Method: R01-Recycler
Facility County: Orange

CERS:
Name: KIM IRON WORKS, INC
Address: 2331 E ORANGETHORPE AVE
City,State,Zip: FULLERTON, CA 92831
Site ID: 422139
CERS ID: 10539457
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 422139
Site Name: Kim Iron Works, Inc
Violation Date: 08-07-2013
Citation: HSC 6.95 25505(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)
Violation Description: Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes: Not reported
Violation Division: Orange County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 422139
Site Name: Kim Iron Works, Inc
Violation Date: 07-16-2015
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 07/20/2015. The manifests were reviewed. They were complete except that the last 3 years had 2 different "temporary" EPA ID #s (CAC002663814 and CAC00279059). The facility does have a permanent EPA ID # of CAL923645247. Stop using the 2 temporary EPA ID #s and begin using the permanent EPA ID on all future manifests. Please mail a copy of the next manifest (proposed to be August 2015) in order to abate this violation.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 422139
Site Name: Kim Iron Works, Inc
Violation Date: 07-19-2018
Citation: 22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Description: Failure to inspect weekly, areas where hazardous waste containers are stored or transferred. The owner or operator shall look for leaking containers and for deterioration of containers and the containment system caused by corrosion or other factors.
Violation Notes: Returned to compliance on 07/23/2018. Per Mr. Diaz hazardous waste containers are only inspected by hauler. Hazardous waste containers must be inspected at least weekly. Begin inspecting hazardous waste containers and provide documentation to this agency demonstrating inspections are being conducted.

. Waste name: Other organic solids

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

VISTA PAINT CORP (Continued) **1000395320**

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 13294.4

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 1992

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 10504.4

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 10504.4

VISTA PAINT CORP (Continued) **1000395320**

Eval Date:	10-10-2013
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Inspection authority granted by Vista Paints/Long. SPCC on site and available for review. The tier 1 SPCc was written on 1-2010. It was amended on 10-2013. It needs to be re certified before 1-2015. All aboveground storage tanks (ASTs) are empty, closed and labeled as empty. Facility has only 55 gallon drums of petroleum products that are subject to SPCC requirements. Use the entire facility as the secondary containment. There is a cinder block wall with removable gates that separate the outside chemical storage area from the nearby storm drain channel. The secondary containment appears to be "minimal" however, all the 55 gallon drums that contain regulated petroleum products are stored at the other end of the parking lot and a release of 55 gallons would most likely not make it to the containment area. Facility has 5 USTs on site. 3 are not being used and 2 contain [Truncated]

Violation Description:	Failure to close containment bypass valves when not draining rainwater.
Violation Notes:	Returned to compliance on 10/17/2013. The facility uses "gate valves" to hold/release storm water. To date the facility conducts weekly drum/tank inspections but has not used any inspection records to document the storm water releases. Immediately begin using storm water release forms and retain them for inspection.

Eval Date:	10-10-2013
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Inspection authority granted by Vista Paints/Long. SPCC on site and available for review. The tier 1 SPCc was written on 1-2010. It was amended on 10-2013. It needs to be re certified before 1-2015. All aboveground storage tanks (ASTs) are empty, closed and labeled as empty. Facility has only 55 gallon drums of petroleum products that are subject to SPCC requirements. Use the entire facility as the secondary containment. There is a cinder block wall with removable gates that separate the outside chemical storage area from the nearby storm drain channel. The secondary containment appears to be "minimal" however, all the 55 gallon drums that contain regulated petroleum products are stored at the other end of the parking lot and a release of 55 gallons would most likely not make it to the containment area. Facility has 5 USTs on site. 3 are not being used and 2 contain [Truncated]

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Stains and spills around facility. Condensate & oil coming out of compressor area. SWPPP out of date. Unauthorized discharge into flood channel from hosing down driveway of maint. Garage. Black dust and oily material observed floating in the water.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 503876
Site Name: Vista Paint Corp
Violation Date: 01-02-2001
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Paint residue in storm swales. Oil and condensate leeking from compressor. Broken bags of sand spilling into storm drain. Numerous paint and chemical drums (ie. no lids) without secondary containment along flood control channel. Poor housekeeping.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-02-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Inspection was also follow up for a fire - info from Karen Ashby, Orange County RFRD. Liquid paint stains noted on east side of main building, coming out of a door. White staining and spilling near ASTs (east side of facility). Evidence of paint resdidues in storm swale on east side of building. Condensate and oil coming out of compressor area. Plastic bags of sand leaking into storm drain and flood control channel. Numerous 55 gallon drums without secondary containment along flood channel and by field on west side of building. Poor housekeeping. Fresh 1 gallon spill and crushed container noted by AAB and cleaned up as inspectors watched. On south side of the facility leaking latex residue from ASTs. SWPPP needs to be updated ('94). As leaving the inspection there was an unauthorized discharge into the flood control channel as the mechanic hosed down the driveway of the maintenance garage. Black dust and oily material observed floating in the water.
Eval Division: Water Boards

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-19-2009
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Regional Board staff conducted an inspection of the above facility on August 19, 2009. Staff met with Graham Swan (Plant Mgr.) and John Long (Environmental Mgr). SWPPP was certified at time of inspection. SWPPP did not contain training records. Graham Swan said he would put those in by 8/28/09. Good housekeeping. Proper BMP use.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-29-2017
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Regional Board Staff conducted a compliance inspection of the above facility on November 29, 2017. The SWPPP was reviewed and no violations were observed. A site walk was then conducted. Totes, drums, and paint products were observed stored outside without BMPs or secondary containment. Additional miscellaneous chemical products were stored outside without BMPs. Secondary containment valves observed with signs reading ?Wet Season Check Before Draining?. Spill kit needed near southeast side near drum and tote storage. Totes were observed stored on storm swale. Soapy water discharge observed in storm swale. Mr. Long found the discharge was from an eye wash station. Increase sweeping and housekeeping needed around drum storage area. Fire pump construction was taking place at the northern portion of the property, parallel to Orangethorpe Ave. BMPs were not observed or in place to prevent sediment runoff from the property into the storm gutter.

Violation Description: Failure to close containment bypass valves when not draining rainwater.
Violation Notes: Returned to compliance on 10/17/2013. The facility uses "gate valves" to hold/release storm water. To date the facility conducts weekly drum/tank inspections but has not used any inspection records to document the storm water releases. Immediately begin using storm water release forms and retain them for inspection.

Eval Notes: On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Inspection authority granted by Vista Paints/Long. SPCC on site and available for review. The tier 1 SPCc was written on 1-2010. It was amended on 10-2013. It needs to be re certified before 1-2015. All aboveground storage tanks (ASTs) are empty, closed and labeled as empty. Facility has only 55 gallon drums of petroleum products that are subject to SPCC requirements. Use the entire facility as the secondary containment. There is a cinder block wall with removable gates that separate the outside chemical storage area from the nearby storm drain channel. The secondary containment appears to be "minimal" however, all the 55 gallon drums that contain regulated petroleum products are stored at the other end of the parking lot and a release of 55 gallons would most likely not make it to the containment area. Facility has 5 USTs on site. 3 are not being

Eval Notes: On site for the annual hazardous waste recycler inspection. Inspection authority granted by Vista Paints/ John Long. This facility no longer recycles the waste oil based paints from their own store or the satellite stores. All non usable oil based paints are hauled away as hazardous waste from each store. The satellite stores do return off spec and mis-tint laytex paints to this location for re blending into new paints at the factory. These paints have been tested via a fish bio-assay and determined no be non hazardous. Any re blending does not require a "recyclable materials exemption" nor any regulatory paperwork. This inspection program will be removed from the inspection database via anRUR.

Violations:
Site ID: 142757
Site Name: PETES ROAD SERVICE INC
Violation Date: 06-02-2016
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 07/26/2016. 6-2-16 annual update required, add motor oil (375 gal) to inventory.
Violation Division: Fullerton City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 142757
Site Name: PETES ROAD SERVICE INC
Violation Date: 10-03-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 10/03/2016. -Oily water waste container label missing facility information and accumulation start date. -Completely and accurately fill in missing information on hazardous waste label, corrected on-site.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 142757
Site Name: PETES ROAD SERVICE INC
Violation Date: 08-22-2013
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)

HORIZON HIGH REACH & EQUIP CO (Continued) **1000265272**

Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 09/18/2013. The facility was unable to locate the waste antifreeze manifests. Please find the manifests for the waste antifreeze for the last 3 years and submit to this office for review. Attached is a "Certificate of Return to Compliance' (CRC). Please complete the CRC and mail it back to me with the manifest copies in order to abate the violation.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-22-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for the annual hazardous waste inspection. Permission to inspect granted by Pete's/Brina Orozco. All HWs were stored in non-leaking tanks/drums. All were properly labeled. All were stored closed. Trash and facility were reviewed for HW spills/disposal and found clean. OJT training and FD emergency plan on site. Waste oil/oil filters/clarifier waste manifests were on site and reviewed. OK. See violations for waste antifreeze manifests.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 09-05-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Received the "certificate of return to compliance" and manifests to verify the antifreeze is bing manifested. Abate violation # W038 on the 8-22-13 inspection report.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-03-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by James Van Horn, assistant manager. Walked throughout the facility. Observed hazardous waste storage areas. Facility mixes their ethylene glycol and used oil waste and has it hauled away as contaminated oil waste. Containers were closed and not properly labeled, oily water waste labels were missing all facility information and accumulation start date, corrected on-site. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted in the office area. The dumpster/enclosure was observed, no signs of dumping.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	07-09-2015
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for the triennial hazardous waste (HW) inspection. Permission to inspect granted by Plasticolor/Mc Carty. This site manufacturers vehicle floor mats. The only HW generated is E-waste that is self hauled to a neighboring E-waste recycler. Receipts OK. The waste oil is from compressor oil blow down. They have reduced the oil from 55 gallons per year to about 15 gallons per year. They no longer accumulate waste oil in a 55 gallon drum. The now self haul 5 gallons per haul to a waste oil collection center. Due to the low volume of HW generated, this facility will be removed from the HW inspection program. If you generate any new HW in the future, please call this Agency for evaluation.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-04-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Dan Tatum, owner. Walked throughout the facility. Observed hazardous waste storage areas. Containers of hazardous waste were closed and not properly labeled, the drums did not have the word hazardous waste, generator information, content composition, physical state hazardous properties, and accumulation start date. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is not posted. The dumpster/enclosure was observed, no signs of dumping observed. A Certificate of Return to Compliance (CRC) is being issued. The minor violations on this report must be corrected within 30 days. Complete the CRC and return to this Agency within 30 days.

Citation:	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also

WINONICS ELECTRO CIRCUITS INC (Continued) **U003778944**

include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 04/14/2014. No current PE certification available for the HW tanks in the TP units. There was a PE report dated 1-2005 and 1-2008. The next PE review was due 1-2013. Per Cazares, the PE review has been completed in the last week. Please submit the PE certification to this Agency for review once completed.

Eval Notes:	INSPECTOR COMMENTS: On site for routine tiered permitting inspection; accompanied on inspection by Susan Berg of Orange County Environmental Health (OCEH). Consent to enter and conduct inspection activities was provided by Ira Rosenberg, also accompanied inspection by Francisco Cazares and Roberto. This facility conducts treatment of dragout and other waste containing copper under the Permit by Rule (PBR) tier. There are three PBR units at this facility: -Contaminated waste water -Acid batch treatment -Copper Absorption There is a total of four below grade tanks at this facility; two are connected to the treatment units. The other two tanks are being reviewed by this agency. Walked through process area and observed the following: -All treatment units were labeled with required information -Liquid was present on process floors, per Mr. Rosenberg floor has a gradient and is sloped towards piping that leads to treatment unit The following documentation [Truncated]

Eval Notes:	INSPECTOR COMMENTS On site for a Tiered permitting- Permit By Rule (PBR) inspection. Consent to inspect and take any necessary photos was given by Ira Rosenberg, facilities and equipment manager. There have been no changes in the system and no releases in three years. The facility has four different FTU systems: FTU #1 PBR, waste water treatment system; pH adjustment, precipitation, flocculation, and filter press, 6 tanks FTU #2 acid neutralization, pH adjustment, 2 tanks FTU #3 caustic neutralization, pH adjustment, 2 tanks FTU #4 copper absorption, flocculation in tanks, then sent into waste water treatment system, three tanks. FTU #4 tanks were not labeled properly with the owner/operator ID, facility ID, and serial number. Annually they treat around 4.4 million gallons of liquid waste. Facility sends all liquid out to the sewer and the filter cake is hauled away as hazardous waste. The following documents were available for review: Inspection logs, [Truncated]

CERS ID: 10153319
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 86386
Site Name: WINONICS ELECTRO CIRCUITS INC
Violation Date: 03-18-2014
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes: Returned to compliance on 04/14/2014. No current PE certification available for the HW tanks in the TP units. There was a PE report dated 1-2005 and 1-2008. The next PE review was due 1-2013. Per

WINONICS ELECTRO CIRCUITS INC (Continued) **U003778944**

	Cazares, the PE review has been completed in the last week. Please submit the PE certification to this Agency for review once completed.

Site Name:	WINONICS ELECTRO CIRCUITS INC
Violation Date:	06-30-2016
Citation:	22 CCR 45 67450.13(a)(1) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.13(a)(1)
Violation Description:	Failure to prepare a written estimate of the cost of closing each unit which includes the cost that would be incurred for closing a treatment unit when using the owner or operator or generator's own staff and/or personal equipment taking into account any salvage value that may be realized from the sale of wastes, facility structure or equipment, land or other facility assets. This estimate shall be submitted as an attachment to the Certification of Financial Assurance for Permit by Rule and Conditionally Authorized Operations/ Maintenance page(s) of the Unified Program Consolidated Form (x/99)).
Violation Notes:	Returned to compliance on 07/15/2016. Required annual PBR renewal and Certification Of Financial Assurance forms that should have been submitted by 3/1/16 have not been submitted. Required documents must be submitted electronically to CERS by 7/14/16.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 04/13/2016. The site had 3 (1) cubic yard containers (plastic lined, plastic boxes). 2 held circuit board waste water treatment (WWT) sludge, resist. 1 had waste filters and debris. The 2 WWT waste containers had HW labels with most of the proper information, including beginning accumulation date. However, they had the site address and EPA iD# that corresponded to their sister facility in Brea. The HW labels need to have the proper DBA, address and EPA ID #. The filter container was properly labeled. The two labels were corrected and reattached during the inspection. The violation was abated during the inspection.

Violation Description: Failure to determine if the waste generated is a hazardous waste.
Violation Notes: Returned to compliance on 05/03/2016. During the inspection, I looked at the municipal trash dumpster, which is located on the Winonics property, in the rear parking lot, behind locked gates. The dumpster was about 1/4 full with municipal trash. In the lower right corner, I saw about 20 gallons of light colored dirt/sand/dust. I asked Cazares what this was. He said it was the wet sanding waste , used to clean circuit boards that is dried out in the back parking lot via the sun and once dried, they dispose of it to the municipal trash. When asked if the waste had ever been lab tested for heavy metals, he said no. I reviewed the sanding machine water/sand reservoir and took photos of the machine and trash bin. I took one sample of the waste from the dumpster using a single use plastic spatula and glass jar. Cazares had his staff remove the rest of the waste and place it into (3) 5 gallon pails. He will hold onto the waste/pails until the lab analysis has been performed. Have the waste analyzed for [Truncated]

Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 04/04/2014. The business has a circuit board drilling process. The process generates copper dust and fiberglass waste in a bag house accumulation device. To date, the business has disposed of the bag house waste into the copper, waste water treatment sludge HW stream. The problem is that the bag house waste container is labeled as "recyclable materials", with the proper beginning accumulation date. If this waste is managed as a HW and not as a separate recyclable material, the bag house waste accumulation container must be labeled as "hazardous wastes". Immediately change the receptacle to the proper HW label.

Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS On site for a Tiered permitting- Permit By Rule (PBR) inspection. Consent to inspect and take any necessary photos was given by Ira Rosenberg, facilities and equipment manager. There have been no changes in the system and no releases in three years. The facility has four different FTU systems: FTU #1 PBR, waste water treatment system; pH adjustment, precipitation, flocculation, and filter press, 6 tanks FTU #2 acid neutralization, pH adjustment, 2 tanks FTU #3 caustic neutralization, pH adjustment, 2 tanks FTU #4 copper absorption, flocculation in tanks, then sent into waste water treatment system, three tanks. FTU #4 tanks were not labeled properly with the owner/operator ID, facility ID, and serial number. Annually they treat around 4.4 million gallons of liquid waste. Facility sends all liquid out to the sewer and the filter cake is hauled away as hazardous waste. The following documents were available for review: Inspection logs, [Truncated]

Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Ira Rosenberg, facilities and equipment manager. Walked throughout the facility. Observed hazardous waste storage areas. Facility has four fixed treatment units (FTU), they treat all their waste waters, copper plating solution, acid batch solutions, and basic batch solutions. Facility uses a filter press to remove more water from their sludge and they have the filter cake hauled away as hazardous waste. In their 90 day waste storage are they had adequate aisle space between containers. There was a little bit of filter cake on the ground in their outdoor storage area. Facility also has some liquid and crystal build up in some of their secondary containment/wet process floors. Discussed the management of the hazardous waste storage area and the wet process floors with Ira and Francisco. Facility had a container of carbon filters and [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On site for the biennial Tiered Permitting (TP) inspection. Permission to inspect granted by Winonics/Cazares. The site has 4 PBR units: #1, PBR, WWT (PH adjust/precipitation/flocculation/filter press), 180,000 gallons per month treated, 8 tanks. #2, WWT, acid neutralization, 1,300 gallons per month treated, 3 tanks. #3, WWT, caustic neutralization, 200 gallons per month treated, 2 tanks. #4, WWT, copper absorption, electro less chelation treatment, 240 gallons treated per month, 1 tank. Financial assurance (self insured) was in place and annually certified. Cazares is working with HCA/Fard to get the TP information on the CERS database.

Violations Found: Yes

WINONICS ELECTRO CIRCUITS INC (Continued) **U003778944**

Eval Type:	Routine done by local agency
Eval Notes:	On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by Winonics/Cazares. This is a RCRA, Large Quantity Generator (LQG). It manufactures printed circuit boards (PCB). Federal EPA ID # is correct. Federal waste F008 is the major waste generated. Last 3 years of manifests were reviewed and complete. The facility is on a 90 day haul away cycle. The facility has haul aways 2x/month. Biennial report was submitted 2-2016. SB-14 report submitted and on site. Annual training was reviewed. All staff names, job position and description of training were OK. Training program was reviewed. HMBEP on file with the FFD. OC Sanitation permit # 2-1-735 is current and on file for sewer discharges. Contingency plan reviewed. The HW storage area weekly review records OK. The facility is fenced in with 24 hour surveillance for security. The HW drums were stored closed and not leaking. Labels, see violations. [Truncated]

Eval Notes:	Inspector Comments: Your business is required to submit an Annual Permit Renewal Package Certification Of Financial Assurance for the onsite treatment of hazardous waste. A letter dated January 15, 2016, was mailed to your facility along with instructions on how to electronically submit the required documents by the due date of March 1, 2016. To date, your documents have not been electronically submitted to the California Environmental Reporting System (CERS). Required documents must be submitted to CERS via http://cers.calepa.ca.gov/ by 7/14/16. Failure to submit the required documents may result in a fine of twenty-five thousand dollars ($25,000) for each day of the violation pursuant to Section 25189 of the California Health and Safety Code (H&SC).

WINONICS ELECTRO CIRCUITS INC (Continued) **U003778944**

Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes:	Returned to compliance on 04/14/2014. No current PE certification available for the HW tanks in the TP units. There was a PE report dated 1-2005 and 1-2008. The next PE review was due 1-2013. Per Cazares, the PE review has been completed in the last week. Please submit the PE certification to this Agency for review once completed.

Violation Description:	Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes:	Returned to compliance on 04/04/2014. There are 2 ~1,000 gallon, plastic Aboveground Storage Tanks (ASTs) in the rear yard area. The ASTs used to hold new and spent ammonia etch (ammonia and copper). The ASTs have been out of service for several years and are currently labeled "empty". 1 of the ASTs is in fact empty. The 2nd AST still has ~ 1/4"- 1/2" of blue-green etchant crystals on the AST floor. In order to be "empty", there must be no chemicals left in the AST. Immediately have this AST cleaned and the resulting waste managed as HW.

Violation Description: Failure to determine if the waste generated is a hazardous waste.
Violation Notes: Returned to compliance on 05/03/2016. During the inspection, I looked at the municipal trash dumpster, which is located on the Winonics property, in the rear parking lot, behind locked gates. The dumpster was about 1/4 full with municipal trash. In the lower right corner, I saw about 20 gallons of light colored dirt/sand/dust. I asked Cazares what this was. He said it was the wet sanding waste , used to clean circuit boards that is dried out in the back parking lot via the sun and once dried, they dispose of it to the municipal trash. When asked if the waste had ever been lab tested for heavy metals, he said no. I reviewed the sanding machine water/sand reservoir and took photos of the machine and trash bin. I took one sample of the waste from the dumpster using a single use plastic spatula and glass jar. Cazares had his staff remove the rest of the waste and place it into (3) 5 gallon pails. He will hold onto the waste/pails until the lab analysis has been performed. Have the waste analyzed for [Truncated]

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 04/04/2014. The business has a circuit board drilling process. The process generates copper dust and fiberglass waste in a bag house accumulation device. To date, the business has disposed of the bag house waste into the copper, waste water treatment sludge HW stream. The problem is that the bag house waste container is labeled as "recyclable materials", with the proper beginning accumulation date. If this waste is managed as a HW and not as a separate recyclable material, the bag house waste accumulation container must be labeled as "hazardous wastes". Immediately change the receptacle to the proper HW label.

Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes: Returned to compliance on 04/14/2014. No current PE certification available for the HW tanks in the TP units. There was a PE report dated 1-2005 and 1-2008. The next PE review was due 1-2013. Per Cazares, the PE review has been completed in the last week. Please

Violation Date: 06-20-2018
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Observed one 5 gallon container of waste filters in treatment area to be open while not in use. Filters were moved to larger closed container during inspection. Observed one cubic yard bin of waste paint, electronics and air cylinder to be open while not in use. Close container immediately and provide a photograph that container has been closed.

Violation Description: Failure to determine if the waste generated is a hazardous waste.
Violation Notes: Returned to compliance on 05/03/2016. During the inspection, I looked at the municipal trash dumpster, which is located on the Winonics property, in the rear parking lot, behind locked gates. The dumpster was about 1/4 full with municipal trash. In the lower right corner, I saw about 20 gallons of light colored dirt/sand/dust. I asked Cazares what this was. He said it was the wet sanding waste , used to clean circuit boards that is dried out in the back parking lot via the sun and once dried, they dispose of it to the municipal trash. When asked if the waste had ever been lab tested for heavy metals, he said no. I reviewed the sanding machine water/sand reservoir and took photos of the machine and trash bin. I took one sample of the waste from the dumpster using a single use plastic spatula and glass jar. Cazares had his staff remove the rest of the waste and place it into (3) 5 gallon pails. He will hold onto the waste/pails until the lab analysis has been performed. Have the waste analyzed for [Truncated]

	the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/04/2014. The business has a circuit board drilling process. The process generates copper dust and fiberglass waste in a bag house accumulation device. To date, the business has disposed of the bag house waste into the copper, waste water treatment sludge HW stream. The problem is that the bag house waste container is labeled as "recyclable materials", with the proper beginning accumulation date. If this waste is managed as a HW and not as a separate recyclable material, the bag house waste accumulation container must be labeled as "hazardous wastes". Immediately change the receptacle to the proper HW label.

Eval Date:	07-25-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS On site for a Tiered permitting- Permit By Rule (PBR) inspection. Consent to inspect and take any necessary photos was given by Ira Rosenberg, facilities and equipment manager. There have been no changes in the system and no releases in three years. The facility has four different FTU systems: FTU #1 PBR, waste water treatment system; pH adjustment, precipitation, flocculation, and filter press, 6 tanks FTU #2 acid neutralization, pH adjustment, 2 tanks FTU #3 caustic neutralization, pH adjustment, 2 tanks FTU #4 copper absorption, flocculation in tanks, then sent into waste water treatment system, three tanks. FTU #4 tanks were not labeled properly with the owner/operator ID, facility ID, and serial number. Annually they treat around 4.4 million gallons of liquid waste. Facility sends all liquid out to the sewer and the filter cake is hauled away as hazardous waste. The following documents were available for review: Inspection logs, [Truncated]

Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Ira Rosenberg, facilities and equipment manager. Walked throughout the facility. Observed hazardous waste storage areas. Facility has four fixed treatment units (FTU), they treat all their waste waters, copper plating solution, acid batch solutions, and basic batch solutions. Facility uses a filter press to remove more water from their sludge and they have the filter cake hauled away as hazardous waste. In their 90 day waste storage are they had adequate aisle space between containers. There was a little bit of filter cake on the ground in their outdoor storage area. Facility also has some liquid and crystal build up in some of their secondary containment/wet process floors. Discussed the management of the hazardous waste storage area and the wet process floors with Ira and Francisco. Facility had a container of carbon filters and [Truncated]

Violation Date:	03-18-2014
Citation:	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes:	Returned to compliance on 04/14/2014. No current PE certification available for the HW tanks in the TP units. There was a PE report dated 1-2005 and 1-2008. The next PE review was due 1-2013. Per Cazares, the PE review has been completed in the last week. Please submit the PE certification to this Agency for review once completed.

Violation Description:	Failure to determine if the waste generated is a hazardous waste.
Violation Notes:	Returned to compliance on 05/03/2016. During the inspection, I looked at the municipal trash dumpster, which is located on the Winonics property, in the rear parking lot, behind locked gates. The dumpster was about 1/4 full with municipal trash. In the lower right corner, I saw about 20 gallons of light colored dirt/sand/dust. I asked Cazares what this was. He said it was the wet sanding waste , used to clean circuit boards that is dried out in the back parking lot via the sun and once dried, they dispose of it to the municipal trash. When asked if the waste had ever been lab tested for heavy metals, he said no. I reviewed the sanding machine water/sand reservoir and took photos of the machine and trash bin. I took one sample of the waste from the dumpster using a single use plastic spatula and glass jar. Cazares had his staff remove the rest of the waste and place it into (3) 5 gallon pails. He will hold onto the waste/pails until the lab analysis has been performed. Have the waste analyzed for [Truncated]

Eval Notes:	INSPECTOR COMMENTS: On site for routine tiered permitting inspection; accompanied on inspection by Susan Berg of Orange County Environmental Health (OCEH). Consent to enter and conduct inspection activities was provided by Ira Rosenberg, also accompanied inspection by Francisco Cazares and Roberto. This facility conducts treatment of dragout and other waste containing copper under the Permit by Rule (PBR) tier. There are three PBR units at this facility: -Contaminated waste water -Acid batch treatment -Copper Absorption There is a total of four below grade tanks at this facility; two are connected to the treatment units. The other two tanks are being reviewed by this agency. Walked through process area and observed the following: -All treatment units were labeled with required information -Liquid was present on process floors, per Mr. Rosenberg floor has a gradient and is sloped towards piping that leads to treatment unit The following documentation [Truncated]

Eval Notes:	INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Ira Rosenberg, facilities and equipment manager. Walked throughout the facility. Observed hazardous waste storage areas. Facility has four fixed treatment units (FTU), they treat all their waste waters, copper plating solution, acid batch solutions, and basic batch solutions. Facility uses a filter press to remove more water from their sludge and they have the filter cake hauled away as hazardous waste. In their 90 day waste storage are they had adequate aisle space between containers. There was a little bit of filter cake on the ground in their outdoor storage area. Facility also has some liquid and crystal build up in some of their secondary containment/wet process floors. Discussed the management of the hazardous waste storage area and the wet process floors with Ira and Francisco. Facility had a container of carbon filters and [Truncated]

Prepare a Source Reduction Review and Plan (Plan) and the Hazardous Waste Management Performance Reports (Performance Report) immediately. December 2010 SB14 guidance document was provided to facility on this date. Observed one cubic yard bin of each filters and filter cake to be missing required labeling information (hazardous property) labels were completed during inspection. Violation I562 has been corrected. All containers of hazardous waste were observed to be closed while not in use, violation I145 has been corrected. Discussed disposal of hazardous waste.
Eval Division:	Orange County Environmental Health
Eval Program:	HWLQG
Eval Source:	CERS

Eval General Type:	Other/Unknown
Eval Date:	09-05-2018
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On site for tiered permitting re-inspection. Reviewed the following documentation on this date: -Waste Analysis Plan (WAP): include the test methods used for the analysis of waste entering into the treatment unit. Facility has conducted testing on all waste entering into the treatment unit, a copy was provided during inspection. -Closure Plan: Include a description of how equipment will be decontaminated after taken out of use. Violation I675 remains outstanding. Update the above documents and provide copies of each to this agency immediately.

Hazardous Waste Summary:

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D011
. Waste name: SILVER

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

WINONICS INC DBA BENCH 2 BENCH (Continued) **1015732651**

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 3300.1

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.
Amount (Lbs): 34000

Waste code: F007
Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS
Amount (Lbs): 1310

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency Case Number:	60001385
Latitude:	33.8634808337132
Longitude:	-117.895723047607
Case Type:	Cleanup Program Site
Case Worker:	MG
Local Agency:	Not reported
RB Case Number:	SLT8R224
File Location:	Not reported
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Under Investigation
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Lead, Nickel, Other Metal, Gasoline, Stoddard solvent / Mineral Spriits / Distillates
Site History:	The Khyber Foods site is located at 1818 East Rosslynn Avenue, Fullerton, California. The site occupies approximately 1.44 acres in an urban industrial area in Orange County. As of March 2015, the site contained a single 26,851-ft2 building with roll-up doors located along the western and eastern portions of the building. Paved parking areas are located along the northern and eastern portion of the property. USTs are located in the southeastern and central western portions of the property. In addition, the former drum storage area was located adjacent to the building along the central eastern portion of the property. From 1984 to 1988, J.C. Ford Manufacturing Company (J.C. Ford) operated onsite as a machine shop and weld fabricator. Santa Ana Plating Corp. may have occupied the property subsequent to J.C. Ford, but the records are not clear, and it may have operated on the adjacent property. In the 1990s, Khyber Foods, Inc. operated at the site. From at least 1998 to 2006, PCA Industries, LLC operated onsite and conducted metal plating operations. Since at least 2008 until approximately 2014, Metaclad Insulation Corporation has operated at the site and designed and fabricated specialty insulation items. The operations and hazardous substances used onsite during the time that J.C. Ford, Santa Ana Plating Corp., and Khyber Foods occupied the property are unknown. Metaclad Insulation Corporation generated asbestos-containing waste, other inorganic solid waste, waste oil and mixed oil, unspecified organic liquid mixture, and lead. Analytical results from a March 1990 soils investigation indicated the presence of trichloroethylene (TCE) at 260 micrograms per kilogram (ug/kg), tetrachloroethylene PCE) at 170 ug/kg, 1,1,1-trichloroethane (1,1,1-TCA) at 750 ug/kg, 1,1-dichloroethylene (1,1-DCE) at 670 ug/kg, and 1,1,2-trichloroethane (1,1,2-TCA) at 44 ug/kg. In 1990, three monitoring wells were installed on the Khyber Foods site and quarterly sampling began in October 1991. Numerous groundwater sampling events occurred in the early 1990s that detected PCE, TCE, and 1,1-DCE in groundwater beneath the site at concentrations exceeding Maximum Contaminant Levels (MCLs).

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared

KHYBER FOODS (Continued) **U003782809**

to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS HAZ WASTE:
Site ID: 92953
CERS ID: 10402903
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 92953
Site Name: ARCO 42122
Violation Date: 04-20-2015
Citation: 23 CCR 16 2711(a)(8) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2711(a)(8)
Violation Description: Failure to submit, obtain approval, or maintain a complete/accurate plot plan.
Violation Notes: Returned to compliance on 06/08/2015. Monitoring plot failed to show sensor locations.
Violation Division: Fullerton City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 92953
Site Name: ARCO 42122
Violation Date: 03-13-2018
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes: Returned to compliance on 03/13/2018. Diesel STP sump sensor failed testing. Replaced and retested at time of inspection.
Violation Division: Fullerton City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 92953
Site Name: ARCO 42122
Violation Date: 04-05-2016
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.
Violation Notes: Returned to compliance on 04/06/2016. Stand-alone VR 001 sensors in all UDC's except #13/14 failed to shut down dispensers until nozzle was hung up. Additionally, a bad hook signal in dispensers #3/4 and #5/6 prevented testing of 87 and 91 PLLD's because the turbines wouldn't shut down. Permission to conduct emergency repairs was given at time of inspection. Plans received 4/6/16. Sensors in 87/91 UDC's (i.e. all except diesel dispenser #13/14) replaced with 208's and programmed for positive shutdown. Testing of new sensors and 87/91

P & M SERVICE STATION #947 (Continued) **S101589654**

PLLD's witnessed by this agency 4/6/16.

Eval Notes:	Rosie of Tesoro called (210 626 6564). She called because collections are pursuing an unpaid invoice. She reported that Tesoro had taken over ownership at the end of 2013. She stated that change of ownership was reported in CERS. However, they do not have a permit and are receiving ARCO's unpaid invoices and calls from collections. (It seems like I'm missing some information here). EC showed active facility in HW with Kevin and HM / UST with Fullerton Fire. She has 3 more OC facilities in the same situation with unacknowledged change of ownership. I'm not the inspector for this site but to keep it simple, I asked her to PDF me copies of the invoices so that I can follow up and get the right people involved.

Eval Notes:	On site for the triennial Hazardous Waste (HW) inspection report. Permission to inspect granted by the Arco/manager. The facility generates waste liquids/solids from UST maintenance. The facility is a Small Quantity Generator (SQG) and has its HW hauled away every 6 months. EPA ID# s correct. HW drums had incomplete HW labels. See violations. Abated during the inspection. Manifests were on site and reviewed. OK. HMBEP is on file with the FFD. Emergency plan posted. Review of the facility perimeter and trash showed no disposal of HW.

CERS TANKS:
Name: ARCO 42122

P & M SERVICE STATION #947 (Continued) **S101589654**

Address: 2351 E ORANGETHORPE AVE
City,State,Zip: FULLERTON, CA 92831
Site ID: 92953
CERS ID: 10402903
CERS Description: Underground Storage Tank

Violations:

Site ID: 92953
Site Name: ARCO 42122
Violation Date: 04-20-2015
Citation: 23 CCR 16 2711(a)(8) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2711(a)(8)
Violation Description: Failure to submit, obtain approval, or maintain a complete/accurate plot plan.
Violation Notes: Returned to compliance on 06/08/2015. Monitoring plot failed to show sensor locations.
Violation Division: Fullerton City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 92953
Site Name: ARCO 42122
Violation Date: 03-13-2018
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes: Returned to compliance on 03/13/2018. Diesel STP sump sensor failed testing. Replaced and retested at time of inspection.
Violation Division: Fullerton City Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 92953
Site Name: ARCO 42122
Violation Date: 04-05-2016
Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.
Violation Notes: Returned to compliance on 04/06/2016. Stand-alone VR 001 sensors in all UDC's except #13/14 failed to shut down dispensers until nozzle was hung up. Additionally, a bad hook signal in dispensers #3/4 and #5/6 prevented testing of 87 and 91 PLLD's because the turbines wouldn't shut down. Permission to conduct emergency repairs was given at time of inspection. Plans received 4/6/16. Sensors in 87/91 UDC's (i.e. all except diesel dispenser #13/14) replaced with 208's and programmed for positive shutdown. Testing of new sensors and 87/91 PLLD's witnessed by this agency 4/6/16.

Eval Notes:	Rosie of Tesoro called (210 626 6564). She called because collections are pursuing an unpaid invoice. She reported that Tesoro had taken over ownership at the end of 2013. She stated that change of ownership was reported in CERS. However, they do not have a permit and are receiving ARCO's unpaid invoices and calls from collections. (It seems like I'm missing some information here). EC showed active facility in HW with Kevin and HM / UST with Fullerton Fire. She has 3 more OC facilities in the same situation with unacknowledged change of ownership. I'm not the inspector for this site but to keep it simple, I asked her to PDF me copies of the invoices so that I can follow up and get the right people involved.

Eval Notes:	On site for the triennial Hazardous Waste (HW) inspection report. Permission to inspect granted by the Arco/manager. The facility generates waste liquids/solids from UST maintenance. The facility is a Small Quantity Generator (SQG) and has its HW hauled away every 6 months. EPA ID# s correct. HW drums had incomplete HW labels. See violations. Abated during the inspection. Manifests were on site and reviewed. OK. HMBEP is on file with the FFD. Emergency plan posted. Review of the facility perimeter and trash showed no disposal of HW.

Eval Notes:	Tesoro called regarding no UST permit. E-mailed: Rosie: Hope your Christmas was good. Regarding the ?lack of UST permit? for this station, I cannot get you the permit because Fullerton Fire is the issuing Agency. I have called Fullerton and asked them to call you ASAP, but it may not be until after the New Years due to holidays. Get back to me if there are any snags.

P & M SERVICE STATION #947 (Continued) **S101589654**

	Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double wall pressurized piping in the under dispenser containment to be continuously monitored by a method that either shuts down the flow of product to the dispenser or activates an audible/visual alarm when a leak is detected.
Violation Notes:	Returned to compliance on 04/06/2016. Stand-alone VR 001 sensors in all UDC's except #13/14 failed to shut down dispensers until nozzle was hung up. Additionally, a bad hook signal in dispensers #3/4 and #5/6 prevented testing of 87 and 91 PLLD's because the turbines wouldn't shut down. Permission to conduct emergency repairs was given at time of inspection. Plans received 4/6/16. Sensors in 87/91 UDC's (i.e. all except diesel dispenser #13/14) replaced with 208's and programmed for positive shutdown. Testing of new sensors and 87/91 PLLD's witnessed by this agency 4/6/16.

Eval Notes:	Rosie of Tesoro called (210 626 6564). She called because collections are pursuing an unpaid invoice. She reported that Tesoro had taken over ownership at the end of 2013. She stated that change of ownership was reported in CERS. However, they do not have a permit and are receiving ARCO's unpaid invoices and calls from collections. (It seems like I'm missing some information here). EC showed active facility in HW with Kevin and HM / UST with Fullerton Fire. She has 3 more OC facilities in the same situation with unacknowledged change of ownership. I'm not the inspector for this site but to keep it simple, I asked her to PDF me copies of the invoices so that I can follow up and get the right people involved.

Eval Notes:	On site for the triennial Hazardous Waste (HW) inspection report. Permission to inspect granted by the Arco/manager. The facility generates waste liquids/solids from UST maintenance. The facility is a Small Quantity Generator (SQG) and has its HW hauled away every 6 months. EPA ID# s correct. HW drums had incomplete HW labels. See violations. Abated during the inspection. Manifests were on site and reviewed. OK. HMBEP is on file with the FFD. Emergency plan posted. Review of the facility perimeter and trash showed no disposal of HW.

Violation Date: 07-18-2017
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 08/08/2017.
Violation Division: Fullerton City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 424750
Site Name: Corru Kraft- Fullerton
Violation Date: 03-27-2001
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: 1ST NOV REQD SUBMITTAL OF RECORDS - NOT RECVD BY MARCH 27, 2001 DEADLINE, SO A SECOND NOV IS ISSUED
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-07-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: A compliance inspection was conducted for this facility on 02/07/01 at 1045. Mr. Carlos Deborja accompanied Regional Board staff through the

CORRU-KRAFT COMPANY (Continued) **1000818474**

facility. Review of the SWPPP indicated that it was adequate and detailed all pollutant sources and the BMPs used to prevent pollutant discharge. This facility is involved in a group monitoring program and has already collected samples for this year. There are five discharge locations on this property. The outside area is mostly used for parking. Drums were observed with triple containment. Additionally, all raw materials were stored under cover. No concerns were observed during the inspection.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-11-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a HW inspection. Consent to enter and to inspect was granted by Frank McDonald, Facility Mgr. The following was observed: Proper hazardous waste labeling on all HW drums and containers. Training program and records were available for review. Emergency plan was available for review. Manifests were available for review. No violation was observed.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-21-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: VIOLATIONS NOTED
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-29-2017
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a compliance inspection of the above facility on November 29, 2017. The SWPPP was reviewed and training records were missing at the time of the inspection. The updated SWPPP as well as the updated Pollution Prevention Team was not available but has been emailed to Regional Board Staff. The SWPPP claims the facility submitted and is participating in representative sampling reduction. A site walk was then conducted. Uncovered 55-gallon drums were observed without secondary containment. An uncovered boneyard was also observed but has since been covered and photographs were emailed to Regional Board Staff.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-19-2019
Violations Found: Yes
Eval Type: Routine done by local agency

CORRU-KRAFT COMPANY (Continued) **1000818474**

Eval Notes:	Business ownership information was verified. Facility has approximately 75 employees. Facility produces corrugated sheets and generates used oil, absorbent and punctured aerosol can waste. As a Small Quantity Generator (SQG) of hazardous waste you must: -label all hazardous waste containers/tanks -keep hazardous waste containers/tanks closed except when in use -maintain hazardous waste manifest/consolidated manifest on site for a minimum of three years -do not store hazardous waste on site greater than 180 days, 365 days for used/ drained oil filters -maintain an EPA ID number -maintain contingency plan Observed one full 5 gallon bucket in sump leading to storm drain. Bucket was removed from sump; no sheen was observed on liquid and pH was tested using test strip pH =6. Mr. Ruiz believes material is water and had employees place material into clarifier. Photographs taken during inspection.

Eval Date:	08-27-2014
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	I was cc d on a letter from DTSC to the business. DTSC is looking at businesses in that area that may be causing groundwater contamination. Letter attached with inspection.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-03-2002
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Arrived on site at approximately 11:20 a.m., warm, clear skies. Sign in front of building identifed the business as Corru-Kraft Co., a division of Sunclipse Inc. Met with Mr. Carlos DeBorja, who granted us permission to conduct the inspection and accompanied us. Reviewed the SWPPP and the 2001-2002 annual report with Mr. DeBorja. They had

CORRU-KRAFT COMPANY (Continued) **1000818474**

reported an unauthorized non-storm water discharge. Instructed them to complete Form 4 and provide Form 1, even if no sample collected (part of the Fiber Box Association - Group Monitoring Plan). Not required to sample during 2001-2002. SWPPP needs to be tailored to site conditions. Asked them to revise the SWPPP and to provide a site map that identifies sampling locations. During the inspection, we observed that they are storing poly-cubes and 55-gallon drums (appeared to be empty) on top of the drainage swale that runs behind the facility, along the eastern property boundary (see photographs). Noted that drainage swale had some trash and sediment debris, as well as evidence of a spill of white material in the swale itself. Forklift storage area equipped with grated trench/sump, but located adjacent to the drainage swale. Pavement of the forklift storage area had some staining (hydrocarbon stains). Outfall of drainage swale leads to small flood control channel and black stains were observed on the concrete of the channel directly below the drainage swale and forklift storage area at this site. Dye tank stored outside, under roof, and bermed, but some dye was observed on the pavement outside the bermed area. Also had a pipe/valve leading from the bermed area to the pavement outside the berm. Another forklift area also located along the northern part of the facility, under a roofed structure. Also had trench/sump and several 55-gallon drums w/o secondary containment. Hydrocarbon staining noted on pavement in this area.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-07-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: A compliance inspection was conducted for this facility on 02/07/01 at 1045. Mr. Carlos Deborja accompanied Regional Board staff through the facility. Review of the SWPPP indicated that it was adequate and detailed all pollutant sources and the BMPs used to prevent pollutant discharge. This facility is involved in a group monitoring program and has already collected samples for this year. There are five discharge locations on this property. The outside area is mostly used for parking. Drums were observed with triple containment. Additionally, all raw materials were stored under cover. No concerns were observed during the inspection.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-11-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a HW inspection. Consent to enter and to inspect was granted by Frank McDonald, Facility Mgr. The following was observed: Proper hazardous waste labeling on all HW drums and containers. Training program and records were available for review. Emergency plan was available for review. Manifests were available for review. No violation was observed.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-29-2017
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Regional Board Staff conducted a compliance inspection of the above facility on November 29, 2017. The SWPPP was reviewed and training records were missing at the time of the inspection. The updated SWPPP as well as the updated Pollution Prevention Team was not available but has been emailed to Regional Board Staff. The SWPPP claims the facility submitted and is participating in representative sampling reduction. A site walk was then conducted. Uncovered 55-gallon drums were observed without secondary containment. An uncovered boneyard was also observed but has since been covered and photographs were emailed to Regional Board Staff.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-19-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Business ownership information was verified. Facility has approximately 75 employees. Facility produces corrugated sheets and generates used oil, absorbent and punctured aerosol can waste. As a Small Quantity Generator (SQG) of hazardous waste you must: -label all hazardous waste containers/tanks -keep hazardous waste containers/tanks closed except when in use -maintain hazardous waste manifest/consolidated manifest on site for a minimum of three years -do not store hazardous waste on site greater than 180 days, 365 days for used/ drained oil filters -maintain an EPA ID number -maintain contingency plan Observed one full 5 gallon bucket in sump leading to storm drain. Bucket was removed from sump; no sheen was observed on liquid and pH was tested using test strip pH =6. Mr. Ruiz believes material is water and had employees place material into clarifier. Photographs taken during inspection.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	I was cc d on a letter from DTSC to the business. DTSC is looking at businesses in that area that may be causing groundwater contamination. Letter attached with inspection.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-03-2002
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Arrived on site at approximately 11:20 a.m., warm, clear skies. Sign in front of building identifed the business as Corru-Kraft Co., a division of Sunclipse Inc. Met with Mr. Carlos DeBorja, who granted us permission to conduct the inspection and accompanied us. Reviewed the SWPPP and the 2001-2002 annual report with Mr. DeBorja. They had reported an unauthorized non-storm water discharge. Instructed them to complete Form 4 and provide Form 1, even if no sample collected (part of the Fiber Box Association - Group Monitoring Plan). Not required to sample during 2001-2002. SWPPP needs to be tailored to site conditions. Asked them to revise the SWPPP and to provide a site map that identifies sampling locations. During the inspection, we observed that they are storing poly-cubes and 55-gallon drums (appeared to be empty) on top of the drainage swale that runs behind the facility, along the eastern property boundary (see photographs). Noted that drainage swale had some trash and sediment debris, as well as evidence of a spill of white material in the swale itself. Forklift storage area equipped with grated trench/sump, but located adjacent to the drainage swale. Pavement of the forklift storage area had some staining (hydrocarbon stains). Outfall of drainage swale leads to small flood control channel and black stains were observed on the concrete of the channel directly below the drainage swale and forklift storage area at this site. Dye tank stored outside, under roof, and bermed, but some dye was observed on the pavement outside the bermed area. Also had a pipe/valve leading from the bermed area to the pavement outside the berm. Another forklift area also located along the northern part of the facility, under a roofed structure. Also had trench/sump and several 55-gallon drums w/o secondary containment. Hydrocarbon staining noted on pavement in this area.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-07-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: A compliance inspection was conducted for this facility on 02/07/01 at 1045. Mr. Carlos Deborja accompanied Regional Board staff through the facility. Review of the SWPPP indicated that it was adequate and detailed all pollutant sources and the BMPs used to prevent pollutant discharge. This facility is involved in a group monitoring program and has already collected samples for this year. There are five discharge

CORRU-KRAFT COMPANY (Continued) **1000818474**

locations on this property. The outside area is mostly used for parking. Drums were observed with triple containment. Additionally, all raw materials were stored under cover. No concerns were observed during the inspection.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-29-2017
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a compliance inspection of the above facility on November 29, 2017. The SWPPP was reviewed and training records were missing at the time of the inspection. The updated SWPPP as well as the updated Pollution Prevention Team was not available but has been emailed to Regional Board Staff. The SWPPP claims the facility submitted and is participating in representative sampling reduction. A site walk was then conducted. Uncovered 55-gallon drums were observed without secondary containment. An uncovered boneyard was also observed but has since been covered and photographs were emailed to Regional Board Staff.
Eval Division: Water Boards
Eval Program: INDSTW

Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-03-2002
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Arrived on site at approximately 11:20 a.m., warm, clear skies. Sign in front of building identifed the business as Corru-Kraft Co., a division of Sunclipse Inc. Met with Mr. Carlos DeBorja, who granted us permission to conduct the inspection and accompanied us. Reviewed the SWPPP and the 2001-2002 annual report with Mr. DeBorja. They had reported an unauthorized non-storm water discharge. Instructed them to complete Form 4 and provide Form 1, even if no sample collected (part of the Fiber Box Association - Group Monitoring Plan). Not required to sample during 2001-2002. SWPPP needs to be tailored to site

CORRU-KRAFT COMPANY (Continued) **1000818474**

conditions. Asked them to revise the SWPPP and to provide a site map that identifies sampling locations. During the inspection, we observed that they are storing poly-cubes and 55-gallon drums (appeared to be empty) on top of the drainage swale that runs behind the facility, along the eastern property boundary (see photographs). Noted that drainage swale had some trash and sediment debris, as well as evidence of a spill of white material in the swale itself. Forklift storage area equipped with grated trench/sump, but located adjacent to the drainage swale. Pavement of the forklift storage area had some staining (hydrocarbon stains). Outfall of drainage swale leads to small flood control channel and black stains were observed on the concrete of the channel directly below the drainage swale and forklift storage area at this site. Dye tank stored outside, under roof, and bermed, but some dye was observed on the pavement outside the bermed area. Also had a pipe/valve leading from the bermed area to the pavement outside the berm. Another forklift area also located along the northern part of the facility, under a roofed structure. Also had trench/sump and several 55-gallon drums w/o secondary containment. Hydrocarbon staining noted on pavement in this area.

RB Case Number:	2080022
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	Arconic (formerly Alcoa) manufactures fastners for the aerospace industry. Investigation of the Site began in 1996 and found metals, petroleum hydrocarbons and VOCs (PCE, TCE, cis-1,2-DCE , 11DCE) in the soil and soil vapor. The primary areas of concern are the former degreaser area and the plating area. Four groundwater monitoring wells were installed at the Site between 2003 and 2005. Groundwater was encounterd at 106 to 108 feet bgs. VOCs PCE and TCE were detected in the groundwater at concentrations as high as 99 ug/L and 41 ug/L respectively . The groundwater flow direction is to the south southwest. A soil vapor extraction (SVE) and treatment pilot test operated between January 2007 to January 2008. The full scale SVE and treatment system was installed and operational May 6, 2009. The SVE

ORANGE COUNTY NORTH BASIN - ARCONIC GLOBAL FASTENERS & RINGS (Continued) **S107504413**

system consists of seven vapor extraction wells and the extracted soil vapors are treated wtih carbon filters. Groundwater is monitored semiannually.

CERS Description: Hazardous Waste Onsite Treatment

Violations:
Site ID: 90708
Site Name: ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date: 05-02-2014
Citation: 22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(c)(10)
Violation Description: Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.
Violation Notes: Returned to compliance on 10/22/2014. FTU-01 is correctly listed as PBR, with 10 tanks, chrome reduction. The unit correctly lists the treatment as #1, chrome reduction but incorrectly lists this as a CESQT unit, #2, aqueous waste with metals, #8, with PH adjustment and #17, recycling. Please update this page.

Violation Date:	06-06-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 06/15/2017. -Facility has several hazardous waste containers in which the waste physical state or hazardous characteristics were not properly labeled on the drum. -All labels were corrected while on-site, no further corrective action necessary.

Citation: 19 CCR 4.5 2735.4(a)(3) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2735.4(a)(3)
Violation Description: Failure to comply with the provisions of this chapter pursuant to the time frames identified in Section 2745.1(b) if a stationary source has a process with more that a threshold quantity of a regulated substance as listed in Tables 1 or 2 and Table 3 of Section 2770.5.
Violation Notes: Returned to compliance on 09/15/2014. The facility had submitted an RMP in 2011. This RMP claimed an OCA with no off site emissions. This OCA was predicated on the belief that the plating wet floor had distinct barriers between the cyanide tank areas (cyanide plating and rinse tanks) and the acid bearing wet floor. The OCA was accepted, and a level 1 assignment accepted with no acid/cyanide mixing in the wet floor. This inspection revealed that the plating floor has only a single wet floor and that any acids and cyanide tanks/rinses would be mixed if a catastrophic release occurred. The facility options are: 1) build discrete secondary containment wet floors that keep the acids and cyanide plating tanks/rinse separate. This will allow the current level 1 status to remain. 2) resubmit an OCA using an acid/cyanide vapor release in order to determine if the site is sill eligible for level 1 status. Please advise this Agency which option it chooses. If the wet floor is changed, a re inspection will be [Truncated]

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 04/08/2015. The facility has (6) poly tanks located in the facility's concrete lined basement. 3 of these tanks (cyanide rinse, general waste rinse and chrome rinse) are exempt from HW tank management because they are part of a waste water treatment system (WWT). The 3 other tanks (cyanide plating, chrome dump and alkaline dump) are poly tanks (~1,000 gallons each) that are located in the basement, not part of the WWT system and are not being monitored (visually or electronically). These 3 tanks are regulated as underground storage tanks (USTs) and should be monitored as USTs (either electronically or visually) in order to meet HW tank management standards. Immediately notify the Fullerton Fire Department (FFD), who has regulatory authority over USTs in the City of Fullerton, and either begin properly monitoring these UST/HW tanks or have them removed.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to discuss the appropriate containment/diversionary structures/equipment within the plan.
Violation Notes:	Returned to compliance on 07/28/2016. The SPCC lists the secondary containment for the "oil filled machinery" as the building. Most of the machines may claim the building as secondary containmnet. However, several of the oil filled machines that are located near the buildings exterior walls appear to drain outside the building. Immediately outside the building, there are two storm drains that have absorbent tubes. This is general containment. These machines need to have "sized secondary containment". You must either 1) verify that these machines near the building perimeter are not regulated under SPCC (ie: the machines have oil reservoirs < 55 gallons 2) verify that the machines will drain into the building and not outside the building 3) verify that the facility perimeter storm drains/piping do not drain to the street but are "weirs/culverts" to the one facility storm drain that is controlled via a closure valve.

Violation Date: 05-02-2014
Citation: 22 CCR 15 66265.177 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.177
Violation Description: Failure to ensure incompatible waste and/or materials are not placed or stored in the same container or nearby or into an unwashed container, which previously contained incompatible waste and/or materials, so that it does not potentially result in the following: 1) Generate extreme heat or pressure, fire or explosion, or violent reaction; 2) Produce uncontrolled toxic mists, fumes, dusts, or gases in sufficient quantities to threaten human health or the environment; 3) Produce uncontrolled flammable fumes or gases in sufficient quantities to pose a risk of fire or explosions; 4) Damage the structural integrity of the device or facility containing the waste; or 5) Through other like means threaten human health or the environment.
Violation Notes: Returned to compliance on 08/28/2014. The HW storage area is kept clean and drums are segregated by hazard category. Except, there was (1) 270 gallon plastic tote labeled "waste cyanide rinses". This tote held waste cyanide bearing rinse water from the wet floor clean up. This tote was stored in the same secondary containment with some nitric acid waste (steel drum). These waste are incompatible and if

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

	mixed would cause an exothermic reaction. Immediately separate these containers and continue ot manage your incompatible wastes in separate secondary containment.

Eval Notes: On site for a follow up inspection to the routine inspection dated 5-2-14. Permission to inspect granted by Alcoa/Goeke and Doh. Discussed the previous violations. Violation # A04 (no RMP) is still outstanding and is due immediately. Per Goeke, the facility has a consultant conducting the OCA computer model for an acid/cyanide release. If this OCA still allows the facility to maintain the level 1 status, they will submit the RMP as is and work on getting the cyanide tanks double contained during the end of year closure. If the OCA model shows an off site consequence (and therefore make the site a level 2 RMP) they will either 1) secondarily contain the tanks immediately or submit a level 2 RMP. This violation is still outstanding and correction is due within 30 days (9-29-14). If not corrected, an administrative action may be started.

Eval Notes:	Alcoa/Barbara had a TP question regarding aerosol can puncturing. My response; Barbara: The short answer is that you can do this ON SITE. You are covered under TP but the treatment tier (level 11b) makes it ?no authorization required? (meaning no TP ?authorization?) is needed if you follow H&SC 25201.16. This section sets some site requirements such as ability to handle a spill, management of residuals etc. You would have to amend your TP forms to include this treatment level (aerosol can puncturing) but only minimal other requirements. Hope that helps.

Eval Notes:	INSPECTOR COMMENTS On-site for routine recycler inspection. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Consent to enter, inspect, and take photographs was given by Barbara Ross. The facility recycles hydraulic oil on site. The oil is removed from the shop machines, subject to vacuum dehydration and filtration prior to being returned to the presses. Tanks are used for storage of the used oil prior to recycling and recycled oil is stored in another tank and returned to the process when oil I needed. There have been no changes to the recycling process. UPC Forms for Recycling Activity dated 02/24/2016 were received today. The facility reports recycling 980 gallons of hydraulic oil over the previous two year reporting period. The recycling activity is authorized by H&SC 25143.2(d).

Eval Notes:	On site for a routine inspection. Permission to inspect was given to me by Barbara Ross, Environmental Engineer. This facility is a CalARP Program Level 1 facility. Program Level 1 chemicals include Sodium Cyanide, Potassium Cyanide and Cadmium Oxide. Storage areas were inspected and chemical volumes were verified. The Risk Management Plan (RMP) was re-validated/updated in August, 2016. The RMP included calculations and release plume modeling that indicated toxic endpoints that do not extend beyond the property line. I was not able to review documentation that response actions have been coordinated with local emergency planning and response agencies (Fullerton Fire). The RMP did not contain the required certification statement found in Title 19, CCR section 2735.5(d)(4). The violations on this report must be corrected immediately.

CERS ID: 10153205
CERS Description: Hazardous Chemical Management

Violations:
Site ID: 90708
Site Name: ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date: 05-02-2014
Citation: 22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(c)(10)
Violation Description: Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.
Violation Notes: Returned to compliance on 10/22/2014. FTU-01 is correctly listed as PBR, with 10 tanks, chrome reduction. The unit correctly lists the treatment as #1, chrome reduction but incorrectly lists this as a CESQT unit, #2, aqueous waste with metals, #8, with PH adjustment and #17, recycling. Please update this page.

Citation:	19 CCR 4.5 2735.4(a)(3) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2735.4(a)(3)
Violation Description:	Failure to comply with the provisions of this chapter pursuant to the time frames identified in Section 2745.1(b) if a stationary source has a process with more that a threshold quantity of a regulated substance as listed in Tables 1 or 2 and Table 3 of Section 2770.5.
Violation Notes:	Returned to compliance on 09/15/2014. The facility had submitted an RMP in 2011. This RMP claimed an OCA with no off site emissions. This OCA was predicated on the belief that the plating wet floor had distinct barriers between the cyanide tank areas (cyanide plating and rinse tanks) and the acid bearing wet floor. The OCA was accepted, and a level 1 assignment accepted with no acid/cyanide mixing in the wet floor. This inspection revealed that the plating floor has only a single wet floor and that any acids and cyanide tanks/rinses would be mixed if a catastrophic release occurred. The facility options are: 1) build discrete secondary containment wet floors that keep the acids and cyanide plating tanks/rinse separate. This will allow the current level 1 status to remain. 2) resubmit an OCA using an acid/cyanide vapor release in order to determine if the site is sill eligible for level 1 status. Please advise this Agency which option it chooses. If the wet floor is changed, a re inspection will be [Truncated]

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 04/08/2015. The facility has (6) poly tanks located in the facility's concrete lined basement. 3 of these tanks

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

(cyanide rinse, general waste rinse and chrome rinse) are exempt from HW tank management because they are part of a waste water treatment system (WWT). The 3 other tanks (cyanide plating, chrome dump and alkaline dump) are poly tanks (~1,000 gallons each) that are located in the basement, not part of the WWT system and are not being monitored (visually or electronically). These 3 tanks are regulated as underground storage tanks (USTs) and should be monitored as USTs (either electronically or visually) in order to meet HW tank management standards. Immediately notify the Fullerton Fire Department (FFD), who has regulatory authority over USTs in the City of Fullerton, and either begin properly monitoring these UST/HW tanks or have them removed.

Violation Date:	05-02-2014
Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes:	Returned to compliance on 10/22/2014. FTU-02 incorrectly lists in section II. basis for not needing a federal permit as (h) empty container rinsing. Please un check this box.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to discuss the appropriate containment/diversionary structures/equipment within the plan.
Violation Notes: Returned to compliance on 07/28/2016. The SPCC lists the secondary containment for the "oil filled machinery" as the building. Most of the machines may claim the building as secondary containmnet. However, several of the oil filled machines that are located near the buildings exterior walls appear to drain outside the building. Immediately outside the building, there are two storm drains that have absorbent tubes. This is general containment. These machines need to have "sized secondary containment". You must either 1) verify that these machines near the building perimeter are not regulated under SPCC (ie: the machines have oil reservoirs < 55 gallons 2) verify that the machines will drain into the building and not outside the building 3) verify that the facility perimeter storm drains/piping do not drain to the street but are "weirs/culverts" to the one facility storm drain that is controlled via a closure valve.

Citation:	22 CCR 15 66265.177 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.177
Violation Description:	Failure to ensure incompatible waste and/or materials are not placed or stored in the same container or nearby or into an unwashed container, which previously contained incompatible waste and/or materials, so that it does not potentially result in the following: 1) Generate extreme heat or pressure, fire or explosion, or violent reaction; 2) Produce uncontrolled toxic mists, fumes, dusts, or gases in sufficient quantities to threaten human health or the environment; 3) Produce uncontrolled flammable fumes or gases in sufficient quantities to pose a risk of fire or explosions; 4) Damage the structural integrity of the device or facility containing the waste; or 5) Through other like means threaten human health or the environment.
Violation Notes:	Returned to compliance on 08/28/2014. The HW storage area is kept clean and drums are segregated by hazard category. Except, there was (1) 270 gallon plastic tote labeled "waste cyanide rinses". This tote held waste cyanide bearing rinse water from the wet floor clean up. This tote was stored in the same secondary containment with some nitric acid waste (steel drum). These waste are incompatible and if mixed would cause an exothermic reaction. Immediately separate these containers and continue ot manage your incompatible wastes in separate secondary containment.

Site ID: 90708
Site Name: ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date: 05-02-2014
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52

Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 10/22/2014. FTU-01 incorrectly lists in section II. basis for not needing a federal permit as (h) empty container rinsing. Please un check this box.

Eval Notes:	On site follow up inspection to discuss the 3 below grade HW storage tanks with FFD and Doh, Banajai, Yontz/Alcoa. It was decided by Alcoa that they will change the 3 current basement, storage tanks into a flow through system. Each of the tanks will be placed into a secondary tank and installed with automatic pumps which will transfer any liquids out of the tank and into a new AST. This will make the basement tanks exempt from UST regulations. Alcoa needed 180 days in order to complete the change. Have this project completed on/before 12-29-14 in order to abate this violation.

Eval Notes:	On site for a follow up inspection to the routine inspection dated 5-2-14. Permission to inspect granted by Alcoa/Goeke and Doh. Discussed the previous violations. Violation # A04 (no RMP) is still outstanding and is due immediately. Per Goeke, the facility has a consultant conducting the OCA computer model for an acid/cyanide release. If this OCA still allows the facility to maintain the level 1 status, they will submit the RMP as is and work on getting the cyanide tanks double contained during the end of year closure. If the OCA model shows an off site consequence (and therefore make the site a level 2 RMP) they will either 1) secondarily contain the tanks immediately or submit a level 2 RMP. This violation is still outstanding and correction is due within 30 days (9-29-14). If not corrected, an administrative action may be started.

Eval Notes:	Alcoa/Barbara had a TP question regarding aerosol can puncturing. My response; Barbara: The short answer is that you can do this ON SITE. You are covered under TP but the treatment tier (level 11b) makes it ?no authorization required? (meaning no TP ?authorization?) is needed if you follow H&SC 25201.16. This section sets some site requirements such as ability to handle a spill, management of residuals etc. You would have to amend your TP forms to include this treatment level (aerosol can puncturing) but only minimal other requirements. Hope that helps.

Eval Notes:	On site for the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Alcoa/Banajai and Doh. Reviewed the current CAL ARP Risk Management Plan (RMP). Prepared on 4-2011. This is a level 1 facility. The regulated chemicals are sodium cyanide, potassium cyanide and cadmium oxide in the plating tanks. The same chemicals in raw product form are exempt due to the particle size. The RMP needs to be reevaluated before 4-2016 (every 5 years). Executive Summary: OK. Accident history: No releases of regulated chemicals in the last 5 years. Confirmed with FFD. The facility has coordinated with the FFD every year to offer training. The training has been declined by FFD. Worst case release scenario: The OCA shows no TE past the facility walls (level 1). The facility has a single wet floor that could mix acids and cyanides. See violations. Certification statement: OK. Uses California verbiage. [Truncated]

Eval Notes:	INSPECTOR COMMENTS On-site for routine recycler inspection. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Consent to enter, inspect, and take photographs was given by Barbara Ross. The facility recycles hydraulic oil on site. The oil is removed from the shop machines, subject to vacuum dehydration and filtration prior to being returned to the presses. Tanks are used for storage of the used oil prior to recycling and recycled oil is stored in another tank and returned to the process when oil I needed. There have been no changes to the recycling process. UPC Forms for Recycling Activity dated 02/24/2016 were received today. The facility reports recycling 980 gallons of hydraulic oil over the previous two year reporting period. The recycling activity is authorized by H&SC 25143.2(d).

Eval Notes:	On site for a routine inspection. Permission to inspect was given to me by Barbara Ross, Environmental Engineer. This facility is a CalARP Program Level 1 facility. Program Level 1 chemicals include Sodium Cyanide, Potassium Cyanide and Cadmium Oxide. Storage areas were inspected and chemical volumes were verified. The Risk Management Plan (RMP) was re-validated/updated in August, 2016. The RMP included calculations and release plume modeling that indicated toxic endpoints that do not extend beyond the property line. I was not able to review documentation that response actions have been coordinated with local emergency planning and response agencies (Fullerton Fire). The RMP did not contain the required certification statement found in Title 19, CCR section 2735.5(d)(4). The violations on this report must be corrected immediately.

Eval Notes:	On site to conduct the follow up inspection to the original CAL ARP inspection of 5-2-14. Permission to inspect granted by Alcoa/Doh. The 5-2-14 inspection listed the facility as not having a correct RMP (needed an OCA). This Agency received the updated RMP on 9-25-14. Violation was abated. On this date, met with Alcoa and evaluated the new RMP. RMP: OK, submitted 9-2014. The next re validation id due on 9-2019. Executive summary: OK. Facility has KCN, NaCN and CdOx in numerous plating tanks. The new "product" form of all these chemicals are not CAL ARP regulated due to being in brick form (not powder). The HNO3 is not regulated (below concentration levels). Worst case off site consequence analysis (OCA): KCN (plating line, 921 lbs, single largest container = 260 lbs. NaCN (plating line), 1,478 lbs, single

Eval Type:	Other, not routine, done by local agency
Eval Notes:	On site to conduct the follow up inspection to the original Hazardous Waste (HW) inspection of 5-2-14. Permission to inspect granted by Alcoa/Doh. All the violations listed on the 5-2-14 inspection have been abated except for violation # W022 (now listed as violation # 52I545), failure to monitor HW tank systems. Alcoa is in the process of converting the 3 HW tanks (cyanide, chrome and alkaline tanks) from storage tanks to flow through systems, thereby making them exempt from underground storage tank (UST) and HW tank management requirements. These tanks need to be converted to flow through or properly monitored and permitted as USTs on/before 1-1-2015 or administrative enforcement action may be taken.

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

Site ID: 90708
CERS ID: 10153205
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 90708
Site Name: ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date: 05-02-2014
Citation: 22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(c)(10)
Violation Description: Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.
Violation Notes: Returned to compliance on 10/22/2014. FTU-01 is correctly listed as PBR, with 10 tanks, chrome reduction. The unit correctly lists the treatment as #1, chrome reduction but incorrectly lists this as a CESQT unit, #2, aqueous waste with metals, #8, with PH adjustment and #17, recycling. Please update this page.

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

Chapter 4.5, Section(s) 2735.4(a)(3)

Violation Description: Failure to comply with the provisions of this chapter pursuant to the time frames identified in Section 2745.1(b) if a stationary source has a process with more that a threshold quantity of a regulated substance as listed in Tables 1 or 2 and Table 3 of Section 2770.5.

Violation Notes: Returned to compliance on 09/15/2014. The facility had submitted an RMP in 2011. This RMP claimed an OCA with no off site emissions. This OCA was predicated on the belief that the plating wet floor had distinct barriers between the cyanide tank areas (cyanide plating and rinse tanks) and the acid bearing wet floor. The OCA was accepted, and a level 1 assignment accepted with no acid/cyanide mixing in the wet floor. This inspection revealed that the plating floor has only a single wet floor and that any acids and cyanide tanks/rinses would be mixed if a catastrophic release occurred. The facility options are: 1) build discrete secondary containment wet floors that keep the acids and cyanide plating tanks/rinse separate. This will allow the current level 1 status to remain. 2) resubmit an OCA using an acid/cyanide vapor release in order to determine if the site is sill eligible for level 1 status. Please advise this Agency which option it chooses. If the wet floor is changed, a re inspection will be [Truncated]

Violation Description:	Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 04/08/2015. The facility has (6) poly tanks located in the facility's concrete lined basement. 3 of these tanks (cyanide rinse, general waste rinse and chrome rinse) are exempt from HW tank management because they are part of a waste water treatment system (WWT). The 3 other tanks (cyanide plating, chrome dump and alkaline dump) are poly tanks (~1,000 gallons each) that are located in the basement, not part of the WWT system and are not being monitored (visually or electronically). These 3 tanks are regulated as underground storage tanks (USTs) and should be monitored as USTs (either electronically or visually) in order to meet HW tank management standards. Immediately notify the Fullerton Fire Department (FFD), who has regulatory authority over USTs in the City of Fullerton, and either begin properly monitoring these UST/HW tanks or have them removed.

Violation Description:	Failure to provide and maintain adequate secondary containment.
Violation Notes:	Returned to compliance on 07/14/2016. The three (3) oil aboveground storage tanks (ASTs) in the rear, oil handling area (east property line) all appear to have the drain/delivery piping that is outside the bermed, secondary containment wall. All ASTs are required to have the tank (up to the first valve in the piping) located within the secondary containment. Either 1) move the ASTs back into the bermed area where the valve/piping is within the berm 2) change the valve locations to inside the bermed area or 3) when the new ASTs replace these old ASTs, make sure the tanks and valves are within the bermed area.

Violation Date:	05-02-2014
Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

Violation Notes:	Returned to compliance on 10/22/2014. Unit # CA-01 lists the oil/water separator as CE with treatment #s, #8, PH adjust of acids, and oil/water sludges as treatment. these are incorrect and should not be checked. Treatment # 10a should be checked.

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

Violation Description:	Failure to discuss the appropriate containment/diversionary structures/equipment within the plan.
Violation Notes:	Returned to compliance on 07/28/2016. The SPCC lists the secondary containment for the "oil filled machinery" as the building. Most of the machines may claim the building as secondary containmnet. However, several of the oil filled machines that are located near the buildings exterior walls appear to drain outside the building. Immediately outside the building, there are two storm drains that have absorbent tubes. This is general containment. These machines need to have "sized secondary containment". You must either 1) verify that these machines near the building perimeter are not regulated under SPCC (ie: the machines have oil reservoirs < 55 gallons 2) verify that the machines will drain into the building and not outside the building 3) verify that the facility perimeter storm drains/piping do not drain to the street but are "weirs/culverts" to the one facility storm drain that is controlled via a closure valve.

Eval Type: Other, not routine, done by local agency
Eval Notes: On site follow up inspection to discuss the 3 below grade HW storage tanks with FFD and Doh, Banajai, Yontz/Alcoa. It was decided by Alcoa that they will change the 3 current basement, storage tanks into a flow through system. Each of the tanks will be placed into a secondary tank and installed with automatic pumps which will transfer any liquids out of the tank and into a new AST. This will make the basement tanks exempt from UST regulations. Alcoa needed 180 days in order to complete the change. Have this project completed on/before 12-29-14 in order to abate this violation.

Eval Notes:	On site for a follow up inspection to the routine inspection dated 5-2-14. Permission to inspect granted by Alcoa/Goeke and Doh. Discussed the previous violations. Violation # A04 (no RMP) is still outstanding and is due immediately. Per Goeke, the facility has a consultant conducting the OCA computer model for an acid/cyanide release. If this OCA still allows the facility to maintain the level 1 status, they will submit the RMP as is and work on getting the cyanide tanks double contained during the end of year closure. If the OCA model shows an off site consequence (and therefore make the site a level 2 RMP) they will either 1) secondarily contain the tanks immediately or submit a level 2 RMP. This violation is still outstanding and correction is due within 30 days (9-29-14). If not corrected, an administrative action may be started.

Eval Notes:	Alcoa/Barbara had a TP question regarding aerosol can puncturing. My response; Barbara: The short answer is that you can do this ON SITE. You are covered under TP but the treatment tier (level 11b) makes it ?no authorization required? (meaning no TP ?authorization?) is needed if you follow H&SC 25201.16. This section sets some site requirements such as ability to handle a spill, management of residuals etc. You would have to amend your TP forms to include this treatment level (aerosol can puncturing) but only minimal other requirements. Hope that helps.

Eval Notes: On site for the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Alcoa/Banajai and Doh. Reviewed the current CAL ARP Risk Management Plan (RMP). Prepared on 4-2011. This is a level 1 facility. The regulated chemicals are sodium cyanide, potassium cyanide and cadmium oxide in the plating tanks. The same chemicals in raw product form are exempt due to the particle size. The RMP needs to be reevaluated before 4-2016 (every 5 years). Executive Summary: OK. Accident history: No releases of regulated chemicals in the last 5 years. Confirmed with FFD. The facility has coordinated with the FFD every year to offer training. The training has been declined by FFD. Worst case release scenario: The OCA shows no TE past the facility walls (level 1). The facility has a single wet floor that could mix acids and cyanides. See violations. Certification statement: OK. Uses California verbiage. [Truncated]

Eval Notes: INSPECTOR COMMENTS On-site for a routine RCRA Large Quantity Hazardous Waste inspection. Consent to enter, inspect, and take photographs was given by Barbara Ross. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Facility is a RCRA large quantity generator and they use satellite storage throughout the facility. The 90 day hazardous waste storage area had adequate aisle space and is secondarily contained. Facility has three plating areas which have secondary containment, the secondary containment below most of the plating area, see photos, has hazardous waste which had leaked or been spilled out of the tanks in the plating line. There is a lot of crystal build up under the tank area in the wet process floors and some liquid. Discussed the management of wet process floors with Daniel, Alonso, and Barbara.

Eval Notes: On site for a routine inspection. Permission to inspect was given to me by Barbara Ross, Environmental Engineer. This facility is a CalARP Program Level 1 facility. Program Level 1 chemicals include Sodium Cyanide, Potassium Cyanide and Cadmium Oxide. Storage areas were inspected and chemical volumes were verified. The Risk Management Plan (RMP) was re-validated/updated in August, 2016. The RMP included calculations and release plume modeling that indicated toxic endpoints that do not extend beyond the property line. I was not able to review documentation that response actions have been coordinated with local emergency planning and response agencies (Fullerton Fire). The RMP did not contain the required certification statement found in Title 19, CCR section 2735.5(d)(4). The violations on this report must be corrected immediately.

Eval Notes:	Received the following information regarding the violations listed on the 4-28-16 SPCC inspection: 1) PE has signed off on the "technical amendments" to AST OFP and secondary containment. Abate violation # I172. 2) The 3 oil ASTs are now located completely within secondary containment. (Violation abated 7-14-16). 3) The doors on the north side of the building now have proper secondary containment. Abate violation # I265. All listed violations have now been corrected. No outstanding violations.

Eval Notes:	On site to conduct the follow up inspection to the original CAL ARP inspection of 5-2-14. Permission to inspect granted by Alcoa/Doh. The 5-2-14 inspection listed the facility as not having a correct RMP (needed an OCA). This Agency received the updated RMP on 9-25-14. Violation was abated. On this date, met with Alcoa and evaluated the new RMP. RMP: OK, submitted 9-2014. The next re validation id due on 9-2019. Executive summary: OK. Facility has KCN, NaCN and CdOx in numerous plating tanks. The new "product" form of all these chemicals are not CAL ARP regulated due to being in brick form (not powder). The HNO3 is not regulated (below concentration levels). Worst case off site consequence analysis (OCA): KCN (plating line, 921 lbs, single largest container = 260 lbs. NaCN (plating line), 1,478 lbs, single largest container = 448 lbs. CdOx (plating line), 100 lbs, single largest container = 63 lbs. Also modeled an HCN cloud (due to possibility of no [Truncated]

CERS ID:	10153205
CERS Description:	RCRA LQ HW Generator

Violations:

Site ID:	90708
Site Name:	ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date:	05-02-2014
Citation:	22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(c)(10)
Violation Description:	Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

	FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.
Violation Notes:	Returned to compliance on 10/22/2014. FTU-01 is correctly listed as PBR, with 10 tanks, chrome reduction. The unit correctly lists the treatment as #1, chrome reduction but incorrectly lists this as a CESQT unit, #2, aqueous waste with metals, #8, with PH adjustment and #17, recycling. Please update this page.

Violation Program:	PBR
Violation Source:	CERS
Site ID:	90708
Site Name:	ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date:	05-02-2014
Citation:	19 CCR 4.5 2735.4(a)(3) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2735.4(a)(3)
Violation Description:	Failure to comply with the provisions of this chapter pursuant to the time frames identified in Section 2745.1(b) if a stationary source has a process with more that a threshold quantity of a regulated substance as listed in Tables 1 or 2 and Table 3 of Section 2770.5.
Violation Notes:	Returned to compliance on 09/15/2014. The facility had submitted an RMP in 2011. This RMP claimed an OCA with no off site emissions. This OCA was predicated on the belief that the plating wet floor had distinct barriers between the cyanide tank areas (cyanide plating and rinse tanks) and the acid bearing wet floor. The OCA was accepted, and a level 1 assignment accepted with no acid/cyanide mixing in the wet floor. This inspection revealed that the plating floor has only a single wet floor and that any acids and cyanide tanks/rinses would be mixed if a catastrophic release occurred. The facility options are: 1) build discrete secondary containment wet floors that keep the acids and cyanide plating tanks/rinse separate. This will allow the current

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

level 1 status to remain. 2) resubmit an OCA using an acid/cyanide vapor release in order to determine if the site is sill eligible for level 1 status. Please advise this Agency which option it chooses. If the wet floor is changed, a re inspection will be [Truncated]

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 04/08/2015. The facility has (6) poly tanks located in the facility's concrete lined basement. 3 of these tanks (cyanide rinse, general waste rinse and chrome rinse) are exempt from HW tank management because they are part of a waste water treatment system (WWT). The 3 other tanks (cyanide plating, chrome dump and alkaline dump) are poly tanks (~1,000 gallons each) that are located in the basement, not part of the WWT system and are not being monitored (visually or electronically). These 3 tanks are regulated as underground storage tanks (USTs) and should be monitored as USTs (either electronically or visually) in order to meet HW tank management standards. Immediately notify the Fullerton Fire Department (FFD), who has regulatory authority over USTs in the City of Fullerton, and either begin properly monitoring these UST/HW tanks or have them removed.

Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 08/28/2014. The CA/PBR units/tanks were last certified by a PE on 3-2009. This certification is requited every 5 years and was due on 3-2014. Have this PE certification completed immediately and submit to this Agency for review.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to discuss the appropriate containment/diversionary structures/equipment within the plan.
Violation Notes: Returned to compliance on 07/28/2016. The SPCC lists the secondary containment for the "oil filled machinery" as the building. Most of the machines may claim the building as secondary containmnet. However, several of the oil filled machines that are located near the buildings exterior walls appear to drain outside the building. Immediately outside the building, there are two storm drains that have absorbent tubes. This is general containment. These machines need to have "sized secondary containment". You must either 1) verify that these machines near the building perimeter are not regulated under SPCC (ie: the machines have oil reservoirs < 55 gallons 2) verify that the machines will drain into the building and not outside the building 3) verify that the facility perimeter storm drains/piping do not drain to the street but are "weirs/culverts" to the one facility storm drain that is controlled via a closure valve.

Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 10/22/2014. FTU-01 incorrectly lists in section II. basis for not needing a federal permit as (h) empty container rinsing. Please un check this box.

Site Name: ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date: 03-26-2019
Citation: HSC 6.67 25270.6(a)(1), 25270.6(a)(2) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.6(a)(1), 25270.6(a)(2)
Violation Description: Failure to submit a tank facility statement on or before January 1 annually unless a current Business Plan has been submitted.
Violation Notes: Any facility storing over 1,320 gallons of petroleum product must submit the Tank Facility Statement Form annually by January 1st. Tank Facility Statement Form was last submitted on 07/26/2016. Submit form to the California Environmental Reporting System (CERS); alternatively you may use your hazardous materials inventory to meet this requirement. If you choose to use your inventory this must be indicated in CERS.

Eval Notes:	On site follow up inspection to discuss the 3 below grade HW storage tanks with FFD and Doh, Banajai, Yontz/Alcoa. It was decided by Alcoa that they will change the 3 current basement, storage tanks into a flow through system. Each of the tanks will be placed into a secondary tank and installed with automatic pumps which will transfer any liquids out of the tank and into a new AST. This will make the basement tanks exempt from UST regulations. Alcoa needed 180 days in order to complete the change. Have this project completed on/before 12-29-14 in order to abate this violation.

Eval Notes:	On site for a follow up inspection to the routine inspection dated 5-2-14. Permission to inspect granted by Alcoa/Goeke and Doh. Discussed the previous violations. Violation # A04 (no RMP) is still outstanding and is due immediately. Per Goeke, the facility has a consultant conducting the OCA computer model for an acid/cyanide release. If this OCA still allows the facility to maintain the level 1 status, they will submit the RMP as is and work on getting the cyanide tanks double contained during the end of year closure. If the OCA model shows an off site consequence (and therefore make the site a level 2 RMP) they will either 1) secondarily contain the tanks immediately or submit a level 2 RMP. This violation is still outstanding and correction is due within 30 days (9-29-14). If not corrected, an administrative action may be started.

Eval Notes:	Alcoa/Barbara had a TP question regarding aerosol can puncturing. My response; Barbara: The short answer is that you can do this ON SITE.

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

	You are covered under TP but the treatment tier (level 11b) makes it ?no authorization required? (meaning no TP ?authorization?) is needed if you follow H&SC 25201.16. This section sets some site requirements such as ability to handle a spill, management of residuals etc. You would have to amend your TP forms to include this treatment level (aerosol can puncturing) but only minimal other requirements. Hope that helps.

Eval Notes:	On site for the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Alcoa/Banajai and Doh. Reviewed the current CAL ARP Risk Management Plan (RMP). Prepared on 4-2011. This is a level 1 facility. The regulated chemicals are sodium cyanide, potassium cyanide and cadmium oxide in the plating tanks. The same chemicals in raw product form are exempt due to the particle size. The RMP needs to be reevaluated before 4-2016 (every 5 years). Executive Summary: OK. Accident history: No releases of regulated chemicals in the last 5 years. Confirmed with FFD. The facility has coordinated with the FFD every year to offer training. The training has been declined by FFD. Worst case release scenario: The OCA shows no TE past the facility walls (level 1). The facility has a single wet floor that could mix acids and cyanides. See violations. Certification statement: OK. Uses California verbiage. [Truncated]

necessary photos was given by Barbara Ross, EHS manager. Terry Carrier of OCHCA was also present. Facility is treating their oily water waste. No changes have been made to the system since the last inspection. No releases have been made within the last three years. Waste analysis plan, waste analysis records, operating procedures, treatment log, sewer agency discharge records, and closure plan were available and reviewed. PE certification for the entire treatment system was available and reviewed. The seismic calculations were missing from the PE certification.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On-site to conduct a routine Permit By Rule (PBR) inspection. Consent to enter and inspect and take any necessary photos was given by Barbara Ross, EHS manager. Terry Carrier of OCHCA was also present. Facility is treating their cyanide plating waste and puncturing MAPP gas cylinders. No changes have been made to the system since the last inspection. No releases have been made within the last three years. All tanks are properly labeled with the owner/operator information, EPA ID#, and serial #. Inspection logs were available and reviewed. Waste analysis plan, waste analysis records, sewer agency discharge records, and closure plan were available and reviewed. PE certification for the entire treatment system was available and reviewed. The seismic calculations were missing from the PE certification.

Eval Notes: INSPECTOR COMMENTS On-site for routine recycler inspection. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Consent to enter, inspect, and take photographs was given by Barbara Ross. The facility recycles hydraulic oil on site. The oil is removed from the shop machines, subject to vacuum dehydration and filtration prior to being returned to the presses. Tanks are used for storage of the used oil prior to recycling and recycled oil is stored in another tank and returned to the process when oil I needed. There have been no changes to the recycling process. UPC Forms for Recycling Activity dated 02/24/2016 were received today. The facility reports recycling 980 gallons of hydraulic oil over the previous two year reporting period. The recycling activity is authorized by H&SC 25143.2(d).

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for a routine inspection. Permission to inspect was given to me by Barbara Ross, Environmental Engineer. This facility is a CalARP Program Level 1 facility. Program Level 1 chemicals include Sodium Cyanide, Potassium Cyanide and Cadmium Oxide. Storage areas were inspected and chemical volumes were verified. The Risk Management Plan (RMP) was re-validated/updated in August, 2016. The RMP included calculations and release plume modeling that indicated toxic endpoints that do not extend beyond the property line. I was not able to review documentation that response actions have been coordinated with local emergency planning and response agencies (Fullerton Fire). The RMP did not contain the required certification statement found in Title 19, CCR section 2735.5(d)(4). The violations on this report must be corrected immediately.

Violation Program:	PBR
Violation Source:	CERS

Site ID:	90708
Site Name:	ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date:	05-02-2014
Citation:	19 CCR 4.5 2735.4(a)(3) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2735.4(a)(3)
Violation Description:	Failure to comply with the provisions of this chapter pursuant to the time frames identified in Section 2745.1(b) if a stationary source has a process with more that a threshold quantity of a regulated substance as listed in Tables 1 or 2 and Table 3 of Section 2770.5.
Violation Notes:	Returned to compliance on 09/15/2014. The facility had submitted an RMP in 2011. This RMP claimed an OCA with no off site emissions. This OCA was predicated on the belief that the plating wet floor had distinct barriers between the cyanide tank areas (cyanide plating and rinse tanks) and the acid bearing wet floor. The OCA was accepted, and a level 1 assignment accepted with no acid/cyanide mixing in the wet floor. This inspection revealed that the plating floor has only a single wet floor and that any acids and cyanide tanks/rinses would be mixed if a catastrophic release occurred. The facility options are: 1) build discrete secondary containment wet floors that keep the acids and cyanide plating tanks/rinse separate. This will allow the current level 1 status to remain. 2) resubmit an OCA using an acid/cyanide vapor release in order to determine if the site is sill eligible for level 1 status. Please advise this Agency which option it chooses. If the wet floor is changed, a re inspection will be [Truncated]

Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes: Returned to compliance on 10/22/2014. Unit # CA-01 lists 9 tanks. in fact there are only 3 tanks. Please update tis information.

Violation Description:	Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 04/08/2015. The facility has (6) poly tanks located in the facility's concrete lined basement. 3 of these tanks (cyanide rinse, general waste rinse and chrome rinse) are exempt from HW tank management because they are part of a waste water treatment system (WWT). The 3 other tanks (cyanide plating, chrome dump and alkaline dump) are poly tanks (~1,000 gallons each) that are located in the basement, not part of the WWT system and are not being monitored (visually or electronically). These 3 tanks are regulated as underground storage tanks (USTs) and should be monitored as USTs (either electronically or visually) in order to meet HW tank management standards. Immediately notify the Fullerton Fire Department (FFD), who has regulatory authority over USTs in the City of Fullerton, and either begin properly monitoring these UST/HW tanks or have them removed.

Violation Description:	Failure to discuss the appropriate containment/diversionary structures/equipment within the plan.
Violation Notes:	Returned to compliance on 07/28/2016. The SPCC lists the secondary containment for the "oil filled machinery" as the building. Most of the machines may claim the building as secondary containmnet. However, several of the oil filled machines that are located near the buildings exterior walls appear to drain outside the building. Immediately outside the building, there are two storm drains that have absorbent tubes. This is general containment. These machines need to have "sized secondary containment". You must either 1) verify that these machines near the building perimeter are not regulated under SPCC (ie: the machines have oil reservoirs < 55 gallons 2) verify that the machines will drain into the building and not outside the building 3) verify that the facility perimeter storm drains/piping do not drain to the street but are "weirs/culverts" to the one facility storm drain that is controlled via a closure valve.

Violation Date:	06-06-2017
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 06/15/2017. -Facility had several 55 gallon drums of hazardous waste that were open with a funnel in the bung of the drum while not actively adding or removing waste. -Facility removed the funnels while on-site, no further corrective action necessary.

Site Name: ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date: 05-02-2014
Citation: 22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(c)(10)
Violation Description: Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.
Violation Notes: Returned to compliance on 10/22/2014. The on site hazardous waste Treatment Notification page listed the facility having 2 CA units and 1 CE unit. In fact it has 2 PBR units and 1 either CA or PBR unit depending on the waste analysis. The current form lists the CA-01 unit (oil water separator) as a CA unit. In fact it is a PBR unit. Please update this form to reflect the proper information/tier.

Violation Date: 05-02-2014
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.

Violation Notes: Returned to compliance on 10/22/2014. FTU-01 incorrectly lists in section II. basis for not needing a federal permit as (h) empty container rinsing. Please un check this box.

Eval Notes:	On site follow up inspection to discuss the 3 below grade HW storage tanks with FFD and Doh, Banajai, Yontz/Alcoa. It was decided by Alcoa that they will change the 3 current basement, storage tanks into a flow through system. Each of the tanks will be placed into a secondary tank and installed with automatic pumps which will transfer any liquids out of the tank and into a new AST. This will make the basement tanks exempt from UST regulations. Alcoa needed 180 days in order to complete the change. Have this project completed on/before 12-29-14 in order to abate this violation.

Eval Notes:	On site for a follow up inspection to the routine inspection dated 5-2-14. Permission to inspect granted by Alcoa/Goeke and Doh. Discussed the previous violations. Violation # A04 (no RMP) is still

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

outstanding and is due immediately. Per Goeke, the facility has a consultant conducting the OCA computer model for an acid/cyanide release. If this OCA still allows the facility to maintain the level 1 status, they will submit the RMP as is and work on getting the cyanide tanks double contained during the end of year closure. If the OCA model shows an off site consequence (and therefore make the site a level 2 RMP) they will either 1) secondarily contain the tanks immediately or submit a level 2 RMP. This violation is still outstanding and correction is due within 30 days (9-29-14). If not corrected, an administrative action may be started.

Eval Notes: Alcoa/Barbara had a TP question regarding aerosol can puncturing. My response; Barbara: The short answer is that you can do this ON SITE. You are covered under TP but the treatment tier (level 11b) makes it ?no authorization required? (meaning no TP ?authorization?) is needed if you follow H&SC 25201.16. This section sets some site requirements such as ability to handle a spill, management of residuals etc. You would have to amend your TP forms to include this treatment level (aerosol can puncturing) but only minimal other requirements. Hope that helps.

inspection by Susan Berg of Orange County Environmental Health (OCEH). Facility performs the following treatment under the Permit By Rule (PBR) tier: -cyanide destruction -chrome reduction and treatment of metals Observed exterior of treatment units to be labeled with owner name, EPA ID number and treatment unit number. The following documentation was available and reviewed: -Sewer agency discharge records -SB 14 -Inspection schedule and log -Waste Analysis Plan -Closure Plan -Training records for cyanide handling Facility has submitted annual notification forms through the California Environmental System (CERS). Hazardous waste tanks and secondary containment were last certified in 2016 by a Professional Engineer (PE). Hazardous waste tanks and secondary containment must be certified by a PE every 5 years.

Eval Division: Orange County Environmental Health
Eval Program: PBR
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-26-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Accompanied on inspection by Susan Berg of Orange County Environmental Health. Source Reduction (SB 14) is due by 09/01/2019. Hazardous waste tank and secondary containment was last certified by a Professional Engineer (PE) in 2016; plan previously reviewed by this agency. Have hazardous waste tanks and secondary containment certified by a PE every 5 years. Photographs taken during inspection.

Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-08-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for the annual RCRA large quantity generator (LQG) inspection. Permission to inspect granted by Alcoa/Doh/Ross and consultant Katherine Winsor/Envirosolve. This is a machine shop, plating business. Federal EPA ID #. Biennial report and SB-14 reviewed on the last inspection. All HW drums/containers/tanks are properly labeled, under a 90 days haul away cycle and in secondarily contained HW storage areas. 2 HW storage areas, 1 for cyanide waste the 1 for all other HWs. Facility has a written training program. Annual training. Facility has a written contingency plan. Facility has weekly HW storage inspection logs. Manifests show a 90 day haul away cycle. (HWTS review completed). The 3 HW storage tanks that were previously below grade are now above grade. Abate violation # W022 from the 5-2-14 inspection. Discussed the future use of the new HW storage tanks, that are not currently being used. They need secondary containment, PE certification [Truncated]

Eval Type:	Routine done by local agency
Eval Notes:	On site for the annual Hazardous Waste (HW) inspection. Permission to inspect granted by Aloca/Banaji and Doh. This is a RCRA Large Quantity Generator (LQG). The facility disposes of its HW every 90 days or more often. The last 3 years of manifests and land disposal restriction paperwork was reviewed. All manifests matched the California manifest tracking system database. OK. The facility has a federal EPA ID # (CAD00828983). OK. The biennial report was on site. Submitted 12-2013. Reviewed and OK. Formal, written employee training plan was reviewed. OK. Written employee training records were on site and reviewed. OK. SB-14 (waste minimization) report was on site and reviewed. OK. All HWs were being stored within the 90 day allowable time frame. OK. All HW tanks and containers were stored closed. OK. All HW tanks/containers were properly labeled with the beginning accumulation date, except 1 drum, see violations. Written contingency plan [Truncated]

Eval Notes:	On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Permission to inspect granted by Alcoa/Ross. The facility has approximately 20,000 gallons of regulated petroleum on site. The Full SPCC was on site and available for review. It had the 5-year update on 1-21-13. The SPCC is due for the next 5-year update on/before 1-21-18. The SPCC was PE certified and has had several non-technical and technical amendments over the last 3 years. Amendment pages were listed and completed properly. No oil spills in the last 5 years. The regulated oils are; (3) 1,000 gallon ASTs, (new oil, used oil and recyclable oil), OFP= visual, bermed secondary containment. See violations. numerous oil 55 gallon drums and totes, throughout the building, building is secondary containment, visual OFP. numerous oil filled machines, oil in use, throughout the building, building is secondary containment, visual OFP. numerous drums/totes of oils, [Truncated]

Eval Type:	Routine done by local agency
Eval Notes:	On site for the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Alcoa/Banajai and Doh. Reviewed the current CAL ARP Risk Management Plan (RMP). Prepared on 4-2011. This is a level 1 facility. The regulated chemicals are sodium cyanide, potassium cyanide and cadmium oxide in the plating tanks. The same chemicals in raw product form are exempt due to the particle size. The RMP needs to be reevaluated before 4-2016 (every 5 years). Executive Summary: OK. Accident history: No releases of regulated chemicals in the last 5 years. Confirmed with FFD. The facility has coordinated with the FFD every year to offer training. The training has been declined by FFD. Worst case release scenario: The OCA shows no TE past the facility walls (level 1). The facility has a single wet floor that could mix acids and cyanides. See violations. Certification statement: OK. Uses California verbiage. [Truncated]

Eval Notes:	INSPECTOR COMMENTS On-site for a routine RCRA Large Quantity Hazardous Waste inspection. Consent to enter, inspect, and take photographs was given by Barbara Ross. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Facility is a RCRA large quantity generator and they use satellite storage throughout the facility. The 90 day hazardous waste storage area had adequate aisle space and is secondarily contained. Facility has three plating areas which have secondary containment, the secondary containment below most of the plating area, see photos, has hazardous waste which had leaked or been spilled out of the tanks in the plating line. There is a lot of crystal build up under the tank area in the wet process floors and some liquid. Discussed the management of wet process floors with Daniel, Alonso, and Barbara. Facility does some sand blasting and they have been having their sand blasting waste hauled as [Truncated]

Eval Notes:	INSPECTOR COMMENTS On-site for routine recycler inspection. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Consent to enter, inspect, and take photographs was given by Barbara Ross. The facility recycles hydraulic oil on site. The oil is removed from the shop machines, subject to vacuum dehydration and filtration prior to being returned to the presses. Tanks are used for storage of the used oil prior to recycling and recycled oil is stored in another tank and returned to the process when oil I needed. There have been no changes to the recycling process. UPC Forms for Recycling Activity dated 02/24/2016 were received today. The facility reports recycling 980 gallons of hydraulic oil over the previous two year reporting period. The recycling activity is authorized by H&SC 25143.2(d).

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-11-2004
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Alcoa Global Fasteners, Inc. is a captive metal fabrication company housing a variety of metalworking and metal finishing activities. Alcoa manufactures aerospace fasteners from titanium, aluminum, stainless steel and other related metal alloys for commercial and government clients. All industrial manufacturing was observed to occur indoors. Hazardous materials are transported to the facility by truck and unloaded in designated outdoor areas (Photo 6). Hazardous materials were stored in sealed 55-gallon drums within secondary containment until the product was needed for specific manufacturing needs. Metal turnings generated during the manufacturing were contained in steel bins with sealing lids and secondary containment pans (Photo 7). During the inspection, a municipal waste bin storage area was present on the southeast corner of the facility (Photo 4). According to the facility representative, the waste bins and recycling

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

bins were temporary, as the facility was undergoing a large clean up in preparation for a corporate audit. Storm water collected from the facility is conveyed via concrete swales to the single drop inlet (Photo 2 and 5). The storm water flow gradient is generally from the north to the south at the facility.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-03-2018
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a compliance inspection for the above facility on December 3, 2018. Staff met with Ms. Barbara Ross, Environmental Engineer. The facility is currently in Level 1 for Copper and Zinc. The SWPPP was up to date and employee training was conducted November 2018. Housekeeping is conducted twice a month with an industrial sweeper and hand sweeping is conducted as needed. The wastewater treatment plant is surrounded with a concrete berm and drains to the sanitary sewer. The hazardous waste storage and empty drum storage were located in containment berms at the northeast portion of the facility. An industrial boneyard was observed surrounded by a containment berm. Metal filtering waddles were noted around both outlets and waddles are deployed across the yard during rain events. Tarps were observed covering industrial materials and Ms. Ross stated more tarps are used during a rain event. No violations were observed during the inspection.

Violation Date: 05-02-2014
Citation: 22 CCR 45 67450.2(c)(10) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.2(c)(10)
Violation Description: Failure of the generator to prepare, maintain, and submit to CUPA an annual report containing the following information: (A) The serial number(s) of the FTU(s) involved in treatment; (B) The physical and mailing address of the business entity which owns or operates the FTU(s); (C) The name, title and telephone number of each FTU contact person; (D) The name and address or legal description of the facility; (E) The facility identification number; (F) The number of days each FTU was operated; (G) The quantity of hazardous waste(s) treated by each FTU; (H) The composition and hazardous characteristics of the influent hazardous waste(s); (I) The treatment method(s) used for each hazardous waste treated by each FTU; (J) The quantity, composition and hazardous characteristic(s) of any treatment effluent or residual discharged from each FTU to a POTW, if applicable; and (K) The quantity, composition, hazardous characteristic(s) and disposition of any FTU treatment effluent or residual that was not discharged to a POTW, if applicable.
Violation Notes: Returned to compliance on 10/22/2014. FTU-01 is correctly listed as PBR, with 10 tanks, chrome reduction. The unit correctly lists the treatment as #1, chrome reduction but incorrectly lists this as a CESQT unit, #2, aqueous waste with metals, #8, with PH adjustment and #17, recycling. Please update this page.

Violation Source: CERS

Site ID: 90708
Site Name: ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date: 05-02-2014
Citation: 19 CCR 4.5 2735.4(a)(3) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2735.4(a)(3)
Violation Description: Failure to comply with the provisions of this chapter pursuant to the time frames identified in Section 2745.1(b) if a stationary source has a process with more that a threshold quantity of a regulated substance as listed in Tables 1 or 2 and Table 3 of Section 2770.5.
Violation Notes: Returned to compliance on 09/15/2014. The facility had submitted an RMP in 2011. This RMP claimed an OCA with no off site emissions. This OCA was predicated on the belief that the plating wet floor had distinct barriers between the cyanide tank areas (cyanide plating and rinse tanks) and the acid bearing wet floor. The OCA was accepted, and a level 1 assignment accepted with no acid/cyanide mixing in the wet floor. This inspection revealed that the plating floor has only a single wet floor and that any acids and cyanide tanks/rinses would be mixed if a catastrophic release occurred. The facility options are: 1) build discrete secondary containment wet floors that keep the acids and cyanide plating tanks/rinse separate. This will allow the current level 1 status to remain. 2) resubmit an OCA using an acid/cyanide vapor release in order to determine if the site is sill eligible for level 1 status. Please advise this Agency which option it chooses. If the wet floor is changed, a re inspection will be [Truncated]

Site Name:	ARCONIC GLOBAL FASTENERS & RINGS, INC.
Violation Date:	05-02-2014
Citation:	HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description:	Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 04/08/2015. The facility has (6) poly tanks located in the facility's concrete lined basement. 3 of these tanks (cyanide rinse, general waste rinse and chrome rinse) are exempt from HW tank management because they are part of a waste water treatment system (WWT). The 3 other tanks (cyanide plating, chrome dump and alkaline dump) are poly tanks (~1,000 gallons each) that are located in the basement, not part of the WWT system and are not being monitored (visually or electronically). These 3 tanks are regulated as underground storage tanks (USTs) and should be monitored as USTs (either electronically or visually) in order to meet HW tank management standards. Immediately notify the Fullerton Fire Department (FFD), who has regulatory authority over USTs in the City of Fullerton, and either begin properly monitoring these UST/HW tanks or have them removed.

Violation Description:	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

	construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f
Violation Notes:	Returned to compliance on 08/28/2014. The CA/PBR units/tanks were last certified by a PE on 3-2009. This certification is requited every 5 years and was due on 3-2014. Have this PE certification completed immediately and submit to this Agency for review.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to discuss the appropriate containment/diversionary structures/equipment within the plan.
Violation Notes: Returned to compliance on 07/28/2016. The SPCC lists the secondary containment for the "oil filled machinery" as the building. Most of the machines may claim the building as secondary containmnet. However, several of the oil filled machines that are located near the buildings exterior walls appear to drain outside the building. Immediately outside the building, there are two storm drains that have absorbent tubes. This is general containment. These machines need to have "sized secondary containment". You must either 1) verify that these machines near the building perimeter are not regulated under SPCC (ie: the machines have oil reservoirs < 55 gallons 2) verify that the machines will drain into the building and not outside the building 3) verify that the facility perimeter storm drains/piping do not drain to the street but are "weirs/culverts" to the one facility storm drain that is controlled via a closure valve.

Violation Date: 05-02-2014
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52

Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency

ARCONIC GLOBAL FASTENERS & RINGS, INC. (Continued) **S119083988**

	plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes:	Returned to compliance on 10/22/2014. FTU-01 incorrectly lists in section II. basis for not needing a federal permit as (h) empty container rinsing. Please un check this box.

Violation Description:	Failure to submit a tank facility statement on or before January 1 annually unless a current Business Plan has been submitted.
Violation Notes:	Any facility storing over 1,320 gallons of petroleum product must submit the Tank Facility Statement Form annually by January 1st. Tank Facility Statement Form was last submitted on 07/26/2016. Submit form to the California Environmental Reporting System (CERS); alternatively you may use your hazardous materials inventory to meet this requirement. If you choose to use your inventory this must be indicated in CERS.

Eval Notes:	INSPECTOR COMMENTS: On site for routine tiered permit inspection; accompanied on inspection by Susan Berg of Orange County Environmental Health (OCEH). Consent to enter and conduct inspection activities was provided by Barbara Ross. Facility is regulated under Permit By Rule (PBR). Observed the following processes: cyanide destruction, waste water treatment to remove metals and puncturing of gas cylinders. Process of puncturing gas cylinders is under review by this agency. Exterior of units are marked with all required information. Facility has submitted annual notification forms through the California Environmental System (CERS). The following documentation was available and reviewed: -Sewer agency discharge records -SB 14 -Inspection schedule and log -Waste Analysis Plan -Closure Plan -Training records for cyanide handling Professional Engineer (PE) assessment was previously reviewed by this agency.

Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On site follow up inspection to discuss the 3 below grade HW storage tanks with FFD and Doh, Banajai, Yontz/Alcoa. It was decided by Alcoa that they will change the 3 current basement, storage tanks into a flow through system. Each of the tanks will be placed into a secondary tank and installed with automatic pumps which will transfer any liquids out of the tank and into a new AST. This will make the basement tanks exempt from UST regulations. Alcoa needed 180 days in order to complete the change. Have this project completed on/before 12-29-14 in order to abate this violation.

Eval Notes:	On site for a follow up inspection to the routine inspection dated 5-2-14. Permission to inspect granted by Alcoa/Goeke and Doh. Discussed the previous violations. Violation # A04 (no RMP) is still outstanding and is due immediately. Per Goeke, the facility has a consultant conducting the OCA computer model for an acid/cyanide release. If this OCA still allows the facility to maintain the level 1 status, they will submit the RMP as is and work on getting the cyanide tanks double contained during the end of year closure. If the OCA model shows an off site consequence (and therefore make the site a level 2 RMP) they will either 1) secondarily contain the tanks immediately or submit a level 2 RMP. This violation is still outstanding and correction is due within 30 days (9-29-14). If not corrected, an administrative action may be started.

Eval Notes:	Alcoa/Barbara had a TP question regarding aerosol can puncturing. My response; Barbara: The short answer is that you can do this ON SITE. You are covered under TP but the treatment tier (level 11b) makes it ?no authorization required? (meaning no TP ?authorization?) is needed if you follow H&SC 25201.16. This section sets some site requirements such as ability to handle a spill, management of residuals etc. You would have to amend your TP forms to include this treatment level (aerosol can puncturing) but only minimal other requirements. Hope that helps.

Eval Notes: On site for the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Alcoa/Banajai and Doh. Reviewed the current CAL ARP Risk Management Plan (RMP). Prepared on 4-2011. This is a level 1 facility. The regulated chemicals are sodium cyanide, potassium cyanide and cadmium oxide in the plating tanks. The same chemicals in raw product form are exempt due to the particle size. The RMP needs to be reevaluated before 4-2016 (every 5 years). Executive Summary: OK. Accident history: No releases of regulated chemicals in the last 5 years. Confirmed with FFD. The facility has coordinated with the FFD every year to offer training. The training has been declined by FFD. Worst case release scenario: The OCA shows no TE past the facility walls (level 1). The facility has a single wet floor that could mix acids

Eval Notes: INSPECTOR COMMENTS On-site for a routine RCRA Large Quantity Hazardous Waste inspection. Consent to enter, inspect, and take photographs was given by Barbara Ross. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Facility is a RCRA large quantity generator and they use satellite storage throughout the facility. The 90 day hazardous waste storage area had adequate aisle space and is secondarily contained. Facility has three plating areas which have secondary containment, the secondary containment below most of the plating area, see photos, has hazardous waste which had leaked or been spilled out of the tanks in the plating line. There is a lot of crystal build up under the tank area in the wet process floors and some liquid. Discussed the management of wet process floors with Daniel, Alonso, and Barbara. Facility does some sand blasting and they have been having their sand blasting waste hauled as [Truncated]

Eval Date: 06-06-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On-site to conduct a routine conditionally authorized (CA) inspection. Consent to enter and inspect and take any necessary photos was given by Barbara Ross, EHS manager. Terry Carrier of OCHCA was also present. Facility is treating their oily water waste. No changes have been made to the system since the last inspection. No releases have been made within the last three years. Waste analysis plan, waste analysis records, operating procedures, treatment log, sewer agency discharge records, and closure plan were available and reviewed. PE certification for the entire treatment system was available and reviewed. The seismic calculations were missing from the PE certification.

Eval Notes: INSPECTOR COMMENTS On-site for routine recycler inspection. The inspection was conducted with Barbara Ross, Daniel Doh, and Alonso Mejia. Also present was Terry Carrier of OCHCA. Consent to enter, inspect, and take photographs was given by Barbara Ross. The facility recycles hydraulic oil on site. The oil is removed from the shop machines, subject to vacuum dehydration and filtration prior to being returned to the presses. Tanks are used for storage of the used oil prior to recycling and recycled oil is stored in another tank and returned to the process when oil I needed. There have been no changes to the recycling process. UPC Forms for Recycling Activity dated 02/24/2016 were received today. The facility reports recycling 980 gallons of hydraulic oil over the previous two year reporting period. The recycling activity is authorized by H&SC 25143.2(d).

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine inspection. Permission to inspect was given to me by Barbara Ross, Environmental Engineer. This facility is a CalARP Program Level 1 facility. Program Level 1 chemicals include Sodium Cyanide, Potassium Cyanide and Cadmium Oxide. Storage areas were inspected and chemical volumes were verified. The Risk Management Plan (RMP) was re-validated/updated in August, 2016. The RMP included calculations and release plume modeling that indicated toxic endpoints that do not extend beyond the property line. I was not able to review documentation that response actions have been coordinated with local emergency planning and response agencies (Fullerton Fire). The RMP did not contain the required certification statement found in Title 19, CCR section 2735.5(d)(4). The violations on this report must be corrected immediately.

Eval Notes: On site to conduct the follow up inspection to the original Hazardous Waste (HW) inspection of 5-2-14. Permission to inspect granted by Alcoa/Doh. All the violations listed on the 5-2-14 inspection have been abated except for violation # W022 (now listed as violation # 52I545), failure to monitor HW tank systems. Alcoa is in the process of converting the 3 HW tanks (cyanide, chrome and alkaline tanks) from storage tanks to flow through systems, thereby making them exempt from underground storage tank (UST) and HW tank management requirements. These tanks need to be converted to flow through or properly monitored and permitted as USTs on/before 1-1-2015 or administrative enforcement action may be taken.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Annual Waste Handled:
Waste code: D001

ALCOA GLOBAL FASTENERS INC. (Continued) **1007198696**

Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	9085.2
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	396347
Waste code:	D003
Waste name:	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

FINDS:

Registry ID: 110006469678

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Hazardous Waste Generator

Violations:
Site ID: 140880
Site Name: PACIFIC ELITE COLLISION CENTER - FULLERTON
Violation Date: 07-21-2015
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to dispose of hazardous waste within 180 days (or 270 if waste is transported over 200 miles) for the generator who generates less than 1000 kilogram per month, but more than 100 kilograms per month.
Violation Notes: Returned to compliance on 08/06/2015. The waste paint is being disposed of on a monthly cycle. The waste antifreeze and waste oil has been stored on site for over 1 year. Please have these wastes properly disposed of immediately and send a copy of the manifest in order to verify proper disposal and abate the violation.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 140880
Site Name: PACIFIC ELITE COLLISION CENTER - FULLERTON
Violation Date: 07-19-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200

PACIFIC COLLISION CENTER (Continued) **1007370097**

	miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 07/24/2018. Observed one 30 gallon drum of waste aerosol cans with an accumulation start date of 08/30/2016. Have waste hauled immediately by a licensed hauler and provide a copy of the manifest to this agency.
Violation Division:	Orange County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	140880
Site Name:	PACIFIC ELITE COLLISION CENTER - FULLERTON
Violation Date:	07-21-2015
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to properly close hazardous waste containers when not in active use.
Violation Notes:	Returned to compliance on 08/06/2015. The 55 gallon drum of waste antifreeze was closed, however there was a ~3 gallon drain pan of waste antifreeze being stored on the top of the drum. This pan was full of waste antifreeze and had no lid. All HW must be stored closed except when adding/removing. Make sure that all HW antifreeze is stored in the drum and not in an open pan.

Eval Notes: On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by Elite/Ung. The facility is Pacific Collision Center with a DBA of PacificElite. This is a small quantity generator (SQG) and must dispose of tis HW every 6-9 months. Currently the waste paint/thinner is on a monthly haul away cycle. The waste oil and antifreeze have not been disposed in the last year. See violations. Manifest reviewed and OK. Annual haz mat training. Facility has an HMBEP on file with FFD. Filters were tested "non haz". Most containers were stored closed except the paint thinner drums (see violations) that were fixed during the inspection) and the drain pan of antifreeze. See violations. Reviewed the facility perimeter and municipal trash. No disposal of HW. Please mail a copy of the oil/antifreeze manifests and photo of the empty drain pan in order to abate the violations.

Eval Type:	Routine done by local agency
Eval Notes:	On site for the triennial Spill Prevention Control and Countermeasure (SPCC) inspection. Permission to inspect granted by Dusk Sheridan. The PE stamped SPCC was written in 10-2005. See violations. There is 1 fuel aboveground storage tank (AST) that has 2 compartments. 1 gasoline and 1 diesel. The AST is double walled and has a tertiary containment concrete berm. Overfill prevention (OFP) is electronic and leak detection is also electronic. ***the AST meets secondary containment requirements however, the berm is open to the environment. Any rainwater will be released to the storm drain. It is recommended that the berm have a plug installed in order to prohibit any petroleum/rainwater releases.*** There is 1 250 gallon waste oil AST, secondarily contained with visual OFP. There are 3 110 gallon new oil ASTs that are in a "bathtub" style secondary containment with a roof covering. There are 4 55 gallon drums of oil, fuel and ATf that are on secondary [Truncated]

Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 501229
Site Name: United Rentals Inc Branch 515
Violation Date: 12-14-2012
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Deficient BMP Implementation
Violation Notes: Food wrappers found accumulated behind shop building. Failure to use best conventional technology to clean litter and spilled cement mix.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-14-2012
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Weather: cold and overcast. SWPPP dated 9/2005. Small low opening in block wall at SW portion appears to allow undocumented runon. Contact also reports undocumented runon from SE portion. Observed aggregate mix spilled over and around push walls of the agg bin; dry cement mix on ground around the batch plant mixing/loading area; Contact reports spilled mix is allowed to remain on ground and is removed when it is added to the load of the next truck. Contact reports that keeping the batch plant area cleaner would be impractical. Food wrappers observed behind shop building; Contact agreed to clean. Openings observed in roof over wash fluid shed; may allow water into the wash fluid secondary containment pallets.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110000861764

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Notes:	INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by John Williams, inbound supervisor. Walked throughout the facility. Observed hazardous waste storage areas. EPA ID# CAL000425022 Hazardous waste is kept in the warehouse area. Facility is a distribution warehouse and generates very little waste from damages that happen in transit or within the warehouse. Satellite accumulation and generator status was discussed with Danielle and John. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted in the break rooms. The dumpster was observed, no signs of dumping. Ownership and employee count were confirmed; owner is Elliot Auto Supply Co and the employee count is around 140 employees.
