Subject: **Phase I Environmental Site Assessment**
1881, 1883, 1891 and 1899 West San Carlos Street
San Jose, California 95128
AEI Project No. 427453
Client Reference No. 20-085
Client Reference Name: 1881 West San Carlos Project

Dear Shannon George:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (408) 829-8679 or TGolino@aeiconsultants.com.

Sincerely,
DRAFT
Tory Golino
Vice President
AEI Consultants

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by David J. Powers & Associates to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 1881, 1883, 1891 and 1899 West San Carlos Street, San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	1881, 1883, 1891 and 1899 West San Carlos Street, San Jose, Santa Clara County, California 95128
Historical Addresses	1877-1899 West San Carlos Street (odd # addresses) 1-17 Boston Ave (odd # addresses) 2-22 Brooklyn Avenue (even # addresses)
Property ID (APN or Block/Lot)	274-16-049, 050, 051, 052, 053, 069, 070
Location	Northern side of West San Carlos Street, western side of Boston Avenue and eastern side of Brooklyn Avenue
Property Type	Retail - Strip Center
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	1.24/Assessor
Number of Buildings	4
Building Construction Date(s)/Source	1925 and 1939/Site Inspection
Building Square Footage (SF)/Source	28,358/Site Inspection
Number of Floors/Stories	One and Two-Story Structures
Basement or Subgrade Area(s)	None identified
Number of Units	12
Additional Improvements	Asphalt-paved parking/drive areas, concrete-paved walkways, landscaped areas, and multiple storage trailers (storage of donated household and clothing items for Teen Challenge Thrift Store - 1897 West San Carlos)
On-site Occupant(s)	Antiques Colony (1881 West San Carlos Street) Antiques (1883 West San Carlos Street) Briarwood Antiques (1885 and 1887 West San Carlos Street) Vacant (1889 West San Carlos Street) Four residential tenants (1891 West San Carlos Street) Burbank Antiques (1893 West San Carlos Street) Teen Challenge Thrift Store (1897 West San Carlos Street) Pro Audio World (1899 West San Carlos Street)
Current On-site Operations/Use	General residential, office and retail uses
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	EDR Historic Cleaners

A chronological summary of historical subject property information is as follows:

DRAFT

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1915	Unknown use/Data failure; refer to Section 1.6.1	N/A
1915-1920s	Residential	Sanborn Map and city directories
1925 and 1939-Present	Current buildings constructed for residential and commercial uses, and have been occupied by: A possible auto repair shop, self-serve laundry facility, copy shop, drug store, furniture stores, grocery store and various retail stores	Agency records, Sanborn maps, aerial photographs, city directories, agency records, interviews and site observations

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Multi-family residential apartment building (22-32 Brooklyn Avenue) and a residence (19 Boston Avenue)	32 Brooklyn - RCRA Non-Gen
East	Boston Avenue followed by: Residences (6 & 12 Boston Avenue) and San Carlos Market & Liquor (1875 West San Carlos Street)	None identified
South	West San Carlos Street followed by: Lunch Box Restaurant (1876 West San Carlos), Tina's Salon & Barber Shop (1878 West San Carlos), Gulzaar Halaal (1880 West San Carlos), Mars Ink (1884 West San Carlos), Brick House Fitness (1886 West San Carlos), Edna Ray Chinese Restaurant (1890 West San Carlos), Raymond Avenue and K&K Sound and Iglesia Evangelica Bethania (1908/1910 West San Carlos Street)	1886 West San Carlos - HAZNET, HAZMAT, HWTS, CUPA Listings
West	Brooklyn Avenue followed by: 99 Cent Only Stores (1915 West San Carlos Street)	CERS Hazardous Waste, CERS, RCRA Non-Gen, CUPA Listings, HAZMAT, EDR Historical Cleaners, LUST, SLIC, Historic Cortese, Non-Case Info

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

DRAFT

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

- Due to the age of the subject property buildings, there is a potential that ACMs are present. According to the User, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.
- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition and worker/ occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- AEI observed interior areas of the subject property buildings in order to identify the presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. However, water stained ceiling material was observed in the 1893 West San Carlos building. The source of water staining was reportedly plumbing leaks and/or overflowing bathtubs in the residential units above. However, the subject property buildings are planned for demolition in the near future. As such, no additional action or investigation of the water intrusion issue appears warranted at this time.

DRAFT

- Review of historical city directories identified 'Henry Ward - auto repair' as a tenant of 11 Boston Avenue in 1930. It is unknown if auto repair operations occurred onsite or if the listing was a reference to a residential tenant's occupation (commonly provided in older directories). The location of the former 11 Boston Avenue building appeared to be at the northern end of the existing 1881 West San Carlos Street structure. Henry Ward was no longer an occupant of 11 Boston Avenue in the 1935 directory, and that former address was no longer listed in the 1940 city directory or in subsequent directories. Considering the length of time since Henry Ward was located at the subject property (at least 85 years), the single year listing, and removal of the former building and replacement with the existing structure, the possible former auto repair uses at the subject property is not expected to represent a significant environmental concern.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 1881, 1883, 1891 and 1899 West San Carlos Street, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

DRAFT

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 1881, 1883, 1891 and 1899 West San Carlos Street, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

DRAFT

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

DRAFT

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
- Due to the large volume of materials within portions of the buildings and vehicles parked within exterior areas, direct visual observation of many of the floor and wall areas of the buildings and exterior ground surfaces was not possible. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.
- AEI was not granted access to the interiors of the shipping containers. Based upon their presumed use for general storage, this limitation is not expected to alter the overall findings of this assessment.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

DRAFT

1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was a Sanborn fire insurance map from 1915 indicating that the subject property was developed with residences. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	City directories, Sanborn fire insurance maps, aerial photographs, agency records, interviews

1.6.2 SIGNIFICANT DATA GAPS

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of David J. Powers & Associates. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by David J. Powers & Associates on September 18, 2020. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

DRAFT

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

PROPERTY INFORMATION	
Site Address(es)	1881, 1883, 1891 and 1899 West San Carlos Street, San Jose, Santa Clara County, California 95128
Historical Addresses	1877-1899 West San Carlos Street (odd # addresses) 1-17 Boston Ave (odd # addresses) 2-22 Brooklyn Avenue (even # addresses)
Property ID (APN or Block/Lot)	274-16-049, 050, 051, 052, 053, 069, 070
Location	Northern side of West San Carlos Street, western side of Boston Avenue and eastern side of Brooklyn Avenue
Property Type	Retail - Strip Center
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	1.24/Assessor
Number of Buildings	4
Building Construction Date(s)/Source	1925 and 1939/Site Inspection
Building Square Footage (SF)/Source	28,358/Site Inspection
Number of Floors/Stories	One and Two-Story Structures
Basement or Subgrade Area(s)	None identified
Number of Units	12
Additional Improvements	Asphalt-paved parking/drive areas, concrete-paved walkways, landscaped areas, and multiple storage trailers (storage of donated household and clothing items for Teen Challenge Thrift Store - 1897 West San Carlos)
On-site Occupant(s)	Antiques Colony (1881 West San Carlos Street) Antiques (1883 West San Carlos Street) Briarwood Antiques (1885 and 1887 West San Carlos Street) Vacant (1889 West San Carlos Street) Four residential tenants (1891 West San Carlos Street) Burbank Antiques (1893 West San Carlos Street) Teen Challenge Thrift Store (1897 West San Carlos Street) Pro Audio World (1899 West San Carlos Street)
Current On-site Operations/Use	General residential, office and retail uses
Current Use of Hazardous Substances	Yes; refer to Section 7.1
REGULATORY INFORMATION	
Regulatory Database Listing(s)	EDR Historic Cleaners

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	City of San Jose
Sewage Disposal/Treatment	City of San Jose

DRAFT

Utility source/system information listed in the table above is provided by Mr. David Silberstein, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a mixed residential and commercial area of San Jose, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Multi-family residential apartment building (22-32 Brooklyn Avenue) and a residence (19 Boston Avenue)	32 Brooklyn - RCRA Non-Gen
East	Boston Avenue followed by: Residences (6 & 12 Boston Avenue) and San Carlos Market & Liquor (1875 West San Carlos Street)	None identified
South	West San Carlos Street followed by: Lunch Box Restaurant (1876 West San Carlos), Tina's Salon & Barber Shop (1878 West San Carlos), Gulzaar Halaal (1880 West San Carlos), Mars Ink (1884 West San Carlos), Brick House Fitness (1886 West San Carlos), Edna Ray Chinese Restaurant (1890 West San Carlos), Raymond Avenue and K&K Sound and Iglesia Evangelica Bethania (1908/1910 West San Carlos Street)	1886 West San Carlos - HAZNET, HAZMAT, HWTS, CUPA Listings
West	Brooklyn Avenue followed by: 99 Cent Only Stores (1915 West San Carlos Street)	CERS Hazardous Waste, CERS, RCRA Non-Gen, CUPA Listings, HAZMAT, EDR Historical Cleaners, LUST, SLIC, Historic Cortese, Non-Case Info

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 Physical Setting

Geologic Unit: Description/Source	Marine sedimentary and alluvial deposits of the Cenozoic era/USGS and United States Department of the Interior
Soil Series: Description/Source	The USDA Soil Survey indicated that the subject property is classified as Urban Land-Campbell Complex, which is described as moderately well drained silt loam, silty clay loam and silty clay soil with a depth of 79 inches. The parent material is described as alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. The Urban Land Index indicated that 70% of the site area is classified as urban land, with the remaining 30% classified as Campbell and minor components.
Groundwater Flow Direction/Source	North-Northwest/SCVWD's September 26, 1996 LUST Case Closure Summary for Regal/Gambucci - 2211 Stevens Creek Boulevard (located approximately 750 feet west of the subject property), via GeoTracker
Estimated Depth to Groundwater/ Source	44 feet bgs/SCVWD's September 26, 1996 LUST Case Closure Summary for Regal/Gambucci - 2211 Stevens Creek Boulevard (located approximately 750 feet west of the subject property)

DRAFT

Surface waters on the subject property or adjoining sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1915	Unknown use/Data failure; refer to Section 1.6.1	N/A
1915-1920s	Residential	Sanborn Map and city directories
1925 and 1939-Present	Current buildings constructed for residential and commercial uses, and have been occupied by: A possible auto repair shop, self-serve laundry facility, copy shop, drug store, furniture stores, grocery store and various retail stores	Agency records, Sanborn maps, aerial photographs, city directories, agency records, interviews and site observations

Review of historical city directories identified Henry Ward - auto repair as a tenant of 11 Boston Avenue in 1930. The location of the former 11 Boston Avenue building appeared to be at the northern end of the existing 1881 West San Carlos Street structure. Henry Ward was no longer an occupant of 11 Boston Avenue in the 1935 directory, and that former address was no longer listed in the 1940 city directory and subsequent directories. Considering the length of time since Henry Ward was located at the subject property (at least 85 years) and removal of the former building and replacement with the existing structure, the possible former auto repair uses at the subject property is not considered an REC. No additional action or investigation appears warranted at this time.

AEI did not identify any additional potential environmental concerns in association with the current or historical use of the subject property.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR and Google Earth collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939	The subject property appears to be developed with the existing commercial-type buildings, and several residential-type buildings.	NORTH: Residential EAST: Roadway followed by residential and commercial-type buildings SOUTH: Roadway followed residential and commercial-type buildings (old railway right of way visible) WEST: Roadway followed residential and commercial-type buildings

DRAFT

Year(s)	Subject Property Description	Adjoining Site Descriptions
1948	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: Roadway followed commercial-type buildings WEST: No significant changes
1950, 1956	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
1963	No significant changes are visible, except for the removal of residential-type buildings at the northwestern corner of the property. The northwestern portion of the subject property appears to be a parking lot.	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: Roadway followed by a new commercial-type building, parking lot and residential-type building
1968, 1974, 1982	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
1993	No significant changes are visible, except for the removal of residential-type buildings at the northeastern corner of the property. The northeastern portion of the subject property appears to be a parking lot.	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: Roadway followed by a commercial-type building and parking lot
2005	No significant changes are visible, except for the addition of possible storage containers on the northern portion of the site	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes
2006, 2009, 2010, 2012, 2019	No significant changes	NORTH: No significant changes EAST: No significant changes SOUTH: No significant changes WEST: No significant changes

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the aerial photograph review.

Due to poor image quality and/or scale, detailed observation of site features was not possible in various images.

DRAFT

3.2 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1915	The subject property is depicted as developed with five residences and multiple out buildings. (2231-2311 Stevens Creek, 1-17 Boston)	NORTH: Undeveloped land EAST: Boston Avenue followed by residences, a store, hall and out buildings SOUTH: Stevens Creek Road followed by vacant land and the Peninsula Railway Company right-of-way WEST: Brooklyn Avenue followed by vacant land and residences
1950	The subject property is depicted as developed with multiple stores, bakery, self serve laundry, residences and out buildings. (1877-1899 W San Carlos, 1-17 Boston)	NORTH: Residences and garages EAST: Boston Avenue followed by residences, stores, hall and out buildings SOUTH: West San Carlos Street followed by a restaurant, stores, road, used auto sales lot, and offices WEST: Brooklyn Avenue is located adjacent to the west, followed by a restaurant, residences and out buildings. A clothes cleaning facility is located farther to the west (approximately 180 feet away).
1956	The subject property is depicted as developed with multiple stores, bakery, furniture store, residences and out buildings. (1877-1899 W San Carlos, 1-17 Boston)	NORTH: No significant changes depicted EAST: No significant changes depicted SOUTH: West San Carlos Street followed by stores, road and US Post Office WEST: No significant changes depicted
1966	The subject property is depicted as developed with multiple stores, furniture stores, a residence, garage and parking lot. (1877-1899 W San Carlos, 1-17 Boston)	NORTH: No significant changes depicted EAST: No significant changes depicted SOUTH: West San Carlos Street followed by stores, road, restaurant and US Post Office WEST: Brooklyn Avenue is located adjacent to the west, followed by a parking lot, steam laundry facility and a residence.

The eastern side of the subject property was historically occupied by a self-serve laundry facility. Refer to Section 5.1 for discussion.

AEI did not identify any additional potential environmental concerns in association with the historical use of the subject property during the Sanborn map review.

The former dry cleaning/steam laundry facility west of Brooklyn Avenue is discussed in Section 5.1.

DRAFT

Railroad tracks were historically located adjoining to the south, within the current West San Carlos Street right of way. Railroad tracks and spurs represent environmental concerns due to the historical application of oils containing PCBs, herbicides, and arsenic for pest and weed control, as well as the potential presence of creosote on the rail ties, and the historical common practice of using coal cinders for track fill material. However, the area of the former railroad tracks is currently paved over, prohibiting any direct contact with near surface soils.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Please refer to the appendices for a complete list of historical subject property tenants identified by EDR. Directories were reviewed in approximate five-year increments from 1922 to 2017. The first listing for the subject property appeared in 1922. The following table summarizes the results of the city directory search.

Year(s)	Address - Occupant Listed
1922	15 Boston – Residential 17 Boston – Residential 22 Brooklyn Avenue – Vacant
1925	15 Boston – Residential 17 Boston – Residential 22 Brooklyn Avenue – Residential
1930	**11 Boston – Henry Ward auto repair** 15 Boston – Residential 17 Boston – Residential 22 Brooklyn Avenue – Residential
1935	11 Boston – Vacant 15 Boston – Residential 17 Boston – Vacant 22 Brooklyn Avenue – Residential
1940	15 Boston – Residential 17 Boston – Residential 22 Brooklyn Avenue – Residential
1945	15 Boston – Residential 17 Boston – Residential 22 Brooklyn Avenue – Residential 1877 San Carlos – E A Barsi drugs 1883 San Carlos – A A Farrill used furniture 1885 San Carlos – Prandi Giuseppi baker 1887 San Carlos - Jeweler 1889 San Carlos - Variety store 1891 San Carlos – Residential 1893 San Carlos - Used furniture 1899 San Carlos – Ferrero Brothers grocery
1950	15 Boston – Residential 17 Boston – Residential 22 Brooklyn Avenue – Residential 1877 San Carlos – Burbank Pharmacy 1883 San Carlos – Mrs Genevieve Davis women's furnishings 1885 San Carlos – Prandi Giuseppi baker 1887 San Carlos - Jeweler 1889 San Carlos - gift shop

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

Review of historical city directories identified 'Henry Ward - auto repair' as a tenant of 11 Boston Avenue in 1930. It is unknown if auto repair operations occurred onsite or if the listing was a reference to a residential tenant's occupation (commonly provided in older directories). The location of the former 11 Boston Avenue building appeared to be at the northern end of the existing 1881 West San Carlos Street structure. Henry Ward was no longer an occupant of 11 Boston Avenue in the 1935 directory, and that former address was no longer listed in the 1940

DRAFT

city directory or in subsequent directories. Considering the length of time since Henry Ward was located at the subject property (at least 85 years), the single year listing, and removal of the former building and replacement with the existing structure, the possible former auto repair uses at the subject property is not expected to represent a significant environmental concern.

AEI did not identify any additional potential environmental concerns in association with the historical use of the subject property during the city directory review.

3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Environmental Health Department (SCCEHD)	September 18, 2020	Website/ Email	Ms. Anna Cortez	No records on file

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
State Water Resources Control Board (SWRCB)	September 18, 2020	Website	GeoTracker	No records on file

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of San Jose Fire Department (SJFD)	September 18, 2020	Website/ Email	Ms. Erica Lopez	No records on file via email request. Website contained only a 2008 fire code investigation re: Kiddie World.

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of San Jose Building Department (SJBD)	September 18, 2020	Website	Staff	Records discussed below
Santa Clara County Building Department (SCCBD)	September 18, 2020	Website and Telephone	Staff	No records on file

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1965	Elvin Crema	Building permit for 4-unit 2-story residential building (17 Boston Avenue) - permit voided (not built)
1982	Steve Dorsa	Electrical permit for a sign shop (1867 West San Carlos Street)
1987	Omega Electrical Company	Cancelled electrical permit for a retail store (1899 West San Carlos Street) - property not located within the City of San Jose

DRAFT

It appears that 1881 West San Carlos Street parcel is located within the City of San Jose, with the remaining areas located in Burbank (unincorporated San Jose).

SJBD's online permit website included an August 25, 2020 Conditional Use Permit to allow a 6-story, 187,400-square foot mixed-use development consisting of a 157-bed Residential Care Facility for the Elderly, 61 multi-family residential units, and 6,000 square-foot ground floor retail space with alternative parking (stackers) on the ground floor and in the basement on a 1.23-acre site.

In July 2020, an application was made to annex five parcels from County to City.

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the SJBD.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
City of San Jose Planning Department (SJPD) and Santa Clara County Planning Department (SCCPD)	September 18, 2020	Website and Telephone	Staff	No evidence indicating the existence of AULs on file for the subject property

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Assessor's Office	September 18, 2020	Website	N/A	Information obtained is discussed below

Records Summary

APN	274-16-049, 050, 051, 052, 053, 069, 070
Acreage	1.24 acres
Construction Date	Not provided
Building Square Footage	Not provided
Current Owner	Not provided

4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	September 18, 2020	Website	N/A	Records discussed below
CA DTSC EnviroStor	September 18, 2020	Website	N/A	No records on file

DRAFT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Bay Area Air Quality Management District (BAAQMD)	September 18, 2020	Website and Email	Rochele Henderson	No records on file
Valley Water (VW) Wells and Historical Fuel Leaks/ Solvents databases	September 18, 2020	Website	N/A	No records on file

HWTS Records

HWTS included one record for the subject property as discussed below:

- Copyland (1893 West San Carlos Street) - This site is listed as an inactive hazardous waste transporter facility as of June 30, 2000. Manifest records identified the removal and offsite disposal of photo chemical/photo processing wastes under manifest in 1996, 1997 and 1998. The business was present as early as 1986, per city directories. Based on the apparent small-scale operations, presumed nature of operations (retail photocopy center) and lack of a documented release, this former tenancy is not expected to represent a significant environmental concern.
- Sparks Racing Ent (10 Boston) - This site had an EPA ID number, but no waste manifests.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	September 18, 2020	CalGEM Map	Information obtained is discussed below

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	September 18, 2020	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	See Below	✔	✔	

Facility Name	Burbank Laundromat
Address	7 Boston Avenue
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	EDR Historic Cleaners
Comments	The EDR Historic Cleaners indicated that Burbank Laundromat (7 Boston Avenue) was a self-serve laundry facility at the subject property in 1950. The 1950 Sanborn fire insurance map identified a self-serve laundry facility in the northern portion of the 1881 West San Carlos building. A furniture store was depicted in 1881 West San Carlos building on the 1956 Sanborn map. There are no additional listings for this former laundry facility in the EDR regulatory database report. In addition, the available documentation does not indicate that this tenant space was used for dry cleaning purposes. Based on this information, this listing is not expected to represent a significant environmental concern.

Facility Name	John Wolfson
Address	32 Brooklyn Avenue
Distance & Direction	Adjoining to the north
Hydrologic Position	Down-gradient
Databases Listed	RCRA Non-Gen
Comments	The RCRA Non-Gen database indicated that this site is a registered non-generator of hazardous waste with no reported violations. Based on the lack of a documented release and gradient, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	San Jose BMW and BMW Motorcycles
Address	1886 West San Carlos Street
Distance & Direction	Adjoining to the south, beyond road
Hydrologic Position	Up-gradient
Databases Listed	HAZNET, HAZMAT, HWTS, CUPA Listings

DRAFT

Comments	The HAZNET and HWTS listings are associated with the removal and offsite disposal of various hazardous substances under manifest. The HAZMAT database indicated that this site is categorized as an 'auto wrecking/ miscellaneous simple facility'. The CUPA database indicated that this site is a hazardous waste generator facility. Based on the lack of a documented release, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	99 Cents Only Stores #270
Address	1915 West San Carlos Street
Distance & Direction	Adjoining to the west, beyond road
Hydrologic Position	Cross-gradient
Databases Listed	CERS Hazardous Waste, CERS, RCRA Non-Gen, CUPA Listings, HAZMAT
Comments	The CERS databases indicated that this site is a registered hazardous waste generator and chemical storage facility with reported violations. The RCRA Non-Gen database indicated that this site is a registered non-generator of hazardous waste with no reported violations. The CUPA database indicated that this site is a hazardous waste generator and Hazardous Materials Business Plan facility. The HAZMAT database indicated that this site is categorized as an 'auto wrecking/miscellaneous simple facility'. It should be noted that this designation is generally not related to actual auto wrecking based on AEI's experience. Based on the lack of a documented release related to this tenancy and gradient, the review of regulatory agency files for this site was not deemed necessary, and the site is not expected to represent a significant environmental concern.

Facility Name	Economy Cleaners & Launderers, David Rosenthal, Dymo Industries. Antiques Colony
Address	1915 West San Carlos Street/30 Cleveland Street
Distance & Direction	Adjoining to the west, beyond road (approximately 180 feet west)
Hydrologic Position	Cross-gradient
Databases Listed	EDR Historical Cleaners, LUST, SLIC, Historic Cortese, Non-Case Info, Historic LUST, Cortese, CERS
Comments	The EDR Historical Cleaners database indicated that this adjacent property was occupied by dry cleaning tenants from 1966 to 1977. The LUST, SLIC, Historic Cortese and Non-Case Info databases indicated that this is a soil contamination case with tetrachloroethylene (PCE) as a potential contaminant of concern. This is an informational item case as of April 17, 2009. GeoTracker records indicated that the 1915 West San Carlos site contained one 2,000-gallon UST that was used for storage of gasoline, and one 7,500-gallon UST that was used for storage of perchloroethylene or petroleum distillates. Both USTs were reportedly removed in 1985. Soil samples were reportedly obtained from the area of the former USTs in 1987 and analyzed for total volatile hydrocarbons as gasoline, petroleum distillates and perchloroethylene. The sampling results indicated that PCE was not identified above the 6 parts per billion (ppb) laboratory detection limit. In addition, up to 6 parts per million (ppm) of Total Petroleum as Gasoline, up to 25 ppb of Benzene, up to 7 ppb of Toluene and up to 260 ppb of Xylenes

DRAFT

	were present in the soil. The USTs were reportedly located near the northeastern corner of the intersection of West San Carlos Street and Cleveland Avenue, which is approximately 175 feet west of the subject property). RWQCB concluded that the agency is not opening a case due to the lack of PCE in the soil sample. No investigation or remedial action is required. A separate LUST case appeared to have been opened for 30 Cleveland Street. The case is listed as closed as of August 21, 2002. The Case Closure Summary references the above discussed 2,000-gallon gasoline UST and 7,500-gallon diesel of solvent UST that were removed in 1984/1985. SCVWD concluded that the source of contamination at this site (former USTs) have been removed, and no Benzene, Toluene, Ethylbenzene or Xylenes (BTEX) or Methyl tert-butyl ether (MTBE) were detected in recent soil and grab groundwater samples at this site. Trace levels of acetone in soil (0.24 ppm) and groundwater (35 ppb) were identified, but were below levels of regulatory concern. Based on the prior removal of the USTs, soil and groundwater sampling results, distance, gradient and current regulatory status, this site is not expected to represent a significant environmental concern.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

DRAFT

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	N/A	N/A	N/A	N/A	Interview pending; refer to Section 1.5
Key Site Manager and Broker	Mr. David Silberstein	October 7, 2020	In Person	2019	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	N/A	No
Do you have any knowledge of previous environmental investigations conducted on site?	N/A	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	N/A	No
Are you aware of any known plans for site redevelopment or change in site use?	N/A	Yes
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	N/A	No

DRAFT

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/ Comment
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	N/A	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	N/A	No
Additional information provided:		Mr. Silberstein stated that all subject property buildings are planned for demolition in the near future. Mr. Silberstein provided access to all interior and exterior areas of the subject property.

DRAFT

6.1.2 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)	Information not provided

Question	Response/ Comment
Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

The User provided AEI with plans for the proposed redevelopment project. The site will consist of two buildings, a senior care facility and residential condominium. The buildings will have basement level parking garages.

Copies of the plans are appended.

DRAFT

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	October 7, 2020
AEI Site Assessor(s)	Christopher Olsen
Property Escort(s)/ Relationship(s) to Property	Mr. David Silverstein/Principal and Broker with Silverstone Commercial Ms. Liz Puga, Representative with Silverstone Commercial
Units/Areas Observed	All interior areas and exterior areas of the subject property buildings were accessed during the onsite reconnaissance.
Area(s) not accessed and reason(s)	None
Other Physical Constraints	Volume of materials/cars; refer to Section 1.5

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use	✔	
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids	✔	✔
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement	✔	✔
Stressed Vegetation		
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other		

DRAFT

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use

Substance/Waste (size/quantity)	Location	Operations Associated with Material	Disposal Method/ Frequency	Secondary Containment	Staining/ Spills
Janitorial/maintenance supplies (several retail-sized containers)	Storage rooms and janitorial closets	Facility maintenance	N/A	No	None observed
Motor oil and automotive fluids (retail-sized containers)	North of the 1887-1893 West San Carlos building	Unknown (possible tenant conducting automotive services on a personal vehicle)	N/A	No	Minor staining on the concrete surface observed

AEI observed automotive parts and one-gallon and smaller containers of motor oil on the paved surface adjacent to the north of the 1887-1893 West San Carlos building. Minor staining of oil was observed on the concrete-paved surface adjacent to the automotive parts. No significant cracking, drains or other potential subsurface entry points were observed in the area of staining.

As a best housekeeping practice it would be prudent to remove and properly dispose of the automotive fluids if they are not planned for future use.

7.1.2 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/ No)
Pole-Mounted	2	PG&E	Post-1977	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

DRAFT

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.1.3 Drains, Sumps, and Clarifiers

Multiple storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.1.4 Stained Soil and Pavement

Refer to Section 7.1.1 for discussion.

7.2 Adjoining Property Reconnaissance Findings

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Transformers

Multiple pole-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.2 Drains, Sumps, and Clarifiers

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2.3 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking areas. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

DRAFT

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

DRAFT

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to the AEI's client, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

DRAFT

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall,

DRAFT

wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property buildings in order to identify the presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. However, water stained ceiling material was observed in the 1893 West San Carlos building. The source of water staining was reportedly plumbing leaks and/or overflowing bathtubs in the residential units above. However, the subject property buildings are planned for demolition in the near future. As such, no additional action or investigation of the water intrusion issue appears warranted at this time.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 20 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 40 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

DRAFT

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Violation Date:	03-16-2016
Citation:	40 CFR 1 265.177 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.177
Violation Description:	Failure to ensure incompatible waste and/or materials are not placed or stored in the same container or nearby or into an unwashed container, which previously contained incompatible waste and/or materials, so that it does not potentially result in the following: 1) Generate extreme heat or pressure, fire or explosion, or violent reaction; 2) Produce uncontrolled toxic mists, fumes, dusts, or gases in sufficient quantities to threaten human health or the environment; 3) Produce uncontrolled flammable fumes or gases in sufficient quantities to pose a risk of fire or explosions; 4) Damage the structural integrity of the device or facility containing the waste; or 5) Through other like means threaten human health or the environment.
Violation Notes:	Returned to compliance on 06/09/2016. Noted an OX (oxidizer) bin that contained a battery, broken light bulbs, an aersol can, bleach, detergents, and krazy glue.. Another bin contained both acids and bases. Inspection of multiple bins showed a patter of incompatible materials being stored together.

Site ID:	88499
Site Name:	99 Cents Only Stores #270
Violation Date:	03-16-2016
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes:	Returned to compliance on 06/09/2016. Nature and number of violations indicated that effective hazardous waste management training has not been conducted. One employee stated that there is currently no one on-site who is trained to sort and manage hazardous waste bins, as evidenced by the state of hazardous waste.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	88499

Violation Notes:	Returned to compliance on 06/09/2016. Clear tote bins were stacked over 6 feet high in a way that may cause containers to break or tip over.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-16-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	The HMBP update submitted via the California Environmental Reporting System (CERS) on 2/25/2016 was reviewed. Observed the following hazardous materials: Helium, 8 X 200 CUFT and 2 x 286 CUFT 22 totes of hazardous wastes: oxidizers, flammables, corrosives, aerosols (each waste stream is less than HMBP quantities) 99 Cents Only Stores is the property owner for this facility.
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-16-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Inspection conducted with Joanne Tracey. Facility recently underwent a change in supervisors. Alejandra has been assistant manager at this store for one week and has been with the company for 1 month. The following violations were corrected at the time of inspection: 1. No emergency posting- Alejandra created an appropriate emergency posting and posted it at the time of inspection. NOTE: 1. Noted two fluorescent light bulb in tubes affixed to the wall that were not boxed or label. If these light tubes are spent, they must be managed in a way that prevents release to the environment. Ensure that light tubes are managed in accordance with Universal Waste regulations.

Violation Date: 03-23-2016
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: No disposal receipts for used coolant were available for review.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-23-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Inspection conducted with Matthew Burge of HMCD. Facility has 4 service bays, 1 used for smog checks. Observed the following wastes on site: 4 x 55 gallon drums of used oil 1 x 55 gallon drum of used coolant 2 x 15 gallon drums of used coolant 1 x 55 gallon drum of used oil filters 2 x 20 gallon used oil rollers Fire extinguishers have had annual maintenance Spill control is available on site Emergency information is posted on site Container areas are inspected daily Mr. Luong has had hazardous waste training EPA ID# CAL000264464 is active. Corrected on site: 2 x 55 gallon drums of used oil were missing bung caps. The caps were placed on the drums during inspection. 1 x 55 gallon drum of used oil filters was missing the accumulation start date. The start date was added during inspection. 1 x 55 gallon drum of used oil filters was missing the lid. The lid was placed on the drum during [Truncated]

CERS ID:	10347961
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	100574
Site Name:	BURBANK PET HOSPITAL
Violation Date:	08-12-2019
Citation:	HSC 6.5 25189.5(a),25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a),25201(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to HSC 6.5.
Violation Notes:	Unwanted biopsy jars containing formaldehyde and samples/specimens are rarely generated, but when they are, they are reported to be bagged and disposed of in the municipal trash. Formaldehyde is a presumptive hazardous waste per appendix X of title 22; unless analytical data is available demonstrating that it is not hazardous, this waste must be managed as a hazardous waste. Additionally, Dr Fluegge, indicated that silver nitrate sticks have been used for wound cauterization, but cannot recall the last time one had been used. If used, she indicated they were likely disposed of in the trash. Facility does not have any records demonstrating this waste to be managed as hazardous waste. This item, after being used, meets hazardous waste criteria due to silver content.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	100574
Site Name:	BURBANK PET HOSPITAL
Violation Date:	08-12-2019
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes:	Staining waste (including methanol based stain that meets hazardous waste criteria due to flash point under 140 degrees F) is used on occasion and left over solution in the beakers is poured onto absorbent paper towels before being disposed of in the municipal trash. This action constitutes treatment in the state of California

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-12-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: State ID # CAL000216384 is active. Facility provides veterinary services. No specialized services provided (eg cancer treatment). X-rays are all digital. Instruments are cleaned prior to autoclave via an ultrasonic with enzyme cleaner. No cold sterile/high level disinfection. On occasion instruments are disinfected using chlorhexidine and disposed of down the drain. Surface and cage disinfection performed using sentinel II (quaternary ammonium compounds). Unwanted controlled pharmaceuticals are returned in attempts to obtain credit. Expired unwanted pharmaceuticals per the Dr. have not included what would be RCRA regulated wastes such as insulin. Inventory and purchasing is controlled to minimize the chance of pharmaceuticals expiring. Did not observe any specimens in formaldehyde on-site that are being stored in lieu of disposal. Staining is rarely performed but when performed the spent solutions are poured into absorbent paper towels and disposed of in the [Truncated]

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 12804
Site Name: BMW MOTORCYCLES
Violation Date: 11-06-2015
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 08/03/2016. On 1/29/2015 the facility submitted the Facility Information section only. Submit a complete HMBP (Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans) on CERS. Ensure all three HMBP sections are submitted by the end of the same calendar month annually to re-certify the HMBP.

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-06-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Motorcycle dealership with service center. EPA ID# CAL000385444 is active. Currently generating used oil, waste coolant, used oil filters. Generating approximately 110 gallons used oil and a gallon of waste coolant per month per waste pickup receipts. Used motorcycle batteries well contained and picked up weekly. Documentation, accumulation area and emergency equipment in good order.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-06-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Motorcycle dealership with service center. Currently storing 1x55 gallon used oil and 2x55 gallon new oil in HMBP quantities. Automotive fluids, aerosols, and an Oxygen (125 cuft)/Acetylene (140 cuft) rig and smaller quantities of other automotive fluids for retail sale at the parts department are also present. NOTE: Beginning January 1, 2015 all annual HBMP training must be documented and the documents retained for 3 years. Contact me for more information. A sample training log attached with this report.

Site ID: 157277
Site Name: STEVENS CREEK VALERO
Violation Date: 06-15-2016
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description: Failure of the line leak detector (LLD) monitoring pressurized piping

DRAFT

REGAL GAMBUCCI (Continued) **S101309313**

to meet one or more of the following requirements:Monitor at least hourly.Be capable of detecting a release of 3.0 gallons per hour at 10 p.s.i.g. Restrict or shut off the flow of product through the piping when a leak is detected.

Violation Notes: Returned to compliance on 06/15/2016. The Vaporless Manufacturing 99LD-2000 mechanical line leak detector (MLLD) for the 12,000 gallon 87-grade UST system failed to restrict product flow when a 3.0 gph leak at 10 psi was simulated. The service technician adjusted the MLLD by 1/4 turn. Upon re-testing, the MLLD was able to successfully detect a simulated 3.0 gph leak at 10 psi and hold slow flow. NO FURTHER ACTION IS REQUIRED.
Violation Division: Santa Clara County Environmental Health

Violation Date: 06-28-2017
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 06/27/2018. The 91 spill bucket failed the hydrostatic test. Within 30 days troubleshoot the cause of the failure and retest the spill bucket. Contact our office to apply for a repair/retrofit permit if the spill bucket needs to be replaced.

Violation Description: Failure to have a UST Monitoring Plan available on site.
Violation Notes: Returned to compliance on 06/15/2016. The facilityG s most recent UST Monitoring Plan submittals on CERS incorrectly identify the following information: 1. The model number of the leak sensors that perform tank monitoring for all four tank annular spaces is listed as G 793480-407,G but Veeder-Root #0794390-409 sensors are used to monitor all four tank annular spaces. 2. The manufacturer and model number of the leak sensors that perform montitoring of piping secondary containment for all four UST systems is listed as G Vaporless 99-LD2000,G but Veeder-Root #794380-208 sensors are used for pipe secondary containment monitoring for all four UST systems. 3. All four UST Monitor Plans indicate G NoG for the presence of Mechanical Line Leak Detectors, but both 87-grade tanks and the diesel tank have Vaporless Manufacturing 99LD-2000 mechanical line leak detectors installed and the 91-grade tank has a Veeder-Root Red Jacket FX1V mechanical line leak detector installed. 4. The UDC Monitoring portion indicate [Truncated]

REGAL GAMBUCCI (Continued) **S101309313**

Violation Description: Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).
Violation Notes: Returned to compliance on 07/06/2016. The facilityG s annual monitoring equipment certification was due on 6/30/2016, but was not completed until today, 7/5/2016. A re-test of the Veeder-Root Red Jacket 99LD-2000 mechanical line leak detector (MLLD) was required to complete the certification, because Mr. Fontana did not have the proper certification for testing the MLLD at the time of the scheduled testing (6/15/2016). Ensure that annual monitoring equipment certifications are completed prior to the 12 month anniversary due date for all future monitoring equipment certifications.

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes: Returned to compliance on 06/15/2016. The bottoms of all four submersible turbine pump (STP) sumps are sloped so that the edges of the sump bottoms are lower than the middle portion. This design directs liquid to initially accumulate on the sump bottoms' edges. Upon opening all four STP sumps, the Veeder-Root 794380-208 sensors, which are used to monitor the secondary containment piping, were observed to be located in the middle of the sump bottom and not at the earliest opportunity of leak detection (the edge nearest to where the product piping enters the sumps). All four sensors were re-located next to the piping secondary containment opening at the lowest point in the sump, in order to provide leak detection at the earliest opportunity. NO FURTHER ACTION IS REQUIRED, but ensure that the 208 sensors remain properly located.

product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Overfill prevention equipment inspection has not been performed for overfill prevention valves installed on 87-1 and 91 grade USTs. Additionally, Mr. Olfat stated that the Diesel and 87-2 grade overfill prevention valves have been inspected but no documentation was available for verification.

Eval Notes: ON-SITE TO WITNESS THE ANNUAL UST MONITORING EQUIPMENT TESTING PERFORMED BY UST SERVICE TECHNICIAN TONY FONTANA OF UST COMPLIANCE TESTING. MR. FONTANA HAS CURRENT ICC UST SERVICE TECHNICIAN CERTIFICATION (EXP. 05/29/2016), VEEDER-ROOT LEVEL 4 CERTIFICATION (EXP. 08/09/2015), FRANKLIN FUELING LEGACY DISPENSING CUTOFF SYSTEM (BEADREAU) (EXP. 2/26/2017) AND VAPORLESS MANUFACTURING (VMI) LDT-890 TESTER AND TECHNICIAN CERTIFICATION (EXP. 06/24/2015). THERE WAS A SMALL AMOUNT OF WATER OBSERVED IN THE FOUR STP SUMPS. ONE OF THE FILTERS INSTALLED IN DISPENSER 9/10 WAS LEAKING OUTSIDE OF THE UDC CONTAINMENT. THE FILTER WAS CHANGED AND NO LEAKING WAS OBSERVED. THE FOLLOWING UST MONITORING SYSTEM EQUIPMENT WAS FUNCTIONALLY TESTED AND PASSED: FOUR STP SUMP SENSORS, ONE FILL SUMP SENSOR, 87, 89 AND 91 TANK ANNULAR SPACE SENSORS AND FIVE UDC SENSORS. SEE VIOLATION CITED FOR DIESEL ANNULAR SENSOR. SENSOR OUT AND POWER OUT TESTS PROVIDED POSITIVE TURBINE SHUTDOWN. THE FOUR [Truncated]

Eval Notes: Onsite to witness functionality testing of the replacement 89 tank spill bucket. Aneil Chand of Pinnacle Fuel Compliance Services performed todayG s testing. All required certifications were submitted for this project. Note: The new spill bucket installed was not the same model as was submitted in the permit application. Review of the provided cut sheet shows the new model meets the requirements of corrosion protection and five gallon capacity. Approval for changing the spill bucket from the OPW 2100C model to OPW 2200D was granted during this inspection. On this date I observed the following testing: - 89 spill bucket: hydrostatic test for one hour. Test results = Pass. Submit a copy of the completed spill bucket test report within 30 days for final approval.

AUTOSPORT PROBODY SHOP (Continued) **S121795243**

Violation Description: Failure of a generator of hazardous waste that meets the conditions to be transported on a consolidated manifest to comply with one or more of the required consolidated manifesting procedures and retain copies of receipts for three years.
Violation Notes: Returned to compliance on 01/02/2019. Disposal receipts for the last 3 years were not available for review. Provide them to me via email, mail, or fax within the next 30 days. Alternatively, contact me at michelle.santos@cep.sccov.org or 408-918-1981 to arrange and follow-up inspection for records review.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-08-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to perform a routine Hazardous Waste Generator inspection. Auto Sport Pro-Body Shop offers collision repair services and operates 1 paint booth. A walk-through of the facility was conducted with manager, James Taylor. The following hazardous waste streams were observed: - 1 x 55 gal drum solid paint contaminated materials (cups) - 1 x 30 gal drum of waste waterborne paint - 1 x approx. 20 gal drum of waste solvent - 1 x 5 gal drum of used oil - 1 x 5 gal drum of used coolant Paint guns and cups are cleaned directly into the appropriate hazardous waste drums. Paint cups with hardened materials are collected in the solid waste drum. Mr. Taylor also stated that the paint booth filters are managed as hazardous waste and periodically changed out by Corrick. State ID: CAL000326275 is active. Observed fire extinguishers as annually maintained, last service date: 9/4/2018. A spill kit and absorbent (kitty litter) are available on-site. Employees are [Truncated]

Violation Date:	10-14-2014
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	* The last accumulation start date listed on the hazardous waste label

DRAFT

STEVENS CREEK AUTO WORKS, INC. (Continued) **S121747671**

for used oil shows 1-6-14 however receipts show the used oil was picked up five times after that date. Ensure that the new accumulation start date is added after the drums are emptied and a new accumulation period starts. * Observed the following containers without the required hazardous waste labels: - one 10-gallon roller for used oil - one 10-gallon roller for used coolant

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 157267
Site Name: STEVENS CREEK AUTO WORKS, INC.
Violation Date: 10-14-2014
Citation: HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)
Violation Description: Failure to properly dispose of hazardous waste at an authorized location.
Violation Notes: Observed two quart size containers of motor oil in the regular trash that still had pourable amounts of motor oil inside them.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 157267
Site Name: STEVENS CREEK AUTO WORKS, INC.
Violation Date: 10-14-2014
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.
Violation Notes: The last Hazardous Materials Business Plan (HMBP) submittal date was 3-8-2010. HMBP information and the annual certification is now required to be completed via the California Environmental Reporting System (CERS) website at http://cers.calepa.ca.gov.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-18-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site with Ashley Ryder from this office to conduct a HMBP inspection, which included a comparison of information submitted to CERS on 5/27/18. Confirmed Inventory for threshold amounts: 2x55 gallon drums of used oil 1x55 gallon drum of used antifreeze -Verification of emergency procedures posting. -Site Plan & Storage Map and Consolidated Emergency Response / Contingency Plan were verified to be current. -Emergency equipment (fire extinguishers & spill absorbent) were available and recently inspected. For questions regarding this inspection report, contact Ray Maiden at ray.maiden@cep.sccgov.org or by phone at 408-918-1980.

DOLLAR TREE #05522 (Continued) **S118235513**

Site ID: 112243
Site Name: Dollar Tree #05522
Violation Date: 08-27-2015
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 10/08/2015. Copies of manifest 006324908 (shipped 6/5/14) and no hazardous waste manifests for 2015 could be provided on-site.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 112243
Site Name: Dollar Tree #05522
Violation Date: 09-04-2018
Citation: 22 CCR 12 66262.23(a)(4) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)(4)
Violation Description: Failure to send a legible copy of each hazardous waste manifest to the Department within 30 days of each shipment of hazardous waste.
Violation Notes: Returned to compliance on 11/16/2018. Per the Hazardous Waste Tracking System, the following hazardous waste manifests were not submitted to DTSC: -010061671FLE Additionally, no manifests were submitted to DTSC for 2017.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-04-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Conducted a Hazardous Material Business Plan (HMBP) Inspection with Albert Wolff. Last HMBP submittal was on 2/9/2018 via CERS and was reviewed as complete. CERS ID is 10481629. Verified the following hazardous material at or above reportable threshold: -7 x cylinders of helium, each at 291 cubic feet.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-27-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility is a retail store. Performed a facility walk-through and observed the following hazardous waste in rear stockroom: -State regulated toxics, OTC pharmaceuticals, universal waste: 4 x plastic tote bins -Hazardous waste bases: 1 x plastic tote bin -Hazardous waste acids: 1 x plastic tote bin -Hazardous waste oxidizers: 1 x plastic tote bin -Hazardous waste aerosol & flammable liquids: 1 x plastic tote bin Hazardous waste shipments occur every 6 months or when plastic tote bins become

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 04/03/2015.

55 gallon drums of used oil were stored in secondary containment that had collected rain water, possibly causing rust to form. Remove the water from the secondary containment and dispose of it as hazardous waste. Ensure the hazardous waste storage areas are monitored for rainwater collection after storm events and remove any water from the secondary containment as soon as possible.

Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 16879

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-30-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Per Fred Ho, the name of the facility changed from All Pro Auto to Midas in November 2014. The owner information remains the same. Active EPA ID number: CAL00400793 Facility generates approximately 200 gallons of used oil per month (based on pickup receipts). Remove all of the paper filters from the used filter drum and start managing them as hazardous waste. Remove the extra label from the used oil tank. Provide information on how dirty mop water is disposed of.
Eval Division: Santa Clara County Environmental Health

Eval Notes: ON-SITE FOR A FOLLOW-UP INSPECTION TO INSPECTION PERFORMED ON 8/21/2013. THE FOLLOWING CORRECTIONS FROM THE NOTICE OF INSPECTION DATED 8/21/2013 WERE OBSERVED DURING THE FACILITY WALK THROUGH TODAY:

DRAFT

MIDAS - STEVENS CREEK (Continued) **S104580865**

G000 - HAZARDOUS WASTE GENERATOR PERMIT WAS COMPLETED AND PROVIDED TO INSPECTOR TODAY. G011 - PER ROBERT GARBUNDO, HAZARDOUS WASTE CONTAINERS WERE REMOVED FROM TRASH DUMPSTER AND ALL LIQUIDS WERE REMOVED BEFORE BEING DISPOSED. THERE WERE NOT ANY HAZARDOUS WASTE CONTAINERS OBSERVED IN THE TRASH DUMPSTER TODAY. G020 - THE 10-GALLON ROLLER OF USED OIL WAS PROPERLY LABELED AND MARKED AS A HAZARDOUS WASTE. G211 - EMERGENCY INFORMATION POSTER WAS POSTED DURING THIS INSPECTION. G412 - THE USED OIL FILTERS DRUM WAS PROPERLY LABELED AND DATED. G430 - FACILITY IS NOW USING ABSORBENT TO CLEAN UP SPILLS INSTEAD OF SHOP RAGS. OBSERVED SATURATED SHOP RAGS ON TOP OF A DRUM THAT ROBERT GARBUNDO SAID WILL BE DISPOSED OF THROUGH EVERGREEN WHEN THEY PICK UP THE USED OIL. THE USED [Truncated]

Eval General Type: Other/Unknown
Eval Date: 08-21-2013
Violations Found: Yes
Eval Type: Other, not routine, done by local agency
Eval Notes: HAZARDOUS WASTE GENERATOR INSPECTION PERFORMED TODAY. FACILITY DOES NOT CURRENTLY HAVE A HAZARDOUS WASTE GENERATOR PERMIT WITH SANTA CLARA COUNTY. PER BUSINESS OWNER, ROBERT GARBUNDO, HE TOOK OVER OWNERSHIP IN FEBRUARY OF 2013. PER ROBERT, THE PREVIOUS OWNER LEFT SHOP MESSY WITH A LARGE QUANTITY OF USED OIL AND THE EIGHTEEN EMPTY DRUMS THAT ONCE CONTAINED HAZARDOUS MATERIALS AND THEY ARE IN THE PROCESS OF CLEANING UP THE SHOP. EVERGREEN RECEIPT FROM 2-28-2013 SHOWS PICK UP OF 490 GALLONS OF USED OIL THAT PER ROBERT WAS LEFT FROM PREVIOUS OWNER. RECOMMEND FACILITY OWNERS OR EMPLOYEE ATTEND THE SANTA CLARA COUNTY FREE HAZARDOUS WASTE MANAGEMENT TRAINING CLASS (FLYER PROVIDED). ACCORDING TO PICK-UP RECEIPTS FOR USED OIL FROM EVERGREEN, THIS SHOP GENERATES APPROXIMATELY 220 GALLONS OF USED OIL EVERY SIX WEEKS. THE 55-GALLON DRUM OF WASTE ANTIFREEZE IS APPROXIMATELY HALF FULL AFTER FIVE MONTHS. USING THIS DATA, FACILITY IS CONSIDERED A SMALL QUANTITY

City,State,Zip: SAN JOSE, CA 95128
Site ID: 85353
CERS ID: 10347610
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 85353
Site Name: WEST SAN CARLOS GAS
Violation Date: 05-12-2016
Citation: 23 CCR 16 2635 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2635
Violation Description: Failure to inspect the impressed-current system every 60 calendar days and/or failure to have corrosion protection equipment turned on and functioning properly and/or failure to inspect the impressed-current system within six months of installation and at least every three years thereafter and/or failure to test sacrificial anodes once every three years in accordance with the manufacturerG s instructions.
Violation Notes: Returned to compliance on 05/17/2016. The facility's cathodic protection system inspection test, which is required to be conducted by a qualified cathodic protection tester every three years, was due on 5/1/2016 and is now past due. Mr. Zaghi was reminded of the due date of this cathodic protection system inspection test by HMCD during the 2015 and 2016 UST compliance inspections and a reminder was written in the 2015 and 2016 Official Notice of Inspection Reports. As of 5/12/2016, Mr. Zaghi has not made any arrangements to schedule a cathodic protection system test.
Violation Division: Santa Clara County Environmental Health

Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 05/12/2016. UST Certification of Financial Responsibility that is dated 9/25/2011 and was submitted via the CERS

DRAFT

LUU THIEN LE (BEACON STATION (Continued) **S104395208**

website on 3/28/2014 is not the most recent version prepared by you and is incomplete. The most recent CFR form (4/15/2013) is incomplete. Additionally, the Chief Financial Officer (CFO) letter submitted via CERS on 3/28/2014 is incomplete and inaccurate. The CFO Letter must include the accurate Total Tangible Assets and Total Liabilities of the owner/operator that are calculated on the basis of current market value of tangible assets and must reflect the tangible net worth of the owner or operator as of the close of the latest completed fiscal year used by the owner or operator. This is a repeat violation from the 2015 Official Notice of Inspection Report (NOI). An updated Certification of Financial Responsibility was submitted via CERS during the inspection. Submit an accurate and complete CFO letter using the template provided during today's inspection.

Site Name: WEST SAN CARLOS GAS
Violation Date: 03-28-2016
Citation: HSC 6.7 25299 - California Health and Safety Code, Chapter 6.7, Section(s) 25299
Violation Description: Owner/operator make false statements, representation, or certification on an application, record, or other document.
Violation Notes: Returned to compliance on 05/12/2016. The facility submitted a signed written response to HMCD stating that all corrective actions are "done" for the violations issued on the 2015 Official Notice of Inspection Report. Observations made during today's inspection indicate that the facility has not taken actions to correct the 2015 violations, with the exception of the tank lining requirements violations.

Violation Date: 04-30-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Overfill prevention mechanism inspection was not conducted by 10/13/18 as required. UST service technicians preformed this test today. Provide copies of the inspection report to HMCD within 30 days. Next overfill prevention mechanism inspection must be completed by 10/13/2021.

Violation Description:	Failure to conduct the monthly 0.2 gallons per hour automatic tank gauging test on a single wall tank and/or failure of the automatic tank gauge to generate and print a hard copy of the monthly 0.2 gallons per hour test.
Violation Notes:	Third-party approval of Veeder-Root ATG system requires that the product level in the tank be between 50 and 95% of tank capacity for a valid 0.2 g.p.h. leak test to be run. The TLS-350 "Fullest Periodic Test Passed Each Month" reports covering the most recent 24 months shows that the Premium unleaded tank (T2) only had valid tests meeting the 50% minimum fuel level in May and June of last year and June and July of 2013. The remaining 20 months all had fuel levels well below the minimum required fuel level. Ensure that the 91 tank contains at least 4,248 gallons of fuel at least once each month so that a valid 0.2 g.p.h. leak test can be performed. Other requirements for a valid 0.2 g.p.h. leak test are a minimum of 8 hour and 18 minute wait time between most recent fuel delivery and beginning of the 2:30 a.m. test start time, and a minimum of 30 minutes between dispensing and the beginning of testing. [Note: The 87 tank (T1) had valid tests for the past 24 months. T1 50% [Truncated]

Violation Description:	Failure to maintain leak detection alarm logs and/or maintain records of appropriate follow-up actions
Violation Notes:	Returned to compliance on 05/12/2016. Two fuel alarms and one sensor-out alarm occurred for both sensors (L1 and L2) on 6/1/2015. The Designated Operator Monthly Inspection Report from 6/16/2016 documented the alarms, but Mr. Zaghi stated that he has no record of how the alarms were cleared and follow-up actions that occurred for each alarm. Additionally, no copies of passed automatic tank gauging (ATG) test reports were available for review. You must keep a copy of at least one successful valid 0.2 g.p.h. leak test report for each tank each month for the most recent 3 years available for inspection. These reports are the In-Tank Leak Test printouts generated by the TLS-350 each morning that show the test date and time, tank identification, fuel depth, water depth, temperature, liquid volume, and duration of the test. This is a repeat violation from the 2015 Official Notice of Inspection.

The underground storage tank (UST) systems are comprised of two, single-walled steel tanks (10,000 gallon Regular Unleaded Gasoline [87] & 8,000 gallon Premium Unleaded Gasoline [91]). All tanks are existing tanks and are used for motor vehicle fueling. The tanks are equipped with a Cathodic Rectifiers, Inc. model ACW impressed current cathodic protection (CP) system. All UST systems have double-walled, fiberglass, pressurized piping. The under dispenser containment (UDC) pans and tank top sumps are [Truncated]

Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to witness the site's initial annual monitoring certification that was completed in conjunction with the final UST installation inspection. The Service Technician for the functional tests was Elmer Mortera from Balch Petroleum, Inc. Mr. Mortera's ICC and Mfg. certifications were verified to be current. The final inspection spanned two site visits due to complications with air entrained in the primary product lines, which required significant purging of each product line. All functional testing, except for the PLLD was conducted on 4-11-17. The PLLD testing was conducted by Mr. Mortera on 4-17-17. Functional testing observed on 4-11-17: 2-Tank annular space sensors (Veeder-Root 794380-303; Duel-point) confirmed programming for audible and visual alarm; PASS. 2-Fill Sump sensors (Veeder-Root 794380-208) confirmed programming for audible and visual alarm; PASS. 2-Fill Sump interstitial sensors (Veeder-Root 794380-304, Single Point Hydrostatic) confirmed [Truncated]

Eval Notes:	A final underground storage tank (UST) system installation inspection was performed today to observe the Monitoring System Certification testing. All components tested today passed functional testing (see routine inspection documented below conducted in conjunction with the Monitoring System Certification). Final UST system installation inspection is complete and the station approved to be operated as designed. This approval is applicable to requirements solely imposed by this office. Additional approvals by other regulatory agencies may be required. The facility submitted all necessary permit application forms to CERS on 3/30/17. These forms included: -Operating Permit Application - Facility Information page -Operating Permit Application - Tank Information page; one per tank -UST Monitoring Plan -UST Response Plan -Hazardous Materials Business Plan -Site Plan (map) -DUSTO notification page -Financial Responsibility Operation of UST system is contingent [Truncated]

material, and wastes related to UST maintenance. Fire extinguishers are annually serviced, spill kit is adequate, and EPA ID CAL000391885 is currently active. Facility last disposed of hazardous waste on 2/6/17. NOTE TO FACILITY: Mr. Zaghi was advised that he must use his own waste containers and his own EPA ID number to dispose of hazardous waste. He has not generated any waste since the last disposal, but had stated that he intended to give waste to the neighboring auto shop to dispose of.

Eval Notes: On-site to witness the triennial cathodic protection testing of the facility's two, single-walled steel tanks (10,000 gallon Regular Unleaded Gasoline [87] & 8,000 gallon Premium Unleaded Gasoline [91]). All USTs are existing tanks and are used for motor vehicle fueling. The USTs are equipped with a Cathodic Rectifiers Inc. model ACW Impressed Current Cathodic Protection (CP) System Serial No. 760110609 with CP system; CP size = 40 volts DC and 15 amps. Today's rectifier readings are 23 volts DC and 7.1 amps. The cathodic protection testing was conducted by David Kashifi of Corrosion Protection Solutions (NACE certification #7355, Corrosion Protection Specialist, as verified on NACE Institute Certification Holders Search) and the system was tested in accordance with NACE Standard: SP0169. The rectifier was tested for proper calibration with a voltmeter. A current interrupter was then affixed to the rectifier and a 6sec. on/2 sec. off cycle was used to test the cathodic [Truncated]

Eval Notes:	On-site to witness the secondary containment testing performed by Mr. Benjamin Duncan (ICC #35246802-UT, exp. 4/6/2017; SWRCB #90-1120, exp. 12/31/2016; Caldwell 2016) of R&D Compliance Testing. Tanks are single-walled and lined so there are no annular spaces to test. Piping secondary containment tested at 3.5 psi for one hour with no loss. Piping sumps were hydrostatically tested over the product piping penetration using the Caldwell accelerated test. No loss was observed. The under dispenser containment UDC was filled with water and no loss or other signs of leaks (bubbles) were observed over 15 minutes. The UDCs were set to be tested by the Caldwell accelerated test, but the testing was not observed by the inspector. Submit a copy of the Secondary Containment Test report to our office within 30 days and keep a copy available for review for at least 3 years. Reports may be sent via email to USTinspector@deh.sccgov.org. eMail: toov@sbcglobal.net

below the UST detected 4.9 parts per million (ppm) total petroleum hydrocarbons. In 1991 three soil borings (SC-1, SC-2, and SC-3) were installed to approximately 50 feet below ground surface (bgs). The borings were installed as part of a real estate divestment investigation. Toluene was detected in every soil sample and benzene was detected in the sample collected from SC-2. The consultant theorized that the trace levels of contamination were due to laboratory cross contamination. In 1992, gasoline was reportedly flowing through cracks in the asphalt located between the pump island and the underground storage tanks (USTs). Piping tests determined that three piping runs were breached. Soil samples collected in the piping runs detected TPH-g up to 6,000 ppm. Soil sample collected from the vicinity of the USTs indicated TPH-g at concentrations up to 23,000 ppm. Due to these results, additional soil was excavated. Confirmation samples collected following the additional excavation detected up to 18,000 ppm TPH-g. The volume of soil excavated and it's final location is not described in the file. In March 1999 five soil borings were installed (B-1 through B-5) near the USTs and product islands to a depth of 40 feet bgs. Up to 390 ppm TPH-g was detected in soil samples. Grab groundwater samples were collected from borings B-2, B-3, B-4, and B-5. Up to 120,000 ppb TPH-g was detected. UP to 1,400 ppb benzene was detected. Up to 4,300 ppb MTBE was detected. On August 11, 1999 four soil borings (ABA-1, ABA-2, ABA-4, and ABA-5) were installed to depths of 35 to 40 feet bgs. Trace concentrations of hydrocarbons were detected in two of the borings. Up to 83 ppb TPH-g and 3.3 ppb benzene were detected in grab groundwater samples. In October 1999 three groundwater monitoring wells (MW-1 through MW-3) were installed to depths of approximately 50 feet bgs. TPH-g and benzene was not detected in groundwater samples. MTBE was detected in well MW-1 at a concentration of 33 ppb. Groundwater gradient was determined to be toward the southeast. In December 2001, three soil borings (ABA-6 through ABA-8) and one groundwater monitoring well (MW-4) were installed. Low levels of fuel related compounds were reported in soil samples. In March 2003 groundwater monitoring well MW-5 was installed near the USTs to a depth of approximately 60 feet bgs. On September 28 and 29, 2005 six soil vapor extraction wells were installed. The wells were completed to a depth of approximately 30 feet bgs. In December 2005, soil vapor pilot tests were performed (performed on December 8, 9, 12, and 13) on four of the extraction wells (VEW-1, VEW-2, VEW-3, and VEW-4). These wells are screened between 10 and 30 feet bgs. The SVE pilot tests removed approximately 9.1 pounds of TPH-g and 0.008 pounds of benzene.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

CPS-SLIC:
Name: RITZ CLEANERS (FORMER)
Address: 526 S. BASCOM AVENUE
City,State,Zip: SAN JOSE, CA 95128
Region: STATE
Facility Status: **Open - Site Assessment**
Status Date: 12/02/2015
Global Id: T10000006551
Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 07S1W13N01s
Latitude: 37.3189486
Longitude: -121.9313449
Case Type: Cleanup Program Site
Case Worker: GOR
Local Agency: SANTA CLARA COUNTY LOP
RB Case Number: Not reported
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Soil, Soil Vapor

DRAFT

RITZ CLEANERS (Continued) **1000442614**

Potential Contaminants of Concern: Tetrachloroethylene (PCE)
Site History: Report of soil vapor investigation forwarded to us by attorney's office. Based on information in this report, soil and soil vapor have been impacted by PCE from a former dry cleaner. Dry cleaner ceased operations after July 2012, exact date unknown at this time.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 03-22-2017
Citation: 23 CCR 6.7 25284, 25286 - California Code of Regulations, Title 23, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 06/04/2017. The following information reported to CERS on 1/3/2017 is not accurate for the current UST system in place at this site: 1. The UST installation date noted for all three tanks is 3/1/2009. This is not accurate as this system has been in place prior to 2009 and is not a VPH system (meeting regulatory requirements for UST systems installed on or after July 1, 2004). *Provide the correct installation date for this UST system. 2. "Double-walled" is noted in the section for Vent Piping Transition Sumps on all three Tank Information pages. The vent piping associated with this UST system does not have a transition sump. *Update this section to state "none".

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).
Violation Notes: Returned to compliance on 05/19/2017.
_____ All four dispensers have fuel filters as well as piping that extend outside of the secondary containment provided by the under-dispenser containment (UDC) boxes. Piping in all dispensers extends beyond UDC boxes to where it overhangs the asphalt beneath the outer rim of dispensers. Any fuel leaks there would drain outside of dispensers. Under dispenser containment must provide containment for any potential leaks from piping and other fuel components within the dispenser. *Repair, modify or replace UDCs and/or dispensers as necessary to provide adequate protection for any potential leaks from components within dispensers. Apply for a permit from HMCD, if necessary.

Citation: 23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: The site DUSTO, Ian Hall failed to complete Section X of the DUSTO ?Visual Inspection Report regarding the overfill prevention equipment inspection question for the following Reports: 1/11/19, 12/20/18, 11/23/18 and 10/24/18.

Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 06/04/2017.

The current Chief Financial Officer (CFO) Letter submitted to CERS on 1/3/2017 reports rounded numbers for total tangible assets, total liabilities and net worth (i.e. $500,000.00, $200,000.00, and $300,000.00). If a CFO Letter is used as a Financial Responsibility mechanism, it must include the total tangible assets and total liabilities of the owner or operator that are calculated on the basis of current market value of tangible assets and must reflect the tangible net worth of the owner or operator as of the close of the latest completed fiscal year used by the owner or operator [23CCR 2808.1(c)]. Re-submit a CFO Letter that accurately identifies the owner's or operator's total tangible assets, total liabilities and tangible net worth or use another mechanism to demonstrate Financial Responsibility.

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 03/25/2019. The overfill equipment prevention inspection was due to be completed by 10/15/18. Service Technician Anthony Reyes from Walton Engineering, Inc. conducted an inspection of the overfill prevention valves and removed all ball float housings (ball floats were not attached). This violation was corrected during the inspection, not further action is required.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

DRAFT

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

USGS TOPOGRAPHIC MAP

Target Property Map:	5640416 SAN JOSE WEST, CA
Version Date:	2012

DRAFT

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

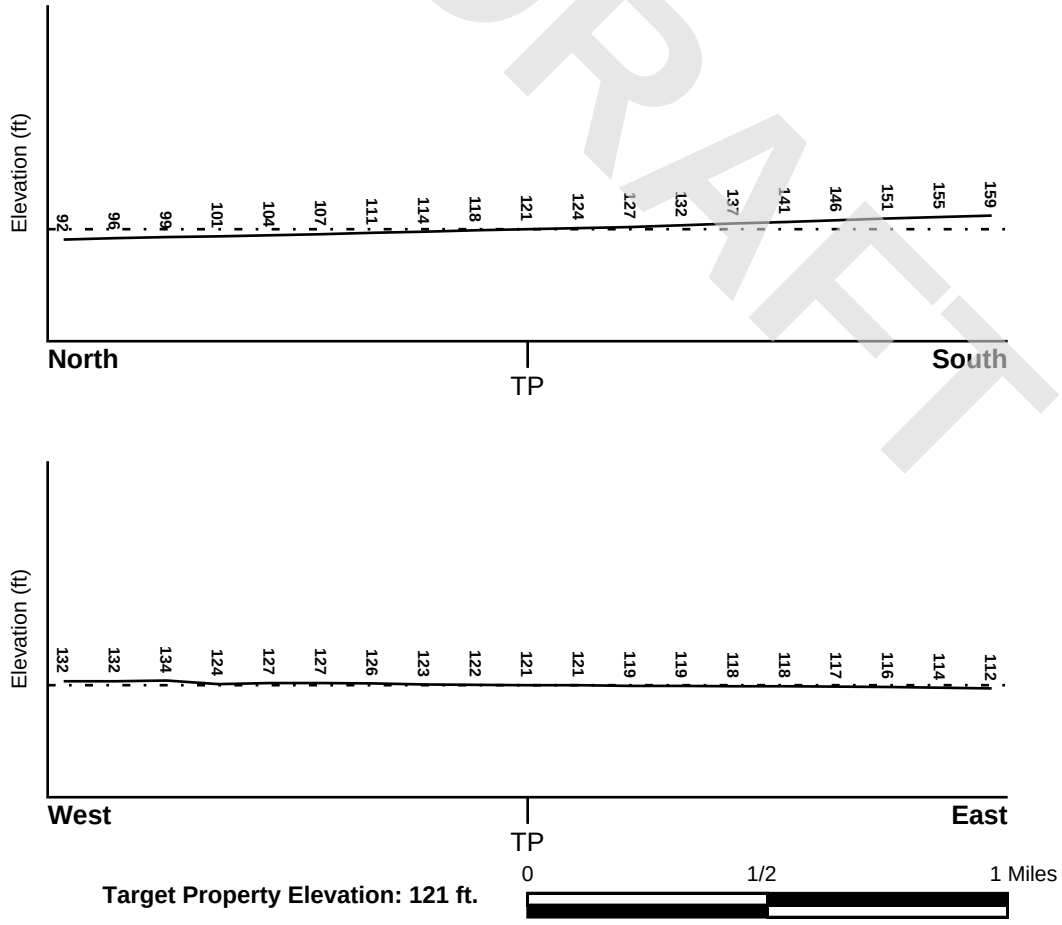
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

DRAFT

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 121 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0233H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0229H	FEMA FIRM Flood data

06085C0241H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SAN JOSE WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

DRAFT

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

DRAFT

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

DRAFT

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

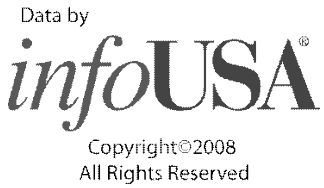
Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.



DRAFT

AGREEMENT FOR PROFESSIONAL SERVICES

This is an Agreement between DAVID J. POWERS & ASSOCIATES, INC. (hereinafter "CONSULTANT"), and AEI CONSULTANTS, (hereinafter "SUBCONSULTANT"), for professional services in connection with the project described below:

DRAFT

I. Project:

1881 West San Carlos Street Project, Job No. 20-085

II. Scope of Services:

A complete description of the scope of services is included in Exhibit A.

III. Compensation:

1. Basic Compensation:

Compensation will be paid in an amount not to exceed $2,500, on a time and materials basis, based on work completed.

2. Invoice Submission:

Invoices are due by the 10th of each month (for work completed the previous month) and shall be submitted via email to apinvoices@davidjpowers.com. Invoices received after the 10th of each month may not be included in that month's billing cycle and could result in a payment delay. The David J. Powers & Associates, Inc. job number and project manager name shall be included on the invoice.

3. Method of Payment:

CONSULTANT will reimburse SUBCONSULTANT upon receipt by CONSULTANT of payment from their client SALVATORE CARUSO DESIGN CORPORATION.

IV. Insurance:

SUBCONSULTANT shall, throughout the duration of this Agreement, maintain insurance to cover SUBCONSULTANT (including its agents, representatives, subconsultants, and employees) in connection with the performance of services under this Agreement.

1871 The Alameda • Suite 200 • San José, CA 95126 • Tel: 408-248-3500 • Fax: 408-248-9641 • www.davidjpowers.com

Concurrently with the execution of this Agreement by SUBCONSULTANT, and prior to the commencement of any services, SUBCONSULTANT shall furnish written proof of insurance (certificates and endorsements) to the CONSULTANT for the marked minimum insurance levels:

☒ Commercial General Liability coverage in an amount not less than one million dollars ($1,000,000) per occurrence and two million dollars ($2,000,000) general aggregate for general liability, bodily injury, personal injury, and property damage.

☒ Automobile Liability coverage in an amount not less than one million dollars ($1,000,000) per accident for bodily injury and property damage.

☒ Workers' Compensation coverage as required by the State of California.

☒ Professional Liability coverage for damages that may be the result of errors, omissions, or negligent acts of SUBCONSULTANT in an amount not less than one million dollars ($1,000,000) per claim and annual aggregate.

General Liability and owned Automobile Liability insurance under this contract shall be endorsed to contain the following clause:

"David J. Powers & Associates, Inc., its officials and employees are added as additional insured as respects the operations and activities of, and on behalf of, the named insured's performance under its contract with David J. Powers & Associates, Inc."

Please note our job number 20-085 on the insurance certificate(s).

V. <u>General</u>:

1. SUBCONSULTANT is an independent contractor and all persons employed by SUBCONSULTANT in connection herewith shall be its employees and not employees of CONSULTANT in any respect.

2. SUBCONSULTANT shall comply with applicable local, state, and federal laws, rules and regulations and shall obtain all permits required for the work to be performed hereunder.

3. Should litigation occur between the two parties relating to the provisions of this Agreement, all litigation expenses, collection expenses, witness fees, court costs and reasonable attorney's fees shall be paid by the non-prevailing party to the prevailing party.

4. Work shall commence immediately upon execution of this Agreement.

5. In the event any provision of this Agreement shall be held to be invalid and unenforceable, the remaining provisions shall be valid and binding upon the parties. One or more waivers by either party of any provision, term, condition or covenant shall not be construed by the other party as a waiver or a subsequent breach of the same by the other party.

DRAFT

1871 The Alameda • Suite 200 • San José, CA 95126 • Tel: 408-248-3500 • Fax: 408-248-9641 • www.davidjpowers.com

6. SUBCONSULTANT shall indemnify and defend CONSULTANT (including its officers, agents and employees) against all suits, losses, damages, expenses (including reasonable attorney's fees), and liability for injury or harm to persons or property only to the extent caused by the negligent performance of this Agreement, excepting only such injury or harm as may be caused by the fault or negligence of the CONSULTANT.

VI. **Additional Provisions:**

None.

VII. Scope of Agreement:

This is the entire agreement between the parties for Job 20-085, and there are no conditions, agreements or representations between the parties except as expressed herein. It is not the intent of the parties to this Agreement to form a partnership or joint venture.

This above is mutually agreed to the 18th day of September, 2020.

Re: Proposal for Phase I ESA
1881, 1883, 1891 and 1899 West San Carlos Street, San Carlos, CA 95128 and three other Parcels on Boston and Brooklyn Avenue

Dear Ms. George:

In response to your request for technical reports for the above referenced site, AEI Consultants (AEI) is pleased to present this proposal with our attached Terms and Conditions to complete a Phase I ESA. AEI will follow the scopes of work as stated in the American Society for Testing and Materials (ASTM) to complete these technical requirements.

AEI understands the property consists of the following:

Property Description	
Property Type or Use	Retail, parking lot, storage
Purpose of Assessment	Equity: New Construction/redevelopment
Date of Construction	Various
Lender Name	NA
Number of Buildings / Stories	TBD
Number of Units / Tenants	TBD
Gross Building Area / Land Area	TBD/ 1.24
Assessor Parcel Number's (APN)	274-16-049, 050, 051, 052, 053, 069, 070

Proposed Fees:
AEI will complete the below stated scopes of work for the following fees:

Requested	Service(s)	Fee per Service
☐	Phase I Environmental Site Assessment	$2,500.00

The total cost of the project will be adjusted based on the above selected services. If all services are selected, the total project will be $2,500.00.

Schedule:
The project will be completed within 15 working days of receiving the signed Authorization to Proceed. Due to the number of days allotted to complete this investigation, responses from some regulatory agencies may not be received prior to the report due date. As such, the report may contain limitations pertaining to the lack of agency responses to the Freedom of Information Act requests and/or records review.

Due to the ongoing cases of COVID-19, AEI is taking extra precautions during site visits to limit the interaction between our employees and occupants. For healthcare, senior living, medical office, assisted living and/or

Client Initials: _____ Date: _____

DRAFT

multifamily properties, AEI may not be able to view interior features or occupied areas of the subject property. Client should be aware that access limitations may apply. In addition, client should be aware that travel restrictions or lack of site access may affect our quoted turnaround time. Any delays will be communicated with our client as soon as possible.

If there have been any cases of COVID-19 reported at any of the properties we have scheduled site visits for, please be sure AEI is made aware. Our goal is the safety of our employees as well as the safety of your occupants. The turnaround time quoted is subject to staff availability and any access restrictions due to COVID-19.

Payment Terms and Deliverables:
An invoice for the full contract amount will be issued at the completion of the assessment. AEI will deliver one electronic final copy of each report. Hard copies of the reports are available upon request.

In the event that the client cancels the contract, then the client will be responsible for payment of incurred costs up to the cancellation notice date. If the project is placed on hold for longer than a 90-day period, AEI will cancel the project and the client will be responsible for incurred costs up to the hold date. Hold projects may be re-initiated at any time, and additional fees may apply.

Please review our proposal and if you have any questions, please do not hesitate to contact me. To initiate this contract, please sign the Authorization to Proceed, initial and date each page and return to AEI. Thank you for the opportunity to be of service.

Sincerely,

Tory Golino

Scope of Work

Phase I Environmental Site Assessment (ESA) ASTM E1527-13: The Phase I ESA will be performed in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312). The Phase I ESA will be conducted under the charge of an Environmental Professional and will include the following:

- Site visit and walk-through of the property and structures, readily accessible interior common areas, and a representative sample of occupant spaces. Items such as current and past uses of the property and adjoining properties; property boundaries; observable topographic geologic, hydrogeologic conditions; structures or other improvements; roads; source and location of potable water; wells; surface water; potential hazardous substances and/or petroleum products; storage tanks; abnormal odors; pools of liquid; drums and containers; suspected fill materials; stain soil or pavement; stressed vegetation; solid waste; waste water discharges; floor drains, sumps or clarifiers; septic systems shall be noted as reasonably and visibly observed.
- Search of local, state, tribal and federal databases in accordance with current ASTM and AAI standard search distances.
- Contact local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to Activity and Use Limitations (AULs), defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.
- Site history and land use review, including reasonably ascertainable agency records, aerial photographs, historical city directories, fire insurance maps, and other applicable sources.
- Interviews with knowledgeable persons (i.e. past and present owners, property managers, tenants, neighbors), as available and open to interview, regarding the history, operations, waste management, and other environmental considerations for the property.
- Additional observations, though generally outside the scope of a Phase I ESA, but provided as a service to our clients unless otherwise instructed, include EPA-determined radon zone, visual inspection of asbestos-containing building materials, lead-based paint, and mold.
- AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.
- Report includes findings, opinions and conclusions, photographs, site map, historical sources, and qualifications in a manner consistent with standard practices.

Environmental Liens Search is not included in the Phase I ESA scope of work unless it is specifically requested.

TERMS AND CONDITIONS

1. **Billings, Payment and Credit.** The Client shall pay All Environmental Inc. d/b/a AEI Consultants (AEI) for the services (the "Services") performed in accordance with the prices set forth in the proposal to which these terms and conditions are attached (the "Proposal", and together with these terms and conditions the "Agreement"). Invoices shall be submitted in accordance with the Proposal. Payment of the AEI invoices shall be the primary, absolute and non-contingent obligation of the Client, and shall not be conditioned upon the closing of a loan transaction or any other event. PAYMENT IS DUE UPON RECEIPT. If AEI does not receive payment in full within thirty (30) calendar days of the date of the invoice, the account shall be deemed delinquent. Unpaid delinquent balances shall bear interest from the invoice date at one and one-half percent (1.5%) per month, or at the maximum lawful interest rate (whichever rate is less).
The Client shall be liable to AEI for all costs and expenses of collection of delinquent balances, including reasonable attorney and other fees, and court costs. Time is of the essence with respect to this provision. AEI's non-exercise of any rights or remedies, whether specified herein or as otherwise provided by law, shall not be deemed a waiver of any rights or remedies, nor preclude AEI from the future exercise of such rights or remedies. If a third party is accepting a Proposal as agent for the Client, such third party represents and warrants to AEI that it is legally authorized to bind the Client to the terms of the Agreement and guarantees payment for services.

2. **Right of Entry; Force Majeure.** The Client shall arrange for the right of entry to the subject property ("Site") by AEI, its agents, employees, consultants, contractors and subcontractors, for the purpose of performing all acts as may be reasonably necessary to complete the Services within the agreed scope of work. AEI may require that an authorized, knowledgeable representative of the Site owner be present at the Site as a condition of the performance of the Services and may require that Site personnel operate major building systems and equipment at the time the Services are performed. AEI's ability to comply with the schedule for performance described in the Proposal is contingent upon timely and complete Site access. AEI shall not be responsible for damages or delays in performance caused by force majeure, acts of God, events beyond the control of AEI, or events that could not have been reasonably foreseen and prevented.

3. **Documents/Samples.** All field notes, calculations, estimates and other documents, data or information prepared by or on behalf of AEI in connection with the performance of its Services (collectively, "Documents"), shall remain the sole property of AEI. All Documents prepared by AEI for the Client with respect to any Site shall be used solely for the intended purposes described in the Proposal, and solely with respect to the Site. Unless otherwise agreed, AEI shall retain all Documents for three (3) years following submission of AEI's report to the Client. In its sole discretion and without prior notice to the Client, AEI may dispose of all field samples within thirty (30) calendar days after submission of AEI's report to the Client.

4. **Matters Known to Client.** The Client, itself or through the Site owner, shall provide AEI with any and all information known to the Client, or suspected by the Client, which pertains to: (a) the existence or possible existence at, on, under or in the vicinity of the Site, any hazardous materials, pollutants, lead-based paint, radon or asbestos; (b) any conditions at, on, under or in the vicinity of the Site, which might represent a potential safety hazard or danger to human health or the environment; (c) any permit, manifest, title record, or other record of compliance or non-compliance with any federal, state or local laws, or court or administrative order or decrees; (d) any known or suspected deficiencies or adverse conditions associated with structures or other physical improvements on Site; or (e) any modifications or changes from the original plans and specifications of Site improvements which could affect the recommendations or conclusions reached by AEI in the performance of its Services.

5. **Preliminary Findings.** Preliminary findings (often referred to as "verbals") can be provided to the Client in order to quickly apprise them of **preliminary** data obtained as a result of AEI's visual observations at the project Site. They are not intended to be exhaustive or conclusive or to substitute for the final written report, as they do not include information obtained from a number of other important and necessary components of the overall assessment. AEI recommends against making any decisions based upon such limited, preliminary, verbal information.

6. PERFORMANCE STANDARDS. IN PERFORMING THE SERVICES, AEI SHALL EXERCISE THE DEGREE OF SKILL AND CARE NORMALLY EXERCISED BY CONSULTANTS IN THE SAME COMMUNITY PROVIDING THE SAME OR SIMILAR SERVICES FOR PROJECTS OF COMPARABLE SIZE, COMPLEXITY, BUDGET, SCHEDULE AND OTHER CHARACTERISTICS OF THE PROJECT (THE "STANDARD OF CARE"). EXCEPT AS SET FORTH IN THE IMMEDIATELY PRECEDING SENTENCE, AEI MAKES NO WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO THE SERVICES OR ANY OF ITS ORAL OR WRITTEN REPORTS. CLIENT ACKNOWLEDGES AND AGREES THAT (I) THE SERVICES MAY REQUIRE JUDGMENTS TO BE MADE BY AEI THAT ARE BASED UPON LIMITED DATA RATHER THAN UPON SCIENTIFIC CERTAINTIES; (II) AEI'S APPROACH, RECOMMENDATIONS, AND ASSOCIATED COST ESTIMATES, IF ANY, ARE BASED ON INDUSTRY PRACTICES AND AVERAGES; (III) PROFESSIONAL OPINIONS ARE RENDERED WITH RESPECT TO OBSERVATIONS MADE AND DATA OBTAINED AT THE TIME OF ASSESSMENT; AND (IV) ULTIMATE OUTCOMES COULD BE INCONSISTENT WITH THE CONCLUSIONS, RESULTS AND PROJECTIONS OF AEI. ALL INFORMATION REGARDING OPERATIONS, PLANS, SPECIFICATIONS, CONDITIONS OR OTHER DATA WHICH IS PROVIDED TO AEI BY CLIENT, OWNERS OR THIRD PARTIES (INCLUDING WITHOUT LIMITATION, ANY POINT OF CONTACT AT THE SITE), IS DEEMED BY AEI TO BE CORRECT AND COMPLETE WITHOUT INDEPENDENT VERIFICATION. AEI ASSUMES NO RESPONSIBILITY FOR THE ACCURACY OR COMPLETENESS OF SUCH INFORMATION AND SHALL NOT BE LIABLE IF RELIANCE ON SUCH INFORMATION RESULTS IN INCORRECT CONCLUSIONS OR RESULTS.

7. INDEMNIFICATION AND LIMITATION OF LIABILITY. AEI AGREES TO INDEMNIFY AND HOLD HARMLESS (BUT NOT DEFEND) CLIENT, ITS DIRECTORS, OFFICERS AND EMPLOYEES AGAINST ANY LOSSES, LIABILITY, DAMAGES, COSTS AND EXPENSES TO THE EXTENT CAUSED BY THE NEGLIGENT ACTS, ERRORS, OR OMISSIONS OF AEI, ITS EMPLOYEES, SUBCONTRACTORS OR ANYONE FOR WHOM AEI IS LEGALLY LIABLE, IN THE PERFORMANCE OF SERVICES HEREUNDER. IN NO EVENT SHALL AEI BE LIABLE FOR LATENT OR HIDDEN CONDITIONS, CONDITIONS NOT ACTUALLY OBSERVED BY AEI WITHIN THE LIMITED SCOPE OF WORK, THE POTENTIAL CONSEQUENCES OF OBSERVABLE CONDITIONS, CONDITIONS OF WHICH CLIENT HAD KNOWLEDGE OF AT THE TIME OF THE ASSESSMENT, OR ANY UNAUTHORIZED ASSIGNMENT OF OR RELIANCE UPON THE REPORTS. THE LIABILITY OF AEI, AND THAT OF ITS OFFICERS, DIRECTORS, EMPLOYEES, AGENTS AND SUBCONTRACTORS, TO CLIENT OR TO ANY THIRD PARTY CLAIMING BY OR THROUGH CLIENT, INCLUDING ANY COMPANY AFFILIATED WITH CLIENT, OR ANY OFFICER, DIRECTOR, EMPLOYEE, AGENT, SUBCONTRACTOR, SUCCESSOR, OR ASSIGN OF SUCH PARTIES, FOR ANY LOSSES, WHETHER IN CONTRACT OR TORT (INCLUDING NEGLIGENCE AND STRICT LIABILITY), RELATED TO THE SERVICES, THE AGREEMENT OR OTHERWISE, SHALL NOT EXCEED THE AGGREGATE SUM OF TWENTY-FIVE THOUSAND DOLLARS ($25,000.00). IN NO EVENT SHALL AEI BE LIABLE TO CLIENT FOR ANY EXEMPLARY, PUNITIVE, INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES (INCLUDING LOST PROFITS) ARISING FROM OR IN ANY WAY CONNECTED WITH ITS PERFORMANCE OR FAILURE TO PERFORM UNDER THE AGREEMENT, EVEN IF THE AFFECTED PARTY HAS KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES.

8. **Dispute Resolution.** This Agreement shall be governed by, subject to, and construed in accordance with the laws of the State of California. Any controversy, claim or action arising out of, or related to, this Agreement, the breach thereof, or the coverage of this arbitration provision may be settled by arbitration and will be based on the rules in effect on the date of delivery of demand for arbitration. The arbitrator(s) shall apply California substantive law to the proceedings, except to the extent Federal substantive law would apply to the claim. The arbitrator(s) shall prepare in writing and provide to the parties an award including actual findings and the reasons on which their decision is based. The arbitrator shall not have the power to commit errors of law or legal reasoning, and the award may be vacated or corrected on appeal to a court of competent jurisdiction for any such error. The arbitration of such issues, including the determination of the amount of any damages suffered by either party hereto by reason of the acts or omissions of the other, shall be to the exclusion of any court of law except for enforcement of an arbitrated award. The decision of the arbitrators, or a majority of them, shall be final and binding on both parties and their respective successors and assigns. If the arbitrators determine that a party has initiated a recovery action on a basis inconsistent with the provisions of this Agreement, the initiating party shall, without exception, be assessed all costs incurred by the responding party. Except as identified above, each party shall pay the fees of its own attorneys, and the expenses of its witnesses and all other expenses connected with the presentation of its case. The costs of the arbitration, including the cost of the record or transcripts thereof, if any, administrative fees, fees of the arbitrators, and all other fees and cost shall be borne as determined by the arbitrators.

9. **Reliance and Assignment. AEI'S WRITTEN REPORT SHALL CONTAIN AEI'S STANDARD RELIANCE LANGUAGE UNLESS ALTERNATE LANGUAGE HAS BEEN PRE-APPROVED BY AEI. IF NO PRE-APPROVED ALTERNATE LANGUAGE EXISTS, THE SERVICES, THE REPORTS AND OTHER RELATED WORK PRODUCT PROVIDED BY AEI MAY BE RELIED UPON BY THE CLIENT, ITS SUCCESSORS AND ASSIGNS WITH RESPECT TO A LOAN SECURED BY THE SITE, AND ANY RATING AGENCY RATING, OR ANY ISSUER OR PURCHASER OF, ANY SECURITY COLLATERALIZED OR OTHERWISE BACKED BY SUCH LOAN. NO OTHER PERSON OR ENTITY MAY RELY ON THE REPORT WITHOUT THE ADVANCE WRITTEN CONSENT OF AEI, AND NO OTHER THIRD PARTY BENEFICIARIES ARE INTENDED. EXCEPT AS DESCRIBED ABOVE, THE CLIENT SHALL NOT ASSIGN THE AGREEMENT, ANY REPORT OR ANY RELATED WORK PRODUCT, WITHOUT THE PRIOR WRITTEN CONSENT OF AEI. ANY UNAUTHORIZED REUSE OR REDISTRIBUTION OF AEI'S WORK PRODUCT OR REPORTS SHALL BE AT THE CLIENT'S AND RECIPIENT'S SOLE RISK, WITHOUT LIABILITY TO AEI. CLIENT WILL HOLD AEI HARMLESS FROM ANY AND ALL LIABILITY, OBLIGATION, COST AND EXPENSE ARISING FROM OR RELATED TO ANY UNAUTHORIZED DISTRIBUTION OR USE BY CLIENT OF AEI'S WORK PRODUCT OR REPORTS. AEI SHALL NOT ASSIGN ITS OBLIGATIONS UNDER THE PROPOSAL; HOWEVER, AEI MAY EMPLOY, BY SUBCONTRACT, SUITABLY TRAINED PERSONS OR ENTITIES ACCEPTABLE TO AEI TO PERFORM THE SERVICES.**

10. **Confidentiality.** AEI shall not disclose information regarding the Proposal, the Services or any Documents, except to the Client, employees, consultants, subcontractors, or other persons engaged by AEI to perform the Services, third parties designated by the Client (subject to the reliance limitations described herein), or as required by law. Notwithstanding the terms of this Section, AEI shall comply with all judicial orders, government directives, and laws, regulations and ordinances, regarding the reporting to appropriate public agencies of potential dangers to public health, safety or the environment.

11. **Miscellaneous.** AEI is an independent contractor of Client, and not Client's agent, employee or partner. The Agreement shall be governed by the laws of the State of California and the parties irrevocably consent to the jurisdiction of the courts of the State of California and of the United States District Court for the District of Northern California if a basis for federal jurisdiction exists. In the event a dispute relating to an AEI report results in litigation, and the claimant does not prevail at trial, then the claimant shall pay all costs incurred by AEI in the defense of the claim, including reasonable attorney's fees. Each provision of the Agreement shall be considered separable, and if, for any reason, any provision or provisions herein are determined to be invalid and contrary to any existing or future law, such invalidity shall not affect those portions of this Agreement that are valid. This Agreement constitutes the entire agreement, and supersedes all prior agreements and understandings, both written and oral, between the parties with respect to the Services to be provided pursuant to this Agreement. The provisions of the Agreement may only be modified by a written instrument signed by an authorized representative of each party.

12. **Hazardous Waste and Reporting.** The Client understands and agrees that human health and safety is a priority in implementing any investigation or assessment. AEI and Client agree that the discovery of hazardous materials, suspect hazardous materials or petroleum products, or unexpected conditions may constitute a change in the condition of the job Site mandating a renegotiation of the scope of work or termination of the project and may make it necessary for AEI to take immediate measures to protect human health and safety. AEI agrees to notify Client as soon as practicable if such materials are encountered. Client encourages AEI to take any and all measures, that in AEI's professional opinion, are justified to protect AEI's personnel and the public. Client agrees to waive any claim against AEI and to indemnify, defend and hold harmless AEI from any and all claims arising out of AEI's encountering unanticipated hazardous materials or suspected hazardous materials. Client agrees to compensate AEI for all costs associated with such an event based upon AEI's prevailing fee schedule.

13. **Utilities.** If AEI is expressly engaged to perform soil boring or other invasive testing, AEI shall not be responsible for damages to underground or aboveground utilities, for unmarked or mismarked utilities or other features, or for damage that occurs to such utilities or features. The Client is responsible for providing information to AEI regarding the location of intra-Site utilities. Client recognizes that the use of exploration equipment may unavoidably affect, alter or damage existing structures, vegetation and terrain at the Site. AEI, including subcontractors, will take reasonable precautions to limit damage. However, Client recognizes that such damage is inherent in the normal course of the contracted scope of work and the cost of the repair for any damages is not part of the contracted services. In the event of damage to the property as a result of such work and specifically stated above, Client will hold harmless, AEI, including subcontractors, for damage caused during the course of the agreed upon scope of work.

14. **Conflict of Interest.** To the best of AEI's knowledge, AEI has no actual, potential or apparent conflict of interest pertaining to this Agreement, except as has been previously disclosed to Client in writing, and AEI covenants and agrees that it shall promptly advise Client of any other actual, potential or apparent conflicts of interest, whether existing as of the execution date of this Agreement or arising in the future, upon discovering the same.

AUTHORIZATION TO PROCEED

Proposal for Phase I ESA

1881, 1883, 1891 and 1899 West San Carlos Street, San Carlos, CA 95128

Client Authorization and Billing Information:

I hereby accept the proposal and authorize AEI to proceed with the scope of work as described herein. AEI reserves the right to suspend or delay work for late payment. Should any project information change, I understand that additional fees may accrue and the due date may be extended. Should the agreement be terminated by either party upon written notice through no fault of the party initiating termination, compensation shall be paid for all services performed and expenses incurred to the date of termination.

Site Contact Information:

Name: _____ **Phone Number:** _____

Title: _____ **Email Address:** _____

Company: _____ **Relation to Project:** _____

Billing Options (please select method of payment):

☐ **Credit Card:** AEI accepts Visa and MasterCard. Payment must be received prior to the release of the report.

☐ **Check:** Check must be received prior to issuance of the report(s).

☐ **Corporate Account:** For established corporate accounts only.

☐ **Purchase Order:** For government accounts only.

Client Responsibilities: *It is our client's responsibility to provide adequate information for AEI to complete the requested scope of services. This includes sufficient information to identity property boundaries, the arrangement of complete site access and identifying a knowledgeable site contact. If there are known copies of prior reports or other relevant documentation, the client will assist AEI in obtaining them prior to the completion of our assessment.*

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

SURVEY NOTES

BASIS OF BEARINGS:
THE BEARING N00°15'00"W BETWEEN FOUND MONUMENTS ON BROOKLYN AVENUE AS SHOWN ON THAT PARCEL MAP RECORDED ON MAY 22, 1991 IN BOOK 629 OF MAPS PAGE 10, SANTA CLARA COUNTY RECORDS, WAS TAKEN AS THE BASIS OF BEARINGS FOR THIS SURVEY.

BENCHMARK:
A CITY OF SAN JOSE BENCHMARK BM 349-F, DESCRIBED AS: CHISELED SQUARE ON TOP OF CURB, FIRST JOINT WEST OF WESTERLY E.R. OF THE NORTHWEST RETURN OF SAN CARLOS AT N. BUENA VISTA AVENUE, ADJACENT TO PEDESTRIAN CROSSING.

ELEVATION = 112.45 FEET (NGVD29)

GENERAL NOTES:

1. DATE OF FIELD SURVEY: FEBRUARY 13, 21, 22 AND 26, 2020.
   AERIAL BASED TOPOGRAPHIC MAP SHOWN AS BACKGROUND TO THIS SURVEY PROVIDED BY 360 AERIAL SURVEYS DATED FEBRUARY 21, 2020.
2. ALL DISTANCES AND DIMENSIONS ARE SHOWN IN FEET AND DECIMALS THEREOF.
3. THE TYPES, LOCATIONS, AND SIZES OF EXISTING UNDERGROUND UTILITIES AS SHOWN ON THIS TOPOGRAPHIC SURVEY ARE BASED ON AS-BUILT MAPS, GIS MAPS, AND OTHER UTILITY INFORMATION FROM DIFFERENT SOURCES. ONLY ACTUAL EXCAVATION WILL REVEAL THE TYPES, EXTENT, SIZES, LOCATIONS AND DEPTHS OF SUCH UNDERGROUND UTILITIES. A REASONABLE EFFORT HAS BEEN MADE TO DELINEATE ALL KNOWN UNDERGROUND UTILITIES. CONTRACTOR SHALL VERIFY IN FIELD AND ASSUME RESPONSIBILITY FOR ALL EXISTING UTILITIES NOT SHOWN ON THESE DRAWINGS.

FOOTNOTES

1. "Retained" in box 2.d.2 means to leave existing IA in place. An IA that goes through maintenance (e.g., pavement resurfacing/slurry seal/grind), but no change in grade is considered "retained."
2. The "replaced" and "new" IA in boxes 2.d.3. and 2.d. 4 are based on the total area of the site and not specific locations on site. For example, impervious parking created over a pervious area is not "new" IA if an equal amount of pervious area replaces IA somewhere else on the site. Constructed IA on a site that does not exceed the Total Pre-Project IA in box 2.d.1. will be considered "replaced" IA. **A site will have "new" IA only if the Total Post-Project IA in box 2.d.5. exceeds the Total Pre-Project IA (2.d.5 - 2.d.1 = 2.d.4).**
3. These areas are locations of the public street that are being dedicated (sidewalk or street easement) to the City of San José.
4. Include bioretention areas, infiltration areas, green roofs, and pervious pavement in PA calculations.

TABLE 1
ROUTINE MAINTENANCE ACTIVITIES FOR FLOW-THROUGH PLANTERS

NO.	MAINTENANCE TASK	FREQUENCY OF TASK
1	INSPECT THE PLANTER SURFACE AREA, INLETS AND OUTLETS FOR OBSTRUCTIONS AND TRASH; CLEAR ANY OBSTRUCTIONS AND REMOVE TRASH.	QUARTERLY
2	INSPECT PLANTER FOR STANDING WATER. IF STANDING WATER DOES NOT DRAIN WITHIN 2-3 DAYS, THE SURFACE BIOTREATMENT SOIL SHOULD BE TILLED OR REPLACED WITH THE APPROVED SOIL MIX AND REPLANTED. USE THE CLEANOUT RISER TO CLEAR ANY UNDERDRAINS OF OBSTRUCTIONS OR CLOGGING MATERIAL.	QUARTERLY
3	CHECK FOR ERODED OR SETTLED BIOTREATMENT SOIL MEDIA. LEVEL SOIL WITH RAKE AND REMOVE/REPLANT VEGETATION AS NECESSARY.	QUARTERLY
4	MAINTAIN THE VEGETATION AND IRRIGATION SYSTEM. PRUNE AND WEED TO KEEP FLOW-THROUGH PLANTER NEAT AND ORDERLY IN APPEARANCE.	QUARTERLY
5	EVALUATE HEALTH AND DENSITY OF VEGETATION. REMOVE AND REPLACE ALL DEAD AND DISEASED VEGETATION. REMOVE EXCESSIVE GROWTH OF PLANTS THAT ARE TOO CLOSE TOGETHER.	ANNUALLY, BEFORE THE RAINY SEASON BEGINS
6	USE COMPOST AND OTHER NATURAL SOIL AMENDMENTS AND FERTILIZERS INSTEAD OF SYNTHETIC FERTILIZERS, ESPECIALLY IF THE SYSTEM USES AN UNDERDRAIN.	ANNUALLY, BEFORE THE RAINY SEASON BEGINS
7	INSPECT THE OVERFLOW PIPE TO MAKE SURE THAT IT CAN SAFELY CONVEY EXCESS FLOWS TO A STORM DRAIN. REPAIR OR REPLACE ANY DAMAGED OR DISCONNECTED PIPING. USE THE CLEANOUT RISER TO CLEAR UNDERDRAINS OF OBSTRUCTIONS OR CLOGGING MATERIAL.	ANNUALLY, BEFORE THE RAINY SEASON BEGINS
8	INSPECT THE ENERGY DISSIPATOR AT THE INLET TO ENSURE IT IS FUNCTIONING ADEQUATELY, AND THAT THERE IS NO SCOUR OF THE SURFACE MULCH. REMOVE ANY ACCUMULATION OF SEDIMENT.	ANNUALLY, BEFORE THE RAINY SEASON BEGINS
9	INSPECT AND, IF NEEDED, REPLACE WOOD MULCH. IT IS RECOMMENDED THAT 2" TO 3" OF COMPOSTED ARBOR MULCH BE APPLIED ONCE A YEAR.	ANNUALLY, BEFORE THE RAINY SEASON BEGINS
10	INSPECT SYSTEM FOR EROSION OF BIOTREATMENT SOIL MEDIA, LOSS OF MULCH, STANDING WATER, CLOGGED OVERFLOWS, WEEDS, TRASH AND DEAD PLANTS. IF USING ROCK MULCH, CHECK FOR 3" OF COVERAGE.	ANNUALLY AT THE END OF THE RAINY SEASON AND/OR AFTER LARGE STORM EVENTS,
11	INSPECT SYSTEM FOR STRUCTURAL INTEGRITY OF WALLS, FLOW SPREADERS, ENERGY DISSIPATORS, CURB CUTS, OUTLETS AND FLOW SPLITTERS.	ANNUALLY AT THE END OF THE RAINY SEASON AND/OR AFTER LARGE STORM EVENTS,

Notes:

1. Precast concrete structure shall be manufactured in accordance with ASTM Designation C857 and C858.
2. Filter system shall be supplied with traffic rated (H20) bolted & gasketed Ø36" circular access covers with risers as required. Shallow applications may require configurations with (H20) bolted & gasketed square/rectangular access hatches. Field poured concrete collars required, by others.
3. Inlet & outlet pipe(s) (Ø 18" maximum) may enter device on all three sides of the inlet & outlet chambers respectively.
4. Inlet chamber shall be supplied with a drain-down device designed to remove standing water between storm events.
5. For depths less than specified minimums contact Oldcastle® Stormwater Solutions for engineering assistance.

II.D. ADDRESS:
305 VINEYARD TOWN CENTER #228
MORGAN HILL, CA 95037

BIOTREATMENT SOIL REQUIREMENTS

- BIORETENTION SOIL MIX SHALL MEET THE REQUIREMENTS AS OUTLINED IN APPENDIX C OF THE C.3 STORM WATER HANDBOOK AND SHALL BE A MIXTURE OF FINE SAND AND COMPOST MEASURED ON A VOLUME BASIS OF 60-70% SAND AND 30-40% COMPOST. CONTRACTOR TO REFER TO APPENDIX C FOR SAND AND COMPOST MATERIAL SPECIFICATIONS. CONTRACTOR MAY OBTAIN A COPY OF THE C3 HANDBOOK AT : HTTP: //WWW.SANJOSECA.GOV/INDEX.ASPX?NID=1761
- PRIOR TO ORDERING THE BIOTREATMENT SOIL MIX OR DELIVERY TO THE PROJECT SITE, CONTRACTOR SHALL PROVIDE A BIOTREATMENT SOIL MIX SPECIFICATION CHECKLIST, COMPLETED BY THE SOIL MIX SUPPLIER AND CERTIFIED TESTING LAB.

BIORETENTION & FLOW-THROUGH PLANTER NOTES:

1. SEE GRADING PLAN FOR BASIN FOOTPRINT AND DESIGN ELEVATIONS.
2. PLACE 3 INCHES OF COMPOSTED, NON-FLOATABLE MULCH IN AREAS BETWEEN PLANTINGS AND SIDE SLOPES.
3. SEE LANDSCAPE PLAN FOR MULCH, PLANT MATERIALS AND IRRIGATION REQUIREMENTS
4. CURB CUTS SHALL BE A MINIMUM 18" WIDE AND SPACED AT MAXIMUM 10' O.C. INTERVALS AND SLOPED TO DIRECT STORMWATER TO DRAIN INTO THE BASIN. CURB CUTS SHALL ALSO NOT BE PLACED INLINE WITH OVERFLOW CATCH BASIN. SEE GRADING PLAN FOR MORE DETAIL ON LOCATIONS OF CURB CUTS.
5. A MINIMUM 0.2' DROP BETWEEN STORM WATER ENTRY POINT (I.E. CURB OPENING, FLUSH CURB, ETC.) AND ADJACENT LANDSCAPE FINISHED GRADE.
6. DO NOT COMPACT NATIVE SOIL / SUBGRADE AT BOTTOM OF BASIN. LOOSEN SOIL TO 12" DEPTH.

STANDARD STORMWATER CONTROL NOTES:

- STANDING WATER SHALL NOT REMAIN IN THE TREATMENT MEASURES FOR MORE THAN FIVE DAYS, TO PREVENT MOSQUITO GENERATION. SHOULD ANY MOSQUITO ISSUES ARISE, CONTACT THE SANTA CLARA VALLEY VECTOR CONTROL DISTRICT (DISTRICT). MOSQUITO LARVICIDES SHALL BE APPLIED ONLY WHEN ABSOLUTELY NECESSARY, AS INDICATED BY THE DISTRICT, AND THEN ONLY BY A LICENSED PROFESSIONAL OR CONTRACTOR. CONTACT INFORMATION FOR THE DISTRICT IS PROVIDED BELOW.
- DO NOT USE PESTICIDES OR OTHER CHEMICAL APPLICATIONS TO TREAT DISEASED PLANTS, CONTROL WEEDS OR REMOVED UNWANTED GROWTH. EMPLOY NON-CHEMICAL CONTROLS (BIOLOGICAL, PHYSICAL AND CULTURAL CONTROLS) TO TREAT A PEST PROBLEM. PRUNE PLANTS PROPERLY AND AT THE APPROPRIATE TIME OF YEAR. PROVIDE ADEQUATE IRRIGATION FOR LANDSCAPE PLANTS. DO NOT OVER WATER.

Luminaire illuminance values provided in this report, whether for normal, critical, or emergency applications, are for product application assistance only. These values were developed in collaboration with, and are subject to approval by, the design professional of record (architect/engineer/LC), and are NOT intended for construction. Because these values are approximate and based on limited application information provided to 16500, Inc. at the time of calculation, 16500, Inc. does not warrant the installed performance of the luminaire(s) will match that shown in this report. Please verify all data and conditions to assure the accuracy of the report. 16500 shall neither be responsible nor liable for design, approval, or results of emergency lighting under any circumstances.

THIS LIGHTING APPLICATION REQUIRES SPECIFIC LIGHTING CONTROL DEVICES OR SYSTEMS PER CALIFORNIA TITLE 24 PART 6.

Therefore, this proposal includes:

- ☐ SOLUTION: This proposal includes a complete lighting and control system either as an alternate to that specified, or as a recommendation based on the information provided, subject to your review and approval.
- ☐ SUPPLEMENT: This proposal includes lighting as requested/specified; as well as a proposed lighting control system for your review and approval.
- ☒ ALERT: This proposal includes only lighting as requested/specified. However, the application likely requires compatible lighting controls to meet the following criteria. We are happy to provide a lighting control quote/proposal at your request.
  - Manual Switch(es)
  - Automatic time switch (astronomical)
  - Occupancy Sensor(s)
  - Photosensor(s) / daylight sensor(s)
  - Demand responsive / load shedding
  - Controlled Receptacle(s)
  - Motion Sensor(s) - Outdoor

SUBJECT: Approval of Site History Report, 1915 West San Carlos Street, San Jose, Santa Clara County

DRAFT

Dear Ms. Woods:

This letter responds to your March 24, 2016, site history report. As explained below, I approve the report.

Background
The 2007 Santa Clara Valley Water District Study reported that the Economy Cleaners dry cleaning facility had been operating at 1915 West San Carlos Street in San Jose (Site) for over 30 years beginning in 1947 (Santa Clara Valley Water District, "Study of Potential for Groundwater Contamination from Past Dry Cleaner Operations in Santa Clara County," undated, circa 2007). Our letter dated February 3, 2016, required a site history report to assess the dry cleaning operation that reportedly took place at Site.

Report Summary
The site history report indicated the following:

- The 99 Cents Only Stores LLC (99 Cents) acquired the property in February 2007
- 99 Cents obtained a December 12, 2006, Phase I Environmental Site Assessment Report (ESA) for the Site Prior to purchasing the property
- The ESA did not refer to the presence of a dry cleaner facility at the Site

Regional Water Board Comments
Subsequently The Regional Water Board obtained the following information regarding the Site:

- An undated Sanborn Map (i.e., fire insurance map) for the Site indicated a "Steam Laundry" was present at the Site
- A July 1, 1987, soil sampling report indicated that one gasoline and one tetrachloroethene (PCE) underground storage tank (USTs) were reportedly removed from the Site in 1985. Four soil samples were collected approximately 10 to 11 feet below the ground surface near the ends of the former USTs in June 1987. The sampling indicated PCE was not present above laboratory reporting limits of 6 parts per billion (ppb). Up to 6 parts per

million total petroleum as gasoline, up to 25 ppb benzene, up to 7 ppb toluene, and up to 260 ppb xylene were present in the soil samples.

Approval of Report
The subject report satisfies the requirements of our letter dated February 3, 2016. I hereby approve it.

Case Status
Although the site history report(s) documents that a dry cleaner operated at the property, soil samples collected at the Site did not contain PCE above laboratory reporting limits. Therefore, the Regional Water Board is not opening a case for this Site, and no investigation or remedial action is required. We will keep the Site in our GeoTracker database with the type of the site designated as "non-case information" and the status as "informational item."

If you have any questions, please contact Ron Goloubow of my staff at (510) 622-2442 or by e-mail at ron.goloubow@waterboards.ca.gov.

Sincerely,

Bruce H. Wolfe
Executive Officer

DRAFT

Mr. Paul Dorsa
Antiques Colony
1915 West San Carlos Street
San Jose, CA 95128

Attention: Paul Dorsa:

Subject: Field sampling and analysis at Antiques Colony, 1915 West San Carlos St., San Jose, CA on 6-24-87.

DRAFT

Enclosed are the results for the analysis of soil samples taken at Antiques Colony, 1915 West San Carlos Street, San Jose, CA on 6-24-87. The site had contained two underground storage tanks that were removed approximately two years ago. It is our understanding that one tank was a 2000 gallon gasoline tank while the other was a 7500 gallon tank which contained possibly cleaning solvent i.e. perchloroethylene or petroleum distillates. Both tanks supposedly resided in the same backfill. The tanks had been removed approxmately two years ago, the hole backfilled and covered with asphalt. Samples were taken at depths of 10 feet to 11 feet below grade at where the ends of the tanks had previously been located. This was determined by talking with Paul Dorsa. The lot had been paved over with asphalt so there was no obvious indication as to where the tanks had resided. A map giving the location of the samples and where the tanks supposedly had resided is enclosed. The samples were analysed for total volatile hydrocarbons (as gasoline) which would pick up gasoline and petroleum distillates, as well as specifically for perchloroethylene (PCE). Sampling was performed in accordance with approved methodology. The samples were obtained in appropriate containers which were sealed, logged, chilled and transported to the laboratory for analysis. Standard chain-of-custody records were maintained at each transmittal. The samples were analyzed in accordance with approved methodology.

Reportage

Submission to the Santa Clara County Health Department should include copies of this report. The property owner should attach a cover letter and submit all documents together in a package.

The following address has been listed for your convenience:

Santa Clara County Health Department
Hazardous Materials Section
2220 Moorpark Avenue
San Jose, CA 95128
Attn: Gordon McPhail

If you have any questions please do not hesitate to contact us.

Sincerely,

Michael L. Murtiff

Comments:SOIL SAMPLES FOR GASOLINE, PCE AND PETROLEUM DISTILLATES, SAMPLES 6/24/87

DRAFT

ANALYSIS: FOR GASOLINE, PCE AND PETROLEUM DISTILLATES

Sample #		Result
001705	Soil sample, 10 Foot depth below grade, south end of where 2000 gallon gasoline tank had resided.	0.6 +/- 0.06 PPM(wt/wt) Volatile hydrocarbons (as Gasoline) 3.4 +/- 0.4 PPB Benzene 2.9 +/- 0.3 PPB Toluene 30 +/- 3 PPB Xylenes < 6 PPB PCE
001707	Soil sample, 10 Foot depth below grade, north end of where 2000 gallon gasoline tank had resided.	0.43 +/- 0.04PPM(wt/wt) Volatile hydrocarbons (as Gasoline) 4.9 +/- 0.5 PPB Benzene 5.7 +/- 0.6 PPB Toluene 73 +/- 8 PPB Xylenes < 6 PPB PCE
001709	Soil sample, 10 Ft 2 in depth below grade, east end of where 7500 gallon tank had resided.	6 +/- 0.6 PPM (wt/wt) Volatile hydrocarbons (as Gasoline) 25 +/- 3 PPB Benzene 7 +/- 0.7 PPB Toluene 260 +/- 26 PPB Xylenes < 6 PPB PCE

001706	Soil sample, 11 Foot depth below grade, west end of where 7500 gallon tank had resided.	0.3 +/- 0.03 PPM(wt/wt) Volatile hydrocarbons (as Gasoline) 5 +/- 0.5 PPB Benzene 6 +/ -0.6 PPB Toluene 47 +/ - 5 PPB Xylenes < 6 PPB PCE

Protocol: For soils: EPA Method 5020 and 8015, (EPA Manual SW-846, April 1984). Final detection is by gas chromatography employing a flame ionization detector. Standards run as spikes and recoveries.

Samples kept for 14 days unless prior arrangements made.

PPM = Parts Per Million, PPB = Parts Per Billion, PCE = Perchloroethylene

Subject: Fuel Leak Site Case Closure, Antiques Colony, 30 Cleveland Street, San Jose, CA 95128; Case No. 14-370; SCVWDID # 07S1W13E01f.

Dear Mr. Dorsa:

This letter transmits the enclosed underground storage tank (UST) case closure letter in accordance with Chapter 6.75 (Article 4, Section 25299.37[h]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, the Santa Clara Valley Water District is required to use this case closure letter for all UST leak sites. We are also transmitting to you the enclosed case closure summary. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

SITE INVESTIGATION AND CLEANUP SUMMARY

Please be advised that the following conditions exist at the site:

- Traces of several solvents (i.e., Acetone) have been detected in soil samples and grab groundwater samples; these appear to be below levels of regulatory concern (Regional Board, Risk Based Screening Levels).

If you have any questions, please call Benjamin Berman at (408) 265-2607, extension 2992. Thank you.

Sincerely,

James S. Crowley, P.E.
Engineering Unit Manager
Leaking Underground Storage Tank Oversight Program

Subject: Fuel Leak Site Case Closure, Antiques Colony, 30 Cleveland Street, San Jose, CA 95128; Case No. 14-370; SCVWDID # 07S1W13E01f.

Dear Mr. Dorsa:

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

James S. Crowley, P.E.

Description of Interim Remediation Activities:

1. Sample 001709, collected at 10 ft. bgs on 6-24-87 from the east end of the former 7500 gallon UST.
2. Analysis for Perchloroethylene (PCE) on four soil samples collected at 10 to 11 ft. bgs on 6-24-87 from the approximate ends of the two former USTs.
3. Soil sample SB1@25', collected at 25 ft. bgs on 5-14-02 from boring SB1 located approximately between the two former USTs. Analysis by EPA Method 8260.
4. Acetone; six additional EPA Method 8260 analytes were detected in soil samples at lesser concentrations.
5. Groundwater sample SB1-GW, collected on 5-14-02 from boring SB1 located approximately between the two former USTs. Analysis by EPA Method 8260.
6. Acetone; two additional EPA Method 8260 analytes were detected in the groundwater sample at lesser concentrations.
7. Lab report states the following: "This data, generated on 7-8-02, is based on analytical data from 5-17-02 per client request: the results are roughly estimated due to the absence of TPH(g) calibration standard at that time."

DRAFT

IV. CLOSURE

Does complete corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land Use? Santa Clara Valley Water District staff does not make specific determinations concerning public heath risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: None		
Should corrective action be reviewed if land use changes? No		
Monitoring Wells Decommissioned: NA	Number Decommissioned: NA	Number Retained: NA
List Enforcement Actions Taken: 10-10-01 Late Letter, resolved 10-12-01		
List Enforcement Actions Rescinded: None		

V. ADDITIONAL COMMENTS, DATA, ETC.

Summary of Site Investigation:

1984/1985.

The data/documentation available in District files is very limited. Two underground storage tanks (USTs), one 2,000-gallon gasoline and one 7,500-gallon UST, were reportedly removed in October 1984 or February 1985. The 7,500-gallon UST was reported to have contained diesel fuel and/or cleaning solvents (i.e., "perchloroethylene or petroleum distillates"). Both tanks were reportedly located within the same backfill material/excavation. The owner (Mr. Paul Dorsa) witnessed the UST removals and reported that "the tanks were in excellent condition" and "no leakage of either tank was observed". The excavation was backfilled and resurfaced with asphalt. Apparently, no samples were taken at the time of UST removal.

1987.

Four soil samples were collected on June 24, 1987, at depths of approximately 10 to 11 feet below the ground surface (bgs). The samples were collected at the approximate ends of the former UST locations as determined by Mr. Paul Dorsa (it was reported that "The lot had been paved over with asphalt so there was no obvious indication as to where the tanks had resided"). The samples were analyzed for "Gasoline, PCE and Petroleum Distillates" by EPA Method 5020 and 8015. The soil sample analytical results indicated up to 6.0 parts per million (ppm) Gasoline and 0.025 ppm Benzene from soil sample "001709" at 10 ft. bgs from east end of former 7500 gal. UST. All four samples had <0.006 ppm PCE.

2002.

One exploratory soil boring ("SB1"), located approximately between the two former USTs, was driven to 75 ft. bgs on May 14, 2002. Soil samples were collected at five foot intervals beginning at 15 ft. bgs, and a grab groundwater sample was also collected (groundwater was encountered at ~48 ft. bgs). The soil samples were analyzed for volatile halocarbons by EPA Method 601/8010; in addition, soil sample "SB1@25'" (from 25 ft. bgs) was analyzed for volatile organics by EPA Method 8260. This sample had the highest PID readings in the field. The grab groundwater sample was analyzed for volatile organics by EPA Method 8260.

The analytical results for soil sample SB1@25' generally indicated no Benzene, Toluene, Ethyl Benzene, or total Xylenes (BTEX) or Methyl tert Butyl Ether (MtBE) concentrations above the method detection limits. The exception was Ethyl Benzene, which was detected at 0.0054 ppm (detection limit: 0.005 ppm). Seven other Method 8260 analytes were found in sample SB1@25'; these included 0.24 ppm Acetone, 0.081 ppm n-Propylbenzene, 0.058 ppm sec-Butylbenzene, and 0.026 ppm Methyl Ethyl Ketone. The soil samples generally did not contain EPA Method 8010 analytes above the test method detection limits. The two exceptions were soil samples SB1@30' and SB1@40', which contained 0.0071 and 0.007 ppm 1,2 Dichlorobenzene, respectively.

The grab groundwater sample ("SB1-GW") did not contain BTEX or MtBE/fuel oxygenates above the test method detection limits. Three Method 8260 analytes were detected in the groundwater sample; these included 35 parts per billion (ppb) Acetone, 6.4 ppb Methyl Ethyl Ketone, and 0.66 ppb Methyl Isobutyl Ketone. PCE was not detected.

Note: There is a reference in a District letter (dated November 8, 1989) in the file that indicates PCE detections in soil prior to 1988. The lack of detection of PCE reported by CHIPS Environmental in 1987 and by Environmental Restoration Services in May 2002 resolves the regulatory concern regarding PCE.

DRAFT

Conclusions:

The sources of contamination have been removed (USTs), the depth to first encountered groundwater is relatively deep (~50 ft. bgs), and no BTEX or MtBE/fuel oxygenate analytes were detected in the recent soil samples (with the exception of Ethyl benzene at 0.0054 ppm) and grab groundwater samples. The District does not consider potential residual contaminants from previous petroleum hydrocarbon fuel releases to be a significant risk to human health or the environment; therefore, SCVWD staff recommend closure for this site.

Traces of several solvents have been detected in soil samples (i.e., up to 0.24 ppm Acetone) and grab groundwater samples (i.e., up to 35 ppb Acetone); these appear below levels of regulatory concern (Regional Board, Risk Based Screening Levels).

AHERA, Asbestos Building Inspector

Summary of Professional Experience:

Mr. Olsen has had experience in the environmental consulting, property disclosure, and real estate due diligence industry since 1994. Mr. Olsen has performed several thousand Phase I Environmental Site Assessments (ESAs) including Fannie Mae, Freddie Mac, HUD and FDIC scopes of work. Mr. Olsen has performed asbestos, lead-based paint, radon, and mold sampling on hundreds of Phase I ESA projects. He has completed Phase I ESA projects on all property types, including heavy and light industrial, commercial office and retail, hospitality, multifamily, mobile home parks, hospital and skilled nursing facilities, resort properties, automotive service facilities, and waste processing facilities. Mr. Olsen has several years' experience reviewing Phase I ESA reports, and conducing "desk reviews" of Phase I ESAs as a third-party reviewer. Mr. Olsen has completed approximately 50 Property Condition Assessments.

Select project experience for Mr. Olsen includes:

- **Oakridge Shopping Center, San Jose, CA** - This 1.14M SF shopping center was constructed in 1971. HRECs were identified in connection with a former auto service facility which was on site. Mr. Olsen recommended an ACM O&M plan.
- **Garaventa Transfer Station, Pittsburg, CA** - This 11.05-acre site is a recycling and solid waste transfer station. RECs were identified, and an ACM O&M plan was recommended as well as continued groundwater monitoring and remediation per RWQCB requirements.
- **Embassy Suites, South Lake Tahoe, CA** - Embassy Suites is a resort hotel. No RECs were identified; however, Mr. Olsen recommended an ACM O&M plan.
- **Durkee Industrial Facility, Richmond, CA** - This 6.32-acre commercial/industrial property was found to have multiple RECs due to historic industrial uses. Groundwater contamination was reported. Mr. Olsen recommended continued groundwater monitoring and remediation per RWQCB requirements.
- **Office Tower, 100 Van Ness Ave, San Francisco, CA** - This 29-story office tower constructed in 1973 was undergoing a complete interior renovation for conversion to residential use. Several RECs were identified due to the operation of vaulted tanks without permits or tank testing documentation.
- **Mixed-use Property, Oakland, CA** - This 2.45-acre site consisted of ten office and retail buildings constructed between 1868 and 1881. RECs were identified in connection with undocumented former onsite contaminated soil removal. Additionally, an adjacent open SLIC case (groundwater contamination) was reported.
- **Portfolio of five multifamily residential facilities, San Francisco, CA** - No RECs were found while reviewing this portfolio of multifamily residential properties in San Francisco. Mr. Olsen recommended both ACM and LBP O&M plans for these properties.

Katie Hindt – Client Manager

B.A. – Environmental Studies, University of California, Santa Cruz

Registered Environmental Property Assessor (REPA) #528528

Ms. Hindt has over 10 years of experience in the environmental service industry and provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase 1 Environmental Site Assessments, Environmental Transaction Screens, Environmental Transaction Analyses, Records Research with Risk Assessments, Regulatory Database Reviews and Historical Records Reviews. She has completed assessments on a variety of residential, agricultural, commercial and industrial sites. Ms. Hindt is familiar with all aspects of Due Diligence Property Assessments and the requirements of many reporting standards including, ASTM, AAI, HUD and client-specific formats.

Project experience for Ms. Hindt includes:

- Phase 1 Environmental Site Assessments (Phase 1 ESA)
- Environmental Transaction Screens (ETS)
- Environmental Transaction Analyses (ETA)
- Records Search with Risk Assessment (RSRA)
- Regulatory Database Reviews
- Historical Records Reviews
- Project Coordination and Setup

As a Client Manager, Ms. Hindt provides senior author services and client management. Additional responsibilities include managing projects and staff mentorship.

In addition, prior to joining the environmental service industry, Ms. Hindt spent four years studying a broad range of environmental disciplines including: National environmental law, policy and economics, restoration ecology, California environmental history and California freshwater policy/issues.
