CERTIFICATION

PSI, an Intertek company, has completed a Phase I ESA of property ID br40346 located at 3401 Etiwanda Avenue, Buildings 711-931 in Jurupa Valley, California ("the subject property"). PSI performed the Phase I ESA in accordance with ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the Practice). The assessment was completed at the request of Link Logistics Real Estate ("the client") in accordance with the scope of work outlined in PSI's Proposal Number 315-251172RO, which was authorized by the client on March 24, 2021.

The conclusions developed herein represent our professional judgment based on information and data available to us at the time of the assessment, and observations made at the time of our site reconnaissance. In accordance with ASTM E1527-13 § 4.6, the report is valid for a period of 180 days from the time of issuance.

Environmental Professional Certification

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 EXECUTIVE SUMMARY

PSI, an Intertek company, performed a Phase I ESA of property ID br40346 located at 3401 Etiwanda Avenue, Buildings 711-931, in Jurupa Valley, California, 91752. PSI performed the assessment to comply with the contract between Link Logistics Real Estate (the client) and PSI.

Our assessment included a Phase I ESA, and evaluation of certain business environmental risks that are beyond the scope of ASTM E1527, as follows: visual asbestos survey, visual lead based paint survey, radon, lead in drinking water, and historical oil and gas wells evaluation.

This Phase I ESA was performed in accordance with ASTM E1527-13 Standard Practice for Environmental Assessment: The Phase I Environmental Site Assessment Process and Citi's Third Party Report Scope of Work dated June 2020.

1.1 FINDINGS

A summary of findings is provided below. The report should be read in its entirety to obtain a more complete understanding of the information provided and to aid in any decisions made or actions taken based on this information.

1.1.1 SITE DESCRIPTION AND CURRENT USE

The subject property consists of a 105± acre parcel located at 3401 Etiwanda Avenue in Jurupa Valley, California. The subject property buildings were constructed in 1942. The property is developed with nine industrial buildings/warehouses. Onsite operations consist of packaging supplies, carboard products, empty containers, refrigeration units, carboard boxes, clothing, wood and lumber, roller derby skates, colored roofing granules, electronic products and general merchandise warehouse and distribution; fabric spools, luggage and laminated countertop manufacturing; steel an aluminum forming; and plastic and Styrofoam recycling activities. In addition to the current structures, the subject property is also improved with trailer parking, railroad tracks, asphalt-paved parking areas and associated landscaping.

The subject property is currently occupied by: Material Supply [711 A-C]; Olivet [711D]; California Packaging [721 A-D]; Rhino Container [731 A-C]; Gileno Distribution [731D]; Utopia [811A]; Airtech [811 B East]; GIS Consulting [811 B1-East; Rajah, Inc [811 B2 West]; Syed Aziz [811 B3]; Best Delivery [811 C East]; O'Neil Tube & Reel [811 C West]; Triways, Inc [811 D]; Gileno Dist. [821 A1 East]; Freight Co. [821 A2 East]; Curvetech, LLC [821 B East]; Active Apparel [821 B West]; Bridge Trading Corp. [821 C]; California Packaging [821 D]; Utopia [831A]; Contract Labeling [831B]; Closeout Center [831C]; TCS (Smart Drayage)[831D]; Surplus Asset Management [911A East]; Best Delivery [911A West]; Material Supply [911 BCD]; Olivet/Ecothech [921 AB]; Decotone Surfaces [921 C]; Olivet [921 C West]; Met Corp [921D]; G L Veneer [931A]; TCS (Smart Drayage) [931B East]; Cornerstone [931B West]; J.H. Recycling [931C West]; Smart Drayage [931C West]; JB Hudco [931D]; Gileno (Adams Nevada) [Land]; Roadrunner Dawes [Land]; Manheim [Land]; and Propak [Land].

1.1.2 ADJOINING PROPERTY DESCRIPTION AND USE

The adjoining property uses are detailed in the table below.

Direction	Description of Adjoining Property Use
North	Trailer Parking lot, Home Depot Distribution Center and K-Swiss Distribution Center Manitou Ct, and American West and Hanes Industries
East	Space Center Ct followed by IVC, Hopkins Street, and Olivet.
South	Concrete channel, Interline Brands, Triways and Gebruden Weiss followed by Iberia Street.
West	Concrete channel, Union Pacific Railroad followed by Day Creek Reservoir.

1.1.3 HISTORICAL USE OF SITE AND SURROUNDING AREA

According to available historical sources, the subject property was formerly undeveloped as early as 1897; and developed with the current structures in 1942. Tenants on the subject property have included Mira Loma Quartermaster Depot (1942-1966) and various commercial tenants (1975-Present).

To the north, the property was part of a military reservation. Stacks of material were observed between 1952 and 1973. After 1948, the property was observed developed with present day building to the northeast. Cargo boxes were observed parked on the north and northwest adjoining properties. After 2002, the property was observed developed with present day building to the northwest. After 2012, the building was observed with an addition on the east end.

To the east, the land appeared vacant or used for agriculture until at least 1938. After 1948, the land appeared developed with curved railroad tracks. Stacks of material were noted on and off until 1985. After 1994, the tracks appeared to not be in use. After 2002, the land was developed with present day industrial buildings and roads.

To the south, the property appeared as undeveloped land until at least 1938. Between 1948 and 1994, the property appeared to consist of graded land with development occurring along the northern portion. The topographic maps indicated that the land was considered to be a U.S. Military Installation. After 2002, the land was developed with present day industrial buildings and roads.

To the west, the land appeared vacant or used for agriculture until at least 1938. Between 1948 and 1973, the land was developed with railroad spurs followed by what appeared to be a quarry. The area was observed as leveled land between 1977 and 1985. After 1994, the area of the former quarry was observed flooded with present day Day Creek.

1.1.4 GOVERNMENTAL RECORDS REVIEW

PSI subcontracted with ERIS to provide a review of governmental database records for spill sites, tanks, hazardous waste handlers, and other facilities of potential concern within proximity to the subject property.

The subject property was identified in the database search and those listings were evaluated by PSI during this assessment.

One or more off-site facility listings were identified in the database search within the appropriate AMSD and were evaluated by PSI during this assessment.

These listings are discussed in Section 7.1 of this report and the regulatory radius map report is appended.

1.1.5 SIGNIFICANT DATA GAPS

The ASTM E1527 Standard Practice defines a significant data gap as a lack of or inability to obtain information required by the practice that would limit our ability to draw conclusions with regard to RECs in connection with the subject property. Based on our experience, the information that we gathered and evaluated did not present significant data gaps that affected our ability to identify RECs in connection with the subject property.

1.2 CONCLUSIONS

PSI performed a Phase I ESA of the subject property in accordance with the scope and limitations of ASTM Practice E 1527-13. Any exceptions to or deletions from this practice are described in Section 2.3 of this report. The following conclusions have been made with regard to evidence of RECs, HRECs, CRECs, VECs, and de minimis conditions on the subject property, as defined in ASTM E 1527-13.

1.2.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

This assessment has revealed no evidence of RECs in connection with the subject property.

1.2.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527 Standard Practice defines a CREC as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of a regulatory agency with chemicals of concern allowed to remain in place subject to the implementation of institutional and/or engineering controls to prevent future exposure. In some cases, certain uses or activities (e.g., residential use) may be limited or prohibited on the property. By definition, the ASTM E1527 Standard Practice considers a CREC to also represent an REC, since residual chemicals may remain present in the subsurface.

This assessment has revealed no evidence of CRECs in connection with the subject property.

1.2.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

The ASTM E1527 Standard Practice defines an HREC as a past release of hazardous substances or petroleum products that has impacted the property, but the release has been addressed to the satisfaction of a regulatory agency or meets unrestricted use criteria established by the regulatory agency without the need for institutional or engineering controls.

This assessment has revealed no evidence of HRECs in connection with the subject property.

1.2.4 VAPOR ENCROACHMENT CONDITIONS

The ASTM E1527 Standard Practice requires that the environmental professional evaluate the potential for VECs on the subject property. A VEC is defined in ASTM E2600 as the presence or likely presence of volatile chemicals in the subsurface that are caused by the release of vapors from contaminated soil or groundwater either on or near the subject property.

This assessment has revealed no VECs in connection with the subject property.

1.2.5 DE MINIMIS CONDITIONS

A de minimis condition is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. PSI identified the following issues in connection with the subject property, which were considered to be de minimis in nature, but not considered to be a REC in connection with the subject property:

- Building 731: Oil and diesel fluid staining underneath containers and around metal drums with used oil filters.
- Building 811: Oil staining underneath packaging equipment.
- Building 821: Oil staining around air compressors and used oil containers.
- Building 931: Oil staining around air compressor and used oil containers outside building. Adhesive staining on floor near ICB tote used for used adhesive collection.

1.3 NON-SCOPE CONSIDERATIONS - OTHER BUSINESS ENVIRONMENTAL RISKS

PSI conducted additional assessment to address potential environmental concerns, also known as business environmental risks or BERs, which are beyond the scope of the ASTM E1527 Standard Practice. The results of these additional investigations are described below.

1.3.1 VISUAL ASBESTOS SURVEY

Asbestos-Containing Materials (ACM) have been used extensively in buildings since the turn of the 20th century, and many buildings contain some quantity of ACM. As the adverse health effects of exposure to asbestos became known, the use and installation of many types of ACM in buildings was progressively phased out. By 1979 the EPA had banned the use of spray and troweled-on asbestos materials in building construction. In 1989, the EPA attempted to ban asbestos in all building products, however, this ban was subsequently overturned. Although this EPA ban in all products was overturned, the use of asbestos in building products saw a dramatically declined after 1989.

In addition to EPA policies related to building products, the U.S. Occupational Safety and Health Administration (OSHA) published regulations regarding the protection of workers from exposure to airborne asbestos. OSHA established the date of 1981, where surfacing materials and thermal insulation systems (TSI) must be "*Presumed*" ACM (PACM). In addition, all vinyl flooring systems installed prior to 1981 are "*designated*" as ACM by regulation. Because of the costs associated with the control, removal and disposal of certain types of ACM, it can have a significant impact on the value of a property.

The scope of work included observation of accessible areas of the building to identify suspect ACM could represent a possible "*Business Environmental Risk*" (BER) for the property. The observations were performed for due diligence purposes and were not intended to satisfy regulatory requirements for site demolition or renovation. Our scope of work also did not include sampling or destructive/invasive methods to observe materials that were not readily observable, such as beneath carpet, inside wall cavities, beneath/behind equipment, etc.

During the site reconnaissance, PSI observed the following suspect building materials:

- Floor tile and mastic
- Baseboard and mastic
- Ceiling tiles
- Pipe insulation
- Drywall systems

The observed suspect ACM materials appeared to be in [good][1] condition and no removal or corrective actions are recommended. As the building was constructed prior to 1981, all surfacing materials and TSI is considered PACM and all vinyl flooring finishes *designated* as ACM per OSHA regulations. In addition, PSI recommends that an asbestos Operations and Maintenance (O&M) Plan be developed for the site until such time that all suspect ACM can be properly characterized. If site renovations or demolition are planned, PSI recommends that all impacted suspect building materials be properly sampled and analyzed for possible asbestos content.

Footnote [1] *– Assumed that the materials in these optional paragraphs were in good condition with no recommended removal or corrective actions. If we have poor conditions, we will need to modify the paragraph to discuss the condition and determine if we are going to recommend removal, corrective actions or further investigation.*

1.3.2 VISUAL LEAD-BASED PAINT SURVEY

Use of lead-based paint was widespread until the 1950s, when it became evident that exposure to lead represented a health hazard, especially to children. Decreased usage of lead-based paint continued until 1978, when the manufacture and use of lead-based paints was banned for residential applications. Leaded paint and coating products continue to be produced and utilized for certain exempt applications, and there are cases where exempted paints have been used in residences constructed after the 1978 ban. Because leaded paint abatement procedures are expensive, the presence of lead-based paint may be a BER in association with a property.

PSI conducted a reconnaissance of the interior and exterior on the subject property building(s) to evaluate the condition of painted surfaces. It should be noted that lead-based paint cannot be visually detected, and sampling and laboratory analysis would typically be required to determine the lead content of any painted surfaces. Therefore, PSI evaluated the condition of painted surfaces and noted any surfaces that were in poor condition, which might lead to unacceptable airborne concentrations of lead inside the building.

Based on the age of construction of the building (pre-1978) it is possible that lead-based paint could be present. However, PSI noted the painted surfaces to be generally in good condition, with only minor evidence of flaking or peeling of paint. Sanding or disturbance of painted surfaces should be avoided to minimize the potential for airborne lead dust, unless sampling indicates that lead is not present.

1.3.3 RADON RECORDS REVIEW

Radon is a colorless, odor-less gas that results from the decay of naturally occurring radioactive minerals in the subsurface. Radon may enter buildings through foundation cracks, utility openings, etc. and may accumulate in the indoor air space. Radon is measured in pCi/L of air. The USEPA has developed a recommended action level for radon levels in residential buildings of 4 pCi/L, but has not developed any recommendations for commercial structures. Generally, radon levels within slab-on-grade industrial and commercial structures would be expected to be lower than that found in single-family homes in the same location.

It should be noted that our work did not include sampling for radon in the building(s). While the review of the MDH radon information provides an estimate of the potential for radon in the area, radon levels may vary on a structure by structure basis due to underlying geology and building construction characteristics.

Based on the records reviewed, the site is located in USEPA Zone 2 and is non-residential. Therefore, radon is not considered to represent a significant concern.

1.3.4 LEAD IN DRINKING WATER RECORDS REVIEW

Lead in drinking water is regulated by the U.S. EPA under 40 Code of Federal Regulation (CFR) Part 141 Subpart I. The regulation applies to community systems and non-transient, non-community water systems. The EPA has established an action level of 15 ug/L or ppb for lead in drinking water.

Potable water at the subject property is provided by Jurupa Community Services District. According to Jurupa Community Services District, the public water supply meets Federal guidelines for consumption. A copy of the most recent published Consumer Confidence Report or Water Quality Report is appended.

1.3.5 HISTORICAL OIL AND GAS WELLS RECORDS REVIEW

PSI reviewed readily-available maps showing locations of historical oil and gas wells in the vicinity of the subject property. No gas and oil production was historically performed in the geographical area of the subject property.

1.4 RECOMMENDATIONS

PSI recommends no further assessment at this time.

Development of an Operations & Maintenance Program that meets current EPA and OSHA regulations, under which the identified suspect ACM may be monitored and controlled.

2.0 PHASE I ESA SCOPE AND METHODOLOGY

2.1 PURPOSE OF SERVICES

PSI performed the Phase I ESA in conformance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the Practice). The purpose of the Practice was to define good commercial practice for conducting a Phase I ESA and as such, the Practice is intended to permit the user to satisfy one of the requirements to qualify for the LLPs. The goal of the processes established by the Practice is to identify RECs in connection with the property.

Based on the information provided, PSI understands that your purpose for having the Phase I ESA performed is to satisfy one of the LLPs.

This Phase I ESA was also performed in accordance Citi's Third-Party Report Scope of Work dated June 2020.

2.2 PHASE I ESA METHODOLOGY

PSI performed a Phase I ESA of the subject property. The scope of our services and general methodology is presented below.

The information sources that PSI used, including published material, material obtained from commercial and other sources, is listed below and cited as it is presented in the report. The information or excerpts thereof is appended.

This assessment included four components:

- Records review;
- Reconnaissance;
- Interviews; and,
- Preparation of this report, including our evaluation.

In addition to the ASTM E1527-13 standard and in accordance with the client's scope of work, the following non-scope items were included within the Phase I ESA:

- Visual Asbestos Survey
- Visual Lead Based Paint Survey
- Radon Records Review
- Lead in Drinking Water Records Review
- Historical Oil and Gas Wells Records Review

2.3 LIMITATIONS, EXCEPTIONS, DEVIATIONS AND DATA GAP

PSI considers that limitations, exceptions, and deviations from the Practice manifest as a lack of or inability to obtain information required by the Practice. This represents the definition of the 'data gap' contained in the Practice. PSI listed the component objectives of the Practice on the appended Data Gap Worksheet and tracked the information obtained against the objectives. Therefore the limitations, exceptions and deviations are identified in the Worksheet.

In general, when required information was incomplete, not provided, otherwise not obtained, or indicated a need for additional information, PSI attempted to use information from other sources to meet the Practices' performance objectives. When the data gaps affected the Environmental Professional's ability to identify RECs, PSI considered the data gap(s) to be significant. PSI identified significant data gaps (if any) on the Data Gap Worksheet and reported them in Section 1.1.5.

2.4 SIGNIFICANT ASSUMPTIONS

PSI made the following assumptions in developing our Phase I ESA findings and conclusions:

- Regulatory Agency Information - PSI considers all information provided by our environmental database subcontractor regarding regulatory status of facilities to be complete, accurate, and current.
- Other Regulatory Information - PSI considers all information obtained from regulatory or enforcement agencies to be complete, accurate, and current.
- Title, Lien and AUL Information - PSI considers all information provided by real estate title record review firms regarding property use or ownership, encumbrances or other limitations, if provided, to be complete, accurate and current.
- Interviews - PSI considers all information provided through interviews to be complete, unbiased and provided in good faith.
- Groundwater - PSI interpreted and inferred the direction of the shallow groundwater movement based on the information we obtained and our experience. Actual groundwater flow may be locally influenced by many factors beyond the scope of this assessment. Subsurface investigation would be necessary to determine site-specific groundwater flow direction.

3.0 USER-PROVIDED INFORMATION

PSI considers the client to be the 'User' of our assessment, defined in ASTM Practice E 1527 as "the party seeking to use ASTM E 1527 to complete a Phase I ESA of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager. The User has specific obligations for completing a successful application of this practice...."

3.1 USER QUESTIONNAIRE

The EPA All Appropriate Inquiry Rule (40 CFR Part 312) and ASTM E1527 Section 6 require the User to answer certain questions related to the property, in order to obtain certain LLPs from CERCLA liability. To facilitate this process, PSI provided the client with a User Questionnaire, which is provided in the Appendix if it has been returned. A summary of the required questions and client responses is provided below:

Question	Yes	No	Unknown	N/A	Client did not respond
Did a review of recorded land title records or other sources identify any environmental liens filed or recorded against the subject property under federal, tribal, state or local law?			✔		
Did a review of land title records or other sources identify any activity use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place on the subject property?			✔		
Do you have specialized knowledge or experience related to the subject property or nearby properties?		✔			
Does the purchase price being paid for the property reasonably reflect the fair market value of the property?				✔	
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?				✔	
Are you aware of commonly known or reasonable ascertainable information about the property that would help the environmental professional to identify conditions indicative of a releases or threatened releases?					

Question	Yes	No	Unknown	N/A	Client did not respond
Do you know of the past uses of the property?	✔				
Do you know of specific chemicals that are present or were once present at the property?	✔				
Do you know of spills or other chemical releases that have taken place at the property?		✔			
Do you know of any environmental cleanups that have taken place at the property?		✔			
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?		✔			
Do you know of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?		✔			
Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	✔				

NOTES

The client returned PSI's questionnaire indicating 'UNKNOWN' to the questions: "Did a review of land title records (or judicial records where appropriate) identify any environmental cleanup liens filed or recorded against the subject property under federal, tribal, state or local law?" or "Did a review of land title records (or judicial records where appropriate) identify any activity and land use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the subject property and/or have been filed or recorded in a registry under federal, tribal, state, or local law?" This is a limitation that is evaluated on the appended Data Gap Worksheet. The completed questionnaire is appended.

3.2 TITLE RECORDS

PSI was not provided with land title records by the client in order to obtain information about the current and past owners of the subject property and past uses and tenancies. However, given the availability of other historic resources, we do not consider this limitation to represent a significant data gap.

Based on a review of the local tax assessor's records, the subject property is currently owned by BRE Space Mira Loma. The property was transferred from the previous owner to the current owner in 2019.

3.3 SUGGESTED INFORMATION

The client provided PSI with the following suggested information described by the Practice.

- The reason for performing the Phase I ESA.
- The type of property and type of property transaction.
- The complete and correct address of the property.

- Identification of the key site contact and contact information.

3.4 HELPFUL DOCUMENTS

The Practice requires that the environmental professional ask the property owner, the key site manager (if any is identified), and the User for certain helpful documents about the property and certain legal proceedings involving hazardous substances and the subject property. PSI mailed or e-mailed questions or performed interviews requesting this information. The responses documenting the persons we corresponded with, and relevant information obtained, are appended where practical.

Provided reports are appended.

Report Title:	Phase I Environmental Site Assessment
Prepared For:	Space Center, Inc.
Prepared By:	Partner Engineering and Science, Inc.
Report Date:	November 20, 2018

Summary:	Partner performed a Phase I Environmental Site Assessment on the building located at 3401 Etiwanda Avenue, Building 1011 in the City of Jurupa Valley, Riverside County, California (the “subject property”). The assessment revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommended no further investigation of the subject property.

Report Title:	Phase I Environmental Site Assessment
Prepared For:	Space Center, Inc.
Prepared By:	GEOCON
Report Date:	November 20, 2018
Summary:	GEOCON performed a Phase I Environmental Site Assessment on the building located at 3401 Etiwanda Avenue, Building 1011 in the City of Jurupa Valley, Riverside County, California (the “subject property”). The assessment revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. The former landfill identified on the western portion of the Site, was occupied by a trailer parking area, and was considered to represent a potential environmental concern that should be addressed prior to future redevelopment of that portion of the Site. No further environmental assessment of the Site appeared to be warranted at the time.

4.0 PHYSICAL SETTING

PSI reviewed a USGS topographic (topo) map, information from the USDA and/or Natural Resources Conservation Service (NRCS) and/or other information regarding the physical setting of the subject property to assist with the interpretation of subsurface water movement near the subject property. Physical setting information is summarized in the table below.

Summary of Physical Setting Information

Physical Setting Attributes	Description	Source
Subject property elevation:	Approximately 820-feet AMSL	USGS Topo Map sheets "Corona North, CA", "Fontana, CA", "Guasti, CA", "Ontario, CA", "Prado Dam, CA", and "Riverside West, CA" 7.5 minute Quadrangle, 2015
Topographic gradient:	The subject property and surrounding area slopes to the south direction.	ERIS Physical Setting Report
Closest surface water:	Day Creek, located approximately560 feet to the east.	ERIS Physical Setting Report
Other resource or physical characteristics mapped on the subject property?	No	ERIS Physical Setting Report
Is a flood plain mapped on the subject property?	No	ERIS Physical Setting Report
Predominant soil type(s) mapped on the subject property:	Delhi loamy fine sand. A Class A soil with low runoff potential when thoroughly wet. Water is transmitted freely through the soil.	ERIS Physical Setting Report

Physical Setting Attributes	Description	Source
Geology/Hydrogeology:	The soils on the surface are a result of deeply weathered crystalline bedrock and consolidated sediments in low relief areas. A basement complex of volcanic, meta-sediments, and igneous rocks, underlies the alluvium and soils in the Chino Basin. Intrusive granitic rocks compose most of the basement complex and were deposited in the Cretaceous period. The basement complex has been the major source of material for the water bearing soils in the Chino Basin.	ERIS Physical Setting Report
Estimated depth to first groundwater:	Approximately 258 feet bgs, as of 09/01/2020	ERIS Physical Setting Report
Anticipated regional groundwater flow direction:	Groundwater is expected to flow in the same general direction as the local topography	ERIS Physical Setting Report
Oil and Gas Resources:	None mapped on or adjacent to the subject property	ERIS Physical Setting Report
Mining Resources:	None mapped on or adjacent to the subject property	ERIS Physical Setting Report

5.0 SITE RECONNAISSANCE

The location and approximate boundaries of the subject property are illustrated on the appended figures. The legal description of the subject property, if provided to PSI, is appended.

The client arranged for PSI to access the subject property. Our assessor was escorted by Ms. Heather Schultz, property manager of Link Logistics Real Estate and Mr. Daniel Haro, maintenance worker of the Space Center Mira Loma during the site reconnaissance.

The ground reconnaissance consisted of observing the periphery of the subject property and viewing the subject property from accessible adjoining public access areas. Visual reconnaissance of adjoining properties was limited to areas and facilities that were readily observable from the subject property or from public access areas. PSI also systematically toured the interior portions of the subject property parcels to provide an overlapping field of view.

The peripheries of surface features and/or structures, where present on the subject property, were observed along with accessible interior common areas. PSI photo-documented selected features. The photo log is included in the Appendix.

EMERGENCY GENERATORS

PSI observed emergency generators located in buildings 711, 721, 821, and 911. These emergency generators appeared to be diesel-fueled as well as electric. Typically, tanks associated with emergency generators are equipped with integrated secondary containment systems. PSI did not observe evidence of leaking or staining

around the base of the generator at the time of the site reconnaissance. Based on this information, the presence of the emergency generator is not considered to be evidence of a REC in connection with the subject property.

AIR COMPRESSORS

PSI observed air compressors located in buildings 721, 821, 911, 921, and 931. The air compressors were placed on secondary containment and other smaller compressors observed were portable. PSI also observed containers with compressor oil in the vicinity of the compressors in building 821, which was observed to be in good condition with no evidence of leakage. The area around the static compressors was slightly stained with oil. However, the leakage appears to be confined to the floor and appears to be de minimis in nature. Therefore, the oil leakage from the air compressor is not considered evidence of a REC in connection with the subject property.

TRANSFORMERS OR OTHER ELECTRICAL OR MECHANICAL EQUIPMENT THAT COULD CONTAIN PCBS

Seventeen pole-mounted and two pad-mounted electrical transformers and electrical switchgear were observed on the subject property. The pole-mounted transformers are distributed on the periphery and streets of the subject property. One pad-mounted transformer and electric switchgear was located to the east of Building 921 and one pad-mounted transformer was located to the south of the Building 931 along 9th Street. PSI did not observe non-PCB labeling on the transformers and switchgear at the time of the site reconnaissance. PSI believes the electrical equipment is the property and responsibility of Southern California Edison, the local electrical utility company, who would be responsible for cleanup related to the equipment that could not be attributed to tenant negligence. The identified electrical equipment appeared to be in good condition, with no apparent evidence of staining, leakage, or corrosion noted. Based on their observed condition and the local utility ownership, the observed transformers and switchgear are not considered to be evidence of a REC in connection with the subject property.

PSI identified a pad-mounted transformer located in Buildng 811 on the subject property. Information attached to the transformer housing classified it as a dry-type model, not known to contain insulating or dielectric fluids potentially containing PCBs. Based on this information, presence of the transformer is not considered to be evidence of a REC in connection with the subject property.

PSI observed a trash compactor west of Building 921 on the subject property. PSI did not observe evidence of leaking or staining in connection with the hydraulic features of the compactor at the time of the site reconnaissance. Based on these observations, the presence of the trash compactor is not considered to be evidence of a REC in connection with the subject property.

USE, STORAGE, OR DISPOSAL OF HAZARDOUS SUBSTANCES

Small quantities of cleaning products were observed in buildings 711, 721, 821, 831, 911, and 921. These cleaning products appeared to be stored properly, in containers of five gallons or less in size, and no leaks or stains were observed around them. Based on this information, these cleaning products are not considered evidence of a REC in connection with the subject property.

Flame resistant cabinets were observed in buildings 821, 911, and 931. The cabinets appeared to contain a combination of acrylic and latex paints, spray paint cans, and other maintenance materials. small amounts of leaking or staining was observed on the containers, but not in the vicinity of the flame resistant cabinets. Additionally, no drain inlets were observed in the area. Based on this information, the presence of the flammables cabinet is not considered to be evidence of a REC in connection with the subject property.

Containers of latex paints were observed in buildings 7112 and 921. Some staining was observed on the containers, but no staining was observed in the storage area at the time of the site reconnaissance. Based on this information, the presence of these paints is not considered to be evidence of a REC in connection with the subject property.

Numerous used automotive batteries were observed at the subject property, mainly in the warehouse area of building 731. The batteries appeared to be in good condition with no observed staining or corrosion noted. Based on the observations made at the time of site reconnaissance, the storage of these batteries is not considered to be evidence of a REC in connection with the subject property.

USE, STORAGE, OR DISPOSAL OF PETROLEUM PRODUCTS

PSI observed motor oil, Diesel fluid, gear oil, and hydraulic oil stored in various size containers ranging from a quart to 55-gallon drums in buildings 731, 811, 821, 831, 921, and 931. These storage containers appeared to be in good condition with no significant staining or corrosion. The drums were generally placed inside secondary containment trays. Some staining in the vicinity of the drums and secondary containment trays was observed. Based on the observations made at the time of site reconnaissance, the storage and use of these petroleum products does not appear to be evidence of a REC in connection with the subject property.

PSI observed multiple propane tanks in buildings 711, 731, 811, 821, 831, 911, and 931. These tanks are used at the subject property for the forklifts. These tanks appeared to be in good condition and no leaks or spills were observed. These tanks were stored in a caged storage unit outside of the building on the subject property. Based on this information, these propane tanks are not considered evidence of a REC in connection with the subject property.

ASTS/USTS

PSI observed abandoned ASTs in buildings 831 and 921 these ASTs are not considered to be evidence of a REC in connection with the subject property.

PSI observed propane ASTs on the subject property. The cylinder were situated on concrete and appeared to be in good condition. Due to the extremely low boiling point of propane, leaks or spills from the cylinders are not expected to result in contamination of soil or groundwater. Based on the condition of the cylinder at the time of site reconnaissance, which were reported to be out of service, these propane ASTs are not considered to represent evidence of a REC in connection to the subject property.

DRUMS OR OTHER BULK CHEMICAL CONTAINERS

PSI observed various size containers of adhesives in building 931. The containers were placed inside secondary containment trays and were generally observed in good condition with small amounts of staining. Based on the lack of staining and the observed containment, PSI does not consider the presence of the drum to be evidence of a REC in connection with the subject property.

DRAINS OR SUMPS

Storm water runoff is collected by storm drains at the exterior of the building and is discharged into the municipal water management system directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

RAILROAD SPUR/TRACKS

PSI observed railroad spurs between all buildings used to deliver materials for the manufacturing of the various products identified at the subject property. Since the materials being delivered are inert, the concern for spillage or chemical transfer is low. There is some evidence of oil and grease staining of the railroad ballast along the spur, which is likely associated with locomotive idling, wheel bearing grease leakage, etc., while loading occurs. However, the staining appears de minimis and is not likely to be laterally extensive or to penetrate the soil more than a few inches. Based on this information, the presence of this railroad right-of-way is not considered to be evidence of a REC in connection with the subject property.

INTERIOR/PAVEMENT STAINS OR CORROSION

Apparent oil staining was identified in the area of an air compressor located outside building 931. PSI believes the observed staining is an accumulation over time of minor leakage of lubricants used in association with operation of the air compressor and not evidence of a single spill incident. PSI was not able to determine the age of the air compressor. No inlets or drains were noted in the vicinity of the compressor and the staining appeared to be only around the compressor area. PSI considers the presence of the staining a de minimis condition and not a REC in connection with the subject property.

PSI identified areas of minor staining on the paved parking area located on the subject property. The stains appear to be the result of leakage of automobile fluids and not the result of a large scale spill. PSI considers the presence of the staining a de minimis condition and, by definition, not a REC in connection with the subject property.

Apparent staining from adhesive spills was identified in building 931. PSI believes the observed staining is an accumulation of residue from leaking or being drained onto the larger container and is not considered to represent evidence of a REC in connection with the subject property.

CHEMICAL ODORS

PSI noted an unusual adhesive odor at the subject property inside building 931. The odor appeared to be emanating from the adhesive containers located in the warehouse area. Air filtering systems were in use at the time of the reconnaissance and the mail loading doors were open for ventilation. The odor is not considered a REC in connection with the subject property.

POOLS OF LIQUID OR STANDING WATER

PSI observed small pools of standing water at the subject property. These pools can be attributed to recent rains and are not considered to be evidence of a REC in connection with the subject property.

SOLID WASTE DUMPING, LANDFILLING, OR SUSPECT FILL MATERIAL

No landfilling or suspect fill material was observed at the subject property. Solid waste trash and recycling dumpsters were observed on the subject property. The dumpsters are cleaned or emptied on a weekly basis. No adverse conditions, such as staining or improper dumping, were observed at the time of the site reconnaissance. As such, the observed dumpsters are not considered to be evidence of a REC in connection with the subject property.

5.3 OFF-SITE OBSERVATIONS

A summary of our interpretation of the current and past uses and conditions of adjoining and surrounding property based on historical records and observations is provided below.

EMERGENCY GENERATORS

PSI observed an emergency generator located on the north adjoining property. This emergency generator appeared to be diesel-fueled. Typically, tanks associated with emergency generators are equipped with integrated secondary containment systems. PSI did not observe evidence of leaking or staining around the base of the generator at the time of the site reconnaissance. Based on this information, the presence of the emergency generator is not considered to be evidence of a REC in connection with the subject property.

TRANSFORMERS OR OTHER MECH./ELEC. EQUIPMENT THAT COULD CONTAIN PCBS

Three pole-mounted and four pad-mounted electrical transformers were observed on the east and south of the subject property. The pole-mounted transformers were located to the east of the subject property. The pad-mounted transformers were located to the south of the subject property; two transformers to the west of Space Center Drive and two transformers to the east of C Street. PSI did not observe non-PCB labeling on the transformers at the time of the site reconnaissance. PSI believes the electrical equipment is the property and responsibility of Southern California Edison, the local electrical utility company, who would be responsible for cleanup related to the equipment that could not be attributed to tenant negligence. The identified electrical equipment appeared to be in good condition, with no apparent evidence of staining, leakage, or corrosion noted. Based on their observed condition and the local utility ownership, the observed transformers are not considered to be evidence of a REC in connection with the subject property.

QUARRIES, PITS, LAKES, OR LAGOONS

PSI identified an artificial pond located to the west of the subject property. No obvious staining, stressed vegetation, or oily sheen was noted in connection with the water observed at the time of the site reconnaissance. Based on PSI's observations, the presence of the identified pond is not considered to represent evidence of a REC in connection with the subject property.

USE, STORAGE OR DISPOSAL OF PETROLEUM PRODUCTS

PSI observed multiple propane tanks on the surrounding properties. These tanks are used at the property for the forklifts. These tanks appeared to be in good condition and no leaks or spills were observed. These tanks were stored in a caged storage unit outside of the building on the property. Based on this information, these propane tanks are not considered evidence of a REC in connection with the subject property.

DRINKING WATER, IRRIGATION OR MONITORING WELLS

PSI observed municipal well No 22 water line flushing area southeast of the subject property. The well was identified on the ERIS database report. Please refer to Section 7.1 for detailed information and our conclusion.

RAILROAD SPUR/TRACKS

It should be noted that adjoining property appears to have been a railroad right-of-way. While no information indicating the misuse or misapplication of herbicides, or the misuse or improper placement of creosote-covered railroad ties was obtained during this assessment, in certain instances, the chemicals historically applied to the adjoining property and railroad ties historically placed on the adjoining property could be persistent and not biodegrade. As with any land that has been developed as a railroad right-of-way, there exists the possibility that herbicides have been applied or creosote-covered railroad ties placed which may still be present on adjoining property and which may have impacted the subject property. However, PSI does not consider the presence of this railroad right-of-way to be evidence of a REC in connection with the subject property.

SOLID WASTE DUMPING/LANDFILLING/SUSPECT FILL MATERIAL

Some amount of dumping was observed on the west adjoining property consisting primarily of hazardous or non-hazardous discarded wood pieces, concrete chunks, a few tires, and scrap metal. No 55-gallon drums, containers or evidence of soil contamination was observed. The dumped materials do not appear to represent evidence of a REC in connection with the subject property.

6.0 HISTORICAL USES

PSI utilized readily ascertainable historical data resources in order to research the history of the site and surrounding area. The intent of this review was to identify historical tenancies or uses of the subject property and surrounding area, which might be considered evidence of a REC. Generally, PSI reviewed the following readily ascertainable historic data resources, where they were available:

- Readily available historical topographic maps were reviewed to evaluate land development in the area over time. It should be noted that the scale of topographic maps in some cases does not allow for mapping of individual structures and developed areas may be shown by shading only.
- Selected historical aerial photographs were reviewed at 5-10 year intervals to obtain information concerning the development and history of the subject property and surroundings.
- PSI reviewed readily ascertainable historical city directories at 5-10 year intervals in order to obtain information on tenancies on the subject property and adjoining properties.
- PSI requested available historical fire insurance maps from ERIS. The Sanborn Map Company and other regional providers historically mapped urban areas for use by insurance underwriters. In some cases these maps provide useful information in evaluating previous tenancies and uses of the subject property and surrounding area.

Copies of select historical documents are provided in the report appendix; however, it should be noted that some of the resources used by PSI may be copyrighted and PSI has summarized these resources herein, but we have not included copies of these resources in the appendix.

6.1 SUMMARY OF RESOURCES

PSI reviewed the following resources in order to evaluate the historic uses of the subject property and surrounding area:

Source Type	Years Reviewed	Source
USGS Topo Maps	1897, 1900, 1903, 1953, 1954, 1966, 1973, 1981, and 2015	ERIS
Aerial Photographs	1938, 1948, 1952, 1959, 1966, 1971, 19877, 1985, 1994, 2002, 2005, 2010, 2012, 2014, 2016, 2018, and 2020	ERIS and Google Earth
City Directories	1921, 1925, 1931, 1934, 1941, 1945, 1951, 1971, 1986, 1991, 1996, 2001, and 2006	ERIS
Fire Insurance Maps	Unmapped Property	ERIS

6.2 CURRENT AND PRIOR USE INTERVIEWS

PSI conducted interviews with persons who are knowledgeable of the current use and history of the site. The following individuals were interviewed:

Name	Title/Role	Date Interviewed	Affiliation
Mr. Daniel Haro and Heather Schultz	Maintenance	May 11, 2021	Provided access to the buildings and escorted PSI.
Ms. Patricia Berlow	Product Supervisor at Decotone Surfaces	May 11, 2021	Provided information related to the type of materials stored on site.
Mr. Aaron Chan	Operations Manager at Echotech	May 11, 2021	Provided information related to the type of materials stored on site.

No evidence of RECs were identified as a result of the interviews conducted during this assessment. Complete records of communication detailing information obtained and reviewed, have been appended to this report.

6.3 PRIOR INVESTIGATIONS

The client provided PSI with the reports or documents discussed in Section 3.4 of this report.

6.5 SUMMARY HISTORY OF SITE AND SURROUNDING AREA

A chronological summary of the history/use of the subject property and immediately adjacent properties is provided in the following table.

Date	Resource	Interpreted Use/Observations
SUBJECT PROPERTY		
1897 to 1938	Topo maps and aerial images	The property appears as undeveloped land or for agriculture.
1948 to present day	Topo maps and aerial images	The land was developed with present day industrial buildings, railroad spurs, and roads. In 1977, the buildings appear to have new roofing. Railroad tracks appear to be no longer in use.
NORTH ADJOINING PROPERTY		
1897 to 1938	Topo maps and aerial images	The property appears as undeveloped land
1948 to 1995	Topo maps and aerial images	The property was part of a military reservation. Stacks of material were observed between 1952 and 1973
1994	Topo maps and aerial images	The property was observed developed with present day building to the northeast. Cargo boxes were observed parked on the north and northwest adjoining properties.

According to available historical sources, the subject property was formerly undeveloped as early as 1897; and developed with the current structures in 1942. Tenants on the subject property have included Mira Loma Quartermaster Depot (1942-1966) and various commercial tenants (1975-Present).

To the north, the property was part of a military reservation. Stacks of material were observed between 1952 and 1973. After 1948, the property was observed developed with present day building to the northeast. Cargo boxes were observed parked on the north and northwest adjoining properties. After 2002, the property was observed developed with present day building to the northwest. After 2012, the building was observed with an addition on the east end.

To the east, the land appears vacant or used for agriculture until at least 1938. After 1948, the land appeared developed with curved railroad tracks. Stacks of material were noted on and off until 1985. After 1994, the tracks appeared to not be in use. After 2002, the land was developed with present day industrial buildings and roads.

To the south, the property appeared as undeveloped land until at least 1938. Between 1948 and 1994, the property appeared to consist of graded land with development occurring along the northern portion. The topographic maps indicated that the land was considered to be a U.S. Military Installation. After 2002, the land was developed with present day industrial buildings and roads.

To the west, the land appeared vacant or used for agriculture until at least 1938. Between 1948 and 1973, the land was developed with railroad spurs followed by what appeared to be a quarry. The area was observed as leveled land between 1977 and 1985. After 1994, the area of the former quarry was observed flooded with present day Day Creek.

7.0 ENVIRONMENTAL REGULATORY RECORDS REVIEW

7.1 DATABASE FINDINGS

PSI retained ERIS to provide environmental database information attributed to the subject property and its surroundings. ERIS obtains environmental databases published by local, state, tribal, and federal agencies and maps the information for electronic searches. ERIS's service includes reporting Standard Environmental Records Sources and, in most cases, some Additional Environmental Records Sources.

The search was performed to AMSDs listed in ASTM E 1527-13. The search radius required by ASTM varies by database.

Unmappable (orphan) sites (if any were listed) having insufficient address information to be mapped were evaluated for potential location within the AMSD. Those that could be determined to be within the AMSD are discussed, as appropriate.

The distribution of listed sites with respect to the subject property is tabulated and mapped in ERIS's Database Report, which is appended. The reader is referred to the table, which can be found near the front of ERIS's report. The full names of the abbreviations and acronyms used below and in ERIS's report can be found in the appendix of the report.

7.1.1 SUBJECT PROPERTY

The subject property was listed on one or more regulatory databases, as summarized in the following table.

Facility Name & Address	Database(s)	Comments
California Custom Design 3401 Etiwanda Avenue Building 811A	Emissions FINDS/FRS HAZNET	NDS and ECHO are typically pointers to other databases, and are used as a tracking tool by the US EPA and State agencies. It is a compilation of the following lists: California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) and Resource Conservation and Recovery Act (RCRA). The property is listed as a FINDS and ECHO site in association with the RCRA listing. No further information was provided under this listing. According to HAZNET listing, California Custom Design generated unspecified solvent mixture, waste oil/mixed oil, and other organic solids from 1995 to 1997. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. According to RCRA SQG listing, this facility is not listed as having violations and was not reported on the regulatory databases reviewed, which report unauthorized releases and contamination incidents. Based on the reviewed information, PSI does not consider this listing a REC in connection with the subject property.
McVeigh Transportation at 3401 Etiwanda Avenue	HAZNET	The subject property, identified as McVeigh Transportation at 3401 Etiwanda Avenue, is listed in the HAZNET database. database report, McVeigh Corporation generated unspecified solvent mixture in 1995. The HAZNET does not track violators and the presence of a facility on the HAZNET database does not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, this listing is not considered a REC in connection with the subject property.

It is a compilation of the following lists: California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) and Resource Conservation and Recovery Act (RCRA). The property is listed as a FINDS site in association with the RCRA listing. No further information was provided under this listing. According to the NPDES listing, Rhino ATP obtained a NPDES Permit on August 1, 2016 for storm water runoff prevention associated with special warehousing/storage activities. No enforcement actions or violations are reported in connection with the NPDES Permit. Based on the lack of violations and the nature of on-site operations (warehousing), these listings are not considered a REC in connection with the subject property.
Proko Industries Inc. 3401 Etiwanda Avenue Building 931D	FINDS/FRS HAZNET	According to the database report, this facility is not listed as having violations and was not reported on any of the regulatory databases reviewed that report unauthorized releases and contamination incidents. Based on the lack of violations and small quantities of chemicals involved, this listing is not considered a REC in connection with the subject property.
Nelson Ball Paper Products 3401 Etiwanda Avenue Building 931A	HAZNET	According to the database report, Nelson Ball Paper Products generated unspecified organic liquid mixture, other organic solids, waste oil & mixed oil and unspecified aqueous solution in 2004. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, this listing is not considered a REC in connection with the subject property.
Cargo Cats 3401 Etiwanda Avenue Building 811A	HAZNET	According to the database report, Cargo Cats generated liquids with pH<=2, other organic solids and other inorganic solid waste in 2004 and 2012. The HAZNET does not track violators and the presence of a facility on the HAZNET database not necessarily indicate that an environmental concern exists at that facility. The presence of the property on the HAZNET database is not, in itself, considered to represent an environmental concern. Based on the lack of violations and small quantities of chemicals involved, this listing is not considered a REC in connection with the subject property.

7.2 REGULATORY AGENCY INQUIRIES

PSI requested records or information about the subject property and/or surrounding area from the governmental agencies listed in the following sections. Information was requested by telephone, in person, via e-mail or through a written FOIA or equivalent request, as appropriate.

7.2.1 HEALTH DEPARTMENT/ENVIRONMENTAL DIVISION

PSI contacted the City of Jurupa Valley Records Department for information related to any spills or hazardous materials incidents on the subject property. Ms. Debra McNay, Deputy City Clerk, indicated that the records department did not have any records related to the subject property.

7.2.2 REGULATORY AGENCY MAINTAINED WEBSITES

PSI reviewed the State of California GeoTracker and EnviroStor websites websites for records pertaining to underground storage tanks, hazardous material storage, spills, leaks, cleanups, violations, and releases at the subject property. No records for the subject property or adjoining property addresses were identified on the GeoTracker or EnviroStor databases.

8.0 VAPOR ENCROACHMENT SCREENING

8.1 METHODOLOGY

Vapor encroachment is an emerging concern associated with the potential for volatile chemicals, such as petroleum fuels and chlorinated solvents to migrate through the subsurface in the gas phase from contaminated soil and/or groundwater plumes. Vapor encroachment may be a concern if subsurface volatile contaminants migrate into occupied buildings through cracks and penetrations in the building slab.

The ASTM E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment process requires the Environmental Professional to evaluate the potential for vapor encroachment onto the subject property, and to determine if such vapor encroachment constitutes evidence of a REC on the subject property. The E1527-13 Standard Practice does not specifically state the methods that must be used to screen for potential vapor encroachment issues. However, ASTM has developed a separate Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM E2600-15). The vapor encroachment screening guidance outlines a methodology to conduct vapor encroachment screening, which will satisfy the vapor screening requirements under the Phase I ESA Standard Practice. PSI utilized the ASTM E2600-15 Standard Guide to conduct vapor encroachment screening for the subject property.

The goal of conducting Vapor Encroachment Screening (VES) is to identify a VEC, which is defined as the presence or likely presence of COC vapors in the subsurface of the subject property caused by the release of vapors from contaminated soil either on or near the subject property. If a VEC is identified, the environmental professional must determine whether the VEC represents evidence of a REC on the subject property under the context of the Phase I ESA Standard Practice. It should be noted that the identification of a VEC on the subject property does not necessarily indicate that a potential for migration of vapors into existing or proposed structures on the subject property is likely. The environmental professional will identify the VEC as a REC where the potential for vapor migration into structures is considered likely, or where the contaminant concentrations in the soil, groundwater, or soil vapors on the subject property are significant and likely to result in enforcement against on-site or off-site responsible parties.

The VES utilizes information regarding the potential presence of releases on or near the subject property that were collected as a normal part of the Phase I ESA process, such as governmental database records, review of governmental files, historical data sources, etc. No additional data was collected specifically for the purpose of the VES. In order to identify potential sites of concern within the AMSD, as available and appropriate, PSI reviewed fire insurance maps, governmental database records, regulatory agency files, aerial photographs, and other information.

VES Standard Guide prescribes a two tier approach for screening of sites for potential vapor encroachment. In Tier I, potential sites of concern within the search radii are identified and the environmental professional must determine whether a VEC exists or not based on the information that is available within the context of the Phase I ESA data gathering. If the available information indicates that a VEC exists based on available information, the environmental professional, in consultation with the User, may conduct Tier II screening to further evaluate the potential risk. Under Tier II, the environmental professional would review available

reports through the regulatory agency or other reasonably ascertainable sources to determine the status of assessment/remediation, size and migration pathways for any associated plumes, geologic conditions, and other geologic information. This information would be utilized to determine the distance between the plume and the target property boundary. For example, if the distance from the edge of a plume in a downgradient position to the subject property boundary exceeds 100 feet for VOCs or petroleum free product, or 30 feet for dissolved petroleum hydrocarbons (PHCs), then the site may be screened out and a VEC does not exist. Functionally, where Tier II information is readily available during the normal course of conducting the Phase I ESA, PSI has combined the Tier I and Tier II steps herein. Where agency files are not readily available for nearby contaminated sites within the typical schedule for a Phase I ESA, then Tier II screening might be recommended as a separate step subsequent to the Phase I ESA. Where Tier II screening is recommended, the sites of concern where data is lacking are considered a VEC until further information is available and/or further screening is completed.

The VES Standard Guide requires the environmental professional to search for potential sites of concern within the following databases and search distances, where groundwater flow is not known and/or preferential pathways for groundwater or vapor flow may exist:

Standard Environmental Records Sources	Minimum Search Distance (miles) - VOCs, excluding PHCs	Minimum Search Distance (miles) - PHCs
State and tribal HWS lists	1/3	1/10
State or tribal-equivalent NPL	1/3	1/10
State or tribal-equivalent CERCLIS list	1/3	1/10
State or tribal landfill or solid waste site list	1/3	1/10
State or tribal leaking storage tank lists	1/3	1/10
State and tribal registered tank lists	Subject property only	Subject property only
State and tribal IC/EC registries	Subject property only	Subject property only
State and tribal voluntary cleanup site lists	1/3	1/10
State and tribal brownfield sites list	1/3	1/10
Federal NPL site list	1/3	1/10

Federal IC/EC registries	Subject property only	Subject property only

Standard Environmental Records Sources	Minimum Search Distance (miles) - VOCs, excluding PHCs	Minimum Search Distance (miles) - PHCs
Federal ERNS list	Subject property only	Subject property only

The default search distances may be expanded or reduced in the up-gradient, down-gradient, or cross-gradient directions by the environmental professional based on experience in the local area and applying professional judgment to factors such as where a well-defined regional groundwater flow direction is identified, or whether other geologic features such as low permeability soils or hydrogeologic boundaries such as rivers or streams exist which would tend to limit the potential for migration of groundwater or vapors in a particular direction.

8.2 VES RESULTS

PSI identified seven (7) sites of potential concern within the VES search radii. These sites were evaluated using the ERIS Vapor Screening Tool and the results of the VES are included in the ERIS Vapor Screening Report, which is appended. Based on that evaluation, no VECs were identified.

8.3 VES LIMITATIONS

The VES process is not intended to be an exhaustive screening and cannot wholly eliminate uncertainty regarding the presence of VECs in connection with the subject property. Screening is intended to reduce, but not eliminate uncertainty regarding whether or not a VEC exists in connection with the subject property.

9.0 NON-SCOPE CONSIDERATIONS

PSI conducted additional assessment to address conditions, also known as business environmental risks or BERs, beyond the scope of the Practice. Methodology and protocols used to conduct the assessment and evaluate these conditions follow.

9.1 VISUAL ASBESTOS SURVEY

Asbestos-Containing Materials (ACM) have been used extensively in buildings since the turn of the 20th century, and many buildings contain some quantity of ACM. As the adverse health effects of exposure to asbestos became known, the use and installation of many types of ACM in buildings was progressively phased out. By 1979 the EPA had banned the use of spray and troweled-on asbestos materials in building construction. In 1989, the EPA attempted to ban asbestos in all building products, however, this ban was subsequently overturned. Although this EPA ban in all products was overturned, the use of asbestos in building products saw a dramatically declined after 1989.

In addition to EPA policies related to building products, the U.S. Occupational Safety and Health Administration (OSHA) published regulations regarding the protection of workers from exposure to airborne asbestos. OSHA established the date of 1981, where surfacing materials and thermal insulation systems (TSI) must be "*Presumed"* ACM (PACM). In addition, all vinyl flooring systems installed prior to 1981 are "*designated"* as ACM by regulation. Because of the costs associated with the control, removal and disposal of certain types of ACM, it can have a significant impact on the value of a property.

The scope of work included observation of accessible areas of the building to identify suspect ACM could represent a possible "*Business Environmental Risk"* (BER) for the property. The observations were performed for due diligence purposes and were not intended to satisfy regulatory requirements for site demolition or renovation. Our scope of work also did not include sampling or destructive/invasive methods to observe materials that were not readily observable, such as beneath carpet, inside wall cavities, beneath/behind equipment, etc.

During the site reconnaissance, PSI observed the following suspect building materials:

- Floor tile and mastic
- Baseboard and mastic
- Ceiling tiles
- Pipe insulation
- Drywall systems

The observed suspect ACM materials appeared to be in [good][1] condition and no removal or corrective actions are recommended. As the building was constructed prior to 1981, all surfacing materials and TSI is considered PACM and all vinyl flooring finishes *designated* as ACM per OSHA regulations. In addition, PSI recommends that an asbestos Operations and Maintenance (O&M) Plan be developed for the site until such

time that all suspect ACM can be properly characterized. If site renovations or demolition are planned, PSI recommends that all impacted suspect building materials be properly sampled and analyzed for possible asbestos content.

Footnote [1] *– Assumed that the materials in these optional paragraphs were in good condition with no recommended removal or corrective actions. If we have poor conditions, we will need to modify the paragraph to discuss the condition and determine if we are going to recommend removal, corrective actions or further investigation.*

9.2 VISUAL LEAD-BASED PAINT SURVEY

Use of lead-based paint was widespread until the 1950s, when it became evident that exposure to lead represented a health hazard, especially to children. Decreased usage of lead-based paint continued until 1978, when the manufacture and use of lead-based paints was banned for residential applications. Leaded paint and coating products continue to be produced and utilized for certain exempt applications, and there are cases where exempted paints have been used in residences constructed after the 1978 ban. Because leaded paint abatement procedures are expensive, the presence of lead-based paint may be a BER in association with a property.

PSI conducted a reconnaissance of the interior and exterior on the subject property building(s) to evaluate the condition of painted surfaces. It should be noted that lead-based paint cannot be visually detected, and sampling and laboratory analysis would typically be required to determine the lead content of any painted surfaces. Therefore, PSI evaluated the condition of painted surfaces and noted any surfaces that were in poor condition, which might lead to unacceptable airborne concentrations of lead inside the building.

Based on the age of construction of the building (pre-1978) it is possible that lead-based paint could be present. However, PSI noted the painted surfaces to be generally in good condition, with only minor evidence of flaking or peeling of paint. Sanding or disturbance of painted surfaces should be avoided to minimize the potential for airborne lead dust, unless sampling indicates that lead is not present.

9.3 RADON RECORDS REVIEW

Radon is a colorless, odor-less gas that results from the decay of naturally occurring radioactive minerals in the subsurface. Radon may enter buildings through foundation cracks, utility openings, etc. and may accumulate in the indoor air space. Radon is measured in pCi/L of air. The EPA has developed a recommended action level for radon levels in residential buildings of 4 pCi/L, but has not developed any recommendations for commercial structures. Generally, radon levels within slab-on-grade industrial and commercial structures would be expected to be lower than that found in single-family homes in the same location.

It should be noted that our work did not include sampling for radon in the building(s). While the review of the MDH radon information provides an estimate of the potential for radon in the area, radon levels may vary on a structure by structure basis due to underlying geology and building construction characteristics.

Based on the records reviewed, the site is located in USEPA Zone 2 and is non-residential. Therefore, radon is not considered to represent a significant concern.

9.4 LEAD IN DRINKING WATER RECORDS REVIEW

Lead in drinking water is regulated by the U.S. EPA under 40 Code of Federal Regulation (CFR) Part 141 Subpart I. The regulation applies to community systems and non-transient, non-community water systems. The EPA has established an action level of 15 micrograms per liter or parts per billion for lead in drinking water.

Potable water at the subject property is provided by Jurupa Community Services District. According to Jurupa Community Services District, the public water supply meets Federal guidelines for consumption. A copy of the most recent published Consumer Confidence Report or Water Quality Report is appended.

9.5 HISTORICAL OIL AND GAS WELLS RECORDS REVIEW

PSI reviewed readily-available maps showing locations of historical oil and gas wells in the vicinity of the subject property. No gas and oil production was historically performed in the geographical area of the subject property.

10.0 CONTRACT INFORMATION

10.1 STANDARD OF CARE AND WARRANTIES

Our services were not intended to be technically exhaustive. There is a possibility that with the proper application of methodologies, conditions may exist on the property that could not be identified within the scope of the assessment(s) or that were not reasonably identifiable from the available information.

No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with the property. The ESA was intended to reduce, but not eliminate uncertainty regarding the potential for RECs in connection with a property.

Our report is based on commonly known and reasonably ascertainable information, including limited, ground-level visual inspection of the property except where otherwise explicitly indicated, in conformance with ASTM E1527-13. Findings and conclusions derived from the methodologies described in the Practice contain all of the inherent limitations in the methodologies that are referred to in the Practice.

PSI has assumed that factual information provided to us by the client, or obtained from governmental and historical research firm, the public domain, interviews, and other sources is accurate and unbiased. PSI assumes no liability for the accuracy of data provided to us by others.

PSI did not perform exploratory probing or discovery, perform tests, operate specific equipment, or take measurements or samples to perform the ESA scope. The ESA was not a building code, safety, regulatory or environmental compliance inspection. The ESA is not intended to reduce the risk of the presence of mold and physical deficiencies conducive to mold nor the risk that mold or physical deficiencies conducive to mold may pose to the buildings and building occupants.

The methodologies include reviewing information provided by other sources. PSI treats information obtained from the record reviews and interviews concerning the property as reliable and the ASTM protocol does not require PSI to independently verify the information. Therefore, PSI cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete.

PSI has performed the services in a manner consistent with that level of care and skill ordinarily exercised by other members of our profession currently practicing in the same locality and under similar conditions, within the limitations of ASTM E1527-13 standard, and the All Appropriate Inquiries Rule established by the U.S. Environmental Protection Agency (40 C.F.R. Part 312). No other warranties are implied or expressed.

The observations and recommendations presented in this report are time dependent, and conditions will change. This report speaks only as of its date.

10.2 RELIANCE

Link Logistics Real Estate, PSI's client, may rely on this report.

This report is addressed to Citibank, N.A., Citigroup Global Markets Realty Corp. and Citi Real Estate Funding Inc. (Citigroup), and such other persons as may be designated by Citigroup and their respective successors and assigns. Special Conditions include (i) the Report may be relied upon by Citigroup in determining whether to make a loan evidenced by a note ("the Property Note") secured by the Subject Property, (ii) the Report may be relied upon by any purchaser in determining whether to purchase the Property Note from Citigroup and any rating agency rating securities issued by or representing an interest in the Mortgage Note, (iii) the Report may be referred to in and included with materials offering for sale the Property Note or an interest in the Property Note, (iv) persons who acquire the Property Note or an interest in the Property Note may rely on the Report, (v) the Report speaks only as of its date in the absence of a specific written update of the Report.

This report is for the use and benefit of, and may be relied upon by Citibank, N.A., Citigroup Global Markets Realty Corp. and Citi Real Estate Funding Inc. (Citigroup), and any of their respective affiliates, agents and advisors, the initial and subsequent holders from time to time of any debt (or any portion thereof) and/or debt securities secured, directly and indirectly, by the property which is the subject of this report, by any participation interest in any such debt (or any portion thereof), and indenture trustee, servicer or other agent acting on behalf of such holders of such debt (or any portion thereof) and/or debt securities; any rating agencies; and the institutional provider(s) from time to time of any liquidity facility or credit support for such financings, and their respective successors and assigns.

In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, private placement memorandum, prospectus or sales brochure (in either electronic or hard copy format) in connection with a securitization or transaction involving such debt (or any portion thereof) and or debt securities.

This report is addressed to BMO (collectively, Bank of Montreal, BMO Financial Group, BMO Capital Markets, BMO Harris Bank N.A., and any of their respective affiliates, agents and advisors (including, without limitation, investors who purchase the mortgage loan or a participation interest in the mortgage loan)). This report is for the use and benefit of, and may be relied upon by the following intended users: (i) BMO, (ii) the initial and subsequent holders from time to time of any debt (or any portion thereof) and/or debt securities secured, directly and indirectly, by the property that is the subject of this report, (iii) any participation interest in such debt (or any portion thereof), (iv) any indenture trustee, servicer or other agent acting on behalf of such holders of such debt (or any portion thereof) and/or debt securities, (v) any rating agencies, (vi) the institutional provider(s) from time to time of any liquidity facility or credit support for such financings, and (vii) any of the respective successors and assigns of any of the foregoing parties. In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, private placement memorandum, prospectus or sales brochure (in either electronic or hard copy format) in connection with a sale, securitization or syndication, or transaction involving such debt (or any portion thereof) and/or debt securities.

This report is addressed to Barclays Capital Real Estate Inc. ("BCREI") and its affiliates, their respective successors and assigns (including, without limitation, investors who purchase the mortgage loan or a participation interest in the mortgage loan and the trustee in a securitization that includes the mortgage loan), each servicer of the mortgage loan, and all rating agencies involved in any sale, securitization or syndication involving the mortgage loan may use and rely upon this Report, including, without limitation,

utilizing selected information from the Report in the offering materials (either in electronic or hard copy format) relating to any sale, securitization or syndication involving the mortgage loan. Intertek agrees to cooperate in answering questions by any of the above parties in connection with the sale, securitization or syndication, as communicated by BCREI personnel. In addition, this Report or a reference to this Report may be included or quoted in any offering circular, registration statement, prospectus or sales brochure (either in electronic or hard copy format) in connection with a sale, securitization or syndication, or transaction involving such debt and or debt securities. We hereby certify that we have no undisclosed interest in the property, and our employment and compensation are not contingent upon our findings. This study is subject to the comments made throughout this report and to all assumptions and limiting conditions set forth herein.

This report is for the use and benefit of, and may be relied upon by, Goldman, Sachs & Co., Goldman Sachs Mortgage Company, Goldman Sachs Bank USA, GS Commercial Real Estate LLC and any of their respective affiliates, agents and advisors, the initial and subsequent holders from time to time of any debt (or any portion thereof) and/or debt securities secured, directly and indirectly, by the property which is the subject of this report, by any participation interest in any such debt (or any portion thereof), and indenture trustee, servicer or other agent acting on behalf of such holders of such debt (or any portion thereof) and/or debt securities; any rating agencies; and the institutional provider(s) from time to time of any liquidity facility or credit support for such financings, and their respective successors and assigns.

In addition, this report or a reference to this report, may be included or quoted in any offering circular, registration statement, private placement memorandum, prospectus or sales brochure (in either electronic or hard copy format) in connection with a securitization or transaction involving such debt (or any portion thereof) and or debt securities.

10.3 USE BY OTHER PARTIES

This report was prepared pursuant to a contract between PSI and its client. That contractual relationship included an exchange of information about the property that was unique and serves as the basis upon which this report was prepared. Because of the importance of these understandings, our assessment may not be sufficient for the intended purposes of another party.

Reliance or any use of this report by anyone other than those parties identified above for which it was prepared, except with express written permission, is prohibited and therefore not foreseeable to PSI. Any unauthorized reliance on or use of this report, including any of the information or conclusions contained herein, will be at the third party's risk. No warranties or representations expressed or implied in this report are made to any such third party.

Third party reliance letters may be issued:

- upon timely request;
- subject to the permission of our original client; and
- payment of the then-current fee for such letters.

All third parties relying on our report, by such reliance, agree that such reliance is limited by our proposal and/or General Conditions, as applicable.

Description of Events: AT APPROXIMATELY 0300 HOURS ON 3/29/95 TRAILER 19-2287 X/BAKERSFIELD CA. WAS BROUGHT TO THE DOCK FOR STRIPPING. DOCKMAN JOE GUERRA OPENED THE DOOR. HE NOTICED A TERRIBLE ODOR COMING FROM THE TRAILER THE SUPERVISOR MIKE WOODDY CALLED ME TO THE 172 DOOR. I NOTICED A LIQUID ON THE FLOOR OF THE TRAILER. JOE MOVED SOME SKIDS AND FOUND (1) 35 GALLON DRUM LEAKING. (UN2922 II) CORROSIVE LIQUID/POISONOUS NOS. I THEN HAD JOE PUT DOWN SOME QUICK-SORB TO CONTAIN THE SPILL. WE PULLED THAT TRAILER AWAY FROM THE DOCK AND CONTRACTED CONSOLIDATED WASTE INDUSTRIES. CONSOLIDATED SHOWED UP AND TOOK CARE OF THE SPILL.

Description of Events: WHILE UNLOADING ONE DAMAGED 50-POUND BAG WAS DISCOVERED IN THE TRAILER. APPROXIMATELY ONE POUND OF FREE PRODUCT WAS RELEASED. APPARENTLY THE RELEASE WAS DUE TO THE BAG RUBBING AGAINST THE TRAILER DURING TRANSIT. TERMINAL PERSONNEL PERFORMED THE CLEAN-UP BY SWEEPING THE FREE PRODUCT INTO A 5-GALLON RECOVERY DRUM. THE RECOVERY DRUM WILL BE HELD AT THE TERMINAL FOR DISPOSITION. THE DAMAGED BAG WAS REPAIRED WITH TAPE AND WILL BE FORWARDED ALONG WITH THE REMAINDER OF THE SHIPMENT TO THE CONSIGNEE. THERE WERE NO INJURIES OR EXPOSURES REPORTED. THE MSDS WAS REQUESTED AND RECEIVED.

Description of Events: YARD COORDINATOR FRED LUNA REPORTED A LEAKER HAD COME IN FROM THE MAINLINE. WE WENT THROUGHT THE BILLS AND DISCOVERED THAT THERE WAS FLAMMABLE LIQUID ABOARD. TRAILER WAS PLACED OUT IN DIRT TO SEE IF LEAKAGE WOULD STOP. OPENED DOOR AND THERE WAS A STRONG ODOR. THE DECISION WAS MADE TO CONTACT CONTAINERIZED CHEMICAL. THEY RE COOPED THE ORDER AND SHIPMENT WAS FORWARDED TO DESTINATION.

Description of Events: THIS FREIGHT WAS BEING UNLOADED BY PETE KARABAN. HE HEARD A HISSING NOISE COMING FROM ONE OF THE CYLINDERS. THE SAFETY CAP WAS STILL IN PLACE SO HE COULDN'T GET TO THE VALVE. I CALLED CONSOLIDATED WASTE INDUSTRIES. GREGORY EMELE CAME OUT AND CHECKED INTO THE SITUATION AND SAID THE CYLINDER WAS IN FACT EMPTY NOW. SINCE THE SAFETY CAP WAS STILL IN PLACE HE WONDERED IF THE VALVES WERE DEFECTIVE. WE SENT THE SHIPMENT BACK TO THE SHIPPER FOR INSPECTION OF THE VALVES.

Description of Events: MR. ROMAN WAS UNLOADING TRAILER 15-7694 IN THE 405 BAY ON THE INBOUND DOCK. THIS TRAILER HAD ABOUT 80 % SKIDS ON IT. MR. ROMAN WAS UNLOADING A DOUBLE STACKED PALLET. THE PALLET WAS IN FRONT OF THE SKID OF ACETIC ACID. MR. ROMAN DROVE THE FORKLIFT INTO THE TRAILER TO REMOVE THE DOUBLE STACKED PALLET. THAT IS WHEN THE BLADES PUNCTURED THE SKID OF HAZARDOUS MATERIAL.

Description of Events: MR. PRIVATE (PC0 WAS OFF LOADING TRAILER 19-499 OUT OF INDIANAPOLIS IN. WHEN HE CAME TO THE SHIPMENT THAT WAS DAMAGED. IND. HAD LOADED ONE ORDER OF BOOKS 1285# ON TOP OF THESE 2 DRUMS WITH NO DUNNAGE. WHILE IN ROUTE TO MLC SKID OF BOOKS SHIFTED AND ALL THE WEIGHT WAS TRANSFERED TO ONE CORNER OF THIS DRUM. THIS CAUSED THE DRUM TO CRUSH AT MIDDLE SEAM AND CREATED A PIN HOLE LEAK. WE USED PLUG AND DIKE TO PLUG THE HOLE PLACED IN RECOUP DRUM AND MOVED ON TO DESTINATION.

Description of Events: JOHN STILLMAN STRIPPING TRAILER 15-8232. ABOUT HALF WAY IN HE DISCOVERED 1 CTN WET. HE OPENED THE CARTON AND DISCOVERED 1 BROKEN BOTTLE (1 GALLON). NO LIQUID WAS IN THE TRAILER. JUST A WET CARTON AND BROKEN GLASS. THE TRAILER WAS ISOLATED AWAY FROM THE DOCK AND WE CALLED CHEMTREC THEY IN TURN CALLED THE SHIPPER. THE SHIPPER INFORMED ME TO RETURN THE CARTON WITH BROKEN GLASS AND 3 GOOD BOTTLES BACK TO HIM. IF THIS SHIPMENT HAD BEEN PLACED IN METAL CONTAINERS THIS INCIDENT COULD OF BEEN AVOIDED.

Description of Events: MR. VENEGAS WAS OFF LOADING TRAILER 17-8395 IN BAY 193. AS HE PULLED 1 SKID OF A 2 SKID ORDER HE NOTICED IT LEAKING. IT WAS A 110 GALLON BULK CONTAINER CONTAINING RESIDUE (MINERAL SPIRITS). IT LOOKED AS IF THE FITTING ON THE BOTTOM OF THE CONTAINER HAD COME LOOSE IN ROUTE TO MLC. WE TIGHTENED UP THE FITTING AND CLEANED UP THE SPILL. PLACED CLEANED-UP MATERIALS IN H/M TRAILER AND MOVED FREIGHT TO DESTINATION.

Description of Events: JOHN GORDON OPENED TRAILER 11-4430 X-DLS (405BAY) AND DISCOVERED 1 DRUM LEAKING. AT THIS TIME 1 EVACUATED THE AREA AND CALLED CHEMTREC AND SHIPPER. SHIPPER ADVISED TO CALL CONTAINERIZED CHEMICAL FOR CLEAN-UP. CONTAINERIZED CHEMICAL ADVISED ME DRUMS WERE DEFECTIVE. ALSO IMPROER PACKAGING FOR THIS PRODUCT. HAD SHIPPER USED PROPER PACKAGING I BELIEVE THIS INCIDENT COULD HAVE BEEN PREVENTED.

Description of Events: WHILE UNLOADING TERMINAL PERSONNEL DETECTED A STRONG ODOR COMING FROM THE TRAILER. THE AREA WAS ISOLATED AND CONSOLIDATED WASTE INDUSTRIES OF MONTCLAIR CA RESPONDED TO INVESTIGATE. UPON INVESTIGATION SEVEN FIVE GALLON PLASTIC PAILS WERE DISCOVERED LEAKING IN THE REAR OF THE TRAILER. APPROXIMATELY TWO GALLONS OF FREE PRODUCT WERE RELEASED TO THE TOP OF THE PAILS. APPARENTLY THE PAILS WERE LEAKING DUE TO LOOSE LIDS. CONSOLIDATED WASTE INDUSTRIES PERFORMED THE CLEANUP USING LEVEL C PROTECTION AND ABSORBENTS. THE CLEANUP MATERIALS AND FREE PRODUCT WERE PLACED INTO A 10 GALLON RECOVERY DRUM. THE RECOVERY DRUM WILL BE DISPOSED OF BY CONSOLIDATED WASTE INDUSTRIES. THE LEAKING PAILS AND REMAINING PRODUCT WERE PLACED INTO A 95 GALLON POLY RECOVERY DRUM. THE POLY RECOVERY DRUM WILL BE FORWARDED TO THE CONSIGNEE ALONG WITH THE REMAINDER OF THE SHIPMENT. NO INJURIES OR EXPOSURES WERE REPORTED. THE MSDS WAS REQUESTED AND RECEIVED.

Description of Events: TRAILER 11-3927 X/COLUMBUS BROUGHT TO DOCK TO UNLOAD. UPON OPENING THE DOOR A STRONG ODOR WAS NOTICED. AFTER FURTHER INVESTIGATION A LEAKAGE WAS DISCOVERED FROM THE BOTTOM SEAM ON 1/55 GALLON DRUM OF CORROSIVE MATERIAL APPROXIMATELY 1/2 GALLON HAD LEAKED OUT OF BOTTOM SEAM. LOOKED LIKE THE SEAM FAILED TO HOLD THE WELD. I THEN HAD THE TRAILER MOVED TO THE OUTBOUND DOCK. DOCKMEN JOE CANTELLETTA AND LARRY ROBINSON PUT DRUM INTO A OVERPACK DRUM WITH LINER. THEN SHIPMENT WAS SENTO ON TO DESTINATION.

Description of Events: ON 4/20 I INVESTIGATED A SPILL INSIDE TRLR 15-7970 WHICH WAS LOADING FOR POCONO AT THE 162 BAY. I OBSERVED 1 SMALL CTN WHICH HAD FALLEN FROM NEAR THE ROOF OF THE TRLR. THE ODOR WAS QUITE SEVER. I CONTACTED CONTAINERIZED CHEMICAL FOR CLEANUP PURPOSES AND THE RIVERSIDE CO. FIRE DEPT. DURING MY INVESTIGATION IT WAS DETERMINED THAT J. QUILTY A. VILLA D. MORTENSEN P. MONGE M. MARTY INGRAHAM HENDERSON HADAMAK AND J. MARTINEZ WERE ALL DECONTAMINATED AND SENT TO VARIOUS HOSPITALS. ALSO J. CLARK J. DEFRANCES WERE ALSO SENT. THE SHIPMENT WAS CLEANED UP BY CONTAINERIZED CHEMICAL AND DISPOSED OF BY THEM.

Description of Events: ON 4/20 I INVESTIGATED A SPILL INSIDE TRLR 15-7970 WHICH WAS LOADING FOR POCONO AT THE 162 BAY. I OBSERVED 1 SMALL CTN WHICH HAD FALLEN FROM NEAR THE ROOF OF THE TRLR. THE ODOR WAS QUITE SEVER. I CONTACTED CONTAINERIZED CHEMICAL FOR CLEANUP PURPOSES AND THE RIVERSIDE CO. FIRE DEPT. DURING MY INVESTIGATION IT WAS DETERMINED THAT J. QUILTY, A. VILLA, D. MORTENSEN, P. MONGE, M. MARTY, INGRAHAM, HENDERSON HADAMAK AND J. MARTINEZ WERE ALL DECONTAMINATED AND SENT TO VARIOUS HOSPITALS. ALSO J. CLARK, J. DEFRANCES WERE ALSO SENT. THE SHIPMENT WAS CLEANED UP BY CONTAINERIZED CHEMICAL AND DISPOSED OF BY THEM.

Description of Events: MR. VENEGAS WAS OFF LOADING TRAILER 17-8395 IN BAY 193. AS HE PULLED 1 SKID OF A 2 SKID ORDER, HE NOTICED IT LEAKING. IT WAS A 110 GALLON BULK CONTAINER CONTAINING RESIDUE (MINERAL SPIRITS). IT LOOKED AS IF THE FITTING ON THE BOTTOM OF THE CONTAINER HAD COME LOOSE IN ROUTE TO MLC. WE TIGHTENED UP THE FITTING, AND CLEANED UP THE SPILL. PLACED CLEANED-UP MATERIALS IN H/M TRAILER AND MOVED FREIGHT TO DESTINATION.

Description of Events: JOHN STILLMAN STRIPPING TRAILER 15-8232. ABOUT HALF WAY IN, HE DISCOVERED 1 CTN WET. HE OPENED THE CARTON AND DISCOVERED 1 BROKEN BOTTLE (1 GALLON). NO LIQUID WAS IN THE TRAILER. JUST A WET CARTON, AND BROKEN GLASS. THE TRAILER WAS ISOLATED AWAY FROM THE DOCK, AND WE CALLED CHEMTREC, THEY IN TURN CALLED THE SHIPPER. THE SHIPPER INFORMED ME TO RETURN THE CARTON WITH BROKEN GLASS, AND 3 GOOD BOTTLES BACK TO HIM. IF THIS SHIPMENT HAD BEEN PLACED IN METAL CONTAINERS THIS INCIDENT COULD OF BEEN AVOIDED.

Description of Events: TRAILER 11-3050 A 1 BILL TO FILL FROM SVC WAS CALLED TO DOOR 125 AT APPROX. 1230 PM ON 11/08/90. TO LOAD AT APPRX. 1245 TRL. CAME TO DOCK LOADER C. RIVAS OPENED DOOR NOTICING A LIQUID RUNNING OUT OF REAR OF TRAILER. AFTER FURTHER INVESTIGATION NOTICED SAME LIQUID RUNNING OUT OF NOSE. AS THE TRAILER WAS PLACARDED CORROSIVE, I EVACUATED AREA. I THEN GOT THE RESPONSE GUIDE BOOK TO SEE HOW TO HANDLE THE INCIDENT. (SEE GUIDE 60) I THEN CALLED CONTAINERIZED CHEM DISP. TO CLEAN UP TRAILER & YARD AREA AFFECTED. TRAILER CAME INTO MLC STACKED (SEE PICTURES) I BELIEVE FREIGHT DAMAGED IN TRANSIT. DESIGNATED FACILITY: U.S. POLLUTION CONTROL-GRASSY MOUNTAIN FACILITY 3 MI EAST, 7 MI NORTH OF KNOLLS EXIT 41-I80, TOOELE COUNTY, CLIVE, UT.

Description of Events: AT APPROXIMATELY 0300 HOURS ON 3/29/95 TRAILER 19-2287 X/BAKERSFIELD, CA. WAS BROUGHT TO THE DOCK FOR STRIPPING. DOCKMAN JOE GUERRA OPENED THE DOOR. HE NOTICED A TERRIBLE ODOR COMING FROM THE TRAILER, THE SUPERVISOR, MIKE WOODDY CALLED ME TO THE 172 DOOR. I NOTICED A LIQUID ON THE FLOOR OF THE TRAILER. JOE MOVED SOME SKIDS AND FOUND (1) 35 GALLON DRUM LEAKING. (UN2922 II), CORROSIVE LIQUID/POISONOUS NOS. I THEN HAD JOE PUT DOWN SOME QUICK-SORB TO CONTAIN THE SPILL. WE PULLED THAT TRAILER AWAY FROM THE DOCK AND CONTRACTED CONSOLIDATED WASTE, INDUSTRIES. CONSOLIDATED SHOWED UP AND TOOK CARE OF THE SPILL.

Description of Events: JOHN GORDON OPENED TRAILER 11-4430 X-DLS (405BAY) AND DISCOVERED 1 DRUM LEAKING. AT THIS TIME 1 EVACUATED THE AREA AND CALLED CHEMTREC AND SHIPPER. SHIPPER ADVISED TO CALL CONTAINERIZED CHEMICAL FOR CLEAN-UP. CONTAINERIZED CHEMICAL ADVISED ME DRUMS WERE DEFECTIVE. ALSO IMPROER PACKAGING FOR THIS PRODUCT. HAD SHIPPER USED PROPER PACKAGING, I BELIEVE THIS INCIDENT COULD HAVE BEEN PREVENTED.

Description of Events: AT APPROX. 0600 HRS. ON 1/5/91 TRAILER 15-1554 X SFS WAS BROUGHT TO DOCK TO STRIP. AT APPROX. 0730 HRS. DOCKWORKER C. KNIGHT DISCOVERED 3 DRUMS ON A PALLET. PALLET BROKE DURING TRANSIT CAUSING 1 DRUM TO TILT CAUSING APPROX. 1.5 GALLONS TO SPILL ON PALLET & FLOOR OF TRAILER. AFTER PLACING DRUMS ON DOCK THEY BEGAN TO SMOKE. AT THIS TIME I NOTIFIED CHEM-TREC WHO NOTIFIED SHIPPER. AFTER TALKING TO SHIPPER, I NOTIFIED CONTAINERIZED CHEMICAL DISPOSAL CO. TO CLEAN UP SPILL. IT IS CF POLICY THAT CARDBOARD BE PLACED ON TRAILER FLOOR. DRUMS THEN PLACED ON CARDBOARD, NOT ON WOODEN PALLET. (SEE ATTACHED). DESIGNATED FACILITY: U.S. POLLUTION CONTROL-GRASSY MOUNTAIN FACILITY 3 MI EAST, 7 MI NORTH OF KNOLLS EXIT 41-I80 TOOELE COUNTY, CLIVE, UT

Description of Events: TRAILER 11-3927 X/COLUMBUS BROUGHT TO DOCK TO UNLOAD. UPON OPENING THE DOOR A STRONG ODOR WAS NOTICED. AFTER FURTHER INVESTIGATION A LEAKAGE WAS DISCOVERED FROM THE BOTTOM SEAM ON 1/55 GALLON DRUM OF CORROSIVE MATERIAL, APPROXIMATELY 1/2 GALLON HAD LEAKED OUT OF BOTTOM SEAM. LOOKED LIKE THE SEAM FAILED TO HOLD THE WELD. I THEN HAD THE TRAILER MOVED TO THE OUTBOUND DOCK. DOCKMEN JOE CANTELLETTA AND LARRY ROBINSON PUT DRUM INTO A OVERPACK DRUM WITH LINER. THEN SHIPMENT WAS SENTO ON TO DESTINATION.

Description of Events: YARD COORDINATOR FRED LUNA REPORTED A LEAKER HAD COME IN FROM THE MAINLINE. WE WENT THROUGHT THE BILLS AND DISCOVERED THAT THERE WAS FLAMMABLE LIQUID ABOARD. TRAILER WAS PLACED OUT IN DIRT TO SEE IF LEAKAGE WOULD STOP. OPENED DOOR AND THERE WAS A STRONG ODOR. THE DECISION WAS MADE TO CONTACT CONTAINERIZED CHEMICAL. THEY RE COOPED THE ORDER AND SHIPMENT WAS FORWARDED TO DESTINATION.

Description of Events: WHILE UNLOADING, TERMINAL PERSONNEL DETECTED A STRONG ODOR COMING FROM THE TRAILER. THE AREA WAS ISOLATED AND CONSOLIDATED WASTE INDUSTRIES OF MONTCLAIR, CA RESPONDED TO INVESTIGATE. UPON INVESTIGATION, SEVEN, FIVE GALLON PLASTIC PAILS WERE DISCOVERED LEAKING IN THE REAR OF THE TRAILER. APPROXIMATELY TWO GALLONS OF FREE PRODUCT WERE RELEASED TO THE TOP OF THE PAILS. APPARENTLY THE PAILS WERE LEAKING DUE TO LOOSE LIDS. CONSOLIDATED WASTE INDUSTRIES PERFORMED THE CLEANUP USING LEVEL C PROTECTION AND ABSORBENTS. THE CLEANUP MATERIALS AND FREE PRODUCT WERE PLACED INTO A 10 GALLON RECOVERY DRUM. THE RECOVERY DRUM WILL BE DISPOSED OF BY CONSOLIDATED WASTE INDUSTRIES. THE LEAKING PAILS AND REMAINING PRODUCT WERE PLACED INTO A 95 GALLON POLY RECOVERY DRUM. THE POLY RECOVERY DRUM WILL BE FORWARDED TO THE CONSIGNEE ALONG WITH THE REMAINDER OF THE SHIPMENT. NO INJURIES OR EXPOSURES WERE REPORTED. THE MSDS WAS REQUESTED AND RECEIVED.

Description of Events: WHILE UNLOADING, ONE DAMAGED 50-POUND BAG WAS DISCOVERED IN THE TRAILER. APPROXIMATELY ONE POUND OF FREE PRODUCT WAS RELEASED. APPARENTLY THE RELEASE WAS DUE TO THE BAG RUBBING AGAINST THE TRAILER DURING TRANSIT. TERMINAL PERSONNEL PERFORMED THE CLEAN-UP BY SWEEPING THE FREE PRODUCT INTO A 5-GALLON RECOVERY DRUM. THE RECOVERY DRUM WILL BE HELD AT THE TERMINAL FOR DISPOSITION. THE DAMAGED BAG WAS REPAIRED WITH TAPE AND WILL BE FORWARDED ALONG WITH THE REMAINDER OF THE SHIPMENT TO THE CONSIGNEE. THERE WERE NO INJURIES OR EXPOSURES REPORTED. THE MSDS WAS REQUESTED AND RECEIVED.

Description of Events: MR. PRIVATE (PC0 WAS OFF LOADING TRAILER 19-499 OUT OF INDIANAPOLIS, IN., WHEN HE CAME TO THE SHIPMENT THAT WAS DAMAGED. IND. HAD LOADED ONE ORDER OF BOOKS 1285# ON TOP OF THESE 2 DRUMS WITH NO DUNNAGE. WHILE IN ROUTE TO MLC SKID OF BOOKS SHIFTED AND ALL THE WEIGHT WAS TRANSFERED TO ONE CORNER OF THIS DRUM. THIS CAUSED THE DRUM TO CRUSH AT MIDDLE SEAM AND CREATED A PIN HOLE LEAK. WE USED PLUG AND DIKE TO PLUG THE HOLE, PLACED IN RECOUP DRUM AND MOVED ON TO DESTINATION.

Description of Events: THIS FREIGHT WAS BEING UNLOADED BY PETE KARABAN. HE HEARD A HISSING NOISE COMING FROM ONE OF THE CYLINDERS. THE SAFETY CAP WAS STILL IN PLACE, SO HE COULDN'T GET TO THE VALVE. I CALLED CONSOLIDATED WASTE INDUSTRIES. GREGORY EMELE CAME OUT AND CHECKED INTO THE SITUATION AND SAID THE CYLINDER WAS IN FACT EMPTY NOW. SINCE THE SAFETY CAP WAS STILL IN PLACE HE WONDERED IF THE VALVES WERE DEFECTIVE. WE SENT THE SHIPMENT BACK TO THE SHIPPER FOR INSPECTION OF THE VALVES.

SITE HISTORY/RELEASE INFORMATION: June 15, 2015--Six soil samples were taken at the under-dispenser sumps at the point of connection during a product piping replacement project. The soil sample taken under dispenser 15 at feet had 17300 ppm TPHd, 121 ppb ethylbenzene, 7.9J ppb total xylenes, 530 ppb 1,3,5-TMB, 85.9 ppb n-butylbenzene, and 5.2J ppb naphthalene. The site was placed into LOP July 15, 2015. ASSESSMENT: November 3, 2015--Three soil borings (SP-1 through SP-3) were drilled surrounding dispenser 15. SB-1 was drilled to 50 feet, SB-2 was drilled to 29 feet where it hit refusal and SB-3 was drilled to 70 feet. Hydrocarbons were limited to between 3 and 20 feet bgs in all three borings and the site was defined vertically. TPHd in SB-1 was detected at 2900, 6000, 6700 and 2800 ppm at 5, 10, 15, and 20 feet and TPHg was detected at 1800, 340, 390 and 300 ppm at 5, 10, 15 and 20 feet. TPHd in SB-2 was detected at 250, 14000, 1000 and 3500 at 3, 5, 10, and 15 feet and TPHg was detected at 3300, 120 and 180 ppm at 5, 10 and 15 feet. TPHd in SB-3 was detected at 9100, 1500, 4100, and 2200 ppm at 5, 10, 15, and 20 feet and TPHg was detected at 1300, 420, 200 and 110 ppm at 5, 10, 15, and 20 feet. No Benzene or MTBE was detected in any of the soil samples. Additional lateral assessment was requested. February 22, 2016-- Three soil borings(SB-4 through SB-6) were completed to 40 feet bgs using direct push technologies surrounding the original three borings. A total of 24 soil samples were collected at depths ranging from 5 to 40 feet bgs. No analyte was detected above the laboratory reporting limit in the soil samples. Groundwater was not encountered. REMEDIATION: No active remediation was completed. GROUNDWATER:: Groundwater was not encountered in the 70 foot depth explored and is anticipated to be greater than 200 feet bgs. CLOSEST WELLS: According to GeoTracker, six wells are located within 1/2 mile with the closest well at 1300 feet from the site MASS REMAINING IN-SITU: TPHd is soil is limited in extent near dispenser island pump #15 and has been delineated to a vertical extent of 25 feet or less and laterally between 20 to 60 feet from dispenser #15. Other information: The site is a card lock fueling facility and is expected to remain in use as a commercial petroleum fueling facility in the future. A UST system is currently installed and operating at the site. The piping were replaced in June 2015 and the leak has been stopped. The site has been adequately characterized. Residual impacts remain at the site between 3 and 20 feet bgs in the soils near dispenser #15. No water wells, surface waters, or other sensitive receptors are likely to be impacted.

Site History:

In 1983 hazardous wastes from Orchid Paper Company, Fontana, were dumped in a vacant lot adjacent to the facility. An investigation began to find who was responsible for the illegal dumping. About twenty-eight (28) 55 gallon drums containing glue, paper and small amounts of a carcinogenic chemical. In 1985 the company agreed to pay $100,000 in settlement fees for a civil suit to San Bernardino County. File Room cleanup conducted on February 22, 2018 revealed that there are NO files for this Facility exist in the File Room.
