

Phase I Environmental Site Assessment: 468 North Rodeo

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

468 North Rodeo Drive Beverly Hills California 90210

Report Date: July 31, 2018 Partner Project No. 18-220933.1

Prepared for:

468 N RODEO DRIVE LLC, a Delaware limited liability company c/o Morgan Lewis 300 South Grand Avenue, Twenty-Second Floor Los Angeles, California 90017

July 31, 2018

Mr. Paul Williams 468 N RODEO DRIVE LLC, a Delaware limited liability company c/o Morgan Lewis 300 South Grand Avenue, Twenty-Second Floor Los Angeles, California 90017

Subject: Phase I Environmental Site Assessment 468 North Rodeo Drive Beverly Hills California 90210 Partner Project No. 18-220933.1

Dear Mr. Williams:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (424) 318-5742.

Sincerely,

molty S. Kilo

Timothy Kidd Relationship Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by 468 N RODEO DRIVE LLC, a Delaware limited liability company c/o Morgan Lewis for the property located at 468 North Rodeo Drive in the City of Beverly Hills, Los Angeles County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide 468 N RODEO DRIVE LLC, a Delaware limited liability company c/o Morgan Lewis for the property"). The Phase I Environmental Site Assessment is designed to provide 468 N RODEO DRIVE LLC, a Delaware limited liability company c/o Morgan Lewis with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the southeast side of South Santa Monica Boulevard and the northwest side of North Rodeo Drive within a mixed commercial/retail/residential area of Los Angeles County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address(es):	468 North Rodeo Drive
Additional Address(es):	460-468 North Rodeo Drive, 467 North Rodeo Drive,
	9478-9496 Santa Monica Boulevard
Historical Address(es):	1426-1444 Burton Way
Property Use:	Commercial
Land Acreage (Ac):	0.35 Ac
Number of Buildings:	One
Number of Floors:	Two
Gross Building Area (SF):	23,509 SF (Total)
Date of Construction:	1999
Assessor's Parcel Number (APN):	4343-016-001
Type of Construction:	Masonry or Wood-Framed
Current Tenants:	Brooks Brothers
Site Assessment Performed By:	Jason Bates and Brooke Hasty of Partner
Site Assessment Conducted On:	July 24, 2018

The subject property is currently occupied by Brooks Brothers for commercial retail use. The subject property consists of a two-story structure and is improved with an asphalt-paved parking/loading area throughout the northeast of the property. Onsite operations consist of clothing storage and retail operations. The two-story structure harbors two large showroom areas and various storage areas located on the first and second floors as well as two balconies situated to the southwest and southeast of the subject property structure. Furthermore, the subject property consists of a northeastern back-of-house area located on the first floor which contains various storage rooms and an elevator equipment room. Partner observed two hydraulic elevators located within the central portion of the building.

According to available historical sources, the subject property was formerly undeveloped as early as 1884; developed with one commercial structure comprised of various commercial retail tenants between 1924

and circa 1994; and developed with the current structure in 1997. Tenants on the subject property include various commercial retail tenants (1925-1991); Tommy Hilfiger (1998-2000); Lawrence Martin Gallery (2000-2006); and Brooks Brothers (2001-Present).

The immediately surrounding properties consist of two commercial retail strip centers to the north across South Santa Monica Boulevard (9455-9497 South Santa Monica Boulevard, 474 North Rodeo Drive, 475 North Beverly Drive); two commercial structures occupied by commercial retail tenants identified as MaxMara, Loro Piana and Brioni to the south across North Rodeo Drive (451-459 North Rodeo Drive); one commercial structure occupied by various commercial retail tenants identified as DSquared2, Zadig & Voltaire, and Saint Laurent to the southwest across North Rodeo Drive (461-467 North Rodeo Drive, 9500 South Santa Monica Boulevard); one commercial retail strip center to the west across South Santa Monica Boulevard (9507-9523 South Santa Monica Boulevard, 479 North Rodeo Drive); one commercial structure occupied by The Paley Center for Media to the east (461 and 465 North Beverly Drive); and one vacant commercial structure to the southeast (456 North Rodeo Drive).

According to topographic map interpretation and the Regional Water Quality Control Board (RWQCB) GeoTracker database, the depth and direction of groundwater in the vicinity of the subject property is inferred to be approximately 33 to 50 feet below ground surface (bgs) and flow toward the southeast.

Findings

A recognized environmental condition (REC) refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

• Partner did not identify any recognized environmental conditions during the course of this assessment.

A controlled recognized environmental condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

• Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

 Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An environmental issue refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

The subject property is equipped with two elevator motors located within the back-of-house
portion of the subject property building. The elevator motor in closer proximity to the access
door was observed with absorption pads placed underneath and minor evidence of leakage was
noted. No floor drains were observed near the motor and the releases appear to be surficial in
nature. Minor cracks in the concrete flooring were observed in this area, but no hydraulic fluid
stains were observed in the vicinity of these small cracks. Based on the small quantity and
surficial nature of staining observed, this equipment is not expected to represent a significant
environmental concern.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 468 North Rodeo Drive in the City of Beverly Hills, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and/or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

• The elevator equipment should be repaired as part of routine building maintenance to address the potential source of the leaking.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 468 North Rodeo Drive in the City of Beverly Hills, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E1527-13 constitutes 'all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Morgan Lewis engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of 468 N RODEO DRIVE LLC, a Delaware

limited liability company c/o Morgan Lewis. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

This report has been completed under specific Terms and Conditions relating to scope, relying parties, limitations of liability, indemnification, dispute resolution, and other factors relevant to any reliance on this report. Any parties relying on this report do so having accepted Partner's standard Terms and Conditions, a copy of which can be found at http://www.partneresi.com/terms-and-conditions.php.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to Los Angeles County Fire Department Health Hazardous Materials Division (LACFDHMMD) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner's view of the ground during the site assessment was obstructed due to excessive storage.
 Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 468 in Beverly Hills, California is located on the southeast side of South Santa Monica Boulevard and the northwest side of North Rodeo Drive. According to the Los Angeles County Assessor, the subject property is legally described as "Beverly Lots 1 and Lot 2 Block 2" and Assessor Parcel Number (APN) 4343-016-001.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by Brooks Brothers for commercial retail use. The subject property consists of a two-story structure and is improved with an asphalt-paved parking/loading area throughout the northeast of the property. Onsite operations consist of clothing storage and retail operations. The two-story structure harbors two large showroom areas and various storage areas located on the first and second floors as well as two balconies situated to the southwest and southeast of the subject property structure. Furthermore, the subject property consists of a northeastern back-of-house area located on the first floor which contains various storage rooms and an elevator equipment room. Partner observed two hydraulic elevators located within the central portion of the building.

The subject property is designated for commercial development by the City of Beverly Hills.

The subject property was not identified in the regulatory database report of Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial/retail/residential area of Los Angeles County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediate	ly Surrounding Properties
North:	South Santa Monica Boulevard beyond which are two commercial retail strip centers
	(9455-9497 South Santa Monica Boulevard, 474 North Rodeo Drive, 475 North Beverly
	Drive)
South:	North Rodeo Drive beyond which are MaxMara, Alexander McQueen, Loro Piana and
	Brioni (451-459 North Rodeo Drive)
Southwest:	North Rodeo Drive beyond which are DSquared2, Zadig & Voltaire, and Saint Laurent
	(461-467 North Rodeo Drive, 9500 South Santa Monica Boulevard)
Southeast:	One vacant commercial structure (456 North Rodeo Drive)
East:	The Paley Center for Media (461 and 465 North Beverly Drive)
West:	South Santa Monica Boulevard beyond which is one commercial retail strip center (9507-
	9523 South Santa Monica Boulevard, 479 North Rodeo Drive)

The adjacent properties to the north were identified as EDR Exclusive Historical Cleaners (EDR Hist Cleaner) and Resource Conservation and Recovery Act Small Quantity Generator (RCRA-SQG) sites in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) Beverly Hills, California Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 265 above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping moderately toward the southeast. The subject property structure is not depicted on the 2012 map.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the southeast. The nearest surface water in the vicinity of the subject property is the Franklin Canyon Reservoir located approximately 1.7 miles north of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Beverly Hills Public Works Department serves the subject property vicinity. According to a representative of the Beverly Hills 2017 Annual Water Quality Report, the sources of public water for the City of Beverly hills are the City's Reverse Osmosis Water Treatment Plant (10%) and the Metropolitan Water District (MWD) (90%). The MWD lures water from the Jensen and Weymouth surface water treatment plant which draws from the State Water Project and the Colorado River. The osmosis plant lures water from the City of Beverly Hill's four groundwater wells located within the Hollywood Basin and this treated water is then blended with the MWD water. These waters are stored in steel tanks and throughout the City's reservoirs.

According to a previous subsurface investigation conducted on a nearby property (427 North Crescent Drive, Case # I-10978) the depth of groundwater in the vicinity of the subject property is inferred to be approximately 33 to 50 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property lies within the Los Angeles County Coastal Plain area of the Los Angeles Basin. The plain consists of predominantly alluvial basin-fill material deposited by meandering tributaries of the Santa Ana River system (Morton, et al., 1979). Surficial geology in the subject property vicinity consists of recent alluvium of gravel, sand, silty sand, and clayey silt with an average thickness of 200 feet (Poland, et al., 1956; California DWR, 1967). This recent alluvium is underlain by the upper Pleistocene Lakewood Formation, which averages 500 feet in thickness and consists of alternating stratigraphic zones of coarse-grained sand and clayey silt. The estimated depth to bedrock is more than 1,000 feet.

Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is mapped as Urban land-Anthraltic Xerorthents, loamy substratum-Grommet complex, 0 to 5 percent slopes. This series consists of Human-transported material over young alluvium derived from sedimentary rock. These soils are considered to be well drained with a moderately high permeability rate and a high available water storage capacity.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06037C1585F, dated September 26, 2008, the subject property appears to be located in Zone X, an area located outside of the 100-year and 500-year flood plains.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	Source	Description/Use
1884-1921	Topographic Maps	Undeveloped/Native land
1922	Sanborn Map	Vacant land
1924-1994	Aerial Photographs, City Directories,	Commercial
	Topographic Maps, Sanborn Maps, Online	
	Permits	
1997-Present	Aerial Photographs, City Directories, Assessor	Current commercial structure
	Records, Online Permits	

Tenants on the subject property include various commercial/retail tenants (1925-1991); Tommy Hilfiger (1998-2000); Lawrence Martin Gallery (2000-2006); and Brooks Brothers (2001-Present). According to historical review, the subject property was occupied a printing facility from 1925 to 1929, as further discussed in Section 3.3.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR) on July 20, 2018. The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date: 1928	Scale: 1"=500'

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on Jul 20, 2018. The following observations were noted to be depicted on the subject property and adjacent properties during the fire insurance map review:

Date: 1922	
Subject Property:	Vacant land
North:	Developed with two commercial structures across Burton Way which consist of a
	bank, offices, and vacant units
South:	Vacant land across North Rodeo Drive
Southeast:	Vacant land
Southwest:	Vacant land across North Rodeo Drive
East:	Developed for commercial use; includes offices, a barber shop, hardware/paint
	stores, and a furniture store
West:	Vacant land across Burton Way

Date: 1926	
Subject Property:	Developed with one commercial structure with multiple units occupied by stores, a
	restaurant, a bakery, and a printing facility
North:	Developed as two commercial structures across Burton Way which consist of a bank,
	stores, and a restaurant
South:	Developed with two stores across North Rodeo Drive
Southeast:	No significant changes depicted
Southwest:	Developed with an auto repair, gas station, and various other stores across North
	Rodeo Drive
East:	No significant changes depicted
West:	Developed with two structures with multiple units occupied by stores, including a
	drug store across Santa Monica Boulevard

Date: 1950	
Subject Property:	No structural changes are apparent; occupied by stores and offices; printing facility is no longer listed as a tenant
North:	No structural changes are apparent, occupied by various stores and restaurants across Santa Monica Boulevard
South:	Developed with an additional structure occupied by a paint store across North Rodeo Drive
Southeast:	Developed with one structure
Southwest:	Developed with stores and offices; the automotive repair facility is no longer on the property across North Rodeo Drive
East:	No significant structural changes are apparent, occupied by a bank, offices, and stores
West:	The drug store is now an office; no structural changes across Santa Monica Boulevard

Date: 1969	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
Southeast	No significant changes depicted
Southwest:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Copies of reviewed Sanborn Maps are included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) on July 19, 2018 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Dir	ectory Search for 468 North Rodeo Drive (Subject Property
Year(s)	Occupant Listed
1925	Mortson Francisest, Kson Cora B Clerk Mortson & Co (462 North Rodeo Drive)
1925	Reynolds C M Printer Beverly Hills Citizen, George R Baker Editor and Publisher, various other
	commercial listings (460 North Rodeo Drive)
1933	Western Union Telegraph Co (9509 Santa Monica Boulevard)
1934	Allue Genuine French Hand Laundry (JS Allue) (462 North Rodeo Drive)
1934-	Clark William Manager Southern California Telephone Co (9478 Santa Monica Boulevard)
1945	
1934-	Various commercial listings, including photography (9490 Santa Monica Boulevard)
1945	
1934	Western Union Telegraph (9488 Santa Monica Boulevard)
1937	Central Station Central Ave at Fifth (9486 Santa Monica Boulevard)
1939-	Western Union Telegraph Co (9486 Santa Monica Boulevard)
1945	
1939	Glennon Gloria Beauty Parlor (462 North Rodeo Drive)
1939	Blumenthal S Dresses and Millinery (9509 Santa Monica Boulevard)
1939	Champlin Harry Cameras (1939 Santa Monica Boulevard)
1939-	Peterson S Woman Shop (9496 Santa Monica Boulevard)
1950	
1945-	Various commercial listings including retail (9488 Santa Monica Boulevard)
1958	
1945-	Freeman Jack Floor Coverings Carpets Rugs Asphalt and Rubber Tile, Freeman Jack Floor
1976	Covering Co (460 North Rodeo Drive)
1950-	Various investment and stocks commercial listings (9478 Santa Monica Boulevard)
1971	Cift shan listings (0496 Sente Manice Baulayard)
1950- 1954	Gift shop listings (9486 Santa Monica Boulevard)
1954 1951-	Metal Carpet Anchoring Strip Co Inc (460 North Rodeo Drive)
1954	
1954-	Carroll & Company Mens Furnishings (466 North Rodeo Drive)
1990	Carton a company meneral announgs (400 North Nodeo Enve)
1958	Boyle B E & Co (9486 Santa Monica Boulevard)
1962-	Mayos Antiques (9486 Santa Monica Boulevard)
1967	
1990-	LACB LTD (460 North Rodeo Drive)
1991	
2000	Tommy Hilfiger Inc (466 North Rodeo Drive)
2000-	Lawrence Martin Gallery (460 North Rodeo Drive)
2006	· · · · · · · · · · · · · · · · · · ·
2006-	Brooks Brothers, Brooks Brothers Group Inc (468 North Rodeo Drive)
Present	

According to the city directory review and Sanborn review, the subject property was occupied a printing facility from 1925 to 1929. Based on the presumed short duration of printing operations on-site, this tenant listing is not expected to represent a significant environmental concern.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data	
Name of Agency:	Los Angeles County Fire Department Health Hazardous Materials
	Division (LACFD HMMD)
Point of Contact:	Online database query
Agency Address:	1320 North Eastern Avenue, Los Angeles, California
Agency Phone Number:	(323) 881-2411
Date of Contact:	July 12 and July 16, 2018
Method of Communication:	Online
Summary of Communication:	As of the date of this report, Partner has not received a response
	from the LACFD HMMD for inclusion in this report.

4.1.2 Fire Department

Regulatory Agency Data	
Name of Agency:	Beverly Hills Fire Department (BHFD)
Point of Contact:	Mr. Michael Dunn from the Office of the City Clerk
Agency Address:	455 North Rexford Drive, Suite 290, Beverly Hills, California
Agency Phone Number:	(310) 285-2403
Date of Contact:	July 20, 2018
Method of Communication:	Email
Summary of Communication:	No records regarding hazardous substance use, storage or releases,
	or the presence of USTs and AULs on the subject property were on
	file with the BHFD.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Southern California Air Quality Management District (SCAQMD)
Point of Contact:	Online database
Agency Address:	21865 Copley Drive, Diamond Bar, California
Agency Phone Number:	(909) 396-2000
Date of Contact:	July 20, 2018
Method of Communication:	Online
Summary of Communication:	According to the SCAQMD Online database, the subject property identified as Tommy Hilfiger Retail at 466 North Rodeo Drive obtained a 'Plans & Excavation' Permit on February 27, 2000 under Facility ID 126382 and Application Number 379139. According to this database, this permit was received in connection to SCQAQMC Rule 1415, which involves the installation, repair, maintenance, service, relocation, or disposal of an air conditioning system. There are no reported Notices to Comply or Notices of Violation.

4.1.4 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	GeoTracker and ENVIROSTOR Online databases
Agency Address:	320 W 4th St #200, Los Angeles, California
Agency Phone Number:	(916) 323-2514
Date of Contact:	July 12, 2018
Method of Communication:	Online database
Summary of Communication:	No records regarding hazardous substance use, storage or releases,
	or the presence of USTs and AULs on the subject property were on
	file with the RWQCB.

4.1.5 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	Online database
Agency Address:	9211 Oakdale Avenue, Chatsworth, California
Agency Phone Number:	(877) 786-9427
Date of Contact:	July 12, 2018
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases,
	or the presence of USTs and AULs on the subject property were on
	file with the DTSC.

4.1.6 Building Department

Regulatory Agency Data	
Name of Agency:	Beverly Hills Building Department (BHBD)
Point of Contact:	Online database
Agency Address:	455 North Rexford, Beverly Hills, California
Agency Phone Number:	(310) 285-1124
Date of Contact:	September 10, 2017
Method of Communication:	Email and Online
Summary of Communication:	Records were available for review, as further discussed in the
	following table.

Building Records Reviewed for 468 North Rodeo Drive (Subject Property)

Year(s)	Owner/Applicant	Description
1934	Stanley Anderson	Awning Installation
1935	Stanley Anderson	Steel Frame for Marquise
1998	Tommy Hilfiger	Cocktail Party
1998-	Class Party Rentals	Temporary Tent Installation
1999		
1999	Regan Rents, Inc.	Canopy Tenant Installation
1999	Linda Cervantes	Interior Alteration for Tommy Hilfiger
1999	Tommy Hilfiger	New Cabinets Installation

Phase I Environmental Site Assessment Project No. 18-220933.1 July 31, 2018 Page 22

Building Records Reviewed for 468 North Rodeo Drive (Subject Property)

Year(s)	Owner/Applicant	Description				
2001	Brooks Brothers	Sign and Awning Installation for Retail Clothing				
2003	Brooks Brothers	Architectural Reviews for Retail Clothing (Previously Tomn Hilfiger)				
2003	Newport Awning Company, AGAM Pool and Spa	Awnings with 'Brooks Brothers' Sign				
2003	Commercial Sign & Lighting Inc	Business I. <u>D. Signs for 'Brooks Brothers'</u>				
2003	Jerome Julian	Illuminated Wall Signs for 'Brooks Brothers'				
2003	Erik Sondergaard, Forunat T. Rocio	Film on Windows Installation, Refinish Trellis, New Wall Scones, Building Power Wash				
2003	Erik Sondergaard, Alan Pharr	Tenant Improvement for Brooks Brothers				
2006	Jimmy Paola	Temporary Tent Installation				
2008	Cal West Lighting	Light Change of Exterior				
2011	Illumination Dynamics Inc	Temporary Generator				
2012	Precision Air Conditioning and Mechanical	HVAC Change-Out for Commercial				
2013	Excellence In Air Conditioning Inc	HVAC Repair				

4.1.7 Planning Department

Regulatory Agency Data	
Name of Agency:	Beverly Hills Planning Department (BHPD)
Point of Contact:	Zoning and Property Information Online database
Agency Address:	455 North Rexford, Beverly Hills, California
Agency Phone Number:	(310) 285-1124
Date of Contact:	July 12, 2018
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is zoned BHC3
	for commercial development by the City of Beverly Hills.

4.1.8 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Division of Oil, Gas and Geothermal Resources (DOGGR)
Point of Contact:	Online Well Finder GIS database
Agency Address:	801 K Street, Sacramento, California
Agency Phone Number:	(916) 445-9686
Date of Contact:	July 12, 2018
Method of Communication:	Online
Summary of Communication:	According to DOGGR, no oil or gas wells are located on or adjacent
	to the subject property.

4.1.9 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Los Angeles County Assessor (LACA)
Point of Contact:	Online database
Agency Address:	500 West Temple Street, Room 225, Los Angeles, California
Agency Phone Number:	(213) 974-3211
Date of Contact:	July 12, 2018
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 4343-016-001. The current building was constructed in 1997 and total(s) approximately 23,509 square feet on a 15,255 square-foot lot. No records regarding property ownership or utility information for the subject property was on file with the LACA.

4.1.10 Sanitation District

Regulatory Agency Data	
Name of Agency:	Los Angeles County Sanitation District (LACSD)
Point of Contact:	Ms. Alexandria Pearch
Agency Address:	1955 Workman Mill Road, Whittier, California
Agency Phone Number:	(562) 908-4288
Date of Contact:	July 23, 2018
Method of Communication:	Email
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the LACED.
	file with the LACSD.

4.1.11 Department of Public Works

Regulatory Agency Data	
Name of Agency:	Los Angeles County Public Works Division (LACPWD)
Point of Contact:	Online database
Agency Address:	900 South Fremont Avenue, Alhambra, California
Agency Phone Number:	(626) 458-5100
Date of Contact:	July 12, 2018
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the LACPWD.

A copy of pertinent documents is included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in

this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

Radius Report Data				
Database	Search Radius	Subject	Adjacent	Sites of
Database	(mile)	Property	Properties	Concern
Federal NPL or Delisted NPL Site	1.00	N	Ν	Ν

4.2.1 Regulatory Database Summary

4.2.2 Subject Property Listings

The subject property is not identified in the regulatory database report.

4.2.3 Adjacent Property Listings

The adjacent properties to the north are identified as EDR Hist Cleaner and RCRA-SQG sites in the regulatory database report, as discussed below:

• The property, identified as Commerce Cleaners at 9489 Santa Monica Boulevard, is located adjacent to the north of the subject property. According to the radius report, this site operated as a dry cleaning facility in 1934 identified as Commerce Cleaners. Based on the absence of a

reported release in connection to this listing coupled with the presumed short duration of dry cleaning operations on the site (one year), this listing is not expected to represent a significant environmental concern.

The property, identified as Bobbi Brown – 002 at 9497 Santa Monica Boulevard, is located adjacent to the north of the subject property. According to the radius report and the RCRAInfo Online database, this site is listed as a Small Quantity Generator (SQG) in 2016 and 2017 in regard to ignitable waste, organic solids, and off-speciation, aged, or surplus organics under NAICS Code 446120 (Cosmetics, Beauty Supplies, and Perfume Stores). There are no reported violations in connection to this listing. Based on the lack of reported violations coupled with the absence of a documented release in connection to this site, this listing is not expected to represent a significant environmental concern.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings are identified in the regulatory database report of concern.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the Brownfields Amendments), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The User should provide the following information to the environmental professional. Failure to provide this information could result in a determination that all appropriate inquiries is not complete. The User is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or Reasonably Ascertainable information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from 468 N RODEO DRIVE LLC, a Delaware limited liability company c/o Morgan Lewis (User of this report).

User Responsibilities

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property was not identified and was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

The report user was not identified and was not available to be interviewed at the time of the assessment.

5.1.3 Interview with Key Site Manager

Ms. Parv Ebrahimi, key site manager, indicated that she did not have any information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

Ms. Ebrahimi did not have any knowledge of the historical use of the property.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or reasonably ascertainable within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Jason Bates and Brooke Hasty
Site Assessment Conducted On:	July 24, 2018

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 468 North Rodeo Drive				
Name	Title/Role	Contact Number	Site Walk*	
			Yes/No	
Ms. Parv Ebrahimi	Key Site Manager	(818) 462-3853	Yes	

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the eastern portion of the asphalt parking/loading zone on the subject property. An independent solid waste disposal contractor, Athens Environmental Services, removes solid waste from the subject property. According to property personnel, only household trash is collected in the on-site solid waste dumpsters.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Beverly Hills services the subject property vicinity. No wastewater treatment facilities or septic systems are observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards two storm water drains located within the northern portion of the asphalt parking/loading zone. Storm drains were also observed within the floors of the two balconies on-site. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity/ natural gas provided by Southern California Edison. According to the key site manager, the subject property consists of eight units which are located on the rooftop. One portable air conditioning unit, identified as a 'KwiKool Portable Cooling Systems' apparatus, was identified within a storage area on the second floor.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

Partner identified hazardous substances used, stored, and/or generated on the subject property as noted in the following table:

Hazardous Substances and/or Petroleum Products Noted Onsite				
Substance	Container Size	Location	Nature of Use	Disposal Method
Anti-Wear Hydraulic Oil	1x 5-gallon bucket	Eevator Equipment Room	Eevator Motor Routine Maintenance	N/A

The materials were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. Secondary containment is not provided. Based on the nature of use, overall small quantities observed, presence of secondary containment, and lack of violations on-file with the local fire department, this material is not expected to represent a significant environmental concern.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

Partner observed signs of leaking from an elevator motor as further discussed in Section 6.2.4.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "Non-PCB;" 2) 50 ppm-500 ppm – 'PCB-Contaminated;" and, 3) Greater than 500 ppm – 'PCB-Containing." The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. One vaulted transformer and one indoor transformer were observed on the subject property. The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Additionally, the subject property building is equipped with two hydraulic elevators. The hydraulic fluid contained within elevator systems can potentially contain toxic polychlorinated biphenyls (PCBs). Based on the age of the building (post-1978), it is unlikely that the hydraulic fluid within the equipment contains PCBs. The elevator motor in closer proximity to the access door was observed with absorption pads placed underneath and minor evidence of leakage was noted. No floor drains were observed near the motor and the releases appear to be surficial in nature. Minor cracks in the concrete flooring were observed in this area, but no hydraulic fluid stains were observed in the vicinity of these small cracks. Based on the small quantity and surficial nature of staining observed, this equipment is not expected to represent a significant environmental concern.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building constructed prior to 1981 and have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property building was constructed in 1997. As such, an asbestos evaluation was not required by the scope of services; however, please refer to the table below for observed materials that would be considered suspect ACMs in the event of a thorough survey:

Suspect ACMs			
Suspect ACM	Location	Friable Yes/No	Physical Condition
Floor Tiles	Throughout Building Interior	No	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

Partner was not provided building plans or specifications for review, which may have been useful in determining areas likely to have used ACM.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

A copy of the analytical data is not included in Appendix B of this report.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm² (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint

should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

It is unlikely that LBP is present in buildings constructed after 1977. Therefore, due to the age of the subject property building, it is unlikely that LBP is present.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	Average Predicted Radon Levels	Potential
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Beverly Hills Public Works Department serves the subject property vicinity. According to a representative of the Beverly Hills 2017 Annual Water Quality Report, the sources of public water for the City of Beverly hills are the City's Reverse Osmosis Water Treatment Plant (10%) and the Metropolitan Water District (MWD) (90%). The MWD lures water from the Jensen and Weymouth surface water treatment plant which draws from the State Water Project and the Colorado River. The osmosis plant lures water from the City of Beverly Hill's four groundwater wells located within the Hollywood Basin and this treated water is then blended with the MWD water. These waters are stored in steel tanks and throughout the City's reservoirs. According to the report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises.

6.4.1 PCBs

One vaulted transformer was observed on the eastern adjacent property. No staining or leakage was observed in the vicinity of the transformer. Based on these observations and the likelihood that the subject property does not maintain ownership of the transformer, the presence of adjacent transformers is not expected to represent a significant environmental concern.

7.0 FINDINGS AND CONCLUSIONS

Findings

A recognized environmental condition (REC) refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

• Partner did not identify any recognized environmental conditions during the course of this assessment.

A controlled recognized environmental condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

• Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

• Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An environmental issue refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

The subject property is equipped with two elevator motors located within the back-of-house
portion of the subject property building. The elevator motor in closer proximity to the access
door was observed with absorption pads placed underneath and minor evidence of leakage was
noted. No floor drains were observed near the motor and the releases appear to be surficial in
nature. Minor cracks in the concrete flooring were observed in this area, but no hydraulic fluid
stains were observed in the vicinity of these small cracks. Based on the small quantity and
surficial nature of staining observed, this equipment is not expected to represent a significant
environmental concern.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 468 North Rodeo Drive in the City of Beverly Hills, Los Angeles County, California (the 'subject property'). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed evidence of recognized environmental conditions and/or environmental issues in connection with the subject property. Based on the conclusions of this assessment, Partner recommends the following:

• The elevator equipment should be repaired as part of routine business maintenance to address the potential source of the leaking.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 468 North Rodeo Drive in the City of Beverly Hills, Los Angeles County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

2018-133 - Hasty.pdf 💡 59 KB
Dear Ms. Hasty,
This email serves as response to your public records request of July 12, 2018.
The City does not have any records of Hazmat, USTs/ASTs, or clarifiers, and there are no fire code violations for the property located at 458-472 N. Rodeo Dr. Please note that the Los Angeles County Fire Department is the reporting agency for Hazmat disclosure, and their website may be accessed by clicking "here."
Kind Regards.
Michael Dunn, CMC, CPMCCity of Beverly HillsRecords ManagerCity of Beverly HillsOffice of the City Clerk655 N. Rexford Drive Suite 290Beverly Hills, CA 90210Tel: 310-285-2403 Fax: 310-385-0862
 The City keeps a copy of all E-mails sent and received for a minimum of 2 years. All retained E-mails will be treated as a Public Record per the California Public Records Act, and may be subject to disclosure pursuant to the terms, and subject to the exemptions, of that Act.

2017 Annual Water Quality Report

We are very pleased to share with you the 2017 Annual Drinking Water Quality Report that presents the high quality of your drinking water. This report contains 2016 water quality testing results, explanation of our local water supply, and additional water conservation information.

The City of Beverly Hills is continually working to ensure that all our customers have safe, reliable and high-quality water for years to come. That is why we are implementing the Water Enterprise Plan which focuses and strengthens our water supply portfolio. We are moving forward with increasing local supply for enhanced system resilience. Additionally, our customers and operations staff continues to respond proactively to conservation which enables the City to ensure the viability of our existing water supplies.

I am confident this report will not only illustrate the quality of our water, but our continued commitment to sustainability and delivery of this precious resource for the years to come.

Sincerely,

Trish Rhay Assistant Director of Public Works

THE 2017 WATER QUALITY REPORT

Your Water Meets All Safe Drinking Water Standards

The technical and analytical water quality information presented in this report is required by State health regulations.

These regulations require water suppliers to inform customers where their water comes from, what is in their water, and any violation of standards that may have occurred.

For information or concerns about this report, or your water quality in general, please contact Trish Rhay, Assistant Director of Public Works-Infrastructure and Field Operations, at (310) 285-2467 You may also address your concerns at scheduled Public Works Commission meetings. The Public Works Commission is an advisory group to the City Council that generally meets at 8:00 a.m. on the second Thursday of every month. For exact meeting dates and time, please contact the City Clerk at (310) 285-2400. The Public Works Commission for 2016 includes residents Barry Pressman, Ron Shalowitz, Sandra Aronberg, Jeff Wolfe and Jerrold S. Felsenthal.

This report contains important information about your drinking water. Please share this information or have it translated.

Este informe contiene información muy importante sobre su agua potable. Tradúzcalo ó hable con alguien que lo entienda bien.

این اطلاعیه شامل اطلاعات مهمی راجع به آب آ شامیدنی است. اگر نمیتوانیداین اطلاعات را بزبان انگلیسی

BASIC INFORMATION ABOUT DRINKING WATER COMPONENTS

The sources of drinking water (both tap and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activities.

Components that may be present in source water include:

- Microbial components, such as viruses and bacteria that may come from sewage treatment plants, septic systems, agricultural livestock operations and wildfires.
- **Inorganic components**, such as salts and metals, which can be naturally occurring or result from urban storm runoff, industrial or domestic wastewater discharges, oil and gas production, mining and farming.
- **Radioactive components**, that can be naturally occurring or be the result of oil and gas production or mining activities.
- **Pesticides and herbicides**, that may come from a variety of sources such as agriculture, urban storm water runoff and residential uses.
- **Organic chemical components**, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production and can also come from gasoline stations, urban storm runoff, agricultural application and septic systems.
- The City uses **chloramines** to disinfect your water. The City is required to disinfect your water to prevent waterborne pathogens.
- Your drinking water also contains small amount of **fluoride ions**. This additive helps prevent tooth decays. The fluoride concentration in your water ranges from 0.6 to 1.2 mg/L.
- Your average water hardness is approximately 300 mg/L or 17.5 grains/gallon.

In order to ensure that tap water is safe to drink, the United States Environmental Protection Agency (USEPA) and Division of Drinking Water (DDW) prescribe regulations that limit the amount of certain components in water provided by public water systems. DDW also establishes limits for the components in bottled water that must provide the same protection for public health.

ADDITIONAL CHARACTERISTICS OF OUR DRINKING WATER

- **Disinfection with Chloramines** Your water is disinfected with chloramines, a compound of chlorine and ammonia. This type of disinfectant is very stable and reduces the formation of disinfection by-products in your water. We carefully monitor the amount of chloramine disinfectant to protect the safety of your water.
- Chloramines Chloraminated water is safe for people and animals to drink, and for all other general uses. Three special user groups, including kidney dialysis patients, aquarium owners, and businesses or industries that use water in their treatment process, must remove chloramine from the water prior to use. Hospitals or dialysis centers should be aware of chloramine in the water and should install proper chloramine removal equipment, such as dual carbon adsorption units. Aquarium owners can use readily available products to remove or neutralize chloramine. Businesses and industries that use water in any manufacturing process or for food or beverage preparation should contact their water treatment equipment supplier regarding specific equipment needs.

Water Conservation - Uplifting Update

If you don't want a water wise landscape, at least water wisely! Grass does not have to be a water waster!

Beverly Hills water customers reduced their water use 22% in 2016. This is especially impressive given the State relaxed some regulations mid-year causing many of our neighboring cities conservation efforts to plummet.

The drought is officially over due to the ample rain events this past winter which have filled our reservoirs and created abundant snowpack. Our groundwater aquifers are still low and future rain years are unknown. Therefore, we must always remember *water conservation is a Beverly Hills way of life*.

The City's Water Conservation Administrator, Debby Figoni, assists our customers with conservation efforts through water wise landscaping workshops, large landscape water audits and the City's Water Tracker Program (water.beverlyhills.org).

For more information, visit bhsaves.org, call 310-285-2467 or email DFigoni@beverlyhills.org

Water

Conservation is a

Beverly Hills

Way of Life

Large Landscape Water Evaluations

"Prior audits performed in Beverly Hills have helped residents reduce up to 50% of the total water used at their property!"

A typical single family home uses two-thirds of their total water consumption outdoors to water the landscape. In an effort to help our higher water consumers use water more efficiently, the City is offering large landscape water evaluations. Irrigation professionals will examine every valve and sprinkler in the landscape for water efficiency and provide a comprehensive report detailing adjustments and retrofits that can be implemented in order to reduce water use. There is a fee for the assessment, but the City will cover part of the cost. The resident is responsible for the other rest and for any retrofits they choose to perform. Prior audits performed in Beverly Hills have helped residents reduce up to 50% of the total water used at their property!

To sign up, please call 310-285-2467 or email DFigoni@beverlyhills.org

Control Your (Sprinkler) Controller

Experts estimate that up to 50-percent of residential irrigation water use goes to waste due to evaporation, runoff, or over-watering.

To use water efficiently in your landscape, follow these simple steps that produce great results:

- Communicate with the person who sets your sprinkler controller to make sure the days and times are set the way you want. Install a new 9-volt back-up battery every year in the back of the controller which will keep your settings in case the power goes out.
- Adjust your sprinkler controller with the seasons. The City provides rebates on smart weather-based irrigation controllers that automatically adjust with the weather. For details, visit: SoCalWaterSmart.com
- Check your irrigation system monthly to ensure water is distributed evenly on the landscape and there is no over-spray onto paved areas. Look for an irrigation specialist to keep your system working efficiently.
- Water your landscape up to three days per week, adhering to the City's guidelines. Check for good, even sprinkler coverage. Aerate and dethatch the lawn one to two times per year.
- Landscape with plants that are suited for our climate. Many shrubs in existing landscapes are low water plants and can survive on half of the water they presently receive.
- Sign up for Water Tracker to keep an eye on water usage water.beverlyhills.org

Sign up for the City of Beverly Hills' FREE Water Tracker program to keep track of your daily, weekly or monthly water use.

- This free program can help you save water, money and future headaches!
- 1 To sign up, visit water.beverlyhills.org and click on "signup here".
- 2 Enter your e-mail address and hit "submit".
- **3** Check your email (possibly junk mail) for a link to create a password.
- 4 Sign-in to Water Tracker using your login email address and newly created password.
- 5 To link up your account, enter your 6 digit customer number (check your water bill).
- Note: If your customer number is less than 6 digits, add "0" to the beginning of your number.
- **6** Re-enter your login and password to finalize set up.
- Click "My Water Use" to start observing your usage.
 View your billing cycle usage at "Consumption Summary".
- 8 Set your notifications via "Account Settings" (top bar) to complete your "Account Profile" and hit "Save."

Go to "Water Settings" (side bar) and set:

- 1. "Usage Budget" at 10% above your typical outdoor watering day usage
- (ex: if you use 600 gallons, set it for 660 gallons "daily"), and
- 2. "Continuous Flow Threshold" at 0 in order to be notified of potential leaks.
- 3. Enter your email and cell phone (aka: sms) to receive leak or excessive water use alerts.

Caring for Your Lawn — Water Conservation Tips

If you don't want a water wise landscape, at least water wisely! Grass does not have to be a water waster!

WATERING GUIDELINES

On average, outdoor water use accounts for about two-thirds of a typical home's water use. Many homeowners over water their lawns by 30% to 100%! Not only can over-watering be bad for your lawn, it often causes the excess water to run off the landscape, into the street and down our storm drains.

EASY STEPS TO WATER MORE EFFICIENTLY

- 1. Water between 5:00 pm to 9:00 am (BH Municipal Code).
- 2. Water 3 days a week:

North of Santa Monica Blvd:

October - May: Monday and Friday

June - September: Monday, Wednesday & Friday

South of Santa Monica Blvd:

October - May: Tuesday and Saturday

June - September: Tuesday, Thursday and Saturday

- 3. Use MP rotating sprinkler heads which water slower and more efficiently than traditional sprinkler heads (rebates available at www.SoCalWaterSmart.com).
- 4. Water more efficiently for your type of grass, soil, sprinkler type and location.
- 5. Check and adjust your irrigation system (timer and sprinkler heads) monthly.
- 6. Install a weather based irrigation controller that automatically adjusts with the weather (rebates available at www.SoCalWaterSmart.com).
- 7. Change the back-up battery in your irrigation timer twice a year.

MOWING HEIGHT

Select less thirsty grasses (see options below). Use a longer cut for maximum water conservation and healthier turf. Raise your lawn mower blade to 3" to 3-1/2" in the summer and to 1-1/2'' to 2-1/2'' in the cooler months. A lawn cut higher encourages grass roots to grow deeper, shades the root system and holds in soil moisture better than a closely clipped lawn.

Cool Season Turf Kentucky bluegrass THIRSTY Fescue Marathon Ryegrass

Turf Alternatives

NATER WISE Buffalo Grass Carex Pansa Dymondia

Warm Season Turf

Bermuda

- Zoysia
- St. Augustine
- Kikuyu

Kurapia Creeping Thyma Various groundcovers

OTHER HELPFUL TIPS

- 1. Water in Cycles (aka: Cycle & Soak) Deep watering less frequently encourages stronger, healthier turf with deeper roots. To avoid overwatering and run-off, water in cycles (example: instead of watering for 10 minutes straight, water for 5 minutes at 4:00 am and an hour later, water for another 5 minutes). If you have clay soil or a slope, you may need to split the time into three cycles. This also works well for water wise plants.
- 2. Aerate and Dethatch At least twice a year aerate and dethatch your lawn to help water infiltrate.
- 3. Reduce Lawn Area Expand planter bed borders with drought tolerant plants. Make sure these areas are on separate valves than your grass in order to water these areas appropriately.
- 4. Grasscycle Leave grass clipping on the lawn to naturally decompose. The clippings return nutrients back into the soil and prevent overfilling our landfills.
- **5. Fertilizer** If you fertilize, use an organic compost or composted manure instead of chemical fertilizers. This will build healthier soil, conserve moisture, and be less likely to cause water quality problems if run-off gets into our storm drains.

Finding a Leak

Where, Oh Where, Could Your Water Leak Be?

It is not uncommon for continuous water flow issues to occur in a home or business. Most of the time, they are easy to find and easy to repair. The City of Beverly Hills has a helpful tool called "Water Tracker" that shows the customer their daily water use. Plus, it notifies the customer of continuous flow issues (such as a leak or the irrigation being stuck on). To sign up or Water Tracker, visit: water.beverlyhills.org

	BASIC AREAS TO LOOK FOR LEAKS									
Area	Leak (gallons/hr)	How to Detect It								
Toilet	Up to 200	Put a few drops of food coloring in the toilet tank and wait 15 minutes. If food color leaks to toilet bowl, you have a leak. To avoid staining the toilet, flush after test is completed.								
Irrigation	Up to hundreds	 Check each head and riser for leaks. Check the valve to see if it is leaking. If there are no leaks here, turn off the valve that moves water to your irrigation system (not all homes have this) – Note that this has nothing to do with your irrigation controller. Underground irrigation leaks are more common in older, galvanized pipes. 								
Water Heater	Up to hundreds	Check your heater water leaking into a nearby drain. (Note: This can also cause an increase to your gas bill.)								
Pool, Pond or Jacuzzi	Up to hundreds	 Check float valve to see if it's functioning properly. Check auto fill to see if it's running. Check the water feature for leaks. 								
Pipes	Up to hundreds	 Check pipes to house, especially older, galvanized steel. It may take a leak detection company to detect more challenging leaks. 								

If you cannot find the issue, try to isolate it. Check your water meter (see "How To Read Your Meter" flyer) to see the flow rate. Shut off the valve that supplies water to the irrigation (your gardener may have to help) and check the meter again. If the short read on the meter shows "0", the issue is in your irrigation. If the meter is still registering a flow, turn off the water to the house and check the meter again. If the meter read does not change, the issue may be in the service line (the pipe going from the house to the meter). For leaks you cannot locate or fix yourself, contact a plumber or leak detection company. FYI - A leak of 1 gallon per minute could cost you \$600 to \$1,800 a billing cycle!

	DEFINITIONS		FC	DOTN	OTES

- 1. Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.
- 2. Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. Environmental Protection Agency.
- **3. Public Health Goal (PHG):** The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.
- 4. Maximum Residual Disinfectant Level (MRDL): The level of a disinfectant added for water treatment that may not be exceeded at the consumer's tap.
- Maximum Residual Disinfectant Level Goal (MRDLG): The level of a disinfectant added for water treatment below which there is no known or expected risk to health. MRDLGs are set by the U.S. Environmental Protection Agency.
- 6. **Primary Drinking Water Standard (PDWS):** MCLs and MRDLs for contaminants that affect health along with their monitoring and reporting requirements, and water treatment requirements.
- 7. **Treatment Technique:** A required process intended to reduce the level of a contaminant in drinking water.
- 8. **Regulatory Action Level:** The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

As a Primary Standard, the turbidity levels of the filtered water were less than or equal to 0.3 NTU in 95% of the online measurements taken each month and did not exceed 1 NTU for more than one hour. Turbidity, a measure of the cloudiness of the water, is an indicator of treatment performance. The turbidity levels for grab samples at these locations were in compliance with the Secondary Standard.

Total coliform MCL: No more than 5.0% total coliform-positive samples in a month. Compliance is based on the
 (b) combined distribution system sampling from all of the treatment plants. Three total coliform-positive samples were found out of the 7,106 samples analyzed in 2016. The MCL was not violated.

Acute total coliform (E. coli) MCL: The occurrence of two consecutive total coliform-positive samples, one of (c) which contains E. coli, constitutes an acute MCL violation. No samples were E. coli-positive and the MCL was not violated.

Total coliform TT trigger, Level 1 assessments, and total coliform TT violations: More than 5.0% total coliform (d) positive samples in a month trigger Level 1 assessments. Failure to conduct assessments and correct findings within 30 days is a total coliform violation. No triggers, Level 1 assessments, or violations occurred.

(e) E. coli MCL and Level 2 TT triggers for assessments: Routine and repeat samples are total coliform-positive and either sample is E. coli-positive or system fails to collect all repeat samples following an E. coli-positive sample, or fails to test for E. coli when therepeat sample is total coliform-positive. No samples were E. coli-positive. No MCLs violations or no assessments occurred.

All distribution system samples collected had detectable total chlorine residuals and no HPC was required. (f) (f') HPC reporting level is 1 CFU/mL. Values are based on monthly median per State guidelines and recommendations.

- (g) Data are from samples collected in 2015. Metropolitan's required triennial monitoring (2017-2019) will be performed in 2018.
- (h) Data are from samples collected in 2011 and reported once every nine-year compliance cycle until the next samples are collected.
- Metropolitan's chromium VI reporting level is 0.03 ppb, which is below the state DLR of 1 ppb. Data above (i) Metropolitan's reporting level but below the DLR are reported as ND in this report. These data are available upon request.
- (j) As a wholesaler, Metropolitan has no retail customers and is not required to collect samples at the consumers' tap under the Lead and Copper Rule. Results are based from annual compliance monitoring.
- (k) Metropolitan was in compliance with all provisions of the State's Fluoridation System Requirements.
- Metropolitan's perchlorate reporting level is 0.1 ppb, which is below the state DLR of 4 ppb.Data above (1) Metropolitan's reporting level but below the DLR are reported as ND in this report. These data are available upon request.
- (m) Data are from samples collected (triennially) during four consecutive quarters of monitoring in 2014 and reported for three years until the next samples are collected.
- (n) SWRCB considers 50 pCi/L to be the level of concern for beta particles.
- (o) These data represent the treatment plant specific core locations per the State approved monitoring plan. For the Jensen service area, the data for the B-5 location were excluded when served by the Weymouth treatment plant.
- (p) These data represent the Locational Running Annual Average (LRAA) of all data collected at distribution system-wide monitoring locations.
- (q) No MCL exceedance occurred. Compliance with State and Federal Bromate MCL is based on RAA.
- (r) Noncompliance monthly percentage of coliform-positive samples analyzed at each treatment plant.

 $AI \ge 12.0 = Non-aggressive water$

(s) AI(10.0-11.9) = Moderately aggressive water

AI ≤ 10.0 = Highly aggressive water Reference: ANSI/AWWA Standard C400-93 (R98)

(t) Positive SI index = non-corrosive; tendency to precipitate and/or deposit scale on pipes Negative SI index = corrosive; tendency to dissolve calcium carbonate

City Information and Guidelines

Beverly Hills is in Stage C water conservation restrictions. This requires a 20% reduction in water use citywide. For ways you can use water more efficiently, visit **www.bhsaves.org**. City staff are here to help! Let's work together to make water conservation a Beverly Hills way of life.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

RITE AID #5462	300 N CANON DR	ESE 1/8 - 1/4 (0.239 mi.)	L59	77

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/30/2018 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 13 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 13 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

. Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
. Waste code: . Waste name:	D002 A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/13/2018 Date Data Arrived at EDR: 05/30/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 23 Source: EPA Telephone: N/A Last EDR Contact: 07/06/2018 Next Scheduled EDR Contact: 10/15/2018 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 1 Telephone 617-918-1143

EPA Region 3 Telephone 215-814-5418

EPA Region 4 Telephone 404-562-8033

EPA Region 5 Telephone 312-886-6686

EPA Region 10 Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/13/2018 Date Data Arrived at EDR: 05/30/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 23

Source: EPA Telephone: N/A Last EDR Contact: 07/06/2018 Next Scheduled EDR Contact: 10/15/2018 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 07/06/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 10/15/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 05/18/2018 Date Data Arrived at EDR: 05/30/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 23

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 05/18/2018 Date Data Arrived at EDR: 05/30/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 23 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 07/06/2018 Next Scheduled EDR Contact: 07/30/2018 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/01/2018	Source: EPA
Date Data Arrived at EDR: 03/28/2018	Telephone: 800-424-9346
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 06/28/2018
Number of Days to Update: 86	Next Scheduled EDR Contact: 10/08/2018

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/28/2018 Next Scheduled EDR Contact: 10/08/2018 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/28/2018 Next Scheduled EDR Contact: 10/08/2018 Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/28/2018 Next Scheduled EDR Contact: 10/08/2018 Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 06/28/2018 Next Scheduled EDR Contact: 10/08/2018 Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 02/16/2018Source: Department of the NavyDate Data Arrived at EDR: 02/22/2018Telephone: 843-820-7326Date Made Active in Reports: 05/11/2018Last EDR Contact: 05/09/2018Number of Days to Update: 78Next Scheduled EDR Contact: 08/27/2018Date Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/27/2018	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 04/30/2018 Date Data Arrived at EDR: 05/02/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 51 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 05/02/2018 Next Scheduled EDR Contact: 08/13/2018 Data Release Frequency: Quarterly

State and tribal landfill and/or solid waste disposal site lists

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 05/14/2018 Date Data Arrived at EDR: 05/16/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 37 Source: Department of Resources Recycling and Recovery Telephone: 916-341-6320 Last EDR Contact: 05/16/2018 Next Scheduled EDR Contact: 08/27/2018 Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 03/19/2018 Date Data Arrived at EDR: 03/21/2018 Date Made Active in Reports: 06/08/2018 Number of Days to Update: 79 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 06/20/2018 Next Scheduled EDR Contact: 10/01/2018 Data Release Frequency: Semi-Annually

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

	Data Release Frequency: No Update Planned

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005 Date Data Arrived at EDR: 08/03/2006 Date Made Active in Reports: 08/24/2006 Number of Days to Update: 21 Source: Department of Toxic Substance Control Telephone: 916-323-3400 Last EDR Contact: 02/23/2009 Next Scheduled EDR Contact: 05/25/2009 Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/30/2018 Date Data Arrived at EDR: 05/02/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 51 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 05/02/2018 Next Scheduled EDR Contact: 08/13/2018 Data Release Frequency: Quarterly

CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 06/30/2017 Date Data Arrived at EDR: 08/18/2017 Date Made Active in Reports: 09/21/2017 Number of Days to Update: 34 Source: Department of Toxic Substances Control Telephone: 916-255-6504 Last EDR Contact: 07/05/2018 Next Scheduled EDR Contact: 10/22/2018 Data Release Frequency: Varies

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995 Date Data Arrived at EDR: 08/30/1995 Date Made Active in Reports: 09/26/1995 Number of Days to Update: 27 Source: State Water Resources Control Board Telephone: 916-227-4364 Last EDR Contact: 01/26/2009 Next Scheduled EDR Contact: 04/27/2009 Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/22/2018 Date Data Arrived at EDR: 03/01/2018 Date Made Active in Reports: 05/11/2018 Number of Days to Update: 71 Source: Drug Enforcement Administration Telephone: 202-307-1000 Last EDR Contact: 05/30/2018 Next Scheduled EDR Contact: 09/10/2018 Data Release Frequency: Quarterly

CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/23/2018 Date Data Arrived at EDR: 04/24/2018 Date Made Active in Reports: 06/07/2018 Number of Days to Update: 44 Source: CalEPA Telephone: 916-323-2514 Last EDR Contact: 04/24/2018 Next Scheduled EDR Contact: 08/06/2018 Data Release Frequency: Quarterly

Local Lists of Registered Storage Tanks

SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994 Date Data Arrived at EDR: 07/07/2005 Date Made Active in Reports: 08/11/2005 Number of Days to Update: 35 Source: State Water Resources Control Board Telephone: N/A Last EDR Contact: 06/03/2005 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

UST MENDOCINO: Mendocino County UST Database

A listing of underground storage tank locations in Mendocino County.

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 01/28/2018	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 03/01/2018	Telephone: 916-323-3400
Date Made Active in Reports: 04/16/2018	Last EDR Contact: 05/31/2018
Number of Days to Update: 46	Next Scheduled EDR Contact: 09/17/2018
	Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 05/13/2018 Date Data Arrived at EDR: 05/30/2018 Date Made Active in Reports: 06/29/2018 Number of Days to Update: 30 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 07/06/2018 Next Scheduled EDR Contact: 08/06/2018 Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 02/08/2018 Date Data Arrived at EDR: 02/08/2018 Date Made Active in Reports: 02/08/2018 Number of Days to Update: 0 Source: DTSC and SWRCB Telephone: 916-323-3400 Last EDR Contact: 06/06/2018 Next Scheduled EDR Contact: 09/17/2018 Data Release Frequency: Semi-Annually

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation:	265 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5630733 BEVERLY HILLS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE	
Flood Plain Panel at Target Property	FEMA Source Type
06037C1585F	FEMA FIRM Flood data
Additional Panels in search area:	FEMA Source Type
06037C1595F	FEMA FIRM Flood data
NATIONAL WETLAND INVENTORY	NWI Electronic
<u>NWI Quad at Target Property</u> BEVERLY HILLS	Data Coverage YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:		
Search Radius:	1.25 miles	
Status:	Not found	

AQUIFLOW

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

a hydric soil.

Soil Component Name:	URBAN LAND
Soil Surface Texture:	variable

APPENDIX D: QUALIFICATIONS

Education

B.A., in Geography / Environmental Studies, Political Science and Environmental Systems & Society Minors University of California Los Angeles (UCLA)

Highlights

- 10 years in the environmental consulting industry, conducting and managing Phase I Environmental Site Assessments (Phase I ESAs)
- 7 years managing multiple scope projects, including Phase I ESAs, Property Condition Assessments (PCAs), Seismic assessments, ALTA Surveys, Zoning reports, and Asbestos, Lead Based Paint, Radon, Mold, and Methane assessments/screenings
- Experienced in different property types including rural/agricultural land, single and multi-family residential, commercial office and retail (i.e. gas stations and dry cleaners), and industrial and manufacturing operations

Experience Summary

Mr. Bates serves as a Principal and Senior Project Manager for Partner Engineering and Science, Inc. (Partner), performing and managing Phase I Site Assessments in accordance with EPA's All Appropriate Inquiry (AAI) and the American Society of Testing and Materials (ASTM) standard, as well as customized client formats and requirements. Mr. Bates also manages multiple scope projects, and works directly with clients to discuss any specific requirements as well as report findings and recommendations.

Mr. Bates works with large financial institutions including top lenders, equity firms and investors, as well as the Federal Deposit Insurance Corporation (FDIC). For the FDIC, Mr. Bates serves as the Lead Project Manager in managing Phase I ESAs. Mr. Bates also has extensive experience working with many asset management groups, real estate firms and brokers, law firms, and individual owners or prospective buyers.

Mr. Bates entered the environmental consulting industry as a Project Staffer, conducting Phase I ESA assessments. Mr. Bates' thorough breath of field experience quickly translated well into transitioning to project management and conducting technical report reviews. Mr. Bates has completed over thousands of Phase I ESAs and limited environmental scope reports, and peer reviewed hundreds of third-party Phase I and Phase II reports. Mr. Bates has also conducted radon testing, and asbestos and lead based paint sampling throughout Southern California. As a project manager, Mr. Bates has also shown strong provess in portfolio management, successfully completing various portfolios of up to more than 125 sites.

Mr. Bates is also committed to furthering Partner's position as an industry leader, and is actively involved with internal technical training programs, team management strategies, and marketing.

Project Experience

Mr. Bates has worked on numerous large scope and high profile projects including commercial high rise and new development projects located in Los Angeles, New York City, and throughout the southeastern US.

Gas Station Portfolio, Northern California. Mr. Bates managed a large number of gas station Phase I ESAs on a fast turnaround that involved significant regulatory agency file and historical reviews.

Sheraton Atlanta, Downtown Atlanta, Georgia. Mr. Bates managed multiple scope assessments that were performed on this centrally located 763 room hotel in Downtown Atlanta.

Various Borrower to Lender/Agency Portfolios. Mr. Bates managed several portfolios with multiple scope assessments that were performed to meet borrower requirements and then were converted to meet lender and/or agency-specific requirements.

Stater Bros. Supermarkets Portfolio, Nationwide. Mr. Bates conducted technical report reviews as part of this 300 site portfolio.

40,000 Acres of Land, Hobbs, New Mexico. Mr. Bates conducted the Phase I ESA on this large ranchland site, with Federal and State lands, agricultural, and oil and gas well development concerns.

Fig Central Development, Downtown Los Angeles, California. Mr. Bates managed multiple scope assessments that were performed on this high profile area in Downtown Los Angeles, adjacent to the Staples Center. The assessments were conducted on a 4.6 acre lot in anticipation of a new development including luxury condos, a five star hotel, and 200,000 square feet of commercial space that will feature an open-air shopping mall.

Education

MBA, University of Miami BBA, University of Michigan

Highlights

Over 11 years in the Commercial Real Estate Due Diligence Industry 11 assisting clients with their Due Diligence including ALTA Land survey, Zoning reports, Property Condition

Assessments, Phase I's, II's, ADA Seismic Reports 7 years specifically with Phase I's, II's, Property Condition Assessments, ADA and Seismic Reports

Experience Summary

Mr. Kidd brings over 20 years of experience of sales and account management experience to his role as National Client Manager for Partner Engineering and Science, Inc (Partner). For the last 11 years, Mr. Kidd served as the western region's director for Bock & Clark, expanding the reach of the company from ALTA Surveys to a full-fledged due diligence company, including zoning reports and environmental and engineering due diligence.

An experienced marketing, promotional, and business development professional, Mr. Kidd currently serves as a National Client Manager for Partner, providing solutions to clients' due diligence and engineering needs. He is responsible for all aspects of client management, including ensuring consistency, quality, and on-time delivery of due diligence and engineering services provided by Partner. Current day-to-day responsibilities include business development, client management, project oversight, staff supervision, and technical assistance.

Project Experience

Mr. Kidd works with REIT's, Title Companies, Financial Institutions, Freddie and Fannie and Law Firms throughout North America. Projects include various property types, such as, Multi-Family, Industrial, Shopping Centers, Fast Food Corporate and Franchise as well as Student Housing and Retirement Facilities.

Portfolio Management/Transaction Due Diligence

Independent Living Community Portfolio. Assisted leading independent living owner/operator with the disposition of an approximately \$640 million-dollar portfolio 28 properties, containing 3,298 units across 21 states. To help facilitate the disposition of the assets, ALTA land surveys were completed within a three-week time frame.

1031 Exchange Firm. Assisted a national 1031 exchange firm which has over \$1 billion of assets under management, 10+ million square feet of value-added multifamily, with their ALTA survey, Zoning reports and Phase I reporting.

Healthcare REIT. Over a ten-year period assisted one of the largest healthcare REIT, with ALTA land surveys and zoning reports for a variety of real estate acquisitions. Including senior housing, life science, medical office, and hospitals.
