Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-17-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by John Williams, inbound supervisor. Walked throughout the facility. Observed hazardous waste storage areas. EPA ID# CAL000425022 Hazardous waste is kept in the warehouse area. Facility is a distribution warehouse and generates very little waste from damages that happen in transit or within the warehouse. Satellite accumulation and generator status was discussed with Danielle and John. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted in the break rooms. The dumpster was observed, no signs of dumping. Ownership and employee count were confirmed; owner is Elliot Auto Supply Co and the employee count is around 140 employees.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-30-2014
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Future Foam/Knudtson. Covered the following level 1 elements: This site has TDI, is a California/Federal regulated, level 1 CAL ARP facility. The Risk Management Plan had its 5-year update on 6-2014 (on schedule). Received the 5-year update during this inspection. Executive summary: OK. 5-year accident history: OK. Confirmed no releases of TDI in the last 5 years with Fullerton Fire Department. Worst case release analysis: See violations. Certification: OK, used the proper California notations. Coordinate with local emergency responders: Made a tour of the facility and took photos for the local emergency response cards to be handed out to Haz mat teams. This visit qualifies as your annual coordination(2014-2015). Abate the violation on/before 7-28-14.

Eval Date:	06-03-2005
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	On June 3, 2005, Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Steve the Environmental Engineer. The SWPPP was requested and reviewed at this time. Upon inspection of the site the following observations were observed. Large stains were found on the ground from the unloading process which was located in the north east corner of the site. There is a very high potential for storm water and non-storm water to come into contact with chemicals from this process. Currently, there is a active faucet and garden hose in this area, although Steve stated that it is not used for washing down the area. Furthermore, Along the railroad there are several unloading docks that were currently discharging an unknown liquid and amount directly to the storm drain system. BMPs should have be implemented but were not in place at the time of inspection. Improved general housekeeping is needed for the trash bin and spills that are occurring in this area. Large stains and debris were noted on the ground. A re-inspection for this site is scheduled for July 7, 2005.

Eval Date:	06-30-2014
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Future Foam/Knudtson. Covered the following level 1 elements: This site has TDI, is a California/Federal regulated, level 1 CAL ARP facility. The Risk Management Plan had its 5-year update on 6-2014 (on schedule). Received the 5-year update during this inspection. Executive summary: OK. 5-year accident history: OK. Confirmed no releases of TDI in the last 5 years with Fullerton Fire Department. Worst case release analysis: See violations. Certification: OK, used the proper California notations. Coordinate with local emergency responders: Made a tour of the facility and took photos for the local emergency response cards to be handed out to Haz mat teams. This visit qualifies as your annual coordination(2014-2015). Abate the violation on/before 7-28-14.

Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	On June 3, 2005, Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Steve the Environmental Engineer. The SWPPP was requested and reviewed at this time. Upon inspection of the site the following observations were observed. Large stains were found on the ground from the unloading process which was located in the north east corner of the site. There is a very high potential for storm water and non-storm water to come into contact with chemicals from this process. Currently, there is a active faucet and garden hose in this area, although Steve stated that it is not used for washing down the area. Furthermore, Along the

FUTURE FOAM (Continued) **1001615533**

railroad there are several unloading docks that were currently discharging an unknown liquid and amount directly to the storm drain system. BMPs should have be implemented but were not in place at the time of inspection. Improved general housekeeping is needed for the trash bin and spills that are occurring in this area. Large stains and debris were noted on the ground. A re-inspection for this site is scheduled for July 7, 2005.

Eval Notes:	AEO meeting (10-30-14). Future Foam/Knudtson provided manifests to verify that the hazardous waste (HW) previously stored over 180 days has been disposed. Abate violation # W009. Future Foam will dispose of the TDI/carbon absorbent as a RCRA HW. Abate violation # W004. Knudtson provided photos showing that the drums are now stored with proper aisle space. Abate violation # W027. Future Foam is working on obtaining a Federal EPA ID # (I E-mailed Knudtson the web site/link during the meeting). Violation # W002 (improper EPA ID #) is still outstanding and must be correct on/before 11-30-14.

Eval Notes:	INSPECTOR COMMENTS On site for routine aboveground petroleum storage tank (APST) inspection. The inspection was conducted with Steve Sabo, plant engineer. The facility has the following petroleum storage capacity: 4,800 gallon tank, Rebond Oil -220 gallons (4 x 55 gallon drums), WD40 -80 (16 x 5 gallon buckets), hydraulic, motor, mineral oil -55 gallon tank, Diesel -55 gallon drum, used oil All of the tanks and containers have secondary containment. The spill prevention countermeasure and control (SPCC) plan is dated 06/14/2013 and has not been reviewed since then. Employee training records for employees that conduct oil handling activities are not available for review. Daily inspections are not conducted in accordance with the SPCC plan.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-03-2005
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On June 3, 2005, Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Steve the Environmental Engineer. The SWPPP was requested and reviewed at this time. Upon inspection of the site the following observations were observed. Large stains were found on the ground from the unloading process which was located in the north east corner of the site. There is a very high potential for storm water and non-storm water to come into contact with chemicals from this process. Currently, there is a active faucet and garden hose in this area, although Steve stated that it is not used for washing down the area. Furthermore, Along the railroad there are several unloading docks that were currently discharging an unknown liquid and amount directly to the storm drain system. BMPs should have be implemented but were not in place at the time of inspection. Improved general housekeeping is needed for the trash bin and spills that are occurring in this area. Large stains and

FUTURE FOAM (Continued) **1001615533**

	debris were noted on the ground. A re-inspection for this site is scheduled for July 7, 2005.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation: 19 CCR 4.5 2745.1(a) - California Code of Regulations, Title 19, Chapter 4.5, Section(s) 2745.1(a)
Violation Description: Failure to submit an RMP which includes all requirements described in Section 2745.3 through 2745.5 and 2745.8 through 2745.9.
Violation Notes: Returned to compliance on 12/04/2014. The current worst case off site consequence analysis (OCA) lists the toxic endpoint as 0.02 miles. This = 105 feet. Please supply the distance to the nearest receptor (business parking lot directly to the east of Future Foam). Report if this distance (originating form the furthest east end of a parked rail car) will stay on the Future Foam property or go off site. If it stays on site, the level 1 is proper. If it goes off site, a reevaluation may be made.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-30-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Future Foam/Knudtson. Covered the following level 1 elements: This site has TDI, is a California/Federal regulated, level 1 CAL ARP facility. The Risk Management Plan had its 5-year update on 6-2014 (on schedule). Received the 5-year update during this inspection. Executive summary: OK. 5-year accident history: OK. Confirmed no releases of TDI in the last 5 years with Fullerton Fire Department. Worst case release analysis: See violations. Certification: OK, used the proper California notations. Coordinate with local emergency responders: Made a tour of the facility and took photos for the local emergency response cards to be handed out to Haz mat teams. This visit qualifies as your annual coordination(2014-2015). Abate the violation on/before 7-28-14.

Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	On June 3, 2005, Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Steve the Environmental Engineer. The SWPPP was requested and reviewed at this time. Upon inspection of the site the following observations were observed. Large stains were found on the ground from the unloading process which was located in the north east corner of the site. There is a very high potential for storm water and non-storm water to come into contact with chemicals from this process. Currently, there is a active faucet and garden hose in this area, although Steve stated that it is not used for washing down the area. Furthermore, Along the railroad there are several unloading docks that were currently discharging an unknown liquid and amount directly to the storm drain system. BMPs should have be implemented but were not in place at the time of inspection. Improved general housekeeping is needed for the trash bin and spills that are occurring in this area. Large stains and debris were noted on the ground. A re-inspection for this site is scheduled for July 7, 2005.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-30-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct the triennial California Accidental Release Prevention Program (CAL ARP) inspection. Permission to inspect granted by Future Foam/Knudtson. Covered the following level 1 elements: This site has TDI, is a California/Federal regulated, level 1 CAL ARP facility. The Risk Management Plan had its 5-year update on 6-2014 (on schedule). Received the 5-year update during this inspection. Executive summary: OK. 5-year accident history: OK. Confirmed no releases of TDI in the last 5 years with Fullerton Fire Department. Worst case release analysis: See violations. Certification: OK, used the proper California notations. Coordinate with local emergency responders: Made a tour of the facility and took photos for the local emergency response cards to be handed out to Haz mat teams. This visit qualifies as your annual coordination(2014-2015). Abate the violation on/before 7-28-14.

FUTURE FOAM (Continued) **1001615533**

Eval Notes:	On June 3, 2005, Regional Water Board staff conducted a routine inspection at the above mentioned site. Contact was made with Steve the Environmental Engineer. The SWPPP was requested and reviewed at this time. Upon inspection of the site the following observations were observed. Large stains were found on the ground from the unloading process which was located in the north east corner of the site. There is a very high potential for storm water and non-storm water to come into contact with chemicals from this process. Currently, there is a active faucet and garden hose in this area, although Steve stated that it is not used for washing down the area. Furthermore, Along the railroad there are several unloading docks that were currently discharging an unknown liquid and amount directly to the storm drain system. BMPs should have be implemented but were not in place at the time of inspection. Improved general housekeeping is needed for the trash bin and spills that are occurring in this area. Large stains and debris were noted on the ground. A re-inspection for this site is scheduled for July 7, 2005.

Eval General Type: Occupational Safety and Health Administration Inspection
Eval Date: 01-25-2019
Violations Found: No
Eval Type: Cal/OSHA Inspection
Eval Notes: Not reported
Eval Division: Cal/OSHA
Eval Program: OSHA
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 02-22-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Inspection reports fromHCA/Long are filed in the CALARP file.
Eval Division: Orange County Environmental Health
Eval Program: CalARP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 02-24-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Anonymous complainant to DTSC. Referred to HCA and FFD. Claims that the general manager (Randy Lake) orders employees to dump the old chemicals to the "gutter" and "inside and behind building on Kimberly Ave.". Enter into EC. Call FFD/Miner.Discussed the case. This is a HW/HMBEP/SPCC/CAL ARp site. We will both conduct on site surveillance to see if we can find a dump point. FFD will research the storm drains on site. I will review the HWTS for HW issues. We will meet in a week or two to compare notes.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 02-25-2014
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site visit early AM. No employees dumping during surveillance. Questioned the surrounding businesses, several morning walkers/joggers and one hobo. No witness to chemical dumping. No stains on the Cypress nor Kimberly streets.
Eval Division: Orange County Environmental Health
Eval Program: HW

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-23-2002
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On July 23, 2002 under clear, hot conditions, Regional Board staff conducted a routine compliance inspection at the above referenced site. Staff met with Misty Bryant, the Service Center Manager who produced the facility's SWPPP. The plan was not certified at the time of inspection, but Ms. Bryant reviewed and signed the certification page of the document by the end of the inspection. The SWPPP did not have quantities of significant materials. Otherwise, all applicable information was contained in the document. Houskeeping was adequate but needed additional attention around the truck fueling station. Training records, as well as, a well documented monitoring program was presented and found to be compliant with regulations.

Eval Notes:	7/15/16 - UPS Fullerton Terminal On site to conduct a routine hazardous a routine hazardous waste inspection. Consent to enter, inspect and take any necessary photos was given by the Service Center Manager, Arthur Morales at 1:14 pm. Walked the site with the UPS Supervisor, Angelo Madison. The hazardous waste containers found here: - 30 gallons of Antifreeze - 55 gallons of Used oil - 20 Used oil filters - 50 pounds of Oily Rags All Hazardous waste containers were covered Manifests were available from 2014, 2015 and 2016 and were reviewed and hazardous waste is being picked up Asbury. Walked the perimeter of the site, and there were some historical oil/fuel stains found at the parking lot, but no new hazardous waste spills or discharges observed during this inspection. Emergency response sticker with the necessary information was posted outside the restroom area. The common dumpster at the back of the shop was checked and no hazardous waste was [Truncated]

Site ID:	62661
Site Name:	Rohner Machinery Sales, Inc.
Violation Date:	01-17-2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	As a Small Quantity Generator (SQG) of hazardous waste you must have hazardous waste hauled every 180 days from the accumulation start date. Observed six 55 gallon drums of waste oil with no accumulation start date, last manifest is dated 06/13/2017. Per Mr. Rohner waste has been on site for over 1 year. Have waste hauled by a licensed hauler immediately and provide a copy of the hazardous waste manifest to this agency.

ROHNER MACHINERY SALES, INC. (Continued) **S113460501**

Violations:

Site ID:	62661
Site Name:	Rohner Machinery Sales, Inc.
Violation Date:	01-17-2019
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	The following hazardous waste containers were observed to not be labeled with required information: -six 55 gallon drums of used oil -one 20 gallon drum of waste coolant Label drums with the following, ?Hazardous Waste,? name and address of generator, physical characteristic (sold or liquid), hazardous property (toxic, reactive, corrosive, flammable), contents of container and accumulation start date. Label drums with required information immediately.
Violation Division:	Orange County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	62661
Site Name:	Rohner Machinery Sales, Inc.
Violation Date:	01-17-2019
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	As a Small Quantity Generator (SQG) of hazardous waste you must have hazardous waste hauled every 180 days from the accumulation start date. Observed six 55 gallon drums of waste oil with no accumulation start date, last manifest is dated 06/13/2017. Per Mr. Rohner waste has been on site for over 1 year. Have waste hauled by a licensed hauler immediately and provide a copy of the hazardous waste manifest to this agency.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110009531033

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-14-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by Starbuck Refinishing/Starbuck. The facility repairs and paints trucks and school buses. It is a Small Quantity Generator (SQG). All HWs must be hauled away every 6-9 months. The facility is currently on a semi annual haul away cycle. Manifests reviewed and OK. The clarifier waste has not been pumped out in years. It appears to be full. Once the clarifier is pumped out, retain the HW manifest in order to verify proper disposal. HW drums of waste paint/thinner were stored closed and properly labeled, with the beginning accumulation dates (3-2016). The paint booth filters were tested non hazardous in 2004 and are being disposed to the municipal trash. Facility has a current HMBEP on file with the FFD. Review the on site dumpster. Municipal trash only. No HW. Review the facility perimeter. No evidence of HW disposal.

Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS On-site to conduct a change of ownership inspection. Met with Ed Hassan, manager. Walked throughout the facility. Ed stated that they are not currently doing any body work at this facility. They are thinking about opening up to the public and doing more truck body repair next year, but for now the yard and facility is being used to store tow trucks and spare parts for their other service centers. Ed was informed that once he starts generating hazardous waste to contact me and we will put them into the program.

User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

FINDS:

Registry ID: 110009529938

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description:	APSA Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 07/09/2015. You must prepare a Tier 1 SPCC. Make sure that the SPCC includes a list of all tanks/totes/drums that contain petroleum, maintain logs of rainwater disposal, annual training for staff oil spill kits for the generators and monthly inspection logs.
Violation Division:	Orange County Environmental Health
Violation Program:	APSA
Violation Source:	CERS

Site ID:	398601
Site Name:	Olson-EcoLogic Engine Testing Laboratories
Violation Date:	04-10-2018
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.
Violation Notes:	Per Mr. Barber inspections are conducted, but logs are not maintained. Maintain a log of tank inspections. Provide a copy of inspection log to this agency.

FINDS:

Registry ID: 110002671546

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: 7/14/16 - Marton Precision Manufacturing Inc. On site to conduct a routine hazardous a routine hazardous waste inspection. Consent to enter, inspect and take any necessary photos was given by the Manager, Steve Shillinglaw at 1:35 pm. The hazardous waste containers found here: - 110 gallons of Coolant waste water - 250 gallons of Used oil - 150 Alkaline Batteries Hazardous waste containers were not covered and some did not have any labels. Aluminum chips and shavings were found to be recycled by a private company. The oily rags are being washed and serviced. Manifests were available and were reviewed and hazardous waste is being picked up Worldwide Recovery systems. Walked the perimeter of the site, and there were some aluminum metal shavings found near the parking lot, but no hazardous waste spills or discharges observed during this inspection. Emergency response sticker with the necessary information was posted outside the break room. The [Truncated]

Eval Notes: 7/14/16 - Marton Precision Manufacturing Inc. On site to conduct a routine hazardous a routine hazardous waste inspection. Consent to enter, inspect and take any necessary photos was given by the Manager, Steve Shillinglaw at 1:35 pm. The hazardous waste containers found here: - 110 gallons of Coolant waste water - 250 gallons of Used oil - 150 Alkaline Batteries Hazardous waste containers were not covered and some did not have any labels. Aluminum chips and shavings were found to be recycled by a private company. The oily rags are being washed and serviced. Manifests were available and were reviewed and hazardous waste is being picked up Worldwide Recovery systems. Walked the perimeter of the site, and there were some aluminum metal shavings found near the parking lot, but no hazardous waste spills or discharges observed during this inspection. Emergency response sticker with the necessary information was posted outside the break room. The

FINDS:

Registry ID: 110006478301

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110006482074

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-30-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Denny Bui and Dave Wardwell. Walked throughout the facility. Observed hazardous waste storage areas. Facility is a machine shop and they generate oily water waste and waste absorbent. They have specific oil cutting machines for harder aerospace parts, they reuse the oil until it is no longer viable and have it hauled with the oily water waste from the other machines. Facility also has a mop water recycling and treatment system on-site. They take the mop water from the floor and they use gravity filtration to get rid of big chunks of metal and they add a soap and then reuse the water on-site for mopping. The filter and the debris on the filter are hauled away with the waste absorbent. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted [Truncated]

Eval Date:	09-10-2014
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for the inspection of California Precision Machining. That business moved out of this location on/before 7-1-14. The new business, Thunderbolt Mfg., Inc. is on site. Permission to conduct a new hazardous waste (HW) generator inspection granted by Thunderbolt/Wardwell. The business moved from Anaheim to this location about 2-3 weeks ago. The business has a new EPA ID # for this site. The business has not yet generated any HW. Wardwell is aware of the storage, labeling and manifesting requirements of his HW. Manifests for the previous location were reviewed and OK. The facility has drip pans for all the machines and is starting a water/oil recycling plan in an attempt to reduce the HW generation. Perimeter walk and review of the dumpster shows no evidence of HW disposal. The facility will be a non RCRA HW small quantity generator (SQG) and be required to manifest their HW every 180 days. This facility will be placed into the HCA inspection [Truncated]

Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Denny Bui and Dave Wardwell. Walked throughout the facility. Observed

THUNDERBOLT MFG INC (Continued) **S118236105**

hazardous waste storage areas. Facility is a machine shop and they generate oily water waste and waste absorbent. They have specific oil cutting machines for harder aerospace parts, they reuse the oil until it is no longer viable and have it hauled with the oily water waste from the other machines. Facility also has a mop water recycling and treatment system on-site. They take the mop water from the floor and they use gravity filtration to get rid of big chunks of metal and they add a soap and then reuse the water on-site for mopping. The filter and the debris on the filter are hauled away with the waste absorbent. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted [Truncated]

FINDS:

Registry ID: 110006469776

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

SIC Code:	3691
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-10-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by Solutions/Goetsch. This facility is a printing operation. The generate waste ink (during clean outs) and photo fix. Due to AQMD restrictions, they no longer generate waste ink solvents. All inks are UV sensitive. The facility is a small quantity generator (SQG) and must dispose of the HW every 6-9 months. Currently on a 9

SOLUTIONS UNLIMITED (Continued) **S113101011**

month haul away cycle. Reviewed HW manifest. OK. Facility has current FFD/HMBEP. No ink waste at this time. The photo fix drum is closed and properly labeled. Stored inside the developer room. The facility has E-wastes (lighting tubes) stored in cardboard boxes. They had no labels. See violations. Viewed the dumpster and perimeter. All had no HW disposal. Please correct the violation on/before 8-10-15 in order to abate the violation.

Violation Notes: Returned to compliance on 06/30/2016. remove from inventory, remove hr3 haze-stain remover, argon, acetone. Change argon shield gas to argon/co2 mix, verify max and average daily amount for propane
Violation Division: Fullerton City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-10-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by Solutions/Goetsch. This facility is a printing operation. The generate waste ink (during clean outs) and photo fix. Due to AQMD restrictions, they no longer generate waste ink solvents. All inks are UV sensitive. The facility is a small quantity generator (SQG) and must dispose of the HW every 6-9 months. Currently on a 9 month haul away cycle. Reviewed HW manifest. OK. Facility has current FFD/HMBEP. No ink waste at this time. The photo fix drum is closed and properly labeled. Stored inside the developer room. The facility has E-wastes (lighting tubes) stored in cardboard boxes. They had no labels. See violations. Viewed the dumpster and perimeter. All had no HW disposal. Please correct the violation on/before 8-10-15 in order to abate the violation.

Citation:	HSC 6.5 25189.5(a),25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a),25201(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to HSC 6.5.
Violation Notes:	Returned to compliance on 01/29/2018. OBSERVATION: Generator has failed to properly dispose of hazardous waste at an authorized location. Two light fixtures were disposed of in the municipal dumpster. CORRECTIVE ACTION; The Owner/Operator shall dispose of all hazardous waste at an authorized location as required in Title 22 regulations. Documentaion records of disposal of any hazardous wastes must be maintained in accordance with Title 22. Facility personnel removed the two light fixtures from the dumpster and educated them on proper disposal of fluorescent bulbs. This violation was corrected on site. No further action necessary.

Violation Date:	01-29-2018
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 01/31/2018. The secondary containment is subject to container management standards which requires that the containment be properly closed when not in active use. CORRECTIVE ACTION: Please clean out all secondary containment pallets to remove all accumulation of liquid waste. Submit photos to this agency within 30 days to show all accumulation has been removed.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-14-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site for a routine CalARP Audit. Met with Kim Braegger (Director of Safety), Norman Calix (Facilities Maintenance Manager) and Joe (facilities Personnel) of Schreiber Foods. Amanda Nesbit of OCHCA was also present during this inspection. This facility is regulated under CalARP Program Level 2 requirements for Anhydrous Ammonia. The facility maintains (1) processes that has a maximum charge of approximately 7,207 pounds. Schreiber Foods personnel operate the anhydrous ammonia system at the facility. The Program Level 2 RMP Registration was reviewed and deemed to be complete. -- RMP Certification: The RMP certification was reviewed and certified on August 8, 2016. -- The Executive Summary was reviewed and was complete. -- The Worst-Case Release Analysis and Alternate Release Analysis was reviewed. -- Document Management System was reviewed. PREVENTION PROGRAM ELEMENTS: -- Safety Information: The safety information is included in the RMP and [Truncated]

Eval Notes:	Consultant/Katie Roberts call with HW questions. Schreiber is changing form Calif. SQG to LQG. Do they need to: change the EPA ID #? need to notify any agency/ E-mailed her back that; EPA ID # stays the same SQG ---> LQG means: 10 HW disposal every 90 days 2) formal training program 3) formal contingency plan.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	Phone call from Schreiber/Braegger. Discussed the site. The 5 year RMP re certification is due soon. He wanted to know 1) if HCA needs a copy (no, keep on site for on site review), 2) they did the hazard review earlier this year, do they need another (no, HCA was invited but was unable to attend) and 3) the seismic review was done during the addition of piping, does it need to be re done (no, earlier seismic is OK). VM from Schreiber/Ebert. Same seismic question. Called and left a VM that the earlier seismic is OK.

FINDS:

Registry ID: 110002807972

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best

ORANGE CO., TRANSIT DISTRICT (Continued) **U001615007**

management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 01/30/2019. Observed one 55 gallon drum of UV with accumulation start date 03/2018. Per Mr. Kitajima he is unsure of the exact start date, but the drum has been on site since 03/2018. Facility is a Small Quantity Generator (SQG) and must have hazardous waste hauled 180 days from the accumulation start date. Have waste hauled by a licensed hauler immediately and provide a copy of the manifest to this agency within 30 days of waste pick-up.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	On-site inspection conducted this date in regards to hazardous waste disposed of to the storm channel, consent to enter, inspect and take photographs was given by ? Bob Kitajima, facilities manager The material that went to the storm drain is stated to be water based ink and yellow magic cleaning solution from cleaning small amounts of ink residue from the trays. The material has been sent as a hazardous waste in the past under waste code 331. Safety Kleen transported 1025 gallons on 11/16/18. A waste determination is required, see the inspection report from Emily Minson for waste determination requirements. Ensure that the results are submitted in a timely manner. The facility will receive a full inspection next week to further investigate hazardous waste generation. During the inspection, it was noted that the three 275 gallon totes containing water based inks and cleaning solution were unlabeled at that time. The labels were added during the inspeciton.

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits

ADVANCED IMAGE DIRECT, LLC (Continued) **1000818445**

issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Hazardous Waste Summary:

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 491
. Waste name: Unspecified sludge waste

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D011
. Waste name: SILVER

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE

RTIE HOLDINGS LLC (Continued) **1015740109**

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Registry ID: 110001200254

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: INSPECTOR COMMENTS Orora Visual Orange County 1600 E Valencia Drive Fullerton, CA 92831 Facility has just gone through an ownership change and they are in the process of updating their EPA ID#. On site for a change of ownership hazardous waste inspection. Consent to inspect and take any necessary photos was given by John Rigney, general manager. Walked throughout the facility. Observed hazardous waste storage areas. Facility is a digital print shop, they generate a very small amount of silver recovery photo waste. Containers were closed and properly labeled. Manifests were not available and reviewed, facility has not had any waste hauled since the change of ownership. Employees are reported to be trained. Emergency plan is posted near the front office area. The dumpster was observed, no signs of dumping. Ownership and employee count were confirmed facility is owned by orora packaging and have 87 employees.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-14-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: 7/14/16 - Graphic Tech Inc On site to conduct a routine hazardous a routine hazardous waste inspection. Consent to enter, inspect and take any necessary photos was given by Director of digital operations, Jimmy Chang at 2:45 pm. The hazardous waste containers found here: - Silver Waste = 100 pounds - Fluorescent light bulbs = 80 items - Solvent mixture = 110 gallons All containers of hazardous waste were covered and but not labeled. Manifests were available and were reviewed and waste was picked up by Safety Kleen. Walked the perimeter of the site, and there were no hazardous waste spills or discharges observed during this inspection. Emergency response sticker with the necessary information was posted inside the break room. The 40 yard bins were visually inspected no hazardous waste was observed. Large recycle bins within the screen printing warehouse had labels that told the employees to only dispose paper waste. The weekly inspections are by [Truncated]

ORANGE COUNTY NORTH BASIN - AMERICAN ELECTRONICS (Continued) **S106486993**

RB Case Number: SLT8R227
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: 3/24/87 a chemical use questionaire was sent to RP under AB 1803. RP response indicated potential SGW contamination. 10/26/88 a request for subsurface investigaiton was issued and was conducted. 2/2/90 a Plan of Action was received from the RP that includes vapor and water extraction wells and a treatment process. Plan was approved with modifications to include additional monitoring wells and other specifics. 1/7/97 Annual monitoring was required by Board for 2 years. Results to be analyzed to determine if additional monitoring or action is necessary. Subsurface investigaiton conducted. Plan of Action implemeted including monitoring wells, vapor and water extraction wells, and a treatment process. 1/7/97 Annual monitoring was required by Board for 2 years. Results to be analyzed to determine if additional monitoring or action is necessary.

FINDS:

Registry ID: 110006469589

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	412676
Site Name:	WARE DISPOSAL INC
Violation Date:	07-16-2016
Citation:	2014-0057-DWQ - Industrial General Permit
Violation Description:	SW - Late Report
Violation Notes:	Failure to submit 2015-2016 Annual Report by due date.
Violation Division:	Water Boards
Violation Program:	INDSTW
Violation Source:	SMARTS

Site ID:	412676
Site Name:	WARE DISPOSAL INC
Violation Date:	02-22-2017
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 05/08/2017. Facility shall add reportable quantities of acetylene to inventory.
Violation Division:	Fullerton City Fire Department
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	412676
Site Name:	WARE DISPOSAL INC
Violation Date:	08-20-2013
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 08/20/2013. The facility has a waste oil tank and a 55 gallon drum for waste oil filters. The used oil filters label was mistakenly put on the waste oil drum and the oil filter drum was unlabeled. The label was removed from the tank and placed on the proper drum during the inspection. Violation is noted and abated

COOK EQUIPMENT COMPANY (Continued) **1004676042**

during the inspection.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 412676
Site Name: WARE DISPOSAL INC
Violation Date: 10-04-2016
Citation: 22 CCR 15 66265.53 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.53
Violation Description: Failure to maintain a copy of the contingency plan and all its revisions at the facility and to submit a copy to all local police departments, fire departments, hospitals, and State and local emergency response teams that may be called upon to provide emergency services.
Violation Notes: Returned to compliance on 10/04/2016. -Emergency contingency plan was not posted on-site -Emergency plan was posted in the front office , corrected on-site.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 412676
Site Name: WARE DISPOSAL INC
Violation Date: 08-15-2015
Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Late Report
Violation Notes: Failure to submit 2014-2015 Annual Report by due date.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 08-19-2013
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: file review for inspection.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-22-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Violation observed.
Eval Division: Fullerton City Fire Department
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-20-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for the annual hazardous waste inspection. Conducted the inspection and permission granted for inspection by Ware/Manny

COOK EQUIPMENT COMPANY (Continued) **1004676042**

Gonzalez. Manifests reviewed for waste oil, oil filters, oil/absorbent, clarifier waste (bill of lading) and universal waste (truck headlights). Most are being hauled 2x-3x/year. The universal waste has not been hauled in over 1 1/2 years. Storage is OK. Universal waste storage drum is 1/2 full. All storage clean, no leaks. All drums/tanks properly labeled except for the used oil filters drum (see violations). This violation was corrected during the inspection. Numerous trash roll off bins on site. Review of some shows only municipal trash. No HW. This is a trash truck maintenance yard and no trash disposal/sorting takes place. On the job training for employees. Fire department emergency plan on site. No spills or disposal of HW seen.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-04-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Manny Gonzalez, operations manager. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan was not posted, but was corrected on-site and posted in the front office. The dumpster/enclosure was observed, no signs of dumping.
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-02-2013
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: NO VIOALTIONS OBSERVED
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 12-05-2018
Violations Found: No
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a drive-by inspection of the above facility on December 5, 2018. The purpose of the inspection was to determine whether or not the facility was discharging storm water from the actively occurring storm event. Staff observed discharge from the parking lots south of the facility, at the driveway towards the curb and gutter. Staff expect the discharger to submit an Ad Hoc report within 30 days of their receipt of the laboratory report. Failure to do so is a violation of the IGP.
Eval Division: Water Boards

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

Violation Status: No violations found

FINDS:

Registry ID: 110002941844

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site for the annual hazardous waste inspection. Conducted the inspection and permission granted for inspection by Ware/Manny Gonzalez. Manifests reviewed for waste oil, oil filters, oil/absorbent, clarifier waste (bill of lading) and universal waste (truck headlights). Most are being hauled 2x-3x/year. The universal waste has not been hauled in over 1 1/2 years. Storage is OK. Universal waste storage drum is 1/2 full. All storage clean, no leaks. All drums/tanks properly labeled except for the used oil filters drum (see violations). This violation was corrected during the inspection. Numerous trash roll off bins on site. Review of some shows only municipal trash. No HW. This is a trash truck maintenance yard and no trash disposal/sorting takes place. On the job training for employees. Fire department emergency plan on site. No spills or disposal of HW seen.

Eval Notes: INSPECTOR COMMENT: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by George Rodriguez, Shop Manager. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. An oil water clarifier is present in the truck wash area. Facility states that the clarifier contains bacteria for anaerobic digestion of the oil, the water is discharged to a publicly owned treatment works facility, and the sludge will occasionally be clean out and lay on cardboard to dry before it gets disposed as solid waste. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is available on site. The dumpster/enclosure was observed. No hazardous waste violations were observed this date.

Eval Type:	Routine done by local agency
Eval Notes:	The facility has four double-walled tanks monitored by a Veeder Root TLS-350 system. The site has double-walled pressurized piping with mechanical line leak detector. Positive shutdown and fail safe programming were verified. ATG is used for overfill prevention. SB989 testing was last conducted on 4/19/17. Tester certifications were verified. CERS information requires the following correction within 30 days: TANK PAGES There are two tanks listed with tank contents as Regular Unleaded ? there are four products on site ? premium, diesel, 87 and 89. Please modify tank information to reflect the presence of 89 product. MONITORING PLAN ? Premium and 87 product: Sensors in the turbine sump for the premium and regular unleaded tank sumps are model 205 and not 208 MONITORING PLAN ? ALL TANKS UDC ? change UDC Monitoring to Electronic Stand Alone;;;remove information from the UDC Panel Manufacturer and UDC Panel Model fields;;;change responses to No

Eval Notes:	Kanti Macwan (Store Manager) consented to/assisted with this routine, annual, hazardous waste inspection. This business generates fuel contaminated solids and liquids related to gas station sales and UST testing processes; no automotive repair/service processes. I used a hazardous waste compliance checklist to survey haz waste management and to review required record keeping: - steel drums are used to accumulate/store hazardous waste fuel contaminated solids and liquids. - hazardous wastes are stored along an outside wall of the convenience store. - hazardous waste drums marked with required information and closed to prevent spillage. - hazardous waste manifest history was reviewed. - employees are trained/supervised to the level of assigned haz waste management tasks. - haz waste disposed within allowable hazardous waste storage time limits. Contact this agency for haz waste compliance assistance.

Eval Notes:	On site to conduct a routine hazardous materials business emergency plan inspection. Facility has complied with annual 2017 reporting requirement. Facility has disclosed 3 materials. Materials observed on site are consistent with materials that were disclosed with the exception of the C02. C02 has been reported as being stored as a gas. Liquid C02 was observed on site. Facility?s submittal status will be changed to Not Accepted. Please correct the chemical inventory to reflect the presence of liquid C02. Ensure that all amounts are

7-ELEVEN INC. STORE# 37966 (Continued) **S113081880**

reported in gallons. There were no other materials meeting minimum disclosure thresholds observed on site. Site map was reviewed and appears to be accurate. Business emergency plan training records were reviewed.

Eval Notes:	INSPECTOR COMMENTS: On site for a routine hazardous materials inspection. Facility has conducted annual training. The following materials were observed to be on site: - gasoline, ust - diesel, ust - CO2, cylinder Facility?s electronic submittal included the disclosure for propane. Verified that propane stored on site is for retail sale. Items offered for retail sale are not required to be included in your disclosure and should be removed from your submittal. The facility has submitted hazardous materials disclosure and business emergency plan documents electronically to the CERS database which were reviewed and not accepted. Please log in and update your submittal.

Eval Notes:	Reviewed UST submission package on CERS. Package was declined and an email sent to the facility contact. The following corrections are needed: UST SITE MAP Tanks are not oriented correctly on the site map and north is incorrectly listed at the bottom of the map. In addition, UDC 9/10 and 10 Satellite are also inaccurately listed. Please move the ?north? to the top of the map, correct tank orientation, and correct the dispenser/UDC placement. Piping information (runs) must also be included on your map. TANK MONITORING PLANS Tanks 3749-1, 3749-2, and 3749-3 = please correct the model number in the Pipe Monitoring section ? model number should be 205 and not 208. Only the diesel tank uses a model 208 sensor.

Eval Notes:	On site to conduct a routine hazardous waste inspection. Observed facility and inspected hazardous waste storage area. Facility generates the following hazardous wastes: fuel contaminated liquid and solids Containers of hazardous waste were stored closed and properly labeled. Containers appeared to be in good condition. Manifests were available for review. Facility is assigned and using active EPA ID# CAL000384027. There was no hazardous waste observed in the dumpster.

Eval Notes:	Kanti Macwan (Store Manager) consented to/assisted with this routine, annual, hazardous waste inspection. This business generates fuel contaminated solids and liquids related to gas station sales and UST testing processes; no automotive repair/service processes. I used a hazardous waste compliance checklist to survey haz waste management and to review required record keeping: - steel drums are used to accumulate/store hazardous waste fuel contaminated solids and liquids. - hazardous wastes are stored along an outside wall of the convenience store. - hazardous waste drums marked with required information and closed to prevent spillage. - hazardous waste manifest history was reviewed. - employees are trained/supervised to the level of assigned haz waste management tasks. - haz waste disposed within allowable hazardous waste storage time limits. Contact this agency for haz waste compliance assistance.

Eval Notes:	On site for routine underground storage tank inspection, monitoring system certification, and spill bucket testing. The facility has four double walled tanks monitored by a Veeder Root system. Monitor is operational for audible and visual alarms. The panel reads "all functions normal." Positive shutdown and fail safe programming were verified. ATGs are installed for overfill prevention. All sump and UDC sensors were found to be located at the lowest point of each sump/UDC. The UDC are also equipped float and chain assemblies. All sumps and UDCs appeared to be dry. Fail-safe system functioned properly. Fail-safe system was tested by cutting power to the Veeder Root control panel. Turbine engines shut down when the power was removed. ATGs and an external alarm were installed for overfill protection. ATGs were tested after the inspector left. Spill buckets were visually tested on 4/20/16. This Agency has already received the test results. Leak detectors were tested the [Truncated]

Eval Date:	11-25-2013

KRAFT FOODS (Continued) **S103973702**

Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for the annual hazardous waste (HW) inspection. Permission to inspect granted by Kraft/Carlos Morales. The facility is a packager of Kraft packaged meals. No food is processed at this site, only packaging. Most HWs are from machinery maintenance, refrigerant oil and E-wastes. The lead acid batteries and diesel fuel waste were one time wastes and are deleted on this inspection. This year had a one time generation of heavy metal liquid waste from a storage area clean out. Due to process changes and waste minimization, several HWs (waste oil and alcohol based inks have been reduced significantly). The facility is a small quantity generator (SQG) however, the facility maintains a 90 day disposal cycle. No SB 14 required. All manifests were reviewed and complete. All generator and TSDF copies were on site. All HW drums were stored closed, in secondary containment areas and labeled properly with accumulation dates. All HMBEP were submitted with [Truncated]
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-28-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	INSPECTOR COMMENTS On site for a routine hazardous waste inspection. Consent to inspect was given by Veronica Chaidez, ORM manager. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Manifests were available and reviewed. Employees are reported to be trained. Emergency plan is posted in the maintenance office. The dumpster/enclosure was observed, no signs of dumping.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 03-19-2009
Violations Found: Yes
Eval Type: Construction Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a drive-by inspection of the above facility on March 19, 2009. All industrial activities seem to remain the same and the facility is open for business. An enforcement letter will be sent to the facility notifying them to pay any outstanding invoices or be administratively terminated.
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-06-2010

KRAFT FOODS (Continued) **S103973702**

Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Observed shed where electrical material handling equipment is charged. Bay door is open and inside is an emergency shower with no floor drain. Floor is corroded and dry battery acid is visible along with track-out to ramp leading outside. Contact indicated this area is to be remodeled. Observed 2 scrap metal bins; one with hinged lid, other with no lid. Hinged bin couldn't be closed since large oversized cardboard placed inside prevented this. Other bin contained an unidentified powder at the bottom. Outdoor trash compactor has much staining beneath it; used to wash this area but told not to by fire dept. inspectors. Area is still subject to rainfall, a roof downspout is nearby along with another emergency shower. Observed an oil-water separator dripping water onto parking area asphalt. Separator treats compressor blow-down. Three biocide cartridges on roof; one is open and exposed. SWPPP doesn't show all outdoor industrial process with related BMPs; needs to be updated according to Section A of Permit.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS
Eval General Type:	Case Development Inspection
Eval Date:	08-23-2010
Violations Found:	Yes
Eval Type:	Industrial Storm Water Enforcement Follow-up
Eval Notes:	Battery charging room and ramp are cleaner; contact explained that the floor had been washed and the rinsate collected for disposal. Trash compactor area is also cleaner; discussed relocating roof downdrain away from this area and removing the nearby emergency shower. Contact showed oil absorbent pads that had been purchased for leaking equipment. Scrap metal bins found with closed lids and air compressor has been plumbed to drain to a bucket for manual disposal; a sump/pump is planned for later. Found staining on asphalt leading from mechanical room containing chillers; contact stated that the chillers had been cleaned during routine maintenance. Contact stated that they had also been informed by City inspectors that this discharge was not allowed; Contact was informed that this was a prohibited discharge and a violation. Contact stated that they'll clean up the staining. Outside area is generally neat and orderly.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-20-2012
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Weather: Sunny and cool. SWPPP dated 6/2/1991; updated 4/7/2010. Results for storm water samples taken 11/28/2012 show SC of 6100 and 5720 and pH of 2.03 and 2.07 respectively for discharges at the SE and SW drainage points. Contact was unable to explain the results. Inspection showed no obvious causes but potential pollutant sources are present. Site was found generally neat and orderly except for dried spill of white liquid at south-central personnel door.
Eval Division:	Water Boards
Eval Program:	INDSTW
Eval Source:	SMARTS

KRAFT FOODS (Continued) **S103973702**

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-14-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: The AR 99/00 did not include lab reports. The results were within the benchmark range. The facility was clean with no storage or activities outddor. Some minor housekeeping was needed at the sampling point near the rear of the facility.

FINDS:

Registry ID: 110006487462

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Notes:	INSPECTOR COMMENTS On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by Daniel Williams, general manager. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: -Propane, one, 500 gallon tank Business emergency plan maintained on site. Annual employee training conducted. Site map is confirmed to be accurate on-site. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 181
. Waste name: Other inorganic solid waste

KRYLER CORP (Continued) **1000280929**

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 722
. Waste name: Liquids with cadmium > 100 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE,

KRYLER CORP (Continued) **1000280929**

2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 5854.6

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6834.9

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 6834.9

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 17264.9

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 19614.9

Waste code: D008
Waste name: LEAD
Amount (Lbs): 8500

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

KRYLER CORP (Continued) **1000280929**

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 1574.6

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 1574.6

CERS HAZ WASTE:
Site ID: 42155
CERS ID: 10151967
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 42155
Site Name: KRYLER CORP
Violation Date: 08-15-2016
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 05/11/2017. update chemical inventory
Violation Division: Fullerton City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 42155
Site Name: KRYLER CORP

KRYLER CORP (Continued) **1000280929**

Violation Date:	05-02-2017
Citation:	22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Description:	Failure to inspect weekly areas where hazardous waste containers are stored. The owner or operator must look for leaking containers and for deterioration of containers caused by corrosion or other factors.
Violation Notes:	Returned to compliance on 04/23/2018. -Weekly inspection log did not have a specific section for the hazardous waste containers. -Revise records to document that the hazardous waste containers are being inspected.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS
Site ID:	42155
Site Name:	KRYLER CORP
Violation Date:	04-07-2014
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/07/2014. During the inspection, I located (1) 5 gallon pail that held a chrome grinding filter. It was awaiting transfer to the main HW box. The pail was not labeled with a HW label. Krygier elected to immediately transfer the filter to the main HW box and thereby not require a HW label. This violation was abated during the inspection.
Violation Division:	Orange County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS
Site ID:	42155
Site Name:	KRYLER CORP
Violation Date:	08-15-2016
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 05/11/2017.
Violation Division:	Fullerton City Fire Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	42155
Site Name:	KRYLER CORP
Violation Date:	05-02-2017
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	RCRA Large Quantity Generator Program - Operations/Maintenance - General
Violation Notes:	Returned to compliance on 04/23/2018. -Dilute chrome tank was taken off line, but the tank remains still in the plating area, with some liquid still in the bottom. -Since the tank was taken off line over 90 days ago, the remaining liquid and debris in the tank must be hauled

KRYLER CORP (Continued) **1000280929**

away as hazardous waste. -Cadmium filters were left on the drying racks and are not in a hazardous waste container. -Store hazardous waste in a proper hazardous waste container with labeling.
Violation Division: Orange County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 42155
Site Name: KRYLER CORP
Violation Date: 05-02-2017
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 04/23/2018. -Sand blast media with Cadmium and Chrome heavy metals waste is ot being swept up from below the air compressor. -Regularly sweep up the heavy metal sand blast waste from under the air compressor.
Violation Division: Orange County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 42155
Site Name: KRYLER CORP
Violation Date: 05-02-2017
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 05/02/2017. -Deox 275 gallon tote was not closed while not in use, the was a funnel in the top of the tote. -Funnel was removed and tote was closed on-site, no further corrective action necessary. -Chrome debris waste container did not have a lid on while not actively in use. -Maintain lid on container while not actively in use.

Eval Notes: FA0027330 Kryler Corp. 1217 E. Ash Ave. Fullerton, CA 92831 On site to conduct the annual RCRA LQG hazardous waste inspection. Permission to inspect granted by Kryler/Krygier Jr. During the HW inspection, I determined that the facility has on site: 220 lbs of sodium cyanide. It is exempt from CAL ARP because it is not in a dust form. 50 lbs of cadmium oxide. It is exempt from CAL ARP because it is not in a dust form and is < 100 lbs. A 336 gallon cadmium plating tank (tank # 6) which currently has 16 oz/gallon of sodium cyanide and 5.5 oz/gallon of cadmium oxide. This calculates to 336 lbs of sodium cyanide and 115

KRYLER CORP (Continued) **1000280929**

lbs of cadmium oxide in this tank. Both of these chemicals exceed the 100 lbs reporting limit for the California Accidental Release Prevention Program (CAL ARP). You may either submit a RiskManagement Plan (RMP) within 1 year (4-7-2015) or you may reduce your plating tank to < 100 lbs of cadmium oxide and sodium cyanide (each).

Eval Notes: On site for the annual Hazardous Waste (HW) inspection. Permission to inspect granted by Kryler/Chet Kreiger. This facility is a RCRA Large Quantity Generator (LQG). All HWs are hauled away on a 90 day cycle. Manifests were on site and reviewed. OK. Confirmed in HWTS. All HW tanks/totes/drums were properly labeled and stored closed. No leaks. **NOTE** the rear alley way (rear of 500 block of S. Raymond) had a noticeable amount of powder in the alley. It appears to originate from the auto repair shops and not Kryler. Notified FFD for storm water issues. EPA ID # is correct. Annual training held 5-2015. OC Sanitation District permit is valid. HMBEP has been submitted to FFD but not yet reviewed. Review of facility trash dumpster and facility perimeter were made. No dumping of HW. All wet floors were clean and dry. Updated OCHCA database with CNC machine coolant.

Krygier, quality assurance. Walked throughout the facility. Observed hazardous waste storage areas. A dilute chrome tank was found still located on the plating line, but no longer in service, but liquid was present still within the tank. Spoke with Chet about how once he takes a tank off line, he has 90 days to either drum up the liquid and store it for later use, put it back online, or have it hauled away as hazardous waste. Sand Blast media with Cadmium was behind the air compressor and in some spots around the back area, Chet states that he sweeps up the sand blast at the end of the day, but the sand blast under the air compressor has been accumulating. There was a container that the facility had dumped some chrome debris sludge that Chet stated that they were drying to have hauled away. Spoke with Chet about how drying the [Truncated]

Eval Notes: On site for the annual California Accidental Release Prevention (CALARP) inspection. Permission to inspect granted by Kryler/Chet Krygier. This facility was placed into the CAL ARP inspection program last year for sodium cyanide and cadmium oxide for tank #6. Since then, Kryler has decided to reduce the tank volume to 99 gallons. Lab tests showed the concentrations for NaCn @ 14 oz/gal and CDOx @ 4 oz/gal. This calculates out to 86 lbs of NaCN and 25 lbs. of CDOx. Tank volume was verified during the inspection. Both chemicals are below the TQ and therefore this site is not subject to the CAL ARP inspection program. RUR to remove this from the OCHCA inspection database.

Eval Notes:	FA0027330 Kryler Corp. 1217 E. Ash Ave. Fullerton, CA 92831 On site to conduct the annual RCRA LQG hazardous waste inspection. Permission to inspect granted by Kryler/Krygier Jr. During the HW inspection, I determined that the facility has on site: 220 lbs of sodium cyanide. It is exempt from CAL ARP because it is not in a dust form. 50 lbs of cadmium oxide. It is exempt from CAL ARP because it is not in a dust form and is < 100 lbs. A 336 gallon cadmium plating tank (tank # 6) which currently has 16 oz/gallon of sodium cyanide and 5.5 oz/gallon of cadmium oxide. This calculates to 336 lbs of sodium cyanide and 115 lbs of cadmium oxide in this tank. Both of these chemicals exceed the 100 lbs reporting limit for the California Accidental Release Prevention Program (CAL ARP). You may either submit a RiskManagement Plan (RMP) within 1 year (4-7-2015) or you may reduce your plating tank to < 100 lbs of cadmium oxide and sodium cyanide (each).

Eval Notes:	On site for the annual Hazardous Waste (HW) inspection. Permission to inspect granted by Kryler/Chet Kreiger. This facility is a RCRA Large Quantity Generator (LQG). All HWs are hauled away on a 90 day cycle. Manifests were on site and reviewed. OK. Confirmed in HWTS. All HW tanks/totes/drums were properly labeled and stored closed. No leaks. **NOTE** the rear alley way (rear of 500 block of S. Raymond) had a noticeable amount of powder in the alley. It appears to originate from the auto repair shops and not Kryler. Notified FFD for storm water issues. EPA ID # is correct. Annual training held 5-2015. OC Sanitation District permit is valid. HMBEP has been submitted to FFD but not yet reviewed. Review of facility trash dumpster and facility perimeter were made. No dumping of HW. All wet floors were clean and dry. Updated OCHCA database with CNC machine coolant.

Eval Notes:	INSPECTOR COMMENTS On-site to conduct follow-up inspection, met with Chet to conduct follow-up walk through. Facility has updated their inspection log sheet to include the hazardous waste secondary containment areas and the hazardous waste storage areas. The liquid in the tank that was taken offline has been emptied and hauled away as hazardous waste, the manifest was available for review. Chrome debris waste was placed in a properly closed and labeled drum. All waste containers are closed and properly labeled. All dust from the san blasting unit outside is being swept daily and the area under the air compressor was clean. Violations I316, I333, I070, and violation I562 have all been corrected. No outstanding violations at this time.

Eval Notes: On site for the annual California Accidental Release Prevention (CALARP) inspection. Permission to inspect granted by Kryler/Chet Krygier. This facility was placed into the CAL ARP inspection program last year for sodium cyanide and cadmium oxide for tank #6. Since then, Kryler has decided to reduce the tank volume to 99 gallons. Lab tests showed the concentrations for NaCn @ 14 oz/gal and CDOx @ 4 oz/gal. This calculates out to 86 lbs of NaCN and 25 lbs. of CDOx. Tank volume was verified during the inspection. Both chemicals are below the TQ and therefore this site is not subject to the CAL ARP inspection program. RUR to remove this from the OCHCA inspection database.

Environmental Interest/Information System

AIR EMISSIONS CLASSIFICATION UNKNOWN

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RISK AND TECHNOLOGY REVIEW

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

WDS:

Name:	KRYLER CORP.
Address:	1217 E ASH AVE
City:	FULLERTON
Facility ID:	Santa Ana River 30I003989
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	8
Facility Telephone:	7148719611
Facility Contact:	CHET KRYGIER

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Notes: FA0027330 Kryler Corp. 1217 E. Ash Ave. Fullerton, CA 92831 On site to conduct the annual RCRA LQG hazardous waste inspection. Permission to inspect granted by Kryler/Krygier Jr. During the HW inspection, I determined that the facility has on site: 220 lbs of sodium cyanide. It is exempt from CAL ARP because it is not in a dust form. 50 lbs of cadmium oxide. It is exempt from CAL ARP because it is not in a dust form and is < 100 lbs. A 336 gallon cadmium plating tank (tank # 6) which currently has 16 oz/gallon of sodium cyanide and 5.5 oz/gallon of cadmium oxide. This calculates to 336 lbs of sodium cyanide and 115 lbs of cadmium oxide in this tank. Both of these chemicals exceed the 100 lbs reporting limit for the California Accidental Release Prevention Program (CAL ARP). You may either submit a RiskManagement Plan (RMP) within 1 year (4-7-2015) or you may reduce your plating tank to < 100 lbs of cadmium oxide and sodium cyanide (each).

Eval Notes: On site for the annual Hazardous Waste (HW) inspection. Permission to inspect granted by Kryler/Chet Kreiger. This facility is a RCRA Large Quantity Generator (LQG). All HWs are hauled away on a 90 day cycle. Manifests were on site and reviewed. OK. Confirmed in HWTS. All HW tanks/totes/drums were properly labeled and stored closed. No leaks. **NOTE** the rear alley way (rear of 500 block of S. Raymond) had a noticeable amount of powder in the alley. It appears to originate from the auto repair shops and not Kryler. Notified FFD for storm water issues. EPA ID # is correct. Annual training held 5-2015. OC Sanitation District permit is valid. HMBEP has been submitted to FFD but not yet reviewed. Review of facility trash dumpster and facility perimeter were made. No dumping of HW. All wet floors were clean and dry. Updated OCHCA database with CNC machine coolant.

Eval Notes: On site for the annual California Accidental Release Prevention (CALARP) inspection. Permission to inspect granted by Kryler/Chet Krygier. This facility was placed into the CAL ARP inspection program last year for sodium cyanide and cadmium oxide for tank #6. Since then, Kryler has decided to reduce the tank volume to 99 gallons. Lab tests showed the concentrations for NaCn @ 14 oz/gal and CDOx @ 4 oz/gal. This calculates out to 86 lbs of NaCN and 25 lbs. of CDOx. Tank volume was verified during the inspection. Both chemicals are below the TQ and therefore this site is not subject to the CAL ARP inspection program. RUR to remove this from the OCHCA inspection database.

activities were performed indoor. The SWPPP was old. Staff asked the contact to review and update the plan at least once a year. An etchant drum was found near the door that could pose a risk of leaking to the ground outside. Two containers of a colored liquid were found with no secondary containment. Two buckets of colored mop water were placed outside. The contact said that he would move these two containers and the etchant drum inside. The other two containes would be picked up by a wastehauler. Staff asked that the sampling point be changed to a corner point near their back gate to make sure that the sample representing the runoff from the facility. Staff asked the contact to mail in the photos of the site after the defificencies were fixed. By mailing in the pictures, the facility can avoid to have an NOV issued. The contact agreed to do that.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided

JEFF HUNG PHU (Continued) **U001576978**

the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,?2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October?1,?2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: FAILURE TO PERFORM OVERFILL TESTING AS REQUIRED. 1/2/2019: OVERFILL TESTING PERFORMED AND ALL 3 TANKS FAILED.

Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by store manager. This is a gas station. It generates waste gas station solids (absorbent, hoses etc.) and liquids (UST sump testing). The facility is a Conditionally Exempt Small Quantity Generator (CESQG). EPA ID # is correct. The HW must be disposed within 90 days of reaching 220 lbs/27 gallons. The business is currently on an annual HW haul away cycle. Manifests were reviewed. OK. (2) 55 gallon drums on site. Both are stored closed and properly labeled with HW labels and beginning accumulation dates (4-1-16). HMBEP is on file with the FFD. No HW in the municipal trash nor on the facility perimeter.

Eval General Type:	Other/Unknown
Eval Date:	10-04-2013
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On site inspection for follow up to the 7-1-13 hazardous waste inspection. Permission to inspect granted by Mike Kough. The 7-1-13 inspection listed violation # W002/W010 and W013. To date, the business has not labeled the 2 55-gallon drums of waste fuel/absorbent, no beginning accumulation date nor reactivated the EPA ID #. Discussed with the owner. He has made arrangements for the drums to be disposed as HW but has been unable to obtain his EPA ID #. He had been mistakenly calling the DTSC waste minimization unit. I gave him the DTSC, EPA ID # unit. Have your EPA ID # obtained, have the drums labeled and properly disposed of within 15 days or you may receive a civil penalty. Have all violations abated by 10-23-13.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by store manager. This is a gas station. It generates waste gas station solids (absorbent, hoses etc.) and liquids (UST sump testing). The facility is a Conditionally Exempt Small Quantity Generator (CESQG). EPA ID # is correct. The HW must be disposed within 90 days of reaching 220 lbs/27 gallons. The business is currently on an annual HW haul away cycle. Manifests were reviewed. OK. (2) 55 gallon drums on site. Both are stored closed and properly labeled with HW labels and beginning accumulation dates (4-1-16). HMBEP is on file with the FFD. No HW in the municipal trash nor on the facility perimeter.

Eval General Type:	Other/Unknown
Eval Date:	10-04-2013
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On site inspection for follow up to the 7-1-13 hazardous waste inspection. Permission to inspect granted by Mike Kough. The 7-1-13 inspection listed violation # W002/W010 and W013. To date, the business has not labeled the 2 55-gallon drums of waste fuel/absorbent, no beginning accumulation date nor reactivated the EPA ID #. Discussed with the owner. He has made arrangements for the drums to be disposed as HW but has been unable to obtain his EPA ID #. He had been mistakenly calling the DTSC waste minimization unit. I gave him the DTSC, EPA ID # unit. Have your EPA ID # obtained, have the drums labeled and properly disposed of within 15 days or you may receive a civil penalty. Have all violations abated by 10-23-13.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95

JEFF HUNG PHU (Continued) **U001576978**

percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,?2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October?1,?2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: FAILURE TO PERFORM OVERFILL TESTING AS REQUIRED. 1/2/2019: OVERFILL TESTING PERFORMED AND ALL 3 TANKS FAILED.

Eval Notes:	On site for the triennial Hazardous Waste (HW) inspection. Permission to inspect granted by store manager. This is a gas station. It generates waste gas station solids (absorbent, hoses etc.) and liquids (UST sump testing). The facility is a Conditionally Exempt Small Quantity Generator (CESQG). EPA ID # is correct. The HW must be disposed within 90 days of reaching 220 lbs/27 gallons. The business is currently on an annual HW haul away cycle. Manifests were reviewed. OK. (2) 55 gallon drums on site. Both are stored closed and properly labeled with HW labels and beginning accumulation dates (4-1-16). HMBEP is on file with the FFD. No HW in the municipal trash nor on the facility perimeter.

Eval Date:	10-04-2013
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On site inspection for follow up to the 7-1-13 hazardous waste inspection. Permission to inspect granted by Mike Kough. The 7-1-13 inspection listed violation # W002/W010 and W013. To date, the business has not labeled the 2 55-gallon drums of waste fuel/absorbent, no beginning accumulation date nor reactivated the EPA ID #. Discussed with the owner. He has made arrangements for the drums to be disposed as HW but has been unable to obtain his EPA ID #. He had been mistakenly calling the DTSC waste minimization unit. I gave him the DTSC, EPA ID # unit. Have your EPA ID # obtained, have the drums labeled and properly disposed of within 15 days or you may receive a civil penalty. Have all violations abated by 10-23-13.
Eval Division:	Orange County Environmental Health

ORANGE COUNTY NORTH BASIN - FULLERTON CROSSINGS DEVELOPMENT (Continued) **S122356438**

Status Date:	07/03/2009
Global Id:	T0605993569
Lead Agency:	SANTA ANA RWQCB (REGION 8)
Lead Agency Case Number:	Not reported
Latitude:	33.866077
Longitude:	-117.885546
Case Type:	Cleanup Program Site
Case Worker:	PAH
Local Agency:	FULLERTON, CITY OF
RB Case Number:	08FulFULCr08
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Polychlorinated biphenyls (PCBs), Chromium, Chromium VI, Ethylbenzene, Naphthalene, Waste Oil / Motor / Hydraulic / Lubricating
Site History:	For additional information and reports on this address see also Aeroject General, 601 S. Placentia, Fullerton, (SL0605973469) The Fullerton Crossings development is located at the site of a former manufacturing facility that was operated by Aerojet. Four underground storage tanks (USTs) were removed January 30, 2008. Stained soil was observed below one of the USTs. Soil samples were collected and analyzed for total petroleum hydrocarbons (TPH), volatile organic compounds (VOC) and metals TPH, tetrachloroethene (PCE) and low concentration of various metals were detected in some of the soil sample. In July 2009, contaminated soil was found during excavation of a trench for a storm drain along the southwestern boundary of the site. The trench was originally designed to extend to 12 feet bgs. Odorous and stained soil was observed at approximately 6 feet bgs. Soil samples were collected at two, four and six feet bgs along the alignment of the trench. The samples were analyzed for VOCs and TPH. TPH and VOCs, specifically tetrachloroethylene (PCE) and trichloroethylene (TCE), were detected in the soil samples. Tthe highest concentrations detected were - PCE 12,200 microgram/kilogram (a%g/kg) at 2 feet below grade surface (bgs), TCE 2080 ug/kg at 6 feet bgs, and TPH 27,200 milligrams/kilograms (mg/kg) at 6 feet bgs. In August 2009, eight soil borings were drilled to depths of 15 and 25 ft bgs within and adjacent to the trench boundary, to determine the extent of the contaminated soil in the vicinity of the trench. Selected samples were submitted for VOC and TPH analysis. The highest concentrations of PCE, TCE and TPH detected in the soil samples are: PCE 1020 a%g/kg at 15 ft. bgs, TCE 106 a%g/kg at 15 ft. bgs, TPH 8040 mg/kg at 10 ft. bgs. The highest detected concentrations of PCE, TCE and TPH were from the soil samples that were collected closest to the fence line. Soil excavated from northside
