1.0 INTRODUCTION

1.1 Purpose and Scope of Work

This report presents the results of a Phase I Environmental Site Assessment (ESA) for the properties located at 119, 123-125, and 127 Independence Drive, 1205 Chrysler Drive, and 130 Constitution Drive in Menlo Park, San Mateo County, California (the site or subject property). The site location is shown on Plate 1, and the subject property and vicinity are shown on Plates 2 and 3. The site consists of five legal parcels covering approximately 8.45 acres and identified by San Mateo County Assessor's Parcel Numbers (APNs) 055-236-140, -180, -240, -280, and -300 that have been developed with light industrial commercial buildings and associated paved parking lots and landscaped areas. PES Environmental, Inc. (PES) performed the Phase I ESA on behalf of The Sobrato Organization (Sobrato) to compile and evaluate available information to assess for Recognized Environmental Conditions (RECs) associated with the site. PES understands that the Phase I ESA is a component of environmental due diligence to support a planned redevelopment for mixed-use purposes.

The ESA was performed pursuant to our work authorization dated December 15, 2020 (Reference No. 126.167.01.P02) and in general accordance with ASTM International guidelines for Phase I Environmental Site Assessments (ASTM E1527-13). These guidelines comply with the U.S. Environmental Protection Agency's All Appropriate Inquiries (AAI) rule adopted in November 2013 and amended December 30, 2013. The following tasks were conducted during this ESA:

- Federal, State, and local agency databases were reviewed to identify nearby sites that have reported the use, storage, or release of hazardous materials;
- Regulatory agency records regarding the site and adjacent properties were reviewed;
- Historical aerial photographs, Sanborn® Fire Insurance maps, and historical topographic maps of the site and surrounding area were evaluated, as available, to assess prior land uses;
- Historical documents concerning investigations performed at the subject property were reviewed;
- Individuals with knowledge of the site were interviewed;
- An inspection of the site and a reconnaissance of surrounding properties were performed to assess the potential for contamination of the site from on-site or off-site sources. The site inspection was conducted by an environmental professional with qualifying experience; and
- This report was prepared presenting the results of the Phase I ESA assessment.

A Recognized Environmental Condition, or REC, is defined in the ASTM International guidelines (ASTM E1527-13) as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. A controlled REC (CREC) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., property use restrictions, activity/use limitations, institutional controls, or engineering controls). An historical REC (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

De minimis conditions are defined by ASTM as conditions that generally do not present a threat to human health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. A *de minimis* condition is not a REC and not a CREC.

1.2 Special Terms and Conditions

The ESA activities were conducted in general accordance with ASTM E1527-13. There are no other special terms or conditions for this report.

1.3 Limitations and Exceptions

This Phase I ESA was performed in accordance with practices and procedures generally accepted in the consulting environmental engineering profession at the time they were performed. The findings, opinions, conclusions, and recommendations expressed herein are applicable as of the date the services were provided. Our professional judgment to assess the potential for contamination is based on limited data; no warranty is given or implied.

The Phase I ESA was prepared at the request of The Sobrato Organization (Sobrato) as part of its due diligence for acquisition of specified properties and redevelopment, and may be relied on only by Sobrato and as provided for in the Service Agreement with Sobrato. No other party may rely on this report without the express written permission of Sobrato and PES.

2.0 USER PROVIDED INFORMATION

2.1 Title Records

Title records were not provided to PES for the preparation of this Phase I ESA.

2.2 Specialized Knowledge or Experience

PES does not possess any specialized knowledge or experience regarding the subject property. Also, as noted below, Sobrato has advised PES that it has no specialized environmental knowledge regarding the subject property except for information included in reports as discussed in Section 4.0.

2.3 Environmental Liens or Activity and Use Limitations

Information regarding environmental liens or activity or use limitations was not provided to PES for this ESA, and PES is not aware of any such liens or use limitations on the subject property. Sobrato has advised PES it is not aware of any such liens or use limitations on the subject property.

2.4 User Questionnaires

As part of this Phase I ESA, User Questionnaires for the five properties, as recommended in ASTM E 1527-13, were submitted to Ms. Sierra Sousa, the project representative for Sobrato. This questionnaire, which is typically completed by the party who will rely on the ESA, facilitates the transfer of known site information to the environmental professional and promotes qualification of the relying party for one of the *Landowner Liability Protections (LLPs)*[1] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*").

According to Ms. Sousa, the following responses were provided on the User Questionnaire:

- A search of recorded land title records did not identify any environmental cleanup liens or activity or use limitations (AULs) filed or recorded against the properties under federal, tribal, state, or local law; and

- Ms. Sousa has no specialized knowledge or experience related to the subject properties or nearby properties, except that the property at 119 Independence was purchased by Sobrato in 2015 and is occupied by Davey Tree Expert Company (Davey Tree); 123-125 Independence Drive was purchased by Sobrato in 2015 and is occupied by L3 Harris; 127 Independence Drive was purchased by Sobrato in 2016 and is occupied by Artio Medical; 1205 Chrylser Drive was purchased by Sobrato in 2016 and is vacant; and 130 Constitution Drive was purchased by Sobrato in 2015 and is occupied by L3 Harris;

[1] *Landowner Liability Protections, or LLPs, is the term used to describe the three types of potential defenses to Superfund Liability in US EPA's Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements" Guide) issued on March 6, 2003.*

Ms. Sousa additionally stated the following in the User Questionnaire.

119 Independence Drive

- Ms. Sousa believed the property has been used for light industrial/office space and the current tenant, Davey Tree, occasionally has approximately 50 gallons of insecticides and fungicides on site. Ms. Sousa is unaware of any chemical spills or releases or environmental cleanups on the site; and
- Ms. Sousa has no other knowledge or experience related to the properties and of the presence of indicators that point to the presence or likely presence of environmental contamination on the subject property.

123-125 Independence Drive

- Ms. Sousa states the property was used for agricultural land prior to development in 1960. Since then, the on-site building has been occupied by various light industrial/commercial companies. Ms. Sousa is unaware of any chemical spills or releases or environmental cleanups on the site, except for what was reported in the Phase 1 conducted by AEI Consultants (Section 4.0); and
- Ms. Sousa stated that according to the previous Phase 1 (AEI, 2015), chlorinated solvents were previously used at the site; cyanide and hexavalent chromium exceeded allowable limits in wastewater discharge; and two underground storage tanks were removed from the subject property in 1985.

127 Independence Drive

- Ms. Sousa states the property was used for agricultural land prior to development of the current structure in 1968. Since then, the on-site building has been occupied by multiple dentists, office uses, and bioscience/med-tech companies. Ms. Sousa is unaware of any chemical storage or uses, chemical spills or releases, or environmental cleanups on the site; and
- Ms. Sousa stated that according to the previous Phase 1 (PES, 2015b), there is a regional trichloroethylene (TCE) plume in groundwater in the vicinity of the site.

1205 Chrysler Drive

- Ms. Sousa states the property was likely used for agricultural land prior to development of the current structure, which based on the area, has been used for light industrial/office space. Ms. Sousa is unaware of any current chemical storage or uses or environmental cleanups at the site; however, based on a Phase 1 conducted for an adjacent property (PES, 2015b), the site was listed in the Spill, Leaks, Investigation, and Cleanup (SLIC) database and the Regional Water Quality Control Board (RWQCB) issued a No Further Action determination on March 27, 2002; and
- Ms. Sousa stated that according to the previous Phase 1 (PES, 2015), there is a regional TCE plume in groundwater in the vicinity of the site.

130 Constitution Drive

- Ms. Sousa states the property was likely used for agricultural land prior to development of the current structure. The on-site building has been occupied by the current tenant, since 1972. Ms. Sousa is unaware of any current chemical storage or uses. Based on a previous Phase 1 (PES, 2016), two California Hazardous Material Incident Reporting System (CHMIRS) incidents (in 1997 and 2007) are listed for the subject property; however, after cleanup activities, no further action was required by San Mateo County Environmental Health (SMCEH); and

- Ms. Sousa stated that according to the previous Phase 1 (PES, 2016), there is a regional TCE plume in groundwater in the vicinity of the site.

Copies of the completed User Questionnaires provided by Ms. Sousa are provided in Appendix A of this report.

2.5 Commonly Known or Reasonably Ascertainable Information

Any commonly known or reasonably ascertainable information provided to PES during the preparation of this Phase I ESA is presented within this report. Commonly known or reasonably ascertainable information provided by Sobrato is summarized above in Section 2.4.

2.6 Owner, Property Manager, and Occupant Information

A Key Site Manager Questionnaire was completed for each parcel by the following:

- Mr. Leonardo Rivera Barragan, representing the current tenant of 119 Independence Drive;

- Mr. Paul Muller, representing the current tenant of 127 Independence Drive;

- Mr. Randy C. Perkins, representing the current tenant of 123-125 Independence Drive and 130 Constitution Drive; and

- Ms. Shelle Barnes, representing the property owner of 1205 Chrysler Drive.

A copy of these completed Key Site Manager questionnaires is also provided in Appendix A. According to responses provided by the above tenant representatives to the questionnaires, the following information was provided:

- Mr. Barragan has no knowledge of USTs or aboveground storage tanks (ASTs) or hazardous substances on or in the vicinity of 119 Independence Drive; however, Mr. Barragan noted up to 50 gallons in aggregate of insecticides and fungicides are stored on the site;

- Mr. Muller has no knowledge of USTs or ASTS or hazardous substances on or in the vicinity of 127 Independence Drive. His company moved into the building in October 2020;

- Mr. Perkins reported the aircraft antenna production support has been operating at 123-125 Independence Drive and 130 Constitution Drive since 1972. He has no knowledge of USTs or ASTS or hazardous substances on or in the vicinity of the properties. Mr. Perkins noted the floor tile mastic contains asbestos-containing material, ACM testing has been completed, and there is an asbestos Operations and Maintenance (O&M) program in place. He additionally indicated the HVAC system is inspected at least annually and problems have been corrected in a timely manner; and

- Ms. Barnes indicated the property was formerly occupied by Pan-Pacific Mechanical which provided plumbing prefabrication, design, and installation. She has no knowledge of USTs or ASTS or hazardous substances on or in the vicinity of 1205 Chrysler Drive. Ms. Barnes indicated that based on the construction of the building in 1965, it may contain ACM and the HVAC system is inspected at least annually and problems have been corrected in a timely manner.

The information was evaluated during completion of the environmental assessment. Further details are provided in the sections below.

3.0 SITE DESCRIPTION

3.1 Location and Description

The site is located in an area primarily used for light industrial/commercial purposes within the City of Menlo Park and County of San Mateo, California. The subject property consists of five legal parcels that are accessed via driveways off Independence Drive, Chrysler Drive, or Constitution Drive. The subject property addresses, San Mateo County Assessor's Parcel Numbers, approximate acreage, and current uses are listed in the table below.

APN #	Approximate Acreage	Property Address	Current Property Use
055-236-180	1-acre	119 Independence Drive	Davey Trees
055-236-140	0.96-acre	123-125 Independence Drive	L3 Harris Technologies
055-236-240	1.18 acres	127 Independence Drive	Artio Medical
055-236-300	2.3 acres	1205 Chrysler Drive	Vacant
055-236-280	2.6 acres	130 Constitution Drive	L3 Harris Technologies

3.2 Site and Vicinity Characteristics

The subject property consists of five parcels; each parcel has been developed with one commercial building, asphalt-paved ground level parking, and landscaped areas. Temporary structures used for storage are situated on 119 Independence Drive and 130 Constitution Drive.

The subject property is bounded to the north by Constitution Drive, to the east by Chrysler Drive and light industrial/commercial buildings, to the south by Independence Drive, and to the west by light industrial/commercial buildings. The subject property and vicinity are illustrated on Plate 2.

3.3 Physical Setting

According to the United States Geological Survey (USGS) *Palo Alto, California* Quadrangle topographic map dated 2012, the site is situated at an elevation of approximately 11 feet above mean sea level. The site is flat, but the area in the general vicinity of the site slopes to the north-northeast. No surface waters or wetlands exist on the site. The nearest surface water body is the Ravenswood Slough and salt marshes located approximately 650 feet north of the site.

According to the database report from EDR, of Shelton, Connecticut (Appendix B) and the National Wetlands Inventory[2] (NWI), there are no identified wetlands on the subject property and the closest located approximately 650 feet to the north. The site is located in a Federal Emergency Management Agency (FEMA) FIRM[3] Special Flood Hazard Area (Zone A) with a 1-percent-annual-chance flood event.

3.4 Local Geology and Hydrogeology

The subject property is located in the southwest side of the San Francisco Bay basin, a sediment-filled structural basin. Soil encountered during a subsurface investigation to install two groundwater monitoring wells on 119 Independence Drive in 1987 (Lowney, 1987) and subsurface investigation on 130 Constitution Drive (PES, 2015c) consisted of fine-grained silt and clay to approximately 10 feet below ground surface (bgs) underlain by interbedded layers of gravel, sand, sandy silt, sandy gravel, and clay to the maximum depth explored of 24 feet bgs.

In 2009, depth to groundwater in the two wells on 119 Independence Drive was measured at an average of approximately 4.5 feet bgs (E2C, 2009). In 2015, groundwater was first encountered in the borings in 130 Constitution Drive at depths ranging from 8 to 10 feet bgs, with the exception of one boring where groundwater was reportedly encountered at 20 feet bgs.

[2] *Federal Fish and Wildlife Service, NWI Mapper (https://www.fws.gov/wetlands/data/Mapper).*
[3] *FEMA Flood Map Service Center (https://msc.fema.gov/portal/search).*

Overall regional groundwater flow is presumed to be toward the San Francisco Bay to the north. According to quarterly groundwater data collected at the adjoining property (120 Constitution Drive) to the west, static depth to groundwater was ranges from approximately 4 to 5 feet bgs and groundwater flow fluctuates north to southeast due to tidal influences typical within the Bay fringe (Pacific, 1994).

The closest surface water body is San Francisco Bay, located approximately 0.9 miles north of the Site. Salt marshes at the edge of the bay extend shoreward to within 650 feet of the site.

The EDR database report summarizes information about soil types in the site vicinity. According to the USGS, the subject property is located in a developed area underlain by clayey soil classified as Urban Land. The National Surveys and Analysis (NSA), The Natural Resources Conservation Service (NRCS), and Soil Conservation Service[4] (SCS) describe soil in the subject property as Urban Land-Orthents (soil which is either covered by asphalt, concrete, buildings, and other structures) in a tidal flat setting.

3.5 Descriptions of Existing On-Site Structures and Improvements

3.5.1 Structures and Current Use

119 Independence Drive

This property currently contains one approximately 13,000 square feet office/warehouse building of single-story steel frame and wood construction constructed in the late 1960s. The building has been improved with a loft style storage area above the northeast portion of the building. A review of historical aerial photographs indicates that no significant structural changes of the building have taken place since construction. The areas surrounding the buildings have been improved with asphalt-paving, curbing, and landscaping. The northern portion of the site is used for storage of vehicles and portions of large tree trunks.

The building is currently occupied by Davey Trees with a sub-tenant, Tom Sawyer Labs, leasing the room in the northwest corner of the building for research and development of robotics. The interior of the building consists of a warehouse, offices, and restrooms. Davey Trees uses the warehouse for storage of mechanical equipment, tools and miscellaneous items, and the loft area for miscellaneous storage.

[4] *United States Department of Agriculture, National Resources Conversation Service, Web Soil Survey (https://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey).*

123-125 Independence Drive

This property currently contains one approximately 12,800 square-foot single story office/warehouse building with a mezzanine, constructed in approximately 1961. A review of historical aerial photographs indicate that no significant structural changes have occurred since building construction. The remaining portions of the site have been improved with asphalt paved parking and driveways, curbing, and landscaping.

The building is currently occupied by L3 Harris (formerly L3 Communications and Randtron Antenna Systems), for the assembly of small antennae used on Department of Defense (DOD) aircraft, testing of antennae in anechoic chambers, and typical office activities.

127 Independence Drive

This property contains one approximately 14,400 square-foot single story building constructed in the late 1960s. The building is composed of steel frame and wood construction with stucco exterior. A review of historical aerial photographs indicates that no significant structural changes have taken place since building construction. The remaining portions of the site have been improved with asphalt-paving, curbing, and landscaping.

The building is currently occupied by Artio Medical, specializing in the research and design of medical and surgical devices. The building is split about evenly between office space and laboratory areas used for research and design of medical devices.

130 Constitution Drive

This property contains one approximately 28,800 square-foot two-story building with a partial mezzanine constructed in the late 1960s. A review of historical aerial photographs indicates that no significant structural changes have taken place since construction of the building. The remaining portions of the site have been improved with enclosed storage areas, asphalt paving, curbing, and landscaping.

The building is currently occupied by L3 Harris (formerly L3 Communications and Randtron Antenna Systems) to design and manufacture antenna systems used on DOD aircraft. The building includes office space and small-scale manufacturing areas.

1205 Chrysler Drive

This property is currently occupied by an approximately 40,400 square feet single-story concrete tilt-up commercial building with a brick and steel single-story addition on the south side of the building. The site building was originally constructed in the late 1960s comprising approximately 22,500 square feet. Additions to the building in the early 1970s, including the brick and steel addition, resulted in the configuration of the present-day structure. A review of historical aerial photographs indicates that no significant structural changes have occurred since the 1970s.

The building is currently vacant but was previously occupied by Pan Pacific Mechanical (Pan Pacific) which used the facility for fabrication and machining of plumbing and construction materials. Approximately 20 percent of the building interior consisted of office space and the remainder a warehouse.

3.5.2 Other Improvements

Electricity and natural gas are supplied by Pacific Gas and Electric (PG&E). Water is supplied by Menlo Park Municipal Water District, and sewage services are provided by West Bay Sanitary District (WBSD).

3.6 Current Uses of Adjoining Properties

A reconnaissance of the surrounding area was performed to assess whether neighboring sites represent a potential environmental condition that could affect the subject site. The current uses of the adjoining properties, as observed during the reconnaissance, are summarized below.

Properties to the North

The subject property is bound to the north by Constitution Drive and beyond by a recently constructed multi-story office building and multi-story open air parking garage. Further north is Bayfront Expressway, a flood slough, and Bedwell Bayfront Park.

Properties to the East

The subject property is bounded to the east by L3 Harris (150 Constitution Drive), Component West (1215 Chrysler Drive), and Chrysler Drive, and beyond by commercial properties occupied by L3 Harris and Spaces Co-Working offices. Further east are more commercial buildings.

Properties to the South

The subject property is bounded to the south by the Independence Drive and beyond by a newly constructed multi-story office building, open air multi-story parking garage, and Hotel Nia. Further south is Highway 101 running southeast to northwest.

Properties to the West

The subject property is bounded to the west by commercial buildings occupied by Studio Red (115 Independence Drive) and Carr & Ferrell LLP (120 Constitution Drive) and beyond by additional commercial/light industrial buildings.

3.7 Past Uses of Property and Adjoining Properties

Historical site use information was obtained through a review of aerial photographs, historical topographic maps, historical Sanborn® Fire Insurance Maps, city directories, and regulatory agency file reviews.

3.7.1 Historical Sources

Site use information was obtained through a review of the following list of historical sources. The results of the review of these sources are summarized below:

- **Aerial Photographs:** Aerial photographs obtained from the EDR database report were reviewed for the following years: 1943, 1948, 1950, 1958, 1963, 1968, 1974, 1982, 1991, 1998, 2005, 2009, 2012, and 2016. A summary of the aerial photograph review and copies of the photographs are presented in Appendix C;

- **Topographic Maps:** Various topographic maps of the subject property vicinity were compiled by EDR. The following maps were included in the compilation: USGS *Palo Alto, CA* Quadrangle, 15-minute series topographic maps produced in 1897, 1899, 1943, and 1947, 1948; USGS *Hayward, CA* Quadrangle, 15-minute series topographic maps produced in 1899 and 1947, 1948; USGS *Santa Cruz, CA* Quadrangle, 30-minute series topographical map produced in 1902; USGS *Redwood Point, CA* Quadrangle, 7.5-minute series topographic maps produced in 1948, 19531959, 1961, 1968, 1973, 1994, 1996, and 2012; and USGS *Palo Alto, CA* Quadrangle 7.5-minute series topographic maps produced in 1948, 1953, 1959, 1961, 1968, 1973, 1994, 1996, 1999, and 2012. A summary of the topographic review and copies of the topographic maps are presented in Appendix D;

- **Sanborn Fire Insurance Maps** - A search for available historical Sanborn Fire Insurance Maps was performed by EDR. EDR did not identify any Sanborn Maps for the site. A copy of the EDR 'No Coverage' report is provided in Appendix E;

- **City Directories:** A search for available city directories was performed by EDR. Directories from 1957 to 2017 were searched in approximately 5-year intervals. A summary of the city directories review and copies of the city directory listings are presented in Appendix F;

- **Interviews:** PES interviewed available persons with knowledge concerning the historical use of the property. Information obtained from interviews was incorporated in the historical summary, presented below;

- **Previous Environmental Reports:** Historical information from previous environmental reports prepared concerning the subject and adjacent properties. Further information on the previous environmental reports is provided in Sections 4.0 and 5.0 for subject property and adjacent properties, respectively;

- **Regulatory Agencies Review:** PES requested historical files concerning the site from the City of Menlo Park Building Department (MPBD), Menlo Park Fire Protection District (MPFPD), San Francisco Bay Regional Water Quality Control Board (RWQCB), San Mateo County Environmental Health (SMCEH), San Mateo County Planning and Building Department (SMCPBD), and California Office of Environmental Health Hazard Assessment (OEHHA); and

  PES reviewed historical files concerning the subject property obtained from SMCEH, RWQCB, and MPFPD. MPFPD records included only fire safety inspection reports. SMCPBD and OEHHA did not have any records for the site to review. Information from these sources concerning all site use is included in the summary below. As of the date of this Phase I ESA, the MPBD has not responded to PES's request for files. PES will complete the file reviews once information is obtained from the MPBD and will issue an addendum to this report if warranted.

3.7.2 Historical Review Summary

The following provides historical use information for the subject property and vicinity based on available historical resources listed in the previous sections.

Subject Property

The earliest reviewed record for the site is an 1897 topographic map, which shows the site as undeveloped land at the edge of a slough. Based on the 1943 topographic map, the edge of the slough has been filled in. The southern edge of the slough now is approximately ¼-mile to the north on the north side of Bayfront Expressway. Aerial photographs from 1943 to 1958 show the subject property as vacant land with likely agricultural use (grain and/or grass farming). Subject property buildings are first visible on the 1963 aerial photograph. The buildings and asphalt paving are visible on 119, 123-125, and 127 Independence Drive and the building on 130 Constitution Drive appears to be under construction. The 1968 aerial photograph shows an apparent building on 1205 Chrysler Drive and the completed building and asphalt parking on 130 Constitution Drive. By 1982, the subject property appears in its current configuration.

Available historical city directory references indicate the 119 Independence Drive was occupied from 1963 to at least 1981 by S&M Manufacturing Corporation metal stamping, in the 1990s by A&A Racing Services, Motion Pro, and Ranzi Corporation, in 2000 by Motion Pro, and has been occupied by tree and landscaping services (S&B Trees & Landscape, Inc., Care of Trees, and currently Davey Tree) since approximately 2005.

Available historical city directories indicate 123-125 Independence Drive building was originally two separate addresses. 123 Independence Drive was occupied by California Air Conditioning Services in the 1960s and early 1970s, by Sunburst Solar Energy from the late 1970s to early 1980s. 125 Independence Drive was occupied by Johnson & Mape Construction Company Incorporated in the 1960s, by Oceans Magazine in 1973, and Granger Associations telecommunications equipment manufacturing in 1978. Directories for 1986, 1992, 1995, 2000, and 2005 did not identify a tenant for either address. The current tenant, L3 Harris, has occupied the 123-125 building since at least 2010.

Available historical city directory references indicate 127 Independence Drive was occupied by dental supply companies, Litton Dental in the 1970s and Salsow West Coast Dental in the 1980s, Peninsula Control Panel in the early 2000s, and by Cabochon Aesthetics Incorporated, Dollinger Properties, Neodyne Biosciences, and Transcend Medical Incorporated from approximately 2010 to 2017. The 1990s directories did not identify a tenant for the address. The current tenant, Artio Medical specializing in the research and design of medical and surgical devices has occupied the building since 2020.

The current tenant, L3 Harris (previously Randtron Company) has operated at the 130 Constitution Drive building since 1972. Available historical city directories indicate TRG West research and development (1963) and the marketing division of Lockheed Aircraft (1969) occupied the building prior to Randtron Company.

Available historical city directory references indicate the 1205 Chrysler Drive was occupied from 1969 to 1995 by Krebs Engineers. Directories for 2000, 2005, 2014, and 2017 did not identify a tenant on the property. In 2010 the site tenant was listed as Comcast. The building is currently unoccupied; however, based on information obtained during the site inspection and interview, the building was recently occupied by Pan Pacific, which used the facility for fabrication and machining of plumbing and construction materials.

Surrounding Properties

The earliest reviewed record is an 1897 topographic map, which shows the area surrounding the subject property as undeveloped land. Based on the 1943 topographic map, the edge of the slough has been filled in and the slough now is approximately ¼-mile to the north. Aerial photographs from 1943 to 1958 show the subject property vicinity as primarily vacant land with likely agricultural use (grain and/or grass farming); however, by 1958 a commercial building is depicted southeast of the subject property and Highway 101 has been constructed to the south. Through the 1960s, 1970s, 1980s, and 1990s, the area surrounding the subject property continued to slowly infill with commercial/light industrial buildings. In 2016, the three buildings previously located on the south side of Independence Drive were demolished for the construction of the existing multi-story office building, multi-story open-air parking garage, and Hotel Nia. In approximately 2019, the buildings located on the 100-block on the north side of Constitution Drive were demolished for the construction of the two existing multi-story office buildings and two multi-story open air parking garages.

Buildings in the immediate vicinity of the subject property were historically used for commercial and light industrial purposes; primarily associated with the manufacturing of electronic, medical, and communication devices. Businesses identified in the historical city directories for addresses in the immediate vicinity of the subject property are summarized in Appendix F.

3.7.3 Interviews

The below interviews were conducted by Ms. Kiersten Hoey of PES on January 12, 2021.

119 Independence Drive

Mr. Leonardo Rivera Barragan, a representative of the current tenant, Davey Trees, was interviewed. Mr. Barragan has been associated with the subject property for two years. He also stated Davey Trees does not use significant amounts of hazardous materials other than small quantities of engine oil and lubricants for their landscaping equipment and fertilizers and pesticides for use on client properties, and they do not generate hazardous wastes. He was not aware of any ASTs or USTs currently or formerly located on the subject property and was not aware of any releases of hazardous materials from site operations. Mr. Barragan had no knowledge of previous tenant activities on the subject property.

123-125 Independence Drive

Mr. Randy Perkins, Environmental Health and Safety and Facilities Manager for L3 Harris was also interviewed. He has been associated with the property for 17 years and believes L3 Harris (previously Randtron) has been conducting the same operations since they began their occupancy of the subject property. Mr. Perkins stated the company conducts antenna testing and uses small quantities of isopropyl alcohol (IPA) and acetone. He was not aware of any ASTs or USTs currently or formerly located on the subject property. Mr. Perkins was not aware of any releases of hazardous materials from site operations.

127 Independence Drive

Mr. Paul Muller, a representative for the current tenant, Artio Medical, was interviewed. He stated that the company moved into the building in October 2020, makes medical devices to help physicians perform vascular, neurovascular, and heart procedures, and does not use a significant amounts of hazardous materials, other than small quantities of IPA, acetone, hydrophilic coating and high level disinfectants. He stated that the small quantities of waste generated during laboratory activities are stored on-site and removed by Clean Harbors for proper disposal. He was not aware of any ASTs or USTs currently or formerly located on the subject property. Mr. Muller was not aware of any releases of hazardous materials at the site.

1205 Chrysler Drive

Ms. Shelle Barnes, Assistant Property Manager for Sobrato was also interviewed. Ms. Barnes has been associated with the property for just under 3 years. The building is currently vacant. Ms. Barnes stated it was previously used by Pan Pacific Mechanical from approximately 2012 to 2020 for plumbing supply and plumbing design and contracting services. She also stated the building was constructed in 1965 and there are no documented improvements to the property. Sobrato purchased the building in 2015 and Ms. Barnes was unaware building uses prior to Pan Pacific. Furthermore, she stated she did not know the purpose of the soil borings that had recently been drilled on the five properties, as described below in Section 6.0.

130 Constitution Drive

Mr. Randy Perkins, Environmental Health and Safety and Facilities Manager for L3 Harris was also interviewed. Mr. Perkins has been associated with the property for 17 years and believed L3 Harris (previously Randtron) has been the sole tenant of the building and has been conducting the same operations since they began their occupancy of the property. Mr. Perkins stated the company manufactures small aluminum antenna and uses small quantities of propane for the forklifts, and hydraulic oil and coolant for the various manufacturing machines. Used coolant and waste oil are stored in 55-gallon drums on their 150 Constitution Drive property and removed by Clean Harbors. The aware of any USTs or ASTs currently or formerly located on the subject property. Mr. Perkins was not aware of any releases of hazardous materials from site operations.

4.0 SUBJECT PROPERTY PREVIOUS ENVIRONMENTAL SITE INVESTIGATION

The following environmental documents related to the subject property were made available to PES for review as part of the Phase 1 ESA. A copy of these documents is included in Appendix G.

4.1 119 Independence Drive

A number of previous environmental investigations have been conducted for this property. These investigations are discussed below.

4.1.1 Soil and Ground Water Quality Reconnaissance Investigation – 1987

In 1987, while the Raychem Corporation occupied the site for maintenance and spooling operations, groundwater monitoring well MW-1 was installed in the northeast corner of the property prior to a potential acquisition of the site (Lowney, 1987). The well was sampled and volatile organic compounds (VOCs) including 420 micrograms per liter (μg/L) TCE and 35 μg/L 1,1-dichloroethylene (1,1-DCE) were detected in the groundwater. Six depth discrete soil samples were also collected during drilling operations. A composite of the six samples

was analyzed for VOCs and priority metals. VOCs were not detected in the composite sample; however, 12 milligrams per kilogram (mg/kg) arsenic and 51 mg/kg chromium were detected. Lowney stated in their report that Raychem was operating the site at that time for spooling operations and was using small quantities of TCE. Lowney recommended installing additional wells in order to determine if the detected VOCs were coming from off-site or if there was a possible on-site source.

A second well (MW-2) was installed at the southeast corner of the property by Lowney in 1991. PES did not obtain any reports for installation of the well, but did obtain a 2009 sampling report for MW-1 and MW-2 as discussed below.

4.1.2 Groundwater Sampling Report – 2009

Environmental Risk Specialties Corporation (ERS) sampled wells MW-1 and MW-2 in 2009 at the request of the SMCEH (ERS, 2009). VOCs detected in the groundwater samples included 303 µg/L and 108 µg/L TCE; 1,9 µg/L and 0.61 µg/L 1,1-DCE; and 22.4 µg/L and 8.9 µg/L cis-1,2-dichloroethylene (cis-1,2-DCE) in wells MW-1 and MW-2, respectively. Depth to water in the wells was measured at 4.39 and 4.69 feet bgs, respectively. ERS concluded that the groundwater flow direction could not be established without installing at least one additional well. They also indicated that the occupant of the site at that time, Davey Trees, did not appear to be the source of the VOCs in groundwater.

4.1.3 Well Destruction Report – 2011

In April 2011, ERS oversaw Hew Drilling of East Palo Alto, California destroy wells MW-1 and MW-2 (ERS, 2011). Well MW-1 was destroyed by pressure grouting with approval of SMCEH due to an adjacent canopy obstructing rig access to the well. Well MW-2 was destroyed by overdrilling to total depth.

4.1.4 Phase I ESA - 2015

A Phase 1 ESA was completed by PES in 2015 (PES, 2015a). The site description in the PES Phase I ESA was generally consistent with findings from this report. At the time of the 2015 Phase I ESA, the building was occupied by Davey Trees with two sub-tenants: Jensen Landscaping Services (Jensen) and Tacklin Design. In addition, the property owner at the time, Mr. Chris Carter, maintained a storage space. Site observations included solid waste and recycling bins, 100 to 200 gallons of herbicides, equipment for tree care operations, and open top containers of oil.

- The 2015 Phase I ESA identified a two RECs for the subject property which consisted of the following: (1) the presence of TCE in the groundwater (former on-site wells MW-1 and MW-2) beneath the site; and (2) the proximity of former USTs removed from the northwest portion of the adjoining property (123-125 Independence Drive) and the inadequate characterization of constituents [93 parts per million (ppm) total petroleum hydrocarbons as gasoline (TPHg)] detected in the groundwater sample collected from the tank pit during UST removal;

- PES also noted in the report that the source of TCE in this area had not been determined, and the RWQCB apparently had not been actively involved in pursuing this issue. It also appeared that potential vapor intrusion concerns had not been evaluated in this area as they have been in many other South Bay areas where TCE has been detected in shallow groundwater. Depending upon the results of potential sampling, various vapor intrusion mitigation approaches such as modifications to HVAC systems, sub-slab depressurization systems, and vapor barriers with either active or passive venting systems can be evaluated, if exposure concerns are identified; and

- The 2015 Phase I ESA also identified the following potential environmental concerns (1) past agricultural use of the property may have resulted in the presence of residual chemicals such as pesticides, herbicides, arsenic, and lead. Although not a concern under current use, should the property be redeveloped, the potential presence of such chemicals should be evaluated, as necessary for earthwork or off-haul considerations; (2) the potential presence of LBP and ACMs based on the age of construction of the original building in the late 1960s; and (3) the presence of oil stained asphalt and improper oil storage created the potential for soil contamination in the area defined by the three-sided storage unit immediately north of the site building.

4.2 123-125 Independence Drive

4.2.1 Phase I Environmental Site Assessment - 2015

A Phase I ESA was performed at this site in 2015 by AEI (AEI, 2015). The report was prepared for City National Bank for appraisal purposes. The site description in the AEI Phase I ESA was generally consist with findings from this Phase I, and at the time of the 2015 Phase I ESA, the building was occupied by Randtron for assembly of antennae for DOD aircraft, testing of antennae, and typical office activities.

AEI's research of SMCEH and other regulatory agency files indicated the following:

- There is a regional plume of TCE impact to shallow groundwater and a source of the TCE has not been identified;

- Two gasoline USTs (a 1,000-gallon tank and an 8,000-gallon tank) were removed from the northwest portion of the property in 1985. Approximate location of the former USTs is illustrated on Plate 3. A water sample was collected from the tank pit during the removal activities and analyzed only for TPHg; 93 ppm TPHg was reported. No other analyses were performed. The water from the pit was apparently "skimmed" before the pit was backfilled with excavated soil. Reportedly, the most heavily contaminated soil was set aside to "air dry". No closure documentation was found in the SMCEH files and no follow-up work was conducted. AEI concluded this represents a REC for the 123-125 Independence Drive property, and would require sampling and analysis of the subsurface to assess the degree of impact from the former USTs;

- AEI reported that Randtron (reported as previously operating under L3 Randtron Antenna Systems or Loral Randtron Systems) conducted operations in a number of buildings in the area. The 123-125 Independence Drive property is referred to as Randtron Plant 2. Adjacent properties to the northeast and east are Randtron Plant 1 (130 Constitution) and Plant 6 (127 Independence Drive); respectively. Apparently, most of Randtron's manufacturing occurred at Plant 1 and at nearby properties at 1150 Chrysler (Plants 3 and 4) and 150 Constitution (Plant 5). AEI reviewed files associated with Randtron's use of hazardous materials in the area and reported that Randtron had used, or is using, many oils, non-chlorinated solvents, chlorinated solvents, as well as other chemicals. AEI noted that the majority of Randtron's chlorinated solvent handling was conducted at Plants 3, 4, and 5 and, to a lesser extent, at Plant 6 (subject property) and Plant 2; (123-125 Independence Drive). AEI reported that the presence of TCE in the shallow groundwater and the use of the property by Randtron are RECs that would require investigation for potential impacts to groundwater and assessing vapor intrusion concerns; and

- AEI also reported that due to the age of the building there is a potential for the presence of lead-based paint and asbestos as "other environmental considerations".

AEI recommended *"The performance of a Phase II Subsurface Investigation to determine the level of chlorinated solvent contamination in the subsurface of the subject property as well as to determine whether any source areas exist at the subject property, and to determine whether any residual contamination remains in the area of the former gasoline USTs."* Furthermore AEI stated that *"Based on the results of the Phase II Investigation, the performance of a Human Health Risk Assessment may be prudent in determining the potential risk of vapor migration into the building"*.

4.3 127 Independence Drive

4.3.1 Phase I Environmental Site Assessment - 2015

A Phase 1 ESA was completed for this property by PES in 2015 (PES, 2015b). The site description in the PES Phase I ESA was generally consist with findings from this Phase I. At the time of the 2015 Phase I ESA, the building was occupied by Neodyne Biosciences and Transcend Medical, both specializing in the research and design of medical and surgical devices. The building was split about evenly between office space and small-scale manufacturing areas utilized for the assemblage of prefabricated medical equipment. A small pathology laboratory was located in the center of the building. Chemical use observed on site was limited to IPA, small quantities of acetone, methanol, hydrochloric acid, and germicidal detergents and all chemicals appeared to be stored properly.

- A review of regulatory agency files indicated no violations associated with the use and storage of hazardous material;

- The 2015 Phase I ESA did not identify any RECs for the property but noted there is a regional TCE plume impacting shallow groundwater in the area. The RWQCB has not specifically identified a source of the TCE and had not pursued a case to date. Additionally, it also appears that potential vapor intrusion concerns have not been evaluated in this area as they have been in many other South Bay areas where TCE has been detected in shallow groundwater. Relatively new guidelines adopted by the RWQCB for evaluation of vapor intrusion which include multiple lines of sampling are being conducted for similar areas overlying TCE groundwater plumes; and

- The 2015 Phase I ESA also identified the following potential environmental concerns: (1) the potential presence of LBP and ACMs based on the age of construction of the original building in the late 1960s; and (2) the regional TCE plume identified in the subject property vicinity.

4.4 1205 Chrysler Drive

A number of previous environmental investigations have been conducted for this property. These investigations are discussed below.

4.4.1 Phase I ESA - 1995

A Phase I ESA was performed at the site in 1995 by E^2C, Inc. (E^2C). At the time of the Phase I ESA, the property was occupied by Krebs Engineers. E^2C's Phase I ESA findings (paraphrased from E^2C [1995]) were:

- The Phase I ESA did not reveal any evidence to indicate, or suggest, that the site had been impacted by past or present, on-site land use or owner operations;

- Surrounding sites were identified that were currently, or have been, under investigation for a chemical release; however, they did not appear to have the potential to negatively impact the property;

- Potential ACMs were noted during the site inspection. These included 12-inch x 12-inch floor tiles and acoustic tiles, 2 feet x 4 feet drop ceiling tiles, and rolled linoleum. Because the subject site building was constructed in 1968, other ACMs may also exist on the site; and

- E2C, Inc. concluded that no further investigations were warranted at the time.

4.4.2 Phase II ESA - 1996

E^2C performed a Phase II Investigation of the site in 1996 and drilled shallow soil borings at three sump locations inside the building and three borings in the landscaped areas outside the south and east sections of the building (E^2C, 1996a). The boring locations are shown on Plate 3.

A soil sample was collected from each of the three sump locations (SP-1, SP-2, and SP-3) at a depth of approximately 2 feet bgs. The samples were analyzed for total recoverable petroleum hydrocarbons (TRPH) by U.S. Environmental Protection Agency (USEPA) Method 418.1. The results indicated that TRPH was detected in samples S-1 and S-3 at concentrations of 50 and 140 mg/kg, respectively. No other analyses were performed on the samples.

A groundwater sample was collected from each of the three exterior borings (HP-1, HP-2, and HP-3 (Plate 3). Groundwater was encountered at approximately 6 feet bgs. Samples HP-1 and HP-2 were analyzed for purgeable halocarbons by USEPA Method 8010. HP-1 contained 81 μg/L TCE and HP-2 contained 36 μg/L TCE, 9.0 μ/L chloromethane, and 3.2 μg/L bromoform. The sample from HP-3 was analyzed for TPHg by USEPA Method 8015M and benzene, toluene, ethylbenzene and xylenes (BTEX) by USEPA Method 8020. HP-3 contained 140 μg/L TPH-g and 8.3 μg/L xylenes.

In addition to the soil and water samples discussed above, E2C collected five samples of building materials in the office area of the site for asbestos analysis. Asbestos was detected in three of the samples (linoleum, floor tile mastic, and wallboard mud). The asbestos sampling results are discussed in Section 6.8.1.

Based on investigation findings, E2C concluded that the groundwater impacts identified in borings HP-1 through HP-3 were from an off-site source and that the soil impacts did not warrant additional site investigation. E2C recommended reporting the investigation results to the SMCEH.

4.4.3 Sludge and Soil Sampling Report - 1996

At the request of SMCEH, E2C performed additional site investigations that included sampling of the sludge in the three sumps discussed in Section 4.4.2 and drilled two shallow soil borings adjacent to a compressor located outside the west wall of the site building (E2C, 1996b). A soil sample (#4 and #5) was collected from each of the two borings. The sump locations and the two new boring locations (#4 and #5) are shown on Plate 3.

The sludge samples collected from the bottom of each sump were analyzed for chromium, cadmium, nickel, lead, and zinc by USEPA 7000 series methods, TRPH by USEPA Method 418.1 and halogenated volatile organic compounds (HVOCs) by USEPA Method 8010. The metal concentrations detected in the samples were all below State of California Total Threshold Limit Concentrations (TTLCs), except for 1,200 mg/kg lead detected in Sump #1 which was above the above the TTLC of 1,000 mg/kg. HVOCs were not detected in Sump #1 but were detected in Sumps #2 and #3 at total concentrations ranging from 0.0573 to 252.7 mg/kg. The HVOCs detected in Sump #2 included 3.6 mg/kg chloroethane, 150 mg/kg 1,1-dichloroethane, 6.4 mg/kg tetrachloroethane (PCE), 90 mg/kg 1,1,1-trichloroethane (TCA); and 2.7 mg/kg TCE. HVOCs detected in Sump #3 included 0.0063 mg/kg chloroethane, 0.029 mg/kg methylene chloride, and 0.022 mg/kg PCE. TRPH was detected in all three sludge samples at concentrations of 610 mg/kg, 30,000 mg/kg, and 800 mg/kg, respectively. No other analyses were performed on the samples.

The soil samples (#4 and #5) collected from the compressor area were analyzed for chromium, cadmium, nickel, lead, and zinc by USEPA 7000 series methods and TRPH by USEPA Method 418.1. The metal concentrations detected in the samples were all below State of California TTLCs. TRPH was detected at 66 mg/kg in boring sample #4 and no TRPH was detected in sample #5. No other analyses were performed on the samples.

Based on the sampling results summarize above, E^2C recommended disposal of the sludge in the sumps and subsequent steam cleaning, and either closure in place or closure by removal of the sumps. E^2C stated that the results from the soil samples at locations #4 and #5 were below applicable regulatory guidelines; therefore, no action was warranted.

4.4.4 SMCEH Closure Letter - 1997

On January 14, 1997, SMCEH issued a letter (SMCEH, 1997) to Krebs Engineers confirming closure of the Krebs Engineers operations. The letter stated that closure was achieved under the supervision of SMCEH and that no further action was required by SMCEH. No details of the closure were provided in the letter.

4.4.5 Site Status Summary - 1997

At the request of SMCEH, E^2C prepared a Site Status Summary Report of previous work at the site (E^2C, 1997a). The Site Status Summary Report reiterated and summarized the results from the previous Phase I ESA (Section 4.4.1), the Phase II ESA (Section 4.4.2) and the Sludge and Soil Sampling Report (Section 4.4.3). The information in these reports is summarized above. No new information was presented in the Site Status Summary Report.

4.4.6 Soil and Groundwater Sampling and Analysis Report - 2002

At the request of SMCEH in a May 13, 1997 letter (after issuance of the Site Closure letter [Section 4.4.4]), E^2C prepared a Work Plan for Groundwater Investigation in Former Sump Areas (E^2C, 1997b). The Work Plan proposed a soil boring at each of the three sumps for the collection of one soil sample and one groundwater sample from each boring to be analyzed for TRPH, VOCs, and lead.

After a hiatus in site work from 1997 until 2001, E^2C conducted the site investigation as proposed in the Work Plan. The investigation was reported in E^2C's February 2002 Soil and Groundwater Sampling and Analysis Report (E^2C, 2002). One soil boring was advanced adjacent to each of the three now-decommissioned sumps (Plate 3). At each boring, one soil sample was collected at 3 feet bgs (at the approximate base of the former sumps) and then the boring was advanced to groundwater and a grab groundwater sample was collected from each boring.

The soil and groundwater samples were analyzed for TRPH by USEPA Method 418.1, HVOCs by USEPA Method 8010, methyl tertiary butyl ether (MTBE) by USEPA Method 8260, and lead by USEPA Method 6010.

No TRPH or MTBE were detected in the soil and groundwater samples. Lead was detected in all three soil samples and two of the three groundwater samples. E_2C reported that the detected lead concentrations were consistent with area background levels.

The majority of HVOCs were not detected in the soil and groundwater samples. The soil sample from Sump #3 contained 6.9 µg/kg cis-1,2-DCE and 7.7 µg/kg TCE. TCE was detected in the groundwater samples Sump #1, Sump #2, and Sump #3 at concentrations of 22 µg/L, 17 µg/L, and 59 µg/L, respectively. The groundwater sample Sump #3 also contained 1.7 µg/L cis-1,2-DCE and 0.58 µg/L 1,1-DCA.

Based on the soil and groundwater sampling results, E2C stated that: "*If the former on-site sumps were the point source of the TCE, the expected soil contamination levels would be much higher than those currently detected. Since the TCE and general overall VOC soil contaminant levels are less than that detected in the groundwater, it is highly unlikely that the Site is the source of the groundwater contamination. Furthermore, since the total soil VOC contaminant levels in each sample point are less than 1 mg/kg, no soil remediation is required*".

E_2C's conclusion for the report was that the low concentrations of VOCs detected in the soil and groundwater near the former locations of the sumps is due to groundwater contamination that has migrated onto the subject site from off-site sources and is not a result of prior site activities. E_2C recommended that the site be granted case closure status.

4.4.7 California Regional Water Quality Control Board No Further Action Letter - 2002

On March 27, 2002, the RWQCB issued a No Further Action determination for this property (RWQCB, 2002). The No Further Action letter stated that after their review of the February 2002 Soil and Groundwater Investigation Report (Section 4.4.6), the RWQCB determined TCE is present in groundwater beneath all three sumps with a maximum concentration of 59 µg/L; however, based on the lack of TCE impacts to soils beneath two of the sumps and the low level of TCE in soils beneath the third sump (7.7 µg/kg), the RWQCB stated that "the subject property is located within an industrial area with regional groundwater contamination" and determined that "based on the available information, including current land use, and assuming the information provided is accurate and representative of site conditions, no further action related to the pollutant release at the subject site is required."

4.4.8 Phase I ESA – 2015

A Phase 1 ESA was completed for this property by PES in 2015 (PES, 2015c). At the time of the 2015 Phase I ESA, the building was occupied by Pan Pacific Mechanical for the fabrication and machining of plumbing and construction materials. The building interior was separated into office space along the southern end of the building, and the northern portion of the

building was used in support of fabrication and machining operations. Chemical use observed on-site was limited to various compressed gases, grease, and various sealants. Chemicals stored in a storage shed on-site but only used at off-site locations included anti-freeze solution, polyurethane foams, and less than 10 gallons of gasoline. The report also stated the chemicals used on-site were consumed during use and no waste was generated.

- The 2015 Phase I ESA did not identify any RECs or CRECs for the property but did identify one HREC. Low levels of petroleum hydrocarbon compounds and HVOCs were detected in soil and groundwater collected adjacent to the three former sumps located inside the site building and a compressor located outside the west wall of the building. The RWQCB issued a No Further Action determination for the subject property on March 27, 2002. Based on the No Further Action determination and because the determination did not require environmental, administrative, or institutional controls under the current use of the property, the impacts at the site were considered to be an HREC;

- The 2015 Phase I ESA also identified the following potential environmental concerns:

    - No off-site sources of TCE impacts to groundwater were identified that represented an obvious source of the TCE detected at the property. This includes the 135 Commonwealth Drive site that is located in a presumed upgradient direction only 150 feet from the subject property. If there is an on-site source of TCE, it has not been detected based on the previous investigations performed at the subject property. TCE was detected in groundwater from previous investigations in 1997 and 2002; however, the current concentrations of TCE in groundwater are not known. For redevelopment considerations, potential TCE vapor intrusion concerns can be mitigated through the design and construction of a standard vapor barrier system, if necessary;

    - The presence of ACM based on 1996 sampling data; and

    - The potential presence of lead-based paint based on the age of construction of the original building in the late 1960s and 1970s.

4.5 130 Constitution Drive

4.5.1 Phase 1 ESA – 2016

A Phase 1 ESA was completed for this property by PES in 2016. Findings of the 2016 Phase I ESA included the following:

- The site description and observations in the 2016 PES Phase I ESA were generally consist with findings from this Phase I. At the time of the 2016 Phase I ESA, the building was occupied by Randtron (now L3 Harris). Randtron used the building to design and manufacture antenna systems;

- Historical use of the site described in the PES report is consistent with that found during this PES Phase I ESA including, the development of the site (number and size of buildings, land improvements for parking and landscape, etc.); and

- The 2016 Phase I ESA did not identify any RECs for the property, but identified the following potential environmental concerns: (1) Staining was observed in the vicinity of the bermed area containing waste cutting oil; (2) A regional TCE groundwater plume is present within the site vicinity; however, the source of the plume has not been identified and it did not appear potential vapor intrusion concern had been evaluated; (3) ACM was identified at the site, but is managed under an O&M plan; and (4) based on the construction date of the building, lead-based paint may be present.

4.5.2 Groundwater Sampling – 2015

In 2015, PES advanced six borings (PSB-1 through PSB-6) throughout the property and collected a groundwater sample at each location for the analysis of VOCs and TPHg by USEPA Method 8260B, and TPHd and TPHmo by USEPA Method 8015B with silica gel cleanup. Boring locations are illustrated on Plate 3. TCE was detected at all locations at concentrations ranging from 34 to 220 µg/L, which exceed the vapor intrusion risk ESL of 7.5 µg/L at a commercial property. Vinyl chloride, detected at three locations, at concentrations ranging from 0.64 to 1.6 µg/L, exceeded the vapor intrusion risk ESL of 0.14 µg/L. Boring logs, laboratory reports and site plan are included in Appendix G.

5.0 ENVIRONMENTAL AGENCY DATABASES AND RECORDS REVIEW

5.1 Environmental Liens

Based on a review of an environmental database search conducted by EDR, there are no Federal Superfund (National Priority List [NPL]) liens or State environmental deed restrictions associated with the subject property (EDR, 2020). No information indicating the presence of environmental liens on the subject property was provided to PES as part of this assessment.

No specific Activity or Use Limitations (AULs) (e.g., prohibitions on development) were identified for the subject property.

5.2 Standard Environmental Record Sources

The discussion presented in this section is based on available information provided by government agencies and various databases of reported sites that may be of potential hazardous material concern to the subject property. An EDR report dated January 11, 2021 contains listings of sites located within a 1-mile radius, which were selected in accordance with ASTM E1527-13 standards. This information is obtained from computerized databases of Federal, State, and local records. Descriptions of the lists reviewed are not limited to the list presented below. The EDR database report is included as Appendix B.

The following regulatory agency databases were searched and reported in the EDR report:

- U.S. Environmental Protection Agency (U.S. EPA) – Comprehensive Environmental Response Compensation, and Liability Information System (CERCLIS);
- U.S. EPA – CERCLA NPL;
- U.S. EPA – CERCLA Proposed NPL;
- U.S. EPA – Superfund (CERCLA) Consent Decrees (CONSENT);
- U.S. EPA – CERCLA Records of Decision (ROD);
- U.S. EPA – CERCLA NPL Deletions;
- U.S. EPA – CERCLA No Further Remedial Action Planned Site (CERC-NFRAP);
- U.S. EPA - Facility Index System (FINDS);
- U.S. EPA – Enforcement and Compliance History Online (ECHO);
- U.S. EPA – Emergency Response Notification System (ERNS);
- U.S. EPA– Hazardous Materials Information Reporting System (HMIRS);
- U.S. EPA – Material Licensing Tracking System (MLTS);
- U.S. EPA – Mines Master Tracking Index File (MINES);
- U.S. EPA – Federal Superfund Liens (NPL Liens);
- U.S. EPA – PCB Activity Database System (PADS);
- U.S. EPA – RCRA Administrative Action Tracking System (RAATS);
- U.S. EPA – Section 7 Tracking Systems (SSTS);
- U.S. EPA – Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA)/Toxic Substance Control Act (TSCA) Tracking System (FTTS, HIST FTTS);
- U.S. EPA – Toxic Substances Control Act (TSCA);
- U.S. EPA – Resource Conservation and Recovery Information System (RCRA Info), Treatment, Storage, or Disposal (TSD) facilities, and Small Quantity and Large Quantity Generators (SQG and LQG) of hazardous waste;
- U.S. EPA – Emergency Response Notification System (ERNS);

- U.S. EPA - RCRA Corrective Action Report (CORRACTS);
- U.S. EPA - Toxic Chemical Release Inventory System (TRIS);
- California State Water Resources Control Board (SWRCB) – Leaking Underground Storage Tank Listing (LUST) sites including Indian Land;
- SWRCB - Underground Storage Tank (UST);
- SWRCB – Voluntary Cleanup Sites (VCP); and
- SWRCB – Solid Waste Facilities (SWF/LF).

The following California Environmental Protection Agency (CalEPA) websites were also searched for environmental records related to the subject property:

- SWRCB's GeoTracker website located at http://geotracker.swrcb.ca.gov/;
- DTSC's EnviroStor website located at http://www.envirostor.dtsc.ca.gov/public-/default.asp; and
- DTSC's Hazardous Waste Tracking System (HWTS) website located at http://hwts.dtsc.ca.gov/report_search.cfm?id=5.

The EPA National Priorities List and Superfund website was also search for environmental records related to the subject property: www.epa.gov/superfund/search-superfund-sites-where-you-live.

5.2.1 Subject Property Records

119 Independence Drive

The subject property address was listed in several databases searched by EDR. The property address was listed as closed in the California Spills 90 database; details were not specific regarding the reason for the listing. The address was also listed in the GeoTracker database as a Non-Case Information site on March 7, 2018 due to TCE detected in groundwater in 2009. Non-Case Information sites either have no unauthorized release, had a release to the environment with minimal impact or is currently evaluated for impacts and may result with the activation of a new case. Non-Case information sites contain environmental data, location data, or potential source information that may be considered important to a given area. PES's 2015 Phase I report was listed on GeoTracker as requested by the RWQCB.

One former tenant, Siebert Machine Corporation (Motion Pro), was listed on the EnviroStor Database in 1995; details were not specific regarding the reason for the listing. The tenant was also listed on The San Mateo Business Inventory listing for the generation and storage of hazardous wastes.

No other listings for the site address were present in the EDR report.

SMCEH files pertaining to Raychem, a former tenant at the site, consisted of chemical inventories and correspondence letters. Correspondence letters indicated that the quantity of Raychem's chemical storage at 119 Independence Drive never met the minimum threshold requiring a Hazardous Materials Management Plan (HMBP) or Business Plan. Chemical inventories did not list any quantities of TCE but did note the presence of 2 gallons of PCE. Files also included correspondences, permits, and reports for the installation and/or destruction of wells MW-1 and MW-2. Available reports pertaining to sampling and destruction of the wells are summarized above in Section 4.1.

123-125 Independence Drive

The subject property address was not listed in any database searched by EDR.

SMCEH files consisted of applications, regulatory notes, and a laboratory report associated with the removal 8,000-gallon and 1,000-gallon gasoline USTs in 1985. A groundwater sample collected during tank removal was analyzed for TPHg; 93 ppm was detected. Reportedly, a product line attached to one of the tanks severed when it was pulled and a small amount of product drained into the pit. The product was skimmed and the pit was backfilled. No other information regarding the tanks or additional sampling was located.

127 Independence Drive

The subject property address was listed in several databases searched by EDR. Former tenants, Arrinex Inc, Carbochon Aesthetics, and Transcend Medical, Inc, were listed on the FINDS, ECHO, HAZNET, HWTS, and San Mateo Business Inventory databases for conducting hazardous waste activities; Arrinex Inc for generating less than 1 ton of hazardous waste per year. Carbochon Aesthetic conducted stormwater discharge and generated and stored small quantities of 'off-specification aged or surplus inorganics', 'unspecified organic liquid mixtures', 'laboratory waste chemicals', and 'waste oil and mixed oil' which were reportedly transferred off-site for disposal from 2008 through 2011. Transcend Medical conducted stormwater discharge and generated small quantities of 'unspecified solvent mixtures' which were reportedly transferred off-site for fuel blending prior to energy recovery; and 'laboratory waste chemicals', 'other organic solids', 'pharmaceutical waste', and 'unspecified organic liquid mixtures', which were reportedly transferred off-site for disposal in 2012 through 2018. No on-site treatment was reported. No violations were identified.

No other listings for the site address were present in the EDR report.

PES also reviewed SMCEH records concerning the subject property. Noteworthy information is discussed below.

- SMCEH files from 1987 indicate the subject property is listed as Randtron Systems Plant 6. A Hazardous Materials Business Plan (HMBP) lists the following hazardous materials and amounts stored and used at the site annually: 15 gallons acetone, 15 gallons 1-1-1- trichloroethane, 20 gallons IPA, 5 gallons silver powder, 5 gallons bisphenol "A" resin diethylene triamine, and 5 gallons toluene and approximately 10 gallons of methyl ethyl keytone, methyl isobutyl keytone, propylene glycol, and monomethyl ether. Records show that hazardous materials storage was limited to the "Rotary Coupler – Assembly and Repair" portion of the building, in the southeastern quadrant of the building. SMCEH files do not indicate any violations or releases associated with the hazardous materials usage;

- SMCEH files for Cabochon Aesthetics list the following hazardous materials and amounts stored and used at the site annually: 200 gallons formalin waste, 100 gallons IPA and acetone, 100 gallons cidex and 5 gallons hydrochloric acid (HCL). SMCEH hazardous materials and stormwater inspections did not identify any violations; and

- A SMCEH CUPA issued a permit to Arrinex Inc in 2019 to generate less than 1 ton of hazardous waste per year. Arrinex develops cryotherapy devices. The devices were cleaned, sealed, and fixed together using four chemicals related to waste; lead free flux cured solder, Kester 70 neutralizer, IPA, and indalloy flux. In 2020, Arrinex completed facility closure as a small quantity generator of hazardous waste under the supervision of SMCEH CUPA.

1205 Chrysler Drive

The subject property address was listed in several databases searched by EDR. These listings are discussed below.

Krebs Engineers was listed on the CPS-SLIC and Hist CORTESE database. PES obtained information on these listings from the SWRCB GeoTracker website and from SMCEH. The documents are discussed in detail in Section 4.4 and copies of pertinent documents are included in Appendix G. As a result of site investigations conducted beginning in 1995 and concluding in 2001, the RWQCB issued a No Further Action determination for this property on March 27, 2002. Krebs Engineers was also listed the CA Recovered Government Archive (RGA) LUST database in 1997, 1998, 2000, 2001, 2002 and 2008 which lists LUST sites that have been recovered from older, no longer in use. The dates of the Krebs Engineers listings correspond with the identification and investigation of a release that was identified at this property in 1996 and received a subsequent No Further Action closure determination in 2002. The RGA listing for 2008 does not correspond to any other known or reported release at the site and may be a typographical or transcription error.

Four former site tenants, Pan Pacific, Roto Rooter, Krebs Engineers, and Comcast of California, are listed on the HAZNET and CA HWTS databases. The HAZNET database listings indicate that Pan Pacific generated off-specification, aged or surplus organics in 2019 which were reportedly transferred off-site for bulking and treatment. Roto Rooter generated 'aqueous solutions containing less than 10 percent (%) total organic residues' in 1998 and 2001, and 'waste oil and mixed oil in 2001'. All of these wastes were reported to be recycled. Krebs Engineers generated 'laboratory waste chemicals', 'oxygenated solvents', 'liquid with halogenated organic compounds', 'unspecified solvent mixture', and 'waste oil and mixed oil' from 1983 through 1999. All of these chemicals were reported to have been transferred off-site for disposal or recycling. The Comcast of California HAZNET listing indicated that they shipped 'unspecified aqueous solution', 'organic liquid mixtures', 'organic solids', and 'off-specification, aged or surplus organics' off-site for bulking and treatment in 2012.

Krebs Engineers was also listed in the FINDS and San Mateo Business Inventory databases for generating hazardous waste and in the California Environmental Reporting System (CERS) database with a HMBP.

The most recent tenant, Pan Pacific Mechanical was listed in the RCRA NonGen/NLR, and ECHO databases for conducting hazardous waste activities. No violations were identified;

No other listings for the site address were present in the EDR report.

PES reviewed SMCEH records concerning the subject property. Records for Roto-Rooter, a site tenant from approximately 1997 to 2001, consisted of a HMBP, hazardous materials inspections, requests for HMBP improvements, and a 2001 letter approving closure of the Roto-Rooter operations at the site. According to the HMBP, Roto-Rooter stored motor oil, transmission fluid, lubricant oil, antifreeze, waste oil, supreme solvent, oxygen-acetylene, and lacquers. Similar records from 1992 to 1997 were identified for Krebs Engineers, including closure of Krebs' operations in January 1997. The records included HMBP, hazardous waste manifests and shipping records, inspection forms, and copies of reports of investigations that are also discussed in Section 4.4. According to the HMBP, Krebs stored waste paint, waste oil, acetylene, oxygen, and propane on the site. Pertinent information in the county records indicated the following: (1) there were no ASTs or USTs at this property; (2) wastes appeared to be handled in an appropriate manner and recycled or disposed of off-site; (3) there were no records indicating significant violations of County regulations; and (4) there were no records of a release or spill response in the records other than the information for Krebs Engineers discussed in Section 4.4.

130 Constitution Drive

The current tenant [listed under various business names including L3 Communications, Lorel Randtron Systems, Lockheed Martin Rand, Randtron Antenna Systems, Randtron Systems, L3 Randtron Antenna, and L3 Harris Randtron (Randtron)] was listed in the RCRA-SQG, CHMIRS, EMI, NPDES, ERNS, FINDS, HAZNET, HWTS, CIWQS,

MN Manifest, CERS Hazwaste databases, and San Mateo Business Inventory databases. These listings are discussed below. Note that 130 Constitution Drive is the main administrative facility and is the mailing address used for administrative issues for all six area Randtron buildings. As a result, some database listings may pertain to other facilities.

Randtron has been listed on the RCRA-SQG database since 1969. No violations are listed for this property. The listing is consistent with hazardous wastes generated at the facility, as discussed below.

Two CHMIRS incidents are listed for the subject property. In 1997, approximately 50 to 55 gallons of metalworking coolant overfilled a drum and secondary containment and was released to the storm drain. The spill was flushed with significant amounts of water. No further investigation was required by SMCEH. In 2004, a container reportedly fell off a truck and approximately 1.5 gallons diesel travelled to a storm drain. The spill was reportedly cleaned up by an outside contractor. No further action was required by SMCEH. Randtron is also listed on the ERNS database for these incidents.

Randtron is listed on the NPDES database for wastewater discharge permitted with South Bayside System Authority. Violations associated with the permit are discussed below.

Randtron is listed on the HAZNET database for 'waste oil', 'aqueous solution', 'laboratory chemicals', 'solvent solutions', 'alkaline solutions', 'aged or surplus chemicals', 'organic solids', and 'wastewater discharges'. Based on SMCEH records and observations during the site reconnaissance (see below), wastes currently generated at the subject property are limited to waste oils, waste coolant, and aluminum shavings. Many of the HAZNET listings appear to apply to other Randtron facilities.

RWQCB indicated the address is listed in the Stormwater Multiple Application and Reporting Tracking (SMART) system. L3 Harris operates under a Stormwater Pollution Prevention Plan with stormwater discharge identification number 41NEC000046.

PES reviewed SMCEH records concerning the subject property. SMCEH files from 1987 indicate the subject property is listed as Randtron Systems Plant 1. An HMBP indicates 5-gallon containers with "soluble oil" and "WD-40" were stored in the southern end of the building.

The subject property was listed as a Non-Case Information site in GeoTracker on December 11, 2015. Results of a 2015 groundwater sampling, a 2018 letter from the RWQCB requesting a site history, and PES's 2016 Phase I were listed in GeoTracker. The groundwater sampling and Phase I are summarized in Section 4.5, above.

5.2.2 Surrounding Area

Several database listings were identified for properties surrounding the subject property and were related to past hazardous materials operations and releases. Most notably are: (1) 120 Constitution Drive; (2) Randtron activities at 150 Constitution Drive; (3) 115 Independence Drive; (4) 135 Commonwealth Drive; and (5) 1150 Chrysler Drive.

120 Constitution Drive

This site is located adjacent to 130 Constitution Drive (subject property) to the east. The address is listed in the LUST, CORTESE, CERS, and SLIC databases. According to regulatory agency files, a 1,000-gallon gasoline UST was removed from this property in 1986. A March 24, 1993 letter from SMCEH stated that sampling during the tank removal reported 470 mg/kg TPHg in soil and 6,700 (µg/L in groundwater.

In 1993, three groundwater monitoring wells were installed and two exploratory soil borings were advanced in the vicinity of the former UST (McLaren Hart, 1993). No petroleum hydrocarbons were detected in the soil samples, and no significant contaminant concentrations were detected in groundwater. Subsequent quarterly monitoring of groundwater wells produced no detectable concentrations of petroleum hydrocarbons. However, TCE was detected in one of the wells at a concentration of 1,200 µg/L. Additional wells were installed to further characterize the extent of the VOC contamination. Detected TCE concentrations ranged from 29 to 540 µg/L (Pacific Environmental Group, 1994). The RWQCB reviewed the findings of the investigations and approved a closure request in April 1998 (RWQCB, 1998). The RWQCB indicated that a regional TCE plume exists in the area but was not able to determine a source.

Following a Phase I conducted in 2010, two soil borings were advanced near the northeast corner of the building to assess the presence of VOCs in soil vapor and the potential for VOCs to impact indoor air inside the property building (ERAS, 2010). Soil vapor and groundwater samples were collected from the two borings. TCE was detected in the groundwater samples at 110 µg/L (B-1) and 6.0 µg/L (B-2). Several VOCs were detected in soil vapor; however, no TCE was detected above the laboratory reporting limit. Based the results, and the 1998 No Further Action Letter, ERAS recommended no further actions be performed regarding subsurface environmental conditions or indoor air quality at the property.

In April 2018, the RWQCB issued a letter requesting site history information for the property to assist Regional Water Board staff with its investigation of groundwater pollution in the vicinity.

Based on information available, the cross-gradient location with respect to the inferred regional groundwater flow direction, and the listed site received case closure by the appropriate regulatory agency, this property does not appear to present significant environmental conditions to the subject property.

150 Constitution Drive – Randtron

The building at 150 Constitution Drive, located adjacent to 130 Constitution Drive (subject property) to the east, has been occupied by L3 Harris (formerly Randtron) since the early 1970s, and is referred to as Randtron Building #5. The address is not listed on any environmental databases, likely because the Randtron 130 Constitution Drive address is the administrative address for all of the Randtron buildings. As a result, during our review of records for the subject property, several records for the 150 Constitution Drive building were included. Noteworthy records include the following:

- A 1985/86 Hazardous Materials Inventory shows an exterior storage area on the west side of the building where acetone, 1,1,1-TCA, MEK, toluene, IPA, butyl cellosolve, Release All 20 and 30, and Garalease 915 are stored. Four waste containers were marked as Acetone; Freon TF, TP35; 1,1,1-TCA; and Mixed Flammable Solvents, MIBK, MEK, Tolulol, Alcohol, PT-1003, PT-1002;

- A 1987 Hazardous Material Inventory lists use of acetone, 1,1,1-TCA, MEK, hexane, IPA, and xylenes;

- During a 1987 inspection, it was noted that an outside tumbler needs to be hooked to the sanitary sewer, and cannot drain to the ground surface; and

- A 2001 Hazardous Material Inventory lists use of acetone, ethyl alcohol, IPA, toluene, and MEK. A 2004 Hazardous Material Inventory shows similar usage.

Additionally, Mr. Perkins on L3 Harris, stated hazardous waste generated at 130 Constitution Drive and 123-125 Independence Drive (subject properties) are stored on the 150 Constitution Drive for transportation and off-site disposal by Clean Harbors.

Based on information available and the cross-gradient location with respect to the inferred regional groundwater flow direction this property does not appear to present significant environmental conditions to the subject property.

115 Independence Drive

The property, 115 Independence Drive, located adjoining 119 Independence Drive (subject property) to the west is a Cleanup Program Site in GeoTracker. Regulatory agency files document that soil, groundwater, and soil gas investigations were performed at the site between 1989 and 1997.

A 1996 Phase I (Levine-Fricke-Recon, 1996) performed for the property indicated the building, reportedly constructed in 1966, was historically occupied by Electro Nuclear Laboratories, Irex Corporation, Triad Systems Corporation, Xirex Corporation, a CPA firm, and Raychem Corporation, a semiconductor manufacturing company. Raychem completed a facility closure process in 1994 under the oversight of the SMCEH. The closure process

included collecting a soil sample next to a floor drain that exhibited etching and corrosion. Analysis indicated the sample contained 0.005 mg/kg TCE. The 1996 Phase I noted that Raychem Corporation also historically occupied 119 Independence Drive (subject property) which contained similar TCE concentrations in groundwater.

The RWQCB issued a letter dated June 27, 1996, stating that based on the soil, groundwater, and soil gas testing on the property, they believed the VOC contamination in groundwater was from an off-site source (RWQCB, 1996). Furthermore, the RWQCB stated that the property owner would not be responsible for investigation and cleanup on their property caused by an off-site source.

In January 1997, soil and grab groundwater samples were collected from 12 locations across the site (Levine-Fricke-Recon, 1997). The results of the investigation showed the presence of TCE in groundwater at concentrations ranging from 160 to 340 μg/L. Other VOCs, including 1,1,1-TCA; cis-1,2-DCE; and 1,1-DCE, were detected at lower concentrations. There were no detections of VOCs in soil samples collected from the boreholes at depths of 5 to 6 feet bgs. The source of the VOCs in groundwater was interpreted as being of off-site origin.

The case was inactive for many years. In April 2018, the RWQCB issued a letter requesting a site history information for the subject property to assess whether the property is a source to the regional TCE plume.

Ramboll conducted two subsurface investigations at 115 Independence Drive and 104 and 110 Constitution Drive to facilitate redevelopment of the properties (Ramboll, 2020). In September 2018, soil and groundwater samples were collected from eight exterior soil borings, and six sub-slab soil vapor samples were collected from within the buildings. Soil samples were collected at 2 and 4 feet bgs. TCE was detected in all eight groundwater samples at concentrations ranging from 18 to 150 μg/L; all exceeded the groundwater vapor intrusion RWQCB Environmental Screening Level (ESL)[5] of 7.5 μg/L at a commercial property. Benzene, ethylbenzene, PCE, and TCE were detected in soil vapor samples. No concentrations exceeded their respective ESLs for a commercial property; however, TCE in one sample (100 μg/m3 in SS06 located within 115 Independence Drive) was equal to the ESL of 100 μg/m3. In August 2020, additional soil, groundwater, and soil vapor samples were collected. TCE was detected in soil at 0.012 mg/kg. TCE was detected in the four groundwater samples at concentrations ranging from 27 to 48 µg/L; all exceeded the groundwater vapor intrusion ESL of 7.5 μg/L at a commercial property. VOCs detected in soil vapor samples included 1,400 μg/m^3 TCE, 310 μg/m^3 and 97 μg/m^3 vinyl chloride, 32,000 μg/m^3 ethylbenzene, 110,000 μg/m^3 xylenes, 1,900 μg/m^3 cis-1,2-DCE, and 30 μg/m^3 benzene; all exceeding their respective vapor intrusion ESLs at a commercial property. Based on the analytical data, Ramboll recommended no further investigations. Based on the presence of VOCs in regional groundwater, and concentrations of VOCs in groundwater and soil vapor beneath the property are consistent with and lower than nearby sites, they do not appear to be related to an on-site release. To date, the RWQCB has not responded to the Ramboll report.

[5] RWQCB, 2019. *Environmental Screening Levels*. Rev 2.

Based on information available, VOC concentrations detected in groundwater and soil vapor beneath the property exceed their respective vapor intrusion ESLs, and based on its up-gradient location with respect to the inferred regional groundwater flow direction, the VOC impacted groundwater and/or soil vapor appear to present a significant environmental condition to the subject property.

135 Commonwealth Drive

The address 135 Commonwealth Drive, located approximately 150 feet southeast (cross-gradient) of the subject property, is a Cleanup Program Site in Geotracker for benzene impact to the subsurface. A review of information reported on Geotracker for the 135 Commonwealth Drive site indicated that the property was occupied by a pharmaceutical company from 1959 through 1974 and by Raychem Communications from 1974 until 1998 when the former building was demolished. In 2006, nine soil vapor samples were collected across the property (O'Brien & Gere, 2008), no TCE or PCE were detected; however, benzene concentrations detected in all nine samples ranging from 29 to 2,100 mg/m^3, exceed the current vapor intrusion risk ESL at a commercial property. In 2007, nine borings were drilled for the collection of soil, groundwater, and soil vapor samples (O'Brien & Gere, 2007). Analytical results indicated that (1) no VOCs were detected in soil; (2) VOCs detected in groundwater were limited to 1.82 $\mu g/L$ toluene, 1.92 $\mu g/L$ xylenes, 0.8 $\mu g/L$ 1,2,3-tricholorobenzene, and 1.4 $\mu g/L$ naphthalene; (3) a number of VOCs were detected in soil vapor, including benzene and ethylbenzene which exceeds the current vapor intrusion risk ESL at a commercial property; and (4) no PCE or TCE was detected in soil, groundwater, or soil vapor.

Based on the concentrations summarized above, and additional site investigation information, SMCEH, the oversight agency, issued a Case Closure and No Further Action determination for the site on December 8, 2009. Based on the type of release, levels of contaminants identified in groundwater and soil vapor, this site is not considered to pose a significant environmental concern with respect to the subject property and does not appear to be a potential source of the TCE detected in groundwater at the subject property.

1150 Chrysler Drive

According to files available in GeoTracker, a release of gasoline-range petroleum hydrocarbons was identified in 1985 at the 1150 Chrysler Drive facility (currently occupied by L3 Harris) located approximately 100 feet east (cross-gradient) of the subject property. The property was listed as a LUST Cleanup Site in GeoTracker with SMCEH as the oversight agency. SMCEH issued a Case Closure determination for this site on April 10, 1999. Based on the Case Closure determination and the inferred direction of groundwater flow, this site is not considered to pose a significant environmental concern with respect to the subject property.

100, 110, 120, 150, 190 Independence Drive – Menlo Gateway Development

This development is listed as a Non-Case Information site in GeoTracker. In 2015, a subsurface investigation was conducted to facilitate development of the existing commercial buildings, parking garage, and hotel (Green Environment, 2015). Eleven soil borings were advanced throughout the properties. One shallow soil sample and grab groundwater sample were collected from each boring. Depth to water ranged from 4.7 to 7.8 feet bgs. No VOCs were detected in soil. TCE and one or more of its degradation products, cis-1,2-DCE, trans-1,2-DCE, and vinyl chloride, were detected in groundwater from seven borings. TCE concentrations ranging from 32 to 110 µg/L and vinyl chloride concentrations ranging from 0.09 to 2.5 µg/L in four of the borings exceed the current potential soil vapor intrusion ESLs of 7.5 and 0.14 µg/L, respectively. Detected cis-1,2-DCE, trans-1,2-DCE concentrations do not exceed current ESLs.

A total of 29 soil vapor probes were installed across the properties and soil vapor samples were collected. PCE was detected at nine locations at concentrations ranged from 11 to 100 $\mu g/m^3$; three of which exceed the current vapor intrusion ESL of 67 $\mu g/m^3$ at a commercial property. TCE was detected at 13 locations at concentrations ranging from 14 to 3,100 $\mu g/m^3$; eight of which exceed the current vapor intrusion ESL of 100 $\mu g/m^3$ at a commercial property. TCE degradation products (1,1-DCE, cis-1,2-DCE, trans-1,2-DCE, vinyl chloride) were detected in the soil vapor samples with the highest concentrations of TCE. The concentrations of detected TCE degradation products ranged from 33 to 340 $\mu g/m^3$ 1,1-DCE; 78 to 1,200 $\mu g/m^3$ cis-1,2-DCE; 180 to 290 $\mu g/m^3$ trans-1,2- DCE; and 52 to 370 $\mu g/m^3$ vinyl chloride (which exceeds the current ESL of 5.2 $\mu g/m^3$ at a commercial property). Green Environmental concluded the source of the TCE and degradation products detected beneath the site is likely off-site.

Based on information available, VOC concentrations detected in groundwater and soil vapor beneath the property exceed their respective vapor intrusion ESLs, and based on its up-gradient location with respect to the inferred regional groundwater flow direction, the VOC impacted groundwater and/or soil vapor have the potential to migrate beneath the subject property and therefore appear to present a significant environmental condition to the subject property.

101 - 155 Constitution Drive - Menlo Gateway Development Phase 2

This development is listed as a Non-Case Information site in GeoTracker. Subsurface investigations were conducted in three phases between December 2016 and June 2017 to facilitate development of the existing office buildings and parking garages (Green Environment, 2017). Grab groundwater samples were collected at 21 locations. TCE and one or more of its degradation products, cis-1,2-DCE, trans-1,2-DCE, and vinyl chloride, were detected in groundwater from all 21 locations. TCE was detected at concentrations ranging from 4.3 to 280 µg/L; all but one concentration exceeds the current vapor intrusion risk ESL of 7.5 µg/L at a commercial property. Vinyl chloride was detected at 14 locations at concentrations ranging from 0.59 to 9.5 µg/L; all exceed the current vapor

intrusion risk ESL of 0.14 µg/L at a commercial property. Cis-1,2-DCE and trans-1,2-DCE were detected at maximum concentrations of 67 µg/L and 3.4 µg/L, respectively, which are both below their vapor intrusion risk ESLs.

Groundwater samples were also collected in March and June 2017 from eight piezometers installed to facilitate groundwater sampling. TCE was detected from the eight piezometers during both sampling events at concentrations ranging from 18 to 270 µg/L, which exceed the vapor intrusion risk ESL of 7.5 µg/L at a commercial property. Vinyl chloride was detected in six of the piezometers at concentrations ranging from 0.67 to 8.4 mg/L; all exceed the current vapor intrusion risk ESL of 0.14 µg/L at a commercial property. Cis-1,2-DCE and trans-1,2-DCE were also detected but at concentrations well below the vapor intrusion risk ESLs.

Multiple soil vapor samples were collected from 12 vapor probes in 2017. TCE was only detected at one location at concentrations of 7.2 and 12 $\mu g/m^3$ which are below the soil vapor intrusion ESL of 100 $\mu g/m^3$. Vinyl chloride was detected at 4 locations at concentrations ranging from 6.4 to 17 $\mu g/m^3$; all exceed the current vapor intrusion ESL of 5.2 $\mu g/m^3$ at a commercial property.

Based on information available, VOC concentrations detected in groundwater and soil vapor beneath the property exceed their respective vapor intrusion ESLs. Although the property is located down-gradient of the subject property with respect to the inferred regional groundwater flow direction, groundwater is tidally influenced; therefore, VOC impacted groundwater and/or soil vapor have the potential to migrate beneath the subject property. Consequently, this property appears to present a potential environmental condition to the subject property.

4040 Campbell Avenue

This property is listed as a Cleanup Program Site in GeoTracker for VOCS, primarily TCE, impact to soil and groundwater. The former 48,000 sq ft building located at this property was constructed in 1957 and was subsequently demolished in early 2007. It was occupied primarily by electronic research, manufacturing, plating and biotechnology firms. Previous operations at this property reportedly involved the use of chemicals including VOCs and petroleum hydrocarbons. Between 1988 and 2014, several subsurface investigations were conducted, including 15 years of groundwater monitoring and sampling of 14 wells (Gannett Fleming, 2014). TCE and cis-1,2-DCE were detected in groundwater at concentrations as high as 200,000 µg/L and 190,000 µg/L, respectively. The source of the contamination was determined to be an oil water separator (OWS). A sample of the sludge material removed from the OWS prior to its abandonment revealed a TCE concentration of 24,000 mg/kg. Groundwater beneath the property was measured to flow north to northwest, positioning this property approximately 1,500 feet upgradient of the subject property. When the RWQCB issued a No Further Action determination in 2014, maximum concentrations of TCE, cis-1,2-DCE, and vinyl chloride in groundwater were reported at 3,900 µg/L, 4,300 µg/L, and 1,100 µg/L, respectively. VOCs detected in groundwater when the site received case closure

exceeded vapor intrusion ESLs. Although this site received case closure from the RWQCB, based on its up-gradient location with respect to the groundwater flow direction, the VOC impacted groundwater has the potential to migrate beneath the subject property and therefore appears to present a significant environmental condition to the subject property.

The remaining sites in the surrounding area that are listed in the databases are not expected to present significant environmental conditions to the subject property based on one or more of the following: (1) the listed site has received case closure by the appropriate regulatory agency; (2) the listed site is either cross gradient or down gradient of the subject property with respect to the inferred regional groundwater flow direction; (3) the listed site is a soils-only affected case; and (4) the listed site is located at too great a distance to represent a significant environmental condition with respect to the subject property.

5.3 Vapor Intrusion Evaluation

There is a known TCE plume in groundwater beneath the site and in the site vicinity. As discussed above in Section 4.0, TCE concentrations up to 303 µg/L (119 Independence Drive), 59 µg/L (1205 Chrysler Drive), and 220 µg/L (130 Constitution Drive) have been detected beneath the subject property. No soil vapor samples have been collected at the subject property.

As discussed above in Section 5.2.2, TCE has been detected in groundwater in the site vicinity as high as 1,200 µg/L in 1993 (120 Constitution Drive, adjoining the subject property to the west). More recently, TCE was detected beneath 115 Independence Drive, adjoining the subject property to the west, at concentrations up to 150 µg/L TCE in groundwater and 1,400 $\mu g/m^3$ TCE in soil vapor. Additionally, TCE and one or more of its degradation products were detected in groundwater and soil vapor samples collected to facilitate the Menlo Gateway Developments north and south of the subject property. TCE was detected south of the subject property across Independence Drive at concentrations up to 110 µg/L in groundwater and 3,100 µg/m3 in soil vapor. TCE was detected north of the subject property across Constitution Drive at concentrations up to 280 µg/L in groundwater and 12 µg/m3 in soil vapor.

The RWQCB groundwater and soil vapor screening levels for evaluation of potential vapor intrusion for TCE are 7.5 µg/L and 100 µg/m3, respectively, for commercial/industrial land use (RWQCB, 2019). VOC-impacted soil vapor is present below the site at concentrations in excess of commercial and residential screening levels and accordingly a vapor encroachment condition (VEC) is present. However, the potential for vapors potentially containing VOCs identified during the investigations from entering portions of the planned building can be mitigated via construction of a sub-slab vapor intrusion mitigation system.

6.0 SITE INSPECTION

6.1 Interior and Exterior Observations

Inspection of the subject property was conducted by Ms. Kiersten Hoey of PES on January 12, 2021. Ms. Hoey was accompanied by Mr. Leonardo Barragan of Davey Trees, Mr. Randy Perkins of L3 Harris, Mr. Paul Muller of Artio Medical, and Ms. Shelle Barnes of The Sobrato Organization. Site details are illustrated on Plate 3. Site photographs taken at the time of the inspection are provided on Plates 4 through 29.

The subject property contains five properties, each with one light industrial/commercial building. Paved parking and landscaped areas encompass the buildings. The uses of the subject property buildings are as follows:

Property Address	Tenant	Current Property Use
119 Independence Drive	Davey Trees	Tree and landscaping services
123-125 Independence Drive	L3 Harris Technologies	Assembly and testing of small antenna for DOD
127 Independence Drive	Artio Medical	Research and design of medical surgical devices
1205 Chrysler Drive	Vacant	Vacant
130 Constitution Drive	L3 Harris Technologies	Design and manufacturing of small antenna for DOD

Hazardous material use and storage at the subject property is limited to small quantities of chemicals for the operation of machines and equipment and for use in medical research and development, and are discussed below. The grounds of the subject property were observed to be in generally good condition, with the exception of surface staining consistent with vehicle parking/storage, and cracked asphalt parking lots and driveways. There was no evidence of improper dumping or stressed vegetation. No evidence of sumps or pits was observed. No indications of septic systems were identified during the site inspection. No evidence of USTs or ASTs was observed during the inspection. Evidence of boreholes for a subsurface investigation were observed on the five properties. Sobrato indicated the boreholes were for a recent geotechnical investigation; however, the report was not available/complete for PES review.

6.1.1 119 Independence Drive

Interior Observations

The interior of the building is primarily utilized as office space and a warehouse for the storage of equipment, vehicles, and tools associated with the tree and landscaping services. As indicated previously, a space in the northeastern portion of the building is leased to Tom Sawyer Labs for research and development of robotics. The space was locked and therefore PES was unable to inspect the space.

Chemical storage in the interior is limited to a flammable-safe storage cabinet in the northern portion of the warehouse. Chemicals include small containers of lighter fluid, hydraulic oil, bleach, IPA, lubricants, and brake fluid which appeared properly labeled and secured. No leaks, spills, or staining were observed in the vicinity of the flammable storage cabinet. Based on these observations, these chemicals do not represent a significant environmental concern.

Exterior Observations

Exterior areas around the north, east, and west sides of the building are asphalt-paved driveways, outdoor storage areas, and parking lots. The south side of the building facing Independence Drive is landscaped and has concrete sidewalks.

Two enclosed storage areas used for materials for tree care services were observed along the northern exterior wall of the site building. One enclosure consisted of a fenced-in containment area with a sign on the door indicated the presence of pesticides. In addition to approximately 12 2.5-gallon containers of fertilizer and pesticides, small containers of lubricants, gasoline, and propane were observed stored on wooden pallets. The second enclosure consisted of an aluminum storage enclosure containing 5-gallon containers of hydraulic oil, paint, and pesticides, two larger poly-containers of fungicide, and miscellaneous equipment oil and waste oil for use with tree maintenance equipment. The materials were not stored with secondary containment and the asphalt surface of both storage areas showed signs of staining. An additional small aluminum sided enclosure contained an air compressor.

There are solid waste and recycling waste bins and a shipping container located on the western perimeter along the fence line containing 2.5-gallon containers of pesticides and fertilizer for tree care services. The floor of the container showed signs of staining. The outside of the shipping container did not clearly indicate its contents.

An area in the northeastern portion of the property is unpaved with vehicle tracks visible in the mud and appears to be used to store large pieces of tree trunks, logs, and mulch. Small landscaping equipment and miscellaneous items were also observed beneath a wooden and aluminum canopy in the northeastern corner of the property. The remaining exterior areas of the site are used for parking and larger equipment storage.

The asphalt pavement was in average condition with numerous cracks and minor oil staining, typical of vehicle parking lots, considered *de minimis*, was observed in the areas of vehicle and equipment storage behind (north) the building.

No significant environmental concerns were identified in the interior or exterior areas of the site.

6.1.2 123-125 Independence Drive

Interior Observations

The building included office space and antenna assembling and testing areas. Small containers (1-liter or less) of IPA, acetone, and other laboratory chemicals and 1-gallon containers of resin are stored in a flammable-safe cabinet within the assembly room. Work stations in the antenna assembly room are equipped with small containers of IPA and acetone, used for wiping down metal surfaces of antenna components. No leaks, spills, or staining were observed in the vicinity of the flammable storage cabinet or at the work stations. Based on these observations, these chemicals do not represent a significant environmental concern.

Exterior Observations

Exterior areas around the building are asphalt-paved driveways and parking lots, a break area with tables and landscaped areas. Two PG&E-owned pole-mounted transformers are located in the northwestern corner of the property. One pad-mounted transformer is located along the north side of the building. No leaks or stains were observed in the area of the transformers. The remaining exterior areas of the site are used for parking.

No significant environmental concerns were identified in the interior or exterior areas of the site.

6.1.3 127 Independence Drive

Interior Observations

The building is split about evenly between office space and small-scale laboratories used for research and design of medical devices. Two break areas were also observed in the building. Chemical storage was observed in the northern portion of the building with a flammable-safe storage cabinet containing small (1-quart to 1-gallon) containers of IPA, acetone, hydrophilic coating, and disinfectants. Three 2- to 3-gallon containers of properly labelled, flammable, acid, and IPA waste generated during laboratory activities were also observed on secondary containment. Mr. Muller stated the hazardous waste is periodically removed by Clean Harbors for proper disposal. A second flammable cabinet was observed in the laboratory area, but it was empty. The laboratory area contained small quantities of the chemicals listed above used during research activities. No leaks, spills, or staining were observed in the vicinity of the chemical and waste storage. Based on these observations, these chemicals do not represent a significant environmental concern

Exterior Observations

Exterior areas of the building are primarily asphalt paved driveways and parking areas with a small landscaped area on the southern portion of the site.

No significant environmental concerns were identified in the interior or exterior areas of the site.

6.1.4 1205 Chrysler Drive

Interior Observations

The building is currently vacant with office space, restrooms and showers, and a large concrete open floor work area.

Exterior Observations

Exterior areas of the building are primarily asphalt-paved driveways and parking lots. The south and southeast sides of the building are landscaped. Waste and recycling roll-away bins were observed in the parking lot on the west side of the building. Minor oil staining, typical of vehicle parking lots was observed in the driveways and parking areas. No significant environmental concerns were identified in the exterior areas of the site.

No significant environmental concerns were identified in the interior or exterior areas of the site.

6.1.5 130 Constitution Drive

Interior Observations

The building includes office space and small-scale antenna manufacturing areas. Manufacturing-related areas of the building include a machine shop with CNC machines and lathes, material storage, deburring room, tool storage, and a shipping/receiving area.

Small amounts of spindle oil and coolant are used in the machines. No staining or evidence of leakage was observed in the machine room or inspection area. Mr. Perkins reported that waste was stored in the hazardous waste enclosure in the adjacent L3 Harris plant at 150 Constitution Drive and removed by Clean Harbors for disposal.

A tumbler deburrer is used to deburr small aluminum parts. Fluids used in the process include water and a non-hazardous cleaner. Wastewater is discharged to the sanitary sewer under a permit issued by South Bayside Systems Authority. Mr. Perkins reported that the deburring machine is used infrequently.

Exterior Observations

The exterior area of the site includes paved areas for driveways and parking areas east and west of the building, landscaped areas north of the building, and a gated enclosure housing fenced storage areas on the south side of the building. Air compressors, universal waste

(batteries, bulbs), waste aluminum, and propane for forklifts are stored in locked enclosures. New and waste oils stored in 5- and/or 55-gallon containers are stored in a locked, concrete bermed storage enclosure equipped with a sign that indicated the presence of hazardous materials storage. In the waste storage area, staining was observed within the bermed area and on the berm.

Two pad-mounted transformers are also located on the south side of the building. Large storage containers and metal waste bins are located in the parking lot on the eastern side of the building. The containers were locked, and Mr. Perkins did not have a key.

6.2 Chemical Use and Storage

119 Independence Drive

Chemical use observed on this property is limited to oils, gasoline, pesticides, paint, and common household cleaning chemicals. The chemicals in the shipping container appeared properly stored and secured. The storage area in the three-sided shed showed signs of staining and containers were not properly stored with secondary containment or secured.

123-125 Independence Drive

Chemical use observed on this property is limited to small containers (1-liter or less) of IPA, acetone, and other laboratory chemicals, and 1-gallon containers of resin. All chemicals appeared to be properly stored. Operations at the site do not generate large amounts of hazardous waste; however, according to Mr. Perkins, generated waste is stored at the adjacent L3 Harris plant (150 Constitution Drive) and disposed of off-site by Clean Harbors.

127 Independence Drive

Chemical use observed on site is limited to IPA, acetone, and germicidal detergents. All chemicals appeared to be properly stored. Operations at the site do not generate large amounts of hazardous waste; most chemicals are used up in process and only small amounts are disposed of off-site by Clean Harbors.

1205 Chrysler Drive

No chemical use or storage was observed on the property.

130 Constitution Drive

Chemical use observed on site includes spindle and slideway oils, hydraulic oils, and coolant. All chemicals appeared to be properly stored. According to Mr. Perkins, generated waste is transferred to the adjacent L3 Harris plant (150 Constitution Drive) and disposed of off-site by Clean Harbors.

6.3 Underground and Aboveground Storage Tanks

No USTs or ASTs were observed at the subject property.

6.4 Generators

No back-up generators were observed at the subject property.

6.5 Elevators

No elevators were observed on the subject property.

6.6 Hydraulic Equipment

No hydraulic equipment was observed at the subject property.

6.7 Indications of Polychlorinated Biphenyls (PCBs)

Two pole-mounted PG&E-owned transformers are present on 123-125 Independence Drive. No leaks or stains were observed on the ground beneath the transformers.

A pad-mounted PG&E-owned transformer is present on 130 Constitution Drive. A pad-mounted transformer was present on 123-125 Constitution Drive. The transformers were not labeled as to PCB content. No staining or evidence of leakage was observed in the vicinity of the transformers.

Fluorescent lights are present throughout the facilities; therefore, PCB-containing ballasts may be present.

6.8 Other Conditions

6.8.1 Asbestos

An assessment of asbestos-containing materials was not conducted as part of this Phase I ESA; however, PES identified one prior site investigation (E2C, 1996a) that reported the results from five samples collected from the office area of the 1205 Chrysler Drive building. According to E2C, asbestos was identified in the 'linoleum in the ladies restroom' at a concentration of 20% asbestos and in the mastic of the 'gray 12x12 vinyl floor tile' located throughout the office area at a concentration of 3% asbestos. Asbestos was also identified in the 'mud' of the wallboard in the 'ladies lounge' area of the office at a concentration of 2% asbestos. The report is included in Appendix G.

Mr. Perkins reported that an asbestos survey was previously performed at 130 Constitution Drive and 123-125 Independence Drive, and ACM was identified in floor tiles and mastic in some areas of the buildings. According to Mr. Perkins, an asbestos operations and maintenance (O&M) plan has been developed for the facility.

Standards set by the Occupational Safety and Health Administration (OSHA) require building owners to presume that thermal system insulation (TSI) and surfacing asbestos containing material (ACM) found in buildings constructed before 1981, and floor tile installed in buildings through 1981, are asbestos containing, unless demonstrated to be less than 1 percent asbestos through sampling. The rule does not permit an assumption to be made that a material does not contain asbestos in buildings constructed after 1980. However, since the late 1970s to early 1980s, asbestos has been removed or substituted for in all but a small number of construction products. For example, asbestos is still used, although at low concentrations, in various mastics and roofing materials.

Based on the 1960s construction dates of the existing buildings, it is likely that ACM is present in the other three buildings as well.

6.7.2 Radon

The National Radon Database includes radon information from U.S. EPA/State Residential Radon Surveys conducted between 1986 and 1992. The federal EPA radon zone rating for San Mateo County is 2 (>=2 pCi/L and 4 pCi/L). The federal database includes test results from 32 sites within San Mateo County. The average value for radon level reported in this region was 0.594 pico curies per liter (pCi/l) of air for the first floor living area. This is significantly lower than the U.S. EPA's recommended action level of 4 pCi/l. The State database includes test results from 101 sites within the zip code 94025 with 21 (approximately 20 percent) exceeding the U.S. EPA's recommended action level of 4 pCi/L. The California state database does not report sample location (first floor, second floor, basement) information.

The survey indicates that it is unlikely that radon levels at the subject property are above the U.S. EPA action level. As such, radon gas testing is not deemed necessary for the subject property.

6.7.3 Solid Waste

Non-hazardous solid wastes and recycling are collected in collection bins which are picked up by Recology for offsite disposal. No concerns were identified with solid waste storage at the subject property.

6.7.4 Lead in Paint

A lead survey was not a part of this Phase I ESA. The Consumer Products Safety Commission limited lead content in residential paint to 0.06 percent (600 parts per million) in 1978. The use of paint containing greater than 0.06 percent lead was also prohibited in areas where consumers have direct access to painted surfaces. Based on the late 1960s construction date of the subject property buildings, lead-based paint may be present.

6.7.5 Water Damage and Mold

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, brown, or black. Molds grow on virtually any organic substance, as long as moisture and oxygen are present. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

No evidence of significant water damage or potential mold growth was identified at the subject property. The property representatives were unaware of any water damage or mold growth.

7.0 SUMMARY AND CONCLUSIONS

The subject property is comprised of five legal parcels totaling approximately 8.45 acres that have been developed with light industrial/commercial buildings and associated paved parking lots. Temporary structures used for storage are situated on 119 Independence Drive and 130 Constitution Drive. The subject property addresses, San Mateo County Assessor's Parcel Numbers, approximate acreage, and current uses are listed in the table below.

APN #	Approximate Acreage	Property Address	Current Property Use
055-236-180	1-acre	119 Independence Drive	Davey Trees
055-236-140	0.96-acre	123-125 Independence Drive	L3 Harris Technologies
055-236-240	1.18 acres	127 Independence Drive	Artio Medical
055-236-300	2.3 acres	1205 Chrysler Drive	Vacant
055-236-280	2.6 acres	130 Constitution Drive	L3 Harris Technologies

The site is in an area developed with commercial and office properties within the City of Menlo Park and County of San Mateo, California. The subject property is bounded to the north by Constitution Drive, to the east by Chrysler Drive and light industrial/commercial buildings, to the south by Independence Drive, and to the west by light industrial/commercial buildings.

Historical Site and Surrounding Area Use

The earliest reviewed record for the site is an 1897 topographic map, which shows the site and surrounding area as undeveloped land at the edge of a slough. Based on the 1943 topographic map, the edge of the slough has been filled in. The southern edge of the slough now is approximately ¼-mile to the north on the north side of Bayfront Expressway. Aerial photographs from 1943 to 1958 show the subject property as vacant land with likely

agricultural use (grain and/or grass farming). Subject property buildings are first visible on the 1963 aerial photograph. By 1982, the subject property appears in its current configuration. Available historical city directories indicate the five property buildings have been occupied primarily by small manufacturing companies, research and development companies, construction companies, laboratories for research and development of medical supplies, and tree and landscaping services.

Earliest historical records show the subject property vicinity as primarily vacant land with likely agricultural use (grain and/or grass farming); however, by 1958, a commercial building is depicted southeast of the subject property and Highway 101 has been constructed to the south. Through the 1960s, 1970s, 1980s, and 1990s, the area surrounding the subject property continued to slowly infill with commercial/light industrial buildings. In 2016, the three buildings previously located on the south side of Independence Drive were demolished for the construction of the existing multi-story office building, multi-story open-air parking garage, and Hotel Nia. In approximately 2019, the buildings located on the 100-block on the north side of Constitution Drive were demolished for the construction of the two existing multi-story office buildings and two multi-story open air parking garages.

Buildings in the immediate vicinity of the subject property were historically used for commercial and light industrial purposes; primarily associated with the manufacturing of electronic, medical, and communication devices. Businesses identified in the historical city directories for the subject property addresses and addresses in the immediate vicinity of the subject property are discussed in Section 3.7.2 and listed in Appendix F.

Previous Investigations

119 Independence Drive

In 1987, while the Raychem Corporation occupied the site, groundwater monitoring well MW-1 was installed in the northeast corner of the property. TCE and 1,1-DCE were detected in groundwater and no VOCs were detected in soil collected during installation of well MW-1. In 1991, well MW-2 was installed at the southeast corner of the property. In 2009, while Davey Trees occupied the site, the two wells were sampled and VOCs detected in the groundwater samples included TCE, 1,1-DCE, and cis-1,2-DCE. In April 2011, the two wells were destroyed.

A Phase 1 ESA was completed in 2015. The Phase I identified two RECs for the subject property: (1) the presence of TCE in the groundwater (former on-site wells MW-1 and MW-2) beneath the site; and (2) the proximity of former USTs removed from the northwest portion of the adjoining property (123-125 Independence Drive) and the inadequate characterization of constituents (93 ppm TPHg) detected in the groundwater sample collected from the tank pit during tank removal. The following potential environmental concerns were also identified: (1) past agricultural use of the property may have resulted in the presence of residual chemicals such as pesticides, herbicides, arsenic, and lead. Although not a concern under current use, should the property be redeveloped, the potential presence of such

chemicals should be evaluated, as necessary for earthwork or off-haul considerations; (2) the potential presence of LBP and ACMs based on the age of construction of the original building in the late 1960s; and (3) the presence of oil stained asphalt and improper oil storage created the potential for soil contamination in the area defined by the three-sided storage unit immediately north of the site building.

123-125 Independence Drive

A Phase I ESA was performed at this site in 2015. AEI reported that the presence of TCE in the shallow groundwater and the use of the property by Randtron are RECs that would require investigation for potential impacts to groundwater and assessing vapor intrusion concerns. AEI also concluded the two gasoline USTs removed from the northwest portion of the property in 1985 represented a REC because 93 ppm TPHg was reported in a groundwater sample collected from the tank pit, no closure documentation was found in the SMCEH files, and no follow-up work was conducted. AEI also reported that due to the age of the building there is a potential for the presence of lead-based paint and asbestos as "other environmental considerations".

127 Independence Drive

A Phase 1 ESA was completed in 2015. The Phase I did not identify any RECs for the property but noted the following: (1) there is a regional TCE plume impacting shallow groundwater in the area and potential vapor intrusion concerns have not been evaluated; and (2) the potential presence of LBP and ACMs based on the age of construction of the original building in the late 1960s.

1205 Chrysler Drive

Several previous environmental investigations of the site were identified beginning with a Phase I ESA prepared in 1995 and subsequent investigations prompted by concerns related to chemical use, waste in three sumps located inside the site building, and a compressor located outside the west wall of the building. The site investigations identified low levels of petroleum hydrocarbon compounds and HVOCs in soil and groundwater at the site; however, soil concentrations were below regulatory levels and groundwater impacts appeared to be from area-wide groundwater impacts rather than an on-site release. The RWQCB issued a No Further Action determination for the subject property on March 27, 2002 stating that "the subject property is located within an industrial area with regional groundwater contamination" and determined that "based on the available information, including current land use, and assuming the information provided is accurate and representative of site conditions, no further action related to the pollutant release at the subject site is required".

In 2015, a Phase I ESA was prepared for this property. No RECs or CRECs were identified; however, the No Further Action determination issued for the site in 2002 was considered to be an HREC. The Phase I also identified the following environmental concerns: (1) the regional

TCE impacts to groundwater and potential TCE vapor intrusion concerns; (2) the presence of ACM; and (3) the potential presence of lead-based paint based on the age of construction of the original building in the late 1960s and 1970s.

130 Constitution Drive

A Phase 1 ESA was completed in 2016. No RECs were identified for the property; however, the following potential environmental concerns were noted: (1) staining was observed in the vicinity of the bermed area containing waste cutting oil; (2) a regional TCE groundwater plume is present within the site vicinity; however, the source of the plume has not been identified and a potential vapor intrusion concern had been evaluated; (3) ACM was identified at the site, but is managed under an O&M plan; and (4) based on the construction date of the building, lead-based paint may be present. In 2015, six borings (PSB-1 through PSB-6) were sampled throughout the property and a groundwater sample was collected at each location for the analysis of VOCs, TPHg, TPHd, and TPHmo. TCE was detected at all locations at concentrations ranging from 34 to 220 μg/L, which exceed the current vapor intrusion risk ESL of 7.5 μg/L at a commercial property. Vinyl chloride, detected at three locations, at concentrations ranging from 0.64 to 1.6 μg/L, exceeded the vapor intrusion risk ESL of 0.14 μg/L.

Regulatory Agency Records

119 Independence Drive

The subject property address was listed as closed in the California Spills 90 database; details were not specific regarding the reason for the listing. The address was also listed in the GeoTracker database as a Non-Case Information site due to TCE detected in groundwater in 2009. One former tenant, Siebert Machine Corporation (Motion Pro), was listed on the Envirostor Database in 1995; details were not specific regarding the reason for the listing. The tenant was also listed on The San Mateo Business Inventory listing for the generation and storage of hazardous wastes.

SMCEH files pertaining to Raychem, a former tenant at the site, consisted of chemical inventories, correspondence letters, and documents associated with the installation/destruction of wells MW-1 and MW-2. Chemical inventories did not list any quantities of TCE but did note the presence of 2 gallons of PCE.

123-125 Independence Drive

The subject property address was not listed in any database searched by EDR. SMCEH files consisted of applications, regulatory notes, and a laboratory report associated with the removal of the gasoline USTs in 1985.

127 Independence Drive

The subject property address was listed in several databases searched by EDR. Former tenants, Arrinex Inc, Carbochon Aesthetics, and Transcend Medical, Inc, were listed on the FINDS, ECHO, HAZNET, HWTS, and San Mateo Business Inventory databases for conducting hazardous waste activities. Hazardous wastes were reportedly transferred off-site for disposal. No on-site treatment was reported. No violations were identified.

SMCEH files from 1987 indicated the subject property is listed as Randtron Systems Plant 6. A HMBP listed the several hazardous materials and amounts stored and used at the site annually. Records show that hazardous materials storage was limited to the "Rotary Coupler – Assembly and Repair" portion of the building, in the southeastern quadrant of the building. SMCEH files did not indicate any violations or releases associated with the hazardous materials usage. SMCEH files for Cabochon Aesthetics also listed hazardous materials and amounts stored and used at the site annually; hazardous materials and stormwater inspections did not identify any violations. In 2019, SMCEH CUPA issued a permit to Arrinex Inc, a developer of cryotherapy devices, to generate less than 1 ton of hazardous waste per year. In 2020, Arrinex completed facility closure as a small quantity generator of hazardous waste under the supervision of SMCEH CUPA.

1205 Chrysler Drive

The subject property address was listed in several databases searched by EDR. Former occupant, Krebs Engineers, was listed on the CPS-SLIC, Hist CORTESE, and CA RGA LUST databases. As a result of site investigations conducted beginning in 1995 and concluding in 2001, the RWQCB issued a No Further Action determination for this property on March 27, 2002. Four former site tenants, Pan Pacific, Roto Rooter, Krebs Engineers, and Comcast of California, are listed on the HAZNET and CA HWTS databases for generating hazardous wastes which were reported to have been transferred off-site for disposal or recycling. Krebs Engineers was also listed in the FINDS and San Mateo Business Inventory databases for generating hazardous waste and in the CERS database with a HMBP. The most recent tenant, Pan Pacific Mechanical, was listed in the RCRA NonGen/NLR, and ECHO databases for conducting hazardous waste activities. No violations were identified. No other listings for the site address were present in the EDR report.

SMCEH files for the subject property (Roto Rooter and Krebs Engineers) included correspondences, HMBPs, hazardous materials inspections, and a 2001 letter approving closure of the Roto-Rooter operations at the site.

130 Constitution Drive

The current tenant was listed in the RCRA-SQG, CHMIRS, EMI, NPDES, ERNS, FINDS, HAZNET, HWTS, CIWQS, MN Manifest, CERS Hazwaste databases, and San Mateo Business Inventory databases. Note, that 130 Constitution Drive is the main administrative facility and is the mailing address used for administrative issues for all six area Randtron buildings. As a result, some database listings may pertain to other facilities.

Two CHMIRS incidents are listed for the subject property. In 1997, approximately 50 to 55 gallons of metalworking coolant overfilled a drum and secondary containment and was released to the storm drain. The spill was flushed with significant amounts of water. No further investigation was required by SMCEH. In 2004, a container reportedly fell off a truck and approximately 1.5 gallons diesel travelled to a storm drain. The spill was reportedly cleaned up by an outside contractor. No further action was required by SMCEH. Randtron is also listed on the ERNS database for these incidents.

Randtron is listed on the NPDES database for wastewater discharge permitted with South Bayside System Authority. L3 Harris operates under a Stormwater Pollution Prevention Plan with stormwater discharge identification number 41NEC000046.

Randtron is listed in the HAZNET database for various chemicals and has been listed on the RCRA-SQG database since 1969. Based on SMCEH records, the subject property is listed as Randtron Systems Plant 1 and a 1987 Randrton HMBP indicates 5-gallon containers with "soluble oil" and "WD-40" were stored in the southern end of the building. Observations during the site reconnaissance, wastes currently generated at the subject property are limited to waste oils, waste coolant, and aluminum shavings. No violations are listed for the site. The subject property is also listed as a Non-Case Information site in GeoTracker on December 11, 2015. Based on the records summarized above, no significant environmental concerns were identified other than those discussed in Section 4.5. The surface spills that occurred in 1987 and 2004 are considered *de minimis* since they were reportedly remediated and therefore unlikely to have created an ongoing environmental issue.

Surrounding Properties

Several database listings were identified for properties surrounding the subject property and were related to past hazardous materials operations and/or releases. Most notably are: (1) 120 Constitution Drive; (2) Randtron activities at 150 Constitution Drive; (3) 115 Independence Drive; (4) 135 Commonwealth Drive; (5) 1150 Chrysler Drive; (6) the Menlo Gateway Development on 100, 110, 120, 150, 190 Independence Drive; (7) the Menlo Gateway Development Phase 2 on 101 - 155 Constitution Drive; and (8) 4040 Campbell Avenue.

120 Constitution Drive is located adjoining the subject property to the west. To assess soil and groundwater conditions in the vicinity of the former 1,000-gallon gasoline UST removed from the property in 1986, groundwater monitoring wells were installed 1993 and 1994. No significant contaminant concentrations were detected in groundwater; however, TCE was detected in groundwater at concentration up to 1,200 µg/L. The RWQCB reviewed the findings of the investigations and approved a closure request in April 1998. The RWQCB indicated that a regional TCE plume exists in the area but was not able to determine a source.

Following a Phase I conducted in 2010, soil vapor and groundwater samples were collected from two borings; no TCE was detected in soil vapor but was detected in groundwater at a maximum concentration of 110 µg/L. Based the results, and the 1998 No Further Action Letter, no further actions were performed regarding subsurface environmental conditions or indoor air quality at the property.

The address, 150 Constitution Drive, located adjacent to 130 Constitution Drive (subject property) to the east, has been occupied by L3 Harris (formerly Randtron) since the early 1970s. The address is not listed on any environmental databases, likely because the Randtron 130 Constitution Drive address is the administrative address for all of the Randtron buildings; however, according to Mr. Perkins of L3 Harris, hazardous waste generated at 130 Constitution Drive and 123-125 Independence Drive (subject properties) are stored on the 150 Constitution Drive for transportation and off-site disposal by Clean Harbors.

The property, 115 Independence Drive, located adjoining subject property to the west, is a Cleanup Program Site in GeoTracker. Regulatory agency files document that soil, groundwater, and soil gas investigations were performed at the site between 1989 and 1997. The RWQCB issued a letter dated June 27, 1996, stating that they believed the VOC contamination in groundwater was from an off-site source.

In 1996, soil and grab groundwater samples were collected from 12 locations across the site. The results of the investigation showed the presence of VOCs in groundwater, including TCE at concentrations up to 340 µg/L. The source of the VOCs in groundwater was interpreted as being of off-site origin because no VOCs were detected in soil. In April 2018, the RWQCB issued a letter requesting a site history information for the subject property to assess whether the property is a source to the regional TCE plume.

Between 2018 and 2020, subsurface investigations were conducted at 115 Independence Drive and 104 and 110 Constitution Drive. TCE was detected in groundwater at concentrations up to 150 µg/L which exceed the groundwater vapor intrusion ESL of 7.5 µg/L at a commercial property. VOCs were detected in soil vapor including TCE, vinyl chloride, benzene, and ethylbenzene at concentrations exceeding their respective vapor intrusion ESLs at a commercial property. Based on the presence of VOCs in regional groundwater, and because concentrations of VOCs in groundwater and soil vapor beneath the property are consistent with and lower than nearby sites, Ramboll concluded they do not appear to be related to an on-site release.

The address, 135 Commonwealth Drive, is located approximately 150 feet southeast (cross-gradient) of the subject property. Benzene has been detected in soil vapor at concentrations up to 2,100 $\mu g/m^3$, which exceeds the current vapor intrusion risk ESL at a commercial property. The report concluded that based on the low concentrations of VOCs in soil and groundwater and the limited extent of benzene in soil vapor, it is highly unlikely that the detected soil vapor in the fill soils constituted a material threat to the quality of the groundwater and the site. Additionally, an indoor air sample collected within the building did not indicate the existence of a threat to the health of tenants in the building. SMCEH, issued a Case Closure and No Further Action determination for the site on December 8, 2009.

The property, 1150 Chrysler Drive facility (currently occupied by L3 Harris), located approximately 100 feet east of the subject property, is listed as a LUST Cleanup site in Geotracker for the release of gasoline-range petroleum hydrocarbons identified in 1985. SMCEH issued a Case Closure determination for this site on April 10, 1999.

The Menlo Gateway Development (100-190 Independence Drive), located south of the subject property across Independence Drive is listed as a Non-Case Information site in GeoTracker. Subsurface investigations conducted in 2015 indicated TCE and one or more of its degradation products, cis-1,2-DCE, trans-1,2-DCE, and vinyl chloride, were detected in groundwater and soil vapor at concentrations exceeding the current vapor intrusion risk ESLs at a commercial property.

The Menlo Gateway Development Phase 2 (101-155 Constitution Drive), located north of the subject property across Constitution Drive, is listed as a Non-Case Information site in Geotracker. Subsurface investigations conducted in 2016 and 2017, to facilitate development of the existing buildings, indicated TCE and one or more of its degradation products, cis-1,2-DCE, trans-1,2-DCE, and vinyl chloride, were detected in groundwater at concentrations exceeding the current vapor intrusion risk ESLs at a commercial property. TCE was detected in soil vapor at concentrations below the soil vapor intrusion ESL of 100 μg/m3; however, vinyl chloride was detected at concentrations exceeding the current vapor intrusion ESL of 5.2 μg/m3 at a commercial property.

Regional groundwater flow is presumed to be toward the San Francisco Bay to the north; however, according to quarterly groundwater data collected 120 Constitution Drive, groundwater flow fluctuates north to southeast due to tidal influences typical of the Bay fringe (Pacific, 1994). VOC concentrations detected in groundwater and/or soil vapor beneath 120 Constitution Drive (adjoining the subject property to the west), 115 Independence Drive (adjoining the subject property to the west), 100-190 Independence Drive (adjacent to the subject site to the south), 101-115 Constitution Drive (adjacent to the subject property to the north) exceed their respective vapor intrusion ESLs. Although the RWQCB has not identified any of the properties as sources of TCE, the VOC impacted groundwater and soil vapor have the potential to migrate beneath the subject property and therefore appear to present a significant environmental condition to the subject property.

The documented hydrocarbon releases at 120 Constitution Drive, 135 Constitution Drive, and 1150 Chrysler Drive received case closure by the appropriate regulatory agency and therefore do not appear to present significant environmental conditions to the subject property.

The property at 4040 Campbell Avenue is listed as a Cleanup Program Site in GeoTracker for VOC, primarily TCE, impact to soil and groundwater from an oil-water separator. Previous operations at this property reportedly involved the use of chemicals including VOCs and petroleum hydrocarbons. TCE and cis-1,2-DCE were detected in groundwater at concentrations as high as 200,000 μg/L and 190,000 μg/L, respectively. The source of the contamination was determined to be an OWS. A sample of the sludge material removed from

the OWS prior to its abandonment revealed a TCE concentration of 24,000 mg/kg. Groundwater beneath the property was measured to flow north to northwest, positioning this property approximately 1,500 feet upgradient of the subject property. Although this property received case closure from the RWQCB, based on its up-gradient location with respect to the groundwater flow direction, the VOC impacted groundwater has the potential to migrate beneath the subject property and therefore appears to present a significant environmental condition to the subject property.

Site Observations

Hazardous material use and storage at the subject property is limited to small quantities of chemicals for the operation of machines and equipment and for use in medical research and development. Notable observations pertaining the hazardous material storage are:

- 119 Independence Drive: containers of hazardous materials including pesticides, fertilizers, paint, hydraulic oil, lubricants, and waste oil were stored on the northern exterior side of the building within containment areas; however, no secondary containment was observed and the asphalt surface showed signs of staining; and

- 130 Constitution Drive: new and waste oils stored in 5- and/or 55-gallon containers are stored in a locked, concrete bermed storage enclosure with a sign indicated the presence of hazardous materials storage. Staining was observed within the bermed area and on the berm.

The grounds of the subject property were observed to be in generally good condition, with the exception of surface staining consistent with vehicle parking/storage, and cracked asphalt parking lots and driveways. There was no evidence of improper dumping or stressed vegetation. No evidence of sumps or pits was observed. No indications of septic systems were identified during the site inspection. No evidence of USTs or ASTs was observed during the inspection. Evidence of boreholes for a subsurface investigation were observed on the five properties. Sobrato indicated the boreholes were for a recent geotechnical investigation; however, the report was not available for PES review.

Conclusions

PES has performed a Phase I ESA, in conformance with the scope and limitations of ATSM Practice E 1527-13, of the property located at 119, 123-125, and 127 Independence Drive, 1205 Chrysler Drive, and 130 Constitution Drive. Any exceptions to, or deletions from, this practice are described in Sections 1.2 and 1.3 of this report. The following lists the RECs identified in connection with the subject property:

- The documented presence of VOCs, primarily TCE and vinyl chloride, in groundwater and soil vapor beneath the subject property and surrounding properties at concentrations above regulatory screening levels for vapor intrusion risk constitutes a REC and is identified as a REC for the subject property. However, the potential for vapors

potentially containing VOCs identified during the investigations from entering portions of the planned building can be mitigated via construction of a sub-slab vapor intrusion mitigation system; and

- The two gasoline USTs removed from the northwest portion of the 123-125 Independence Drive property in 1985 represent a REC due to documented groundwater impacts (TPHg at 93 ppm) and no closure documentation has been identified.

PES also identified the following CREC:

- Site investigations at 1205 Chrysler Drive were conducted between 1995 and 2002 and the RWQCB issued a No Further Action determination for the subject property on March 27, 2002 (Appendix G) stating that "the subject property is located within an industrial area with regional groundwater contamination" and determined that "based on the available information, including current land use, and assuming the information provided is accurate and representative of site conditions, no further action related to the pollutant release at the subject site is required". Based on the No Further Action determination and because the determination is limited to the current use of the property, these impacts at the site are considered to be an CREC.

While not a RECs, CRECs, or HRECs, PES identified the following environmental concerns:

- Past agricultural use of the property may have resulted in the presence of residual chemicals such as pesticides, herbicides, arsenic, and lead. Although not a concern under current use, the potential presence of such chemicals should be evaluated prior to redevelopment for earthwork and/or off-haul considerations;

- The documented and potential presence of ACM in the five site buildings;

- The potential presence of lead-based paint based on the age of construction of the buildings in the late 1960s; and

- Staining on the asphalt surface in the vicinity of hazardous materials storage at 119 Independence Drive and 130 Constitution Drive.

8.0 DATA GAPS STATEMENT

The absence of documentation related to the past subsurface investigations on the subject property is considered a data gap. At the time of PES' site inspection, the space leased to Tom Sawyer Labs at 119 Independence Drive was inaccessible, and the large storage containers at 130 Constitution Drive were inaccessible, and these constitute data gaps. As noted above, the MPBD has not responded to PES's request for files and PES will complete the file reviews once information is obtained from the MPBD and will issue an addendum to this report, if warranted.

No other significant data gaps that may have affected our ability to identify RECs associated with the subject property were identified during the performance of this Phase I ESA.

9.0 ADDITIONAL SERVICES

No additional services were provided during the preparation of this Phase I ESA.

10.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312. Resumes of the Environmental Professionals signing this report are presented in Appendix H.

USER QUESTIONNAIRE AND KEY SITE MANAGER QUESTIONNAIRE

USER QUESTIONNAIRE[1]
PHASE I ENVIRONMENTAL SITE ASSESSMENT

In order to qualify for one of the *Landowner Liability Protections (LLPs)*[2] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*), the User must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

User Information
Name: Sierra Sousa
Title: Development Associate
Company: The Sobrato Organization
Representing, if applicable:
Signature:  Date: 1/11/2021

Site Information
Site Name: 123 Independence
Address: 119 Independence Drive

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)
Did a search of recorded land title records (or judicial records where appropriate[3]) identify any environmental cleanup liens filed or recorded against the property under federal, tribal, state or local law?
Phase 1 conducted by PES in 2015 for neighboring property, 127 Independence, found that subject property was listed on EnviroStor's website. Further information is unknown.

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi))
Did a search of recorded land title records (or judicial records, where appropriate[3]) identify any activity or use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?
Unknown.

[1] In accordance with Appendix X3 of ASTM E1527-13.

[2] *Landowner Liability Protections,* or *LLPs,* is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* (*"Common Elements"* Guide) issued on March 6, 2003.

[3] In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental lien and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former property occupants of the property or an adjoining property so that you have specialized knowledge of the chemicals and processes used by this type of business?

123-25 Independence (east) is a one-story office building occupied by L-3 Communications and purchased by TSO in 2015.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Not looking to purchase the property, so there is no purchase price to compare to fair market value.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

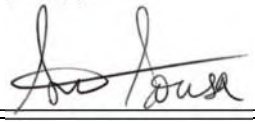
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User:

(a) Do you know the past uses of the property? Because of the area, I believe that this building has been used for light industrial/office space in the past.

(b) Do you know of specific chemicals that are present or once present at the property? Per the current tenant, Davey Tree, they occasionally have close to 50 gallons in the aggregate of tree insecticides and fungicides onsite. Besides that, unknown.

(c) Do you know of spills or other chemical releases that have taken place at the property? Unknown.

(d) Do you know of any environmental cleanups that have taken place at the property? Unknown.



6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Unknown.

USER QUESTIONNAIRE[1]
PHASE I ENVIRONMENTAL SITE ASSESSMENT

In order to qualify for one of the *Landowner Liability Protections (LLPs)*[2] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*), the User must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

User Information
Name: Sierra Sousa
Title: Development Associate
Company: The Sobrato Organization
Representing, if applicable:
Signature:  Date: 1/7/2021

Site Information
Site Name: 123 Independence
Address: 123-25 Independence Drive

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)
Did a search of recorded land title records (or judicial records where appropriate[3]) identify any environmental cleanup liens filed or recorded against the property under federal, tribal, state or local law?
I am not aware of any environmental cleanup liens filed or recorded against the property.

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi))
Did a search of recorded land title records (or judicial records, where appropriate[3]) identify any activity or use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?
I am not aware of any AULs filed or recorded against the property.

[1] In accordance with Appendix X3 of ASTM E1527-13.

[2] *Landowner Liability Protections,* or *LLPs,* is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* (*"Common Elements"* Guide) issued on March 6, 2003.

[3] In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental lien and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former property occupants of the property or an adjoining property so that you have specialized knowledge of the chemicals and processes used by this type of business?

119 Independence (west) is a one-story office building occupied by Davey Tree and purchased by TSO in 2015. 127 Independence (east) is a one-story office building occupied by Artio Medical, Inc and purchased by TSO in 2016. 130 Constitution (north) is a two-story office building occupied by L3 Technologies, Inc. (aka Randtron) and purchased by TSO in 2015.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Not looking to purchase the property, so there is no purchase price to compare to fair market value.

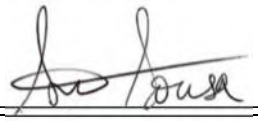
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User:

(a) Do you know the past uses of the property? Per the Phase 1 conducted by AEI Consultants and the prior owner, see below:

Date Range	Subject Property Description/Use	Source(s)
1943-1958	Agricultural land	Aerial Photographs
1960-1967	Current development occupied by Cal-Air Conditioning Service and Johnson & Mape Construction	City Directories, Building Records, Assessor's Information
1971-1974	Current development occupied by Cal-Air Conditioning Service and Oceans Magazine	Aerial Photographs, City Directories, Building Records
1975-1976	Current development occupied by Triad Systems Corp. and West Coast Dental	Building Records
1977-1982	Current development occupied by Sunburst Solar Energy, Solid State Solar Controls, Granger Association, and Randtron Systems	Aerial Photographs, City Directories, Building Records
1984-Present	Current development occupied by Randtron Systems	Aerial Photographs, City Directories, Building Records, Interviews, Oversight Agency Records

(b) Do you know of specific chemicals that are present or once present at the property? See Phase 1 conducted by AEI Consultants and the prior owner for historical information. As for present, I am not aware of any chemicals onsite.



(c) Do you know of spills or other chemical releases that have taken place at the property? See Phase 1 conducted by AEI Consultants and the prior owner.

(d) Do you know of any environmental cleanups that have taken place at the property? See Phase 1 conducted by AEI Consultants and the prior owner.

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)
As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property? Based on the Phase 1 conducted by AEI Consultants and the prior owner, the current tenant's long occupancy at the subject and surrounding properties is considered a REC due to their former use of chlorinated solvents, and because cyanide and hexavalent chromium exceeded allowable limits in wastewater discharges causing a potential subsurface impact. There were also two underground gasoline storage tanks removed from the subject property in 1985.

USER QUESTIONNAIRE[1]
PHASE I ENVIRONMENTAL SITE ASSESSMENT

In order to qualify for one of the *Landowner Liability Protections (LLPs)*[2] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*), the User must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

User Information
Name: Sierra Sousa
Title: Development Associate
Company: The Sobrato Organization
Representing, if applicable:
Signature:  Date: 1/7/2021

Site Information
Site Name: 123 Independence
Address: 127 Independence Drive

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)
Did a search of recorded land title records (or judicial records where appropriate[3]) identify any environmental cleanup liens filed or recorded against the property under federal, tribal, state or local law?
I am not aware of any environmental cleanup liens filed or recorded against the subject property.

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi))
Did a search of recorded land title records (or judicial records, where appropriate[3]) identify any activity or use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?
I am not aware of any AULS filed or recorded against the subject property.

[1] In accordance with Appendix X3 of ASTM E1527-13.

[2] *Landowner Liability Protections,* or *LLPs,* is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* (*"Common Elements"* Guide) issued on March 6, 2003.

[3] In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental lien and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former property occupants of the property or an adjoining property so that you have specialized knowledge of the chemicals and processes used by this type of business?

123-25 Independence (west) is a one-story office building occupied by L-3 Communications (Randtron) and purchased by TSO in 2015. 1205 Chrysler (east) is a vacant, one-story office building purchased by TSO in 2016. 130 Constitution (north) is a two-story office building occupied by L-3 Communications (Randtron) and purchased by TSO in 2015.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Not looking to purchase the property, so there is no purchase price to compare to fair market value.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

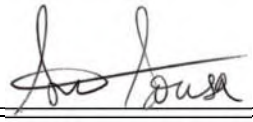
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User:

(a) Do you know the past uses of the property? Based on Phase 1 for subject property done in 2015 by PES, was likely used for agricultural purposes from 1943-1958 and developed, with current structure, in 1968. Based on city records, the site has been occupied by multiple dentists, office uses, and bioscience/med-tech companies.

(b) Do you know of specific chemicals that are present or once present at the property? Currently, no. Historically, unknown.

(c) Do you know of spills or other chemical releases that have taken place at the property? I am not aware of any spills or other chemical releases at the subject property.

(d) Do you know of any environmental cleanups that have taken place at the property? I am not aware of any environmental cleanups at the subject property.



6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Based on Phase 1 for subject property done in 2015 by PES, there are currently no RECs for the subject property; however, there is a regional TCE plume impacting shallow groundwater in the area.

USER QUESTIONNAIRE[1]
PHASE I ENVIRONMENTAL SITE ASSESSMENT

In order to qualify for one of the *Landowner Liability Protections (LLPs)*[2] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*), the User must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

User Information
Name: Sierra Sousa
Title: Development Associate
Company: The Sobrato Organization
Representing, if applicable:
Signature:  Date: 1/7/2021

Site Information
Site Name: 123 Independence
Address: 130 Constitution Drive

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)
Did a search of recorded land title records (or judicial records where appropriate[3]) identify any environmental cleanup liens filed or recorded against the property under federal, tribal, state or local law?
I am not aware of any environmental liens filed or recorded against the property.

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi))
Did a search of recorded land title records (or judicial records, where appropriate[3]) identify any activity or use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?
I am not aware of any AULs filed or recorded against the property.

[1] In accordance with Appendix X3 of ASTM E1527-13.

[2] *Landowner Liability Protections,* or *LLPs,* is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* (*"Common Elements"* Guide) issued on March 6, 2003.

[3] In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental lien and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former property occupants of the property or an adjoining property so that you have specialized knowledge of the chemicals and processes used by this type of business?

123-25 Independence (south) is a one-story office building occupied by L-3 Communications (Randtron) and purchased by TSO in 2015. 127 Independence (south) is a one-story office building occupied by Artio Medical, Inc and purchased by TSO in 2016.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Not looking to purchase the property, so there is no purchase price to compare to fair market value.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

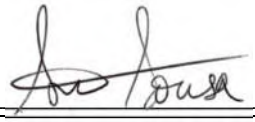
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User:

(a) Do you know the past uses of the property? Based on the 2016 Phase 1 conducted by PES, the subject property was most likely used for agricultural purposes from 1943-1958 and then developed, with the existing building, in 1968. The current tenant, Randtron/L-3, has operated in the building since 1972.

(b) Do you know of specific chemicals that are present or once present at the property? I am not aware of any chemicals onsite historically or currently.

(c) Do you know of spills or other chemical releases that have taken place at the property? Based on the 2016 Phase 1 conducted by PES, two CHMIRS incidents are listed for the subject property. One in 1997 and the other in 2004; however, after flushing with water and cleanup activities, no further action was required by SMCEH. See report for more details.

(d) Do you know of any environmental cleanups that have taken place at the property? Besides what's listed above, I am unaware of any environmental cleanups.



6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Based on Phase 1 for subject property done in 2016 by PES, there are currently no RECs for the subject property; however, there is a regional TCE plume impacting shallow groundwater in the area.

Site Name: 123 Independence
Address: 1205 Chrysler Drive

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)
Did a search of recorded land title records (or judicial records where appropriate[3]) identify any environmental cleanup liens filed or recorded against the property under federal, tribal, state or local law?
Unknown.

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and (vi))
Did a search of recorded land title records (or judicial records, where appropriate[3]) identify any activity or use limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?
Unknown.

[1] In accordance with Appendix X3 of ASTM E1527-13.

[2] *Landowner Liability Protections,* or *LLPs,* is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* (*"Common Elements"* Guide) issued on March 6, 2003.

[3] In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental lien and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28)

As the user of this Phase I ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former property occupants of the property or an adjoining property so that you have specialized knowledge of the chemicals and processes used by this type of business?

127 Independence (west) is a one-story office building occupied by Artio Medical, Inc and purchased by TSO in 2016.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29)

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Not looking to purchase the property, so there is no purchase price to compare to fair market value.

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User:

(a) Do you know the past uses of the property? Because of the area, I believe that this building has been used for light industrial/office space in the past.

(b) Do you know of specific chemicals that are present or once present at the property? Currently, no. Historically, unknown.

(c) Do you know of spills or other chemical releases that have taken place at the property? Based on Phase 1 conducted by PES for neighboring property, 127 Independence, Krebs Engineers was listed on the Spills, Leaks, Investigations and Cleanup database; however, after investigations beginning in 1995 and ending in 2001, the RWQCB issued No Further Action determination for the site on March 27, 2002.

(d) Do you know of any environmental cleanups that have taken place at the property? Unknown.

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Unknown.

KEY SITE MANAGER – PRE-SURVEY QUESTIONNAIRE

Name of person completing questionnaire: Leonardo Rivera Barragan

Association with property: Tenant on behalf of The Davey Tree Expert Company

Length of association with property: About 15 years

Date: 01/11/2021

Phone Number: 650-444-2953

Property Name: 119 Independence Drive

PES Project Number:

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.
Note: *U/NR* indicates *"Unknown"* or *"No Response"*.

QUESTION		RESPONSE			COMMENTS

16E.	Are you aware of any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
17.	Have there been any environmental site assessments of the Project that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Project or recommended further assessment of the Project?		X		
18.	Does the Project discharge waste water on or adjacent to the project, other than storm water, into a storm water sewer system?		X		
19.	Does the Project discharge waste water on or adjacent to the project, other than storm water, or into a sanitary system?		X		
20.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the Project?		X		
21.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?		X		
22.	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Project?		X		
23.	Has there ever been any ACM testing conducted on the Project?		X		
24.	Is there an asbestos Operations and Maintenance (O&M) program in place at the Project?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
25.	Is there now or has there ever been any lead-based paint (LBP) applications on the Project?		X		
26.	Has there ever been LBP testing conducted on the Project?		X		
27.	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Project?		X		
28.	Has the water at the Project ever been tested for lead?		X		
29.	Has Radon testing ever been conducted at the Project?		X		
30.	Are there any other Operations and Maintenance (O&M) programs in place that we should be made aware of?		X		
31.	Is the Project or any portion of the Project located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species, etc.)?		X		
32.	Do you know or suspect that mold was or is present in the building(s) or HVAC system? - If "Yes", proceed to question #33. - If "No", skip question #33 and proceed to question #34.		X		
33.	Are there reliable procedures that specify the actions (i.e. operations and maintenance) to be taken to prevent and/or respond to mold or mold producing problems?		X		
34.	Is there a mold Operations and Maintenance (O&M) program in place at the Project?		X		
35.	Is the HVAC system inspected at least annually?			X	
36.	Have identified HVAC problems been corrected in a timely manner?			X	
37.	Is there now, or has there ever been evidence of mold or mildew present at the building(s)? If so, when?			X	
38.	Is there now, or has there ever been any water damage in the building(s), whether from flooding, plumbing, roof leaks, or other sources? If so, when?		X		
39.	Has there ever been any sort of Indoor Air Quality (IAQ) or mold testing conducted in the building(s)?		X		
Summarize historical Project use (when was the Project developed with the current improvements, what modifications have taken place, what was the Project used for prior to it's current use)					

KEY SITE MANAGER – PRE-SURVEY QUESTIONNAIRE

Name of person completing questionnaire: Randy C. Perkins

Association with property: EH&S / Facilities Manager

Length of association with property: 17 Years

Date: 1/6/21

Phone Number: 650-326-9500 Ext. 483

Property Name: 123-25 Independence Drive

PES Project Number:

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.
Note: *U/NR* indicates *"Unknown"* or *"No Response"*.

25.	Is there now or has there ever been any lead-based paint (LBP) applications on the Project?		X		
26.	Has there ever been LBP testing conducted on the Project?		X		
27.	Is there a Lead Paint Operations and Maintenance (O&M) Program in place at the Project?		X		
28.	Has the water at the Project ever been tested for lead?		X		
29.	Has Radon testing ever been conducted at the Project?		X		
30.	Are there any other Operations and Maintenance (O&M) programs in place that we should be made aware of?		X		
31.	Is the Project or any portion of the Project located or involved in any environmentally sensitive areas (i.e., wetlands, coastal barrier resource areas, coastal barrier improvement act areas, flood plains, endangered species, etc.)?		X		
32.	Do you know or suspect that mold was or is present in the building(s) or HVAC system? - If "Yes", proceed to question #33. - If "No", skip question #33 and proceed to question #34.		X		
33.	Are there reliable procedures that specify the actions (i.e. operations and maintenance) to be taken to prevent and/or respond to mold or mold producing problems?			NR	
34.	Is there a mold Operations and Maintenance (O&M) program in place at the Project?			NR	
35.	Is the HVAC system inspected at least annually?	X			
36.	Have identified HVAC problems been corrected in a timely manner?	X			
37.	Is there now, or has there ever been evidence of mold or mildew present at the building(s)? If so, when?			NR	
38.	Is there now, or has there ever been any water damage in the building(s), whether from flooding, plumbing, roof leaks, or other sources? If so, when?			NR	
39.	Has there ever been any sort of Indoor Air Quality (IAQ) or mold testing conducted in the building(s)?			NR	

Summarize historical Project use (when was the Project developed with the current improvements, what modifications have taken place, what was the Project used for prior to it's current use)	Aircraft antenna production support since the lease began in 1972.

KEY SITE MANAGER – PRE-SURVEY QUESTIONNAIRE

Name of person completing questionnaire: Shelle Barnes

Association with property: Asst. Property Manager

Length of association with property: 2 years/10 months

Date: January 6, 2021

Phone Number: 650.750.4160

Property Name: 1205 Chrysler Drive

PES Project Number:

Directions: Please answer all questions to the best of your knowledge and in good faith. Mark the column corresponding to the appropriate response. Additional details necessary to explain any yes or unknown responses should be provided in the "Comments" column.
Note: *U/NR* indicates *"Unknown"* or *"No Response"*.

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
1A.	Is the Project used for an industrial use?		X		Vacant
1B.	Are any adjoining properties used for an industrial use?	X			
2A.	To the best of your knowledge, has the Project been used for an industrial use in the past?	X			https://www.ppmechanical.com/about
2B.	To the best of your knowledge, has any adjoining properties been used for an industrial use in the past?			U	Other than current occupants as noted on separate surveys
3A.	Is the Project used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
3B.	Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
4A.	To the best of your knowledge, has the Project been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
4B.	To the best of your knowledge, has any adjoining property been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?		X		
5A.	Are there currently any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Project?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
5B.	To the best of your knowledge, have there been previously any automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five gallons in volume or fifty gallons in the aggregate, stored on or used at the Project?		X		
6A.	Are there currently any industrial drums (typically 55 gallon) or sacks of chemicals located on the Project?		X		
6B.	To the best of your knowledge, have there been previously any industrial drums (typically 55 gallon) or sacks of chemicals located on the Project?			U	
7A.	Are there currently any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Project?		X		
7B.	To the best of your knowledge, have there been previously any groundwater monitoring wells or other groundwater wells (i.e., potable drinking water wells) located on the Project?		X		
8A.	Has fill dirt been brought onto the Project which originated from a contaminated site?		X		
8B.	Has fill dirt been brought onto the Project which is of an unknown origin?		X		
9A.	Are there currently any pits, ponds or lagoons located on the Project in connection with waste treatment or waste disposal?		X		
9B.	To the best of your knowledge, have there been previously any pits, ponds or lagoons located on the Project in connection with waste treatment or waste disposal?		X		
10A.	Is there currently, any stained soil on the Project?		X		
10B.	To the best of your knowledge, has there been previously any stained soil on the Project?		X		
11A.	Are there currently any registered or unregistered storage tanks (above or underground) located on the Project?		X		
11B.	To the best of your knowledge, have there been previously any registered or unregistered storage tanks (above or underground) located on the Project?		X		
12A.	Are there currently any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Project or adjacent to any structure located on the Project?		X		
12B.	To the best of your knowledge, have there been previously any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the Project or adjacent to any structure located on the Project?		X		
13A.	Are there currently any flooring, drains, or walls located at the Project that are stained by substances other than water or are emitting foul odors?		X		
13B.	To the best of your knowledge, have there been previously any flooring, drains, or walls located at the Project that are stained by substances other than water or are emitting foul odors?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
14A.	If the Project is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system?				\\N/A
14B.	If the Project is served by a private well or non-public water system, has the well been designated as contaminated by any government environmental/health agency?				\\N/A
15A.	Have you been informed of the past existence of hazardous substances or petroleum products with respect to the Project or any facility located on the Project?		X		
15B.	Have you been informed of the current existence of hazardous substances or petroleum products with respect to the Project or any facility located on the Project?		X		
16A.	Are there any environmental liens or governmental notification relating to past or current violations of environmental laws with respect to the Project or any facility located on the Project?		X		
16B.	Have you been informed of the past existence of environmental violations with respect to the Project or any facility located on the Project?		X		
16C.	Are you aware of any pending, threatened, or past litigation relevant to hazardous substances of petroleum products in, on or from the property?		X		
16D.	Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?		X		
16E.	Are you aware of any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products?		X		
17.	Have there been any environmental site assessments of the Project that indicated the presence of hazardous substances or petroleum products on, or contamination of, the Project or recommended further assessment of the Project?		X		
18.	Does the Project discharge waste water on or adjacent to the project, other than storm water, into a storm water sewer system?		X		
19.	Does the Project discharge waste water on or adjacent to the project, other than storm water, or into a sanitary system?		X		
20.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the Project?		X		
21.	Is there a transformer, capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?		X		
22.	Is there now or has there ever been any asbestos-containing materials (ACM), in any application, on the Project?			U	Built in 1965 prior to regulation of asbestos
23.	Has there ever been any ACM testing conducted on the Project?			U	
24.	Is there an asbestos Operations and Maintenance (O&M) program in place at the Project?		X		

QUESTION		RESPONSE			COMMENTS
		Y	N	U/NR	
25.	Is there now or has there ever been any lead-based paint (LBP) applications on the Project?			U	Built in 1965 prior to prohibition of lead-based paint

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
MENLO TECH INC.	188 CONSTITUTION DR	E 1/8 - 1/4 (0.202 mi.)	Q142	689

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless

information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/14/2020 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 18 RCRA-SQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 10/28/2020 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there are 10 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 07/27/2020 has revealed that there is 1 CA VCP site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 26 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 9 CA HAZNET sites within approximately 0.001 miles of the target property.

CA NON-CASE INFO: Non-Case Information sites

A review of the CA NON-CASE INFO list, as provided by EDR, and dated 09/08/2020 has revealed that there are 2 CA NON-CASE INFO sites within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
119 INDEPENDENCE	119 INDEPENDENCE DRI	0 - 1/8 (0.000 mi.)	B21	173

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
BULLOCK WILLARD C	135 CONSTITUTION DR	NE 0 - 1/8 (0.013 mi.)	A43	224
MITCO PETROLEUM INC	104 CONSTITUTION DRI	NW 0 - 1/8 (0.065 mi.)	H72	302

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

CA RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the CA RGA LUST list, as provided by EDR, has revealed that there are 2 CA RGA LUST sites within approximately 0.001 miles of the target property.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Facility failed to mark the hazard class associated with the waste in the two waste sheds. Avoid storing incompatibles together by having separate containers for each type of hazard class.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 128645
Site Name: L-3 RANDTRON ANTENNA SYSTEMS
Violation Date: 09-11-2018

L-3 RANDTRON ANTENNA SYSTEMS (Continued) **S121742270**

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 04/08/2019. The "contents" section of labels was not adequate to describe the chemicals disposed as "industrial debris." Update all "industrial debris" labels, and others as needed, to identify the chemical contents. Verify with inspector within 30 days.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site ID:	42390
Site Name:	L-3 RANDTRON ANTENNA SYSTEMS
Violation Date:	02-28-2014
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/08/2019. Facility failed to mark the hazard class associated with the waste in the two waste sheds. Avoid storing incompatibles together by having separate containers for each type of hazard class.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	42390
Site Name:	L-3 RANDTRON ANTENNA SYSTEMS
Violation Date:	09-11-2018
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Release/Leaks/Spills - General
Violation Notes:	Returned to compliance on 04/08/2019. Observed contaminated water in trough on floor in dip/braze area of building 4. Technician stated it came from overfilling a tank a few days ago and would be disposed as hazardous waste. He said that they turned ona valve to fill a tank and left to do other prep work and it overflowed. All spills must be cleaned up immediately. Please cleanup this spill and send inspector photo of the cleaned trough and the container of hazardous waste. Please retrain folks that handle hazardous waste in this area regarding spill cleanup and handling of hazardous waste.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS

L-3 RANDTRON ANTENNA SYSTEMS (Continued) **S121781671**

Site ID:	42390
Site Name:	L-3 RANDTRON ANTENNA SYSTEMS
Violation Date:	09-11-2018
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 04/08/2019. Observed open unlabeled 5-gallon container with dried sludge from quench tank; the sludge is considered a hazardous waste. In the interim, cease these operations and put the pail in the industrial debris drum in the central hazardous waste storage shed.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	42390
Site Name:	L-3 RANDTRON ANTENNA SYSTEMS
Violation Date:	09-11-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/08/2019. Observed open unlabeled 5-gallon container with dried sludge from quench tank; the sludge is considered a hazardous waste. Technician said he was drying the sludge before putting it into a drum labeled as hazardous waste. This is considered treatment of hazardous waste. Label on final dried sludge drum also illegible (corrected during inspection). Facility intends to analyze this material for toxicity. In the interim, cease these operations and put the pail in the industrial debris drum in the central hazardous waste storage shed. Provide data from waste determination analysis to inspector within a week of your receipt of results.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	42390
Site Name:	L-3 RANDTRON ANTENNA SYSTEMS
Violation Date:	09-11-2018
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

L-3 RANDTRON ANTENNA SYSTEMS (Continued) **S121781671**

greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 04/08/2019. Observed a step can hazardous waste container in Bldg. 2 with a start date 1/20/18. This container was not labeled "satellite" and was therefore beyond the facility's regulatory accumulation threshold. Please label satellite or dispose as soon as possible. Verify with inspector within 30 days.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE

RANDTRON ANTENNA SYSTEMS (Continued) **1008879896**

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F019
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008

RANDTRON ANTENNA SYSTEMS, A DIV. OF L3 (Continued) **1007200348**

Waste Description: LEAD

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F009
Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Case Type:	Cleanup Program Site
Case Worker:	KAW
Local Agency:	Not reported
RB Case Number:	41S0044
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil Vapor
Potential Contaminants of Concern:	Dichloroethene (DCE), Trichloroethylene (TCE), Vinyl chloride, Arsenic, Benzene, Diesel, Gasoline, Total Petroleum Hydrocarbons (TPH)
Site History:	The site is located in Bohannon Industrial Park Unit 3. The parcel area is 39,650 sf. Prior to construction of the building around 1966, the site was used for agriculture. The building was used for component manufacturing by Electro Nuclear Laboratories from 1974 to approx. 1975. The bldg. had been occupied by semiconductor manufacturing companies, including Raychem Corporation from 1983 to 1994. The 1989 Phase I &II Site Investigation results showed TCE up to 610 ug/l and above MCL concentrations of Cd, Cr, and Ag in GW sample from MW-2. No source of contamination confirmed on-site. Raychem also formerly occupied the adjoining property at 119 Independence GW sample from the MMW-1 in 1997contained up to 420 ug/l TCE, 35 ug/l DCE, and 35,000 ug/l chlorobenzene. Case was inactive for many years. Site history requirement letter issued in April 2018 to make final assessment whether the property is a source to the regional TCE plume. Similar letters are being and will be sent to neighboring commercial/industrial properties.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Case Type:	Cleanup Program Site
Case Worker:	KAW
Local Agency:	Not reported
RB Case Number:	41S0221
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil Vapor
Potential Contaminants of Concern:	Not reported
Site History:	The site is comprised of 3 parcels at 141 Jefferson Drive and 172 - 188 Constitution Drive which have been used for various commercial and industrial shops since the 1960s. Groundwater and soil vapor are contaminated with volatile organic compounds including chlorinated solvents. As of 2020, the 3 parcels are planned for redevelopment into 3 new residential buildings: one building would be seven stories with ground-floor parking garage and 6 levels of apartments; one building would be seven stories with ground-floor parking garage, ground-floor retail space, and 6 levels of apartments; and the third building would be made of up six townhome buildings that would each contain seven three‐story units.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	115369
Site Name:	EXPONENT INC
Violation Date:	04-24-2018
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 06/05/2018. Evidence indicates that training

EXPONENT INC (Continued) **S113035767**

in waste handling has not been effective. (See other violations.) Please provide verification of retraining within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 115369
Site Name: EXPONENT INC
Violation Date: 04-24-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 10/31/2018. In the chromatography lab, observed hazardous waste draining from an instrument into an open unlabeled container and an open funnel lid on a container in the hood. In room 1100, observed a large open unlabeled container of used oil under a tank where work had been done about a year ago according to the lab manager. Ensure appropriate cap for the waste container in chromotography (with adaptors for waste lines from instruments) is in place. All containers of hazardous waste must be closed when hazardous waste is not actively being added. Dispose of the used oil and replace cap(s) within 30 days. Please provide verification via photos and documentation of disposal within 30 days.

Violation Date: 04-24-2018
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.
Violation Notes: Returned to compliance on 06/05/2018. Access to flammable cabinet blocked in the auto-lift equipped lab. Please maintain aisle space to allow unobstructed access for personnel and equipment to this area in case of emergency.
Violation Division: San Mateo County Environmental Health
Violation Program: HW

Site ID: 115369
Site Name: EXPONENT INC
Violation Date: 04-24-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical

EXPONENT INC (Continued) **S113035767**

characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 06/05/2018. Observed hazardous waste in an open unlabeled container in chromatography. Scientist indicated the concentration was about 50% acetonitrile. Observed large open unlabeled container of used oil under a tank where work had been done about a year ago according to the lab manager. Appropriately label all of these containers within 30 days and include instructions for proper labeling procedures in the re-training. According to the facilities manager, proper procedure is to place labeled hazardous waste containers ready for pickup in the bins on the benchtop. Observed several containers labeled with standard Exponent hazardous waste labels or the word "waste" in the chemical storage cabinet in the chemistry lab. These containers must be either placed in the proper bin for pickup or if they contain product their hazardous waste labels should be removed. Please provide verification of this within 30 days.

Site History: Groundwater samples collected at the site in 1987 and tested for VOCs. Confirmed use of chemicals: hydrochloric acid and caustic soda, waste oil; a 500-gal AGST stored TPH-d for an emergency generator. Warehouse bldg. a former liquor store; Phase I Soil & GW Investigation for the Heublein Bldg project was conducted in1987 by Beta Associates for Lincoln Property Company. Two MWs were installed approximately 18.5 ft deep. Groundwater was encountered at 8.5 ft bgs; MW-2 (mostly sand below 8.5 ft) 630 ppb of TCE in GW; TCE in soil sample from MW-2 at 547 ppb, cis-1,2-DCE 60.4 ppb above action level of 5 and 16 ppb, respectively, TPH-d - < 50 ppb; ND for all constituents in soil samples. Additional 4 wells installed in 1987, no VOCs detected in soil samples.Groundwater monitoring data collected for over seven years indicated the presence of low levels of volatile organic compounds in shallow groundwater. Last groundwater sampling event in 1998. Concentrations of TCE had decreased significantly and only TCE was detectable in one well, MW-2, at a concentration of 5.3 ug/L. Board staff agreed that these

EXPONENT INC (Continued) **S101693035**

chemicals most likely originated from an upgradient and off-site source. Permit from SMCo. obtained to decommission all onsite MWs in 1998. No further action letter sent to Exponent 10/21/1998.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D006
Waste Description:	CADMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D011

NANOSYN INC (Continued) **1000356969**

Waste Description: SILVER

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D038
Waste Description: PYRIDINE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violations:

Site ID:	13160
Site Name:	Boston Scientific Structural Heart
Violation Date:	09-21-2020
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Waste coolant containers attached to CNC machines not closed. Please devise lids that will seal these containers from leaks if spilled. Send photo verification to inspector within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS

Site ID:	13160
Site Name:	Boston Scientific Structural Heart
Violation Date:	09-21-2020
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Waste coolant containers attached to CNC machines not labeled. Please label these containers with standard making information and send photo verification to inspector within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS

Site ID:	13160
Site Name:	Boston Scientific Structural Heart
Violation Date:	07-12-2018
Citation:	22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Description:	Failure to inspect weekly areas where hazardous waste containers are stored. The owner or operator must look for leaking containers and for deterioration of containers caused by corrosion or other factors.
Violation Notes:	Returned to compliance on 07/30/2018. Observed that weekly inspections did not catch the wastes stored past their accumulation threshold. Please retrain staff on how to perform these inspections. Consider rephrasing checklist question about accumulation storage time for better understanding. Verify with inspector within 30 days.
Violation Division:	San Mateo County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS

Site ID:	13160
Site Name:	Boston Scientific Structural Heart
Violation Date:	07-12-2018

SADRA MEDICAL (DBA BOSTON SCIENTIFIC) (Continued) **S118237462**

Violation Description: Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.
Violation Notes: Returned to compliance on 07/30/2018. PPE contaminated with acids and waste cleaning compounds in central HW storage area and perchloric acid generated in the R&D lab in EP accumulated beyond 90 day threshold. Please dispose as soon as possible and forward manifest copies to inspector.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RB Case Number:	41S0220
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Not reported
Site History:	Raychem Corporation's operations from 1978 to 1996 included chlorinated solvent (PCE) use and a solvent cleaning station. 1995 facility inspection reports document floor stains and a sump. TCE exceeds screening levels in groundwater. PCE, TCE, and VC exceed screening levels in soil vapor. As of 2020, the site is planned to be redeveloped into a six-story mixed use building with parking, commercial, and tenant amenities on the first and second floors and residential in the upper four floors.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D007
Waste Description: CHROMIUM

MENLOTECH INC (Continued) **1000111898**

Waste Code: D008
Waste Description: LEAD

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

CERS HAZ WASTE:
Name: STANFORD CHILDREN'S HOSPITAL PHARMACY
Address: 4600 BOHANNON DR
City,State,Zip: MENLO PARK, CA 94025
Site ID: 565647
CERS ID: 10726078
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 565647
Site Name: Stanford Children's Hospital Pharmacy
Violation Date: 11-22-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Labels missing much information including contact info, contents composition, physical state, and hazardous properties. Labels include contents that are not always in the container (infectious waste). Please develop new labels compliant with requirements. Verify with inspector within 10 days.

HOME PHARMACY LUCILE PACKARD CHILDREN'S HOSPITAL (Continued) **S123635888**

Violation Division: San Mateo County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 565647
Site Name: Stanford Children's Hospital Pharmacy
Violation Date: 11-22-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Observed open hazardous waste containers in the pharmaceutical and chemo compounding rooms and elsewhere. Hazardous waste containers must be closed unless adding hazardous waste. Close all containers and verify with inspector. Consider purchasing different containers if closing these containers means they cannot be re-opened.
Violation Division: San Mateo County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 565647
Site Name: Stanford Children's Hospital Pharmacy
Violation Date: 11-22-2019
Citation: 22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description: Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes: Manifests use profiles from Stanford hospital and do not match actual content of container of hazardous waste generated at this facility. Please work with Clean Harbors to develop accurate profiles for this specific site - Home Pharmacy - and respond to inspector within 2 weeks. Manifests should be revised in accord with DOT regulations if the profile and contact of the container do not match.

Violation Date: 11-22-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Observed open hazardous waste containers in the pharmaceutical and chemo compounding rooms and elsewhere. Hazardous waste containers must be closed unless adding hazardous waste. Close all containers and verify with inspector. Consider purchasing different containers if closing these containers means they cannot be re-opened.
Violation Division: San Mateo County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 565647
Site Name: Stanford Children's Hospital Pharmacy
Violation Date: 11-22-2019
Citation: 22 CCR 12 66262.23(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.23(a)
Violation Description: Failure to properly complete the Uniform Hazardous Waste Manifest.
Violation Notes: Manifests use profiles from Stanford hospital and do not match actual content of container of hazardous waste generated at this facility. Please work with Clean Harbors to develop accurate profiles for this specific site - Home Pharmacy - and respond to inspector within 2 weeks. Manifests should be revised in accord with DOT regulations if the profile and contact of the container do not match.
Violation Division: San Mateo County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 05-11-2020
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: doesn't belong in BP

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

PRODIGY PRESS (Continued) **1004677028**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 08-16-2018
Citation: 22 CCR 15 66265.171 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.171
Violation Description: Failure to accumulate hazardous waste in a container that is in good condition.
Violation Notes: Returned to compliance on 09/07/2018.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 519618
Site Name: BRIGHTVIEW
Violation Date: 08-16-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 09/16/2018.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Address:	4065 CAMPBELL AVE
City,State,Zip:	MENLO PARK, CA 94025
Site ID:	47970
CERS ID:	838479
CERS Description:	Industrial Facility Storm Water

Violations:

Site ID:	47970
Site Name:	MEMRY CORP
Violation Date:	02-10-2016
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 02/10/2016. Various drums were either mislabeled or the information was inaccurate. You may not use Empty monthly as a start date. Correct waste labels immediately. Completed while inspector was onsite
Violation Division:	San Mateo County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	47970
Site Name:	MEMRY CORP
Violation Date:	02-10-2016
Citation:	HSC 6.5 25200.3(e) - California Health and Safety Code, Chapter 6.5, Section(s) 25200.3(e)
Violation Description:	Failure of the generator to submit, at least 60 days before commencing treatment of hazardous waste to submit a notification, in person or by certified mail, with return receipt requested.
Violation Notes:	Returned to compliance on 03/07/2016. It is past January 1, 2016 and you have not submitted your annual Onsite HW Treatment Notification form for this year. You must submit this form annually by January 1 each year. Submit an updated form to the County within 30 days. This documentation package should include update flow diagrams and system layout.

Citation:	22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8
Violation Description:	Failure of the generator to prepare a hazardous waste management performance report every four years. The report shall contain sufficient detail to convey an understanding of the hazardous waste management approaches used at the site, using narratives, photographs, illustrations, figures or data as necessary, which includes, at a minimum, all of the following: 1) Name and location of the site 2) Four digit SIC code(s) for the site 3) All of the following information for each waste stream identified: A) An estimate, in pounds, of the quantity of hazardous waste generated and the quantity of hazardous waste managed, both onsite and offsite, during the current reporting year and the baseline year; B) A description of current hazardous waste management approaches and identification of all approaches implemented since the baseline year; C) An assessment of the effect, since the baseline year, of each implemented hazardous waste management approach on the weight of hazardous waste generated, the properties which cause it to be classified as a hazardous waste and/or the onsite and offsite management of hazardous waste. The report shall consider, but shall not be limited to all of the following approaches: 1. Source reduction; 2. Onsite or offsite recycling; 3. Onsite or offsite treatment; and D) A description of factors during the current reporting year that have affected hazardous waste generation and onsite and offsite hazardous waste management since the baseline year, including, but not limited to, any of the following: 1. Changes in business activity; 2. Changes in waste classification; 3. Natural phenomena and; 4. Other factors that have affected either the quantity of hazardous waste generated or onsite and offsite hazardous waste management requirements.
Violation Notes:	Returned to compliance on 03/07/2016. There is no evidence on site that the facility has completed a report. Provide to the County within 30 days verification of this report and that you met this requirement.

Violation Division: San Mateo County Environmental Health
Violation Program: CA
Violation Source: CERS

Site ID: 47970
Site Name: MEMRY CORP
Violation Date: 02-14-2020
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 04/09/2020. Some chemicals, for example liquid nitrogen in the outside cage, were not observed where described in the HMBP inventory. Change the description of the Al2O3 from waste to mixture. Please ensure chemical locations are accurate. Review and revise HMBP as needed within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 47970
Site Name: MEMRY CORP
Violation Date: 02-07-2019
Citation: 22 CCR 15 66265.174 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.174
Violation Description: Failure to inspect weekly, areas where hazardous waste containers are stored or transferred. The owner or operator shall look for leaking containers and for deterioration of containers and the containment system caused by corrosion or other factors.
Violation Notes: Returned to compliance on 02/07/2019. Weekly inspection reports cover "chemical storage" but more than one area needs to be inspected. Please revise these inspection reports to be specific to blasting room and all step-cans verify with inspector within 30 days.
Violation Division: San Mateo County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 47970
Site Name: MEMRY CORP
Violation Date: 02-07-2019
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days

MEMRY CORPORATION (Continued) **S111454577**

	after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes:	Returned to compliance on 05/09/2019. Hazardous waste container in quality control labeled "empty daily" observed to be full at 11am. Admitted unlikely to have complied with this storage time limit. Either comply with the label or relabel with accumulation start date and verify with inspector within 30 days.

Citation:	22 CCR 31 67100.8 - California Code of Regulations, Title 22, Chapter 31, Section(s) 67100.8
Violation Description:	Failure of the generator to prepare a hazardous waste management performance report every four years. The report shall contain sufficient detail to convey an understanding of the hazardous waste management approaches used at the site, using narratives, photographs, illustrations, figures or data as necessary, which includes, at a minimum, all of the following: 1) Name and location of the site 2) Four digit SIC code(s) for the site 3) All of the following information for each waste stream identified: A) An estimate, in pounds, of the quantity of hazardous waste generated and the quantity of hazardous waste managed, both onsite and offsite, during the current reporting year and the baseline year; B) A description of current hazardous waste management approaches and identification of all approaches implemented since the baseline year; C) An assessment of the effect, since the baseline year, of each implemented hazardous waste management approach on the weight of hazardous waste generated, the properties which cause it to be classified as a hazardous waste and/or the onsite and offsite management of hazardous waste. The report shall consider, but shall not be limited to all of the following approaches: 1. Source reduction; 2. Onsite or offsite recycling; 3. Onsite or offsite treatment; and D) A description of factors during the current reporting year that have affected hazardous waste generation and onsite and offsite hazardous waste management since the baseline year, including, but not limited to, any of the following: 1. Changes in business activity; 2. Changes in waste classification; 3. Natural phenomena and; 4. Other factors that have affected either the quantity of hazardous waste generated or onsite and offsite hazardous waste management requirements.
Violation Notes:	Returned to compliance on 03/07/2016. There is no evidence on site that the facility has completed a report. Provide to the County within 30 days verification of this report and that you met this requirement.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
