June 29, 2020

Mr. Darrell Butler
3241 Alta Laguna Boulevard
Laguna Beach, CA 92651
Attention: Darrell Butler

Subject: Revisions to the October 19, 2018 Sycamore Hills Project Phase I ESA

Dear Mr. Butler:

The City of Riverside has requested revisions to the October 19, 2018 Phase I Environmental Site Assessment. Given the age of this document the City asked that a new site inspection be performed to identify current site conditions. While conducting the Site inspection, additional interviews were conducted with nearby businesses to query their knowledge of the presence of potential recognized environmental conditions (hazardous materials) on the site.

2020 Site Inspection

The contents of this revised document are:

- New Site Inspection Discussion (a second Section 6)
- New Site Photos (with relevant supporting figures from the earlier report)
- New Interviews (a second Section 7)
- Revision Notes (mostly regarding Section 5 of the 2018 Phase I ESA Report)
- The Revised Report with Requested Revisions Made

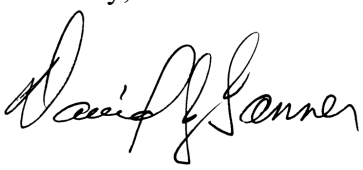

Following the June 2020 site inspection and new interviews our original conclusion remains. There is no indication of recognized environmental conditions on the Subject Property.

2018 Phase I Report revisions

The majority of revisions to the original Phase I report were minor, aiding in readability. Deleted text is not indicated. Inserted or revised text is shown in a dark red color. Page boundaries after the text was modified were not adjusted. However, a new table of contents was generated.

None of the textual revisions changed the conclusion of the original report (no indication of recognized environmental conditions on the subject property).

We thank you for this opportunity to be of service. Should you have questions or need additional information, please call us at 949-646-8958.
Sincerely,

David J. Tanner
President

6.0 - SITE RECONNAISSANCE

6.1 - Objectives

The objective of a site reconnaissance is to obtain information indicating the likelihood of Recognized Environmental Conditions in connection with the Subject Property.

6.2 - Observations

A Site Reconnaissance was performed by David J. Tanner on June 23, 2020, beginning at approximately 11:00 am. The weather was clear. Visibility was excellent. Temperature was approximately 95° F. There was a roughly one knot breeze.

The entire Subject Property was traversed on foot looking for Recognized Environmental Conditions. No signs of Recognized Environmental Conditions were observed. Photographs were taken during the Site Reconnaissance to document the observed conditions (see Figures 5 through 20 shown earlier).

Legal Description: Assessor Parcels 263-060-026 (17.62 Acres), 263-060-024 (17.44 Acres), and 263-060-022 (13.59 Acres).

Location: The Property occupies undeveloped land adjacent to the north side of Alessandro Blvd, near the intersection of Barton Street, in Riverside, California 92508. The Site is bordered by undeveloped open space land to the west, north and east. It is bordered by Alessandro Blvd. and the Citywide Self-Storage facility on the south.

Description: The Property occupies 48.65± gross acres. On-site topography consists of rolling undeveloped land. Maximum topographic relief is estimated at 30 feet. There are segments of several dirt trails including Meadow Crossing Trail and Dookie's Playground Loop which traverse the Property. The northern unimproved extension of Barton Street traverses the western boundary of the Property. A metal fence parallels the western side of the extension of Barton Street. It is not known if this is on or off the Subject Property. An un-named dirt road/trail traverses the Property in an east/west direction. Vegetation on the Property consists of indigenous grasses. Several ephemeral drainages containing riparian vegetation exist on the Property. No surface water was observed on the Property. The Site appeared clean and well maintained with the exception of trash shown on Photo 27 (Figure 18). This is the same trash that was shown on Photo 27 (Figure 20) of the earlier October 19, 2018 Phase I report. No additional new areas of trash were observed.

Endangered Species: No wildlife was observed onsite during the site inspection. Signs warning of rattlesnakes were observed on the Property.

Vegetation: Vegetation on the Property consists of indigenous grasses. Several ephemeral drainages containing riparian vegetation exist on the Property.

Groundwater: No groundwater wells were observed on the Subject Property.

Odors: No odors were detected.

Soils: No sign of stressed vegetation or soil staining was observed on the Subject Property. No soil stockpiles were observed on the Property. Other than the possibility of grading for the apparent future extension of Barton Street and the un-named dirt road/trail trending east/west across the Property, no sign of grading was observed.

Staining: No soil staining, debris, dead vegetation or other signs of recognized environmental conditions were observed on or adjacent to the Subject Property.

Other Indicators: No dead vegetation, dead animals or noxious odors were noted. No visual evidence of above or below ground tanks or other signs of commercial or industrial activity was noted. No potential hazardous substances or industrial hazardous waste impacts were seen on the Subject Property. No electrical transformers were observed. There was no visual indication that hazardous substances or petroleum products ever existed on the Subject Property.

6.3 - Interior Observations

There are no structures on the Subject Property.

7.0 - INTERVIEWS

Four interviews were conducted at the time of the June 23, 2020 Property Inspection. These are people who were found near the Subject Property at the time of the Site Inspection.

Mr. Rigo Valdez, Co-owner of Victoria Cleaners- Tailor, located at 1015 E. Alessandro Blvd., Ste. 180, Riverside, CA 92508 was interviewed. Mr. Valdez has operated this business for approximately 11 years. Mr. Valdez had no knowledge of hazardous materials or recognized environmental conditions having ever existed on the Property.

Ms. Karen Dicey, Owner of Angelica's Florist and Gifts, located at 1015 E. Alessandro Blvd., Ste. 150, Riverside, CA 92508 was interviewed. Ms. Dicey has operated this business for approximately 3 years. Ms. Dicey had no knowledge of hazardous materials or recognized environmental conditions having ever existed on the Property.

Ms. Diana Khovry, owner of OsteoStrong, located at 1015 E. Alessandro Blvd., Ste. 120, Riverside, CA 92508 was interviewed. Ms. Khovry has operated this business for approximately 7 months. Ms. Khovry had no knowledge of hazardous materials or recognized environmental conditions having ever existed on the Property.

Jackie Brown, Manager of Citywide Self-Storage located at 1000 E. Alessandro Blvd, Riverside CA 92508 was interviewed. Ms. Brown has managed this business for approximately 3 years. Ms. Brown had no knowledge of hazardous materials or recognized environmental conditions having ever existed on the Property.

NOTES REGARDING THE REVISIONS

A copy of the original Microsoft Word file for the October 19, 2018 Phase I was requested by the City of Riverside. Normally, EARSI delivers its reports as PDF files. The Word file was sent and was returned to EARSI with a series of comments embedded into the file. These comments are discussed below.

A copy of EARSI's original October 19, 2018 Phase I Word file was then edited to make the requested changes. In some cases, our response is covered fully in these notes with no revisions made to the document. The revised October 19, 2018 Phase I ESA for the Sycamore Hills Project is attached following these notes. No change to the conclusion of the 2018 Phase I ESA report is proposed.

Deleted text is not indicated. Inserted or revised text is shown in a dark red color. Page boundaries after the text was modified were not adjusted. However, a new table of contents was generated changing some page numbers.

Responses to the comments are given in the order they appear in the document edited by the City of Riverside. Because page boundaries have changed due to these edits, the page numbers given below are from the original document. The page numbers for the revised document will always be equal to or greater than the page numbers given below.

Title Page - The zip code is shown as 92506 and should be 92508.

Given the development of the former March Air Force Base land, a new zip code (92508) has recently been created. The Subject Property is now in the new zip code 92508. This had no impact on the October 19, 2018 Phase I report. The databases are searched either by address or by latitude and longitude and not by zip code. A wrong zip code (or one recently changed as in this case) would have no effect on the result of the database search as evidenced by the fact that the sites found are located mostly in the new zip code 92508.

Also, on the titles page was the question of whether anything has changed on the Subject Property in the time since the October 19, 2018. In response to this, a new Site Inspection was performed. The results with photographs were detailed earlier in this document.

Page 1 - Minor wording changes were requested and made.

Page 2 - The word "either" was replaced with the word "this". The phrase "None of the persons interviewed" was left in place. This is an executive summary. The details for these interviews are found in Section 7. All other items in the executive summary have been similarly summarized.

Page 4 - The word "Thus" has been removed as requested.

Page 5 - The phrase "east of Barton Street" was added. The sentence, "The dominant use of the area was the former March AFB, centered well to the southeast" has been replaced with,

> "While the property boundary for the 12-square-mile former March AFB comes up to the southern boundary of the Subject Property, the nearest places found to have contamination (and were cleaned up) are located roughly one mile southeast of the Subject Property. These sites are further away than the required search distances for a Phase I ESA. While the EDR search did not find these areas because they are outside of the required search distances, EARSI has knowledge of this region having performed several Phase I Environmental Site Assessments for properties closer to March AFB than the Subject Property."

This change answers the question that was asked by the City. However, a more detailed discussion of this is already present in Section 5 of the original document, which also contains maps showing the Subject Property in relation to the March AFB cleanup sites 5, 25 and 30, the nearest contamination to the Subject Property. Maps for this appear on Figures 26, 27 and 28 in the original document.

Page 33 - The query regarding Map ID. Figures 23 and 24 located on the prior two pages are the maps that show where the EDR MAP IDs are mapped. These figures already existed. They are taken directly from Appendix I. The maps in Appendix I are higher resolution than the copies placed on Figures 23 and 24 should you wish to see them at higher resolution on your screen. Also, as these sites are discussed following the table on page 33, the writeups for each of these sites (already present later in the document) give these EDR Map IDs.

Further down on Page 33, the map on Figure 25 does show the GeoTracker markers. They are the small dark red squares. Instructions are given in this paragraph to reconstruct the Figure 25 image using GeoTracker, should you wish to examine these sites in more detail or with the satellite photo. The main text for a Phase I ESA is a **summary** of the EDR database search. EARSI is not required to visit GeoTracker to write a Phase I report. We do this as an extra service to our customers. There is not, and would not be, a one to one correspondence between the EDR and GeoTracker markers because the search distance we have given to GeoTracker is larger than the required Phase I search distances (different for the various databases) (as stated) which means GeoTracker will find more sites with RWQCB cases. In addition, GeoTracker only looks at (known) sites where groundwater contamination might be possible. In contrast, while in addition to searching the GeoTracker database, EDR also searches a range of other databases thus finding sites GeoTracker would not find. One would not expect the two lists to match. There is no correspondence between EDR and GeoTracker IDs. Also, the two lists of addresses are handled fully in the text.

Note that 1200 is not "sf" (square feet). It is linear feet. This length is the distance (radius) from a center point where the smallest possible circle fully encloses the Subject Property. To get this point, we adjust (iterate) the latitude and longitude and the radius until we find a good bounding circle. We then go an additional 5280 feet (one mile) beyond this bounding circle (5280 + 1200 = 6480) so that we check at least one mile from every point in the Subject Property. 6480 feet is the distance from the approximate center of the Subject Property that is being searched. I have added in the dash in "1200-foot" as requested.

Page 35 - The figure is already included. It is Figure 25. The markers are the little red squares. This map is 2.4 miles wide. It is very low resolution. That is why we give instructions to go to GeoTracker directly. A Phase I ESA is a **summary**. If you wish to see the figure in greater detail, you can use the instructions to go to the GeoTracker website where you will be able to click on the markers on the figure generated to get detailed information.

Page 40 - A Phase I ESA is a **summary**. The report as originally written is in accord with the ASTM standard and also would have been if the indented paragraph on page 40 listing the nature of the events had not been written. The paragraph was put in originally to give an indication of the nature of incidents. The dates for these events are in Appendix I, which is the complete EDR database search report. However, I will read the Appendix again and provide them for you (in the order of the quoted strings).

10/15/2007
9/27/2007
7/19/2011
9/13/2007
3/11/2008
12/29/2011
2/8/2010
2/7/2008
7/7/2016
1/26/2010
8/1/2010

These reports are from the CMIRS database. These are minor incidents. They are generally cleaned up immediately (and the site continues its operation). If a more serious cleanup is needed, then a case report would be opened on either GeoTracker or Envirostor. Since none of these incidents was serious enough to warrant a further report, is it appropriate to conclude that satisfactory cleanup has occurred and the site does not raise a concern for the Subject Property.

Page 44 - The zip code issue was addressed earlier. Zip code 92506 is adjacent to the northern boundary of the Subject Property and the Subject Property was included in zip code 92506 until recently. While dates are not given by the EDR database search report for the radon tests, it is reasonable to assume that most of these tests were performed while the Subject Property was still part of 92506. By the same reasoning, if zip code 92508 is recent, very few reports would have accrued. Radon reporting is not required for a Phase I ESA and Section 13 of the original document states, "The Subject Property is in an area considered to have a low occurrence of radon; however, radon levels are site-specific and only testing can determine the actual radon level."

Page 46 - The phrase "none of these sites" refers to the markers on Figures 31 and 32 that are within the required search distances for a vapor encroachment analysis. These sites were considered in the analysis earlier in Section 5. They are the nearest sites to the Subject Property and are listed in the table on page 33. As the site by site write-ups conclude, there was no concern

discovered by the EDR database search or GeoTracker that might provide a vapor encroachment problem. The complete VEC report is attached to the Phase I as Appendix VI.

Page 51 - I don't have this information. To prepare this current document, I called 951-826-5371 again. It rang without being answered or going to a machine. The likely case, which occurs occasionally when writing a Phase I ESA, was that the call was picked up by a person who after I asked my question (identifying myself and the Subject Property), identified themselves as: 1) the person who would know about this property given familiarity with other development in the area, 2) that they were not aware of a problem with the Subject Property and 3) that they did not have time to chat further. It happens. So, I let them go without getting their name. The original call would have been made on the day the report was dated or the day before, which means Thursday, October 18, 2018 or Friday, October 19, 2018.

"Others" - "how were these people chosen?" These were people working in businesses near to the Subject Property (and thus had familiarity with the area) who were available at the time of the Site Inspection and were willing to answer questions.

1.0 - EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) Update has been requested as part of the due diligence investigation for a potential real estate transaction or for development of the Subject Property (APNs 263-060-022, 263-060-024 and 263-060-026) and was prepared in accordance with generally accepted industry standards and ASTM Standard E-1527-13.

A Phase I ESA identifies, to the extent feasible, Recognized Environmental Conditions in connection with the Subject Property, via records review, site reconnaissance, interviews and through evaluation and report preparation. The scope of this inquiry is to perform the research and reporting tasks appropriate to support the user's ability to qualify for the innocent landowner defense under CERCLA. No subsurface site investigation was performed or is implied.

No existing Recognized Environmental Conditions were identified on the Subject Property.

Legal Description and Location

The Subject Property consists of three contiguous parcels Assessor Parcel Numbers (APNs) 263-060-022, 263-060-024 and 263-060-026. The Subject Property is on the northern side of East Alessandro Blvd, Riverside, California roughly 1.25 mile west of Interstate 215 and does not yet have a street address.

Site Description

The Property occupies 48.65± gross acres. On-site topography consists of rolling undeveloped land. Maximum topographic relief is estimated at 30 feet. There are several dirt trails traversing the Property. The northern unimproved extension of Barton Street forms the western boundary of the Property. The Site appeared clean and well maintained with the exception of trash shown on Photo 27 (Figure 20). The Subject Property is bordered by undeveloped open space to the north and east, Alessandro Blvd. and commercial and residential uses to the south, and Commercial/Industrial uses border to the west.

Records Search

Environmental Data Resources, Inc. (EDR) searched available environmental records to locate properties reported as possibly having Recognized Environmental Conditions that might impact the Subject Property. No reports for the Subject Property were found by the EDR search. The search flagged 23 reports and Geotracker flagged 14 reports for nearby sites. Upon examination, none of these reports raised an environmental concern on or under the Subject Property. No nearby sites were found that might contribute a vapor encroachment concern.

Historical Aerial Photographs

Aerial Photos starting in 1938 show the Subject Property as open space with dirt roads/paths crisscrossing the area. Aerial photos show the adjoining properties initially as disturbed open space with the current uses of neighboring parcels gradually filling in. The dominant use of the area was the former March AFB, centered well to the southeast. Most of the land from March AFB has been cleaned and turned over for other uses.

Other Sources

Historic topographic maps, phone directories and other sources are consistent with the history gleaned from aerial photos, records searches and the site visit.

Site Reconnaissance

David Tanner performed a site reconnaissance on October 04, 2018. No evidence of environmental concerns was observed during this visit.

Interviews

None of the persons interviewed had knowledge of hazardous materials above de minimus quantities or recognized environmental conditions having existed on the Subject Property.

Vapor Encroachment

There were no potential emission sources discovered within the specified distances on which to perform a Vapor Encroachment Condition analysis. There does not appear to be a concern for the Subject Property due to vapor encroachment from nearby sources.

Findings, Opinion, Conclusion

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM E-1527-13 for the Subject Property described herein. Based on records searches, interviews, aerial photos and Site Reconnaissance, this assessment revealed no evidence of Recognized Environmental Conditions on the surface or in the groundwater below the Subject Property nor is vapor encroachment likely from off-site sources. There is no evidence that hazardous substances or petroleum products above de minimus quantities existed on the Subject Property.

Data Gaps

This Environmental Site Assessment was performed in accord with ASTM E-1527-13 standards. Historic aerial photographs and other sources establish the Subject Property as disturbed open space absent of structures continuously from before 1940 until the present. All data that was requested has been received. There are no “data gaps.”

Additional Issues

No soil testing, subsurface testing or radon testing was performed as part of this Phase I ESA Update. Aerial photos establish the Subject Property as never having been graded. There is no evidence that buildings or water wells ever existed on the Subject Property.

2.0 - INTRODUCTION

2.1 - Objective

The purpose of this ESA is to identify, to the extent feasible, recognized environmental conditions in connection with the Property, via records review, Site reconnaissance, interviews and through evaluation and report preparation.

2.2 - Scope of Services

The scope of this inquiry was to perform those research and reporting requirements that may support the user's ability to qualify for the innocent landowner defense under CERCLA. No subsurface site investigation was performed or is implied.

2.3 - Significant Assumptions

Significant among the assumptions are that the records accessed herein are sufficiently accurate to reasonably ascertain the current condition of the Property with respect to presence of hazardous substances. This inquiry is not exhaustive; that is, it does not identify, obtain or review every possible record that might exist with respect to a property. However, all reasonably ascertainable records were reviewed by the EDR report.

2.4 - Limitations and Exceptions

The conclusions and opinions developed herein were based in part on interviews, records and reports provided by others and on our professional judgment. Thus, the assessment contained herein is only valid as of the date of this report's investigations and may require an update to reflect additional sampling, testing or other information. No guarantee of the results of this study is made or implied. Our professional services were performed in accordance with the prevailing standard of care as practiced by other environmental professionals in this area of California. We make no other warranty, either expressed or implied.

2.5 - Special Terms and Conditions

No special terms or conditions were included in this Phase I ESA.

3.0 - SITE DESCRIPTION

3.1 - Legal Description and Location

The Subject Property includes Assessor Parcel Numbers (APNs) 263-060-022, 263-060-024 and 263-060-026. The Subject Property is on the northern side of East Alessandro Blvd, Riverside, California, east of Barton Street, roughly 1.25 mile west of Interstate 215, and does not yet have a street address. Figure 1 shows the Subject Property on its Assessor Map as screen captured from the Riverside County APN Mapping website (http://mmc.rivcoit.org). Regional and Vicinity Maps are shown on Figures 2 and 3. Figure 4 shows a USGS topographic map. Figure 5 shows satellite photos. Figure 6 shows a photo location map. Site Photographs appear on Figures 7 through 22.

3.2 - Current Use of the Subject Property

The Property occupies 48.65± gross acres. On-site topography consists of rolling undeveloped land. Maximum topographic relief is estimated at 30 feet. There are several dirt trails traversing the Property. The northern unimproved extension of Barton Street forms the western boundary of the Property. A metal fence parallels the western side of the Barton Street extension off the Property. An un-named dirt road/trail traverses the Property in an east/west direction. The Site appeared clean and well maintained with the exception of trash shown on Photo 27 (Figure 20) .

3.3 - Past Uses of the Subject Property

Aerial Photos starting in 1938 show the Subject Property as open space with dirt roads/paths crisscrossing the area.

3.4 - Current Uses of Adjoining Properties

The Subject Property is bordered by undeveloped open space to the north and east. Alessandro Blvd. and residential uses border to the south. Commercial/Industrial uses border to the west.

3.5 - Past Uses of Adjoining Properties

Aerial photos show the adjoining properties initially as disturbed open space with the current uses of neighboring parcels gradually filling in.

3.6 - Current or Past Uses in the Surrounding Area

While the property boundary for the 12-square-mile former March AFB comes up to the southern boundary of the Subject Property, the nearest places found to have contamination (and were cleaned up) are located roughly one mile southeast of the Subject Property. These sites are further away than the required search distances for a Phase I ESA. While the EDR search did not find these areas because they are outside of the required search distances, EARSI has knowledge of this region having performed several Phase I Environmental Site Assessments for properties closer

to March AFB than the Subject Property. Most of the land from March AFB has been cleaned and turned over for other uses.

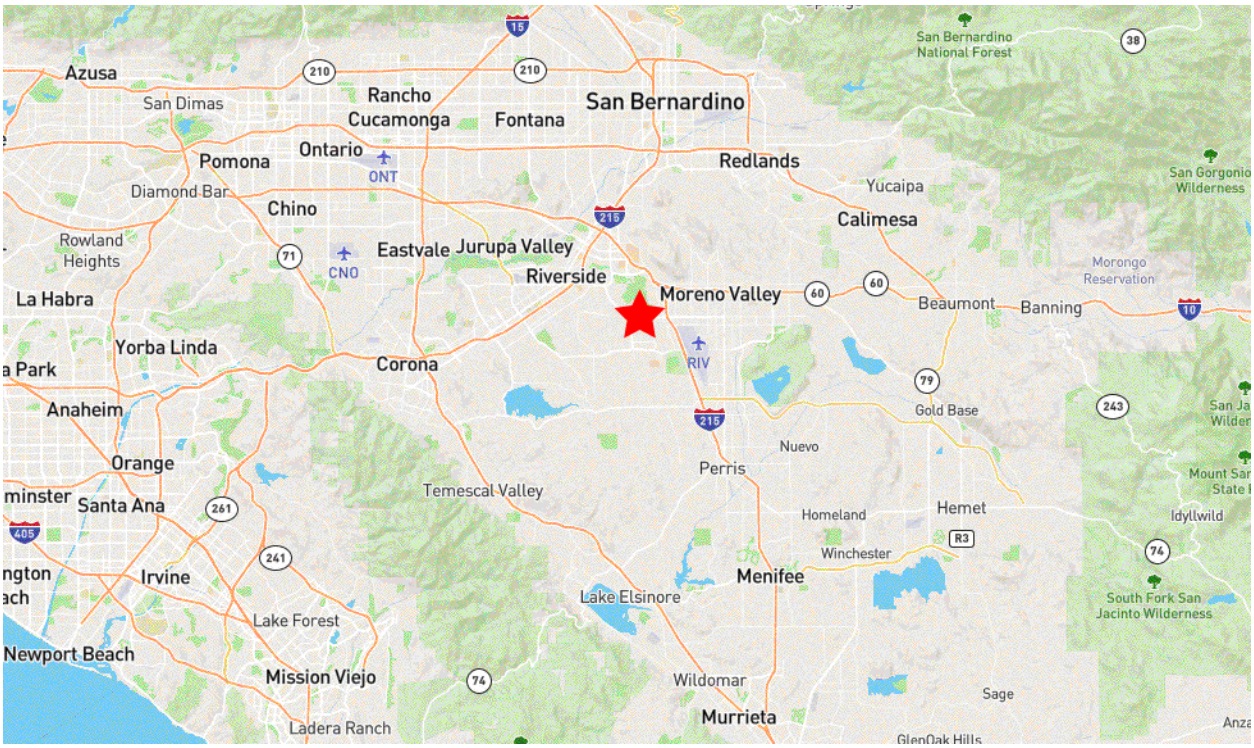

3.7 - Geologic, Hydrogeological, Hydrologic, and Topographic Conditions

The Subject Property is low rolling hills that drain toward the northeast. No surface water was observed on the Property.

Figure 21 - Site Photos 29 & 30

Figure 22 - Site Photos 31 & 32

4.0 - USER PROVIDED INFORMATION

4.1 - Title Records

The Subject Property is owned by Mr. Darrell Butler. The address is 3241 Alta Laguna Blvd., Laguna Beach, CA 92651.

4.2 - Liens or Activity and Use Limitations

Mr. Butler was interviewed on October 18, 2018. According to Mr. Butler, there are no Liens or Activity and Use Limitations on the Subject Property.

On the Riverside County Map My County website, there is no indication of Liens or Activity and Use Limitations on the Subject Property.

4.3 - Specialized Knowledge

Mr. Butler stated he had no specialized knowledge of recognized environmental conditions or concerns existing on the Subject Property.

4.4 - Valuation Reduction for Environmental Issues

According to Mr. Butler there has been no valuation reduction for the Subject Property due to environmental issues and the value of the Subject Property is approximately the same as for comparable parcels in the general area.

4.5 - Owner, Occupant Information

There are no residents on the Subject Property. Owner information is given above.

4.6 - Reasons for Performing Phase I ESA

The reason for performing this Phase I ESA Update is to provide the user (property owner, buyer, lender or other concerned groups) with an assessment of the potential for recognized environmental conditions or hazardous materials to exist at or above de minimus quantities on the Subject Property.

5.0 - RECORDS REVIEW

5.1 - Objective

The purpose of the records review is to obtain and examine records that will help identify recognized environmental conditions in connection with the Subject Property.

5.2 - Standard Environmental Record Sources

Regulatory Agency Record Search

A computer search of regulatory agency databases was performed by Environmental Data Resources (EDR) to locate properties reported as hazardous material generators, known sites with above or below ground storage tanks, sites having leaking storage tanks, sites where hazardous material spills have occurred or for other criteria in accord with ASTM Standard Practices for Environmental Site Assessments, E-1527-13.

Regulatory records contain considerable information about various environmental concerns. In some instances, there may be no Recognized Environmental Condition or impairment regarding the Subject Property arising from these listings because A) the flagged sites are sufficiently distant from the Subject Property, B) the flagged sites are down-gradient from the Subject Property so groundwater contamination below these locations would be carried away from the Subject Property given the direction of groundwater flow, C) the concern has been remediated to "case closed" status as determined by relevant governmental review agencies indicating minimal remaining contamination or D) for other reasons. In this section, all reports discovered by the EDR search are reviewed.

Information such as depth and gradient of groundwater, direction and distance from the Subject Property and current status of the listed property are considered when determining potential environmental impacts to the Subject Property. The complete EDR database search document is reproduced as Appendix I for further review and interpretation. The 1-Mile and 1/4-Mile Radius Maps from the Subject Property boundary generated during the regulatory database search are shown as Figures 23 and 24.

Some potentially environmentally impacted locations identified by the database search are counted on more than one list. Some databases searched are indexes into other databases. This inflates the number of reports flagged. In addition, some listed properties appear under different names or ownerships or the addresses were specified differently making the searching software unable to determine that an entry was for an already found location. The same location is often listed multiple times for the same concern. Thus, the actual number of distinct physical locations with potentially environmentally impacted soils or groundwater is less than initially indicated.

As the first step in this analysis, the reports are scanned to develop a list of unique locations.

Figure 23 - Radius Map

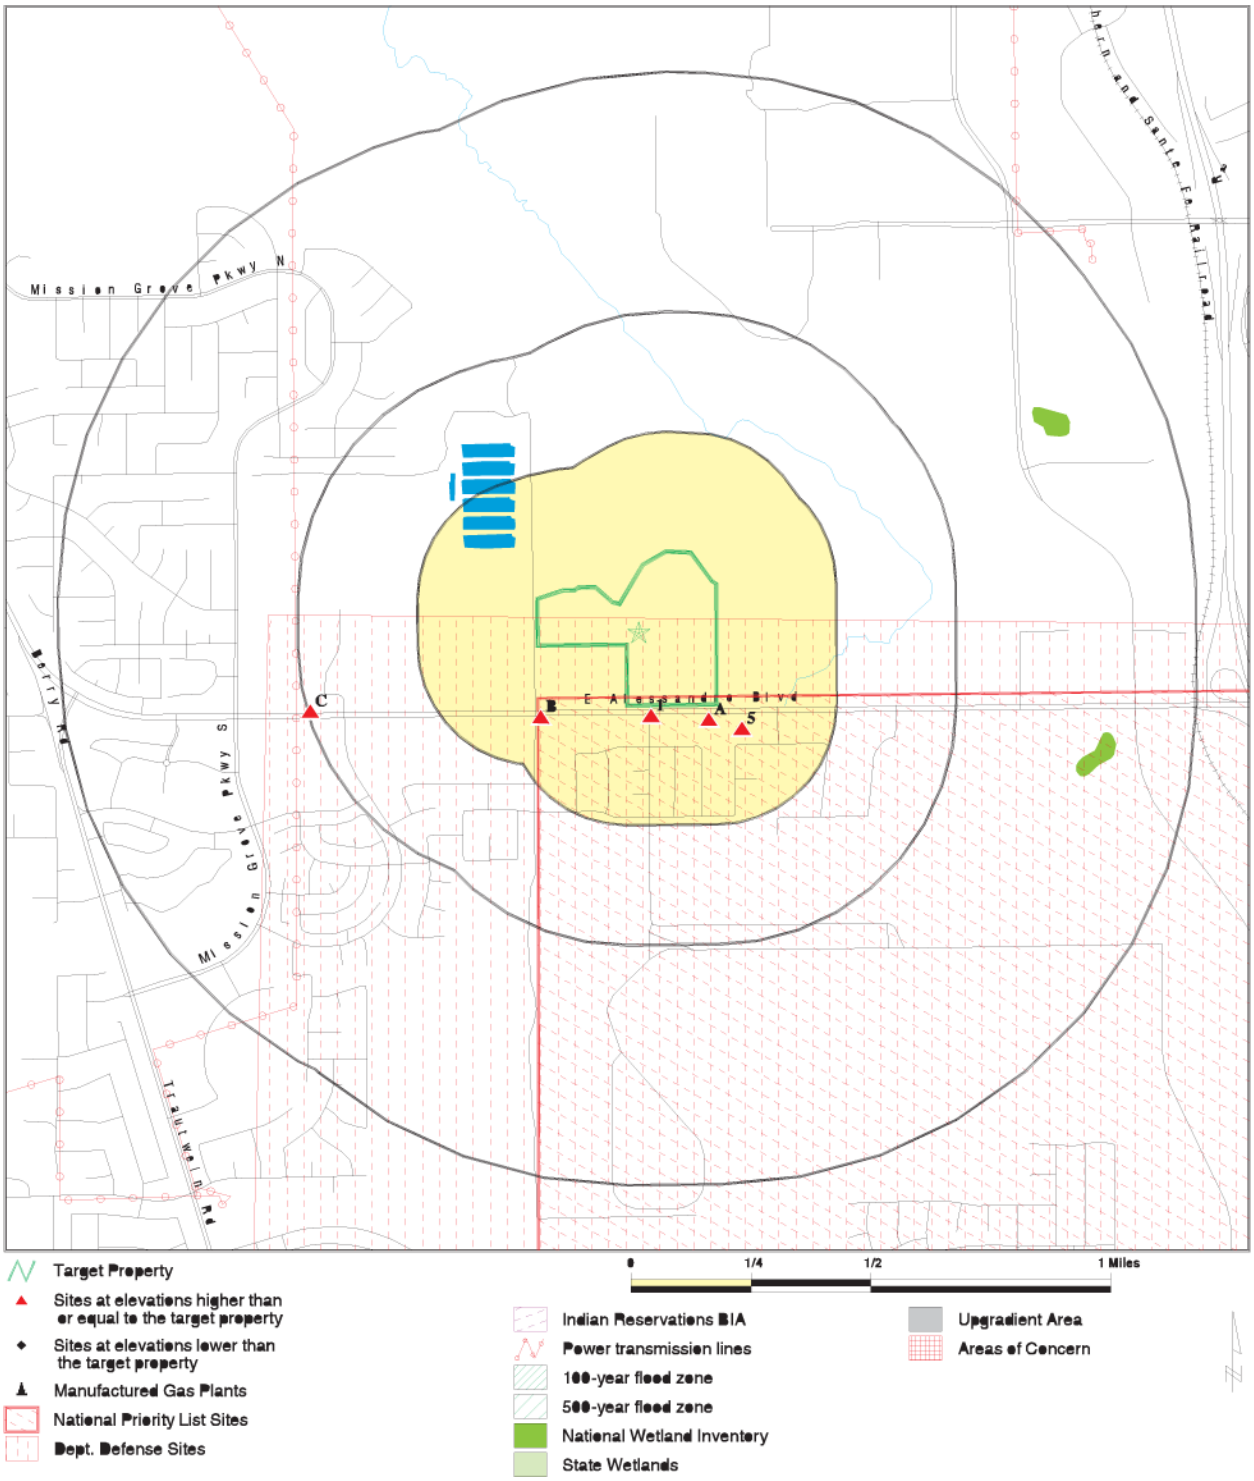

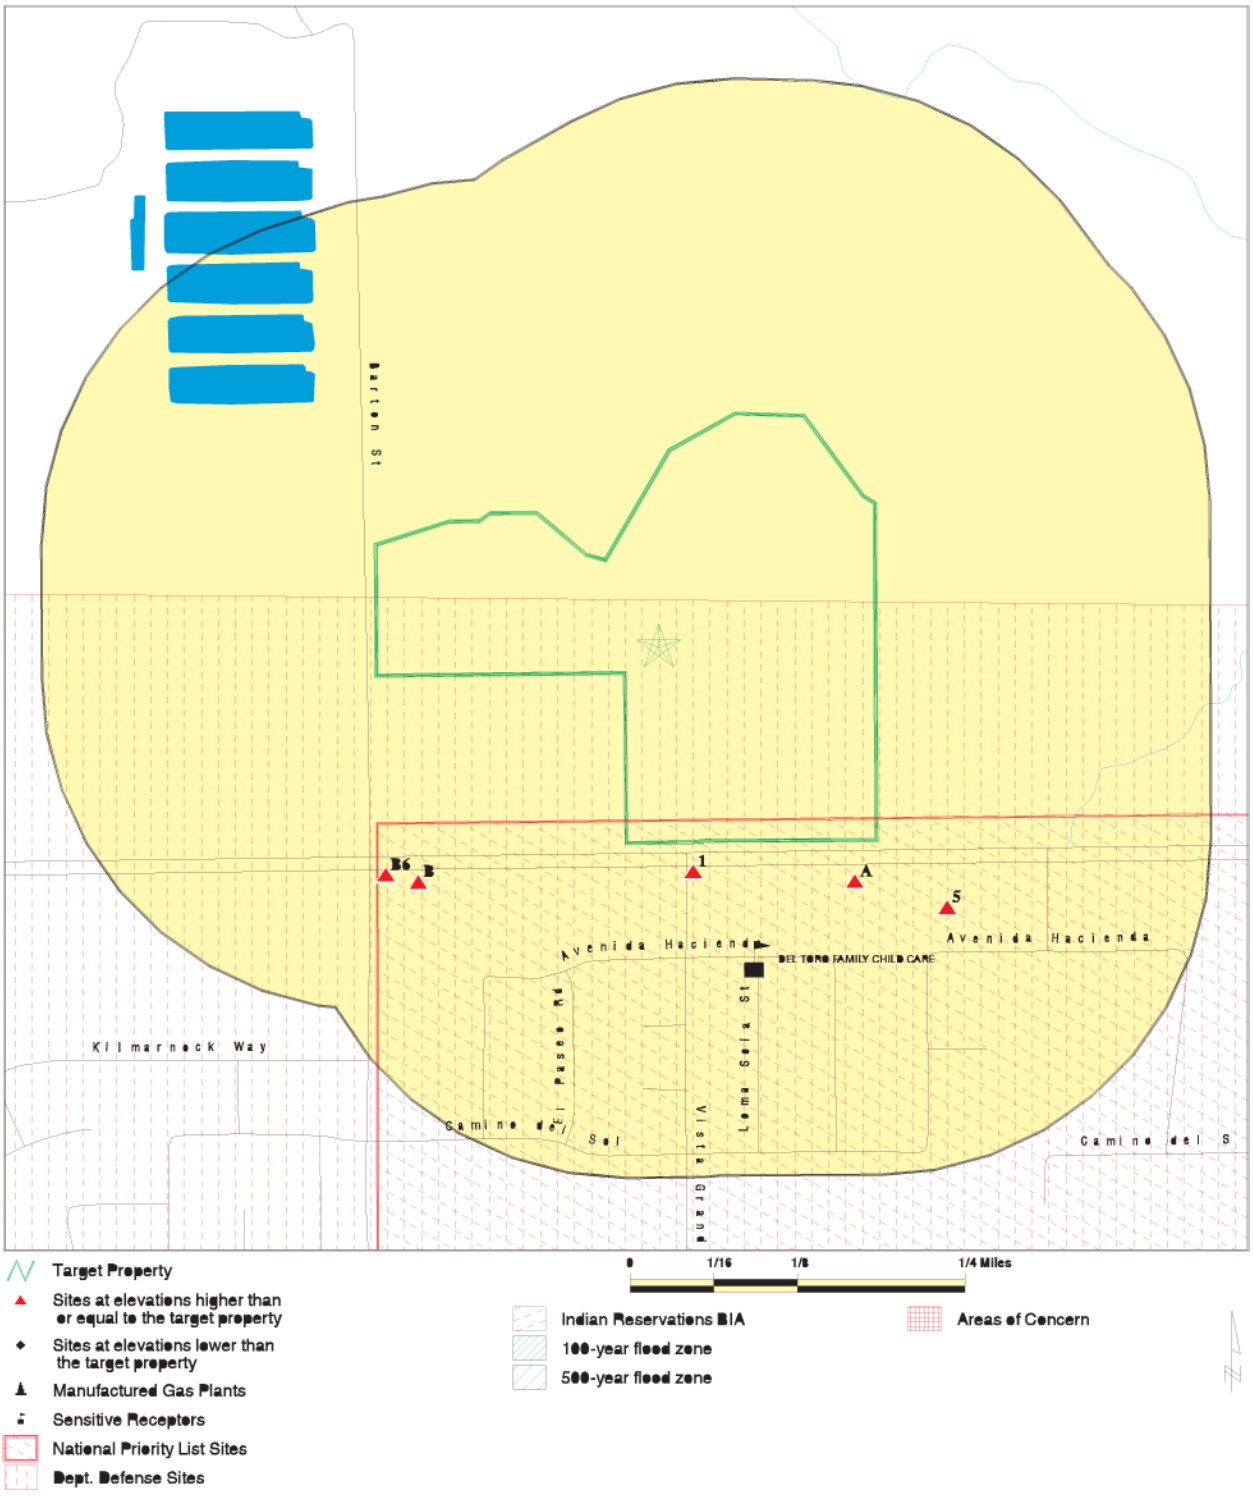

Figure 24 - Radius Map, Finer Scale

Subject Properties Search Results

No reports were found by the EDR search for the Subject Property.

Surrounding Sites Search Results

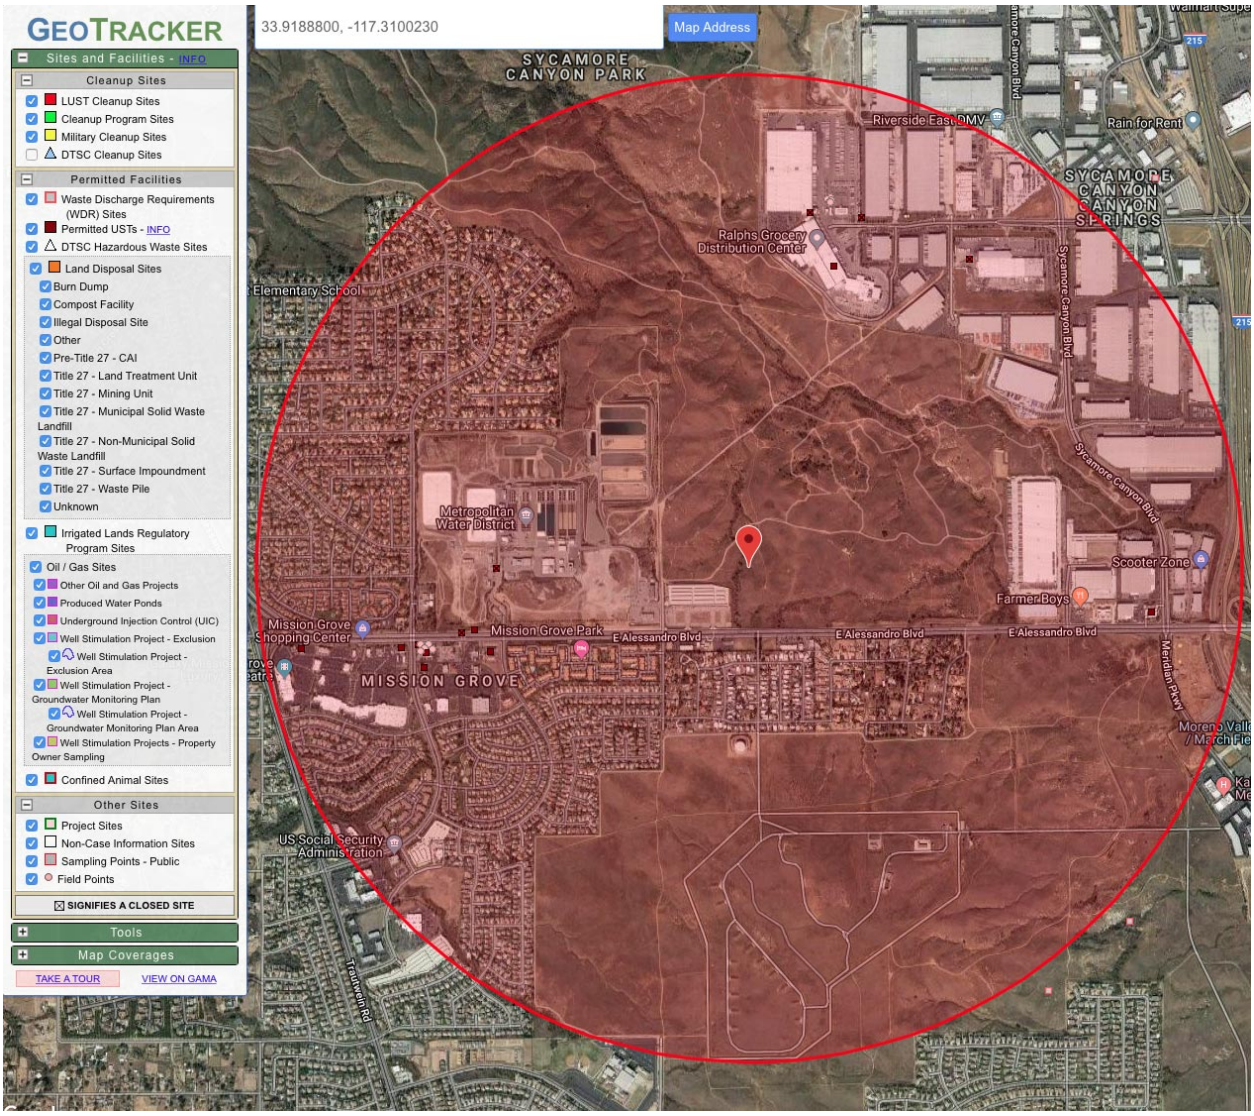

The EDR search found 23 reports for nearby sites. In addition, three "orphan" sites were identified. Orphan reports do not contain sufficient information to map the location and are not considered during this analysis. The EDR reports map to six unique addresses.

Site Name	Map ID	Databases where the site was flagged
March Air Force Base (EPA ID - CA4570024527)	Regional	NPL (Superfund), CERCLIS (SEMS), RCRA LQG, US ENG Controls, US INST Control, DOD, ROD, PRP
Eagle Gas, Adira Inc.	1, A1, A2, A3, A4	UST, SWEEPS UST, EDR Hist Auto, CA FID UST, HAZNET
KJ Auto Trans Inc.	5	EDR Hist Auto
Victoria Cleaner, Flamingo Cleaner	B6, B7, B8, B9, B10	Dry Cleaners
Eastern Municipal, Mills Pumping Plant	C11, C12	LUST, SWEEPS UST, CA FID UST, EMI, HIST UST
MWD Mills Filtration	C13, C14, C15	LUST, CHMIRS, NPDES, HIST CHMIRS

The EDR report provides links to the California Water Boards GeoTracker website, the main repository for leaking underground storage tank (LUST) reports. Figure 25 shows the Subject Property at the center of a 6,480-foot radius circle on the Geotracker map, large enough to extend one mile beyond the boundary of the Subject Property. Go to "geotracker.waterboards.ca.gov" and enter "33.9188800, -117.3100230" (the coordinates where a 1200-foot radius circle fully encloses the entire Subject Property). From there, clicking the markers will access reports regarding the mapped sites. The one-mile radius is well beyond the required half mile Phase I search distance for LUST sites. Geotracker identified 14 sites within this circle.

The 14 Geotracker sites map to 10 unique addresses. Three of the Geotracker reports were also flagged by the EDR search. Again, one mile beyond the border of the Subject Property is considerably further than the required search distances for a standard Phase I ESA. This accounts for the additional reports. Eight of the Geotracker reports are for registered storage tanks. No indication of problems or violations were noted for these sites. The other six reports were for leaking underground storage tanks. All six of these LUST reports are listed as "Completed - Case Closed" indicating satisfactory cleanup of the spill. All of the EDR and Geotracker reports will be examined below.

Figure 25 - GeoTracker Map

Summary of Geotracker Search Findings

Site Name	ID	Status	Address
Arco AMPM Alessandro	UST		501 E Alessandro Blvd
Chevron Station# 202702	UST		2200 E Alessandro Blvd
EMEW Mills Pumping Plant	T0606500416	LUST Case Closed	552 E Alessandro Blvd
Mission Grove Plaza Gas	UST		381 E Alessandro Blvd
MWD Mills Filtration Plant	T0606500366 UST	LUST Case Closed	550 E Alessandro Blvd

Taco Bell (5527)	UST		181 E Alessandro Blvd
Valvoline Instant Oil Change	UST		7450 Mission Grove

March Air Force Base

According to Wikipedia, "In March 1993, March AFB was chosen for realignment under the Base Closure and Realignment [BRAC] III with an effective date of 31 March 1996." March Air Reserve Base (with runway) remains in use on 158 acres (0.247 square miles) located more than two miles southeast of the Subject Property. In reading the March AFB Geotracker documents, a report ("MarchAFBOU2_ROD.pdf") detailing the air base cleanup was found. Page 16 maps the extent of March AFB and shows the areas cleaned. Figure 26 places the Subject Property on this map. A map showing the direction of surface water flow across March Air Force Base was found on page 262 of the 1996 EIS for Disposal of Portions of March AFB. Figure 27 shows the Subject Property on this map. Groundwater flow tends to match surface flow.

The northwest corner of the 12-square mile former March AFB property sits south of the Subject Property across Alessandro Boulevard. The Subject Property was not part of March AFB. The more intensive uses of the March AFB property that required significant cleanup lie well to the southeast of the Subject Property. The nearest three areas of March AFB requiring cleanup are located roughly a mile southeast of the Subject Property (sites 25, 3 and 30) and have all been released for "reuse without restriction." 1,300 acres of March AFB immediately south of the Subject Property has been set aside as a wildlife reserve. Recent residential development to the north, west and south and commercial/industrial development to the east of this reserve has occurred. A satellite photo showing reuse of March AFB land appears as Figure 29. While March Air Force Base appears in eight databases searched by EDR, all of the reports found concern areas well to the south and east and therefore down gradient from the Subject Property. Groundwater contamination, if it exists, would be carried away from the Subject Property to the east. The March AFB reports do not raise an environmental concern for the Subject Property.

Figure 26 - Map of March AFB Showing Cleanup Areas

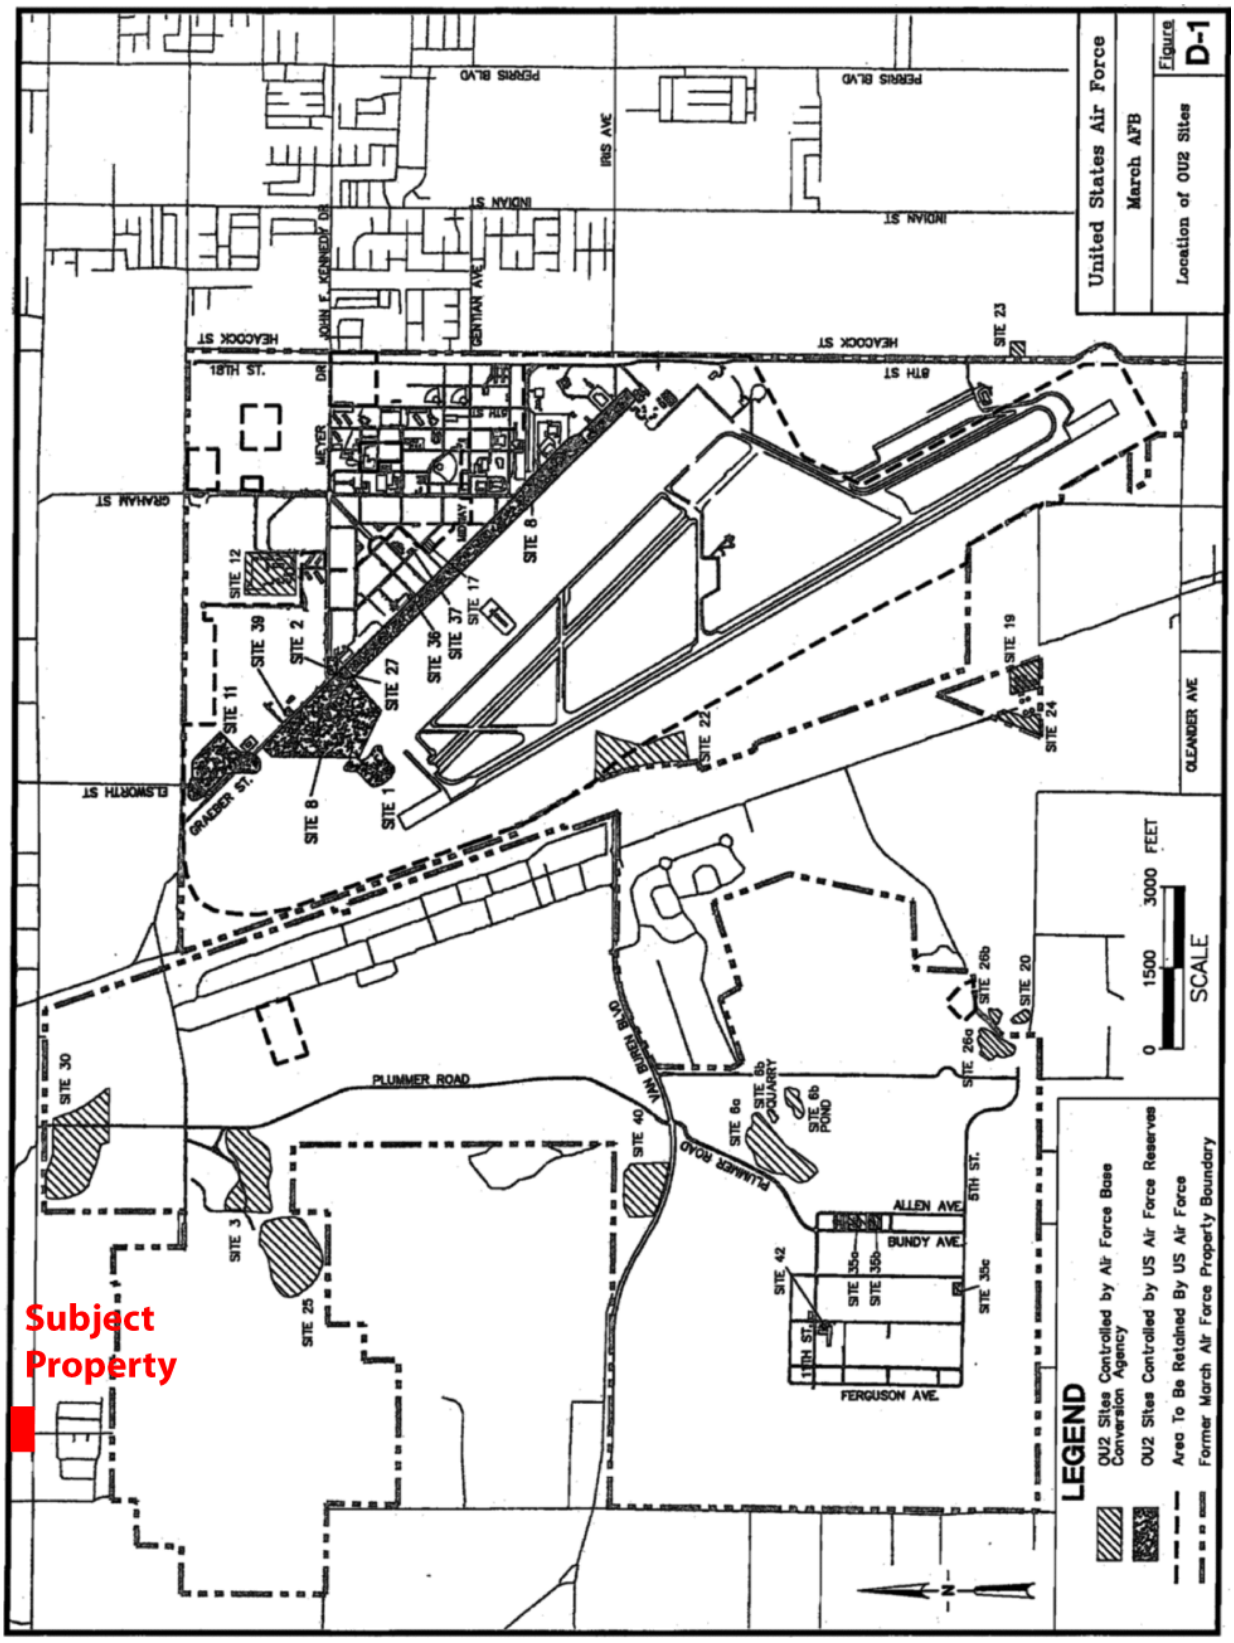

Figure 27 - March AFB Hydrology Map

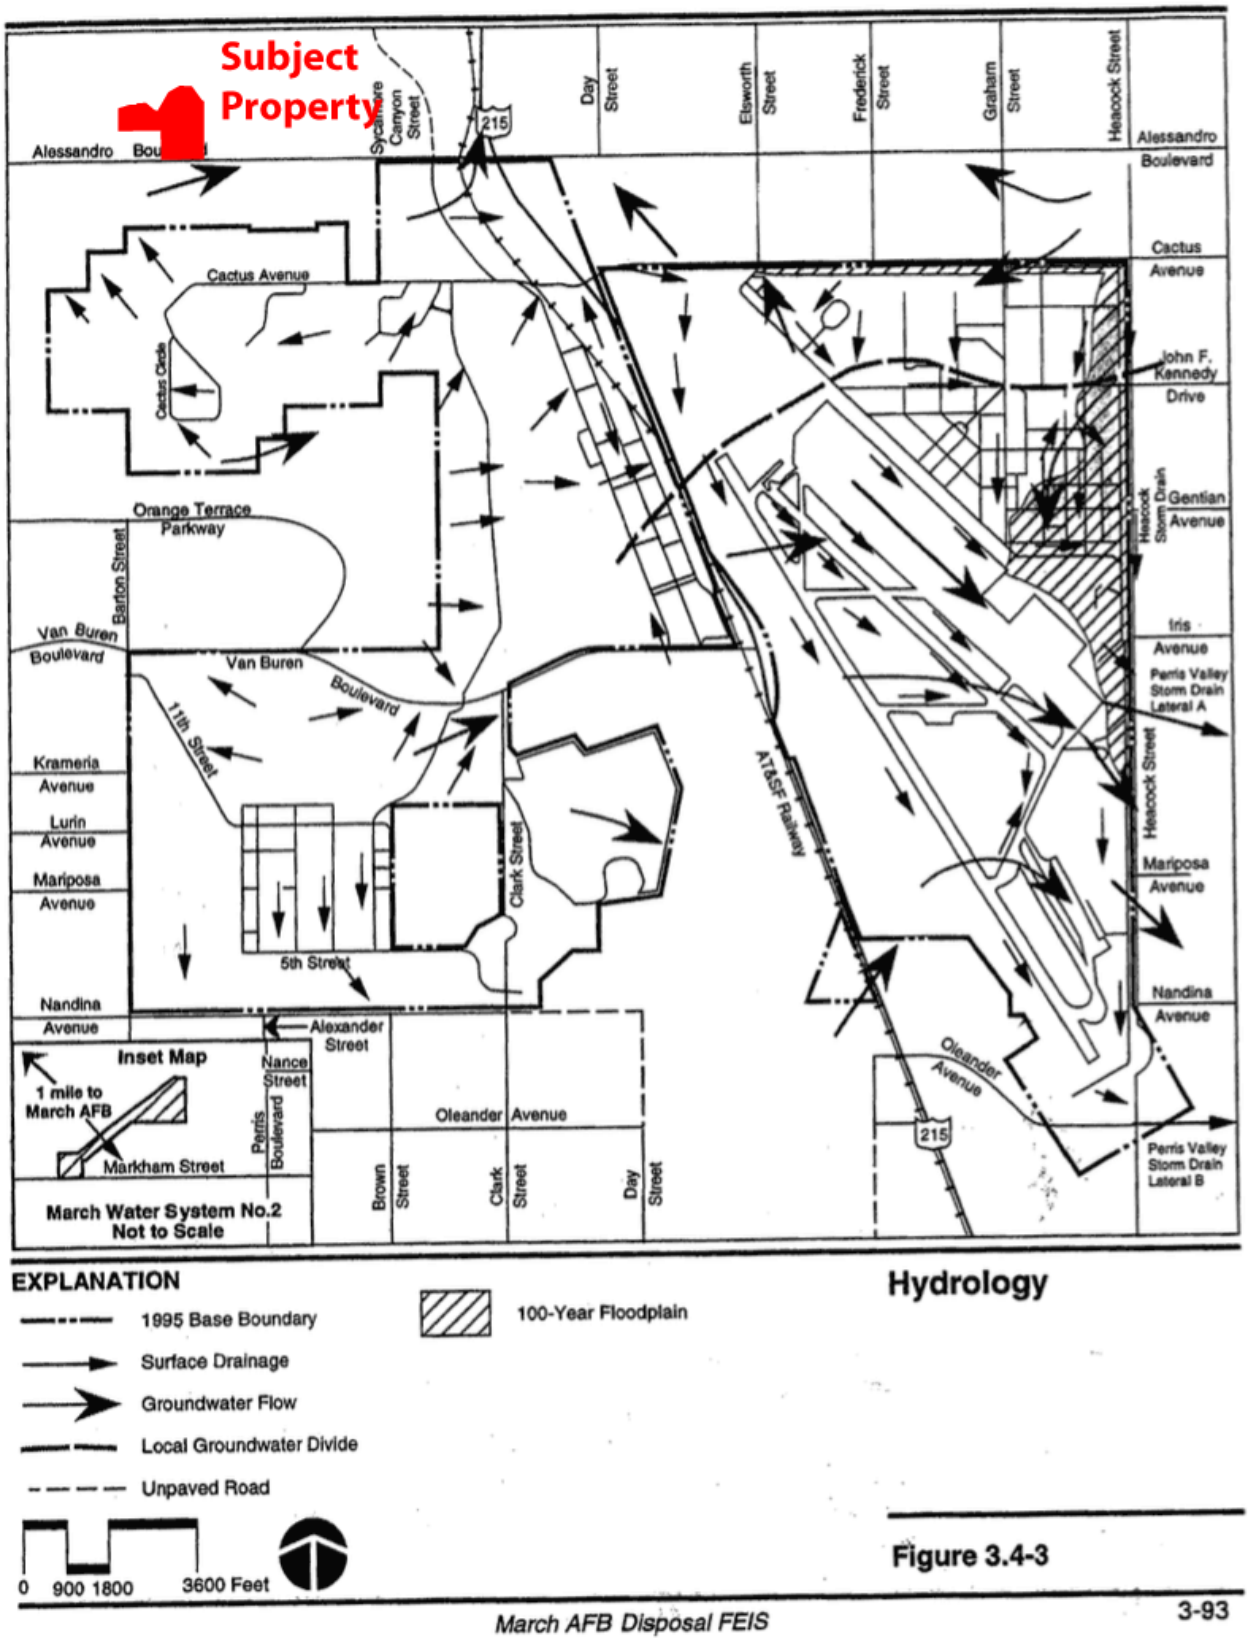

Figure 28 - Redevelopment of March AFB

The **Eagle Gas, Adira Inc.** (1355 East Alessandro Blvd., EDR Map IDs 1, A1, A2, A3, A4) site located south of the Subject Property across Alessandro Blvd. was flagged in five databases (UST, SWEEPS UST, EDR Hist Auto, CA FID UST and HAZNET). The three UST listings are for registered underground storage tanks. No indication of problems or violations is given. The EDR Hist Auto listing indicates the site was used as a gas station from 1993 through 2009. Again, no indication of problems is given. The HAZNET entry indicates that Eagle Gas/Adira properly disposed of hazardous materials at a registered facility. Searching for Eagle Gas with the satellite photo feature of Google Maps, it appears there was a gas station at the 1355 strip mall property on the southeast corner of the intersection with Barton Street. However, the gas station appears to have been removed. It appears the underground storage tank records have now been deleted from Geotracker, though these reports still appear in the much older historic databases. None of these reports raises an environmental concern for the Subject Property.

The **KJ Auto Trans Inc.** (20332 Avenida Hacienda, EDR Map ID 5) site located south of the Subject Proerty across Alessandro Blvd. is listed in the EDR Hist Auto database for 2005 through 2008. Absent additional indications of problems, this report does not raise an environmental concern for the Subject Property.

The **Victoria/Flamingo Cleaners** (1015 Alessandro Blvd., EDR Map IDs B6, B7, B8, B9 and B10) site located south of the Subject Property across Alessandro Blvd. is registered with the EPA as a Dry Cleaner. No indication of problems or violations is given. These reports do not raise an environmental concern for the Subject Property.

The **Eastern Municipal/Mills Pumping Plant** (552 East Alessandro Blvd., EDR Map IDs C11 and C12) site located roughly 1/2 mile WSW of the Subject Property appears in five databases (LUST, SWEEPS UST, CA FID UST, EMI and HIST UST). This is a pumping station for the Municipal Water Purveyor. The three UST reports indicate registered underground storage tanks. The EMI listings are for routine annual vapor emissions reports made to the South Coast Air Quality Management District for the years from 2003 to 2015. The UST registrations and emissions reports (by themselves) do not raise an environmental concern for the Subject Property. The LUST report gives a Geotracker ID of T0606500416. The Geotracker website indicates a "soil" only leak of "waste oil / motor / hydrolic / lubricating" detected and stopped on 11/30/1994 when two storage tanks were removed. Borings were done finding contamination. The remediation plan called for contaminated soil (estimated at 55 cubic yards) to be removed. The case was marked "completed - case closed as of 4/1/1996," indicating satisfactory cleanup. The area where the tanks were located has been backfilled and paved. Groundwater flow in the area would carry groundwater contamination toward the Subject Property. However, given a soil only leak not reaching groundwater, removal of the tanks and piping and remediation to case closed status, this report does not raise an environmental concern for the subject property.

The **MWD Mills Filtration/ EMEW Mills Pumping Plant** (550 E Alessandro Blvd., EDR Map IDs C13, C14 and C15) site located roughly 1/2 mile WSW of the Subject Property appears in four databases (LUST, CHMIRS, NPDES and HIST CORTESE). The documentation indicates this is a sewage treatment plant. The eleven individual CMIRS reports indicate:

> "Tank farm had a leaking line that was discovered during a inspection," "A lab tech was doing quality control and dropped a container," "A trace amount of chlorine was trapped in the line and released out of the pipe. No chlorine was released to the environment," "Operator noticed a coating of the chemical on the flange that was caused by a small leak," "RP states that a lab tech dropped a thermometer onto the ground while taking measurements and caused a release of approximately one ounce of mercury. Area has been isolated with a contractor contacted to clean up area," "Planned event - to locate pin hole leak in their system which resulted in the release of a few oz of chlorine. The room was evacuated before the event and cleanup was done immediately," "Caller states that the water treatment plant was down due to maintenance and the chemicals built up," "The release occurred during maintenance. The alarm showed a level of 9.9 PPM," "A single pump at the Western Municipal Water District incurred an oil line leak. The released oil spilled onto the floor and mixed with existing potable water in a sump. The sump overflowed and released the mixture of oil (2 gallons) and water (500-1,000," "Caller states that maintenance activity caused the release of the gas" and "Caller states that a while charging a line from a chlorine trailer, a mechanical malfunction caused the release."

These incidents were reported and (given the ongoing operation of the site) were likely corrected. These reports do not raise an environmental concern for the Subject Property. The NPDES listing is for a routine stormwater runoff permit. The CORTESE report is a pointer to the following LUST report. The LUST report gives a Geotracker ID of T0606500366. The Geotracker website indicates a "soil" only leak of "gasoline" detected and stopped on 2/27/1994. The case was marked "completed - case closed as of 4/29/1996," indicating satasfactory cleanup. Documents on the Geotracker site indicate two storage tanks, piping and 100 cubic yards of soil were removed from the site. Groundwater flow in the area would carry groundwater contamination toward the Subject Property. However, given a soil only leak not reaching groundwater, removal of the tanks, piping and contaminatied soil and remediation to case closed status, this report does not raise an environmental concern for the Subject Property.

The **Arco AMPM Alessandro** (501 E Alessandro Blvd) site located roughly 1/2 mile WSW of the Subject Property was flaged by Geotracker for a registered UST. This report does not raise an environmental concern for the Subject Property.

The **Chevron Station #202702** (2200 E Alessandro Blvd) site located roughly 3/4 mile east of the Subject Property was flaged by Geotracker for a registered UST. This report does not raise an environmental concern for the Subject Property.

The **Mission Grove Plaza Gas Station** (381 E Alessandro Blvd) site located roughly 3/4 mile west of the Subject Property was flaged by Geotracker for a registered UST. This report does not raise an environmental concern for the Subject Property.

The **Pepsi Cola West** (6659 Sycamore Canyon) site located 3/4 mile northeast of the Subject Property has a Geotracker ID of T0606500225. The website indicates a "diesel" leak impacting an "aquifer used for drinking water supply." The leak was detected and stopped on 3/28/1991 and the status is given as "completed - case closed as of 11/22/2005" indicating satasfactory

remediation of the site. Initially, 397 gallons of "free product" was removed by "hand bailing" and other recovery. Nine monitoring wells were drilled along with two vapor extraction holes. Groundwater was met at depths from 16 to 23 feet below surface and flows to the south-southwest. In 1996, three hot air injection wells were installed. 1400 pounds of diesel were removed from 1997 through 1999. On 11/22/2005, the Riverside County Department of Environmental Health issued a "no further action required" designation marking the file as "Completed: Case Closed." In May 2014, the 15,000-gallon tank, piping, dispensers and 617 tons of impacted soil were removed. Testing indicated contamination at low concentrations remained. On 7/31/2015, a second "no further action" determination was issued by the DEH. Between the Subject Property and the Pepsi plant, a blue line stream (see topographic map on Figure 6) flows toward the northwest. Groundwater from both the Subject Property and the Pepsi site runs toward this stream, effectively isolating these two locations from each other. Contamination from either site would flow toward the stream and where it would migrate toward the northwest. Given satisfactory cleanup, the distance to this site and the intervening creek bed, this report does not raise an environmental concern for the Subject Property.

The **Ralph's Distribution** (1500 Eastridge Ave) site is located 3/4 of a mile north-northeast of the Subject Property and has three Geotracker IDs (FA0018317, T0606509618 and T0606530437). FA0018317 is for registered underground storage tanks. T0606509618 is for a soil only diesel leak detected and stopped 7/12/2006 and marked "Completed - Case Closed" on 12/10/2007. Documents on the Geotracker website indicate four monitoring wells were drilled. The one at the source of the spill registered contamination at 15 feet with none at 20 feet. Two wells (north and south) did not detect contamination. The well to the west detected minimal contamination. Geotracker ID T0606530437 is for a diesel leak impacting an "aquifer used for drinking water supply" detected and stopped 8/12/2002 and marked "Completed - Case Closed" on 1/30/2006. Borings were made and monitoring wells were drilled. Sampling revealed part per billion levels of contamination. Groundwater was encountered at 23 to 25 feet below grade with flow toward the south. Given the minimal contamination, a closure letter was issued. Between the Subject Property and the distribution center, a blue line stream (see topographic map on Figure 6) flows toward the northwest. Groundwater from both the Subject Property and the Ralph's site runs toward this stream, effectively isolating these locations from each other. Contamination from either site would flow toward the stream and then toward the northwest. Given satisfactory cleanup, the distance to this site and the intervening creek bed, these reports do not raise an environmental concern for the Subject Property.

The **Shell Alessandro/Tesoro 68595** (401 E Alessandro Blvd.) site is located 3/4 mile WSW of the Subject Property and has a Geotracker ID of T0606548359. The Geotraker website indicates a "gasoline" leak impacting an "aquifer used for drinking water supply." The leak was detected and stopped on 4/26/2007 and the status is now given as "completed - case closed as of 10/28/2008" indicating satasfactory remediation of the site. The most recent monitoring report dated 9/8/2008 indicates groundwater flow at the site to be to the southwest and therefore away from the Subject Property. Five monitoring wells were drilled and showed low concentrations of cotamination. Given remediation, the distance to this site and groundwater at the site moving away

from the Subject Property, this report does not raise an environmental concern for the Subject Property.

The **Taco Bell (5527)** (181 E Alessandro Blvd) site located nearly a mile west of the Subject Property was flaged by Geotracker for a registered UST. This report does not raise an environmental concern for the Subject Property.

The **Valvoline Instant Oil Change** (7450 Mission Grove) site located roughly 3/4 mile WSW of the Subject Property was flaged by Geotracker for a registered UST. This report does not raise an environmental concern for the Subject Property.

Summary

None of the reports found by the EDR or Geotracker searches raises an environmental concern for the Subject Property. None of the sites with tank leaks that might be a source for vapor encroachment onto the Subject Property falls within the specified search distances for a Vapor Encroachment assessment.

5.3 - Historic Use Information on the Property and Surrounding Areas

The objective of consulting historical sources is to develop a history of the previous uses of the Subject Property and surrounding area to help identify the likelihood of past uses that might have led to recognized environmental conditions in connection with the Subject Property.

Historic Aerial Photographs: Changes observed from historic aerial photos are listed below. Appendix IV contains the 13 Historic Aerial Photos used.

1938 - Alessandro Blvd. is a dirt road that veers north off its future path as it moves east. The Subject Property is open space. The northwest, southwest and southeast corners of the future intersection of Alessandro Blvd. and Barton St have been disced.

1953 - The Subject Property also appears disced. There is an oval dirt track near the center of the Subject Property. Alessandro Blvd has been widened.

1967 - The Subject Property has many dirt paths. The street pattern for the first phase of the residential development on the southeast corner of Alessandro and Barton is in place.

1978 - The first phase of the residential development on the southeast corner of Alessandro and Barton has been built. Alessandro Blvd now has four lanes.

1985 - no significant change

1989 - no significant change. Two objects appear near the center of the Subject Property.

1994 - The grading for the "ponds" and the two buildings west of Barton St north of Alessandro Blvd. has occurred. The two objects on the Subject Property have disappeared.

Grading for the building on the northeast corner of Alessandro and Barton that will become Citywide Self Storage has been done.

2006 - The residential development west of Barton St and south of Alessandro, the "ponds" west of Barton and northwest of the Subject Property and the two buildings west of Barton and southwest of the Subject Property are in place. More of the residential development south of the Subject Property across Alessandro has filled in. The Citywide Self Storage building has been constructed.

2009 - no significant change

2012 - no significant change

2016 - no significant change

Historic USGS Topographical Maps: Historic USGS Topographic Maps are examined below. Appendix V shows the Historical USGS Topographic Maps used.

1901 - The entire area is open space with a railroad running diagonally NNW-SSE well to the east of the Subject Property.

1942 - The map is blank.

1947 - Alessandro Blvd and the southern extension of Barton St are in place.

1953 - no significant change

1967 - Houses in the residential development on the southeast corner of Alessandro and Barton are appearing. The Subject Property is still open space.

1980 - More houses on the southeast corner development, otherwise no change.

2012 - Only the roads show. There is a large residential road system now toward the west.

Historic City Directories: There are no phone listings for the Subject Property, given that it remains as open space. The EDR-City Directory Abstract is reproduced as Appendix III.

Sanborn Fire Insurance Maps: See EDR report Appendix II. (An unmapped property)

Building Department Records: See EDR report Appendix I. (No records found)

5.4 - Historical Use on Subject Property

The Subject Property continues to be disturbed open space with dirt paths crisscrossing it.

5.5 - Historical Use on Adjacent and Surrounding Properties

The area begins as open space. Until its closure, March Air Force Base (mostly well to the southeast off the aerial photos) dominated the area usage beginning around World War II. Residential uses appear to the south of Alessandro Blvd, first to the east of Barton Rd, then to the west. West of Barton Rd, to the north of Alessandro Blvd, two buildings appear along with six ponds. In the cutout from the southwest corner of the Subject Property, the self-storage complex has been constructed. The land to the north and east of the Subject Property remains open space.

5.6 - Physical Setting Sources

The Subject Property is located at 33° 55' 7.961'' North Latitude (33.9188800) and -117° 117° 18' 36.08'' West Longitude (-117.3100230). It is in Zone 11 Universal Transverse Mercator at 471342.2 UTM X (meters) and 3753010.8 UTM Y (meters), 1603 ft. above sea level elevation. It appears on the United States Geological Survey Riverside East, CA Quadrangle (5641312). Additional information can be found in the EDR Radius Map report reproduced as Appendix I.

The Physical Settings Source Map from the EDR Report is reproduced as Figure 29. Topographic Profiles from the EDR Report are reproduced as Figure 30.

Water Wells and Groundwater

Overall, in accord with the Figure 30 topographic profiles, surface water on the Subject Property flows toward the north-northeast.

There are no nearby public water wells.

Oil and Gas Well Records: No oil wells were mapped by the EDR Search.

Soils

Ten soil types were mapped in the vicinity of the Subject Property with four mapped as likely present on the Subject Property. All are characterized as variants of well-drained sandy loam with slow infiltration rates. Detailed information on the area soil map and soil types appears in the EDR Radius Map report that is reproduced in Appendix I (see page 136).

Radon Records

The EDR Report listed 22 Radon tests for Zip Code 92506 in the California Radon database with only one tests indicating more than 4 pCi/L. Federal Radon Information Zip Code 92506 lists one site with results less than 4 pCi/L. The EPA maps Riverside County as Zone 2 with indoor average level between 2 and 4 pCi/L.

Figure 29 - Physical Settings Source Map

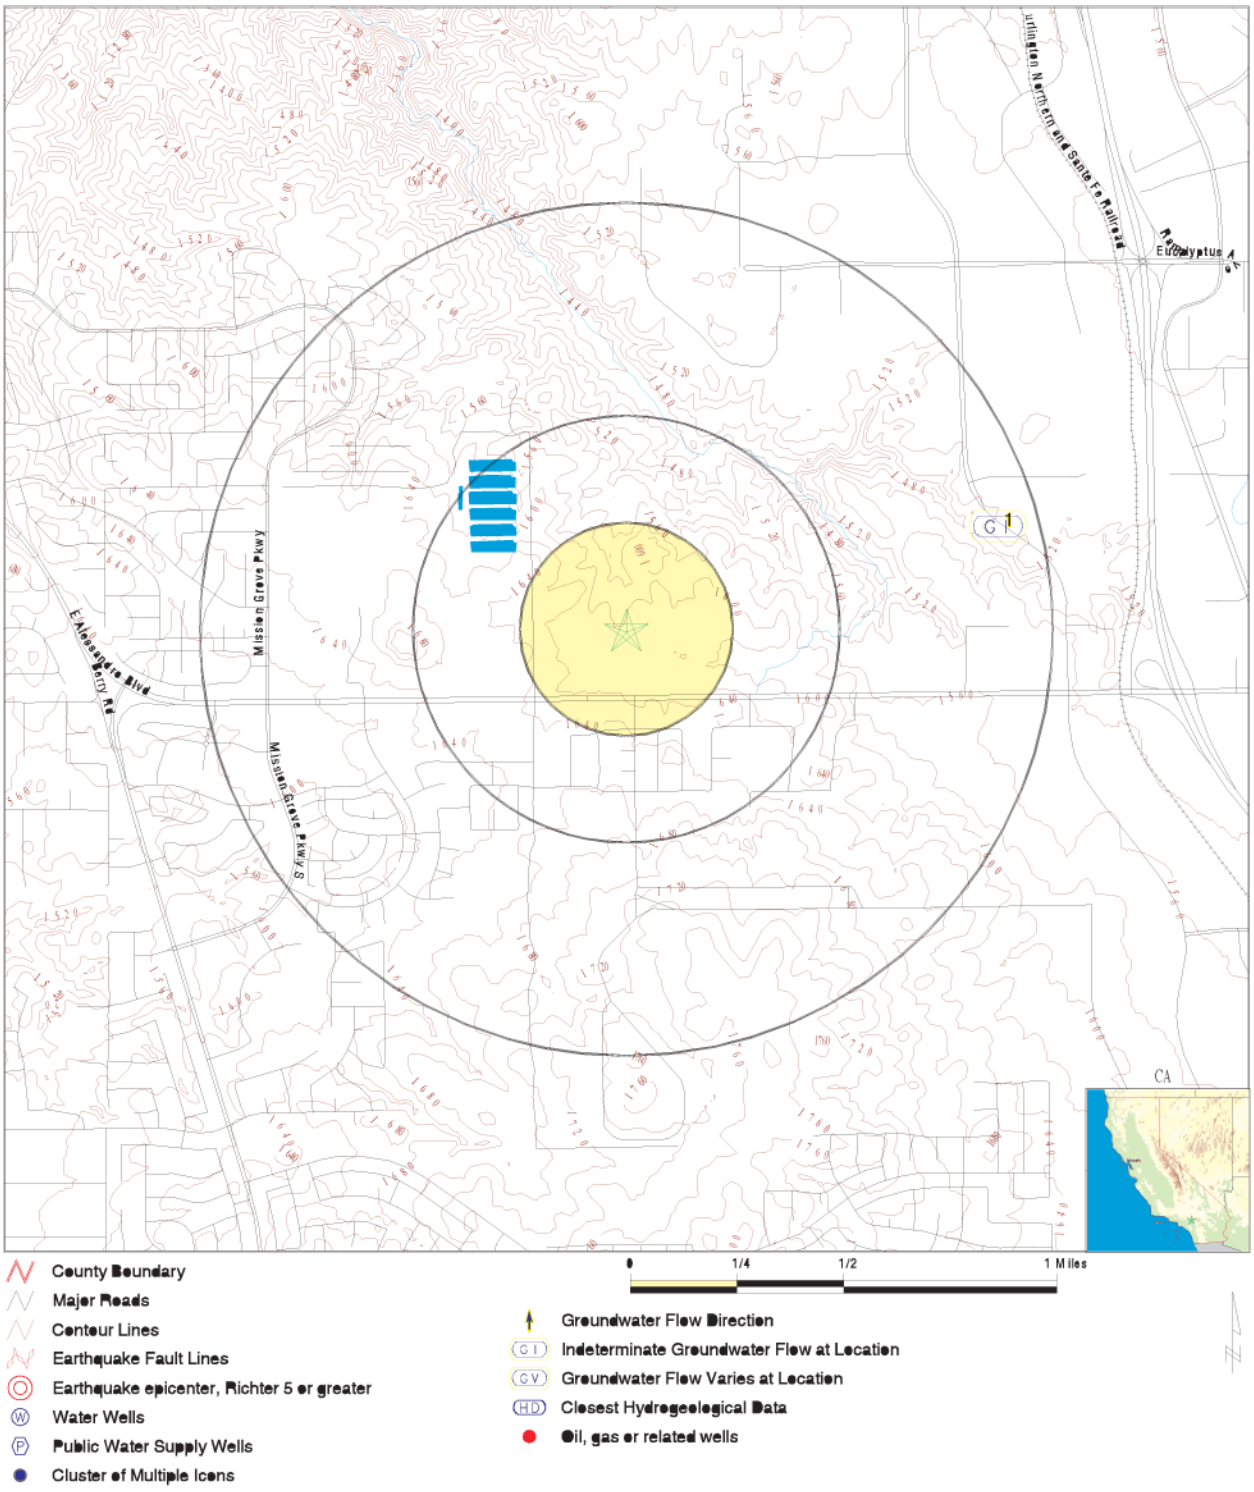

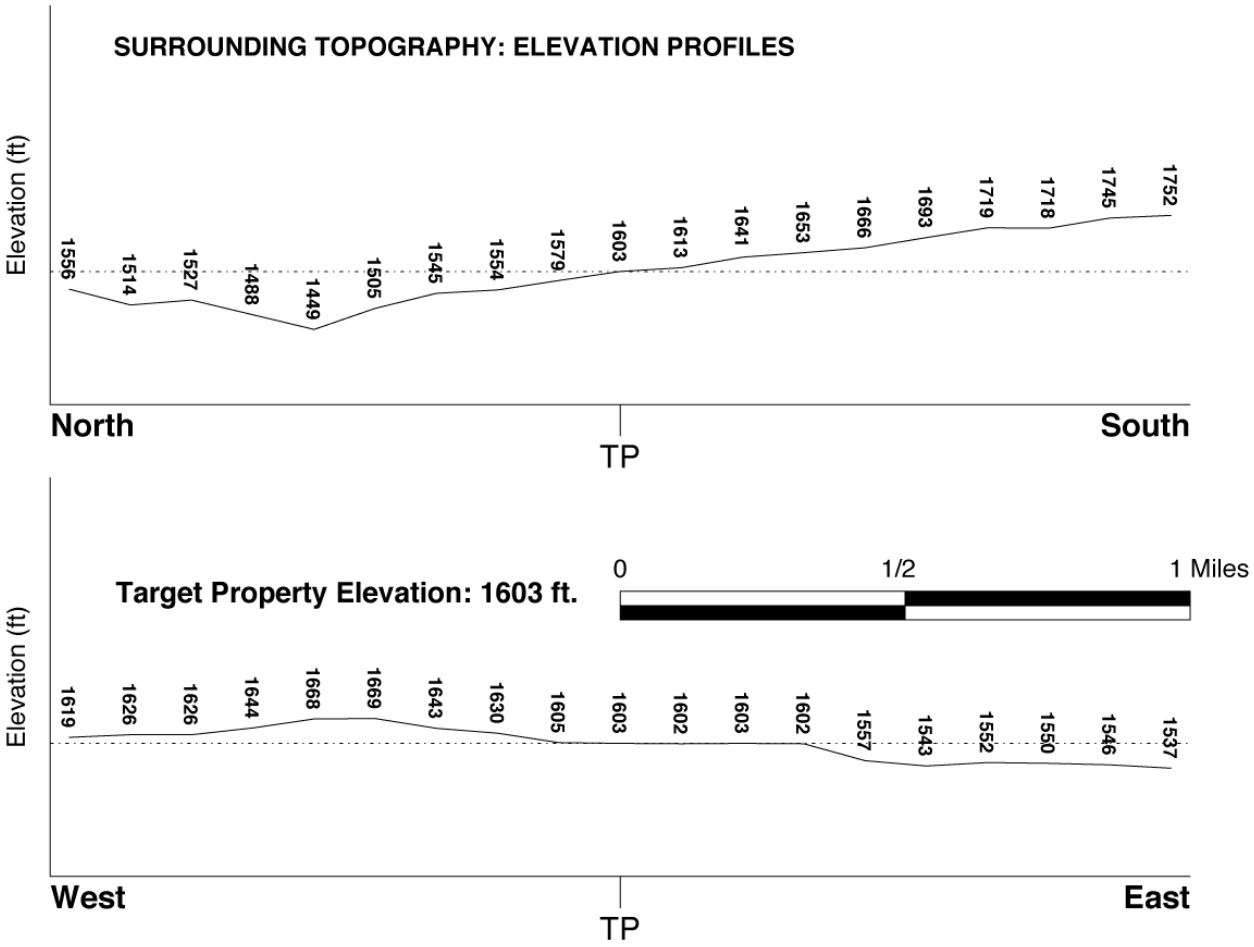

Figure 30 - Surrounding Topography: Elevation Profiles

5.7 - Vapor Encroachment

ASTM Standard Practices for Phase I Environmental Site Assessments, E-1527-13 includes a requirement to review records for possible Vapor Encroachment onto the Subject Property from off-site sources. Environmental Data Resources, Inc. (EDR) can perform a computer search of regulatory agency databases to help locate properties that may emit hazardous vapors. Only sources within 1/3-mile up gradient and 100 feet down gradient are flagged for this evaluation. Four sites were flagged by the EDR search for the VEC App as within the required search distances. Based on the information in these reports, examined earlier, none of these sites appears to be a source of concern for vapor emissions. The EDR VEC App with no identified sources has been run. The results are included as Appendix VI. The map from the VEC application for identifying potential vapor encroachment sources is shown on Figure 31. The mapped sites on examination did not raise a concern. The VEC App Secondary Map was reproduced earlier as Figure 32. The areas in gray are up gradient (higher elevation) from the Subject Property. There is no evidence that vapor encroachment is likely to impact the Subject Property. On the day of the site reconnaissance, there was no noticeable odor.

Figure 31 - Vapor Source Location Map

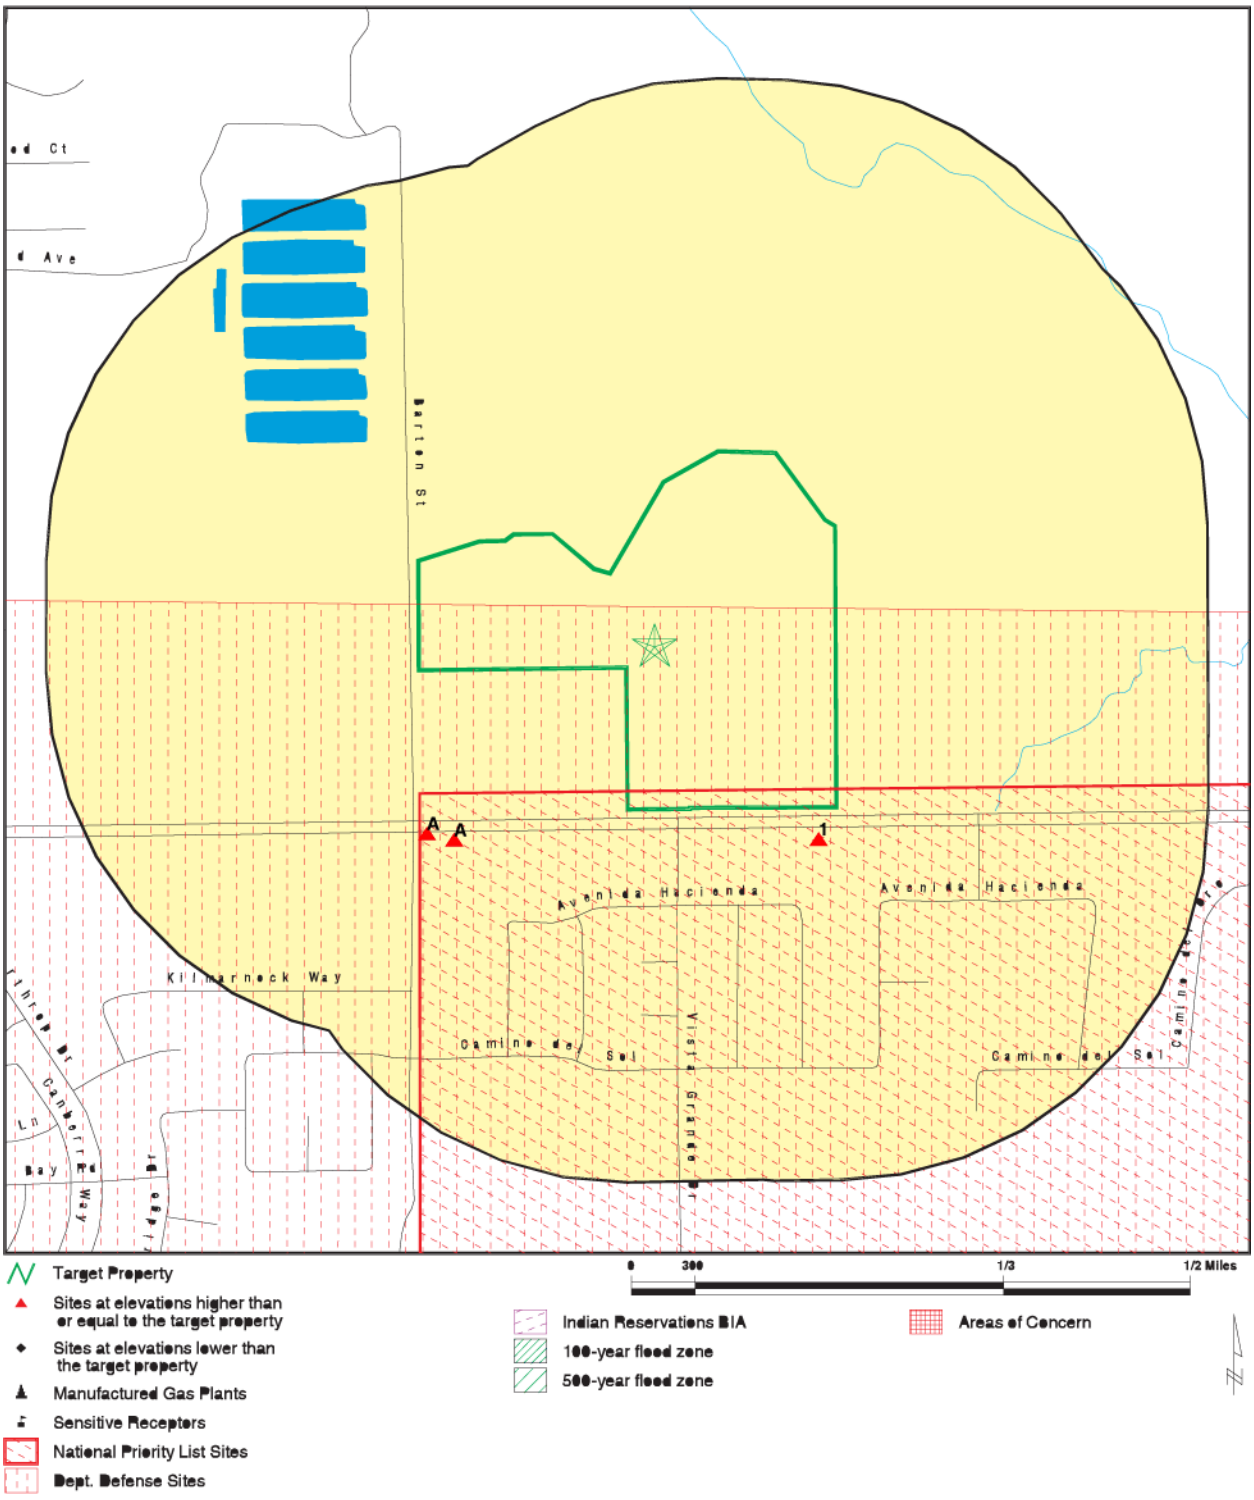

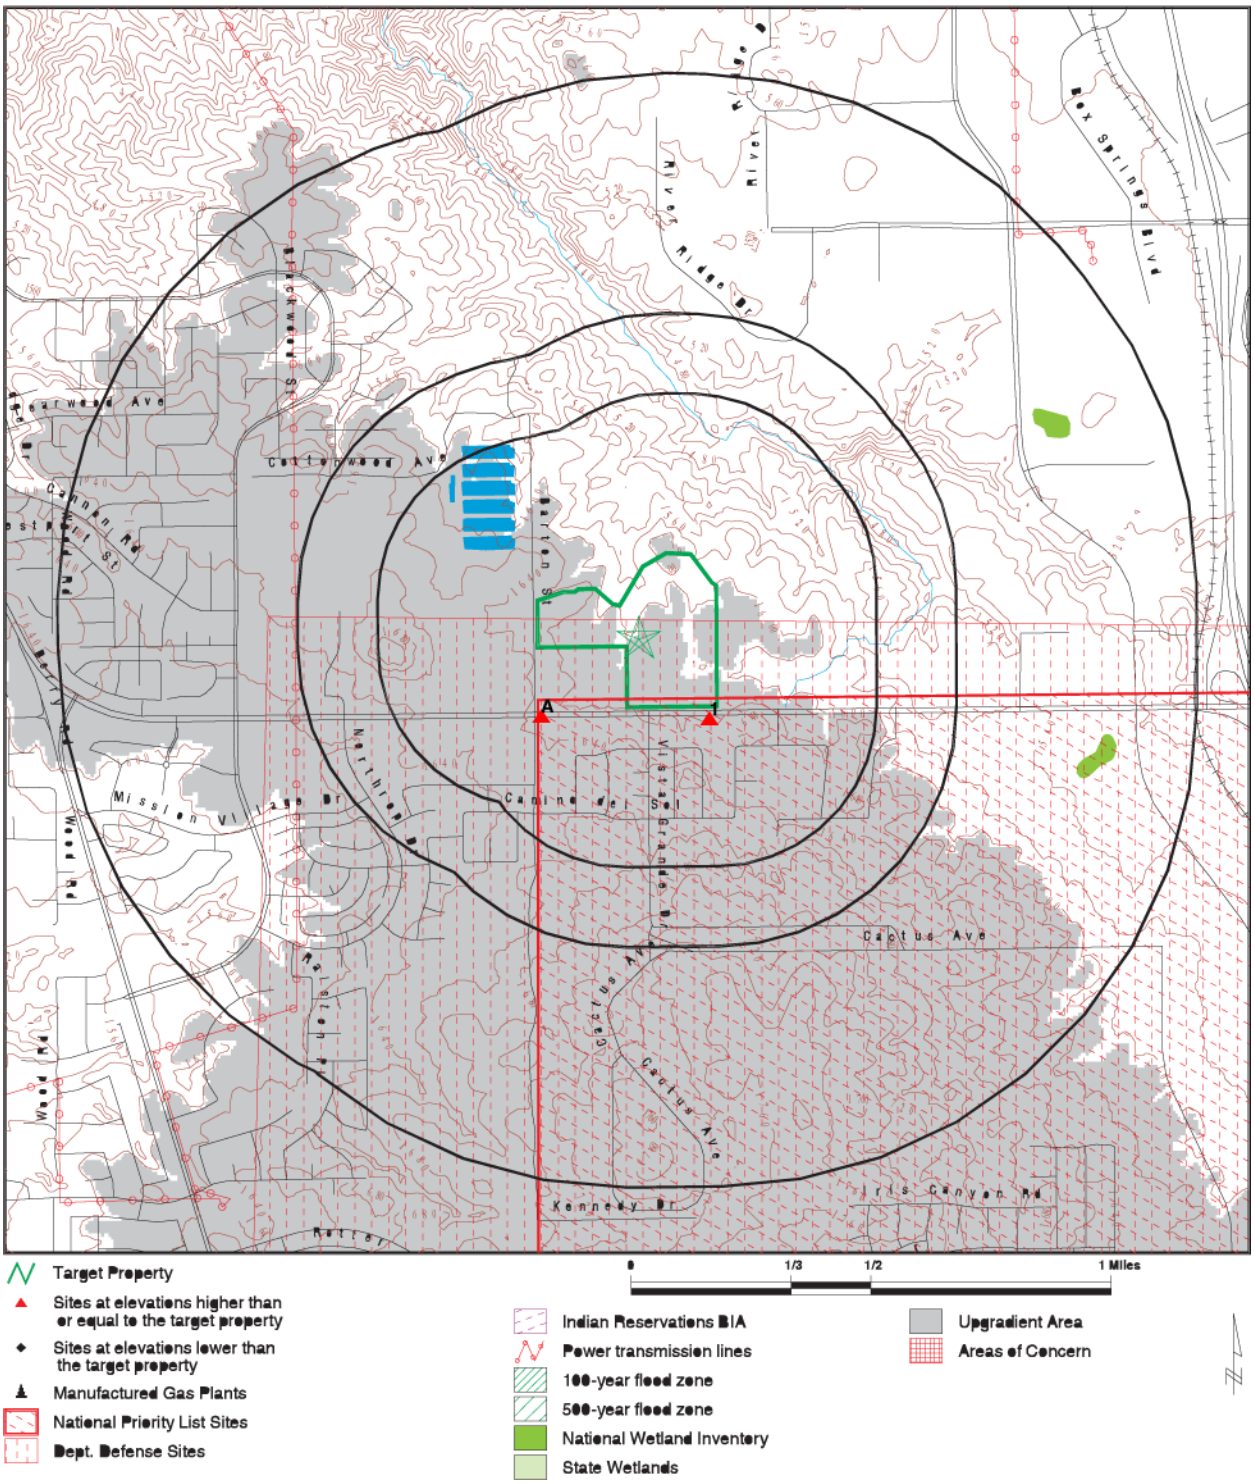

Figure 32 - Vapor App Secondary Map

Areas in gray are up gradient (higher elevation) from the Subject Property

6.0 - SITE RECONNAISSANCE

6.1 - Objectives

The objective of a site reconnaissance is to obtain information indicating the likelihood of identifying Recognized Environmental Conditions in connection with the Subject Property.

6.2 - Observations

A site reconnaissance was performed by David J. Tanner on October 4, 2018 beginning at approximately 1:00 pm. The weather was generally clear with scattered clouds. Visibility was excellent. Temperature was approximately 80° F. There was a 1-2 knot breeze. The Subject Property was traversed on foot while searching for signs of recognized environmental conditions. Photographs (some shown earlier on Figures 7 through 22) were taken during the site reconnaissance to document the observed conditions.

The entire Subject Property was inspected for Recognized Environmental Conditions. No signs of RECs were observed.

Description: The Property occupies 48.65± gross acres. On-site topography consists of rolling undeveloped land. Maximum topographic relief is estimated at 30 feet. There are segments of several dirt trails including Meadow Crossing Trail and Dookie's Playground Loop, which traverse the Property. The northern unimproved extension of Barton Street traverses the western boundary of the Property. A metal fence parallels the western side of the Barton Street extension off the Property. An un-named dirt road/trail traverses the Property in an east/west direction. No surface water was observed on the Property. The Site appeared clean and well maintained with the exception of trash shown on Photo 27 (Figure 20).

Endangered Species: No wildlife was observed onsite during the site inspection. Signs warning of rattlesnakes were observed on the Property.

Vegetation: Vegetation on the Property consists of indigenous grasses. Several ephemeral drainages containing riparian vegetation exist on the Property.

Groundwater: No groundwater wells were observed on the Subject Property.

Odors: No odors were detected.

Soils: No sign of stressed vegetation or soil staining was observed on the Subject Property. No soil stockpiles were observed on the Property. Other than the possibility of grading for the apparent future extension of Barton Street and the un-named dirt road/trail trending east/west across the Property, no sign of grading was observed.

Staining: No soil staining, debris, dead vegetation or other signs of recognized environmental conditions were observed on or adjacent to the Subject Property.

Other Indicators: No dead vegetation, dead animals or noxious odors were noted. No visual evidence of above or below ground tanks or other signs of commercial or industrial activity was noted. No potential hazardous substances or industrial hazardous waste impacts were seen on the Subject Property. No electrical transformers were observed. There was no visual indication that hazardous substances or petroleum products ever existed on the Subject Property.

6.3 - Interior Observations

There are no structures on the Subject Property.

7.0 - INTERVIEWS

7.1 - Objective

The objective of interviews is to obtain information indicating recognized environmental conditions in connection with the Subject Property.

7.2 - Owner

Mr. Darrell Butler was interviewed on October 18, 2018. Mr. Butler had no knowledge of any hazardous materials or recognized environmental conditions having ever existed on the Subject Property.

7.3 - Site Manager

There is no site manager.

7.4 - Occupant Interviews

There are no residents.

7.5 - Local Governments

The City of Riverside Community Development Department was called (951-826-5371). They were unaware of any environmental concerns with the Subject Property.

7.6 - Others

Five interviews were conducted at the time of the October 2018 Property inspection:

Myra an employee at the Better Be Donuts Café, located at 1015 E. Alessandro Blvd., Riverside CA 92508 was interviewed. Myra had no knowledge of any hazardous materials or recognized environmental conditions having ever existed on the Property.

Michael A. Hunting, DDS at 1015 Alessandro Blvd. Suite 130 riverside CA 92508 was interviewed. Mr. Hunting had no knowledge of any hazardous materials or recognized environmental conditions having ever existed on the Property.

Raj, Manager of Gandhi Indian Cuisine & Banquet located at 1355 E. Alessandro Blvd, Suite 205 Riverside CA 92508 was interviewed. Raj had no knowledge of any hazardous materials or recognized environmental conditions having ever existed on the Property.

The Clerk at Alessandro Liquor located at 1051 E. Alessandro Blvd, Riverside CA was interviewed. The Clerk had no knowledge of any hazardous materials or recognized environmental conditions having ever existed on the Property.

A Hair Stylist at Unique Hair and Nails located at 1015 E. Alessandro Blvd, Riverside CA was interviewed. The Hair Stylist had no knowledge of any hazardous materials or recognized environmental conditions having ever existed on the Property.

Additional Phone Interviews:

Jackie Washington of Citywide Self-Storage located at 1000 E. Alessandro Blvd, Riverside CA 92508 was interviewed by phone on October 6, 2018. Ms. Washington had no knowledge of any hazardous materials or recognized environmental conditions having ever existed on the Property.

Mr. R. Mario Calvillo, Vice President, Lee & Associates, Riverside, was interviewed. Lee & Associates is the real estate broker for the Property. Mr. Calvillo had no knowledge of any hazardous materials or recognized environmental conditions having ever existed on the Property.

8.0 - FINDINGS

No reports for the Subject Property were found by the EDR database search. Twenty-three reports for nearby properties were found. Eight additional sites were fond using Geotracker. Many of these reports were for March Air Force Base, which has been closed, cleaned and most of the land transferred to other uses. Leaking underground storage tanks were found off-site and are not related to the project site. None of these reports raises an environmental concern for the Subject Property.

Based on the site reconnaissance and review of government agency records, historic aerial photos and other information sources, there is no evidence that hazardous substances or petroleum products existed on (or have migrated under) the Subject Property.

9.0 - OPINION

Based on a Site Reconnaissance, review of government agency records, historic aerial photos and other information, there is no evidence that hazardous substances or petroleum products exist above de minimus levels on the surface of Subject Property. There is no evidence to suggest that groundwater under the Subject Property has been contaminated from on or off-site sources or that vapor encroachment is likely from off-site sources.

10.0 - CONCLUSIONS

We have performed a Phase I Environmental Site Assessment Update in conformance with the scope and limitations of ASTM E-1527-13 for the Subject Property described herein. Any exceptions to or deletions from, this practice are described in Section 11.0 of this report.

Based on records searches, interviews, aerial photos and Site Reconnaissance, this assessment revealed no evidence of Recognized Environmental Conditions on the surface or in the groundwater below the Subject Property nor is vapor encroachment likely from off-site sources.

11.0 - DEVIATIONS

This Environmental Site Assessment was performed in accordance with industry standards of care and practice and in general conformity with ASTM E-1527-13 standards. We do not believe that we deviated from the ASTM standards in preparing this Phase I ESA report.

12.0 - DATA GAPS

Consistent with 40 CFR 312.21(c)(2), this Environmental Site Assessment was performed in accord with ASTM E-1527-13 standards. Historic aerial photographs and other sources establish the Subject Property as disturbed open space absent of structures continuously from before 1940

until the recent satellite photo used by Google Maps. All data that was requested has been received. There are no "data gaps."

13.0 - ADDITIONAL ISSUES

No soil or radon testing was performed as a part of this Phase I ESA. One of the 23 tests for zip code 92506 found by the EDR search yielded a reading above 4 pCi/L. The Subject Property is in an area considered to have a low occurrence of radon; however, radon levels are site-specific and only testing can determine the actual radon level.

14.0 - SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The conclusions and opinions developed herein were based in part on test data and reports provided by others and our professional judgment. Thus, the assessment contained herein is only valid as of the data of this report and may require an update to reflect additional sampling, testing or other information. No guarantee of the results of this study is made or implied. Our professional services were performed in accordance with the prevailing standard of care as practiced by other environmental professionals in this area of California. We make no other warranty, either expressed or implied.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR Part 312.10.

I have qualifications based on education, training and experience to assess a property based on the nature, history and setting of the property. I have developed and performed the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Professional

David J. Tanner, President
Environmental & Regulatory Specialists, Inc.

15.0 - QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

The following persons were involved in the preparation of this ESA.

- **Project Director: Mr. David Tanner, Environmental Professional**

Mr. Tanner has served as consultant to the Building Industry since 1974 providing project management, entitlement processing and environmental services. He has extensive experience in the development of large-scale multi-use land based projects. In addition to Project Management services, Mr. Tanner has prepared over 500 Environmental documents including Phase I Environmental Site Assessments, Program, Environmental Impact Reports, Environmental Impact Statements, Specific Plans, Planned Community Zoning Regulations, as well as specialized studies typically required as a part of the entitlements process. Mr. Tanner has been involved in the entitlement phase of more than 350 projects in the southern California area alone.

> Mr. Tanner was awarded the degree of Bachelor of Arts with a major in Environmental Studies, from the University of California, Santa Barbara on December 14, 1974
>
> Mr. Tanner was awarded registration as a Registered Environmental Assessor by the State of California Environmental Protection Agency in September 1992 (REA #04440). Mr. Tanner remained a REA until the program was discontinued by the State.
>
> Mr. Tanner was awarded a Certification in Environmental Site Assessment and Remediation from the University of California, Irvine on September 14, 1994
>
> Mr. Tanner has been a long-standing member of the Association of Environmental Professionals.

- **Technical Support, Graphics and Editing: Mr. Joe Tyndall**

Mr. Tyndall holds an engineering degree from MIT and an MBA from UC Irvine. Since 1998 when he began working with EARSI, under supervision of David Tanner and other REA certified professionals, Joe has contributed to the preparation of over 200 environmental documents including roughly 50 Phase I Environmental Site Assessments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/17/2018 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MARCH AIR FORCE BASE Cerclis ID:: 902761 EPA Id: CA4570024527	***22 CSG/CC***	***0 - 1/8 (0.000 mi.)***	***0***	***8***

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/17/2018 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

MARCH AIR FORCE BASE Site ID: 0902761 EPA Id: CA4570024527	***22 CSG/CC***	***0 - 1/8 (0.000 mi.)***	***0***	***8***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EPA ID:: CA4570024527				
EPA ID:: CA4570024527				

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 07/31/2018 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 4 LUST sites within

approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal July 14, 1989): March Air Force Base MAFB) covers approximately 7,000 acres near Riverside in the Moreno Valley in Riverside County, California. MAFB is adjacent to light industrial, agricultural, and residential areas. Established in 1918 as the Alessandro Aviation Field, MAFB has served as a training base and refueling operations base. Industrial operations including aircraft maintenance and repair) involved use of solvents and disposal of solvent wastes. MAFB is participating in the Installation Restoration Program IRP), established in 1978. Under this program, the Department of Defense seeks to identify, investigate, and clean up contamination from ha ardous materials. As part ofIRP, the Air Force investigated 28 potentially contaminated disposal areas. MAFB Well No. 1 on-base was found to be contaminated with trichloroethylene, tetrachloroethylene, and cis-1,2-dichloroethylene at levels that exceed State drinking water standards. It was taken out of service. Soils on the base are contaminated with toluene and ben ene. An estimated 11,600 people obtain drinking water from municipal wells within 3 miles of ha ardous substances on MAFB. The Air Forceis conducting a remedial investigation/ feasibility study RI/FS) to determine the type and extent of contamination at the base and identify alternatives for remedial action. Status November 21, 1989): Field work continues on the RI/FS.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:
Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: No

Waste type: Lamps
Accumulated waste on-site: Yes
Generated waste on-site: No

Waste type: Thermostats
Accumulated waste on-site: Yes
Generated waste on-site: No

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151

MARCH AIR FORCE BASE (Continued) **1000169261**

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D005

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/17/2018

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

CERS: CalEPA Regulated Site Portal Data
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

SYCAMORE HILLS
NOT REPORTED
RIVERSIDE, CA 92506

TARGET PROPERTY COORDINATES

Latitude (North):	33.91888 - 33˚ 55' 7.97"
Longitude (West):	117.310023 - 117˚ 18' 36.08"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	471342.2
UTM Y (Meters):	3753010.8
Elevation:	1603 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5641312 RIVERSIDE EAST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

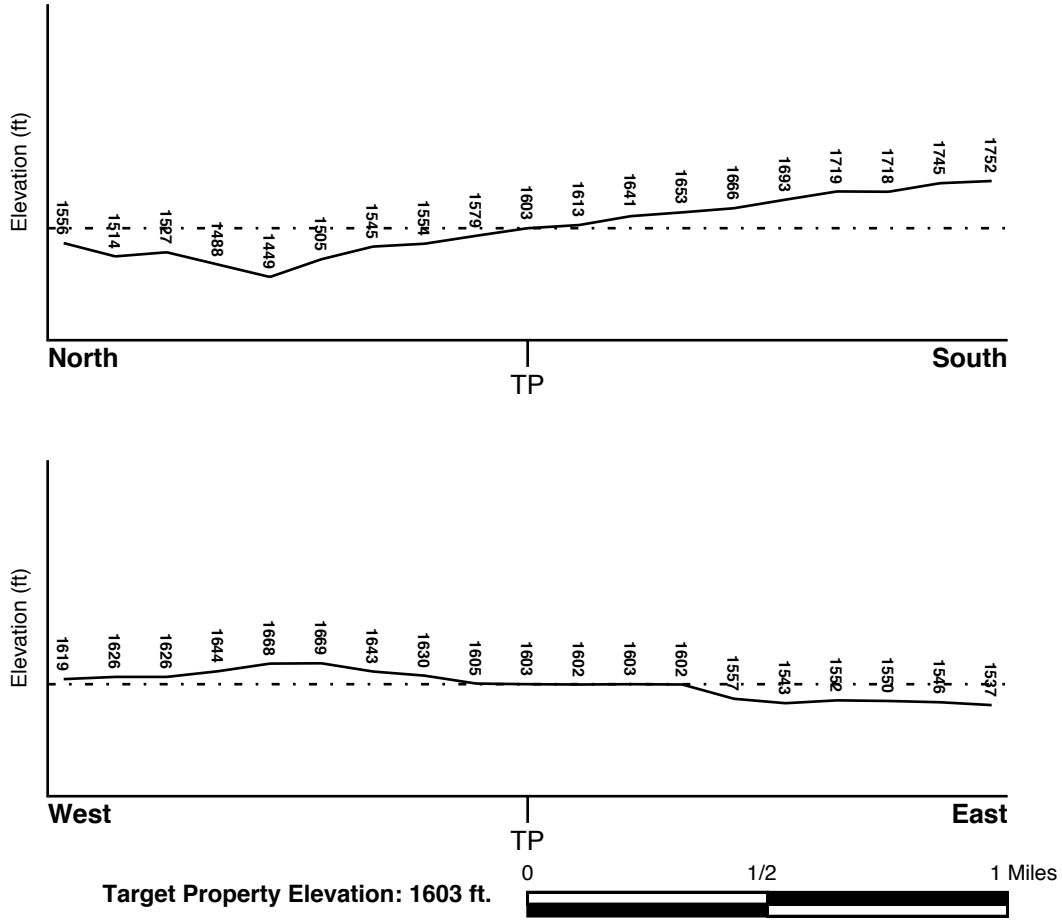

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C0745G	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06065C0740G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile ENE	W-SW
1G	1/2 - 1 Mile ENE	W-SW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: FALLBROOK

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	5 inches	18 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	18 inches	22 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: VISTA

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	14 inches	24 inches	coarse sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	Not reported	Max: 0.42 Min: 0	Max: Min:
3	24 inches	27 inches	weathered bedrock	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: FALLBROOK

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Environmental & Regulatory Specialists, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Environmental & Regulatory Specialists, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# NA

Summary Details:

Conditions at proposal July 14, 1989): March Air Force Base MAFB) covers approximately 7,000 acres near Riverside in the Moreno Valley in Riverside County, California. MAFB is adjacent to light industrial, agricultural, and residential areas. Established in 1918 as the Alessandro Aviation Field, MAFB has served as a training base and refueling operations base. Industrial operations including aircraft maintenance and repair) involved use of solvents and disposal of solvent wastes. MAFB is participating in the Installation Restoration Program IRP), established in 1978. Under this

MARCH AIR FORCE BASE, 22 CSG/CC, RIVERSIDE, CA 92518 (Continued)

program, the Department of Defense seeks to identify, investigate, and clean up contamination from ha ardous materials. As part ofIRP, the Air Force investigated 28 potentially contaminated disposal areas. MAFB Well No. 1 on-base was found to be contaminated with trichloroethylene, tetrachloroethylene, and cis-1,2-dichloroethylene at levels that exceed State drinking water standards. It was taken out of service. Soils on the base are contaminated with toluene and ben ene. An estimated 11,600 people obtain drinking water from municipal wells within 3 miles of ha ardous substances on MAFB. The Air Forceis conducting a remedial investigation/ feasibility study RI/FS) to determine the type and extent of contamination at the base and identify alternatives for remedial action. Status November 21, 1989): Field work continues on the RI/FS.

Contact address:	MEYER DR BLDG 2403 MARCH ARB, CA 92518
Contact country:	US
Contact telephone:	951-655-5082
Contact email:	CRAIG.HUNTER.1@US.AF.MIL
EPA Region:	09
Land type:	Federal
Classification:	Large Quantity Generator
Description:	Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Owner/Operator Summary:

Owner/operator name:	US AIR FORCE

MARCH AIR FORCE BASE, 22 CSG/CC, RIVERSIDE, CA 92518 (Continued)

Owner/operator address:	GRAEBER BLDG 470 MARCH ARB, CA 92518
Owner/operator country:	US

Owner/Operator Type:	Operator
Owner/Op start date:	11/01/2013
Owner/Op end date:	Not Reported

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Universal Waste Summary:

Waste type:	Batteries
Accumulated waste on-site:	Yes
Generated waste on-site:	No
Waste type:	Lamps
Accumulated waste on-site:	Yes
Generated waste on-site:	No

MARCH AIR FORCE BASE, 22 CSG/CC, RIVERSIDE, CA 92518 (Continued)

Waste type: Thermostats
Accumulated waste on-site: Yes
Generated waste on-site: No

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 241
. Waste name: Tank bottom waste

. Waste code: 281
. Waste name: Adhesives

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste code: D005

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D018
. Waste name: BENZENE

Date form received by agency: 04/10/2002
Site name: MARCH AIR RESERVE BASE
Classification: Large Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D003
. Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
