The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,
Diana Warshawsky

Dear Councilmember Raman,

I live a couple of blocks from the historic Weddington Golf and Tennis facility, and pass it almost every day on my walks around the neighborhood.

I am totally opposed to Harvard Westlake's proposed use of the facility. The increased traffic, destruction of trees, and noise from shouting spectators at the school's events would be an annoyance that we do NOT want here. While the remainder of this email is a "template" that the volunteers who are working to save Weddington have written, I just wanted you to know that we, as individuals and voters, really care about the facility and want to see it preserved as it is. Surely there are other ways for the current owners to make money without selling it to Harvard Westlake for a school sports facility.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

Dear Councilmember Raman,

I realize this is a form letter, but at the end of the day you just need a body count of those for and those against. So below is the reasons most of which I agree with. I do whole heartedly agree, that this project has grown in scope over the last few years. It has been represented as something residents can use, but slowly disclosed with much restrictions and reservations. It is unfortunate that the sale was ever approved and completed. In the end I strongly oppose the Harvard Westlake plan for the Weddington Golf and Tennis property.

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

On a personal note, I have been a regular golfer at Weddington Golf since I moved here in 1989. This property provides an affordable space for recreation to thousands of locals every year. If the proposed changes go through, it will be a tremendous loss to the community, not only in terms of a recreational space but as a green space as well. With the Pickwick complex being redeveloped, affordable public accessible recreational spaces like this are becoming rarer and rarer. We must keep spaces like this intact or Los Angeles will become a concrete jungle. Urban planning (maintaining a balance with green spaces) has always been an afterthought pushed aside by wealthy developers, please don't let them take this space as well. As single homes in my Studio City neighborhood are quickly being replaced by multi-unit dwellings, recreational spaces for the public like Weddington Golf and Tennis become an even more critical component in keeping Los Angeles liveable.

Sincerely,
Elizabeth Wiehe

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Jan Kikumoto

Dear Councilmember Raman,

Though it's a form letter below, this is all accurate. From a selfish, personal note (and isn't that why we all email council members?), Weddington is as close to a community as we've managed to get since moving down here from Canada fifteen years ago. Our son learned tennis there, I re-learned tennis there, and our family has spent many a too-hot summer day or too-cool winter evening, watching and playing, seeing the same faces over the years as we all enjoy the luxury of having such a great venue in the middle of our city.

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

Dear Councilmember Raman,

I'm a USTA tennis player who plays several times a week at Weddington. I also play golf there. It is a vital part of the community, for the neighborhood, golf and tennis players who do not have the privilege of membership at a private club, and generations of Angelenos who use and treasure public recreation space.

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. MY OPPOSITION TO - ENV-2020-1512-EIR Weddington Golf & Tennis

Julian Siminski <julian.siminski@gmail.com> Fri, Apr 29, 2022 at 6:02 PM
To: councilmember.raman@lacity.org
Cc: kimberly.henry@lacity.org

Dear Councilmember Raman,

As your constituent and a long-time resident of Studio City, I vehemently oppose Harvard-Westlake's destruction of Weddington Golf and Tennis.

This area has few places to go for recreation and Weddington Golf and Tennis offers area and Valley residents a place to play tennis and golf at a reasonable price. It is also in its way a landmark of the eastern San Fernando Valley.

Over the years I have seen developers make promises they never keep, forever changing the character of a neighborhood, destroying older trees and plants that they never replace. We have such a dearth of large, older trees already that this plan makes no sense. I have seen it time and again. Many of those 200 plus trees they would take down, the shade they provide, their usefulness in removing carbon from the environment and the homes they provide for birds and other wildlife will all be lost, all for an oversized development championed by wealthy backers and an elitist school. New trees do not provide the same benefits as large, older trees, and most trees grow at a very slow pace.

This huge project will degrade the integrity and character of Studio City and will be detrimental to all quality of life, property values, access to recreational open space, increase noise levels and traffic, all for a school that could care less about what it will be destroying so they can spend more of their wealth.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

I'm hoping that you can about the environment and integrity of a neighborhood as much as we residents and that you will halt these plants before they go any further. We need

voices in our City government who speak for its citizens, not for wealthy developers and private schools.

Sincerely,

Julian Siminski

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,
Lana Kebabjian

How many sports facilities do 2500 kids need? This facility is going to be leased to out and be used for profit. Why don't they build a facility in a nearby neighborhood that needs revitalization?
How did this even happen? It makes one cry.

Sincerely,

Libby Goldstein

PS: I am a Los Angeles native and a “Valley Girl” all my life.
Weddington is where I learned to play tennis, where my daughter took tennis lessons. It is a fixture in the Studio City area and is a much needed recreational and environmental facility. Harvard Westlake has no concern for the eco-system, the preservation of Valley history or the occupants who must endure this construction, traffic and lose of the beauty and community.
Please stand with us as we fight to keep Weddington!!! It is a big part of our community and it would be a travesty to lose another lovely piece of Los Angeles history.

Dear Councilmember Raman,

My family and I are avid users of Weddington Golf. We use the driving range and play golf a few times a month. It's a lovely family activity and we've met a lot of new people in the community.

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Mike Polis

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

Wedding means so much to me and my family and it is a big reason why we decided to purchase a home and plant our roots here. Shortly after moving to Studio City we found out about the devastating news and have been working hard to oppose it.

Studio City is such a rare and unique gem of the greater LA area and Weddington is one of the those special things that make it so great. There is no other facility like it!

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

Please, please no! Do not allow Harvard Westlake to build on that precious piece of green property. As of now, it's barely available to the public as HW seems to have some deal with Weddington, but the employees aren't allowed to discuss. That's when I got truly suspicious.

Boo on Harvard Westlake and their misleading everyone. Los Angeles needs to keep every bit of green space it has. Let's stop the overdevelopment while we can.

Sincerely,

Paige Wilds Kern

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Samantha Corbin-Miller

I love walking by on Valley Spring every day the quiet and peace it brings me is unmatched to the chaos of the busy streets of Coldwater Canyon and Whitsett. I love watching the wildlife from the birds and the different squirrels. It’s a beautiful escape that we love in the neighborhood, what will happen to that.

Sincerely,

Sandy O.

Resident of Coldwater Canyon Avenue

Dear Councilmember Raman,

I am writing in sincere opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This project will degrade the integrity and character of Studio City and will be hugely detrimental to the quality of life, property values, and most importantly, access to beloved and sorely needed recreational open space for the entire local community.

The studies included in the recently released DEIR - paid for by Harvard Westlake - do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in any realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. You know more about this subject than any other councilmember. Please, please use your unique skills to give a voice to over 100,000 Angelenos who enjoy this beloved facility annually, who wholeheartedly oppose its removal, and please deny permission to build this project that will benefit only a very privileged few (who already have access to plentiful resources elsewhere).

Sincerely,

Sarah Scougal
Local resident (Goodland Avenue)

Dear Councilmember Raman,

I'm very glad you had the opportunity to see the Weddington property.
It is horrible to think of the change that Harvard Westlake is proposing and what that will do to our charming neighborhood. Particularly, it is easy to see how it will lead to an increase in traffic through our streets, some of which have no sidewalks and so the neighbors all walk their children and dogs IN the street. Imagine what 16 - 18 year old drivers racing to get there will do to that scenario.
I cannot see how this will remain largely public space if HW has their way. I am certain after it's built there will be liability issues allowing public access. We will be duped.
It is irksome that a privileged few will benefit and the public at large, let alone our whole quaint neighborhood will suffer the consequences.
Please do everything in your power to keep this plan from moving forward. SO many are counting on you.

Thank you,
S. Forthal

Cc: kimberly.henry@lacity.org

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Sent from my iPhone

I have lived here my whole life, since 1962 and it is absolutely horrible what this city is turning in to.This was a small town that had a multitude of wonderful businesses and things such as the Sportsmans Lodge,which is being leveled, we fished there as kids. The Golf and later to be Tennis courts, yup, we all played there too. And the Weddington Golf and Tennis location is the last green thing in Studio City. Progress is not just leveling what was there to put in some mega dollar development. We need to keep what makes this city special otherwise it will just turn into Encino which is it is doing rapidly, ugly! This is a green zone, probably the last one and should be protected. I do not blame the The Weddington family for wanting to sell their land, I blame the city for not protecting it!
The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Deborah Laub

Dear Councilmember Raman,

I know that sending an email that was pre-written by the Save Weddington organization may seem impersonal or of questionable authenticity, but I assure you that I am a resident of Studio City and fully support their viewpoint. I couldn't have said it better in my own words.

Thank you for considering all options and determining what is truly best for the residents of our beloved neighborhood.

Jeff Azer

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

I myself enjoy the current facility twice a week with my wife and plan to enjoy with my children someday. Every time I visit, I see the happy members of the community brought together in such a special and iconic organization of Studio City. Truly a gem in our town!

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Narbeh Bandary, DDS

Hello,

Thank you for your email. I will be out of the office on Friday, April 29, 2022 and will respond to your email upon my return.

If you are contacting me regarding the Harvard-Westlake River Park Project, I will respond to your email upon my return.

For other inquiries, if you need immediate assistance, please contact my supervisor, Milena Zasadzien at milena.zasadzien@lacity.org.

Thank you for your patience!

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

I do not find it appropriate at all that a private school for the one percent of our city should be able to take over much needed green space and land for a community. We do not need to privatize our city any further.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Catherine & David McDonough

This is the only green space there is, I have been using the driving range & playing golf on the course for 60 plus years, do not allow this space to be compromised.
Sincerely,

E. Monarch

This is one of those unique places that feels like a real community in a what can be a big anonymous city. Harvard-Westlake can easily go elsewhere to build their complex but Weddington can’t be replaced.

Sincerely,
Jane Mangan

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,
Mitch Marxus

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis. I do not live in your district but I have friends and family who do. I am writing to you as an active member of my community, Sun Valley, who is concerned about open space and green space.

In addition, this huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

Our family uses Wedding to play tennis and meet with other neighbors. This is a huge disruption to our way of life and the wellbeing of our children. They are finally of age and are able to walk there, meet with friends, play tennis. This helps them stay active and nurtures their emotional wellness.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Lucia Shashoian

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Matthew Duggan

Further and most importantly, we as your constituents count on you to protect our interests and save our community. It seems that most of the students attending the school are from West Los Angeles. I can assure you that their parents—**and councilmembers** would never allow the destruction of their parks and open spaces to create additional school complexes in their communities. Instead, they are sending their children here and seeking to make these detrimental/harmful changes to our neighborhood.

We need you to protect us!

Sincerely,

Rob Langer

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Sean Blair
Executive Producer

I was born and have lived most of my life in the San Fernando Valley, more precisely, in Sherman Oaks. The Weddington Golf & Tennis facility is one of my favorite parts of the Valley. I have enjoyed many a day out on the golf course and would really hate to see this taken away for the privilege of a private, privileged and exceedingly wealthy school. There are plenty of areas in the valley that would greatly benefit from this type of high end sport complex but I believe it would significantly damage this particular area and Studio City would be forever damaged. Please don't let them take away this beautiful part of Studio City!

Sincerely,

Siobhan Talbot

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Sara Blindauer Beck

Dear Councilmember Raman,

Hi we met online. I am the Rabbi at Kol Ami in West Hollywood but I live in the Valley near Valley College. The Weddington Tennis and golf course is so important to our community here in the valley.

That is why I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Kimberly Henry <kimberly.henry@lacity.org>

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

As a previous resident in Larchmont Village we voted for you as our councilmember…and now as a resident of the Studio City community we view Weddington as one of the few outdoor public spaces where we can meet my daughters friends for golf, tennis, food and neighborhood gathering.

We are also members of the private school community and see it as outrageous that another private school would take this space away from the public for use by only a privileged few.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis. I have lived with my family in Studio City for 50 years and Weddington Golf and Tennis is one of the reasons we have stayed in the area because of its beautiful open space, the affordability of sports activities for me, my wife, children, friends and other family members. We need to preserve this open space for the thousands of people who come here to enjoy activities throughout the years. My children who now play golf and tennis there regularly, see their grown friends who have kids and it is such an oasis for families.

This huge project will also **degrade the integrity and character of Studio City** and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Antara Holloway

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

I am an avid golfer and have been a golf student at Weddington for over 5 years. I use this place 3-4 times a week. It's become an urban refuge for me. I can say this for many other Afro Black players that attend the facility as well.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. Here is a static from “Fore” Magazine in a study done by the USGA. 31% more people of color are golfing. 37% more female players. Weddington is one of a kind in the valley. I live in Westwood and make the drive to regularly attend my lessons at Weddington with coach Kieth Roberts rather than going to Rancho Park.

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Emily Johnson

Dear Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

Weddington has been a staple for my visits to Los Angeles, every flight in I would take the earliest flight I could to carve out time at Weddington to play golf. It was as if time stood still in the busy world of its every growing surroundings. This place has provided affordable green space activities in a city that is quickly becoming an overpriced concrete hell hole. Weddington is a space for inclusivity and peace. Please save Weddington

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,
Shannon Cholakian

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Annie LaRussa 4342 Wilkinson Ave. Studio City 91604

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,
Dani Biasini

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,
Jayson Allen - Early Boys Golf Club

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

As a father of a LAUSD student and as new tennis player - I want you to reconsider gifting wealthy people a big part of our neighborhood and recreation that should be for all. Money shouldn't be the only factor when it comes to the residents of Studio City and the San Fernando Valley.

Also, a large contingent of new students of all ages as well as gifted and wonderful teachers will be forced to either give up the game or lose amazing learning relationships around both golf and tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's hubristic destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space, worsen gridlock, destroy mature trees and habitats and is a hostile takeover by the powerful who are not committed
tothe community in which they are located.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

The idealized-to-the-point-of-falsehood representations insist that this mega-sports facility with plastic grass is a “park.” It is as park-like, open, green idyllic now as it can be; HW’s alterations involve massive structures, field lights for sporting events and paving—and all private.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Dr. Jo Perry

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Sent from my iPhone

Kimberly Henry <kimberly.henry@lacity.org>

I grew up down the street from weddington and it was a second home to me as a child. I joined the youth golf league there in 80s and spent all my free time there. Please don’t let them destroy this facility. It belongs to the public. I hope that my children will be able to enjoy this course just as I did one day.

Sincerely,
Kevin Blum

Ms. Henry and Council-member Raman,

Please save Weddington. This place has meant the world to me for my whole life, and I can't explain how sad it would be to see this property developed. I have made so many friends, learned to love the game of golf, and much more. Needless to say, Weddington is one of the only places in the entire San Fernando Valley that I truly feel like I am part of a greater community, and that place has become my second home.

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans. This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Luke Stanley McGarry

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

We love and use this facility regularly. It's a gem of the community. Every time we're there it's thriving. It provides a safe, outdoor, affordable environment for families and individuals of all ages to meet, exercise and enjoy sport.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Madalyn Meehan

PS. Weddington functions like a public park and it would be a disaster for folks in the valley if we lost access to it for more parking - which can be found or built anywhere , parks are more difficult to find and keep

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Sent from my iPhone

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space. I really think real estate values will go down if the Golf & Tennis is destroyed as Harvard Westlake plans to do. Our community has a certain “villagey” feel that is at the core of its identity. Destroying Weddington Golf & Tennis in the manner proposed would be a punch in the gut to Studio City’s brand,

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

As well as my father of 94 passed away last year and he came to the courts daily to watch his grandson learn from the age of 10 till 22 to play tennis. He never missed it, he even got knocked on his head with a golf ball and had to get checked but nothing stopped him. It was the highlight of his days till the end of his time. This is not just a tennis court or a golf course this is a family place where memories where and are still made. You demolish this beautiful place and you are demolishing years of thousands and thousands of family memories that were and yet to come. All for some rich spoiled people who do not know the meaning of family and love. Only know what there bank accounts mean to them. What has happened to the people with the hearts? We have kids, elderly, animals, all types of people who walk and play and learn at Weddington now only the rich and spoiled will partake with the walls so high like a jail to keep us out and the rich inside. This is an abomination, a disgusting show of separation of people and so much more. Think what you are doing and STOP. It can only cause problems in the future open your eyes.

Sincerely and very very seriously,

Robin Meyer

Opposition to Proposed Destruction of Weddington Golf & Tennis (ENV-2020-1512-EIR)

1 message

Samantha Powell <sammyjay75@gmail.com> Tue, May 10, 2022 at 12:14 PM
To: kimberly.henry@lacity.org, ContactCD4@lacity.org, takeaction@saveweddington.org

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,
Samantha Powell

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Scott Sorrentino

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Scott Sorrentino

Sincerely,

This land has been a haven in the east valley for decades, providing tennis courts and golfing for the public to enjoy. To destroy all of this for a wealthy private school is a travesty. This has to be protected and made a historical landmark for public use. Keep selfish greed out of this equation.

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,
Tony Samucha

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Tiger Curran

To: kimberly.henry@lacity.org, ContactCD4@lacity.org, takeaction@saveweddington.org

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Adam Libarkin

Dear Ms. Henry, I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons. 1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community. 3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy. 4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few. 5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school. This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted. It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College. Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR. Thank you for your time and consideration of this most important matter. Sincerely,

Amy Galaudet,
Thomas Challener, and family

Dear Ms. Henry, I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons. 1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community. 3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy. 4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few. 5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school. This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted. It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College. Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR. Thank you for your time and consideration of this most important matter. Sincerely,

Kimberly Henry <kimberly.henry@lacity.org>

Dear Ms. Henry,

I do oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. The traffic. The traffic. The traffic.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, **when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed**. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a *higher standard*, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,
Brianna

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,
Casey Kasemeier

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.

4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.

5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

Dear dear Ms. Henry,

I strongly oppose (very strongly, it has been weighing my heart for actual years now) Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is deeply concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It is wholly and utterly shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a long-standing and deeply beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College. It would be a win win for the community and the school!

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR. PLEASE PLEASE PLEASE!

Thank you for your time and consideration of this most important matter.

Sincerely and with deepest hopes for your support of the community over a select and morally-negligent few,

Cheyanne Gustason

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Dale K. Rose

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. Dear Ms. Henry:

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

First and foremost, this wonderful facility should remain intact, open green space for the entire community to enjoy. Since Harvard-Westlake has taken ownership of the facilities, it has become quite a chore to be able to enjoy the tennis facilities like I used to be able to do. There are numerous times that the facility is unavailable due to Harvard-Westlake taking over the entire facility for their enjoyment. There are numerous tennis teaching pros who will LOSE THEIR JOBS if this facility is forced to close.

There are other concerns as well:

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings. When will we stop allowing the rich to exert their influence to secure variances such as changing Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City?

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community. We already have lost a huge amount of trees at the old Sunkist building. When will we stop allowing our urban tree canopies to be destroyed?

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. You must do everything in your power to preserve this HCM designation. Why do we continue to allow our historical facilities to be destroyed?

4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.

5. Traffic and congestion continue to grow at an alarming rate in LA. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation:

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons. 1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community. 3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy. 4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few. 5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school. This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted. It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College. Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR. Thank you for your time and consideration of this most important matter.

Sincerely,

Don Spielvogel

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely
Estrella Montreros

Dear Ms. Henry,
I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation:

I have spent the majority of my adult life as a resident of first Van Nuys, then Sherman Oaks, where I currently live. I have used the golf facilities at Weddington for decades and continue to do so. I taught my son how to play golf there, and continue to use the range and course. I am in strong opposition to the proposed development of Weddington by Harvard Westlake and urge anybody involved with the outcome to preserve Weddington as a landmark and to maintain it as a public place for recreation.

Sincerely,

Evan Biren

Sherman Oaks resident

With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Sent from my iPhone

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Dear Ms. Henry, I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons. 1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community. 3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy. 4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few. 5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.

5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard,

support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Helen R. Giroux

To: kimberly.henry@lacity.org, ContactCD4@lacity.org, takeaction@saveweddington.org

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation:

This HCM designation should be done at once. It is a golden spot in the Valley, and should be preserved. There is ample room on the Harvard-Westlake parking lot to build a sports complex. They should spend the money on a parking lot/structure on the lot to serve the school and the sports complex on the parking lot and save the Valley's historical green belt.

Howard Ekerling, Studio City Resident.

Opposition to Proposed Destruction of Weddington Golf & Tennis (ENV-2020-1512-EIR)

1 message

Jason Blount <jasonblount@me.com> Tue, May 10, 2022 at 11:15 AM
To: kimberly.henry@lacity.org, ContactCD4@lacity.org, takeaction@saveweddington.org

Dear Ms. Henry,

My name is Jason Blount and I am a Studio City resident of 17 years and a regular Weddington golf course patron with my family.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Jason Blount

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Kimberly Henry <kimberly.henry@lacity.org>

Opposition to Proposed Destruction of Weddington Golf & Tennis (ENV-2020-1512-EIR)

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons. My whole family takes lessons there and if destroyed we will not have the same opportunity additionally our respective coaches will have to find another place to do their work and courts are very hard to find around here. Harvard Westlake could consider building courts on their main campus rather than take these courts from the community.

Here are a few other important reasons this development is concerning:

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community. 3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy. 4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few. 5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school. Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,
Karen Andrews
Valley Village

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. This project is too massive for the neighborhood. It benefits a select group of individuals while seriously threatening and destroying the quality of life for a greater number of people. Please consider that it will forever destroy the tranquility and live ability of the neighborhood. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Sent from my iPhone

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons. 1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community. 3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy. 4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few. 5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school. This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted. It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted. It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College. Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR. Thank you for your time and consideration of this most important matter. Sincerely,

Kimberly Henry <kimberly.henry@lacity.org>

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

With Global warming escalating we need as much natural green space and trees and I am prepared to vote for representatives that protect nature and green space and to build Today a future with natural ecosystems.
This development benefits Only rich students from this school at the expense of the community, more so Harvard Westlake as a school not for profit organization doesn't even bring tax revenues to the city.
I urge you to deny all permits and project all together.

Thank you for your time and consideration of this most important matter.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.

4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.

5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,
Marshall Mcgehee

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Dear Ms. Henry,

I am a life-long Valley resident (born and raised), and I'm writing to encourage you to require Harvard Westlake to spend its money improving community assets like LA Valley College that will benefit the Valley as a whole instead of only the student body at Harvard Westlake. They should not be allowed to destroy Weddington Golf & Tennis. It's time for us to encourage those with wealth (100M to spend!) to be altruistic. This is especially true since we're talking about facilities for education and also EXISTING green space that benefits the quality of life for our residents and animal neighbors.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons. 1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community. 3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy. 4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few. 5. Dear Ms. Henry,
Shame on you for even considering letting an entitled private school company take over sacred land like this. Do not let them do this. Please consider the sanctuary and relief this place provides for people. We don't need rich people kids taking over this land with traffic and construction. Let alone destroying a beautiful habitat for people and animals. This needs to be opposed

For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Michelle colbert

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. 3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Sent from my iPhone

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons;

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. Dear Ms. Henry, I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. As a professional in the Studio City area, one of the essential reliefs from the grind of 12-16 hour days in entertainment [Radford Studios] has been being able to get away and escape to the Weddington Golf Course and get away on the links for a brief respite.

The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. Last I looked, artificial turf does not absorb carbon dioxide or produce oxygen and these days every little bit help – the school should be part of the solution, not part of the problem. And while the plan mentions a water reclamation segment, the water will be used for on-site watering, not to replenish the aquifer. The excess will run off into the LA River, further exacerbating our water issues.

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation.

4. When originally proposed, the space was to include a golf driving range, albeit reduced in size. The last plan I looked at only had a golf putting green. It as if the producers of the plan thought having some "golf" in the plan, it would pass muster, but clearly feel deceived.

5. So you know, I have been using the driving range for some 26/27 years – currently live in Studio City, but previously in Sherman Oaks and before that in the Hollywood Hills. It is a bit of an oasis in Studio City.

5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,
R. D. Roberts

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Kimberly Henry <kimberly.henry@lacity.org>

Cc: councilmember.raman@lacity.org

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

www.sjaeofficial.com

To: kimberly.henry@lacity.org, ContactCD4@lacity.org, takeaction@saveweddington.org, Lex Lang <lex@lexlang.com>, Sandy Fox <sandy@sandyfox.com>

Dear Ms. Henry,

My husband and I are residents of Studio City for over 30 years. We strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis.

The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a **number of reasons.**

Please see below.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. We desperately need to retain our green space. This is a new initiative via Governor Newsome. No matter what they say it will take 80 years to produce the water conservation and shade the existing trees bring to our community. It is science based that when you remove old growth trees it dramatically affects climate, also the native birds and wildlife that will be displaced.

It is important to note that this project is only for 250 wealthy students. They have a fully operating football field, gym and track right around the corner on their existing property.

A project of this size and years of construction and damage to the environment does not serve our community at all.

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate **increased noise, traffic and excavation pollution** which does not conform to the surrounding community.

The noise and pollution would be devastating to our area and homes in the surrounding areas.

3. We**ddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years**. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.

4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.

5. **Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.**

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members and the native american community of this land, have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

We must do more to protect our green space and historical sites from big developers,

and focus our attention and resources on the long term protection of our environment.

Sincerely,

Sandy Fox & Lex Lang

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Scott Sorrentino

Dear Ms. Henry and Councilmember Raman,

I am writing in opposition to Harvard Westlake's destruction of Weddington Golf and Tennis.

This huge project will degrade the integrity and character of Studio City and will be detrimental to the quality of life, property values, and access to recreational open space.

The studies included in the recently released DEIR paid for by Harvard Westlake, do not adequately address the most serious impacts including, but not limited to; traffic, noise, construction, and climate. The mandatory "alternative plans" suggested are disingenuous and lacking in a realistic effort to offer alternate sites or plans.

This property is zoned agricultural/open space and requires "special entitlements" and a "conditional use permit". Both would need your approval to be granted. You are the only councilmember who has a master's degree in urban planning. It is arguable that you know more about this subject than any other councilmember. Please use your unique skills to speak for over 100,000 Angelenos who enjoy this beloved facility annual and deny permission to build this project.

Sincerely,

Scott Sorrentino

Dear Ms. Henry,

I, SERAPHINE GEISMAR SEGAL LIVE AT 12842 MILBANK STREET, STUDIO CITY AND HAVE LIVED THERE SINCE 1972 AND I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons. WHILE I DO NOT PLAY GOLF THE AREA AROUND WEDDINGTON IS A REGULAR AREA I WALK MY DOGS BECAUSE OF THE TREES AND PEACEFUL ATMOSPHERE. STROLLING NEXT TO THE QUIET WATERWAY, GIVES ME A BIT OF NATURE WITHOUT HAVING TO DRIVE ANYWHERE. I LOVE WATCHING THE DUCKS AND BIRDS, THE DIFFERENT NATIVE WILD PLANTS AND EVEN THE DIRT PATH. IT BRINGS ME JOY AND A TIME AWAY FOR "THE CITY SCAPE".

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Sent from my iPad

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.

4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Steven Moloney

Dear Ms. Henry,
I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.
1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Tony Lin

Dear Ms. Henry, I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons. 1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community. 3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy. 4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few. 5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school. Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR. Thank you for your time and consideration of this most important matter.
Sincerely,
--

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LAs green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as the gem of Studio City and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the sites green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plans significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Valerie Eads

Dear Ms. Henry,

Every time I drive down that beautiful block on Whitsett, I'm reminded of how thoroughly I oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is outrageously concerning because:

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.

2. Just when we are being made aware of California's serious drought situation, by destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, this property would add to the already disturbing carbon footprint of a city fighting for its life against global warming.

3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.

4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.

5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. 2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

Dear Ms. Henry,

My name is Zane and I grew up blocks from W G+T, it was a crucial escape from the seemingly endless expanse of real estate that is the Valley. It's also essential for the children in the neighborhood to learn skills in sports that are very expensive to learn elsewhere. Also, as a lifelong public school child and supporter, destroying a public, accessible space like Weddington and giving it to Harvard Westlake is antithetical and a dam shame. I also agree with all the points below:

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.

With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,
Corey Steele 818-929-1611

2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.
3. Weddington Golf & Tennis is often referred to as "the gem of Studio City" and considered a local landmark for nearly 70 years. The LA Cultural Heritage Commission (CHC) supported Historic-Cultural Monument (HCM) designation for the ENTIRE 16-acre Weddington Golf & Tennis subject property. For that reason, we strongly support the mysterious, last-minute revisions be reversed and the designation restored to the CHC's original recommendation: preserving the subject property, which encompasses the golf course, driving range, and a majority of the site's green open space and tree canopy.
4. Millions of Angelenos from all over the City and San Fernando Valley have experienced Weddington Golf & Tennis since its opening in 1956. It is incumbent upon the City to protect precious affordable public spaces from developers and special interests, like Harvard-Westlake, who only serve a privileged few.
5. Traffic and congestion continue to grow at an alarming rate in LA. If allowed to proceed, Harvard-Westlake will spend the next four to five years building a massive $100 million dollar sports complex for its students, while the rest of the community grapples with the plan's significant impact on our roads, traffic, and commutes to work and school.

This project hinges on the granting of a Conditional Use Permit (CUP) and since the proposed plan does not satisfy the necessary conditions, a CUP should absolutely NOT be granted.

It's shocking that Harvard-Westlake would consider spending $100 million on a sports complex for a privileged few, when hundreds of thousands of students citywide are lacking the most basic tools needed to succeed. Therefore, we urge Harvard-Westlake to move its proposed complex to a more cost-effective alternative site, like the nearby Los Angeles Valley College, which the School has previously used for its tennis operations – even recently refurbishing the College's tennis courts. With this good neighbor gesture, Harvard-Westlake would not destroy a beloved community asset, but rather, provide for the community and service a much wider area by improving facilities at Los Angeles Valley College.

Finally, please note that more than 14,000 community members have signed a petition supporting the preservation of the 16-acre Weddington property in its entirety. These individuals are counting on you to subscribe to a higher standard, support the public's interests, stand firm against Harvard-Westlake's lobbyists and moneyed special interests, and deny approval of the CUP and certification of the DEIR.

Thank you for your time and consideration of this most important matter.

Sincerely,

Kimberly Henry <kimberly.henry@lacity.org>

Dear Ms. Henry,

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex is concerning for a number of reasons.

1. With LA's green open space disappearing, Harvard-Westlake plans to service a privileged, select few by replacing 16 irreplaceable acres with artificial turf and concrete buildings, as well as by exerting their influence to secure variances to Weddington Golf & Tennis' A1 Agricultural Open Space zone allowances from the City.
2. By destroying the property's significant existing urban tree canopy along the LA River and replacing it with 12-foot walls, artificial turf, saplings, and towering light poles, the end result allows practices, games, and special events that will generate increased noise and traffic, which does not conform to the surrounding community.

Andy Knuth <andyjacobknuth@gmail.com> Sat, May 7, 2022 at 10:02 PM
To: kimberly.henry@lacity.org

Dear Ms. Henry,

My name is ___?___. I am a recreational tennis player and a member of the LOS ANGELES TENNIS ASSOCIATION, and have been a member for __?__ years.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex by the School is concerning for a number of reasons.

I am particularly concerned with the proposed reduction (16 to 8) of publicly-available tennis courts, since this will restrict the ability of Southern California community members to learn and play tennis. Since the early 1970s, the tennis courts at Weddington have served as a teaching hub, with pros offering instruction to beginners and experienced players, alike. Nearly 100,000 Angelinos of all backgrounds and from across the San Fernando Valley and City of Los Angeles use Weddington Golf & Tennis each year. If the proposed development is approved (for the primary benefit of ~900+ Harvard-Westlake School students), tens of thousands of community members will be forced to relocate to continue playing tennis or may simply stop playing tennis altogether. Our organization, LATA, relies heavily on these courts for our weekly leagues, tournaments and visiting city tennis competitions.

Although the DEIR lists alternate "tennis courts in the East San Fernando Valley available to the public," the average number of courts at those facilities is 4.4. LATA provides larger, unique, socially-formatted tennis opportunities for our LGBTQ+ members who benefit and need that kind of community bond, who have sought us out for these larger activities, which also provide—most importantly—that safe haven our community relies on. Four courts per event does not work for our tournaments and for the larger scale leagues we produce. We use the LA City facilities as best we can for pretty much all of our events that can fit into their limited court availabilities (severely reduced by teaching pro concessions and a minimum of courts blocked to organizations for single reservation seekers). But for our moderately grander tennis competitions, events LATA has been organizing regularly for over 40 years now in LA, we rely on the 8-court-block facilities of which there are only three remaining in our commutable area that will let us reserve, Weddington is one of the three (and with the other two—just like with Weddington—we have to fight to get those court hours with so many other organizers).

The DEIR claims the proposed high school sports complex would be able to continue to host league matches "as under existing conditions". Simple common sense says that is misleading and in practice is not possible. A reduction from 16 to 8 courts available to the public means that organizations would never be able to book an 8-court-block for an event. Historical precedent has shown that facilities would never allow reservation of their entire inventory to one organization on a given day or weekend. The 16 courts that Weddington has now allows for an 8-court booking with room to spare for the city residents, teaching pros, and the like.

Finally, in the DEIR, there are multiple disclaimers and pre-conditions for use of the proposed project's "facilities" for the non-Harvard Westlake users, more specifically there is wording regarding access to facilities that says "when not in use by School" and "for pre-approved organizations." These limitations are in stark contrast to the publicly available amenities at Weddington Golf & Tennis which have always been open to all community members without restrictions of any kind at any time. Beyond the hoops we believe we will have to jump through to secure the use of their courts, this leads us to believe that Harvard Westlake is truly not open to the use of these facilities to outside organizations, and would use each and every tiny disclaimer as a reason to deny access, or deny a court booking. This, furthermore, alerts us to the insincerity behind their stated intentions: that they want to preserve the community's access to a well-utilized, thriving, beneficial and vital sporting complex which--by the way--we have had and have used for half a century now.

The sport of tennis has grown exponentially during the COVID-19 pandemic and the City should be preserving facilities available for public use, like Weddington, and denying proposed projects that are clearly not in the best interest of the community and would severely curtail public access. In conclusion, I strongly oppose the Harvard-Westlake "River Park" plan and encourage City Planning to deny approval for ENV-2020-1512-EIR.

Sincerely,

Kimberly Henry <kimberly.henry@lacity.org>

Dear Ms. Henry,

My name is Brett Leonard. I am a recreational tennis player and a member of the LOS ANGELES TENNIS ASSOCIATION, and have been a member for 1 year.

I started playing tennis with a close friend Bob McKinney on the courts at Weddington. We would play with a long time coach at these courts, Jeff, and a group of beginner/intermediates. It was at Weddington courts where i started my tennis journey. Later I played a tournament with LATA and had a great time using the courts at Weddington. It would be a shame if these courts were removed.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex by the School is concerning for a number of reasons.

I am particularly concerned with the proposed reduction (16 to 8) of publicly-available tennis courts, since this will restrict the ability of Southern California community members to learn and play tennis. Dear Ms. Henry,

My name is Paul Wong. I am a recreational tennis player and a member of the LOS ANGELES TENNIS ASSOCIATION, and have been a member for 32+ years.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex by the School is concerning for a number of reasons.

I am particularly concerned with the proposed reduction (16 to 8) of publicly-available tennis courts, since this will restrict the ability of Southern California community members to learn and play tennis. Since the early 1970s, the tennis courts at Weddington have served as a teaching hub, with pros offering instruction to beginners and experienced players, alike. Nearly 100,000 Angelinos of all backgrounds and from across the San Fernando Valley and City of Los Angeles use Weddington Golf & Tennis each year. If the proposed development is approved (for the primary benefit of ~900+ Harvard-Westlake School students), tens of thousands of community members will be forced to relocate to continue playing tennis or may simply stop playing tennis altogether. Our organization, LATA, relies heavily on these courts for our weekly leagues, tournaments and visiting city tennis competitions.

Although the DEIR lists alternate "tennis courts in the East San Fernando Valley available to the public," the average number of courts at those facilities is 4.4. LATA provides larger, unique, socially-formatted tennis opportunities for our LGBTQ+ members who benefit and need that kind of community bond, who have sought us out for these larger activities, which also provide—most importantly—that safe haven our community relies on. Four courts per event does not work for our tournaments and for the larger scale leagues we produce. We use the LA City facilities as best we can for pretty much all of our events that can fit into their limited court availabilities (severely reduced by teaching pro concessions and a minimum of courts blocked to organizations for single reservation seekers). But for our moderately grander tennis competitions, events LATA has been organizing regularly for over 40 years now in LA, we rely on the 8-court-block facilities of which there are only three remaining in our commutable area that will let us reserve, Weddington is one of the three (and with the other two—just like with Weddington—we have to fight to get those court hours with so many other organizers).

The DEIR claims the proposed high school sports complex would be able to continue to host league matches "as under existing conditions". Simple common sense says that is misleading and in practice is not possible. A reduction from 16 to 8 courts available to the public means that organizations would never be able to book an 8-court-block for an event. Historical precedent has shown that facilities would never allow reservation of their entire inventory to one organization on a given day or weekend. The 16 courts that Weddington has now allows for an 8-court booking with room to spare for the city residents, teaching pros, and the like.

Finally, in the DEIR, there are multiple disclaimers and pre-conditions for use of the proposed project's "facilities" for the non-Harvard Westlake users, more specifically there is wording regarding access to facilities that says "when not in use

by School" and "for pre-approved organizations." These limitations are in stark contrast to the publicly available amenities at Weddington Golf & Tennis which have always been open to all community members without restrictions of any kind at any time. Beyond the hoops we believe we will have to jump through to secure the use of their courts, this leads us to believe that Harvard Westlake is truly not open to the use of these facilities to outside organizations, and would use each and every tiny disclaimer as a reason to deny access, or deny a court booking. This, furthermore, alerts us to the insincerity behind their stated intentions: that they want to preserve the community's access to a well-utilized, thriving, beneficial and vital sporting complex which--by the way--we have had and have used for half a century now.

The sport of tennis has grown exponentially during the COVID-19 pandemic and the City should be preserving facilities available for public use, like Weddington, and denying proposed projects that are clearly not in the best interest of the community and would severely curtail public access. In conclusion, I strongly oppose the Harvard-Westlake "River Park" plan and encourage City Planning to deny approval for ENV-2020-1512-EIR.

Sincerely,

Paul Wong

Dear Ms. Henry,

My name is Ralph Gorgoglione. I am a recreational tennis player and a member of the LOS ANGELES TENNIS ASSOCIATION, and have been a member for 22 years.

I have played at Weddington hundreds of times over the years in tournaments, leagues, drop-ins, lessons and round robins.

I'm also a real estate broker in LA for 17 years now. I've been. USPTA Elite Level Professional Instructor for over 18 years.

I can say first hand as a real estate broker there are hundreds of clients I have worked with coming to LA that specifically look for tennis facilities nearby when deciding which neighborhoods to reside. The fact that Weddington has been there was the deciding factor for dozens real estate clients to purchase property and bring their income to the local area. This goes for those looking to lease in the area. These residents are medical professionals, financial professionals, entertainment industry professionals, etc., all of which have brought their income and tax dollars to Studio City because of the Weddington facility being nearby.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex by the School is concerning for a number of reasons.

I am particularly concerned with the proposed reduction (16 to 8) of publicly-available tennis courts, since this will restrict the ability of Southern California community members to learn and play tennis. Adam Dworkin <agdworkin@gmail.com> Sun, May 8, 2022 at 1:53 PM
To: kimberly.henry@lacity.org, contactCD4@lacity.org
Cc: takeaction@saveweddington.org

Dear Ms. Henry,

My name is Adam Dworkin. I am a recreational tennis player and a member of the LOS ANGELES TENNIS ASSOCIATION, where I've made great friendships and kept physically fit after relocating back to Los Angeles during the pandemic. As I write this, I have my tennis bag packed, and will drive to Weddington Golf & Tennis to play in my weekley LATA doubles league. After a long week at work, I look forward to nothing more than playing tennis on Weddington's tennis courts. My heart breaks that I even need to write this letter of opposition to ENV-2020-1512-EIR.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex by the School is concerning for a number of reasons.

I am particularly concerned with the proposed reduction (16 to 8) of publicly-available tennis courts, since this will restrict the ability of Southern California community members to learn and play tennis. Since the early 1970s, the tennis courts at Weddington have served as a teaching hub, with pros offering instruction to beginners and experienced players alike. Nearly 100,000 Angelinos of all backgrounds and from across the San Fernando Valley and City of Los Angeles use Weddington Golf & Tennis each year. If the proposed development is approved (for the primary benefit of ~900+ Harvard-Westlake School students), tens of thousands of community members will be forced to relocate to continue playing tennis or may simply stop playing tennis altogether. Our organization, LATA, relies heavily on these courts for our weekly leagues, tournaments and visiting city tennis competitions.

As an alumnus of another elite, private school in Los Angeles, Windward School, I am terribly bothered by the notion that a well-endowed private institution is attempting to steal public tennis courts from the people of the Los Angeles tennis community. Private school education is a wonderful privilege for those able to pay for it, but that education should *never* come at the expense of the public.

Although the DEIR lists alternate "tennis courts in the East San Fernando Valley available to the public," the average number of courts at those facilities is 4.4. LATA provides larger, unique, socially-formatted tennis opportunities for our LGBTQ+ members who benefit and need that kind of community bond, who have sought us out for these larger activities, which also provide—most importantly—that safe haven our community relies on. Four courts per event does not work for our tournaments and for the larger scale leagues we produce. We use the LA City facilities as best we can for pretty much all of our events that can fit into their limited court availabilities (severely reduced by teaching pro concessions and a minimum of courts blocked to organizations for single reservation seekers). But for our moderately grander tennis competitions, events LATA has been organizing regularly for over 40 years now in LA, we rely on the 8-court-block facilities of which there are only three remaining in our commutable area that will let us reserve, Weddington is one of the three (and with the other two—just like with Weddington—we have to fight to get those court hours with so many other organizers).

The DEIR claims the proposed high school sports complex would be able to continue to host league matches "as under existing conditions". Simple common sense says that is misleading and in practice is not possible. A reduction from 16 to 8 courts available to the public means that organizations would never be able to book an 8-court-block for an event. Historical precedent has shown that facilities would never allow reservation of their entire inventory to one organization on a given day or weekend. The 16 courts that Weddington has now allows for an 8-court booking with room to spare for the city residents, teaching pros, and the like.

Finally, in the DEIR, there are multiple disclaimers and pre-conditions for use of the proposed project's "facilities" for the non-Harvard-Westlake users, more specifically there is wording regarding access to facilities that says "when not in use by School" and "for pre-approved organizations." These limitations are in stark contrast to the publicly available amenities at Weddington Golf & Tennis which have always been open to all community members without restrictions of any kind at any time. Beyond the hoops we believe we will have to jump through to secure the use of their courts, this leads us to

believe that Harvard-Westlake is truly not open to the use of these facilities to outside organizations, and would use each and every tiny disclaimer as a reason to deny access, or deny a court booking. This, furthermore, alerts us to the insincerity behind their stated intentions: that they want to preserve the community's access to a well-utilized, thriving, beneficial and vital sporting complex which--by the way--we have had and have used for half a century now.

The sport of tennis has grown exponentially during the COVID-19 pandemic and the City should be preserving facilities available for public use, like Weddington, and denying proposed projects that are clearly not in the best interest of the community and would severely curtail public access. In conclusion, I strongly oppose the Harvard-Westlake "River Park" plan and encourage City Planning to deny approval for ENV-2020-1512-EIR.

The 16 courts that Weddington has now allows for an 8-court booking with room to spare for the city residents, teaching pros, and the like.

Finally, in the DEIR, there are multiple disclaimers and pre-conditions for use of the proposed project's "facilities" for the non-Harvard Westlake users, more specifically there is wording regarding access to facilities that says "when not in use by School" and "for pre-approved organizations." These limitations are in stark contrast to the publicly available amenities

at Weddington Golf & Tennis which have always been open to all community members without restrictions of any kind at any time. Beyond the hoops we believe we will have to jump through to secure the use of their courts, this leads us to believe that Harvard Westlake is truly not open to the use of these facilities to outside organizations, and would use each and every tiny disclaimer as a reason to deny access, or deny a court booking. This, furthermore, alerts us to the insincerity behind their stated intentions: that they want to preserve the community's access to a well-utilized, thriving, beneficial and vital sporting complex which--by the way--we have had and have used for half a century now.

The sport of tennis has grown exponentially during the COVID-19 pandemic and the City should be preserving facilities available for public use, like Weddington, and denying proposed projects that are clearly not in the best interest of the community and would severely curtail public access. In conclusion, I strongly oppose the Harvard-Westlake "River Park" plan and encourage City Planning to deny approval for ENV-2020-1512-EIR.

Sincerely,

Glenn Wagner

Opposition to proposed destruction of Weddington Golf & Tennis (ENV-2020-1512-EIR)

Dear Ms. Henry,

My name is Ignacio Plascencia. I am a recreational tennis player and a member of the LOS ANGELES TENNIS ASSOCIATION, and have been a member for 1 years.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex by the School is concerning for a number of reasons.

I am particularly concerned with the proposed reduction (16 to 8) of publicly-available tennis courts, since this will restrict the ability of Southern California community members to learn and play tennis. Since the early 1970s, the tennis courts at Weddington have served as a teaching hub, with pros offering instruction to beginners and experienced players, alike. Nearly 100,000 Angelinos of all backgrounds and from across the San Fernando Valley and City of Los Angeles use Weddington Golf & Tennis each year. If the proposed development is approved (for the primary benefit of ~900+ Harvard-Westlake School students), tens of thousands of community members will be forced to relocate to continue playing tennis or may simply stop playing tennis altogether. Our organization, LATA, relies heavily on these courts for our weekly leagues, tournaments and visiting city tennis competitions.

Although the DEIR lists alternate "tennis courts in the East San Fernando Valley available to the public," the average number of courts at those facilities is 4.4. LATA provides larger, unique, socially-formatted tennis opportunities for our LGBTQ+ members who benefit and need that kind of community bond, who have sought us out for these larger activities, which also provide—most importantly—that safe haven our community relies on. Four courts per event does not work for our tournaments and for the larger scale leagues we produce. We use the LA City facilities as best we can for pretty much all of our events that can fit into their limited court availabilities (severely reduced by teaching pro concessions and a minimum of courts blocked to organizations for single reservation seekers). But for our moderately grander tennis competitions, events LATA has been organizing regularly for over 40 years now in LA, we rely on the 8-court-block facilities of which there are only three remaining in our commutable area that will let us reserve, Weddington is one of the three (and with the other two—just like with Weddington—we have to fight to get those court hours with so many other organizers).

The DEIR claims the proposed high school sports complex would be able to continue to host league matches "as under existing conditions". Simple common sense says that is misleading and in practice is not possible. A reduction from 16 to 8 courts available to the public means that organizations would never be able to book an 8-court-block for an event. Historical precedent has shown that facilities would never allow reservation of their entire inventory to one organization on a given day or weekend. The 16 courts that Weddington has now allows for an 8-court booking with room to spare for the city residents, teaching pros, and the like.

Finally, in the DEIR, there are multiple disclaimers and pre-conditions for use of the proposed project's "facilities" for the non-Harvard Westlake users, more specifically there is wording regarding access to facilities that says "when not in use by School" and "for pre-approved organizations." These limitations are in stark contrast to the publicly available amenities at Weddington Golf & Tennis which have always been open to all community members without restrictions of any kind at any time. Beyond the hoops we believe we will have to jump through to secure the use of their courts, this leads us to believe that Harvard Westlake is truly not open to the use of these facilities to outside organizations, and would use each and every tiny disclaimer as a reason to deny access, or deny a court booking. This, furthermore, alerts us to the insincerity behind their stated intentions: that they want to preserve the community's access to a well-utilized, thriving, beneficial and vital sporting complex which--by the way--we have had and have used for half a century now.

The sport of tennis has grown exponentially during the COVID-19 pandemic and the City should be preserving facilities available for public use, like Weddington, and denying proposed projects that are clearly not in the best interest of the

community and would severely curtail public access. In conclusion, I strongly oppose the Harvard-Westlake “River Park” plan and encourage City Planning to deny approval for ENV-2020-1512-EIR.

Cc: takeaction@saveweddington.org

I should add, to my prior email, that the loss of courts at Weddington is particularly problematic for me. I have taken lessons with a Pro at Weddington, and I am particularly concerned about the loss of this opportunity with the reduction of courts. The Pro has indicated that with the reduction of courts, rates are likely to increase and the availability of courts may limit his ability to maintain the current level of clients. This means he may have to cut clients, eliminate the ability to continue instruction, or otherwise change locations. The Weddington location was particularly of value given how close it has been to my home.

So, I would say, apart from the issues raised in my prior letter pertaining to LATA and the challenges that this change presents to our organization, it will also present substantive challenges to me and my use of these public facilities.

Therefore, I ask that you please reconsider and deny this request. Please do not eliminate any of these public courts. They present far too great of a value to our community, particularly in this time of social isolation.

Thank you.
Larry Lawrence

Dear Ms. Henry,

My name is Scott Gregory. I am a recreational tennis player and a member of the LOS ANGELES TENNIS ASSOCIATION, and have been a member for 17 years. I love playing tennis and it is a main outlet for me physically and socially. I got my start with LATA playing a weekly league at the Weddington courts for years and continue to play there on occasion. I recently played there during our annual LA Open tennis tournament that hosts players from all over the world.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex by the School is concerning for a number of reasons.

I am particularly concerned with the proposed reduction (16 to 8) of publicly-available tennis courts, since this will restrict the ability of Southern California community members to learn and play tennis. Dear Ms. Henry,

My name is Tu Nguyen. I am a recreational tennis player and a member of the LOS ANGELES TENNIS ASSOCIATION and have been a member for 8 years. I've made many friends through playing tennis with LATA and that's only possible because of the facilities that have allowed those meaningful social connections to happen.

It's in that spirit that I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex by the School is concerning for a number of reasons.

I am particularly concerned with the proposed reduction (16 to 8) of publicly-available tennis courts, since this will restrict the ability of Southern California community members to learn and play tennis. Since the early 1970s, the tennis courts at Weddington have served as a teaching hub, with pros offering instruction to beginners and experienced players, alike. Nearly 100,000 Angelinos of all backgrounds and from across the San Fernando Valley and City of Los Angeles use Weddington Golf & Tennis each year. If the proposed development is approved (for the primary benefit of ~900+ Harvard-Westlake School students), tens of thousands of community members will be forced to relocate to continue playing tennis or may simply stop playing tennis altogether. Our organization, LATA, relies heavily on these courts for our weekly leagues, tournaments and visiting city tennis competitions.

Although the DEIR lists alternate "tennis courts in the East San Fernando Valley available to the public," the average number of courts at those facilities is 4.4. LATA provides larger, unique, socially-formatted tennis opportunities for our LGBTQ+ members who benefit and need that kind of community bond, who have sought us out for these larger activities, which also provide—most importantly—that safe haven our community relies on. Four courts per event does not work for our tournaments and for the larger scale leagues we produce. We use the LA City facilities as best we can for pretty much all of our events that can fit into their limited court availabilities (severely reduced by teaching pro concessions and a minimum of courts blocked to organizations for single reservation seekers). But for our moderately grander tennis competitions, events LATA has been organizing regularly for over 40 years now in LA, we rely on the 8-court-block facilities of which there are only three remaining in our commutable area that will let us reserve, Weddington is one of the three (and with the other two—just like with Weddington—we have to fight to get those court hours with so many other organizers).

The DEIR claims the proposed high school sports complex would be able to continue to host league matches "as under existing conditions". Simple common sense says that is misleading and in practice is not possible. A reduction from 16 to 8 courts available to the public means that organizations would never be able to book an 8-court-block for an event. Historical precedent has shown that facilities would never allow reservation of their entire inventory to one organization on a given day or weekend. The 16 courts that Weddington has now allows for an 8-court booking with room to spare for the city residents, teaching pros, and the like.

Finally, in the DEIR, there are multiple disclaimers and pre-conditions for use of the proposed project's "facilities" for the non-Harvard Westlake users, more specifically there is wording regarding access to facilities that says "when not in use by School" and "for pre-approved organizations." These limitations are in stark contrast to the publicly available amenities at Weddington Golf & Tennis which have always been open to all community members without restrictions of any kind at any time. Beyond the hoops we believe we will have to jump through to secure the use of their courts, this leads us to believe that Harvard Westlake is truly not open to the use of these facilities to outside organizations, and would use each and every tiny disclaimer as a reason to deny access, or deny a court booking. This, furthermore, alerts us to the insincerity behind their stated intentions: that they want to preserve the community's access to a well-utilized, thriving, beneficial and vital sporting complex which--by the way--we have had and have used for half a century now.

The sport of tennis has grown exponentially during the COVID-19 pandemic and the City should be preserving facilities available for public use, like Weddington, and denying proposed projects that are clearly not in the best interest of the

community and would severely curtail public access. In conclusion, I strongly oppose the Harvard-Westlake “River Park” plan and encourage City Planning to deny approval for ENV-2020-1512-EIR.

Sincerely,
Tu Nguyen

Dear Ms. Henry,

My name is Chris Ota. I am a recreational tennis player and a member of the LOS ANGELES TENNIS ASSOCIATION, and have been a member for 5 years.

I strongly oppose Harvard-Westlake School's planned destruction of Weddington Golf & Tennis. The proposed conversion of the Weddington Golf & Tennis property into a private high school sports complex by the School is concerning for a number of reasons.

I am a newly retired LA citizen and recreational tennis plays a central role in my activities and social life. Lost access to the Weddington courts will definitely negatively impact my continued participation in this sport that I've grown to love and depend as a central part of my life.

I am particularly concerned with the proposed reduction (16 to 8) of publicly-available tennis courts, since this will restrict the ability of Southern California community members to learn and play tennis. Since the early 1970s, the tennis courts at Weddington have served as a teaching hub, with pros offering instruction to beginners and experienced players, alike. Nearly 100,000 Angelinos of all backgrounds and from across the San Fernando Valley and City of Los Angeles use Weddington Golf & Tennis each year. If the proposed development is approved (for the primary benefit of ~900+ Harvard-Westlake School students), tens of thousands of community members will be forced to relocate to continue playing tennis or may simply stop playing tennis altogether. Our organization, LATA, relies heavily on these courts for our weekly leagues, tournaments and visiting city tennis competitions.
