Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List: NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Feb 23, 2021

National Priority List - Proposed: PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Feb 23, 2021

Deleted NPL: DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Feb 23, 2021

SEMS List 8R Active Site Inventory: SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Mar 23, 2021

SEMS List 8R Archive Sites: SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Mar 23, 2021

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 22, 2021

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jan 22, 2021

RCRA Generator List: RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 22, 2021

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 22, 2021

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 22, 2021

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 22, 2021

Federal Engineering Controls-ECs: FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 23, 2021

Federal Institutional Controls- ICs: FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 23, 2021

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 9, 2020

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 6, 2021

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 2, 2020

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property: SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Mar 23, 2021

Superfund Decision Documents: SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Feb 23, 2021

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jan 13, 2021

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jan 13, 2021

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jan 13, 2021

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Feb 8, 2021

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jan 13, 2021

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Nov 2, 2020

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 27, 2020

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Mar 9, 2021

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Mar 9, 2021

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Mar 9, 2021

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Mar 23, 2021

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Feb 2, 2021

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Apr 14, 2021

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Apr 14, 2021

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Feb 9, 2021

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Feb 9, 2021

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jan 13, 2021

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Mar 9, 2021

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jan 13, 2021

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Mar 9, 2021

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Apr 20, 2021

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST
LUSTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST
USTs on Tribal/Indian Lands in Region 9, which includes California.
Government Publication Date: Apr 8, 2020

Delisted Tribal Leaking Storage Tanks: DELISTED ILST
Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

Delisted Tribal Underground Storage Tanks: DELISTED IUST
Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.
Government Publication Date: Apr 14, 2020

County

Riverside County - Local Oversight Program List: RIVERSIDE LOP
A list of Leaking Underground Storage Tank (LUST) facilities in Riverside County. This list is made available by Riverside County Department of Environmental Health. Environmental Cleanup Program provides oversight of assessments and cleanups at properties that have been, or may have been, contaminated with hazardous substances from LUSTs or releases associated with other commercial/industrial use.
Government Publication Date: Mar 23, 2021

Riverside County - Underground Storage Tanks List: UST RIVERSIDE
A list of registered Underground Storage Tank (UST) sites in Riverside County. This list is made available by Riverside County Department of Environmental Health. The Hazardous Materials Management Branch (HMMB) regulates and oversees the inspections of constructions, repairs, upgrades, system operation and removal of UST systems.
Government Publication Date: Mar 23, 2021

San Bernardino County - CUPA List: SANBERN CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Bernardino County. This list is made available by San Bernardino County Fire Department which is the CUPA for all areas of the County except the city of Victorville.
Government Publication Date: Mar 4, 2021

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites: PFAS NPL
List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).
Government Publication Date: Mar 1, 2021

Facility Registry Service/Facility Index: FINDS/FRS
The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 2, 2020

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Releases: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Oct 5, 2020

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Feb 23, 2021

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Mar 24, 2021

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Feb 17, 2021

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Feb 17, 2021

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Jan 28, 2020

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 1, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Aug 5, 2020

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 3, 2020

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites: URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations: ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jan 18, 2021

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Apr 13, 2021

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 19, 2020

State

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Feb 22, 2021

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Mar 9, 2021

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Oct 22, 2020

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Nov 10, 2020

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Oct 7, 2020

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jan 13, 2021

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 21, 2021

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Hazardous Waste Manifest Data: HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Oct 19, 2020

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Dec 16, 2020

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Dec 31, 2020

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Feb 9, 2021

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Mar 9, 2021

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jan 12, 2021

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Nov 16, 2020

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Mar 9, 2021

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2018

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Riverside County - Hazardous Waste Generator Sites List: RIVERSIDE HWG

A list of Hazardous Waste Generator Sites in the County of Riverside. This list is made available by Riverside County Department of Environmental Health which has been designated as the CUPA for the County.

Government Publication Date: Mar 23, 2021

Riverside County - Disclosure Facility List: RIVERSIDE HZH

A list of facilities disclosed to Riverside County Department of Environmental Health (DEH). This list is made available by Riverside County DEH which has been designated as the CUPA for the County. A business is required to establish and submit a Business Plan if the facility handles hazardous material equal to or greater than 55 gallons, 500 pounds or 200 cubic feet at any time during the year.

Government Publication Date: Mar 23, 2021

Riverside County - Medical Waste Facilities: RIVERSIDE MED WSTE

This list of active and inactive medical waste facilities is maintained by the County of Riverside Department of Environmental Health.

Government Publication Date: Sep 1, 2020

Riverside County - California Accidental Release Prevention Program Sites: RIVERSIDE RMP

This list of Riverside County California Accidental Release Prevention Program sites is maintained by the County of Riverside Department of Environmental Health. AB 3777 was enacted in 1986 to minimize potential emergencies involving acutely hazardous materials by requiring facilities which handle these materials to submit Risk Management Prevention Plans. The Riverside County Department of Environmental Health Hazardous Materials Branch began implementation of this Program County-wide in January 1991. All cities within Riverside County are included in this list.

Government Publication Date: Jul 29, 2020

San Bernardino County - Medical Waste Facility List: SANBERN MED WSTE

This list of San Bernardino County medical waste facilities is maintained by the County of San Bernardino Department of Public Health Medical Waste Program. The Medical Waste Program regulates generators of medical waste based on the Medical Waste Management Act. The program inspects medical waste facilities, facilities with on-site medical waste treatment units, and common storage areas annually. This program also investigates complaints regarding mishandling of medical waste and facilities that may be operating without a valid health permit. Some facilities that may generate medical waste include hospitals, skilled nursing facilities, blood banks, and doctors, dental and veterinarian offices.

Government Publication Date: Dec 22, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

USER QUESTIONNAIRE RESPONSES

USER QUESTIONNAIRE

Pursuant to ASTM E1527, ASTM E2600, and the EPA All Appropriate Inquiry Rule, the User of the report must answer specific questions regarding the property and supply this information to the Environmental Professional. While we understand that you may have only limited knowledge of the property, please answer the questions to the best of your ability based on your current knowledge, and return the completed questionnaire to PSI.

Phase I ESA Questions

1. Did a review of land title records (or judicial records where appropriate) identify any environmental cleanup liens filed or recorded against the subject property under federal, tribal, state or local law?
   ☐ No ☐ Yes ☐ Unknown (if yes, please briefly discuss on the next page or as an attachment)

2. Did a review of land title records (or judicial records where appropriate) identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law?
   ☐ No ☐ Yes ☐ Unknown (if yes, please briefly discuss on the next page or as an attachment)

3. Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   ☐ No ☐ Yes (if yes, please briefly discuss on the next page or as an attachment)

4. Does the purchase price being paid reasonably reflect the fair market value of the subject property?
   ☐ No ☐ Yes ☐ Not Applicable

   If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
   ☐ No ☐ Yes

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:
   (a) Do you know of the past uses of the property?
   ☐ No ☐ Yes (if yes, please briefly discuss on the next page or as an attachment)
   (b) Do you know of specific chemicals that are present or were once present at the property?
   ☐ No ☐ Yes (if yes, please briefly discuss on the next page or as an attachment)
   (c) Do you know of spills or other chemical releases that have taken place at the property?
   ☐ No ☐ Yes (if yes, please briefly discuss on the next page or as an attachment)
   (d) Do you know of any environmental cleanups that have taken place at the property?
   ☐ No ☐ Yes (if yes, please briefly discuss on the next page or as an attachment)

6. Based on your knowledge and experience related to the subject property are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?
   ☐ No ☐ Yes (if yes, please briefly discuss on the next page or as an attachment)

7. Do you know of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? ☐ No ☐ Yes (if yes, please briefly discuss on the next page or as an attachment)

8. Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?
   ☐ No ☐ Yes (if yes, please briefly discuss below or as an attachment)

Further Explain any Answers Requiring Clarification: _____

_____

_____

_____

_____

_____

Vapor Encroachment Screening Questions

1. Currently, what type of property is the subject property?
☐ Commercial ☐ Industrial ☐ Residential ☐ Multi-Tenant ☐ Vacant Land

2. Are there buildings on the subject property?
☐ Yes ☐ No ☐ Unknown (if **yes**, indicate number and construction type): 10 buildings: Wood stud platform, with corrugated metal siding or stucco over wood

_____

3. Will buildings or structures be constructed on the subject property in the future?
☐ Yes ☐ No ☐ Unknown (if **yes**, indicate number and construction type)

_____

4. If buildings exist or are proposed, do/will they have elevators?
☐ Yes ☐ No ☐ Unknown

5. What type of below-grade level exists or is proposed?
☐ Full/Partial Basement ☐ Crawl Space ☐ Parking Garage ☐ Multi-Level
☐ None/Unknown (if **none/unknown**, skip to question 11)

6. Is there ventilation currently/proposed in the below-grade level?
☐ Yes ☐ No ☐ Unknown

7. Are there sump pumps, floor drains or trenches existing or proposed in the below-grade level?
☐ Yes ☐ No ☐ Unknown

8. Is there a radon or methane mitigation system installed or proposed?
☐ Yes ☐ No ☐ Unknown (If **yes**, please indicate if passive or active):_____

9. What type of heating system exists or is proposed in the building? (check all that apply)
☐ Hot Air Circulation ☐ Hot Air Radiation ☐ Hot Water Radiation
☐ Hot Water Circulation ☐ Fireplace ☐ Radiant Floor Heat ☐ Fuel Oil Furnace
☐ Electric Baseboard ☐ Heat Pump ☐ Wood Stove ☐ Steam Radiation
☐ Coal Furnace ☐ Kerosene Heater ☐ Used Oil Heater ☐ Natural Gas Furnace
☐ Other

10. How are the utility systems fueled/powered or proposed to be fueled/powered?
(check all that apply)

☐ Natural Gas ☐ Propane ☐ Kerosene ☐ Coal ☐ Wood ☐ Electricity
☐ Fuel Oil ☐ Solar ☐ Wind ☐ Other

11. Have there ever been any environmental problems at the subject property?
☐ Yes ☐ No ☐ Unknown (if **yes**, please describe)

12. Does/will a gas station or dry cleaner operate anywhere on the subject property?
☐ Yes ☐ No ☐ Unknown

13. Do/will any of the tenants use hazardous chemicals in relatively large quantities on the subject property?
☐ Yes ☐ No ☐ Unknown

14. Have any tenants ever complained about odors in the building or experienced health-related problems that may have been associated with the building?

☐ Yes ☐ No ☐ Unknown

15. Are the current or proposed operations on the subject property going to require/require special OSHA or EPA permitting?
☐ Yes ☐ No ☐ Unknown

16. Are there any existing or proposed underground or aboveground storage tanks (ASTs/USTs) on the subject property?
☐ Yes ☐ No ☐ Unknown (if **yes**, please describe)

17. Are there sensitive receptors (for example: children, elderly, people in poor health, and so forth) that occupy or will occupy the subject property?
☐ Yes ☐ No ☐ Unknown

Further Explain any Answers Requiring Clarification: _____

_____

_____

Helpful Documents Checklist

Pursuant to ASTM E 1527 §10.8, do you know whether any of the following documents exist related to the subject property, and if so, whether copies will be provided to PSI for review? If so, please submit such documentation to PSI as soon as practical. Please check all that apply.

☐ Environmental site assessment reports (for example: Phase I/II ESAs or RBCA reports)
☐ Environmental compliance audit reports; or risk assessments
☐ Environmental permits or hazardous waste generation notices or reports
☐ Registrations for above or underground storage tanks, or underground injection systems
☐ Safety data sheets (formerly known as Material Safety Data Sheets or MSDSs)
☐ Community right-to-know plans; safety plans; preparedness and prevention plans; spill prevention, countermeasure and control (SPCC) plans; etc.
☐ Notices or other correspondence from any governmental agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens on the property
☐ Geotechnical studies; or reports regarding hydrogeologic conditions on the property or vicinity
☐ Recorded activity and land use limitations (AULs)

RE: CITY DIRECTORY RESEARCH
Link Logistics RAF Assets Portfolio - BR40346
3401 Etiwanda Ave. Jurupa Valley, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
3300-3900 of Etiwanda Avenue
11200-11600 of Iberia St

Liability Notice....38

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Geologic Information

Geologic Units - Page 1

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit DaD2 (5.97%)

Map Unit Name:	Delhi fine sand, 2 to 15 percent slopes, wind-eroded
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Somewhat excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Delhi(85%)

horizon H1(0cm to 25cm)	Fine sand
horizon H2(25cm to 122cm)	Sand
horizon H3(122cm to 152cm)	Fine sandy loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: DaD2 - Delhi fine sand, 2 to 15 percent slopes, wind-eroded

Component: Delhi (85%)
The Delhi component makes up 85 percent of the map unit. Slopes are 2 to 15 percent. This component is on alluvial fans, dunes. The parent material consists of wind modified alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R019XD035CA Sandy (1975) ecological site. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 3e. This soil does not meet hydric criteria.

Component: Tujunga (5%)
Generated brief soil descriptions are created for major soil components. The Tujunga soil is a minor component.

Component: Unnamed (5%)
Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

Component: Hilmar (5%)
Generated brief soil descriptions are created for major soil components. The Hilmar soil is a minor component.

Map Unit Db (86.37%)

Map Unit Name:	Delhi fine sand
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Somewhat excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Delhi(85%)

horizon H1(0cm to 46cm)	Fine sand
horizon H2(46cm to 152cm)	Sand

Component Description:

Soil Information

Minor map unit components are excluded from this report.

Map Unit: Db - Delhi fine sand

Component: Delhi (85%)
The Delhi component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans. The parent material consists of sandy alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 3e. This soil does not meet hydric criteria.

Component: Unnamed (5%)
Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

Component: Unnamed (5%)
Generated brief soil descriptions are created for major soil components. The Unnamed soil is a minor component.

Component: Tujunga (5%)
Generated brief soil descriptions are created for major soil components. The Tujunga soil is a minor component.

Map Unit DbA (3.82%)

Map Unit Name:	Delhi loamy fine sand, 0 to 2 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Somewhat excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Delhi(85%)

horizon H1(0cm to 25cm)	Loamy fine sand
horizon H2(25cm to 122cm)	Sand
horizon H3(122cm to 152cm)	Fine sandy loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: DbA - Delhi loamy fine sand, 0 to 2 percent slopes

Component: Delhi (85%)
The Delhi component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans, dunes. The parent material consists of wind modified alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R019XD035CA Sandy (1975) ecological site. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 2e. This soil does not meet hydric criteria.

Component: Hilmar (10%)
Generated brief soil descriptions are created for major soil components. The Hilmar soil is a minor component.

Component: Tujunga (5%)
Generated brief soil descriptions are created for major soil components. The Tujunga soil is a minor component.

Map Unit GlC (2.8%)

Map Unit Name:	Gorgonio loamy sand, deep, 2 to 8 percent slopes

Soil Information

Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Somewhat excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Gorgonio(85%)

horizon H1(0cm to 38cm)	Loamy sand
horizon H2(38cm to 152cm)	Stratified gravelly loamy sand to gravelly loamy fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: GlC - Gorgonio loamy sand, deep, 2 to 8 percent slopes

Component: Gorgonio (85%)
The Gorgonio component makes up 85 percent of the map unit. Slopes are 2 to 8 percent. This component is on alluvial fans. The parent material consists of alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. This component is in the R019XD035CA Sandy (1975) ecological site. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 2e. This soil does not meet hydric criteria.

Component: Hanford (5%)
Generated brief soil descriptions are created for major soil components. The Hanford soil is a minor component.

Component: Soboba (5%)
Generated brief soil descriptions are created for major soil components. The Soboba soil is a minor component.

Component: Tujunga (5%)
Generated brief soil descriptions are created for major soil components. The Tujunga soil is a minor component.

Map Unit GP (0.26%)

Map Unit Name:	Gravel pits

No more attributes available for this map unit

Component Description:

Minor map unit components are excluded from this report.

Map Unit: GP - Gravel pits

Component: Gravel pits (100%)
Generated brief soil descriptions are created for major soil components. The Gravel pits is a miscellaneous area.

Map Unit HgA (0.29%)

Map Unit Name:	Hanford fine sandy loam, 0 to 2 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Hanford(85%)

horizon H1(0cm to 20cm)	Fine sandy loam
horizon H2(20cm to 102cm)	Fine sandy loam
horizon H3(102cm to 152cm)	Stratified loamy sand to coarse sandy loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: HgA - Hanford fine sandy loam, 0 to 2 percent slopes

Component: Hanford (85%)
The Hanford component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans. The parent material consists of alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is moderate. Shrink-swell potential is low. This soil is rarely flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R019XD029CA Loamy (1975) ecological site. Nonirrigated land capability classification is 3c. Irrigated land capability classification is 1 This soil does not meet hydric criteria.

Component: Ramona (5%)
Generated brief soil descriptions are created for major soil components. The Ramona soil is a minor component.

Component: Tujunga (5%)
Generated brief soil descriptions are created for major soil components. The Tujunga soil is a minor component.

Component: Greenfield (5%)
Generated brief soil descriptions are created for major soil components. The Greenfield soil is a minor component.

Map Unit HlA (0.11%)

Map Unit Name:	Hilmar loamy very fine sand, 0 to 2 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Hilmar(85%)

horizon H1(0cm to 41cm)	Loamy fine sand
horizon H2(41cm to 183cm)	Loamy fine sand
horizon H2(41cm to 183cm)	Loamy sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: HlA - Hilmar loamy very fine sand, 0 to 2 percent slopes

Component: Hilmar (85%)
The Hilmar component makes up 85 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans. The parent material consists of alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is rarely flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R019XD035CA Sandy (1975) ecological site. Nonirrigated land capability classification is 3e. Irrigated land capability classification is 2e. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 3 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 32 within 30 inches of the soil surface.

Component: Delhi (5%)
Generated brief soil descriptions are created for major soil components. The Delhi soil is a minor component.

Soil Information

Component: Chino (5%)
Generated brief soil descriptions are created for major soil components. The Chino soil is a minor component.

Component: Tujunga (5%)
Generated brief soil descriptions are created for major soil components. The Tujunga soil is a minor component.

Map Unit TwC (0.38%)

Map Unit Name:	Tujunga gravelly loamy sand, 0 to 8 percent slopes
Bedrock Depth - Min:	null
Watertable Depth - Annual Min:	null
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Tujunga(85%)

horizon H1(0cm to 25cm)	Gravelly loamy sand
horizon H2(25cm to 152cm)	Loamy sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: TwC - Tujunga gravelly loamy sand, 0 to 8 percent slopes

Component: Tujunga (85%)
The Tujunga component makes up 85 percent of the map unit. Slopes are 0 to 8 percent. This component is on alluvial fans, flood plains. The parent material consists of sandy alluvium derived from granite. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is occasionally flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. This component is in the R019XD035CA Sandy (1975) ecological site. Nonirrigated land capability classification is 4e. Irrigated land capability classification is 4s. This soil does not meet hydric criteria.

Component: Delhi (10%)
Generated brief soil descriptions are created for major soil components. The Delhi soil is a minor component.

Component: Soboba (5%)
Generated brief soil descriptions are created for major soil components. The Soboba soil is a minor component.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *RIVERSIDE* County: **2**
Federal EPA Radon Zone for *SAN BERNARDINO* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SAN BERNARDINO* County

No Measures/Homes:	17
Geometric Mean:	0.5
Arithmetic Mean:	0.7
Median:	0.7
Standard Deviation:	1
Maximum:	2.9
% >4 pCi/L:	0
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Federal Area Radon Information for *RIVERSIDE* County

No Measures/Homes:	24
Geometric Mean:	0.3
Arithmetic Mean:	0.3
Median:	0.5
Standard Deviation:	0.8
Maximum:	1.7
% >4 pCi/L:	0
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells — **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

WATER QUALITY REPORT

Jurupa Community Services District (JCSD) tests the quality of drinking water through an independent laboratory for the constituents required by state and federal regulations. This report shows the results of our monitoring for the period of January 1, 2019 – December 31, 2019. Last year, as in years past, your metered tap water met all U.S. Environmental Protection Agency (U.S. EPA) and State Drinking Water Health Standards.

This report contains important information about your drinking water. Translate it or speak with someone who understands it.

Este informe está disponible en español en línea en JCSD.us/WaterQualityReport

由于此报告书包含着有关饮用水的重要信 息,因此希望各位跟能够翻译或理解报告书 内容的人对话。

COMMUNITY SERVICES DISTRICT
Serving Jurupa Valley and Eastvale

Services: Water / Sewer / Streetlights / Frontage Maintenance / Graffiti Abatement / Parks & Recreation

01

MAINTAINING THE SAFETY OF OUR WATER, NOW AND INTO THE FUTURE

As the General Manager of Jurupa Community Services District (JCSD), I take pride in being part of the team that serves the community and continues the legacy of providing safe and reliable drinking water to our customers since 1966.

Our dedicated team of water professionals has demonstrated resilience and determination in the face of adversity during the current global COVID-19 crisis. Uninterrupted service was possible due to years of preparation and planning as well as our team's unwavering commitment to public service and the community. Through unprecedented times, JCSD's staff continued to reliably deliver water and wastewater services and will continue to do so into the future.

In alignment with the California State Water Resources Control Board Division of Drinking Water, we provide detailed information about the safety of your drinking water in our 2019 Annual Water Quality Report. We look forward to sharing this information on the water system and the water professionals who ensure that our customers receive highly treated and tested water every day. I encourage you to read this report to learn more about the District and your water supply.

Chris Berch
General Manager
Jurupa Community Services District

Exceptional Water Quality

JCSD is committed to proactively and transparently providing our customers with water that meets or exceeds all water quality standards.

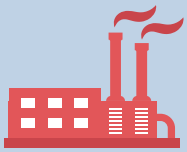
From time to time, our customers may hear about contaminants in water that are affecting local, national and worldwide water quality, including recent stories on perfluoroalkyl and polyfluoroalkyl chemicals (known as PFAS).

We vigilantly test our water thousands of times per year and continuously monitor regulations to ensure our customers receive safe drinking water. Water quality information is available year-round on our website as well as this report.

About PFAS

Found in non-stick cookware, firefighting foam and stain resistant household coatings

PFAS is found in water; however, water agencies don't add these chemicals to water



PFAS enters our water supply as a result of manufacturing, landfills and wastewater discharge

JCSD meets all regulatory levels for PFAS

ABOUT JCSD.

1956 Founded

40.8 Square Mile Service Area

140,150 Customers

32,330 Service Connections

459 Miles of Water Lines

100% Groundwater from Local Wells

THE VALUE OF YOUR TAP WATER

Did you know that the tap water in your home costs less than one cent per gallon? In comparison to bottled water, which is less regulated and loosely monitored, tap water must meet rigorous scientific testing before it enters your home. Your tap water is an exceptional value, especially considering the amount of resources that it takes to pump, test and deliver this resource to your home. Here's a breakdown to explain your water bill:

Monthly Service Charge – This charge covers the majority of the costs to treat and deliver tap water to your home or business. These include maintaining, repairing and replacing water infrastructure, pumping and water quality testing.

Tiered Water Costs – JCSD's rate structure is a tiered system. This means that you pay more when you use more water. Water is billed in HCF or hundred cubic feet. Each HCF is 748 gallons.

Tier 1
1-12 HCF
(748-8,976 gallons)
Generally covers all inside uses including cooking, cleaning and personal use.
- Cheapest Water -

Tier 2
13-20 HCF
(9,724-14,960 gallons)
Generally for efficient outdoor use.

Tier 3
21-30 HCF
(15,708-22,440 gallons)
Generally used by residences with larger landscapes.

Tier 4
30+ HCF
(22,440 gallons or more)
Generally for large landscapes or inefficient water usage.

Sewer Base Charge – This charge covers the majority of the costs to safely remove and treat wastewater from your toilets, sinks, showers and washing machines. Dirty water is then delivered to one of two wastewater treatment plants where contaminants are removed and water is returned into the water cycle with minimum impact to the environment. This includes maintaining, repairing and replacing sewer infrastructure.

Sewer HCF Charge – This charge is based on water use and capped at 8 HCF. It directly relates to the average amount of wastewater generated from indoor uses.

Water Use Efficiency - Small changes can make a big difference. JCSD offers customers many resources to help achieve their water saving goals.

- Free Irrigation System Audit
- Rebates
- Turf Replacement Program
- YardScapes Program
- Flume Program
- Landscape Classes
- Water-saving tips

RATEPAYER $ HARD AT WORK

Granite Hill Pipeline (GHP)

JCSD has benefitted from local groundwater aquifers to supply our water throughout the last 64 years. During that time, several things have changed in the region to impact our water supply including an increase in population, reoccurring droughts and new regulations.

JCSD staff has sought solutions to mitigate these and other changes. Two important components of water supply are reliability and redundancy. This means that multiple water sources or pipelines are available in the event that one or more become inoperative for any reason. On a regular basis, JCSD staff proposes, plans and budgets for projects to improve both reliability and redundancy. These projects can be found in the Water Master Plan and the 2020-2021 Annual Budget. Both documents are located on JCSD's website: www.JCSD.us

The GHP is a water infrastructure project that will meet JCSD's goals of cost efficiency, improved reliability, and redundancy. Currently in the planning and design phase, the project will allow more efficient delivery of water between two pressure zones. This will save a significant amount of energy associated with reduced pump operations. Additionally, the pipeline may be used to convey water between regional partners at a later date. The GHP will be constructed in two phases and the first phase of the work is scheduled to be completed by 2022.

Projects of this scope and scale require a significant amount of time and planning but they are the cornerstone of water supply reliability. It is one more way to ensure safe and reliable drinking water, now and in the future.

INFORMATION ABOUT YOUR WATER

Jurupa Community Services District (JCSD) tests the quality of drinking water through an independent laboratory for many constituents as required by State and Federal Regulations.

This report shows the results of our monitoring for the period of January 1, 2019 - December 31, 2019.

Last year, as in years past, your metered tap water met all U.S. Environmental Protection Agency (USEPA) and State Drinking Water Health Standards.

Este informe contiene información muy importante sobre su agua de beber. Tradúzcalo ó hable con alguien que lo entienda bien.

All water delivered in 2019 was produced from wells.

- JCSD wells are located near Interstate 15 and Highway 60
- Chino I Desalter wells are located in Chino near Chino Airport
- Roger D. Teagarden Ion Exchange Treatment Plant is located near Interstate 15 and Highway 60
- Wells 17/18 Ion Exchange Treatment Facility is located near Interstate 15 and Highway 60
- Chino II Desalter wells are located near Interstate 15 and Bellegrave Ave.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency (USEPA) and the State Water Resources Control Board (State Board) Division of Drinking Water prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. State Board regulations also establish limits for contaminants in bottled water that provide the same protection for public health.

Tables 1, 2, 3, 4, 5 and 6 list all of the drinking water contaminants that were detected during the most recent sampling for the constituent. The presence of these contaminants in the water does not necessarily indicate that the water poses a health risk. The State Board requires all water systems to monitor for certain contaminants less than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year.

Terms Used In This Report:

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. Environmental Protection Agency (USEPA).

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Notification Level (NL): The level is a non-regulatory, health-based advisory level established for contaminants in drinking water for which maximum contaminant level has not been established.

Primary Drinking Water Standard (PDWS): MCLs and MRDLs for contaminants that affect health along with their monitoring and reporting requirements and water treatment requirements.

Public Health Goal (PHG): The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.

Regulatory Action Level (AL): The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements that a water system must follow.

Secondary Drinking Water Standards (SDWS): MCLs for contaminants that affect taste, odor, or appearance of the drinking water. Contaminants with SDWS do not affect health at the MCL levels.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in a drinking water.

Additional General Information On Drinking Water:

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA Safe Drinking Water Hotline (1-800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. USEPA Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

Nitrate (as N) in drinking water at levels above 10 mg/L is a health risk for infants of less than six months of age. Such nitrate levels in drinking water can interfere with the capacity of the infant's blood to carry oxygen, resulting in serious illness; symptoms include shortness of breath and blueness of the skin (methemoglobinemia or Blue-Baby Syndrome). Nitrate (as N) levels above 10 mg/L may also affect the ability of the blood to carry oxygen in other individuals, such as pregnant women and those with certain specific enzyme deficiencies. If you are caring for an infant or you are pregnant, you should ask advice from your health care provider.

If lead in drinking water is present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. JCSD is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or online at www.epa.gov/lead.

Fluoride is a naturally occurring compound. JCSD does not add fluoride to its water supply.

Abbreviations

mg/L — milligrams per liter = parts per million (ppm) (1 ppm is equivalent to 1 second in 11.5 days)

NTU — Nephelometric Turbidity Units

pCi/L — pico Curies per liter (a measure of radiation)

NA — Not Applicable

µg/L — micrograms per liter = parts per billion (ppb)

ND — Not Detectable at testing limit

ng/L — nanograms per liter = parts per trillion (ppt)

µS/cm — microsiemens per centimeter, a unit of conductance (1 µS/cm = 1 µmho/cm)

State Water Resources Control Board (State Board) Division of Drinking Water Fluoridation website link:
https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/Fluoridation

USEPA Web site link: www.epa.gov/ccr/how-water-systems-comply-ccr-requirements

Contaminants that may be present in source water include:

Microbial contaminants, such as viruses and bacteria that may come from sewage treatment plants, septic systems, agricultural livestock operations and wildlife.

Inorganic contaminants, such as salts and metals that can be naturally occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining or farming.

Pesticides and herbicides, that may come from a variety of sources such as agriculture, urban storm water runoff and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals that are byproducts of industrial processes and petroleum production and can also come from gas stations, urban storm-water runoff, agricultural application and septic systems.

Radioactive contaminants, that can be naturally occurring or be the result of oil and gas production and mining activities.

Sodium (Na)	mg/L	28	25 - 28	29	26 - 31	27
Total Hardness (CaCO3)	mg/L	177	130 - 180	205	200 - 210	239

Table 6 - Sampling Results Showing Detection of Constituents with Notification Level

Constituents	Reporting Unit	Average Level Detected	Range of Detection	Average Level Detected	Range of Detection	Average Level Detected
N-Nitrosodimethylamine (NDMA)	ng/L	ND	ND	NA	NA	ND
(1) Perfluorooctanoic Acid (PFOA)	ng/L	ND	ND	[3] 6.1	[3] ND - 12	[3] 3.1
(1) Perfluorooctanesulfonic Acid (PFOS)	ng/L	ND	ND	[3] ND	[3] ND	[3] 47

Footnotes:

(1) NOTE: All water quality data reported in 2019 CCR table were taken from treated water sample locations with the exemption of PFAS data from 870 Zone (JCSD).
(2) NOTE: For 980 Zone (JCSD), the data for gross alpha from 980 blend points A and B were taken in 2015.
(3) NOTE: There is currently not an MCL or sampling requirements for JCSD regarding PFAS chemicals. JCSD sampled PFAS chemicals independently and went above and beyond any requirements. Any source of water that exceeded the Notification Level (NL) has been put on emergency stand-by and would only be used in time of emergencies. All sources above the Response Level (RL) have been removed from the system and will not be used until treatment is in place.
(4) NOTE: The July 2018 notification levels for PFOA of 14 ng/L and for PFOS of 13 ng/L were superseded on August 22, 2019, with new notification levels 5.1 ng/L for PFOA and 6.5 ng/L for PFOS.

JCSD uses Sodium Hypochlorite (Chlorine) for disinfection. JCSD does not use Chloramines.

ne (JCSD)	[1] 870 Zone (Chino I)		Drinking Water Standard Information		
No. of Months in Violation	Highest % of Monthly Positives	No. of Months in Violation	MCL	PHG (MCLG)	Typical Source of Bacteria
0	0	0	5% of monthly samples are positive	(0)	Naturally present in the environment
0	0	0	A routine sample and a repeat sample are total coliform positive, and one of these is also fecal coliform or E coli positive.	(0)	Human and animal fecal waste

90th % Level Detected	No. of Samples	90th % Level Detected	Number of Sites Exceeding (AL)	Action Level (AL)	PHG (MCLG)	Typical Source of Contamination

1.9 - 2.9	1.4	1.1 - 1.6	NA	NA	One of the elements that make up the earths crust's as components of many rock-forming minerals
8.0	8.0	7.9 - 8.0	NA	NA	Erosion of natural deposits
130 - 160	97	94 - 100	NA	NA	Leaching out from rocks and natural deposits
16 -25	11	11	NA	NA	NA
19 - 35	28	27 - 28	NA	NA	Generally found in ground and surface water
180 - 310	190	170 - 210	NA	NA	Generally found in ground and surface water

Range of Detection	Average Level Detected	Range of Detection	Notification Level	PHG (MCLG)	Health Effects
ND	4.0	4.0	10	3	NDMA and other Nitrosamines can cause cancer in laboratory animals. The NTP identifies a number of them as reasonably anticipated to be human carcinogens (NTP,201) and US EPA classifies a number of them as probable human carcinogens.
[3] ND - 6.9	ND	ND	[4] 5.1	NA	Perfluorooctanoic acid exposures resulted in increased liver weight in laboratory animals.
[3] ND - 200	ND	ND	[4] 6.5	NA	Perfluorooctanesulfonic acid exposures resulted in immune suppression, specifically, a decrease in antibody response to an exogenous antigen challenge.

An assessment of the drinking water sources for Jurupa Community Services District was completed in July 2017. The sources are considered most vulnerable to the following activities not associated with contaminants detected in the water supply: Known Contaminant Plumes, Plastics/Synthetics Producers, Junk/Scrap/Salvage Yards, Metal plating/finishing/fabricating, Fleet/truck/bus terminals, and Gas Stations. A copy of the complete assessment is available at 11201 Harrel Street. You may request a summary of the assessment to be sent to you by contacting the Water Quality Department at: (951) 685-7434 Ext. 104. Total of 9 schools from Corona-Norco Unified School District have requested to conduct lead sampling and the results can be found at **www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/leadsamplinginschools.html** and total of 15 schools from Jurupa Unified School District were sampled by an independent group and the results can be found at their own website at **www.jurupausd.org/our-district/planning/mo/Pages/AB-746-Potable-Water-Systems—Lead-Testing.aspx**

HAZARD REDUCTION ABATEMENT NOTICE

SPACE CENTER MIRA LOMA INC
3401 ETIWANDA AVE # 503
MIRA LOMA, CA 91752-1128

APN: 156-140-043
Case No: CE-14-1012

Date: November 5, 2014

Re: NO ADDRESS ASSIGNED

To SPACE CENTER MIRA LOMA INC,

As owner(s) shown on the last equalized assessment roll of the parcel identified above you are hereby given notice that all weeds, dry vegetation, rubble, junk, trash, debris, objects, discarded auto bodies, parts and other waste matter upon the premises is a public nuisance and must be abated (R.C.Per ord.#695). At this time you should make a full and complete inspection of your property and abate (remove) any of the above items by:

COMPLIANCE DATE: December 4, 2014

ABATEMENT MUST INCLUDE:

1. Handwork along perimeters: Removal of weeds/debris from parkway area and edge of street pavement to property; removal of concrete, junk, trash, asphalt, tires, etc. disking more than once :where soil has not adequately mixed with grass; disking twice where tumbleweeds exist.
2. Removal of tree limbs (branches) to provide a minimum of an 8' clearance from ground to branches.
3. Fire officials may require additional abatement work to maximize fire hazard reduction. You may be held liable for costs associated with any Fire Suppression Services that occur on your property which result from dry vegetation or other types of combustible material.

REGROWTH MAY BE SUBJECT TO REMOVAL WITHOUT FURTHER NOTICE:

It is your responsibility to maintain property in good condition at all times. Failure to abate such recurring conditions will result as stated above.

IMPOSED CITY COSTS. FINES AND RIGHTS:

If said items listed are not removed by the compliance date above, the City of Jurupa Valley may order an abatement without further notice and the cost of said abatement shall be assessed against the property as a **Special Tax Lien** . In addition, the City will also impose and assess an administrative fee for each parcel abated and any other recovery costs. If the violations have not been corrected, the City has the authority to issue an Administrative Citation against the property owner and/or parties maintaining the violation and/or commence administrative abatement action. Administrative citations carry a fine from $100.00 for the first occurrence up to $500.00 for the third occurrence of the same violation. Each day that the offense exists constitutes a separate offense.

APPEAL PROCESS

You may appeal to the Fire Marshall of the City of Jurupa Valley and show cause, if any, why the City should not abate the public nuisance. Such appeal shall be in writing and filed with the Fire Prevention Bureau within ten (10) days from the date of this Notice. The Fire Prevention Bureau is located at:

City Hall
8304 Limonite Street, Suite M.
Jurupa Valley, CA 92509

Our mailing address is:

8304 Limonite Street, Suite M.
Jurupa Valley, CA 92509

Further questions concerning this notice can be directed to the Weed Abatement Hotline at: (951) 332-6464

City of Jurupa Valley

Case No: CE-19-0573

Date: April 4, 2019

Re: 3401 ETIWANDA AVE

To SPACE CENTER MIRA LOMA INC,

A recent inspection of your property at 3401 ETIWANDA AVE JURUPA VALLEY, CA 91752-1128 revealed that it contained conditions which violate the City of Jurupa Valley Municipal Code because of the following defects:

1. **Solid Waste Collection & Disposal-**No person shall collect, transfer or remove solid waste in the city without a valid permit or franchise issued by the city. - Jurupa Valley Municipal Code § 6.75.030
   Corrective Action Required: There are tenants on your property that are collecting, transferring, and/or removing waste in the city that are not properly using the franchisee contracted by the City. We have evidence that multiple sub tenants are using third party waste removal companies other than the City of Jurupa Valley's franchisee BURRTEC. Please notify your tenants that they have a responsibility to use the proper franchisee BURRTEC only for solid waste removal. Failure to comply will result in further administrative action.

Section 17920.3 of the California Health & Safety Code declares all such substandard buildings a public nuisance and requires the abatement thereof by repair, if practical, rehabilitation or by demolition. Conditions caused, maintained, and/or permitted to exist are public nuisances in violation of Jurupa Valley Municipal Code section 1.16.020.

As the owner of record, you are hereby notified to comply with the requirements of the above Codes, and to correct the conditions listed. All such work shall be completed within 30 days after receipt of this letter.

This notice will be posted on the property. If, in your opinion, you disagree or cannot comply with the above findings or Order, you may request an Appeal Hearing.

The request for an Appeal Hearing must be made within 30 days after posting of this notice on the property and must be in writing directed to the Jurupa Valley Chief Building Official, Building & Safety Department, 8930 Limonite Avenue, Jurupa Valley, California 92509. The request must be accompanied by a payment of $100.00 (One hundred dollars) hearing fee. If you prevail, the hearing fee will be returned to you.

Permits for repair, or demolition are required before starting the work and may be obtained at the City of Jurupa Valley Building & Safety office at 8930 Limonite Avenue, Jurupa Valley, California. Plans are required for corrective action. Submit plans to the Building & Safety Department. It IS necessary to bring this NOTICE with you when you apply for your permits. If you have any questions regarding this matter, please contact Benny Zimmermann at between 8:30 & 9:30 am, Monday through Friday.

Sincerely,

Benny Zimmermann
Code Enforcement Officer

City of Jurupa Valley

HAZARD REDUCTION ABATEMENT NOTICE

SPACE CENTER MIRA LOMA INC
3401 ETIWANDA AVE # 503
MIRA LOMA, CA 91752-1128

APN: 156-150-069
Case No: CE-14-1011

Date: May 15, 2015

Re: 3401 ETIWANDA AVE # 50

To SPACE CENTER MIRA LOMA INC,

As owner(s) shown on the last equalized assessment roll of the parcel identified above you are hereby given notice that all weeds, dry vegetation, rubble, junk, trash, debris, objects, discarded auto bodies, parts and other waste matter upon the premises is a public nuisance and must be abated (R.C.Per ord.#695). At this time you should make a full and complete inspection of your property and abate (remove) any of the above items by:

COMPLIANCE DATE: **JUNE 8, 2015**

ABATEMENT MUST INCLUDE:

1. **REMOVAL OF ALL TUBMELWEEDS FROM THE PROPERTY AND ADJACENT PARKWAY AREAS.**
2. Handwork along perimeters: Removal of weeds/debris from parkway area and edge of street pavement to property; removal of concrete, junk, trash, asphalt, tires, etc. disking more than once :where soil has not adequately mixed with grass; disking twice where tumbleweeds exist.
3. Removal of tree limbs (branches) to provide a minimum of an 8' clearance from ground to branches.
4. Fire officials may require additional abatement work to maximize fire hazard reduction. You may be held liable for costs associated with any Fire Suppression Services that occur on your property which result from dry vegetation or other types of combustible material.

REGROWTH MAY BE SUBJECT TO REMOVAL WITHOUT FURTHER NOTICE:

It is your responsibility to maintain property in good condition at all times. Failure to abate such recurring conditions will result as stated above.

IMPOSED CITY COSTS. FINES AND RIGHTS:

If said items listed are not removed by the compliance date above, the City of Jurupa Valley may order an abatement without further notice and the cost of said abatement shall be assessed against the property as a **Special Tax Lien** . In addition, the City will also impose and assess an administrative fee for each parcel abated and any other recovery costs. If the violations have not been corrected, the City has the authority to issue an Administrative Citation against the property owner and/or parties maintaining the violation and/or commence administrative abatement action. Administrative citations carry a fine from $100.00 for the first occurrence up to $500.00 for the third occurrence of the same violation. Each day that the offense exists constitutes a separate offense.

APPEAL PROCESS

You may appeal to the Fire Marshall of the City of Jurupa Valley and show cause, if any, why the City should not abate the public nuisance. Such appeal shall be in writing and filed with the Fire Prevention Bureau within ten (10) days from the date of this Notice. The Fire Prevention Bureau is located at:

Partner Project No. 18-231419.15

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 615-4500.

Sincerely,

Jenny Redlin
Relationship Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Space Center, Inc. for the property located at 3401 Etiwanda Avenue, Buildings 711-931 in the City of Jurupa Valley, Riverside County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Space Center, Inc. with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the west side of Space Center Court within an industrial area of Jurupa Valley, California. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address:	3401 Etiwanda Avenue Buildings 711-931, Jurupa Valley, California
Property Use:	Industrial Warehouse
Land Acreage (Ac):	105.43 acres
Number of Buildings:	Nine
Number of Floors:	One
Gross Building Area (SF):	Not provided
Net Rentable Area (SF)	1,557,562
Date of Construction:	1942
Assessor's Parcel Number (APN):	156-150-069
Type of Construction:	Wood-Framed
Current Tenants:	CPS/Coast/Haddy (711A-D), California Packaging (721A-D, 821D), Rhino Container (731A-C), Gileno Distribution (731D, 921C), KeroZak (811A), Airtech (811B), Bridge Trading Corporation (811B, 821C), Rajah Inc. (811B), Best Delivery (811C), O'Neil Tube & Reel (811C), Triways Inc. (811D), Freightco (821A), Manna Freight (821A, 931C), Curvetech LLC (821B), Active Apparel (821B), MJB Wood Group (831A-B), Closet Center (831C), TCS Trucking (831D), Surplus Asset Management (911A), Roller Derby (911B-D), Olive International/Ecotech (921A-C), Decotone (921C), Met Corporation (921D), GL Veneer (931A), Propak (931B), Cornerstone (931B), J H Recycling (931C) and MGA (US Ply) (931D)
Site Assessment Performed By:	Nasim Ahmed of Partner
Site Assessment Conducted On:	November 20, 2018

The subject property is currently occupied by CPS/Coast/Haddy, California Packaging, Rhino Container, Gileno Distribution, KeroZak, Airtech, Bridge Trading Corporation, Rajah Inc., Best Delivery, O'Neil Tube & Reel, Triways Inc., Freightco, Manna Freight, Curvetech LLC, Active Apparel, MJB Wood Group, Closet Center, TCS Trucking, Surplus Asset Management, Roller Derby, Olive International/Ecotech, Decotone, Met Corporation, GL Veneer, Propak, Cornerstone, J H Recycling and MGA (US Ply) for industrial use. Onsite operations consist of packaging supplies, carboard products, empty containers, refrigeration units,

carboard boxes, clothing, wood and lumber, roller derby skates, colored roofing granules, electronic products and general merchandise warehouse and distribution; fabric spools, luggage and laminated countertop manufacturing; steel an aluminum forming; and plastic and Styrofoam recycling activities. In addition to the current structures, the subject property is also improved with trailer parking, railroad tracks, asphalt-paved parking areas and associated landscaping.

According to available historical sources, the subject property was formerly undeveloped as early as 1897; and developed with the current structures in 1942. Tenants on the subject property have included Mira Loma Quartermaster Depot (1942-1966) and various commercial tenants (1975-Present).

The immediately surrounding properties consist of Home Depot Distribution Center and an multi-tenant industrial building to the north; Triways and General Mills to the south; Space Center Court followed by International Vitamin Corporation and a multi-tenant industrial building to the east; railroad tracks to the west followed by a pond; Trailer Parking to the northwest; and railroad tracks and Mission Boulevard to the southwest followed by Mobile Modular Management Corporation.

According to information on the State Water Resources Control Board GeoTracker website (http://geotracker.waterboards.ca.gov/map) the depth to groundwater in the vicinity of the subject property is approximately 35 to 38 feet below ground surface (bgs) with the direction of groundwater flow identified to be towards the southwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- According to historical records, the subject property was developed with the existing nine buildings for industrial purposes since at least 1942. The subject property was formerly part of the Mira Loma Quarter Mater Depot/ Mira Loma Air Force Station, a US Military Reservation, from 1942 to at least 1966. Based on Regional Water Quality Control Board (RWQCB) online records, this facility was used as a military installation for the storage of military supplies. It was comprised of several large warehouses, administration building, training building, infirmary, garage, officer's quarters, sewage disposal plant, engine house, oil pump house, motor repair shop, paint shop, post restaurant, oil storage building, water storage building, and various sheds. Operations were ceased by the late 1960s and early 1970s. The subject property was then sold to a private entity and has been occupied by multiple industrial tenants. According to a previous report, dated May

2018 and performed by Geocon West Inc. (GECON), a landfill area was identified on the western portion of the property (trailer storage area) during a site assessment was conducted by Leighton and Associates in August 1990. The fill consisted of "moderate to heavy amounts" of partially buried solid waste and debris including wood, concrete and asphalt rubble, railroad ties, metal, and empty rusted metal drums. In 1991, three soil borings were advanced in the landfill area to depths of 30, 45, and 50 feet. Inert debris consisting of wood fragments, metal shavings and plastic sheeting was observed in the drill cuttings. Reddish iron staining was also observed. No other soil staining was observed. Eleven soil samples were collected and analyzed for heavy metals, Total Recoverable Petroleum Hydrocarbons (TRPH), polychlorinated biphenyls (PCBs), chlorinated pesticides, halogenated aromatic volatiles, benzene, toluene, ethyl benzene, and xylenes, and semi-volatile organic compounds. One soil sample collected from a depth of 5 feet contained TRPH at a concentration of 8 milligrams per kilogram (mg/kg) and dichloro diphenyl trichloroethane (DDT) at 0.15 mg/kg. According to Mr. Tom Cruikshank, the former inert landfill area in the western portion of the subject property was not completely removed. Only over-excavation and re-compaction to the extent needed to pave for the parking areas was conducted. Based on the soil sampling results and the current use of the area for paved parking, the former reportedly inert landfill activities is considered a CREC and no further action is considered necessary.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property has been occupied by multiple industrial tenants since as early as 1975. As part of the GECON reported, dated May 2018, several previous environmental reports were reviewed and noted various areas of concern, as discussed below.

  A stained area was observed around the adjacent railroad tracks near the northeastern corner of Building 921 during a site assessment conducted by Leighton and Associates in May 1990. Soil samples were collected and were analyzed for heavy metals, PCBs, and TRPH. PCBs were not detected at concentrations exceeding the laboratory detection limits and TRPH concentrations were below regulatory action levels.

A stained area was observed north of Building 711A during a site assessment conducted by CHJ Inc. in November 1994. Six soil samples were collected from depths ranging from 6 inches to 2 feet at three locations. The soil samples were analyzed for TRPH. TRPH concentrations in the shallow samples ranged from 29 to 560 mg/kg. The sample with the highest TRPH concentration was also tested for heavy metals, with results indicating concentrations within typical background levels. The 2-foot sample from that location was also analyzed for TRPH, which was not detected. CHJ concluded that the impacted soils were limited to the upper approximately 6 inches and approximately 4 cubic yards of impacted soil were excavated in March 1995. The maximum TRPH concentration in soil confirmation samples was 36 mg/kg.

A limited subsurface investigation was conducted in an area south the trailer parking, south of Building 711 in April 2012. The purpose of this investigation was to determine if the subsurface media was impacted by a diesel fuel spill reported to the site owner by Haddy Warehousing in February 2012. Six soil samples were collected from three locations within the impacted area. Soil samples were collected from depths of approximately 10 inches and 20 inches. TPH-d was not detected in the three 10-inch soil samples. It was concluded that the impact was limited to the upper soils. A licensed hazardous materials hauler was contracted to remove and dispose of the dead grass and the upper 6 to 8 inches of soil. Following the excavation, laboratory analysis of two confirmation soil samples indicated no detectable concentrations of diesel range hydrocarbons.

Partner notes that analytical data results were not provided in the appendices for review. However, based on the analytical results, excavation of impacted soils, and isolated nature of these incidents, these identified areas of concern are not expected to represent a significant environmental concern and no further investigation is warranted at this time.

- Railroad tracks are located throughout the property. Railroad tracks and spurs represent environmental concerns due to the historical application of oils containing PCBs, herbicides, and arsenic for pest and weed control, as well as the potential presence of creosote on the rail ties, and the historical common practice of using coal cinders for track fill material. However, it is likely that any potential herbicide concentrations have degraded over time, as the railroad tracks and/or spurs have not been used for years. Any potential PCB or arsenic concentrations resulting from the railroad tracks and/or spurs would be confined to the near subsurface sediments and would not present a significant environmental health and safety concern to the building occupants or the underlying groundwater. However, in the event this area of the subject property is redeveloped for residential use, soil sampling may be warranted.
- Due to the age of the subject property buildings, there is a potential that asbestos-containing material (ACM) is present. No damaged friable or damaged nonfriable suspect ACMs were identified. The identified suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 3401 Etiwanda Avenue, Buildings 711-931 in the City of Jurupa Valley, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- If redevelopment of the subject property is planned for residential use, sampling related to the former uses is recommended.
- Operations and Maintenance (O&M) Programs should be implemented in order to safely manage the suspect ACMs located at the subject property.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 3401 Etiwanda Avenue, Buildings 711-931 in the City of Jurupa Valley, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject

property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Space Center, Inc. engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Space Center, Inc. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report is addressed to Barclays Bank PLC ("BBPLC") and its affiliates, their respective successors and assigns (including, without limitation, investors who purchase the mortgage loan or a participation interest in the mortgage loan and the trustee in a securitization that includes the mortgage loan), each servicer of the mortgage loan, and all rating agencies involved in any sale, securitization or syndication involving the mortgage loan may use and rely upon this Report, including, without limitation, utilizing selected information from the Report in the offering materials (either in electronic or hard copy format) relating to any sale, securitization or syndication involving the mortgage loan. The Engineering Consultant agrees to cooperate in answering questions by any of the above parties in connection with the sale, securitization or syndication, as communicated by BBPLC personnel. In addition, this Report or a reference to this Report may be included or quoted in any offering circular, registration statement, prospectus or sales brochure (either in electronic or hard copy format) in connection with a sale, securitization or syndication, or transaction involving such debt and or debt securities. We hereby certify that we have no undisclosed interest in the property, and our employment and compensation are not contingent upon our findings.
This study is subject to the comments made throughout this report and to all assumptions and limiting conditions set forth herein.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted Partner's standard Terms and Conditions, a copy of which can be found at http: / www.partneresi.com/terms-and-conditions.php.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Partner submitted Freedom of Information Act (FOIA) requests to County of Riverside Department of Environmental Health for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner's view of the ground during the site assessment was obstructed due to parked trailers, and/or excessive storage. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 3401 Etiwanda Avenue Buildings 711-931 in Jurupa Valley, California is located on the west side of Space Center Court. According to the Riverside County Assessor records, the subject property is legally identified as Assessor's Parcel Number (APN) 156-150-069, and ownership is currently vested in 1515.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by CPS/Coast/Haddy, California Packaging, Rhino Container, Gileno Distribution, KeroZak, Airtech, Bridge Trading Corporation, Rajah Inc., Best Delivery, O'Neil Tube & Reel, Triways Inc., Freightco, Manna Freight, Curvetech LLC, Active Apparel, MJB Wood Group, Closet Center, TCS Trucking, Surplus Asset Management, Roller Derby, Olive International/Ecotech, Decotone, Met Corporation, GL Veneer, Propak, Cornerstone, J H Recycling and MGA (US Ply) for industrial use. Onsite operations consist of packaging supplies, carboard products, empty containers, refrigeration units, carboard boxes, clothing, wood & lumber, roller derby skates, colored roofing granules, electronic products & general merchandise warehouse and distribution; fabric spools, luggage & laminated countertop manufacturing; steel & aluminum forming; and plastic & Styrofoam recycling activities. The subject property consists of nine one-story buildings located on the east side of the property. In addition to the current buildings, the subject property is also improved with trailer parking, railroad tracks, asphalt-paved parking areas and associated landscaping.

The subject property is designated for industrial development by the City of Jurupa Valley.

The subject property was identified as a California Integrated Water Quality System (CIWQS), Facility Index System (FINDS), Enforcement and Compliance History Information (ECHO), California Facility and Manifest Data (HAZNET), National Pollution Discharge Elimination System (NPDES), Resource Conservation and Recovery Act (RCRA) Small Quantity Generator (SQG), RCRA Non-Generator (NonGen), and California Emission Inventory Data (EMI) site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within an industrial area of Jurupa Valley, California. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties	
North:	Home Depot Distribution Center (11650 Venture Drive) and a multi-tenant industrial building (3401 Etiwanda Ave Building 1011)
South:	Triways (11201 Iberia Street) and General Mills (11600 Iberia Street)
East:	Space Center Court to the east followed by International Vitamin Corporation (11010 Hopkins Street) and a multi-tenant industrial building (3401 Etiwanda Ave)
West:	Railroad tracks followed by a pond
Northwest:	Trailer Parking

Immediately Surrounding Properties

Southwest: Railroad tracks and Mission Boulevard followed by Mobile Modular Management Corporation (11450 Mission Boulevard)

The adjacent property to the north was identified as a HAZNET and RCRA SQG site; the adjacent property to the east was identified as a Leaking Underground Storage Tank (LUST), RCRA Treatment, Storage and Disposal (TSDF), FINDS, ECHO, NPDES, CIWQS, EMI, HAZNET, Envirostor Permitted Facility Listing (HWP), Hazardous Substance Storage Container Database (HIST) Underground Storage Tank (UST), RGA LUST and Hist Cortese sites; the adjacent property to the south was identified as a RCRA Conditionally Exempt Small Quantity Generators (CESQG) site; and the adjacent property to the west was identified as an Envirostor site in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Guasti, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 810 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping toward the southwest. Improvements, with the exceptions of roadways, are not depicted on the 2012 map.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the south-southwest. The nearest surface water in the vicinity of the subject property is the Santa Ana River located approximately 3.5 miles south of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Jurupa Community Service District (JCSD) serves the subject property vicinity. According to a representative of the JCSD, the source of public water for the City of Jurupa Valley is public wells located near Interstate 15 and Highway 60.

According to information on the State Water Resources Control Board GeoTracker website (http://geotracker.waterboards.ca.gov/map) the depth to groundwater in the vicinity of the subject property is approximately 35 to 38 feet below ground surface (bgs) with the direction of groundwater flow identified to be towards the southwest.

2.4.3 Geology/Soils

The subject property overlies the Chino hydrologic subarea (HSA), which lies within the Santa Ana hydrologic basin. The Chino HSA is bounded by the San Gabriel Mountains to the north; the San Jose, Puente, and Chino Hills to the west; the Santa Ana Mountains and El Sobrante De San Jacinto Hills to the South; and the Rialto-Colton Fault to the east. The Jurupa Mountains are in the approximate center of the Chino HSA and the site is approximately 0.5 miles from the southern flanks of these mountains. The Chino HSA was formed by the downward movement of the Perris block along fault zones and corresponding hills and mountains near the perimeter of the HSA. Uplift on the opposite sides of the basin floor formed the surrounding hills and mountains. Erosion of these highland areas gradually filled the basin with alluvial sediments. The sediments have an average thickness of 500 feet within the Chino HSA. Shallow surface soils at the site are composed of older alluvium of Pleistocene age and generally consist of deeply weathered gravel, sand, silt, and clay. These soils are characterized as having low infiltration rates (<1.0 inch/hour). Approximately 0.24 miles north of the site, residual soils are found at the ground surface. The residual soils are a result of deeply weathered crystalline bedrock and consolidated sediments in low relief areas. A basement complex of volcanic, meta-sediments, and igneous rocks, underlies the alluvium and soils in the Chino HSA. Intrusive granitic rocks compose most of the basement complex and were deposited in the Cretaceous period. The basement complex has been the major source of material for the water bearing soils in the Chino HSA.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06065C0019G, dated August 28, 2008, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1897-1938	Aerial Photographs, Topographic Maps	Undeveloped
1942-1966	Aerial Photographs, Previous Report	Industrial -US Military Reservation
1975-Present	Aerial Photographs, City Directories, Previous Report, Onsite Observations	Industrial – Multiple tenants

Tenants on the subject property have included Mira Loma Quartermaster Depot (1942-1966) and commercial tenants (1975-Present). Potential environmental concerns were identified in association with the current or former use of the subject property, as further discussed in Section 5.2.6.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR). The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date: 1938	***Scale: 1'=500"***
Subject Property:	Appears to be undeveloped
North:	Appears to be undeveloped
South:	Appears to be undeveloped
East:	Appears to be undeveloped
West:	Appears to be undeveloped
Northwest:	Appears to be undeveloped
Southwest:	Appears to be undeveloped across railroad tracks

Date: 1948	***Scale: 1'=500"***
Subject Property:	Appears to be part of Mira Loma Quartermaster Depot and developed with the existing nine industrial buildings
North:	Appears to be developed with three industrial structures and storage yard
South:	Appears to be developed with small structures and rail spurs
East:	Appears to be vacant land with rail spurs across a roadway
West:	Appears to be developed with a gravel mining
Northwest:	Appears to be developed with a small structure
Southwest:	Appears to be vacant land across railroad tracks

Date: 1953	***Scale: 1'=500"***
Subject Property:	No significant changes visible
North:	Appears to be developed with three industrial structures and container storage yard
South:	Appears to be developed with additional structures and container storage yard
East:	No significant changes visible
West:	No significant changes visible
Northwest:	No significant changes visible
Southwest:	No significant changes visible

Date: 1967	***Scale: 1'=500"***
Subject Property:	No significant changes visible
North:	Appears to be developed with three industrial structures
South:	Appears to be developed with small structures and rail spurs
East:	No significant changes visible
West:	No significant changes visible
Northwest:	No significant changes visible
Southwest:	No significant changes visible

Date: 1975	***Scale: 1'=500"***
Subject Property:	No significant changes visible
North:	Appears to be developed with industrial structures and storage yard
South:	Appears to be developed with additional structures
East:	No significant changes visible
West:	No significant changes visible
Northwest:	Appears to be developed with a storage yard and railroad tracks
Southwest:	No significant changes visible

Date: 1985	***Scale: 1'=500"***
Subject Property:	No significant changes visible
North:	No significant changes visible
South:	Appears to be developed with small structures, storage yard and railroad tracks
East:	Appears to be developed with a storage yard
West:	No significant changes visible
Northwest:	No significant changes visible
Southwest:	No significant changes visible

Date: 1990	***Scale: 1'=500"***
Subject Property:	No significant changes visible
North:	Appears to be developed with Building 1011 and no other significant changes visible
South:	No significant changes visible
East:	No significant changes visible
West:	No significant changes visible
Northwest:	No significant changes visible
Southwest:	Appears to be graded vacant land across railroad tracks

Date: 1994	***Scale: 1'=500"***
Subject Property:	No significant changes visible
North:	Appears to be developed with container storage yard and Building 10111
South:	Appears to be developed with storage yard and railroad tracks
East:	No significant changes visible
West:	Appears to be developed with a pond
Northwest:	No significant changes visible
Southwest:	No significant changes visible

Date: 2006, 2009	*Scale: 1'=500"*
Subject Property:	Appears to be developed with nine industrial structures and a storage yard on the western portion
North:	Appears to be developed with the existing industrial structures
South:	Appears to be developed with the existing industrial structures
East:	Appears to be developed with the existing industrial structures across Space Center Court
West:	No significant changes visible
Northwest:	Appears to be developed with a storage yard
Southwest:	Appears to be developed with a large storage yard across railroad tracks

Date: 2012, 2016	*Scale: 1'=500"*
Subject Property:	No significant changes visible
North:	No significant changes visible with the exception that that building on the western portion has been expanded
South:	No significant changes visible
East:	No significant changes visible
West:	No significant changes visible
Northwest:	No significant changes visible
Southwest:	No significant changes visible

Copies of the aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed a Certified Sanborn Map Report that was prepared by EDR. According to the report, the subject Property and the nearby area are "unmapped" with no fire insurance maps available.

A copy of the Sanborn Map documentation is included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 3401 Etiwanda Avenue (Subject Property)*	
Year(s)	**Occupant Listed**
1975	Kerns Furniture, Mortarless Block, National Railroad Passengers, Union Pacific Railroad Agent (3401 Etiwanda Ave)
1980	Advance Packaging, Arrow Group Industries, CA Redwood Products, Coast Packaging and Supplies, Convolute Westube, Groschen, Ray, Mortarless Block, Photo Litho Co., Res Com Truss Inc., Rocky Mountain Shippers, Sharp Joe Manufacturing, Tradewind Academy, Uniquip Inc., Weyerheuser Co., Workinger West (3401 Etiwanda Ave)
1985	Advance Packaging, CPS Express, CA Redwood Products, Coast Packaging and Supplies, Dugan CR Construction, Fiber Stream Co., J & S Manufacturing, Kaiser Refractories, Laticrete International Inc., Noma Lites, Photo Litho Co., Sharp Joe Manufacturing, Special Weapon Prod., Swat Viper, Wade Concrete, West End Converters, Western Reel & Supply (3401

According to the city directory review, the adjacent properties were not listed in the city directories between 1975 and 2014. Further discussion of the adjacent properties is included in Section 4.2.

Copies of reviewed city directories are not included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Data Resources (EDR). The following observations were noted to be depicted on the subject property and adjacent properties during the topographic map review:

Date: 1897, 1900, 1903	
Subject Property:	Depicted as developed with a small structure on the northwestern portion
North:	Depicted as undeveloped
South:	Depicted as undeveloped
East:	Depicted as undeveloped
West:	Depicted as undeveloped across a roadway
Northwest:	Depicted as undeveloped
Southwest:	Depicted as undeveloped

Date: 1941	
Subject Property:	Depicted as developed with three small structures on the eastern portion and dirt roads on the central portion of the property
North:	Depicted as vacant land across a dirt road
South:	Depicted as developed with small structures across a dirt road
East:	No significant changes depicted
West:	No significant changes depicted
Northwest:	No significant changes depicted
Southwest:	Depicted as vacant land across Southern Pacific Railroad and Mission Boulevard

Date: 1944	
Subject Property:	Depicted as vacant land
North:	Depicted as vacant land
South:	Depicted as developed with small structures
East:	Depicted as vacant land
West:	Depicted as vacant land across a roadway

Date: 1944	
Northwest:	Depicted as vacant land
Southwest:	Depicted as vacant land across Southern Pacific Railroad and a roadway

Date: 1953, 1954	
Subject Property:	Depicted as part of Mira Loma Quartermaster Depot with nine industrial structures
North:	Depicted as developed with industrial structures and railroad tracks
South:	Depicted as developed with small structures and railroad tracks
East:	Depicted as developed with railroad tracks across a roadway
West:	Depicted as developed with a gravel pit across Wineville Road
Northwest:	Depicted as developed with railroad tracks
Southwest:	Depicted as agricultural land across Union Pacific Railroad and Mission Boulevard

Date: 1966, 1973	
Subject Property:	Depicted as part of US Military Reservation with nine industrial structures
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted
Northwest:	No significant changes depicted
Southwest:	No significant changes depicted

Date: 1976, 1981	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	Depicted as developed with additional structures
East:	No significant changes depicted
West:	No significant changes depicted
Northwest:	No significant changes depicted
Southwest:	Depicted as vacant land across Union Pacific Railroad and Mission Boulevard

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data	
Name of Agency:	California Environmental Protection Agency (Cal/EPA)
Agency Address:	1001 I Street, Sacramento, California 95814
Agency Phone Number:	(916) 323-2514
Date of Contact:	November 13, 2018
Method of Communication:	Online (https://calepa.ca.gov/)
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the Cal EPA.

4.1.2 Health Department

Regulatory Agency Data	
Name of Agency:	County of Riverside Department of Environmental Health (CRDEH)
Agency Address:	4065 County Circle Drive, Riverside, CA 92503
Agency Phone Number:	(951) 358-5055
Date of Contact:	November 13, 2018
Method of Communication:	Fax Request
Summary of Communication:	As of the date of this report, Partner has not received a response from the CRDEH for inclusion in this report. According to the Phase I Environmental Site Assessment Report prepared by Geocon West Inc. dated May 2018, the subject property was formerly occupied by Laticrete, CA Redwood Products, CA Custom Designs, Libbey Inc., Cargo Cats, Railway Express Inc., Borden Trucking, CA Flex Corporation from 1990 to 2012 and has been occupied by J G Haddy/CPS Express, Kerozak, O'Neil Tube & Reel/Pacific Fabric Reel since 2010. Laticrete was issued permit to store hazardous materials on the premises between 1990 and 1997. CA Redwood Products was issued permit to store hazardous materials and generate hazardous wastes on the premises in 1997 and 1998. CA Custom Designs was issued permit to store hazardous materials on the premises between 1996 and 1998. Libbey Inc. was issued permit to store hazardous materials on the premises between 2003 and 2008. Cargo Cats was issued permit to store hazardous materials on the premises between 2004 and 2011. Railway Express Inc. was issued permit to store hazardous materials on the premises between 2003 and 2008. Borden Trucking was issued permit to store hazardous materials on the premises between 1994 and 2011. CA Flex Corporation was issued permit to store hazardous materials on the premises between 2003 and 2010. J G Haddy/CPS Express was issued permit to store hazardous materials on the premises in 2015. Kerozak was issued permit to store hazardous materials on the premises between 2012 and 2015. O'Neil Tube & Reel/Pacific Fabric Reel was issued permit

Regulatory Agency Data	
	to store hazardous materials and generate hazardous wastes on the premises between 2005 and 2011. Further discussion of the onsite operations is included in Sections 4.2 and 5.2.6

4.1.3 Fire Department

Regulatory Agency Data	
Name of Agency:	Riverside County Fire Department (RCFD)
Agency Address:	210 West San Jacinto Avenue, Perris, California 92570
Agency Phone Number:	(951) 940-6900
Date of Contact:	November 13, 2018
Method of Communication:	Telephone
Summary of Communication:	According to Riverside County Fire Department, all records pertaining to the current and/or historical hazardous materials usage, storage or releases, as well as the presence of USTs, is maintained by Riverside County Environmental Health Department.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	South Coast Air Quality Management District (SCAQMD)
Agency Address:	21865 Copley Drive, Diamond Bar, California 91765
Agency Phone Number:	(909) 396-2000
Date of Contact:	November 13, 2018
Method of Communication:	Online (http://www.aqmd.gov/webappl/fim/default.htm)
Summary of Communication:	According to the records reviewed, the subject property identified as American Technical Industries at 3401 Etiwanda Avenue, is listed under Facility ID No. 51280 with an "Inactive" status. No equipment is related to this listing. The subject property identified as American Tree & Wreath at 3401 Etiwanda Avenue, is listed under Facility ID No. 3711 with an "Inactive" status. This facility was issued permit to operate (PTO) a Spray Equipment Open Architectural and Biofilter in 1979. The subject property identified as American Tree Company at 3401 Etiwanda Avenue, is listed under Facility ID No. 50967 with an "Inactive" status. This facility was issued PTO Heater Furnace Natural Gas in 1986. The subject property identified as Barth & Dreyfuss at 3401 Etiwanda Avenue, is listed under Facility ID No. 87850 with an "Inactive" status. No equipment is related to this listing. The subject property identified as Blackhawk Manufacturing Inc. at 3401 Etiwanda Avenue, is listed under Facility ID No. 114955 with an "Inactive" status. This facility was issued PTO a Spray Booth and Solvent in 1998. The subject property identified as Cal Custom Design at 3401 Etiwanda Avenue, is listed under Facility ID No. 23906 with an "Inactive" status. This facility was issued PTO for a Photo Resist Developer, Spray Booth Pain & Solvent, Spray Equipment Open Architectural, Spray Booth Styrenated Resin in 1981, 1983 and 1989. The subject property identified as Cal Custom Design Inc. at 3401 Etiwanda Avenue, is listed under Facility ID No. 51422 with an

Regulatory Agency Data	
	"Inactive" status. This facility was issued a PTO for a Spray Booth Paint and Solvent in 1989 and 1994. The subject property identified as California Redwood Products at 3401 Etiwanda Avenue, is listed under Facility ID No. 56954 with an "Inactive" status. No equipment is related to this listing. The subject property identified as Fiber Stream at 3401 Etiwanda Avenue, is listed under Facility ID No. 5608 with an "Inactive" status. No equipment is related to this listing. The subject property identified as Mobility Sys & Equip Co. at 3401 Etiwanda Avenue, is listed under Facility ID No. 53125 with an "Inactive" status. No equipment is related to this listing. The subject property identified as Western Reel & Supply Corporation at 3401 Etiwanda Avenue, is listed under Facility ID No. 17044 with an "Inactive" status. No equipment is related to this listing. The subject property identified as Space Center Mira Loma Inc. at 3401 Etiwanda Avenue, is listed under Facility ID No. 72988 with an "Inactive" status. This facility was issued PTO for ICE (50-500 HP) EM FIRE FGHT DIESEL in 1990. The subject property identified as Red-E-Kamp Inc. at 3401 Etiwanda Avenue, is listed under Facility ID No. 4767 with an "Inactive" status. No equipment is related to this listing. The subject property identified as Quality Service Railcar Corporation at 3401 Etiwanda Avenue, is listed under Facility ID No. 44621 with an "Inactive" status. This facility was issued PTO for a Spray Booth Paint and Solvent in 1985. The subject property identified as North American Car Corporation at 3401 Etiwanda Avenue, is listed under Facility ID No. 10853 with an "Inactive" status. This facility was issued PTO for an Abrasive Blasting, Scrubber Other Venting System and Spray Booth Paint & Solvent in 1979 and 1980. The subject property identified as National Refractories & Mineral Corporation at 3401 Etiwanda Avenue, is listed under Facility ID No.47449 with an "Inactive" status. This facility was issued PTO for a Clay Blending and Baghouse in 1985. The subject property identified as National Refractories & Mineral Corporation at 3401 Etiwanda Avenue, is listed under Facility ID No47537 with an "Inactive" status. No equipment is related to this listing. Further discussion of the onsite operations is included in Sections 4.2 and 5.2.6.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Agency Address:	3737 Main Street, Unit 500, Riverside, California 92501
Agency Phone Number:	(951) 782-4130
Date of Contact:	November 13, 2018
Method of Communication:	Online (http://geotracker.waterboards.ca.gov/)
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Agency Address:	1001 I Street, Sacramento, California 95814
Agency Phone Number:	(916) 255-3687
Date of Contact:	November 13, 2018
Method of Communication:	Online (https://www.envirostor.dtsc.ca.gov/public/)
Summary of Communication:	According to the records reviewed, the subject property was formerly occupied by Borden Trucking Inc., Pacific Fabric Reels, CPS Express Corporation, Cargo Cats, Ecotech Consumer Products, Proko Industries Inc., North American Car Corporation, California Custom Design, GTE Scrap Yard, Nelson Ball Paper Products, McVeigh Transportation, Distribution Logistics Management Inc., Keyboard Carriage Inc., Chemstar, C Construction Inc., O'Neil Tube & Reel, and General Telephone Company. These facilities generated various wastes on the premises in the past such as unspecified organic liquids in 2015 and other organic solids in 2018. Further discussion of the onsite operations is included in Sections 4.2 and 5.2.6.

4.1.7 Building Department

Regulatory Agency Data	
Name of Agency:	Jurupa Valley Building Department
Agency Address:	8930 Limonite Avenue, Jurupa Valley, California 92509
Agency Phone Number:	(951) 332-6464
Date of Contact:	November 20, 2018
Method of Communication:	In Person
Summary of Communication:	As of the date of this report, Partner has not received a response from the JVBD for inclusion in this report.

4.1.8 Planning Department

Regulatory Agency Data	
Name of Agency:	Jurupa Valley Planning Department
Agency Address:	8930 Limonite Avenue, Jurupa Valley, California 92509
Agency Phone Number:	(951) 332-6464
Date of Contact:	November 13, 2018
Method of Communication:	Online (http://jurupavalley.org/Residents/GIS-Maps)
Summary of Communication:	According to records reviewed, the subject property is designated as industrial (M-M) by the City of Jurupa Valley.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Department of Conservation Division of Oil, Gas and Geothermal Resources (DOGGR)
Agency Address:	801 K Street, MS 24-01, Sacramento, California 95814
Agency Phone Number:	(916) 324-0850
Date of Contact:	November 13, 2018

Regulatory Agency Data	
Method of Communication:	Online (http://maps.conservation.ca.gov/doms/doms-app.html)
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent to the subject property.

4.1.10 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Riverside County Assessor (RCA)
Agency Address:	4080 Lemon Street, Riverside, California 92501
Agency Phone Number:	(951) 955-6200
Date of Contact:	November 13, 2018
Method of Communication:	Online (https://assr.parcelquest.com/Home)
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 156-150-069.

Copies of pertinent documents obtained from the above-referenced regulatory agencies are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources were provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

4.2.2 Subject Property Listings

The subject property is identified as a California Integrated Water Quality System (CIWQS), Facility Index System (FINDS), Enforcement and Compliance History Information (ECHO), California Facility and Manifest Data (HAZNET), National Pollution Discharge Elimination System (NPDES), Resource Conservation and Recovery Act (RCRA) Small Quantity Generator (SQG), RCRA Non-Generator (NonGen), and California Emission Inventory Data (EMI) site in the regulatory database report, as discussed below.

- The subject property, identified as California Custom Design at 3401 Etiwanda Avenue Building 811A, is listed in the HAZNET, RCRA SQG, FINDS, ECHO databases. FINDS and ECHO are typically pointers to other databases, and are used as a tracking tool by the US EPA and State agencies. It is a compilation of the following lists: California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) and Resource Conservation and Recovery Act (RCRA). The property is listed as a FINDS and ECHO site in association with the RCRA listing. No further information was provided under this listing. According to HAZNET listing, California Custom Design generated unspecified solvent mixture, waste oil/mixed oil, and other organic solids from 1995 to 1997. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. According to RCRA SQG listing, this facility is not listed as having violations and was not reported on any of the regulatory databases reviewed which report unauthorized releases and contamination incidents. Based on the aforementioned, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as McVeigh Transportation at 3401 Etiwanda Avenue, is listed in the HAZNET database. According to the database report, McVeigh Corporation generated unspecified solvent mixture in 1995. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, this listing is not considered to represent a significant environmental concern.

- The subject property, identified as Rhino ATP Inc. at 3401 Etiwanda Avenue Building 731A, is listed in the FINDS, NPDES, CIWQS databases. FINDS is typically pointers to other databases, and is used as a tracking tool by the US EPA and State agencies. It is a compilation of the following lists: California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) and Resource Conservation and Recovery Act (RCRA). The property is listed as a FINDS site in association with the RCRA listing. No further information was provided under this listing. According to NPDES listing, Rhino ATP obtained a NPDES Permit on August 1, 2016 for storm water runoff prevention associated with special warehousing/storage activities. No enforcement actions or violations are reported in connection with the NPDES Permit. Based on the lack of violations and the nature of onsite operations (warehousing), these listings are not considered to represent a significant environmental concern.
- The subject property, identified as Proko Industries Inc. at 3401 Etiwanda Avenue Building 931D, is listed in the RCRA NonGen, FINDS, ECHO databases. According to the database report, this facility is not listed as having violations and was not reported on any of the regulatory databases reviewed which report unauthorized releases and contamination incidents. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as Nelson Ball Paper Products at 3401 Etiwanda Avenue Building 831A, is listed in the HAZNET database. According to the database report, Nelson Ball Paper Products generated unspecified organic liquid mixture, other organic solids, waste oil & mixed oil and unspecified aqueous solution in 2004. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as Cargo Cats at 3401 Etiwanda Avenue Building 811A, is listed in the HAZNET database. According to the database report, Cargo Cats generated liquids with pH<=2, other organic solids and other inorganic solid waste in 2004 and 2012. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as JG Haddy Sales Company at 3401 Etiwanda Avenue Building 711A, is listed in the CIWQS, FINDS and ECHO databases. FINDS and ECHO are typically pointers to other databases, and are used as a tracking tool by the US EPA and State agencies. It is a compilation of the following lists: California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) and Resource Conservation and Recovery Act (RCRA). The property is listed as a FINDS and ECHO site in association with the RCRA listing. No further information was

provided under this listing. According to CIWQS listing, JG Haddy Sales Company obtained a CIWQS Permit on November 17, 2009 for storm water runoff prevention associated with trucking without storage activities. No enforcement actions or violations are reported in connection with the CIWQS Permit. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.

- The subject property, identified as O'Neil Tube & Reel at 3401 Etiwanda Avenue Building 811C, is listed in the FINDS and HAZNET databases. The FINDS database typically pointers to other databases, and is used as a tracking tool by the US EPA and State agencies. It is a compilation of the following lists: California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) and Resource Conservation and Recovery Act (RCRA). The property is listed as a FINDS site in association with the RCRA listing. No further information was provided under this listing. According to HAZNET listing, O'Neil Tube & Reel generated other organic solids in 2013, 2015 and 2016. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as Chemstar at 3401 Etiwanda Avenue Building 911D, is listed in the HAZNET database. According to the database report, Chemstar generated unspecified organic liquid mixture and aqueous solution with total organic residues less than 10 percent in 2004 and 2005. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as Distribution Logistics Management Inc. at 3401 Etiwanda Avenue Building 831, is listed in the HAZNET database. According to the database report, Distribution Logistics Management Inc. generated aqueous solution with total organic residues less than 10 percent in 2001. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as CPS Express NA Inc. at 3401 Etiwanda Avenue Building 711, is listed in the FINDS and HAZNET databases. The FINDS database is typically pointers to other databases, and is used as a tracking tool by the US EPA and State agencies. It is a compilation of the following lists: California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) and Resource Conservation and Recovery Act (RCRA). The property is listed as a FINDS site in association with the RCRA listing. No further information was provided under this listing.

According to HAZNET listing, CPS Express generated waste oil/ mixed, liquids with halogenated compounds, unspecified oil-containing waste, other organic solids, unspecified organic liquid mixture in 2000, 2003 and 2011. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.

- The subject property, identified as Space Center Mira Loma at 3401 Etiwanda Avenue Building 811D, is listed in the HAZNET database. According to the database report, Space Center Mira Loma unknown type of wastes in 2012. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as Karis Cham at 3401 Etiwanda Avenue Building 811C, is listed in the HAZNET and EMI databases. According to EMI listing, Karis Cham was issued a permit to emit total organic hydrocarbon gas, reactive organic gas, carbon monoxide, NOX into the air in 1993, 1995 and 1996. No additional information was provided in the database report. According to the HAZNET listing, Karis Cham generated unspecified organic liquid mixture in 2015. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as Cal Custom Design Inc. at 3401 Etiwanda Ave Building 811A, is listed in the EMI database. According to the database report, Cal Custom Design was issued a permit to emit total organic hydrocarbon gas, reactive organic gas, in 1987 and 1990. No additional information was provided in the database report. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.
- The subject property, identified as 3401 Etiwanda Avenue Building 811D, is listed in the CHMIRS database. According to the database report, this site experienced a release of 250-gallons of methylene Diphenyl Disocarnate due to a broken tote in 2004. The Riverside County Environmental Health is reportedly administering agency. Cleanup was reportedly conducted by the responsible party, whom was not identified in the regulatory database. No other details were provided in the CHMIRS listing. Based on the isolated nature of this incident and agency oversight, this listing is not considered to represent a significant environmental concern.
- The subject property, identified as Pacific Fabric Reels at 3401 Etiwanda Avenue Building 811C, is listed in the HAZNET database. According to the database report, Pacific Fabric Reel generated other organic solids in 2006. The HAZNET does not track violators and the presence of a facility

on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.

- The subject property, identified as Kerozakana Inc. at 3401 Etiwanda Avenue Building 811A, is listed in the FINDS database. FINDS is typically pointers to other databases, and is used as a tracking tool by the US EPA and State agencies. It is a compilation of the following lists: California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) and Resource Conservation and Recovery Act (RCRA). The property is listed as a FINDS site in association with the RCRA listing. No further information was provided under this listing. Based on the lack of violations and small quantities of chemicals involved, these listings are not considered to represent a significant environmental concern.

4.2.3 Adjacent Property Listings

The adjacent property to the north is identified as a HAZNET and RCRA SQG site, the adjacent property to the east is identified as a Leaking Underground Storage Tank (LUST), RCRA Treatment, Storage and Disposal (TSDF), FINDS, ECHO, NPDES, CIWQS, EMI, HAZNET, Envirostor Permitted Facility Listing (HWP), Hazardous Substance Storage Container Database (HIST) Underground Storage Tank (UST), RGA LUST and Hist Cortese site, the adjacent property to the south is identified as a RCRA Conditionally Exempt Small Quantity Generators (CESQG) site and the adjacent property to the west is identified as an Envirostor site in the regulatory database report, as discussed below:

- The property, identified as Space Center Mira Loma at 3401 Etiwanda Avenue, is located adjacent to the south of the subject property, and situated hydrologically cross-gradient. This site is listed in the HAZNET, NPDES, CIWQS, FINDS, LUST, RGA LUST and EMI databases. According to HAZNET listing, Space Center Mira Loma generated tank bottom waste, other empty containers, latex waste, unspecified organic liquid mixture, other inorganic solid waste, other organic solid, aqueous solution with total organic residues less than 10 percent, other inorganic solid waste, asbestos containing wastes and unknown type of wastes in 1997, 1999, 2004, 2011 and 2012. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. According to LUST listing, this site reported a release of gasoline in 1990. The release reportedly impacted the soil only. The Riverside County is the lead agency for this site. Case closure was granted on January 2, 1991. Based on the media affected and the current regulatory status, this site is not expected to represent a significant environmental concern.

- The property, identified as GE Rail Car Repair, North American Care and Campbell Oil Company at 3401 Etiwanda Ave, is located adjacent to the south of the subject property, and situated hydrologically cross-gradient. This site is listed in the HIST UST, FINDS, NPDES, CIWQS, RCRA TSDF, RCRA NonGen, FINDS, ECHO, HAZNET, EMI and HWP databases. According to HAZNET listing, North American Car Corporation generated waste/mixed oil, oxygenated solvents, metal

dust, other inorganic solid waste and empty containers oil in 1993. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. According to RCRA TSDF listing, North American Car Corporation was engaged in the treatment, storage or disposal of hazardous wastes. This facility is not listed as having violations and was not reported on any of the regulatory databases reviewed which report unauthorized releases and contamination incidents. As such, this listing is not considered to represent a significant environmental concern. According to HIST UST listing, Campbell Oil Company operated two 11,640-gallon diesel USTs on the premises in the past. No additional information was provided in the database report. In addition, this site is not listed on any regulatory release database that would detail potential impacts the subject property. Based on the lack of a documented release, this site is not expected to represent a significant environmental concern.

- The property, identified as QM Supply Depot, Mira Loma, California, is located adjacent to the west of the subject property, and situated hydrologically cross-gradient. This site is listed in the Envirostor database. The status of this site is listed as Inactive – Needs Evaluation as of July 1, 20105. According to the available information, this is a former U.S. Army installation site that included the subject property from 1942 through 1954. Past uses that caused contamination or potential media affected are not identified. It does not appear that the Quartermaster Supply Depot is a priority for evaluation. The redevelopment and reuse of the area suggests that the facility is unlikely impacted the subject property and is not expected to represent a significant environmental concern.
- The property, identified as Home Depot USA at 11650 Venture Drive, is located adjacent to the north of the subject property, and situated hydrologically cross-gradient. This site is listed in the RCRA SQG database. According to the database report, Home Depot generated ignitable waste and methyl ether ketone on the premises in the past. This facility is not listed as having violations and was not reported on any of the regulatory databases reviewed which report unauthorized releases and contamination incidents. Based on the current regulatory status, this site is not expected to represent a significant environmental concern.
- The property, identified as Iberia/GM Building 5559 at 11600 Iberia Street, is located adjacent to the south of the subject property, and situated hydrologically cross-gradient. This site is listed in the RCRA CESQG database. According to the database report, Iberia/GM Building generated alkaline solution with metals, oxygenated solvents, unspecified oil-containing waste, off-specification, aged or surplus organics, ignitable waste and methyl ether ketone on the premises in the past. This facility is not listed as having violations and was not reported on any of the regulatory databases reviewed which report unauthorized releases and contamination incidents. Based on the current regulatory status, this site is not expected to represent a significant environmental concern.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report. Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings for the subject property or for any adjacent property are identified in the regulatory database report. Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Space Center, Inc. (User of this report).

User Responsibilities				
Item	**Provided By User**	**Not Provided By User**	**Discussed Below**	**Does Not Apply**
Environmental Pre-Survey Questionnaire			**X**	
Title Records, Environmental Liens, and AULs			**X**	
Specialized Knowledge			**X**	
Actual Knowledge			**X**	
Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports	**Section 5.2.6**			
Other				**X**

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User.

5.1.3 Interview with Key Site Manager

Mr. Tom Cruikshank, key site manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Phase I Environmental Site Assessment, Geocon West Inc. (May 2018)

Geocon West Inc. (GECON) prepared this report on behalf of Space Center Inc. The assessment was performed in accordance with ASTM Standard E1527-13. The assessment consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, and a review of federal, state and local regulatory databases. Pertinent information contained in this report is summarized below:

- At the time of the 2018 assessment, the subject property was developed with nine one-story industrial office-warehouse buildings and were occupied by 33 tenants.
- According to the GECON report, the subject property was part of the Mira Loma Quartermaster Depot property and had been occupied by nine warehouse buildings since 1942.
- No current or former ASTs or USTs were identified on the subject property.
- Hazardous substances were identified at the subject property in the form of sponge materials, acetate, acetone, latex paint, hydraulic coil, used oil, transmission fluid, waste antifreeze, waste oil filters, motor oil, gear oil and propane within various buildings. No leaks, spills or staining was observed around any of the stored materials.
- GEOCON reviewed the following environmental reports. Partner notes that analytical data results were not provided in the appendices for review.

  Leighton and Associates, 1990 - According to the report, the assessment was conducted on a 129-acre property that included the subject property. At the time of the site reconnaissance, the subject property was occupied by multiple tenants. Hazardous substance and/or petroleum product were observed. Minor staining was observed on concrete and/or soil in a few locations. Unit 811 D was occupied by California Custom Design, a van conversion business. Strong chemical odor due to the general storage of resins, paints, sealants, and other chemicals was noted. Leighton and Associates recommended that the storage of paints/chemicals and spray within California Custom Design should conform to local, state, and federal ordinances. Stains were observed on the concrete dock and soils around the adjacent railroad tracks near the northeastern corner of Building 921, which was occupied by the General Telephone Sales Surplus Center (GTE). Based on their observations in the area of the GTE facility, Leighton and Associates collected five soil samples from depths ranging from 6 inches to 2 feet in May 1990. The samples were analyzed for heavy metals, polychlorinated biphenyls (PCBs), and TRPH. Leighton and Associates identified a landfill area west of the warehouses. The fill consisted of "moderate to heavy amounts" of partially buried solid waste and debris including wood, concrete and asphalt rubble, railroad ties, metal, and empty rusted metal drums. Leighton and Associates recommended the excavation of stained soils (throughout the 210-acre property) and a geophysical survey of the landfill area.

Leighton and Associates, 1991 - Leighton and Associates presented additional information regarding soil investigation in the GTE area north and east of Building 921 D and the landfill area. Leighton and Associates reported that PCBs were not detected at concentrations exceeding the laboratory detection limits and TRPH concentrations were below regulatory action levels for the soil samples collected north and east of Building 921 D. Leighton and Associates concluded that no further investigation was necessary in the area of the GTE facility and soils were not excavated from the area. Leighton and Associates conducted a geophysical survey of the landfill area within the western portion of the subject property. It was determined to be aligned in a north-south direction and approximately 500 feet long by 300 feet wide. The depth was determined to range from 5 feet on the east to 40 feet on the west. Three soil borings were advanced in the landfill area to depths of 30, 45, and 50 feet. Inert debris consisting of wood fragments, metal shavings and plastic sheeting was observed in the drill cuttings. Reddish iron staining was also observed. No other soil staining was observed. Eleven soil samples were collected and analyzed for heavy metals, TRPH, PCBs, chlorinated pesticides, halogenated aromatic volatiles, benzene, toluene, ethyl benzene, and xylenes, and semi-volatile organic compounds. One soil sample collected from a depth of 5 feet contained TRPH at a concentration of 8 milligrams per kilogram (mg/kg) and dichlorodiphenyltrichloroethane (DDT) at 0.15 mg/kg. Leighton and Associates recommended excavation of the landfill area and disposal of the debris

CHJ Inc., 1994 - According to the report, the assessment was conducted on a 312-acre property that included the subject property. At the time of the site reconnaissance, the subject property was occupied by multiple tenants. Hazardous substance and/or petroleum were observed. Staining observed on concrete and/or soil. Staining within the structures was described as not penetrating the concrete floor. Four areas of soil staining were defined as RECs, as follows: an area within the railroad tracks next to (southwest of) Building 831 D, adjacent to the south dock of Building 831 C, adjacent to the north dock of Building 721 D, and adjacent to the north dock of Building 711 A. The stains were from 3 to approximately 15 feet in diameter. They are described as surficial and generally caused by one-time releases. The staining north of Building 711 A was determined to be caused by repeated washdown of the dock during forklift maintenance at the Libbey Glass facility. The area north of Building 711 A was further investigated by CHJ in November 1994. Six soil samples were collected from depths ranging from 6 inches to 2 feet at three locations. The soil samples were analyzed for TRPH. TRPH concentrations in the shallow samples ranged from 29 to 560 mg/kg. The sample with the highest TRPH concentration was also tested for heavy metals, with results indicating concentrations within typical background levels. The 2-foot sample from that location was also analyzed for TRPH, which was not detected. CHJ concluded that the impacted soils were limited to the upper approximately 6 inches and approximately 4 cubic yards of impacted soil were excavated in March 1995. The maximum TRPH concentration in soil confirmation samples was 36 mg/kg. CHJ concluded that no further investigation was necessary. According to Space Center personnel at that time, Libbey Glass would be modifying their procedures. The three soil stains that appeared to be caused by one-time releases were not investigated or remediated by CHJ. Another REC identified by CHJ was the "material threat" of a release of hazardous materials related to tenants with bulk storage of

hazardous materials onsite. CHJ concluded; however, that the likelihood of a release occurring that would penetrate the thick concrete floors within the buildings was considered negligible. CHJ recommended no further investigation.

P & D, 2009 - According to the report, the assessment was conducted on a 163-acre property that included the subject property. Hazardous materials were observed at various locations, motor oil and waste oil at Building 831 C, waste oil at Building 811 C, and eleven 200-gallon steel shipping containers of MDI at Building 811 A. Regarding stained soils, P&D stated that soil stains other than de minimis stains in the parking areas or along the railroad spurs were not observed. One pad-mounted and 30 pole-mounted Southern California Edison owned transformers were observed with no leakage of transformer fluids. Eight propane ASTs and one 100-gallon motor oil AST were observed. The motor oil AST was located within Building 831 C with some spillage of oil and surface staining, which had been covered with clay absorbent. They noted no cracks or defects in the pavement. P&D stated that it appeared unlikely that motor oil could penetrate the slab to reach the underlying soil; however, the surface staining was still defined as an REC. P&D defined the presence of the shipping containers of MDI at Building 811 A as a REC because they had been the subject of an emergency response listing on the CHMIRS database. P&D defined the 1995 removal of 4 cubic yards of TRPH-impacted material from the loading dock area north of Building 711 A and the historical use of the site area for vineyards before development in 1942 as HRECs. P&D conducted a limited asbestos survey and found asbestos in stucco wall covering. They observed asbestos-cement pipe in the warehouses, but not did not sample it. P&D also conducted a limited lead-based paint survey and found lead in peeling paint under the eaves on the exterior of the warehouses. P&D made no recommendations for additional investigation.

A/E West Consultants, 2009 - According to the report, the assessment was conducted on a 111-acre property that included the subject property. At the time of site reconnaissance, the subject property was occupied by various tenants for light manufacturing, assembly and warehousing purposes. A/E found no specific environmental concerns regarding tenant operations. A/E observed evidence of chemicals, hazardous substances, petroleum-based fuels, or lubricants, a waste oil AST in Building 831 C and waste oil drums in Building 811 C. Minor staining was noted around the AST. A/E defined the presence of abandoned shipping containers storing toxic chemicals at Building 811 A as a REC because they had been the subject of an emergency response listing on the CHMIRS database in 2004. A/E defined the 1995 removal of 4 cubic yards of TRPH-impacted material from the loading dock area north of Building 711 A and the historical use of the site area for vineyards before development in 1942 as HRECs. A/E made no recommendations for additional investigation.

CHJ Consultants, 2012 - According to this previous report, an area of dead grass in the landscaped area south the trailer parking area south of Building 711 indicated the location of a diesel fuel spill reported to the site owner by Haddy Warehousing in February of 2012. The area measured approximately 70 feet by 12 feet. Six soil samples were collected from three locations within the impacted area. Soil samples were collected from depths of approximately 10 inches and 20 inches. TPH-d was not detected in the three 10-inch soil samples. CHJ concluded that the impact was limited to the upper soils. A licensed hazardous materials hauler was contracted to remove and dispose of the dead grass and the upper 6 to 8 inches of soil. Following the excavation, laboratory analysis of two confirmation soil samples indicated no detectable concentrations of diesel range hydrocarbons. CHJ recommended no additional investigation.

- The subject property was identified in any regulatory databases. However, no off-site facilities of concerns were identified that would impact the subject property.

Based on these findings, GECON concluded that, "The assessment has revealed no evidence of RECs in connection with the Site. The former landfill in the western portion of the Site, currently occupied by a trailer parking area, represents a potential environmental concern that should be addressed prior to future redevelopment of that portion of the Site. No further environmental assessment of the Site appears to be warranted at this time".

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Nasim Ahmed
Site Assessment Conducted On:	November 20, 2018

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 3401 Etiwanda Ave Building 11011 (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Tom Cruikshank	Key Site Manager	(951) 685-5221	No

Partner was unaccompanied during the site reconnaissance. No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located throughout the subject property. An independent solid waste disposal contractor, Burtec Waste Industries, removes solid waste from the subject property. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The Jurupa Community Service District services the subject property vicinity. No wastewater treatment facilities or septic systems are observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water runoff is collected by storm drains at the exterior of the building and is discharged into the municipal water management system directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

According to review of the United States Fish & Wildlife Service National Wetland Inventory Mapper (online), no wetlands are shown on the subject property or on the adjacent properties. A comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems are fueled by electricity and natural gas provided by Southern California Edison and the Gas Company.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Partner identified hazardous substances used, stored, and/or generated on the subject property as noted in the following table:

Hazardous Substances and/or Petroleum Products Noted Onsite				
Substance	**Container Size**	**Location**	**Nature of Use**	**Disposal Method**
Motor Oil, Transmission Fluid, Antifreeze	15 x 55-gallon	Freightco	Truck Maintenance	N/A
Used Oil, Used Antifreeze, Used Oil Filters	5 x 55-gallon	Freightco	Truck Maintenance	Transported off-site by a certified hauler
DEF	1 x 300-gallon	Freightco	Truck Maintenance	N/A
Gear Oil	2 x 55-gallon	Ecotech	Luggage Manufacturing	N/A
Used Oil	1 x 55-gallon	Ecotech	Luggage Manufacturing	Transported off-site by a certified hauler
Hydraulic Oil	1 x 55-gallon	Curvetech	Steel, Aluminum Stretch forming	N/A
Adhesive	2 x 300-gallon	O'Neil Tube & Reel	Fabric Spool Manufacturing	N/A
Lubricant	1 x 5-gallon	O'Neil Tube & Reel	Fabric Spool Manufacturing	N/A
Used Oil/Used Absorbent	2 x 55-gallon	O'Neil Tube & Reel	Fabric Spool Manufacturing	Transported off-site by Asbury Environmental
Paint/Stain Finish	1-gallon; 5-gallon	MJB Woods	Maintenance Activities	N/A
Adhesive	9 x 300-gallon	G L Veneer	Countertop Manufacturing	N/A

Hazardous Substances and/or Petroleum Products Noted Onsite				
Substance	**Container Size**	**Location**	**Nature of Use**	**Disposal Method**
Sponge Materials	10 x 55-gallon	Advanced Innovative Recovery	Sponge Manufacturing	N/A
Propane	Cylinders	California Packaging, Rhino Containers, Gileno Distribution, Kerozal Inc., Rajah, Best Delivery, US Play Inc., Manna Freight Systems, Propak Logistics, GL Veneer, Met Corp., Decotone, MJB Wood, Active Apparel, Bridge Trading,	Fork Lift Operation	N/A
Propane	1 x 80-gallon; 1 x 300-gallon; 1 x 500-gallon	Building 811, Building 721 and Building 731	Fork Lift Operation	N/A

The materials were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. Secondary containment is not provided. Based on the nature of use, overall small quantities observed, and lack of violations, these materials are not expected to represent a significant environmental concern.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former USTs was observed during the site reconnaissance.

Partner observed one 80-gallon, one 300-gallon and one 500-gallon aboveground storage tanks (ASTs) for the storage of propane on the subject property. The ASTs are located next to Building 811, Building 721 and Building 731. No staining, leaks or spills were noted in the vicinity of the ASTs. Based on the good condition of the equipment and the absence of staining or conduits to the subsurface, the presence of these ASTs are not expected to represent a significant environmental concern.

6.2.3 Evidence of Releases

Partner observed staining in the vicinity of machineries at O'Neil Tube & Reel, Curvetech, and Kerozak. Absorbent had been scattered across the staining at O'Neil Tube & Reel. No floor cracks were noted in the vicinity of the stained areas. The staining represents de minimis site condition and it is not expected to represent a significant environmental concern.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;*" 2) 50 ppm-500 ppm – "*PCB-Contaminated;*" and, 3) Greater than 500 ppm – "*PCB-Containing.*" The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Two pad-mounted transformers and 25 pole-mounted transformers were observed on the subject property. The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Partner contacted a customer service representative of Southern California Edison (SCE), who confirmed that SCE maintains ownership and operational responsibility for the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

Railroad tracks are located throughout the property. Railroad tracks and spurs represent environmental concerns due to the historical application of oils containing PCBs, herbicides, and arsenic for pest and weed control, as well as the potential presence of creosote on the rail ties, and the historical common practice of using coal cinders for track fill material. However, it is likely that any potential herbicide concentrations have degraded over time, as the railroad tracks and/or spurs have not been used for years. Any potential PCB or arsenic concentrations resulting from the railroad tracks and/or spurs would be confined to the near subsurface sediments and would not present a significant environmental health and safety concern to the building occupants or the underlying groundwater. However, in the event this area of the subject property is redeveloped for residential use, soil sampling may be warranted.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed in 1942. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACMs:

Suspect ACMs

Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall Systems	Throughout Building Interior	No	Good
Floor Tiles	Limited Areas	No	Good
Floor Tile Mastic	Limited Areas	No	Good
Ceiling Tiles	Limited Areas	No	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Due to the non-residential nature of use of the subject property, LBP was not considered within the scope of this assessment.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Jurupa Community Service District (JCSD) serves the subject property vicinity. According to a representative of the JCSD, the source of public water for the City of Jurupa Valley is public wells located near Interstate 15 and Highway 60. According to the 2016 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises.

6.4.1 PCBs

Several pole-mounted transformers were observed on the adjacent properties. No staining or leakage was observed in the vicinity of the transformers. Based on these observations, the presence of adjacent transformers is not expected to represent a significant environmental concern.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- According to historical records, the subject property was developed with the existing nine buildings for industrial purposes since at least 1942. The subject property was formerly part of the Mira Loma Quarter Mater Depot/ Mira Loma Air Force Station, a US Military Reservation, from 1942 to at least 1966. Based on Regional Water Quality Control Board (RWQCB) online records, this facility was used as a military installation for the storage of military supplies. It was comprised of several large warehouses, administration building, training building, infirmary, garage, officer's quarters, sewage disposal plant, engine house, oil pump house, motor repair shop, paint shop, post restaurant, oil storage building, water storage building, and various sheds. Operations were ceased by the late 1960s and early 1970s. The subject property was then sold to a private entity and has been occupied by multiple industrial tenants. According to a previous report, dated May 2018 and performed by Geocon West Inc. (GECON), a landfill area was identified on the western portion of the property (trailer storage area) during a site assessment was conducted by Leighton and Associates in August 1990. The fill consisted of "moderate to heavy amounts" of partially buried solid waste and debris including wood, concrete and asphalt rubble, railroad ties, metal, and empty rusted metal drums. In 1991, three soil borings were advanced in the landfill area to depths of 30, 45, and 50 feet. Inert debris consisting of wood fragments, metal shavings and plastic sheeting was observed in the drill cuttings. Reddish iron staining was also observed. No other soil staining was observed. Eleven soil samples were collected and analyzed for heavy metals, Total Recoverable Petroleum Hydrocarbons (TRPH), polychlorinated biphenyls (PCBs), chlorinated pesticides, halogenated aromatic volatiles, benzene, toluene, ethyl benzene, and xylenes, and semi-volatile organic compounds. One soil sample collected from a depth of 5 feet contained TRPH at a concentration of 8 milligrams per kilogram (mg/kg) and dichloro diphenyl trichloroethane (DDT) at 0.15 mg/kg. According to Mr. Tom Cruikshank, the former inert landfill area in the western portion of the subject property was not completely removed. Only over-excavation and re-compaction to the extent needed to pave for the parking areas was conducted. Based on the soil sampling results and the current use of the area for paved parking, the former

reportedly inert landfill activities is considered a CREC and no further action is considered necessary.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- The subject property has been occupied by multiple industrial tenants since as early as 1975. As part of the GECON reported, dated May 2018, several previous environmental reports were reviewed and noted various areas of concern, as discussed below.

  A stained area was observed around the adjacent railroad tracks near the northeastern corner of Building 921 during a site assessment conducted by Leighton and Associates in May 1990. Soil samples were collected and were analyzed for heavy metals, PCBs, and TRPH. PCBs were not detected at concentrations exceeding the laboratory detection limits and TRPH concentrations were below regulatory action levels.

  A stained area was observed north of Building 711A during a site assessment conducted by CHJ Inc. in November 1994. Six soil samples were collected from depths ranging from 6 inches to 2 feet at three locations. The soil samples were analyzed for TRPH. TRPH concentrations in the shallow samples ranged from 29 to 560 mg/kg. The sample with the highest TRPH concentration was also tested for heavy metals, with results indicating concentrations within typical background levels. The 2-foot sample from that location was also analyzed for TRPH, which was not detected. CHJ concluded that the impacted soils were limited to the upper approximately 6 inches and approximately 4 cubic yards of impacted soil were excavated in March 1995. The maximum TRPH concentration in soil confirmation samples was 36 mg/kg.

  A limited subsurface investigation was conducted in an area south the trailer parking, south of Building 711 in April 2012. The purpose of this investigation was to determine if the subsurface media was impacted by a diesel fuel spill reported to the site owner by Haddy Warehousing in February 2012. Six soil samples were collected from three locations within the impacted area. Soil samples were collected from depths of approximately 10 inches and 20 inches. TPH-d was not detected in the three 10-inch soil samples. It was concluded that the impact was limited to the upper soils. A licensed hazardous materials hauler was contracted to remove and dispose of the dead grass and the upper 6 to 8 inches of soil. Following the excavation, laboratory analysis of two confirmation soil samples indicated no detectable concentrations of diesel range hydrocarbons.

Partner notes that analytical data results were not provided in the appendices for review. However, based on the analytical results, excavation of impacted soils, and isolated nature of these incidents, these identified areas of concern are not expected to represent a significant environmental concern and no further investigation is warranted at this time.

- Railroad tracks are located throughout the property. Railroad tracks and spurs represent environmental concerns due to the historical application of oils containing PCBs, herbicides, and arsenic for pest and weed control, as well as the potential presence of creosote on the rail ties, and the historical common practice of using coal cinders for track fill material. However, it is likely that any potential herbicide concentrations have degraded over time, as the railroad tracks and/or spurs have not been used for years. Any potential PCB or arsenic concentrations resulting from the railroad tracks and/or spurs would be confined to the near subsurface sediments and would not present a significant environmental health and safety concern to the building occupants or the underlying groundwater. However, in the event this area of the subject property is redeveloped for residential use, soil sampling may be warranted.
- Due to the age of the subject property buildings, there is a potential that asbestos-containing material (ACM) is present. No damaged friable or damaged nonfriable suspect ACMs were identified. The identified suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 3401 Etiwanda Avenue, Buildings 711-931 in the City of Jurupa Valley, Riverside County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

- If redevelopment of the subject property is planned for residential use, sampling related to the former uses is recommended.
- Operations and Maintenance (O&M) Programs should be implemented in order to safely manage the suspect ACMs located at the subject property.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at Etiwanda Avenue Buildings 711-931 in the City of Jurupa Valley, Riverside County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

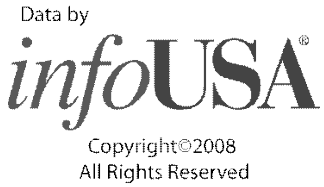
DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Subject: PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT
BUILDINGS 711-931
3401 ETIWANDA AVENUE
JURUPA VALLEY, CALIFORNIA

Dear Mr. Cruikshank:

In accordance with your request and our proposal dated January 26, 2018, we have performed a Phase I Environmental Site Assessment (ESA) of the above-referenced property and improvements (the Site) in Jurupa Valley, California.

You requested a Phase I ESA to provide information regarding the potential for existing hazardous substances and/or petroleum product impacts at the Site for due diligence purposes. The accompanying report presents the details of our Phase I ESA.

We appreciate the opportunity to have performed this Phase I ESA for Space Center Inc. Please contact us if you have any questions concerning this report or if we may be of further service.

Very truly yours,

GEOCON WEST, INC.

Ann Laudermilk
Senior Project Geologist

Jim Brake, PG

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

1. INTRODUCTION

This report presents the findings of a Phase I Environmental Site Assessment (ESA) of the property and improvements located at 3401 Etiwanda Avenue Buildings 711-931 (the Site) in Jurupa Valley, California (Figure 1). The Phase I ESA was requested by Space Center, Inc., (the Client) to obtain information regarding the potential for existing hazardous substances and/or petroleum product impacts at the Site for due diligence purposes. Space Center Mira Loma, Inc., a subsidiary of Space Center, Inc., owns the Site at the time of this Phase I ESA.

1.1 Purpose and Objectives

The purpose of the Phase I ESA was to identify evidence or indications of 'recognized environmental conditions' (REC) as defined by the American Society for Testing and Materials (ASTM) *Designation E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Section 1.1.1 of ASTM Designation E 1527-13 defines an REC as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions." De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

ASTM *Designation E 1527-13* also defines 'Historical' and 'Controlled' RECs. They define an 'Historical REC' as "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." ASTM defines a 'Controlled REC' as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." An HREC is not an REC if the property on which it exists meets current standards for unrestricted residential use. A CREC remains an REC by definition when the property does not meet the unrestricted residential use requirement unconditionally.

We also conducted the Phase I ESA in general accordance with the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled *Standards and Practices for All Appropriate Inquiries*, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an all appropriate inquiries investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA.

The following principles are an integral part of ASTM Designation E1527-13:

- **"Uncertainty Not Eliminated** - No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a property, and this practice recognizes reasonable limits of time and cost."
- **"Not Exhaustive -** All Appropriate Inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information."
- **"Level of Inquiry is Variable** – Not every property will warrant the same level of assessment. Consistent with good commercial and customary practice, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry."

1.2 Scope of Services

Our Proposal No. LP-2018-131, dated January 26, 2018, describes the scope of services for this Phase I ESA. We performed the scope of services outlined in the proposal with the exception that we did not review Sanborn Fire Insurance Maps (Sanborn maps). Environmental Data Resources, Inc. (EDR) confirmed that Sanborn map coverage does not exist for the Site.

The main components of the Phase I ESA and their objectives, as specified by the referenced standards, include the following:

- **Physical Setting:** we reviewed physical setting references to obtain information concerning the topographic, geologic, and hydrogeologic characteristics of the Site and vicinity. Such information may be indicative of the direction and/or extent that a contaminant could migrate in the event of a spill or release.
- **Regulatory Agency Records Review:** we reviewed regulatory agency records to obtain information that could potentially help identify RECs at or potentially affecting the Site. We reviewed publicly available Federal, State, and local regulatory agency records for the Site.

- **Site History:** we reviewed historical references to assess the previous uses of the Site and surrounding area to identify those that could have led to RECs on or near the Site. Historical sources reviewed included aerial photographs, topographic maps, city directories, and building department records. In addition, we conducted interviews with persons who were expected to be reasonably knowledgeable about historical and/or current conditions at and uses of the Site.
- **Site Reconnaissance:** we performed a site reconnaissance to observe site conditions and activities for indications of evidence of RECs. The site reconnaissance was for the Site only. Offsite properties and features were viewed solely from the vantage of the Site and public thoroughfares.

1.3 Report Limitations

We prepared this Phase I ESA report exclusively for the Client. The information obtained is only relevant for the dates of the records reviewed or as of the date of the latest site visit. Therefore, the information contained herein is only valid as of the date of the report and will require an update to reflect recent records/site visits.

The Client should recognize that this report is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, a review of the specified regulatory records, and a review of the historical usage of the Site, as presented in this report. The Client should also understand that wetlands, asbestos-containing building materials, lead-containing paint, lead in drinking water, radon, mercury related to mining activities, methane, and mold surveys were not included in the scope of services for this Phase I ESA.

Therefore, the report should only be deemed conclusive with respect to the information obtained. No guarantee or warranty of the results of the report is implied within the intent of this report or any subsequent reports, correspondence or consultation, either express or implied. We strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

1.4 Data Gaps

ASTM Designation E 1527-13 defines a data gap as “a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.” Data gaps could include such things as insufficient historical information, the inability to interview persons with direct site knowledge (e.g., the owner(s), past owner(s), tenants, workers, etc.) or the lack of access to all parts of a site during the site reconnaissance. No significant data gaps were identified during the performance of this Phase I ESA.

As stated in Section 1.2, we did not review Sanborn maps for the Site since they are not available for the Site and vicinity. However, we do not consider the lack of Sanborn map coverage a data gap because of other historical information for the Site and vicinity that we reviewed.

Although managers were not available onsite to allow interior walk-throughs in a few tenant spaces, limited visual access was available. The types of onsite operations being conducted in these cases does not warrant the lack of access as a data gap.

2. SITE DESCRIPTION

This section provides information regarding the location and physical characteristics of the Site including its size, topography, geologic, soil, and hydrogeologic conditions.

2.1 Location and Legal Description

The Site is located at 3401 Etiwanda Avenue Buildings 711-931 in Jurupa Valley, California (Figure 1). The site address dates back to the original development. The eastern portion of the Site is bounded by Space Center Court, and Etiwanda Avenue is approximately 800 feet to the east. The Site is located approximately 1 mile northeast of the Interstate 15/State Route (SR) 60 interchange on the boundary of Jurupa Valley and Eastvale. The Site occupies the majority of Riverside County assessor's parcel number 156-150-069.

2.2 Site and Vicinity General Characteristics

The approximately 96.5-acre Site is occupied by nine ±175,500-square-foot warehouses of redwood construction, associated concrete loading docks, and asphalt concrete-paved access roads between the warehouses. Employee parking areas are located at the eastern and western ends of most of the buildings. Properties north, east, and south of the Site are developed with commercial concrete tilt-up warehouses. Trailer parking areas are located west of the Site. A flood control channel, a rail line, and East Mission Boulevard occupy an approximately 350-foot-wide corridor adjacent to the southwest of the Site. The Site Plan (Figures 2-1 and 2-2) depicts the site boundaries and features, and surrounding properties.

2.2.1 Topography

The topography of the Site and surrounding vicinity is relatively flat with a slight downslope topographic gradient to the south. The USGS *Guasti* Quadrangle, 7.5-minute topographic map (USGS, 2012) shows the site elevation to be approximately 815 feet above mean sea level.

2.2.2 Geologic Conditions

The Site is located within the Chino Basin in northwestern Riverside County. The Chino Basin encompasses a broad area of coalescing alluvial fans that extend southward from the San Gabriel Mountains. The Chino Basin overlies the Perris Block, a down-dropped structural block that is bounded by the San Jacinto fault and San Bernardino Mountains on the northeast, by the Sierra Madre fault zone and San Gabriel Mountains on the north, and by the Elsinore fault zone and Santa Ana Mountains on the southwest. The alluvial deposits within the Chino Basin were reworked by wind during the Holocene (last 11,000 years) and Pleistocene (11,000 to 2 million years) epochs. As a result, a thin veneer of eolian sand covers extensive areas of the Chino Basin.

Regionally, the Chino Basin is located within the Peninsular Ranges geomorphic province. This province comprises the northwesterly-trending mountains and valleys extending from the southern Baja Peninsula to the Transverse Ranges in Southern California.

Surficial deposits beneath the Site are geologically mapped as artificial fill. Underlying deposits are late Holocene alluvial fan deposits and Holocene to late-Pleistocene eolian deposits (USGS, 2006).

2.2.3 Hydrologic and Hydrogeologic Conditions

The Site is located in the Chino Hydrologic Subarea of the Santa Ana Drainage Province (WMWD, 2016). The depth to groundwater in State Well No. 01S/06W-5J(01), Jurupa Community Services District (JCSD) Well No. 22, located adjacent to the southwestern portion of the Site, was 223 feet on November 2, 2016. Groundwater elevation contours prepared for the Chino Basin Watermaster indicate a groundwater flow direction in the Site vicinity to the southwest (Wildermuth, 2012).

2.3 Current and Planned Uses of the Site

Each of the nine warehouses is divided into four units of approximately 11,000 square feet. At the time of the site assessment there were 33 tenants occupying from 1/4 of one unit to 4 units. The table in Section 5.4.1 summarizes 10 years of tenant occupancy information provided by the Client, as well as information provided by EDR in the city directory image report. The majority of the units are utilized for storage and distribution of various goods. However, manufacturing does take place in some of the units.

The Client provided no specific information on planned future uses. The City of Jurupa Valley 2017 General Plan Land Use Map indicates the Site and vicinity as Light Industrial – Technology and Innovation. The most recent zoning map identified online for Jurupa Valley was dated July 2011 and indicates Manufacturing-Medium for the Site and vicinity.

2.4 Descriptions of Structures, Roads, Other Improvements on the Site

Site structures, roads, and improvements include the nine ±175,500-square foot redwood warehouses, raised concrete loading docks on one side of each warehouse, rail spurs on one side of each warehouse, asphalt concrete-paved access roads between the buildings, and employee parking areas at the ends of each warehouse. Site access is off of Space Center Court on the eastern portion of the Site, C Street on the southeastern portion of the Site, and at the terminus of Manitou Court at the northeastern portion of the Site.

2.5 Current Uses of Adjoining Properties

The Site is bounded by other Space Center, Inc. commercial warehouses to the north and south, Space Center Court to the east with commercial warehouses beyond, trailer parking areas to the west, and an approximately 350-foot-wide corridor occupied by the Day Creek Flood Control Channel, the Union Pacific Railroad line, and East Mission Boulevard to the southwest.

3. USER–PROVIDED INFORMATION

This section provides responses to inquiries made to the Client for site information. The Client was asked to provide previous environmental reports or documents that they have. They were also asked if they have knowledge of legal or administrative proceedings involving the Site. Tom Cruikshank, Vice President of Space Center, Inc., completed a User Questionnaire (Appendix A).

3.1 Title, Appraisal and Sale Agreement Records

The Client provided no title, appraisal, or sale agreement records for review.

3.2 Environmental Liens or Activity and Use Limitations

Mr. Cruikshank stated that he is unaware of any environmental liens on, or use limitations for, the Site.

3.3 Specialized Knowledge

Mr. Cruikshank indicated that he has no specialized knowledge regarding the Site or nearby properties.

3.4 Commonly Known or Reasonably Ascertainable Information

Mr. Cruikshank provided previous environmental reports for ±129-acre and ±210 properties that included the Site that were both prepared in 1990, reports of three previous Phase I ESAs for the Site prepared in August 1994, February 2009, and April 2009, and one letter report prepared in April 2012 describing soil sampling and analytical results from a diesel fuel spill area south of Building 711. The previous reports are described in Section 4.2.5. Mr. Cruikshank cited knowledge of previous soil investigations and referred to the provided reports.

3.5 Owner, Property Manager, and Occupant Information

Mr. Cruikshank indicated that Space Center Mira Loma, Inc., a subsidiary of Space Center, Inc., owns the Site. A current tenant list was provided by the Client. See Section 5.4.1 for occupant information.

3.6 Valuation Reduction for Environmental Issues

There is no transaction at this time.

3.7 Reason for Performing Phase I ESA

The Client requested the Phase I ESA to obtain information regarding the potential for existing hazardous substances and/or petroleum product impacts at the Site for due diligence purposes.

4. RECORDS REVIEW

This section summarizes information we obtained from review of readily available agency records for the Site and properties in the surrounding vicinity.

4.1 Standard Environmental Record Sources

EDR searched Federal, State, and local databases for information pertaining to the Site and properties/facilities within 1 mile of the Site. A copy of *The EDR Radius Map™ Report with GeoCheck*, dated March 12, 2018, is in Appendix B.

4.1.1 Site

California Custom Design (3401 Etiwanda Avenue #811A), a former tenant in the eastern portion of the Site, is listed on the RCRA-SQG, FINDS, ECHO, and HAZNET databases. The RCRA-SQG database entry is from 1986. Four HAZNET manifests from 1997 indicate the removal of waste and mixed oil, empty containers 30 gallons or more, organic solids, and unspecified solvent mixture from the facility. The facility is not listed on databases indicative of hazardous substance/petroleum product spills or releases. The lack of documented contaminant releases suggest that the handling of hazardous substances and/or petroleum products at this facility is unlikely to have caused an REC at the Site.

Proko Industries (3401 Etiwanda Avenue #931D), a former tenant in the northwestern portion of the Site, is listed on the RCRA NonGen/NLR (no longer regulated), FINDS, and ECHO databases. The listings indicate that the facility was a handler, but a non-generator of hazardous waste, active in 1980. No RCRA violations were reported. The facility is not listed on databases indicative of hazardous substance/petroleum product spills or releases. The lack of documented contaminant releases suggest that the handling of hazardous substances and/or petroleum products at this facility is unlikely to have caused an REC at the Site.

Space Center Mira Loma (3401 Etiwanda Avenue) is listed on the NPDES database. The Site has a general industrial permit. A representative of Haddy Warehousing, the tenant of Building 711 in the southeastern portion of the Site is listed as the facility contact. Jay Sorg with Haddy Warehousing indicated that the required sample locations are within the area of Building 711 and that qualifying sample events are not performed every year. He recalled one elevated zinc level that did not recur in subsequent sampling events.

4.1.2 Nearby Properties

Database findings for properties/facilities adjacent to or within ¼ mile of the Site are summarized below. The distances reported are based on known locations of the facilities, some of which are no longer present, and were measured on Google Earth. The locations of facilities within the Space Center Mira Loma warehouse complex and their distances from the Site reported by EDR were found to be inaccurate due to the large aerial extent of the complex under the prior single address of 3401 Etiwanda Avenue.

North American Car Corporation and GE Railcar Repair (GERC) (3401 Etiwanda Avenue), previously located adjacent to the south of the Site is listed on the RCRA-TSDF, RCRA NonGen/NLR, FINDS, ECHO, HAZNET, HWP, HIST UST and EMI databases. Seven HAZNET manifests dated in 1993 indicate the removal of inorganic solid waste, empty containers less than 30 gallons, over 200 tons of metal dust and machining waste, oxygenated solvents, waste oil and mixed oil, and over 60 tons of contaminated soil from site cleanup at the facility. The RCRA-TSDF database indicates that the facility was engaged in the treatment, storage, or disposal of hazardous waste and that they were a non-generator of hazardous waste as of April 1994. The facility is listed as a historical large-quantity generator of hazardous waste with its status changed to non-generator in 1993. The GeoTracker link under the HIST UST database entry for GERC indicates that the information is actually for two underground storage tanks (USTs) owned by Space Center Mira Loma, Inc. located on the Campbell Oil Company facility, as described below. The facility is not listed on databases indicative of hazardous substance/petroleum product spills or releases. The Client provided documentation of soil investigation and remediation of trench and pit areas at the GERC facility performed in 1991. The remediation was performed based on site observations during a 1990 Phase I ESA. The lack of other documented contaminant releases and the documented remediation prior to redevelopment suggest that the handling of hazardous substances and/or petroleum products at this facility is unlikely to have caused an REC at the Site.

Home Depot (11650 Venture Drive), located adjacent to the north of the Site is listed on the RCRA-SQG database. The RCRA-SQG start date is 2000. Waste included ignitable waste, corrosive waste, and spent solvents. The facility is not listed on databases indicative of hazardous substance/petroleum product spills or releases. Information in the EDR report does not suggest that activities/uses associated with this facility have caused an REC at the Site.

County of Riverside (11511 Venture Drive), located adjacent to the north of the Site is listed on the LUST and HIST CORTESE databases. A 500-gallon diesel UST was removed from a location adjacent to a former building at 11511 Venture Drive in December 1995. Elevated total petroleum hydrocarbons as diesel (TPH-d) were identified in soil samples collected from the UST excavation and a soil investigation was initiated. The highest TPH-d concentrations were identified in soil samples collected from a depth of 13 feet, with non-detect concentrations in soil samples from 22 feet. One hundred fifteen tons of impacted soil was subsequently excavated. Laboratory analysis of confirmation soil samples following the additional soil investigation indicated low TPH-d concentrations remaining in soil and the case was closed by the County of Riverside Department of Environmental Health (DEH) on April 18, 1998. The remediation and closed status of the LUST case suggest that the former LUST release at this facility is unlikely to have caused an REC at the Site.

Campbell Oil Company/Space Center Mira Loma (3401 Etiwanda Avenue #502), located approximately 600 feet south-southeast of the Site is listed on the HIST UST, LUST, and HIST CORTESE databases. The facility is listed as having two 12,000-gallon diesel USTs. The Client provided documentation from closure of the USTs in 1990 (GeoSec, 1990). The 12,000-gallon USTs, which were located west of the building on the Campbell Oil Company fueling facility (and reportedly owned by Space Center Mira Loma) were determined to have leaked. The Client provided documentation of five 40-foot soil borings and soil investigation in the vicinity of the 12,000-gallon USTs which indicated that total recoverable petroleum hydrocarbons (TRPH) at "trace" concentrations were left in soil at depths of up to 10 feet. The LUST case was closed in 1991. The closed status of the LUST case suggests that the former LUST release at this facility is unlikely to have caused an REC at the Site.

Orange County Alternator (11186 Venture Drive), located approximately 1,000 feet north of the Site is listed on the RCRA NonGen/NLR, FINDS, ECHO, and HAZNET databases. The facility is listed as a small-quantity generator of hazardous waste in 1995 and a handler, but a non-generator in 1997. Four HAZNET manifests from 1998 and 1999 indicate the removal of aqueous solution and organic liquids with metals from the facility. The facility is not listed on databases indicative of hazardous substance/petroleum product spills or releases. The lack of documented contaminant releases suggests that the handling of hazardous substances and/or petroleum products at this facility is unlikely to have caused an REC at the Site.

BBB Ind Inc. DBA OCA (11040 Inland Avenue), located approximately 1,100 feet northeast of the Site is listed on the RCRA-SQG, FINDS, and ECHO databases. Historical generator listings are dated 1997 and 2004 and the RCRA-SQG database entry is from 2005.. Waste included ignitable waste, arsenic, lead, benzene, and tetrachloroethylene. The ECHO online database lists no violations. The facility is not listed on databases indicative of hazardous substance/petroleum product spills or releases. The lack of documented contaminant releases suggests that the handling of hazardous substances and/or petroleum products at this facility is unlikely to have caused an REC at the Site.

Flyer #462 (11074 Inland Avenue), located approximately 1,100 feet north-northeast of the Site is listed on the LUST and UST databases. The commercial fueling facility has four USTs. Soil contamination was discovered in June 2015 during a product piping replacement project. The impacted soil was assessed and delineated to a vertical extent of 25 feet or less and laterally up to 60 feet from dispenser no. 15, near the southwestern portion of that facility. The LUST case was closed in February 2017 by the Riverside County DEH under the low-threat closure policy with no remediation required. The delineation of the extent of the contamination and the closed status of the LUST case suggest that the former LUST release at this facility is unlikely to have caused an REC at the Site.

Jurupa Community Services District Site 25 (11561 Iberia Street), located approximately 1,150 feet south of the Site is listed on the AST database. The database does not provide specific information; however, we observed backup generators with diesel above-ground storage tanks (ASTs) in secondary containment units beneath them associated with two of the three JCSD wells we observed within the Space Center complex. We observed no signs of leakage. The adjacent AST unlikely to have caused an REC at the Site.

Quartermaster Supply Depot (Mira Loma, CA), which is the former designation of the former U.S. Army installation that included the Site from 1942 through 1954, is listed on the ENVIROSTOR database. It is listed as "inactive-needs evaluation as of July 1, 2005": A *Categorical Exclusion and Ineligible Findings Form* provides a history of the land, indicating 343.45 acres of the government's 530.72 acres being sold to the Mira Loma Space Center. Past uses that caused contamination or potential media affected are not identified. It does not appear that the Quartermaster Supply Depot is a priority for evaluation. The redevelopment and reuse of the area suggests that the facility is unlikely to have caused an REC at the Site.

4.1.3 Orphan Summary

The EDR *Orphan Summary* identifies properties that have incomplete address information and therefore could not be specifically plotted. Five properties are listed on the *Orphan Summary*:

- Home Depot, 1670 B Etiwanda Avenue
- Milliken Sanitary Landfill
- Mira Loma, NE Corner Country Village Road and R
- Jurupa Community Services District Site 22, 3423 Space Center Court
- Space Center, Etiwanda and Highway 60.

The Home Depot and Milliken Sanitary Landfill facilities are greater than 1/2 mile from the Site and are therefore unlikely to have caused RECs at the Site. The Mira Loma property is not identifiable based on a location of "NE Corner Country Village Road and R"; however, Country Village Road is 1 mile east of Etiwanda Avenue, so is too far from the Site to have caused an REC at the Site. JCSD Well No. 22 is located adjacent to the southeastern portion of the Site and is listed on the AST database. Similar to JCSD Well No. 25, described above, the AST operated by JCSD on the dedicated parcel within the Space Center complex is unlikely to have caused an REC at the Site. The Space Center HIST UST database listing is described above with the Campbell Oil HIST UST and Space Center LUST listings.

4.2 Additional Environmental Records Sources

This section summarizes information we obtained from additional readily available environmental record sources for properties/facilities within approximately ¼ mile of the Site.

4.2.1 GeoTracker and EnviroStor Websites

We reviewed additional environmental records sources including the State Water Resources Control Board's GeoTracker online database (http://geotracker.waterboards.ca.gov/) and the California Department of Toxic Substances Control's (DTSC) EnviroStor online database (http://www.envirostor.dtsc.ca.gov/public/) for information regarding nearby properties/facilities of concern. EnviroStor and GeoTracker do not list any properties/facilities that are within approximately ¼ mile of the Site and are not identified in the EDR database report described in Section 4.1.2.

4.2.2 State of California Department of Conservation, Division of Oil, Gas and Geothermal Resources

We reviewed information available from the DOGGR wellfinder database (http://www.conservation.ca.gov/doggr/wellfinder) for existing/former oil, gas, or geothermal wells on or within the site vicinity. No oil and gas wells are shown on or within approximately ¼ mile of the Site on wellfinder.

4.2.3 Riverside County Department of Environmental Health

The Riverside County DEH maintains Certified Unified Program Agency records for Riverside County. Records related to seven hazardous materials programs are maintained including: ASTs, USTs, California Accidental Release Program, hazardous materials disclosure/toxic release inventory program, emergency response team, hazardous waste generators, and waste treatment/tiered permitting records by street address. We submitted a request to the DEH for records pertaining to the Site. The DEH provided a Certified Records Search Findings letter dated March 7, 2018 indicating that records were found for the Site. Various previous and current tenants have had Hazardous Materials Management Permits, as summarized in the following table:

Building	Tenant	DEH Document Information
711	Libbey Inc.	Hazardous Materials Management Permit – Level II handler, 2003-2008; out of business form October 2009; warehouse for tabletop glassware; propane (tank) and forklift batteries.
711	J.G. Haddy/CPS Express	Hazardous Materials Management Permit – Level II handler 2015; Level II handler and generator 2010-2014 (moved from Building 1011 in 2010); transportation company; methanol, antifreeze/coolant, motor oil, transmission fluid, propane.
731 D	CA Redwood Products	Hazardous Materials Management Permit – Level I handler 1997-1998; 1997 inspection report indicated latex paint waste to be disposed of as hazardous waste, no runoff allowed.
811 A	CA Custom Designs	Hazardous Materials Management Permit – Level I handler 1996-1998; van and truck conversions; lacquer, thinner,

Building	Tenant	DEH Document Information
		propane, paint.
811 A	Cargo Cats	Hazardous Materials Management Permit – Level III handler 2004-2011; vacating warehouse July 2012; 2009 inspection report indicated propane and 13 totes of methylene diphenyl diisocyanate (MDI) as hazardous materials under District Attorney investigation for removal; other surfactants and detergents listed; no violations.
811 B	Kerozak	Hazardous Materials Management Permit – Level II handler 2012-2015; hazardous materials disclosure in 2016 for propane; violation in 2016 for failure to submit hazardous materials business plan to the California Environmental Reporting System (CERS).
811 C	O'Neil Tube and Reel/Pacific Fabric Reel	Hazardous Materials Management Permit – Level I handler and generator 2005-2009 and 2011-current; 2016 inspection report indicated used oil and oily absorbent, water-based adhesive, propane, no violations; 2015 manifest for one 55-gallon drum of oily absorbent; 2011 and 2012 inspection reports indicate no violations; 2010 inspection report indicated generation of waste oil contaminated absorbent without a permit; 2009 inspection report for Pacific Fabric Reels indicated no violations.
831 C	Railway Express Inc./BMC West	Hazardous Materials Management Permit – Level II handler and generator 2003-2004; waste oil, propane; Level II handler 2005-2008; propane
911 D	Borden Trucking	Hazardous Materials Management Permit – Level II handler and generator 1994-2011; propane, waste absorbent, used oil, mixed oil, filters; Asbury hauls waste; facility maintains and repairs trucks.
911 A 921 A B	CA Flex Corp	Hazardous Materials Management Permit – Level III handler 2003-2010; out of business 2012; 2010 inspection report indicated water-based adhesive, propane, no hazardous waste, no violations.
931 D	Laticrete	Hazardous Materials Management Permit – Level III handler 1990-1997; ceramic tile and stone manufacturer; cement, epoxy; heavy metals were periodically tested on the silica sand waste (municipal waste disposal).

4.2.4 CalEPA Regulated Site Portal

The CalEPA Regulated Site Portal is a website that combines data from several sources, including the California Environmental Reporting System and the Toxics Release Inventory, as well as EnviroStor and GeoTracker. Three tenants have profiles on the CalEPA Regulated Site Portal.

CPS Express is the trucking company owned by J.G. Haddy, Inc. and operated out of the loading dock area south of the Haddy Warehousing facility in Building 711. CPS is listed as a chemical storage facility and a hazardous waste generator. The chemical storage inventory includes only propane. Compliance data indicates the last CUPA inspection was in 2015 with no violations. Mr. Sorg, the onsite representative, indicated that CPS no longer conducts their own truck maintenance. When outside vendors come to the yard they do not leave waste oil or other hazardous substances onsite.

Kerozak is listed as a chemical storage facility. The chemical storage inventory includes only propane. Compliance data indicates one violation in 2016 related to failure to electronically submitting a Hazardous Materials Release Response Plan.

O'Neil Tube and Reel is listed as a chemical storage facility and a hazardous waste generator. The chemical storage inventory includes propane and vinyl acetate. Compliance data indicates the last CUPA inspection was in 2016 with no violations.

4.2.5 Previous Reports

Leighton and Associates, 1990

The Client provided two environmental reports (without appendices) prepared by Leighton and Associates in August of 1990. One of the reports was from review of historical information and site reconnaissance to assess the potential for contamination prepared for a 129-acre property that included the northern three warehouses of the Site. The other was for a Phase I ESA performed for approximately 210 acres that included the southern six warehouses and the western trailer parking areas.

The tenants of each unit or multiple units are named (as listed in Section 5.4.1), and general business operations are described, if known. A few businesses were reportedly locked and inaccessible at the time of the site visits. Hazardous substance and/or petroleum product use and storage conditions are described, where applicable. They observed minor staining on concrete and/or soil in a few locations. Unit 811 D was occupied by California Custom Design, a van conversion business. They noted a strong chemical odor due to the general storage of resins, paints, sealants, and other chemicals. Leighton and Associates recommended that the storage of paints/chemicals and spray within California Custom Design should conform to local, state, and federal ordinances.

They observed stains on the concrete dock and soils around the adjacent railroad tracks near the northeastern corner of Building 921, which was occupied by the General Telephone Sales Surplus Center (GTE). Based on their observations in the area of the GTE facility, Leighton and Associates collected five soil samples from depths ranging from 6 inches to 2 feet in May 1990. The samples were analyzed for heavy metals, polychlorinated biphenyls (PCBs), and TRPH. The appendices, including summary tables and analytical results were not provided to us.

Leighton and Associates identified a landfill area west of the warehouses. The fill consisted of "moderate to heavy amounts" of partially buried solid waste and debris including wood, concrete and asphalt rubble, railroad ties, metal, and empty rusted metal drums.

Leighton and Associates recommended the excavation of stained soils (throughout the 210-acre property) and a geophysical survey of the landfill area.

Leighton and Associates, 1991

In two separate follow-up reports in 1991, Leighton and Associates presented additional information regarding soil investigation in the GTE area north and east of Building 921 D and the landfill area. Leighton and Associates reported that PCBs were not detected at concentrations exceeding the laboratory detection limits and TRPH concentrations were below regulatory action levels. Leighton and Associates concluded that no further investigation was necessary in the area of the GTE facility and soils were not excavated from the area.

Leighton and Associates conducted a geophysical survey of the landfill area. It was determined to be aligned in a north-south direction and approximately 500 feet long by 300 feet wide. The depth was determined to range from 5 feet on the east to 40 feet on the west. Three soil borings were advanced in the landfill area to depths of 30, 45, and 50 feet. Inert debris consisting of wood fragments, metal shavings and plastic sheeting was observed in the drill cuttings. Reddish iron staining was also observed. No other soil staining was observed. Eleven soil samples were collected and analyzed for heavy metals, TRPH, PCBs, chlorinated pesticides, halogenated aromatic volatiles, benzene, toluene, ethyl benzene, and xylenes, and semi-volatile organic compounds. One soil sample collected from a depth of 5 feet contained TRPH at a concentration of 8 milligrams per kilogram (mg/kg) and dichlorodiphenyltrichloroethane (DDT) at 0.15 mg/kg. Leighton and Associates recommended excavation of the landfill area and disposal of the debris.

CHJ Inc., 1994

The Client provided a Phase I ESA prepared by CHJ Inc. in August 1994. The property assessed consisted of ±312 acres and included the Site.

The tenants of each unit or multiple units are named (as listed in Section 5.4.1), and general business operations are described, if known. A few businesses were locked and inaccessible at the time of the site visit. Hazardous substance and/or petroleum product use and storage conditions are described, where applicable. Staining observed on concrete and/or soil is described. Staining within the structures is described as not penetrating the concrete floor. Four areas of soil staining are defined as RECs, as follows: an area within the railroad tracks next to (southwest of) Building 831 D, adjacent to the south dock of Building 831 C, adjacent to the north dock of Building 721 D, and adjacent to the north dock of Building 711 A. The stains were from 3 to approximately 15 feet in diameter. They are described as surficial and generally caused by one-time releases. The staining north of Building 711 A was determined to be caused by repeated washdown of the dock during forklift maintenance at the Libbey Glass facility.

The area north of Building 711 A was further investigated by CHJ in November 1994. Six soil samples were collected from depths ranging from 6 inches to 2 feet at three locations. The soil samples were analyzed for TRPH. TRPH concentrations in the shallow samples ranged from 29 to 560 mg/kg. The sample with the highest TRPH concentration was also tested for heavy metals, with results indicating concentrations within typical background levels. The 2-foot sample from that location was also analyzed for TRPH, which was not detected. CHJ concluded that the impacted soils were limited to the upper approximately 6 inches and approximately 4 cubic yards of impacted soil were excavated in March 1995. The maximum TRPH concentration in soil confirmation samples was 36 mg/kg. CHJ concluded that no further investigation was necessary. According to Space Center personnel at that time, Libbey Glass would be modifying their procedures. The three soil stains that appeared to be caused by one-time releases were not investigated or remediated by CHJ.

Another REC identified by CHJ was the "material threat" of a release of hazardous materials related to tenants with bulk storage of hazardous materials onsite. CHJ concluded; however, that the likelihood of a release occurring that would penetrate the thick concrete floors within the buildings was considered negligible.

Other than the soil investigation and excavation north of Building 711 A, CHJ made no recommendations for additional investigation or remediation.

P&D Consultants, 2009

The Client provided a Phase I ESA prepared by P&D Consultants in February 2009. The property consisted of ±163 acres and included the Site.

The report does not itemize the interior spaces of each warehouse. Hazardous materials observed are reported to have included propane at various locations, motor oil and waste oil at Building 831 C, waste oil at Building 811 C, and eleven 200-gallon steel shipping containers of MDI at Building 811 A. Regarding stained soils, P&D stated that soil stains other than de minimis stains in the parking areas or along the railroad spurs were not observed. One pad-mounted and 30 pole-mounted Southern California Edison owned transformers were observed with no leakage of transformer fluids. Eight propane ASTs and one 100-gallon motor oil AST were observed. The motor oil AST was located within Building 831 C with some spillage of oil and surface staining, which had been covered with clay absorbent. They noted no cracks or defects in the pavement. P&D stated that it appeared unlikely that motor oil could penetrate the slab to reach the underlying soil; however, the surface staining was still defined as an REC.

P&D defined the presence of the shipping containers of MDI at Building 811 A as a REC because they had been the subject of an emergency response listing on the CHMIRS database (not currently identified).

P&D defined the 1995 removal of 4 cubic yards of TRPH-impacted material from the loading dock area north of Building 711 A and the historical use of the site area for vineyards before development in 1942 as HRECs.

P&D conducted a limited asbestos survey and found asbestos in stucco wall covering. They observed asbestos-cement pipe in the warehouses, but not did not sample it. P&D also conducted a limited lead-based paint survey and found lead in peeling paint under the eaves on the exterior of the warehouses.

P&D made no recommendations for additional investigation.

A/E West Consultants, 2009

The Client provided a Phase I ESA prepared by A/E West Consultants in April 2009. The property consisted of ±111 acres and included the Site.

The report does not itemize the interior spaces of each warehouse. A/E stated that they reviewed the tenant occupancy and confirmed that the property was occupied by various tenants and utilized for light manufacturing, assembly, and warehousing. A/E found no specific environmental concerns regarding tenant operations.

A/E reported that the only evidence of chemicals, hazardous substances, petroleum-based fuels, or lubricants was a waste oil AST in Building 831 C and waste oil drums in Building 811 C. They observed minor staining around the AST.

A/E defined the presence of abandoned shipping containers storing toxic chemicals at Building 811 A as an REC because they had been the subject of an emergency response listing on the CHMIRS database in 2004 (not currently identified).

A/E defined the 1995 removal of 4 cubic yards of TRPH-impacted material from the loading dock area north of Building 711 A and the historical use of the site area for vineyards before development in 1942 as HRECs.

A/E made no recommendations for additional investigation.

CHJ Consultants, 2012

The Client provided a letter report prepared by CHJ Consultants in April 2012. An area of dead grass in the landscaped area south the trailer parking area south of Building 711 indicated the location of a diesel fuel spill reported to the site owner by Haddy Warehousing in February of 2012. The area measured approximately 70 feet by 12 feet. Six soil samples were collected from three locations within the impacted area. Soil samples were collected from depths of approximately 10 inches and 20 inches. TPH-d was not detected in the three 10-inch soil samples. CHJ concluded that the impact was limited to the upper soils. A licensed hazardous materials hauler was contracted to remove and dispose of the dead grass and the upper 6 to 8 inches of soil. Following the excavation, laboratory analysis of two confirmation soil samples indicated no detectable concentrations of diesel range hydrocarbons. CHJ recommended no additional investigation.

5. HISTORICAL USE

This section summarizes information we obtained from a variety of sources regarding the historical uses of the Site and identifies historical uses that could have led to RECs. The sources of information included historical aerial photographs, historical topographic maps, and city directories provided by EDR.

5.1 Sanborn, Inc. Fire Insurance Maps

EDR's Sanborn Map Report dated March 12, 2018, indicates that Sanborn maps do not exist for the Site or vicinity (Appendix C).

5.2 Aerial Photographs

We reviewed historical aerial photographs for the years 1938, 1948, 1953, 1959, 1967, 1975, 1985, 1990, 1994, 2006, 2010, and 2014 (Appendix D) for indications of past land uses that had the potential to have impacted the Site through the use, storage or disposal of hazardous substances and/or petroleum products. We also reviewed a detailed map of the Space Center Mira Loma property prepared by Leighton and Associates in 1990 utilizing the 1960 Riverside County Flood Control and Water Conservation District basemap to identify specific site features (Appendix D). See Figure 2 for corresponding building numbers. The following summarizes our observations of the Site and vicinity on the aerial photographs:

Year	Observations	
	Site	Adjacent Properties
1938 (1" = 625')	The Site was primarily agricultural (dry farming). A natural wash originating north of the Site was present across the central portion of the Site. An unimproved road was present from east to west across the central portion of the Site. One residential-type structure was present in the northeastern portion of the Site.	Surrounding properties were either vacant and undeveloped or agricultural. The natural wash originated north of the Site and extended south of the Site. Scattered residential-type structures were present southeast of the Site. A northwest to southeast-trending rail line and road were present approximately 200 feet southwest of the Site.

Year	Observations	
	Site	Adjacent Properties
1948 (1" = 625')	The Site was in the central and western portions of the Mira Loma Quartermaster Depot. The nine primary warehouses of the supply depot were aligned in three rows with rail spurs on the northern side of each row of three warehouses. Rail spurs extended westward from the warehouses and converged into one north to south-trending line in the western portion of the Site. A perimeter drainage ditch was present parallel to the west of the rail line. Paved access roads were present between the warehouses in a grid pattern, identified on the 1990 Leighton and Associates map as B-D Street east to west and 7th-10th Street south to north. Several small buildings were located along the southeastern portion of the Site, south of Building 711 and 7th Street.	Access roads, rail spurs, and drainage channels were present throughout the Site vicinity. Two additional large warehouses and one small warehouse were located north of the Site. Other areas north of the Site were vacant or utilized for storage Generally vacant land was present east of the Site, with rail spurs extending from the warehouse area. The majority of the auxiliary structures for the Quartermaster Depot were present south to southeast of the Site. The perimeter rail lines joined at the southwestern portion of the Site and expanded to a set of at least six sidings and trended toward the southeast approximately 300 to 600 feet south of the Site. A gravel mining area was present adjacent to the west of the Site and Quartermaster Depot as a whole.
1953 (1" = 625')	Conditions were generally similar to those observed on the 1948 photograph.	Conditions were generally similar to those observed on the 1948 photograph. Adjacent properties to the north and northeast were used to store various materials.
1959 (1" = 625')	Only the six western warehouses are visible. Conditions were generally similar to those observed on the 1953 photograph.	Conditions were generally similar to those observed on the 1953 photograph. A helicopter landing pad was present south of the Site. The area east of the Site is not shown on the photograph.
1967 (1" = 625')	Conditions were generally similar to those observed on the 1953 and 1959 photographs.	Conditions were generally similar to those observed on the 1953 and 1959 photographs. Areas north and east of the Site were vacant other than the permanent buildings.
1975 (1" = 625')	Conditions were generally similar to those observed on the 1967 photograph. Several truck trailers were present in a parking area west of Building 831D.	Rows of vehicles were present north of the eastern portion of the Site. An oval track (the Mobility Systems crash track facility) was present north of the western portion of the Site. Several structures had been added south of Building 711 and 7th Street (GERC facility). Several vehicles were present in a parking area east of Building 811A. Several of the buildings southeast of the Site had been removed.
1985 (1" = 625')	Conditions were similar to those observed on the 1975 photograph.	Vehicles had been removed from the adjacent property to the north. The oval track had been removed and replaced with a straight track, a small structure, and a concrete pad.

Year	Observations	
	Site	Adjacent Properties
1990 (1" = 625')	Conditions were similar to those observed on the 1985 photograph.	Building 1011 was present adjacent to the north of Building 911. The Mobility Systems crash track facility appears to have been abandoned. The structures south of Building 711 and 7th Street had been removed. Concrete pads remained.
1994 (1" = 625')	Conditions were similar to those observed on the 1990 photograph. The rail spurs and drainage channel in the western portion of the Site had been removed. The rail lines were realigned west of the Site, with the perimeter line concurrent with the southwestern portion of the Site. The warehouses appear to have been served by two rail spurs, north of the northern row and between the two remaining rows, that extended only to the east of the Site. Structures and concrete pads along the southern portion of the Site, south of 7th Street, had been removed.	The Mobility Systems crash track facility had been removed. Numerous mobile classroom-type trailers (associated with Scotsman Trailers, a refurbisher of such trailers, occupying Bld. 921D) were tightly arranged in rows north of the Site. The perimeter rail line had been realigned to be adjacent to the west of the Site. Structures on the GERC facility south of Building 711 had been removed. The former gravel pit west of the Site was a detention basin.
2006 (1' = 625')	The rail spurs had been extended to the west to the current alignment. Paved trailer parking areas were present in the western portion of the Site. The current grass median was present south of the loading dock area of Building 711.	The western two thirds of the current commercial warehouse, concrete loading docks, and trailer parking areas were present north of the Site. The rail spurs east of the Site had been removed. The current commercial warehouses were present east and south of the Site. Space Center Court was present east of the Site.
2010 (1" = 625')	Conditions were similar to those observed on the 2006 photograph.	Conditions were similar to those observed on the 2006 photograph.
2014 (1" = 625')	Conditions were similar to those observed on the 2010 photograph.	Conditions were generally similar to those observed on the 2006 photograph. The eastern extension of the current 1,126,500-square-foot warehouse had been added north of the Site.

The Site was in the central and western portions of the Mira Loma Quartermaster Depot property. The nine primary warehouses of the supply depot have been aligned on the Site since 1942. We observed no conditions on the Site or adjacent properties on the aerial photographs that would suggest the potential presence of RECs on the Site.

5.3 Topographic Maps

We reviewed historical topographic maps for the years 1897, 1900, 1903, 1941, 1944, 1953, 1954, 1966, 1973, 1976, 1981, and 2012 (Appendix E). The following summarizes our observations of the Site and adjacent properties on the historical topographic maps.

Year	Observations	
	Site	Adjacent Properties
1897-1903 (1: 62,500)	The Site is depicted as generally vacant and undeveloped. One residential-type building is depicted in the northwestern portion of the Site.	Adjacent properties are depicted as vacant and undeveloped. Scattered buildings are depicted in the site vicinity.
1941 (1: 24,000)	Unimproved roads are depicted in the central portion of the Site. Three residential-type buildings are depicted in the eastern portion of the Site.	Unimproved roads are depicted north and south of the Site. Scattered buildings are depicted southeast of the Site. A rail line (labeled Union Pacific) and Mission Boulevard are depicted southwest of the Site.
1944 (1: 50,000)	The Site is depicted as vacant and undeveloped.	Adjacent properties are depicted as vacant and undeveloped.
1953 (1: 24,000)	The Site is in the central and western portions of the Mira Loma Quartermaster Depot. The nine primary warehouses of the supply depot are aligned in three rows on the Site. Several access roads and rail spurs are depicted on the Site. Rail spurs are depicted extending westward from the warehouses and converging into one north to south-trending line in the western portion of the Site. A perimeter drainage ditch is depicted parallel to the west of the rail line. Seven additional small structures are depicted in the southeastern portion of the Site, south of the southeastern warehouses (Buildings 721-711 and 7th Street).	Access roads, rail spurs, and drainage channels are depicted throughout the Site vicinity. Two additional large warehouses and one small warehouse are depicted north of the Site. Several auxiliary structures for the Quartermaster Depot are depicted south to southeast of the Site. A set of six rail sidings is depicted south of the Site, trending toward the southeast. A gravel mining area is depicted adjacent to the west of the Site.
1954 (1: 62,500)	Conditions were similar to those observed on the 1953 map.	Conditions were similar to those observed on the 1953 map.
1966 (1: 24,000)	Conditions were similar to those observed on the 1954 map.	Conditions were generally similar to those observed on the 1954 map. The Quartermaster Depot designation had been removed. The northern portion is labeled "U.S. Military Reservation."
1973 (1: 24,000)	Conditions were generally similar to those observed on the 1966 map.	Conditions were generally similar to those observed on the 1966 map. Three new structures are depicted south of Building 711.
1976 (1: 50,000)	Conditions were generally similar to those observed on the 1973 map.	Conditions were generally similar to those observed on the 1973 map.
1981 (1: 24,000)	Conditions were generally similar to those observed on the 1976 map.	Conditions were generally similar to those observed on the 1976 map. Several new structures are depicted south of Building 711.
2012 (1:24,000)	No site structures are depicted. The map depicts only roads and topography.	No structures are depicted. The map depicts only roads and topography.

No site or vicinity conditions are depicted on the topographic maps that would suggest the potential presence of RECs on the Site.

5.4 City Directories

EDR prepared a city directory image report of cross-referenced directories reviewed at approximately 5-year intervals, when available, from 1975 through 2014. The Site listings are not separated by building. Previous environmental reports and tenant lists provided by the Client also contained information regarding Site occupants. A copy of the EDR city directory image report including information regarding offsite facilities is in Appendix F.

5.4.1 Site

This section summarizes information included in the EDR city directory image report, previous environmental reports described in Section 4.2.5, and selected tenant lists provided by the Client:

EDR Directory Image Report, 3401 Etiwanda Avenue Prior to 1990		
1975	**1980**	**1985**
Kerns Furniture, Mortarless Block, National Railroad Passenger, Union Pacific Railroad Agent	Advance Packaging, Arrow Group Industries, CA Redwood Products, Coast Packaging and Supplies, Convolute Westube, Groschen, Ray, Mortarless Block, Photo Litho Co., Res Com Truss Inc., Rocky Mountain Shippers, Sharp Joe Manufacturing, Tradewind Academy, Uniquip Inc., Weyerheuser Co., Workinger West	Advance Packaging, CPS Express, CA Redwood Products, Coast Packaging and Supplies, Dugan CR Construction, Fiber Stream Co., J&S Manufacturing, Kaiser Refractories, Laticrete International Inc., Noma Lites, Photo Litho Co., Sharp Joe Manufacturing, Special Weapon Prod., Swat Viper, Wade Concrete, West End Converters, Western Reel & Supply

Several manufacturing tenants have occupied various tenant spaces over time. Section 4.2.5 provides a summary of previous environmental reports that describe identified areas of concern, RECs, and soil investigation and/or remedial efforts in specific areas of the Site.

5.4.2 Adjacent Properties

Adjacent listings in the EDR city directory image report are as follows:

11600 Iberia Street (adjacent to the south): “Third Millenium Services” and “Toyo Tire Corporation” in 2005.

11201 Iberia Street (adjacent to the south):

- “Triways Inc.” in 2000,
- “Quikx Transportation”, “Triways Inc.”, and “York International Corporation” in 2005,
- “JV Distributor Corporation” and “Triways Inc.” in 2010, and
- “Gentyle Thomas Group, LLC” and “Triways Inc.” in 2014.

11650 Venture Drive (adjacent to the north): “The Home Depot” in 2011.

We identified no business names in the directory abstracts for adjacent properties that would suggest business types that are likely to have caused RECs at the Site.

6. SITE RECONNAISSANCE

This section summarizes observations of the Site and surrounding properties made during the site reconnaissance.

6.1 Methodology and Limiting Conditions

Ann Laudermilk, Senior Project Geologist with Geocon, performed the site reconnaissance on April 10 and April 11, 2018, by walking the Site. Ms. Laudermilk was accompanied by personnel from various tenants. A few of the managers or other tenant contacts were not available during the site visit. In such cases, an employee was either available or the loading bay doors were open and brief visual assessment was possible. In either of these cases, photographs were not taken. In other units, the managers or owners did not allow photographs due to company policy. Ms. Laudermilk performed the offsite survey by observing adjacent properties primarily from the Site and adjacent roads and thoroughfares. There were no limiting conditions to her ability to observe exterior portions of surrounding properties. Photographs of various site features and offsite properties are attached. Selected site features and photograph locations are indicated on Figure 2. Photographs from every unit are not included, particularly every unit with typical storage and distribution operations.

6.2 General Site Setting

The Site is located within an area of commercial/light industrial development that includes the Space Center Mira Loma complex. Surrounding properties to the north, east, and south are developed with commercial concrete tilt-up warehouses. A flood control basin is located adjacent to the west of the Site. The Day Creek Flood Control Channel, a Union Pacific Railroad line, and East Mission Boulevard occupy an approximately 350-foot-wide corridor located southwest of the Site.

6.3 Onsite Survey

6.3.1 Interior

Each of the 175,500-square-foot warehouses is divided into four units, A through D, from east to west. The units are divided by three interior solid redwood walls. Where units are further divided into smaller tenant spaces, there may be chain link fences or other temporary walls of plywood or other materials. The eastern unit in each warehouse has two-story offices that are of original construction. Several of the other units have offices that have been constructed subsequently. Most, if not all of the 36 units have at least one restroom facility.

The following table provides general tenant operations, if known, and pertinent observations, if any, regarding conditions within the unit and/or storage of hazardous substances and/or petroleum products. References to site photographs are given, where applicable.

Unit(s)	Tenant and Operations	Conditions and/or Storage of Hazardous Substances and/or Petroleum Products
711 ABCD	Haddy Warehousing Storage and distribution warehouse of egg packaging supplies (Photo 1) (Coast Packaging), food flavoring products, and small appliances (Photo 2); separate operations for CPS Express, a trucking company, are based south of the warehouse in the loading dock area.	None observed.
721 ABCD	California Packaging Storage and distribution warehouse for cardboard products (Photo 3)	Two propane canister storage cages.
731 ABC	Rhino Container Storage and distribution warehouse for empty containers such as plastic buckets (Photo 4), 55-gallon steel drums, paint cans	Three propane canister storage cages; periodic truck maintenance such as oil changes reported by manager in southern loading dock area with no accumulation of waste oil.
731 D	Gileno Distribution Storage and distribution warehouse for commercial refrigeration units (no refrigerant in units) (Photo 5)	Propane canister storage cage.
811 AB	Kerozak, Inc., Plastic scrap recycler; receive plastic and Styrofoam scrap from a variety of sources and process it and export it; densified Styrofoam waste (Photo 6), recycled plastic pellets (Photo 8)	Propane canister storage cage; plastic sorting and bailing machine uses hydraulic oil, concrete floor is heavily stained (Photo 7); Plastic bailers use hydraulic oil (Photo 9); There is no designated storage area for hydraulic oil, a few buckets are stored under the stairway near the offices in the eastern portion of the warehouse.
811 B	Rajah Storage and distribution of pallets and cardboard boxes	Propane canister storage cage.
811 B	Bridge Trading/Master Floors Not accessible, but open to neighboring businesses; same business in 821 C stores flooring materials.	None observed.
811 B	Advanced Innovative Recovery Manufacture, storage, and distribution of sponges, did not allow pictures for proprietary reasons.	8 to 10 55-gallon drums of components of the sponge material; a poly-mixing machine was in the northern portion of the warehouse; two flammable materials storage cabinets were observed to contain small containers of acetate and acetone; one air compressor was in the northern portion of the warehouse. No significant surface staining was observed throughout the space.
811 C	Best Delivery Storage and distribution warehouse for bails of cardboard boxes	Propane canister storage cage.
811 C	O'Neil Tube and Reel Manufacturer and distributor of fabric bolts and spools out of recycled paper	Corrugator (Photos 11-12) operates on a high temperature oil; heavy oil stains on concrete, absorbent material used; 2 55-gallon drums on plastic secondary containment pallet in maintenance area for used oil and

Unit(s)	Tenant and Operations	Conditions and/or Storage of Hazardous Substances and/or Petroleum Products
		spent absorbent material (Photo 13); machining equipment and 5-gallon bucket of hydraulic oil in maintenance area (Photo 14), flammable materials storage cabinet observed to contain 3 one-gallon bottles of motor oil.
811 D	Triways Overflow storage and distribution of products such as geogrid (Photo 15), solar panels, gym padding, wicker furniture.	None observed.
821 A	Space Center Maintenance Maintenance shop for the Space Center complex; general storage of tools and supplies (Photo 16).	Numerous one-gallon cans and 5-gallon buckets of latex paint on a storage rack (Photo 17), miscellaneous containers of roofing cement; flammable materials storage cabinet observed to contain aerosol cans, lacquer, spray paint, lubricant, gas cans.
821 A	TCS Trucking/Smart Storage and distribution warehouse (one of 3 units) floor tiles.	None observed.
821 A	Freightco Express Storage and distribution of general commodities such as toys, plates, and cups (Photo 18); the northern portion of the space is a maintenance shop/storage area (Photos 19-23) (truck maintenance conducted outside at the loading dock area).	20 55-gallon steel drums, partially full to full, containing waste oil, transmission fluid, antifreeze, waste antifreeze, waste oil filters, some unlabeled; some on wooden pallets; numerous 5-gallon buckets of various materials such as hydraulic oil, lubricant, grease; very poor storage conditions overall; heavy staining on concrete floor, absorbent material used in some areas (Photo 21); the drums do not appear to be leaking, but the staining appears to be caused by poor handling practices; loose propane canisters throughout maintenance area; Freightco does not have a Hazardous Materials Management permit on record with the DEH and appears to be operating with quantities of petroleum products, hazardous substances, and generating hazardous waste in quantities that would warrant one.
821 B	Curvetech Stretch form steel, aluminum and other metals; operate four stretch form presses and other machinery.	Stretch form presses (Photos 24-25) and other machines use hydraulic oil; concrete floor is heavily stained in some areas; absorbent material is used; two air compressors in the unit (Photos 26-27), the concrete is stained around the older backup air compressor; one 55-gallon drum of hydraulic oil on a rolling cart is utilized to service all of the equipment in the space, reportedly refilling the drum once or twice annually.
821 B	Active Apparel Storage and distribution warehouse for clothing (Photo 28).	Propane canister storage cage.
821 C	Bridge Trading/Master Floors Wholesale distribution warehouse for laminate flooring, other flooring materials, molding materials	Propane canister storage cage.
821 D	California Packaging Storage and distribution warehouse	None observed.

Unit(s)	Tenant and Operations	Conditions and/or Storage of Hazardous Substances and/or Petroleum Products
	for cardboard products.	
831 AB	MJB Wood Storage and distribution warehouse for wood and lumber; utilize rail line on south side of warehouse.	Propane canister storage cage; flammable materials storage cabinet observed to contain spray paint, one-gallon paint cans, gas cans, aerosol cans.
831 C	Closeout Center Sort, separate, distribute and export clothing and shoes (Photo 32); utilize electric forklifts (Photo 33).	None observed.
831 D	TCS Trucking/Smart Storage and distribution warehouse (one of 3 units) floor tiles, plates (Photo 34), vacuums.	One plastic tote containing diesel fuel, reportedly from a customer and needs disposal; propane canister storage cage.
911 A	Surplus Asset Management Storage of auction items such as vending machines and industrial kitchen items; no manager/no access to interior.	Two propane canister storage racks.
911 B	TCS Trucking/Smart Storage and distribution warehouse (one of 3 units) This unit is for storage of vacuums and was locked during the site visit.	None reported.
911 CD	Roller Derby Skate Corp. Storage and distribution warehouse for roller derby skates and supplies (Photo 36).	None observed. No propane canister storage, two extra canisters.
921 ABC	Olivet/Ecotech Ecotech is a subsidiary of Olivet and produces luggage out of polycarbonate chips; there is a sewing area for minor assembly; colorants and resins are stored in a fence area in the northwestern portion of the space (Photo 40).	Heavy equipment such as the heating system (Photos 37-38) and the vacuum forming machine use heating oil; injection molding machines use hydraulic oil (Photo 39); concrete is stained at base of machines; rags are used to wipe up leaks; 13 55-gallon steel drums containing gear oil, hydraulic oil, heat transfer oil; 9 5-gallon cans of ethyl acetate for cleaning ink rollers; 5-gallon bucket of lubricant; stored on wooden pallets, no concrete staining observed in storage area (Photo 41).
921 C	Decotone Storage and distribution warehouse for laminate flooring materials.	Propane canister storage cage.
921 C	Gileno Distribution Overflow storage of commercial refrigeration units from unit 731 D (Photo 42).	None observed.
921 D	Met Corp Packaging and distribution warehouse for coffee. Operate a conveyor belt machine for bagging coffee. No pictures allowed of process or products.	Propane canister storage cage (Photo 43).
931 A	GL Veneer	A flammable materials cabinet was observed to contain

Unit(s)	Tenant and Operations	Conditions and/or Storage of Hazardous Substances and/or Petroleum Products
	Produce laminate counter tops out of pressed wood pieces and rolled laminate material; four pneumatic presses (Photo 44) and a laminate-glue roller/cutter are used;	aerosol cans, one-gallon paint cans, and one-quart bottles of motor oil.
931 B	Cornerstone Buy electrical supplies such as springs, wire, bungee hooks, etc. for electricians in bulk, repackage, stock, distribute (Photo 45).	None observed.
931 B	Propak Logistics Sort, stack, ship plastic pallets, primarily for Walmart.	Propane canister storage cage.
931 C	Manna Freight Systems A home delivery company for outside vendors, primarily TVs, mattresses, some furniture.	Propane canister storage cage.
931 C	JH Recycling Grind or bail plastic, depending on the type. Plastic pellets put in cloth totes. No manager, no pictures.	Propane canister storage cage.
931 D	US Ply Inc. Storage and distribution of colored roofing granules in cloth totes (Photo 46)	One air compressor is located in the western portion of the space; propane canister storage cage (Photo 47).

Staining on the concrete floor caused by hydraulic oil was observed in units 811 AB, 811 C, 821 B, and 921 ABC. The staining represents de minimis site conditions. Heavy staining on the concrete floor caused by waste oil, motor oil, and other automotive fluids spilled due to poor handling was observed in unit 821 A. The oil and other hazardous substances are not expected to penetrate the concrete floor. The stains represent a de minimis site condition; however, maintenance should be improved. Freightco Express is operating with quantities of petroleum products and hazardous substances, as well as generating hazardous waste (waste oil), in quantities that would warrant a Hazardous Materials Management permit issued by the DEH.

6.3.2 Exterior

On the northern and/or southern sides of each warehouse there are raised concrete loading docks. (Photos 48-53). The loading docks in many areas were obstructed with boxes or other items in short- or long-term storage (Photos 54-59). The business occupying 831 AB, MJB Wood Group, was one of two tenants to report utilizing the rail spurs (Photo 60). Rail spurs are located on the northern side of the northern row of warehouses (Photos 61-62) and between the central and southern rows of warehouses (Photos 63-65).

We observed one trash compactor and one air compressor on the western portion of unit 921 D (Photo 66). We observed two pad-mounted transformers (Photo 67) east of unit 921 A and south of 931 B. Approximately 20 single- to triple-pole-mounted transformers are present throughout the Site. Two propane ASTs are located at the eastern exteriors of units 721 A (Photo 68) and 821 A. Generally, we observed no hazardous materials on loading dock areas other than propane canister storage cages for some of the businesses. Freightco Express operates truck maintenance in the loading dock area north of unit 821 A. Oil stains were observed on the asphalt concrete pavement below the loading dock (Photo 69).

The southern row of warehouses has trailer parking space or storage space on the southern side of the warehouses (Photos 70-74). East and west of the warehouses there are access roads and asphalt-paved employee parking lots (Photos 75-79). US Ply, Inc. utilizes an area in the northwestern portion of the Site for unloading roofing granules from rail cars (Photo 80). Gileno Distribution utilizes a fenced storage area in the western portion of the Site for overflow storage (Photo 81).

Trailer storage areas occupied by Roadrunner Freight are located in the western and southwestern portions of the Site (Photos 82-83).

We observed no evidence of RECs at the Site. The conditions of storage of hazardous substances and/or petroleum products in unit 821 A, Freightco Express, should be improved. Features observed during the onsite survey are depicted on Figure 2 and in the attached Site Photographs.

6.4 Offsite Survey

Properties within the site vicinity include:

- **North** – Commercial warehouses (Photo 62).
- **West** – Flood control basin.
- **South** – Commercial warehouses (Photo 71).
- **East** – Space Center Court and commercial warehouses beyond.

We observed no conditions or activities on adjoining properties that have the potential to cause or have caused RECs at the Site.

7. INTERVIEWS

We interviewed site owner representative Tom Cruikshank, via a site owner questionnaire regarding the current and past uses of the Site. Mr. Cruikshank stated that Space Center Mira Loma, Inc. has owned the Site since 1966. The nine 175,500-square-foot redwood warehouses were built in 1942. Following Site occupancy by the Mira Loma Quartermaster Depot, the 36 units within the nine warehouses have had a series of tenants since 1966. See Section 5.4.1 for a summary of known tenants based on previous environmental reports, tenant lists provided by the Client, and city directory abstracts provided by EDR.

Mr. Cruikshank indicated the presence of hazardous materials related to the tenants' previous and current standard use. Section 6.3.1 provides a description of hazardous materials storage. Mr. Cruikshank cited previous hazardous materials releases and soil investigations and referred to the previous environmental reports for additional information.

Mr. Cruikshank confirmed that the former inert landfill area in the western portion of the Site was not completely removed, as recommended by Leighton and Associates in 1991. Over excavation and recompaction to the extent needed to grade for the parking areas was accomplished.

Mr. Cruikshank confirmed that there is an asbestos operations and maintenance manual in effect for the Site and that an annual notification is given to each tenant in February and to new tenants.

Mr. Cruikshank indicated no knowledge of notices or other correspondence from any government agency relating to past or current violations of environmental laws or to environmental liens encumbering the Site; pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the Site; or notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

8. CONCLUSIONS AND RECOMMENDATIONS

We have performed a Phase I ESA, in general conformance with the scope and limitations of ASTM *Designation E 1527-13*, for the ±96.5-acre property located at 3401 Etiwanda Avenue in Jurupa Valley, California. Any exceptions to, or deletions from, this practice are described in Section 1.4 of this report.

The assessment has revealed no evidence of RECs in connection with the Site. The former landfill in the western portion of the Site, currently occupied by a trailer parking area, represents a potential environmental concern that should be addressed prior to future redevelopment of that portion of the Site. No further environmental assessment of the Site appears to be warranted at this time.

10. QUALIFICATIONS

This Phase I ESA report was prepared by Ms. Ann Laudermilk and reviewed by Mr. Jim Brake. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience, to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries investigation in conformance with the standards and practices set forth in 40 CFR Part 312.

Ms. Laudermilk has over 15 years conducting and managing environmental investigations in California. Ms. Laudermilk has completed numerous Phase I and II ESAs, UST removals, and remedial investigations for a variety of residential, commercial, school, industrial, agricultural, and municipal properties. She has a BA degree in Geology.

Mr. Brake has an MS degree in Geological Science and over 31 years of experience in environmental investigation and remediation, including implementation of Remedial Investigation/Feasibility Study programs and soil and groundwater remedial actions for private industrial and government clients. He has managed a wide variety of projects for clients in the manufacturing, transportation, mining, automobile and real estate industries including Environmental Protection Agency and DTSC Superfund sites. Mr. Brake has extensive experience in the performance of Phase I and II ESAs of commercial, industrial, and agricultural properties throughout Northern California.

APPENDIX A

User Questionnaire
A9726-77-09
3401 Etiwanda Avenue Buildings 711-931, Jurupa Valley, CA

The following are a list of questions that are required to be asked of the user of the report as part of the All Appropriate Inquiry requirements for Phase I ESAs. Please answer them to the best of your knowledge.

1) Are chain of title, appraisal and sale agreement records available for the Site? If available, please provide.

2) Please provide names and contact information of all known current and previous Site owners, occupants, and property managers.

1942-1966-Quarter Master Depot; 1966-current; Misc. Buildings and Land Use/Tenants. For current tenants of buildings 711-931 and land areas west of buildings, see attached tenant list.

Space Center Mira Loma, Inc. – Property Manager, Tom Cruikshank, VP

3) If the reason for this Phase I is other than to identify recognized environmental conditions (RECs) at the property, please indicate the reason.

4) Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law? *(Reference: 40 CFR 312.25 - Environmental cleanup liens that are filed or recorded against the site).*

None known

5) Are you aware of any activity and use limitations (AULs), such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? *(Reference: 40 CFR 312.26 - Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry).*

None known

6) As the *user* of this *ESA*, do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business? *(Reference: 40 CFR 312.28 - Specialized knowledge or experience of the person seeking to qualify for the LLP).*

No

7) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*? *(Reference: 40 CFR 312.29 - Relationship of the purchase price to the fair market value of the property if it were not contaminated).*

N/A

8) Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? *(Reference: 40 CFR 312.30 - Commonly known or reasonably ascertainable information about the property).*

For example, as *user*,
(a) Do you know the past uses of the *property*?

Yes

(b) Do you know of specific chemicals that are present or once were present at the *property*?

See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

(c) Do you know of spills or other chemical releases that have taken place at the *property*?

See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

(d) Do you know of any environmental cleanups that have taken place at the *property*?

See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

9) As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indications of the presence or likely presence of contamination at the *property*? *(Reference: 40 CFR 312.31 - The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation).*

No

Name of person completing User Questionnaire: Tom Cruikshank

Title: Vice President

PHASE I INTERVIEW QUESTIONNAIRE

The purpose of this questionnaire is to obtain information from knowledgeable individuals regarding the site. This questionnaire will become part of the Phase I ESA report.

A. SITE INFORMATION

Project Number: A9726-77-09 **Site Name/Reference: APN 156-150-069**
Site Location: 3401 Etiwanda Avenue Buildings 711-931, Jurupa Valley, CA

B. INTERVIEW INFORMATION

Date/Time: 4/6/18 ❒ In Person
Interviewer: Ann Laudermilk ❒ By Telephone, Number:
Person Interviewed: Tom Cruikshank ❒ By Facsimile, Number:
Title/Company: Vice President x By E-mail, address: tcruikshank@spacecenterinc.com

1. How long have you owned the Site? 1966

2. Do you have good knowledge regarding the uses and physical characteristics of the site?
[x] **Yes** ❒ No If not, who does? Phone Number:

3. Do you have good knowledge regarding the activities/processes conducted at the site?
[x] **Yes** ❒ No If not, who does? Phone Number:

C. PROPERTY INFORMATION

1. To the best of your knowledge, what are the current and past uses of the site? Please describe with approximate dates. Please indicate past tenants of the warehouse and the type of business, if possible.

1942-1966-Quarter Master Depot; 1966-current; Misc. Buildings and Land Use/Tenants. For current tenants of buildings 711-931 and land areas west of buildings, see attached site plan.

2. To the best of your knowledge, what are the current and past uses of the adjoining properties?

North: Vacant Land/Quarter Master Depot, now warehouse

South: Vacant Land/Quarter Master Depot, now warehouse

East: Vacant Land/Quarter Master Depot, now warehouse

West: Vacant Land/Quarter Master Depot, trailer/car storage

3. To the best of your knowledge, what are the current and past uses in the surrounding area?

Warehousing / Distribution / Manufacturing / Quarter Master Depot / Vacant Land

4. Are there currently, or have there been in the past, any surface water bodies such as creeks or streams or other surface drainage on or adjacent to the site?

Yes, there are three main flood control channels from north to south on or adjacent to the Property that tie into the southerly concrete lined Day Creek Channel (RCFC lines "N", "O" and "P").

5. Any historical or current pools of liquid noted? Source? Location? Describe.

   See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09.

6. Any historical or current standing water noted? Source? Location? Describe.

   See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09.

7. Are there any waste water discharges (including storm water) to a drain, ditch, or stream on the site and/or on adjacent properties:

   Usual building and site storm drain lines per construction plans and there are three main flood control channels from north to south on or adjacent to the Property that tie into the southerly concrete lined Day Creek Channel (RCFC lines "N", "O" and "P").

8. Are there currently, or have there been in the past, any wells (e.g. water, oil, gas, irrigation, injection, abandoned), pits, clarifiers, cisterns, cesspools, or similar receptacles noted where liquids drain, collect or are stored (sumps) that are likely to contain hazardous substances or petroleum products on the site or adjacent properties?

   See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09 also there is an existing JCSD owned water well south and east of Building 711-A.

9. Identify the source of potable water on the site.
   JCSD

10. Identify the sewage disposal system on the site (type and age).
    JCSD

11. Is there any historical or current solid waste disposal on site? Describe.
    See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09.

12. Is there any historical or current unnatural fill or grading, particularly fill of unknown origin? Describe.
    See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09.

13. Is there any historical or currently stained soil or pavement? Describe.
See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

14. Is there any historical or current stressed vegetation noted (other than caused by drought)? Describe.
See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

15. To your knowledge, are there or have there been:

Hazardous substances on the site? ☒ **Yes*** ☐ No
Petroleum products on the site? ☒ **Yes*** ☐ No

*See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

If current uses involve hazardous substances or petroleum products, please identify the type, quantity and storage conditions of those substances.

Hazardous Substance or Petroleum Products	Location	Quantity	Storage Conditions
Tenant related maintenance/janitorial and warehousing products.			

If hazardous or otherwise controlled waste storage areas are present on the site, please identify the type, location, quantity, and storage conditions of the waste materials.

Material Stored	Location	Quantity	Storage Conditions
Tenant related maintenance/janitorial and warehousing products.			

16. If hazardous substances and/or petroleum products are present, are there indications of any of the following:

An existing release? ☐ Yes ☒ **No**
A past release? ☒ **Yes** ☐ No
A threat of their release? ☐ Yes ☒ **No**

If yes to any of the above, please describe:

See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

17. Are there any aboveground or underground storage tanks? Identify tank volume, location, material, age.

See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

AST/UST and Age	Location	Tank Volume	Material stored

18. Are there any historical or current drums and/or other containers? Identify volume, material, and location.

See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

Volume	Material	Location

19. Have there been any historical or any current noxious odors noted on the Site? Source? Describe.

See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

20. To your knowledge, are there any utility corridors on the Site? Describe.

Standard sewer/water, electric and phone connections.

21. Any electrical or hydraulic equipment likely to contain PCB's such as transformers, hydraulic lifts, or elevators (fluorescent light ballast excluded).

See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

22. Are there any occupants on the Site? Describe and list duration of occupancy.

See attached Tenant List.

23. Are there structures present on the site? Provide a general description of the structures on the site (amount, size, and age)?

Structure	Sq. Footage	Age
Nine, 175,500 sf warehouse buildings	1,579,500 sf	76 years (1942)

24. If any structures identify the type of HVAC system and fuel source on the interior. Any boilers present?

HVAC exists for office areas (electric source). No boilers present.

25. Is the facility equipped with any backup generators? Fuel source?

No.

26. Any historical or current stains or corrosion on floors, walls or ceilings?

See Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91; CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

27. Do you have good knowledge regarding the identity of any existing documents relating to the Site?

☒ **Yes**
☐ No If not, who does?_____ Phone Number: _____

28. To your knowledge, do any of the following documents exist with respect to the Site? If yes, please name the document and comment upon whether it is available for review.

Document	Availability/ Source	Title of Document
Environmental site assessment reports?		Historical Review and Site Reconnaissance 129 Acres, Leighton & Associates, 8/10/90; Phase I ESA, Leighton & Associates, 8/23/90; Phase I ESA, Leighton & Associates, 2/8/91 (278 acres) CHJ Inc. Phase I ESA, 8/2/94; P&D Phase I ESA, 2/27/09; A/E West Consultants Inc. Phase I ESA, 4/2/09

EDR Inquiry # 5216556.3	Contact: Ann Laudermilk

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Geocon Geotechnical & Env were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # D8F2-44DF-9B73

PO # NA

Project A9726-77-09

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: D8F2-44DF-9B73

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). GEOCON GEOTECHNICAL & ENV used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by GEOCON GEOTECHNICAL & ENV. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

An online review and analysis by GEOCON GEOTECHNICAL & ENV of the RCRA-TSDF list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

An online review and analysis by GEOCON GEOTECHNICAL & ENV of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

An online review and analysis by GEOCON GEOTECHNICAL & ENV of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where

environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

An online review and analysis by GEOCON GEOTECHNICAL & ENV of the ENVIROSTOR list, as provided by EDR, and dated 10/30/2017 has revealed that there are 10 ENVIROSTOR sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

An online review and analysis by GEOCON GEOTECHNICAL & ENV of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by GEOCON GEOTECHNICAL & ENV of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/11/2017 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

HWP: Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

An online review and analysis by GEOCON GEOTECHNICAL & ENV of the HWP list, as provided by EDR, and dated 11/20/2017 has revealed that there are 2 HWP sites within approximately 1 mile of the target property.

Handler Activities Summary:

NORTH AMERICAN CAR CORPORATION (Continued) **1000404816**

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 09/13/1993
Site name: NORTH AMERICAN CAR CORPORATION
Classification: Not a generator, verified

Date form received by agency: 08/18/1980
Site name: NORTH AMERICAN CAR CORPORATION
Classification: Large Quantity Generator

Violation Status: No violations found

Evaluation Action Summary:
Evaluation date: 07/23/1991
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported
Evaluation lead agency: State Contractor/Grantee

Evaluation date: 05/28/1991
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE

Registry ID: 110055778813

Environmental Interest/Information System
STATE MASTER

Registry ID: 110002719611

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Potential Media Affect:	Soil
Potential Contaminants of Concern:	Diesel
Site History:	SITE HISTORY/RELEASE INFORMATION: June 15, 2015--Six soil samples were taken at the under-dispenser sumps at the point of connection during a product piping replacement project. The soil sample taken under dispenser 15 at feet had 17300 ppm TPHd, 121 ppb ethylbenzene, 7.9J ppb total xylenes, 530 ppb 1,3,5-TMB, 85.9 ppb n-butylbenzene, and 5.2J ppb naphthalene. The site was placed into LOP July 15, 2015. ASSESSMENT: November 3, 2015--Three soil borings (SP-1 through SP-3) were drilled surrounding dispenser 15. SB-1 was drilled to 50 feet, SB-2 was drilled to 29 feet where it hit refusal and SB-3 was drilled to 70 feet. Hydrocarbons were limited to between 3 and 20 feet bgs in all three borings and the site was defined vertically. TPHd in SB-1 was detected at 2900, 6000, 6700 and 2800 ppm at 5, 10, 15, and 20 feet and TPHg was detected at 1800, 340, 390 and 300 ppm at 5, 10, 15 and 20 feet. TPHd in SB-2 was detected at 250, 14000, 1000 and 3500 at 3, 5, 10, and 15 feet and TPHg was detected at 3300, 120 and 180 ppm at 5, 10 and 15 feet. TPHd in SB-3 was detected at 9100, 1500, 4100, and 2200 ppm at 5, 10, 15, and 20 feet and TPHg was detected at 1300, 420, 200 and 110 ppm at 5, 10, 15, and 20 feet. No Benzene or MTBE was detected in any of the soil samples. Additional lateral assessment was requested. February 22, 2016-- Three soil borings(SB-4 through SB-6) were completed to 40 feet bgs using direct push technologies surrounding the original three borings. A total of 24 soil samples were collected at depths ranging from 5 to 40 feet bgs. No analyte was detected above the laboratory reporting limit in the soil samples. Groundwater was not encountered. REMEDIATION: No active remediation was completed. GROUNDWATER:: Groundwater was not encountered in the 70 foot depth explored and is anticipated to be greater than 200 feet bgs. CLOSEST WELLS: According to GeoTracker, six wells are located within 1/2 mile with the closest well at 1300 feet from the site MASS REMAINING IN-SITU: TPHd is soil is limited in extent near dispenser island pump #15 and has been delineated to a vertical extent of 25 feet or less and laterally between 20 to 60 feet from dispenser #15. Other information: The site is a card lock fueling facility and is expected to remain in use as a commercial petroleum fueling facility in the future. A UST system is currently installed and operating at the site. The piping were replaced in June 2015 and the leak has been stopped. The site has been adequately

FLYERS #462 (Continued) **S119777434**

characterized. Residual impacts remain at the site between 3 and 20 feet bgs in the soils near dispenser #15. No water wells, surface waters, or other sensitive receptors are likely to be impacted.

FINDS:

Registry ID: 110002934166

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002816917

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/11/2017

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017
Date Data Arrived at EDR: 12/22/2017

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017
Date Data Arrived at EDR: 12/26/2017

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Elevation:	817 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5620426 GUASTI, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

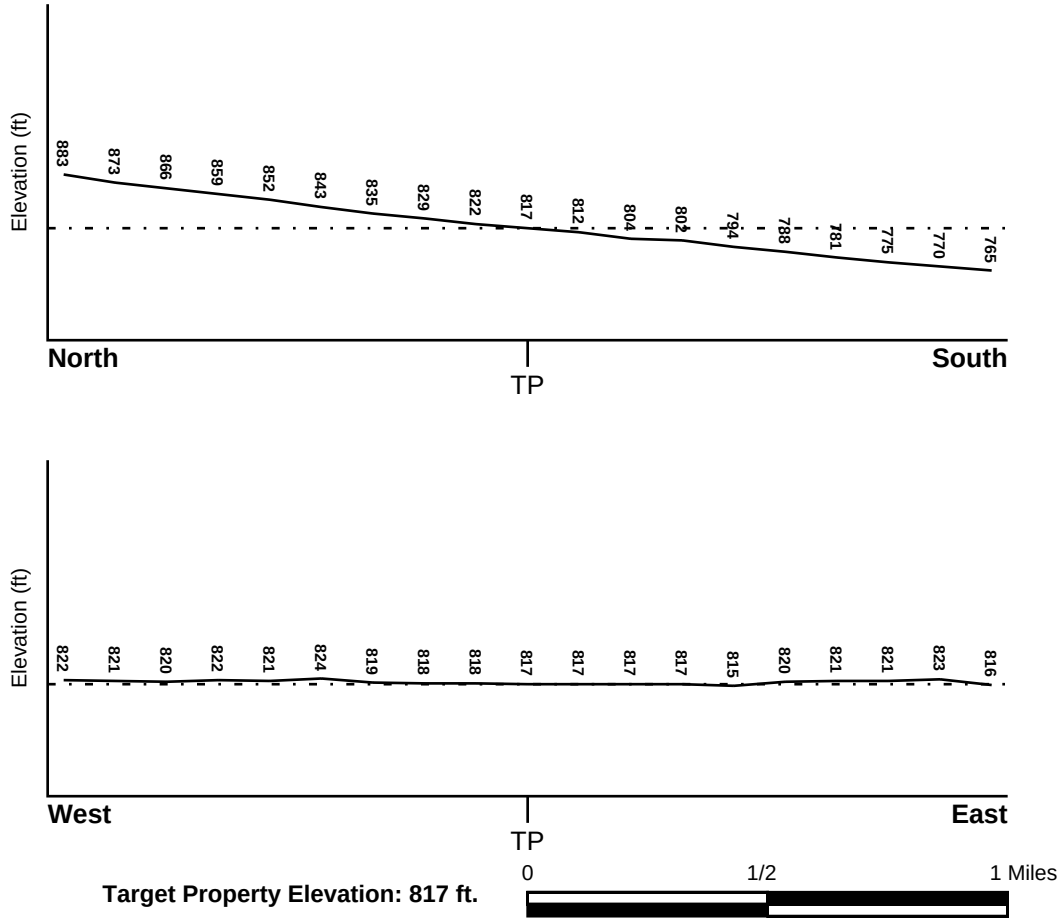
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06071C8643H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06071C8641H	FEMA FIRM Flood data

06065C0019G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
GUASTI	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	9 inches	48 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
3	48 inches	59 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Water System Information:

Prime Station Code:	02S/06W-05A01 S	User ID:	WAT
FRDS Number:	3310021003	County:	Riverside
District Number:	14	Station Type:	WELL/AMBNT
Water Type:	Well/Groundwater	Well Status:	Active Raw
Source Lat/Long:	340200.0 1173127.0	Precision:	100 Feet (one Second)
Source Name:	WELL 06		
System Number:	3310021		
System Name:	Jurupa Community SD		
Organization That Operates System:			
	8621 Jurupa Road		
	Riverside, CA 92509		
Pop Served:	35000	Connections:	10414
Area Served:	JURUPA & VICINITY		
Sample Collected:	10-JAN-12	Findings:	750. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	10-JAN-12	Findings:	32. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	23-FEB-12	Findings:	720. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	23-FEB-12	Findings:	26. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	20-MAR-12	Findings:	620. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	20-MAR-12	Findings:	25. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	17-APR-12	Findings:	690. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	17-APR-12	Findings:	26. MG/L
Chemical:	NITRATE (AS NO3)		
Sample Collected:	02-MAY-12	Findings:	790. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	02-MAY-12	Findings:	22. MG/L
Chemical:	NITRATE (AS NO3)		

Sample Collected:	12-JUN-12	Findings:	940. MG/L
Chemical:	TOTAL DISSOLVED SOLIDS		
Sample Collected:	12-JUN-12	Findings:	35. MG/L

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish & Game
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Geocon Geotechnical & Env were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2017 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Report Generation Date: 11/22/2018

✓ DUPLICATE SITE

DATE DETERMINED: 10 May 1999

DISTRICT POC: Jeffery B. Armentrout, Technical Manager, (213) 452-3720.

REMARKS AND COMMENTS: A map titled, " Map of California, published by the State of California Department of Public Works, Division of Highways (series 1941-45)," depicts the location of a Quartermaster Supply Depot near Mira Loma. When the location shown on this drawing is compared with the location description contained in the Mira Loma Quartermaster Depot (J09CA048900) INPR, it is clear that they are one and the same location. Additionally, the current owner of the property (Mira Loma Space

Center) verified the previous ownership of the property by the U.S. Army and U.S. Air Force.

In 1942, the USA acquired 530.72 acres in fee for the establishment of the Army Quartermaster Supply Depot in Mira Loma. It was comprised of several warehouses, an administration building, training building, infirmary, garage, officer's quarters, sewage disposal plant, and other buildings and structures. In 1943, 2.44 acres were quitclaimed to the State of California. In 1954, a total of 528.75 acres were transferred to the Air Force. In 1966, 343.45 acres were sold to a private entity known as the Mira Loma Space Center. In 1986, a total of 184.74 acres were sold through GSA to the County of Riverside. This property has subsequently been sold to a private developer and is undergoing commercial development.

for Jabin T. Desai.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/30/2018 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

NORTH AMERICAN CAR CORPORATION (Continued) **1000404816**

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110009527388

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110070091020

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D009
. Waste name: MERCURY

. Waste code: D016
. Waste name: 2,4-D

. Waste code: D018
. Waste name: BENZENE

. Waste code: D035

IBERIA/GM BUILDING #5559 (Continued) **1024089800**

. Waste name: METHYL ETHYL KETONE

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Local Agency: Not reported
File Location: Local Agency
Local Case Number: 2015RO6600626
Potential Media Affect: Soil
Potential Contaminants of Concern: Diesel
Site History: SITE HISTORY/RELEASE INFORMATION: June 15, 2015--Six soil samples were taken at the under-dispenser sumps at the point of connection during a product piping replacement project. The soil sample taken under dispenser 15 at feet had 17300 ppm TPHd, 121 ppb ethylbenzene, 7.9J ppb total xylenes, 530 ppb 1,3,5-TMB, 85.9 ppb n-butylbenzene, and 5.2J ppb naphthalene. The site was placed into LOP July 15, 2015. ASSESSMENT: November 3, 2015--Three soil borings (SP-1 through SP-3) were drilled surrounding dispenser 15. SB-1 was drilled to 50 feet, SB-2 was drilled to 29 feet where it hit refusal and SB-3 was drilled to 70 feet. Hydrocarbons were limited to between 3 and 20 feet bgs in all three borings and the site was defined vertically. TPHd in SB-1 was detected at 2900, 6000, 6700 and 2800 ppm at 5, 10, 15, and 20 feet and TPHg was detected at 1800, 340, 390 and 300 ppm at 5, 10, 15 and 20 feet. TPHd in SB-2 was detected at 250, 14000, 1000 and 3500 at 3, 5, 10, and 15 feet and TPHg was detected at 3300, 120 and 180 ppm at 5, 10 and 15 feet. TPHd in SB-3 was detected at 9100, 1500, 4100, and 2200 ppm at 5, 10, 15, and 20 feet and TPHg was detected at 1300, 420, 200 and 110 ppm at 5, 10, 15, and 20 feet. No Benzene or MTBE was detected in any of the soil samples. Additional lateral assessment was requested. February 22, 2016-- Three soil borings(SB-4 through SB-6) were completed to 40 feet bgs using direct push technologies surrounding the original three borings. A total of 24 soil samples were collected at depths ranging from 5 to 40 feet bgs. No analyte was detected above the laboratory reporting limit in the soil samples. Groundwater was not encountered. REMEDIATION: No active remediation was completed. GROUNDWATER:: Groundwater was not encountered in the 70 foot depth explored and is anticipated to be greater than 200 feet bgs. CLOSEST WELLS: According to GeoTracker, six wells are located within 1/2 mile with the closest well at 1300 feet from the site MASS REMAINING IN-SITU: TPHd is soil is limited in extent near dispenser island pump #15 and has been delineated to a

FLYERS #462 (Continued) **S119777434**

vertical extent of 25 feet or less and laterally between 20 to 60 feet from dispenser #15. Other information: The site is a card lock fueling facility and is expected to remain in use as a commercial petroleum fueling facility in the future. A UST system is currently installed and operating at the site. The piping were replaced in June 2015 and the leak has been stopped. The site has been adequately characterized. Residual impacts remain at the site between 3 and 20 feet bgs in the soils near dispenser #15. No water wells, surface waters, or other sensitive receptors are likely to be impacted.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BUILDING MATERIALS MANUFACTURING CORPORATION (Continued) **1000105509**

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 222
. Waste name: Oil/water separation sludge

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

BUILDING MATERIALS MANUFACTURING CORPORATION (Continued) **1000105509**

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D018
. Waste name: BENZENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

FINDS:

Registry ID: 110002816917

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2018
Date Data Arrived at EDR: 08/10/2018
Date Made Active in Reports: 09/10/2018

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Elevation:	817 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5620426 GUASTI, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

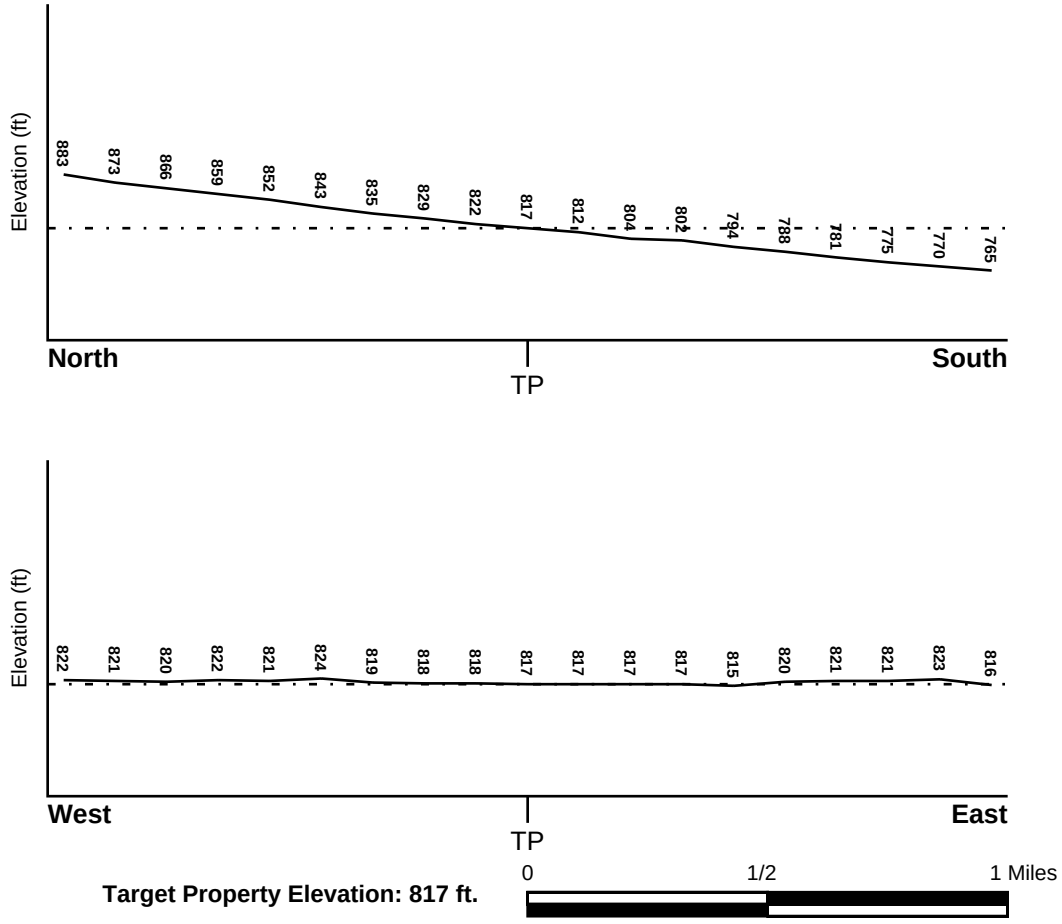
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06071C8643H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06071C8641H	FEMA FIRM Flood data

06065C0019G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
GUASTI	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: DELHI

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	9 inches	48 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
3	48 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS
RADON

AREA RADON INFORMATION

State Database: CA Radon

Radon Test Results

Zipcode	Num Tests	> 4 pCi/L
91752	4	0

Federal EPA Radon Zone for RIVERSIDE County: 2

Note: Zone 1 indoor average level > 4 pCi/L.
: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.
: Zone 3 indoor average level < 2 pCi/L.

Federal Area Radon Information for Zip Code: 91752

Number of sites tested: 1

Area	Average Activity	% <4 pCi/L	% 4-20 pCi/L	% >20 pCi/L
Living Area - 1st Floor	0.500 pCi/L	100%	0%	0%
Living Area - 2nd Floor	Not Reported	Not Reported	Not Reported	Not Reported
Basement	Not Reported	Not Reported	Not Reported	Not Reported

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

APPENDIX D: QUALIFICATIONS

PARTNER

Nasim Ahmed, REA

Partner Associate

Education

Master of Science, Chemical Engineering - University of Southern California
Bachelor of Science, Chemical Engineering - BUET, Bangladesh

Registrations

California Registered Environmental Assessor (REA I- 08051)

Summary of Professional Experience

Mr. Ahmed has over 13 years experience in the environmental service industry. He is familiar with all aspects of Due Diligence Property Assessments and the needs and requirements of varied number of reporting standards, including the ASTM standard, EPA's All Appropriate Inquiry (AAI), and customized client formats. Mr. Ahmed is a certified AHERA Asbestos Building Inspector with experience developing and implementing asbestos, lead-based paint, PCB, and radon Operations & Maintenance (O&M) Programs. Mr. Ahmed has also performed Phase II Subsurface Investigations, Regulatory Compliance Assessments, and Limited Property Condition Assessments.

Mr. Ahmed has performed over 1,000 Phase I Environmental Site Assessments and Environmental Transaction Screens. He has provided daily client support and management of environmental, engineering and associated projects in the due diligence process. Some of his other client management duties have included assessment of current and potential collateral properties for applicable due diligence requirements, with "cradle to grave" client support of projects through loan closing (including addressing client concerns, comments and revisions). He has performed Phase I ESAs, Phase II Subsurface Investigations, and Regulatory Compliance Assessments on numerous multi-acre, multi-tenant industrial, commercial office, retail and multi-regional retail mall complexes, such as the Glendale Fashion Center, Howard Johnson Hotel and Rite Aid. He also has developed and implemented asbestos, lead-based paint, lead in water, and radon Operations and Maintenance (O&M) Programs.

Finally, Mr. Nasim's diversity across residential, industrial, and commercial environments is a major contribution to Partner Engineering and Science's Associate team in the Southwest region of the United States.

Education

B.S., in Environmental Science, University of California, Los Angeles
Minor in Environmental Health Science

Registrations

AHERA Certified Asbestos Building Inspector, AIR030816612N9319
Environmental Management Certificate Program (University of California, Irvine- University Extension)

Training

Asbestos Building Inspector Initial Course

Highlights

8 years in the environmental consulting industry
8 years of experience performing due diligence assessments including Phase I site Assessments, Transaction Screen Assessments and Environmental Desktop Reports

Experience Summary

Ms. Nguyen currently holds the role of a Project Manager and her responsibilities include managing and performing Phase I Site Assessments in line with the American Society of Testing and Materials (ASTM) standard and US Environmental Protection Agency's All Appropriate Inquiry (AAI) as well as customized client formats. In addition, Ms. Nguyen performs limited asbestos surveys, lead-based paint surveys and radon testing as required per scope of work. Ms. Nguyen also serves as a technical reviewer on environmental due diligence assessments.

Ms. Nguyen has been responsible for the completion of Phase I Site Assessments for various properties including gas stations, dry cleaners, manufacturing sites, industrial/warehouse facilities, hotels, office buildings, retail shopping centers, machine shops, auto repair facilities, cell phone data towers and associated land, recycling facilities, and multi-use commercial/residential buildings. Ms. Nguyen has coordinated the completion of various assessments across the United States.

Project Experience

Ms. Nguyen has over eight years of experience performing due diligence assessments for a variety of property types, as detailed above. For each assessment she reviews the condition of the building structure and systems and develops a thorough report.

Phase I Environmental Site Assessment, Gasoline service stations, Nationwide. Ms. Nguyen conducted, managed, and/or reviewed Phase I Environmental Site Assessments on operating and closed gasoline service stations throughout the continental United States and Hawaii. Conducted extensive reviews of subsurface investigations to evaluate the potential for the presence of residual contamination or undiscovered contamination to remain in place.

Phase I Environmental Site Assessment, Various Apartment Complexes, Nationwide. Ms. Nguyen conducted, managed and performed quality control oversight for the completion of numerous Phase I Environmental

Site Assessments in accordance with the Fannie Mae scope of work for various apartment complexes throughout the United States.

Phase I Environmental Site Assessment, Industrial Facilities, Various Locations Throughout Los Angeles and Orange County, California. Ms. Nguyen conducted, managed, and/or reviewed multiple Phase I ESAs for industrial sites of various sizes.

Phase I Environmental Site Assessment, Landfill, Los Angeles and Orange County, California. Ms. Nguyen conducted and reviewed several Phase I ESA for former landfill sites being redeveloped for commercial or residential use.

Phase I Environmental Site Assessment, Hotel, Beverly Hills, California. Ms. Nguyen performed a Phase I ESA for a well-known, five-star, full service hotel with onsite dry cleaning and previous onsite gas station operations.

Highlights

Over 16 years in the environmental and engineering consulting industry
Founding member of Partner Engineering and Science, Inc.
Executive Board Member of Partner Engineering and Science, Inc.

Experience Summary

Ms. Redlin has more than 16 years of experience in the environmental and engineering consulting industry. Her background in environmental science, in addition to her knowledge of current commercial real estate due diligence standards, allows her to offer the most efficient and cost-effective means of regulatory compliance. Ms. Redlin has extensive experience managing all aspects of due diligence, specializing in environmental due diligence, for nationwide and local clients such as:

- Residential Developers
- Commercial Developers
- Mortgage Brokers
- Real Estate Brokers
- Individual Property Owners and Buyers
- Financial Institutions including:
- Portfolio Lenders
- SBA Lenders
- HUD Lenders
- Fannie Mae Lenders
- Freddie Mac Lenders
- Private Equity Funds
- Insurance Lenders

Ms. Redlin has gained valuable knowledge and know-how from having been personally involved in the details of thousands of real estate transactions for various client types, and therefore understands the specific needs and scopes of work required for all parties involved in a transaction.

Ms. Redlin has served as an environmental scientist, project manager, or executive senior author on over 15,000 real estate transactions. Ms. Redlin's due diligence resume includes experience at all levels, advising lenders and real estate investors through the following product types:

- Phase I Environmental Site Assessments

- Phase II Subsurface Investigations
- Phase III Site Characterizations
- Remedial Cost Estimates
- Remediation Design and Implementation
- Environmental Transaction Screens
- Property Condition Assessments
- Probable Maximum Loss Assessments
- Property Condition Evaluations

Real estate investors, redevelopment agencies, financial institutions, insurance lenders, and real estate equity funds have come to rely on her advice and judgment to help them with their real estate business decisions. Ms. Redlin is a dedicated professional who takes pride and pleasure in meeting her client's needs and spearheading and assembling the team with the expertise to handle any issue that may come up during the transaction.

Project Experience

Ms. Redlin has extensive experience in testing soil, soil gas, and groundwater in the context of a real estate transaction, as well as under the supervision of state and federal regulators. Among her specialties is guiding landowners and prospective purchasers through the process of selling or acquiring an environmentally challenged site.

Ms. Redlin has participated in the characterization of groundwater and soil contamination; quarterly groundwater monitoring; implementation of various systems such as soil vapor extraction systems, dual phase extraction systems, ozone sparging, air sparging, pump and treat; and soil excavation projects such as tank removals at several clean-up sites in Los Angeles and Orange County.

Ms. Redlin also has extensive experience in environmental compliance monitoring and biological consulting. She has extensive experience working as an independent contractor for and in conjunction with state and local agencies such as Santa Barbara County Parks, California Department of Fish and Game, California Public Utilities Commission, Los Angeles Water and Sanitation and others. This included monitoring construction activities near sensitive biological receptors; containing, quantifying and reporting any hazardous material spills that occurred; working with construction crews to ensure compliance with environmental permit regulations as well as reporting to interested parties on the progress and compliance of the project.

Distinctions

Real Estate Forum- Woman of Influence 2012

Ms. Redlin was named by the Los Angeles Business Journal for Women Making a Difference in 2010.

Ms. Redlin has been designated a 2009 California Mortgage Bankers Association (CMBA) Future Leader.

Ms. Redlin was named Real Estate Southern California Woman of Influence in 2008 for her role in the area's commercial real estate transactions.

Ms. Redlin was one of only two consultants asked to sit on the Risk Managers Association (RMA) Credit Committee roundtable which discussed the effects of the new Federal All Appropriate Inquiries (AAI) standard on Phase I Environmental Site Assessments.

Ms. Redlin received an Industry Profile of Distinction in Brownfield Renewal.

Notice: IMPORTANT INFORMATION:

Service: Client has used a service offered by ERIS Information Inc. ("**ERIS**") to generate this report based upon certain search parameters set by Client, or in the case of ERIS's Vapor Encroachment Screening Tool and Checklist, certain search parameters set by ERIS and modified by Client (the "**Service**"). This report contains the results of a search conducted by ERIS of environmental records maintained by third parties. ERIS does not maintain, and has no responsibility for the accuracy or completeness of, such records.

Agreement: Client's use of the Service and any report generated thereby is subject to the Master Services Agreement previously entered into by Client and ERIS, or the terms and conditions accepted by Client in electronically submitting a request for the Service, (the "**Agreement**") and no provision of this Notice shall modify the Agreement. To the extent there is a conflict between any provision of this Notice and any provision of the Agreement, the latter shall control.

Liability Limitation: ERIS's liability for the Service and this report shall be limited to the amount paid by Client for this report and as otherwise set forth in the Agreement. Although in preparing this report ERIS has endeavored to present information that is accurate, ERIS will not have any liability for any errors, omissions or inaccuracies in such information, even if ERIS sets, or Client modifies, the parameters used to conduct the search.

Reliance on Report: This report (1) applies only to the address and the date specified on the cover page of this report and (2) is not a substitute for a Phase I Environmental Site Assessment, a Vapor Encroachment Assessment or any other similar assessment. It is solely intended to be used as a database search of current environmental records maintained by third parties, and Client should not rely on this report for any purpose for which it is not intended. Client may, in Client's discretion, modify search parameters within some of the tools of the Service that may affect the results for which ERIS is not responsible.

License for Use of Report: Client is licensed to use this report solely for its intended purpose as set forth in this Notice and the Agreement. No page of this report may be used by Client without including this report's cover page, this Notice and the project property identifier.

Client Liability: Use of the Service or this report in a manner contrary to this Notice or the Agreement will be a breach of contract and an infringement of ERIS's copyright and other intellectual property rights, for which ERIS will be entitled to damages and other remedies. In addition, upon any such breach or infringement, ERIS may terminate the Agreement, Client's account with ERIS, Client's license to use any reports previously generated for Client pursuant to the Service, and Client's future use of the Service.

Warranty Disclaimer: **EXCEPT AS EXPRESSLY SET FORTH IN THE AGREEMENT, ERIS MAKES NO WARRANTY OR REPRESENTATION REGARDING THE SERVICE, THIS REPORT OR THE RESULTS OF ANY SEARCH CONDUCTED BY CLIENT USING THE SERVICE.**

Ownership: Client may not use any of ERIS's trademarks or attribute any work product to ERIS other than as expressly set forth in this Notice or the Agreement. The Service and this reports are owned by ERIS (or its licensors) and protected by copyright and other intellectual property rights. No portion of this report may be, in whole or in part, modified, reproduced or transferred to a third party by Client, without the prior written consent of ERIS.

Executive Summary

This Report was produced through the ERIS Vapor Screening Tool. The ERIS Vapor Screening Tool and this report output are designed to help those in conducting a Vapor Encroachment Screening on a Property Involved in Real Estate Transactions under the ASTM Standard Designation E2600 – 15.

The following table lists the data sources searched and any hits in the Area of Concern (AOC) that have been included in the report. The search distances listed are based on search distances used in the Database Report and the search results are grouped based on the minimum default search distances for Chemicals of Concern (COCs) and Petroleum Hydrocarbon Chemicals of Concern (PHCOCs) as outlined in E2600-15. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment.

Vapor Encroachment Details

Impact on Target Property:	VEC does not exist
Conditions:	NPCOC and PCOC
Groundwater Flow Gradient:	
Flow is based on the following:	
Preferential Pathway:	
Geological Attributes - Hydraulic Barrier:	
Geological Attributes - Physical Barrier:	Low-permeability soil
Geological Attributes - Soil Geology:	Low-permeability soil

Comments:

Professional judgment and reasonably ascertainable information related to the TP and the area within the established AOC have not identified any known or suspected Chemical Of Concern COC-contaminated sites within the established AOC. (ASTM E2600 8.5.1.2, 8.5.1.3).

Global ID: T0606500200
Status: COMPLETED - CASE CLOSED
Status Date: 1/2/1991
Case Type: LUST CLEANUP SITE
County: RIVERSIDE
Latitude: 34.0261256
Longitude: -117.5244479
Date Source: LUST Cleanup Sites from GeoTracker Search; LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download

LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

RB Case No: 083301605T
Local Case No: 90640
Begin Date: 6/22/1990
Lead Agency: RIVERSIDE COUNTY LOP
Local Agency: RIVERSIDE COUNTY LOP
CUF Case: NO
Potential COC: Gasoline
How Discovered: Tank Closure
Stop Method:
Stop Description:
Case Worker: RIV
File Location:
Potential Media of Concern: Soil
How Discovered Description:
Calwater Watershed Name: Santa Ana River - Middle Santa Ana River - Chino (Split) (801.21)
DWR GW Subbasin Name: Upper Santa Ana Valley - Chino (8-002.01)
Disadvantaged Community:
Site History:

Violations

Violation Date: 09/18/2019 ***Violation Source:*** CERS
Violation Program: HW ***Violation Division:*** Riverside County Department of Env Health
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Notes:

Returned to compliance on 07/02/2020. OBSERVATION: Observed both 55 gallon drums that were missing proper labels. CORRECTIVE ACTION: Owner/operator shall label hazardous waste containers with all the required information. Label shall include at least: the words ""hazardous waste"",

generator name and address, accumulation start date, composition and physical state of waste, and hazardous property statement. Submit photos to this department, if applicable.

Violation Description:

Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violations

Violation Date:	09/18/2019	***Violation Source:***	CERS
Violation Program:	HW	***Violation Division:***	Riverside County Department of Env Health
Citation:	40 CFR 1 265.33 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.33		
Violation Notes:			

Returned to compliance on 07/02/2020. OBSERVATION: Observed inoperable or lack of adequate fire-fighting equipment. The extinguishers are in need to recertification. CORRECTIVE ACTION: Owner/operator shall ensure fire-fighting equipment is available on site ready for use and properly certified.

Violation Description:

Failure to test and maintain as necessary all facility communications or alarm systems, fire protection equipment, spill control equipment, and decontamination equipment to assure its proper operation in time of emergency.

Violations

Violation Date:	09/18/2019	***Violation Source:***	CERS

Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)		
Violation Notes:			

Returned to compliance on 07/02/2020. OBSERVATION: Observed no/incomplete emergency response information postings. CORRECTIVE ACTION: Owner/operator shall post required information next to the phone.

Violation Description:

Failure to post the following information next to the telephone:
(A) The name and telephone number of the emergency coordinator;
(B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and
(C) The telephone number of the fire department, unless the facility has a direct alarm.

Violations

Violation Date:	09/18/2019	***Violation Source:***	CERS
Violation Program:	HW	***Violation Division:***	Riverside County Department of Env Health
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31		
Violation Notes:			

Returned to compliance on 07/02/2020. OBSERVATION: Observed spilled oil and used absorbent around machines that has not been cleaned up. CORRECTIVE ACTION: Owner/operator shall clean up areas and placed used absorbent into proper containers, and manage according to Title 22 hazardous waste regulations. Submit a statement and supporting documentation (photos) explaining how this waste was managed to this department.

Violation Description:

Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violations

Violation Date: 09/18/2019
Violation Source: CERS
Violation Program: HMRRP
Violation Division: Riverside County Department of Env Health
Citation: Un-Specified
Violation Notes:

Returned to compliance on 07/02/2020. OBSERVATION: No emergency contact posting was observed. CORRECTIVE ACTION: Owner/operator shall post emergency contact information in a conspicuous location and shall include but not be limited to all of the following: 911; local appropriate hospital name and phone number; primary facility emergency contact person's name and phone number; Riverside County Environmental Health Hazardous Materials Program name and phone number; California Office of Emergency Services name and phone number; National Response Center name and phone number; Poison Control Center name and phone number; and if applicable the name and phone number of a licensed hazardous materials cleanup contractor and location of fire extinguishers, spill control materials, and fire alarm.

Violation Description:

Business Plan Program - Administration/Documentation - General Local Ordinance

Violations

Violation Date: 09/18/2019
Violation Source: CERS
Violation Program: HW
Violation Division: Riverside County Department of Env Health
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Notes:

Returned to compliance on 07/02/2020. OBSERVATION: Observed 55 gallon drums on site that operator stated only gets picked up annually. CORRECTIVE ACTION: Owner/operator shall ensure all hazardous wastes are transported off site within 180 days of the accumulation start date. Owner/operator shall have both drums hazardous waste properly hauled off site by a registered hazardous waste transporter.

Violation Description:

Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met:
(1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms.

(2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f).

(3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Vapor Encroachment Details

Impact on Target Property: VEC does not exist
Conditions: Non-Petroleum Chemicals of Concern (NPCOC)
Groundwater Flow Gradient: Up-Gradient
Flow is based on the following:
Preferential Pathway:
Geological Attributes - Hydraulic Barrier:
Geological Attributes - Physical Barrier: Low-permeability soil
Geological Attributes - Soil Geology: Low-permeability soil
Comments:

The standard environmental record sources are reviewed and identified that there are not known or suspected sources of COC-contamination within the established area of concern (AOC). (ASTM E2600 8.3.1); Professional judgment and reasonably ascertainable information related to the TP and the area within the established AOC have not identified any known or suspected Chemical Of Concern COC-contaminated sites within the established AOC. (ASTM E2600 8.5.1.2, 8.5.1.3).

Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violations

Violation Date: 11/05/2020 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Riverside County Department of Env Health
Citation: Un-Specified
Violation Notes:

OBSERVATION: Owner/ operator failed to maintain Safety Data Sheets for all hazardous material stored on site. Specifically, the Safety Data Sheet for diesel and electrolyte/ sulfuric acid was not available on site. CORRECTIVE ACTION: Owner/operator shall have Safety Data Sheets as defined in Title 8 CCR, readily accessible or maintained on site for each hazardous material stored/handled at the facility. Email missing SDS to kestrada@rivco.org for correction.

Violation Description:

Business Plan Program - Administration/Documentation - General Local Ordinance

Violations

Violation Date: 11/05/2020 ***Violation Source:*** CERS

Violation Program: HMRRP ***Violation Division:*** Riverside County Department of Env Health

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Notes:

OBSERVATION: The chemical inventory description page submitted for petroleum gas, diesel fuel, and electrolyte/ sulfuric acid contained incorrect information. The federal hazardous classes were not completed for each material. Additionally, the maximum daily amounts for diesel fuel and electrolyte/ sulfuric acid are incorrect. The units were electrolyte/ sulfuric acid are reported in pounds when they should be reported in gallons. CORRECTIVE ACTION: Owner/operator shall update the chemical inventory page for petroleum gas, diesel fuel, and electrolyte/ sulfuric acid and submit to the statewide information management system (e.g. CERS) at http://cers.calepa.ca.gov. Please refer to a current Safety Data Sheet (SDS) for guidance. Confirm the gallonage for the diesel fuel tank and the battery electrolyte with the manufacturer specifications.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 03/16/2017 ***Violation Source:*** CERS

Violation Program: HMRRP ***Violation Division:*** Riverside County Department of Env Health

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Notes:

Returned to compliance on 05/30/2017.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 11/05/2020 ***Violation Source:*** CERS

Violation Program: HMRRP ***Violation Division:*** Riverside County Department of Env Health

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)

Violation Notes:

OBSERVATION: Site map submitted in CERS was missing the emergency shut off for gas, water, and electrical. CORRECTIVE ACTION: Owner/operator shall complete an annotated site map which includes all elements outlined in CA Health and Safety Code: north orientation, loading areas, internal roads, adjacent streets, storm and sewer drain, access and exit points, emergency shut offs, evacuation staging areas, hazardous material handling and storage areas, and emergency response equipment. Submit site map into the statewide information management system (e.g. CERS) at http://cers.calepa.ca.gov.

Violation Description:

Failure to complete and electronically submit a site map with all required content.

Violations

Violation Date: 11/05/2020 ***Violation Source:*** CERS

Violation Program: HMRRP ***Violation Division:*** Riverside County Department of Env Health

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)

Violation Notes:

OBSERVATION: No training records observed/provided during inspection. CORRECTIVE ACTION: Owner/operator shall provide training to all employees. Documentation shall be retained and be made available for inspection for a minimum period of 3 years from the date of the training. Sample training document was emailed to Maria Ortiz. Provide training to employees and submit paperwork to kestrada@rivco.org.

Violation Description:

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violations

Violation Date: 11/05/2020
Violation Source: CERS
Violation Program: HMRRP
Violation Division: Riverside County Department of Env Health
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

OBSERVATION: Owner/operator has previously submitted a business plan into the statewide information management system which had one or more sections rejected. Specifically, the facility information section and hazardous materials inventory submittal were rejected for not meeting minimum standards. CORRECTIVE ACTION: Owner/operator shall review the rejection comments attached to the previously submitted business plan, make required corrections, and resubmit corrected sections into the statewide information management system (e.g. CERS) at http://cers.calepa.ca.gov.

Violation Description:

Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violations

Violation Date: 11/05/2020
Violation Source: CERS
Violation Program: HMRRP
Violation Division: Riverside County Department of Env Health
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

OBSERVATION: The Business Activities page included in the hazardous materials business plan contained incorrect information. Specifically, the hazardous materials question is currently marked as 'NO' when it should be marked as "Yes" CORRECTIVE ACTION: Complete and submit an updated Business Activities page in the statewide information management system (e.g. CERS)at http://cers.calepa.ca.gov. Update the business activities page in CERS and resubmit.

Violation Description:

Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

PERSONNEL QUALIFICATIONS

Professional Service Industries, Inc.

TEIRA SOLIS, GIT

Staff Scientist / Project Manager
Environmental Professional

Education
PhD Student in Geological Sciences, University of Texas at El Paso (in progress)

Master of Science in Geophysics, University of Texas at El Paso, 2013

Bachelor of Science in Geological Sciences, University of Texas at El Paso, 2010

Certifications/Registrations/ Technical Training
Geologist in Training (#GIT-403)
PSI Project Manager Certification Program
PSI ASTM E 1527-13 Certification
Accredited Building Inspector for Asbestos. TDSHS No. 603537
Qualified Compliance Inspector of Storm Water Pollution Prevention Plans (Texas)
Qualified Preparer of Storm Water Pollution Prevention Plans (Texas)

Affiliations/Memberships
American Society of Testing Materials (2018)
Society of Exploration Geophysicists (2011)
American Geophysical Union (2010)
American Association of Petroleum Geologists (2006)
National Association of Geoscience Teachers (2018)

Years of experience with other firms: 3
Year started with PSI: 2016

PROFESSIONAL EXPERIENCE

Ms. Solis is a trained geophysicist and is in the process of learning and gaining experience in the environmental field. Ms. Solis's responsibilities include conducting Phase I Environmental Site Assessments for national and local clients; as well as asbestos inspections, indoor air quality monitoring, lead-based paint, and environmental noise surveys in west Texas, the Texas panhandle, New Mexico, Arizona, and selected locations in southern California. Conducts Refraction Microtremor (ReMi) geophysical surveys for soil characterization. She is currently preparing for the Professional Geologist License examination for the state of Texas.
Additionally, as Adjunct Faculty of the Geological Sciences Department at the University of Texas at El Paso, Ms. Solis teaches GIS courses to undergraduate and graduate students.

Representative Project Experience

- **HACEP Machuca Apartments:** Phase I ESA (original and update), Asbestos survey, Lead-Based Paint, Mold, Environmental Noise Survey, and HEROS Report – El Paso, TX
- **HACEP Villa Alegre Apartments:** Asbestos survey on 70 units – El Paso, TX
- **HACEP Emergence Health Network**: Asbestos survey - El Paso, TX
- **Blue Beacon Phase I ESA** – El Paso, Midland, and Odessa, TX
- **Top Golf ESA** – Tucson, AZ; Albuquerque, NM; El Paso, TX.
- **Dollar General** Phase I ESA, Asbestos, Lead-Based Paint, and Mold - Multiple locations in Texas and New Mexico
- **Sears North Plains Mall** Phase I ESA, Asbestos, Lead-Based Paint and Mold survey – Clovis, NM
- **Sealy Portfolio**: Phase I ESA Project Manager at 5 locations in El Paso, TX
- **Republic National Distributing Center Portfolio**: Phase I ESA Project Manager at 3 locations in Albuquerque, NM, El Paso, TX, and Lubbock, TX.
- **Cracker Barrel Portfolio**: Phase I ESA Project Manager at 7 locations in Arizona.
- **VA Community Based Outpatient Clinic** Phase I ESA Project Manager – Phoenix, AZ and Lubbock, TX
- **Caliber Collision** Phase I ESA – Multiple locations in Arizona, Nevada, New Mexico, and Texas.
- **Service First Auto Center** Phase I ESA – Goodyear, Litchfield, Tempe, and Queen Creek, AZ
- **El Paso International Airport Warehouse** Asbestos Survey – El Paso, TX
- **Las Cruces Country Club** Phase I ESA, Asbestos and Lead-Based Paint survey – Las Cruces, NM
- **Canutillo ISD** COVID-19 Disinfection Consultation and Sampling – El Paso, TX
- **Figure 2 Ranch Phase V Headquarters Addition** Refraction Microtremor survey – Van Horn, TX
- **El Paso Fence Replacement:** Refraction Microtremor survey – Columbus, NM
- **Carvana** Phase I ESA – Albuquerque, NM
- **Oakmont Senior Housing Portfolio:** Phase I ESA – Multiple locations in Southern California
- **UTEP Parking Garage III** Refraction Microtremor Survey – El Paso, TX
- **XTO and Jayhawk Compressor Stations:** Refraction Microtremor and Electrical Resistivity Surveys – Carlsbad, NM

intertek psi

JEFFERY P. TOWNSEND, LEP, REPA

SENIOR SPECIALIST/PRINCIPAL CONSULTANT

ORLANDO, FLORIDA

TOTAL YEARS OF EXPERIENCE: 32 / YEARS WITH INTERTEK-PSI: 32

Education

- Associate in Science, Valencia College, Orlando, Florida, 1994
- Aerospace Engineering Studies, Kansas University 1985-87

Certifications/Registrations/Technical Training

- Licensed Environmental Professional #144
- Registered Environmental Property Assessor #5999
- Environmental Professional-Phase I ESA, PSI
- Phase I & II Environmental Site Assessment Field Methods, PSI
- EPA AHERA Asbestos Inspector
- Lead Inspector
- RMD LPA-1 Certified
- OSHA 40-Hour HAZWOPER
- U.S. Housing of Urban Development (HUD) Environmental Review Procedures Training

Memberships/Affiliations

- Florida Environmental Assessors Association, Inc.
- International Society of Technical Environmental Professionals, Inc. (INSTEP)
- National Registry of Environmental Professionals

Professional Experience

Mr. Townsend has over 32 years of experience in the environmental engineering field. He is responsible for senior technical review of Phase I ESAs, employee development and quality control for those performing Phase I ESAs, and has been assigned as one of PSI's Principal Consultants for the Phase I ESA Program in Orlando, Florida and other Florida operations, conducting ESAs and surveys to include components relevant to the All Appropriate Inquiry (AAI), U.S. Housing and Urban Development (HUD), and Federal Communication Commission (FCC) National Environmental Policy Act (NEPA). He serves as the point of contact on projects to provide a fluid project for the client from beginning to end.

One of Mr. Townsend's responsibilities is interacting with clients to discuss environmental concerns and issues, as well as determining the best course of action to address concerns identified. Mr. Townsend is an EPA-certified asbestos and lead inspector and a Licensed Environmental Professional. His current responsibilities include conducting Phase I ESAs, CSERs, asbestos, lead-based paint, and indoor air quality projects. The ESAs have included both developed and undeveloped properties to include agricultural, commercial, industrial, and residential properties, and large acre tracts of land.

Representative Large-Acre Tract Project Experience

- South Florida Water Management District - Phase I ESA Project Manager and Team Leader for 187,000± acre transaction that included cultivated lands and industrial assets (citrus plant, railroad maintenance yards, and sugar mills). The Project Team included personnel from select consulting firms. Mr. Townsend was responsible for ensuring that the Project Team assigned to the project completed daily tasks, implemented quality control, discussed findings with PSI's Chief Engineer and the client. The Phase I ESA team was responsible for identifying point source locations to conduct Phase II ESA.
- Confidential Clients - Conducted Phase I ESAs on tracts of land located in surrounding Central Florida counties that included agriculturally developed land. The properties ranged in size from 5± to 30,000± acres. The site reconnaissance included traversing the property on the ground and aerial fly-overs. The areas of concerns identified included, but were not limited to, chemical storage areas, storage tanks, fleet maintenance repair areas, landfilling activities, and historical agricultural activities.
- Four Winds Hotel, Osceola County, Florida - Performed Senior Review of Phase I ESA for a Neighborhood Stabilization Program (NSP3) on a two-story 52-unit hotel structure in Kissimmee, Florida.
- Donald W. McIntosh - Conducted Phase I ESA on a 4,100± acre tract of land in Orange County, Florida utilized for citrus production, shooting ranges, and cattle grazing. Areas of concern identified chemical mixing/storage areas, maintenance repair facilities, and the shooting ranges and associated ponds.
- Florida Crushed Stone - Performed Phase I ESAs for industrial properties involved in mining operations and concrete manufacturing in Florida. The sites ranged in size from 900 to 1,500 acres. Involved in identifying conditions requiring additional investigation.
- McLin and Burnsed, Florida - Performed Phase I ESAs in Lake, Sumter, and Marion Counties, Florida on properties ranging in size up to 4,000± acres of agriculturally developed land. Concerns identified included cattle dipping vats, former underground storage tanks, and equipment maintenance areas. Determined further investigation was necessary and assisted in Phase II ESA effort.
- Maury L. Carter & Associates, Inc. - Performed Phase I ESA on 400 acre tract in Orange County, Florida. Traversed the land on the ground to identify potential areas of concern. Areas of concern included agricultural activities.

Representative Phase I/II Environmental Site Assessment Projects

- The City of Orlando (City) hired PSI in September 2013 to perform a Phase I ESA for two city blocks in downtown Orlando. PSI performed Phase II ESA and Supplemental Site Assessment (SSA) activities in 2014. The remedial activities were initiated in February 2015 and extended into May 2015. PSI assisted the City with paperwork to receive Brownfields Reimbursement of Remediation costs. PSI continues to work with the project team to complete the assessment activities for the areas of soil and groundwater impacts located outside of the stadium project site. Mr. Townsend provided assessment and senior technical review.
- South of Downtown Orlando (SoDo) Redevelopment Project, Orlando, Florida - Performed Phase I ESA for a proposed mixed use development encompassing a city block. Identified on-site and off-site concerns to include auto maintenance, dry cleaning facilities, paint mixing facilities, petroleum spillage, and former UST/AST locations.

- American Portable Telecom; Orlando, Florida - Performed Phase I ESAs on multiple proposed communication tower sites in Central Florida.
- Orange County Public Schools; Orlando, Florida - Involved in conducting Phase I ESAs on numerous properties throughout Orange County for proposed school facilities. Conducted Phase I ESA on a proposed bus facility for the school district that was identified during the Phase I ESA to have been historically used as a disposal site for construction and demolition debris and used dry cell batteries.
- Orlando Regional Healthcare; Orlando, Florida - Involved in conducting Phase I ESAs on numerous properties throughout Orange County for healthcare facilities. Conducted Phase I ESA on a facility for that was identified during the Phase I ESA to have been historically contaminated with solvents.
- Prudential Real Estate Investments, Florida - Involved in conducting Phase I ESAs on numerous properties throughout Florida. Conducted Phase I ESA on site that was a portion of the former Orlando Naval Training Center facility. Site was identified during the Phase I ESA to have been historically impacted with solvents.
- University of Central Florida (UCF) - Worked with UCF and The UCF Research Foundation on various due diligence projects including the UCF College of Medicine, Bennett Research Park (a research and technology center housing UCF's business incubator program), and the UCF Photovoltaic Manufacturing Consortium (PVMC) Center formerly known as Building 54 of the former Harris Corporation and current Intersil Site, both semiconductor manufacturing operations. This building was used for semiconductor wafer manufacturing operations and consists of more than 100,000 square feet of office space, manufacturing and cleanroom facilities, and five acres of land and is located within an approximate 310-acre area that has been investigated and assessed by the U.S. Environmental Protection Agency (EPA). Remedial activities have included extraction and treatment of impacted groundwater, and based on the decreased contaminant concentrations, the Site is currently under natural attenuation. The EPA has issued a Ready for Reuse Determination concluding that the site may be used for commercial and industrial land uses. Based on the assessment activities, Building 54 was identified not to be a source of the known impact.

Representative HUD, NEPA, and Environmental Review (ER) Project Experience

- Ivanhoe Place Propco LLC - Performed FCC NEPA work including Section 106 and tribal submissions for cell tower relocation that achieved State Historic Preservation Office (SHPO) and Tribal Historic Preservation Office (THPO) concurrence.
- Conducted a NEPA review on a proposed cellular tower site situated at latitude/longitude N 28 30 03.60 / W 81 36 25.40 World Geodetic System 1984 (WGS84), according to the 8-point NEPA Land Use Screening Checklist. Review of the NEPA Checklist for the 8 items found that based on information provided, the scope of work and sources documented, the NEPA Review determined that the preparation and filing of an Environmental Assessment (EA) will not be required.
- Conducted a NEPA Review pursuant to 47 CFR 1.1301-1.1319, as amended. The Site was located at latitude and longitude N 28 43 32.69 / W 81 33 45.04 World Geodetic System 1984 (WGS84) and consisted of vegetated, undeveloped land.
- Florida Housing Finance Corporation (FHFC), Various Locations, Florida - Perform ERs for projects that are seeking HUD funding. PSI has held the contract to perform the ERs for FHFC to the past decade.

- City of Sanford, Sanford, Florida - Performed ERs under Community Development Block Grants (CDBG) and Neighborhood Stabilization Program (NSP2 and NSP3) for individual properties, Hopper Academy, Redding Gardens, and the historic Goldsboro and Georgetown neighborhoods. The property areas included 4.73±, 220±, 540±, and 635± acres in size.
- Florida S.P.E.C.S, Kissimmee, Florida - Performed and reviewed ERs under NSP2 for individual properties.
- First Housing Development Corporation, Orlando, Florida - Performed Phase I ESAs and senior technical review, which included HUD NEPA components.

Representative Educational Facility Project Experience

- Orange County Public Schools (OCPS) - OCPS contracted PSI to perform due diligence services to include Phase I and II ESAs for a planned school development in Orlando. Due to the confidential nature of the project and the number of property owners, OCPS requested that PSI prepare separate Phase I and II ESA reports for each individually owned property. The project involved a significant amount of planning and coordination with numerous parties in order to perform the due diligence services in a timely manner within OCPS' budget, while accommodating schedules of the various owners and tenants of the properties. Mr. Townsend provided oversight, field management, and senior technical review.
- Seminole County Public Schools - Managed and conducted Phase I ESAs for over 20 properties from 1993 to 2005. The properties have included proposed school sites and the administration building and established school properties. Involved with the senior technical review of the Phase I ESA reports and identifying sites requiring additional investigation and communicating findings of Phase I ESAs to the School Board of Seminole County.
- Osceola County Public Schools - Managed and conducted Phase I ESAs for proposed school sites within Osceola County, Florida. Properties have included former convention centers, residential properties, and agricultural land to undeveloped, raw land. Communicate findings to the School Board and discuss sites requiring additional investigation.
- Seminole State College - Managed and conducted Phase I ESAs for properties surrounding the Seminole County, Florida campus for due diligence during real estate transactions. Involved with the senior technical review of reports and communicating findings to the clients.
