaging operation. The site is the location of the planned construction of a new building. It is reported that two 10,000-gallon diesel underground storage tanks (USTs) were formerly located in an area just east of the existing boileroom building, which is the area planned for the new construction. On February 14, 2002, during recent excavation and grading activities, hydrocarbon-affected soil was encountered. The Fullerton Fire Department was notified and it was determined that although the former USTs had been removed, there was no information as to whether any soil samples had been collected and tested for the presence of petroleum hydrocarbons. On February 15, 2002, the concrete slabs which had been at the base of the former underground tanks, were broken up and removed. Subsequent to this, excavation and sampling were conducted under the oversight of the Fullerton Fire Department. A site location map and site layout are included as Figures 1 and 2, respectively.

1.1 Previous Investigations

Two 10,000-gallon underground fuel storage tanks were located at the site. However, there were no records provided regarding previous investigations that may have been conducted at the site.

1.2 Site Ownership and Occupancy

The property is currently owned by the Kimberly-Clark WorldWide Inc. The contact for the property owner is Ms. Grace Madden who can be reached by telephone at (714) 773-7500, extension 7677.

2.0 LOCAL GEOLOGY AND HYDROGEOLOGY

2.1 Geology

The site is located within the Peninsular Ranges Geomorphic Province of Southern California at an elevation of approximately 187 feet above sea level. The local topography slopes to the southwest. Based on excavation and soil sampling at the site, the subsurface soils are generally composed of sand or silty sand.

2.2 Hydrogeology

The site is located within the Orange County Coastal Groundwater Basin Forebay Area (Metropolitan Water District (1987). The Forebay portion of the Orange County Groundwater Basin contains relatively little impermeable subsurface materials and is the main recharge area for the groundwater basin. The depth to groundwater beneath the site is approximately 70 feet below grade, based on the depth to groundwater encountered during drilling of an exploratory boring. The estimated groundwater flow direction is towards the southwest, in accordance with the local topography.

3.0 SCOPE OF WORK

3.1 Soil Excavation

Hydrocarbon-affected soil was identified at the site during construction excavation operations. Based on oral approval from Inspector Long of the Fullerton Fire Department, excavation began on February 18, 2002 to remove the affected soil from the site. The excavation and backfilling activities continued through February 21, 2002. During this time, hydrocarbon-affected soil was excavated and stockpiled, soil samples were collected and tested by an onsite mobile laboratory to verify that all of the affected soil had been removed, and the excavated area was backfilled and compacted to local code in accordance with the construction plan. Approximately 500 to 600 tons of affected soil were excavated and stockpiled onsite nearby. The area of excavation is shown on Figure 3.

Soil samples were collected from various areas of the excavation as shown on the attached site plan to verify that the affected soil had been removed. Inspector Long was onsite during much of the excavation and sampling process and provided guidance for the sampling locations. The samples were tested for total petroleum hydrocarbons, as diesel, using modified EPA method 8015 and for volatile organic compounds using EPA method 8260B. A total of twelve samples were obtained from the excavation area and tested. The locations from which the soil samples were obtained are shown on Figure 3. The laboratory results are presented below in Table 1. The laboratory reports and chain-of-custody records from the excavation soil sampling are included in Appendix A.

Notes:
ND = Not Detected at or above the detection limit stated on the official laboratory reports in Appendix A.

I = Isopropylbenzene
N = Naphthalene
nPB = n-Propylbenzene
1,1,1-TCA = 1,1,1-Trichloroethane
1,2,4-T = 1,2,4-Trimethylbenzene
1,2,5-T = 1,3,5-Trimethylbenzene
nBB = n-Butylbenzene
sec-BB = sec Butylbenzene
p-IPT = p-Isopropyltoluene

The laboratory results indicate that all of the accessible hydrocarbon-affected soil has been excavated and removed. Residual diesel-affected soil, however, remains at the site beneath the existing boileroom building, at the western side of the excavated area. Excavation could not extend to the west or deep enough in this area to remove all of the affected soil due to the threat of soil caving which could undermine the existing building foundation. Because excavation could not be competed in this area and since soil samples could not be obtained from near enough to the building using the excavator to properly characterize the vertical extent of the residual hydrocarbons, the Fire Department requested the drilling and sampling of a soil boring in that area. The proposed scope of work is discussed in the following sections.

3.2 Drill Soil Boring

Drilling and sampling of a soil boring was recommended to evaluate the vertical extent of hydrocarbon-affected soil at the western side of the excavation, adjacent to the existing boiler room. The purpose of the boring was to obtain and test soil samples to document at least 30 feet of clean soil samples beneath the previously identified residual hydrocarbons beneath the boiler room building. Prior to commencing the drilling, Inspector Long requested submittal of a Workplan that would describe the planned sampling activities. A Workplan for Additional Site assessment was prepared and submitted to the Fullerton Fire Department on February 21, 2002.

3.2.1 Health and Safety Plan

A project Health and Safety Plan was prepared prior to beginning field. The purpose of the Plan was to establish personnel/safety protection standards, define responsibilities of personnel involved, establish safe operation procedures relative to physical and chemical conditions encountered on site, and provide for off site safety issues such as traffic control. A tailgate safety meeting was held prior to commencing project tasks. The Health and Safety Plan was available for review at the site during the field investigation. A copy of the Health and Safety Plan is included in Appendix B.

3.2.2 Soil Sampling Procedures

The boring was drilled by A & R Drilling, a licensed California drilling contractor, using a hollow-stem auger drill rig. A California-registered geologist supervised the drilling and sampling, maintained a log of the boring, classified the soils encountered using the Unified Soil Classification System, and obtained soil samples for field examination and laboratory testing. The boring log is included in Appendix C.

The soil samples were collected in brass sample sleeves using an 18-inch sampling tube that held three 6-inch-long sample sleeves. Advancement of the auger was halted at the desired sample depths (every five feet) and the sampler was lowered into the hole and driven into the soil. The

number of blows required to advance the sampler 18 inches was recorded as an indicator of soil density and consistency.

To prevent cross-contamination between samples, the augers were cleaned and the sampler washed using a 3-bucket wash system prior to each use. The wash system involved washing the sampler in a Alconox and water solution, rinsing sampler in tap water, and rinsing sampler in distilled water.

Upon retrieval, the sample sleeves were capped with Teflon™ sheeting, sealed with plastic end caps, and labeled. The samples were then immediately transferred to an onsite California-certified mobile laboratory for testing using standard chain-of-custody documentation.

A lithologic description of the subsurface materials encountered and collected was maintained on boring logs compiled by the field geologist. Soils were classified in accordance with the Unified Soils Classification System (USCS), and descriptions include soil type, particle size and distribution, color (using the Munsell soil color chart), moisture content, and evidence of contamination (discoloration, unusual odors, etc.). These data were compiled on boring logs maintained throughout the project to record observations. The boring log is included in Appendix C.

3.2.3 Head Space Analysis

Head space analysis was performed as a field screening technique using a photo-ionization detector (PID) calibrated using a 50 ppm hexane gas standard. Each soil sample was placed in a zip-lock plastic bag. After being left at ambient temperature approximately 10 minutes, the head space in the bag was evaluated using the field meter. This instrument registers the concentration of organic vapors in the head space, which is an indication of the presence of volatile organic materials in the soil. These readings were included on the boring log in Appendix C.

3.2.4 Groundwater Encountered

Soil samples were collected every five feet and groundwater was encountered during drilling at a depth of approximately 70 feet below grade. A groundwater sample was obtained through the augers in order to obtain and test a groundwater sample. The groundwater sample was collected using a clean bailer and was transferred to the mobile laboratory for analysis. Drilling was halted due to the presence of groundwater and the boring was backfilled with a bentonite cement slurry to grade.

3.3 Laboratory Analysis

3.3.1 Soil Samples

Each of the soil samples collected was tested by the laboratory for total petroleum hydrocarbons as diesel (TPH-d) using modified EPA method 8015 and for volatile organic compounds (VOCs) using EPA methods 8260B and 5035. The principal VOC compounds of concern were benzene, toluene, ethylbenzene, and total xylenes (BTEX), methyl tertiary butyl ether (MTBE) and the common fuel oxygenates.

The results of the exploratory boring soil sample laboratory tests are presented below in Table 2.

TABLE 2
SOIL BORING SAMPLE LABORATORY RESULTS

TBA= Tertiary butyl alcohol DIPE = Di-isopropyl alcohol ETBE = Ethyl tertiary butyl ether
TAME = Tertiary amyl methyl ether

The laboratory results indicate that before 30 feet of not detected samples could be obtained, groundwater was encountered at a depth of 70 feet. The highest concentration of TPH-d was 47,000 mg/kg at a depth of 30 feet. This is 40 feet above groundwater. Low concentrations of toluene, ethylbenzene, and total xylenes were also detected in that sample. Benzene and MTBE were not detected in that 30 foot sample. No hydrocarbons were detected in any of the deeper samples down to groundwater at 70 feet with the exception of 42 mg/kg TPH-d in the 55 foot sample. There were no volatile compounds detected in that 55 foot sample. The official laboratory reports and chain-of-custody records are included in Appendix D.

In addition, the sample with the highest TPH-d concentration (30 feet) was also tested for the full scan of volatile organic compounds using EPA method 8260B. The results indicate that the following compounds were also detected in the 30 foot sample:

chloromethane	1.1 mg/kg
p-isopropyltoluene	1.4 mg/kg
naphthalene	110 mg/kg
n-propylbenzene	1.5 mg/kg
1,2,4-trimethylbenzene	64 mg/kg
1,3,5-trimethylbenzene	26 mg/kg

These compounds are either common constituents of diesel fuel or may be associated with diesel.

3.3.2 Groundwater Sample

The groundwater sample was collected into 40-milliliter VOA vials and an amber liter bottle using a clean, Teflon™ bailer, sealed, labeled, and transferred to the onsite mobile laboratory under proper chain-of-custody procedures. The groundwater sample was identified as sample SB2-02@70AQ. The groundwater sample was tested for TPH as diesel and for VOCs using EPA Method 8260B. The results are shown below in Table 3. The official laboratory reports and chain-of-custody records are included in Appendix E.

The laboratory results indicate that although the groundwater sample was obtained through the drilling augers, the laboratory testing indicates that the only detected compounds were TPH as diesel at 0.86 mg/L and total xylenes at 7.9 µg/L. The TPH-d concentration is low and the xylene concentration is significantly less than the California Maximum Contaminant Level (drinking water standard) for total xylenes of 1,750 µg/L. There is no drinking water standard for TPH-d. All of the other tested compounds, including benzene, toluene, ethylbenzene, MTBE and the other common fuel oxygenates, were all not detected.

TABLE 3
GROUNDWATER SAMPLE LABORATORY RESULTS

Compound	Result
TPH-d	**0.86 mg/L**
MTBE	ND
TBA	ND
DIPE	ND
ETBE	ND
TAME	ND
Benzene	ND
Toluene	ND
Ethylbenzene	ND
Total Xylenes	**7.9 µg/L**

See official laboratory reports in Appendix E for complete list of analytes. All other compounds were not detected.
ND = Not detected at or above method detection limit.
µg/L = parts per billion

3.4 Investigative Waste Management

In the process of collecting environmental samples during the sampling program, different types of potentially contaminated investigation-derived wastes (IDW) were generated that included the following:

- Used personal protective equipment (PPE)
- Disposable sampling equipment
- Soil cuttings

The Federal EPA's National Contingency Plan (NCP) requires that management of IDW comply with all applicable or relevant and appropriate requirements (ARARs) to the extent practicable. The sampling plan followed the Office of Emergency and Remedial Response (OERR) Directive

9345.3-02 dated May 1991, which provides the guidance for the management of IDW.

Listed below are the procedures that were followed for handling the IDW:

- Used PPE and disposable equipment were double-bagged and placed in a municipal refuse dumpster. These wastes are not considered hazardous and can be sent to a municipal landfill. Any PPE and disposable equipment to be disposed of which could still be reused was rendered inoperable before disposal in the refuse dumpster.

- There was no decontamination water generated at the site. The drilling augers were cleaned prior to arrival at the site and were cleaned by the drilling contractor at their yard following completion of the work.

- Soil cuttings were added to the existing excavated soil stockpile, pending offsite disposal.

All solid IDW (soil cuttings) will be disposed of at an appropriate disposal/treatment/recycling facility. Kimberly-Clark will be responsible for the handling and disposal of the waste generated during this project.

4.0 REVIEW OF LABORATORY RESULTS

4.1 Soil Samples

Diesel-range hydrocarbons were detected in the soil beneath the site. The highest concentration is 47,000 mg/kg from the boring at a depth of 30 feet. This area that was sampled is just adjacent to the existing boiler room and cannot be removed by excavation due to its proximity to the existing building. There was no benzene or MTBE associated with this sample, although relatively low concentrations of toluene, ethylbenzene, and total xylenes were detected in this sample.
The 30 foot sample was composed of silt, which was an abrupt lithologic change from the overlying sandy material. The fine-grained silt layer extending from a depth of about 30 to 32 feet has apparently served as a relatively impermeable layer which has generally prevented deeper migration of the diesel hydrocarbon release.

Of the eight deeper samples obtained from depths of 35 feet to 70 feet, the only other detected compound was TPH as diesel at 42 mg/kg in the 55 foot sample. All of the other tested compounds were not detected. This suggests that the residual hydrocarbons at the site are of limited vertical extent.

4.2 Groundwater Samples

The laboratory results for the groundwater sample indicate that the only detected compounds were TPH as diesel at 0.86 mg/L and total xylenes at 7.9 µg/L. TPH-d has no established drinking water guidance level and is considered to be low. The xylene concentration is significantly less than the California Maximum Contaminant Level (drinking water standard) for total xylenes of 1,750 µg/L. All of the other tested compounds, including benzene, toluene, ethylbenzene, MTBE and the other common fuel oxygenates, were all not detected in the groundwater sample.

This indicates that the released diesel-range hydrocarbons at the site have not caused a significant impact to the underlying groundwater.

5.0 CONCLUSIONS

Diesel-affected soil was encountered during construction excavation for a planned new building. The Fullerton Fire Department was notified and an inspector was present at the site to witness the soil excavation and associated soil sampling. Samples were obtained to document the complete removal of affected soil from the site. An on-site mobile laboratory was used to test the samples for the presence of diesel- and fuel-range hydrocarbons. All of the soil that was possible to excavate was removed. However, due to the presence of the existing boiler room building adjacent to the west, some residual diesel-range hydrocarbons remain at the site that could not be excavated because of the possibility of undermining the existing building. It is estimated that from 500 to 600 tons of diesel-affected soil was excavated and is temporarily stockpiled at the site pending offsite disposal by Kimberly-Clark at an appropriate disposal facility.

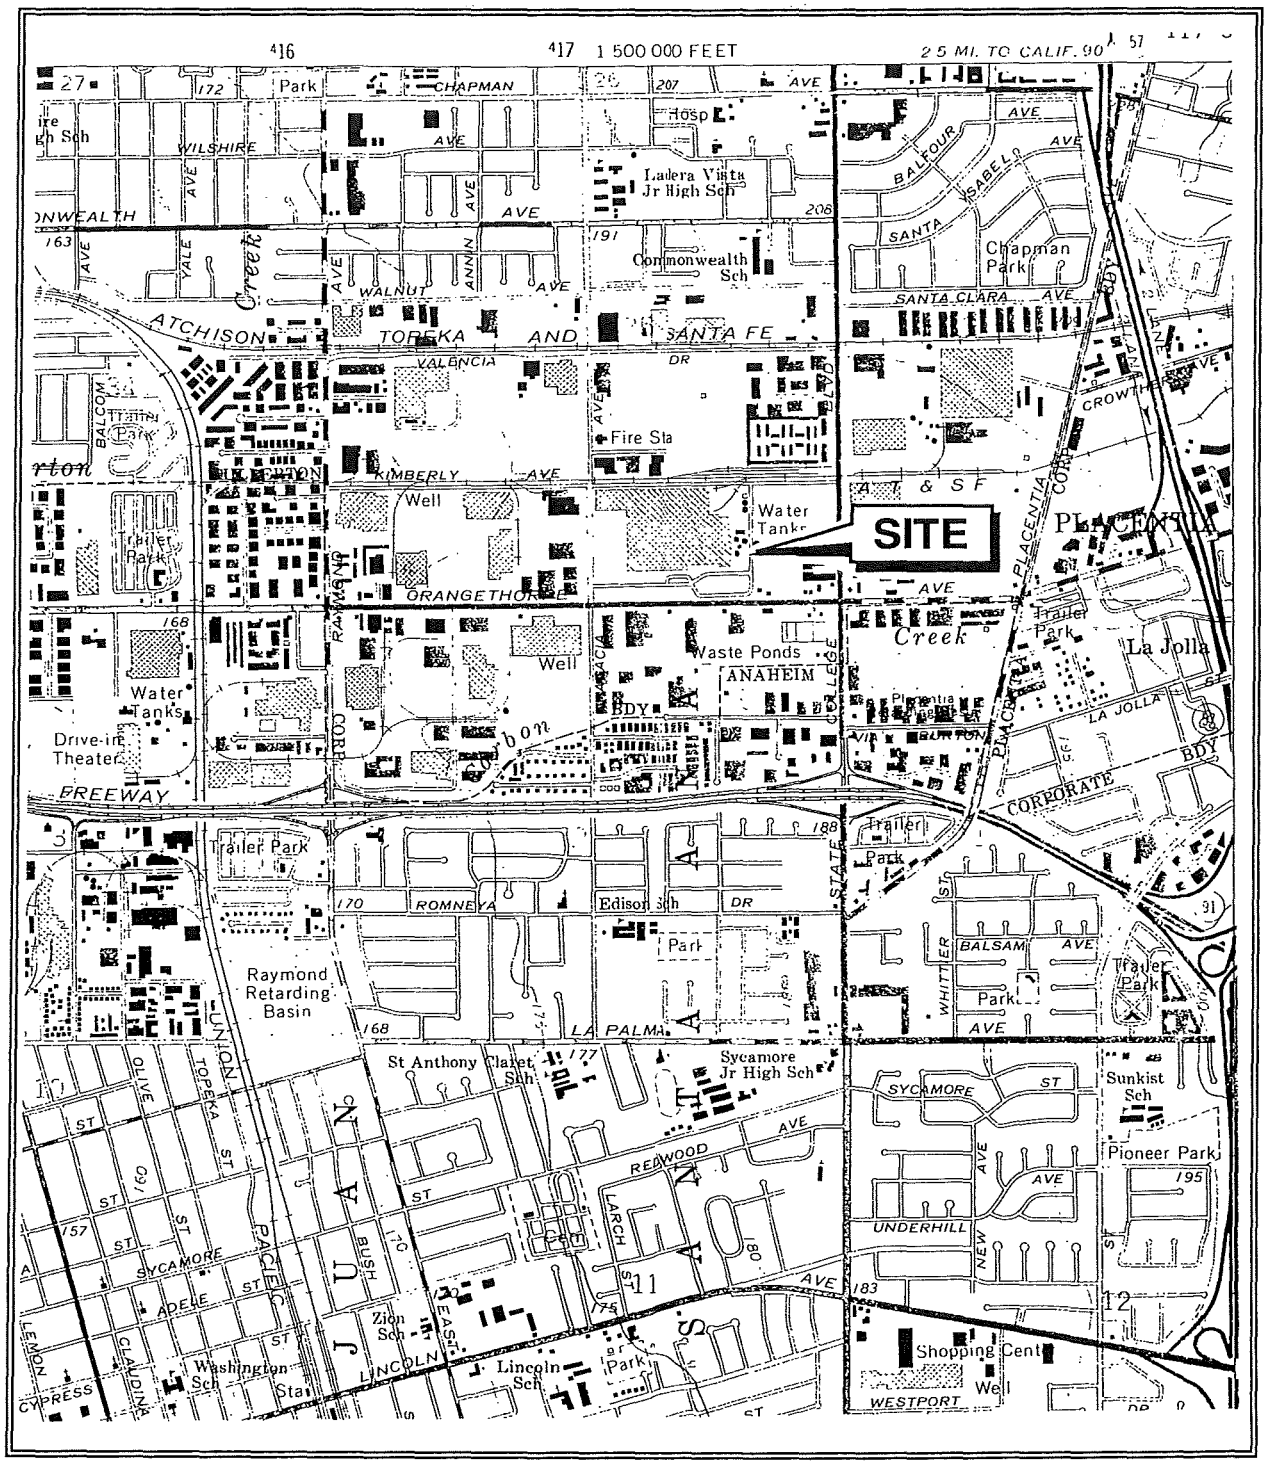
Because all of the affected soil could not be removed, the Fullerton Fire Department required drilling of a soil boring at the west side of the excavated area, as near to the area of residual hydrocarbons as possible. This boring was drilled, soil samples were obtained every five feet, and the samples were analyzed by an onsite mobile laboratory. The analysis of the samples from the boring confirm that residual diesel-range hydrocarbons are present in the soil beneath the existing boiler room building.

During drilling of the boring, groundwater was encountered at a depth of 70 feet. Drilling was halted and a groundwater sample was obtained using a bailer lowered through the drilling augers. The sample was tested for TPH as diesel, BTEX, MTBE, and the common fuel oxygenates. The results of the groundwater testing indicate that low concentrations of TPH-d (0.86 mg/L) and total xylenes (7.9 µg/L) were detected in the sample. These concentrations are every low. Although there is no drinking water standard for TPH as a distinct compound, there is a maximum contaminant level (MCL) for total xylenes which is 1,750 µg/L. The detected xylenes are significantly below the MCL. All of the other tested oxygenates were not detected. Although

the sample was obtained through the drilling augers, the results indicate that there has not been a significant impact to the groundwater beneath the site.

6.0 RECOMMENDATIONS

The findings of this assessment indicate that the diesel-affected soil has been excavated and removed to the practical limits of the site. Residual hydrocarbon-affected soil remains beneath the existing boiler room. Soil sampling from a boring drilled at the site have defined the vertical extent of hydrocarbons in the soil. Groundwater was encountered at 70 feet and a groundwater sample was obtained through the drilling augers for testing. The laboratory results from the groundwater sample indicate that hydrocarbons in the soil at the site have not resulted in a significant impact to the underlying groundwater.



Therefore, since all of the accessible hydrocarbon-affected soil has been excavated from the site, and a groundwater sample does not indicate a significant impact to groundwater, the residual affected soil that cannot be excavated is not considered to pose a threat to the groundwater beneath the site. Therefore, site closure with no further action required is recommended.

CASE NARRATIVE

The following information applies to samples which were received for analysis by Centrum Analytical Mobile Environmental Laboratory Number Four (MEL #4) on: 02/18/02

The samples were received at the project site intact and were either analyzed immediately or stored at 4°C until analyzed.

Unless otherwise noted below, the Quality Control acceptance criteria were met for all samples for every analysis requested. The date of issue for this report is 02/28/02.

Report approved by:

James M. Reed
Mobile Lab Supervisor

Rodolfo Vergara, Jr.
Quality Assurance Manager

ELAP # 2373

DL : Detection Limit -- The lowest level at which the compound can reliably be detected under normal laboratory conditions.
ND : Not Detected -- The compound was analyzed for but was not found to be present at or above the detection limit.
NA : Not Analyzed -- Per client request, this analyte was not on the list of compounds to be analyzed for.

APPENDIX B

HEALTH AND SAFETY PLAN

SITE SPECIFIC HEALTH AND SAFETY PLAN

1.0 Site Name and Address

(714)
738-3160

Kimberly Clark Facility
2001 E. Orangethorpe Avenue
Fullerton, California

2.0 Site Personnel

Project Director	Will Gaston
Field Technical Services	Scott Edwards

3.0 Site Description & Background

Kimberly Clark is a manufacturing facility.

4.0 Planned Site Activities

We anticipate a total of one exploratory soil boring will be installed during this investigation. Soil sampling at the site will be performed using A & R Drilling. The boring will be advanced to a total depth of approximately 50 feet beneath ground surface (bgs), and soil samples will be collected every 5 feet, starting at 25 feet. The samples will be collected and submitted to a mobile laboratory (Spectrum Lab) for analysis. After sampling is completed, each sample location is to be backfilled with bentonite chips and native soil, and patched at the surface with a like paving material.

Appropriate first aid and decontamination equipment will be prepared and maintained on-site for all field portions of this project.

5.0 Health and Safety Precautions

Diesel concentrations in these soils are not known; however, these samples are being used as clean-up confirmation samples. Therefore, sampling will be performed in modified Level D. This includes use of personal protection equipment, including safety glasses and Nitrile gloves. Gloves are to be changed between each sample.

6.0 Contingency Procedures

In the event of an emergency, the initial action will be to use a cell phone to call the City of Fullerton Fire Department at 911. If the emergency consists of an injury, the project team must act to stop bleeding, prevent the injured person from going into shock and ready him for transport.

If emergency consist of fire or a potentially explosive situation, the project team must:

- Shut down all equipment (if feasible and if this action does not result in risk to life or property);
- Clear the area; and
- Re-assemble in the parking lot adjacent to the Kimberly Gate.

At that time, the City of Fullerton Fire Department can be contacted by either cellular phone or landline.

A safety kit containing a fire extinguisher and first aid kit will be maintained at the site in the Field Technicians Vehicle. Daily tailgate safety meetings will be held for all site workers to identify hazards not discussed in this HSP and to review and refine these contingency procedures.

7.0 Physical Hazards

Physical hazards associated with site activities include crushing and cutting injuries associated with heavy machinery, slips, trips, falls, contact and eye abrasions, contusions, lacerations, flammability and potential for explosion.

Other physical hazards include the potential for heat exhaustion and heat stroke.

8.0 Minimum required Health and Safety Procedures

All workers engaged in site activities will wear hard hats, safety glasses and safety shoes while on the job site. All workers will be OSHA 40-hour trained and medically approved for respirator use and show written evidence thereof prior to the commencement of site activities.

9.0 Safety Procedures

9.1 Site Entry/Access: The work area will be controlled to prevent entrance of unauthorized persons. The Field Technician will control access to this area. Area access will be limited to those persons required to perform soil-sampling activities.

9.2 Egress: The facility gate will remain open during fieldwork so that workers can vacate the area in the event of an emergency.

9.3 Decontamination: Distilled water and Alconox will be used for the decontamination of both personnel and sampling equipment.

10.0 Special Procedures and Precautions

All on-site work will be coordinated with Fleming Environmental.

11.0 Emergency Contacts

• AMBULANCE:	911
• POLICE:	911
• FIRE:	911
• HOSPITAL:	911
• NATIONAL RESPONSE CENTER:	1-800-424-8802
• POISON CONTROL CENTER:	1-800-682-9211
• TOXLINE:	1-301-496-1131
• CHEMTREX	1-800-424-9300

12.0 Nearest Medical Facility

Anaheim Memorial Hospital
1111 W. La Palma Avenue
Anaheim, CA 92801
(714) 774-1450

DIRECTIONS TO HOSPITAL:

Start our going West on **E. Orangethorpe Avenue** towards **S. Acacia Avenue** by turning RIGHT.
Turn LEFT onto **S. Lemon Street**.
Turn RIGHT onto **W. La Palma Avenue**.
Anaheim Memorial Hospital will be on your RIGHT.

Client:	Fleming Environmental 6130 Valleyview St. Buena Park, CA 90620	Date Sampled: Date Received: Job Number:	02/22/02 02/22/02 M4-351
Project:	Kimberly-Clark		

CASE NARRATIVE

The following information applies to samples which were received for analysis by Centrum Analytical Mobile Environmental Laboratory Number Four (MEL #4) on: 02/22/02

The samples were received at the project site intact and were either analyzed immediately or stored at 4°C until analyzed.

Unless otherwise noted below, the Quality Control acceptance criteria were met for all samples for every analysis requested. The date of issue for this report is 02/28/02.

EPA 8260B: Some samples were run at a dilution due to high levels of hydrocarbons in the sample; consequently, reporting limits were raised.

Report approved by:

James M. Reed
Mobile Lab Supervisor

Rodolfo Vergara, Jr.
Quality Assurance Manager

ELAP # 2373

DL : Detection Limit -- The lowest level at which the compound can reliably be detected under normal laboratory conditions.
ND : Not Detected -- The compound was analyzed for but was not found to be present at or above the detection limit.
NA : Not Analyzed -- Per client request, this analyte was not on the list of compounds to be analyzed for.

CASE NARRATIVE

The following information applies to samples which were received on 02/22/02 :

The sample was received at the laboratory directly from the field and was cooled to 4°C upon arrival. The sample container was intact.

Unless otherwise noted below, the Quality Control acceptance criteria were met for all samples for every analysis requested. The date of issue for this report is 02/28/02.

CASE NARRATIVE

The following information applies to samples which were received for analysis by Centrum Analytical Mobile Environmental Laboratory Number Four (MEL #4) on: 02/22/02

ELAP Number: 2373

Unless otherwise noted below, the Quality Control acceptance criteria were met for all samples for every analysis requested.

The samples were received at the project site intact and were either analyzed immediately or stored at 4°C until analyzed.

Report approved by:

James M. Reed
Mobile Lab Supervisor

Rodolfo Vergara, Jr.
Quality Assurance Manager

DL: Detection Limit – The lowest level at which the compound can reliably be detected under normal laboratory conditions.
ND: Not Detected – The compound was analyzed for but was not found to be present at or above the detection limit.

LETTER OF TRANSMITTAL

To: Kimberly Clark Facility
2001 E. Orangethorpe Ave.
Fullerton, CA 92831

Date: 3/1/02
Attention:Grace Madden
RE: Cogeneration Facility

WE ARE SENDING YOU:

☑ Attached ☐ Under separate cover via _____ the following items.

☐ Payment ☐ Prints ☐ Plans ☐ Samples ☐ Specifications

☐ Copy of Letter ☐ Change Order _____ ☐ Other_____

Copies	Date(d)	Submittal No.	Description
1			Workplan for drilling activities
1			Soil analytical for sampling on 2/18/02

THESE ARE TRANSMITTED as checked below:

☐ For Approval ☐ Approved as Submitted ☐ Resubmit _____ copies for approval

☑ For your use ☐ Approved as noted ☐ Submit _____ copies for distribution

☐ As requested ☐ Returned for corrections ☐ Return _____ corrected prints

☐ For review and comment ☐ _____

Subject: Workplan for Additional Soil Investigation at the Kimberly Clark site located at 2001 East Orangethorpe Avenue, Fullerton, California

Dear Mr. Long:

Enclosed is the Workplan for additional site assessment activities at the subject site as requested by your office.

We appreciate your assistance and look forward to working with you in this matter. If there are any questions, please call at (714) 505-6123.

Respectfully submitted,

Dear Mr. Rains:

The analytical results for the soil samples, received by our laboratory on February 21, 2002, are attached.

Enviro-Chem appreciates the opportunity to provide you and your company this and other services. Please do not hesitate to call Mr. John Ackerman, our Customer Service Specialist, or myself, if you have any questions.

Sincerely,

Curtis Desilets

Kimberly-Clark

Fullerton Mill

March 13, 2002

Mr. Steve Long
Fullerton Fire Dept.
Hazardous Materials Specialist
Fullerton Fire Department
312 E. Commonwealth Avenue
Fullerton, CA 92832-2099

Subject : Fuel Oil Contamination in Boiler House/Cogen Site at Kimberly Clark Fullerton Mill

Dear Mr. Long:

Per our phone conversation, please find enclosed the following :

1. Two copies of the Geologist's report on the soil excavation and sampling for the fuel oil contamination encountered during the excavation for the new building site. This area formerly housed two underground storage tanks that was removed in 1986. The soil was remediated and closure was obtained in 1992. We sent you a copy of the paperwork on Feb. 20.

2. A total of 2,174.2 tons of soil (81 truckloads) was sent out for recycling disposal on February 25 & 26. A copy of the lab tests from the waste soil and a copy of the shipping summary of the waste is also attached. Please advise if you need a copy of each waste shipment's manifest.

We look forward to working with you in resolving this issue. If you need additional information, please call or email me. Thank you again for your assistance.

Sincerely,

GMadden

COMMENTS
PQL = Practical Quantitation Limit
ND = The concentration is below the PQL or non-detected
TTLC = Total Threshold Limit Concentration
STLC = Soluble Threshold Limit Concentration
@ = Must meet both the STLC Limit at 560 and EPA-TCLP Limit at 5
* = STLC analysis for the metal is recommended (if marked)
** = TCLP-Chromium analysis is recommended (if marked)
*** = The concentration exceeds the TTLC Limit, and the sample is defined as hazardous waste as per CCR-TITLE 22 (if marked)
-- = Not analyzed/not requested

SAMPLE I.D.: 022102 N

LAB I.D.: 020221-14

TOTAL THRESHOLD LIMIT CONCENTRATION ANALYSIS
UNIT: MG/KG = MILLIGRAM PER KILOGRAM = PPM

ELEMENT ANALYZED	SAMPLE RESULT	PQL	TTLC LIMIT	STLC LIMIT	EPA METHOD
Antimony(Sb)	ND	1.0	500	15	6010B
Arsenic(As)	1.57	0.5	500	5.0	6010B
Barium(Ba)	95.7	5.0	10,000	100	6010B
Beryllium(Be)	ND	0.5	75	0.75	6010B
Cadmium(Cd)	ND	0.5	100	1.0	6010B
Chromium(Cr)Total	17.6	0.5	2,500	560/5@	6010B
Chromium VI (Cr6)	--	1.0	500	5.0	7196A
Cobalt(Co)	2.35	1.0	8,000	80	6010B
Copper(Cu)	8.86	1.0	2,500	25	6010B
Lead(Pb)	6.65	0.5	1,000	5.0	6010B
Mercury(Hg)	ND	0.1	20	0.2	7471A
Molybdenum(Mo)	ND	5.0	3,500	350	6010B
Nickel(Ni)	11.3	2.5	2,000	20	6010B
Selenium(Se)	ND	1.0	100	1.0	6010B
Silver(Ag)	ND	1.0	500	5.0	6010B
Thallium(Tl)	ND	1.0	700	7.0	6010B
Vanadium(V)	40.5	5.0	2,400	24	6010B
Zinc(Zn)	58.1	0.5	5,000	250	6010B

COMMENTS
PQL = Practical Quantitation Limit
ND = The concentration is below the PQL or non-detected
TTLC = Total Threshold Limit Concentration
STLC = Soluble Threshold Limit Concentration
@ = Must meet both the STLC Limit at 560 and EPA-TCLP Limit at 5
* = STLC analysis for the metal is recommended (if marked)
** = TCLP-Chromium analysis is recommended (if marked)
*** = The concentration exceeds the TTLC Limit, and the sample is defined as hazardous waste as per CCR-TITLE 22 (if marked)
-- = Not analyzed/not requested
