ORDER TO COMPLY:

As such conditions are contrary to law, you are hereby required to correct said conditions immediately upon receipt of this notice.

An inspection to determine whether or not you have complied with this notice will be conducted on or after _____ days.

Failure to comply with the foregoing order by the date of reinspection may cause a **CITATION** to be issued for the penalties provided by law for such violations.

MONITORING SYSTEM EQUIPMENT CERTIFICATION

For use by All Jurisdictions
Authority Cited: Title 23, Division 3, Chapter 16 California Code of Regulations: Hazardous Materials Storage Ordinance

State and local laws/regulations require that equipment which monitors tanks and/or piping systems containing hazardous materials be tested/serviced annually on a schedule specified by the manufacturer, whichever is more frequent. This form, or a service report with equivalent information, must be used to document testing and servicing of monitoring equipment. If more than one monitoring system (e.g. Veeder-Root TLS-350, Ronan X76S, etc.) is installed at the facility, a separate certification or report must be prepared for each monitoring system by the technician who performs the work.

Date of Testing/Servicing: 4/13/99 Facility Name: Granite Const.

Site Address: 120 Graniterock Ave City: S.J. Zip: 95136

Facility Contact Person: Frank Contact Phone No: (408) 281-6351

Make/Model of Monitoring System: Leak-Alert LA-04 Location of Control Panel: outside

Make/Model of Line Leak Detector (LLD): N/A LLD Leak Threshold: N/A g.p.m.

Complete the following checklist:

☑ Yes	☐ No*	Monitoring system is operable per manufacturer's specifications?
☑ Yes	☐ No*	Audible alarm is operational?
☑ Yes	☐ No*	Visual alarm is operational?
☐ Yes	☑ No*	Monitoring system is secured from unauthorized tampering? outside
☐ Yes	☑ No* ☑ N/A	For pressurized piping systems, do the turbines automatically shut down if the monitoring systems detects a leak, fails to operate, or is electrically disconnected? If yes, which monitoring devices initiate positive shut-down?
☐ Yes	☑ No* ☑ N/A	For monitoring systems which serve as tank overfill warning devices, does the overfill warning function operate properly? If so, at what percent of tank capacity does the alarm trigger? 90

*In the comments section below, describe how and when these deficiencies will be corrected.

Underground Separation, Containment, and Monitoring Plan

(Appendix to Hazardous Materials Business Plan)

Authority Cited: 23 CCR, Sections 2632(d)(1), 2634(d)(2), and 2641(h)

Complete a separate page for each underground storage tank, sump, vault, below-grade treatment system, etc. shown on the Hazardous Materials Business Plan Storage Map(s). For items marked with an asterisk (*), specify the name of the manufacturer of the equipment and the equipment model number on the "Comments" lines provided at the bottom of this page. Make additional copies of this page if needed. Attach a blank copy of the UST monitoring log/form used by the facility. If your facility already has a written separation, containment, and monitoring plan, you do not need to complete the blank plan below, but must submit your current plan with your HMBP.

Location Code: _____

Primary Containment Construction: *(Check all which apply)*

Tank	Piping
☑ Steel WITH FIBERGLASS COATING ☐ Fiberglass ☐ Other *(specify)*:	☑ Steel ☐ Fiberglass ☐ Other *(specify)*:

Secondary Containment Details: *(Check all which apply)*

Tank	Piping
☑ Double wall tank ☐ Tank in vault ☑ Overfill prevention device(s) installed ☑ Overspill prevention device(s) installed ☐ Other *(specify)*:	☑ Double wall piping ☐ Piping in trench or vault ☐ Other *(specify)*:

Monitoring: *(Check all which apply)*

Type	Frequency
☑ In-tank monitoring system*	☑ Continuously; ☐ Daily; ☐ Weekly; ☐ Other *(specify)*:
☐ Groundwater monitoring wells *(Well locations must be shown on HMBP Site Plan)*	☐ Continuously; ☐ Daily; ☐ Weekly; ☐ Other *(specify)*:
☑ Vapor (vadose) monitoring* Wells located: ☐ Inside backfill ☐ Outside backfill	☑ Continuously; ☐ Daily; ☐ Weekly; ☐ Other *(specify)*:
☐ Monthly precision tank test	☐ Continuously; ☐ Daily; ☐ Weekly; ☐ Other *(specify)*:
☑ Electronic monitoring of tank/piping interstitial space, vault, or other secondary containment*	☑ Continuously; ☐ Daily; ☐ Weekly; ☐ Other *(specify)*:
☐ Visual monitoring of tank interstitial space, vault, or other secondary containment	☐ Continuously; ☐ Daily; ☐ Weekly; ☐ Other *(specify)*:
☐ Automatic line leak detectors*	☐ Continuously; ☐ Daily; ☐ Weekly; ☐ Other *(specify)*:
☐ Other *(specify)*:	☐ Continuously; ☐ Daily; ☐ Weekly; ☐ Other *(specify)*:

Monitoring equipment is serviced: ☑ Annually; ☐ Monthly; ☐ Other *(specify)*: _____.

In the Comments section, below:

1. List the name(s) and title(s) of person(s) responsible for performing monitoring and/or maintaining equipment.
2. For methods of monitoring where the presence of leaked material is not determined directly (e.g. where liquid level measurements in the interstitial space are used as the basis for leak determination), specify the method(s) for determining the presence or absence of hazardous material in the interstitial space if the indirect methods indicate a possible leak.
3. Provide other pertinent information (i.e. Name of equipment manufacturer, equipment model number, manufacturer's specifications (if applicable), suitability of monitoring method, etc.).

Comments: *(Attach additional pages if needed.)*

AUTOMATIC TANK GAUGE INSPECTION CHECKLIST

For Inspectors and Tank Owners

System Manufacturer: Veeder 350 TLS.

System name and model number: _____

1. Is the automatic tank gauge listed in LG-113?	Yes ☑	No ☐
2. Is there an operation/maintenance manual available?	Yes ☑	No ☐
3. Are there any alarm lights flashing?	Yes ☐	No ☑
4. Does the system print hard copies of test reports?	Yes ☑	No ☐
5. Does the system's test report include:		
a. tank identification?	Yes ☐	No ☑
b. time and date of the test?	Yes ☐	No ☑
c. product depth?	Yes ☐	No ☑
d. product volume?	Yes ☐	No ☑
e. water depth?	Yes ☐	No ☑
f. product temperature?	Yes ☐	No ☑
g. duration of the test?	Yes ☐	No ☑
h. calculated leak rate? (Required for systems installed after 1/1/95)	Yes ☐	No ☑
l. leak threshold? (Required for systems installed after 1/1/95)	Yes ☐	No ☑
j. test results (i.e. "PASS" or "FAIL")?	Yes ☑	No ☐
6. Does the leak threshold meet the specifications in LG-113?	Yes ☐	No ☐
7. Are the calculated leak rates (absolute value) less than the leak threshold?	Yes ☑	No ☐
8. Was each tank tested above the minimum product levels?[1]	Yes ☑	No ☐
9. Was each tank tested at least once every month?	Yes ☑	No ☐
10. Did waiting times between product delivery and testing meet LG 113 specifications?	Yes ☑	No ☐
11. Did the test period meet the specifications in LG-113?	Yes ☐ N/A	No ☐
12. Does the tank size meet the specifications in LG-113?	Yes ☐	No ☐
13. Is there documentation to show that failed tests were recorded and/or reported to the local agency?	Yes ☐	No ☐
14. Were all high water alarms documented and investigated?	Yes ☐	No ☐
15. Is ground water present around the tank?[2]	Yes ☐	No ☐
16. Are monthly test records maintained for at least 3 years?	Yes ☑	No ☐
17. Is documentation available showing that the system was installed, calibrated, and maintained in accordance with manufacturers instructions, including routine maintenance and service checks at least once per calendar year?	Yes ☑ Last Annual Check: _____	No ☐

Piping Inspection Checklist

Pressurized Piping

Name of line leak detector: (mechanical) _____

(electronic) _____

Name of line tightness test method: N/A

Name of line tightness tester: _____

License number of line tightness tester: _____

Address of line tightness tester: _____

- Has tank tester complied with all State license requirements? Y N
- Are the test equipment and methods listed in LG-113 series? Y N
- Do the equipment and line tightness test methods meet the testing criteria specifications given in the LG-113 series? Y N
- Was the mechanical line leak detector serviced in last 12 months? Y N
- Was the electronic line leak detector serviced in last 12 months? Y N N/A
- Was the continuous interstitial monitoring system serviced in last 12 months? Y N N/A

For piping for each tank, answer the questions in Set 1 or Set 2. (Questions answered by "No" may require follow-up actions.)	Tank 1	Tank 2	Tank 3	Tank 4
Set 1	yes			
1. Is there a mechanical line leak detector with automatic flow restrictor?	N/A			
2. Is there an electronic line leak detector?	yes			
3. Is there automatic pump shut-off capability?	yes			
4. Is there a continuous audible and visual alarm system?				
Set 2				
5. Date of last annual line tightness test, if applicable:				
6. For piping tests conducted on an annual basis, were the lines tested at 150% the normal operating pressure?	yes			
7. Did lines pass test? If not, specify in comments section below the status of the tank and piping and what actions have been taken (e.g., has the local agency been notified?).	yes			
8. Is there interstitial sump monitoring for double-walled piping?	yes			
9. For continuous sump monitoring, is the system designed to detect releases from any portion of product piping?	yes			
10. For continuous interstitial sump monitoring, is the monitoring box operational?	yes			
For vapor or ground water monitoring:				
11. For ground water or vapor monitoring, is documentation of monthly monitoring available for last 36 months?				

APPENDIX F

Facility ID Number _____ Date: _____

Interstitial Monitoring Inspection Form

For use by the agency inspector or a tank owner or operator.

Instructions: Use one form per type of interstitial monitor.
This form may apply to multiply tanks if the method of interstitial monitoring is the same for each tank.
Fill in each section below as applicable.

If Secondary Containment Is Provided By:	Interstitial Space is Monitored:	Interstitial Space Is:
✓ Double-walled tank	✓ Continuously	___ Liquid ✓ Dry
___ Single-walled tank with an internal bladder	___ Continuously	___ Under a vacuum
___ Single-walled tank in a lined excavation	___ Continuously ___ With daily dipsticking	___ Backfilled
___ Single-walled tank in a vault	___ Continuously ___ Visually daily	___ Backfilled ___ Dry
___ Other (specify)	___	___

Method of detection: ___ Liquid level indicator ___ Liquid sensor ___ Vapor sensor ___ Pressure or vacuum loss detector

For Continuous Interstitial Monitors:

Manufacturer: _____

Model name and number: _____

Questions Apply To Continuous, Daily, and Visual Monitoring

1. Are the sensors functioning properly and is the monitoring box operational?	(Yes)	No	N/A
2. Is there a continuous audible and visual alarm?	(Yes)	No	N/A
3. If so, is the continuous audible and visual alarm operational?	(Yes)	No	N/A
4. Can the system print out a leak alarm history?	Yes	(No)	N/A
5. Is there documentation showing leak alarms were recorded and/or reported to the local agency?	Yes	(No)	N/A
6. Do records show routine maintenance and service checks are performed every 12 months?	Yes	No	(N/A)
7. If the interstitial monitor is installed after May 5, 1994, is it third-party certified?	Yes	No	(N/A)
8. If monitoring wells are part of the leak detection system, are they clearly marked and secured to avoid unauthorized access and tampering?	Yes	No	(N/A)
9. If daily readings are taken, is the necessary equipment on-site and functional?	Yes	No	(N/A)
10. For visual monitoring, is there daily documentation for the last 36 months?	Yes	No	(N/A)

re: Underground Storage Tanks at 120 Granite Rock Wy., San Jose, CA.

Enclosed is the operating permit for the above referenced site. Pursuant to Section 25284 of Chapter 6.7 of the California Health & Safety Code the local agency shall issue an operating permit to the owner and operator of underground tank systems.

This permit shall apply to and requires compliance to all applicable state and local underground storage tank regulations. A copy of this permit and all conditions and attachments, including monitoring plans shall be retained at the facility. As a condition of the permit to operate an underground storage tank, the permitee shall notify the local agency of any changes in the usage of the underground storage tank, including the storage of new hazardous substances, changes in monitoring procedures, and if there has been any unauthorized release from the underground storage tank.

There is one permit issued for each tank at the site. Please verify that the information is correct. There are no additional fees for this permit as it is included in the Hazardous Materials Storage Permit already issued to this site. If you have any questions you may contact me at (408) 277-4659 or my fax number is (408) 288-8602.

CERTIFICATION OF FINANCIAL RESPONSIBILITY

FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in Section 2807, Chapter 18, Div. 3. Title 23, CCR:

[X] 500,000 dollars per occurrence
or
[ ] 1 million dollars per occurrence

AND

[ ] 1 million dollars annual aggregate
or
[ ] 2 million dollars annual aggregate

B. Granite Rock Company *hereby certifies that it is in compliance with the requirements of Section 2807,*
(Name of Tank Owner or Operator)
Article 3, Chapter 18, Division 3, Title 23, California Code of Regulations.
The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C. Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Comp.
Letter from Chief Financial Officer	Granite Rock Company 411 Walker Street P. O. Box 50001 Watsonville, CA 95077-5001		$10,000	6/4/98 Continuous		
State Fund			$990,000		Yes	Yes

Note: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance with all conditions for participation in the Fund.

D. Facility Name	Facility Address
Granite Rock Company Gilroy Branch	6475 Chestnut Street Gilroy, CA 95020
Granite Rock Company Monterey Branch	1775 Del Monte Blvd. Seaside, CA 93955
Granite Rock Company Salinas Branch (Cont.)	400 Work Street Salinas, CA 93901

Emergency Response Plan & Training

All Personnel
All employees are trained in the following procedures:
___ Internal/alarm notification.
X External emergency response organization notification.
X Locations and contents of emergency response plan.
X Evacuation procedures.
X Spill procedures/ emergency procedures.
X Emergency incident reporting.

Chemical Handlers
Chemical handlers are additionally trained in the following:
X Safe Method for handling and storage of hazardous materials.
X Proper use of personal protective equipment.
X Locations and proper use of fire and spill control equipment.
X Specific hazards of each chemical to which they may be exposed, including the pathways of exposure (i.e. skin absorption, inhalation, ingestion).

Emergency Response Team
Emergency response team members are additionally trained in the following procedures and will act as liaison to the Fire Department:
X Personnel rescue procedures.
X Shutdown of operations.
X Use, maintenance, and replacement of emergency response equipment.
X Emergency response drills, which are held Weekly (frequency).
X Refresher training is provided at least annually.

Emergency Response Documents
The following training records are maintained for each employee:
X Verification of date that training was completed.
X Description of introductory and continuing training.
X Former employee's training records are retained at least three years.
X Current employees's training records are retained until the facility's closure.
X Description and documents of facility emergency response drills.

Your Emergency Response Training Plan and training records must be on site and available for review by the Fire Department and the County of Santa Clara Health Department.

SECTION VI - SEPARATION, CONTAINMENT AND MONITORING (continued)

Part B - Underground Storage

For underground tanks, sumps, vaults, below grade treatment systems, etc., Complete a separate page for each tank.

Check the type of tank and monitoring method(s) that applies to your tank(s) and piping and answer the appropriate questions. Provide any additional information in the space provided or on a separate sheet.

[ ] Single Wall Tanks & Piping - Tank Facility Map ID _____

[ ] 1. Vapor Wells [ ] Inside Backfill [ ] Outside Backfill
Manufacturer of Monitoring Equipment: _____
Continuous or weekly testing:

[ ] 2. Groundwater Monitoring Wells (Location must be shown on Facility Map).

[ ] 3. Monthly Precision Tank Test

[ ] 4. Piping (List Method and Frequency of Monitoring) _____

[ ] Single Wall [ ] Double Wall

[X] 5. In-Tank Monitoring System - List Model and Manufacturer: EL250

[ ] 6. Other - Describe in detail _____

[ ] 7. Maintenance Schedule - All monitoring equipment will be serviced (frequency) _____

[XX] Double Contained Tanks - Tank Facility ID Area F
(Include vaulted tanks and tanks within a liner.)

1. Type of Secondary Containment: [XX] Double wall tank [ ] Vaulted tank
[XX] Tank in a liner [ ] Other (Describe)

2. List method of monitoring annular space between primary and secondary containment: _____

3. Frequency: [XX] Continuous [ ] Daily [ ] Weekly [ ] Other (List): _____

4. List type of secondary containment for piping: Double Wall Piping

5. List method and frequency of monitoring piping secondary containment: Electrical Sensors

6. Are there any incompatible materials within the same vault? If so, explain how separate secondary containment is provided.
None

7. Maintenance Schedule - All monitoring equipment will be serviced Annually (frequency)

SECTION VII. - RECORDKEEPING

You are required to keep inspection logs or checksheets designed to be used in conjunction with routine inspections for all storage facilities or areas as well as for continuous monitoring systems for underground tanks. Sample forms are attached for your use. Check the appropriate box below.

[XX] We will use the attached sample forms in our routine inspection program.

[ ] We will not use the sample forms. (If you choose not to use the sample forms, provide for review and approval copies of the forms you will be using.)

The following personnel will be responsible for monitoring and/or maintaining equipment.

Name Frank Francini Title Equipment Superintendent

Name Hyrum Unga Title Shop Manager/ Small Tools

Note: If you have continuous monitoring-equipment, you must maintain copies of results for all service and maintenance work. Such reports shall be available for review at the site and shall be submitted to the Fire Prevention Bureau upon request.

CERTIFICATION OF FINANCIAL RESPONSIBILITY
FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in Section 2807, Chapter 18, Div. 3, Title 23, CCR:

☐ $500,000 dollars/occurrence
☐ $ 1 Million/occurrence
AND
☐ $1 Million annual aggregate
☐ $2 Million annual aggregate 10 Each Occ.

B. Frank Francini (Name of Tank Owner or Operator) hereby certifies that it is in compliance with the requirements of Section 2807, Article 3, Chapter 18, Division 3, Title 23, CCR.

The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C. Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Comp.
Contractor's Pollution Legal Liability	McSherry & Hudson Box 2690 Watsonville, CA 95077-2690	GL-2 02519639	$10,000,000	10/1/96 10/1/97	Yes	Yes

NOTE: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance with all conditions for participation in the Fund.

D. Facility Name	Facility Address

Piping Inspection Checklist

Pressurized Piping

Name of line leak detector: (mechanical) Leak Alert LA-04-1-

(electronic)

Name of line tightness test method:

Name of line tightness tester: EDIE M.

License number of line tightness tester:

Address of line tightness tester: PETROTEK

- Has tank tester complied with all State license requirements? (Y) N
- Are the test equipment and methods listed in LG-113 series? Y (N)
- Do the equipment and line tightness test methods meet the testing criteria specifications given in the LG-113 series? Y — N
- Was the mechanical line leak detector serviced in last 12 months? (Y) N
- Was the electronic line leak detector serviced in last 12 months? Y N N/A
- Was the continuous interstitial monitoring system serviced in last 12 months? (Y) N N/A

For piping for each tank, answer the questions in Set 1 or Set 2. (Questions answered by "No" may require follow-up actions.)	Tank 1	Tank 2	Tank 3	Tank 4
Set 1				
1. Is there a mechanical line leak detector with automatic flow restrictor?	NO			
2. Is there an electronic line leak detector?	✓			
3. Is there automatic pump shut-off capability?	NO			
4. Is there a continuous audible and visual alarm system?	✓			
Set 2				
5. Date of last annual line tightness test, if applicable:				
6. For piping tests conducted on an annual basis, were the lines tested at 150% the normal operating pressure?				
7. Did lines pass test? If not, specify in comments section below the status of the tank and piping and what actions have been taken (e.g., has the local agency been notified?).				
8. Is there interstitial sump monitoring for double-walled piping?				
9. For continuous sump monitoring, is the system designed to detect releases from any portion of product piping?				
10. For continuous interstitial sump monitoring, is the monitoring box operational?				
For vapor or ground water monitoring:				
11. For ground water or vapor monitoring, is documentation of monthly monitoring available for last 36 months?

UNDERGROUND STORAGE TANK OPERATING PERMIT

Issued to: *(Check One)* (•) OWNER (•) OPERATOR

Issued Date: 9/4/2002 **Expiration Date:** 9/4/2007

SJFD Inspector
Hagerman

THIS PERMIT MUST BE KEPT AT THE UST LOCATION AT ALL TIMES AND RENEWED PRIOR TO THE EXPIRATION DATE. THE PERMITTEE MUST NOTIFY THE SAN JOSE FIRE DEPARTMENT WITHIN 30 DAYS OF ANY CHANGES TO THE PERMIT OR SYSTEMS, UNLESS REQUIRED TO OBTAIN APPROVAL BEFORE MAKING THE CHANGES.

Active Tanks: 2 Financial Responsibility: Self-Insured *(Recertification required annually)*

Operator: GRANITE ROCK COMPANY
Address: 00120 GRANITE ROCK WY
Zip: 951361304

Owner: (if different)
Address:

OPERATING CONDITIONS

This operating permit is granted subject to the following conditions:

- Comply with all applicable State UST requirements contained in the California Code of Regulations, Title 23, Division 3, Chapters16 &18, the California Health & Safety Code, Division 20, Chapters 6.7 and 6.75, and all applicable local requirements.
- Call 911 in the event of an emergency involving the underground tank. Report any unauthorized releases to the environment to the Hazardous Materials Division of the San Jose Fire Department within 24 hours after the release has been detected or should have been detected.
- Comply with the approved routine monitoring procedures and emergency response plan which are in the current approved Hazardous Materials Management/Business Plan.
- Provide annual maintenance and calibration of monitoring system(s). Maintenance records shall be kept on-site or available upon request. Maintain monitoring and maintenance records on-site or available for review upon request for 3 years.
- Perform secondary containment testing (SB 989) every three years. Initial SB 989 testing was performed 10/4/2002.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e. shouting)*; ☐ Other *(specify)* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program	Phone No.: **(408) 277-4659**
Santa Clara County Hazardous Materials Compliance Division	Phone No. **(408) 918-3400**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(408) 452-7288**
Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.*

c. Emergency Resources:

Poison Control Center		Phone No. **(800) 876-4766**
Nearest Hospital:	Name: **San Jose Medical Group/Oakland Acute Care**	Phone No.: **(408) 224-0262**
	Address: **841 Blossom Hill Road**	City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

_____

_____

_____

43-060-4016659

7. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☐	Facility evacuation drills, that are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☐	Use, maintenance, and replacement of emergency response equipment
☐	Refresher training, which is provided at least annually *
☐	Emergency response drills, which are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

43-060-401659

Record Keeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e. written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☒	Record of hazardous waste tank daily inspections *
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☒	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☐	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

RECEIVED
OCT 2 2 2004
FIRE PREVENTION BUREAU

TO: Mike Lepisto

SUBJECT: 120 Granite Rock Way, San Jose, CA

Dear Mike,

Please find enclosed the signed HMMP, the signed UST Monitoring Plan, the signed UST Response Plan, the signed Certificate of Financial Responsibility, and a copy of the most recent UST monitoring certification and spill box test results.

If you have any questions, do not hesitate to contact me at (831) 768-2009, or at Tlau@Graniterock.com. I will let you know when we will start work on the upgrades. Note that the spill boxes, which failed the most recent testing, will be repaired at that time. I look forward to working with you on this matter. Thank you.

Sincerely,

Tina Lau

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e. shouting)*; ☐ Other *(specify)* _____

b. ☐ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program	Phone No.: **(408) 277-4659**
Santa Clara County Hazardous Materials Compliance Division	Phone No. **(408) 918-3400**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(408) 452-7288**
Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.*

c. Emergency Resources:

Poison Control Center		Phone No. **(800) 876-4766**
Nearest Hospital:	Name: **San Jose Medical Group/Oakland Acute Care**	Phone No.: **(408) 224-0262**
	Address: **841 Blossom Hill Road**	City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

_____

_____

_____

43-060-40659

7. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats		
	☐ Chemical Protective Boots		
	☐ Chemical Protective Gloves		
	☐ Chemical Protective Suits *(describe)*		
	☐ Face Shields		
	☐ First Aid Kits/Stations *(describe)*		
	☒ Hard Hats		Each employee has hard hat
	☐ Plumbed Eye Wash Stations		
	☐ Portable Eye Wash Kits *(i.e. bottle type)*		
	☐ Respirator Cartridges *(describe)*		
	☒ Safety Glasses/Splash Goggles		Each employee has hard hat
	☐ Safety Showers		
	☐ Self-Contained Breathing Apparatuses (SCBA)		
	☐ Other *(describe)*		
Fire Extinguishing Systems	☐ Automatic Fire Sprinkler Systems		
	☐ Fire Alarm Boxes/Stations		
	☒ Fire Extinguisher Systems *(describe)*	Fueling Station and Shop	Fire extinguishers
	☐ Other *(describe)*		
Spill Control Equipment and Decontamination Equipment	☒ Absorbents *(describe)*		Each truck has own spill kits
	☐ Berms/Dikes *(describe)*		
	☐ Decontamination Equipment *(describe)*		
	☐ Emergency Tanks *(describe)*		
	☐ Exhaust Hoods		
	☐ Gas Cylinder Leak Repair Kits *(describe)*		
	☐ Neutralizers *(describe)*		
	☐ Overpack Drums		
	☐ Sumps *(describe)*		
	☐ Other *(describe)*		
Communications and Alarm Systems	☐ Chemical Alarms *(describe)*		
	☐ Intercoms/ PA Systems		
	☐ Portable Radios		
	☐ Telephones		
	☒ Underground Tank Leak Detection Monitors		
	☐ Other *(describe)*		
Additional Equipment *(Use Additional Pages if Needed.)*	☐		
	☐		
	☐		
	☐		
	☐		
	☐		

* *Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

43-060-44659

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☐	Facility evacuation drills, that are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☐	Use, maintenance, and replacement of emergency response equipment
☐	Refresher training, which is provided at least annually *
☐	Emergency response drills, which are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

43-060-401659

Record Keeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e. written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☒	Record of hazardous waste tank daily inspections *
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☒	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☐	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

UNDERGROUND STORAGE TANK MONITORING PLAN

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 23 CCR, Sections 2632(d)(1), 2634(d)(2), and 2641(h)

TYPE OF ACTION ☒ 1. NEW PLAN ☐ 2. CHANGE OF INFORMATION — M01.

PLAN TYPE ☒ MONITORING IS IDENTICAL FOR ALL USTs AT THIS FACILITY. — M02.
(Check one item only) ☐ THIS PLAN COVERS ONLY THE FOLLOWING UST SYSTEM(S): _____

I. FACILITY INFORMATION

FACILITY ID # *(Agency Use Only)* 43-060-401659

FACILITY NAME Graniterock Company — M03.

FACILITY SITE ADDRESS 120 Granite Rock Way — M04. | CITY San Jose — M05.

II. EQUIPMENT TESTING AND PREVENTIVE MAINTENANCE

State law requires that testing, preventive maintenance, and calibration of monitoring equipment (e.g., sensors, probes, line leak detectors, etc.) be performed in accordance with the equipment manufacturers' instructions, or annually, whichever is more frequent. Such work must be performed by qualified personnel. — M06.

MONITORING EQUIPMENT IS SERVICED ☒ 1. ANNUALLY ☐ 99. OTHER (Specify): _____ — M07.

III. MONITORING LOCATIONS

This monitoring plan must include a Site Plan showing the general tank and piping layouts and the locations where monitoring is performed (i.e., location of each sensor, line leak detector, monitoring system control panel, etc.). If you already have a diagram (e.g., current UST Monitoring Site Plan from a Monitoring System Certification form, Hazardous Materials Business Plan map, etc.) which shows all required information, include it with this plan.

IV. TANK MONITORING

MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S): (Check all that apply) — M10.

☒ 1. CONTINUOUS ELECTRONIC MONITORING OF TANK ANNULAR (INTERSTITIAL) SPACE(S) OR SECONDARY CONTAINMENT VAULT(S)
- SECONDARY CONTAINMENT IS: ☒ a. DRY ☐ b. LIQUID FILLED ☐ c. UNDER PRESSURE ☐ d. UNDER VACUUM — M11.
- PANEL MANUFACTURER: Pneumercator — M12. MODEL #: LC 1000 — M13.
- LEAK SENSOR MANUFACTURER: Pneumercator — M14. MODEL #(S): LS 600 — M15.

☐ 2. AUTOMATIC TANK GAUGING (ATG) SYSTEM USED TO MONITOR SINGLE WALL TANK(S)
- PANEL MANUFACTURER: _____ — M16. MODEL #: _____ — M17.
- IN-TANK PROBE MANUFACTURER: _____ — M18. MODEL #(S): _____ — M19.
- LEAK TEST FREQUENCY: ☐ a. CONTINUOUS ☐ b. DAILY/NIGHTLY ☐ c. WEEKLY — M20.
  ☐ d. MONTHLY ☐ e. OTHER (Specify): _____ — M21.
- PROGRAMMED TESTS: ☐ a. 0.1 g.p.h. ☐ b. 0.2 g.p.h. ☐ c. OTHER (Specify): _____ — M22. M23.

☐ 3. INVENTORY RECONCILIATION ☐ a. MANUAL PER 23 CCR §2646 ☐ b. STATISTICAL PER 23 CCR §2646.1 — M24.

☐ 4. WEEKLY MANUAL TANK GAUGING (MTG) PER 23 CCR §2645
- TESTING PERIOD: ☐ a. 36 HOURS ☐ b. 60 HOURS — M25.

☐ 5. INTEGRITY TESTING PER 23 CCR §2643.1
- TEST FREQUENCY: ☐ a. ANNUALLY ☐ b. BIENNIALLY ☐ c. OTHER (Specify): _____ — M26. M27.

☐ 6. VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY (Requires agency approval)

☐ 99. OTHER (Specify): _____ — M28.

V. PIPE MONITORING

MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply) — M30.

☒ 1. CONTINUOUS ELECTRONIC MONITORING OF PIPING SUMP(S)/TRENCH(ES) AND OTHER SECONDARY CONTAINMENT
- SECONDARY CONTAINMENT IS: ☒ a. DRY ☐ b. LIQUID FILLED ☐ c. UNDER PRESSURE ☐ d. UNDER VACUUM — M31.
- PANEL MANUFACTURER: Pneumercator — M32. MODEL #: LC 1000 — M33.
- LEAK SENSOR MANUFACTURER: Pneumercator — M34. MODEL #(S): LS 600 — M35.
- WILL A PIPING LEAK ALARM TRIGGER AUTOMATIC PUMP (i.e., TURBINE) SHUTDOWN? ☒ a. YES ☐ b. NO — M36.
- WILL FAILURE/DISCONNECTION OF THE MONITORING SYSTEM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☒ a. YES ☐ b. NO — M37.

☐ 2. MECHANICAL LINE LEAK DETECTOR (MLLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS AND RESTRICTS OR SHUTS OFF PRODUCT FLOW WHEN A LEAK IS DETECTED
- MLLD MANUFACTURER(s): _____ — M38. MODEL #(S): _____ — M39.

☐ 3. ELECTRONIC LINE LEAK DETECTOR (ELLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS
- ELLD MANUFACTURER: _____ — M40. MODEL #: _____ — M41.
- PROGRAMMED LINE INTEGRITY TESTS: ☐ a. MINIMUM MONTHLY 0.2 g.p.h. ☐ b. MINIMUM ANNUAL 0.1 g.p.h. — M42.
- WILL ELLD DETECTION OF A PIPING LEAK TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO — M43.
- WILL ELLD FAILURE/DISCONNECTION TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO — M44.

☐ 4. INTEGRITY TESTING
- TEST FREQUENCY: ☐ a. ANNUALLY ☐ b. EVERY 3 YEARS ☐ c. OTHER (Specify) _____ — M45. M46.

☐ 5. VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY* ☐ c. MIN. MONTHLY & EACH TIME SYSTEM OPERATED** — M47.

* Requires agency approval ** Allowed for monitoring of unburied emergency generator fuel piping only per HSC §25281.5(b)(3)

☐ 6. PIPING IS SUCTION PIPING MEETING ALL REQUIREMENTS FOR EXEMPTION FROM MONITORING PER 23 CCR §2636(a)(3)

☐ 7. NO PRODUCT OR REMOTE FILL PIPING IS CONNECTED TO THE UST(s)

☐ 99. OTHER (Specify) _____ — M48.

43-060-401659

VI. DISPENSER MONITORING

MONITORING OF AREAS BENEATH DISPENSER(S) IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply) M50.

☐ 1. CONTINUOUS ELECTRONIC MONITORING OF UNDER DISPENSER CONTAINMENT (UDC)

PANEL MANUFACTURER: _____ M51. MODEL #: _____ M52.

LEAK SENSOR MANUFACTURER: _____ M53. MODEL #(S): _____ M54.

WILL DETECTION OF A LEAK INTO THE UDC TRIGGER AUDIBLE AND VISUAL ALARMS? ☐ a. YES ☐ b. NO M55.

WILL A UDC LEAK ALARM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M56.

WILL FAILURE/DISCONNECTION OF UDC MONITORING SYSTEM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M57.

☒ 2. MECHANICAL ASSEMBLY (e.g., FLOAT AND CHAIN ASSEMBLY) IN UDC TRIPS SHEAR VALVE IN CASE OF LEAK

ASSEMBLY MANUFACTURER: Bravo M58. MODEL #(S): FT8000 M59.

☐ 3.VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY (Requires agency approval) M60.

☐ 4. NO DISPENSERS

☐ 99. OTHER (Specify) _____ M61.

VII. ENHANCED LEAK DETECTION

☐ 1. WE HAVE BEEN NOTIFIED BY THE STATE WATER RESOURCES CONTROL BOARD THAT WE MUST IMPLEMENT ENHANCED LEAK DETECTION (ELD) FOR THE UST(S) COVERED BY THIS PLAN. PER 23 CCR §2644.1, ELD IS PERFORMED EVERY 36 MONTHS AS REQUIRED M70.

VIII. TRAINING

REFERENCE DOCUMENTS MAINTAINED AT FACILITY (Check all that apply) M80.

1. ☒ THIS UNDERGROUND STORAGE TANK MONITORING PLAN **(Required)**
2. ☒ OPERATING MANUALS FOR ELECTRONIC MONITORING EQUIPMENT **(Required)**
3. ☒ THE FACILITY'S BEST MANAGEMENT PRACTICES **(Required as of January 1, 2005)**
4. ☐ CALIFORNIA UNDERGROUND STORAGE TANK REGULATIONS
5. ☐ CALIFORNIA UNDERGROUND STORAGE TANK LAW
6. ☐ STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION: "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION"
7. ☐ SWRCB PUBLICATION: "WEEKLY MANUAL TANK GAUGING FOR SMALL UNDERGROUND STORAGE TANKS"

99. ☐ OTHER (Specify): _____ M81.

Personnel with UST monitoring responsibilities are familiar with all of the above documents relevant to their job duties and can access those documents when needed. By January 1, 2005, this facility will have a "Designated UST Operator" who has passed the California UST Sytem Operator Exam administered by the International Code Council (ICC). By July 1, 2005, and annually thereafter, the "Designated UST Operator" will train facility employees in the proper operation and maintenance of the UST systems. This training will include, but is not limited to, the following:

- Operation of the UST systems in a manner consistent with the facility's best management practices.
- The facility employee's role with regard to the leak detection equipment.
- The facility employee's role with regard to spills and overfills.
- Whom to contact for emergencies and leak detection alarms.

For facility employees hired on or after July 1, 2005, the initial training will be conducted within 30 days of the date of hire.

IX. COMMENTS/ADDITIONAL INFORMATION

Please use this section to include any additional UST system monitoring-related information (e.g., additional information required by your local agency): M85.

Note regarding Section X. Pending certification of a Designated UST Operator, the following person has authority for performing the monitoring activities and maintaining leak detection equipment covered by this plan. NAME: JOB TITLE:

X. PERSONNEL RESPONSIBILITIES

AS OF JANUARY 1, 2005, THE "DESIGNATED UST OPERATOR" IDENTIFIED IN SECTION III OF THE CURRENT UST OPERATING PERMIT APPLICATION – FACILITY FORM WILL HAVE ULTIMATE AUTHORITY FOR PERFORMING THE MONITORING ACTIVITIES AND MAINTAINING LEAK DETECTION EQUIPMENT COVERED BY THIS PLAN, AND WILL PERFORM AND DOCUMENT MINIMUM MONTHLY VISUAL INSPECTIONS OF THE FACILITY'S UST SYSTEMS IN ACCORDANCE WITH 23 CCR § 2715(b).

XI. OWNER/OPERATOR SIGNATURE

CERTIFICATION: I certify that the information provided herein is true and accurate to the best of my knowledge.

OWNER/OPERATOR SIGNATURE	REPRESENTING: ☐ Owner ☒ Operator M90.	DATE: 10/20/04 M91.
OWNER/OPERATOR NAME (print): Tina Lau M92.		OWNER/OPERATOR TITLE: Environmental Services Specialist M93.

(Agency Use Only) This plan has been reviewed and: ☐ Approved ☐ Approved With Conditions ☐ Disapproved

Local Agency Signature: _____ Date: _____

Comments/Special Conditions: _____

HAZARDOUS MATERIALS MONITORING SYSTEM INSPECTION FORM

120 Granite Rock Way, San Jose

The Hazardous Materials Storage Ordinance (HMSO) requires that hazardous materials electronic monitoring systems be tested and inspected monthly, at a minimum, to ensure that they are in working order. In the case of tanks holding hazardous wastes, State law requires that such tests and inspections be performed daily. The HMSO requires that these inspections and tests be documented. This form is used to document inspection and testing of the following monitoring system:

Manufacturer Name and Model No. of System: _Pneumercator LC1000_____

Location of System Control Panel: ___Fueling Island, with the dispensers _____

Inspection Date (MM/DD/YY)	Inspector's Initials	System Has Power	All Functions Normal	Audible & Visual Alarms Test OK	Comments/Corrective Actions

Explain any problems found and corrective actions taken in the "Comments" section.
This log is part of the facility operating record and must be kept for a minimum of three (3) years.

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

Facility Name: **Graniterock Company, 120 Graniterock Way, San Jose, CA 95136**

Facility Contact Person: **Tina Lau** Contact Phone No.: **831-768-2009**

Inspector Mike Lepisto of the San Jose Fire Department ☐ was present ☒ was not present

Sensor were tagged and reinstall correctly? ☒ yes ☐ no

Make/Model of Monitoring System: Pneumercator LC-1000 **Date of Testing/Servicing:** 8/6/2004

B. Inventory of Equipment Tested/Certified

Check the appropriate boxes to indicate specific equipment inspected/serviced:

T-1 10000 gallon gasoline tank

- ☐ In-Tank Gauging Probe. Model: _____
- ☒ Annular Space or Vault Sensor. Model: LS-600
- ☒ Piping Sump / Trench Sensor. Model: LS-600
- ☐ Fill Sump Sensor(s). . Model: _____
- ☐ Mechanical Line Leak Detector. Model: _____
- ☐ Electronic Line Leak Detector. Model: _____
- ☐ Tank Overfill / High-Level Sensor. Model: _____

T-2 5000 gallon diesel fuel tank

- ☐ In-Tank Gauging Probe. Model: _____
- ☒ Annular Space or Vault Sensor. Model: LS-600
- ☒ Piping Sump / Trench Sensor. Model: LS-600
- ☐ Fill Sump Sensor(s). . Model: _____
- ☐ Mechanical Line Leak Detector. Model: _____
- ☐ Electronic Line Leak Detector. Model: _____
- ☐ Tank Overfill / High-Level Sensor. Model: _____

Pump ID: #1 dispensing unleaded gasoline

- ☐ UDC Sensor Model: _____ ☐ Shear Valve
- ☒ UDC Float/Chain ☐ None of the Above

Pump ID: #2 dispensing diesel fuel

- ☐ UDC Sensor Model: _____ ☐ Shear Valve
- ☒ UDC Float/Chain ☐ None of the Above

Pump ID: #3 dispensing diesel fuel

- ☐ UDC Sensor Model: _____ ☐ Shear Valve
- ☒ UDC Float/Chain ☐ None of the Above

C. Certification

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; *(check all that apply)*: ☐ System set-up ☐ Alarm history report

Technician: (print) Eddie Martinez **Signature:** _____

D. Results of Testing/Servicing

Software Version: Pneumercator LC100 version # _____

Complete the following checklist:

☒ Yes	❑ No*	Is the audible alarm operational?
☒ Yes	❑ No*	Is the visual alarm operational?
☒ Yes	❑ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	❑ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
❑ Yes	❑ No* ☒N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
❑ Yes	❑ No* ☒N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ❑Sump/Trench Sensors; ❑Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks & sensor failure/disconnection? ❑ Yes; ❑ No.
❑ Yes	❑ No* ☒N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? _____%
❑Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☒ Yes	❑ No	Was liquid found inside secondary containment designed as dry systems? ❑ Product; ☒ Water. If yes, describe causes below.
☒ Yes	❑ No*	Was monitoring system set-up reviewed to ensure proper settings? Attach reports, if applicable
☒ Yes	❑ No*	Is all monitoring equipment operational per manufacturer's specifications?

* In Section E below, describe how and when these deficiencies were or will be corrected.

E. Comments: Approximately 4 gallons of water in diesel piping sump

Monitoring System Certification

F. InTank Gage/SIR Equipment: ☐ Check this box if tank gage is only for inventory control.
☒ Check this box if no tank gage/SIR equipment is installed.

This section to be completed if in-tank gage equipment is used for leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

* In the Section H, below, describe how and when these deficiencies were or will be corrected.

G. Line Leak Detectors (LLD): ☒ Check this box if LLDs are not installed.

Complete the following checklist:

☐ Yes	☐ No* ☐ N/A	For equipment start-up/certification, was leak simulated to verify performance? Simulated rate: ☐ 3 gph ☐ 0.1 gph ☐ 0.2 gph
☐ Yes	☐ No*	Were all LLDs confirmed operational and accurate within regulatory requirements?
☐ Yes	☐ No*	Was the testing apparatus properly calibrated?
☐ Yes	☐ No* ☐ N/A	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐ Yes	☐ No* ☐ N/A	For electronic LLDs, have all accessible wiring connections been visually inspected?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

* In the Section H, below, describe how and when these deficiencies were or will be corrected.

LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for Granite Rock Company , a corporation, 350 Technology Dr., P.O. Box 50001, Watsonville, CA 95076.

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least $10,000.00 per occurrence and $10,000.00 annual aggregate coverage.

1.	Amount of annual aggregate coverage being assured by this letter	$10,000
2.	Total tangible assets	$142,000,000
3.	Total liabilities	$74,000,000
4.	Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	$68,000,000

I hereby certify that the wording of this letter is identical to the wording specified in subsection 2808.1(d)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.

Executed at Watsonville, CA

On September 2, 2004.

Rita Alves

Rita Alves
Vice President – Finance, Chief Financial Officer

CERTIFICATION OF FINANCIAL RESPONSIBILITY

FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in Section 2807, Chapter 18, Div. 3, Title 23, CCR:

☒ 500,000 dollars per occurrence or ☐ 1 million dollars per occurrence AND ☒ 1 million dollars annual aggregate or ☐ 2 million dollars annual aggregate

B. Graniterock
(Name of tank Owner or Operator)

hereby certifies that it is in compliance with the requirements of Section 2807, Article 3, Chapter 18, Division 3, Title 23, California Code of Regulations.

The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C. Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Compensation
Chief Financial Officer Letter	Graniterock 350 Technology Way PO Box 50001 Watsonville, CA 95077	N/A	$10,000	9/02/04 Continuous		
State UST Cleanup Fund		N/A	$990,000		Yes	Yes

Note: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance with all conditions for participation in the Fund.

D. Facility Name	Facility Address

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: H&SC §25503.3(c)

To: Agency Name: SJFD

Agency Mailing Address: _____

_____

Pursuant to Section 25503.3(c) of California Health and Safety Code (H&SC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: Granite Construction Co

Facility Street Address: 720 Coleman Ave City: San Jose

Date of Current HMBP: 6/18/02

I certify that: *(Check the appropriate box.)*

☑ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. *(See bottom of page for details.)* **or**

☐ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is being implemented. A copy of the revisions is enclosed with this Certification.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials whicb would require updating of the HMBP.

Name of Owner/Operator *(Print)*: [illegible] Title: Equipment Supervisor

Signature of Owner/Operator: _____ Date: 6/19/03

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; **and**
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; **and**
- The facility has not begun handling any hazardous material in a HMBP reportable quantity which is not currently listed in the Hazardous Materials Inventory; **and**
- The HMBP most recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; **and**
- There have been no substantial changes in the facility's hazardous materials operations which would require revision of the current HMBP.

Granite Construction - 2003

MONITORING SYSTEM CERTIFICATION

For Use By All Jurisdictions Within the State of California
Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST systems within 30 days of test date.

A. General Information

Facility Name: Granite Construction Company, 120 Graniterock Way, San Jose, CA 95136
Facility Contact Person: Hiram Contact Phone No.: (408) 281-6351

Monitoring System Certification

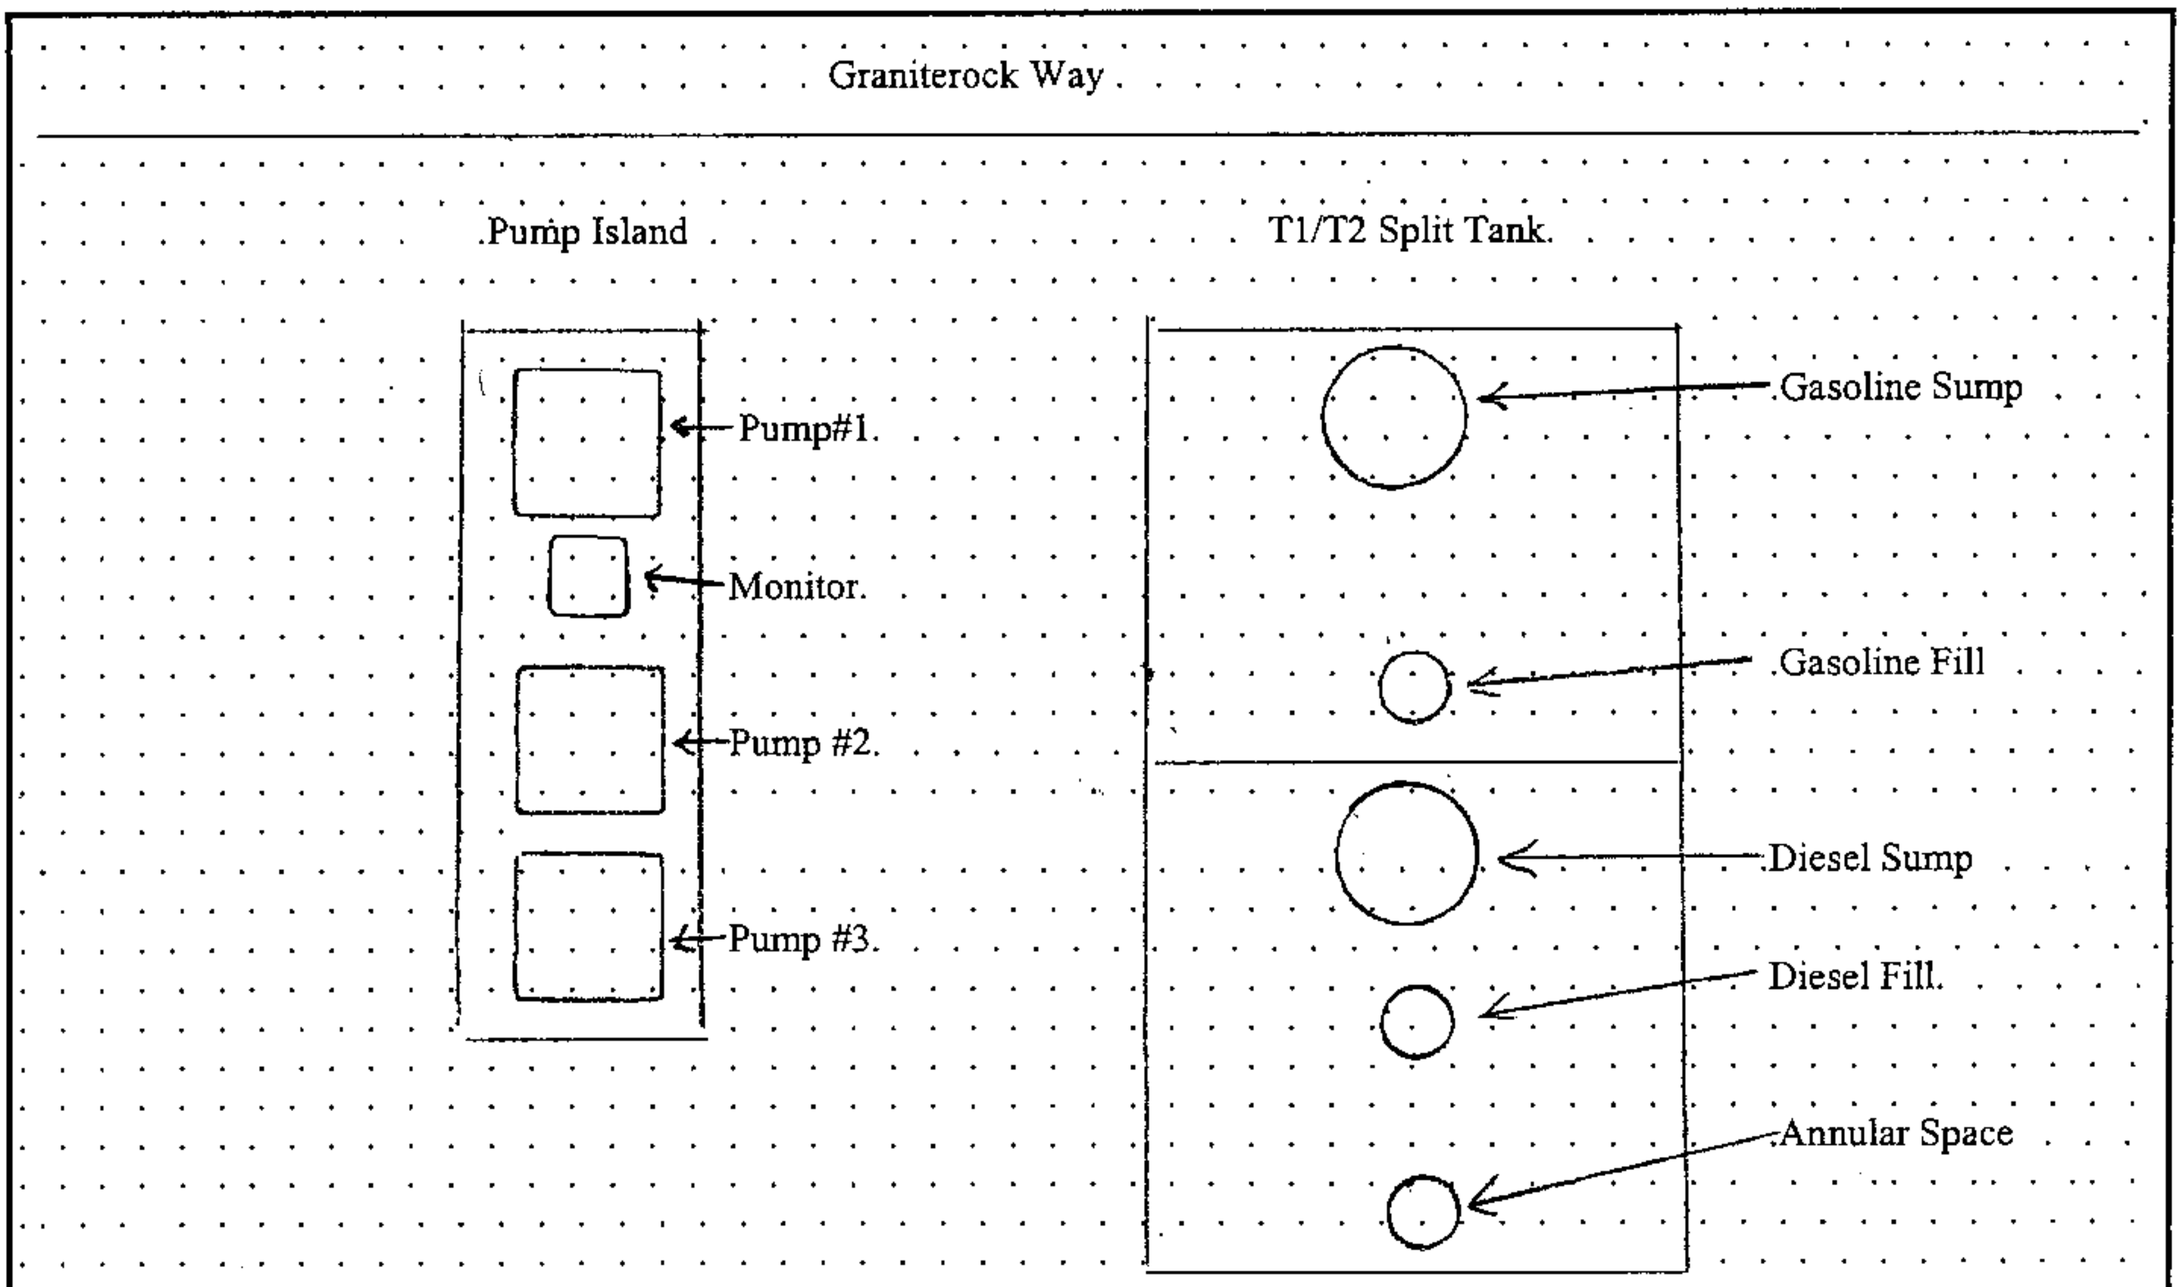
UST Monitoring Site Plan

Granite Construction, 120 Graniterock Way, San Jose, CA 95136



Date map was drawn: **6/13/2003**

Instructions

If you already have a diagram that shows all required information, you may include it, rather than this page, with your Monitoring System Certification. On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment, if installed: monitoring system control panels; sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers, or other secondary containment areas; mechanical or electronic line leak detectors; and in-tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

www.unidocs.org

UNDERGROUND STORAGE TANK MONITORING PLAN

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 23 CCR, Sections 2632(d)(1), 2634(d)(2), and 2641(h)

TYPE OF ACTION ☒ 1. NEW PLAN ☐ 2. CHANGE OF INFORMATION — M01.

PLAN TYPE (Check one item only) ☒ MONITORING IS IDENTICAL FOR ALL USTs AT THIS FACILITY. ☐ THIS PLAN COVERS ONLY THE FOLLOWING UST SYSTEM(S): _____ — M02.

I. FACILITY INFORMATION

FACILITY ID # (*Agency Use Only*) 43-060-401659

FACILITY NAME Graniterock Company — M03.

FACILITY SITE ADDRESS 120 Granite Rock Way — M04. CITY San Jose — M05.

II. EQUIPMENT TESTING AND PREVENTIVE MAINTENANCE

State law requires that testing, preventive maintenance, and calibration of monitoring equipment (e.g., sensors, probes, line leak detectors, etc.) be performed in accordance with the equipment manufacturers' instructions, or annually, whichever is more frequent. Such work must be performed by qualified personnel. — M06.

MONITORING EQUIPMENT IS SERVICED ☒ 1. ANNUALLY ☐ 99. OTHER (Specify): _____ — M07.

III. MONITORING LOCATIONS

This monitoring plan must include a Site Plan showing the general tank and piping layouts and the locations where monitoring is performed (i.e., location of each sensor, line leak detector, monitoring system control panel, etc.). If you already have a diagram (e.g., current UST Monitoring Site Plan from a Monitoring System Certification form, Hazardous Materials Business Plan map, etc.) which shows all required information, include it with this plan.

IV. TANK MONITORING

MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S): (Check all that apply) — M10.

☒ 1. CONTINUOUS ELECTRONIC MONITORING OF TANK ANNULAR (INTERSTITIAL) SPACE(S) OR SECONDARY CONTAINMENT VAULT(S)

SECONDARY CONTAINMENT IS: ☒ a. DRY ☐ b. LIQUID FILLED ☐ c. UNDER PRESSURE ☐ d. UNDER VACUUM — M11.

PANEL MANUFACTURER: Pneumercator — M12. MODEL #: LC 1000 — M13.

LEAK SENSOR MANUFACTURER: Pneumercator — M14. MODEL #(S): LS 600 — M15.

☐ 2. AUTOMATIC TANK GAUGING (ATG) SYSTEM USED TO MONITOR SINGLE WALL TANK(S)

PANEL MANUFACTURER: _____ — M16. MODEL #: _____ — M17.

IN-TANK PROBE MANUFACTURER: _____ — M18. MODEL #(S): _____ — M19.

LEAK TEST FREQUENCY: ☐ a. CONTINUOUS ☐ b. DAILY/NIGHTLY ☐ c. WEEKLY — M20.
☐ d. MONTHLY ☐ e. OTHER (Specify): _____ — M21.

PROGRAMMED TESTS: ☐ a. 0.1 g.p.h. ☐ b. 0.2 g.p.h. ☐ c. OTHER (Specify): _____ — M22. M23.

☐ 3. INVENTORY RECONCILIATION ☐ a. MANUAL PER 23 CCR §2646 ☐ b. STATISTICAL PER 23 CCR §2646.1 — M24.

☐ 4. WEEKLY MANUAL TANK GAUGING (MTG) PER 23 CCR §2645

TESTING PERIOD: ☐ a. 36 HOURS ☐ b. 60 HOURS — M25.

☐ 5. INTEGRITY TESTING PER 23 CCR §2643.1

TEST FREQUENCY: ☐ a. ANNUALLY ☐ b. BIENNIALLY ☐ c. OTHER (Specify): _____ — M26. M27.

☐ 6.VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY (Requires agency approval) — M28.

☐ 99. OTHER (Specify): _____

V. PIPE MONITORING

MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply) — M30.

☒ 1. CONTINUOUS ELECTRONIC MONITORING OF PIPING SUMP(S)/TRENCH(ES) AND OTHER SECONDARY CONTAINMENT

SECONDARY CONTAINMENT IS: ☒ a. DRY ☐ b. LIQUID FILLED ☐ c. UNDER PRESSURE ☐ d. UNDER VACUUM — M31.

PANEL MANUFACTURER: Pneumercator — M32. MODEL #: LC 1000 — M33.

LEAK SENSOR MANUFACTURER: Pneumercator — M34. MODEL #(S): LS 600 — M35.

WILL A PIPING LEAK ALARM TRIGGER AUTOMATIC PUMP (i.e., TURBINE) SHUTDOWN? ☒ a. YES ☐ b. NO — M36.

WILL FAILURE/DISCONNECTION OF THE MONITORING SYSTEM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☒ a. YES ☐ b. NO — M37.

☐ 2. MECHANICAL LINE LEAK DETECTOR (MLLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS AND RESTRICTS OR SHUTS OFF PRODUCT FLOW WHEN A LEAK IS DETECTED

MLLD MANUFACTURER(s): _____ — M38. MODEL #(S): _____ — M39.

☐ 3. ELECTRONIC LINE LEAK DETECTOR (ELLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS

ELLD MANUFACTURER: _____ — M40. MODEL #: _____ — M41.

PROGRAMMED LINE INTEGRITY TESTS: ☐ a. MINIMUM MONTHLY 0.2 g.p.h. ☐ b. MINIMUM ANNUAL 0.1 g.p.h. — M42.

WILL ELLD DETECTION OF A PIPING LEAK TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO — M43.

WILL ELLD FAILURE/DISCONNECTION TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO — M44.

☐ 4. INTEGRITY TESTING

TEST FREQUENCY: ☐ a. ANNUALLY ☐ b. EVERY 3 YEARS ☐ c. OTHER (Specify) _____ — M45. M46.

☐ 5.VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY* ☐ c. MIN. MONTHLY & EACH TIME SYSTEM OPERATED** — M47.

* Requires agency approval ** Allowed for monitoring of unburied emergency generator fuel piping only per HSC §25281.5(b)(3)

☐ 6. PIPING IS SUCTION PIPING MEETING ALL REQUIREMENTS FOR EXEMPTION FROM MONITORING PER 23 CCR §2636(a)(3)

☐ 7. NO PRODUCT OR REMOTE FILL PIPING IS CONNECTED TO THE UST(s)

☐ 99. OTHER (Specify) _____ — M48.

43-060-401659

VI. DISPENSER MONITORING

MONITORING OF AREAS BENEATH DISPENSER(S) IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply) M50.

☐ 1. CONTINUOUS ELECTRONIC MONITORING OF UNDER DISPENSER CONTAINMENT (UDC)

PANEL MANUFACTURER: _____ M51. MODEL #: _____ M52.

LEAK SENSOR MANUFACTURER: _____ M53. MODEL #(S): _____ M54.

WILL DETECTION OF A LEAK INTO THE UDC TRIGGER AUDIBLE AND VISUAL ALARMS? ☐ a. YES ☐ b. NO M55.

WILL A UDC LEAK ALARM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M56.

WILL FAILURE/DISCONNECTION OF UDC MONITORING SYSTEM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M57.

☒ 2. MECHANICAL ASSEMBLY (e.g., FLOAT AND CHAIN ASSEMBLY) IN UDC TRIPS SHEAR VALVE IN CASE OF LEAK

ASSEMBLY MANUFACTURER: Bravo M58. MODEL #(S): FT8000 M59.

☐ 3.VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY (Requires agency approval) M60.

☐ 4. NO DISPENSERS

☐ 99. OTHER (Specify) _____ M61.

VII. ENHANCED LEAK DETECTION

☐ 1. WE HAVE BEEN NOTIFIED BY THE STATE WATER RESOURCES CONTROL BOARD THAT WE MUST IMPLEMENT ENHANCED LEAK DETECTION (ELD) FOR THE UST(S) COVERED BY THIS PLAN. PER 23 CCR §2644.1, ELD IS PERFORMED EVERY 36 MONTHS AS REQUIRED M70.

VIII. TRAINING

REFERENCE DOCUMENTS MAINTAINED AT FACILITY (Check all that apply) M80.

1. ☒ THIS UNDERGROUND STORAGE TANK MONITORING PLAN **(Required)**
2. ☒ OPERATING MANUALS FOR ELECTRONIC MONITORING EQUIPMENT **(Required)**
3. ☒ THE FACILITY'S BEST MANAGEMENT PRACTICES **(Required as of January 1, 2005)**
4. ☐ CALIFORNIA UNDERGROUND STORAGE TANK REGULATIONS
5. ☐ CALIFORNIA UNDERGROUND STORAGE TANK LAW
6. ☐ STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION: "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION"
7. ☐ SWRCB PUBLICATION: "WEEKLY MANUAL TANK GAUGING FOR SMALL UNDERGROUND STORAGE TANKS"

99. ☐ OTHER (Specify): _____ M81.

Personnel with UST monitoring responsibilities are familiar with all of the above documents relevant to their job duties and can access those documents when needed. By January 1, 2005, this facility will have a "Designated UST Operator" who has passed the California UST Sytem Operator Exam administered by the International Code Council (ICC). By July 1, 2005, and annually thereafter, the "Designated UST Operator" will train facility employees in the proper operation and maintenance of the UST systems. This training will include, but is not limited to, the following:

- Operation of the UST systems in a manner consistent with the facility's best management practices.
- The facility employee's role with regard to the leak detection equipment.
- The facility employee's role with regard to spills and overfills.
- Whom to contact for emergencies and leak detection alarms.

For facility employees hired on or after July 1, 2005, the initial training will be conducted within 30 days of the date of hire.

IX. COMMENTS/ADDITIONAL INFORMATION

Please use this section to include any additional UST system monitoring-related information (e.g., additional information required by your local agency): M85.

Note regarding Section X. Pending certification of a Designated UST Operator, the following person has authority for performing the monitoring activities and maintaining leak detection equipment covered by this plan. NAME: JOB TITLE:

X. PERSONNEL RESPONSIBILITIES

AS OF JANUARY 1, 2005, THE "DESIGNATED UST OPERATOR" IDENTIFIED IN SECTION III OF THE CURRENT UST OPERATING PERMIT APPLICATION – FACILITY FORM WILL HAVE ULTIMATE AUTHORITY FOR PERFORMING THE MONITORING ACTIVITIES AND MAINTAINING LEAK DETECTION EQUIPMENT COVERED BY THIS PLAN, AND WILL PERFORM AND DOCUMENT MINIMUM MONTHLY VISUAL INSPECTIONS OF THE FACILITY'S UST SYSTEMS IN ACCORDANCE WITH 23 CCR § 2715(b).

XI. OWNER/OPERATOR SIGNATURE

CERTIFICATION: I certify that the information provided herein is true and accurate to the best of my knowledge.

OWNER/OPERATOR SIGNATURE: Tina Lau

REPRESENTING: ☐ Owner ☒ Operator M90.

DATE: 10/20/04 M91.

OWNER/OPERATOR NAME (print): Tina Lau M92.

OWNER/OPERATOR TITLE: Environmental Services Specialist M93.

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page (OES Form 2730).

Does your facility…	If Yes, please complete these pages of the UPCF…	
A. HAZARDOUS MATERIALS Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4.	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION (OES 2731)
B. UNDERGROUND STORAGE TANKS (USTs) 1. Own or operate underground storage tanks?	☒ YES ☐ NO 5.	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
2. Intend to upgrade existing or install new USTs?	☐ YES ☒ NO 6.	UST FACILITY UST TANK (one per tank) UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank) (Formerly Form C)
3. Need to report closing a UST?	☐ YES ☒ NO 7.	UST TANK (closure portion – one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: ---any tank capacity is greater than 660 gallons, or ---the total capacity for the facility is greater than 1,320 gallons?	☒ YES ☐ NO 8.	NO FORM REQUIRED TO CUPAs
D. HAZARDOUS WASTE 1. Generate hazardous waste?	☒ YES ☐ NO 9.	EPA ID NUMBER – provide at the top of this page
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC §25143.2)?	☐ YES ☒ NO 10.	RECYCLABLE MATERIALS REPORT (one per recycler)
3. Treat hazardous waste on site?	☐ YES ☒ NO 11.	ONSITE HAZARDOUS WASTE TREATMENT – FACILITY (Formerly DTSC Forms 1772) ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit) (Formerly DTSC Forms 1772 A,B,C,D and L)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12.	CERTIFICATION OF FINANCIAL ASSURANCE (Formerly DTSC Form 1232)
5. Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13.	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION (Formerly DTSC Form 1196)
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14.	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION (Formerly DTSC Form 1249)
E. LOCAL REQUIREMENTS (You may also be required to provide additional information by your CUPA or local agency.)		15.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e. shouting)*; ☐ Other *(specify)* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program	Phone No.: **(408) 277-4659**
Santa Clara County Hazardous Materials Compliance Division	Phone No. **(408) 918-3400**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(408) 452-7288**
Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.*

c. Emergency Resources:

Poison Control Center		Phone No. **(800) 876-4766**
Nearest Hospital:	Name: **San Jose Medical Group/Oakland Acute Care**	Phone No.: **(408) 224-0262**
	Address: **841 Blossom Hill Road**	City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

_____

_____

_____

43-060-401659

7. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats		
	☐ Chemical Protective Boots		
	☐ Chemical Protective Gloves		
	☐ Chemical Protective Suits *(describe)*		
	☐ Face Shields		
	☒ First Aid Kits/Stations *(describe)*	Truck shop	First aid kit in the truck shop
	☒ Hard Hats		Each employee has hard hat
	☒ Plumbed Eye Wash Stations	Truck shop	
	☐ Portable Eye Wash Kits *(i.e. bottle type)*		
	☐ Respirator Cartridges *(describe)*		
	☒ Safety Glasses/Splash Goggles		Each employee has hard hat
	☐ Safety Showers		
	☐ Self-Contained Breathing Apparatuses (SCBA)		
Fire Extinguishing Systems	☐ Automatic Fire Sprinkler Systems		
	☐ Fire Alarm Boxes/Stations		
	☒ Fire Extinguisher Systems *(describe)*	Fueling Station, Truck shop, dispatch office	Fire extinguishers
Spill Control Equipment and Decontamination Equipment	☒ Absorbents *(describe)*	Truck shop, fueling station	Each truck has own spill kit. Spill kit at the fueling station and in the truck shop.
	☐ Berms/Dikes *(describe)*		
	☐ Decontamination Equipment *(describe)*		
	☐ Emergency Tanks *(describe)*		
	☐ Exhaust Hoods		
	☐ Gas Cylinder Leak Repair Kits *(describe)*		
	☐ Neutralizers *(describe)*		
	☐ Overpack Drums		
	☐ Sumps *(describe)*		
Communications and Alarm Systems	☐ Chemical Alarms *(describe)*		
	☐ Intercoms/ PA Systems		
	☐ Portable Radios		
	☒ Telephones	Truck shop, dispatch office	Employees have access to telephones and Nextel radios
	☒ Underground Tank Leak Detection Monitors		Lights and alarm
Additional Equipment *(Use Additional Pages if Needed.)*	☐		
	☐		
	☐		
	☐		

* *Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

43-660-401659

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☐	Facility evacuation drills, that are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☐	Use, maintenance, and replacement of emergency response equipment
☐	Refresher training, which is provided at least annually *
☐	Emergency response drills, which are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

43-060-401659

Record Keeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e. written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☒	Record of hazardous waste tank daily inspections *
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☒	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☐	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

WORK PROPOSED: (Select One)

- ☐ Closure
- ☐ Repair
- ☒ New Installation
- ☐ Removal
- ☐ Alteration
- ☐ Temporary
- ☐ Facility Partial Closure
- ☐ Facility Full Closure

TYPE OF PROJECT/SYSTEM: (Select One)

- ☐ Hazard Compressed Gas/Cryogenic System
- ☐ Inert Compressed Gas System
- ☐ Underground Tank/Piping System (liquid)
- ☐ Aboveground Tank/Piping System (liquid)
- ☐ Other Hazardous Material System
- ☐ Variance
- ☐ Battery System
- ☐ Metal Finishing/Plating Line
- ☐ Facility Closure
- ☒ LPG Tank Piping System

Note: Underground Tank/Piping System or Variance, must have specific applications attached.

SYSTEM COMPONENTS		PRIMARY CONTAINMENT		SECONDARY CONTAINMENT	
	Hazardous Materials Stored	Material (s) of Construction	Size (Volume, pipe, diam., etc.)	Material (s) of Construction	Size (Volume, Pipe Diam., etc.)
1	Propane	Steel	500 gall		
2					
3					
4					
5					

Important Note:

- This permit application or approved permit will expire after 180 days of inactivity.
- Plans submitted with this application must be approved by the Fire Department before work can begin.
- A final inspection approving the project must be conducted before the system may be placed into service, or considered closed.
- Call the Hazardous Materials Division at least 48 hours in advance to schedule an inspection.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State license Law as contained in the business and Professions Code, Division 3, Chapter 9. If there is any change, which would materially affect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

Re: Testing at **Granite Rock**
120 Granite Rock Way
San Jose, CA 95132

Dear Inspector:

Triton Construction will be performing Tank Monitoring Certification and Spillbox testing at the above site starting Thursday, September 2nd at 1 PM. Triton Construction is licensed to perform this testing and is currently listed in your database with regards to licensing and required insurance. Our testing protocol is available for your review and will be on site during the testing. The testing results will be submitted to your agency on appropriate forms.

Please contact me at 831.227.4730 if you have any questions.

Sincerely,

Frank Bohnet

D. Results of Testing/Servicing

Software Version Installed: _____

YES	NO	NA	
☒	☐		Is the audible alarm operational?
☒	☐		Is the visual alarm operational?
☒	☐		Were all sensors visually inspected, functionally tested, and confirmed operational?
☒	☐	☐	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐	☐	☒	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
☐	☒	☐	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☐ Sump/Trench Sensors ☐ Dispenser Containment Sensors Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ○ Yes ◉ No
☐	☐	NA	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? ☐ %
☐	☒		Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐	☒		Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product ☐ Water. If yes, describe causes in Section E, below.
☒	☐		Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒	☐		Is all monitoring equipment operational per manufacturer's specifications?

D. Comments: There was no positive shut-down for the Diesel system. The 87 system is a suction system.

E. In-Tank Gauging / SIR Equipment:

☐ Tank gauging is used only for inventory control.
☒ No tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

YES	NO	
☐	☐	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐	☐	Were all tank gauging probes visually inspected for damage and residue buildup?
☐	☐	Was accuracy of system product level readings tested?
☐	☐	Was accuracy of system water level readings tested?
☐	☐	Were all probes reinstalled properly?
☐	☐	Were all items on the equipment manufacturer's maintenance checklist completed?

F. Line Leak Detectors (LLD): ☐ LLDs are not installed.

YES	NO	NA	
☒	☐	☐	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h. ☐ 0.1 g.p.h ☐ 0.2 g.p.h.
☒	☐		Were all LLDs confirmed operational and accurate within regulatory requirements?
☒	☐		Was the testing apparatus properly calibrated?
☒	☐	☐	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐	☐	☒	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒	☐	☐	Were all items on the equipment manufacturer's maintenance checklist completed?

G. Comments: Suction system for unleaded 87, no LLD. The MLLD for the Diesel Turbine was replaced.

H. Certification - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; *(check all that apply)*: ☐ System set-up ☐ Alarm history report

D. Results of Testing/Servicing

Software Version Installed: _____

YES	NO	NA	
☒	☐		Is the audible alarm operational?
☒	☐		Is the visual alarm operational?
☒	☐		Were all sensors visually inspected, functionally tested, and confirmed operational?
☒	☐	☐	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐	☐	☒	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
☐	☐	☒	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☐ Sump/Trench Sensors ☐ Dispenser Containment Sensors Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ○ Yes ◉ No
☐	☐	NA	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? [ ] %
☐	☒		Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐	☒		Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product ☐ Water. If yes, describe causes in Section E, below.
☒	☐		Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒	☐		Is all monitoring equipment operational per manufacturer's specifications?

D. Comments:

E. In-Tank Gauging / SIR Equipment:

☐ Tank gauging is used only for inventory control.
☒ No tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

YES	NO	
☐	☐	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐	☐	Were all tank gauging probes visually inspected for damage and residue buildup?
☐	☐	Was accuracy of system product level readings tested?
☐	☐	Was accuracy of system water level readings tested?
☐	☐	Were all probes reinstalled properly?
☐	☐	Were all items on the equipment manufacturer's maintenance checklist completed?

F. Line Leak Detectors (LLD): ☐ LLDs are not installed.

YES	NO	NA	
☒	☐	☐	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h. ☐ 0.1 g.p.h ☐ 0.2 g.p.h.
☒	☐		Were all LLDs confirmed operational and accurate within regulatory requirements?
☒	☐		Was the testing apparatus properly calibrated?
☒	☐	☐	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐	☐	☒	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒	☐	☐	Were all items on the equipment manufacturer's maintenance checklist completed?

G. Comments: Suction system for unleaded 87, no LLD.

H. Certification - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; *(check all that apply)*: ☐ System set-up ☐ Alarm history report

Re: Testing at **Graniterock - Graniterock Way**
120 Graniterock Way
San Jose, CA

401659 "G"

Dear Inspector:

Triton Construction will be performing SB989 testing at the above site starting Monday, August 25 at 8am. Triton Construction is licensed to perform this testing and is currently listed in your database with regards to licensing and required insurance. Our testing protocol is available for your review and will be on site during the testing. The testing results will be submitted to your agency on appropriate forms.

Please contact me at 831.227.4730 if you have any questions.

Sincerely,

Frank Bohnet

Software Version Installed: _____

YES	NO	NA	
☒	☐		Is the audible alarm operational?
☒	☐		Is the visual alarm operational?
☒	☐		Were all sensors visually inspected, functionally tested, and confirmed operational?
☒	☐	☐	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐	☐	☒	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
☐	☐	☒	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☐ Sump/Trench Sensors ☐ Dispenser Containment Sensors Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ○ Yes ◉ No
☐	☐	NA	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? ____ %
☐	☒		Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐	☒		Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product ☐ Water. If yes, describe causes in Section E, below.
☒	☐		Was monitoring system set-up reviewed to ensure proper settings? Attach set up reports, if applicable
☒	☐		Is all monitoring equipment operational per manufacturer's specifications?

D. Comments:

E. In-Tank Gauging / SIR Equipment:

☐ Tank gauging is used only for inventory control.
☒ No tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

YES	NO	
☐	☐	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐	☐	Were all tank gauging probes visually inspected for damage and residue buildup?
☐	☐	Was accuracy of system product level readings tested?
☐	☐	Was accuracy of system water level readings tested?
☐	☐	Were all probes reinstalled properly?
☐	☐	Were all items on the equipment manufacturer's maintenance checklist completed?

F. Line Leak Detectors (LLD): ☐ LLDs are not installed.

YES	NO	NA	
☒	☐	☐	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h. ☐ 0.1 g.p.h ☐ 0.2 g.p.h.
☒	☐		Were all LLDs confirmed operational and accurate within regulatory requirements?
☒	☐		Was the testing apparatus properly calibrated?
☒	☐	☐	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐	☐	☒	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒	☐	☐	Were all items on the equipment manufacturer's maintenance checklist completed?

G. Comments: Suction system, no LLD's

H. Certification - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; *(check all that apply)*: ☐ System set-up ☐ Alarm history report

Re: UST Operating Permit renewal at 120 Graniterock Way, San Jose CA

[redacted]

Dear Mr. Randolph,

I would like to thank you in advance for your assistance with our Underground Storage Tank (UST) operating permit at 120 Graniterock Way, which appears to have expired in 2007. There is some significant confusion surrounding this specific UST operating permit renewal process that contrasts with other tanks operated by Graniterock in the City of San Jose and surrounding counties. I noticed the form you emailed me was intended for a permit transfer to a new ownership, which is not our situation. Please confirm that another form was not intended to be attached.

I checked the California Code of Regulations and the Health and Safety Code sections relevant to UST permitting. I have also reviewed the San Jose Fire Department's website and the San Jose Municipal Ordinances regarding USTs. None of these sources provides guidance or requirements for an application process for a UST permit renewal. What is especially confusing for me and others at Graniterock is that at other facilities, it appears as if the renewed permit is generated by the CUPA after a site inspection and not by separate permit renewal application forms. For example, we received a renewal generated for our UST operating permit for our facility at 11711 Berryessa St. after the site inspection there in 2008, and I am not aware of a separate renewal application process. The renewal at Berryessa is consistent with my understanding of the process and, based on our phone conversation the other day, appears to be consistent with SJFD's typical standard operating procedure.

I suspect that the renewal for the permit at 120 Graniterock Way "fell through the cracks" in 2007. Looking through our inspection history, we had two separate inspectors in 2007. It is most likely that during this transitional period, prior to you, the permit renewal process was not completed after the inspections. Thus, our permit expired but was not reissued. Please note that

during this time, we have paid the necessary CUPA Hazardous Materials Permit invoices and the State UST surcharges. We have also maintained compliance with the annual and tri-annual certification requirements and other permit operating conditions, as well as the monthly Designated Operator inspections. As such, Graniterock requests that the SJFD issue a renewed permit as soon as possible so that we can close this paperwork loophole.

Again, I thank you in advance for a timely response so that we can resolve this issue very quickly. Do not hesitate to contact me at TLau@graniterock.com or at (831) 768-2009.

Sincerely,

Tina Lau

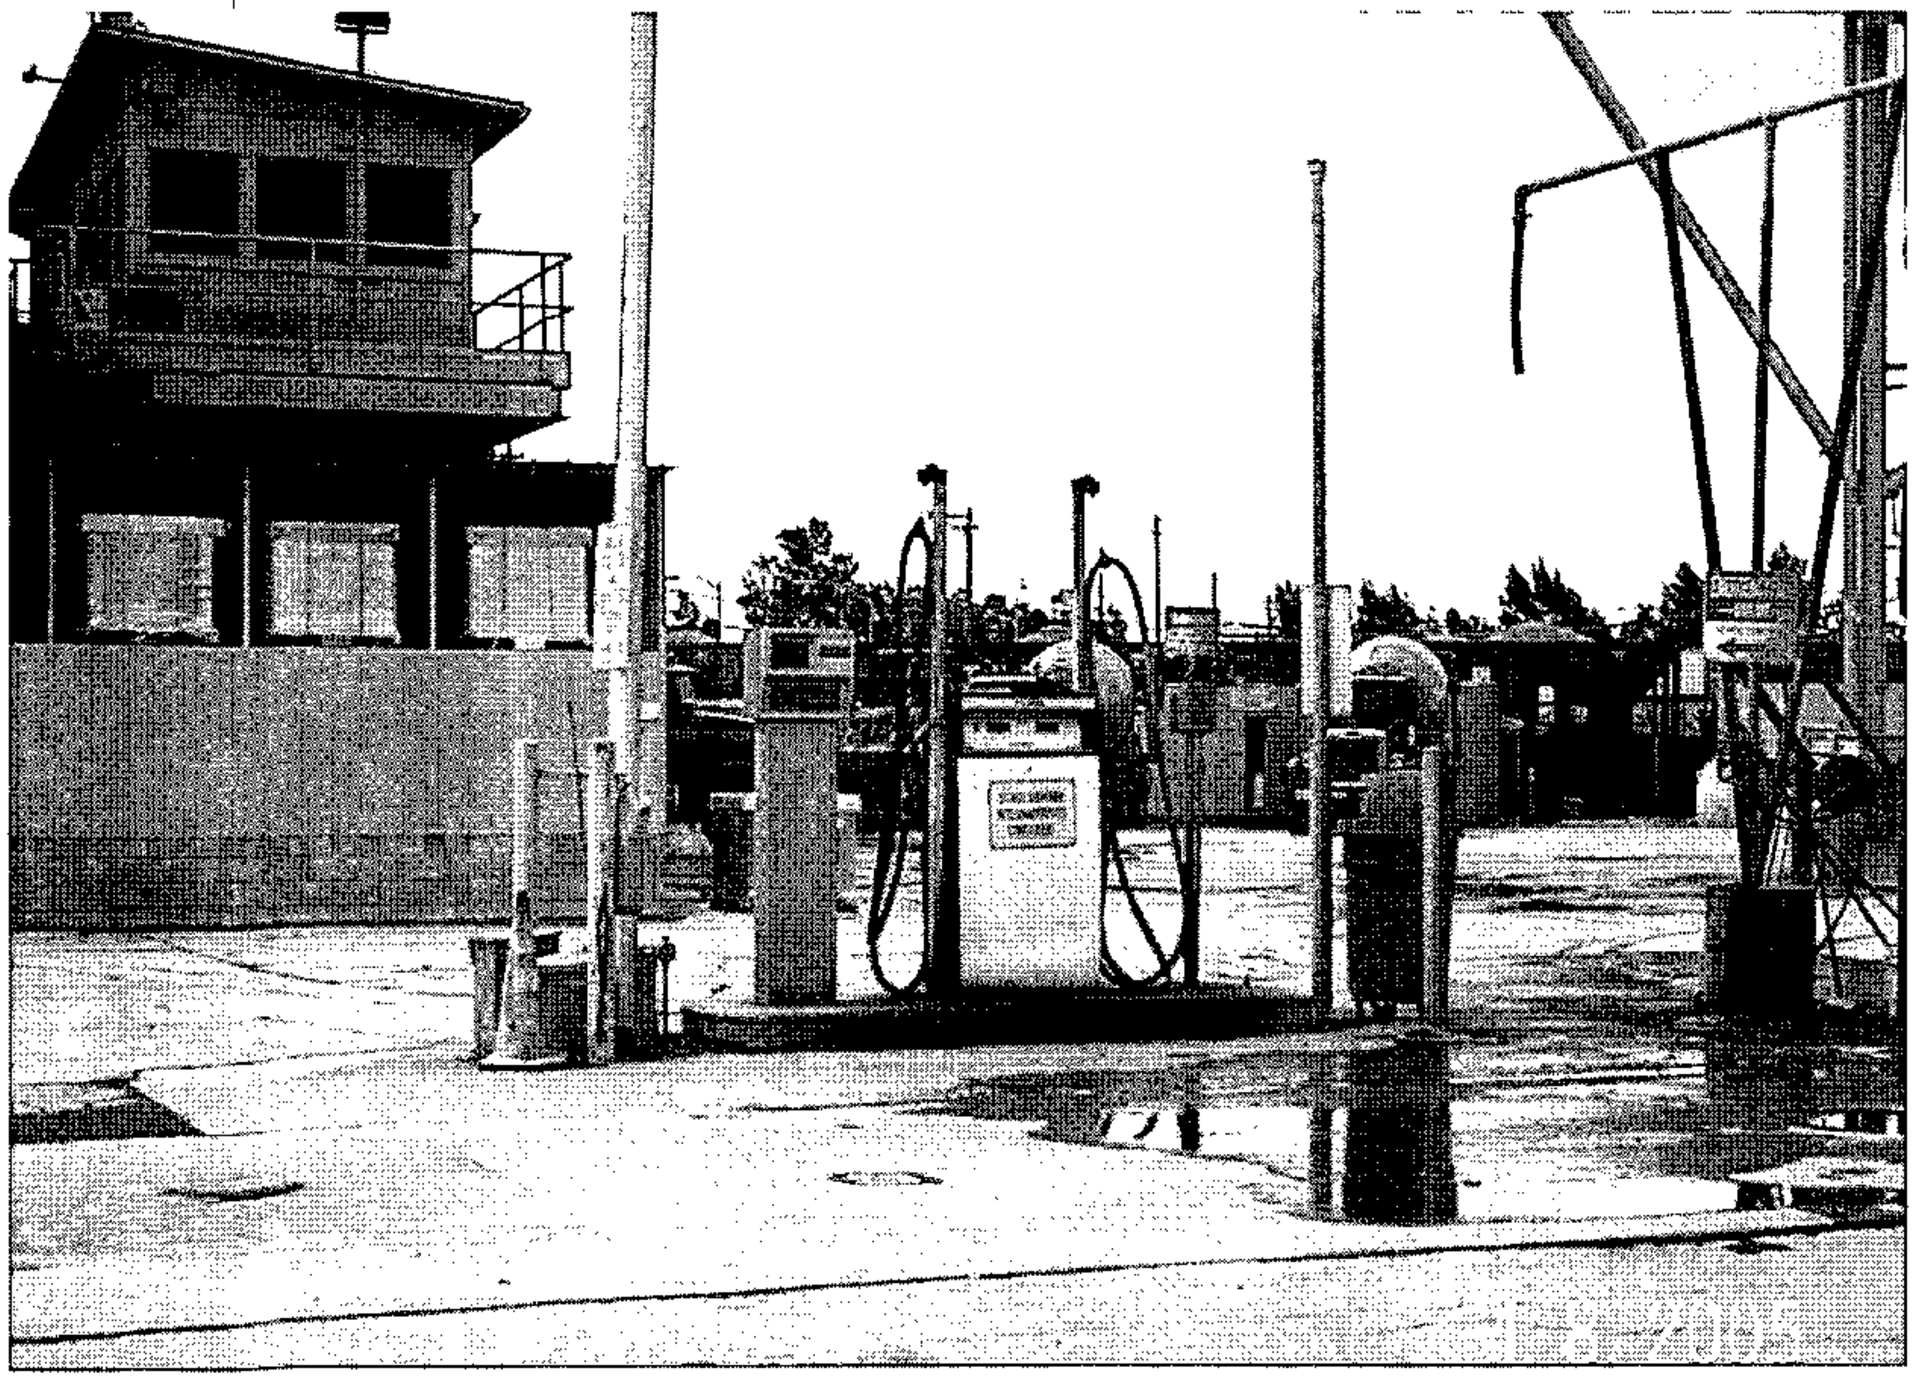
Underground Storage Tanks (USTs)



Graniterock Company

Prepared by Tina Lau, DO# 5247997-UC

Course Goal

To help you answer the following questions:

- Why am I here and why should I care about my branch's UST?
- What is in my branch's UST, and is it hazardous?
- How do I know if there is a leak?
- What should I do if there is a spill?
- Who should I call for help?

So you might be thinking…

- Why am *I* here?
- New Underground Storage Tank (UST) regulations came into effect in 2005
  - They require annual UST training of ALL employees on site
  - They require new hires to receive this training within 30 days of hire
- This way, anyone on site will know what to do if there is a leak or a spill.

Oil Leaks

- If not cleaned up, oil leaks and spills can create a storm water pollution issue and, in some cases, can cause soil contamination.
- Graniterock spends tens of thousands of dollars every year to clean up petroleum releases, some dating back to the early 1990s and before.
  - The key is to clean it up before it becomes a problem

Source Control for Petroleum

- Best way to control pollution is to start at the source: prevent spills and leaks from happening in the first place.

Where can spills occur? How do we control them?

Who Cares?

Graniterock does, of course. But here are some regulatory agencies we work with:

- City Environmental Health Department
- County Environmental Health Departments
- Fire Departments
- State Water Resource Control Board
- EPA
- Department of Toxic Substance Control
- Integrated Waste Management Board

Is there a hazardous material in the UST?

A hazardous material is any substance that can cause injury to people and damage to equipment.

Pretty much any material can be considered hazardous – including the diesel in your branch's underground storage tank.

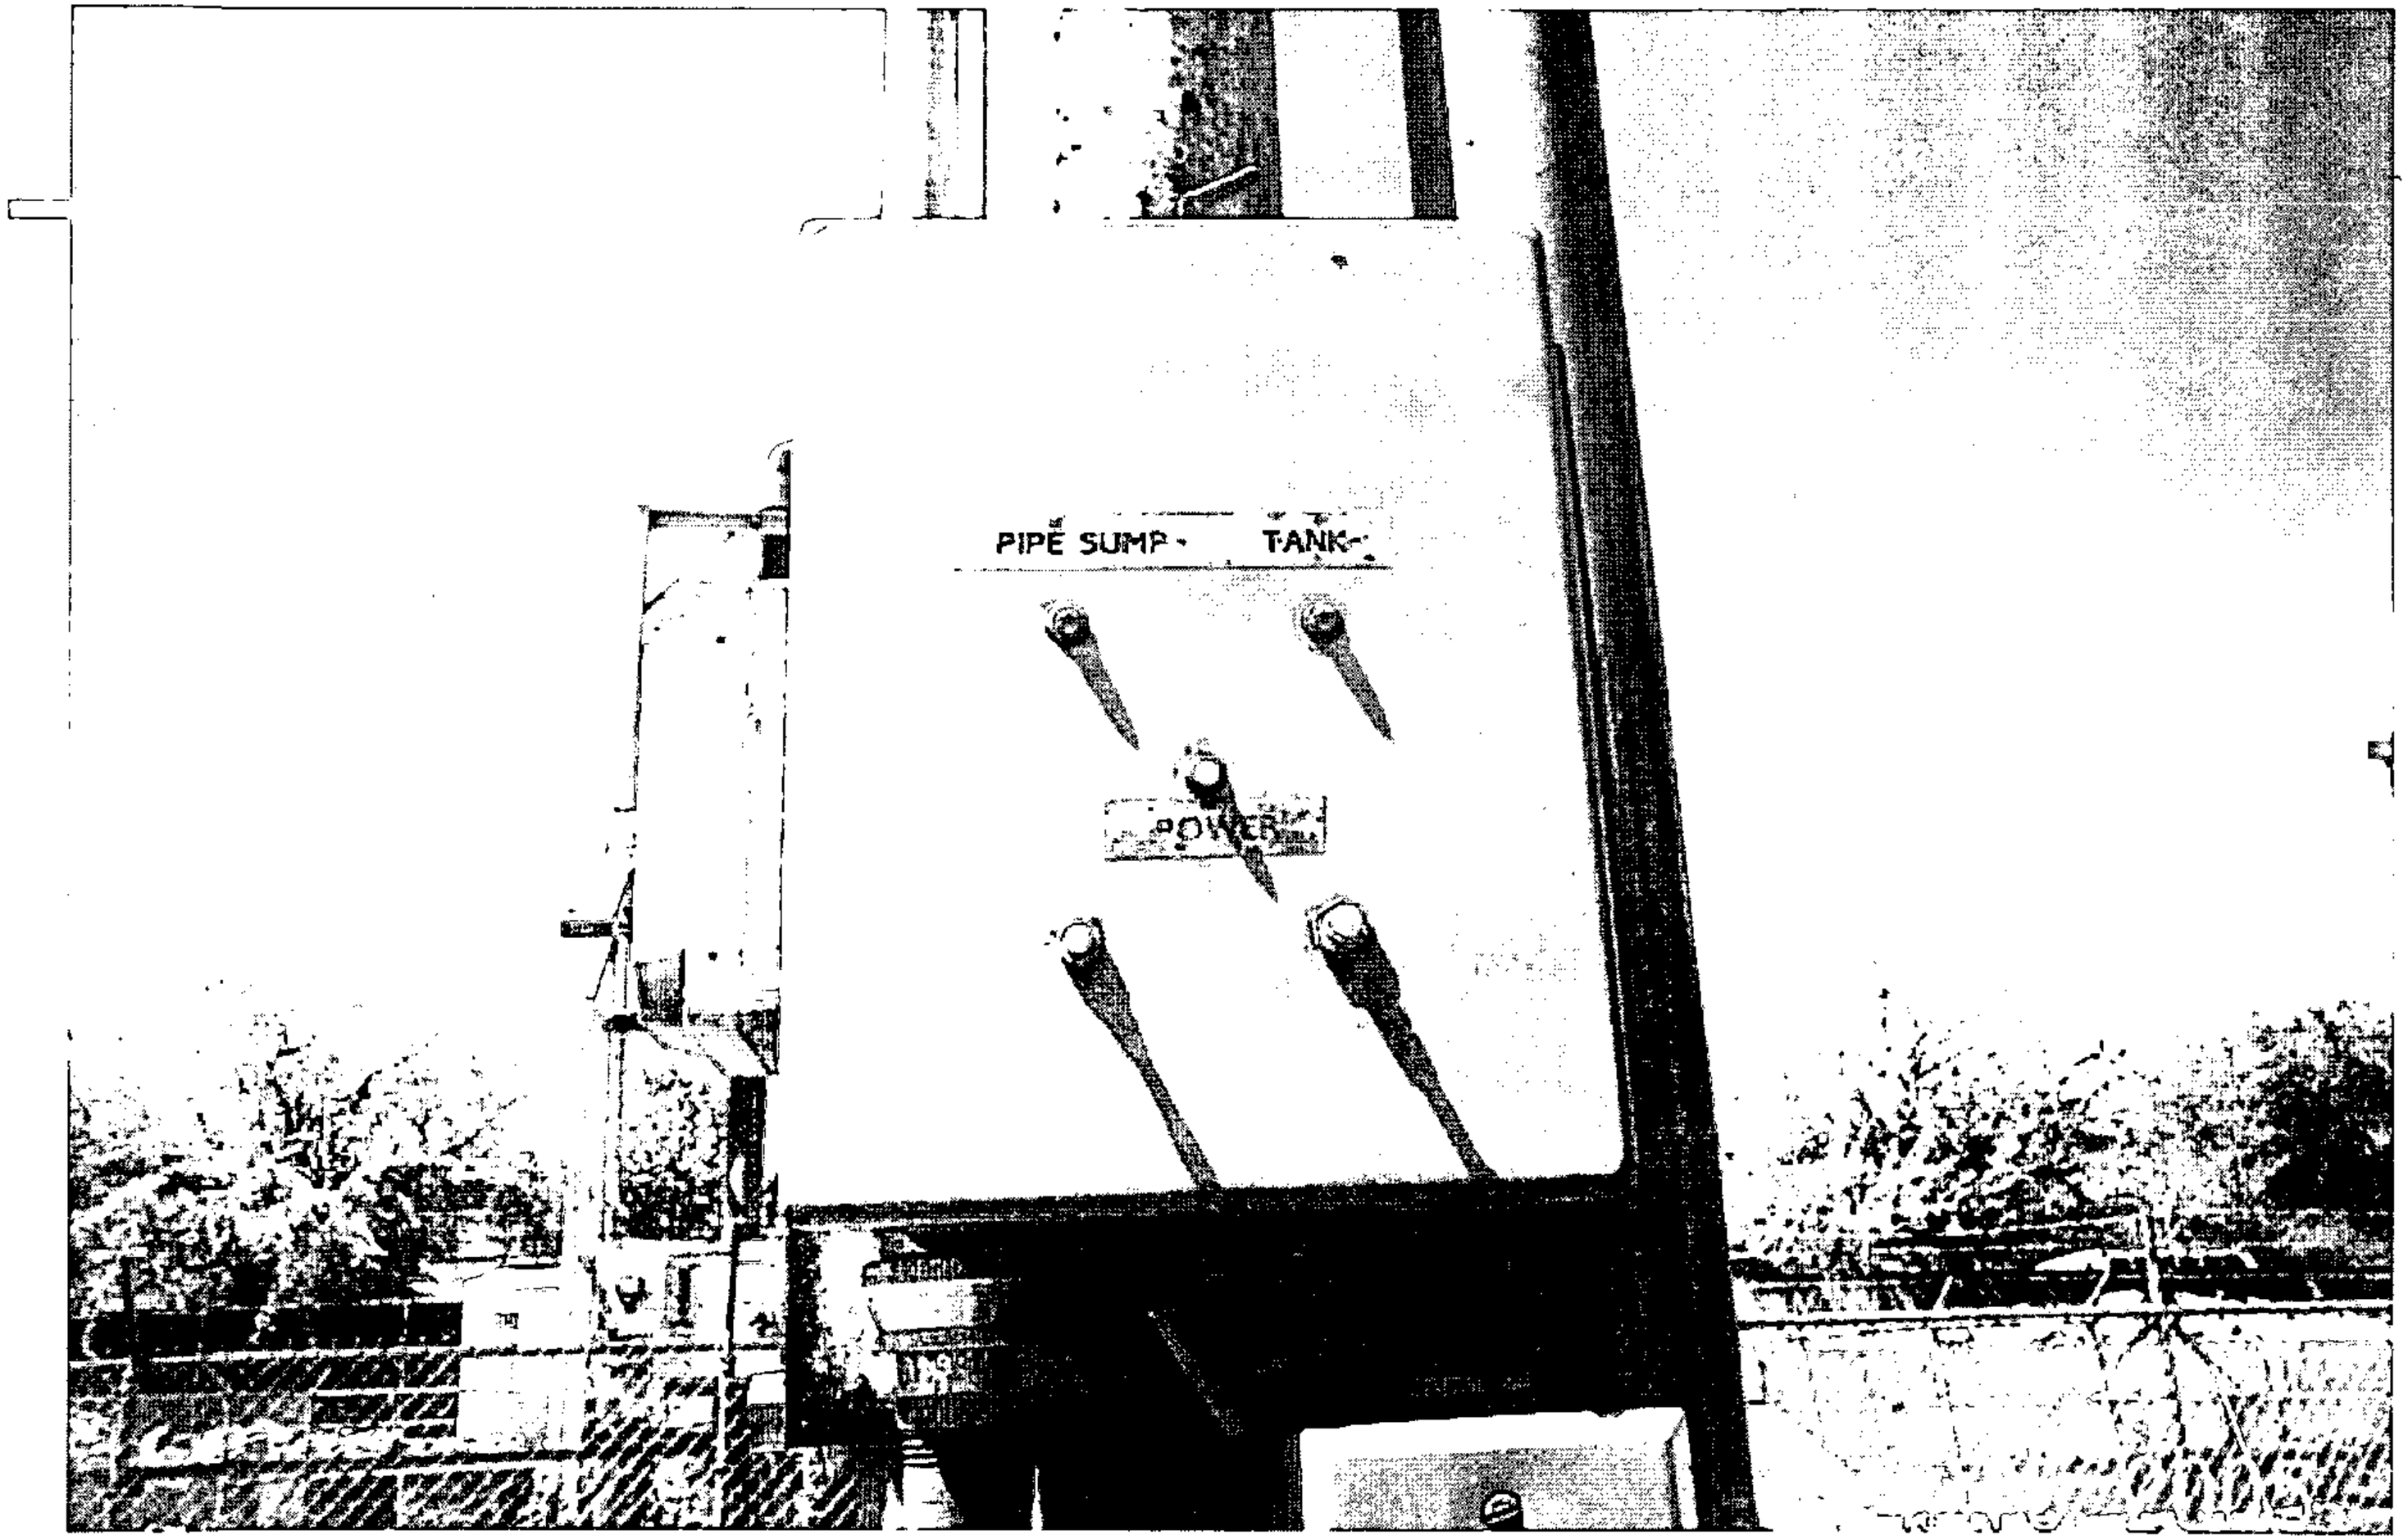
What makes it hazardous?

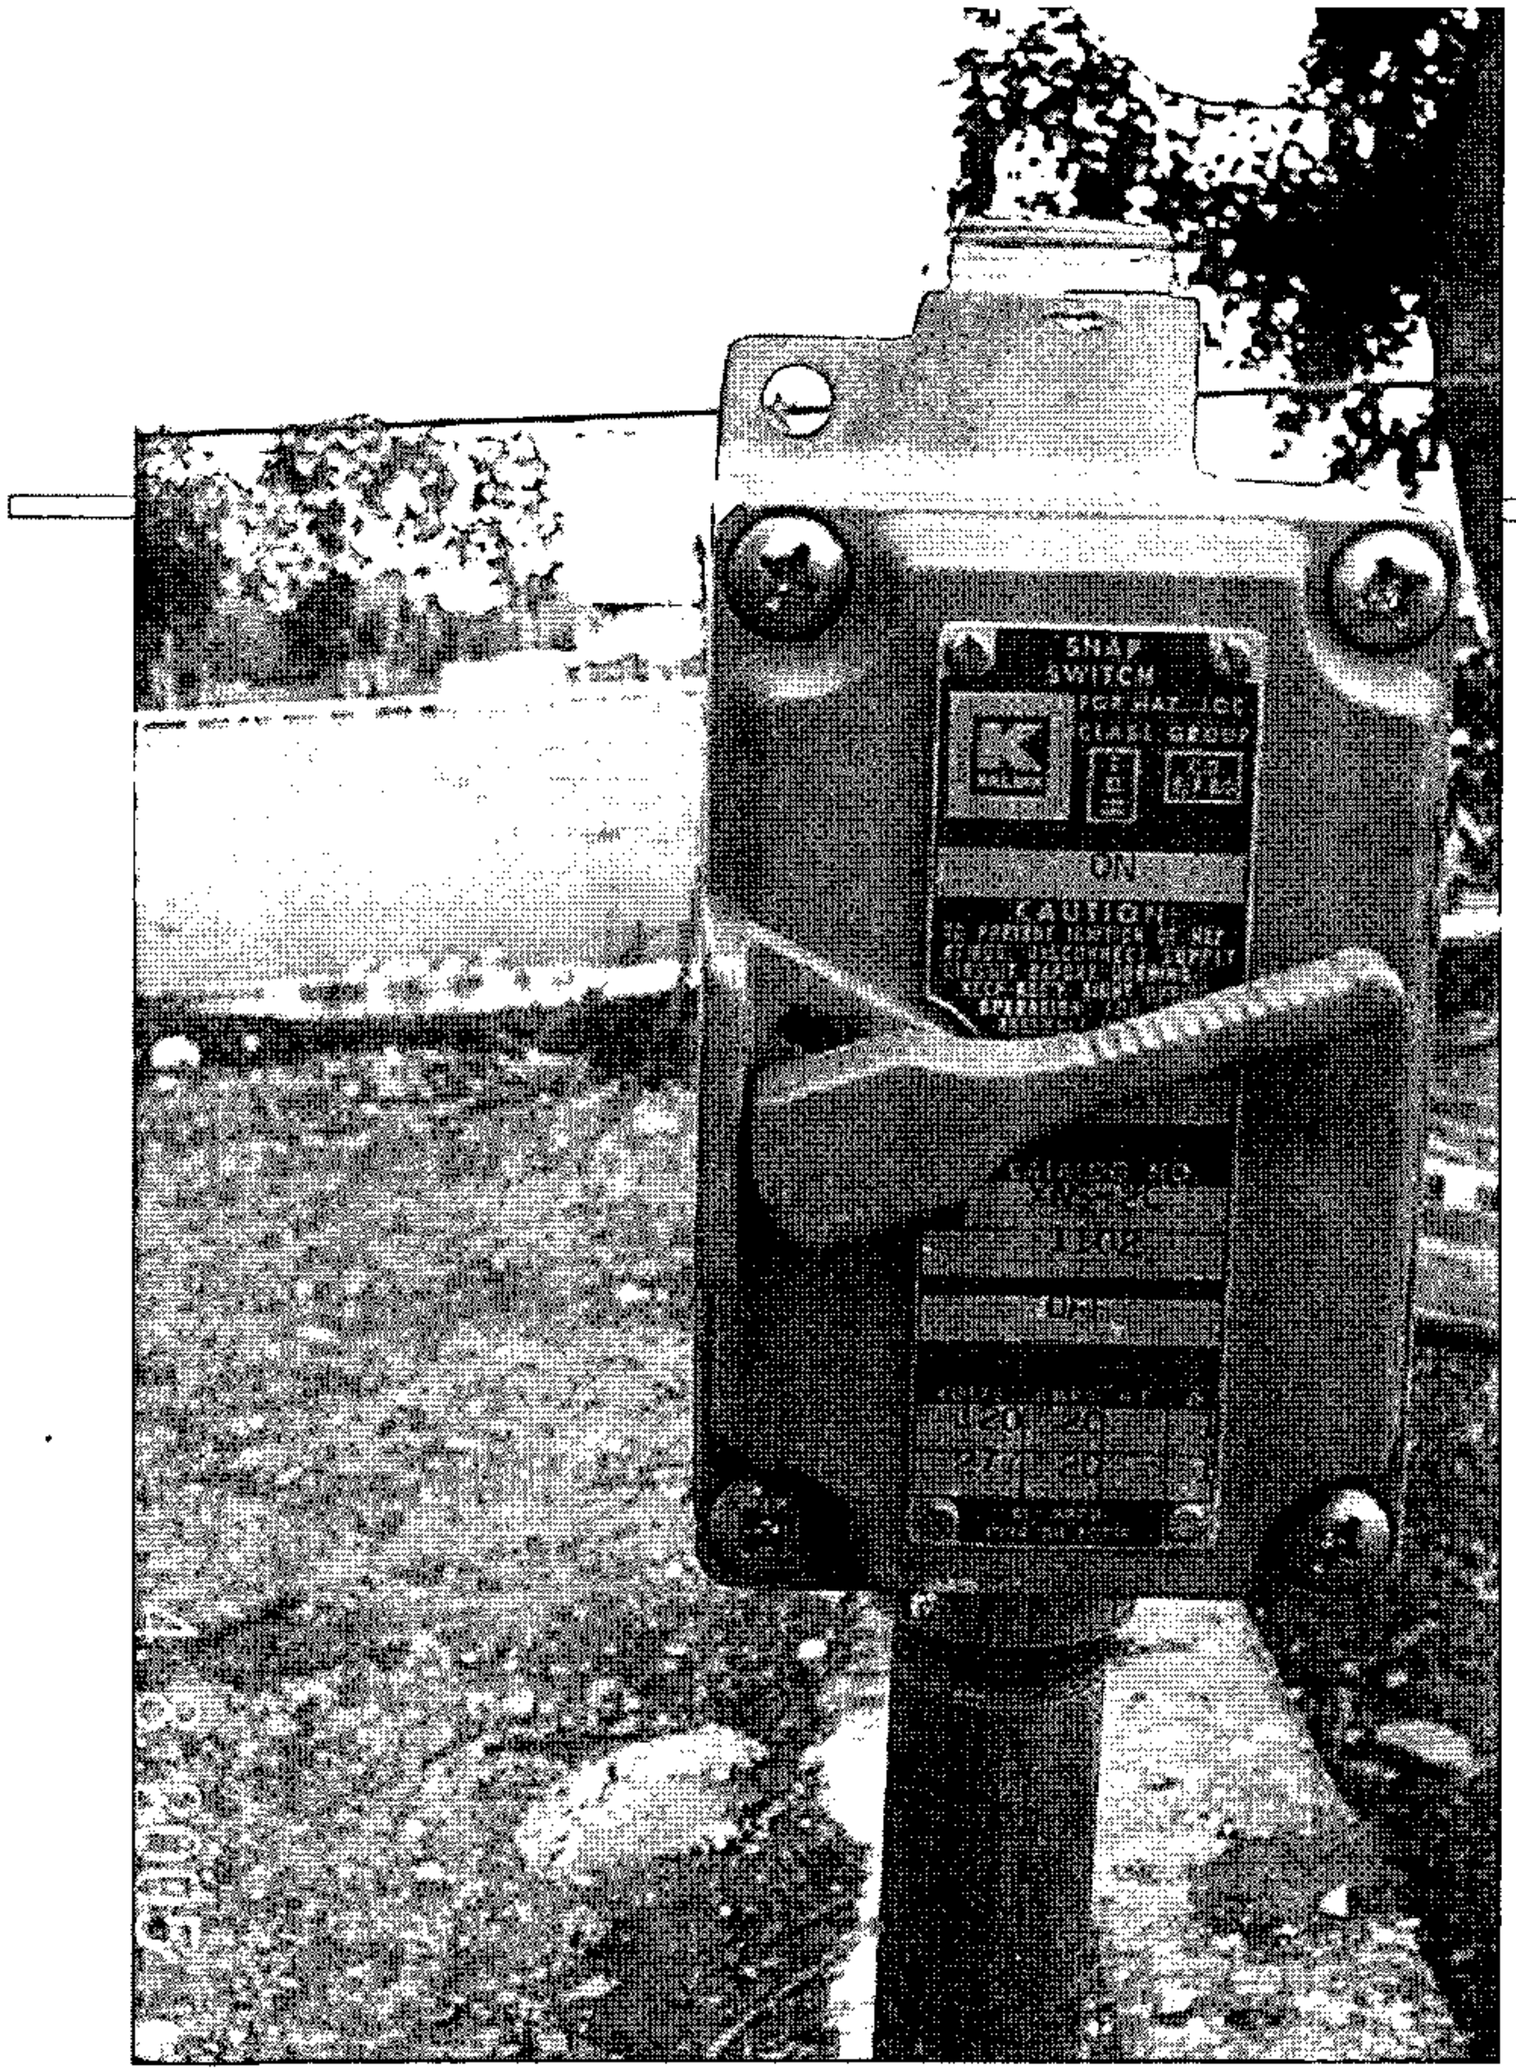
- The key to safety is to handle materials in ways that minimize the hazard:
  - Do not smoke near the fueling station
  - Use gloves when cleaning up diesel spills
  - Understand where the emergency shut off switch is

How do I know if there is a leak in the UST?

- There are leak sensors at the bottom of the tank and at the fueling line that will sound an alarm if there is a leak
  - If you're curious as to the sound, you can press the "test" button on the dispenser

Monitoring panel



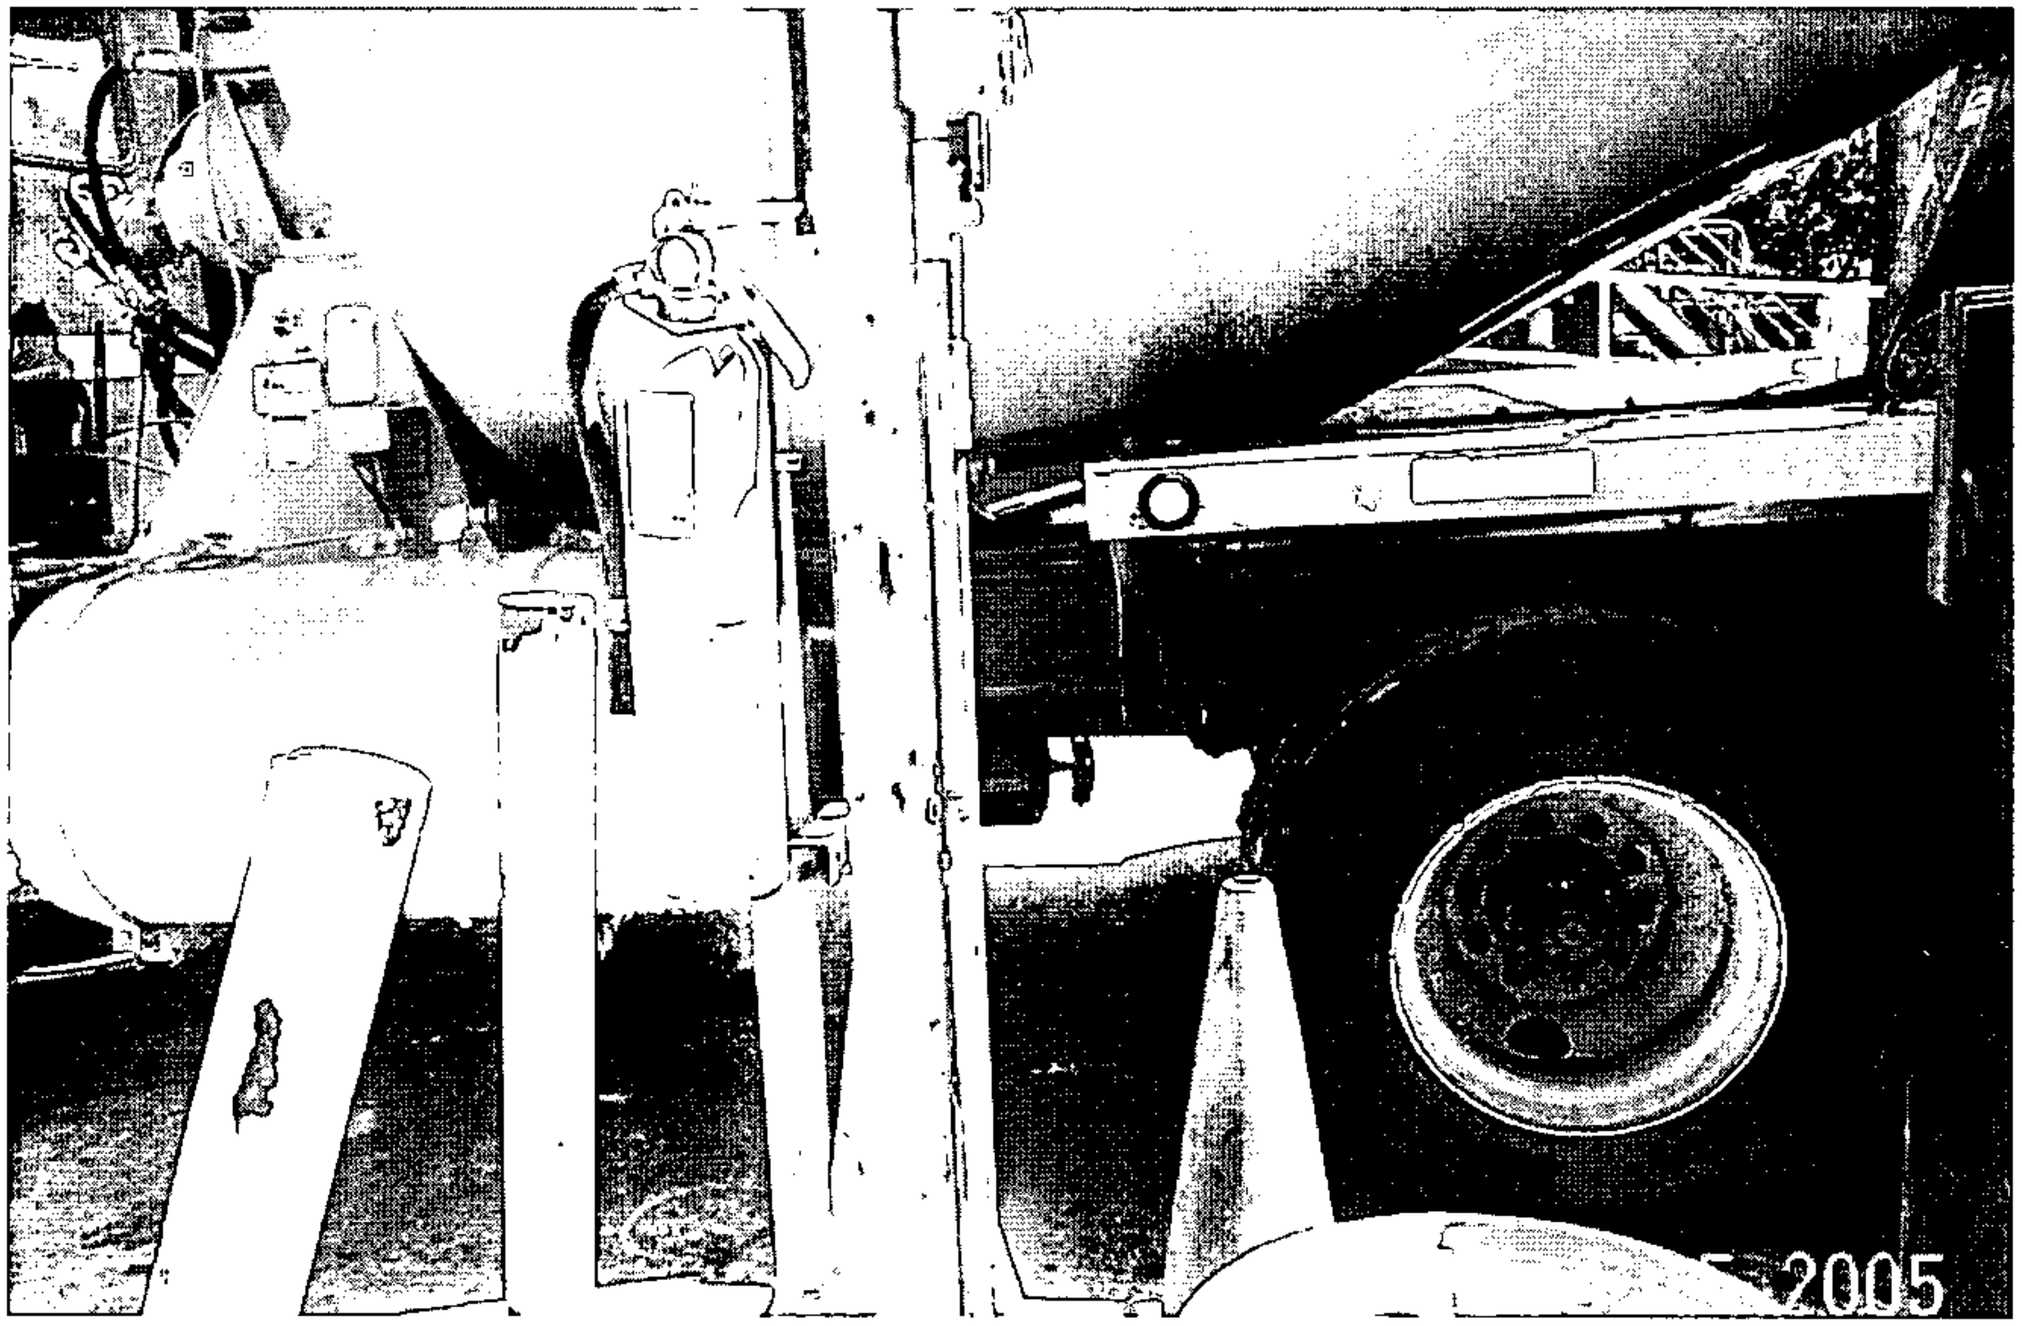


Emergency shut-off switch

- Clearly labeled and visible so everyone knows where it is
- Know how to use it!

Fire extinguishers

- Keep near dispensers
- Know how to use one: PASS



Spill Kits

- Located in all areas where spills might occur
- What is in a spill kit?
  - Absorbent materials: petroleum socks or "kitty litter"
  - Shovel if using kitty litter
  - Containment for used absorbent

So if there's a spill and no one else is around…

- If it is a small spill or a leak, you can clean it up with the absorbents in the spill kit
- Use gloves to pick up used absorbent
  - It is important to clean up used absorbent, since water (i.e. rain or wash water) can leach the oils out from the absorbent
- Place used absorbent in used absorbent container
  - It <u>CANNOT</u> go in the garbage!!

Spill Kits

Spill Response

- Emergency response and contingency plan
  - These are described in your Hazardous Materials Management Plan (HMMP) and Spill Prevention Control and Countermeasure (SPCC) Plan
  - Emergency numbers are in there: local fire departments, hospitals, hazardous waste haulers
  - Where are these plans?

Spill Response

- Call Environmental Services immediately if there is a spill offsite, or to a storm water drain
  - Contact information is on the Environmental Services website
  - There are time limits for reporting to different agencies
- For large or dangerous spills, call 911

In conclusion, things to keep in mind if there is a spill:

- Be sure that it is safe to clean up the spill or leak.
  - If the spill is too large for one person to clean up, get help!
- Prevent spills from leaving our site, especially down the storm drains on site
  - If you can't clean it, then contain it
- Be sure that used absorbent is not thrown in the garbage

Application No.	19542
BAAQMD GDF No.	11370

Equipment Location:
Graniterock Company
120 Graniterock Way
San Jose, CA 95136

Dear Applicant:

This is your Authority to Construct the following:

GDF Modification – Phase II Removal/ORVR Exemption

Resulting in:

One 10,000 gallon diesel tank with one diesel nozzle
One 5,000 gallon underground gasoline tank
One conventional nozzle

Vapor Recovery Equipment

Phase I

Retain existing EVR-certified Two Point system, pursuant to California Air Resources Board (CARB) Executive Order **VR-101 (Phil Tite), VR-102 (OPW), VR-103 (EBW)** or **VR-104 (CNI).**

Phase II

Exempt per. Section 8-7-112.9, ORVR Fleets

Notification

Please contact your assigned Permit Engineer, listed in the correspondence section of this letter, by phone, by fax, or in writing at least three days before the initial operation of the equipment is to take place so that we may observe the equipment in operation and verify conformance with the Authority to Construct. Operation includes any start-up of the source for testing or other purposes. Operation of equipment without notification to the District may result in enforcement action. **Please do not send start-up notifications to the Air Pollution Control Officer**

To: 'Tina Lau'
Subject: RE: UST Operating Permit

Tina,

You have two tanks which share the same secondary containment, but the tanks are two separate USTs. SJFD records reflect this for your site and for all sites which use USTs that consist of multiple compartments.

Thank you,

Mike Randolph

Cc: Aaron Johnston-Karas
Subject: RE: UST Operating Permit

Thanks, Mike.

So to clarify: even though there is only 1 double-compartment tank, the SJFD permits each compartment as an active tank and thus lists the site as having 2 active tanks. I will file this with our permit to avoid any confusion in the future (i.e. people looking for two tanks when there is only one).

Please note I have already submitted two UST operating permit applications, one for diesel and one for gasoline, and the two operating permits have already been issued. As long as it's in the SJFD record that there is only 1 tank with 2 compartments, not two separate tanks at the site, I am satisfied.

Thank you,

Tina

To: Tina Lau
Subject: RE: UST Operating Permit

Tina,

Thank you for your letter stating your questions/concerns about the UST operating permits for 120 Granite Rock Way. Each compartment of a UST is considered a separate UST as far as issuing separate UST operating permits. This is indicated on the Operating Permit Application-Tank Information under Section II, box 434. Hence, each compartment is required to have a separate Operating Permit Application. You are correct that the monitoring system is a Pneumercator LC 100, while the sensors are LS-3.

Please submit two UST Operating Permit Applications - one for the diesel and one for the gasoline

compartments. Once, these applications are received I can issue new UST Operating Permits.

If you have any other questions, please do not hesitate to contact me.

Mike Randolph
Hazardous Materials Inspector
San Jose Fire Department

To: Randolph, Mike
Cc: Aaron Johnston-Karas
Subject: UST Operating Permit

Mike,

I have received the UST operating permit for our facility at 120 Graniterock Way, San Jose. Thank you for that. But I noticed that the permit is for 2 tanks. There is only one tank on site; it is a double-compartment tank of diesel and gasoline. Although it stores two materials and has two compartments, it is still just 1 tank. I had filled out a Form B for each compartment per the instructions on the form, but there should only be 1 tank on site.

In addition, the Monitoring System should be Pneumercator, not LS-3. This is true for both compartments of the tank.

In summary, will you please correct the UST Operating Permit in the following:

1. Change number of active tanks to 1 active tank (with 2 compartments on site), not 2 active tanks
2. Change the Monitoring System to Pneumercator, not LS-3.

Thank you,

Tina

Good Afternoon Tina,

RE: Status of UST and Fire Code Violations at 120 Granite Rock Way

In response to your letter dated June 15, 2010, updated information is needed by the Fire Department to allow for either the transfer of the current UST Operating Permits or to issue new UST Operating Permits. Our records show that the last UST Operating Permits for this site were effective 9/04/2002 and you previously stated that the current company took ownership of this business and the USTs in 2004. In addition, there have been a few upgrades/changes associated with the USTs at this location since the last Form A and Form B's have been submitted to the San Jose Fire Department. Hence, please submit the following information so that I can issue current UST Operating Permits for the USTs at this site:

Current Form A and Form B, aka UST Operating Permit Application - Facility Information (Form A) and UST Operating Permit Application - Tank Application (Form B)
Certification of Financial Responsibility with the information under Section C completed.
Please provide a copy of the 2009 Monitoring System Certification.

Once the above information is received, I should be able to issue current UST Operating Permits.

Regarding two other violations:

If you could provide me with some documentation about the training that the truck drivers have received to show that they know how to dispense furel and what to do in an emergency that should address the unattended self-service violation.

Finally, Inspector Mike Lepisto informed me that the Aboveground Waste Oil Tank Installation has not passed all necessary inspections. Please take action to perform all work necessary to obtain approval for the waste oil tank installation.

If you have any questions, please do not hesitate to contact me.

Thank you,

Mike Randolph
Hazardous Materials Inspector
San Jose Fire Department

2206.2.5 Portable tanks. Where approved by the fire code official, portable tanks are allowed to be temporarily used in conjunction with the dispensing of Class I, II or IIIA liquids into the fuel tanks of motor vehicles or motorized equipment on premises not normally accessible to the public. The approval shall include a definite time limit.

2206.2.6 Special enclosures. Where installation of tanks in accordance with Section 3404.2.11 is impractical, or because of property or building limitations, tanks for liquid motor fuels are allowed to be installed in buildings in special enclosures in accordance with all of the following:

1. The special enclosure shall be liquid tight and vapor tight.
2. The special enclosure shall not contain backfill.
3. Sides, top and bottom of the special enclosure shall be of reinforced concrete at least 6 inches (152 mm) thick, with openings for inspection through the top only.
4. Tank connections shall be piped or closed such that neither vapors nor liquid can escape into the enclosed space between the special enclosure and any tanks inside the special enclosure.
5. Means shall be provided whereby portable equipment can be employed to discharge to the outside any vapors which might accumulate inside the special enclosure should leakage occur.
6. Tanks containing Class I, II or IIIA liquids inside a special enclosure shall not exceed 6,000 gallons (22 710 L) in individual capacity or 18,000 gallons (68 130 L) in aggregate capacity.
7. Each tank within special enclosures shall be surrounded by a clear space of not less than 3 feet (910 mm) to allow for maintenance and inspection.

2206.3 Security. Above-ground tanks for the storage of liquid motor fuels shall be safeguarded from public access or unauthorized entry in an approved manner.

2206.4 Physical protection. Guard posts complying with Section 312 or other approved means shall be provided to protect above-ground tanks against impact by a motor vehicle unless the tank is listed as a protected above-ground tank with vehicle impact protection.

2206.5 Secondary containment. Above-ground tanks shall be provided with drainage control or diking in accordance with Chapter 34. Drainage control and diking is not required for listed secondary containment tanks. Secondary containment systems shall be monitored either visually or automatically. Enclosed secondary containment systems shall be provided with emergency venting in accordance with Section 2206.6.2.5.

2206.6 Piping, valves, fittings and ancillary equipment for use with flammable or combustible liquids. The design, fabrication, assembly, testing and inspection of piping, valves, fittings and ancillary equipment for use with flammable or combustible liquids shall be in accordance with Chapter 34 and Sections 2206.6.1 through 2206.6.3.

2206.6.1 Protection from damage. Piping shall be located such that it is protected from physical damage.

2206.6.2 Piping, valves, fittings and ancillary equipment for above-ground tanks for Class I, II and IIIA liquids. Piping, valves, fittings and ancillary equipment for above-ground tanks shall comply with Sections 2206.6.2.1 through 2206.6.2.6.

2206.6.2.1 Tank openings. Tank openings for above-ground tanks shall be through the top only.

2206.6.2.2 Fill-pipe connections. The fill pipe for above-ground tanks shall be provided with a means for making a direct connection to the tank vehicle's fuel-delivery hose so that the delivery of fuel is not exposed to the open air during the filling operation. Where any portion of the fill pipe exterior to the tank extends below the level of the top of the tank, a check valve shall be installed in the fill pipe not more than 12 inches (305 mm) from the fill-hose connection.

2206.6.2.3 Overfill protection. Overfill protection shall be provided for above-ground flammable and combustible liquid storage tanks in accordance with Sections 3404.2.7.5.8 and 3404.2.9.6.6.

2206.6.2.4 Siphon prevention. An approved antisiphon method shall be provided in the piping system to prevent flow of liquid by siphon action.

2206.6.2.5 Emergency relief venting. Above-ground storage tanks, tank compartments and enclosed secondary containment spaces shall be provided with emergency relief venting in accordance with Chapter 34.

2206.6.2.6 Spill containers. A spill container having a capacity of not less than 5 gallons (19 L) shall be provided for each fill connection. For tanks with a top fill connection, spill containers shall be noncombustible and shall be fixed to the tank and equipped with a manual drain valve that drains into the primary tank. For tanks with a remote fill connection, a portable spill container is allowed.

2206.6.3 Piping, valves, fittings and ancillary equipment for underground tanks. Piping, valves, fittings and ancillary equipment for underground tanks shall comply with Chapter 34 and NFPA 30A.

2206.7 Fuel-dispensing systems for flammable or combustible liquids. The design, fabrication and installation of fuel-dispensing systems for flammable or combustible liquid fuels shall be in accordance with Sections 2206.7.I through 2206.7.9.2.4.

2206.7.1 Listed equipment. Electrical equipment, dispensers, hose, nozzles and submersible or subsurface pumps used in fuel-dispensing systems shall be listed.

2206.7.2 Fixed pumps required. Class I and II liquids shall be transferred from tanks by means of fixed pumps designed and equipped to allow control of the flow and prevent leakage or accidental discharge.

2206.7.3 Mounting of dispensers. Dispensing devices except those installed on top of a protected above-ground

tank that qualifies as vehicle-impact resistant, shall be protected against physical damage by mounting on a concrete island 6 inches (152 mm) or more in height, or shall be protected in accordance with Section 312. Dispensing devices shall be installed and securely fastened to their mounting surface in accordance with the dispenser manufacturer's instructions. Dispensing devices installed indoors shall be located in an approved position where they cannot be struck by an out-of-control vehicle descending a ramp or other slope.

2206.7.4 Dispenser emergency valve. An approved automatic emergency shutoff valve designed to close in the event of a fire or impact shall be properly installed in the liquid supply line at the base of each dispenser supplied by a remote pump. The valve shall be installed so that the shear groove is flush with or within $^1/_2$ inch (12.7 mm) of the top of the concrete dispenser island and there is clearance provided for maintenance purposes around the valve body and operating parts. The valve shall be installed at the liquid supply line inlet of each overhead-type dispenser. Where installed, a vapor return line located inside the dispenser housing shall have a shear section or approved flexible connector for the liquid supply line emergency shutoff valve to function. Emergency shutoff valves shall be installed and maintained in accordance with the manufacturer's instructions, tested at the time of initial installation and at least yearly thereafter in accordance with Section 2205.2.2.

2206.7.5 Dispenser hose. Dispenser hoses shall be a maximum of 18 feet (5486 mm) in length unless otherwise approved. Dispenser hoses shall be listed and approved. When not in use, hoses shall be reeled, racked or otherwise protected from damage.

2206.7.5.1 Breakaway devices. Dispenser hoses for Class I and II liquids shall be equipped with a listed emergency breakaway device designed to retain liquid on both sides of a breakaway point. Such devices shall be installed and maintained in accordance with the manufacturer's instructions. Where hoses are attached to hose-retrieving mechanisms, the emergency breakaway device shall be located between the hose nozzle and the point of attachment of the hose-retrieval mechanism to the hose.

2206.7.6 Fuel delivery nozzles. A listed automatic-closing-type hose nozzle valve with a latch-open device shall be provided on island-type dispensers used for dispensing Class I, II or IIIA liquids.

Overhead-type dispensing units shall be provided with a listed automatic-closing-type hose nozzle valve *with* a latch-open device. *The design of the system shall be such that the hose nozzle valve will close automatically in the event the valve is released from a fill opening or upon impact with a driveway.*

Any latch-open device determined to be inoperative by the fire code official shall be repaired or replaced, within 48 hours after notification.

2206.7.6.1 Special requirements for nozzles. Where dispensing of Class I, II or IIIA liquids is performed, a listed automatic-closing-type hose nozzle valve shall be used incorporating all of the following features:

1. The hose nozzle valve shall be equipped with an integral latch-open device.
2. When the flow of product is normally controlled by devices or equipment other than the hose nozzle valve, the hose nozzle valve shall not be capable of being opened unless the delivery hose is pressurized. If pressure to the hose is lost, the nozzle shall close automatically.

   Exception: Vapor recovery nozzles incorporating insertion interlock devices designed to achieve shutoff on disconnect from the vehicle fill pipe.
3. The hose nozzle shall be designed such that the nozzle is retained in the fill pipe during the filling operation.
4. The system shall include listed equipment with a feature that causes or requires the closing of the hose nozzle valve before the product flow can be resumed or before the hose nozzle valve can be replaced in its normal position in the dispenser.

2206.7.7 Remote pumping systems. Remote pumping systems for liquid fuels shall comply with Sections 2206.7.7.1 and 2206.7.7.2.

2206.7.7.1 Leak detection. Where remote pumps are used to supply fuel dispensers, each pump shall have installed on the discharge side a listed leak detection device that will detect a leak in the piping and dispensers and provide an indication. A leak detection device is not required if the piping from the pump discharge to under the dispenser is above ground and visible.

2206.7.7.2 Location. Remote pumps installed above grade, outside of buildings, shall be located not less than 10 feet (3048 mm) from lines of adjoining property that can be built upon and not less than 5 feet (1524 mm) from any building opening. Where an outside pump location is impractical, pumps are permitted to be installed inside buildings as provided for dispensers in Section 2201.4 and Chapter 34. Pumps shall be substantially anchored and protected against physical damage.

2206.7.8 Gravity and pressure dispensing. Flammable liquids shall not be dispensed by gravity from tanks, drums, barrels or similar containers. Flammable or combustible liquids shall not be dispensed by a device operating through pressure within a storage tank, drum or container.

2206.7.9 Vapor-recovery and vapor-processing systems. Vapor-recovery and vapor-processing systems shall be in accordance with Sections 2206.7.9.1 through 2206.7.9.2.4.

2206.7.9.1 Vapor-balance systems. Vapor-balance systems shall comply with Sections 2206.7.9.1.1 through 2206.7.9.1.5.

2206.7.9.1.1 Dispensing devices. Dispensing devices incorporating provisions for vapor recovery shall be listed and labeled. When existing listed or

105.6.46 Wood products. An operational permit is required to store chips, hogged material, lumber or plywood in excess of 200 cubic feet (6 m^3).

105.6.47 Additional Permits. *In addition to the permits required by Appendix Chapter I, Section 105.6, the following permits shall be obtained from the Bureau of Fire Prevention prior to engaging in the following activities, operations, practices or functions:*

1. ***Production facilities.*** *To change use or occupancy, or allow the attendance of a live audience, or for wrap parties.*
2. ***Pyrotechnics and special effects.*** *To use pyrotechnic special effects, open flame, use of flammable or combustible liquids and gases, welding, and the parking of motor vehicles in any building or location used for the purpose of motion picture, television and commercial production.*
3. ***Live audiences.*** *To install seating arrangements for live audiences in approved production facilities, production studios and sound stages. See Chapter 46.*

105.7 Required construction permits. The fire code official is authorized to issue construction permits for work as set forth in Appendix Chapter 1, Sections 105.7.1 through 105.7.13.

105.7.1 Automatic fire-extinguishing systems. A construction permit is required for installation of or modification to an automatic fire-extinguishing system. Maintenance performed in accordance with this code is not considered a modification and does not require a permit.

105.7.2 Battery systems. A permit is required to install stationary storage battery systems having a liquid capacity of more than 50 gallons (189 L).

105.7.3 Compressed gases. When the compressed gases in use or storage exceed the amounts listed in Appendix Chapter 1, Table 105.6.8, a construction permit is required to install, repair damage to, abandon, remove, place temporarily out of service, or close or substantially modify a compressed gas system.

Exceptions:

1. Routine maintenance.
2. For emergency repair work performed on an emergency basis, application for permit shall be made within two working days of commencement of work.

The permit applicant shall apply for approval to close storage, use or handling facilities at least 30 days prior to the termination of the storage, use or handling of compressed or liquefied gases. Such application shall include any change or alteration of the facility closure plan filed pursuant to Section 2701.6.3. The 30-day period is not applicable when approved based on special circumstances requiring such waiver.

105.7.4 Fire alarm and detection systems and related equipment. A construction permit is required for installation of or modification to fire alarm and detection systems and related equipment. Maintenance performed in accordance with this code is not considered a modification and does not require a permit.

105.7.5 Fire pumps and related equipment. A construction permit is required for installation of or modification to fire pumps and related fuel tanks, jockey pumps, controllers, and generators. Maintenance performed in accordance with this code is not considered a modification and does not require a permit.

105.7.6 Flammable and combustible liquids. A construction permit is required:

1. To repair or modify a pipeline for the transportation of flammable or combustible liquids.
2. To install, construct or alter tank vehicles, equipment, tanks, plants, terminals, wells, fuel-dispensing stations, refineries, distilleries and similar facilities where flammable and combustible liquids are produced, processed, transported, stored, dispensed or used.
3. To install, alter, remove, abandon or otherwise dispose of a flammable or combustible liquid tank.

105.7.7 Hazardous materials. A construction permit is required to install, repair damage to, abandon, remove, place temporarily out of service, or close or substantially modify a storage facility or other area regulated by Chapter 27 when the hazardous materials in use or storage exceed the amounts listed in Appendix Chapter 1, Table 105.6.20.

Exceptions:

1. Routine maintenance.
2. For emergency repair work performed on an emergency basis, application for permit shall be made within two working days of commencement of work.

105.7.8 Industrial ovens. A construction permit is required for installation of industrial ovens covered by Chapter 21.

Exceptions:

1. Routine maintenance.
2. For repair work performed on an emergency basis, application for permit shall be made within two working days of commencement of work.

105.7.9 LP-gas. A construction permit is required for installation of or modification to an LP-gas system.

105.7.10 Private fire hydrants. A construction permit is required for the installation or modification of private fire hydrants.

105.7.11 Spraying or dipping. A construction permit is required to install or modify a spray room, dip tank or booth.

105.7.12 Standpipe systems. A construction permit is required for the installation, modification, or removal from service of a standpipe system. Maintenance performed in accordance with this code is not considered a modification and does not require a permit.

105.7.13 Temporary membrane structures, tents and canopies. A construction permit is required to erect an

Re: UST Operating Permit renewal at 120 Graniterock Way, San Jose CA

[redacted]

Dear Mr. Randolph,

I would like to thank you in advance for your assistance with our Underground Storage Tank (UST) operating permit at 120 Graniterock Way, which appears to have expired in 2007. There is some significant confusion surrounding this specific UST operating permit renewal process that contrasts with other tanks operated by Graniterock in the City of San Jose and surrounding counties. I noticed the form you emailed me was intended for a permit transfer to a new ownership, which is not our situation. Please confirm that another form was not intended to be attached.

I checked the California Code of Regulations and the Health and Safety Code sections relevant to UST permitting. I have also reviewed the San Jose Fire Department's website and the San Jose Municipal Ordinances regarding USTs. None of these sources provides guidance or requirements for an application process for a UST permit renewal. What is especially confusing for me and others at Graniterock is that at other facilities, it appears as if the renewed permit is generated by the CUPA after a site inspection and not by separate permit renewal application forms. For example, we received a renewal generated for our UST operating permit for our facility at 11711 Berryessa St. after the site inspection there in 2008, and I am not aware of a separate renewal application process. The renewal at Berryessa is consistent with my understanding of the process and, based on our phone conversation the other day, appears to be consistent with SJFD's typical standard operating procedure.

I suspect that the renewal for the permit at 120 Graniterock Way "fell through the cracks" in 2007. Looking through our inspection history, we had two separate inspectors in 2007. It is most likely that during this transitional period, prior to you, the permit renewal process was not completed after the inspections. Thus, our permit expired but was not reissued. Please note that

during this time, we have paid the necessary CUPA Hazardous Materials Permit invoices and the State UST surcharges. We have also maintained compliance with the annual and tri-annual certification requirements and other permit operating conditions, as well as the monthly Designated Operator inspections. As such, Graniterock requests that the SJFD issue a renewed permit as soon as possible so that we can close this paperwork loophole.

Again, I thank you in advance for a timely response so that we can resolve this issue very quickly. Do not hesitate to contact me at TLau@graniterock.com or at (831) 768-2009.

Sincerely,

Tina Lau

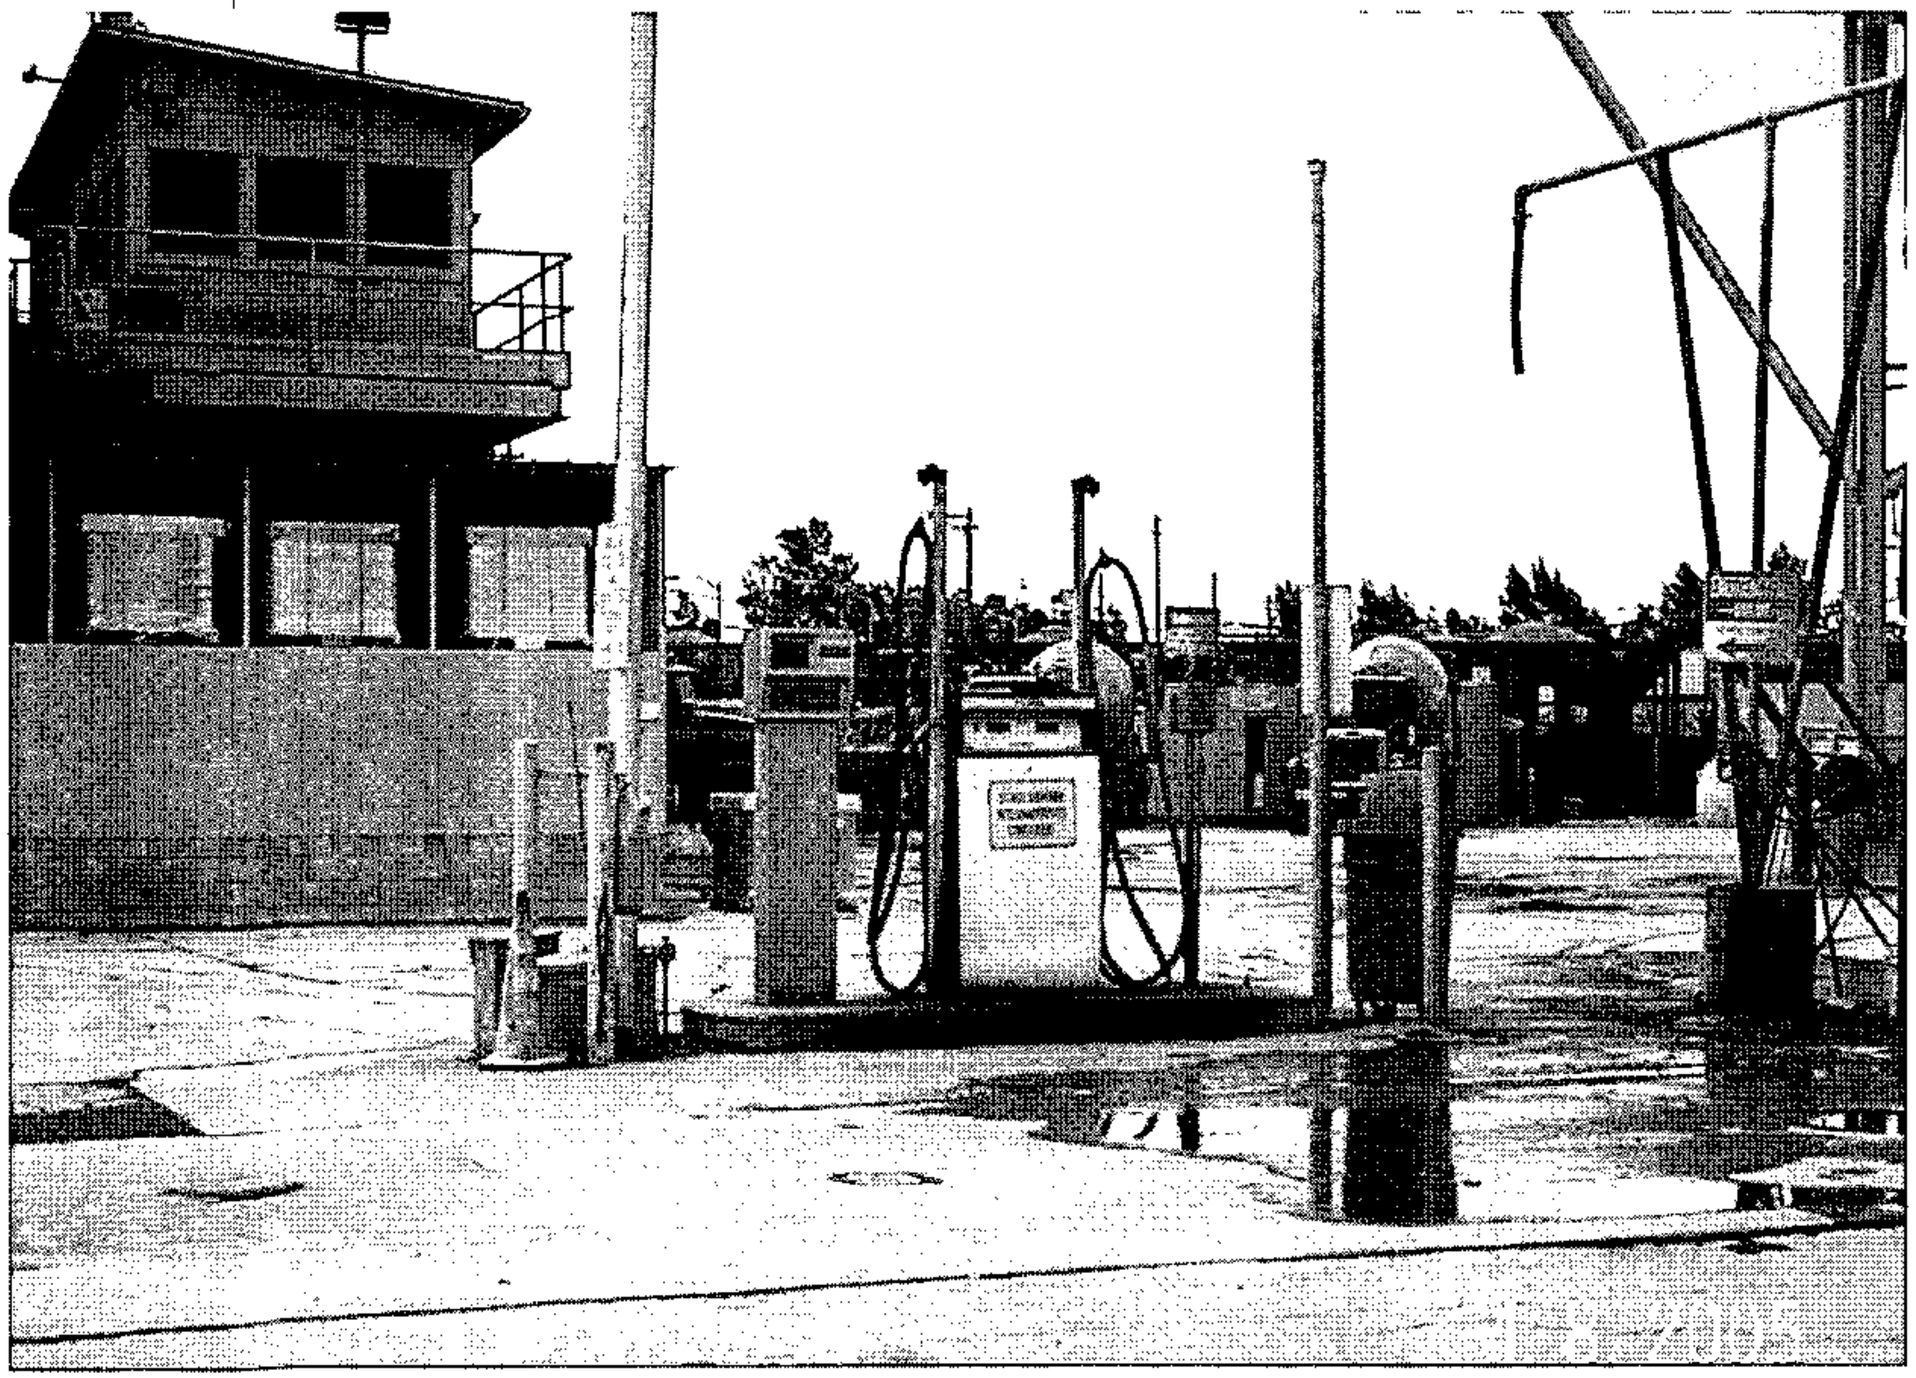
Underground Storage Tanks (USTs)



Graniterock Company

Prepared by Tina Lau, DO# 5247997-UC

Course Goal

To help you answer the following questions:

- Why am I here and why should I care about my branch's UST?
- What is in my branch's UST, and is it hazardous?
- How do I know if there is a leak?
- What should I do if there is a spill?
- Who should I call for help?

So you might be thinking…

- Why am *I* here?
- New Underground Storage Tank (UST) regulations came into effect in 2005
  - They require annual UST training of ALL employees on site
  - They require new hires to receive this training within 30 days of hire
- This way, anyone on site will know what to do if there is a leak or a spill.

Oil Leaks

- If not cleaned up, oil leaks and spills can create a storm water pollution issue and, in some cases, can cause soil contamination.
- Graniterock spends tens of thousands of dollars every year to clean up petroleum releases, some dating back to the early 1990s and before.
  - The key is to clean it up before it becomes a problem

Source Control for Petroleum

- Best way to control pollution is to start at the source: prevent spills and leaks from happening in the first place.

Where can spills occur? How do we control them?

Who Cares?

Graniterock does, of course. But here are some regulatory agencies we work with:

- City Environmental Health Department
- County Environmental Health Departments
- Fire Departments
- State Water Resource Control Board
- EPA
- Department of Toxic Substance Control
- Integrated Waste Management Board

Is there a hazardous material in the UST?

A hazardous material is any substance that can cause injury to people and damage to equipment.

Pretty much any material can be considered hazardous – including the diesel in your branch's underground storage tank.

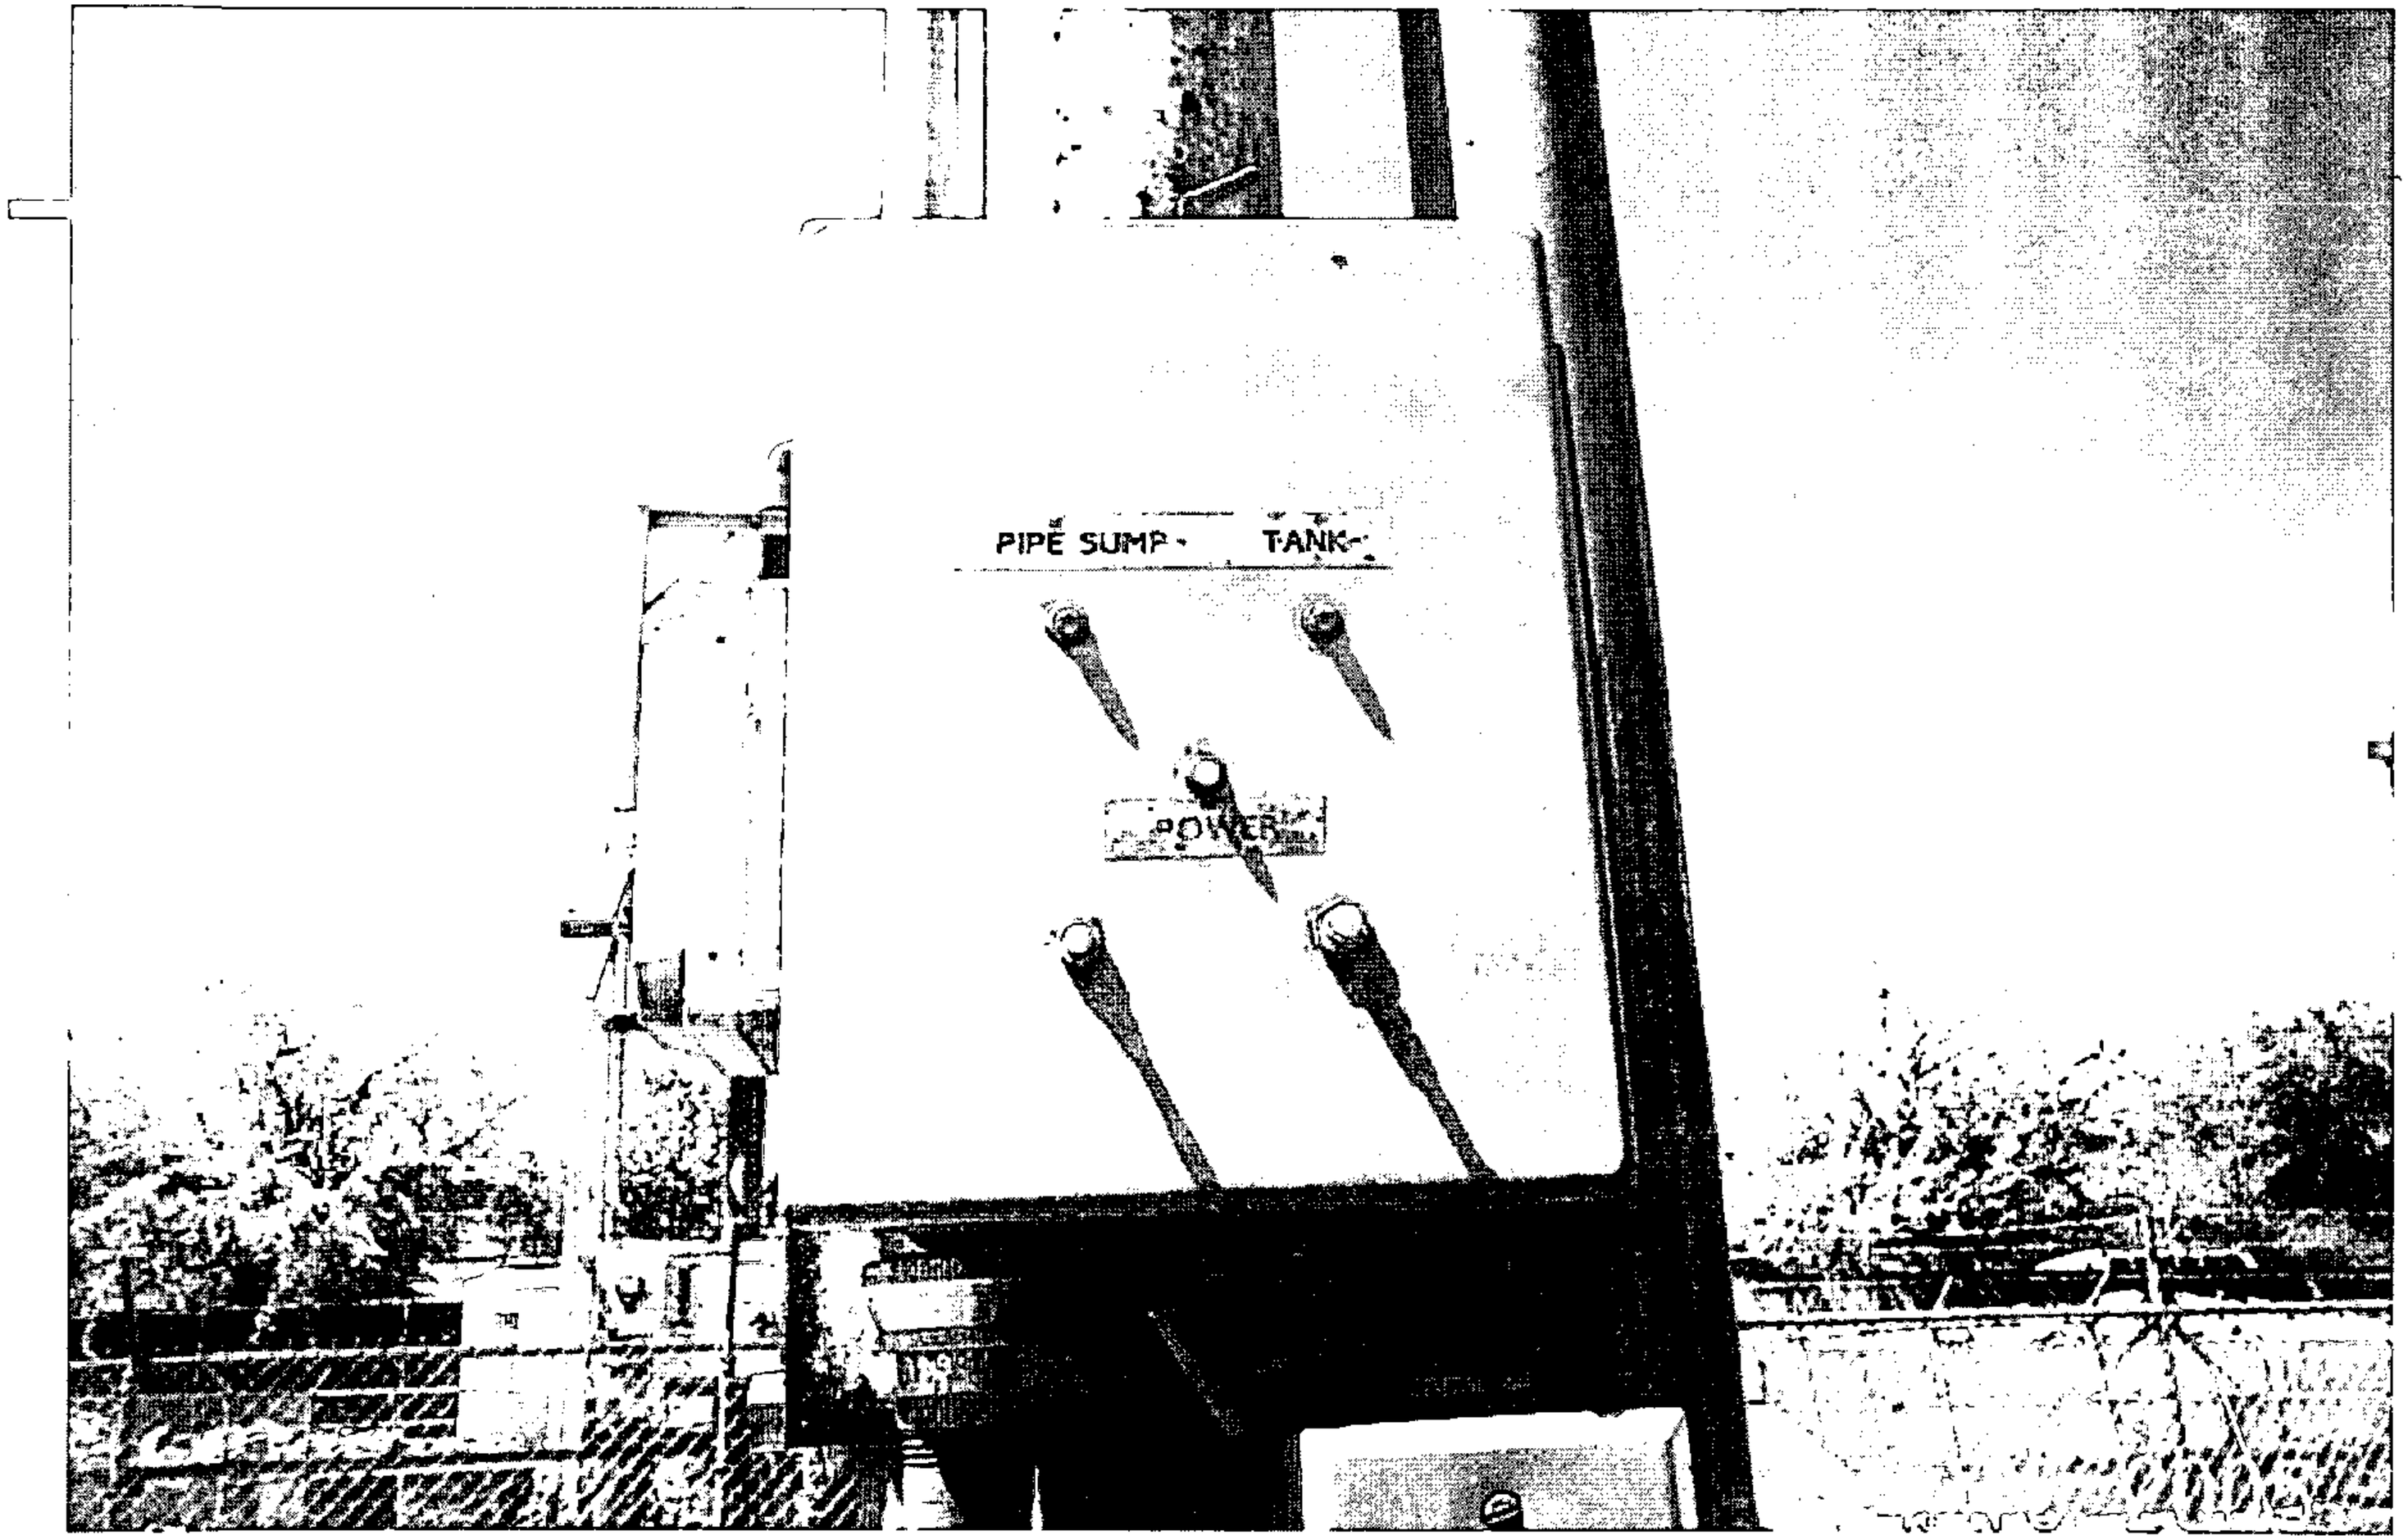
What makes it hazardous?

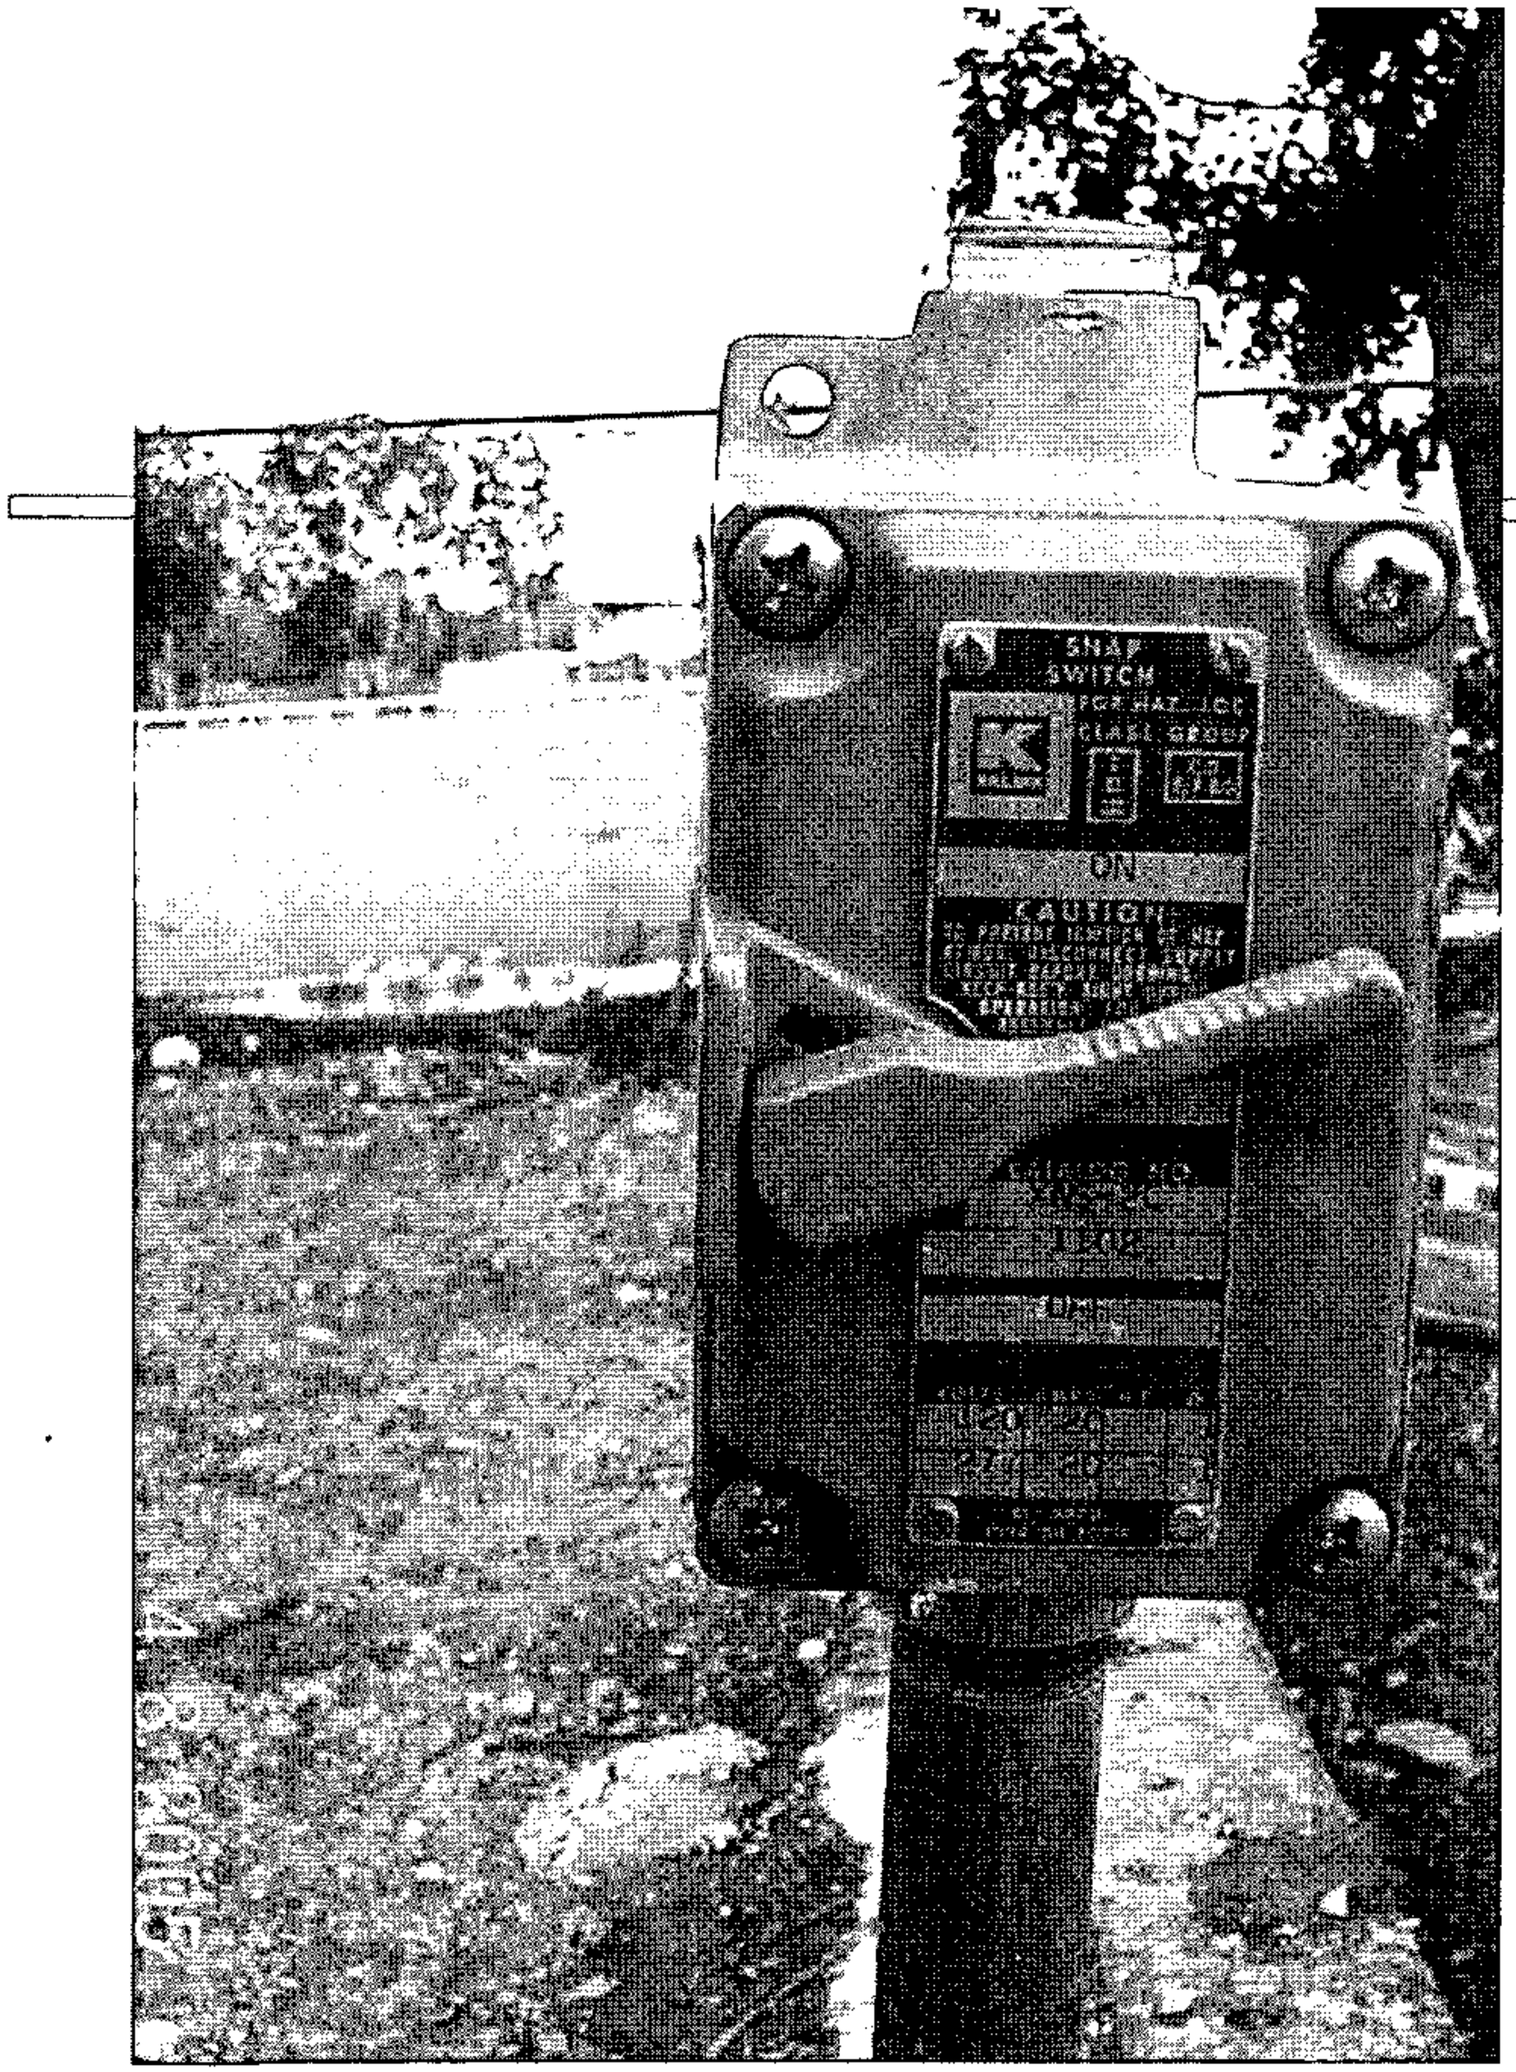
- The key to safety is to handle materials in ways that minimize the hazard:
  - Do not smoke near the fueling station
  - Use gloves when cleaning up diesel spills
  - Understand where the emergency shut off switch is

How do I know if there is a leak in the UST?

- There are leak sensors at the bottom of the tank and at the fueling line that will sound an alarm if there is a leak
  - If you're curious as to the sound, you can press the "test" button on the dispenser

Monitoring panel



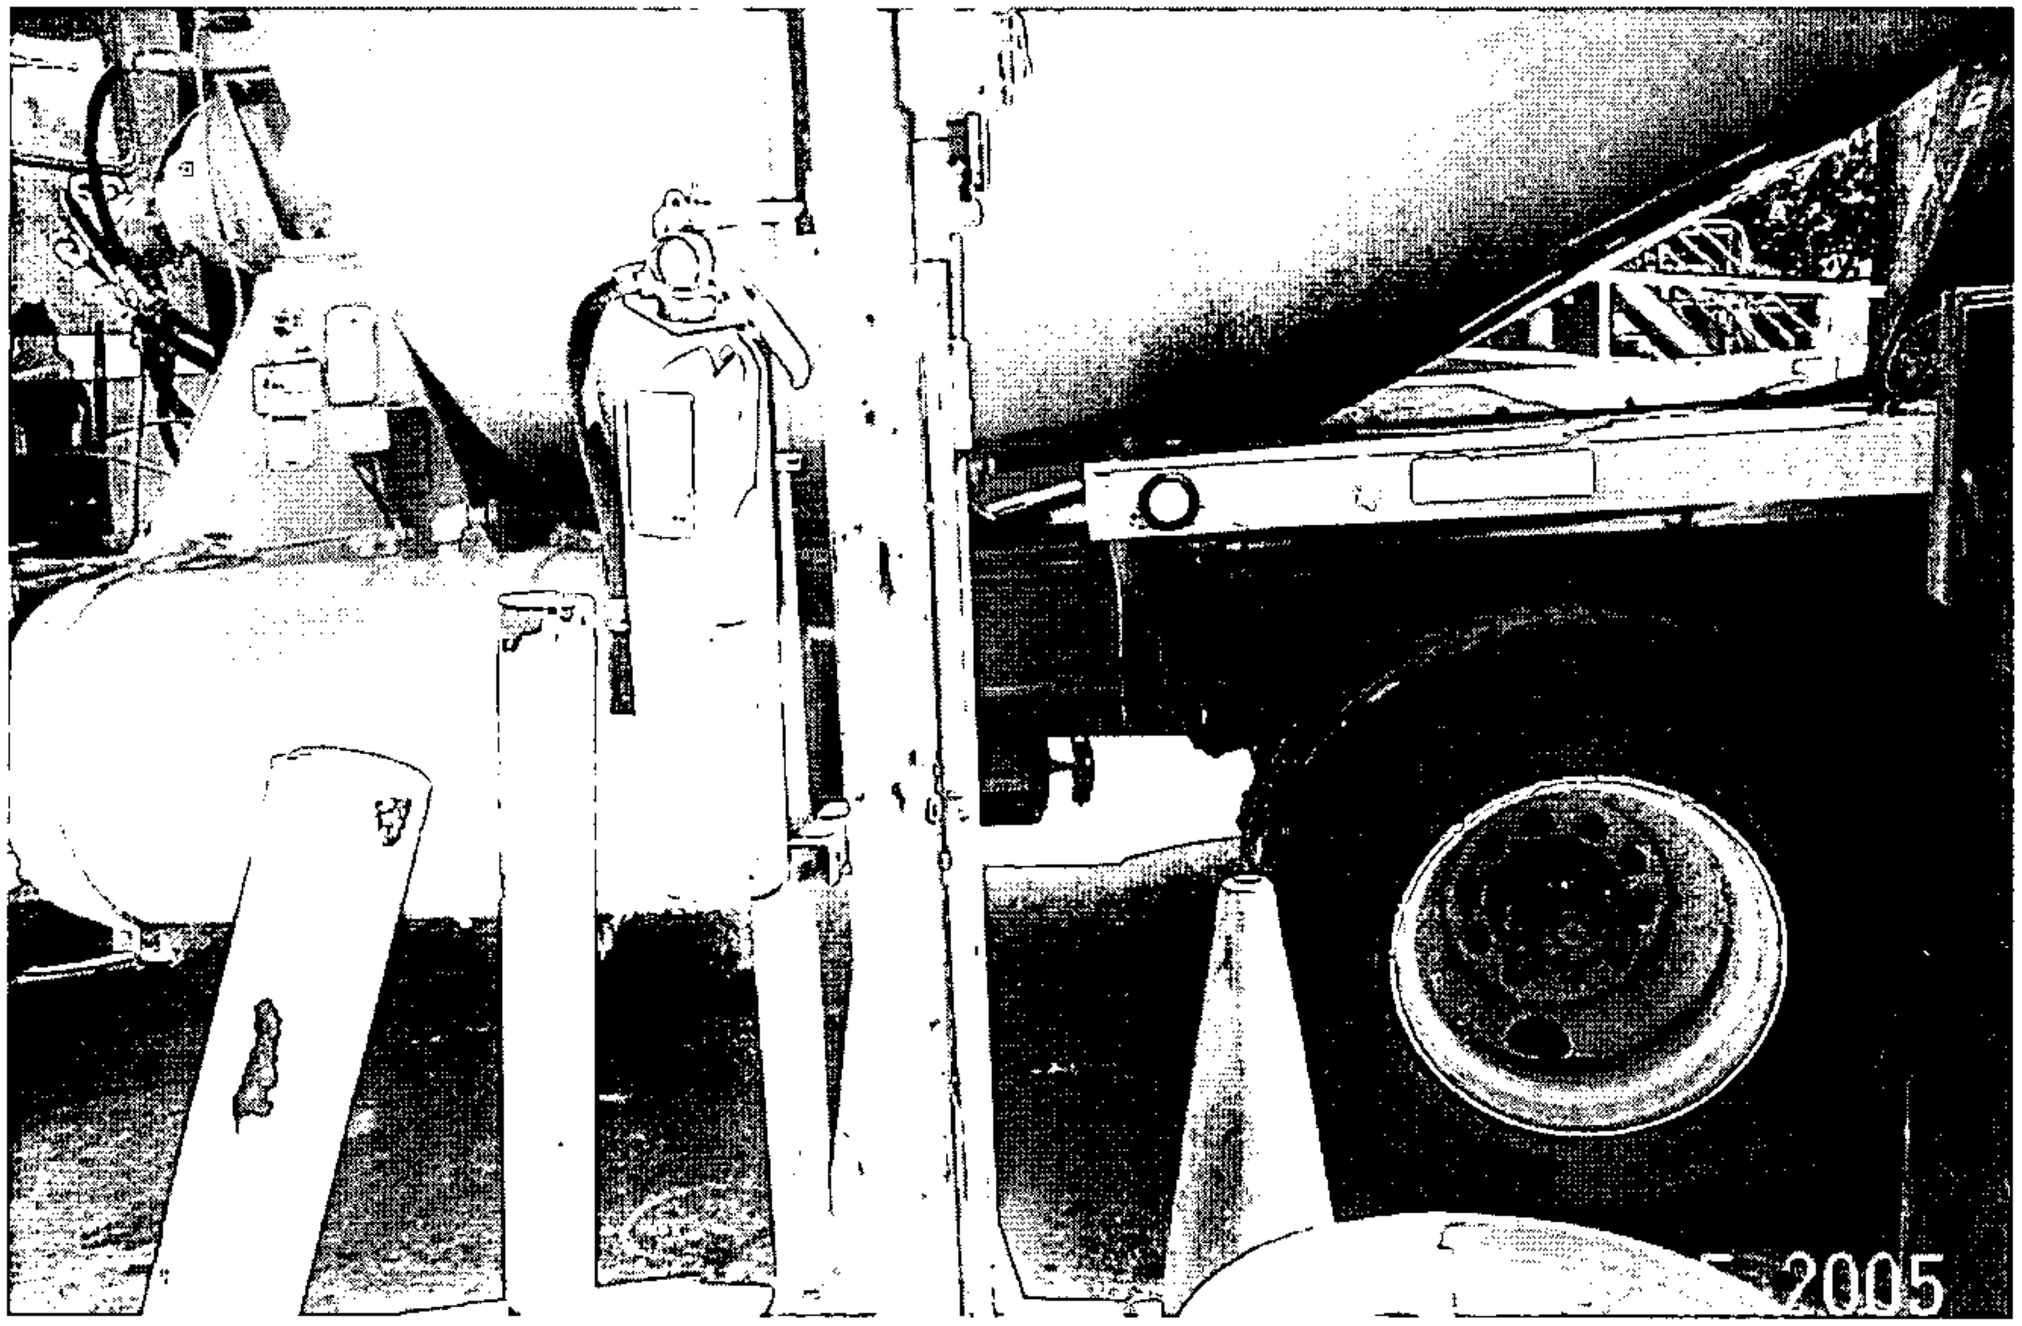


Emergency shut-off switch

- Clearly labeled and visible so everyone knows where it is
- Know how to use it!

Fire extinguishers

- Keep near dispensers
- Know how to use one: PASS



Spill Kits

- Located in all areas where spills might occur
- What is in a spill kit?
  - Absorbent materials: petroleum socks or "kitty litter"
  - Shovel if using kitty litter
  - Containment for used absorbent

So if there's a spill and no one else is around…

- If it is a small spill or a leak, you can clean it up with the absorbents in the spill kit
- Use gloves to pick up used absorbent
  - It is important to clean up used absorbent, since water (i.e. rain or wash water) can leach the oils out from the absorbent
- Place used absorbent in used absorbent container
  - It <u>CANNOT</u> go in the garbage!!

Spill Kits

Spill Response

- Emergency response and contingency plan
  - These are described in your Hazardous Materials Management Plan (HMMP) and Spill Prevention Control and Countermeasure (SPCC) Plan
  - Emergency numbers are in there: local fire departments, hospitals, hazardous waste haulers
  - Where are these plans?

Spill Response

- Call Environmental Services immediately if there is a spill offsite, or to a storm water drain
  - Contact information is on the Environmental Services website
  - There are time limits for reporting to different agencies
- For large or dangerous spills, call 911

In conclusion, things to keep in mind if there is a spill:

- Be sure that it is safe to clean up the spill or leak.
  - If the spill is too large for one person to clean up, get help!
- Prevent spills from leaving our site, especially down the storm drains on site
  - If you can't clean it, then contain it
- Be sure that used absorbent is not thrown in the garbage

Subject: RE: UST Operating Permit

Tina,

You have two tanks which share the same secondary containment, but the tanks are two separate USTs. SJFD records reflect this for your site and for all sites which use USTs that consist of multiple compartments.

Thank you,

Mike Randolph

Subject: RE: UST Operating Permit

Thanks, Mike.

So to clarify: even though there is only 1 double-compartment tank, the SJFD permits each compartment as an active tank and thus lists the site as having 2 active tanks. I will file this with our permit to avoid any confusion in the future (i.e. people looking for two tanks when there is only one).

Please note I have already submitted two UST operating permit applications, one for diesel and one for gasoline, and the two operating permits have already been issued. As long as it's in the SJFD record that there is only 1 tank with 2 compartments, not two separate tanks at the site, I am satisfied.

Thank you,

Tina

Subject: RE: UST Operating Permit

Tina,

Thank you for your letter stating your questions/concerns about the UST operating permits for 120 Granite Rock Way. Each compartment of a UST is considered a separate UST as far as issuing separate UST operating permits. This is indicated on the Operating Permit Application-Tank Information under Section II, box 434. Hence, each compartment is required to have a separate Operating Permit Application. You are correct that the monitoring system is a Pneumercator LC 100, while the sensors are LS-3.

Please submit two UST Operating Permit Applications - one for the diesel and one for the gasoline

compartments. Once, these applications are received I can issue new UST Operating Permits.

If you have any other questions, please do not hesitate to contact me.

Mike Randolph
Hazardous Materials Inspector
San Jose Fire Department

To: Randolph, Mike
Cc: Aaron Johnston-Karas
Subject: UST Operating Permit

Mike,

I have received the UST operating permit for our facility at 120 Graniterock Way, San Jose. Thank you for that. But I noticed that the permit is for 2 tanks. There is only one tank on site; it is a double-compartment tank of diesel and gasoline. Although it stores two materials and has two compartments, it is still just 1 tank. I had filled out a Form B for each compartment per the instructions on the form, but there should only be 1 tank on site.

In addition, the Monitoring System should be Pneumercator, not LS-3. This is true for both compartments of the tank.

In summary, will you please correct the UST Operating Permit in the following:

1. Change number of active tanks to 1 active tank (with 2 compartments on site), not 2 active tanks
2. Change the Monitoring System to Pneumercator, not LS-3.

Thank you,

Tina

Subject: 120 Granite Rock Way

Good Afternoon Tina,

RE: Status of UST and Fire Code Violations at 120 Granite Rock Way

In response to your letter dated June 15, 2010, updated information is needed by the Fire Department to allow for either the transfer of the current UST Operating Permits or to issue new UST Operating Permits. Our records show that the last UST Operating Permits for this site were effective 9/04/2002 and you previously stated that the current company took ownership of this business and the USTs in 2004. In addition, there have been a few upgrades/changes associated with the USTs at this location since the last Form A and Form B's have been submitted to the San Jose Fire Department. Hence, please submit the following information so that I can issue current UST Operating Permits for the USTs at this site:

Current Form A and Form B, aka UST Operating Permit Application - Facility Information (Form A) and UST Operating Permit Application - Tank Application (Form B)
Certification of Financial Responsibility with the information under Section C completed.
Please provide a copy of the 2009 Monitoring System Certification.

Once the above information is received, I should be able to issue current UST Operating Permits.

Regarding two other violations:

If you could provide me with some documentation about the training that the truck drivers have received to show that they know how to dispense furel and what to do in an emergency that should address the unattended self-service violation.

Finally, Inspector Mike Lepisto informed me that the Aboveground Waste Oil Tank Installation has not passed all necessary inspections. Please take action to perform all work necessary to obtain approval for the waste oil tank installation.

If you have any questions, please do not hesitate to contact me.

Thank you,

Mike Randolph
Hazardous Materials Inspector

2206.2.5 Portable tanks. Where approved by the fire code official, portable tanks are allowed to be temporarily used in conjunction with the dispensing of Class I, II or IIIA liquids into the fuel tanks of motor vehicles or motorized equipment on premises not normally accessible to the public. The approval shall include a definite time limit.

2206.2.6 Special enclosures. Where installation of tanks in accordance with Section 3404.2.11 is impractical, or because of property or building limitations, tanks for liquid motor fuels are allowed to be installed in buildings in special enclosures in accordance with all of the following:

1. The special enclosure shall be liquid tight and vapor tight.
2. The special enclosure shall not contain backfill.
3. Sides, top and bottom of the special enclosure shall be of reinforced concrete at least 6 inches (152 mm) thick, with openings for inspection through the top only.
4. Tank connections shall be piped or closed such that neither vapors nor liquid can escape into the enclosed space between the special enclosure and any tanks inside the special enclosure.
5. Means shall be provided whereby portable equipment can be employed to discharge to the outside any vapors which might accumulate inside the special enclosure should leakage occur.
6. Tanks containing Class I, II or IIIA liquids inside a special enclosure shall not exceed 6,000 gallons (22 710 L) in individual capacity or 18,000 gallons (68 130 L) in aggregate capacity.
7. Each tank within special enclosures shall be surrounded by a clear space of not less than 3 feet (910 mm) to allow for maintenance and inspection.

2206.3 Security. Above-ground tanks for the storage of liquid motor fuels shall be safeguarded from public access or unauthorized entry in an approved manner.

2206.4 Physical protection. Guard posts complying with Section 312 or other approved means shall be provided to protect above-ground tanks against impact by a motor vehicle unless the tank is listed as a protected above-ground tank with vehicle impact protection.

2206.5 Secondary containment. Above-ground tanks shall be provided with drainage control or diking in accordance with Chapter 34. Drainage control and diking is not required for listed secondary containment tanks. Secondary containment systems shall be monitored either visually or automatically. Enclosed secondary containment systems shall be provided with emergency venting in accordance with Section 2206.6.2.5.

2206.6 Piping, valves, fittings and ancillary equipment for use with flammable or combustible liquids. The design, fabrication, assembly, testing and inspection of piping, valves, fittings and ancillary equipment for use with flammable or combustible liquids shall be in accordance with Chapter 34 and Sections 2206.6.1 through 2206.6.3.

2206.6.1 Protection from damage. Piping shall be located such that it is protected from physical damage.

2206.6.2 Piping, valves, fittings and ancillary equipment for above-ground tanks for Class I, II and IIIA liquids. Piping, valves, fittings and ancillary equipment for above-ground tanks shall comply with Sections 2206.6.2.1 through 2206.6.2.6.

2206.6.2.1 Tank openings. Tank openings for above-ground tanks shall be through the top only.

2206.6.2.2 Fill-pipe connections. The fill pipe for above-ground tanks shall be provided with a means for making a direct connection to the tank vehicle's fuel-delivery hose so that the delivery of fuel is not exposed to the open air during the filling operation. Where any portion of the fill pipe exterior to the tank extends below the level of the top of the tank, a check valve shall be installed in the fill pipe not more than 12 inches (305 mm) from the fill-hose connection.

2206.6.2.3 Overfill protection. Overfill protection shall be provided for above-ground flammable and combustible liquid storage tanks in accordance with Sections 3404.2.7.5.8 and 3404.2.9.6.6.

2206.6.2.4 Siphon prevention. An approved antisiphon method shall be provided in the piping system to prevent flow of liquid by siphon action.

2206.6.2.5 Emergency relief venting. Above-ground storage tanks, tank compartments and enclosed secondary containment spaces shall be provided with emergency relief venting in accordance with Chapter 34.

2206.6.2.6 Spill containers. A spill container having a capacity of not less than 5 gallons (19 L) shall be provided for each fill connection. For tanks with a top fill connection, spill containers shall be noncombustible and shall be fixed to the tank and equipped with a manual drain valve that drains into the primary tank. For tanks with a remote fill connection, a portable spill container is allowed.

2206.6.3 Piping, valves, fittings and ancillary equipment for underground tanks. Piping, valves, fittings and ancillary equipment for underground tanks shall comply with Chapter 34 and NFPA 30A.

2206.7 Fuel-dispensing systems for flammable or combustible liquids. The design, fabrication and installation of fuel-dispensing systems for flammable or combustible liquid fuels shall be in accordance with Sections 2206.7.I through 2206.7.9.2.4.

2206.7.1 Listed equipment. Electrical equipment, dispensers, hose, nozzles and submersible or subsurface pumps used in fuel-dispensing systems shall be listed.

2206.7.2 Fixed pumps required. Class I and II liquids shall be transferred from tanks by means of fixed pumps designed and equipped to allow control of the flow and prevent leakage or accidental discharge.

2206.7.3 Mounting of dispensers. Dispensing devices except those installed on top of a protected above-ground

tank that qualifies as vehicle-impact resistant, shall be protected against physical damage by mounting on a concrete island 6 inches (152 mm) or more in height, or shall be protected in accordance with Section 312. Dispensing devices shall be installed and securely fastened to their mounting surface in accordance with the dispenser manufacturer's instructions. Dispensing devices installed indoors shall be located in an approved position where they cannot be struck by an out-of-control vehicle descending a ramp or other slope.

2206.7.4 Dispenser emergency valve. An approved automatic emergency shutoff valve designed to close in the event of a fire or impact shall be properly installed in the liquid supply line at the base of each dispenser supplied by a remote pump. The valve shall be installed so that the shear groove is flush with or within $^1/_2$ inch (12.7 mm) of the top of the concrete dispenser island and there is clearance provided for maintenance purposes around the valve body and operating parts. The valve shall be installed at the liquid supply line inlet of each overhead-type dispenser. Where installed, a vapor return line located inside the dispenser housing shall have a shear section or approved flexible connector for the liquid supply line emergency shutoff valve to function. Emergency shutoff valves shall be installed and maintained in accordance with the manufacturer's instructions, tested at the time of initial installation and at least yearly thereafter in accordance with Section 2205.2.2.

2206.7.5 Dispenser hose. Dispenser hoses shall be a maximum of 18 feet (5486 mm) in length unless otherwise approved. Dispenser hoses shall be listed and approved. When not in use, hoses shall be reeled, racked or otherwise protected from damage.

2206.7.5.1 Breakaway devices. Dispenser hoses for Class I and II liquids shall be equipped with a listed emergency breakaway device designed to retain liquid on both sides of a breakaway point. Such devices shall be installed and maintained in accordance with the manufacturer's instructions. Where hoses are attached to hose-retrieving mechanisms, the emergency breakaway device shall be located between the hose nozzle and the point of attachment of the hose-retrieval mechanism to the hose.

2206.7.6 Fuel delivery nozzles. A listed automatic-closing-type hose nozzle valve with a latch-open device shall be provided on island-type dispensers used for dispensing Class I, II or IIIA liquids.

Overhead-type dispensing units shall be provided with a listed automatic-closing-type hose nozzle valve *with* a latch-open device. *The design of the system shall be such that the hose nozzle valve will close automatically in the event the valve is released from a fill opening or upon impact with a driveway.*

Any latch-open device determined to be inoperative by the fire code official shall be repaired or replaced, within 48 hours after notification.

2206.7.6.1 Special requirements for nozzles. Where dispensing of Class I, II or IIIA liquids is performed, a listed automatic-closing-type hose nozzle valve shall be used incorporating all of the following features:

1. The hose nozzle valve shall be equipped with an integral latch-open device.
2. When the flow of product is normally controlled by devices or equipment other than the hose nozzle valve, the hose nozzle valve shall not be capable of being opened unless the delivery hose is pressurized. If pressure to the hose is lost, the nozzle shall close automatically.

   Exception: Vapor recovery nozzles incorporating insertion interlock devices designed to achieve shutoff on disconnect from the vehicle fill pipe.
3. The hose nozzle shall be designed such that the nozzle is retained in the fill pipe during the filling operation.
4. The system shall include listed equipment with a feature that causes or requires the closing of the hose nozzle valve before the product flow can be resumed or before the hose nozzle valve can be replaced in its normal position in the dispenser.

2206.7.7 Remote pumping systems. Remote pumping systems for liquid fuels shall comply with Sections 2206.7.7.1 and 2206.7.7.2.

2206.7.7.1 Leak detection. Where remote pumps are used to supply fuel dispensers, each pump shall have installed on the discharge side a listed leak detection device that will detect a leak in the piping and dispensers and provide an indication. A leak detection device is not required if the piping from the pump discharge to under the dispenser is above ground and visible.

2206.7.7.2 Location. Remote pumps installed above grade, outside of buildings, shall be located not less than 10 feet (3048 mm) from lines of adjoining property that can be built upon and not less than 5 feet (1524 mm) from any building opening. Where an outside pump location is impractical, pumps are permitted to be installed inside buildings as provided for dispensers in Section 2201.4 and Chapter 34. Pumps shall be substantially anchored and protected against physical damage.

2206.7.8 Gravity and pressure dispensing. Flammable liquids shall not be dispensed by gravity from tanks, drums, barrels or similar containers. Flammable or combustible liquids shall not be dispensed by a device operating through pressure within a storage tank, drum or container.

2206.7.9 Vapor-recovery and vapor-processing systems. Vapor-recovery and vapor-processing systems shall be in accordance with Sections 2206.7.9.1 through 2206.7.9.2.4.

2206.7.9.1 Vapor-balance systems. Vapor-balance systems shall comply with Sections 2206.7.9.1.1 through 2206.7.9.1.5.

2206.7.9.1.1 Dispensing devices. Dispensing devices incorporating provisions for vapor recovery shall be listed and labeled. When existing listed or

105.6.46 Wood products. An operational permit is required to store chips, hogged material, lumber or plywood in excess of 200 cubic feet (6 m^3).

105.6.47 Additional Permits. *In addition to the permits required by Appendix Chapter I, Section 105.6, the following permits shall be obtained from the Bureau of Fire Prevention prior to engaging in the following activities, operations, practices or functions:*

1. ***Production facilities.*** *To change use or occupancy, or allow the attendance of a live audience, or for wrap parties.*
2. ***Pyrotechnics and special effects.*** *To use pyrotechnic special effects, open flame, use of flammable or combustible liquids and gases, welding, and the parking of motor vehicles in any building or location used for the purpose of motion picture, television and commercial production.*
3. ***Live audiences.*** *To install seating arrangements for live audiences in approved production facilities, production studios and sound stages. See Chapter 46.*

105.7 Required construction permits. The fire code official is authorized to issue construction permits for work as set forth in Appendix Chapter 1, Sections 105.7.1 through 105.7.13.

105.7.1 Automatic fire-extinguishing systems. A construction permit is required for installation of or modification to an automatic fire-extinguishing system. Maintenance performed in accordance with this code is not considered a modification and does not require a permit.

105.7.2 Battery systems. A permit is required to install stationary storage battery systems having a liquid capacity of more than 50 gallons (189 L).

105.7.3 Compressed gases. When the compressed gases in use or storage exceed the amounts listed in Appendix Chapter 1, Table 105.6.8, a construction permit is required to install, repair damage to, abandon, remove, place temporarily out of service, or close or substantially modify a compressed gas system.

Exceptions:

1. Routine maintenance.
2. For emergency repair work performed on an emergency basis, application for permit shall be made within two working days of commencement of work.

The permit applicant shall apply for approval to close storage, use or handling facilities at least 30 days prior to the termination of the storage, use or handling of compressed or liquefied gases. Such application shall include any change or alteration of the facility closure plan filed pursuant to Section 2701.6.3. The 30-day period is not applicable when approved based on special circumstances requiring such waiver.

105.7.4 Fire alarm and detection systems and related equipment. A construction permit is required for installation of or modification to fire alarm and detection systems and related equipment. Maintenance performed in accordance with this code is not considered a modification and does not require a permit.

105.7.5 Fire pumps and related equipment. A construction permit is required for installation of or modification to fire pumps and related fuel tanks, jockey pumps, controllers, and generators. Maintenance performed in accordance with this code is not considered a modification and does not require a permit.

105.7.6 Flammable and combustible liquids. A construction permit is required:

1. To repair or modify a pipeline for the transportation of flammable or combustible liquids.
2. To install, construct or alter tank vehicles, equipment, tanks, plants, terminals, wells, fuel-dispensing stations, refineries, distilleries and similar facilities where flammable and combustible liquids are produced, processed, transported, stored, dispensed or used.
3. To install, alter, remove, abandon or otherwise dispose of a flammable or combustible liquid tank.

105.7.7 Hazardous materials. A construction permit is required to install, repair damage to, abandon, remove, place temporarily out of service, or close or substantially modify a storage facility or other area regulated by Chapter 27 when the hazardous materials in use or storage exceed the amounts listed in Appendix Chapter 1, Table 105.6.20.

Exceptions:

1. Routine maintenance.
2. For emergency repair work performed on an emergency basis, application for permit shall be made within two working days of commencement of work.

105.7.8 Industrial ovens. A construction permit is required for installation of industrial ovens covered by Chapter 21.

Exceptions:

1. Routine maintenance.
2. For repair work performed on an emergency basis, application for permit shall be made within two working days of commencement of work.

105.7.9 LP-gas. A construction permit is required for installation of or modification to an LP-gas system.

105.7.10 Private fire hydrants. A construction permit is required for the installation or modification of private fire hydrants.

105.7.11 Spraying or dipping. A construction permit is required to install or modify a spray room, dip tank or booth.

105.7.12 Standpipe systems. A construction permit is required for the installation, modification, or removal from service of a standpipe system. Maintenance performed in accordance with this code is not considered a modification and does not require a permit.

105.7.13 Temporary membrane structures, tents and canopies. A construction permit is required to erect an

☐	☐	Were all probes reinstalled properly?
☐	☐	Were all items on the equipment manufacturer's maintenance checklist completed?

F. Line Leak Detectors (LLD): ☐ LLDs are not installed.

YES	NO	NA	
☒	☐	☐	For equipment start-up or annual equipment certification, was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h. ☐ 0.1 g.p.h ☐ 0.2 g.p.h.
☒	☐		Were all LLDs confirmed operational and accurate within regulatory requirements?
☒	☐		Was the testing apparatus properly calibrated?
☒	☐	☐	For mechanical LLDs, does the LLD restrict product flow if it detects a leak?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if the LLD detects a leak?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐	☐	☒	For electronic LLDs, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐	☐	☒	For electronic LLDs, have all accessible wiring connections been visually inspected?
☒	☐	☐	Were all items on the equipment manufacturer's maintenance checklist completed?

G. Comments: Suction system for unleaded 87, no LLD. The MLLD for the Diesel Turbine was replaced.

H. Certification - I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturers' guidelines. Attached to this Certification is information (e.g. manufacturers' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the report; *(check all that apply)*: ☐ System set-up ☐ Alarm history report

UNDERGROUND STORAGE TANK
RESPONSE PLAN – PAGE 1

(One form per facility)

TYPE OF ACTION ☐ 1. NEW PLAN ☒ 2. CHANGE OF INFORMATION R01.

I. FACILITY INFORMATION

FACILITY ID # *(Agency Use Only)* — — — 4 6 1 6 5 9 1

BUSINESS NAME (Same as FACILITY NAME) 3.

Granite Rock Company - Pavex Central

BUSINESS SITE ADDRESS 103.

120 Granite Rock Way

BUSINESS SITE CITY 104.

San Jose

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED: *(Complete only if applicable)*

EQUIPMENT	LOCATION	AVAILABILITY
R10.	R20.	R30.
R11.	R21.	R31.
R12.	R22.	R32.
R13.	R23.	R33.
R14.	R24.	R34.
R15.	R25.	R35.

IV. RESPONSIBLE PERSONS

THE FOLLOWING PERSON(S) IS/ARE RESPONSIBLE FOR AUTHORIZING ANY WORK NECESSARY UNDER THIS RESPONSE PLAN:

NAME Elden Davis R40.	TITLE Equipment Manager R50.
NAME Chuck Gardner R41.	TITLE Equipment Superintendent R51
NAME Elias Lanuza R42.	TITLE Maintenance Planner R52.
NAME R43.	TITLE R53.

V. MONITORING INDICATORS

IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE, STEPS TO VERIFY THE RELEASE WILL BE MADE AS FOLLOWS:

☒ 1. ADDITIONAL SYSTEM TESTING OR DATA COLLECTION ☒ 2. INSPECTION BY QUALIFIED PERSONS ☐ 3. RECALIBRATION OF EQUIPMENT R60.

☐ 99. OTHER (Specify): R61.

UNDERGROUND STORAGE TANK

RESPONSE PLAN – PAGE 2

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

VII. OWNER/OPERATOR SIGNATURE

CERTIFICATION: I certify that the information provided herein is true and accurate to the best of my knowledge.

Authority Cited: Title 23 CCR, Sections 2632(d)(1), 2634(d)(2), and 2641(h)

TYPE OF ACTION ☒ 1. NEW PLAN ☐ 2. CHANGE OF INFORMATION M01.

PLAN TYPE ☒ MONITORING IS IDENTICAL FOR ALL USTs AT THIS FACILITY. M02.
(Check one item only) ☐ THIS PLAN COVERS ONLY THE FOLLOWING UST SYSTEM(S): _____

I. FACILITY INFORMATION

FACILITY ID # *(Agency Use Only)* – – 4 0 1 6 5 9

FACILITY NAME Graniterock Company M03.

FACILITY SITE ADDRESS 120 Granite Rock Way M04. | CITY San Jose M05.

II. EQUIPMENT TESTING AND PREVENTIVE MAINTENANCE

State law requires that testing, preventive maintenance, and calibration of monitoring equipment (e.g., sensors, probes, line leak detectors, etc.) be performed in accordance with the equipment manufacturers' instructions, or annually, whichever is more frequent. Such work must be performed by qualified personnel. M06.

MONITORING EQUIPMENT IS SERVICED ☒ 1. ANNUALLY ☐ 99. OTHER (Specify): _____ M07.

III. MONITORING LOCATIONS

This monitoring plan must include a Site Plan showing the general tank and piping layouts and the locations where monitoring is performed (i.e., location of each sensor, line leak detector, monitoring system control panel, etc.). If you already have a diagram (e.g., current UST Monitoring Site Plan from a Monitoring System Certification form, Hazardous Materials Business Plan map, etc.) which shows all required information, include it with this plan.

IV. TANK MONITORING

MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S): (Check all that apply) M10.

☒ 1. CONTINUOUS ELECTRONIC MONITORING OF TANK ANNULAR (INTERSTITIAL) SPACE(S) OR SECONDARY CONTAINMENT VAULT(S)

SECONDARY CONTAINMENT IS: ☒ a. DRY ☐ b. LIQUID FILLED ☐ c. UNDER PRESSURE ☐ d. UNDER VACUUM M11.

PANEL MANUFACTURER: Pneumercator M12. MODEL #: LC 1000 M13.

LEAK SENSOR MANUFACTURER: Pneumercator M14. MODEL #(S): LS 600 M15.

☐ 2. AUTOMATIC TANK GAUGING (ATG) SYSTEM USED TO MONITOR SINGLE WALL TANK(S)

PANEL MANUFACTURER: _____ M16. MODEL #: _____ M17.

IN-TANK PROBE MANUFACTURER: _____ M18. MODEL #(S): _____ M19.

LEAK TEST FREQUENCY: ☐ a. CONTINUOUS ☐ b. DAILY/NIGHTLY ☐ c. WEEKLY M20.
☐ d. MONTHLY ☐ e. OTHER (Specify): _____ M21.

PROGRAMMED TESTS: ☐ a. 0.1 g.p.h. ☐ b. 0.2 g.p.h. ☐ c. OTHER (Specify): _____ M22. M23.

☐ 3. INVENTORY RECONCILIATION ☐ a. MANUAL PER 23 CCR §2646 ☐ b. STATISTICAL PER 23 CCR §2646.1 M24.

☐ 4. WEEKLY MANUAL TANK GAUGING (MTG) PER 23 CCR §2645

TESTING PERIOD: ☐ a. 36 HOURS ☐ b. 60 HOURS M25.

☐ 5. INTEGRITY TESTING PER 23 CCR §2643.1

TEST FREQUENCY: ☐ a. ANNUALLY ☐ b. BIENNIALLY ☐ c. OTHER (Specify): _____ M26. M27.

☐ 6.VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY (Requires agency approval)

☐ 99. OTHER (Specify): _____ M28.

V. PIPE MONITORING

MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply) M30.

☒ 1. CONTINUOUS ELECTRONIC MONITORING OF PIPING SUMP(S)/TRENCH(ES) AND OTHER SECONDARY CONTAINMENT

SECONDARY CONTAINMENT IS: ☒ a. DRY ☐ b. LIQUID FILLED ☐ c. UNDER PRESSURE ☐ d. UNDER VACUUM M31.

PANEL MANUFACTURER: Pneumercator M32. MODEL #: LC 1000 M33.

LEAK SENSOR MANUFACTURER: Pneumercator M34. MODEL #(S): LS 600 M35.

WILL A PIPING LEAK ALARM TRIGGER AUTOMATIC PUMP (i.e., TURBINE) SHUTDOWN? ☒ a. YES ☐ b. NO M36.

WILL FAILURE/DISCONNECTION OF THE MONITORING SYSTEM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☒ a. YES ☐ b. NO M37.

☐ 2. MECHANICAL LINE LEAK DETECTOR (MLLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS AND RESTRICTS OR SHUTS OFF PRODUCT FLOW WHEN A LEAK IS DETECTED

MLLD MANUFACTURER(s): _____ M38. MODEL #(S): _____ M39.

☐ 3. ELECTRONIC LINE LEAK DETECTOR (ELLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS

ELLD MANUFACTURER: _____ M40. MODEL #: _____ M41.

PROGRAMMED LINE INTEGRITY TESTS: ☐ a. MINIMUM MONTHLY 0.2 g.p.h. ☐ b. MINIMUM ANNUAL 0.1 g.p.h. M42.

WILL ELLD DETECTION OF A PIPING LEAK TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M43.

WILL ELLD FAILURE/DISCONNECTION TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M44.

☐ 4. INTEGRITY TESTING

TEST FREQUENCY: ☐ a. ANNUALLY ☐ b. EVERY 3 YEARS ☐ c. OTHER (Specify) _____ M45. M46.

☐ 5.VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY* ☐ c. MIN. MONTHLY & EACH TIME SYSTEM OPERATED** M47.

* Requires agency approval ** Allowed for monitoring of unburied emergency generator fuel piping only per HSC §25281.5(b)(3)

☐ 6. PIPING IS SUCTION PIPING MEETING ALL REQUIREMENTS FOR EXEMPTION FROM MONITORING PER 23 CCR §2636(a)(3)

☐ 7. NO PRODUCT OR REMOTE FILL PIPING IS CONNECTED TO THE UST(s)

☐ 99. OTHER (Specify) _____ M48.

VI. DISPENSER MONITORING

MONITORING OF AREAS BENEATH DISPENSER(S) IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply) M50.

☐ 1. CONTINUOUS ELECTRONIC MONITORING OF UNDER DISPENSER CONTAINMENT (UDC)

PANEL MANUFACTURER: _____ M51. MODEL #: _____ M52.

LEAK SENSOR MANUFACTURER: _____ M53. MODEL #(S): _____ M54.

WILL DETECTION OF A LEAK INTO THE UDC TRIGGER AUDIBLE AND VISUAL ALARMS? ☐ a. YES ☐ b. NO M55.

WILL A UDC LEAK ALARM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M56.

WILL FAILURE/DISCONNECTION OF UDC MONITORING SYSTEM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M57.

☒ 2. MECHANICAL ASSEMBLY (e.g., FLOAT AND CHAIN ASSEMBLY) IN UDC TRIPS SHEAR VALVE IN CASE OF LEAK

ASSEMBLY MANUFACTURER: Bravo M58. MODEL #(S): FT8000 M59.

☐ 3.VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY (Requires agency approval) M60.

☐ 4. NO DISPENSERS

☐ 99. OTHER (Specify) _____ M61.

VII. ENHANCED LEAK DETECTION

☐ 1. WE HAVE BEEN NOTIFIED BY THE STATE WATER RESOURCES CONTROL BOARD THAT WE MUST IMPLEMENT ENHANCED LEAK DETECTION (ELD) FOR THE UST(S) COVERED BY THIS PLAN. PER 23 CCR §2644.1, ELD IS PERFORMED EVERY 36 MONTHS AS REQUIRED M70.

VIII. TRAINING

REFERENCE DOCUMENTS MAINTAINED AT FACILITY (Check all that apply) M80.

1. ☒ THIS UNDERGROUND STORAGE TANK MONITORING PLAN **(Required)**
2. ☒ OPERATING MANUALS FOR ELECTRONIC MONITORING EQUIPMENT **(Required)**
3. ☒ THE FACILITY'S BEST MANAGEMENT PRACTICES **(Required as of January 1, 2005)**
4. ☐ CALIFORNIA UNDERGROUND STORAGE TANK REGULATIONS
5. ☐ CALIFORNIA UNDERGROUND STORAGE TANK LAW
6. ☐ STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION: "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION"
7. ☐ SWRCB PUBLICATION: "WEEKLY MANUAL TANK GAUGING FOR SMALL UNDERGROUND STORAGE TANKS"
99. ☐ OTHER (Specify): _____ M81.

Personnel with UST monitoring responsibilities are familiar with all of the above documents relevant to their job duties and can access those documents when needed. By January 1, 2005, this facility will have a "Designated UST Operator" who has passed the California UST Sytem Operator Exam administered by the International Code Council (ICC). By July 1, 2005, and annually thereafter, the "Designated UST Operator" will train facility employees in the proper operation and maintenance of the UST systems. This training will include, but is not limited to, the following:

- Operation of the UST systems in a manner consistent with the facility's best management practices.
- The facility employee's role with regard to the leak detection equipment.
- The facility employee's role with regard to spills and overfills.
- Whom to contact for emergencies and leak detection alarms.

For facility employees hired on or after July 1, 2005, the initial training will be conducted within 30 days of the date of hire.

IX. COMMENTS/ADDITIONAL INFORMATION

Please use this section to include any additional UST system monitoring-related information (e.g., additional information required by your local agency): M85.

Note regarding Section X. Pending certification of a Designated UST Operator, the following person has authority for performing the monitoring activities and maintaining leak detection equipment covered by this plan. NAME: JOB TITLE:

X. PERSONNEL RESPONSIBILITIES

AS OF JANUARY 1, 2005, THE "DESIGNATED UST OPERATOR" IDENTIFIED IN SECTION III OF THE CURRENT UST OPERATING PERMIT APPLICATION – FACILITY FORM WILL HAVE ULTIMATE AUTHORITY FOR PERFORMING THE MONITORING ACTIVITIES AND MAINTAINING LEAK DETECTION EQUIPMENT COVERED BY THIS PLAN, AND WILL PERFORM AND DOCUMENT MINIMUM MONTHLY VISUAL INSPECTIONS OF THE FACILITY'S UST SYSTEMS IN ACCORDANCE WITH 23 CCR § 2715(b).

XI. OWNER/OPERATOR SIGNATURE

CERTIFICATION: I certify that the information provided herein is true and accurate to the best of my knowledge.

CERTIFICATION OF FINANCIAL RESPONSIBILITY

FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in Section 2807, Chapter 18, Div. 3, Title 23, CCR:

☐ 500,000 dollars per occurrence or ☒ 1 million dollars per occurrence AND ☒ 1 million dollars annual aggregate or ☐ 2 million dollars annual aggregate

B. Graniterock
(Name of tank Owner or Operator)

hereby certifies that it is in compliance with the requirements of Section 2807, Article 3, Chapter 18, Division 3, Title 23, California Code of Regulations.

The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C. Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Compensation
Chief Financial Officer Letter	Graniterock 350 Technology Way PO Box 50001 Watsonville, CA 95077	N/A	$10,000	Continuous	Yes	Yes
State UST Cleanup Fund	UST Cleanup Fund P.O. Box 944212 Sacramento, CA 94244-2120	N/A	$990,000	Continuous	Yes	Yes

Note: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance with all conditions for participation in the Fund.

D. Facility Name	Facility Address
Graniterock - Watsonville Concrete and Building Materials	540 Beach St. Watsonville, CA 95076
Graniterock - Santa Cruz Concrete and Building Materials	303 Coral St. Santa Cruz, CA 95060

Graniterock

CONFIDENTIAL

LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for Graniterock Company, 350 Technology Drive, Watsonville CA 95076.

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least $500,000 per occurrence and $1,000,000 annual aggregate coverage.

1.	Amount of annual aggregate coverage being assured by this letter	$10,000
2.	Total tangible assets	$151,000,000
3.	Total liabilities	$90,000,000
4.	Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	$61,000,000

I hereby certify that the wording of this letter is identical to the wording specified in subsection 2808.1(d)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.

Executed at Watsonville, CA

On May 7, 2010

UNDERGROUND STORAGE TANK MONITORING PLAN

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 23 CCR, Sections 2632(d)(1), 2634(d)(2), and 2641(h)

TYPE OF ACTION ☒ 1. NEW PLAN ☐ 2. CHANGE OF INFORMATION — M01.

PLAN TYPE (Check one item only) ☒ MONITORING IS IDENTICAL FOR ALL USTs AT THIS FACILITY. ☐ THIS PLAN COVERS ONLY THE FOLLOWING UST SYSTEM(S): _____ — M02.

I. FACILITY INFORMATION

FACILITY ID # (*Agency Use Only*) 43-060-401659

FACILITY NAME Graniterock Company — M03.

FACILITY SITE ADDRESS 120 Granite Rock Way — M04. CITY San Jose — M05.

II. EQUIPMENT TESTING AND PREVENTIVE MAINTENANCE

State law requires that testing, preventive maintenance, and calibration of monitoring equipment (e.g., sensors, probes, line leak detectors, etc.) be performed in accordance with the equipment manufacturers' instructions, or annually, whichever is more frequent. Such work must be performed by qualified personnel. — M06.

MONITORING EQUIPMENT IS SERVICED ☒ 1. ANNUALLY ☐ 99. OTHER (Specify): _____ — M07.

III. MONITORING LOCATIONS

This monitoring plan must include a Site Plan showing the general tank and piping layouts and the locations where monitoring is performed (i.e., location of each sensor, line leak detector, monitoring system control panel, etc.). If you already have a diagram (e.g., current UST Monitoring Site Plan from a Monitoring System Certification form, Hazardous Materials Business Plan map, etc.) which shows all required information, include it with this plan.

IV. TANK MONITORING

MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S): (Check all that apply) — M10.

☒ 1. CONTINUOUS ELECTRONIC MONITORING OF TANK ANNULAR (INTERSTITIAL) SPACE(S) OR SECONDARY CONTAINMENT VAULT(S)

SECONDARY CONTAINMENT IS: ☒ a. DRY ☐ b. LIQUID FILLED ☐ c. UNDER PRESSURE ☐ d. UNDER VACUUM — M11.

PANEL MANUFACTURER: Pneumercator — M12. MODEL #: LC 1000 — M13.

LEAK SENSOR MANUFACTURER: Pneumercator — M14. MODEL #(S): LS 600 — M15.

☐ 2. AUTOMATIC TANK GAUGING (ATG) SYSTEM USED TO MONITOR SINGLE WALL TANK(S)

PANEL MANUFACTURER: _____ — M16. MODEL #: _____ — M17.

IN-TANK PROBE MANUFACTURER: _____ — M18. MODEL #(S): _____ — M19.

LEAK TEST FREQUENCY: ☐ a. CONTINUOUS ☐ b. DAILY/NIGHTLY ☐ c. WEEKLY — M20.
☐ d. MONTHLY ☐ e. OTHER (Specify): _____ — M21.

PROGRAMMED TESTS: ☐ a. 0.1 g.p.h. ☐ b. 0.2 g.p.h. ☐ c. OTHER (Specify): _____ — M22. M23.

☐ 3. INVENTORY RECONCILIATION ☐ a. MANUAL PER 23 CCR §2646 ☐ b. STATISTICAL PER 23 CCR §2646.1 — M24.

☐ 4. WEEKLY MANUAL TANK GAUGING (MTG) PER 23 CCR §2645

TESTING PERIOD: ☐ a. 36 HOURS ☐ b. 60 HOURS — M25.

☐ 5. INTEGRITY TESTING PER 23 CCR §2643.1

TEST FREQUENCY: ☐ a. ANNUALLY ☐ b. BIENNIALLY ☐ c. OTHER (Specify): _____ — M26. M27.

☐ 6.VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY (Requires agency approval) — M28.

☐ 99. OTHER (Specify): _____

V. PIPE MONITORING

MONITORING IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply) — M30.

☒ 1. CONTINUOUS ELECTRONIC MONITORING OF PIPING SUMP(S)/TRENCH(ES) AND OTHER SECONDARY CONTAINMENT

SECONDARY CONTAINMENT IS: ☒ a. DRY ☐ b. LIQUID FILLED ☐ c. UNDER PRESSURE ☐ d. UNDER VACUUM — M31.

PANEL MANUFACTURER: Pneumercator — M32. MODEL #: LC 1000 — M33.

LEAK SENSOR MANUFACTURER: Pneumercator — M34. MODEL #(S): LS 600 — M35.

WILL A PIPING LEAK ALARM TRIGGER AUTOMATIC PUMP (i.e., TURBINE) SHUTDOWN? ☒ a. YES ☐ b. NO — M36.

WILL FAILURE/DISCONNECTION OF THE MONITORING SYSTEM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☒ a. YES ☐ b. NO — M37.

☐ 2. MECHANICAL LINE LEAK DETECTOR (MLLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS AND RESTRICTS OR SHUTS OFF PRODUCT FLOW WHEN A LEAK IS DETECTED

MLLD MANUFACTURER(s): _____ — M38. MODEL #(S): _____ — M39.

☐ 3. ELECTRONIC LINE LEAK DETECTOR (ELLD) THAT ROUTINELY PERFORMS 3.0 g.p.h. LEAK TESTS

ELLD MANUFACTURER: _____ — M40. MODEL #: _____ — M41.

PROGRAMMED LINE INTEGRITY TESTS: ☐ a. MINIMUM MONTHLY 0.2 g.p.h. ☐ b. MINIMUM ANNUAL 0.1 g.p.h. — M42.

WILL ELLD DETECTION OF A PIPING LEAK TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO — M43.

WILL ELLD FAILURE/DISCONNECTION TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO — M44.

☐ 4. INTEGRITY TESTING

TEST FREQUENCY: ☐ a. ANNUALLY ☐ b. EVERY 3 YEARS ☐ c. OTHER (Specify) _____ — M45. M46.

☐ 5.VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY* ☐ c. MIN. MONTHLY & EACH TIME SYSTEM OPERATED** — M47.

* Requires agency approval ** Allowed for monitoring of suburied emergency generator fuel piping only per HSC §25281.5(b)(3)

☐ 6. PIPING IS SUCTION PIPING MEETING ALL REQUIREMENTS FOR EXEMPTION FROM MONITORING PER 23 CCR §2636(a)(3)

☐ 7. NO PRODUCT OR REMOTE FILL PIPING IS CONNECTED TO THE UST(s)

☐ 99. OTHER (Specify) _____ — M48.

43-060-401659

VI. DISPENSER MONITORING

MONITORING OF AREAS BENEATH DISPENSER(S) IS PERFORMED USING THE FOLLOWING METHOD(S) (Check all that apply) M50.

☐ 1. CONTINUOUS ELECTRONIC MONITORING OF UNDER DISPENSER CONTAINMENT (UDC)

PANEL MANUFACTURER: _____ M51. MODEL #: _____ M52.

LEAK SENSOR MANUFACTURER: _____ M53. MODEL #(S): _____ M54.

WILL DETECTION OF A LEAK INTO THE UDC TRIGGER AUDIBLE AND VISUAL ALARMS? ☐ a. YES ☐ b. NO M55.

WILL A UDC LEAK ALARM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M56.

WILL FAILURE/DISCONNECTION OF UDC MONITORING SYSTEM TRIGGER AUTOMATIC PUMP SHUTDOWN? ☐ a. YES ☐ b. NO M57.

☒ 2. MECHANICAL ASSEMBLY (e.g., FLOAT AND CHAIN ASSEMBLY) IN UDC TRIPS SHEAR VALVE IN CASE OF LEAK

ASSEMBLY MANUFACTURER: Bravo M58. MODEL #(S): FT8000 M59.

☐ 3. VISUAL MONITORING DONE: ☐ a. DAILY ☐ b. WEEKLY (Requires agency approval) M60.

☐ 4. NO DISPENSERS

☐ 99. OTHER (Specify) _____ M61.

VII. ENHANCED LEAK DETECTION

☐ 1. WE HAVE BEEN NOTIFIED BY THE STATE WATER RESOURCES CONTROL BOARD THAT WE MUST IMPLEMENT ENHANCED LEAK DETECTION (ELD) FOR THE UST(S) COVERED BY THIS PLAN. PER 23 CCR §2644.1, ELD IS PERFORMED EVERY 36 MONTHS AS REQUIRED M70.

VIII. TRAINING

REFERENCE DOCUMENTS MAINTAINED AT FACILITY (Check all that apply) M80.

1. ☒ THIS UNDERGROUND STORAGE TANK MONITORING PLAN **(Required)**
2. ☒ OPERATING MANUALS FOR ELECTRONIC MONITORING EQUIPMENT **(Required)**
3. ☒ THE FACILITY'S BEST MANAGEMENT PRACTICES **(Required as of January 1, 2005)**
4. ☐ CALIFORNIA UNDERGROUND STORAGE TANK REGULATIONS
5. ☐ CALIFORNIA UNDERGROUND STORAGE TANK LAW
6. ☐ STATE WATER RESOURCES CONTROL BOARD (SWRCB) PUBLICATION: "HANDBOOK FOR TANK OWNERS - MANUAL AND STATISTICAL INVENTORY RECONCILIATION"
7. ☐ SWRCB PUBLICATION: "WEEKLY MANUAL TANK GAUGING FOR SMALL UNDERGROUND STORAGE TANKS"
99. ☐ OTHER (Specify): _____ M81.

Personnel with UST monitoring responsibilities are familiar with all of the above documents relevant to their job duties and can access those documents when needed. By January 1, 2005, this facility will have a "Designated UST Operator" who has passed the California UST Sytem Operator Exam administered by the International Code Council (ICC). By July 1, 2005, and annually thereafter, the "Designated UST Operator" will train facility employees in the proper operation and maintenance of the UST systems. This training will include, but is not limited to, the following:

- Operation of the UST systems in a manner consistent with the facility's best management practices.
- The facility employee's role with regard to the leak detection equipment.
- The facility employee's role with regard to spills and overfills.
- Whom to contact for emergencies and leak detection alarms.

For facility employees hired on or after July 1, 2005, the initial training will be conducted within 30 days of the date of hire.

IX. COMMENTS/ADDITIONAL INFORMATION

Please use this section to include any additional UST system monitoring-related information (e.g., additional information required by your local agency): M85.

Note regarding Section X. Pending certification of a Designated UST Operator, the following person has authority for performing the monitoring activities and maintaining leak detection equipment covered by this plan. NAME: JOB TITLE:

X. PERSONNEL RESPONSIBILITIES

AS OF JANUARY 1, 2005, THE "DESIGNATED UST OPERATOR" IDENTIFIED IN SECTION III OF THE CURRENT UST OPERATING PERMIT APPLICATION – FACILITY FORM WILL HAVE ULTIMATE AUTHORITY FOR PERFORMING THE MONITORING ACTIVITIES AND MAINTAINING LEAK DETECTION EQUIPMENT COVERED BY THIS PLAN, AND WILL PERFORM AND DOCUMENT MINIMUM MONTHLY VISUAL INSPECTIONS OF THE FACILITY'S UST SYSTEMS IN ACCORDANCE WITH 23 CCR § 2715(b).

XI. OWNER/OPERATOR SIGNATURE

CERTIFICATION: I certify that the information provided herein is true and accurate to the best of my knowledge.

OWNER/OPERATOR SIGNATURE	REPRESENTING ☐ Owner ☒ Operator M90.	DATE: 10/20/04 M91.
OWNER/OPERATOR NAME (print): Tina Lau M92.		OWNER/OPERATOR TITLE: Environmental Services Specialist M93.

UNDERGROUND STORAGE TANK RESPONSE PLAN

For use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Title 23 CCR, Sections 2632(d)(2), 2634(e), and 2641(h)

(One form per facility)

TYPE OF ACTION ☒ 1. NEW PLAN ☐ 2. CHANGE OF INFORMATION R01.

I. FACILITY INFORMATION

FACILITY ID # *(Agency Use Only)* 43-060-9016599

FACILITY NAME R02.
Graniterock Company

FACILITY SITE ADDRESS R03.
120 Granite Rock Way

CITY R04.
San Jose

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan.

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material may be reused until it becomes too saturated to be effective. It will then be managed properly. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container.
- Facility personnel will determine whether or not any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, and supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED: (Complete only if applicable)

EQUIPMENT	LOCATION	AVAILABILITY
R10.	R20.	R30.
R11.	R21.	R31.
R12.	R22.	R32.
R13.	R23.	R33.
R14.	R24.	R34.
R15.	R25.	R35.

IV. RESPONSIBLE PERSONS

THE FOLLOWING PERSON(S) IS/ARE RESPONSIBLE FOR AUTHORIZING ANY WORK NECESSARY UNDER THIS RESPONSE PLAN:

NAME R40. Dave Lowry	TITLE R50. Pavex Business Manager
NAME R41.	TITLE R51.
NAME R42.	TITLE R52.
NAME R43.	TITLE R53.

V. INDIRECT HAZARD DETERMINATION

This information is required only when the presence of the hazardous substance can not be determined directly by the monitoring method used (e.g., where liquid level measurements in a tank annular space or secondary piping are used as the basis for leak determination).

THE FOLLOWING STEPS WILL BE TAKEN TO DETERMINE THE PRESENCE OR ABSENCE OF HAZARDOUS SUBSTANCE IN THE SECONDARY CONTAINMENT IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE:

R60.

VCHRIS

43-060-401659

VI. LEAK INTERCEPTION AND DETECTION SYSTEM

This information is required only for motor vehicle fuel UST systems constructed per the Alternate Construction Requirements of 23 CCR §2633, and only if the Leak Interception and Detection System (LIDS) does not meet the volumetric requirements of 23 CCR §2631(d)(1) through (5) (i.e., when accounting for rainfall and backfill material, the secondary containment volume is less than 100% of primary tank volume for a single UST; or in the case of multiple USTs in shared secondary containment, 150% of the largest primary tank volume or 10% of aggregate primary tank volume, whichever is greater).

ATTACH AN ADDITIONAL PAGE TO THIS PLAN CONTAINING THE FOLLOWING INFORMATION:

- The volume of the LIDS in relation to the volume of the primary container;
- The amount of time the LIDS shall provide containment related to the time between detection of an unauthorized release and cleanup of the leaked substance;
- The depth from the bottom of the LIDS to the highest anticipated level of groundwater;
- The nature of the unsaturated soils under the LIDS and their ability to absorb contaminants or to allow movement of contaminants;
- The methods and scheduling for removal of all hazardous substances which may have been discharged from primary containment and are located in the unsaturated soils between the primary containment and groundwater, including the LIDS sump.

VII. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

VIII. OWNER/OPERATOR SIGNATURE

COURTESY AND SERVICE WITH PRIDE

UNDERGROUND STORAGE TANK OPERATING PERMIT

Issued to: *(Check One)* ◉ OWNER ◉ OPERATOR

Issued Date: 9/3/2007 **Expiration Date:** 9/2/2012

SJFD Inspector Randolph

THIS PERMIT MUST BE KEPT AT THE UST LOCATION AT ALL TIMES AND RENEWED PRIOR TO THE EXPIRATION DATE. THE PERMITTEE MUST NOTIFY THE SAN JOSE FIRE DEPARTMENT WITHIN 30 DAYS OF ANY CHANGES TO THE PERMIT OR SYSTEMS, UNLESS REQUIRED TO OBTAIN APPROVAL BEFORE MAKING THE CHANGES.

Active Tanks: 2 Financial Responsibility: CFO Letter + State Fund *(Recertification required annually)*

Operator: GRANITEROCK COMPANY
Address: 00120 GRANITE ROCK WY
Zip: 951361304

Owner: GRANITE ROCK CO
(if different)
Address:

OPERATING CONDITIONS

This operating permit is granted subject to the following conditions:

- Comply with all applicable State UST requirements contained in the Califomia Code of Regulations, Title 23, Division 3, Chapters16 &18, the California Health & Safety Code, Division 20, Chapters 6.7 and 6.75, and all applicable local requirements.
- Call 911 in the event of an emergency involving the underground tank. Report any unauthorized releases to the environment to the Hazardous Materials Division of the San Jose Fire Department within 24 hours after the release has been detected or should have been detected.
- Comply with the approved routine monitoring procedures and emergency response plan which are in the current approved Hazardous Materials Management/Business Plan.
- Provide annual maintenance and calibration of monitoring system(s). Maintenance records shall be kept on-site or available upon request. Maintain monitoring and maintenance records on-site or available for review upon request for 3 years.
- Perform secondary containment testing (SB 989) every three years. Perform monthly Designated UST Operator inspections.

UNDERGROUND STORAGE TANK OPERATING PERMIT

Issued to: *(Check One)* (•) OWNER (•) OPERATOR

Issued Date: 9/4/2002 **Expiration Date:** 9/4/2007

SJFD Inspector
Hagerman

THIS PERMIT MUST BE KEPT AT THE UST LOCATION AT ALL TIMES AND RENEWED PRIOR TO THE EXPIRATION DATE. THE PERMITTEE MUST NOTIFY THE SAN JOSE FIRE DEPARTMENT WITHIN 30 DAYS OF ANY CHANGES TO THE PERMIT OR SYSTEMS, UNLESS REQUIRED TO OBTAIN APPROVAL BEFORE MAKING THE CHANGES.

Active Tanks: 2 Financial Responsibility: Self-Insured *(Recertification required annually)*

Operator: GRANITE ROCK COMPANY
Address: 00120 GRANITE ROCK WY
Zip: 951361304

Owner:
(if different)
Address:

OPERATING CONDITIONS

This operating permit is granted subject to the following conditions:

- Comply with all applicable State UST requirements contained in the California Code of Regulations, Title 23, Division 3, Chapters16 &18, the California Health & Safety Code, Division 20, Chapters 6.7 and 6.75, and all applicable local requirements.
- Call 911 in the event of an emergency involving the underground tank. Report any unauthorized releases to the environment to the Hazardous Materials Division of the San Jose Fire Department within 24 hours after the release has been detected or should have been detected.
- Comply with the approved routine monitoring procedures and emergency response plan which are in the current approved Hazardous Materials Management/Business Plan.
- Provide annual maintenance and calibration of monitoring system(s). Maintenance records shall be kept on-site or available upon request. Maintain monitoring and maintenance records on-site or available for review upon request for 3 years.
- Perform secondary containment testing (SB 989) every three years. Initial SB 989 testing was performed 10/4/2002.

CONFIDENTIAL

LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for Graniterock Company, 350 Technology Drive, Watsonville CA 95076.

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least $500,000 per occurrence and $1,000,000 annual aggregate coverage.

1.	Amount of annual aggregate coverage being assured by this letter	$10,000
2.	Total tangible assets	$151,000,000
3.	Total liabilities	$90,000,000
4.	Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	$61,000,000

I hereby certify that the wording of this letter is identical to the wording specified in subsection 2808.1(d)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.

Executed at Watsonville, CA

On May 7, 2010

Dear Mr. Randolph,

Per your request, Graniterock submits this letter to confirm that Graniterock's tangible net worth was greater than $100,000 in 2005 and in 2006, and thus has been in continuous compliance with the Underground Storage Tank minimal financial certification requirements for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum.

Sincerely,
Steve Snodgrass

Graniterock

CONFIDENTIAL

LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for Graniterock Company, 350 Technology Drive, Watsonville CA 95076.

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least $500,000 per occurrence and $1,000,000 annual aggregate coverage.

1.	Amount of annual aggregate coverage being assured by this letter	$10,000
2.	Total tangible assets	$151,000,000
3.	Total liabilities	$90,000,000
4.	Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	$61,000,000

I hereby certify that the wording of this letter is identical to the wording specified in subsection 2808.1(d)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.

Executed at Watsonville, CA

On May 7, 2010

Malcolm Baldrige National Quality Award 1992 Winner

Dear Mr. Randolph,

Per your request, Graniterock submits this letter to confirm that Graniterock's tangible net worth was greater than $100,000 in 2005 and in 2006, and thus has been in continuous compliance with the Underground Storage Tank minimal financial certification requirements for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum.

Sincerely,
Steve Snodgrass

Granite Rock Company
Vice President – Finance, Chief Financial Officer

HAZARDOUS MATERIALS BUSINESS PLAN CERTIFICATION FORM

For Use by Unidocs Member Agencies or where approved by your Local Jurisdiction
Authority Cited: Health and Safety Code §25503.3(c); 19 CCR §2729.5(c)

9/20/10

To: Agency Name: San Jose Fire Department

Agency Mailing Address: 170 W. San Carlos St, San Jose, CA 95113

Pursuant to Section 25503.3(c) of California Health and Safety Code (HSC), the Hazardous Materials Business Plan (HMBP) certification described below is hereby submitted for the following facility:

Facility Name: Graniterock - Pavex Central

Facility Street Address: 120 Granite Rock Way City: San Jose

Date of Current HMBP: February 2009

I certify that: *(Check the appropriate box.)*

☒ I have personally reviewed the Hazardous Materials Business Plan currently on file with your agency and certify that the HMBP is complete and accurate. *(See bottom of page for details.)* If this facility is subject to Federal Emergency Planning and Community Right to Know Act (EPCRA) reporting requirements, I have submitted the following documents with this Certification Form: Unified Program Consolidated Form (UPCF) Business Activities page; UPCF Business Owner/Operator Identification page with current signature and date; Hazardous Materials Inventory Statement page(s) with an original signature, photocopy of an original signature, or signature stamp on each page for all Extremely Hazardous Substances (EHS) handled at or above their Federal Threshold Planning Quantity (TPQ) or 500 pounds, whichever is less.

or

☐ Revisions to the Hazardous Materials Business Plan are necessary. The HMBP as revised is complete and accurate and is being implemented. A copy of the revisions has been electronically submitted or is enclosed with this Certification along with a signed UPCF Business Owner/Operator Identification page and UPCF Business Activities page if the HMBP revision include changes to the Hazardous Materials Inventory Statement.

OWNER/OPERATOR CERTIFICATION: I hereby certify under penalty of law that, based upon my inquiry of those individuals responsible for obtaining the information reported above, I believe that the submitted information is true, accurate, and complete. I understand that a revised HMBP must be submitted within 30 days of any change in this facility's storage or handling of hazardous materials that would require updating of the HMBP.

Name of Owner/Operator *(Print)*: Tina Lau for Graniterock Title: Environmental Specialist

Phone: (831) 768-2009 Signature: Tina Lau Date: 9/20/10

By checking the upper box on this form, you are certifying that:

- The information contained in the HMBP most recently submitted is complete, accurate, and up-to-date; and
- There has been no change in the quantity of any hazardous material as reported in the most recently submitted Hazardous Materials Inventory forms; and
- The facility has not begun handling any hazardous material in a HMBP reportable quantity that is not currently listed in the Hazardous Materials Inventory; and
- The must recently submitted HMBP contains the information required by Section 11022 of Title 42 of the United States Code; and
- There have been no substantial changes in the facility's operations that would require revision of the current HMBP.

If EPCRA, Please Sign Here

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e. shouting)*; ☐ Other *(specify)* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program	Phone No.: **(408) 277-4659**
Santa Clara County Hazardous Materials Compliance Division	Phone No. **(408) 918-3400**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(408) 452-7288**
Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.*

c. Emergency Resources:

Poison Control Center		Phone No. **(800) 876-4766**
Nearest Hospital:	Name: **San Jose Medical Group/Oakland Acute Care**	Phone No.: **(408) 224-0262**
	Address: **841 Blossom Hill Road**	City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

_____

_____

_____

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g. the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e. call 911)*.
   v. Notify the State Office of Emergency Services at 1-800-852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g. fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

Identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion:

None identified.

7. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats		
	☐ Chemical Protective Boots		
	☐ Chemical Protective Gloves		
	☐ Chemical Protective Suits *(describe)*		
	☐ Face Shields		
	☒ First Aid Kits/Stations *(describe)*	Truck shop	First aid kit in the truck shop
	☒ Hard Hats		Each employee has hard hat
	☒ Plumbed Eye Wash Stations	Truck shop	
	☐ Portable Eye Wash Kits *(i.e. bottle type)*		
	☐ Respirator Cartridges *(describe)*		
	☒ Safety Glasses/Splash Goggles		Each employee has hard hat

* *Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

FILE NO. 401659

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☐	Facility evacuation drills, that are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☐	Use, maintenance, and replacement of emergency response equipment
☐	Refresher training, which is provided at least annually *
☐	Emergency response drills, which are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

Record Keeping

(Hazardous Materials Business Plan Module)

FILE NO. **401659**

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e. written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☒	Record of hazardous waste tank daily inspections *
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☒	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☐	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

II. ACTIVITIES DECLARATION

NOTE: If you check YES to any part of this list, please submit the Business Owner/Operator Identification page (OES Form 2730).

Does your facility…	If Yes, please complete these pages of the UPCF…	
A. HAZARDOUS MATERIALS Have on site (for any purpose) hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	☒ YES ☐ NO 4.	HAZARDOUS MATERIALS INVENTORY – CHEMICAL DESCRIPTION (OES 2731)
B. UNDERGROUND STORAGE TANKS (USTs) 1. Own or operate underground storage tanks?	☒ YES ☐ NO 5.	UST FACILITY (Formerly SWRCB Form A) UST TANK (one page per tank) (Formerly Form B)
2. Intend to upgrade existing or install new USTs?	☐ YES ☒ NO 6.	UST FACILITY UST TANK (one per tank) UST INSTALLATION - CERTIFICATE OF COMPLIANCE (one page per tank) (Formerly Form C)
3. Need to report closing a UST?	☐ YES ☒ NO 7.	UST TANK (closure portion – one page per tank)
C. ABOVE GROUND PETROLEUM STORAGE TANKS (ASTs) Own or operate ASTs above these thresholds: ---any tank capacity is greater than 660 gallons, or ---the total capacity for the facility is greater than 1,320 gallons?	☒ YES ☐ NO 8.	NO FORM REQUIRED TO CUPAs
D. HAZARDOUS WASTE 1. Generate hazardous waste?	☒ YES ☐ NO 9.	EPA ID NUMBER – provide at the top of this page
2. Recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC §25143.2)?	☐ YES ☒ NO 10.	RECYCLABLE MATERIALS REPORT (one per recycler)
3. Treat hazardous waste on site?	☐ YES ☒ NO 11.	ONSITE HAZARDOUS WASTE TREATMENT – FACILITY (Formerly DTSC Forms 1772)
		ONSITE HAZARDOUS WASTE TREATMENT – UNIT (one page per unit) (Formerly DTSC Forms 1772 A,B,C,D and L)
4. Treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	☐ YES ☒ NO 12.	CERTIFICATION OF FINANCIAL ASSURANCE (Formerly DTSC Form 1232)
5. Consolidate hazardous waste generated at a remote site?	☐ YES ☒ NO 13.	REMOTE WASTE / CONSOLIDATION SITE ANNUAL NOTIFICATION (Formerly DTSC Form 1196)
6. Need to report the closure/removal of a tank that was classified as hazardous waste and cleaned onsite?	☐ YES ☒ NO 14.	HAZARDOUS WASTE TANK CLOSURE CERTIFICATION (Formerly DTSC Form 1249)

E. LOCAL REQUIREMENTS 15.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(b); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials in specified quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** Within Santa Clara County, hospitals and police agencies have delegated receipt of these plans to the local agencies administering Hazardous Materials Business Plans, so additional copies need not be submitted. However, a copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e. contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e. shouting)*; ☐ Other *(specify)* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts*:

Fire/Police/Ambulance	Phone No. **911**
State Office of Emergency Services	Phone No. **(800) 852-7550**

b. Post-Incident Contacts*:

Fire Department Hazardous Materials Program	Phone No.: **(408) 277-4659**
Santa Clara County Hazardous Materials Compliance Division	Phone No. **(408) 918-3400**
California EPA Department of Toxic Substances Control	Phone No. **(510) 540-3739**
Cal-OSHA Division of Occupational Safety and Health	Phone No. **(408) 452-7288**
Air Quality Management District	Phone No. **(415) 771-6000**
Regional Water Quality Control Board	Phone No. **(510) 622-2300**

**** These telephone numbers are provided as a general aid to emergency notification. Be advised that additional agencies may be required to be notified.***

c. Emergency Resources:

Poison Control Center		Phone No. **(800) 876-4766**
Nearest Hospital:	Name: **San Jose Medical Group/Oakland Acute Care**	Phone No.: **(408) 224-0262**
	Address: **841 Blossom Hill Road**	City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e. contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

_____

_____

_____

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g. the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.).*
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e. call 911)*.
   v. Notify the State Office of Emergency Services at 1-800-852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Environmental Protection Agency's Department of Toxic Substances Control, the County of Santa Clara's Hazardous Materials Compliance Division, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g. fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

Identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion:

None identified.

7. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] and the Hazardous Materials Storage Ordinance require that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats		
	☐ Chemical Protective Boots		
	☐ Chemical Protective Gloves		
	☐ Chemical Protective Suits *(describe)*		
	☐ Face Shields		
	☒ First Aid Kits/Stations *(describe)*	Truck shop	First aid kit in the truck shop
	☒ Hard Hats		Each employee has hard hat
	☒ Plumbed Eye Wash Stations	Truck shop	
	☐ Portable Eye Wash Kits *(i.e. bottle type)*		
	☐ Respirator Cartridges *(describe)*		
	☒ Safety Glasses/Splash Goggles		Each employee has hard hat
	☐ Safety Showers		
	☐ Self-Contained Breathing Apparatuses (SCBA)		
Fire Extinguishing Systems	☐ Automatic Fire Sprinkler Systems		
	☐ Fire Alarm Boxes/Stations		
	☒ Fire Extinguisher Systems *(describe)*	Fueling Station, Truck shop, dispatch office	Fire extinguishers
Spill Control Equipment and Decontamination Equipment	☒ Absorbents *(describe)*	Truck shop, fueling station	Each truck has own spill kit. Spill kit at the fueling station and in the truck shop.
	☐ Berms/Dikes *(describe)*		
	☐ Decontamination Equipment *(describe)*		
	☐ Emergency Tanks *(describe)*		
	☐ Exhaust Hoods		
	☐ Gas Cylinder Leak Repair Kits *(describe)*		
	☐ Neutralizers *(describe)*		
	☐ Overpack Drums		
	☐ Sumps *(describe)*		
Communications and Alarm Systems	☐ Chemical Alarms *(describe)*		
	☐ Intercoms/ PA Systems		
	☐ Portable Radios		
	☒ Telephones	Truck shop, dispatch office	Employees have access to telephones and Nextel radios
	☒ Underground Tank Leak Detection Monitors		Lights and alarm
Additional Equipment *(Use Additional Pages if Needed.)*	☐		
	☐		
	☐		
	☐		

* *Use the map and grid numbers from the Storage Map prepared earlier for your HMBP.*

** *Describe the equipment and its capabilities. If applicable, specify any testing/maintenance procedures/intervals. Attach additional pages, numbered appropriately, if needed.*

Employee Training Plan

(Hazardous Materials Business Plan Module)

FILE NO. 401659

Authority Cited: HSC, Section 25504(c); Title 22, Div. 4.5, Ch. 12, Art. 3 CCR

All facilities that handle hazardous materials must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. Personnel are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Ptan
☐	Facility evacuation drills, that are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

2. Chemical Handlers are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e. inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g. container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. Emergency Response Team Members are capable of and engaged in the following:

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☐	Use, maintenance, and replacement of emergency response equipment
☐	Refresher training, which is provided at least annually *
☐	Emergency response drills, which are conducted at least *(specify)* _____ *(e.g. "Quarterly", etc.)*

Record Keeping

(Hazardous Materials Business Plan Module)

FILE NO. 401659

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your recordkeeping procedures is a required module of the Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials recordkeeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e. written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☒	Record of hazardous waste tank daily inspections *
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *(Exception: Available from your local agency is a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the example provided, you do not need to attach a copy.)*

Check the appropriate box:

☒	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☐	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

Date 09/07/2010
Inspector: Randolph, Mike /
Station: BFP Insp.Dist: 13

An inspection of your facility on Thursday September 2, 2010 revealed the violations listed below.

Violation Code	Article	Division	Page	Count
2632(D1);2634(D2);2641(H) Monitoring & Response Plan			0	0
Owner/Operator shall submit a Monitoring and Response Plan to local agency for approval within 30 days. Provide copy on site. MXR 9/2/10				
Repaired 09/02/2010				
2636 (F) (2) Automatic line leak detector present			0	0
Automatic line leak detector present capable of detecting a 3 gph leak MXR 10/04/10				
25505 (D) Business Plans (D)			0	0
Unless exempted from the business plan requirements under this chapter, each handler shall annually report its hazardous materials inventory on the form required by subdivision (a) of Section 25503.3 or in the alternative form designated by the administering agency pursuant to subdivision (b) of Section 25503.3, or submit a certification statement to the administering agency of the county or city in which the handler is located. MXR 10/04/10				

ORDER TO COMPLY: Since these conditions are contrary to law, you must correct them upon receipt of this notice. An inspection to determine compliance with this Notice will be conducted on or after 10/07/2010 .
If you fail to comply with this notice before the reinspection date listed, you may be liable for the penalties provided for by law for such violations.

Emergency Response/Contingency Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC§ 25504(b); 19 CCR §2731; 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written emergency response plan. In addition, facilities that generate 1,000 kilograms or more of hazardous waste (or more than 1 kilogram of acutely hazardous waste or 100 kilograms of debris resulting from the spill of an acutely hazardous waste) per month, or accumulate more than 6,000 kilograms of hazardous waste on-site at any one time, must prepare a hazardous waste contingency plan. Because the requirements are similar, they have been combined in a single document, provided below, for your convenience. This plan is a required module of the Hazardous Materials Business Plan (HMBP). **If you already have a plan that meets these requirements, you should not complete the blank plan, below, but you must include a copy of your existing plan as part of your HMBP.**

This site-specific Emergency Response/Contingency Plan is the facility's plan for dealing with emergencies and shall be implemented immediately whenever there is a fire, explosion, or release of hazardous materials that could threaten human health and/or the environment. **At least one copy of the plan shall be maintained at the facility for use in the event of an emergency and for inspection by the local agency.** A copy of the plan and any revisions must be provided to any contractor, hospital, or agency with whom special (i.e., contractual) emergency services arrangements have been made *(see section 3, below)*.

1. Evacuation Plan:

a. The following alarm signal(s) will be used to begin evacuation of the facility *(check all that apply)*:

☐ Bells; ☐ Horns/Sirens; ☒ Verbal *(i.e., shouting)*; ☐ Other *(specify* _____

b. ☒ Evacuation map is prominently displayed throughout the facility.

Note: A properly completed HMBP Site Plan satisfies contingency plan map requirements. This drawing (or any other drawing that shows primary and alternate evacuation routes, emergency exits, and primary and alternate staging areas) must be prominently posted throughout the facility in locations where it will be visible to employees and visitors.

2. a. Emergency Contacts:*

Fire/Police/Ambulance ..... Phone No.: **911**

California Emergency Management Agency ..... Phone No.: **(800) 852-7550**

b. Post-Incident Contacts:*

Certified Unified Program Agency (CUPA) ..... Phone No.: **(408) 918-3400** (3400)

Local Hazardous Materials Program ..... Phone No.: **(408) ~~277-4659~~** (918-3400)

California Department of Toxic Substances Control (DTSC) ..... Phone No.: **(510) 540-3739**

Cal/OSHA Division of Occupational Safety and Health ..... Phone No.: **(408) 452-7288**

Air Quality Management District ..... Phone No.: **(415) 771-6000**

Regional Water Quality Control Board ..... Phone No.: **(510) 622-2300**

*** Phone numbers for agencies in Unidocs Member Agency geographic jurisdictions are available at www.unidocs.org.**

c. Emergency Resources:

Poison Control Center* ..... Phone No.: **(800) 876-4766**

Nearest Hospital: Name: **Santa Clara Valley Medical** Phone No.: **(408) 885-5000**

Address: **751 South Bascom Ave** City: **San Jose**

3. Arrangements With Emergency Responders:

If you have made special (i.e., contractual) arrangements with any police department, fire department, hospital, contractor, or State or local emergency response team to coordinate emergency services, describe those arrangements below:

4. Emergency Procedures:

Emergency Coordinator Responsibilities:

a. Whenever there is an imminent or actual emergency situation such as a explosion, fire, or release, the emergency coordinator *(or his/her designee when the emergency coordinator is on call)* shall:
   i. Identify the character, exact source, amount, and areal extent of any released hazardous materials.
   ii. Assess possible hazards to human health or the environment that may result from the explosion, fire, or release. This assessment must consider both direct and indirect effects *(e.g., the effects of any toxic, irritating, or asphyxiating gases that are generated, the effects of any hazardous surface water run-off from water or chemical agents used to control fire, etc.)*.
   iii. Activate internal facility alarms or communications systems, where applicable, to notify all facility personnel.
   iv. Notify appropriate local authorities *(i.e., call 911)*.
   v. Notify the California Emergency Management Agency at (800) 852-7550.
   vi. Monitor for leaks, pressure build-up, gas generation, or ruptures in valves, pipes, or other equipment shut down in response to the incident.
   vii. Take all reasonable measures necessary to ensure that fires, explosions, and releases do not occur, recur, or spread to other hazardous materials at the facility.

b. Before facility operations are resumed in areas of the facility affected by the incident, the emergency coordinator shall:
   i. Provide for proper storage and disposal of recovered waste, contaminated soil or surface water, or any other material that results from a explosion, fire, or release at the facility.
   ii. Ensure that no material that is incompatible with the released material is transferred, stored, or disposed of in areas of the facility affected by the incident until cleanup procedures are completed.
   iii. Ensure that all emergency equipment is cleaned, fit for its intended use, and available for use.
   iv. Notify the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program that the facility is in compliance with requirements b-i and b-ii, above.

Responsibilities of Other Personnel:

On a separate page, list any emergency response functions not covered in the "Emergency Coordinator Responsibilities" section, above. Next to each function, list the job title or name of each person responsible for performing the function. Number the page(s) appropriately.

5. Post-Incident Reporting/Recording:

The time, date, and details of any hazardous materials incident that requires implementation of this plan shall be noted in the facility's operating record.

Within 15 days of any hazardous materials emergency incident or threatened hazardous materials emergency incident that triggers implementation of this plan, a written Emergency Incident Report, including, but not limited to a description of the incident and the facility's response to the incident, must be submitted to the California Department of Toxic Substances Control, the local CUPA, and the local fire department's hazardous materials program. The report shall include:

a. Name, address, and telephone number of the facility's owner/operator;
b. Name, address, and telephone number of the facility;
c. Date, time, and type of incident *(e.g., fire, explosion, etc.)*;
d. Name and quantity of material(s) involved;
e. The extent of injuries, if any;
f. An assessment of actual or potential hazards to human health or the environment, where this is applicable;
g. Estimated quantity and disposition of recovered material that resulted from the incident;
h. Cause(es) of the incident;
i. Actions taken in response to the incident;
j. Administrative or engineering controls designed to prevent such incidents in the future.

6. Earthquake Vulnerability: [19 CCR §2731(e)]

As an attachment to this plan, you must identify any areas of the facility and mechanical or other systems that require immediate inspection or isolation because of their vulnerability to earthquake-related ground motion.

7. Hazard Mitigation/Prevention/Abatement [19 CCR §2731(e)]

As an attachment to this plan, you must include procedures that provide for mitigation, prevention, or abatement of hazards to persons, property, or the environment. These procedures must be scaled appropriately for the size and nature of the business, the nature of the damage potential of the hazardous materials handled, and the proximity of the business to residential areas and other populations.

8. Emergency Equipment:

22 CCR §66265.52(e) [as referenced by 22 CCR §66262.34(a)(4)] requires that emergency equipment at the facility be listed. Completion of the following Emergency Equipment Inventory Table meets this requirement.

EMERGENCY EQUIPMENT INVENTORY TABLE

1. Equipment Category	2. Equipment Type	3. Locations *	4. Description**
Personal Protective Equipment, Safety Equipment, and First Aid Equipment	☐ Cartridge Respirators		
	☐ Chemical Monitoring Equipment *(describe)*		
	☐ Chemical Protective Aprons/Coats

Employee Training Plan

(Hazardous Materials Business Plan Module)

Authority Cited: HSC, Section 25504(c); 22 CCR §66262.34(a)(4)

All facilities that handle hazardous materials in HMBP quantities must have a written employee training plan. This plan is a required module of the Hazardous Materials Business Plan (HMBP). A blank plan has been provided below for you to complete and submit if you do not already have such a plan. **If you already have a brief written description of your training program that addresses all subjects covered below, you are not required to complete the blank plan, below, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. *[Note: Items marked with an asterisk (*) are required.]*:

1. **Personnel** are trained in the following procedures:

☒	Internal alarm/notification *
☒	Evacuation/re-entry procedures & assembly point locations*
☐	Emergency incident reporting
☐	External emergency response organization notification
☒	Location(s) and contents of Emergency Response/Contingency Plan
☐	Facility evacuation drills, that are conducted at least *(specify)*: *(e.g., "Quarterly", etc.)*

2. **Chemical Handlers** are additionally trained in the following:

☒	Safe methods for handling and storage of hazardous materials *
☒	Location(s) and proper use of fire and spill control equipment
☒	Spill procedures/emergency procedures
☒	Proper use of personal protective equipment *
☒	Specific hazard(s) of each chemical to which they may be exposed, including routes of exposure *(i.e., inhalation, ingestion, absorption)* *
☒	**Hazardous Waste Handlers/Managers** are trained in all aspects of hazardous waste management specific to their job duties *(e.g., container accumulation time requirements, labeling requirements, storage area inspection requirements, manifesting requirements, etc.)* *

3. **Emergency Response Team Members** are capable of and engaged in the following:

Complete this section only if you have an in-house emergency response team

☐	Personnel rescue procedures
☐	Shutdown of operations
☐	Liaison with responding agencies
☐	Use, maintenance, and replacement of emergency response equipment
☒	Refresher training, which is provided at least annually *
☐	Emergency response drills, which are conducted at least *(specify)*: *(e.g., "Quarterly", etc.)*

Record Keeping

(Hazardous Materials Business Plan Module)

All facilities that handle hazardous materials must maintain records associated with their management. A summary of your record keeping procedures is a required module of the Unidocs Hazardous Materials Business Plan (HMBP). A blank summary has been provided below for you to complete and submit if you do not already have such a document. **If you already have a brief written description of your hazardous materials record keeping systems that addresses all subjects covered below, you are not required to complete this page, but you must include a copy of your existing document as part of your HMBP.**

Check all boxes that apply. The following records are maintained at the facility. *[Note: Items marked with an asterisk (*) are required.]*:

☒	Current employees' training records *(to be retained until closure of the facility)* *
☒	Former employees' training records *(to be retained at least three years after termination of employment)* *
☒	Training Program(s) *(i.e., written description of introductory and continuing training)* *
☒	Current copy of this Emergency Response/Contingency Plan *
☒	Record of recordable/reportable hazardous material/waste releases *
☒	Record of hazardous material/waste storage area inspections *
☒	Record of hazardous waste tank daily inspections *
☐	Description and documentation of facility emergency response drills

Note: The above list of records does not necessarily identify every type of record required to be maintained by the facility.

Note: The following section applies where local agencies require facility owners/operators to perform and document routine facility self-inspections:

A copy of the Inspection Check Sheet(s) or Log(s) used in conjunction with required routine self-inspections of your facility must be submitted with your HMBP. *[Exception: Unidocs provides a Hazardous Materials/Waste Storage Area Inspection Form that you may use if you do not already have your own form. If you use the Unidocs form (available at* **www.unidocs.org***), you do not need to attach a copy.]*

Check the appropriate box:

☒	We will use the Unidocs "Hazardous Materials/Waste Storage Area Inspection Form" to document inspections.
☐	We will use our own documents to record inspections. ***(A blank copy of each document used must be attached to this HMBP.)***

Comments by regulator: Accepted as observed 8/2014. Please update the Property Owner section on the "Business Owner/Operator Identification" page at the next submittal. Also, select "No" for the "Consolidate Hazardous Waste from Remote Sites."

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**Yes**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**Yes**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

An inspection of yout facility onThursday August 6, 2015 revealed the violations listed below

Violation Code	Article	Division	Page	Count
5001.5.2 Hazardous Materials Inventory Statement (HMIS).			0	0

Where required by the fire code official, an application for a permit shall include an HMIS, such as Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III, Tier II Report or other approved statement. The HMIS shall include the following information: 1. Product name.; 2. Component.; 3. Chemical Abstract Service (CAS) number.; 4. Location where stored or used.; 5. Container size.; 6. Hazardous classification.; 7. Amount in storage.; 8. Amount in use-closed systems.; 9. Amount in use-open systems. [For SFM] The HMIS shall comply with Health and Safety Code, Chapter 6.95, Sections 25500 through 25545, and Title 19, Division 2, Chapter 4.

NOTEl:
UPDATE HMBP INVENTORY, SPECIFICALLY THE WASTE OIL QUANTITIES.

5704.3.4.4 Liquids for maintenance and operation of equipment			0	0

In all occupancies, quantities of flammable and combustible liquids in excess of 10 gallons (38 L) used for maintenance purposes and the operation of equipment shall be stored in liquid storage cabinets in accordance with Section 5704.3.2. Quantities not exceeding 10 gallons (38 L) are allowed to be stored outside of a cabinet when in approved containers located in private garages or other approved locations.

NOTE:
PLACE FLAMMABLE/COMBUSTIBLE LIQUIDS INSIDE THE FLAMMABLE/COMBUSTIBLE LIQUID STORAGE CABINET. SEE SHOP TABLE TOP STORAGE AND SHED IN BAY 2.

5003.5.1 Markings			0	0

Individual containers, cartons or packages shall be conspicuously marked or labeled in an approved manner. Rooms or cabinets containing compressed gases shall be conspicuously labeled: COMPRESSED GAS.

NOTE:
POST COMPRESSED GAS SIGNS AT THE ENTRANCES TO THE FACILITY SHOP.

5005.2.1.4 Secondary containment for hazardous material liqui 0 0

Where required by Table 5005.2.1.4, buildings, rooms or areas where hazardous material liquids are dispensed or used in open systems shall be provided with secondary containment in accordance with Section 5004.2.2 when the capacity of an individual vessel or system or the capacity of multiple vessels or systems exceeds the following: 1. Individual vessel or system: greater than 1.3 gallons (5 L).; 2. Multiple vessels or systems: greater than 5.3 gallons (20 L).

NOTE:
PROVIDE SECONDARY CONTAINMENT FOR THE CONTAINERS INSIDE OF THE OIL STORAGE ROOM, 55 GALLON WASTE OIL DRUM IN BAY 2, AND OIL TRANSFER CARTS.

5003.5 Hazard identification signs. 0 0

Unless otherwise exempted by the fire code official, visible hazard identification signs as specified in NFPA 704 for the specific material contained shall be placed on stationary containers and above-ground tanks and at entrances to locations where hazardous materials are stored, dispensed, used or handled in quantities requiring a permit and at specific entrances and locations designated by the fire code official.

NOTE:
POST NFPA 704 PLACARD AT THE FOLLOWING LOCATIONS:
-ENTRANCES TO THE OIL ROOM. INSIDE AND OUT.
-PARTS WASHER

5003.2.2.1 Design and construction. 0 0

Piping, tubing, valves, fittings and related components used for hazardous materials shall be in accordance with the following: ... 2. Piping and tubing shall be identified in accordance with ASME A13.1 to indicate the material conveyed.;...

NOTE:
1) LABEL OIL TRANSFER PIPING IN THE FACILITY SHOP.
2) LABEL PROPANE PIPING LEADING TO THE BURNER.

5803.1.4.2 Signs. 0 0

"No Smoking" signs shall be posted at entrances to rooms and in areas containing flammable gases in accordance with Section 5003.7.1.

NOTE:
POST "NO SMOKING" SIGN IN THE AREA WHERE PROPANE AND ACETELYENE ARE STORED.

5303.5.3 Secure compressed gas containers, cylinders, tanks 0 0

Compressed gas containers, cylinders and tanks shall be seured to prevent falling caused by contact, vibration or seismic activity. Securing of compressed gas containers, cylinders and tanks shall be by one of the following methods:

1. Securing containers, cylinders and tanks to a fixed object with one or more restraints.
2. Securing containers, cylinders and tanks on a cart or other mobile device designed for the movement of compressed gas containers, cylinders or tanks.
3. Nesting of compressed gas containers, cylinders and tanks at container filling or servicing faci.ities or in seller's warehouses not accessible to the public. Nesting shall be allowed provided the nested containers, cylinders or tanks, if deslodged, do not obstruct the required means of egress.
4. Securing of compessed gas containers, cylinders and tanks to or within a rack, framework, cabinet or similar assembly designed for such use.

Exeeption: Compressed gas containers, cylinders and tanks in the process of examination, filling, transport or servicing.

NOTE:
SECURE PROPANE TANKS AND CYLINDERS INSIDE THE FACILITY SHOP BY ONE OF THE ABOVE METHODS.

906.1 Fire Extinguisher - Where required. 0 0

Portable fire extinguishers shall be installed in the following locations.

1. In new and existing Group A, B, E, F, H, I , M, R-1, R-2, R-4 and S occupancies. Exception: In new and existing Group A, B and E occupancies equipped throughout with quick- response sprinklers, portable fire extinguishers shall be required only in locations specified in Items 2 through 6.
2. Within 30 feet (9144 mm) of commercial cooking equipment.
3. In areas where flammable or combustible liquids are stored, used or dispensed.
4. On each floor of structures under construction, except Group R-3 occupancies, in accordance with Section

An inspection of yout facility onThursday August 6, 2015 revealed the violations listed below

Violation Code	Article	Division	Page	Count
5001.5.2 Hazardous Materials Inventory Statement (HMIS).			0	0

Where required by the fire code official, an application for a permit shall include an HMIS, such as Superfund Amendments and Reauthorization Act of 1986 (SARA) Title III, Tier II Report or other approved statement. The HMIS shall include the following information: 1. Product name.; 2. Component.; 3. Chemical Abstract Service (CAS) number.; 4. Location where stored or used.; 5. Container size.; 6. Hazardous classification.; 7. Amount in storage.; 8. Amount in use-closed systems.; 9. Amount in use-open systems. [For SFM] The HMIS shall comply with Health and Safety Code, Chapter 6.95, Sections 25500 through 25545, and Title 19, Division 2, Chapter 4.

NOTEl:
UPDATE HMBP INVENTORY, SPECIFICALLY THE WASTE OIL QUANTITIES.

5704.3.4.4 Liquids for maintenance and operation of equipment			0	0

In all occupancies, quantities of flammable and combustible liquids in excess of 10 gallons (38 L) used for maintenance purposes and the operation of equipment shall be stored in liquid storage cabinets in accordance with Section 5704.3.2. Quantities not exceeding 10 gallons (38 L) are allowed to be stored outside of a cabinet when in approved containers located in private garages or other approved locations.

NOTE:
PLACE FLAMMABLE/COMBUSTIBLE LIQUIDS INSIDE THE FLAMMABLE/COMBUSTIBLE LIQUID STORAGE CABINET. SEE SHOP TABLE TOP STORAGE AND SHED IN BAY 2.

5003.5.1 Markings			0	0

Individual containers, cartons or packages shall be conspicuously marked or labeled in an approved manner. Rooms or cabinets containing compressed gases shall be conspicuously labeled: COMPRESSED GAS.

NOTE:
POST COMPRESSED GAS SIGNS AT THE ENTRANCES TO THE FACILITY SHOP.

5005.2.1.4 Secondary containment for hazardous material liqui 0 0

Where required by Table 5005.2.1.4, buildings, rooms or areas where hazardous material liquids are dispensed or used in open systems shall be provided with secondary containment in accordance with Section 5004.2.2 when the capacity of an individual vessel or system or the capacity of multiple vessels or systems exceeds the following: 1. Individual vessel or system: greater than 1.3 gallons (5 L).; 2. Multiple vessels or systems: greater than 5.3 gallons (20 L).

NOTE:
PROVIDE SECONDARY CONTAINMENT FOR THE CONTAINERS INSIDE OF THE OIL STORAGE ROOM, 55 GALLON WASTE OIL DRUM IN BAY 2, AND OIL TRANSFER CARTS.

5003.5 Hazard identification signs. 0 0

Unless otherwise exempted by the fire code official, visible hazard identification signs as specified in NFPA 704 for the specific material contained shall be placed on stationary containers and above-ground tanks and at entrances to locations where hazardous materials are stored, dispensed, used or handled in quantities requiring a permit and at specific entrances and locations designated by the fire code official.

NOTE:
POST NFPA 704 PLACARD AT THE FOLLOWING LOCATIONS:
-ENTRANCES TO THE OIL ROOM. INSIDE AND OUT.
-PARTS WASHER

5003.2.2.1 Design and construction. 0 0

Piping, tubing, valves, fittings and related components used for hazardous materials shall be in accordance with the following: ... 2. Piping and tubing shall be identified in accordance with ASME A13.1 to indicate the material conveyed.;...

NOTE:
1) LABEL OIL TRANSFER PIPING IN THE FACILITY SHOP.
2) LABEL PROPANE PIPING LEADING TO THE BURNER.

5803.1.4.2 Signs. 0 0

"No Smoking" signs shall be posted at entrances to rooms and in areas containing flammable gases in accordance with Section 5003.7.1.

NOTE:
POST "NO SMOKING" SIGN IN THE AREA WHERE PROPANE AND ACETELYENE ARE STORED.

5303.5.3 Secure compressed gas containers, cylinders, tanks 0 0

Compressed gas containers, cylinders and tanks shall be seured to prevent falling caused by contact, vibration or seismic activity. Securing of compressed gas containers, cylinders and tanks shall be by one of the following methods:

1. Securing containers, cylinders and tanks to a fixed object with one or more restraints.
2. Securing containers, cylinders and tanks on a cart or other mobile device designed for the movement of compressed gas containers, cylinders or tanks.
3. Nesting of compressed gas containers, cylinders and tanks at container filling or servicing faci.ities or in seller's warehouses not accessible to the public. Nesting shall be allowed provided the nested containers, cylinders or tanks, if deslodged, do not obstruct the required means of egress.
4. Securing of compessed gas containers, cylinders and tanks to or within a rack, framework, cabinet or similar assembly designed for such use.

Exeeption: Compressed gas containers, cylinders and tanks in the process of examination, filling, transport or servicing.

NOTE:
SECURE PROPANE TANKS AND CYLINDERS INSIDE THE FACILITY SHOP BY ONE OF THE ABOVE METHODS.

906.1 Fire Extinguisher - Where required. 0 0

Portable fire extinguishers shall be installed in the following locations.

1. In new and existing Group A, B, E, F, H, I , M, R-1, R-2, R-4 and S occupancies. Exception: In new and existing Group A, B and E occupancies equipped throughout with quick- response sprinklers, portable fire extinguishers shall be required only in locations specified in Items 2 through 6.
2. Within 30 feet (9144 mm) of commercial cooking equipment.
3. In areas where flammable or combustible liquids are stored, used or dispensed.
4. On each floor of structures under construction, except Group R-3 occupancies, in accordance with Section

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**Yes**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**Yes**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**Yes**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**Yes**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

Division of Financial Assistance
P.O. Box 944212
Sacramento, CA 94244-2120

For State Use Only

CERTIFICATION OF FINANCIAL RESPONSIBILITY

FOR UNDERGROUND STORAGE TANKS CONTAINING PETROLEUM

A. I am required to demonstrate Financial Responsibility in the required amounts as specified in CCR, Title 23 Division 3, Chapter 18, Section 2807:

☐ 500,000 dollars per occurrence
or
☒ 1 million dollars per occurrence

AND

☒ 1 million dollars annual aggregate
or
☐ 2 million dollars annual aggregate

B. **Granite Rock Company** hereby certifies that it is in compliance with the requirements of California Code of Regulations, Title 23, Division 3, Chapter 18, Article 3, Section 2807.
(Name of tank Owner or Operator)

The mechanisms used to demonstrate financial responsibility as required by Section 2807 are as follows:

C: Mechanism Type	Name and Address of Issuer	Mechanism Number	Coverage Amount	Coverage Period	Corrective Action	Third Party Compensation
Chief Financial Officer Letter	**Granite Rock Compnay 350 Technology Dr. Watsonville Ca 95076**	**N/A**	**$10,000**	**Continuous**	**Yes**	**Yes**
State UST Cleanup Fund Graniterock UST BOE No. 44-014738	**UST Cleanup Fund P.O. Box 944212 Sacramento Ca 94244**	**N/A**	**$990,000**	**Continuous**	**Yes**	**Yes**

Note: If you are using the State Fund as any part of your demonstration of financial responsibility, your execution and submission of this certification also certifies that you are in compliance and shall remain in compliance with all conditions for participation in the Fund.

D. Facility Name	Facility Address
Graniterock-Watsonville Concrete and Building Mat'l	**540 W. Beach St. Watsonville, CA 95076**
Graniterock - Santa Cruz Concrete and Building Mat'l	**303 Coral St. Santa Cruz, CA 95060**
Graniterock - Salinas Concrete and Building Materials	**400 Work St. Salinas, CA 93901**

Graniterock - Construction Division Central Office	**120 Granite Rock Way, San Jose, CA 95136**
Graniterock - San Jose Concrete and Road Materials	**11711 Berryessa Rd. San Jose, CA 95133**

E. Signature of Tank Owner or Operator	Date	Name and Title of Tank Owner or Operator
	7/16/15	**Thomas Squeri, CEO**
Signature of Witness or Notary	Date	Name of Witness or Notary
	7/16/15	

Submit original to local UST regulatory agency. Keep a copy at each UST facility.

(Instructions on Next Page)

INSTRUCTIONS FOR CERTIFICATION OF FINANCIAL RESPONSIBILITY

Please type or print information clearly. All underground storage tank (UST) sites owned or operated may be listed on one form, therefore a separate certification is not required for each site. For questions regarding required coverage amounts or approved financial responsibility mechanisms, please refer to the State Water Resources Control Board's publication, "Petroleum Underground Storage Tank Financial Responsibility Guide" or call the UST Cleanup Fund at (800) 813-3863.

A. Coverage Required — Check one box on the left side of the form to indicate coverage per occurrence (i.e., $500,000 or $1,000,000) and one box on the right side of the form to indicate annual aggregate coverage (i.e., $1,000,000 or $2,000,000).

B. Name of Tank Owner or Operator — Provide the full legal name of either the tank owner or the tank operator.

C. Mechanism Type — Indicate which approved mechanism(s) are being used to show financial responsibility either as contained in the federal regulations (40 CFR, Part 280, Subpart H, Sections 280.93 through 280.107) or CCR, Title 23, , Division 3, Chapter 18, Section 2808.1.

Name of Issuer — List the names and addresses of companies and/or individuals issuing coverage. If you use the State UST Cleanup Fund as a mechanism, use the following information:
"
: UST Cleanup Fund, P.O. Box 944212, Sacramento, CA 94244-2120".

Mechanism Number — List the identifying number for each mechanism used (e.g. insurance policy number, letter of credit number, etc.). If using the State Cleanup Fund and/or a financial test of self-insurance (e.g. CFO letter), enter "N/A".

Coverage Amount — Indicate the per occurrence and annual aggregate coverage amount provided by each listed mechanism. If more than one mechanism is indicated, aggregate coverage must equal 100% of required financial responsibility amounts.

Coverage Period — Indicate the effective date of each mechanism. State Cleanup Fund coverage is continuous as long as you maintain compliance and remain eligible for participation.

Corrective Action — Does the specified mechanism provide coverage for corrective action? Indicate "Yes" or "No". If using the State Cleanup Fund, indicate "Yes."

Third Party Compensation — Does the specified mechanism provide coverage for third party compensation? Indicate "Yes" or "No". If using the State Cleanup Fund, indicate "Yes."

D. Facility Information — List the name and site address of each UST facility covered by this Certification.

E. Signature Block — The tank owner or operator must sign and date the Certification. Print or type the owner or operator's name and title in the space provided. The owner or operator's signature must be witnessed. The witness or notary must sign and date the Certification. Print or type the witness' name in the space provided. Anybody may sign as witness; however, if a notary signs, please attach documentation.

Send the original completed form to the local agency(ies) that issue the UST permit(s) for the listed site(s). Keep a copy of the certification at each UST site. Local agency contact information is available at: **www.calcupa.net/cupacontactlist.xls.**

If you have questions about financial responsibility requirements or about the Certification of Financial Responsibility form, please contact the State Water Resources Control Board, Underground Storage Tank Cleanup Fund at 1-800-813-FUND (3863) or refer to **www.waterboards.ca.gov/cwphome/ustcf/howtocontactus.htm.**

NOTE: Per Health and Safety Code §25299.76(a), failure comply with UST Financial Responsibility requirements can result in civil penalties of up to $10,000 per day, per UST, for each day of violation. Eligibility for reimbursement of claims submitted to the State Cleanup Fund may also be jeopardized.

CALIFORNIA ALL-PURPOSE ACKNOWLEDGMENT **CIVIL CODE § 1189**

A notary public or other officer completing this certificate verifies only the identity of the individual who signed the document to which this certificate is attached, and not the truthfulness, accuracy, or validity of that document.

UNDERGROUND STORAGE TANK
RESPONSE PLAN – PAGE 1

(One form per facility)

TYPE OF ACTION ☐ 1. NEW PLAN ☒ 2. CHANGE OF INFORMATION R01.

I. FACILITY INFORMATION

FACILITY ID # *(Agency Use Only)* | | | — | | | | — | | | | | | | 1.

BUSINESS NAME (Same as FACILITY NAME) 3
Granite Rock Company - Pavex Central

BUSINESS SITE ADDRESS 103.
120 Granite Rock Way

BUSINESS SITE CITY 104.
San Jose

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED: *(Complete only if applicable)*

EQUIPMENT	LOCATION	AVAILABILITY
R10	R20.	R30
R11	R21.	R31
R12.	R22.	R32.
R13.	R23.	R33
R14.	R24.	R34.
R15.	R25.	R35.

IV. RESPONSIBLE PERSONS

THE FOLLOWING PERSON(S) IS/ARE RESPONSIBLE FOR AUTHORIZING ANY WORK NECESSARY UNDER THIS RESPONSE PLAN:

NAME Elden Davis R40.	TITLE Equipment Manager R50.
NAME Chuck Gardner R41	TITLE Equipment Superintendent R51
NAME Elias Lanuza R42.	TITLE Maintenance Planner R52.
NAME R43.	TITLE R53.

V. MONITORING INDICATORS

IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE, STEPS TO VERIFY THE RELEASE WILL BE MADE AS FOLLOWS:

☒ 1. ADDITIONAL SYSTEM TESTING OR DATA COLLECTION ☒ 2. INSPECTION BY QUALIFIED PERSONS ☐ 3. RECALIBRATION OF EQUIPMENT R60

☐ 99. OTHER (Specify): R61.

UNDERGROUND STORAGE TANK

RESPONSE PLAN – PAGE 2

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

CONFIDENTIAL

LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for Graniterock Company, 350 Technology Drive, Watsonville CA 95076.

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least $500,000 per occurrence and $1,000,000 annual aggregate coverage.

1.	Amount of annual aggregate coverage being assured by this letter	$10,000
2.	Total tangible assets	$163,000,000
3.	Total liabilities	$83,000,000
4.	Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	$80,000,000

I hereby certify that the wording of this letter is identical to the wording specified in subsection 2808.1(d)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.

Executed at Watsonville, CA

INSTRUCTIONS

1. Report the name(s) of the Designated UST Operator(s) as registered with the International Code Council (ICC). ICC certification information is available on-line at: **www.iccsafe.org/e/certsearch.html**. Search for "California UST System Operators."
2. Submit this completed form to the local agency that regulates this facility's USTs. Unidocs member agency jurisdictions and contact information are listed on-line at: **www.unidocs.org/members/whoregulateswhat.html**. Contact information for other local agencies within California is available at: **www.swrcb.ca.gov/cwphome/ust/contacts/docs/local_agency_list.xls**.
3. 23 CCR §2715(a) requires that you notify the local agency of any changes to this information within 30 days of the date of change.

Monitoring System Equipment Certification

For Use By All Jurisdictions Within The State of California

Authority Cited: Chapter 6.7, Health and Safety Code; Chapter 16, Division 3, Title 23, California Code of Regulations

This form must be used to document testing and servicing of monitoring equipment. A separate certification or report must be prepared for each monitoring system control panel by the technician who performs the work. A copy of this form must be provided to the tank system owner/operator. The owner/operator must submit a copy of this form to the local agency regulating UST system within 30 days of test date.

*If the facility contains more tanks or dispensers, copy this form. Include information for every tank and dispenser at the facility

C. Certification -

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturer's guidelines. Attached to this Certification is information (e.g. manufactures' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the; *(check all that apply):* ☐ System set-up ☐ Alarm history report

Technician Name (print): **Israel Santillan** Signature:

Mfg. Cert.#.: **10999** ICC# **8057571-UT** License. No.: **485184**

Testing Company Name: **Service Station Systems** Phone No.: **(408) 971-2445**

Testing Company Address: **680 Quinn Ave., San Jose, CA 95112** Date of Testing/Servicing: **8/8/14**

Site Address: **120 Granite Rock Way** Date of Testing/Servicing: **8/8/14**

D. Results of Testing / Servicing

Software Version Installed: **N/A**

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☐ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes ☐ No
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? 0 %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☐ Yes	☒ No*	Was monitoring system set-up reviewed to ensure proper settings? *(Attach set-up reports, if applicable.)*
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments: **Site has no printer & no system to determine if set up is correct.**

87 & Diesel are split tanks and share Annular.

87 Dispenser has Suction System & Stand Alone Sensor that shuts down Dispenser (330212-001).

Only Diesel STP has a sensor that shuts down Turbine.

Site Address: **120 Granite Rock Way** Date of Testing/Servicing: **8/8/14**

F. In - Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☒ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In Section H below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD):

☐ Check this box if LLD's are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h. (1.); ☐ 0.1 g.p.h. (2.); ☐ 0.2 g.p.h. (2.). Notes: 1. Required for equipment start-up certification and annual certification. 2. Unless mandated by local agency, certification required only for electronic LLD start-up.
☒ Yes	☐ No*	Were all LLD's confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☒ Yes	☐ No* ☐ N/A	For mechanical LLD's, does the LLD restrict product flow if it detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, does the turbine automatically shut off if the LLD detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In Section H below, describe how and when these deficiencies were or will be corrected.**

H. Comments:

SWRCB, January 2006

Spill Bucket Testing Report Form

This form is intended for use by contractors performing annual testing of UST spill containment structures. The completed form and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

Submitted on 8/19/2015 by *Reed Carter* of GRANITE ROCK COMPANY (SAN JOSE, CA)
Submittal was *Accepted*; Processed on 9/2/2015 by *Matthew Burge* for Santa Clara County Environmental Health
Comments by regulator: Accepted as administratively complete. A technical review may be conducted subsequently as part of your next facility inspection.
NOTE: Update the property owner information on the Business Owner/Operator Identification page.
NOTE: To re-certify the Hazardous Materials Business Plan you must submit the Facility Information, Hazardous Materials Inventory, AND Emergency Response and Training Plans sections next year by the end of the same month in which the submittal was made.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**Yes**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**Yes**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

Employee Training Plan

Employee training is provided in the following manner:

-Initially for all new employees (1-2 hrs)
New employees receive training before their initial work assignment on the following:

A. Injury and illness prevention
   1. Safety Policies
   2. Safety Rules
   3. Employee Responsibilities
   4. Hazard Reporting

B. Emergency Response
   1. Emergency Response Plan
   2. Emergency Evacuation Map

- Annual Refresher (1 hr) courses for all employees
Same as above

All employees are trained in the following procedures:
- Internal alarm/notification (verbal)

A. If not an immediate evacuation, employees are trained to:
   1. Secure all hazardous material containers
   2. Shut off all ignition sources
   3. Close all doors
   4. Shut down utilities
   5. Lower hydraulic hoists to ground level

B. Immediate evacuation, employees are trained to evacuate and to notify all non-employees to evacuate the building.

- Evacuation/reentry procedures and assembly locations
   Employees are trained to assemble at the evacuation staging area as indicated on the evacuation map until told by local agencies it is safe to reenter.

- Location and content of the emergency response plan

Employees are informed that the emergency response plan is kept in the Body shop Manager's office.

In addition, all employees who handle hazardous materials are annually trained in the following:

- Safe methods for handling and storage of hazardous materials
  Must have a written Hazard Communication Program.
  Hazardous substances are properly labeled, sealed, and contained.
  Inventory is complete with copies of the MSDS's for each hazardous material and is accessible to all employees.

- Location and proper use of fire and spill control equipment
  Employees are informed of the location of the fire and spill control equipment.
  Employees are trained on proper use of fire and spill control equipment.

- Proper use of personal protective equipment
  Taught the importance and use of each appropriate personal.
  Protective equipment (safety gloves, glasses, respirators, etc.).

- Specific hazards of each chemical to which they may be exposed, including the pathways of exposure (i.e., skin absorption, inhalation, ingestion).
  Identify the most commonly used hazardous materials (components) used at the facility.
  Identify physical properties.
  Identify primary hazards.
  Identify methods of immediate treatment.

Emergency response team members are additionally trained in the following procedures and will act as a liaison for the fire department.

- Personal rescue procedures

Take headcount; inform fire department of unaccounted personnel.

- Shutdown of operations

Identify potentially hazardous leaks and spills, report to the local fire department and Office of Emergency Services (800) 852-7550.

- Use, maintenance, and replacement of emergency response equipment

Check first aid kit on a periodic basis; replace first aid items as needed. Inspect fire extinguishers and sprinklers on a monthly basis (as required by the local fire code).

- Refresher training

Provided annually – 1 hour.

- Emergency response drills.

Annual practice drills are recommended.

The following training records are maintained for each employee

Facility follows training recordkeeping procedures as recommended by the state codes.

- Verification of date the training was conducted
- Current (to be maintained until facility closure) and former employees' training records (held for three years after job termination).
- Description of introductory and continuing training.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**Yes**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**Yes**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

Comments by regulator: Update the monitoring plan with the new Incon System information. Also the updated CFR should have the $500,000 per occurrence checked and $1 million annual aggregate checked. Also check the coverage numbers. The prior year's CFR is properly completed so use that as a template.

INSTRUCTIONS FOR CERTIFICATION OF FINANCIAL RESPONSIBILITY

Please type or print information clearly. All underground storage tank (UST) sites owned or operated may be listed on one form, therefore a separate certification is not required for each site. For questions regarding required coverage amounts or approved financial responsibility mechanisms, please refer to the State Water Resources Control Board's publication, "Petroleum Underground Storage Tank Financial Responsibility Guide" or call the UST Cleanup Fund at (800) 813-3863.

A. Coverage Required — Check one box on the left side of the form to indicate coverage per occurrence (i.e., $500,000 or $1,000,000) and one box on the right side of the form to indicate annual aggregate coverage (i.e., $1,000,000 or $2,000,000).

B. Name of Tank Owner or Operator — Provide the full legal name of either the tank owner or the tank operator.

C. Mechanism Type — Indicate which approved mechanism(s) are being used to show financial responsibility either as contained in the federal regulations (40 CFR, Part 280, Subpart H, Sections 280.93 through 280.107) or CCR, Title 23, , Division 3, Chapter 18, Section 2808.1.

Name of Issuer — List the names and addresses of companies and/or individuals issuing coverage. If you use the State UST Cleanup Fund as a mechanism, use the following information:
l"
: UST Cleanup Fund, P.O. Box 944212, Sacramento, CA 94244-2120".

Mechanism Number — List the identifying number for each mechanism used (e.g. insurance policy number, letter of credit number, etc.). If using the State Cleanup Fund and/or a financial test of self-insurance (e.g. CFO letter), enter "N/A".

Coverage Amount — Indicate the per occurrence and annual aggregate coverage amount provided by each listed mechanism. If more than one mechanism is indicated, aggregate coverage must equal 100% of required financial responsibility amounts.

Coverage Period — Indicate the effective date of each mechanism. State Cleanup Fund coverage is continuous as long as you maintain compliance and remain eligible for participation.

Corrective Action — Does the specified mechanism provide coverage for corrective action? Indicate "Yes" or "No". If using the State Cleanup Fund, indicate "Yes."

Third Party Compensation — Does the specified mechanism provide coverage for third party compensation? Indicate "Yes" or "No". If using the State Cleanup Fund, indicate "Yes."

D. Facility Information — List the name and site address of each UST facility covered by this Certification.

E. Signature Block — The tank owner or operator must sign and date the Certification. Print or type the owner or operator's name and title in the space provided. The owner or operator's signature must be witnessed. The witness or notary must sign and date the Certification. Print or type the witness' name in the space provided. Anybody may sign as witness; however, if a notary signs, please attach documentation.

Send the original completed form to the local agency(ies) that issue the UST permit(s) for the listed site(s). Keep a copy of the certification at each UST site. Local agency contact information is available at: **www.calcupa.net/cupacontactlist.xls**.

If you have questions about financial responsibility requirements or about the Certification of Financial Responsibility form, please contact the State Water Resources Control Board, Underground Storage Tank Cleanup Fund at 1-800-813-FUND (3863) or refer to **www.waterboards.ca.gov/cwphome/ustcf/howtocontactus.htm**.

NOTE: **Per Health and Safety Code §25299.76(a), failure comply with UST Financial Responsibility requirements can result in civil penalties of up to $10,000 per day, per UST, for each day of violation. Eligibility for reimbursement of claims submitted to the State Cleanup Fund may also be jeopardized.**

Graniterock®

CONFIDENTIAL

LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for Graniterock Company, 350 Technology Drive, Watsonville CA 95076.

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least $500,000 per occurrence and $1,000,000 annual aggregate coverage.

1.	Amount of annual aggregate coverage being assured by this letter	$2,000,000
2.	Total tangible assets	$186,000,000
3.	Total liabilities	$92,000,000
4.	Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	$94,000,000

I hereby certify that the wording of this letter is identical to the wording specified in subsection 2808.1(d)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.

RESPONSE PLAN – PAGE 1

(One form per facility)

R01.

TYPE OF ACTION ☐ 1. NEW PLAN ☒ 2. CHANGE OF INFORMATION

I. FACILITY INFORMATION

FACILITY ID # *(Agency Use Only)* | | | — | | | | — | | | | | | | 1.

3.

BUSINESS NAME (Same as FACILITY NAME)

Granite Rock Company - Pavex Central

BUSINESS SITE ADDRESS 103.

120 Granite Rock Way

BUSINESS SITE CITY 104.

San Jose

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED: *(Complete only if applicable)*

EQUIPMENT	LOCATION	AVAILABILITY
R10.	R20.	R30.
R11.	R21.	R31.
R12.	R22.	R32.
R13.	R23.	R33.
R14.	R24.	R34.
R15.	R25.	R35.

IV. RESPONSIBLE PERSONS

THE FOLLOWING PERSON(S) IS/ARE RESPONSIBLE FOR AUTHORIZING ANY WORK NECESSARY UNDER THIS RESPONSE PLAN:

NAME R40. Elden Davis	TITLE R50. Equipment Manager
NAME R41. Chuck Gardner	TITLE R51. Equipment Superintendent
NAME R42. Elias Lanuza	TITLE R52. Maintenance Planner
NAME R43.	TITLE R53.

V. MONITORING INDICATORS

IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE, STEPS TO VERIFY THE RELEASE WILL BE MADE AS FOLLOWS:

☒ 1. ADDITIONAL SYSTEM TESTING OR DATA COLLECTION ☒ 2. INSPECTION BY QUALIFIED PERSONS ☐ 3. RECALIBRATION OF EQUIPMENT R60.

☐ 99. OTHER (Specify): R61.

UNDERGROUND STORAGE TANK

RESPONSE PLAN – PAGE 2

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

C. Certification

I certify that the equipment identified in this document was inspected/serviced in accordance with the manufacturer's guidelines. Attached to this Certification is information (e.g. manufactures' checklists) necessary to verify that this information is correct and a Plot Plan showing the layout of monitoring equipment. For any equipment capable of generating such reports, I have also attached a copy of the; ***(check all that apply):*** ☐ **System set-up** ☐ **Alarm history report**

Technician Name (print): **Israel Santillan** Signature:

Mfg. Cert.#.: **10999** ICC# **8057571-UT** License. No.: **485184**

Testing Company Name: **Service Station Systems** Phone No.: **(408) 971-2445**

Testing Company Address: **680 Quinn Ave., San Jose, CA 95112** Date of Testing/Servicing: **8/8/14**

Site Address: 120 Granite Rock Way Date of Testing/Servicing: 8/8/14

D. Results of Testing / Servicing

Software Version Installed: N/A

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☐ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes ☐ No
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? 0 %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☐ Yes	☒ No*	Was monitoring system set-up reviewed to ensure proper settings? *(Attach set-up reports, if applicable.)*
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments: Site has no printer & no system to determine if set up is correct.

87 & Diesel are split tanks and share Annular.

87 Dispenser has Suction System & Stand Alone Sensor that shuts down Dispenser (330212-001).

Only Diesel STP has a sensor that shuts down Turbine.

Site Address: 120 Granite Rock Way Date of Testing/Servicing: 8/8/14

F. In - Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☒ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In Section H below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD): ☐ Check this box if LLD's are not installed.

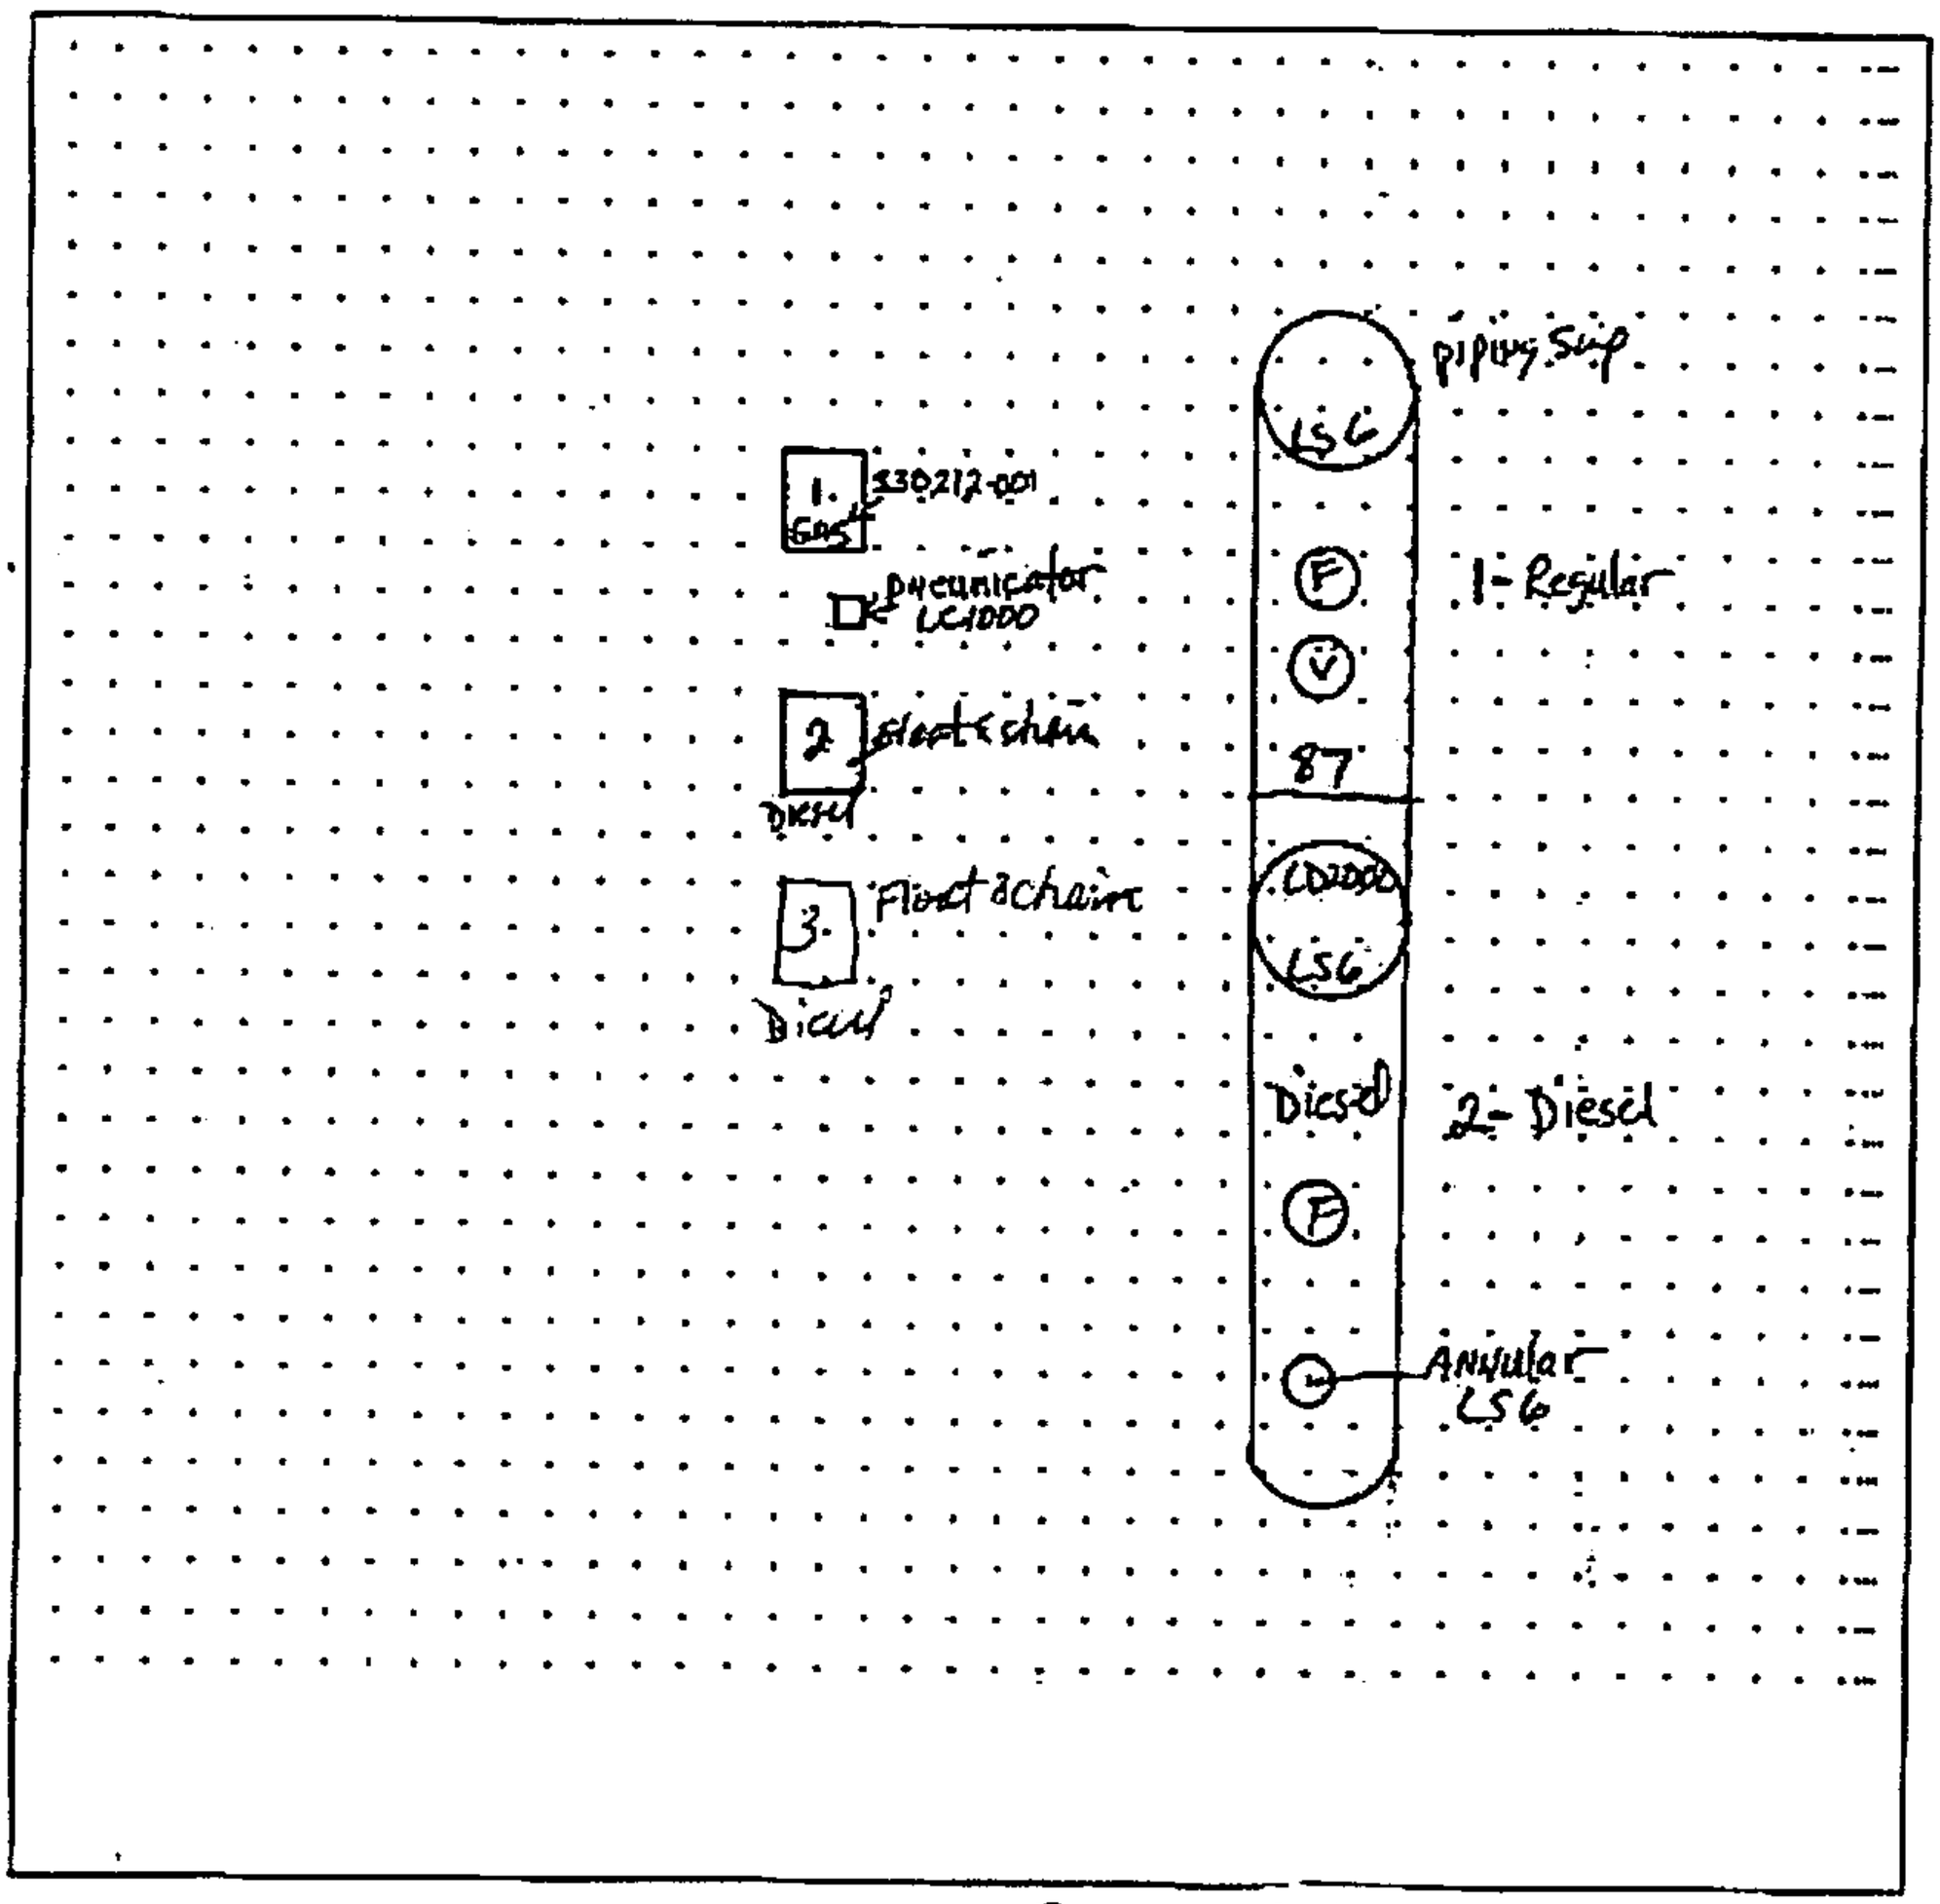
Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h. (1.); ☐ 0.1 g.p.h. (2.); ☐ 0.2 g.p.h. (2.). Notes: 1. Required for equipment start-up certification and annual certification. 2. Unless mandated by local agency, certification required only for electronic LLD start-up.
☒ Yes	☐ No*	Were all LLD's confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☒ Yes	☐ No* ☐ N/A	For mechanical LLD's, does the LLD restrict product flow if it detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, does the turbine automatically shut off if the LLD detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In Section H below, describe how and when these deficiencies were or will be corrected.**

H. Comments: _____

Monitoring System Certification
UST Monitoring Site Plan
120 Granite Rock Way @ Fillcap Ave. in San Jose



Date map was drawn: 8/8/14

Instructions

On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment, if installed: monitoring system control panels; sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers, or other secondary containment areas; mechanical or electronic line leak detectors; and in-tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

SWRCB, January 2006

Spill Bucket Testing Report Form

This form is intended for use by contractors performing annual testing of UST spill containment structures. The completed form and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

1. FACILITY INFORMATION

Facility Name: Granite Rock	Date of Testing: 08/08/14
Facility Address: 120 Granite Rock Way San Jose, CA 95136-	
Facility Contact: Elden Davis (408) 574-1427	
Date Local Agency Was Notified of Testing: 7/29/14	
Name of Local Agency Inspector *(if present during testing):* Matthew Burge	

2. TESTING CONTRACTOR INFORMATION

Company Name: Service Station Systems
Technician Conducting Test: Israel Santillan
Credentials[1]: ☒ CSLB Contractor ☒ ICC Service Tech. ☐ SWRCB Tank Tester ☐ Other *(Specify)*
License Number(s): License: 485184 ICC:8057571-UT

3. SPILL BUCKET TESTING INFORMATION

Test Method Used:	☒ Hydrostatic	☐ Vacuum	☐ Other	
Test Equipment Used: Measuring Tape			Equipment Resolution: 1/16 in.	
Identify Spill Bucket *(By Tank Number, Stored Product, etc.)*	1 Fill Bucket 01 Regu	2 Fill Bucket 02 Diesel	3	4
Bucket Installation Type:	☒ Direct Bury ☐ Contained in Sump	☒ Direct Bury ☐ Contained in Sump	☐ Direct Bury ☐ Contained in Sump	☐ Direct Bury ☐ Contained in Sump
Bucket Diameter:	12.00 in.	12.00 in.		
Bucket Depth:	14.00 in.	16.00 in.		
Wait time between applying vacuum/water and start of test:	10 min.	10 min.		
Test Start Time (T_I):	9:30am	9:30am		
Initial Reading (R_I):	11.750 in.	12.125 in.		
Test End Time (T_F):	10:30am	10:30am		
Final Reading (R_F):	11.750 in.	12.125 in.		
Test Duration ($T_F - T_I$):	1.00 hr.	1.00 hr.		
Change in Reading ($R_F - R_I$):	0.0000 in.	0.0000 in.		
Pass/Fail Threshold or Criteria:	ZERO LOSS	ZERO LOSS		
Test Result:	☒ Pass ☐ Fail	☒ Pass ☐ Fail	☐ Pass ☐ Fail	☐ Pass ☐ Fail

Comments: Include information on repairs made prior to testing, and recommended follow-up for failed tests.

CERTIFICATION OF TECHNICIAN RESPONSIBLE FOR CONDUCTING THIS TESTING

I hereby certify that all the information contained in this report is true, accurate,and in full compliance with legal requirements.

Technician's Signature: _____ Date: 8/8/14

[1] State laws and regulations do not currently require testing to be performed by a qualified contractor. However, local requirements may be more stringent.

Hazardous Materials

Does your facility have on site (for any purpose) at any one time, hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases (include liquids in ASTs and USTs); or is regulated under more restrictive inventory local reporting requirements (shown below if present); or the applicable Federal threshold quantity for an extremely hazardous substance specified in 40 CFR Part 355, Appendix A or B; or handle radiological materials in quantities for which an emergency plan is required pursuant to 10 CFR Parts 30, 40 or 70?	**Yes**

Underground Storage Tank(s) (UST)

Does your facility own or operate underground storage tanks?	**Yes**

Hazardous Waste

Is your facility a Hazardous Waste Generator?	**Yes**
Does your facility treat hazardous waste on-site?	**No**
Is your facility's treatment subject to financial assurance requirements (for Permit by Rule and Conditional Authorization)?	**No**
Does your facility consolidate hazardous waste generated at a remote site?	**Yes**
Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?	**No**
Does your facility generate in any single calendar month 1,000 kilograms (kg) (2,200 pounds) or more of federal RCRA hazardous waste, or generate in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste; or generate or accumulate at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste.	**No**
Is your facility a Household Hazardous Waste (HHW) Collection site?	**No**

Excluded and/or Exempted Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?	**No**
Does your facility own or operate ASTs above these thresholds? Store greater than 1,320 gallons of petroleum products (new or used) in aboveground tanks or containers.	**No**
Does your facility have Regulated Substances stored onsite in quantities greater than the threshold quantities established by the California Accidental Release prevention Program (CalARP)?	**No**

Additional Information

No additional comments provided.

Comments by regulator: Update the monitoring plan with the new Incon System information. Also the updated CFR should have the $500,000 per occurrence checked and $1 million annual aggregate checked. Also check the coverage numbers. The prior year's CFR is properly completed so use that as a template.

INSTRUCTIONS FOR CERTIFICATION OF FINANCIAL RESPONSIBILITY

Please type or print information clearly. All underground storage tank (UST) sites owned or operated may be listed on one form, therefore a separate certification is not required for each site. For questions regarding required coverage amounts or approved financial responsibility mechanisms, please refer to the State Water Resources Control Board's publication, "Petroleum Underground Storage Tank Financial Responsibility Guide" or call the UST Cleanup Fund at (800) 813-3863.

A. Coverage Required — Check one box on the left side of the form to indicate coverage per occurrence (i.e., $500,000 or $1,000,000) and one box on the right side of the form to indicate annual aggregate coverage (i.e., $1,000,000 or $2,000,000).

B. Name of Tank Owner or Operator — Provide the full legal name of either the tank owner or the tank operator.

C. Mechanism Type — Indicate which approved mechanism(s) are being used to show financial responsibility either as contained in the federal regulations (40 CFR, Part 280, Subpart H, Sections 280.93 through 280.107) or CCR, Title 23, , Division 3, Chapter 18, Section 2808.1.

Name of Issuer — List the names and addresses of companies and/or individuals issuing coverage. If you use the State UST Cleanup Fund as a mechanism, use the following information:
l"
: UST Cleanup Fund, P.O. Box 944212, Sacramento, CA 94244-2120".

Mechanism Number — List the identifying number for each mechanism used (e.g. insurance policy number, letter of credit number, etc.). If using the State Cleanup Fund and/or a financial test of self-insurance (e.g. CFO letter), enter "N/A".

Coverage Amount — Indicate the per occurrence and annual aggregate coverage amount provided by each listed mechanism. If more than one mechanism is indicated, aggregate coverage must equal 100% of required financial responsibility amounts.

Coverage Period — Indicate the effective date of each mechanism. State Cleanup Fund coverage is continuous as long as you maintain compliance and remain eligible for participation.

Corrective Action — Does the specified mechanism provide coverage for corrective action? Indicate "Yes" or "No". If using the State Cleanup Fund, indicate "Yes."

Third Party Compensation — Does the specified mechanism provide coverage for third party compensation? Indicate "Yes" or "No". If using the State Cleanup Fund, indicate "Yes."

D. Facility Information — List the name and site address of each UST facility covered by this Certification.

E. Signature Block — The tank owner or operator must sign and date the Certification. Print or type the owner or operator's name and title in the space provided. The owner or operator's signature must be witnessed. The witness or notary must sign and date the Certification. Print or type the witness' name in the space provided. Anybody may sign as witness; however, if a notary signs, please attach documentation.

Send the original completed form to the local agency(ies) that issue the UST permit(s) for the listed site(s). Keep a copy of the certification at each UST site. Local agency contact information is available at: **www.calcupa.net/cupacontactlist.xls**.

If you have questions about financial responsibility requirements or about the Certification of Financial Responsibility form, please contact the State Water Resources Control Board, Underground Storage Tank Cleanup Fund at 1-800-813-FUND (3863) or refer to **www.waterboards.ca.gov/cwphome/ustcf/howtocontactus.htm**.

NOTE: **Per Health and Safety Code §25299.76(a), failure comply with UST Financial Responsibility requirements can result in civil penalties of up to $10,000 per day, per UST, for each day of violation. Eligibility for reimbursement of claims submitted to the State Cleanup Fund may also be jeopardized.**

Graniterock®

CONFIDENTIAL

LETTER FROM CHIEF FINANCIAL OFFICER

I am the Chief Financial Officer for Graniterock Company, 350 Technology Drive, Watsonville CA 95076.

This letter is in support of the use of the **Underground Storage Tank Cleanup Fund** to demonstrate financial responsibility for taking corrective action and/or compensating third parties for bodily injury and property damage caused by an unauthorized release of petroleum in the amount of at least $500,000 per occurrence and $1,000,000 annual aggregate coverage.

1.	Amount of annual aggregate coverage being assured by this letter	$2,000,000
2.	Total tangible assets	$186,000,000
3.	Total liabilities	$92,000,000
4.	Tangible net worth (subtract line 3 from line 2. Line 4 must be at least 10 times line 1)	$94,000,000

I hereby certify that the wording of this letter is identical to the wording specified in subsection 2808.1(d)(1), Chapter 18, Division 3, Title 23 of the California Code of Regulations.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief.

RESPONSE PLAN – PAGE 1

(One form per facility)

R01.

TYPE OF ACTION ☐ 1. NEW PLAN ☒ 2. CHANGE OF INFORMATION

I. FACILITY INFORMATION

FACILITY ID # *(Agency Use Only)* | | | — | | | | — | | | | | | | 1.

3.

BUSINESS NAME (Same as FACILITY NAME)

Granite Rock Company - Pavex Central

BUSINESS SITE ADDRESS 103.

120 Granite Rock Way

BUSINESS SITE CITY 104.

San Jose

II. SPILL CONTROL AND CLEANUP METHODS

This plan addresses unauthorized releases from UST systems and supplements the emergency response plans and procedures in the facility's Hazardous Materials Business Plan (HMBP).

- If safe to do so, facility personnel will take immediate measures to control or stop any release (e.g., activate pump shut-off, etc.) and, if necessary, safely remove remaining hazardous material from the UST system.
- Any release to secondary containment will be pumped or otherwise removed within a time consistent with the ability of the secondary containment system to contain the hazardous material, but not greater than 30 calendar days, or sooner if required by the local agency. Recovered hazardous materials, unless still suitable for their intended use, will be managed as hazardous waste.
- Absorbent material will be used to contain and clean up manageable spills of hazardous materials. Absorbent material which has become too saturated to be effective or which is no longer intended for use will be managed as hazardous waste unless a waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. Used absorbent material, reusable or waste, will be stored in a properly labeled and sealed container. Waste material shall be disposed of appropriately.
- Facility personnel will determine whether any water removed from secondary containment systems, or from clean-up activity, has been in contact with any hazardous material. If the water is contaminated, it will be managed as hazardous waste unless a hazardous waste determination in accordance with 22 CCR §66262.11 finds that it is non-hazardous. If the water has a petroleum sheen (i.e., rainbow colors), it is contaminated. A thick floating petroleum layer may not necessarily display rainbow colors. Water (hazardous or non-hazardous) from sumps, spill containers, etc. will not be disposed to storm water systems.
- We will review secondary containment systems for possible deterioration if any of the following conditions occur:
  1. Hazardous material in contact with secondary containment is not compatible with the material used for secondary containment;
  2. Secondary containment is prone to damage from any equipment used to remove or clean up hazardous material collected in secondary containment;
  3. Hazardous material, other than the product/waste stored in the primary containment system, is placed inside secondary containment to treat or neutralize released product/waste, and the added material or resulting material from such a combination is not compatible with secondary containment.

III. SPILL CONTROL AND CLEAN-UP EQUIPMENT

PERIODIC MAINTENANCE: Spill control and clean-up equipment kept permanently on-site is listed in the facility's Hazardous Materials Business Plan. This equipment is inspected at least monthly, and after each use, supplies are replenished as needed. Defective equipment is repaired or replaced as necessary.

EQUIPMENT NOT PERMANENTLY ON-SITE, BUT AVAILABLE FOR USE IF NEEDED: *(Complete only if applicable)*

EQUIPMENT	LOCATION	AVAILABILITY
R10.	R20.	R30.
R11.	R21.	R31.
R12.	R22.	R32.
R13.	R23.	R33.
R14.	R24.	R34.
R15.	R25.	R35.

IV. RESPONSIBLE PERSONS

THE FOLLOWING PERSON(S) IS/ARE RESPONSIBLE FOR AUTHORIZING ANY WORK NECESSARY UNDER THIS RESPONSE PLAN:

NAME R40. Elden Davis	TITLE R50. Equipment Manager
NAME R41. Chuck Gardner	TITLE R51. Equipment Superintendent
NAME R42. Elias Lanuza	TITLE R52. Maintenance Planner
NAME R43.	TITLE R53.

V. MONITORING INDICATORS

IF MONITORING INDICATES A POSSIBLE UNAUTHORIZED RELEASE, STEPS TO VERIFY THE RELEASE WILL BE MADE AS FOLLOWS:

☒ 1. ADDITIONAL SYSTEM TESTING OR DATA COLLECTION ☒ 2. INSPECTION BY QUALIFIED PERSONS ☐ 3. RECALIBRATION OF EQUIPMENT R60.

☐ 99. OTHER (Specify): R61.

UNDERGROUND STORAGE TANK

RESPONSE PLAN – PAGE 2

VI. REPORTING AND RECORD KEEPING

We will report/record any overfill, spill, or unauthorized release from a UST system as indicated in this plan.

Recordable Releases: Any unauthorized release from primary containment which the UST operator is able to clean up within eight (8) hours after the release was detected or should reasonably have been detected, and which does not escape from secondary containment, does not increase the hazard of fire or explosion, and does not cause any deterioration of secondary containment, must be recorded in the facility's monitoring records. Monitoring records must include:

- The UST operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous substances released;
- A description of the actions taken to control and clean up the release;
- The method and location of disposal of the released hazardous substances, and whether a hazardous waste manifest was or will be used;
- A description of actions taken to repair the UST and to prevent future releases;
- A description of the method used to reactivate interstitial monitoring after replacement or repair of primary containment.

Reportable Releases: Any overfill, spill, or unauthorized release which escapes from secondary containment (or primary containment if no secondary containment exists), increases the hazard of fire or explosion, or causes any deterioration of secondary containment, is a reportable release. Reportable releases are also recordable.

Within 24 hours after a reportable release has been detected, or should have been detected, we will notify the local agency administering the UST program of the release, investigate the release, and take immediate measures to stop the release. If necessary, or if required by the local agency, remaining stored product/waste will be removed from the UST to prevent further releases or facilitate corrective action. If an emergency exists, we will notify the State Office of Emergency Services.

Within five (5) working days of a reportable release, we will submit to the local agency a full written report containing all of the following information to the extent that the information is known at the time of filing the report:

- The UST owner's or operator's name and telephone number;
- A list of the types, quantities, and concentrations of hazardous materials released;
- The approximate date of the release;
- The date on which the release was discovered;
- The date on which the release was stopped;
- A description of actions taken to control and/or stop the release;
- A description of corrective and remedial actions, including investigations which were undertaken and will be conducted to determine the nature and extent of soil, ground water or surface water contamination due to the release;
- The method(s) of cleanup implemented to date, proposed cleanup actions, and a schedule for implementing the proposed actions;
- The method(s) and location(s) of disposal of released hazardous materials and any contaminated soils, groundwater, or surface water.
- Copies of any hazardous waste manifests used for off-site transport of hazardous wastes associated with clean-up activity;
- A description of proposed methods for any repair or replacement of UST system primary/secondary containment systems;
- A description of additional actions taken to prevent future releases.

We will follow the reporting procedures described above if any of the following conditions occur:

- A recordable unauthorized release can not be cleaned up or is still under investigation within eight (8) hours of detection;
- Released hazardous substances are discovered at the UST site or in the surrounding area;
- Unusual operating conditions are observed, including erratic behavior of product dispensing equipment, sudden loss of product, or the unexplained presence of water in the tank, unless system equipment is found to be defective and is immediately repaired or replaced, and no leak has occurred;
- Monitoring results from UST system monitoring equipment/methods indicate that a release may have occurred, unless the monitoring equipment is found to be defective and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial results.

Record Retention: Monitoring records and written reports of unauthorized releases must be maintained on-site (or off-site at a readily available location, if approved by the local agency) for at least 3 years. Hazardous waste shipping/disposal records (e.g., manifests) must be maintained for at least 3 years from the date of shipment.

D. Results of Testing / Servicing

Software Version Installed: N/A

Complete the following checklist:

☒ Yes	☐ No*	Is the audible alarm operational?
☒ Yes	☐ No*	Is the visual alarm operational?
☒ Yes	☐ No*	Were all sensors visually inspected, functionally tested, and confirmed operational?
☒ Yes	☐ No*	Were all sensors installed at lowest point of secondary containment and positioned so that other equipment will not interfere with their proper operation?
☐ Yes	☐ No* ☒ N/A	If alarms are relayed to a remote monitoring station, is all communications equipment (e.g. modem) operational?
☒ Yes	☐ No* ☐ N/A	For pressurized piping systems, does the turbine automatically shut down if the piping secondary containment monitoring system detects a leak, fails to operate, or is electrically disconnected? If yes: which sensors initiate positive shut-down? *(Check all that apply)* ☒ Sump/Trench Sensors; ☐ Dispenser Containment Sensors. Did you confirm positive shut-down due to leaks and sensor failure/disconnection? ☒ Yes ☐ No
☐ Yes	☐ No* ☒ N/A	For tank systems that utilize the monitoring system as the primary tank overfill warning device (i.e. no mechanical overfill prevention valve is installed), is the overfill warning alarm visible and audible at the tank fill point(s) and operating properly? If so, at what percent of tank capacity does the alarm trigger? 0 %
☐ Yes*	☒ No	Was any monitoring equipment replaced? If yes, identify specific sensors, probes, or other equipment replaced and list the manufacturer name and model for all replacement parts in Section E, below.
☐ Yes*	☒ No	Was liquid found inside any secondary containment systems designed as dry systems? *(Check all that apply)* ☐ Product; ☐ Water. If yes, describe causes in Section E, below.
☐ Yes	☒ No*	Was monitoring system set-up reviewed to ensure proper settings? *(Attach set-up reports, if applicable.)*
☒ Yes	☐ No*	Is all monitoring equipment operational per manufacturer's specifications?

*** In Section E below, describe how and when these deficiencies were or will be corrected.**

E. Comments: Site has no printer & no system to determine if set up is correct.

87 & Diesel are split tanks and share Annular.

87 Dispenser has Suction System & Stand Alone Sensor that shuts down Dispenser (330212-001).

Only Diesel STP has a sensor that shuts down Turbine.

Site Address: 120 Granite Rock Way Date of Testing/Servicing: 8/8/14

F. In - Tank Gauging / SIR Equipment:

☐ Check this box if tank gauging is used only for inventory control.
☒ Check this box if no tank gauging or SIR equipment is installed.

This section must be completed if in-tank gauging equipment is used to perform leak detection monitoring.

Complete the following checklist:

☐ Yes	☐ No*	Has all input wiring been inspected for proper entry and termination, including testing for ground faults?
☐ Yes	☐ No*	Were all tank gauging probes visually inspected for damage and residue buildup?
☐ Yes	☐ No*	Was accuracy of system product level readings tested?
☐ Yes	☐ No*	Was accuracy of system water level readings tested?
☐ Yes	☐ No*	Were all probes reinstalled properly?
☐ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In Section H below, describe how and when these deficiencies were or will be corrected.**

G. Line Leak Detectors (LLD): ☐ Check this box if LLD's are not installed.

Complete the following checklist:

☒ Yes	☐ No* ☐ N/A	For equipment start-up or annual equipment certification was a leak simulated to verify LLD performance? *(Check all that apply)* Simulated leak rate: ☒ 3 g.p.h. (1.); ☐ 0.1 g.p.h. (2.); ☐ 0.2 g.p.h. (2.). Notes: 1. Required for equipment start-up certification and annual certification. 2. Unless mandated by local agency, certification required only for electronic LLD start-up.
☒ Yes	☐ No*	Were all LLD's confirmed operational and accurate within regulatory requirements?
☒ Yes	☐ No*	Was the testing apparatus properly calibrated?
☒ Yes	☐ No* ☐ N/A	For mechanical LLD's, does the LLD restrict product flow if it detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, does the turbine automatically shut off if the LLD detects a leak?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, does the turbine automatically shut off if any portion of the monitoring system is disabled or disconnected?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, does the turbine automatically shut off if any portion of the monitoring system malfunctions or fails a test?
☐ Yes	☐ No* ☒ N/A	For electronic LLD's, have all accessible wiring connections been visually inspected?
☒ Yes	☐ No*	Were all items on the equipment manufacturer's maintenance checklist completed?

*** In Section H below, describe how and when these deficiencies were or will be corrected.**

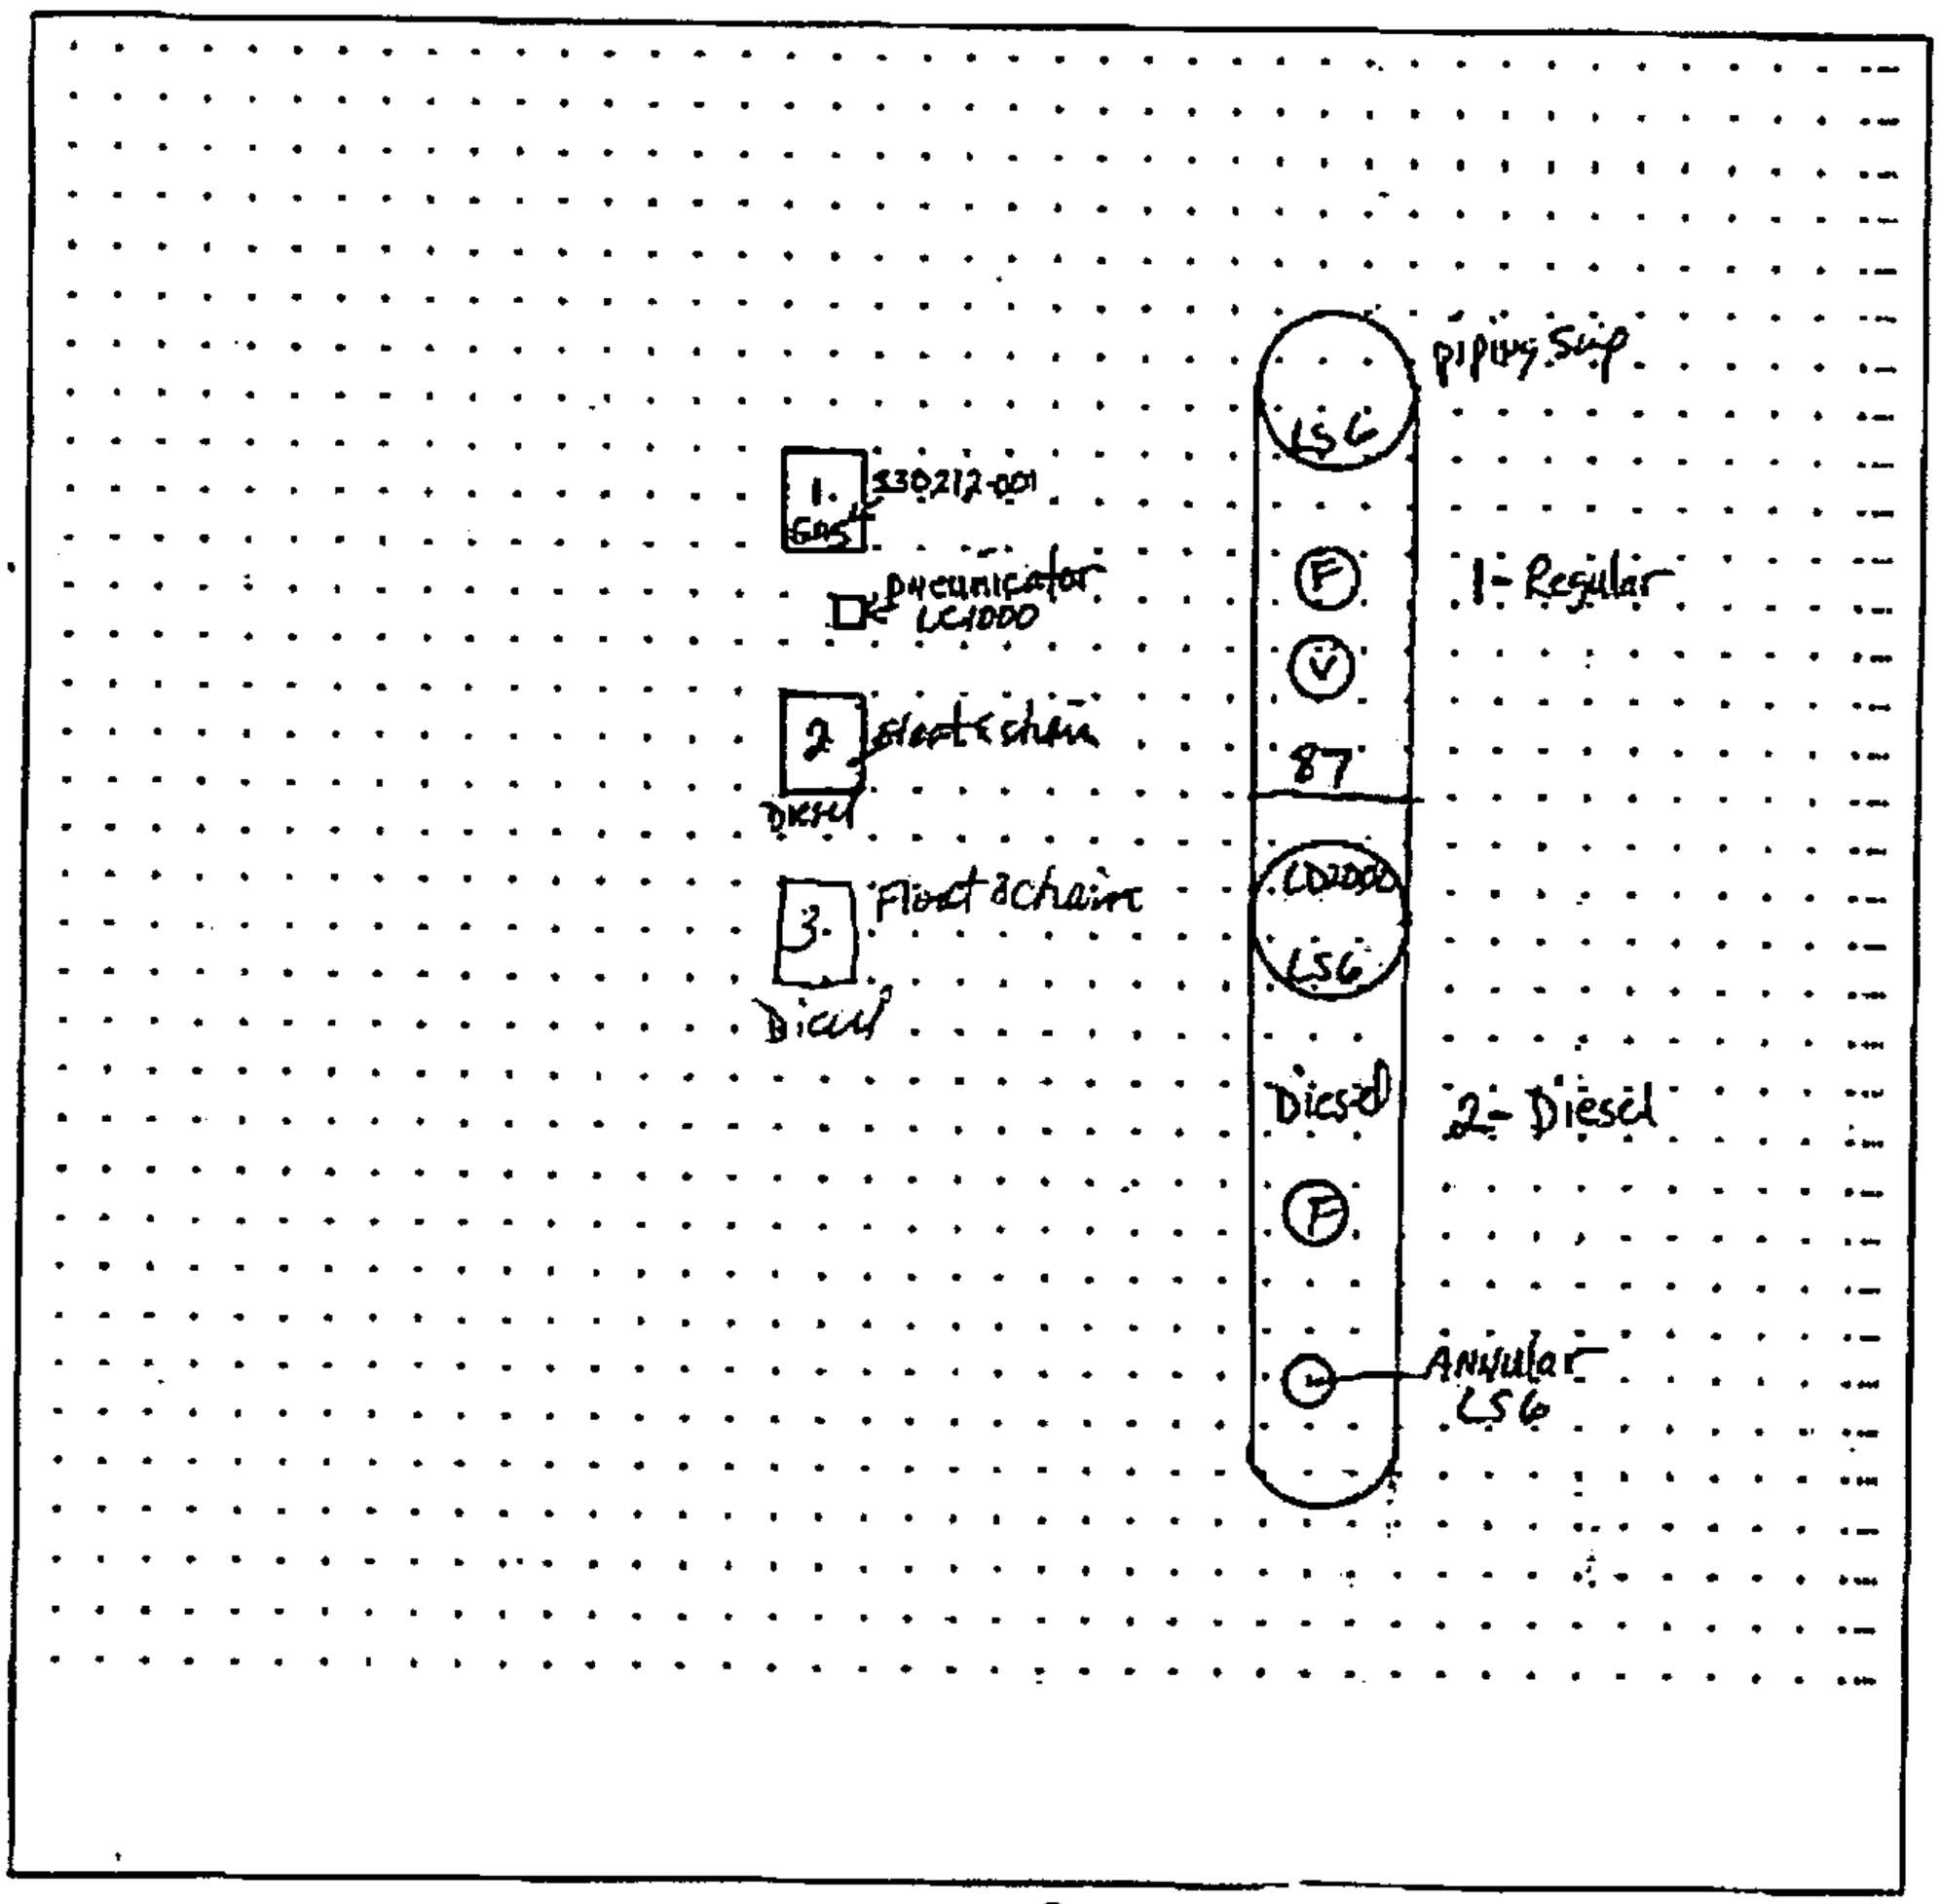
Monitoring System Certification
UST Monitoring Site Plan
120 Granite Rock Way @ Fillcap Ave. in San Jose



Date map was drawn: 8/8/14

Instructions

On your site plan, show the general layout of tanks and piping. Clearly identify locations of the following equipment, if installed: monitoring system control panels; sensors monitoring tank annular spaces, sumps, dispenser pans, spill containers, or other secondary containment areas; mechanical or electronic line leak detectors; and in-tank liquid level probes (if used for leak detection). In the space provided, note the date this Site Plan was prepared.

SWRCB, January 2006

Spill Bucket Testing Report Form

This form is intended for use by contractors performing annual testing of UST spill containment structures. The completed form and printouts from tests (if applicable), should be provided to the facility owner/operator for submittal to the local regulatory agency.

1. FACILITY INFORMATION

Facility Name: Granite Rock	Date of Testing: 08/08/14
Facility Address: 120 Granite Rock Way San Jose, CA 95136-	
Facility Contact: Elden Davis (408) 574-1427	
Date Local Agency Was Notified of Testing: 7/29/14	
Name of Local Agency Inspector *(if present during testing):* Matthew Burge	

2. TESTING CONTRACTOR INFORMATION

An inspection of your facility on Monday October 30, 2017 revealed the violations listed below

Violation Code	Article	Division	Page	Count
105.1.2.2 Construction permit			0	0

Violation carried over from inspection on 10/03/2017
A construction permit allows the applicant to install or modify systems and equipment for which a permit is required by Appendix Chapter1, Section 105.7.

NOTE:
FACILITY WAS GIVEN UNTIL FRIDAY, 10/06/2017, TO SEND IN COPY OF CONSTRUCTION PERMITS. NO PERMITS WERE SUBMITTED AND NO RECORDS OF PERMITS WERE FOUND. FACILITY WILL NEED TO SUBMIT PLANS AND APPLY FOR PERMITS WITH CITY OF SAN JOSE.

315.3.1 Ceiling Clearance 0 0

Violation carried over from inspection on 10/03/2017
Storage shall be maintained 2 feet (610 mm) or more below the ceiling in nonsprinklered areas of buildings or not less than 18 inches (457 mm) below sprinkler head deflectors in sprinklered areas of buildings.

NOTE:
MAINTAIN THE MINIMUM DISTANCE MENTIONED ABOVE THROUGHOUT FACILITY.

5001.5.1 Hazardous Materials Management Plan (HMMP). 0 0

Violation carried over from inspection on 10/03/2017
Where required by the fire code official, an application for a permit shall include an HMMP. The HMMP shall include a facility site plan designating the following: 1. Access to each storage and use area.; 2. Location of emergency equipment.; 3. Location where liaison will meet emergency responders.; 4. Facility evacuation meeting point locations.; 5. The general purpose of other areas within the building.; 6. Location of all above-ground and underground tanks and their appurtenances including, but not limited to, sumps, vaults, below-grade treatment systems and piping.; 7. The hazard classes in each area.; 8. Locations of all control areas and Group H occupancies.; 9. Emergency exits. [For SFM] The HMMP shall comply with Health and Safety Code, Chapter 6.95, Sections 25500 through 25545, and Title 19, Division 2, Chapter 4.

5003.2.2.1 Design and construction. 0 0
Violation carried over from inspection on 10/03/2017
Piping, tubing, valves, fittings and related components used for hazardous materials shall be in accordance with the following: 1. Piping, tubing, valves, fittings and related components shall be designed and fabricated from materials that are compatible with the material to be contained and shall be of adequate strength and durability to withstand the pressure, structural and seismic stress and exposure to which they are subject.; 2. Piping and tubing shall be identified in accordance with ASME A13.1 to indicate the material conveyed.; 3. Readily accessible manual valves or automatic remotely activated fail-safe emergency shutoff valves shall be installed on supply piping and tubing at the following locations: 3.1. The point of use.; 3.2. The tank, cylinder or bulk source.; 4. Manual emergency shutoff valves and controls for remotely activated emergency shutoff valves shall be identified and the location shall be clearly visible, accessible and indicated by means of a sign.; 5. Backflow prevention or check valves shall be provided when the backflow of hazardous materials could create a hazardous condition or cause the unauthorized discharge of hazardous materials.; 6. Where gases or liquids having a hazard ranking of: Health Class 3 or 4; Flammability Class 4; Instability Class 3 or 4; in accordance with NFPA 704 are carried in pressurized piping above 15 pounds per square inch gauge (psig) (103 kPa), an approved means of leak detection and emergency shutoff or excess flow control shall be provided. Where the piping originates from within a hazardous material storage room or area, the excess flow control shall be located within the storage room or area. Where the piping originates from a bulk source, the excess flow control shall be located as close to the bulk source as practical. Exceptions: 1. Piping for inlet connections designed to prevent backflow.; 2. Piping for pressure relief devices.

NOTE:
PROVIDE LABELING FOR PIPING TO EASILY IDENTIFY ALL PIPES.

5003.5 Hazard identification signs. 0 0
Violation carried over from inspection on 10/03/2017
Unless otherwise exempted by the fire code official, visible hazard identification signs as specified in NFPA 704 for the specific material contained shall be placed on stationary containers and above-ground tanks and at entrances to locations where hazardous materials are stored, dispensed, used or handled in quantities requiring a permit and at specific entrances and locations designated by the fire code official.

NOTE:
NFPA 704 PLACARD IS REQUIRED IN THE GAS STORAGE AREA ON BACKSIDE OF BUILDING

5003.9.8 Separation of incompatible materials. 0 0
Violation carried over from inspection on 10/03/2017
Incompatible materials in storage and storage of materials that are incompatible with materials in use shall be separated where the stored materials are in containers having a capacity of more than 5 pounds (2 kg) or 0.5 gallon (2 L), separation shall be accomplished by:
1. Segregating incompatible materials in storage by a distance of not less than 20 feet (6096 mm).
2. Isolating incompatible materials in storage by a noncombustible partition extending not less than 18 inches (457 mm) above and to the sides of the stored material.
3. Storing liquid and solid materials in hazardous material storage cabinets.
4. Storing compressed gases in gas cabinets or exhausted enclosures in accordance with Sections 5003.8.5 and 5003.8.6. Materials that are incompatible shall not be stored within the same cabinet or exhausted enclosure.

NOTE:
SEPARATE THE OXIDIZERING GASES AND FLAMMABLE GASES WITH THE OPTIONS ABOVE.

906.9.1 Extinguishers weighing 40 pounds or less 0 0
Violation carried over from inspection on 10/03/2017
Portable fire extinguishers having a gross weight not exceeding 40 pounds (18 kg) shall be installed so that their tops are not more than 5 feet (1524 mm) above the floor.

NOTE:
FIRE EXTINGUISHER HEIGHT SHALL NOT EXCEED THE HEIGHT MENTIONED ABOVE.

Violation carried over from inspection on 10/03/2017
Incompatible materials in storage and storage of materials that are incompatible with materials in use shall be separated where the stored materials are in containers having a capacity of more than 5 pounds (2 kg) or 0.5 gallon (2 L), separation shall be accomplished by:
1. Segregating incompatible materials in storage by a distance of not less than 20 feet (6096 mm).
2. Isolating incompatible materials in storage by a noncombustible partition extending not less than 18 inches (457 mm) above and to the sides of the stored material.
3. Storing liquid and solid materials in hazardous material storage cabinets.
4. Storing compressed gases in gas cabinets or exhausted enclosures in accordance with Sections 5003.8.5 and 5003.8.6. Materials that are incompatible shall not be stored within the same cabinet or exhausted enclosure.

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Planning, Building and Code Enforcement
ROSALYNN HUGHEY, ACTING DIRECTOR

STATEMENT OF EXEMPTION

FILE NO.	AT17-055 and 3-04234
LOCATION OF PROPERTY	Granite Rock Way
PROJECT DESCRIPTION	A street vacation to shorten part of the existing Granite Rock Way and a Lot Line Adjustment (LLA) to consolidate three adjacent parcels into one lot on a 20.03-gross acre site located at 120 Granite Rock Way to maintain public street accessibility.

CERTIFICATION

Under the provisions of Sections 15305of the State Guidelines for Implementation of the California Environmental Quality Act (CEQA) as stated below, this project is found to be exempt from the environmental review requirements of Title 21 of the San José Municipal Code, implementing the California Environmental Quality Act of 1970, as amended.

15305. MINOR ALTERATIONS IN LAND USE LIMITATION

Class 5 consists of minor alternations in land use limitations in areas with an average slope of less than 20%, which do not result in any changes in land use or density.

ANALYSIS

The project is to vacate approximately 500 feet of Granite Rock Way and to consolidate three parcels adjacent to Granite Rock Way into one to maintain public street accessibility to the lots. The project would result in the construction of a new barricade and fencing to limit access to the proposed new private area. The project would conform to all City's standards and regulations for construction. The street vacation and lot line adjustment will result in a realignment of the property and create a minor land use alternation in an area with a slope less than 20% and, this action alone, would not change the land use or density. Therefore, this project qualifies for an exemption under Section 15305.

Exceptions:

CEQA Guidelines Section 15300.2 provides exceptions to the use of Categorical Exemptions where the use of a Categorical Exemption is prohibited under certain circumstances. The City has considered the projects applicability to all of the exceptions under Section 15300.2. An analysis of each of these exceptions in reference to this specific project is provided below.

(a) Location. Class 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located. Section 15300.2(a) started that a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. The project will not impact an environmental resource of hazardous or critical concern.

(b) Cumulative Impact. Based on the above analysis, there is no evidence of a potential significant

cumulative impact on the environment from the proposed project. The project proposes the vacation of a portion of a public street that is no longer needed for public use and to consolidate three existing adjacent parcel into one. It has been determined that the project will not cumulatively impact traffic, noise, air quality, or water quality.

(c) Significant Effect. The project would not result in any significant effects on the environment due to unusual circumstances. The proposed project site does not have any unusual circumstances that would negatively impact the environment.

(d) Scenic Highways. It is not anticipated that the specific project sites will results in damage to any scenic resources. If one does, it is subject to 15300.2(d) and may not utilize this categorical exemption.

(e) Hazardous Waste Sites. The proposed project sites are not included on any list complied pursuant to Section 65962.5 of the Government Code. Therefore, the project is not subject to 15300.2(e).

(f) Historical Resources. There are no historical resources located on the proposed project site; therefore, Section 15300.2(f) does not apply.

ENVIRONMENTAL EVALUATION APPLICATION

INSTRUCTIONS

Please prepare the application form, environmental analysis, and other required information listed below and return them, in conjunction with other required forms for your project (i.e., Planned Development Permit/ Amendment, Conditional Use Permit/Amendment, Rezoning, etc.). This application is accepted by Appointment only. Please visit the Planning Division's website: http://www.sanjoseca.gov/index.aspx?nid=1725 to set up an appointment.

1. **Completed Application Form.** Each application shall be signed by the preparer of the application. Original wet signatures (not Xeroxed) are required. **One** copy of the application shall be submitted for each site.

   The application must contain the following:

   (a) Aerial photograph (8 ½" x 11" or 11" x 17")
   - Minimum scale 1"= 200'
   - Include a north arrow and the scale of the photograph
   - Include date of the photograph
   - The site shown in the center of the photograph
   - Clearly outline and identify the site

   (b) Site Plan (drawn to scale) showing the proposed project. (8 ½" X 11" or 11" X 17")

   (c) Vicinity Map that shows the surrounding roadways, schools, etc., (8 ½" X 11")
   - Include a north arrow
   - Site in the center of the map with North at the top of the page
   - Clearly outline and identify the site
   - Name each surrounding street
   - Label all land uses within 500 feet of the site

   (d) Photographs of the site and surrounding properties
   - Snapshots or Polaroid photos will be accepted
   - Mount on (8 ½" X 11") paper
   - Identify the subject of each photograph

3. **Noticing the Neighborhood.** Refer to the Public Outreach Policy for a full description of the City's public notification procedures. Public Hearing notices will be mailed for development proposals at least 10 calendar days before the date set for hearing for a project. Notices will be sent to all property owners and residents within 300 feet for Very Small projects, 500 feet for Standard Development Proposals and a minimum of 1,000 feet for large or controversial projects as detailed in the Public Outreach Policy.

4. **HUD Federal Funding and Environmental Compliance with the National Environmental Policy Act (NEPA).** Compliance with the National Environmental Policy Act (NEPA) is required for all projects anticipating the use of federal funding from the Department of Housing and Urban Development (HUD), for any portion of the project. Additional review, reports, and/or referrals may be necessary. Additional fees will be required for projects not funded by the Community Development Block Grant (CDBG) program. Please contact the Environmental Review Team for more information.

5. **Santa Clara Valley Habitat Conservation Plan (HCP).** Please provide HCP information for the project below, and refer to the HCP Geobrowser at http://www.hcpmaps.com as needed. To determine if a project eligible for coverage under the HCP, complete the Coverage Screen Form and as needed, the Fees and Conditions Worksheet. Both are available on the HCP Website at http://scv-habitatagency.org.

   Land Cover Designation: Urban - Suburban
   Private Development Area: Area 4
   Permanently Disturbed Footprints (in acres): 20.03
   Fee Zone(s): Urban Areas
   Wildlife Survey Area(s): N/A
   Plant Survey Area(s): Plant Survey Zone
   Streams and Setback: N/A

6. **Fees.** An application fee, associated Public Noticing fee(s), and the appropriate Environmental application fees are due at the time of filing (see fee schedule). Checks are made payable to the "City of San Jose".

This application is accepted by APPOINTMENT ONLY. To arrange an appointment, please visit the Planning Division's website: http://www.sanjoseca.gov/index.aspx?nid=1725. For assistance, call (408) 535-3555.

Are the following items applicable to the project or its effects? Discuss below all items checked yes (attach additional sheets as necessary):		
YES	NO	
☐	☒	Does the project involve or whether the use of Federal funding is anticipated?
☐	☒	Does the project propose the demolition or alteration of any existing structures on the project site?
☐	☒	Does the project change existing features of any bays, tidelands, beaches, lakes or hills or substantial alteration of ground contours?
☐	☒	Does the project change scenic views or vistas from existing residential areas or public lands or roads?
☐	☒	Does the project change pattern, scale or character of the general area of the project?
☐	☒	Does the project create a significant amount of solid waste or litter?
☐	☒	Does the project change the amount of dust, ash, smoke, fumes or odors in the vicinity?
☐	☒	Does the project propose to locate a feature within a riparian corridor or area subject to flooding?
☐	☒	Does the project propose a substantial change in existing noise or vibration levels in the vicinity?
☐	☒	Does the project propose to develop on land or on a slope of 15 percent or more?
☐	☒	Does the project propose the use of hazardous materials to be used as part of the operation of any of the establishments on the project site?
☐	☒	Does the project propose a substantial change in the demand for municipal services (police, fire, water, sewage, etc.)?
☐	☒	Does the project propose a substantial increase in fossil fuel consumption (electricity, oil, natural gas, etc.)?
☒	☐	Does the project have a relationship with a larger project or series of projects?
☐	☒	Does the project create one acre or more of impervious surface on the site?
☐	☒	Does the project site include any structures listed as City Landmarks, Candidate City Landmarks, Structures of Merit, or listed Determined Eligible for Listing on the National or California Register of Historic Places?

This application is accepted by APPOINTMENT ONLY. To arrange an appointment, please visit the Planning Division's website: http://www.sanjoseca.gov/index.aspx?nid=1725. For assistance, call (408) 535-3555.

An inspection of your facility on Monday September 24, 2018 revealed the violations listed below

Violation Code	Article	Division	Page	Count
105.1.2.2 Construction permit	0		0	

Violation carried over from inspection on 07/26/2018
A construction permit allows the applicant to install or modify systems and equipment for which a permit is required by Appendix Chapter1, Section 105.7.

NOTE:
FACILITY HAS NOT BEEN ABLE TO SHOW HAZARDOUS MATERIALS PERMITS WERE OBTAINED FOR THE INSTALLATION OF NEW AND USED OIL TANKS IN MAINTENANCE SHOP.

5001.5.1 Hazardous Materials Management Plan (HMMP).	0		0	

Violation carried over from inspection on 07/26/2018
Where required by the fire code official, an application for a permit shall include an HMMP. The HMMP shall include a facility site plan designating the following: 1. Access to each storage and use area.; 2. Location of emergency equipment.; 3. Location where liaison will meet emergency responders.; 4. Facility evacuation meeting point locations.; 5. The general purpose of other areas within the building.; 6. Location of all above-ground and underground tanks and their appurtenances including, but not limited to, sumps, vaults, below-grade treatment systems and piping.; 7. The hazard classes in each area.; 8. Locations of all control areas and Group H occupancies.; 9. Emergency exits. [For SFM] The HMMP shall comply with Health and Safety Code, Chapter 6.95, Sections 25500 through 25545, and Title 19, Division 2, Chapter 4.

NOTE:
LAST COMPLETE HAZARDOUS MATERIALS BUSINESS PLAN (HMBP) SUBMITTAL ON CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS) WAS ON NOVEMBER 21, 2017. SUBMITTAL DOES NOT REFLECT THE NEW LOCATION OF THE WELDING GASES THAT HAVE BEEN MOVED. MAKE NECESSARY UPDATES TO HMBP AND RESUBMIT TO CERS.

GP AGENDA: 4/15/03
ITEM: 2.8a and 2.8b

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Memorandum

TO: HONORABLE MAYOR AND CITY COUNCIL

FROM: Stephen M. Haase

SUBJECT: SEE BELOW

DATE: March 24, 2003

COUNCIL DISTRICT: 7
SNI AREA: N/A

SUBJECT: GP03-07-05/GPT03-07-05: General Plan amendment request to change the *San Jose 2020 General Plan* Land Use/Transportation Diagram designation from Combined Industrial/Commercial to Light Industrial on 17.2 acres and Heavy Industrial on 21 acres (Communications Hill Planned Community) and an associated text amendment to reflect the proposed land use changes to the Communications Hill Specific Plan, on a site located west of Monterey Road, between the Union Pacific tracks, Hillsdale Avenue and approximately 600 feet south of Goble lane.

RECOMMENDATION

The Planning Commission voted 7-0-0 to recommend that the City Council approve the proposed amendments.

BACKGROUND

On March 17, 2003, the Planning Commission held a public hearing to consider a staff initiated General Plan amendment request to change the Land Use/Transportation Diagram designation from Combined Industrial/Commercial to Light Industrial on 17.2 acres and Heavy Industrial on 21 acres (Communications Hill Planned Community) for property located generally west of Monterey Road and north of Hillsdale. At this same public hearing, the Commission also considered an associated text amendment to reflect the proposed land use changes to the Communications Hill Specific Plan. As discussed in the attached staff report, the overall goal of the amendment is to strengthen the land base for industrial suppliers and services that are already stable and established uses in this area.

ANALYSIS

No community members spoke on this item. Commissioner Levy commended staff for their efforts to preserve the industrially designated lands in San Jose.

PUBLIC OUTREACH

The property owners and occupants within a 1,000-foot radius were sent a newsletter regarding the two community meetings that were held on February 24 and 26, 2003. They also received a notice of the public hearings to be held on the subject amendments before the Planning Commission in March and City Council in April. In addition, the Department's web-site contains information regarding the General Plan process, amendments, staff reports, and hearing schedule. This site is used by the community to keep informed of the status of the amendments.

No comments were received from the general public at either of the two community meetings or in any other communications.

GENERAL PLAN REPORT

2003 Spring Hearing

PROJECT DESCRIPTION:

General Plan amendment request to change the Land Use/Transportation Diagram designation from Combined Industrial/Commercial to Light Industrial on 17.2 acres and Heavy Industrial on 21 acres (Communications Hill Planned Community) and an associated text amendment to reflect the proposed land use changes to the Communications Hill Specific Plan.

LOCATION: A triangular shaped area located on the west side of Monterey Road, between the Union Pacific Railroad tracks, Hillsdale Avenue and approximately 600 feet south of Goble Lane.

ACREAGE: 38.2

APPLICANT/OWNER:

City of San Jose/Various property owners

GENERAL PLAN LAND USE / TRANSPORTATION DIAGRAM DESIGNATION:

Existing Designation: Combined Industrial/Commercial (Communications Hill Planned Community)

Proposed Designation: Light Industrial on 17.2 acres, Heavy Industrial on 21 acres (Communications Hill Planned Community)

EXISTING ZONING DISTRICT(S): HI Heavy Industrial, LI Light Industrial, CG General Commercial

SURROUNDING LAND USES AND GENERAL PLAN DESIGNATION(S):

North: Auto services, Raisch aggregate stockpile/asphalt plant, vacant land, various industrial uses on Goble Lane, mobile home park – Heavy Industrial and Medium Density Residential (8-16 DU/AC)(Communications Hill Planned Community)

South: Quarry uses and truck storage, concrete operation– Combined Industrial/Commercial, Industrial Park (Communications Hill Planned Community)

East: Various auto related and commercial uses on the west side of Monterey Road between Umbarger Road and Southside Drive. Various light industrial uses (auto-related uses, self-storage, etc.) and Commercial uses (liquor store, manufactured home sales, motel, etc.) on the east side of Monterey Road – Combined Industrial/Commercial.

West: Quarry – Industrial Park (Communications Hill Planned Community)

ENVIRONMENTAL REVIEW STATUS:

Communications Hill Specific Plan Final EIR, Resolution No. 63624, adopted on April 7, 1992.

PLANNING STAFF RECOMMENDATION:

Light Industrial on 17.2 acres and Heavy Industrial on 21 acres.

Approved by: Stanley Ketchum
Date: Mar. 12, 2003

PLANNING COMMISSION RECOMMENDATION:

CITY COUNCIL ACTION:

CITY DEPARTMENT AND PUBLIC AGENCY COMMENTS RECEIVED:

- Department of Public Works (DPW) – The amendment site is located in Flood Zone AO-1 and in a Geologic hazard zone.
- Department of Transportation (DOT) – The subject amendment would not result in long-term traffic impacts.
- The Airport Land Use Commission (ALUC) – No comment.
- Valley Transportation Agency (VTA) – VTA has indicated that they oppose the proposal based on the earlier project description which included a larger area extending south of Hillsdale Avenue, as shown on the public notice. The opposition was due to a planned relocation of the existing Caltrain platform southerly near Capitol Expressway and that transit-oriented development should be considered nearby. Staff has modified the boundaries of the proposed amendment to exclude property south of Hillsdale Avenue, thereby addressing the VTA's concerns.

GENERAL CORRESPONDENCE:

None.

ANALYSIS AND RECOMMENDATIONS:

PROJECT DESCRIPTION

This is a staff initiated General Plan amendment request to change the Land Use/ Transportation Diagram designation from Combined Industrial/Commercial to Light Industrial on 17.2 acres and Heavy Industrial on 21.0 acres on a site located west of Monterey Road, between the Union Pacific tracks, Hillsdale Avenue and approximately 600 feet south of Goble lane (see exhibit 1). The subject area is characterized by established light and heavy industrial uses that have been in existence in this part of San Jose for many years. The objective of this amendment is to recognize these uses and to preserve this area for industrial uses that are critical to the City's long term economic development.

BACKGROUND

In 1992, the City Council adopted the Communications Hill Specific Plan to create a unified, high-density residential, pedestrian-oriented, urban community with a mix of uses on and around Communications Hill. At the same time, the City Council amended the General Plan to add the Communications Hill Planned Community to incorporate the major features of the Specific Plan directly into the General Plan.

The Communications Hill Specific Plan designates the flatland area in proximity to and along Monterey Road for Heavy Industrial, Light Industrial and Combined Industrial/Commercial uses. The intent of this subarea is to expand the development opportunities without jeopardizing the existing industrial uses.

ANALYSIS

Existing and Surrounding Land Uses

The amendment site is a triangular shaped area, west of Monterey Road, between the Union Pacific Railroad tracks, Hillsdale Avenue and approximately 600 feet south of Goble Lane. The area is zoned predominantly HI Heavy Industrial and LI Light Industrial. Staff has completed a detailed land use survey for the area which confirms the predominance of light and heavy industrial uses in the subject area (see exhibit 2). There is a small area of land zoned CG General Commercial on the frontage of Monterey Road at the southeasterly tip of the amendment area, which houses a used car sales lot. The area is currently developed with a mixture of uses. Light industrial uses include auto repair/body/paint/accessory installation, and outdoor storage. Heavy industrial uses include a quarry operation, trucking companies, wrecking yard and a blacktop/asphalt company. Commercial uses are also present, such as furniture sales, used car sales and motorcycle parts and accessories.

Examples of the surrounding uses are as follows:

- North – Raisch asphalt/quarry, auto-related uses (i.e., repair and body shop), various industrial uses on Goble Lane, and a 54-unit mobile home park.
- East – Auto-related uses (i.e., repair and body shop), commercial uses such as furniture and boat sales on the west side of Monterey Road. Various commercial and auto related uses, self-storage, etc. on the east side of Monterey Road.
- South – Quarry uses, truck storage, concrete plant.
- West – Union Pacific Railroad tracks, vacant land and asphalt manufacturing/quarry.

The proposed amendment site is part of a larger intact industrial area, approximately 375 acres in size. It is located on both sides of Monterey Road, extending generally from Umbarger Road to Capitol Expressway. This area is made up of predominantly industrial and industrial-oriented commercial uses. These uses include heavy and light manufacturing, warehouse, auto-related uses, quarry operations, concrete and asphalt facilities, and other industrial-oriented commercial/retail uses. All the uses that surround the subject site are generally in conformance with the respective existing industrial zoning districts (HI Heavy Industrial, LI Light Industrial, and IP Industrial Park)(see exhibit 3).

Land Use Compatibility

The proposed designations of Light Industrial and Heavy Industrial would be compatible with the existing and planned land uses in the immediate area. Typical uses of the Light Industrial designation include warehousing, wholesale, auto-related uses and light manufacturing. Typical uses associated with the proposed Heavy Industrial designation are those which generate nuisance or hazardous

characteristics which for reasons of health, safety, environmental effects, or welfare are best segregated from other non-industrial uses. The Communications Hill Specific Plan envisions the flat area in proximity to and along Monterey Road for primarily industrial and commercial-oriented industrial uses. Therefore, the proposed amendment is consistent with the Communications Hill Specific Plan.

There are currently two pending General Plan amendments in the vicinity of the site, which are reflective of the pressure to convert industrial land to other uses. Approximately 600 feet northerly of the subject site is a pending General Plan amendment for the "Goble Lane" site (GP02-07-04), proposing to change a 33-acre site from Combined Industrial/Commercial, Heavy Industrial, and Single-Family Detached & Attached (8-16 DU/AC) (Communications Hill Planned Residential Community) to High Density Residential (25-50 DU/AC) (Communications Hill Planned Community). If approved, the Goble Lane amendment could accommodate up to 1,421 residential units.

GP03-07-04 is proposing to change the Land Use/Transportation Diagram designation from Combined Industrial/Commercial to High Density Residential (25-50 Dwelling Units per Acre) for a J-shaped property located generally at the south side of Umbarger Road and the east side of Monterey Road on a 2.35-acre site. If approved, this amendment could accommodate up to 120 dwelling units.

Policy Consistency

Consistency with the General Plan

The *San Jose 2020 General Plan* is the adopted statement of goals and policies for the future character and quality of development in the community as a whole. The proposed redesignation of this area to Light Industrial on 17.2 acres and Heavy Industrial on 21 acres is consistent with the General Plan Economic Development Major Strategy which seeks to maximize the economic potential of the City's land resources and employment opportunities.

The continuing conversion of lands planned for light industrial and heavy industrial uses has been consistently identified as an issue for the long-term viability of the City's economic development. Since 1995 just over 250 acres have been converted from light and heavy industrial to non-industrial uses, a 10% reduction.

The subject amendment would increase the inventory of Light Industrial and Heavy Industrial designated land by approximately 38.2 acres; thereby strengthening the land base for industrial suppliers and services. Industrial suppliers and services support other businesses and contribute to a diverse economy in San Jose.

The General Plan Industrial Land Use Goals and Policies encourage the development of industrial land to provide sufficient opportunities for job growth and for expansion of the City's tax base. Reserving some areas exclusively for industrial uses maintains the desirability of those locations for potential future industrial users. The amendment site is part of the Monterey Corridor and nearby Monterey Corridor Redevelopment Project Area which is located north of the County Fairgrounds. The subject amendment would be consistent with Industrial Land Use Policy #9, which encourages industrial supplier/service business retention and expansion in appropriate areas of the City (e.g., Monterey Corridor). The amendment is also consistent with Industrial Land Use Policy #15, which states that exclusively industrial areas should be reserved for industrial uses.

The subject amendment is consistent with General Plan Economic Development Policy #1 in that approving the proposed amendment would further the City's efforts to enhance its economic development goals and increase employment opportunities for San Jose citizens by attracting businesses and industries which are particularly suited to the area. The proposed amendment is also consistent with Economic Development Policy #7 that encourages a mix of land uses in appropriate locations which contribute to a balanced economic base, including industrial suppliers and services, commercial support services, "green industries" as well as high technology manufacturers and other related industries.

Consistency with the Communications Hill Specific Plan

For the area east of the railroad tracks, the intent of the Communications Hill Specific Plan is to provide development opportunities that support the long-term industrial uses in the area. The proposed General Plan amendment would be consistent with the intent of the Specific Plan for the subject site and surrounding properties.

Future development of the area would need to conform to the design standards outlined within the Communications Hill Specific Plan and the Industrial Design Guidelines to ensure that new development provides the appropriate improvements and streetscape design. Many of the existing uses in this area pre-date these standards and would be expected to upgrade the appearance of the buildings, screen outdoor activities, add landscaping, improve the streetscape, and add street improvements as each property is expanded or is redeveloped.

Future General Plan Amendments

As stated previously, the proposed amendment site is part of a larger intact industrial area, approximately 375 acres in size. This area is located on both sides of Monterey Road, extending generally from Umbarger Road to Capitol Expressway and is part of the even larger Monterey Corridor located north of the County Fairgrounds. Staff is anticipating initiating a similar amendment for the existing industrial uses on the east side of Monterey Road from Umbarger Road to Capitol Expressway in the near future. The overall goal of the amendment would be to strengthen the land base for industrial suppliers and services that are already stable and established uses in the Monterey Corridor and to respond to increased pressure to convert these established industrial lands to residential development.

PUBLIC OUTREACH

The property owners within the project boundaries and/or property owners within a 1000-foot radius were sent a newsletter regarding the two community meetings that were held on February 24th and 26th, 2003. They also received a hearing notice of the public hearings to be held on the subject amendment before the Planning Commission in March and City Council in April. In addition, the Department's web-site contains information regarding the General Plan process, amendments, staff reports, and hearing schedule. This site is used by the community to keep informed with the status of the amendments.

No comments were received by staff at the community meetings or in other communications.

RECOMMENDATION

Staff recommends a change from Combined Industrial/Commercial to Light Industrial on 17.2 acres and Heavy Industrial on 21 acres as proposed (see exhibit 1).

Proposed Text Amendment
to the Communications Hill Specific Plan

Amend Chapter 3.2.e – Communications Hill Specific Plan; Land Use; Industrial/Commercial and Heavy Industrial, page 68, paragraph 2, as follows:

MONTEREY ROAD

DESCRIPTION
Monterey Road is primarily built out with industrial and commercially oriented uses where it borders Communications Hill. The plan proposes ~~to change~~ that land use ~~designated~~ designations for this stretch of Monterey Road ~~to~~ be ~~c~~Combined ~~i~~Industrial/ ~~c~~ Commercial, Light Industrial, and Heavy Industrial, consistent with the existing uses. The criteria below supports the strategy of the Monterey Corridor Revitalization study and focus on street frontage design to ensure that future development is more street oriented and accessible by walking.

See attached list 466-09-030	Approximately 77.4 gross acres

EXISTING LAND USE(S) SUBJECT SITE -	Various industrial and industrial oriented commercial uses (e.g., auto repair, industrial truck storage and wash, manufacturing and assembly, quarry operations, auto wrecking, etc.)
NORTH -	Heavy Industrial and trailor park - Redwood Mobile Home Park, Raisch Aggregate Concrete
EAST -	Industrial, commercial and residential uses
SOUTH -	Drive-In/Flea Market, Capital Expressway
WEST -	Communications Hill, vacant and industrial uses

THIS APPLICATION IS ACCEPTED BY APPOINTMENT ONLY WITH THE GENERAL PLAN STAFF, CALL (408) 277-4576

TO BE COMPLETED BY THE APPLICANT

(PLEASE PRINT OR TYPE. FOR ADDITIONAL INFORMATION USE A SUPPLEMENTAL SHEET)

REASON(S) FOR AMENDMENT REQUEST

Staff initiated General Plan amendment request to better reflect the existing uses within the proposed amendment boundaries and to further the City's efforts to preserve its limited supply of industrially oriented areas within the Urban Service Area.

THE FOLLOWING REQUIRED MATERIALS ARE ATTACHED:

- ☐ Application for Environmental Clearance
- ☐ Application Fee(s) and Public Noticing Fees
- ☐ Assessor's Parcel Map(s)

THIS APPLICATION IS ACCEPTED BY APPOINTMENT ONLY WITH THE GENERAL PLAN STAFF, CALL (408) 277-4576

APPLICANT

That for the purpose of processing and coordination of this application, the following person is my (our) designated representative/contact person:

APPENDIX A

PROPOSED GENERAL PLAN TEXT AMENDMENT LANGUAGE

Proposed Communications Hill Specific Plan Text Amendment(s)

Amend the Communications Hill Specific Plan; Chapter 3.2.e; Industrial/Commercial & Heavy Industrial; Monterey Road as follows:

Pg. 68, P.2:
MONTEREY ROAD

DESCRIPTION
Monterey Road is primarily built out with industrial and commercially-oriented industrial uses where it borders Communications Hill. The Plan proposes that~~to change~~ the land use designate~~d~~ions for this stretch of Monterey Road to be light and heavy industrial, consistent with the existing uses ~~combined industrial/commercial~~. The criteria below supports the strategy of the Monterey Corridor Revitalization study and focus on street frontage design to ensure that future development is more street oriented and accessible by walking.

GP03-07-04 Existing GP Designation: Combined Industrial/Commercial Acreage: 2.3 Requested GP Designation: High Density Residential (25-50 DU/AC)

Located on the south side of Umbarger Road approximately 200 feet northeast of Monterey Road (State Route 82).

Attention: Michael Mena, Project Manager

Subject: File No. GP03-07-05/ General Plan Amendment @ Monterey Road/Capitol Expressway

Dear Mr. Mena:

Santa Clara Valley Transportation Authority (VTA) staff have reviewed the project referenced above for a General Plan Amendment to change the Land Use/Transportation Diagram from Combined Industrial/Commercial to Light Industrial on an approximately 77.4-acre site, located on the east side of Monterey Road, between Capitol Expressway, Hillsdale and the Pacific Railroad tacks. We have the following comments.

Existing Transit Service
VTA maintains a bus stop located adjacent to the project site on Monterey Highway. The stop is served by *Lines 66, 68, 304 and 305.*

Pedestrian Access Improvements
To allow residents and guests of the proposed project to safely and conveniently access the transit service in the area, VTA staff recommend that the City condition the developer to provide the following improvements as part of the project:

- Continuous sidewalks along Monterey Highway.
- Wheelchair curb ramps, in compliance with Americans with Disabilities Act (ADA) requirements, at all driveways and intersections within and adjacent to the project site.

Bus Stops Improvements
VTA staff recommend that the City condition the developer to maintain the existing bus stop on Monterey Highway with the following improvements as part of the project:

- A minimum 22-foot curb lane or bus duckout consistent with the attached *Figure 22, VTA Typical Bus Duckout* or *VTA Modified Bus Duckout Sample Designs Sheet* at the adjacent bus stop. This minimum width curb lane or duckout allows buses to service the stop while out of the flow of traffic and reduces the conflicts between buses and other vehicles traveling on Monterey Highway.

- A 10' x 55' PCC bus stop pavement pad consistent with the attached *Figure 26, VTA Bus Stop Pavement Details* and *Attachment 1 for Figure 26, VTA Bus Stop Pavement Details Technical Specifications*, to prevent pavement failures.
- A sidewalk or passenger waiting pad, a minimum of 8' wide and 40' long, adjacent to the bus stop as shown on the attached *Figure 20, VTA Bus Stop Configuration, Bus Stop and Passenger Pad without Shelter.*

Mixed-Use

The proposed General Plan Amendment involves sites that are adjacent to and within close proximity of the Capitol Expressway Caltrain Station. Currently, VTA plans to relocate the existing Caltrain Station south to Capitol Expressway to be integrated with the proposed Monterey Station on the Capitol Expressway Light Rail Project. Also, as part of Downtown East Valley Transit Improvement, there is also a bus rapid transit study being conducted along Monterey Highway between the Diridon Station in Downtown San Jose to the Santa Teresa Station on the Santa Teresa-Baypointe (Guadalupe) LRT line.

VTA's Community Design & Transportation Best Practices Manual recommends mixing the land uses and maximizing the density of land uses that are adjacent to and within close proximity of transit hubs such as Caltrain Stations, Light Rail Stations, and BRT stops. Therefore, VTA staff opposes the proposal to change the Land Use/Transportation Diagram from Combined Industrial/Commercial to Light Industrial on the 77.4-acre site along the western side of Monterey Road north of Capitol Expressway. This General Plan Amendment would reduce the ability to provide a mix of uses along Monterey Road.

VTA staff understands that sites for industrial uses are limited within the City of San Jose, and does not recommend changing the industrial use of these sites. However, the location of this proposed General Plan Amendment will be well served by several transit lines. Therefore, VTA staff recommends maintaining the existing General Plan Designation and existing Land Use/Transportation Diagram as Combined Industrial/Commercial in order to support a wider variety of uses to serve the residents and employees with local services that can be reached by transit, on foot or on bike rather than by the automobile.

We appreciate the opportunity to review this project. If you have any questions, please call Somruthai Michelutti of my staff at (408) 321-5785.

Sincerely,

Roy Molseed
Senior Environmental Planner

PLANNING DIVISION

January 15, 2003

Dear Property Owner:

FILE NUMBER: GP03-07-05
LOCATION: Generally bounded by the Monterey Road, Capitol Expwy., Hillsdale Ave. and the Union Pacific Railroad tracks (Communications Hill Planned Community) (see reverse side for map).

According to the latest Santa Clara County Assessor's records, you are the owner of property within the identified area on the attached map. As a courtesy, we would like to inform you that the City of San Jose staff is proposing a General Plan Amendment for your property. The amendment proposes to change the land use designation from Combined Industrial/Commercial to Light Industrial.

City staff is proposing to change the land use designation in order to reflect the existing industrial and industrially oriented commercial uses on the amendment site. The General Plan for the City of San Jose determines how properties will be used in the future. During the upcoming Spring Hearings, the City will review the General Plan and the individual amendments that are proposed. The proposed amendment on your property will be the subject of public hearings before the Planning Commission on March 17, 2003 and City Council on April 15, 2003.

If you have any questions regarding the proposed amendment, please feel free to contact myself or Rich Buikema/Senior Planner at (408) 277-4576.

Sincerely,

Mike Mena
Project Manager

SUBJECT: **TRAFFIC IMPACT ANALYSIS FOR GP03-07-05**

DATE: 1-6-03

Approved | Date

File Number: GP03-07-05
Location: Area generally bounded by Monterey Road, Capitol Expressway, Hillcap Avenue, Hillsdale Avenue, and the Union Pacific Railroad tracks
Acreage: 77.4 ac.
Description: Combined Industrial/Commercial to Light Industrial
(Add 265 Jobs)
Outside Special Subarea (Remainder of City)

COPY

We have reviewed the subject General Plan Amendment (GPA) and submit the following comments. The estimated number of new PM peak hour trips resulting from the proposed land use change is below the exemption threshold established for this area. Therefore, this GPA is exempt from a computer model (TRANPLAN) traffic impact analysis. In accordance with the City Council adopted fees resolution, a traffic analysis base fee in the amount of $500 is due.

If an Environmental Impact Report (EIR) is required for this GPA for other reasons, the EIR must include a traffic impact analysis report for the project and a cumulative analysis for all GPAs on file this year. Additional traffic data will be provided to the applicant's traffic engineering consultant for the preparation of the report.

Please contact Paul Ma at 277-5780 or Casey Hirasaki at 277-4217 if you have any questions

Meeting w/ Laurel, Stan, Rich
2-12-03
GP03-07-05 Boundary Discussion

1. Jim Lightbody and the author of the comment letter should be invited to meet with us to discuss the " new location" for the Cal Train stop.(note we did to figure out where existing stop it before hand).
2. The Staff report should include discussion related to a future GPA for the east side for the same reasons we are presenting this amendment.
3. Staff report should include discussion that new development will be expected to be an improvement to the area in that: frontage improvements, updated appearance, follow IDG, design quality, regardless of use. Most of the existing un-attractive uses and arch. Are pre IDG, new will be an improvement.
4. Our goal is to maintain tax base, preserve and reinforce that this is an Industrial area and promote redev of this area with ind. Uses.

GENERAL PLAN AMENDMENT
FILE NO. GP03-07-05/GPT03-07-05

Issues for further discussion:

1. VTA's plans for the relocation of the Caltrain platform along Monterey Road near the Capitol Expressway. (SEE MEMO FROM VTA)

2. Communications Hill Specific Plan states that mixed use opportunities (transit oriented development) should be reviewed for the industrial area southerly of Hillcap Road following a Caltrain Facility development along Monterey Road. (SEE ATTACHED TEXT) HILL CAP ROAD

3. Prelims have been submitted for request to change the area bound by Hillcap Road and Snell Avenue from LI to a high-density residential development. Staff would not support the proposed residential uses at this time. (PRE03-012 & PRE03-003)

4. Staff report should consider revising staff's recommendation and amend a smaller area to only consider the properties located on the west side of Monterey Road, on both sides of Daylight Way and ~~southerly to~~ Easterly of the Union Pacific Railroad tracks.

5. Although the area southerly of Hillcap Road may be appropriate for residential/transit oriented development in the long-term (following Caltrain Facility), the existing industrial uses should be preserved until such a facility becomes real.

6. Need a meeting with Pat Colombe, Laurel Prevetti, Stan Ketchum, OED, and possibly VTA to discuss long-term vision for this area. OK w/ Laurel

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Department of Planning, Building and Code Enforcement

STEPHEN M. HAASE, AICP, DIRECTOR

PUBLIC HEARING NOTICE

An amendment to the *San Jose 2020 General Plan* Land Use/Transportation Diagram and Text will be considered at the following public hearings: the Planning Commission on **Monday, March 17, 2003 at 6:00 p.m.** and the City Council on **Tuesday, April 15, 2003 at 7:00 p.m.** The Planning Commission will make a recommendation to the City Council regarding the proposed amendment. The City Council will make the final decision on the proposed General Plan amendment.

The amendment being considered is:

GP03-07-05: GENERAL PLAN AMENDMENT request to change the Land Use/Transportation Diagram designation from Combined Industrial/Commercial to Light Industrial and Heavy Industrial (Communications Hill Planned Community) for the area generally bound by Monterey Road, Capitol Expressway, Hillsdale Avenue, and the Union Pacific Railroad tracks (see map on back) on a 77.8-acre site. (Various, Owner/City of San Jose, Applicant). Council District: 7.

GPT03-07-05: GENERAL PLAN TEXT AMENDMENT request to reflect the proposed land use changes in the Communications Hill Specific Plan.

These public hearings will be held in the City Council Chambers, 801 North First Street, 2nd Floor, San Jose, California. You are welcome to attend and to speak on this amendment. If you choose to challenge this land use decision in court, you may be limited to only those issues that you or someone else raised and discussed at the public hearing or in written correspondence delivered to the City at or prior to the public hearing. Should you wish to submit written comments, you may address them to:

Department of Planning, Building, & Code Enforcement
Attention: Dave Tymn
801 North 1st Street, Room 400
San Jose, CA 95110

Please include the file number referenced below on your correspondence. To arrange an accommodation under the Americans with Disabilities Act to participate in these public hearings, please call (408) 998-5299 (TTY) at least 48 hours before the hearing.

Please note that the *San Jose 2020 General Plan* reflects the long-range future growth for the City. A change in the General Plan land use designation would only affect the type and intensity of future development allowed on the subject property. The proposed amendment would not change the legality of existing uses or the zoning designation of the property. Zoning changes occur through the rezoning process, which is separate from the General Plan amendment process.

Comments and questions regarding this proposal or the General Plan amendment process are welcome, and should be referred to the Project Manager, **Dave Tymn** of the General Plan staff, at **(408) 277-8532.** Please contact the Project Manager two weeks prior to the above mentioned hearing dates to confirm the actual hearing date for this specific amendment. Information regarding the proposed amendment is also available on the Department's web site at www.ci.san-jose.ca.us/planning/sjplan.

Stephen M. Haase, AICP, Director

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Department of Planning, Building and Code Enforcement

STEPHEN M. HAASE, DIRECTOR

INITIAL STUDY

PROJECT FILE NO.: GP03-07-05/GPT03-07-05

PROJECT DESCRIPTION:

- **General Plan Amendment request to change the Land Use/Transportation Diagram from Combined Industrial/Commercial to Light Industrial on 19.4 acres and Heavy Industrial on 58.4 acres, grossing an approximately 77.8 acre-site (Communications Hill Planned Community).**
- **A General Plan Text Amendment to reflect the proposed Land Use/Transportation Diagram changes in the Communications Hill Specific Plan.**

PROJECT LOCATION: Generally bounded by the Monterey Road, Capitol Expwy., Hillsdale Ave. and the Union Pacific Railroad tracks (Communications Hill Planned Community).

GENERAL PLAN DESIGNATION:
Combined Industrial/Commercial

ZONING: HI, Heavy Industrial/LI, Light Industrial
CG, General Commercial/IP, Industrial Park/
Unincorporated

SURROUNDING LAND USES:
North: Industrial/Mobile Home Park
East: Industrial/Commercial/Residential
South: Commercial/Flea Market/Drive-in Theater
West: Industrial/Vacant

PROJECT APPLICANT'S NAME AND ADDRESS:
City of San Jose, 801 North First Street, Room 400, San Jose, CA 95110

DETERMINATION
On the basis of this initial study:

☐	I find the proposed project could not have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
☐	I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the project proponent has agreed to revise the project to avoid any significant effect. A MITIGATED NEGATIVE DECLARATION will be prepared.
☐	I find the proposed project could have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT(EIR) is required.
☐	I find the proposed project could have a significant effect on the environment, but at least one effect has been (1) adequately analyzed in a previous document pursuant to applicable legal standards, and (2) addressed by mitigation measures based on the previous analysis as described in the attached initial study. An EIR is required that analyzes only the effects that were not adequately addressed in a previous document.
☒	I find that although the proposed project could have a significant effect on the environment, no further environmental analysis is required because all potentially significant effects have been (1) adequately analyzed in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (2) avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are included in the project, and further analysis is not required.

PROJECT SETTING:

The subject General Plan amendment site is located in south San Jose and is centrally located in relation to main transportation routes, including; Highway 87, Monterey Road, Capital Expressway, and a Light Rail Line which connects north and south San Jose. The site is also located along the eastern and southern boundaries of the Communications Hill Planned Residential Community. On site development is primarily built-out with industrial and industrially oriented commercial uses. Existing uses located within the proposed amendment site include; auto-storage, wrecking yards, construction and equipment yards, auto and collision repair, quarries, asphalt recycling facilities, self-storage facilities, boat and furniture sales, and various other industrial oriented uses (see land use survey map).

Directly surrounding the proposed amendment site are a variety of uses. Northerly of the site consists of industrial, auto-related uses and two mobile home parks (The Chateau-Le-Salle and The Redwoods Mobile Home Park). Easterly of the site is built-out with a variety of industrial, commercial and multi-family housing; in addition to older motels built in the mid-1900's. South of the site is located a Drive-in Theater currently used as a Flea Market and the Capital Expressway further south of the site. Westerly of the site consists of Communications Hill, planned for higher density residential and commercial uses. Additional planned industrial park uses and the Union Pacific Railroad tracks are located westerly of the site.

CONSISTENCY WITH ADOPTED GOALS AND POLICIES

COMMUNICATIONS HILL PLANNED COMMUNITY

The subject site is within the Communications Hill Planned Residential Community. The boundaries of the Communications Hill Planned Community were chosen to ensure a careful integration of the existing industrial and commercial uses with new residential uses, as outlined in the Communications Hill Specific Plan. The Communications Hill Planned Community discusses the retention of the industrial uses in the flat area along this stretch of Monterey Road. Therefore, the subject amendment proposal to change the Land Use/Transportation Diagram from Combined Industrial/Commercial to Light Industrial and Heavy Industrial accordingly would be consistent with the intent of the Communications Hill Planned Community to retain the industrial uses along Monterey Road.

COMMUNICATIONS HILL SPECIFIC PLAN

The proposed amendment site is within the Communications Hill Planned Community. In 1992, the City adopted the Communications Hill Specific Plan, which provided a comprehensive planning framework for development of a unified, high-density, pedestrian oriented, urban community with a mix of uses on an approximately 400-acre site, on and around Communications Hill. The basic land use components of the Specific Plan have been incorporated into the General Plan as a Planned Community. The Communications Hill Planned Community establishes the fundamental intent of the City for development of the Specific Plan area.

The proposed General Plan amendment and text amendment would not result in any new uses which were not considered by the Communications Hill Specific Plan Final Environmental Impact Report. The amendment(s) as proposed would limit the potential for new commercial uses in the future to protect the viable concentration of existing light and heavy industrial uses. The proposed General Plan amendment and text amendment would be in furtherance of the Communications Hill Specific Plan.

CITY OF SAN JOSE 2020 GENERAL PLAN

The proposed amendment relates to a number of General Plan goals and policies. The City of San Jose's General Plan is an adopted statement of goals and policies for the future character and quality of development in the community as a whole. The following is a summary of relevant sections of the General Plan that would apply to the proposed amendment.

Issues	*Potentially Significant Impact*	*Less Than Significant With Mitigation Incorporated*	*Less Than Significant Impact*	*No Impact*	*Information Sources*

Economic Development Major Strategy
The subject amendment is in consistent with the General Plan's Economic Development Major Strategy. An important component of the Economic Development Major Strategy is the preservation of the City's industrial areas that are critical to the City's economic viability. Light and Heavy Industrial areas, such as the one in which the amendment site is located, provide a location for industrial supplier/service firms to operate. These firms help to fuel the San Jose economy as they are inextricably linked to the region's high technology base by providing needed services or materials to other businesses.

Economic Development Goals and Policies
The subject amendment request is also consistent with the General Plan Economic Development Goals and Policies. These policies include the following:

- Economic Development Policy #2 states that in order to enhance the City's economic development goals and increase employment opportunities for San Jose citizens, the City should:
    1. Seek to attract businesses and industries, which are particularly suited to the area.
    2. Protect the industrial lands designated exclusively for industrial uses.
    3. Attract a diverse mixture of businesses and industries that can provide jobs suitable for the City's unemployed and under-employed labor force.

- Economic Development Policy #7 encourages a mix of land uses in appropriate locations which contribute to a balanced economic base, including industrial suppliers and services, commercial support services, and "green industries" (industries related to recycling or environmental preservation) as well as high technology manufacturers and other related industries.

Industrial Land Use Goals and Policies
The intent of the General Plan Industrial Land Use Goals and Policies is to encourage the development of industrial land to provide sufficient opportunities for job growth for the City's residents and for expansion of the City's tax base. According to the General Plan, since some of the industrial land use designations allow for development of non-industrial uses, it is critical that the Land Use/Transportation Diagram designates certain areas exclusively for industrial uses. These areas include North San Jose, Edenvale, and along the Monterey Corridor. Reserving some areas exclusively for industrial uses maintains the desirability of those locations in San Jose for potential future industrial users.

Although the project site is located just south of the area formally identified as the Monterey Corridor, the subject industrial area serves as an extension of the corridor and includes a mix of industrial uses. Therefore, the subject amendment would be consistent with the intent of the General Plan's Industrial Land Use goals mentioned above. In particular, the subject amendment would be consistent with the following Industrial Land Use Policies:

- Industrial Land Use Policy #9 encourages industrial supplier/service business retention and expansion in appropriate areas of the City (e.g., Monterey Corridor).

- Industrial Land Use Policy #15 states that areas which are exclusively industrial should be reserved for industrial uses to the extent possible.

Issues	*Potentially Significant Impact*	*Less Than Significant With Mitigation Incorporated*	*Less Than Significant Impact*	*No Impact*	*Information Sources*

I. AESTHETICS - Would the project:

a) Have a substantial adverse effect on a scenic vista?	☐	☐	☐	☒	1,2
b) Substantially damage scenic resources, including, but not limited to, trees, rock out-croppings, and historic buildings within a state scenic highway?	☐	☐	☐	☒	1,2
c) Substantially degrade the existing visual character or quality of the site and its surroundings?	☐	☐	☐	☒	1,2
d) Create a new source of substantial light or glare that would adversely affect day or nighttime views in the area?	☐	☐	☐	☒	1,2
e) Increase the amount of shade in public and private open space on adjacent sites?	☐	☐	☐	☒	1,2

DISCUSSION OF IMPACTS: The proposed General Plan amendment is intended to reflect and bring into conformance the existing land uses located within the amendment boundaries. No development is associated and/or anticipated with the subject amendment. The proposed General Plan amendment and text amendment would not result in a significant impact to any known scenic trails and/or corridors, as the amendment is only intended to reflect existing uses on the subject site. The subject amendment would not result in a substantial increase to light and glare from what currently exists. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

II. AGRICULTURE RESOURCES - Would the project:

a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒	1,3,4
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒	1,3,4
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?	☐	☐	☐	☒	1,3,4

DISCUSSION OF IMPACTS: The subject amendment site is currently built-out with industrial and industrially commercial oriented uses. Therefore, the proposed General Plan amendment will not result in any significant impacts to agriculture resources, local or regional. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

III. AIR QUALITY - Would the project:

a) Conflict with or obstruct implementation of the applicable air quality plan?	☐	☐	☐	☒	1,14
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	☐	☐	☐	☒	1,14
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is classified as non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions that exceed quantitative thresholds for ozone precursors)?	☐	☐	☐	☒	1,14
d) Expose sensitive receptors to substantial pollutant concentrations?	☐	☐	☐	☒	1,14

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	Information Sources
e) Create objectionable odors affecting a substantial number of people?	☐	☐	☐	☒	1,14

DISCUSSION OF IMPACTS: The subject General Plan amendment is intended to reflect the existing industrial and industrially oriented commercial uses and therefore, would not result in further impacts other than those previous analyzed as part of the Communications Hill Specific Plan Final Environmental Impact Report. Any future development would be subject to environmental review and will be required to conform to the region's Clean Air Plan and other State and local requirements. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

IV. BIOLOGICAL RESOURCES - Would the project:

a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☒	1,10
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	☒	1,6,10
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act including, but not limited to, marsh, vernal pool, coastal, etc., through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	☒	1,6
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☐	☒	1,10
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	☐	☒	1,11
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒	1,2

DISCUSSION OF IMPACTS: The amendment site is currently built-out with existing industrial heavy and light industrial uses. The subject General Plan amendment is intended to reflect those existing industrial and industrially oriented commercial uses and therefore, would not result in further impacts other than those previous analyzed as part of the Communications Hill Specific Plan Final Environmental Impact Report. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

IV. CULTURAL RESOURCES - Would the project:

a) Cause a substantial adverse change in the significance of an historical resource as defined in CEQA Guidelines §15064.5?	☐	☐	☐	☒	1,7
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to CEQA Guidelines §15064.5?	☐	☐	☐	☒	1,8
c) Directly or indirectly destroy a unique paleontological resource or site, or unique geologic feature?	☐	☐	☐	☒	1,8
d) Disturb any human remains, including those interred outside of formal cemeteries?	☐	☐	☐	☒	1,8

Issues	*Potentially Significant Impact*	*Less Than Significant With Mitigation Incorporated*	*Less Than Significant Impact*	*No Impact*	*Information Sources*

DISCUSSION OF IMPACTS: The amendment site is currently built-out with existing industrial heavy and light industrial uses. The subject General Plan amendment is intended to reflect those existing industrial and industrially oriented commercial uses and therefore, would not result in further impacts other than those previous analyzed as part of the Communications Hill Specific Plan Final Environmental Impact Report. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

V. GEOLOGY AND SOILS - Would the project:

a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:					
1) Rupture of a known earthquake fault, as described on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? (Refer to Division of Mines and Geology Special Publication 42.)	☐	☐	☐	☒	1,5
2) Strong seismic ground shaking?	☐	☐	☐	☒	1,5
3) Seismic-related ground failure, including liquefaction?	☐	☐	☐	☒	1,5
4) Landslides?	☐	☐	☐	☒	1,5
b) Result in substantial soil erosion or the loss of topsoil?	☐	☐	☐	☒	1,5
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	☐	☐	☐	☒	1,5
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	☐	☐	☐	☒	1,5
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	☐	☐	☐	☒	1,5

DISCUSSION OF IMPACTS: There are no known faults within one mile of the subject site. Although the amendment site is not located near any known faults, it is within the seismically active San Francisco Bay Area. The use of standard engineering and construction techniques at the development stage would mitigate any potential dangers from severe ground shaking. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

Issues	*Potentially Significant Impact*	*Less Than Significant With Mitigation Incorporated*	*Less Than Significant Impact*	*No Impact*	*Information Sources*
VI. HAZARDS AND HAZARDOUS MATERIALS - Would the project:					
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☐	☒	☐	1, 24
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☐	☐	☒	1, 24
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☒	☐	1, 24
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☒	☐	1,12
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☒	1,2
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?	☐	☐	☐	☒	1
g) Impair implementation of, or physically interfere with, an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒	1,2
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	☐	☐	☐	☒	1

DISCUSSION OF IMPACTS: Several heavy and light industrial uses are located within the proposed amendment boundary. Heavy and light industrial uses typically are associated with the storage and/or use of hazardous materials or substances. The Communications Hill Specific Plan Final Environmental Impact Report (pg. 185) describes the policies that will serve as mitigation to prevent significant hazardous materials from future industrial uses on the subject site. There is one property on the site (APN 455-24-036), which is listed on the City's Hazardous Waste and Substances Site List for a Leaking Underground Storage Tank Site (LTNKA). The subject contamination is due to soil containing gasoline contaminants. Any future development of the site would be subject to further environmental review in addition to the incorporation of mitigation measures to ensure the site is "cleaned" in conformance with local and regional requirements. The fact that the proposed amendment is requesting a change to Light Industrial, any potential impact from the subject site would be considered less than significant than if the proposed change would have been to a commercial or residential category.

The proposed General Plan amendment and text amendment would not expose the public or the environment to safety hazards associated with hazardous materials use, from aircraft, or from wildfires. **LESS THAN SIGNIFICANT IMPACT.**

MITIGATION MEASURES: No mitigation is required.

Issues	*Potentially Significant Impact*	*Less Than Significant With Mitigation Incorporated*	*Less Than Significant Impact*	*No Impact*	*Information Sources*
VII. HYDROLOGY AND WATER QUALITY - Would the project:					
a) Violate any water quality standards or waste discharge requirements?	☐	☐	☐	☐	1,15
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	☐	☐	☐	☐	1
c) Substantially alter the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on-or off-site?	☐	☐	☐	☐	1
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on-or off-site?	☐	☐	☐	☐	1
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	☐	☐	☐	☐	1,17
f) Otherwise substantially degrade water quality?	☐	☐	☐	☐	1
g) Place housing within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	☐	☐	☐	☐	1,9
h) Place within a 100-year flood hazard area structures that would impede or redirect flood flows?	☐	☐	☐	☐	1,9
i) Expose people or structures to a significant risk of loss, injury, or death involving flooding, including flooding as a result of the failure of a levee or dam?	☐	☐	☐	☐	1
j) Be subject to inundation by seiche, tsunami, or mudflow?	☐	☐	☐	☐	1

DISCUSSION OF IMPACTS: The proposed General Plan amendment and text amendment would not result in any new or more severe drainage, flood, or water quality impacts from what may currently exist. Future development of the Specific Plan, as amended, would result in the same amount of overall development and acreage of impermeable surfaces in regards to the existing condition of the subject site. The Communications Hill Specific Plan Final Environmental Impact Report (pages 62-72) describe the flooding and water quality impacts and mitigation measures to reduce impacts to a less than significant level. Additionally, any future development would be subject to conform with the requirements of the National Pollutant Discharge Elimination System (NPDES) to reduce impacts on storm water quality from the proposed land use, construction activities, and post construction activities. A Storm Water Pollution Prevention Plan (SWPPP) may be required at the time of future development, in compliance with the State regulations, to control the discharge of storm water pollutants. **LESS THAN SIGNIFICANT IMPACT.**

MITIGATION MEASURES: No mitigation is required.

Issues	*Potentially Significant Impact*	*Less Than Significant With Mitigation Incorporated*	*Less Than Significant Impact*	*No Impact*	*Information Sources*
VIII. LAND USE AND PLANNING - Would the project:					
a) Physically divide an established community?	☐	☐	☐	☐	1,2, 24
b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☐	☐	1,2, 24
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?	☐	☐	☐	☐	1,2, 24

DISCUSSION OF IMPACTS: The proposed amendment site is within the Communications Hill Planned Community. In 1992, the City adopted the Communications Hill Specific Plan, which provided a comprehensive planning framework for development of a unified, high-density, pedestrian oriented, urban community with a matrix of uses on an approximately 400-acre site, on and around Communications Hill. The basic land use components of the Specific Plan have been incorporated into the General Plan as a Planned Community. The Communications Hill Planned Community establishes the fundamental intent of the City for development of the Specific Plan area.

The proposed General Plan amendment and text amendment would not result in any new uses which were not considered by the Communications Hill Specific Plan Final Environmental Impact Report. The proposed General Plan amendment and text amendment would be in furtherance of the Communications Hill Specific Plan and would be consistent with the City's Sustainable City Major Strategy, Balanced Community goal and the City's Economic Major Strategy and Industrial policies and goals to preserve and expand the City's limited supply of Heavy and Light Industrially designated land.

Therefore, the proposed General Plan land use and text amendment would not result in any land use or planning impacts. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

IX. MINERAL RESOURCES - Would the project:					
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒	1,2,23, 24
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒	1,2,23, 24

DISCUSSION OF IMPACTS: Quarry operations are currently functioning on the subject site. The existing quarry operations consist of gravel mining and asphalt and recycling facilities. The proposed land use designation of Heavy Industrial on these properties would further the City's efforts to maintain and preserve these areas for such uses. The additional proposed designation of Light Industrial on the adjacent properties would not result in impacts on any such use and provide a transitional area to Monterey Road and the mix of uses which are located on the easterly side of Monterey Road. Therefore, the proposed General Plan amendment and text amendment would not result in impacts to mineral resources beyond what was previously considered in the Communications Hill Specific Plan Final Environmental Impact Report. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	Information Sources
X. NOISE - Would the project result in:					
a) Exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☒	☐	1,2,13,18, 24
b) Exposure of persons to, or generation of, excessive groundborne vibration or groundborne noise levels?	☐	☐	☒	☐	1
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☐	☐	☒	1, 24
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	☐	☐	☐	☒	1
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒	1
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒	1

DISCUSSION OF IMPACTS: The major source of environmental noise on the project site are aircraft over-flights and vehicular traffic. Occasionally, noise generated by Union Pacific Railroad activity and quarry (concrete/asphalt recycling) operations also affects the noise environment at the project site and its surroundings.3

As part of the Communications Hill Kaufman & Broad Residential Project Supplemental Environmental Impact Report, a noise monitoring survey was conducted in June 2000 at representative locations throughout the Communications Hill area to quantify the existing noise environment. Noise generated from the industrial uses and the Azevedo quarry concrete/asphalt recycling activities was not audible during the 2000 noise monitoring above the ambient noise environment on the ridge top of the Communications Hill. Other concrete/asphalt operations in the area consist of Granite Rock and Ready Mix Inc., both located at the southern end of the proposed amendment boundary and proposed to by designated Heavy Industrial from the current designation of Combined Industrial/Commercial.

Therefore, the proposed General Plan amendment and text amendment would not result in any new or more severe noise impacts than currently exist on the subject site and the surrounding area. Implementation of the mitigation measures identified in the Communications Hill Specific Plan Final Environmental Impact Report (pages 149-151) would reduce any noise impacts to a less than significant level. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

Issues	*Potentially Significant Impact*	*Less Than Significant With Mitigation Incorporated*	*Less Than Significant Impact*	*No Impact*	*Information Sources*
XII. POPULATION AND HOUSING - Would the project:					
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☐	☒	1,2, 24
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒	1, 24
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	☐	☐	☐	☒	1, 24

DISCUSSION IMPACTS: The proposed amendment requests relative minor changes to the layout of the already approved Communications Hill Planned Community. The proposed General Plan land use and text amendment would not result in more housing or an increase in population over that which was already addressed in the Communications Hill Specific Plan Final Environmental Impact Report. The proposed amendment(s) would not result in the displacement of existing houses or people. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

XIII. **PUBLIC SERVICES** - Would the project:					
a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:					
Fire Protection?	☐	☐	☐	☒	1,2
Police Protection?	☐	☐	☐	☒	1,2
Schools?	☐	☐	☐	☒	1,2
Parks?	☐	☐	☐	☒	1,2
Other Public Facilities?	☐	☐	☐	☒	1,2

DISCUSSION OF IMPACTS: The proposed General Plan amendment and text amendment is intended to reflect the existing uses on the subject site. The proposed General Plan land use and text amendment would not result in any new or more severe demands upon public service than what currently exist. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

XIV. RECREATION					
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☐	☒	1,2
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment?	☐	☐	☐	☒	1,2

DISCUSSION OF IMPACTS: The proposed General Plan amendment and text amendment is intended to reflect the existing uses on the subject site and would not result in any reduction in the acreage of park space. Therefore, the proposed General Plan land use and text amendment would not result in any new or more severe demands upon parkland. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

Issues	*Potentially Significant Impact*	*Less Than Significant With Mitigation Incorporated*	*Less Than Significant Impact*	*No Impact*	*Information Sources*

XV. TRANSPORTATION / TRAFFIC - Would the project:

a) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a substantial increase in either the number of vehicle trips, the volume to capacity ratio of roads, or congestion at intersections)?	☐	☐	☐	☒	1,2,19
b) Exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads or highways?	☐	☐	☐	☒	1,2,19
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	☐	☐	☐	☒	1,19
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible land uses (e.g., farm equipment)?	☐	☐	☐	☒	1,19
e) Result in inadequate emergency access?	☐	☐	☐	☒	1,20
f) Result in inadequate parking capacity?	☐	☐	☐	☒	1,18
g) Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?	☐	☐	☐	☒	1,2,18

DISCUSSION OF IMPACTS: The proposed General Plan amendment and text amendment would not result in long-term traffic impacts. The subject amendment is intended to reflect and preserve the existing industrial uses and industrial oriented commercial uses on the subject site. The proposed amendment(s) would not result in additional vehicle trips and does not exceed the threshold of a significant impact requiring a traffic TRANPLAN analysis. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

XVI. UTILITIES AND SERVICE SYSTEMS - Would the project:

a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	☐	☐	☐	☒	1,15
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☐	☒	1,2,21
c) Require or result in the construction of new stormwater drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	☐	☐	☐	☒	1,17
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?	☐	☐	☐	☒	1,22
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☐	☒	1,21
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	☐	☐	☐	☒	1,21
g) Comply with federal, state, and local statutes and regulations related to solid waste?	☐	☐	☐	☒	1,21

DISCUSSION OF IMPACTS: The proposed General Plan amendment and text amendment is intended to reflect the existing uses within the proposed amendment site. Therefore, the proposed amendment would not

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	Information Sources

result in further demands or impacts on utilities and service systems from the existing conditions. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

XVII. MANDATORY FINDINGS OF SIGNIFICANCE

a) Does the project have the potential to (1) degrade the quality of the environment, (2) substantially reduce the habitat of a fish or wildlife species, (3) cause a fish or wildlife population to drop below self-sustaining levels, (4) threaten to eliminate a plant or animal community, (5) reduce the number or restrict the range of a rare or endangered plant or animal, or (6) eliminate important examples of the major periods of California history or prehistory?	☐	☐	☐	☒	1,10, 24
b) Does the project have impacts that are individually limited, but cumulatively considerable? "Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects and the effects of other current projects.	☐	☐	☐	☒	1,16, 24
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☐	☐	☒	1, 24, 12

DISCUSSION OF IMPACTS: The proposed General Plan land use and text amendment is intended to reflect the existing industrial and commercially-oriented industrial uses on subject amendment site. The proposed amendment(s) is consistent with the goals and policies of the Communications Hill Specific Plan and the San Jose 2020 General Plan to preserve and maintain the existing industrial uses along the flat area east of the Union Pacific Railroad tracks and the sloped hillside of Communications Hill for this stretch of Monterey Road. The proposed General Plan amendment and text amendment would not result in impacts in regards to the discussed topics above, in that the fact that the Communications Hill Specific Plan and associated Environmental Impact Report considered industrial uses for the subject area.

Any future development of the site would be subject to further environmental review and be subject to the mitigation measures identified within the Communications Hill Specific Plan Final Environmental Impact Report. **NO IMPACT.**

MITIGATION MEASURES: No mitigation is required.

APPENDIX A

PROPOSED GENERAL PLAN TEXT AMENDMENT LANGUAGE

Proposed Communications Hill Specific Plan Text Amendment(s)

Amend the Communications Hill Specific Plan; Chapter 3.2.e; Industrial/Commercial & Heavy Industrial; Monterey Road as follows:

Pg. 68, P.2:
MONTEREY ROAD

DESCRIPTION
Monterey Road is primarily built out with industrial and commercially-oriented industrial uses where it borders Communications Hill. The Plan proposes that~~to change~~ the land use designate~~d~~ions for this stretch of Monterey Road to be light and heavy industrial, consistent with the existing uses ~~combined industrial/commercial~~. The criteria below supports the strategy of the Monterey Corridor Revitalization study and focus on street frontage design to ensure that future development is more street oriented and accessible by walking.

(Approx. 58.4 acres)

FROM CIC TO LI
(Approx. 19.4 acres)

ENVIRONMENTAL REVIEW CHECKLIST

(Complete project information prior to Staff Review Meeting)

File GP03-07-05

PROJECT INFORMATION: *(Initial Correct Response)*

Is the project located …	YES	NO
• in a ~~Geologic~~ Hazard Zone? Seismic: Liquefaction	X	
• in an area subject to flooding?		X
• adjacent to a creek or wetland?		X
• in an area where endangered or protected animal or plant species have been previously identified?		X
• in an area of archaeological sensitivity?		X
• within the 60 db Ldn noise contour (if residential)?		X
• in an area of past agricultural/industrial uses (if ~~residential~~)? May RES.	X	
• within 1000 feet of railroad tracks?	X	
Will the project result in excessive noise to sensitive receptors (e.g. mechanical equipment, loading docks)		X
Are there ordinance size or Heritage trees on the site?		X
Does the project propose removal of ordinance size trees or riparian vegetation?		X
Is grading or development proposed within the dripline of any trees?		X
Does the project site contain potential burrowing owl habitat?		X
Are any of the existing structures on site 50 years old or older?		X
Is the property listed on the City's Historic Resources Inventory?		X
Are there any water wells or subsurface tanks located on the property?	X	
Does the project conform to the Parking Ordinance?	—	
Is the project Fish and Game Exempt?*	—	
Will the project need to be sent to the State Clearinghouse for a 30 day review?**	—

NOTICE OF DETERMINATION (EIR)

GP03-07-05/GPT03-07-05. Property located on the west side of Monterey Road between the Union Pacific Railroad tracks, Hillsdale Avenue, and approximately 600 feet south of Goble Lane on a 38.3-acre site.

GP03-07-05. General Plan amendment request to change the Land Use/Transportation Diagram designation from Combined Industrial/Commercial to Light Industrial on 17.2-acres and heavy Industrial on 20.9 acres (Communications Hill Planned Residential Community) in a triangular shaped area located on the west side of Monterey Road between the Union Pacific Railroad tracks, Hillsdale Avenue, and approximately 600 feet south of Goble Lane on a 38.3-acre site.

GPT03-07-05. General Plan text amendment request to reflect the proposed land use changes (GP03-07-05) in the Communications Hill Specific Plan.

This is to advise you that on **April 15, 2003,** the City Council of the City of San Jose approved the above described project and made the following determination regarding such project:

1. An Environmental Impact Report was prepared and certified for this project pursuant to the provisions of the California Environmental Quality Act (CEQA).

2. The project will have a significant effect on the environment regarding land use, geology and soils, flooding, water quality, biological resources, visual and aesthetic resources, air quality, noise, facility services, utilities, and environmental hazards.

3. Mitigation measures have been made a condition of approval of the project.

4. A Statement of Overriding Considerations has been adopted for this project.

This is to certify that the Final EIR with comments, responses and record of project approval is available to the general public at Office of the Director of Planning, Building and Code Enforcement, City of San Jose, Room 400, City Hall, 801 North First Street, San Jose, California 95110. This notice is in compliance with Sections 21108 and 21152 of the Public Resources Code.

Project Description

GP03-07-05. General Plan amendment request to change the Land Use/Transportation Diagram designation from Combined Industrial/Commercial to Light Industrial on 17.2-acres and heavy Industrial on 20.9 acres (Communications Hill Planned Residential Community) in a triangular shaped area located on the west side of Monterey Road between the Union Pacific Railroad tracks, Hillsdale Avenue, and approximately 600 feet south of Goble Lane on a 38.3-acre site.

GPT03-07-05. General Plan text amendment request to reflect the proposed land use changes (GP03-07-05) in the Communications Hill Specific Plan. Zoning District: 7.

Findings of Exemption

The proposed project will not individually or cumulatively have an adverse effect on wildlife resources, as defined in Section 711.2 of the California Department of Fish and Game Code.

Certification

I hereby certify that the lead agency has made the above findings of fact and that based upon the Initial Study and hearing record, the project will not individually or cumulatively have an adverse effect on wildlife resources, as defined in Section 711.4 of the California Department of Fish and Game Code.

CITY OF SAN JOSE
USE OF COMMUNICATIONS HILL SPECIFIC PLAN FINAL EIR
FOR A GENERAL PLAN LAND USE AND TEXT AMENDMENT IN SAN JOSE

Pursuant to Section 15162 of the CEQA Guidelines, the City of San Jose has determined that the project described below is pursuant to or in furtherance of the Final Environmental Impact Report (EIR) for the San Jose 2020 General Plan and does not involve new significant effects beyond those analyzed in this Final EIR. Therefore, the City of San Jose can take action on the project as being within the scope of the Final EIR.

PROJECT DESCRIPTION AND LOCATION:

GP03-07-05/GPT03-07-05. General Plan Amendment request to change the Land Use/Transportation Diagram from Combined Industrial/Commercial to Light Industrial on 19.4 acres and Heavy Industrial on 58.4 acres, totaling approximately 77.8 gross acres and a General Plan Text Amendment to reflect the proposed Land Use/Transportation Diagram changes in the Communications Hill Specific Plan (Communications Hill Planned Community). The proposed amendment site is generally bounded by Monterey Road, Capitol Expressway, Hillsdale Avenue and the Union Pacific Railroad tracks.

The environmental impacts of this project were addressed by a Final EIR entitled, "Communications Hill Specific Plan," and findings were adopted by City Council Resolution No. 63624 on April 7, 1992. The following impacts were reviewed and found to be adequately considered by the EIR:

☒ Traffic and Circulation	☒ Soils and Geology	☒ Noise
☒ Cultural Resources	☒ Hazardous Materials	☒ Land Use
☒ Urban Services	☒ Biotics	☒ Air Quality
☒ Aesthetics	☐ Airport Considerations	☐ Microclimate
☒ Energy	☐ Relocation Issues	☐ Construction Period Impacts
☒ Transportation	☒ Utilities	☒ Facilities and Services
☒ Water Quality

Re: City File No. GP03-07-05: General Plan Amendment to change the Land Use/Transportation Diagram designation from Combined Industrial/Commercial to Light Industrial on an approximately 77.4-acre site (Granite Rock Co., owner, City of San Jose, applicant)

Dear Mr. Mena:

I am writing in response to your referral for the above-referenced project. The project site lies outside the Airport Land Use Commission (ALUC) project referral boundary for San Jose International Airport. Therefore, the ALUC has no comments.

ALUC staff appreciates the opportunity to review this project. If you have any questions or comments, please contact me at (408) 299-5785.

Sincerely,

Derek Farmer

Important Note:

- This permit application or approved permit will expire after 180 days of inactivity.
- Plans submitted with this application must be approved by the Fire Department before work can begin.
- A final inspection approving the project must be conducted before the system may be placed into service, or considered closed.
- Call the Hazardous Materials Division at least 48 hours in advance to schedule an inspection.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State license Law as contained in the business and Professions Code, Division 3, Chapter 9. If there is any change, which would materially affect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

ASSESSOR'S PARCEL NUMBER(S) *(Attach Map)*

DESCRIPTION OF THE PROPOSED MINOR CHANGE *(Approval is limited to description contained herein)*

490 sq. ft addition to conference room

DOES THE PROJECT INVOLVE HUD FEDERAL FUNDING/ASSISTANCE? ☒ NO ☐ YES

Please indicate whether HUD Funding has been awarded, is proposed, or is anticipated, for the proposed project. If yes, indicate type of funding (i.e. CDBG Grant, HOME Investment Partnership Program, Section 108 Loan Guarantee, etc.), funding amount, whether awarded (if known) or application is pending, and fiscal year of award or application request.

PLEASE NOTE: Projects involving 1) acquisition of real property involving a change of use, or 2) new construction require an Environmental Assessment (EA). Concurrent environmental review per the California Environmental Quality Act (CEQA) is also required. The obtainment of a qualified environmental consultant to provide documentation services (i.e. a combined Initial Study/ EA) is strongly required.

SIGNATURE FIELDS REQUIRED BY OWNER REQUIRED

Check One:

☐ I hereby certify that a Homeowner's Association/Architectural Review Committee does exist and have reviewed this project. Please include a copy of their letter and comments with the application.

☒ *I hereby certify that a Homeowner's Association does not exist to comment on the requested change to my property.*

Please complete the FRONT Sheet of this application and provide the following.
INCOMPLETE APPLICATION WILL NOT BE ACCEPTED.

☐ **FILING FEE:**

→ $265* - Checks are made payable to the "City of San Jose".
$608* for Major Adjustment.
$531* for each adjustment after the 1st to process simultaneously
$126* per hour for consultation regarding review of a proposal prior to filing the application.

*includes the General Plan Update fee

✓ ☐ **ASSESSOR'S PARCEL MAP** marked with the project location.

✓ ☐ **PHOTOGRAPHS** of existing building or subject area.

✓ ☐ **FOUR (4) COPIES** of the development plans that include:

a. A **SITE PLAN* DRAWN TO SCALE** showing the location of the proposed changes on the subject property, and
b. A **DRAWING TO SCALE** of the proposed change (elevations, floor plans, construction, details, as appropriate).

*A **Site Plan** should contain the following basic information:

- Dimensions of subject property, lot lines, and existing and proposed driveways.
- Streets adjoining the subject property.
- Existing and proposed buildings and structures, including proposed building removal.
- Dimensions of existing and proposed setbacks.
- Existing and proposed off-street parking, loading, landscape and circulation areas.
- Existing trees to be removed. Include circumference of tree at 2 feet above ground level as well as distances from existing and proposed structures and/or trees on the site.

N/A ☐ A **LETTER** from the **Homeowner's Association/Architectural Review Committee** commenting specifically on the plans it reviewed, if appicable.

HUD FEDERAL FUNDING AND ENVIRONMENTAL COMPLIANCE WITH THE NATIONAL ENVIRONMENTAL POLICY ACT (NEPA). Compliance with the national environmental policy act (nepa) is required for all projects involving property acquisition, new construction for any project that has been awarded, proposes to include, or anticipates the use of federal funding from the department of Housing and Urban Development (HUD), for any portion of the project. Additional review, reports, and/or referrals may be necessary. additional fees will be required for projects funded by hud programs other than the cdbg program. please contact the plan implementation division environmental review team principal or senior planner for more information at 408.277.4576.

PLEASE CALL THE APPOINTMENT DESK AT (408) 535-3555 FOR AN APPLICATION APPOINTMENT.

STOCKDRAFTING FORM NO. 101-93

HANDICAPPED NOTES:

A. HARDWARE: SCHLAGE LEVER ALL DOORS SHALL HAVE 18" MIN. CLR. ON THE STRIKER SIDE FOR THE HANDICAPPED

B. EXIT DOORS SHALL BE OPENABLE FROM THE INSIDE WITHOUT THE USE OF KEY OR ANY OTHER SPECIAL KNOWLEDGE OR EFFORT

C. THRESHOLD SHALL HAVE A MAX. HEIGHT OF 1/2" FROM FIN. FLOOR HANDICAPPED SIGN SHALL BE POSTED AT ALL EXTERIOR DOORS

D. EFFORT TO OPERATE DOORS SHALL NOT EXCEED 8-1/2 LBS FOR EXTERIOR DOORS AND 5 LBS FOR INTERIOR DOORS, SUCH PULL OR PUSH EFFORT BEING APPLIED AT RIGHT ANGLES TO HINGED DOORS AND AT THE CENTER PLANE OF THE SLIDING OR FOLDING DOOR

E. BOTTOM 10" OF ALL DOORS EXCEPT AUTOMATIC AND SLIDING SHALL HAVE A SMOOTH UNINTERRUPTED SURFACE

F. RESTROOM FLOOR SHALL HAVE SMOOTH, HARD, NONABSORBENT SURFACE WHICH EXTENDS 4'-0" UPWARD UNTO WALLS (MATERIAL: "MARLITE")

G. ACCESSORIES SUCH AS GRAB BARS PAPER DISPENSERS, ETC., SHALL BE INSTALLED AND SEALED TO PROTECT STRUCTURAL ELEMENTS FROM MOISTURE

H. WATER CLOSETS HEIGHT SHALL BE A MIN. OF 17" & MAX. OF 19" FROM TOP OF TOILET SEAT. CONTROLS SHALL BE OPERABLE WITH ONE HAND, AND SHALL NOT REQUIRE TIGHT GRASPING, PINCHING, OR TWISTING OF THE WRIST. THE FORCE REQUIRED TO ACTIVATE CONTROLS SHALL BE NO GREATER THAN 5 LBS PER FOOT

I. LAVATORY: CLEAR SPACE OF 30"x48" SHALL BE PROVIDED FOR KNEE SPACE ACCORDING TO SECTION 522(c)

J. MIRROR: SHALL BE MOUNTED WITH BOTTOM EDGE NO HIGHER THAN 40" FROM FIN. FLOOR

K. TOWEL, SANITARY NAPKINS, WASTE RECEPTACLES & OTHER SIMILAR FIXTURES SHALL BE LOCATED WITH ALL OPERABLE PARTS WITHIN 40" FROM FIN. FLOOR

L. TOILET TISSUE DISPENSERS SHALL BE LOCATED ON THE WALL WITHIN 12" OF THE FRONT EDGE OF THE TOILET SEAT

M. ALL DOORS TO ACCESSIBLE TOILET COMPARTMENT SHALL PROVIDE A CLEAR OPENING WITH OF AT LEAST 32" WHEN LOCATED AT THE END OF THE COMPARTMENT PER SECTION 511.1 (a) 7.

N. THE WIDTH OF LEVEL AREA ON THE SIDE TO WHICH THE DOOR SWINGS SHALL EXTEND 24" PAST THE STRIKER EDGE OF THE DOOR FOR EXTERIOR DOORS PER SECTION 3304 (i.1) 2.C.

O. HOT WATER AND DRAIN PIPES UNDER ACCESSIBLE LAVATORIES SHALL BE INSULATED PER SECTION P1504 (b)

☐ **Water Closets:**
- Seat Height: 17" - 19".
- Flush Controls: Max. 5 lb., lever or push type, located on clear side.
- Control Height: Max. 44" above floor.

☐ **Urinals:** Min. 1 required.
- Clear Space: Min. 30" X 48" for front approach.
- Fixture Extension: Min. 14" from wall.
- Height: Max. 17" above floor.
- Faucet Controls: Max. 5 lb., lever or push type, or electronic controlled.

☐ **Toilet Tissue Dispensers:**
- Height: Min. 19" above floor.
- Location: On wall max. 12" from front of toilet seat.
- Type: continuous paper flow.

☐ **Mirrors:** Min. 1 with bottom edge max. 40" above floor.

☐ **Towel, Sanitary Napkin & Waste Receptacles:**
- Min. one each type.
- Operable Parts Heights: Max. 40" above floor.

☐ **Lockers:** 1% and min. one shall be accessible and on a 36" path of travel.

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Department of Planning, Building and Code Enforcement
JOSEPH HORWEDEL, ACTING DIRECTOR

DEVELOPMENT PERMIT ADJUSTMENT

PROJECT FILE NO.: AD06-1263

PERMIT TO BE ADJUSTED: H79-092

PROJECT DESCRIPTION: Permit Adjustment to allow: (1) the addition of a new ADA handicap ramp by the front building elevation; and (2) parking lot striping to add 21 new parking spaces to 17 existing parking spaces. New total of 38 parking spaces to meet current parking requirements. This Permit Adjustment modifies previously approved AD06-672 for a 490 square foot office addition.

PROJECT LOCATION: 120 GRANITE ROCK WY

A.P.N.(S): 462-17-020

ZONING: IP Industrial Park

GENERAL PLAN: CIC

ACTION: Approved

SUBJECT TO THE FOLLOWING CONDITIONS: This permit to allow: (1) the addition of a new ADA handicap ramp by the front building elevation; and (2) parking lot striping to add 21 new parking spaces, only.

Approved by: Sylvia Do **Signature:** Sylvia Do

Action Date: November 01, 2006

This permit sheet is only valid when accompanied by an original signature and when fastened to a stamped plan set, if applicable.

☐ RESIDENTIAL ☐ COMMERCIAL ☒ INDUSTRIAL

TO BE COMPLETED BY THE APPLICANT *(PLEASE PRINT OR TYPE)*

PROPERTY LOCATION/ ADDRESS 120 GRANITE ROCK WAY

ASSESSOR'S PARCEL NUMBER(S) *(Attach Map)* 462-17-020

DESCRIPTION OF THE PROPOSED MINOR CHANGE *(Approval is limited to description contained herein)*
ADDITION OF NEW HANDICAP RAMP & PARKING

DOES THE PROJECT INVOLVE HUD FEDERAL FUNDING/ASSISTANCE? ☒ NO ☐ YES
Please indicate whether HUD Funding has been awarded, is proposed, or is anticipated, for the proposed project.
If **yes**, indicate type of funding (i.e. CDBG Grant, HOME Investment Partnership Program, Section 108 Loan Guarantee, etc.), funding amount, whether awarded (if known) or application is pending, and fiscal year of award or application request.

PLEASE NOTE: Projects involving 1) acquisition of real property involving a change of use, or 2) new construction require an Environmental Assessment (EA). Concurrent environmental review per the California Environmental Quality Act (CEQA) is also required. The obtainment of a qualified environmental consultant to provide documentation services (i.e. a combined Initial Study/ EA) is strongly required.

SIGNATURE OF PROPERTY OWNER REQUIRED

Check One:

☐ I hereby certify that a Homeowner's Association/Architectural Review Committee does exist and have reviewed this project. Please include a copy of their letter and comments with the application.

☒ *I hereby certify that a Homeowner's Association does not exist to comment on the requested change to my property.*

Please complete the FRONT Sheet of this application and provide the following.
INCOMPLETE APPLICATION WILL NOT BE ACCEPTED.

FILING FEE:
→ $272* - Checks are made payable to the "City of San Jose".
$648* for Major Adjustment.
$545* for each adjustment after the 1st to process simultaneously
$135* per hour for consultation regarding review of a proposal prior to filing the application.

*includes the General Plan Update fee

☐ **ASSESSOR'S PARCEL MAP** marked with the project location.

☐ **PHOTOGRAPHS** of existing building or subject area. SEE AD06-672

☐ **FOUR (4) COPIES** of the development plans that include:

a. A **SITE PLAN* DRAWN TO SCALE** showing the location of the proposed changes on the subject property, and
b. A **DRAWING TO SCALE** of the proposed change (elevations, floor plans, construction, details, as appropriate).

*A **Site Plan** should contain the following basic information:
- Dimensions of subject property, lot lines, and existing and proposed driveways.
- Streets adjoining the subject property.
- Existing and proposed buildings and structures, including proposed building removal.
- Dimensions of existing and proposed setbacks.
- Existing and proposed off-street parking, loading, landscape and circulation areas.
- Existing trees to be removed. Include circumference of tree at 2 feet above ground level as well as distances from existing and proposed structures and/or trees on the site.

☐ A **LETTER** from the **Homeowner's Association/Architectural Review Committee** commenting specifically on the plans it reviewed, if applicable.

HUD FEDERAL FUNDING AND ENVIRONMENTAL COMPLIANCE WITH THE NATIONAL ENVIRONMENTAL POLICY ACT (NEPA). Compliance with the national environmental policy act (nepa) is required for all projects involving property acquisition, new construction for any project that has been awarded, proposes to include, or anticipates the use of federal funding from the department of Housing and Urban Development (HUD), for any portion of the project. Additional review, reports, and/or referrals may be necessary. additional fees will be required for projects funded by hud programs other than the cdbg program. please contact the plan implementation division environmental review team principal or senior planner for more information at 408.535-7801.

PLEASE CALL THE APPOINTMENT DESK AT (408) 535-3555 FOR AN APPLICATION APPOINTMENT.

DATAWORK CORP. 700 RD. CLAIRMONT ST. SAN MATEO, CA. 94403
STOCKDRAFTING FORM NO. 101-93

GENERAL NOTES

1. ALL NEW CONSTRUCTION SHALL CONFORM TO CURRENT CITY, STATE AND NATIONAL CODES, STANDARDS AND REQUIREMENTS.
2. THE CONTRACTOR, SHALL VERIFY ALL EXISTING SITE CONDITIONS IN THE FIELD BEFORE COMMENCEMENT OF THE WORK AND SHALL REPORT ANY DISCREPANCIES AND/OR INCONSISTENCIES BETWEEN THE DRAWINGS, SPECIFICATIONS AND EXISTING FIELD CONDITIONS TO THE OWNERS REPRESENTATIVE FOR CLARIFICATIONS BEFORE COMMENCEMENT OF THE WORK.
3. THE CONTRACTOR PRIOR TO BIDDING, SHALL VISIT THE JOB SITE TO BECOME ACQUAINTED WITH THE EXISTING INSTALLATION AND SYSTEMS RELATED TO HIS WORK AND SHALL INCLUDE IN THE BID PROPOSAL ALL LABOR AND MATERIALS REQUIRED FOR THE INSTALLATION TO BE COMPLETE AND OPERATIVE.
4. THE CONTRACTOR SHALL CONSULT THE ELECTRICAL, STRUCTURAL AND OTHER DRAWINGS RELATED TO THIS PROJECT FOR ADDITIONAL WORK TO BE PROVIDED.
5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SECURING ALL TRADE LICENSES, ALL PERMITS AND INSPECTIONS.
6. THE CONTRACTOR SHALL PROVIDE ALL MATERIALS LABOR AND EQUIPMENT TO COMPLETE WORK AS SET FORTH IN THESE PLANS AND SPECIFICATIONS. UNLESS OTHERWISE NOTED, THE SUBMISSION OF A BID OR PROPOSAL, SHALL BE CONSIDERED AS CONCLUSIVE EVIDENCE THAT THE CONTRACTOR IS THOROUGHLY FAMILIAR WITH THE INTENT OF THE CONTRACT DOCUMENTS.
7. DRAWINGS ARE DIAGRAMMATIC IN NATURE AND EXISTING CONDITIONS SHALL BE FIELD VERIFIED FOR EXACT LOCATIONS AND SIZES OF EXISTING SYSTEMS AND NEW ROUTINGS.
8. DEMOLITION WORK SHALL BE PROVIDED AS REQUIRED TO ACCOMPLISH NEW WORK CALLED AND AS NOTED. WORK SHALL BE PERFORMED CAREFULLY TO AVOID DAMAGE TO EQUIPMENT OR SYSTEMS NOT BEING REMOVED.
9. ALL PIPING SHALL CONFORM WITH THE CALIFORNIA MECHANICAL CODE AND THE CALIFORNIA PLUMBING CODE.
10. PIPES SHALL BE SUPPORTED AND BRACED PER THE SMACNA "GUIDELINES FOR SEISMIC RESTRAINTS OF MECHANICAL SYSTEMS AND PLUMBING SYSTEM" OR R-0003 THE SUPERSTRUT "SEISMIC RESTRAINT SYSTEM" OR OTHER PRE-APPROVED SYSTEM.
11. MECHANICAL CONTRACTOR SHALL PROVIDE ADDITIONAL STRUCTURAL MEMBERS AS REQUIRED TO SUPPORT PIPING WHERE STRUCTURAL FRAME DOES NOT ALLOW FOR SUPPORT.
12. ANY UTILITY SHUTDOWNS SHALL BE COORDINATED WITH THE OWNER. A SHUTDOWN SCHEDULE SHALL BE PRESENTED TO THE OWNER FOR APPROVAL PER SPECIFICATIONS PRIOR TO COMMENCEMENT OF WORK. SHUTDOWN WORK SHALL BE PERFORMED ON OVERTIME HOURS IF SO DIRECTED BY THE OWNER.
13. CONTRACTOR SHALL ASSUME SOLE RESPONSIBILITY FOR SAFETY OF ALL PERSONS ON OR ABOUT THE CONSTRUCTION SITE, IN ACCORDANCE WITH APPLICABLE LAWS AND CODES. GUARD ALL HAZARDS IN ACCORDANCE WITH THE SAFETY PROVISIONS OF THE LATEST MANUAL OF ACCIDENT PREVENTION PUBLISHED BY THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA.
14. CLEAN ALL EXPOSED SURFACES AND NEW EQUIPMENT AFTER COMPLETION.
15. PROVIDE LABELS ON ALL EQUIPMENT AND DEVICES. LABELS SHALL BE SECURED WITH MACHINE SCREWS W/LAMINATED PLASTIC, WHITE LETTERS ON BLACK BACKGROUND.
16. THE CONTRACTOR SHALL MAINTAIN AT THE JOB SITE. AN UP TO DATE "AS-BUILT" DRAWING SET. THE "AS-BUILT" DRAWING SET SHALL REFLECT ALL APPROVED CHANGES TO THE DESIGN DRAWINGS. THE "AS-BUILT" DRAWING SET SHALL BE KEPT CLEAN AND IN GOOD CONDITION AND SHALL BE TURNED OVER TO THE OWNER AT THE COMPLETION OF THE PROJECT.
17. UPON COMPLETION OF THE WORK, THE CONTRACTOR SHALL SCHEDULE AND PERFORM A COMPLETE FUNCTIONAL TEST TO DEMONSTRATE TO THE OWNER THAT THE NEW INSTALLATION IS OPERATING AS INTENDED. ANY DEFECTS OR DEFICIENCIES IN THE MATERIALS OR WORK SHALL BE CORRECTED IMMEDIATELY BY AND AT THE CONTRACTORS EXPENSE. CONTRACTOR SHALL FURNISH ALL TEST PUMPS, GAUGES AND EQUIPMENT.
18. THE CONTRACTOR SHALL GUARANTEE THAT ALL WORK DONE UNDER THIS SPECIFICATION WILL BE FREE FROM FAULTY MATERIALS OR WORKMANSHIP AND HEREBY AGREES TO REPAIR OR REPLACE WITHOUT COST TO THE AND OWNER AND TO HIS SATISFACTION ALL DEFECTS OR IMPERFECTIONS APPEARING IN SAID WORK WITHIN A PERIOD OF ONE YEAR AFTER THE DATE OF FINAL ACCEPTANCE BY THE OWNER. SEE SPECIFICATIONS FOR OTHER REQUIREMENTS.
19. IN THE AREA OF CONSTRUCTION THERE WILL BE FOUND A NUMBER OF EXISTING SERVICES. PROTECT ALL ACTIVE SERVICES, MAINTAIN SAME IN GOOD OPERATING CONDITION.
20. THE OWNER RETAINS FIRST SALVAGE RIGHTS TO ALL EXISTING EQUIPMENT REMOVED UNDER THIS CONTRACT. THE CONTRACTOR SHALL CONSULT WITH THE OWNER FOR DISPOSITION OF THE EXISTING EQUIPMENT TO BE REMOVED BY HIM. THE CONTRACTOR SHALL INCLUDE THE DISPOSAL OF EXISTING EQUIPMENT UNDER THIS CONTRACT.
21. ALL MECHANICAL AND ELECTRICAL EQUIPMENT SHALL BE CERTIFIED AND LISTED BY UL OR OTHER NATIONALLY ACCREDITED AGENCIES. ANY EQUIPMENT NOT LISTED SHALL BE FIELD TESTED AND CERTIFIED BY AN APPROVED TESTING AGENCY. CONTRACTOR SHALL NOTIFY THE BUILDING DEPARTMENT AND ARRANGE FIELD TEST AND CERTIFICATION OF UNLISTED EQUIPMENT PRIOR TO REQUESTING FINAL INSPECTION BY THE BUILDING INSPECTOR.
22. ALL COMBUSTIBLE MATERIALS SHALL NOT EXCEED A FLAME SPREAD RATING OF 25 AND A SMOKE DEVELOPED RATING OF 50.
23. EXISTING CONDITIONS REPRESENTED ON THESE DRAWINGS HAVE BEEN TAKEN FROM PREVIOUS PROJECT DRAWINGS. FIELD VERIFY ALL EXISTING CONDITIONS. THIS OFFICE MAKES NO ASSURANCES AS TO THE ACCURACY OF EXISTING CONDITIONS REPRESENTED ON THESE DRAWINGS.
24. GENERAL CONTRACTOR TO PERFORM ALL CUTTING, PAINTING, FRAMING, LEVELING, CURB INSTALLATION AND WATERPROOFING FOR MECHANICAL SYSTEMS INSTALLATION.

P2.1	PIPING FLOOR PLAN

PROJECT DESCRIPTION

1. PROVIDE NEW COLD WATER AND PROPANE GAS PIPING AS REQUIRED TO MEET THE NEW REQUIREMENTS OF THE FLOOR PLAN.
2. PROVIDE NEW PLUMBING FIXTURES AS REQUIRED TO MEET THE NEW REQUIREMENTS OF THE FLOOR PLAN.
3. THE NEW WATER RECLAIM SYSTEM RECIRCULATES ALL WASTE WATER. REMAINING SEDIMENT IS HAULED AWAY BY AN APPROVED DISPOSAL COMPANY. THEREFORE THERE IS NO WASTE OR SEWER PIPING TO THE PUBLIC SEWER SYSTEM.
4. THE COLD WATER IS USED TO MAKE-UP WATER TO THE WATER RECLAIM SYSTEM TO REPLACE WATER LOST THRU EVAPORATION. A REDUCED PRESSURE BACKFLOW PREVENTER WILL BE USED TO PROTECT THE PUBLIC WATER SUPPLY. SUPPLY WATER PRESSURE REQUIRED AT WATER RECLAIM SYSTEM IS 45 PSIG.
5. THE PROPANE GAS WILL BE SUPPLIED BY A 500 GALLON STORGE TANK LEASED BY THE OWNER. THE GAS WILL BE USED TO FUEL A HOT WATER HEATER/PRESSURE WASHER. GAS INPUT CONSUMPTION IS 330 CFH @ 6"-14" W.C.

MANDATORY MEASURES

SERVICE WATER HEATING SYSTEMS

☒ THE FOLLOWING SERVICE WATER HEATING SYSTEMS AND EQUIPMENT MAY BE INSTALLED ONLY IF THE MANUFACTURER HAS CERTIFIED THAT THE EQUIPMENT MEETS OR EXCEEDS ALL APPLICABLE EFFICIENCY REQUIREMENTS LISTED IN THE APPLIANCE EFFICIENCY REGULATIONS, OR APPENDIX B, TABLE B-9.

☐ UNFIRED SERVICE WATER HEATER STORAGE TANKS AND BACKUP TANKS FOR SOLAR WATER HEATING SYSTEMS SHALL HAVE EITHER:

- ☐ EXTERNAL ISOLATION WITH AN INSTALLED R-VALUE OF AT LEAST R-12; INTERNAL AND EXTERNAL INSULATION WITH A COMBINED R-VALUE OF AT LEAST R-16; OR
- ☐ SUFFICIENT INSULATION SO THAT THE HEAT LOSS OF THE TANK SURFACE BASED ON AN 80°F WATER AIR TEMPERATURE DIFFERENCE SHALL BE LESS THAN 6.5 BTU/HR/SF.

☒ IF A CIRCULATING HOT WATER SYSTEM IS INSTALLED, IT SHALL HAVE A CONTROL CAPABLE OF AUTOMATICALLY TURNING OFF THE CIRCULATING PUMP(S) WHEN HOT WATER IS NOT REQUIRED.

LAVATORIES IN RESTROOMS OF PUBLIC FACILITIES SHALL BE EQUIPPED WITH EITHER:

- ☐ OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 0.5 GALLONS PER MINUTE.
- ☐ FOOT ACTUATED CONTROLS VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 0.75 GALLONS PER MINUTE.
- ☐ PROXIMITY SENSOR ACTUATED CONTROL VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 0.75 GALLONS PER MINUTE.
- ☐ SELF-CLOSING VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 2.5 GALLONS PER MINUTE AND 0.25 GALLONS/CYCLE (CIRCULATING SYSTEM).
- ☐ SELF-CLOSING VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 2.5 GALLONS PER MINUTE AND 0.50 GALLONS/CYCLE (NON-CIRCULATING SYSTEM).
- ☐ SELF-CLOSING VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 2.5 GALLONS PER MINUTE AND 0.75 GALLONS/CYCLE (FOOT SWITCHES AND PROXIMITY SENSOR CONTROLS).

☐ LAVATORIES IN RESTROOMS OF PUBLIC FACILITIES SHALL BE EQUIPPED WITH CONTROLS TO LIMIT THE OUTLET TEMPERATURE TO 110°F.

APPROVED FOR COMPLIANCE WITH HAZ MAT REQUIREMENTS.

1 OF 3 SHEETS

15010 GENERAL PLUMBING REQUIREMENTS

1. ELECTRICAL DEVICES SHALL BEAR A 'UL' OR 'ETL' LISTING.
2. PROVIDE PRIME COAT ON ALL UNFINISHED DEVICES AND MATERIALS IN EXPOSED AREAS.
3. PERFORM THE FOLLOWING TESTS:
   A. WATER: FILL WITH WATER TO 150 PSIG. RETAIN FOR 4 HOURS. REPAIR LEAKING JOINTS AND RETEST AS REQUIRED UNTIL SYSTEM IS PROVEN TIGHT.
   B. PROPANE GAS: PRESSURIZE WITH AIR TO 100 PSIG AND HOLD TIGHT FOR TWENTY-FOUR HOURS WITH NO DROP IN PRESSURE; TEST JOINTS AND EQUIPMENT FOR EVIDENCE OF LEAKS AFTER SATISFACTORY PRESSURE TEST.
4. STERILIZE THE DOMESTIC WATER SYSTEM IN ACCORDANCE WITH THE REQUIREMENTS OF THE AMERICAN WATER WORKS ASSOCIATION AND THE STATE OF CALIFORNIA HEALTH AND SAFETY CODE.
5. PIPING SYSTEMS SHALL BE IDENTIFIED WITH MARKERS AND FLOW ARROWS IN COMPLIANCE WITH OSHA 1910.261-264
6. PROVIDE (6) COPIES OF OPERATION AND SERVICE MANUALS FOR ALL MECHANICAL AND PLUMBING EQUIPMENT.

15400 PIPING SPECIFICATIONS

1. WATER PIPING SHALL BE TYPE "L" DRAWN COPPER MADE UP WITH WROUGHT OR FORGED COPPER FITTINGS AND 95-5 TIN-ANTIMONY SOLDER WITH NON-CORROSIVE FLUX. CW PIPING BELOW SLAB SHALL BE TYPE "K".
2. ALL VALVES SHALL HAVE SCREWED THREADS AND INSTALLED WITH SWEAT TO SCREWED ADAPTERS.
3. INSTALL UNIONS DOWNSTREAM OF VALVES.
4. VALVES FOR SHUT-OFF SERVICE SHALL BE GATE OR FULL-PORT BALL TYPE.
5. HANGERS AND SUPPORTS SHALL BE AS MANUFACTURED BY SUPERSTRUT OR UNISTRUT. USE 3/8" HANGER ROD FOR INDIVIDUAL PIPES UP TO 2" AND ½" FOR PIPES UP TO 4". SUPPORTS SHALL BE 6' O.C. FOR PIPES 1" AND UNDER AND 8' O.C. FOR PIPES 2" AND OVER.
6. USE EPCO DIELECTRIC COUPLINGS FOR CONNECTIONS BETWEEN DISSIMILAR METALS.
7. PROPANE GAS PIPING SHAL BE STANDARD WEIGHT SCHEDULE 40 STEEL PIPE CONFORMING TO THE FOLLOWING SPECIFICATIONS:
   A. ABOVE GROUND PIPE EXPOSED TO WEATHER SHALL BE ASTM A-120, T&C GALVANIZED PIPE MADE UP WITH BANDED MALLEABLE IRON FITTINGS.
   B. CONCEALED OR EXPOSED WITHIN BUILDING: ASTM A-120, T&C BLACK PIPE MADE UP WITH BANDED BLACK MALLEABLE IRON FITTINGS. PIPING LARGER THAN 3" SHALL BE WELDED FITTINGS.
8. ALL SCREWED UNIONS IN GAS PIPE SHALL BE 150 POUND RATED GROUND JOINT TYPE.
9. ALL VALVES FOR PROPANE GAS SHALL BE WALWORTH. VALVES MANUFACTURED BY CRANE, STOCKHAM, AND NIBCO, MEETING THE REQUIREMENTS OF THIS SPECIFICATION ARE ACCEPTABLE. ALL VALVES SHALL BE LISTED FOR PROPANE GAS SERVICE.

PIPE SCHEDULE

SYSTEM	DESCRIPTION	PIPE MATERIAL	JOINING METHOD	SIZES
—CW/ICW—	COLD WATER/INDUSTRIAL COLD WATER	COPPER, TYPE 'L'	95/5 SILVER BRITE	ALL
-PG-	PROPANE GAS	GALVANIZED STEEL, SCHEDULE 40	THREADED/WELDED	THREADED UP TO 3", WELDED OVER 3"

PIPING PARTIAL FLOOR PLAN

SCALE: 1/8"=1'-0"

NOTES (◇ INDICATES KEYED):

1. INSTALL ALL PIPING ABOVE GRADE.
2. ◇2 CONNECT 3/4 ICW TO WATER RECLAIM SYSTEM MAKEUP FLOAT VALVE. VERIFY LOCATION IN FIELD. PROVIDE (N) SHUT-OFF VALVE.
3. ◇3 CONNECT (N) 1½" PG TO LEASED PROPANE TANK. VERIFY LOCATION IN FIELD. PROVIDE SHUT-OFF GAS COCK.
4. ◇4 CONNECT (N) 1½" PG TO (N) HW HEATER/PRESSURE WASHER. VERIFY LOCATION IN FIELD. PROVIDE SHUT-OFF GAS COCK. REQUIRED PRESSURE IS 6-14" W.C.

WATER PIPE SIZING

1. TOTAL EQUIVALENT LENGTH: 400 L.F. x 1.4 (FITTINGS)= 560 L.F..
2. WATER PRESSURE AT METER 64.0 PSIG
   LESS: WATER METER (7.0) PSIG
   LESS: RP BACKFLOW PREVENTER (10.0) PSIG
   AVAILABLE PRESSURE: 47.0 PSIG
3. FIXTURES:
   (2) WATER CLOSETS, TANK TYPE 5.0 FU
   (2) LAVATORIES 2.0 FU
   (1) ¾" FILL CONNECTION TO WATER RECLAIM TANK 2.5 FU
   TOTAL: 9.5 FU
4. PER 2001 CPC, TABLE 6.5, USE 46 TO 60 PSI, 600 FT COLUMN; 3/4"ø METER REQUIRED, 1" SUPPLY LINE.

GAS LOAD SIZING

GAS APPLIANCE	QTY.	BTUH INPUT RATINGS	TOTAL BTUH LOAD
1. HW HEATER/ PRESSURE WASHER	1	330,000	330,000
TOTAL BTUH REQUIREMENTS:			330,000
TOTAL BTUH/2500 (BTU PER CU.FT.):			132 CFH
EQUIVALENT LENGTH OF PIPE FROM METER TO MOST REMOTE OUTLET:			125 FT
SIZE OF GAS PIPE PER CPC-2001, TABLE 12-7 FOR LOW PRESSURE. USE 125 FT: COLUMN.		1" USE	REQUIRED 1 1/2"

QUALITY CONTROL

SPECIAL INSPECTIONS

1. Special inspection per CBC Section 108.3.5 & 1701 is required on the following:

a. Masonry	
i. Where F'm is greater than 1500 psi	NR
ii. Reinforcement placement in masonry with special inspection	NR
b. Concrete	
i. Where F'c is greater than 2500 psi, except for slab on grade	NR
ii. Reinforcement placement in concrete with special inspection	NR
iii. Anchor bolts in tension (where noted on drawings)	NR
c. Welding	
i. Ductile moment resisting steel frames per CBC Section 2211.7.	NR
ii. All structural welding except welding performed in an approved fabricator's shop.	NR
d. All high strength bolting in "slip-critical" connections. See plans and steel notes for location of "slip-critical" connections.	NR
e. Special diaphragm nailing where noted on drawings.	NR
f. Drilled or Epoxy concrete and masonry anchors	●

● REQUIRED — NR NOT REQUIRE

2. The special inspector shall be under the supervision of a registered professional engineer.
   a. The special inspector shall observe the work assigned for conformance with the approved design drawings and specifications.
   b. The special inspector shall furnish inspection reports to the Building Official, Engineer or Architect of Record and other designated persons. All discrepancies shall be brought to the immediate attention of the contractor for correction, then, if not corrected, to the proper design authority and to the Building Official.
   c. The Special Inspector shall submit a final signed report, signed by a registered professional engineer, stating whether the work requiring special inspection was in conformance with the approved plans and specifications and the applicable workmanship provisions of the CBC.
   d. An application for off-site fabrication must be submitted to the field inspection division for approval prior to fabrication.
   e. Certificate of compliance for off site fabrication must be completed and submitted to the field inspection division prior to the erection of prefabricated components.
3. The contractor shall contact the Planning and Building Inspection Department to schedule Special Inspection meeting prior to construction.

STRUCTURAL NOTES

I. GENERAL

1. All construction, workmanship and materials shall conform with the requirements of the 2001 Edition C.B.C., and any other governing code.
2. The contractor shall verify all dimensions, elevations and site conditions and shall become completely familiar with the construction documents prior to starting construction.
3. The Architect and Engineer shall be notified of any omissions or discrepancies in the working drawing and/or specifications before proceeding with any work so involved.
4. All dimensions take precedence over scale shown on plans, sections and details.
5. Specific notes and details take precedence over structural notes and typical details.
6. Where specific details are not provided, construction can follow details for similar conditions, unless conflicts occur.
7. The contractor shall be responsible for the design, installation and maintenance of all bracing and shoring required during construction until all construction is finalized.
8. Job site safety is the sole responsibility of the contractor.
9. See architectural drawings for the size and location of all door and window openings, location of non-bearing partitions, roof an floor elevations, roof slopes, architectural finishes, and other related information not indicated on the structural drawings.
10. See mechanical, electrical and/or architectural drawing for the size and location of pipes, conduits, floor drains, vents, ducts, and other similar penetrations not indicated on the structural drawings.

II. FOUNDATIONS

1. All foundation and related site work shall comply with the requirements of Chapter 18 of the C.B.C.
2. Foundation have been designed for a maximum soil pressure of 1500 PSF in accordance with provisions of Table No. 18-1-A of the California Building Code, for Soil Class 4. If actual site conditions differ from those above, the site shall be prepared according to the recommendations of a competent Geotechnical Engineer registered in the State of California.
3. Footing and utility trench backfill within the building area shall be clean sand, mechanically compacted in thin layers to a minimum of 95% of relative density.

III. CONCRETE

Reinforcing Steel

1. Reinforcing bars shall conform to ASTM A615 for deformed bars Grade 40 for #4 bars and smaller, and Grade 60 for #5 bars and larger.
2. All bars shall be clean of rust, grease or other materials likely to impair bond.
3. All reinforcing bar bends shall be made cold and conform to the ACI Manual of Standard Practice.
4. Reinforcing bars shall be wired together at splices as follows:

REINFORCING CONCRETE

REINFORCEMENT DEVELOPMENT LENGTHS: (LENGTH IN INCHES) f'_c = 2500 PSI w/ 28 DAYS

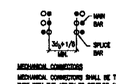
BAR SIZE	#3 GR40	#4	#5	#6	#7	#8	#9	#10	#11
TOP	16	32	39	47	69	78	88	100	110
OTHER	12	24	30	36	53	60	68	77	85

REINFORCEMENT LAP SPLICES: (LENGTH IN INCHES) f'_c = 2500 PSI w/ 28 DAYS

BAR SIZE	#3	#4	#5	#6	#7	#8	#9	#10	#11
* TOP BARS	21	42	51	62	90	102	115	130	143
OTHER BARS	16	32	39	47	69	78	89	101	111

TOP REINFORCING IS HORIZONTAL REINFORCEMENT THAT HAS MORE THAN TWELVE INCHES OF CONCRETE PLACED BELOW IT.

USE WELDED SPLICE OR MECHANICAL CONNECTOR IF THE LAP SPLICE REINFORCEMENT DOES NOT HAVE A MINIMUM SPACING $3d_b + 1/8$ INCHES AND A MINIMUM COVER OF $+d_b + 1/8$ INCHES



WELDED SPLICE (DIRECT BUTT SPLICES-FULL PENETRATION)
#8 AND SMALLER SINGLE-BEVEL GROOVE WELD
#9 AND LARGER DOUBLE-BEVEL GROOVE WELD
WELDS SHALL HAVE THE ABILITY TO DEVELOP 125 PERCENT OF THE YIELD STRENGTH FOR THE SPLICED REINFORCEMENT (70 KSI)

MECHANICAL CONNECTORS
MECHANICAL CONNECTORS SHALL BE TENSION-COMPRESSION TYPE WITH THE ABILITY TO DEVELOP 125 PERCENT OF THE YIELD STRENGTH FOR THE SPLICED REINFORCEMENT (70KSI). ALSO, MECHANICAL CONNECTORS SHALL HAVE AND BE INSTALLED PER AN EVALUATION REPORT FROM ICBO EVALUATION SERVICE, INC.

III. CONCRETE (CONT.)

5. Unless otherwise noted, minimum concrete coverage for reinforcing bars shall be as follows:

Concrete in contact with earth, unformed	3"
Concrete in contact with earth, formed	2"
Walls (interior face)	1"
Slab on grade	1-1/2"

Cast-in-Place Concrete

1. All concrete used for this work shall comply with A.C.I. "Specifications for Structural Concrete" (A.C.I. 301-96). The material used to prepare the concrete shall meet the following standards:

Water	Clean, Potable
Portland cement	ASTM C150
Coarse aggregate	3/4" rock ASTM C33
Fine aggregate clean sand	ASTM C33-77

2. All concrete used for this work shall be proportioned to meet the following 28 day ultimate compressive strength requirements:

~~Concrete Walls (12" Thick)~~	~~150 PCF. f' c = 4000 PSI~~
~~Raised Floor Deck Slab (8-1/2")~~	~~150 PCF. f' c = 4000 PSI~~
Footings	150 PCF. f' c = 2500 PSI
~~Grade beams and piers~~	~~150 PCF. f' c = 2500 PSI~~
Slab on grade	150 PCF. f' c = 2500 PSI

3. Add mixtures shall not be used unless specifically authorized by the Engineer.
4. A mix design including proposed admixtures and supporting test data for strength and shrinkage shall be submitted for review and approval prior to concrete placement.
5. All reinforcing bars, anchor bolts, hold-downs and other embeds shall be well secured in place prior to concrete placement.
6. All reinforcement and other embeds shall be inspected and approved prior to concrete placement.
7. Concrete shall be placed as a continuous operation without any interruptions longer than 45 minutes.
8. The slump at time of placement shall be the minimum consistent with placing conditions but shall not exceed 4"
9. Mechanical vibrators or other "approved" methods for thorough consolidation shall be used. For slab on grade, approved grid tampers may be used.

CERTIFICATE OF PERMIT

NOTICE OF GRANTING OF A PERMIT
PURSUANT TO THE PROVISIONS OF
TITLE 20 OF THE SAN JOSÉ MUNICIPAL CODE

NOTICE IS HEREBY GIVEN that a permit (**File No. H06-081**), covering all of that certain property hereinafter described is granted to **Granite Rock Co.** by the Director of Planning of the City of San José on **February 07, 2007**, and becomes effective on the date recorded as shown above. This permit contained conditions, restrictions, and use limitations, which are subject to enforcement by the City. The subject property is **located east side of Granite Rock Way from approximately 220 feet east of Hilltop Avenue to the terminus of Granite Rock Way, San José, California.** That said real property is more particularly described in the attached legal description.

Said permit is on file in the office of the Department of Planning, Building and Code Enforcement of the City of San José and is available for inspection at said office by any person interested herein.

City of San José
JOSEPH HORWEDEL, Director
Planning, Building and Code Enforcement

Michael C. Enderby, Acting Deputy

State of California
County of Santa Clara

On February 21, 2007, before me, Olga Guzman, Notary Public, personally appeared Michael C. Enderby, personally known to me to be the person whose name is subscribed to the within instrument and acknowledged to me that he executed the same in his authorized capacity, and that by his signature on the instrument the person, or the entity upon behalf of which the person acted, executed the instrument.

WITNESS my hand and official seal.

Olga Guzman, Notary Public

OLGA GUZMAN
Commission # 1621864
Notary Public - California
Santa Clara County
My Comm. Expires Nov 14, 2009

LEGAL DESCRIPTION

Real property in the City of San Jose, County of Santa Clara, State of California, described as follows:

PARCEL ONE:

Parcel B, as shown on that certain Parcel Map filed for record November 19, 1979 in Book 454 of Maps, at pages 27 and 28, Santa Clara County Records.

PARCEL TWO:

That portion of Granite Rock Way, described as "Parcel B" in Resolution No. 52622, entitled "RESOLUTION OF THE COUNCIL OF THE CITY OF SAN JOSE VACATING THOSE PORTIONS OF GRANITE ROCK WAY IN THE CITY OF SAN JOSE" a certified copy of which was recorded March 27, 1980 as Book F230, page 582 of Official Records, and more particularly described as follows:

Commencing at the point of intersection of the Westerly line of Granite Rock Way with the Southerly line of lot 2 as shown upon that Certain Parcel Map filed for record on October 16, 1978, in Book 428, page 21, Records of Santa Clara County, California; thence along the Easterly prolongation of said Southerly line of Parcel 2 South 64° 07' 04" East 60.00 feet to the True Point of Beginning in the Easterly line of said Granite Rock Way; thence along said Easterly line along a curve to the right, a line radial to said curve at this point bears South 64° 07' 04" East, with a radius of 30.00 feet, through a central angle of 33° 33' 26; for an arc distance of 17.57 feet to a point of reverse curvation; thence along said reverse curve to the left, with a radius of 42.00 feet, through a central angle of 77° 58' 23", for a distance of 57.16 feet to a point of cusp in a line that is parallel with and distant 30.00 feet, measured at right angles, Easterly from the Northerly extension of the center line of said Granite Rock Way; thence leaving said point of cusp along said parallel line South 25° 52' 56" East 69.19 feet to the True Point of Beginning.

Pat Rooney
Granite Rock Co.
120 Granite Rock Way
San Jose, CA 95136

Dear Pat Rooney:

RE: **Site Development Permit,** File No. **H06-081**, located east side of Granite Rock Way from approximately 220 feet east of Hilltop Avenue to the terminus of Grante Rock Way

The enclosed is your copy of the Planning Director's action on this **Site Development Permit**.

This permit may contain one or more conditions, such as revised plans, which must be met within a specific deadline. If conditions are not met the permit will automatically expire. Please read your permit carefully!

The Planning Director's action taken on this permit or any of the conditions of this permit may be appealed by the applicant to the Planning Commission by filing a Notice of Appeal and a $1,925.00 fee. The appeal must be submitted in person and presented on the Notice of Appeal form available from this department on or before **5:00 p.m., February 20, 2006.** If you have any questions, please feel free to contact your Project Manager, Reena Mathew, at (408) 535-7800 or by e-mail at reena.mathew@sanjoseca.gov.

Sincerely,

Deputy

Cc; Pat Rooney, Granite Rock Co., 120 Granite Rock Way, San Jose, CA 95136

Enclosure

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Department of Planning, Building and Code Enforcement
JOSEPH HORWEDEL, DIRECTOR

SITE DEVELOPMENT PERMIT

FILE NO.	H06-081
LOCATION OF PROPERTY	East side of Granite Rock Way from approximately 220 feet east of Hilltop Avenue to the terminus of Granite Rock Way
ZONING DISTRICT	IP Industrial Park
GENERAL PLAN DESIGNATION	Combined Industrial Commercial
PROPOSED USE	Site Development Permit to construct 2,400 square foot truck wash facility on a 5.51 gross acres site
ENVIRONMENTAL STATUS	Exempt
APPLICANT **ADDRESS**	Pat Rooney 120 Granite Rock Way San Jose, CA 95136

FACTS

The Director of Planning finds that the following are the relevant facts regarding this proposed project:

1. This Site Development Permit is to construct a 2,400 square foot truck wash facility at an existing industrial rock-crushing facility.

2. The subject property is located in the IP Industrial Park Zoning District.

3. Under the provisions of Section 15301(a) of CEQA, this project is exempt from the environmental review requirements of Title 21 of the San José Municipal Code, implementing the California Environmental Quality Act of 1970, as amended, in that the proposal involves the construction of a truck wash facility, which is ancillary to the existing industrial uses on the site.

4. Under the provisions of 20.150.050 B of the Zoning Ordinance, any legal nonconforming use, may be enlarged or altered if the building or structure that conforms to the development standards of the district, and does not significantly increase traffic, on-street parking, or

noise. This determination should be made as part of the consideration of any Site Development Permit. Although, rock crushing and truck washing are not permitted within the IP Zoning District, the truck wash facility meets all the setback requirements of the IP Zoning District. There shall be no significant increases in traffic, on-site parking, or noise, as a result of the development of a truck washing facility.

5. No rinse water from the truck washing facility shall enter into any storm drain inlet. The storm drain system flows to the Bay, so the washing facility recycles and reuses and/or connects to the sanitary sewer system.

FINDINGS

The Director of Planning, Building, and Code Enforcement concludes and finds, based on the analysis of the above facts, that:

1. The interrelationship between the orientation, location and elevations of the existing and proposed buildings and structures and other uses on-site are mutually compatible and aesthetically harmonious in that:

   a. The truck washing facility is compatible with the buildings and structures that compose of the existing industrial rock crushing operation on site.

   b. Sufficient open space separates all structures and uses.

2. The orientation, location and elevation of the proposed building is compatible with and aesthetically harmonious with adjacent development or the character of the neighborhood in that:

   a. The proposed truck washing facility is to be located within an existing site used for heavy industrial purposes.

   b. The proposed truck washing facility shall not be visible from off-site, due to its extensive setback from Monterey Road and the existence of Eucalyptus trees which screen the facility from view from the adjacent movie theater/drive-in property.

3. The environmental impacts of the project, including but not limited to noise, vibration, dust, drainage, erosion, storm water runoff, and odor which, even if insignificant for the purposes of CEQA, will not have an unacceptable negative affect on adjacent property or properties because the proposed truck washing facility will not create an increased demand for traffic, parking, or substantial noise on the site. In addition, all the water used for the washing facility shall be treated and recycled. None of the rinse water will be discharged into the storm drain.

4. Landscaping, irrigation systems, walls and fences, features to conceal outdoor activities, exterior heating, ventilating, plumbing, utility, and trash facilities are sufficient to maintain or upgrade the appearance of the neighborhood because the proposed truck washing facility shall be hidden behind existing eucalyptus trees, shielding its visibility from off-site.

5. Traffic access, pedestrian access, and parking are adequate because the subject site is already developed and the truck washing operation is ancillary to the main function of the existing rock crushing facility. No increased demand of traffic is anticipated to be generated.

6. This site has a designation of Combined Industrial Commercial on the adopted San Jose 2020 General Plan Land Use/Transportation Diagram. In accordance with Zoning Ordinance criteria, any legal nonconforming uses can be altered if the structures meet the development standards of the existing Zoning District and it can be determined that no substantial traffic, on-site parking, or noise would be generated due to the alteration. The proposed truck wash facility meets the development standards of the IP Zoning District. No additional traffic, demand for on-parking, or noise is anticipated because the truck washing facility is intended to be available to trucks already utilizing the site.

APPROVED SUBJECT TO THE FOLLOWING CONDITIONS:

1. **Sewage Treatment Demand.** Chapter 15.12 of Title 15 of the San José Municipal Code requires that all land development approvals and applications for such approvals in the City of San José shall provide notice to the applicant for, or recipient of, such approval that no vested right to a Building Permit shall accrue as the result of the granting of such approval when and if the City Manager makes a determination that the cumulative sewage treatment demand of the San José-Santa Clara Water Pollution Control Plant to treat such sewage adequately and within the discharge standards imposed on the City by the State of California Regional Water Control Board for the San Francisco Bay Region. Substantive conditions designed to decrease sanitary sewage associated with any land use approval may be imposed by the approval authority.

2. **Acceptance of Permit.** Per Section 20.100.290(B), should the applicant fail to file a timely and valid appeal of this Permit within the applicable appeal period, such inaction by the applicant shall be deemed to constitute all of the following on behalf of the applicant:

   a. Acceptance of the Permit by the applicant; and

   b. Agreement by the applicant to be bound by, to comply with, and to do all things required of or by the applicant pursuant to all of the terms, provisions, and conditions of this permit or other approval and the provisions of Title 20 applicable to such Permit.

3. **Permit Expiration.** This Site Development Permit shall automatically expire two years from and after the date of approval by the Director of Planning, or by the Planning Commission on appeal, granting this Permit, if within such two-year period, the proposed use of this site has not commenced, pursuant to and in accordance with the provisions of this Site Development Permit. The Director of Planning may approve a Permit Adjustment/Amendment to extend the validity of this Permit in accordance with Title 20. The Permit Adjustment/Amendment must be approved prior to the expiration of this Permit.

4. **Building Permit.** Obtainment of a Building Permit is evidence of acceptance of all conditions specified in this document and the applicant's intent to fully comply with said conditions.

5. **Storm Drain Protection.** No hazardous materials, paint, rinse water, or construction sediments or debris shall be allowed to enter the public right-of-way or any storm drain inlet. The storm drain systems flows to the Bay.

6. **Conformance with Plans.** Construction and development shall conform to approved Site Development Permit plans entitled, "Granite Rock Wash Rock Facility" dated June 13, 2006, on file with the Department of City Planning and Building and to the San José Building Code (San José Municipal Code, Title 17, Chapter 17.04).

7. **Revocation.** This Site Development Permit is subject to revocation for violation of any of its provisions or conditions.

8. **Conformance with Municipal Code.** No part of this approval shall be construed to permit a violation of any part of the San José Municipal Code.

9. **Street Cleaning and Dust Control.** During construction, the developer shall sweep and wash down the public streets each working day. In any on-site area visible to the public from the public right-of-way, the site shall be clean of debris, rubbish and trash at least once a week. The developer shall implement effective dust control measures to prevent dust and other airborne matter from leaving the construction site.

10. **Construction Hours.** Construction shall be limited to the hours of 7:00 a.m. to 7:00 p.m. Monday through Friday for any on-site or off-site work within 500 feet of any residential unit.

11. **Fire Department Comments.** The applicant shall comply with all Fire Department comments at the Plan Review stage, including: Fire Apparatus Access and Fire Flow requirements are not impacted by the scope of work. A new 500 gal. Propane tank is shown on the drawings submitted. The applicant should contact the Hazardous Materials Division at (408) 535-7750 as soon as possible to initiate the process if applicable.

12. **Building Clearance for Issuing Permits.** Prior to the issuance of a Building Permit, the following requirements must be met to the satisfaction of the Chief Building Official:

    a. *Construction Plans.* This Permit File Number, H06-081, shall be printed on all construction plans submitted to the Building Division.

    b. *Construction Conformance.* A project construction conformance review by the Planning Division is required. Planning Division review for project conformance will begin with the initial plan check submittal to the Building Division. Prior to final inspection approval by the Building Department, Developer shall obtain a written confirmation from the Planning Division that the project, as constructed, conforms with all applicable requirements of the subject Permit, including the plan sets. To prevent delays in the issuance of Building Permits, please notify Planning Division staff at least one week prior to the final Building Division inspection date.

13. **Trees.** No removal of any tree is authorized with this permit. No tree larger than 56 inches in circumference, at a height of 24 inches above the natural grade, shall be removed without a Tree Removal Permit issued by the Director of Planning.

14. **Archaeology.** Pursuant to Section 7050.5 of the Health and Safety Code, and Section 5097.94 of the Public Resources Code of the State of California in the event of the discovery of human remains during construction, there shall be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains. The Santa Clara County Coroner shall be notified and shall make a determination as to whether the remains are Native American. If the Coroner determines that the remains are not subject to his authority, he shall notify the Native American Heritage Commission who shall attempt to identify descendants of the deceased Native American. If no satisfactory agreement can be reached as to the disposition of the remains pursuant to this State law, then the land owner shall re-inter the human remains and items associated with Native American burials on the property in a location not subject to further subsurface disturbance.

15. **Nuisance**. As required by Title 20 of the San José Municipal Code, construction on this site shall be conducted in a manner, which does not create a public or private nuisance. The applicant must abate any such nuisance immediately upon notice by the City.

16. **Recycled Water**. This facility shall utilize a privately maintained water recycling system for all truck washing activities.

17. **Permits from Other Agencies.** The applicant shall secure all necessary permits as applicable from outside agencies including but not limited to the Santa Clara Valley Water District and the Regional Water Quality Control Board.

APPROVED and issued this 7th day of February, 2007.

Joseph Horwedel, Director
Planning, Building and Code Enforcement

QUALITY CONTROL

SPECIAL INSPECTIONS

1. Special inspection per CBC Section 108.3.5 & 1701 is required on the following:

a. Masonry	
i. Where F'm is greater than 1500 psi	NR
ii. Reinforcement placement in masonry with special inspection	NR
b. Concrete	
i. Where F'c is greater than 2500 psi, except for slab on grade	NR
ii. Reinforcement placement in concrete with special inspection	NR
iii. Anchor bolts in tension (where noted on drawings)	NR
c. Welding	
i. Ductile moment resisting steel frames per CBC Section 2211.7.	NR
ii. All structural welding except welding performed in an approved fabricator's shop.	NR
d. All high strength bolting in "slip-critical" connections. See plans and steel notes for location of "slip-critical" connections.	NR
e. Special diaphragm nailing where noted on drawings.	NR
f. Drilled or Epoxy concrete and masonry anchors	●

● REQUIRED NR NOT REQUIRE

2. The special inspector shall be under the supervision of a registered professional engineer.
   a. The special inspector shall observe the work assigned for conformance with the approved design drawings and specifications.
   b. The special inspector shall furnish inspection reports to the Building Official, Engineer or Architect of Record and other designated persons. All discrepancies shall be brought to the immediate attention of the contractor for correction, then, if not corrected, to the proper design authority and to the Building Official.
   c. The Special Inspector shall submit a final signed report, signed by a registered professional engineer, stating whether the work requiring special inspection was in conformance with the approved plans and specifications and the applicable workmanship provisions of the CBC.
   d. An application for off-site fabrication must be submitted to the field inspection division for approval prior to fabrication.
   e. Certificate of compliance for off site fabrication must be completed and submitted to the field inspection division prior to the erection of prefabricated components.
3. The contractor shall contact the Planning and Building Inspection Department to schedule Special Inspection meeting prior to construction.

STRUCTURAL NOTES

I. GENERAL

1. All construction, workmanship and materials shall conform with the requirements of the 2001 Edition C.B.C., and any other governing code.
2. The contractor shall verify all dimensions, elevations and site conditions and shall become completely familiar with the construction documents prior to starting construction.
3. The Architect and Engineer shall be notified of any omissions or discrepancies in the working drawing and/or specifications before proceeding with any work so involved.
4. All dimensions take precedence over scale shown on plans, sections and details.
5. Specific notes and details take precedence over structural notes and typical details.
6. Where specific details are not provided, construction can follow details for similar conditions, unless conflicts occur.
7. The contractor shall be responsible for the design, installation and maintenance of all bracing and shoring required during construction until all construction is finalized.
8. Job site safety is the sole responsibility of the contractor.
9. See architectural drawings for the size and location of all door and window openings, location of non-bearing partitions, roof an floor elevations, roof slopes, architectural finishes, and other related information not indicated on the structural drawings.
10. See mechanical, electrical and/or architectural drawing for the size and location of pipes, conduits, floor drains, vents, ducts, and other similar penetrations not indicated on the structural drawings.

II. FOUNDATIONS

1. All foundation and related site work shall comply with the requirements of Chapter 18 of the C.B.C.
2. Foundation have been designed for a maximum soil pressure of 1500 PSF in accordance with provisions of Table No. 18-1-A of the California Building Code, for Soil Class 4. If actual site conditions differ from those above,the site shall be prepared according to the recommendations of a competent Geotechnical Engineer registered in the State of California.
3. Footing and utility trench backfill within the building area shall be clean sand, mechanically compacted in thin layers to a minimum of 95% of relative density.

III. CONCRETE

Reinforcing Steel

1. Reinforcing bars shall conform to ASTM A615 for deformed bars Grade 40 for #4 bars and smaller, and Grade 60 for #5 bars and larger.
2. All bars shall be clean of rust, grease or other materials likely to impair bond.
3. All reinforcing bar bends shall be made cold and conform to the ACI Manual of Standard Practice.
4. Reinforcing bars shall be wired together at splices as follows:

REINFORCING CONCRETE

REINFORCEMENT DEVELOPMENT LENGTHS: (f_c = 2500 PSI at 28 DAYS)

BAR SIZE	#3 GRADE	#4	#5	#6	#7	#8	#9	#10	#11
TOP	16	32	39	47	69	78	88	100	110
OTHER	12	24	30	38	53	60	68	77	85

REINFORCEMENT LAP SPLICES: (f_c = 2500 PSI at 28 DAYS)

BAR SIZE	#3	#4	#5	#6	#7	#8	#9	#10	#11
* TOP BARS	21	42	51	82	90	102	115	130	143
OTHER BARS	16	32	39	47	89	78	89	101	111

III. CONCRETE (CONT.)

5. Unless otherwise noted, minimum concrete coverage for reinforcing bars shall be as follows:

Concrete in contact with earth, unformed	3"
Concrete in contact with earth, formed	2"
Walls (interior face)	1"
Slab on grade	1-1/2"

Cast-in-Place Concrete

1. All concrete used for this work shall comply with A.C.I. "Specifications for Structural Concrete" (A.C.I. 301-96). The material used to prepare the concrete shall meet the following standards:

Water	Clean, Potable
Portland cement	ASTM C150
Coarse aggregate	3/4" rock ASTM C33
Fine aggregate clean sand	ASTM C33-77

2. All concrete used for this work shall be proportioned to meet the following 28 day ultimate compressive strength requirements:

~~Concrete Walls (10" thick)~~	~~150 PCF, f'c = 4000 PSI~~
~~Raised Floor Beam Slab (8 1/2")~~	~~150 PCF, f'c = 4000 PSI~~
Footings	150 PCF, f'c = 2500 PSI
~~Grade beams and piers~~	~~150 PCF, f'c = 2500 PSI~~
Slab on grade	150 PCF, f'c = 2500 PSI

3. Add mixtures shall not be used unless specifically authorized by the Engineer.
4. A mix design including proposed admixtures and supporting test data for strength and shrinkage shall be submitted for review and approval prior to concrete placement.
5. All reinforcing bars, anchor bolts, hold-downs and other embeds shall be well secured in place prior to concrete placement.
6. All reinforcement and other embeds shall be inspected and approved prior to concrete placement.
7. Concrete shall be placed as a continuous operation without any interruptions longer than 45 minutes.
8. The slump at time of placement shall be the minimum consistent with placing conditions but shall not exceed 4".
9. Mechanical vibrators or other "approved" methods for thorough consolidation shall be used. For slab on grade, approved grid tampers may be used.

DOES THE PROJECT INVOLVE HUD FEDERAL FUNDING/ASSISTANCE? ☒ NO ☐ YES

PLEASE INDICATE WHETHER HUD FUNDING HAS BEEN AWARDED, IS PROPOSED, OR IS ANTICIPATED, FOR THE PROPOSED PROJECT.

If yes, indicate type of funding (i.e. CDBG Grant, HOME Investment Partnership Program, Section 108 Loan Guarantee, etc.), funding amount, whether awarded (if known) or application is pending, and fiscal year of award or application request.

PLEASE NOTE: Projects involving 1) acquisition of real property involving a change of use, or 2) new construction require an Environmental Assessment (EA). Concurrent environmental review per the California Environmental Quality Act (CEQA) is also required. The obtainment of a qualified environmental consultant to provide documentation services (i.e. a combined Initial Study/EA) is strongly recommended.

THE FOLLOWING EXHIBITS ARE ATTACHED HERETO AND MADE A PART THEREOF BY REFERENCE.

SITE DEVELOPMENT PERMIT/AMENDMENT

STORMWATER RUNOFF DATA:

a. Site size: 24,0015 sq. ft. (acres multiplied by 43,560 sq. ft.)

b. Existing impervious surface area (includes land covered by buildings, sheds, patios/covers, parking lots, streets, sidewalks, paved walkways and driveways): 87,120.06 sq. ft.

c. New Impervious surface area created, added, or replaced: 2,400 sq. ft.

d. Total proposed impervious surface area (new + existing): 89,520 sq. ft.

e. Percent increase/decrease/replacement of impervious surface area (c./d. multiplied by 100): 0 %

f. Will or have hazardous materials been used or stored on site? (Yes) or No.

g. If required, has a Hazardous Materials Management Plan been approved for the site? (Yes) or No.

PLEASE CALL THE APPOINTMENT DESK AT (408) 535-3555 FOR AN APPLICATION APPOINTMENT.

AFFIDAVIT OF OWNERSHIP

THE UNDERSIGNED HEREBY DECLARE THAT THE FOLLOWING IS TRUE AND CORRECT:

1. The undersigned are all the owners of all the property described in Exhibit A - Legal Description of Subject Property, or tenants of the entire subject site with a recorded lease and a term remaining of at least five years.

2. The development plans a part of this application show the exact location, size, and use of all easements on the subject site and all easement on surrounding properties benefiting the subject property.

3. If there are any existing active or deactivated water wells on your property, they must be shown on your plans. The property which is the subject of this application:

   _____does contain existing active or deactivated water wells and they are shown on the plans accompanying this application

   _____does not contain existing active or deactivated water wells.

4. In conformance with Section 65962.5 of the California Government Code, and as owner(s) of the property referenced below, I(we) hereby certify that I(we) have reviewed the list of Hazardous Waste and Substance Sites within the City of San Jose, as compiled by the State Office of Planning and Research.
   The property which is the subject of the above-referenced application is_____ is not_____included on said list.
   If included on the List, the listed item reads as follows:

   _____

   _____

   _____

THE UNDERSIGNED HEREBY DECLARE THAT THEY UNDERSTAND THE FOLLOWING APPLIES TO THEIR PROJECT:

5. **Notice to Applicants regarding effect of Wastewater treatment capacity on land development approvals.** Part 2.75 of Chapter 15.12 of the San Jose Municipal Codes requires that an applicant acknowledge the effect of Wastewater treatment capacity on Land development approvals at the time of application. As owner (s) of the property subject to this development application, I(we) hereby acknowledge the requirements of the Municipal Code, as stated below, and understand that these requirements will apply to the development permit for which I(we) am(are) applying.

   Pursuant to Part 2.75 of Chapter 15.12 of the San Jose Municipal Code, no vested right to a building permit shall accrue as the result of the granting of any land development approvals and applications when and if the City Manager makes a determination that the cumulative sewage treatment demand on the San Jose-Santa Clara Water Pollution Control Plant represented by approved land uses in the area served by said Plant will cause the total sewage treatment demand to meet or exceed the capacity of the San Jose-Santa Clara Water Pollution Control to treat such sewage adequately and within the discharge standards imposed on the City by the State of California Regional Water Quality Control Board for the San Francisco Bay Region. Substantive conditions designed to decrease sanitary sewage associated with any land use approval may be imposed by the approving authority.

Owner:	Granite Rock Company
Property:	120 Granite Rock Way San Jose, California

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage of said Policy or Policies are set forth in Exhibit A attached. Copies of the Policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of May 04, 2006 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Owners Extended 1992

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

Granite Rock Company, a California Corporation

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2006-2007, a lien not yet due or payable.

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. TERMS AND CONDITIONS of that certain Permit
   File No.: PD 79-4-29
   Disclosed By: Notice of Granting of a Planned Development (PD) Permit
   Recorded: July 9, 1979 as Document No. Book E623, page 670, Official Records

   Reference is hereby made to the record for particulars.

4. An easement for the right from time to time to construct, install, inspect, maintain, replace, remove, and use facilities of the type thereinafter specified, together with a right of way therefor, and also ingress thereto and egress therefrom and incidental purposes, recorded November 14, 1979 as Book E943, page 584 of Official Records.
   In Favor of: Pacific Gas and Electric Company, a California corporation
   Affects: the Easterly corner of said land

5. An easement shown or dedicated on the map filed or recorded November 19, 1979 as Book 454 at pages 27 and 28 of Maps
For: public service facilities over the Easterly corner of said land, shown on said map as "10' P.S.E." and incidental purposes.

6. An easement shown or dedicated on the map filed or recorded November 19, 1979 as Book 454 at pages 27 and 28 of Maps
For: storm drainage purposes over a Northwesterly portion of said land, shown on said map as "15' S.D.E." and incidental purposes.

7. An easement for the right from time to time to construct, install, inspect, maintain, replace, remove, and use facilities of the type thereinafter specified, together with a right of way therefor, and also ingress thereto and egress therefrom and incidental purposes, recorded March 20, 1980 as Book F233, page 717 of Official Records.
In Favor of: Pacific Gas and Electric Company, a California corporation
Affects: the Easterly corner of said land

8. An easement for the right from time to time to construct, install, inspect, maintain, replace, remove, and use facilities of the type thereinafter specified, together with a right of way therefor, and also ingress thereto and egress therefrom and incidental purposes, recorded June 13, 1985 as Book J371, page 2262 of Official Records.
In Favor of: Pacific Gas and Electric Company, a California corporation
Affects: a Southwesterly portion of said land

9. Rights of parties in possession.

10. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/ACSM survey.

INFORMATIONAL NOTES

1. Taxes for proration purposes only for the fiscal year 2005-2006 (Secured).

First Installment:	$27,758.95, PAID
Second Installment:	$27,758.95, PAID
Tax Rate Area:	17 030
APN:	462-17-020

2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

3. Basic rate applies.

4. We find no open deeds of trust. Escrow please confirm before closing.

5. The Vestee(s) herein (has/have) been run to date, but the following items must be considered by Escrow prior to closing:

   CLEAR.

6. The City of San Jose imposes a property transfer tax of $3.30 for each $1,000.00 or fractional part thereof of the total consideration.

7. Collect $10.00 (per parcel) user fee for each Grant Deed for County Monument Preservation Fund.

8. SALE of said land is subject to the County of Santa Clara Transfer Tax of $1.10 per thousand based on equity transferred.

9. Prior to the issuance of any policy of title insurance, the Company will require:

   With respect to Granite Rock Company, a corporation:
   a. A certificate of good standing of recent date issued by the Secretary of State of the corporation's state of domicile.
   b. A certified copy of a resolution of the Board of Directors authorizing the contemplated transaction and designating which corporate officers shall have the power to execute on behalf of the corporation.
   c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to

the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

NOTICE I

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

If you have any questions about the effect of this new law, please contact your local First American Office for more details.

NOTICE II

As of January 1, 1991, if the transaction which is the subject of this report will be a sale, you as a party to the transaction, may have certain tax reporting and withholding obligations pursuant to the state law referred to below:

In accordance with Sections 18662 and 18668 of the Revenue and Taxation Code, a buyer may be required to withhold an amount equal to three and one-third percent of the sales price in the case of the disposition of California real property interest by either:

1. A seller who is an individual with a last known street address outside of California or when the disbursement instructions authorize the proceeds be sent to a financial intermediary of the seller, OR
2. A corporate seller which has no permanent place of business in California.

The buyer may become subject to penalty for failure to withhold an amount equal to the greater of 10 percent of the amount required to be withheld or five hundred dollars ($500).

However, notwithstanding any other provision included in the California statutes referenced above, no buyer will be required to withhold any amount or be subject to penalty for failure to withhold if:

1. The sales price of the California real property conveyed does not exceed one hundred thousand dollars ($100,000), OR
2. The seller executes a written certificate, under the penalty of perjury, certifying that the seller is a resident of California, or if a corporation, has a permanent place of business in California, OR
3. The seller, who is an individual, executes a written certificate, under the penalty of perjury, that the California real property being conveyed is the seller's principal residence (as defined in Section 1034 of the Internal Revenue Code).

The seller is subject to penalty for knowingly filing a fraudulent certificate for the purpose of avoiding the withholding requirement.

The California statutes referenced above include provisions which authorize the Franchise Tax Board to grant reduced withholding and waivers from withholding on a case-by-case basis.

The parties to this transaction should seek an attorney's, accountant's, or other tax specialist's opinion concerning the effect of this law on this transaction and should not act on any statements made or omitted by the escrow or closing officer.

The Seller May Request a Waiver by Contacting:
Franchise Tax Board
Withhold at Source Unit
P.O. Box 651
Sacramento, CA 95812-0651
(916) 845-4900

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

1. CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990
SCHEDULE B

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notice of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by their policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

2. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970
SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions of area of the land, or the effect of any violation of any such law, ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder; (c) resulting in no loss or damage to the insured claimant; (d) attaching or

created subsequent to Date of Policy; or (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

3. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 2 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:
Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material heretofore or hereafter furnished, imposed by law and not shown by the public records.

4. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions or area of the land, or the effect of any violation of any such law ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant, (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy or acquired the insured mortgage and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder, (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy (except to the extent insurance is afforded herein as to any statutory lien for labor or material or to the extent insurance is afforded herein as to assessments for street improvements under construction or completed at Date of Policy).
4. Unenforceability of the lien of the insured mortgage because of failure of the insured at Date of Policy or of any subsequent owner of the indebtedness to comply with applicable "doing business" laws of the state in which the land is situated.

5. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970 WITH REGIONAL EXCEPTIONS

When the American Land Title Association Lenders Policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy, the exclusions set forth in paragraph 4 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:
Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

6. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy;
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material or the extent insurance is afforded herein as to assessments for street improvements under construction or completed at date of policy); or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any statutory lien for services, labor or materials (or the claim of priority of any statutory lien for services, labor or materials over the lien of the insured mortgage) arising from an improvement or work related to the land which is contracted for and commenced subsequent to Date of Policy and is not financed in whole or in part by proceeds of the indebtedness secured by the insured mortgage which at Date of Policy the insured has advanced or is obligated to advance.
7. Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (i) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
   (iii) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
   (a) to timely record the instrument of transfer; or
   (b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

7. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 6 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

8. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
(a) created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
(c) resulting in no loss or damage to the insured claimant;
(d) attaching or created subsequent to Date of Policy; or
(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
(i) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
(ii) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
(a) to timely record the instrument of transfer; or
(b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

9. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 8 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:
Part One:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

10. AMERICAN LAND TITLE ASSOCIATION RESIDENTIAL TITLE INSURANCE POLICY - 1987 EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   * land use
   * land division
   * improvements on the land
   * environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in items 12 and 13 of Covered Title Risks.

2. The right to take the land by condemning it, unless:
* a notice of exercising the right appears in the public records on the Policy Date
* the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking.

3. Title Risks:
* that are created, allowed, or agreed to by you
* that are known to you, but not to us, on the Policy Date - unless they appeared in the public records
* that result in no loss to you
* that first affect your title after the Policy Date - this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks

4. Failure to pay value for your title.

5. Lack of a right:
* to any land outside the area specifically described and referred to in Item 3 of Schedule A, or
* in streets, alleys, or waterways that touch your land
This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

11. EAGLE PROTECTION OWNER'S POLICY

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 1998
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 1998

Covered Risks 14 (Subdivision Law Violation). 15 (Building Permit). 16 (Zoning) and 18 (Encroachment of boundary walls or fences) are subject to Deductible Amounts and Maximum Dollar Limits of Liability

EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes ordinances, laws and regulations concerning:
   a. building
   b. zoning
   c. land use
   d. improvements on the land
   e. land division
   f. environmental protection

   This exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.
   This exclusion does not limit the coverage described in Covered Risk 14, 15, 16, 17 or 24.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at the Policy Date.
3. The right to take the Land by condemning it, unless:
   a. a notice of exercising the right appears in the Public Records at the Policy Date; or
   b. the taking happened before the Policy Date and is binding on You if You bought the Land without Knowing of the taking.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they appear in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.d, 22, 23, 24 or 25.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any Land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This exclusion does not limit the coverage described in Covered Risk 11 or 18.

12. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE WITH EAGLE PROTECTION ADDED

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the Land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the Land; (iii) a separation in ownership or a change in the dimensions or area of the Land or any parcel of which the Land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the Land has been recorded in the Public Records at Date of Policy. This exclusion does not limit the coverage provided under insuring provisions 14, 15, 16 and 24 of this policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the Public Records at Date of Policy. This exclusion does not limit the coverage provided under insuring provisions 14, 15, 16 and 24 of this policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the Public Records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without Knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
(a) created, suffered, assumed or agreed to by the Insured Claimant;
(b) not known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (this paragraph (d) does not limit the coverage provided under insuring provisions 7, 8, 16, 17, 19, 20, 21, 23, 24 and 25); or
(e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of the Insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable doing business laws of the state in which the Land is situated.
5. Invalidity or unenforceability of the lien of the Insured Mortgage, or claim thereof, which arises out of the transaction evidenced by the Insured Mortgage and is based upon:
(a) usury, except as provided under insuring provision 10 of this policy; or
(b) any consumer credit protection or truth in lending law.
6. Taxes or assessments of any taxing or assessment authority which become a lien on the Land subsequent to Date of Policy.
7. Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
(a) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
(b) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
(c) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
(i) to timely record the instrument of transfer; or
(ii) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.
8. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This exclusion does not limit the coverage provided under insuring provision 7.
9. Lack of priority of the lien of the Insured Mortgage as to each and every advance made after Date of Policy, and all interest charged thereon, over liens, encumbrances and other matters affecting title, the existence of which are Known to the Insured at:
(a) The time of the advance; or
(b) The time a modification is made to the terms of the Insured Mortgage which changes the rate of interest charged, if the rate of interest is greater as a result of the modification than **it would have** been before the modification.
This exclusion does not limit the coverage provided under insuring provision 7.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Environmental protection liens provided for by the following existing statutes, which liens will have priority over the lien of the Insured Mortgage when they arise: NONE.

13. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH EAGLE PROTECTION ADDED WITH REGIONAL EXCEPTIONS

When the American Land Title Association loan policy with EAGLE Protection Added is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 12 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:
Part One:
1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.

3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

Part Two:

1. Environmental protection liens provided for by the following existing statutes, which liens will have priority over the lien of the Insured Mortgage when they arise: NONE

Title Officer:	Mike Hickey
Phone:	(408)451-7800
Owner:	Granite Rock Company
Property:	120 Granite Rock Way San Jose, California

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage of said Policy or Policies are set forth in Exhibit A attached. Copies of the Policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of May 04, 2006 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Owners Extended 1992

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

Granite Rock Company, a California Corporation

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2006-2007, a lien not yet due or payable.

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. TERMS AND CONDITIONS of that certain Permit
File No.: PD 79-4-29
Disclosed By: Notice of Granting of a Planned Development (PD) Permit
Recorded: July 9, 1979 as Document No. Book E623, page 670, Official Records

Reference is hereby made to the record for particulars.

4. An easement for the right from time to time to construct, install, inspect, maintain, replace, remove, and use facilities of the type thereinafter specified, together with a right of way therefor, and also ingress thereto and egress therefrom and incidental purposes, recorded November 14, 1979 as Book E943, page 584 of Official Records.
In Favor of: Pacific Gas and Electric Company, a California corporation
Affects: the Easterly corner of said land

5. An easement shown or dedicated on the map filed or recorded November 19, 1979 as Book 454 at pages 27 and 28 of Maps
For: public service facilities over the Easterly corner of said land, shown on said map as "10' P.S.E." and incidental purposes.

6. An easement shown or dedicated on the map filed or recorded November 19, 1979 as Book 454 at pages 27 and 28 of Maps
For: storm drainage purposes over a Northwesterly portion of said land, shown on said map as "15' S.D.E." and incidental purposes.

7. An easement for the right from time to time to construct, install, inspect, maintain, replace, remove, and use facilities of the type thereinafter specified, together with a right of way therefor, and also ingress thereto and egress therefrom and incidental purposes, recorded March 20, 1980 as Book F233, page 717 of Official Records.
In Favor of: Pacific Gas and Electric Company, a California corporation
Affects: the Easterly corner of said land

8. An easement for the right from time to time to construct, install, inspect, maintain, replace, remove, and use facilities of the type thereinafter specified, together with a right of way therefor, and also ingress thereto and egress therefrom and incidental purposes, recorded June 13, 1985 as Book J371, page 2262 of Official Records.
In Favor of: Pacific Gas and Electric Company, a California corporation
Affects: a Southwesterly portion of said land

9. Rights of parties in possession.

10. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/ACSM survey.

NOTICE I

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

If you have any questions about the effect of this new law, please contact your local First American Office for more details.

NOTICE II

As of January 1, 1991, if the transaction which is the subject of this report will be a sale, you as a party to the transaction, may have certain tax reporting and withholding obligations pursuant to the state law referred to below:

In accordance with Sections 18662 and 18668 of the Revenue and Taxation Code, a buyer may be required to withhold an amount equal to three and one-third percent of the sales price in the case of the disposition of California real property interest by either:

1. A seller who is an individual with a last known street address outside of California or when the disbursement instructions authorize the proceeds be sent to a financial intermediary of the seller, OR
2. A corporate seller which has no permanent place of business in California.

The buyer may become subject to penalty for failure to withhold an amount equal to the greater of 10 percent of the amount required to be withheld or five hundred dollars ($500).

However, notwithstanding any other provision included in the California statutes referenced above, no buyer will be required to withhold any amount or be subject to penalty for failure to withhold if:

1. The sales price of the California real property conveyed does not exceed one hundred thousand dollars ($100,000), OR
2. The seller executes a written certificate, under the penalty of perjury, certifying that the seller is a resident of California, or if a corporation, has a permanent place of business in California, OR
3. The seller, who is an individual, executes a written certificate, under the penalty of perjury, that the California real property being conveyed is the seller's principal residence (as defined in Section 1034 of the Internal Revenue Code).

The seller is subject to penalty for knowingly filing a fraudulent certificate for the purpose of avoiding the withholding requirement.

The California statutes referenced above include provisions which authorize the Franchise Tax Board to grant reduced withholding and waivers from withholding on a case-by-case basis.

The parties to this transaction should seek an attorney's, accountant's, or other tax specialist's opinion concerning the effect of this law on this transaction and should not act on any statements made or omitted by the escrow or closing officer.

The Seller May Request a Waiver by Contacting:
Franchise Tax Board
Withhold at Source Unit

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

1. CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990
SCHEDULE B

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notice of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by their policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

2. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970
SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions of area of the land, or the effect of any violation of any such law, ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder; (c) resulting in no loss or damage to the insured claimant; (d) attaching or

created subsequent to Date of Policy; or (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

3. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 2 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:
Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material heretofore or hereafter furnished, imposed by law and not shown by the public records.

4. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE SCHEDULE OF EXCLUSIONS FROM COVERAGE

1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions or area of the land, or the effect of any violation of any such law ordinance or governmental regulation.
2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant, (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy or acquired the insured mortgage and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder, (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy (except to the extent insurance is afforded herein as to any statutory lien for labor or material or to the extent insurance is afforded herein as to assessments for street improvements under construction or completed at Date of Policy).
4. Unenforceability of the lien of the insured mortgage because of failure of the insured at Date of Policy or of any subsequent owner of the indebtedness to comply with applicable "doing business" laws of the state in which the land is situated.

5. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1970 WITH REGIONAL EXCEPTIONS

When the American Land Title Association Lenders Policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy, the exclusions set forth in paragraph 4 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage by reason of the matters shown in parts one and two following:
Part One

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

6. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy;
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy (except to the extent that this policy insures the priority of the lien of the insured mortgage over any statutory lien for services, labor or material or the extent insurance is afforded herein as to assessments for street improvements under construction or completed at date of policy); or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable "doing business" laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any statutory lien for services, labor or materials (or the claim of priority of any statutory lien for services, labor or materials over the lien of the insured mortgage) arising from an improvement or work related to the land which is contracted for and commenced subsequent to Date of Policy and is not financed in whole or in part by proceeds of the indebtedness secured by the insured mortgage which at Date of Policy the insured has advanced or is obligated to advance.
7. Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (i) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
   (iii) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
   (a) to timely record the instrument of transfer; or
   (b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

7. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 6 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

8. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims, or other matters:
   (a) created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.
4. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
   (I) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or
   (ii) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:
   (a) to timely record the instrument of transfer; or
   (b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

9. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 8 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:
Part One:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

10. AMERICAN LAND TITLE ASSOCIATION RESIDENTIAL TITLE INSURANCE POLICY - 1987 EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   * land use
   * land division
   * improvements on the land
   * environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in items 12 and 13 of Covered Title Risks.

2. The right to take the land by condemning it, unless:
* a notice of exercising the right appears in the public records on the Policy Date
* the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking.

3. Title Risks:
* that are created, allowed, or agreed to by you
* that are known to you, but not to us, on the Policy Date - unless they appeared in the public records
* that result in no loss to you
* that first affect your title after the Policy Date - this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks

4. Failure to pay value for your title.

5. Lack of a right:
* to any land outside the area specifically described and referred to in Item 3 of Schedule A, or
* in streets, alleys, or waterways that touch your land
This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

11. EAGLE PROTECTION OWNER'S POLICY

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 1998
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE - 1998

Covered Risks 14 (Subdivision Law Violation). 15 (Building Permit). 16 (Zoning) and 18 (Encroachment of boundary walls or fences) are subject to Deductible Amounts and Maximum Dollar Limits of Liability

EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes ordinances, laws and regulations concerning:
   a. building
   b. zoning
   c. land use
   d. improvements on the land
   e. land division
   f. environmental protection
   This exclusion does not apply to violations or the enforcement of these matters if notice of the violation or enforcement appears in the Public Records at the Policy Date.
   This exclusion does not limit the coverage described in Covered Risk 14, 15, 16, 17 or 24.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not apply to violations of building codes if notice of the violation appears in the Public Records at the Policy Date.
3. The right to take the Land by condemning it, unless:
   a. a notice of exercising the right appears in the Public Records at the Policy Date; or
   b. the taking happened before the Policy Date and is binding on You if You bought the Land without Knowing of the taking.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they appear in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they appear in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.d, 22, 23, 24 or 25.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any Land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This exclusion does not limit the coverage described in Covered Risk 11 or 18.

12. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH A.L.T.A. ENDORSEMENT FORM 1 COVERAGE WITH EAGLE PROTECTION ADDED

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the Land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the Land; (iii) a separation in ownership or a change in the dimensions or area of the Land or any parcel of which the Land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the Land has been recorded in the Public Records at Date of Policy. This exclusion does not limit the coverage provided under insuring provisions 14, 15, 16 and 24 of this policy.
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the Public Records at Date of Policy. This exclusion does not limit the coverage provided under insuring provisions 14, 15, 16 and 24 of this policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the Public Records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without Knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
(a) created, suffered, assumed or agreed to by the Insured Claimant;
(b) not known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (this paragraph (d) does not limit the coverage provided under insuring provisions 7, 8, 16, 17, 19, 20, 21, 23, 24 and 25); or
(e) resulting in loss or damage which would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of the Insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable doing business laws of the state in which the Land is situated.
5. Invalidity or unenforceability of the lien of the Insured Mortgage, or claim thereof, which arises out of the transaction evidenced by the Insured Mortgage and is based upon:
(a) usury, except as provided under insuring provision 10 of this policy; or
(b) any consumer credit protection or truth in lending law.
6. Taxes or assessments of any taxing or assessment authority which become a lien on the Land subsequent to Date of Policy.
7. Any claim, which arises out of the transaction creating the interest of the mortgagee insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:
(a) the transaction creating the interest of the insured mortgagee being deemed a fraudulent conveyance or fraudulent transfer; or
(b) the subordination of the interest of the insured mortgagee as a result of the application of the doctrine of equitable subordination; or
(c) the transaction creating the interest of the insured mortgagee being deemed a preferential transfer except where the preferential transfer results from the failure:
(i) to timely record the instrument of transfer; or
(ii) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.
8. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This exclusion does not limit the coverage provided under insuring provision 7.
9. Lack of priority of the lien of the Insured Mortgage as to each and every advance made after Date of Policy, and all interest charged thereon, over liens, encumbrances and other matters affecting title, the existence of which are Known to the Insured at:
(a) The time of the advance; or
(b) The time a modification is made to the terms of the Insured Mortgage which changes the rate of interest charged, if the rate of interest is greater as a result of the modification than **it would have** been before the modification.
This exclusion does not limit the coverage provided under insuring provision 7.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Environmental protection liens provided for by the following existing statutes, which liens will have priority over the lien of the Insured Mortgage when they arise: NONE.

13. AMERICAN LAND TITLE ASSOCIATION LOAN POLICY - 1992 WITH EAGLE PROTECTION ADDED WITH REGIONAL EXCEPTIONS

When the American Land Title Association loan policy with EAGLE Protection Added is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 12 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:
Part One:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.

3. Easements, claims of easement or encumbrances which are not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
5. Unpatented mining claims; reservations or exceptions in patents or in acts authorizing the issuance thereof; water rights, claims or title to water.
6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

Part Two:

1. Environmental protection liens provided for by the following existing statutes, which liens will have priority over the lien of the Insured Mortgage when they arise: NONE

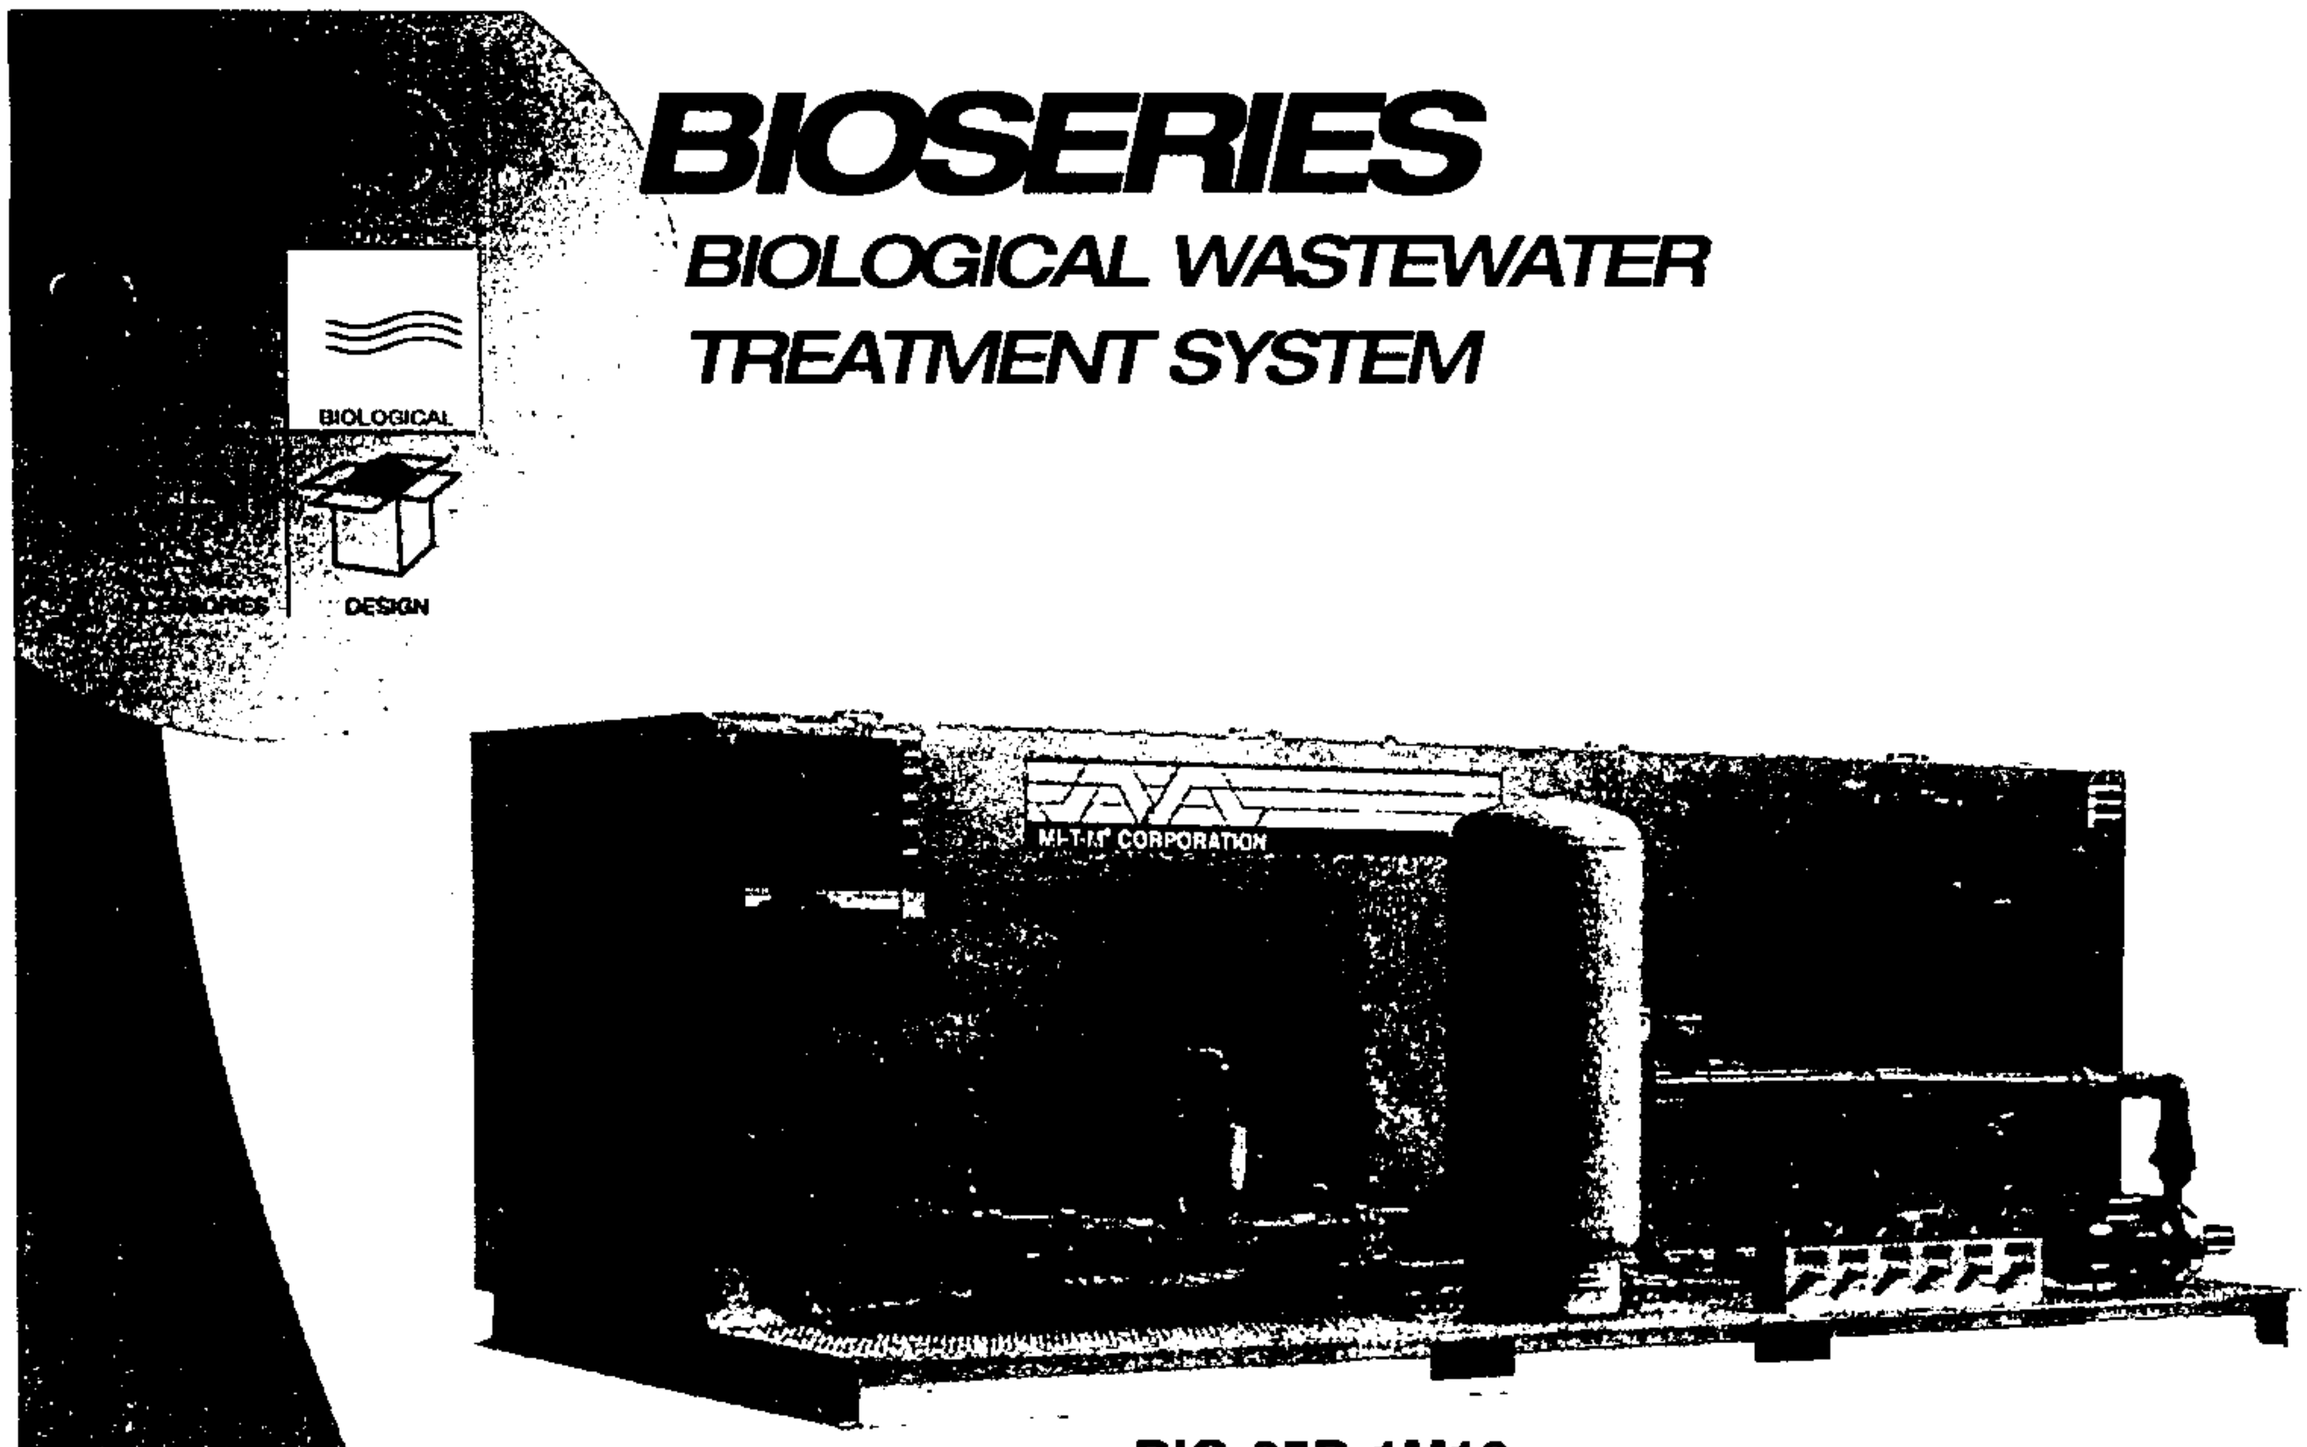
BIOLOGICAL WASTEWATER TREATMENT SYSTEM



BIO-25R-1M10

Mi-T-M Corporation offers the latest in biological wastewater treatment systems for some of the toughest wastewater applications on the market today. The biological treatment turns organic contaminants (oil, grease, phenolics and pesticides) into carbon dioxide and water. This system is available for either [illegible] or [illegible] operations, and offers a user:

- [illegible] maintenance than any recycle system on the market today.
- [illegible] extremely low operating cost.
- [illegible] simple equipment operation.

HANDLES TOUGH ORGANIC APPLICATIONS

Golf Courses-Designed to handle equipment wash-water for 18 or 36 hole golf courses.

Solid Waste-Haulers-Able to effectively treat vehicle wash-water.

Food Processing Facilities-Effective treatment of a broad range of food processing waste water.

Petro Chemical-Capable of treating heavy emulsified waste streams.

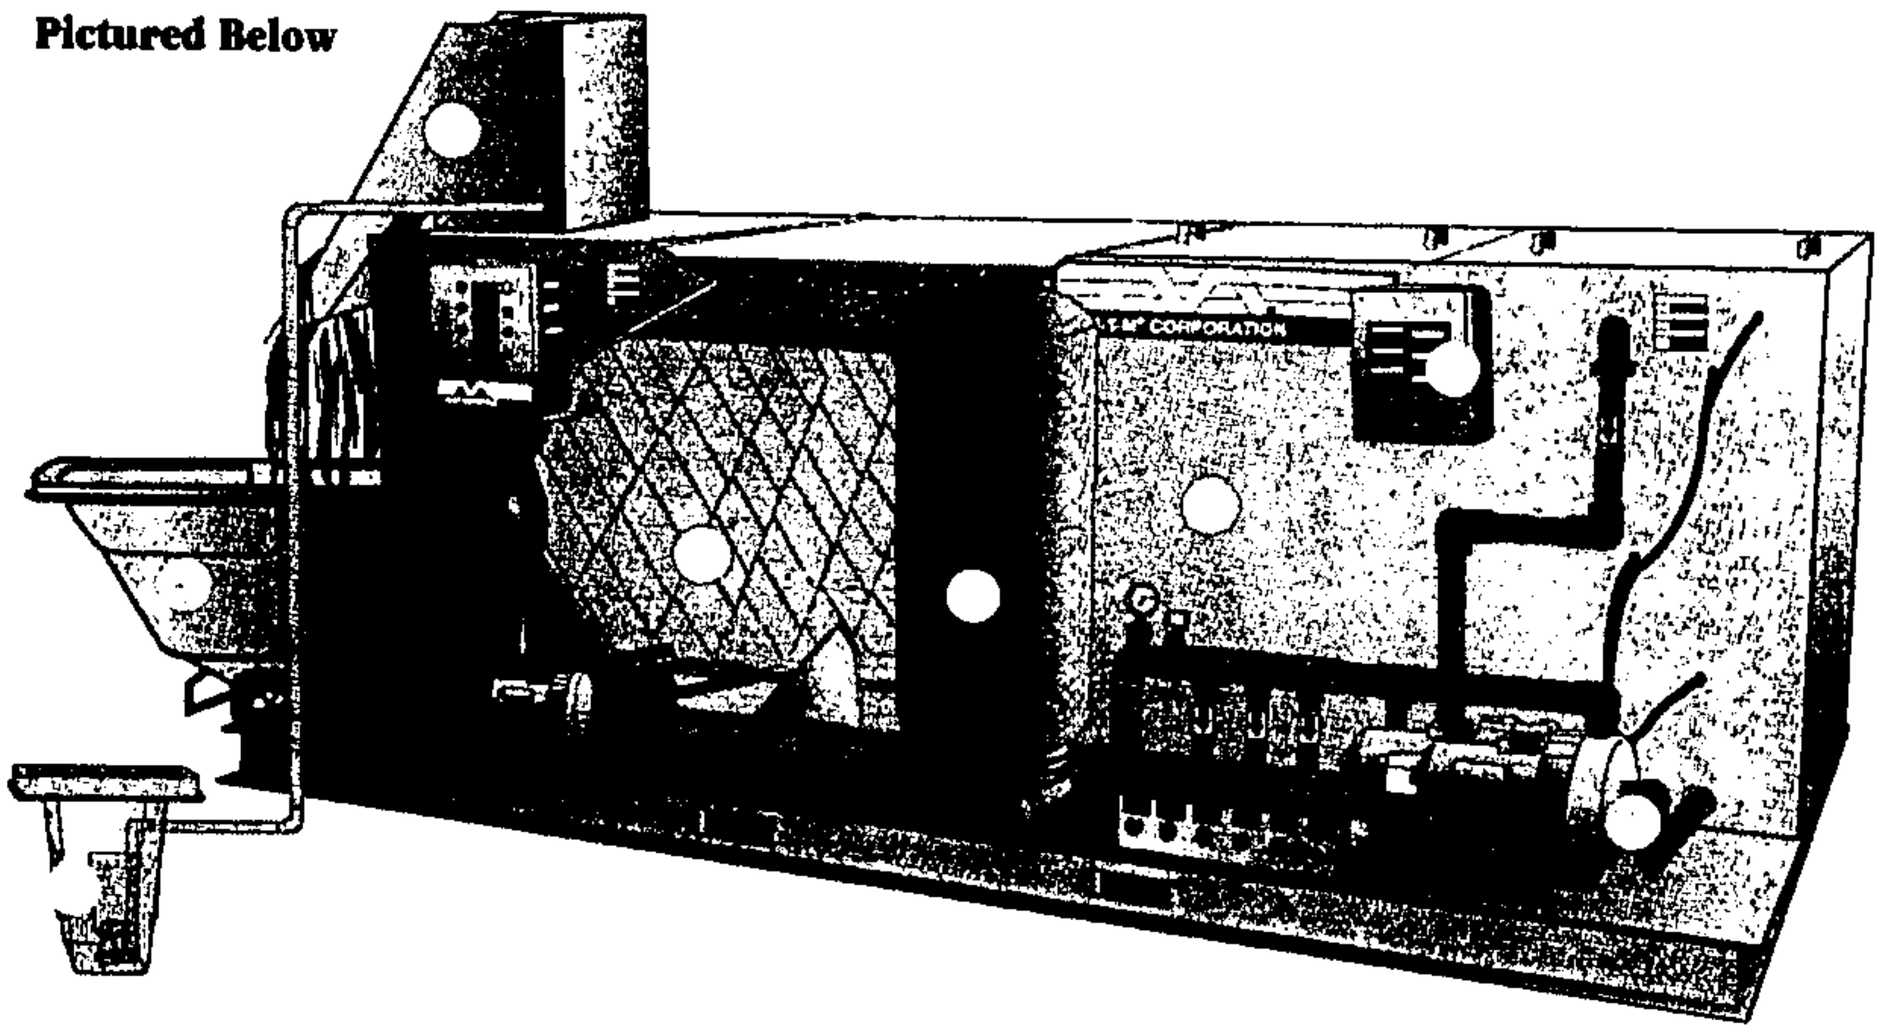
21-0153	Wall mount bracket for waterfall filter
55-0068	2" Air fine bubble injector

Website: www.mitm.com

Model#

Pictured Below



Submersible Sump Pump:
Untreated water is introduced into the bio system via a 1/2 H.P. submersible sump pump.

Waterfall Filter (Optional):
For golf course applications, water is typically pumped to a stainless steel waterfall filter (part# RC-0008-0001) for very effective grass and particle separation. Water flows onto the system while grass and debris are separated and dropped into the grass cart.

Grass Cart (Optional):
Grass from the waterfall filter is collected in the grass cart (part# RC-0004-0001). Grass is de-watered through a specially designed stainless steel screen in the grass cart that allows the cart to be filled with grass and debris without plugging up the screen. Water drains back to the pit, and the grass can be easily transported for disposal.

Bioreaction Tank:
Untreated wastewater is pumped into the first chamber of the stainless steel tank, where solids are precipitated and the microbes begin their work. The tank has up to 2,244 gallons of holding capacity to provide maximum treatment time from the biological microbes.

Biological Media:
The bioreaction portion of the system houses literally thousands of square feet of biological media, where the microbe growth is maximized. Water flows through the media and around a series of baffles, changing direction countless times, and maximizing contact with "hungry" microbes. The microbes then treat the water by consuming a broad range of organic constituents (i.e. herbicides, pesticides, oils, greases, etc.), turning them into carbon dioxide and water. To ensure proper and continued colonization, microbes are added monthly - a process called inoculation.

Aeration System:
A unique aeration system quietly injects large amounts of oxygen in the form of microbubbles, to maximize the amount of dissolved oxygen introduced into the water. The proper amount of dissolved oxygen is critical for maximizing the health and the activity level of the microbes and the size of the colony.

Ozone (Optional):
An ozone generator is an option for specialized applications where sterilization of the waste stream is desired.

Pressurized Tank:
Once water is biologically treated, a pressurized tank and pump deliver up to 45 GPM of recycled water to up to three hoses or pressure washers.

Product Specification

Product Category: Biological Water Treatment System

Biological Water Treatment System

1.0 General Description

The Biological Water Treatment System will be designed to treat and recycle vehicle and equipment wash-water originating from a pressure washer, steam cleaner, hose, or similar cleaning device. The water treatment system will be self-contained on a 12' by 6' 14-gauge 304L stainless steel skid. The water treatment system will be no higher than 5'. The water treatment system will use fixed-film microbes to treat the wastewater. The water treatment system will have the capacity of processing up to 25 gallons per minute.

The Biological Water Treatment System will have (3) treated water outlets. The water treatment system will be complete with water level control floats. All of the equipment in this section shall be supplied by a single supplier as a packaged system. The water treatment system shall be a BIO-25R-1M10 Biological Wastewater Treatment System as manufactured by Mi-T-M Corporation, 8650 Enterprise Drive, Peosta, IA 52068, phone: 1-800-367-6486.

2.0 Performance

General. The biological wash-water treatment system shall be capable of treating and recycling pressure washer, steam cleaner, or garden hose water generated from the cleaning of vehicles, machinery or equipment. The water treatment system will:

2.1. Treat the water with fixed film microbes, which will colonize on over 3,456 square feet of biological media.
2.2. Be capable of removing from the water trace amounts of a wide range of organic material, such as; gasoline, diesel fuel, greases, oils, herbicides, and pesticides.
2.3. Provide final polishing of the treated water with an optional 20 micron, 26 sq. ft. filter.
2.4. Process water up to 25 gallons per minute.
2.5. Automatically restore fresh water to the system due to water loss from evaporation and/or "vehicle carry-off".

3.0 Equipment Description

3.1 Electrical Requirements. The system will be fully operational by the use of a 230 volt, single phase, 25 amp power source.

3.2 Electrical Components

3.2.1 Micron 50 VA control transformer.

3.2.2 Omron 3 HP motor control relays.

3.2.3 Anchor Scientific mechanical float switches, 3.5A @ 230 V, 2 N.O., 1 N.C.

3.2.4 Advanced Control Technology Inc, side entry float switch.

3.3 Bio-Reaction Tank. The bio-reaction tank shall be made of 14-guage 304L stainless steel and shall be (L) 12' x (W) 4' x (H) 4.5' and able to hold up to 1,434 gallons of water.

3.4 Biological Media. The bio-reaction tank shall house ¾" sheet biological media packs with a minimum of 3,456 square feet of surface area for biological colonization.

3.5 Air Distribution System. The unit shall have a Jacuzzi 1.0 HP centrifugal pump with strainer supplying water to (2) fine bubble venturi injectors .

3.6 Control Panel. The control panel will be constructed of a NEMA 4 housing. Conveniently displayed on the control panel will be controls for the system's power, sump pump, air processor pump, and transfer pump.

3.7 Transfer Pump. The system will contain a Cat Pumps 2 HP stainless steel centrifugal pump for processing the water in the tank and supplying treated water at up to 25 GPM.

3.8 Optional Polishing Filter. The system will have an optional USFilter 1" Big Blue cartridge filter housing containing a USFilter 20" pleated polyester filter cartridge with 26 square feet of filtering surface area, which will be capable of filtering particulates in the wastewater down to 20 microns.

3.9 Pressurized Container. The system will contain a 33 gallon pre-charged pressure tank. The tank will provide between 40 and 60 psi of treated water.

3.10 Fresh Water Makeup. The system will contain a float-activated freshwater makeup system for adding fresh water lost due to evaporation and/or carry-off.

Vacuum Bubble® Technology Aerator

The Vacuum Bubble®Technology Aerator 101 is sized for on-site wastewater treatment, small commercial applications, and pretreatment of industrial wastewater. Several configuration options give flexibility to meet differing requirements. Available options, which may be ordered, include an all-weather housing, self-monitoring electronic controller, and a basic GFI controller.

Science

Bioconversion Inc.'s Vacuum Bubble® Aerators are built upon sound scientific principles and engineering practices. The bubbles are created under a partial vacuum and consequently, as they enter the water, the higher water pressure surrounding them causes them to collapse further. There are n documented aerators with bubbles as 0.25mm in diameter

Vacuum Bubble® Technology and Aerobic Bacteria are great fo

Natural Gas

Distance to Unit from Regulator	Pipe Size
0-50 feet	1½" 1PS
50-100 feet	2" 1PS
100-200 feet	2½" 1PS

LP Gas

Distance to Unit from Regulator	Pipe Size
0-50 feet	1" 1PS
50-100 feet	1½" 1PS
100-200 feet	1¾" 1PS

Additional Features

- Open drip-proof electric motor with thermal overload protection
- Natural gas or LP gas-fired (vapor only) natural draft with aspirating-type burner, 10 inch stack
- Factory preset trapping unloader
- Thermal relief valve
- Pressure switch and overpressure safety controls
- 24 volt control system
- Polyethylene float tank (4 gallon with in-line screen filter)
- 1/2 schedule 80 coil with 7 pancake heat exchanger
- Adjustable thermostat
- Temperature rise 150°F/66°C above ambient, maximum 200°F (250°F/121°C outlet temperature with steam option)
- 338,000 BTU per hour - Natural gas
- 326,000 BTU per hour - LP gas (vapor only)
- 3/8 inch x 50 foot steel wire-braided pressure hose with screw connects, swivel and bend restrictors
- Professional-grade insulated trigger gun with safety lock-off
- Adjustable pressure insulated dual lance with quick connect nozzles (0°, 15°, 25° and 40°) and fixed detergent nozzle

Options:

HX-0104 **K7 unloader (flow activated) (auto start/stop N/A)** - Converts pressure trapping unloader system to flow actuated K7 unloader. Pressure is not trapped in the discharge line when trigger is released.

HX-0105 **Liquid propane** - Converts natural gas pressure washer to operate on liquid propane (vapor only)

HX-0106 **Hour meter** - Displays number of hours unit has been in operation

HX-0107 **Time delay shutdown** - Timer will shut unit off automatically when trigger gun is released and timer reaches setting

HX-0108 **(1) Remote station (auto start/stop N/A)** - Adds control box which may be mounted away from unit to control on/off, burner and soap injection

HX-0109 **Time delay shutdown and first remote box (kit option)** - Timer will shut unit off automatically when trigger gun is released and timer reaches setting; Adds control box which may be mounted away from unit to control on/off, burner and soap injection

HX-0110 **Additional remotes (up to 3)** - Additional remotes that may be added to unit after the 1st remote is installed

HX-0111 **Auto start/stop** - When trigger gun is released timer will turn unit off, when trigger gun is pulled unit will restart

HX-0112 **K7 unloader (flow activated) (auto start/stop N/A)** - Converts pressure trapping unloader system to flow actuated K7 unloader. Pressure is not trapped in the discharge line when trigger is released.

HX-0113, HX-0114 **Dual gun control** - Two guns may be operated at the same time. Flow is divided between the two guns while each operator maintains equal system pressure.

HX-0116 **Stainless-steel coil wrap** - Converts powder coat painted coil wrap to stainless-steel

HX-0117 **Painted box kit option** - Converts side panels to painted material

HX-0118 **Painted and stainless-steel box kit option** - Converts side panels to stainless-steel material

HX-0119 - HX-0122 **250°F steam upgrade** - Increases outlet temperature to 250°F while lowering system pressure

HX-0124 **Auto start/stop and first remote option** - When trigger gun is released timer will turn unit off, when trigger gun is pulled unit will restart; Adds control box which may be mounted away from unit to control on/off, burner and soap injection

HX-0154 **All stainless-steel frame and hardware on modular units** - Converts powder coat painted frame and hardware to stainless-steel

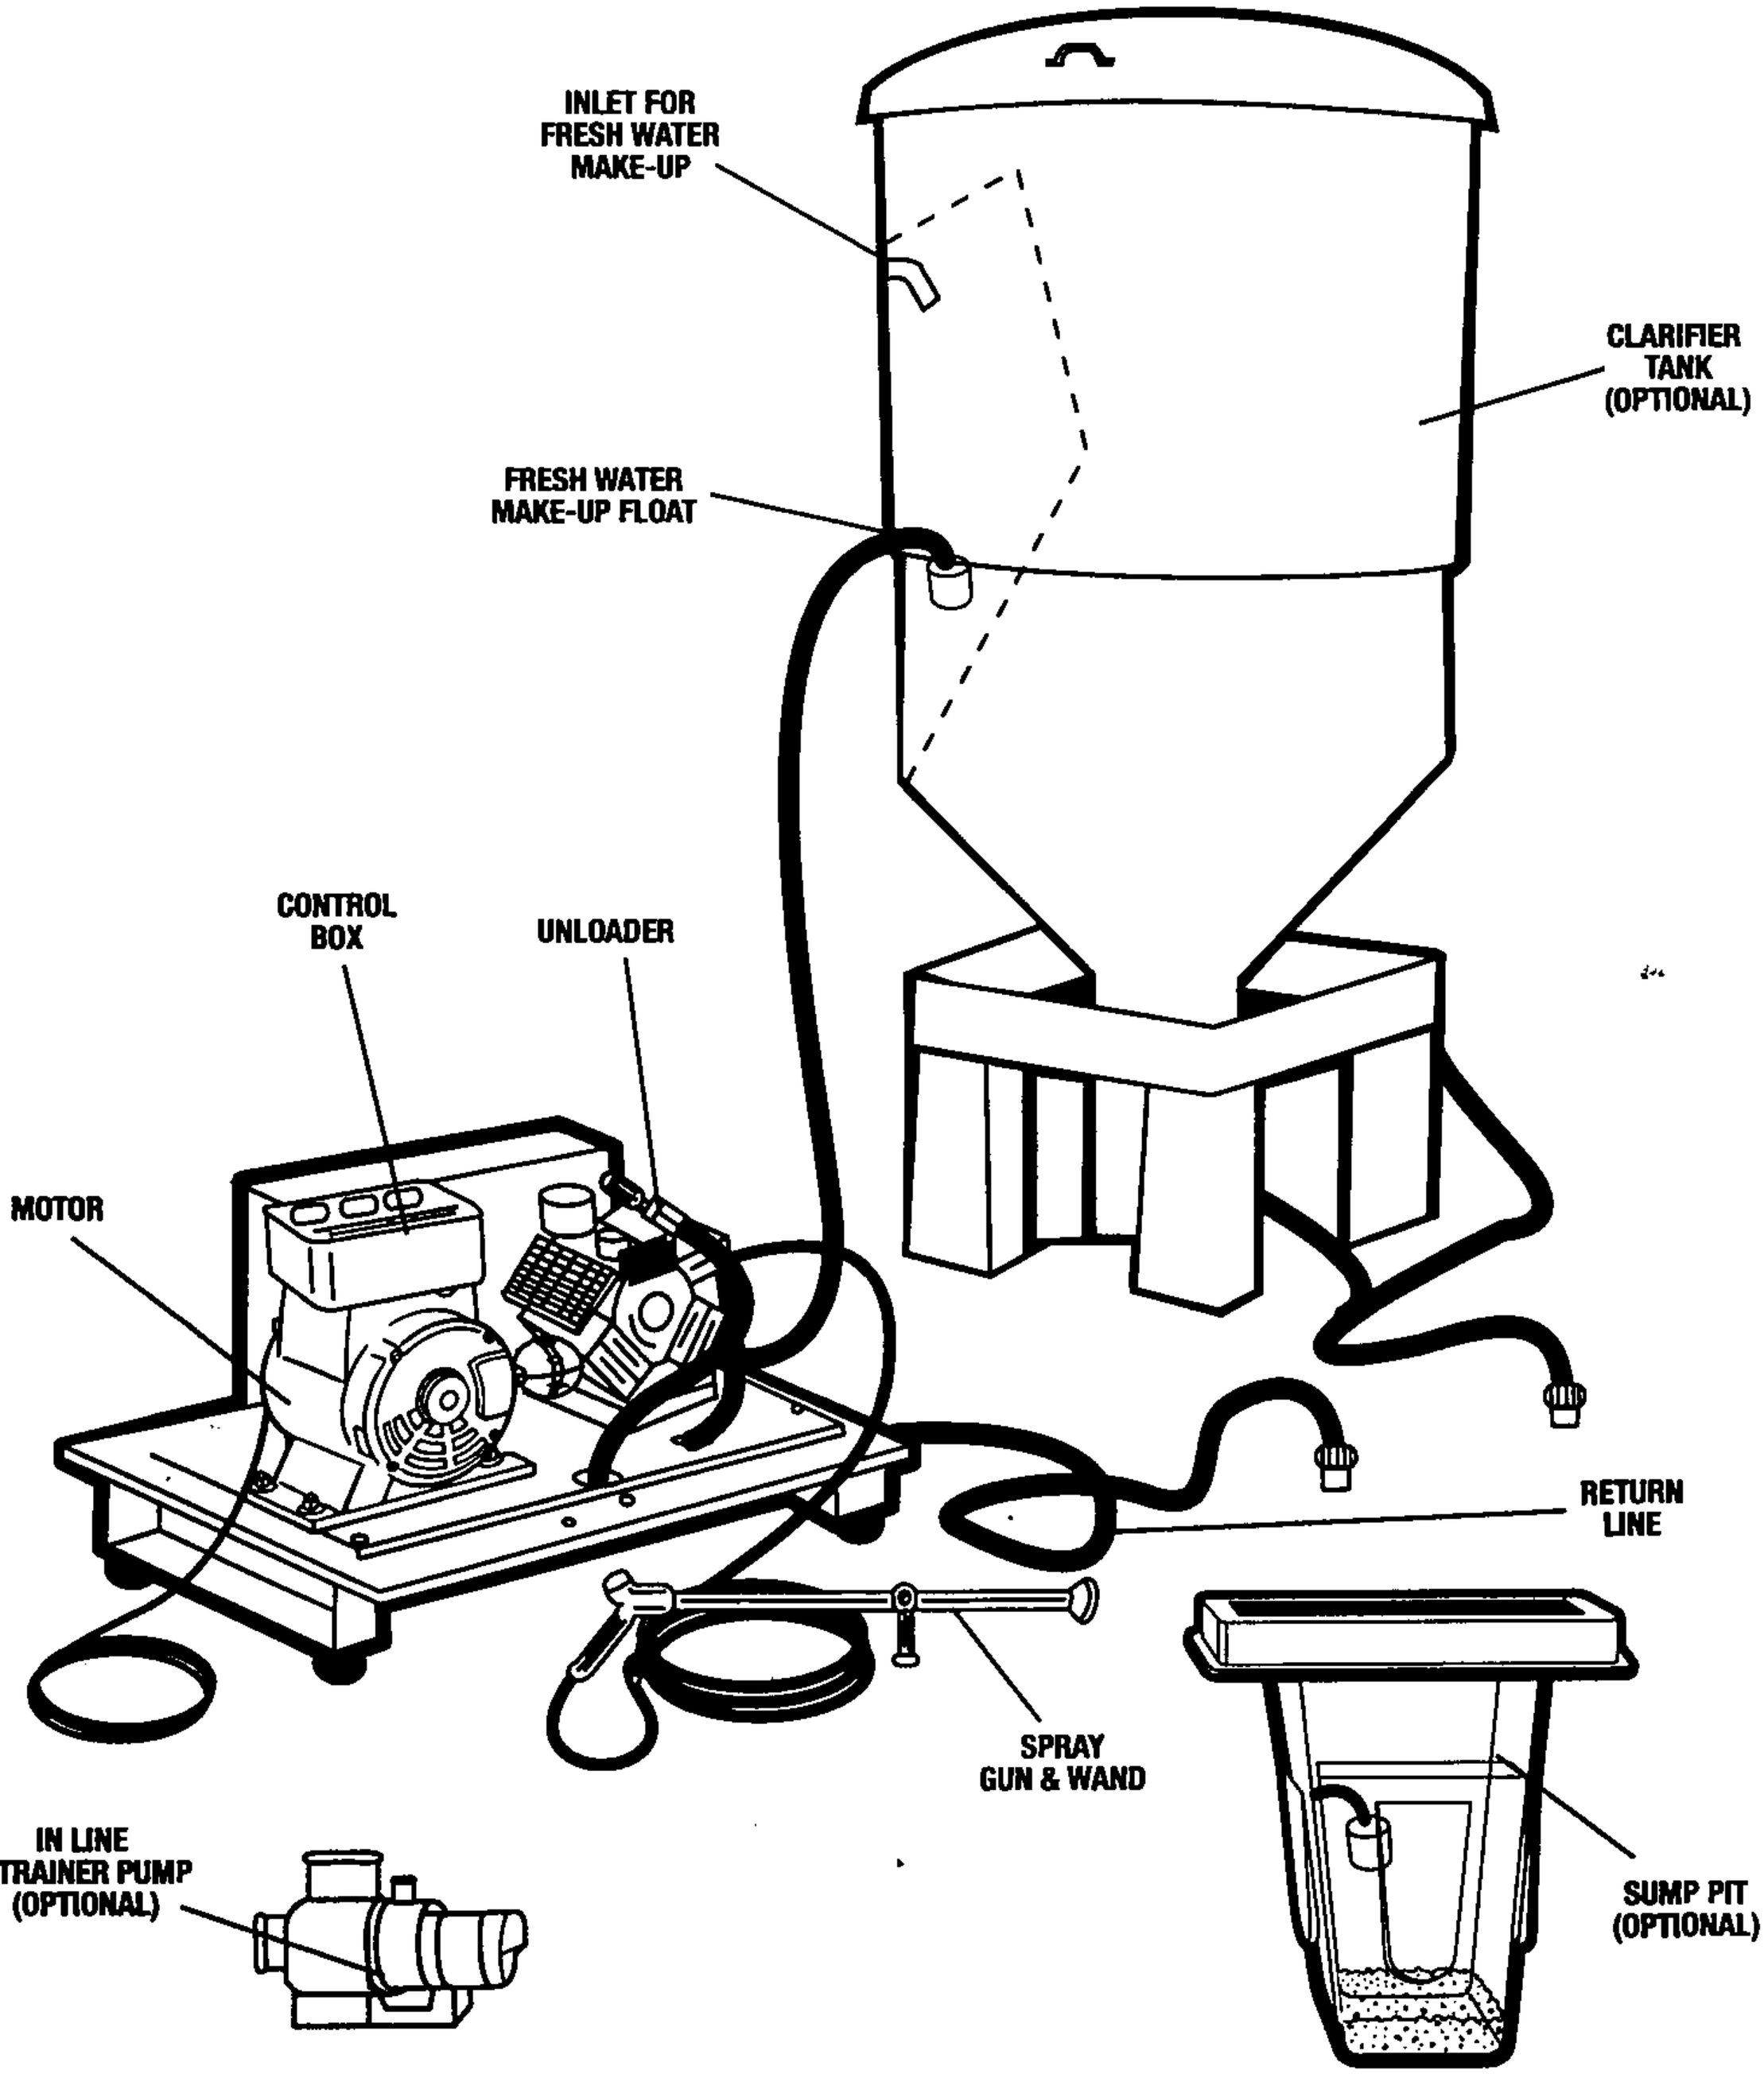
25 GPM HVW SERIES FEATURES



CONTENTS OF THE HVW SERIES

Carefully unpack your new Mi-T-M HVW. Contact the freight line if a damage claim is required on any component. The following items are the basic equipment sent with your HVW.

- HVW System
- Spray Gun & Wand With 100' Hose
- Float Switch For Fresh Water Make-Up

Options:

- Hose Reel
- Clarifier Pit
- Catch Basin
- Remote
- Sump Pump

KINETICO®

Water solutions for a changing world

Kinetico's Worldwide Success

Since 1970, Kinetico has been designing and manufacturing innovative water treatment systems that solve a variety of water problems. Kinetico continually develops and offers products to meet the diverse water treatment needs of people in more than 100 countries worldwide.

Kinetico Incorporated

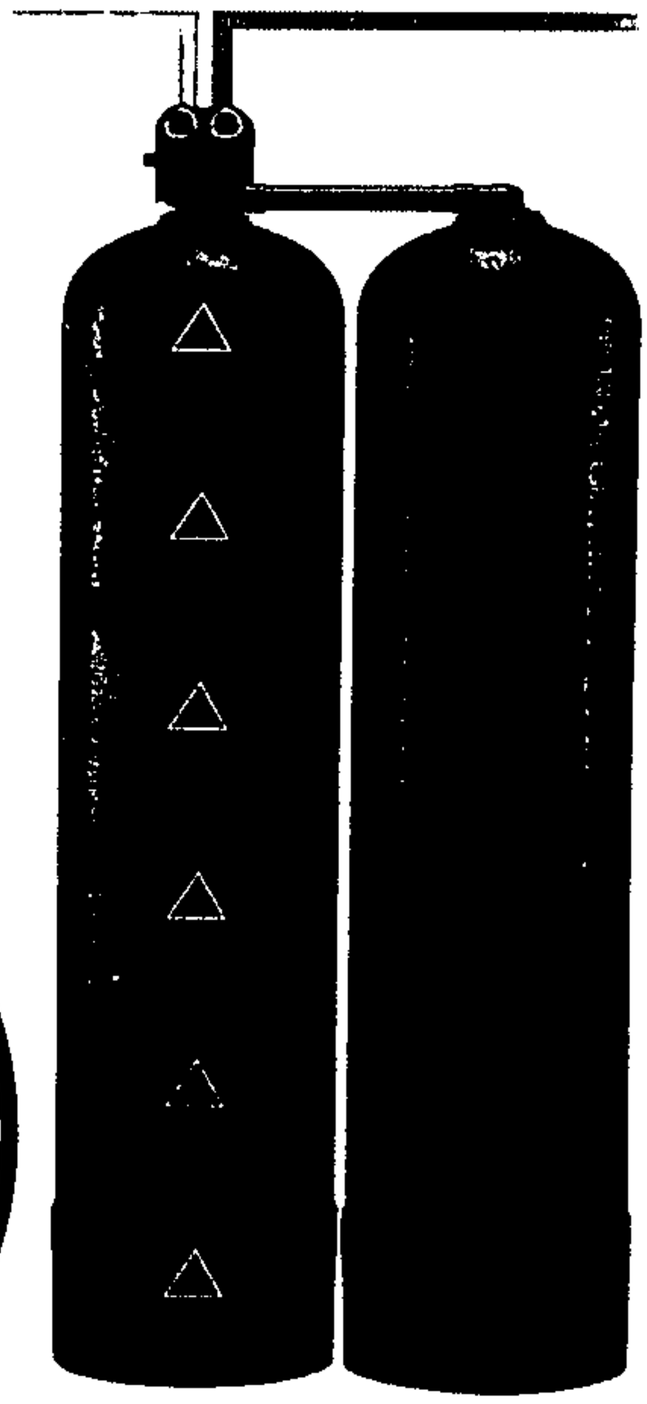
KINETICO'S Exclusive Mach™ Series Non-Electric Control Valve

Kinetico's patented Mach Series control valve eliminates the need to adjust, set, repair or replace timers, computers or electrical components. Available in both 1" and 1.25" porting, the Mach Series control valve simultaneously manages two media tanks through service and regeneration cycles. Water pressure runs the system. As water passes through the control valve, a water turbine meters the amount of water processed by the system. The valve automatically initiates a regeneration after the predetermined amount of water has been treated.

Since the system is comprised of two media tanks, soft water can be used for the complete regeneration process which substantially improves the system's efficiency and the product water quality.



[illegible]

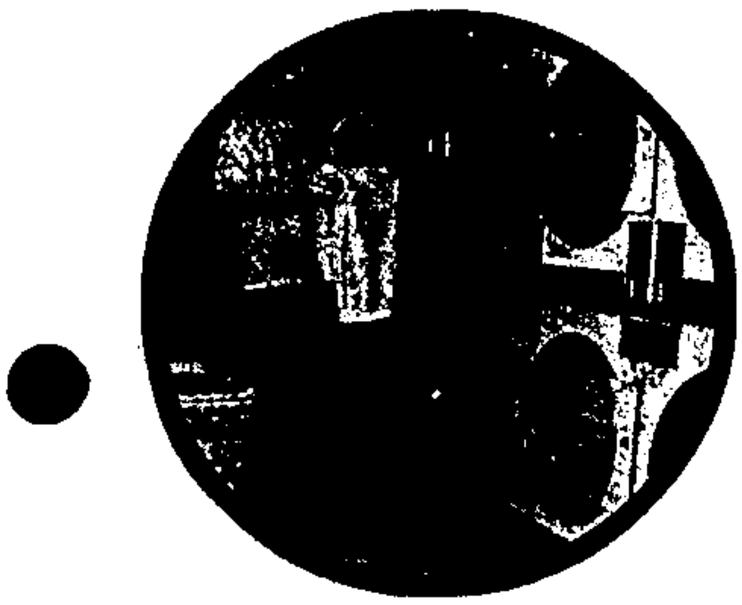
KINETICO®

Water solutions for a changing world

Commercial Plus Water Softener Systems

CP Series



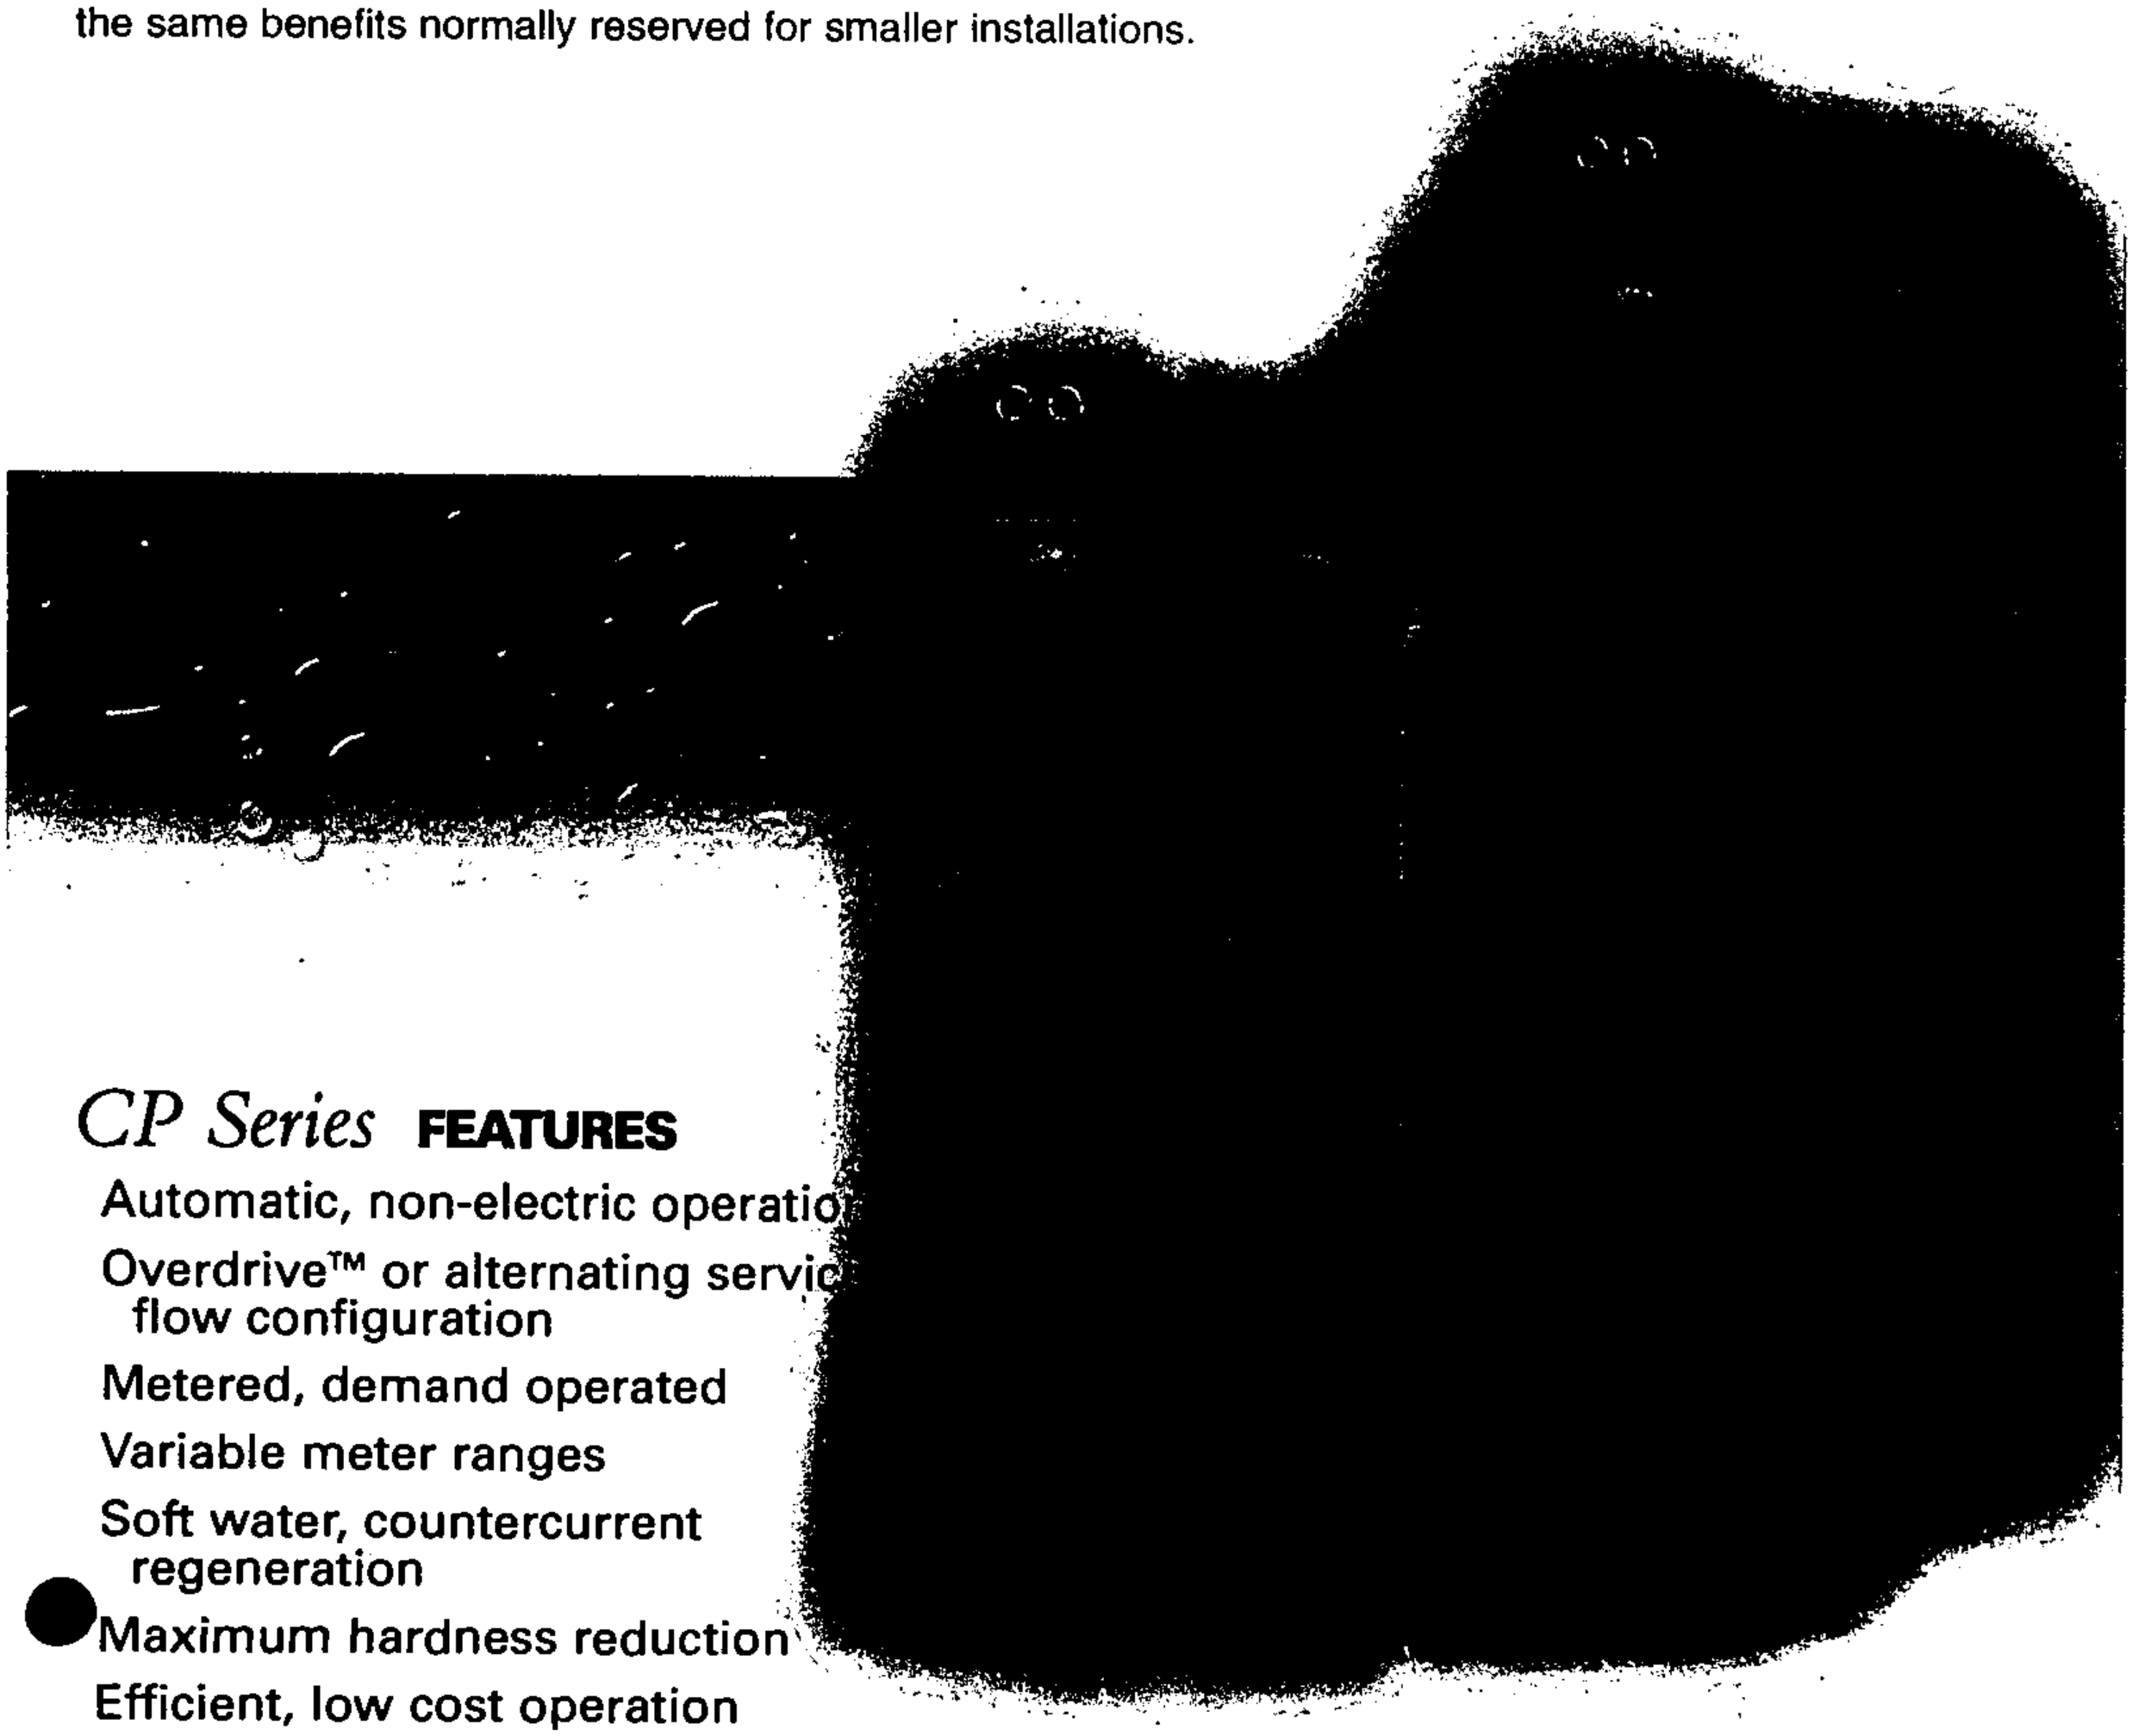
KINETICO®

Water solutions for a changing world

Kinetico understands your company's water treatment needs.
We deliver the quality you expect with a variety of standard features and a selection of options for your specific application.

Commercial Water Softening *CP Series*

The CP Series water softener is ideal when expectations for both performance and efficiency are high and can't be compromised. The Kinetico Mach Series control valve allows larger, commercial applications to enjoy the same benefits normally reserved for smaller installations.



CP Series FEATURES

- Automatic, non-electric operatio
- Overdrive™ or alternating servic flow configuration
- Metered, demand operated
- Variable meter ranges
- Soft water, countercurrent regeneration
- Maximum hardness reduction
- Efficient, low cost operation
- Corrosion-resistant

ES REPORT™

ESR-1682

Issued December 1, 2004

This report is subject to re-examination in one year.

EVALUATION SUBJECT:

HILTI HIT RE 500 ADHESIVE ANCHOR SYSTEMS

1.0 EVALUATION SCOPE

Compliance with the following codes:

- 2000 *International Building Code®* (IBC)
- 2000 *International Residential Code®* (IRC)
- 1997 *Uniform Building Code™* (UBC)

Properties evaluated:

- Structural
- Health effects

2.0 USES

The Hilti HIT RE 500 Adhesive Anchoring System consists of adhesive and either post-installed threaded rods or deformed reinforcing bars. The system is used to resist static tension and shear loads, live loads, seismic loads and wind loads in uncracked, normal-weight concrete having a minimum compressive strength of 2,000 psi (13.8MPa) or 4,000 psi (27.6 MPa). The anchor system is an alternative to cast-in-place anchors described in Section 1912 of the IBC and Section 1923.1 of the UBC. The anchor systems may also be used under the IRC where an engineered design is submitted in accordance with IRC Section R301.1.2.

3.0 DESCRIPTION

3.1 General:

The Hilti HIT RE 500 Adhesive Anchor System consists of the Hilti HIT RE 500 adhesive and steel reinforcement bars or threaded rods.

3.2 Materials:

3.2.1 Hilti HIT RE 500 Adhesive: The Hilti HIT RE 500 adhesive is a two-component, injectable, epoxy adhesive with the components contained in a dual-chambered cartridge. Available cartridge sizes include 11.1 ounces (330 ml), 16.9 ounces (500 ml), and 47.3 ounces (1400 ml) of adhesive. The two components combine, when dispensed through a static mixing nozzle attached to the cartridge, at a 3:1 ratio of resin to hardener. The static mixing nozzle is supplied by Hilti. Each cartridge is stamped with an adhesive expiration date. The Hilti HIT RE 500 epoxy adhesive has a recommended maximum shelf life of nine months when stored in the manufacturer's unopened cartridge at temperatures between 23°F (-5°C) and 77°F (25°C).

3.2.2 Threaded Steel Rods: The threaded steel rods consist of all-thread rods in diameters shown in Table 1 of this report. The rods, with nut and washer, are available in four steel specifications as shown in Table 2. The carbon steel standard threaded rod and the high-strength threaded rod shall be furnished with either a 5 µm zinc electroplate coating in accordance with ASTM B 633 SC 1, or a hot-dipped galvanized zinc coating in accordance with ASTM A 153 Class C or D.

3.2.3 Reinforcement Bars: Deformed reinforcement bars (rebars) range in size from No. 3 to No. 11, as shown in Table 3, and shall comply with ASTM A 615, A 616, A 617, or A 706 (Grade 60, minimum).

3.3 Normal-weight Concrete:

Normal-weight concrete shall be stone-aggregate concrete, conforming to Sections 1903 and 1905 of the IBC and the UBC, having a minimum 28-day compressive strength of 2,500 psi (17.3 MPa) (IBC) or 2,000 psi (13.8 MPa) (UBC) at the time of anchor installation.

4.0 DESIGN AND INSTALLATION

4.1 Design:

Allowable tension and shear loads for threaded rod and rebar in normal-weight concrete are given in Tables 4 and 5, respectively. Allowable tension and shear loads for threaded rods connecting sill plates and other attachments are given in Table 7. Anchors are permitted for static live and dead load, wind load and earthquake load. Where adjustments to the allowable loads are permitted or required in accordance with Section 1612.3 of the UBC and Section 1605.3 of the IBC, those adjustments shall be as follows:

1. When using the basic load combinations in accordance with IBC Section 1605.3.1 or UBC Section 1612.3.1, allowable shear and tension concrete/bond values and allowable tension steel values in Tables 4, 5 and 7 of this report are not permitted to be increased for wind or earthquake loading. When using the alternative basic load combinations in IBC Section 1605.3.2 or UBC Section 1612.3.2 that include wind or seismic loads, the allowable shear and tension concrete/bond values and allowable tension steel values in Tables 4, 5 and 7 are permitted to be increased by $33^1/_3$ percent. Alternatively, the basic load combinations may be reduced by a factor of 0.75 when using IBC Section 1605.3.2.

ES REPORTS™ are not to be construed as representing aesthetics or any other attributes not specifically addressed, nor are they to be construed as an endorsement of the subject of the report or a recommendation for its use. There is no warranty by ICC Evaluation Service, Inc., express or implied, as to any finding or other matter in this report, or as to any product covered by the report.

Copyright © 2004

2. For allowable short-term shear loads resulting from wind and seismic loads based on steel strength, the allowable steel shear values shall be adjusted using the factors in Table 9.

The allowable tension and shear values based on bond or concrete in Tables 4, 5 and 7 shall be adjusted in accordance with Figure 1 for in-service base-material temperatures in excess of 120°F (49°C).

Allowable loads for anchors subjected to combined shear and tension loads are determined as follows:

$$(P_a/P_t)^{5/3} + (V_a/V_t)^{5/3} \leq 1$$

where:

P_a = Applied service tension load.

P_t = Allowable service tension load.

V_a = Applied service shear load.

V_t = Allowable service shear load.

For anchors installed at edge distances less than c_{cr}, or spacing less than s_{cr}, or both, the bond or concrete values given in Tables 4 and 5 shall be reduced in accordance with the reduction factors given in Table 6. The reduced bond- or concrete-strength anchor values shall be compared with the corresponding allowable steel strength, and the lesser value shall be used to establish allowable anchor capacity. For installations with $1^3/_4$-inch (44.5 mm) edge distance, Table 7 applies.

4.2 Installation:

4.2.1 General: Installation requirements are shown for various threaded rod sizes in Table 1, and for deformed reinforcement bars in Table 3. Holes shall be drilled to the required depth using an electro-pneumatic hammer-drill, in roto-hammer mode, with a carbide-tipped drill bit that complies with ANSI Specification B212.15-1994, or a Hilti matched-tolerance diamond core bit. Holes shall be cleaned of dust and debris using a wire brush and oil-free compressed air, as required. For holes which are drilled with a core bit, the hole should be immediately flushed with water until the water from the hole runs clear; brushed with a wire brush; and flushed again until the water runs clear. Holes are permitted to be dry, damp or wet (including standing water) at the time of anchor installation. A clean mixing nozzle shall be attached to the cartridge, and the first three trigger pulls from each refill pack shall be discarded. The holes shall be filled one-half to two-thirds full with the epoxy adhesive, starting at the bottom to avoid entrapment of air. The steel anchor rod or rebar is installed in the hole with a rotating motion until the bottom of the hole is reached. Minor adjustments to the anchor position may be made during the gel time as given in Table 8. The design load may be applied after the cure time given in Table 8 has elapsed.

4.2.2 Special Inspection: Special inspection in accordance with Section 1704 of the IBC or Section 1701 of the UBC shall be provided for all anchor installations. The special inspector shall record compliance of the carbide drill bit with ANSI B212.15-1994, and compliance of: the Hilti diamond core drill bit nominal diameter; the hole depth and cleanliness; the product description, including product name, rod type, diameter and length; and the adhesive expiration date. The special inspector also shall verify anchor installation as being in accordance with this report and the manufacturer's published installation instructions.

4.2.3 Compliance with ANSI/NSF Standard 61, Drinking Water System Components—Health Effects: HIT RE 500 is recognized for use under ANSI/NSF Standard 61, for contact with potable water systems. HIT RE 500 is recognized for the threaded rods subjected to water at temperatures up to 140°F (60°C).

5.0 CONDITIONS OF USE

The Hilti HIT RE 500 Adhesive Anchor Systems described in this report comply with, or are suitable alternatives to what is specified in, those codes listed in Section 1.0 of this report, subject to the following conditions:

5.1 The Hilti HIT RE 500 Adhesive Anchor System is permitted to be used to resist dead loads, live loads and short-term loads, such as those resulting from wind or earthquake.

5.2 When anchors are used to resist short-term loads, such as wind or seismic loads, allowable loads shall be calculated in accordance with Section 4.1 of this report.

5.3 The anchors shall be installed in accordance with Hilti's instructions and this report. In the event of a conflict between Hilti's instructions and this report, this report shall govern.

5.4 The HIT RE 500 Adhesive Anchors shall be installed in holes predrilled using a carbide-tipped masonry drill bit manufactured within the range of the maximum and minimum dimensions of ANSI B212.15-1994, or with a Hilti matched-tolerance diamond core bit having the same nominal diameter.

5.5 Special inspection in accordance with Section 4.2.2 of this report shall be provided for all anchor installations.

5.6 Calculations, drawings and details demonstrating that the HIT RE 500 Adhesive Anchor System complies with this report shall be submitted to the building official. The calculations and details shall be prepared by a registered design professional where required by the jurisdiction in which the project is to be constructed.

5.7 The Hilti HIT RE 500 Adhesive Anchor System is not permitted for use in conjunction with fire-resistance-rated construction. Exceptions are:

- Anchors resist wind or seismic loading only.
- For other than wind or seismic loading, special consideration is given to fire exposure conditions.

5.8 The Hilti HIT RE 500 Adhesive Anchor System may be used to resist tension and shear loads in overhead or wall installations. In overhead and wall tension applications, consideration shall be given to the effects of elevated temperature conditions on anchor performance. Figure 1 shows load reduction factors for elevated temperatures.

5.9 Since an ICC-ES acceptance criteria for evaluating data to determine the performance of adhesive anchors subjected to fatigue or shock loading is unavailable at this time, the use of these anchors under these conditions is beyond the scope of this report.

5.10 Since an ICC-ES acceptance criteria for evaluating the performance of adhesive anchors in cracked concrete or masonry is unavailable at this time, the use of anchors in tension zones of concrete or masonry members is limited to installation in uncracked concrete. Cracking occurs when $f_t > f_r$ due to service loads or deformations.

5.11 Use of the Hilti HIT RE 500 Adhesive Anchor System in conjunction with carbon steel threaded rods shall be limited to interior exposure. Installations exposed to severa, moderate or negligible exterior weathering conditions, as defined in Figure 1 of ASTM C 62, are permitted where stainless steel anchors or hot-dipped

anchors with a zinc coating complying with ASTM A 153 Class C or D are used.

5.12 During anchor installation, the hole and surrounding location are permitted to be dry, damp or wet (including standing water).

5.13 The Hilti HIT RE 500 Adhesive Anchor System may be installed in base materials having interior temperatures between 23°F (-5°C) and 110°F (43°C) at the time of installation. Installation of the Hilti HIT RE 500 Adhesive Anchor System in base materials having interior temperatures outside this range is beyond the scope of this report. The temperature of the Hilti HIT RE 500 Adhesive shall be between 40°F (5°C) and 105°F (40°C) at the time of installation.

5.14 When anchors are located where the interior base-material temperature may exceed 120°F (49°C), allowable tension loads in this report shall be adjusted for in-service temperatures in accordance with Figure 1. The use of the Hilti HIT RE 500 Adhesive Anchor System in base materials having interior temperatures exceeding 212°F (100°C) is beyond the scope of this report.

5.15 The Hilti HIT RE 500 Adhesive Anchor System is manufactured by Hilti GmbH at their facilities in Kaufering, Germany, with quality control inspections by Underwriters Laboratories Inc. (AA-668).

6.0 EVIDENCE SUBMITTED

6.1 Data in accordance with the ICC-ES Acceptance Criteria for Adhesive Anchors in Concrete and Masonry Elements (AC58), dated November 2001, including test reports for the following tests: axial tension testing of single anchors, establishing minimum edge distance, $c = c_{min}$ (AC58 Test Series 5); axial tension testing of a group of two anchors, establishing minimum spacing distance, $s = s_{min}$ (AC58 Test Series 9); shear testing of single anchors, establishing critical edge distance, $c = c_{cr}$ (AC58 Test Series 13); shear testing of single anchors, establishing minimum edge distance, $c = c_{min}$ and $1^3/_4$ inches (44.5 mm) (AC58 Test Series 14); creep testing (AC58 Test Series 17); in-service temperature testing (AC58 Test Series 18); dampness testing (AC58 Test Series 19); freezing and thawing testing (AC58 Test Series 20); seismic testing of threaded rods and rebar (AC58 Test Series 21); single anchor tensile testing of reinforcing bars (AC58 Test Series 1); and single anchor shear testing of reinforcing bars (AC58 Test Series 13). Additional documentation was provided on use of HIT RE 500 adhesive in contact with potable water (ANSI/NSF Standard 61), and for evaluation of anchor performance in cored holes.

6.2 A quality control manual.

7.0 IDENTIFICATION

The Hilti HIT RE 500 adhesive is identified in the field by labels on, or in, the packaging that note the manufacturer's name (Hilti), product name, lot number, expiration date, evaluation report number (ESR-1682) and installation instructions.

TABLE 1—SPECIFICATIONS FOR INSTALLATION OF THREADED RODS IN CONCRETE WITH HILTI HIT RE 500 ADHESIVE

PROPERTY	THREADED ROD DIAMETER (inches)						
	$^3/_8$	$^1/_2$	$^5/_8$	$^3/_4$	$^7/_8$	1	$1^1/_4$
A_{nom} = Nominal area of threaded rod (in.^{2})	0.1104	0.1963	0.3068	0.4418	0.6013	0.7854	1.2272
BD = Nominal bit diameter (inches)	$^7/_{16}$	$^9/_{16}$	$^3/_4$	$^7/_8$	1	$1^1/_8$	$1^3/_8$
Standard embedment depth (inches)	$3^3/_8$	$4^1/_2$	$5^5/_8$	$6^3/_4$	$7^7/_8$	9	$11^1/_4$
T = maximum torque (ft.-lb.)	18	30	75	150	175	235	400

For **SI:** 1 inch = 25.4 mm, 1 ft-lb = 1.4 N-m, 1 inch^2 = 645 mm^2.

TABLE 2—STEEL SPECIFICATIONS FOR ROD, NUT AND WASHER

ALL-THREAD ROD				NUT SPECIFICATION	WASHER SPECIFICATION
Description	Specification	f_y (ksi)	f_u (ksi)		
Standard carbon threaded rod[1]	ASTM A 36	36.0	58.0	ASTM A 563, Grade A	ANSI B 18.22.1, Type A, plain
High-strength carbon threaded rod[1]	ASTM A 193 B7	105.0	125.0	ASTM A 563, Grade DH	ASTM F 436
Stainless rod (316/304) $^3/_8$ inch - $^5/_8$ inch	ASTM F 593, CW	65.0	100.0	ASTM F 594, Alloy, Group 1	ANSI B 18.22.1, Type A, plain
Stainless rod (316/304) $^3/_4$ inch - $1^1/_4$ inches		45.0	85.0		

For **SI:** 1 inch = 25.4 mm, 1 ksi = 6.89 kPa.

[1]Carbon steel rods, nuts, and washers exposed to exterior or damp environments shall be hot-dipped galvanized in accordance with ASTM A 153 Class C or D.

TABLE 3—SPECIFICATIONS FOR INSTALLATION OF GRADE 60 REINFORCING BAR IN CONCRETE WITH HILTI HIT RE 500 ADHESIVE

PROPERTY	REINFORCING BAR SIZES								
	No. 3	No. 4	No. 5	No. 6	No. 7	No. 8	No. 9	No. 10	No. 11
d = Nominal bar diameter (inches)	0.375	0.500	0.625	0.750	0.875	1.000	1.125	1.250	1.375

	9	13,845	17,365				11,190	15,820			
	12	17,935	17,935				18,245	25,800			
1 1/4	5 5/8	5,760	12,815	23,490	50,620	34,425	5,380	7,610	12,100	26,080	17,735
	11 1/4	24,610	31,620				17,480	24,720			
	15	34,130	35,270				28,510	40,315			

For **SI:** 1 inch = 25.4 mm, 1 lbf = 4.48 N, 1 psi = 6.89 Pa.

[1]Allowable load shall be the lesser of tabulated bond and steel values. Load reduction factors given in Table 6 for reduced edge distance (*c*) and spacing (*s*) shall be applied to values in the bond or concrete capacity column. Linear interpolation may be used for intermediate spacings, edges distances, embedments and concrete strengths. Load reduction factors are cumulative for anchors with multiple anchor spacings or base-material edge distances.

[2]The tabulated values are for anchors installed in concrete having the designated compressive strength (f'_c) or a higher strength at the time of installation.

[3]Allowable loads based on bond strength have been calculated using a safety factor of 4.0 applied to the mean ultimate strength.

[4]Concrete thickness shall be equal to or greater than 1.5 times the anchor embedment depth.

[5]The allowable tension and shear values for adhesive anchors to resist short-term loads such as wind or seismic loads shall be calculated in accordance with Section 4.1 of this report.

TABLE 5—ALLOWABLE TENSION AND SHEAR VALUES IN NORMAL-WEIGHT CONCRETE FOR REINFORCING BAR INSTALLED WITH HILTI HIT RE 500 ADHESIVE (pounds)[1,2,3,4,5]

ANCHOR SIZE	EMBEDMENT DEPTH, h_{ef} (inches)	TENSION (lbs)			SHEAR (lbs)	
		Based on Bond or Concrete		Based on Steel Strength, ASTM A 615 Gr. 60	Based on Bond or Concrete: $f'_c \geq$ 2,000 psi	Based on Steel Strength, ASTM A 615 Gr. 60
		f'_c 2,000 psi	f'_c 4,000 psi			
No. 3	$3^3/_8$	2,525	2,760	2,640	1,715	1,685

	12	17,400	18,235			
No. 9	$10^1/_8$	18,060	20,310	24,000	15,080	15,300
	$13^1/_2$	21,005	21,005			
No. 10	$11^1/_4$	23,000	24,180	30,480	19,620	19,430
	15	23,960	24,265			
No. 11	$12^3/_8$	29,655	30,780	37,440	22,235	23,870
	$16^1/_2$	30,895	30,950			

For **SI:** 1 inch = 25.4 mm, 1 lbf = 4.48 N, 1 psi = 6.89 Pa.

[1]Allowable load shall be the lesser of tabulated bond and steel values. Load reduction factors given in Table 6 for reduced edge distance (c) and spacing (s) shall be applied to values in the bond or concrete capacity column. Linear interpolation may be used for intermediate spacings, edge distances, embedments and concrete strengths. Load reduction factors are cumulative for anchors with multiple anchor spacings or base-material edge distances.

[2]The tabulated values are for rebar installed in concrete having the designated compressive strength (f'_c) or a higher strength at the time of installation.

[3]Allowable loads based on bond strength have been calculated using a safety factor of 4.0 applied to the mean ultimate strength.

[4]Concrete thickness shall be equal to or greater than 1.5 times the anchor embedment depth.

[5]The allowable tension and shear values for adhesive anchors to resist short-term loads such as wind or seismic loads shall be calculated in accordance with Section 4.1 of this report.

TABLE 6—INFLUENCE FACTORS FOR SPACING AND EDGE DISTANCE IN NORMAL-WEIGHT CONCRETE WITH HILTI HIT RE 500[1]

SPACING FACTORS FOR TENSION AND SHEAR LOADS			EDGE DISTANCE FACTORS FOR SHEAR LOADS			EDGE DISTANCE FACTORS FOR TENSION LOADS		
s_{cr}	s_{min}	f_A	c_{cr}	c_{min}	f_{RV}	c_{cr}	c_{min}	f_{RN}
1.5 × h_{ef}	0.5 × h_{ef}	0.70	1.5 × h_{ef}	0.5 × h_{ef}	0.30 toward edge 0.60 not toward edge	1.5 × h_{ef}	0.5 × h_{ef}	0.70

h_{ef} = Actual embedment depth.
s = The measure between anchors, centerline-to-centerline distance.
s_{cr} = The least anchor spacing distance at which the allowable load capacity of an anchor is applicable without reductions.
s_{min} = The least anchor spacing at which the anchors have been tested for recognition.
c = The measure between the anchor centerline and the free edge of the concrete member.
c_{cr} = The least edge distance at which the allowable load capacity of an anchor is applicable without reductions.
c_{min} = The least edge distance at which the anchors are tested for recognition.
f_A, f_{RV}, f_{RN} = Load reduction factors applied to the allowable bond or concrete working loads when:

$$s_{min} \le s \le s_{cr} \text{ or } c_{min} \le c \le c_{cr}$$

Linear interpolation of allowable loads may be used for spacings between s_{cr} and s_{min} and edge distances between c_{cr} and c_{min}, as well as intermediate embedment depths.

[1]For an anchor affected by multiple anchor spacings and/or edge distances, the allowable adjusted load is the product of the following factors:

$$F = f_{A1} \times f_{A2} \ldots\ldots f_{An} \times f_{R1} \times f_{R2} \ldots\ldots f_{Rn}$$

TABLE 7—ALLOWABLE TENSION AND SHEAR LOADS BASED ON BOND OR CONCRETE FOR THREADED RODS CONNECTING SILL PLATE AND OTHER ATTACHMENTS TO NORMAL-WEIGHT CONCRETE AT $1^3/_4$ INCHES EDGE DISTANCE USING HILTI HIT RE 500 ADHESIVE (pounds)[1,2,3,4,5,6,7,8,9]

ANCHOR DIAMETER (inch)	EMBEDMENT DEPTH (inches)	EDGE DISTANCE (inches)	TENSION	SHEAR	
				Load Applied Perpendicular to Edge	Load Applied Parallel to Edge
$^1/_2$	$4^1/_2$	$1^3/_4$	1,990	645	2,100
	$5^5/_8$		2,545		
$^5/_8$	$5^5/_8$	$1^3/_4$	3,070	670	2,985
	10		6,345	885	2,700
$^3/_4$	$6^3/_4$	$1^3/_4$	3,555	875	3,400
	$9^3/_8$		5,305		
$^7/_8$	$7^7/_8$	$1^3/_4$	5,015	875	3,400
	15		8,085	875	3,400

For **SI:** 1 inch = 25.4 mm, 1 lbf = 4.45 N, 1 psi = 6.89 kPa.

[1]Loads in this table are for threaded rod complying with Section 3.2.2 installed in the concrete at the edge distance listed in this table. No reductions for edge distance are required when anchors are installed with the edge distance specified in this table. Capacity of attached sill plate or other material to resist loads in this table shall be determined in accordance with the applicable code.
[2]Edge distances are given in this table. No reductions in edge distance are permitted when anchors are installed with the $1^3/_4$-inch edge distance specified in this table. Anchor spacing shall conform to the dimensions given in Table 6.
[3]When anchors are used to resist short-term loads, allowable loads should be calculated in accordance with Section 4.1 of this report.
[4]Allowable loads have been calculated using a safety factor of 4.0.
[5]Concrete thickness shall be equal to or greater than 1.5 times the anchor embedment depth.
[6]The tabulated values are for anchors installed in concrete complying with Section 3.4 having the designated compressive strength (f'_c) or greater at the time of installation.
[7]Allowable loads shall be the lesser of tabulated loads and steel values shown in Table 4.
[8]For intermediate embedments, use linear interpolation to determine allowable load.
[9]See Table 4 for load capacities of threaded steel rods.

TABLE 8—HILTI RECOMMENDED GEL TIME AND CURE TIME FOR HILTI HIT RE 500 ADHESIVE[1,2]

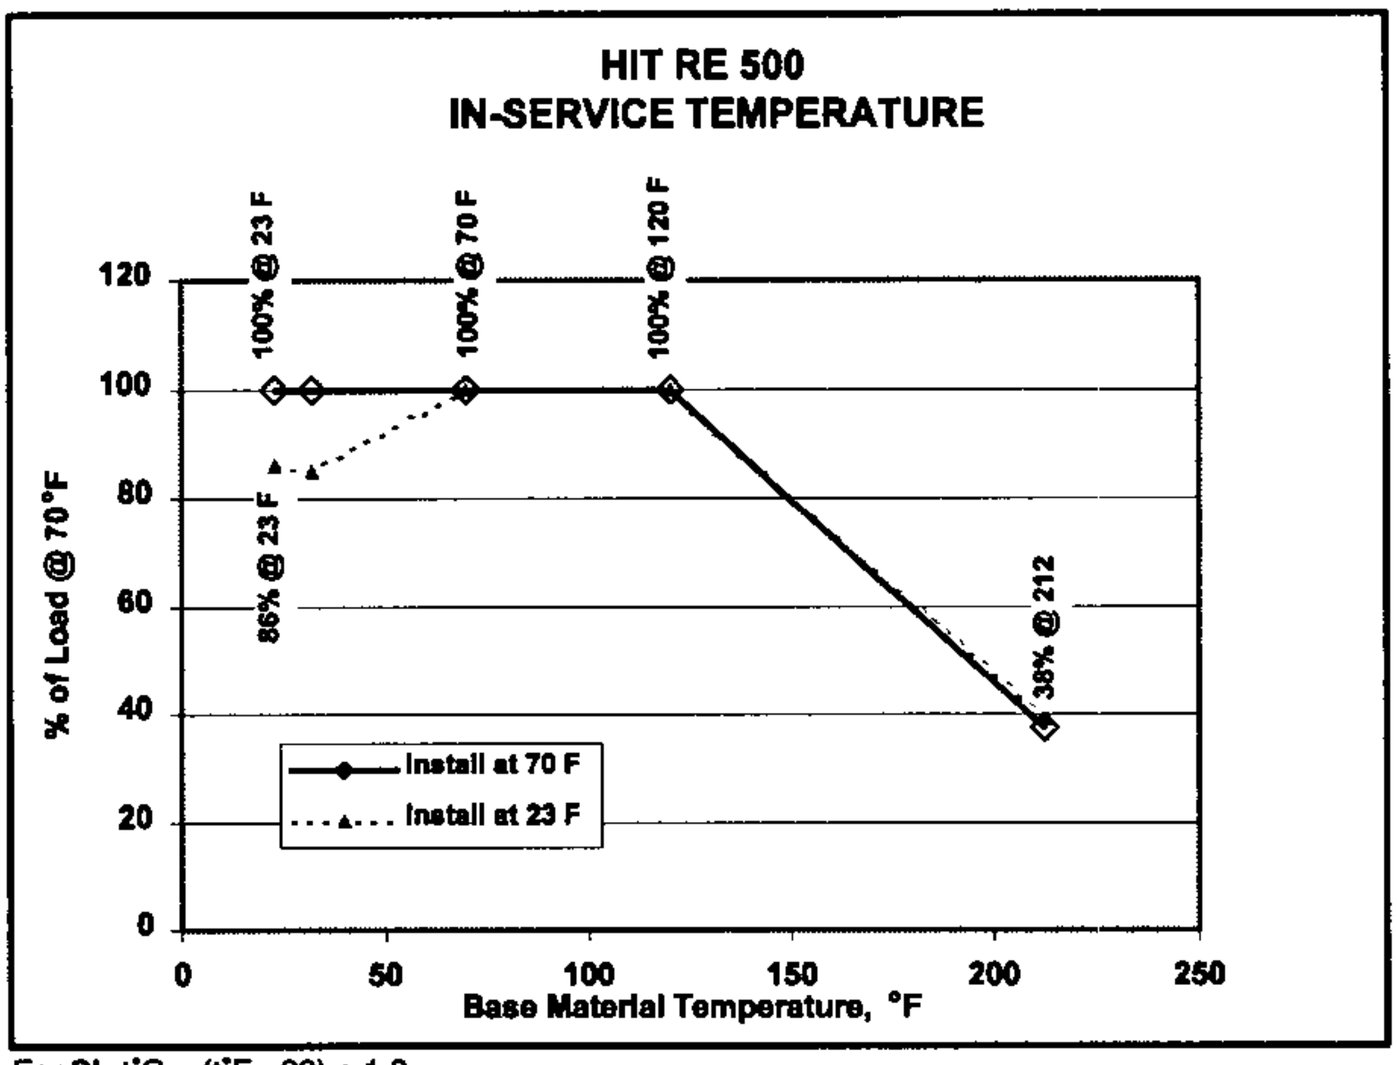
MINIMUM BASE-MATERIAL TEMPERATURE	GEL TIME[1,2]	CURE TIME[1,2]
23°F (-5°C)	4 hours	72 hours
32°F (0°C)	3 hours	50 hours
50°F (5°C)	2 hours	24 hours
70°F (20°C)	30 minutes	12 hours
85°F (30°C)	20 minutes	8 hours
104°C (40°C)	12 minutes	4 hours

For **SI:** t°C = (t°F - 32) ÷ 1.8.

[1]Section 4.2.1 describes permitted operations relative to these time periods.
[2]As measured from the time of anchor installation.

TABLE 9—LOAD COMBINATION ADJUSTMENT FACTORS

STEEL TYPE	LOAD COMBINATIONS	
	Basic Load Combination (Minimum)	Alternative Load Combination (Maximum)
Standard HAS	0.75	1.33
Super HAS	1.07	0.94
Stainless	0.88	1.14
Grade 60 Rebar	0.75	1.33

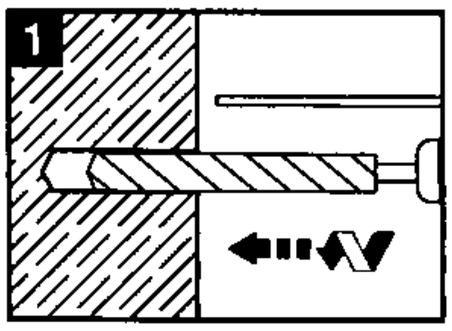


For **SI:** t°C = (t°F - 32) ÷ 1.8.

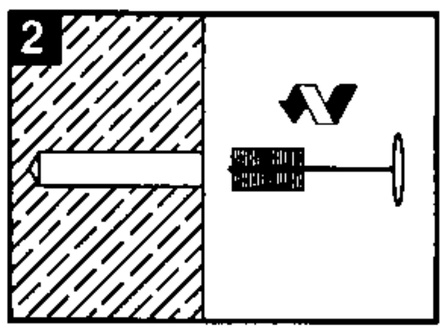
FIGURE 1—INFLUENCE OF TEMPERATURE ON ALLOWABLE TENSION AND SHEAR LOADS FOR HILTI HIT RE 500 ADHESIVE

HIT RE 500 Injection Adhesive Anchor

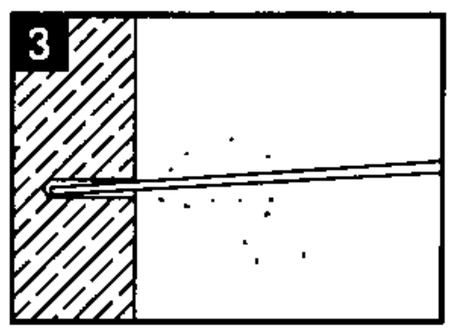
4.2.4.4 Installation Instructions



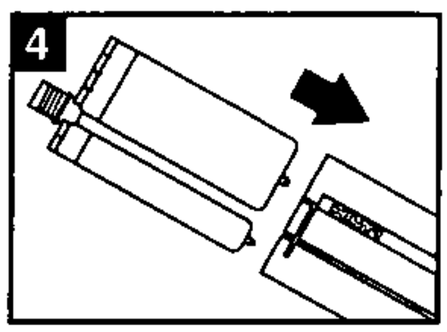
1. Drill anchor hole using carbide or diamond core bits.



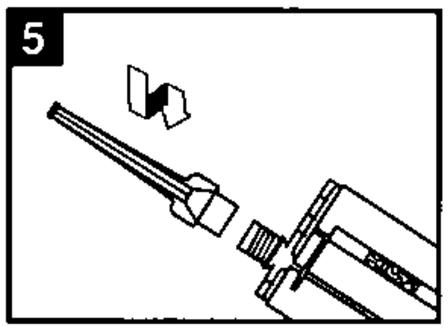
2. Clean hole with a nylon or wire brush. Proper hole cleaning is essential. For core bits, flush hole clean with water then immediately remove standing water.



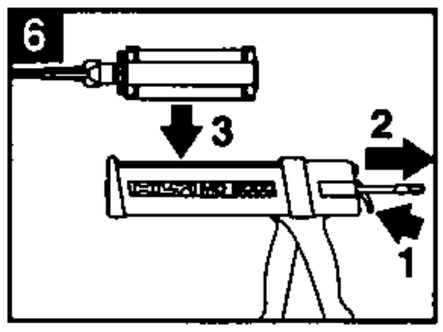
3. Insert air nozzle to bottom of hole and blow out hole using a pump, or compressed air. For underwater holes, flush hole with clean water after brushing.



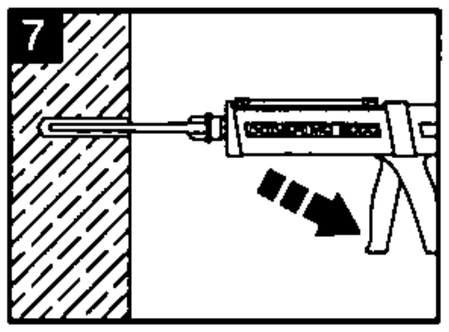
4. Insert refill pack into holder. Remove cap covering threaded projection.



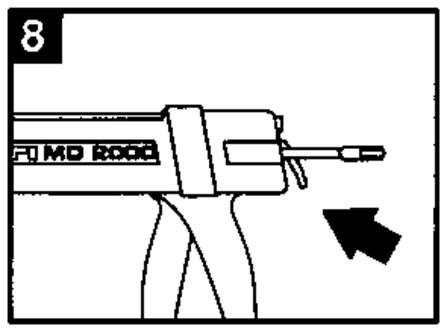
5. Screw on static mixer.



6. Put holder into dispenser and **DISCARD FIRST THREE TRIGGER PULLS OF ADHESIVE FROM EACH REFILL PACK.**

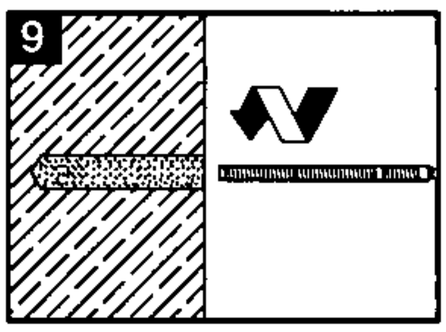


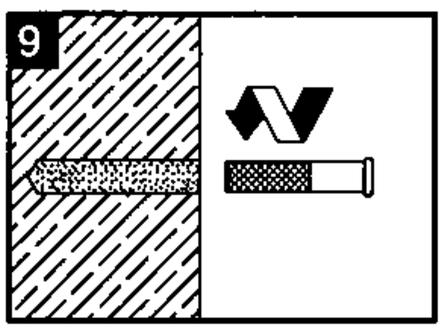
7. Inject adhesive into hole starting at the bottom until 1/2 to 2/3 full. Use mixer filler tube extensions when needed to reach the hole bottom.

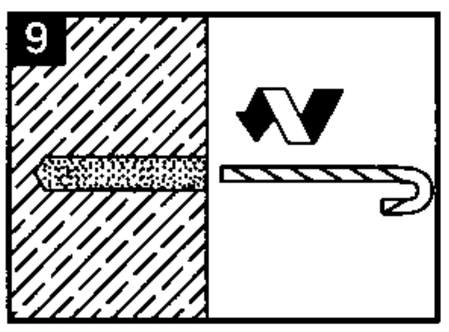


8. Unlock dispenser.

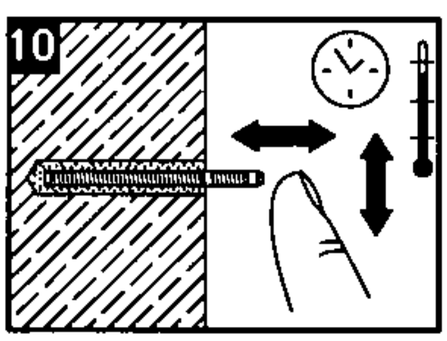
Rod **Insert** **Rebar**

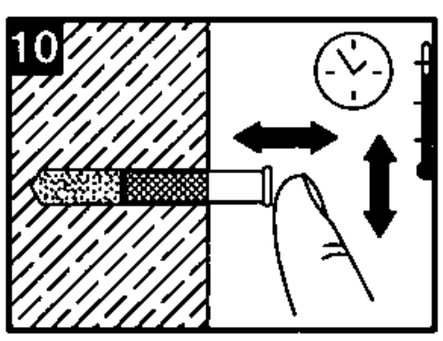


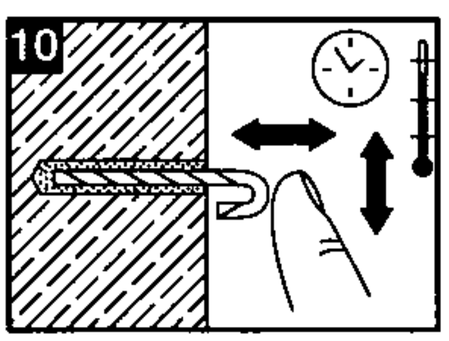




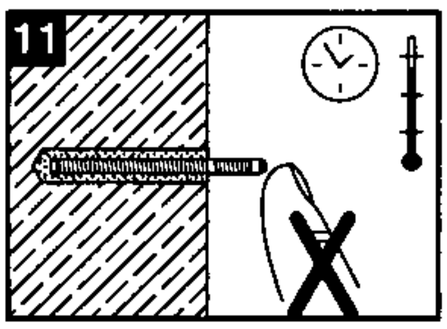
9. Insert rod, threaded insert or rebar. Twist during installation.

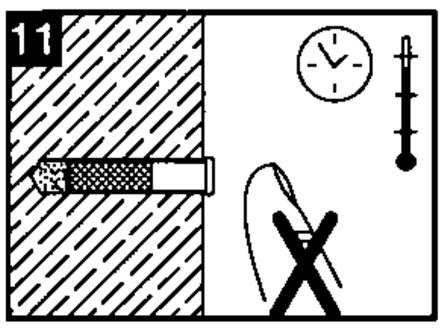


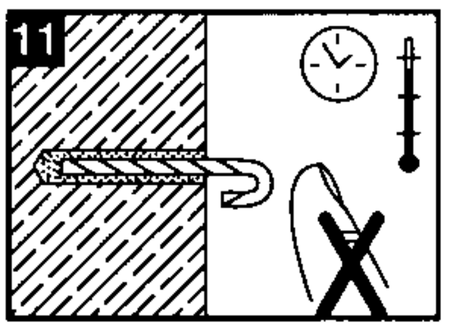




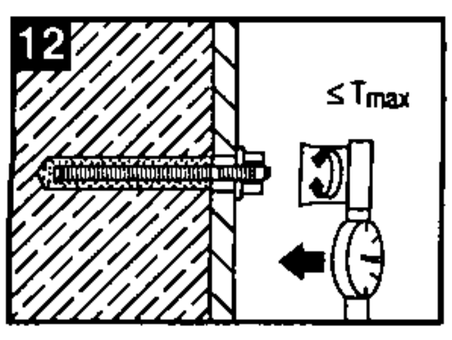
10. Fastener may be adjusted during specified gel time.

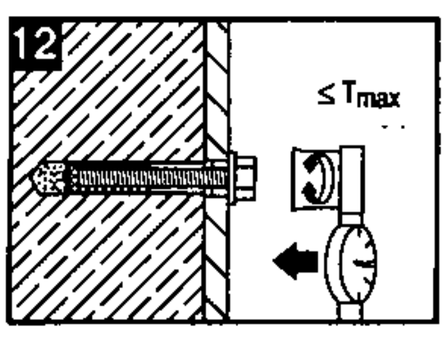


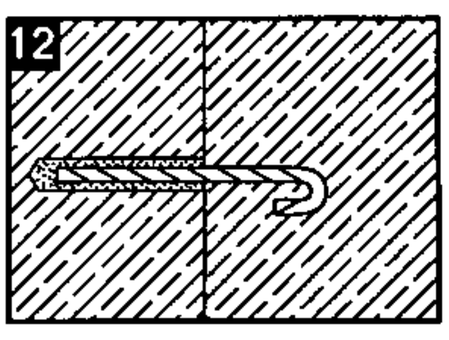




11. Do not disturb anchor between specified gel time and initial cure time. At the initial cure time the fastener has 25% of full working load. Work may proceed (e.g. tying rebar, setting steel) which will not exceed 25% of the full working load. Do not torque anchor.







12. After full cure time, apply specified torque as required to secure items to be fastened. Do not exceed maximum torque specified.

CITY OF SAN JOSÉ, CALIFORNIA
DEPARTMENT OF PLANNING, BUILDING AND CODE ENFORCEMENT
STATEMENT OF EXEMPTION

FILE NO.	H06-081
LOCATION OF PROPERTY	east side of Granite Rock Way from approximately 220 feet east of Hilltop Avenue to the terminus of Granite Rock Way (120 GRANITE ROCK WY)
PROJECT DESCRIPTION	Site Development Permit to construct 2,400 square foot truck wash facility on a 5.51 gross acres site
ASSESSOR'S PARCEL NUMBER	46217020

CERTIFICATION

Under the provisions of Section 15301(a) of the State Guidelines for Implementation of the California Environmental Quality Act (CEQA) as stated below, this project is found to be exempt from the environmental review requirements of Title 21 of the San José Municipal Code, implementing the California Environmental Quality Act of 1970, as amended.

Consists of the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of use beyond that existing at the time of the lead agency's determination. The types of "existing facilities" itemized below are not intended to be all-inclusive of the types of projects which might fall within Class 1. The key consideration is whether the project involves negligible or no expansion of an existing use. Examples include but are not limited to:

Interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances.

A truck wash facility constitues a minor alteration to an existing rock crushing, industrial operation. All water used in the truck wash, shall be reclaimed, recyled, and not discharged into the storm drain.

Joseph Horwedel, Acting Director
Planning, Building and Code Enforcement

Dear Pat,

F.W. Associates has received and reviewed San Jose's electrical plan check comments and our responses are as follow:

1. Drawing E-3. We have revised the single line diagram indicating 120/208V, 3 phase, 4 wire WYE system. We have also revised panel schedule to indicate 120/208V, 3 phase, 4 wire service.

2. We have added a note regarding the "TP-1" rated transformer in Specification Section # 12.A on Drawing E-3.

3. Enclosed please find two sets of stamped and signed revised electrical plans for your resubmittal to San Jose Electrical Plan Check Department.

Please feel free to call me should you have any questions.

Sincerely,
F.W. Associates, Inc.

TITLE:

WIND DESIGN:
  UBC SECTION 2916
  110 MPH WIND
  EXPOSURE Ce=1.22 (OPEN, FLAT, 0-20 FT.)
  CYLINDRICAL SHAPE Cq=.8
  DESIGN PRESSURE: 34 PSF
SEISMIC DESIGN:
  UBC SECTION 2336(b) ZONE 4, HAZARDOUS, ON GRADE
  Fp=ZI Cp Wp=(.4X1.5)(2/3X.75)Wp
  Fp=.3 Wp
GENERAL:
1. ALL DESIGN WORK IS BASED ON THE CURRENT EDITION OF THE UNIFORM BUILDING CODE.
2. ALL CONSTRUCTION MUST MEET LOCAL BUILDING CODE REQUIREMENTS AND BE APPROVED BY THE CONSTRUCTION SITE ENGINEER.
3. THESE GUIDELINES HAVE BEEN PROVIDED TO SPECIFY THE RESTRAINT RECOMMENDATIONS FOR SNYDER INDUSTRY CONE BOTTOM BULK STORAGE TANKS.

CONCRETE MATERIAL:
1. CONCRETE SHALL ATTAIN A MINIMUM ULTIMATE 28 DAY COMPRESSIVE STRENGTH OF Fc=3000 PSI.

CONCRETE REINFORCEMENT:
1. REINFORCING STEEL SHALL CONFORM TO THE REQUIREMENTS OF ASTM A615 GRADE 40 (Fy 40,000 PSI.) AND/OR WELDED WIRE FABRIC PER ASTM A185.
2. LAP ALL BARS A MINIMUM OF 40 BAR DIAMETERS. LAP WIRE FABRIC 6" MINIMUM.
3. MINIMUM COVER FOR REINFORCING BARS SHALL BE AS FOLLOWS:
   - 3" FOR CONCRETE DEPOSITED DIRECTLY AGAINST EARTH.
   - 2" FOR CONCRETE DEPOSITED IN FORMS.
4. CONCRETE PAD DESIGN SHOULD BE COMPLETED BY THE CONSTRUCTION SITE ENGINEER BASED ON SPECIFIC APPLICATION.

STRUCTURAL STEEL:
1. ALL STRUCTURAL STEEL COMPONENTS SHALL BE NEW AND OF BASIC OPEN HEARTH PROCESS STEEL CONFORMING TO ALL APPLICABLE REQUIREMENTS OF ASTM A500, A513, ANSI 1020, AND ANSI 1026 (DEPENDS ON STRUCTURAL SHAPE).
2. ALL ARC WELDING ELECTRODES SHALL CONFORM TO ASTM A233 FOR STEEL ARC WELDING ELECTRODES. ELECTRODES SHALL BE AS RECOMMENDED BY THE MANUFACTURES FOR THE POSITIONS AND OTHER CONDITIONS OF ACTUAL USE. WELDING SHALL CONFORM TO REQUIREMENTS OF AMERICAN WELDING SOCIETY AWS D12.1.
3. ALL SHARP EDGES AND CORNERS SHALL BE REMOVED ON ALL STRUCTURAL STEEL COMPONENTS.
4. CABLES TO BE 7X19 STRANDED CORE CONSTRUCTION SIZED PER CHART. MATERIAL TO BE SPECIFIED BY CUSTOMER ORDER (MINIMUM BREAKING STRENGTH EQUAL TO OR GREATER THAN 304 SS RATING).
5. ANCHOR BOLTS TO BE HILTI ADHESIVE ANCHORS, MODEL HVA WITH SIZE AND MATERIAL AS SPECIFIED PER SPECIFICATION CHART.
   ALL 1/2" DIA. HVA ANCHORS TO HAVE 4-1/4" EMBEDMENT.
   ALL 3/4" DIA. HVA ANCHORS TO HAVE 6-5/8" EMBEDMENT.
   ALL OTHER FASTENER MATERIALS MUST CORRESPOND TO THE TYPE OF ANCHOR SELECTED.

QUALITY CONTROL

SPECIAL INSPECTIONS

1. Special inspection per CBC Section 106.3.5 & 1701 is required on the following:

a. Masonry	
i. Where f'm is greater than 1500 psi	NR
ii. Reinforcement placement in masonry with special inspection	NR
b. Concrete	
i. Where f'c is greater than 2500 psi, except for slab on grade	NR
ii. Reinforcement placement in concrete with special inspection	NR
iii. Anchor bolts in tension (where noted on drawings)	NR
c. Welding	
i. Ductile moment resisting steel frames per CBC Section 2211.7.	NR
ii. All structural welding except welding performed in an approved fabricator's shop.	NR
d. All high strength bolting in "slip-critical" connections. See plans and steel notes for location of "slip-critical" connections.	NR
e. Special diaphragm nailing where noted on drawings.	NR
f. Drilled or Epoxy concrete and masonry anchors	●

● REQUIRED NR NOT REQUIRE

2. The special inspector shall be under the supervision of a registered professional engineer.
   a. The special inspector shall observe the work assigned for conformance with the approved design drawings and specifications.
   b. The special inspector shall furnish inspection reports to the Building Official, Engineer or Architect of Record and other designated persons. All discrepancies shall be brought to the immediate attention of the contractor for correction, then, if not corrected, to the proper design authority and to the Building Official.
   c. The Special Inspector shall submit a final signed report, signed by a registered professional engineer, stating whether the work requiring special inspection was in conformance with the approved plans and specifications and the applicable workmanship provisions of the CBC.
   d. An application for off-site fabrication must be submitted to the field inspection division for approval prior to fabrication.
   e. Certificate of compliance for off site fabrication must be completed and submitted to the field inspection division prior to the erection of prefabricated components.
3. The contractor shall contact the Planning and Building Inspection Department to schedule Special Inspection meeting prior to construction.

STRUCTURAL NOTES

I. GENERAL

1. All construction, workmanship and materials shall conform with the requirements of the 2001 Edition C.B.C., and any other governing code.
2. The contractor shall verify all dimensions, elevations and site conditions and shall become completely familiar with the construction documents prior to starting construction.
3. The Architect and Engineer shall be notified of any omissions or discrepancies in the working drawing and/or specifications before proceeding with any work so involved.
4. All dimensions take precedence over scale shown on plans, sections and details.
5. Specific notes and details take precedence over structural notes and typical details.
6. Where specific details are not provided, construction can follow details for similar conditions, unless conflicts occur.
7. The contractor shall be responsible for the design, installation and maintenance of all bracing and shoring required during construction until all construction is finalized.
8. Job site safety is the sole responsibility of the contractor.
9. See architectural drawings for the size and location of all door and window openings, location of non-bearing partitions, roof an floor elevations, roof slopes, architectural finishes, and other related information not indicated on the structural drawings.
10. See mechanical, electrical and/or architectural drawing for the size and location of pipes, conduits, floor drains, vents, ducts, and other similar penetrations not indicated on the structural drawings.

II. FOUNDATIONS

1. All foundation and related site work shall comply with the requirements of Chapter 18 of the C.B.C.
2. Foundation have been designed for a maximum soil pressure of 1500 PSF in accordance with provisions of Table No. 18-1-A of the California Building Code, for Soil Class "4". If actual site conditions differ from those above,the site shall be prepared according to the recommendations of a competent Geotechnical Engineer registered in the State of California.
3. Footing and utility trench backfill within the building area shall be clean sand, mechanically compacted in thin layers to a minimum of 95% of relative density.

III. CONCRETE

Reinforcing Steel

1. Reinforcing bars shall conform to ASTM A615 for deformed bars Grade 40 for #4 bars and smaller, and Grade 60 for #5 bars and larger.
2. All bars shall be clean of rust, grease or other materials likely to impair bond.
3. All reinforcing bar bends shall be made cold and conform to the ACI Manual of Standard Practice.
4. Reinforcing bars shall be wired together at splices as follows:

REINFORCING CONCRETE

REINFORCEMENT DEVELOPMENT LENGTHS: (LENGTH IN INCHES) f'_c = 2500 PSI AT 28 DAYS

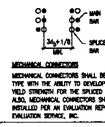
BAR SIZE	#3 GR40	#4	#5	#6	#7	#8	#9	#10	#11
TOP	16	32	39	47	69	78	88	100	110
OTHER	12	24	30	36	53	60	68	77	85

REINFORCEMENT LAP SPLICES: (LENGTH IN INCHES) f'_c = 2500 PSI AT 28 DAYS

BAR SIZE	#3	#4	#5	#6	#7	#8	#9	#10	#11
* TOP BARS	21	42	51	62	90	102	115	130	143
OTHER BARS	16	32	39	47	69	78	89	101	111

TOP REINFORCING IS HORIZONTAL REINFORCEMENT THAT HAS MORE THAN TWELVE INCHES OF CONCRETE PLACED BELOW IT.

USE WELDED SPLICE OR MECHANICAL CONNECTOR IF THE LAP SPLICE REINFORCEMENT DOES NOT HAVE A MINIMUM SPACING $3d_b$+1/8 INCHES AND A MINIMUM COVER OF d_b+1/8 INCHES



WELDED SPLICE: (DIRECT BUTT SPLICES-FULL PENETRATION)
#8 AND SMALLER SINGLE-BEVEL GROOVE WELD
#9 AND LARGER DOUBLE-BEVEL GROOVE WELD
WELDS SHALL HAVE THE ABILITY TO DEVELOP 125 PERCENT OF THE YIELD STRENGTH FOR THE SPLICED REINFORCEMENT (75 KSI)

MECHANICAL CONNECTORS
MECHANICAL CONNECTORS SHALL BE TENSION-COMPRESSION TYPE WITH THE ABILITY TO DEVELOP 125 PERCENT OF THE YIELD STRENGTH FOR THE SPLICED REINFORCEMENT (75KSI). ALSO, MECHANICAL CONNECTORS SHALL HAVE AND BE INSTALLED PER AN EVALUATION REPORT FROM ICBO EVALUATION SERVICE, INC.

III. CONCRETE (CONT.)

5. Unless otherwise noted, minimum concrete coverage for reinforcing bars shall be as follows:

Concrete in contact with earth, unformed	3"
Concrete in contact with earth, formed	2"
Walls (interior face)	1"
Slab on grade	1-1/2"

Cast-In-Place Concrete

1. All concrete used for this work shall comply with A.C.I. "Specifications for Structural Concrete" (A.C.I. 301-96). The material used to prepare the concrete shall meet the following standards:

Water	Clean, Potable
Portland cement	ASTM C150
Coarse aggregate	3/4" rock ASTM C33
Fine aggregate clean sand	ASTM C33-77

2. All concrete used for this work shall be proportioned to meet the following 28 day ultimate compressive strength requirements:

~~Concrete Walls (12" Thick)~~	~~150 PCF. f' c = 4000 PSI~~
~~Raised Floor Deck Slab (6 1/2")~~	~~150 PCF. f' c = 4000 PSI~~
Footings	150 PCF. f' c = 2500 PSI
~~Grade beams and piers~~	~~150 PCF. f' c = 2500 PSI~~
Slab on grade	150 PCF. f' c = 2500 PSI

3. Add mixtures shall not be used unless specifically authorized by the Engineer.
4. A mix design including proposed admixtures and supporting test data for strength and shrinkage shall be submitted for review and approval prior to concrete placement.
5. All reinforcing bars, anchor bolts, hold-downs and other embeds shall be well secured in place prior to concrete placement.
6. All reinforcement and other embeds shall be inspected and approved prior to concrete placement.
7. Concrete shall be placed as a continuous operation without any interruptions longer than 45 minutes.
8. The slump at time of placement shall be the minimum consistent with placing conditions but shall not exceed 4".
9. Mechanical vibrators or other "approved" methods for thorough consolidation shall be used. For slab on grade, approved grid tampers may be used.

GENERAL:

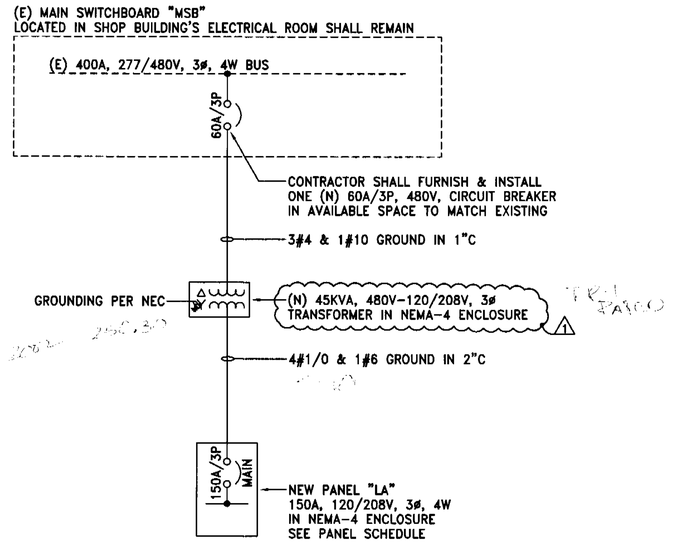
1. ALL LABOR, MATERIALS AND WORKMANSHIP SHALL BE IN ACCORDANCE WITH ALL APPLICABLE CODES; NATIONAL, STATE AND LOCAL. ALL WORK SHALL BE PERFORMED AND INSTALLED IN A NEAT AND WORKMANLIKE MANNER. NO EXTRA CHARGE WILL BE PAID FOR FURNISHING ITEMS REQUIRED BY THE REGULATIONS, BUT NOT SPECIFIED HEREIN OR ON THE DRAWINGS.
2. PAY ALL FEES AND OBTAIN ALL PERMITS NECESSARY FOR THE COMPLETION AND INSPECTION OF THIS WORK, NOTIFY ALL INTERESTED AUTHORITIES WHEN THIS WORK IS READY FOR ANY NECESSARY INSPECTION.
3. VISIT THE SITE OF THE WORK. COMPARE IT WITH THE DRAWINGS AND SPECIFICATIONS AS TO THE CONDITIONS UNDER WHICH WORK IS TO BE PERFORMED, ASCERTAIN AND CHECK ALL CONDITIONS AND ELEVATIONS AND TAKE ALL MEASUREMENTS WHICH MAY AFFECT THE EXPENSE OR CLAIMS DUE TO FAILURE OR NEGLECT UNDER THIS SECTION TO MAKE SUCH EXAMINATION, INCLUDING EXAMINATION OF THE RESTRICTED WORKING CONDITIONS OR SUCH OTHER DIFFICULTIES VISUALLY OBSERVED DURING THE SITE VISIT.
4. THERE IS NOW EXISTING WITHIN THE BUILDING, COMPLETE AND OPERATING MECHANICAL, PLUMBING AND ELECTRICAL SYSTEMS. THESE SYSTEMS SHALL BE KEPT IN OPERATION AT ALL TIMES AND SHALL NOT BE SHUT DOWN UNDER ANY CIRCUMSTANCES WITHOUT PRIOR APPROVAL OF THE OWNER.
5. DURING THE PERFORMANCE OF ANY WORK IN THE BUILDING, COVER WITH U.L. LABELED SHEET PLASTIC OR CANVAS ALL OWNER EQUIPMENT AND FURNISHINGS, OFFICE FURNITURE, WALL AND FLOORS, ETC., ADJACENT TO THE WORK TO PROTECT SAME FROM DUST AND/OR DIRT WHERE SO REQUIRED, OR AS DIRECTED. ALL WORK SHALL BE PROSECUTED SO AS TO CAUSE NO DAMAGE OR INTERRUPTION TO THE BUILDING EQUIPMENT OR OPERATION.
6. FINAL TEST: THE FINAL AND ACCEPTANCE TEST AND INSPECTION SHALL BE MADE AT THE TIME ACCEPTABLE TO THE OWNER AND SHALL BE PAID FOR BY THE CONTRACTOR AS A PORTION OF THE CONTACT PRICE. SHOULD ANY PART OF THE SYSTEM OR ANY MATERIALS FAIL THIS TEST, IT SHALL BE RECTIFIED.
7. GUARANTEE: THE FOLLOWING GUARANTEE IS A PART OF THE CONTRACT BETWEEN THE CONTRACTOR AND THE OWNER.
   THE CONTRACTOR GUARANTEES THAT THIS INSTALLATION IS FREE FROM MECHANICAL OR ELECTRICAL DEFECTS. HE AGREES TO REPLACE OR REPAIR TO THE SATISFACTION OF THE OWNER ANY PART OF THE INSTALLATION, WHICH MAY FAIL WITHIN A PERIOD OF ONE (1) YEAR AFTER FINAL ACCEPTANCE, PROVIDED THAT SUCH FAILURE IS DUE TO DEFECTS IN MATERIALS OR WORKMANSHIP OR FAILURE TO FOLLOW THE SPECIFICATIONS AND DRAWINGS. THE CONTRACTOR SHALL ALSO AGREE TO REPLACE OR REPAIR WITH THE LIKE WORKMANSHIP AND MATERIALS ANY PART OF THE BUILDING OR EQUIPMENT INSTALLED BY OTHERS BUT DAMAGED BY HIM IN THE INSTALLATION OF HIS WORK. THIS GUARANTEE SHALL BE IN WRITING AND A SIGNED COPY SHALL BE PRESENTED TO THE OWNER UPON RECEIPT OF THE FAINL AND ACCEPTANCE PAYMENT.

ELECTRICAL MATERIALS:

1. GENERAL:
   A. MATERIALS SHALL BE NEW, PACKED IN ORIGINAL CONTAINERS, INSTALLED AND TURNED OVER TO THE OWNER FREE OF DEFECTS.
   B. MATERIALS SHALL BEAR UNDERWRITER'S LABORATORY LABEL EXCEPT EQUIPMENT WHICH U.L. DOES NOT LIST OR PROVIDE LABEL SERVICE.
   C. FURNISH EQUIPMENT AND MATERIALS FOR ANY ONE SYSTEM BY THE SAME MANUFACTURER.
2. CONDUIT:
   A. RIGID STEEL: HOT DIPPED GALVANIZED, FOR USE EXPOSED OUTSIDE BUILDING AND IN SLAB FLOOR OR WALL. MANUFACTURER: WALKER, NATIONAL, APPLETON, TRANGLE, ROME OR EQUAL.
   B. EMT: USE IN WALLS AND ABOVE CEILING INSIDE BUILDING EXCEPT NOT IN CONCRETE WALLS AND SLAB. SAME MANUFACTURER AS RIGID STEEL.
   C. LIQUID TIGHT FLEXIBLE METAL CONDUIT. MANUFACTURER: AMERICAN BRASS, SEALTIGHT OR EQUAL.
   D. PVC SCHEDULE 40: UNDERGROUND EXTERIOR, UNDER BUILDING SLAB.
3. CONDUIT FITTINGS: E.M.T. – W.T. COMPRESSION OR SET SCREW. INDENTER TYPE NOT ACCEPTABLE.
4. PULLBOXES: CONSTRUCTED OF CODE GAUGE GALVANIZED SHEET STEEL WITH SCREW ON COVER.
5. WIRE: TYPE "THWN" OR "TW", 600 VOLT, #12 AWG MINIMUM U.O.N.
6. WIRE CONNECTIONS: "SCOTCHLOKS" TYPE "RY&B" OR LUGS, TYPE "QDA".
7. ESCUTCHEON PLATES: SHALL BE BEATON & CORBIN #34, OR APPROVED ALTERNATE, CAST BRASS, FLOOR AND CEILING PLATES USED ON ALL EXPOSED CONDUITS PENETRATING WALLS, FLOORS OR CEILING.
8. OUTLETS FOR CEILING AND WALL OUTLETS: ALL 4" SQUARE OR LARGER WITH COVER.
9. ELECTRICAL GROUNDING SYSTEM: ALL EQUIPMENT, CONDUIT, BOXES, AND NEUTRALS SHALL BE PERMANENTLY AND EFFECTIVELY GROUNDED AS CALLED FOR IN THE LATEST EDITION OF THE NATIONAL ELECTRICAL CODE, STATE DIVISION OF THE INDUSTRIAL SAFETY, AND ALL LOCAL CODES. THE NEUTRAL WIRE, WHICH MAY CARRY CURRENT UNDER THE NORMAL OPERATION SHALL NOT BE USED AS A GROUND WIRE.
10. CIRCUIT BREAKERS INSTALLED IN EXISTING PANELBOARD:
    A. GENERAL: CIRCUIT BREAKERS SHALL BE LISTED FOR THE PANELBOARD THAT THEY ARE TO BE INSTALLED.
    B. INTERRUPTING CAPACITY OF CIRCUIT BREAKERS SHALL MATCH THE HIGHEST CIRCUIT BREAKER I.C. RATING IN EXISTING PANELBOARD.
11. PANELBOARD:
    A. FURNISHED AND INSTALL PANELBOARDS AS INDICATED ON THE DRAWINGS. THE BREAKERS SHALL BE OF THE BOLT-ON TYPE, AND HAVE AN INTERRUPTING CAPACITY AS NOTED. ALL PANELS SHALL BE MOUNTED +60" TO TOP OF PANEL.
    B. ALL MULTI-POLE BREAKERS SHALL BE COMMON TRIP. BUS SEQUENCE SHALL START AT THE TOP LEFT PHASE BUS OF THE INTERIOR FOR BOTH TOP AND BOTTOM FED PANELS. PROVISIONS FOR SPACE AND FUTURE BREAKERS SHALL BE LOCATED AT THE BOTTOM OF THE PANEL AND BE FULLY BUSSED COMPLETE WITH ALL NECESSARY MOUNTING HARDWARE LESS THE BREAKER. LOCATE NEXT TO EACH BREAKER OR PROVISION AN INDIVIDUAL NUMBER BUTTON WITH AN ENGRAVED OR DEPRESSED NUMBER. NUMBERING TAPE, PAINTED NUMBERS OR USE OF MORE THAN ONE NUMBER PER BREAKER IS UNACCEPTABLE.
    C. BUS-BARS: SHALL BE SOLID COPPER, COLOR CODED AND SUPPORTED BY GLASS-FILLED POLYESTER TYPE INSULATORS. ALL BOLTS USED TO CONNECT CURRENT-CARRYING PARTS TOGETHER SHALL BE ACCESSIBLE FOR TIGHTENING FROM THE FRONT OF THE PANEL.
    D. PANELBOARD SHALL BE IN NEMA-4 ENCLOSURE FOR OUTDOOR INSTALLATION.
12. DRY-TYPE TRANSFORMERS:
    A. VENTILATED DRY-TYPE TRANSFORMERS AS MANUFACTURED BY SQUARE D COMPANY SORGEL, ACME ELECTRIC CO. OR APPROVED ALTERNATE, SHALL BE DESIGNED IN FULL ACCORDANCE WITH THE LATEST REVISIONS OF NEMA ST-20 STANDARD OF A 220 DEGREES C. UNDERWRITER'S LABORATORY STANDARD NO. 506 INSULATION SYSTEM. TRANSFORMER SHALL BE TP-1 RATED. 1
    B. THE WINDING SHALL BE COPPER AND SIZED TO PROVIDE A MAXIMUM OF 150 DEGREE C. TEMPERATURE ABOVE 40 DEGREE C. AMBIENT DUE TO RESISTANCE AT CONTINUOUS RATED FULL LOAD. THE MAXIMUM TEMPERATURE OF THE TOP OF THE ENCLOSURE SHALL NOT EXCEED 50 DEGREES C. RISE ABOVE A 40 DEGREES C. AMBIENT. SOUND LEVEL SHALL NOT EXCEED 45 db.
    C. TRANSFORMERS SHALL HAVE A MINIMUM 10 PERCENT CONTINUOUS OVERLOAD CAPACITY AT NOMINAL VOLTAGE.
    D. PRIMARY TAPS SHALL BE FULL CAPACITY, WITH 6 TAP INCREMENTS OF 4-1/2% BELOW AND 2-1/2% ABOVE RATED VOLTAGE.
    E. TRANSFORMER SHALL HAVE NEMA-4 OUTDOOR ENCLOSURE.
    F. BRACKETS OR FEET SHALL BE PROVIDED FOR MOUNTING. VIBRATION DAMPERS SHALL BE FURNISHED.
    G. LIQUID-TIGHT FLEXIBLE METALLIC CONDUIT OR WIREWAY SHALL BE USED TO CONNECT TRANSFORMER TO BOTH PRIMARY AND SECONDARY FEEDER CONDUITS.
13. OUTLET BOXES FOR CEILING AND WALL OUTLETS: ALL 4" SQUARE OR LARGER WITH COVER.
14. RECEPTACLES: ALL RECEPTACLES BODIES ARE TO BE DUPLEX, 20A, 3PG 120V. A&H #5362, HUBBELL #5362, BRYANT #5362, P&S #5362, OR EQUAL. FURNISH GROUND FAULT CIRCUIT INTERRUPTER TYPE AS INDICATED. HUBBELL #GF5362, OR EQUAL. COLOR SHALL BE WHITE OR AS SELECTED BY THE ARCHITECT.
15. COVER PLATES: COLOR SHALL BE WHITE OR AS SELECTED BY ARCHITECT.
16. WIRE TERMINATIONS AND SPLICING:
    A. POWER CONDUCTORS SPLICED WITH BURNDY HYLINK, O.Z. OR ANDERSON. POWER CONDUCTORS TERMINATED WITH BURNDY HYLUG.
    B. LUGS AND CONNECTORS: SHALL BE INSTALLED WITH A COMPRESSION TOOL.
    C. BRANCH CIRCUITS: USE 3M TYPE "YRG & G" CONNECTORS OR APPROVED EQUAL.

EXECUTION

1. INSTALLATION – GENERAL:
   A. INSTALL WORK NEATLY. RACEWAYS, FITTINGS, EQUIPMENT LEVEL, PLUMB AND STRAIGHT. CONNECTORS, LOCKNUTS, CLAMPS, AND JOINTS MADE UP TIGHTLY.
   B. CONDUIT, OUTLETS, EQUIPMENT, INSTALL TO CLEAR BEAMS OR OBSTRUCTIONS. DO NOT CUT OR REDUCE SIZE OF ANY LOAD CARRYING MEMBER WITHOUT APPROVAL.
2. INSTALLATION – RACEWAY:
   A. EXPOSED WIREWAY RUN PARALLEL OR AT RIGHT ANGLES TO BUILDING WALLS OR CEILING, OR AS DIRECTED BY ARCHITECT.
   B. PENETRATIONS THROUGH CONCRETE WALLS AND SLABS SHALL BE CORE DRILLED AND SEALED AIRTIGHT WITH CODE APPROVED MATERIALS AFTER CONDUIT INSTALLATION.
3. PENETRATION:
   A. ALL WALL AND FLOOR PENETRATIONS SHALL BE SEALED WATERTIGHT. MAINTAIN FIRE RATING AS REQUIRED.
4. PANELBOARDS:
   A. ALL BRANCH WIRING IN PANELS: SHALL BE BUNDLED WITH PLASTIC CABLE TIES, WITH WIRE TO DEVICES NEATLY BRANCHED. ALL WIRES SHALL BE MARKER TAGS.
   B. ALL ENCLOSURES: SHALL BE CLEAN AND FREE OF DEBRIS.
5. INSTALLATION – OUTLETS AND PULLBOXES:
   A. SET OUTLETS AND BOXES SQUARE WITH BUILDINGS, SECURED IN PLACE.
   B. CLEAN DEBRIS FROM ALL BOXES PRIOR TO INSTALLING WIRING DEVICES.
6. IDENTIFICATION: PROPERLY IDENTIFY ELECTRICAL EQUIPMENT USED FOR OPERATION OF, OR CONTROL OF, CIRCUITS, OR EQUIPMENT BY MEANS OF ENGRAVED LAMINATED PLASTIC DESCRIPTIVE NAMEPLATES MOUNTED ON APPARATUS, USING SCREWS.
7. TESTING:
   A. CONTRACTOR SHALL FURNISH ALL LABOR AND TEST EQUIPMENT REQUIRED.
   B. TEST CIRCUITS FOR UNINTENTIONAL GROUNDS AND SHORT CIRCUIT. MEGGER POWER CONDUCTORS AND RECORD READINGS. REPLACE CONDUCTORS FAILING MINIMUM INSULATION RESISTANCE PER N.E.C.
   C. TEST EACH INDIVIDUAL CIRCUIT WITH EQUIMENT CONNECTED FOR PROPER OPERATION.



SINGLE LINE DIAGRAM

NOTES: 1. DOTTED LINES INDICATE EXISTING CONDITION.
2. SOLID LINES INDICATE NEW CONDITION.

Rev. 4/30/02

GENERAL NOTES

1. ALL NEW CONSTRUCTION SHALL CONFORM TO CURRENT CITY, STATE AND NATIONAL CODES, STANDARDS AND REQUIREMENTS.
2. THE CONTRACTOR, SHALL VERIFY ALL EXISTING SITE CONDITIONS IN THE FIELD BEFORE COMMENCEMENT OF THE WORK AND SHALL REPORT ANY DISCREPANCIES AND/OR INCONSISTENCIES BETWEEN THE DRAWINGS, SPECIFICATIONS AND EXISTING FIELD CONDITIONS TO THE OWNERS REPRESENTATIVE FOR CLARIFICATIONS BEFORE COMMENCEMENT OF THE WORK.
3. THE CONTRACTOR PRIOR TO BIDDING, SHALL VISIT THE JOB SITE TO BECOME ACQUAINTED WITH THE EXISTING INSTALLATION AND SYSTEMS RELATED TO HIS WORK AND SHALL INCLUDE IN THE BID PROPOSAL ALL LABOR AND MATERIALS REQUIRED FOR THE INSTALLATION TO BE COMPLETE AND OPERATIVE.
4. THE CONTRACTOR SHALL CONSULT THE ELECTRICAL, STRUCTURAL AND OTHER DRAWINGS RELATED TO THIS PROJECT FOR ADDITIONAL WORK TO BE PROVIDED.
5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SECURING ALL TRADE LICENSES, ALL PERMITS AND INSPECTIONS.
6. THE CONTRACTOR SHALL PROVIDE ALL MATERIALS LABOR AND EQUIPMENT TO COMPLETE WORK AS SET FORTH IN THESE PLANS AND SPECIFICATIONS. UNLESS OTHERWISE NOTED, THE SUBMISSION OF A BID OR PROPOSAL, SHALL BE CONSIDERED AS CONCLUSIVE EVIDENCE THAT THE CONTRACTOR IS THOROUGHLY FAMILIAR WITH THE INTENT OF THE CONTRACT DOCUMENTS.
7. DRAWINGS ARE DIAGRAMMATIC IN NATURE AND EXISTING CONDITIONS SHALL BE FIELD VERIFIED FOR EXACT LOCATIONS AND SIZES OF EXISTING SYSTEMS AND NEW ROUTINGS.
8. DEMOLITION WORK SHALL BE PROVIDED AS REQUIRED TO ACCOMPLISH NEW WORK CALLED AND AS NOTED. WORK SHALL BE PERFORMED CAREFULLY TO AVOID DAMAGE TO EQUIPMENT OR SYSTEMS NOT BEING REMOVED.
9. ALL PIPING SHALL CONFORM WITH THE CALIFORNIA MECHANICAL CODE AND THE CALIFORNIA PLUMBING CODE.
10. PIPES SHALL BE SUPPORTED AND BRACED PER THE SMACNA "GUIDELINES FOR SEISMIC RESTRAINTS OF MECHANICAL SYSTEMS AND PLUMBING SYSTEM" OR R-0003 THE SUPERSTRUT "SEISMIC RESTRAINT SYSTEM" OR OTHER PRE-APPROVED SYSTEM.
11. MECHANICAL CONTRACTOR SHALL PROVIDE ADDITIONAL STRUCTURAL MEMBERS AS REQUIRED TO SUPPORT PIPING WHERE STRUCTURAL FRAME DOES NOT ALLOW FOR SUPPORT.
12. ANY UTILITY SHUTDOWNS SHALL BE COORDINATED WITH THE OWNER. A SHUTDOWN SCHEDULE SHALL BE PRESENTED TO THE OWNER FOR APPROVAL PER SPECIFICATIONS PRIOR TO COMMENCEMENT OF WORK. SHUTDOWN WORK SHALL BE PERFORMED ON OVERTIME HOURS IF SO DIRECTED BY THE OWNER.
13. CONTRACTOR SHALL ASSUME SOLE RESPONSIBILITY FOR SAFETY OF ALL PERSONS ON OR ABOUT THE CONSTRUCTION SITE, IN ACCORDANCE WITH APPLICABLE LAWS AND CODES. GUARD ALL HAZARDS IN ACCORDANCE WITH THE SAFETY PROVISIONS OF THE LATEST MANUAL OF ACCIDENT PREVENTION PUBLISHED BY THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA.
14. CLEAN ALL EXPOSED SURFACES AND NEW EQUIPMENT AFTER COMPLETION.
15. PROVIDE LABELS ON ALL EQUIPMENT AND DEVICES. LABELS SHALL BE SECURED WITH MACHINE SCREWS W/LAMINATED PLASTIC, WHITE LETTERS ON BLACK BACKGROUND.
16. THE CONTRACTOR SHALL MAINTAIN AT THE JOB SITE, AN UP TO DATE "AS-BUILT" DRAWING SET. THE "AS-BUILT" DRAWING SET SHALL REFLECT ALL APPROVED CHANGES TO THE DESIGN DRAWINGS. THE "AS-BUILT" DRAWING SET SHALL BE KEPT CLEAN AND IN GOOD CONDITION AND SHALL BE TURNED OVER TO THE OWNER AT THE COMPLETION OF THE PROJECT.
17. UPON COMPLETION OF THE WORK, THE CONTRACTOR SHALL SCHEDULE AND PERFORM A COMPLETE FUNCTIONAL TEST TO DEMONSTRATE TO THE OWNER THAT THE NEW INSTALLATION IS OPERATING AS INTENDED. ANY DEFECTS OR DEFICIENCIES IN THE MATERIALS OR WORK SHALL BE CORRECTED IMMEDIATELY BY AND AT THE CONTRACTORS EXPENSE. CONTRACTOR SHALL FURNISH ALL TEST PUMPS, GAUGES AND EQUIPMENT.
18. THE CONTRACTOR SHALL GUARANTEE THAT ALL WORK DONE UNDER THIS SPECIFICATION WILL BE FREE FROM FAULTY MATERIALS OR WORKMANSHIP AND HEREBY AGREES TO REPAIR OR REPLACE WITHOUT COST TO THE AND OWNER AND TO HIS SATISFACTION ALL DEFECTS OR IMPERFECTIONS APPEARING IN SAID WORK WITHIN A PERIOD OF ONE YEAR AFTER THE DATE OF FINAL ACCEPTANCE BY THE OWNER. SEE SPECIFICATIONS FOR OTHER REQUIREMENTS.
19. IN THE AREA OF CONSTRUCTION THERE WILL BE FOUND A NUMBER OF EXISTING SERVICES. PROTECT ALL ACTIVE SERVICES, MAINTAIN SAME IN GOOD OPERATING CONDITION.
20. THE OWNER RETAINS FIRST SALVAGE RIGHTS TO ALL EXISTING EQUIPMENT REMOVED UNDER THIS CONTRACT. THE CONTRACTOR SHALL CONSULT WITH THE OWNER FOR DISPOSITION OF THE EXISTING EQUIPMENT TO BE REMOVED BY HIM. THE CONTRACTOR SHALL INCLUDE THE DISPOSAL OF EXISTING EQUIPMENT UNDER THIS CONTRACT.
21. ALL MECHANICAL AND ELECTRICAL EQUIPMENT SHALL BE CERTIFIED AND LISTED BY UL OR OTHER NATIONALLY ACCREDITED AGENCIES. ANY EQUIPMENT NOT LISTED SHALL BE FIELD TESTED AND CERTIFIED BY AN APPROVED TESTING AGENCY. CONTRACTOR SHALL NOTIFY THE BUILDING DEPARTMENT AND ARRANGE FIELD TEST AND CERTIFICATION OF UNLISTED EQUIPMENT PRIOR TO REQUESTING FINAL INSPECTION BY THE BUILDING INSPECTOR.
22. ALL COMBUSTIBLE MATERIALS SHALL NOT EXCEED A FLAME SPREAD RATING OF 25 AND A SMOKE DEVELOPED RATING OF 50.
23. EXISTING CONDITIONS REPRESENTED ON THESE DRAWINGS HAVE BEEN TAKEN FROM PREVIOUS PROJECT DRAWINGS. FIELD VERIFY ALL EXISTING CONDITIONS. THIS OFFICE MAKES NO ASSURANCES AS TO THE ACCURACY OF EXISTING CONDITIONS REPRESENTED ON THESE DRAWINGS.
24. GENERAL CONTRACTOR TO PERFORM ALL CUTTING, PAINTING, FRAMING, LEVELING, CURB INSTALLATION AND WATERPROOFING FOR MECHANICAL SYSTEMS INSTALLATION.

DRAWING INDEX

SHEET NO.	DESCRIPTION
P1.1	GENERAL NOTES, ABBREVIATIONS, SYMBOLS, SCHEDULES AND DRAWING INDEX
P1.2	PIPING SPECIFICATIONS AND DETAILS.
P2.1	PIPING FLOOR PLAN

PROJECT DESCRIPTION

1. PROVIDE NEW COLD WATER AND PROPANE GAS PIPING AS REQUIRED TO MEET THE NEW REQUIREMENTS OF THE FLOOR PLAN.
2. PROVIDE NEW PLUMBING FIXTURES AS REQUIRED TO MEET THE NEW REQUIREMENTS OF THE FLOOR PLAN.
3. THE NEW WATER RECLAIM SYSTEM RECIRCULATES ALL WASTE WATER. REMAINING SEDIMENT IS HAULED AWAY BY AN APPROVED DISPOSAL COMPANY. THEREFORE THERE IS NO WASTE OR SEWER PIPING TO THE PUBLIC SEWER SYSTEM.
4. THE COLD WATER IS USED TO MAKE-UP WATER TO THE WATER RECLAIM SYSTEM TO REPLACE WATER LOST THRU EVAPORATION. A REDUCED PRESSURE BACKFLOW PREVENTER WILL BE USED TO PROTECT THE PUBLIC WATER SUPPLY. SUPPLY WATER PRESSURE REQUIRED AT WATER RECLAIM SYSTEM IS 45 PSIG.
5. THE PROPANE GAS WILL BE SUPPLIED BY A 500 GALLON STORGE TANK LEASED BY THE OWNER. THE GAS WILL BE USED TO FUEL A HOT WATER HEATER/PRESSURE WASHER. GAS INPUT CONSUMPTION IS 330 CFH @ 6"-14" W.C.

MANDATORY MEASURES

SERVICE WATER HEATING SYSTEMS

☒ THE FOLLOWING SERVICE WATER HEATING SYSTEMS AND EQUIPMENT MAY BE INSTALLED ONLY IF THE MANUFACTURER HAS CERTIFIED THAT THE EQUIPMENT MEETS OR EXCEEDS ALL APPLICABLE EFFICIENCY REQUIREMENTS LISTED IN THE APPLIANCE EFFICIENCY REGULATIONS, OR APPENDIX B, TABLE B-9.

☐ UNFIRED SERVICE WATER HEATER STORAGE TANKS AND BACKUP TANKS FOR SOLAR WATER HEATING SYSTEMS SHALL HAVE EITHER:

- ☐ EXTERNAL ISOLATION WITH AN INSTALLED R-VALUE OF AT LEAST R-12; INTERNAL AND EXTERNAL INSULATION WITH A COMBINED R-VALUE OF AT LEAST R-16; OR
- ☐ SUFFICIENT INSULATION SO THAT THE HEAT LOSS OF THE TANK SURFACE BASED ON AN 80°F WATER AIR TEMPERATURE DIFFERENCE SHALL BE LESS THAN 6.5 BTU/HR/SF.

☒ IF A CIRCULATING HOT WATER SYSTEM IS INSTALLED, IT SHALL HAVE A CONTROL CAPABLE OF AUTOMATICALLY TURNING OFF THE CIRCULATING PUMP(S) WHEN HOT WATER IS NOT REQUIRED.

LAVATORIES IN RESTROOMS OF PUBLIC FACILITIES SHALL BE EQUIPPED WITH EITHER:

- ☐ OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 0.5 GALLONS PER MINUTE.
- ☐ FOOT ACTUATED CONTROLS VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 0.75 GALLONS PER MINUTE.
- ☐ PROXIMITY SENSOR ACTUATED CONTROL VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 0.75 GALLONS PER MINUTE.
- ☐ SELF-CLOSING VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 2.5 GALLONS PER MINUTE AND 0.25 GALLONS/CYCLE (CIRCULATING SYSTEM).
- ☐ SELF-CLOSING VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 2.5 GALLONS PER MINUTE AND 0.50 GALLONS/CYCLE (NON-CIRCULATING SYSTEM).
- ☐ SELF-CLOSING VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 2.5 GALLONS PER MINUTE AND 0.75 GALLONS/CYCLE (FOOT SWITCHES AND PROXIMITY SENSOR CONTROLS).

☐ LAVATORIES IN RESTROOMS OF PUBLIC FACILITIES SHALL BE EQUIPPED WITH CONTROLS TO LIMIT THE OUTLET TEMPERATURE TO 110°F.

15010 GENERAL PLUMBING REQUIREMENTS

1. ELECTRICAL DEVICES SHALL BEAR A 'UL' OR 'ETL' LISTING.
2. PROVIDE PRIME COAT ON ALL UNFINISHED DEVICES AND MATERIALS IN EXPOSED AREAS.
3. PERFORM THE FOLLOWING TESTS:
   A. WATER: FILL WITH WATER TO 150 PSIG. RETAIN FOR 4 HOURS. REPAIR LEAKING JOINTS AND RETEST AS REQUIRED UNTIL SYSTEM IS PROVEN TIGHT.
   B. PROPANE GAS: PRESSURIZE WITH AIR TO 100 PSIG AND HOLD TIGHT FOR TWENTY-FOUR HOURS WITH NO DROP IN PRESSURE; TEST JOINTS AND EQUIPMENT FOR EVIDENCE OF LEAKS AFTER SATISFACTORY PRESSURE TEST.
4. STERILIZE THE DOMESTIC WATER SYSTEM IN ACCORDANCE WITH THE REQUIREMENTS OF THE AMERICAN WATER WORKS ASSOCIATION AND THE STATE OF CALIFORNIA HEALTH AND SAFETY CODE.
5. PIPING SYSTEMS SHALL BE IDENTIFIED WITH MARKERS AND FLOW ARROWS IN COMPLIANCE WITH OSHA 1910.261-264
6. PROVIDE (6) COPIES OF OPERATION AND SERVICE MANUALS FOR ALL MECHANICAL AND PLUMBING EQUIPMENT.

15400 PIPING SPECIFICATIONS

1. WATER PIPING SHALL BE TYPE "L" DRAWN COPPER MADE UP WITH WROUGHT OR FORGED COPPER FITTINGS AND 95-5 TIN-ANTIMONY SOLDER WITH NON-CORROSIVE FLUX. CW PIPING BELOW SLAB SHALL BE TYPE "K".
2. ALL VALVES SHALL HAVE SCREWED THREADS AND INSTALLED WITH SWEAT TO SCREWED ADAPTERS.
3. INSTALL UNIONS DOWNSTREAM OF VALVES.
4. VALVES FOR SHUT-OFF SERVICE SHALL BE GATE OR FULL-PORT BALL TYPE.
5. HANGERS AND SUPPORTS SHALL BE AS MANUFACTURED BY SUPERSTRUT OR UNISTRUT. USE 3/8" HANGER ROD FOR INDIVIDUAL PIPES UP TO 2" AND ½" FOR PIPES UP TO 4". SUPPORTS SHALL BE 6' O.C. FOR PIPES 1" AND UNDER AND 8' O.C. FOR PIPES 2" AND OVER.
6. USE EPCO DIELECTRIC COUPLINGS FOR CONNECTIONS BETWEEN DISSIMILAR METALS.
7. PROPANE GAS PIPING SHAL BE STANDARD WEIGHT SCHEDULE 40 STEEL PIPE CONFORMING TO THE FOLLOWING SPECIFICATIONS:
   A. ABOVE GROUND PIPE EXPOSED TO WEATHER SHALL BE ASTM A-120, T&C GALVANIZED PIPE MADE UP WITH BANDED MALLEABLE IRON FITTINGS.
   B. CONCEALED OR EXPOSED WITHIN BUILDING: ASTM A-120, T&C BLACK PIPE MADE UP WITH BANDED BLACK MALLEABLE IRON FITTINGS. PIPING LARGER THAN 3" SHALL BE WELDED FITTINGS.
8. ALL SCREWED UNIONS IN GAS PIPE SHALL BE 150 POUND RATED GROUND JOINT TYPE.
9. ALL VALVES FOR PROPANE GAS SHALL BE WALWORTH. VALVES MANUFACTURED BY CRANE, STOCKHAM, AND NIBCO, MEETING THE REQUIREMENTS OF THIS SPECIFICATION ARE ACCEPTABLE. ALL VALVES SHALL BE LISTED FOR PROPANE GAS SERVICE.

PIPING PARTIAL FLOOR PLAN

SCALE: 1/8"=1'-0"

NOTES (◇ INDICATES KEYED):

1. INSTALL ALL PIPING ABOVE GRADE.
2. ◇2 CONNECT 3/4 ICW TO WATER RECLAIM SYSTEM MAKEUP FLOAT VALVE. VERIFY LOCATION IN FIELD. PROVIDE (N) SHUT-OFF VALVE.
3. ◇3 CONNECT (N) 1½" PG TO LEASED PROPANE TANK. VERIFY LOCATION IN FIELD. PROVIDE SHUT-OFF GAS COCK.
4. ◇4 CONNECT (N) 1½" PG TO (N) HW HEATER/PRESSURE WASHER. VERIFY LOCATION IN FIELD. PROVIDE SHUT-OFF GAS COCK. REQUIRED PRESSURE IS 6-14" W.C.

WATER PIPE SIZING

1. TOTAL EQUIVALENT LENGTH: 400 L.F. x 1.4 (FITTINGS)= 560 L.F..
2. WATER PRESSURE AT METER 64.0 PSIG
   LESS: WATER METER (7.0) PSIG
   LESS: RP BACKFLOW PREVENTER (10.0) PSIG
   AVAILABLE PRESSURE: 47.0 PSIG
3. FIXTURES:

(2) WATER CLOSETS, TANK TYPE	5.0 FU
(2) LAVATORIES	2.0 FU
(1) ¾" FILL CONNECTION TO WATER RECLAIM TANK	2.5 FU
TOTAL:	9.5 FU

4. PER 2001 CPC, TABLE 6.5, USE 46 TO 60 PSI, 600 FT COLUMN; 3/4"ø METER REQUIRED, 1" SUPPLY LINE.

GAS LOAD SIZING

GAS APPLIANCE	QTY.	BTUH INPUT RATINGS	TOTAL BTUH LOAD
1. HW HEATER/ PRESSURE WASHER	1	330,000	330,000
TOTAL BTUH REQUIREMENTS:			330,000
TOTAL BTUH/2500 (BTU PER CU.FT.):			132 CFH
EQUIVALENT LENGTH OF PIPE FROM METER TO MOST REMOTE OUTLET:			125 FT
SIZE OF GAS PIPE PER CPC-2001, TABLE 12-7 FOR LOW PRESSURE. USE 125 FT: COLUMN.		1" USE	REQUIRED 1 1/2"

DEVELOPMENT PERMIT ADJUSTMENT

PROJECT FILE NO.: **AD07-609**

PERMIT TO BE ADJUSTED: **H06-081**

PROJECT DESCRIPTION: **Permit Adjustment to modify previously approved Site Development Permit file H06-081 to allow the removal of a 2'-0" concrete wall on the east elevation of a new truck wash facility.**

PROJECT LOCATION: **120 GRANITE ROCK WY**

A.P.N.(s): **462-17-020**

ZONING: **IP Industrial Park**

GENERAL PLAN: **CIC**

ACTION: Approved

SUBJECT TO THE FOLLOWING CONDITIONS: This permit to modify previously approved Site Development Permit file H06-081 to allow the removal of a 2'-0" concrete wall on the east elevation of a truck wash facility, only.

Plan Set: **[X] Yes** **[ ] No**

Approved by: Sylvia Do **Signature:** Sylvia L. Do

Action Date: May 29, 2007

This permit sheet is only valid when accompanied by an original signature and when fastened to a stamped plan set, if applicable.

ASSESSOR'S PARCEL NUMBER(S) *(Attach Map)* 462-17-020

DESCRIPTION OF THE PROPOSED MINOR CHANGE *(Approval is limited to description contained herein)*
eliminate one cmu wall & add steel facia

DOES THE PROJECT INVOLVE HUD FEDERAL FUNDING/ASSISTANCE? ☒ NO ☐ YES

Please indicate whether HUD Funding has been awarded, is proposed, or is anticipated, for the proposed project. If **yes**, indicate type of funding (i.e. CDBG Grant, HOME Investment Partnership Program, Section 108 Loan Guarantee, etc.), funding amount, whether awarded (if known) or application is pending, and fiscal year of award or application request.

PLEASE NOTE: Projects involving 1) acquisition of real property involving a change of use, or 2) new construction require an Environmental Assessment (EA). Concurrent environmental review per the California Environmental Quality Act (CEQA) is also required. The obtainment of a qualified environmental consultant to provide documentation services (i.e. a combined Initial Study/ EA) is strongly required.

SIGNATURE OF PROPERTY OWNER REQUIRED

Check One:

☐ I hereby certify that a Homeowner's Association/Architectural Review Committee does exist and have reviewed this project. Please include a copy of their letter and comments with the application.

☒ *I hereby certify that a Homeowner's Association does not exist to comment on the requested change to my property.*

Please complete the FRONT Sheet of this application and provide the following.
INCOMPLETE APPLICATION WILL NOT BE ACCEPTED.

☑ **FILING FEE:**
$272* Checks are made payable to the "City of San Jose".
~~$648*~~ for Major Adjustment.
$545* for each adjustment after the 1st to process simultaneously
$135* per hour for consultation regarding review of a proposal prior to filing the application.

*includes the General Plan Update fee

☑ **ASSESSOR'S PARCEL MAP** marked with the project location.

☑ **PHOTOGRAPHS** of existing building or subject area. N/A SEE H06-081

☑ **FOUR (4) COPIES** of the development plans that include:

a. A **SITE PLAN* DRAWN TO SCALE** showing the location of the proposed changes on the subject property, and
b. A **DRAWING TO SCALE** of the proposed change (elevations, floor plans, construction, details, as appropriate).

*A **Site Plan** should contain the following basic information:

- Dimensions of subject property, lot lines, and existing and proposed driveways.
- Streets adjoining the subject property.
- Existing and proposed buildings and structures, including proposed building removal.
- Dimensions of existing and proposed setbacks.
- Existing and proposed off-street parking, loading, landscape and circulation areas.
- Existing trees to be removed. Include circumference of tree at 2 feet above ground level as well as distances from existing and proposed structures and/or trees on the site.

☐ A **LETTER** from the **Homeowner's Association/Architectural Review Committee** commenting specifically on the plans it reviewed, if appicable.

HUD FEDERAL FUNDING AND ENVIRONMENTAL COMPLIANCE WITH THE NATIONAL ENVIRONMENTAL POLICY ACT (NEPA). Compliance with the national environmental policy act (nepa) is required for all projects involving property acquisition, new construction for any project that has been awarded, proposes to include, or anticipates the use of federal funding from the department of Housing and Urban Development (HUD), for any portion of the project. Additional review, reports, and/or referrals may be necessary. additional fees will be required for projects funded by hud programs other than the cdbg program. please contact the plan implementation division environmental review team principal or senior planner for more information at 408.535-7801.

PLEASE CALL THE APPOINTMENT DESK AT (408) 535-3555 FOR AN APPLICATION APPOINTMENT.

QUALITY CONTROL

SPECIAL INSPECTIONS

1. Special inspection per CBC Section 106.3.5 & 1701 is required on the following:

a. Masonry	
1. Where F'm is greater than 1500 psi	NR
2. Reinforcement placement in masonry with special inspection	NR
b. Concrete	
1. Where F'c is greater than 2500 psi, except for slab on grade	NR
2. Reinforcement placement in concrete with special inspection	NR
3. Anchor bolts in location (where noted on drawings)	NR
c. Welding	
1. Ductile moment matching steel frames per CBC Section 2711.7.	NR
2. All structural welding except welding performed in an approved fabricator's shop.	NR
d. All high strength bolting in "slip-critical" connections. See plans and shop notes for location of "slip-critical" connections.	NR
e. Special diaphragm nailing where noted on drawings.	NR
f. Drilled or Epoxy concrete and masonry anchors	●

● REQUIRED NR NOT REQUIRE

2. The special inspector shall be under the supervision of a registered professional engineer.
   a. The special inspector shall observe the work assigned for conformance with the approved design drawings and specifications.
   b. The special inspector shall furnish inspection reports to the Building Official, Engineer or Architect of Record and other designated persons. All discrepancies shall be brought to the immediate attention of the contractor for correction, then, if not corrected, to the proper design authority and to the Building Official.
   c. The Special Inspector shall submit a final signed report, signed by a registered professional engineer, stating whether the work required special inspection was in conformance with the approved plans and specifications and the applicable workmanship provisions of the CBC.
   d. An application for off-site fabrication shall be submitted to the field inspection division for approval prior to fabrication.
   e. Certificate of compliance for off site fabrication shall be completed and submitted to the field inspection division prior to the erection of prefabricated components.
3. The contractor shall contact the Planning and Building Inspection Department to schedule Special Inspection meeting prior to construction.

STRUCTURAL NOTES

I. GENERAL

1. All construction, workmanship and materials shall conform with the requirements of the 2001 Edition C.B.C. and any other governing code.
2. The contractor shall visit the site to ascertain dimensions and site conditions and shall become completely familiar with the construction documents prior to starting construction.
3. The Architect and Engineer shall be notified of any omissions or discrepancies in the working drawing and/or specifications before proceeding with any work so involved.
4. All dimensions take precedence over scale shown on plans, sections and details.
5. Specific notes and details take precedence over structural notes and typical details.
6. Where specific details are not provided, construction use notes details for similar conditions, unless conflicts occur.
7. The contractor shall be responsible for the design, installation and maintenance of all bracing and shoring required during construction until all construction is finished.
8. Job site safety is the sole responsibility of the contractor.
9. See architectural drawings for the size and location of all door and window openings, location of non-bearing partitions, roof an floor elevations, roof slopes, architectural finishes, and other related information not indicated on the structural drawings.
10. See mechanical, electrical and/or architectural drawing for the size and location of pipes, conduits, floor drains, vents, ducts, and other similar penetrations not indicated on the structural drawings.

II. FOUNDATIONS

1. All foundation and related site work shall comply with the requirements of Chapter 18 of the C.B.C.
2. Foundation have been designed for a maximum soil pressure of (1500) PSF in accordance with provisions of Table No. 18-I-A of the California Building Code, for Soil Class -A-. If actual site conditions differ from those shown, the site shall be prepared according to the recommendations of a competent Geotechnical Engineer registered in the State of California.
3. Footing and utility trench backfill within the building area shall be clean sand, mechanically compacted in thin layers to a minimum of 95% of relative density.

III. CONCRETE

Reinforcing Steel

1. Reinforcing bars shall conform to ASTM A615 for deformed bars Grade 40 for #4 bars and smaller, and Grade 60 for #5 bars and larger.
2. All bars shall be clean of rust, grease or other materials likely to impair bond.
3. All reinforcing bar bends shall be made cold and conform to the ACI Manual of Standard Practice.
4. Reinforcing bars shall be tied together at splices as follows:

REINFORCED CONCRETE

REINFORCEMENT DEVELOPMENT LENGTHS: f'_c = 2500 PSI, all # Bar, bends in inches

BAR SIZE	#3 (9mm)	#4	#5	#6	#7	#8	#9	#10	#11

OTHER BARS	16	33	39	47	68	76	86	101	111

III. CONCRETE (CONT.)

5. Unless otherwise noted, minimum concrete coverage for reinforcing bars shall be as follows:

Concrete in contact with earth, unformed	3"
Concrete in contact with earth, formed	2"
Slabs (interior face)	1"
Slab on grade	1-1/2"

Cast-in-Place Concrete

1. All concrete used for this work shall comply with A.C.I. "Specifications for Structural Concrete" (A.C.I. 301-96). The material used to prepare the concrete shall meet the following standards:

Water	Clean, Potable
Portland cement	ASTM C150
Coarse aggregate	3/4" rock ASTM C33
Fine aggregate clean sand	ASTM C33-77

2. All concrete used for this work shall be proportioned to meet the following 28 day ultimate compressive strength requirements:

Concrete Slabs (not flat)	150 PCF, f'c = 4000 PSI
Raised Floor Over Slab-on-Grade	150 PCF, f'c = 4000 PSI
Footings	150 PCF, f'c = 2500 PSI
Grade beams and piers	150 PCF, f'c = 2500 PSI
Slab on grade	150 PCF, f'c = 2500 PSI

3. Add admixtures shall not be used unless specifically authorized by the Engineer.
4. A mix design including proposed admixtures and supporting test data for strength and shrinkage shall be submitted for review and approval prior to concrete placement.
5. All reinforcing bars, anchor bolts, bolt-downs and other embeds shall be well secured in place prior to concrete placement.
6. All reinforcement and other embeds shall be inspected and approved prior to concrete placement.
7. Concrete shall be placed as a continuous operation without any interruptions longer than 45 minutes.
8. The slump at time of placement shall be the minimum consistent with placing conditions but shall not exceed 5".
9. Mechanical vibrators or other "approved" methods for thorough consolidation shall be used. For slab on grade, squeegee and screeders may be used.

CAMPBELL, CA 95008

MAY 10, 2006

CITY OF SAN JOSE BUILDING DEPARTMENT

RE: TITLE 24 DOCUMENTATION:

PROJECT: GRANITEROCK OFFICE ADDITION

SCOPE OF WORK: BUILDING ENVELOPE AND LIGHTING

THE PERFORMANCE APPROACH WAS USED TO DEMONSTRATE COMPLIANCE WITH THE 2005 NONRESIDENTIAL STANDARDS.

ENVELOPE:

OPAQUE SURFACES:

THE EXTERIOR WALLS ARE CALCULATED AS 2 X 4 WOOD FRAMED WITH R-13 INSULATION.

THE ADDITION ROOF AREA HAS IS CALCULATED WITH R-30 INSULATION.

ALL WALLS BACKING INTO UNCONDITIONED SPACES, ATTICS ETC., MUST BE INSULATED WITH A MINIMUM OF R-13 INSULATION.

THE FLOOR IS CALCULATED WITH A MINIMUM R-13 INSULATION.

GLAZING:

THE WINDOWS ARE CALCULATED AS CLEAR DOUBLE GLAZING IN METAL FRAMES. THE FACTOR IS ,58 AND THE SHGC IS .65

THE U-FACTOR AND SHGC ARE TAKEN FROM CEC TABLE 116-A AND 116-B.

OVERHANGS ARE PART OF THE CALCULATION ANY CHANGES TO THESE ARE CAN CAUSE THIS BUILDING TO BE OUT OF COMPLIANCE. IF CHANGES ARE MADE TO THESE ELEMENTS CONTACT FRANK R. IANNUCCI, 408-866-1620.

<u>ENVELOPE MANDATORY MEASURES MUST BE FOLLOWED FOR CAULKING, GASKETING, ETC.</u>

LIGHTING

THE TOTAL ALLOWED LIGHTING LOAD IS IN THE CONDITIONED RETAIL AREA IS 621 WATTS.

THE PROPOSED ADJUSTED CONNECTED LIGHTING WATTAGE IS 524 WATTS.

A PENALTY OF 97 WATTS WAS TAKEN FOR THE PORTABLE LIGHTING FOR OFFICE SPACES LARGER THAT 250 SQ. FEET.

THE UNCONDITIONED RESTROOM HAS 75 CONNECTED WATTS.

SWITCHING REQUIREMENTS:

NOTE: FOR EVERY FLOOR, ALL INTERIOR LIGHTING SYSTEMS SHALL BE EQUIPPED WITH A SEPARATE AUTOMATIC CONTROL TO SHUT OFF THE LIGHTING. THIS AUTOMATIC CONTROL SHALL MEET THE REQUIREMENTS OF SECTION 119 AND MAY BE AN OCCUPANCY SENSOR, AUTOMATIC TIME SWITCH, OR OTHER DEVICE CAPABLE OF AUTOMATICALLY SHUTTING OFF THE LIGHTING.

BI-LEVEL SWITCHING IS REQUIRED IN THE ROOMS WITH MORE THAN ONE LIGHT FIXTURE.

NOTE: BI-LEVEL SWITCHING IS NOT REQUIRED IF:

1. *IN ROOMS LESS THAN 100 SQUARE FEET;*
2. *IN ROOMS WITH A LIGHTING POWER DENSITY OF LESS THAN .8 WATT PER SQ. FOOT;*
3. *WITH ONLY ONE LUMINARE.*
4. *THE AREA IS A CORRIDOR.*
5. *USING DIMMING CONTROLS*

DAYLIGHT SWITCHING IS NOT REQUIRED.

NOTE: FOR AREAS DAYLIT BY VERTICAL GLAZING, THE DAYLIT AREA HAS A LENGTH OF 15 FEET, OR THE DISTANCE ON THE FLOOR, PERPENDICULAR TO THE GLAZING, TO THE NEAREST 60-INCH OR HIGHER OPAQUE PARTITION, WHICHEVER IS LESS; AND A WIDTH OF THE WINDOW PLUS EITHER 2 FEET ON EACH SIDE, OR THE DISTANCE TO A OPAQUE PARTITION OR ONE HALF THE DISTANCE TO THE CLOSEST SKYLIGHT OR VERTICAL GLAZING, WHICHEVER IS LEAST. TAKEN FROM THE CEC NONRES MANUAL PAGE 5-71.

TANDEM WIRING: PAIRS OF ONE-LAMP AND THREE-LAMP RECESSED FLUORESCENT LUMINAIRES THAT ARE 1) ON THE SAME SWITCH CONTROL, 2) IN THE SAME ENCLOSED AREA AND 3) WITHIN 10 FEET OF EACH OTHER IN AN ACCESSIBLE CEILING SPACE, MUST BE TANDEM WIRED. SINGLE LAMP BALLAST SHOULD NOT BE USED.

Tandem wiring is not required if the three bulb and single bulb fixtures use high frequency electronic ballast or are pendant hung and are not back to back (CONTINUOUS).

SINGLE LAMP BALLAST MAY BE USED IN EMERGENCY BATTERY-BALLAST UNITS AND WHEN THERE ARE AN ODD NUMBER OF LAMPS OR WHERE THERE ARE MULTIPLE GROUPS OF BI-LEVEL SWITCHING AND THE CONTROL SCHEME PRODUCES TWO ONE-LAMP BALLAST ADJACENT TO EACH OTHER, BUT CONTROLLED BY DIFFERENT SWITCHES. EXIST SIGNS ARE EXEMPT.

EACH ENCLOSED AREA WITH FLOOR TO CEILING WALLS MUST HAVE AN INDEPENDENT SWITCH OR CONTROL DEVICE. THE SWITCHING MUST BE READILY ACCESSIBLE, MANUALLY OPERATED, OR AUTOMATICALLY CONTROLLED BY AN APPROVED OCCUPANT-SENSING DEVICE, OVERRIDE THE ACTION OF ALL DEVICES, AND BE CAPABLE TO RESET THE MODE OF ANY ACTION OF ANY AUTOMATIC SYSTEM.

THE MANDATORY SWITCHING REQUIREMENTS MUST BE INSTALLED AS SHOWN ON PAGE 2 OF THE LTG-1 FORM. A FULL COPY OF THE MANDATORY MEASURES IS AVAILABLE THROUGH THE CALIFORNIA ENERGY COMMISSION OR FROM FRANK R. IANNUCCI.

STATEMENT OF COMPLIANCE

This Certificate of Compliance lists the building features and performance specifications needed to comply with Title 24, Parts 1 and 6 of the California Code of Regulations. This certificate applies only to a Building using the performance compliance approach.

The documentation preparer hereby certifies that the documentation is accurate and complete.

DOCUMENTATION AUTHOR	SIGNATURE	DATE
FRANK R. IANNUCCI		5/9/06

The Principal Designer hereby certifys that the proposed building design represented in this set of construction documents is consistent with the other compliance forms and worksheets, with the specifications, and with any other calculations submitted with this permit application. The proposed building as designed meets the energy efficiency requirements contained in sections 110, 116, through 118, and 140, 142, 143 or 149 of Title 24, Part 6.

ENV.	LTG.	MECH.

EXCEPTIONAL CONDITIONS COMPLIANCE CHECKLIST

The local enforcement agency should pay special attention to the items specified in this checklist. These items require special written justification and documentation, and special verification to be used with the performance approach. The local enforcement agency determines the adequacy of the justification, and may reject a building or design that otherwise complies based on the adequacy of the special justification and documentation submitted.

The exceptional features listed in this performance approach application have specifically been reviewed. Adequate written justification and documentation for their use have been provided by the applicant.

PROJECT NAME GRANITEROCK OFFICE ADDITION

DATE 5/9/2006

Designer:

This form is to be used by the designer and attached to the plans. Listed below are all the acceptance tests for lighting systems. The designer is required to check the boxes by all acceptance tests that apply and list all equipment that require an acceptance test. If all equipment of a certain type requires a test, list the equipment description and the number of systems to be tested in parentheses. The NJ number designates the Section in the Appendix of the Nonresidential ACM Manual that describes the test. Also indicate the person responsible for performing the tests (i.e. the installing contractor, design professional or an agent selected by the owner). Since this form will be part of the plans, completion of this section will allow the responsible party to budget for the scope of work appropriately.

Building Departments:

Before an occupancy permit is granted for a newly constructed building or space, or a new lighting system system serving a building or space is operated for normal use, all control devices serving the building or space shall be certified as meeting the Acceptance Requirements for Code Compliance. In addition a Certificate of Acceptance, LTG-1-A, Forms shall be submitted to the building department that:

A. Certifies plans, specifications, installation certificates, and operating and maintenance information meet the requirements of§ 10-103(b) and Title 24 Part 6.

Test Description	Test Performed By:
☐ LTG-2-A: Lighting Control Acceptance Document - Occupancy Sensor Acceptance - Manual Daylight Controls Acceptance - Automatic Time Switch Control Acceptance Equipment requiring acceptance testing	
☐ LTG-3-A: Automatic Daylighting Controls Acceptance Document Equipment requiring acceptance testing

ENVELOPE MANDATORY MEASURES — ENV-MM

PROJECT NAME: GRANITEROCK OFFICE ADDITION

DATE: 5/9/2006

DESCRIPTION	Designer	Enforcement
[X] § 118(a) Installed Insulating Material shall have been certified by the manufacturer to comply with the California Quality Standards for insulating material, Title 20, Chapter 4, Article 3.		
[X] § 118(c) All Insulating Materials shall be installed in compliance with the flame spread rating and smoke density requirements of Sections 2602 and 707 of Title 24, Part 2.		
[X] § 117(a) All Exterior Joints and openings in the building that are observable sources of air leakage shall be caulked, gasketed, weatherstripped or otherwise sealed.		
[X] § 116(b) Site Constructed Doors, Windows and Skylights shall be caulked between the unit and the building, and shall be weatherstripped (except for unframed glass doors and fire doors).		
[X] § 116(a)1 Manufactured Doors and Windows installed shall have air infiltration rates not exceeding those shown in Table Number 1-E. of the Standards. Manufactured fenestration products must be labeled for U-value according to NFRC procedures.		
[X] § 118(e) Demising Walls in Nonresidential Buildings: The opaque portions of framed demising walls in nonresidential buildings shall have insulation with an installed R-value of no less than R-13 between framing members.		

LIGHTING MANDATORY MEASURES — LTG-MM

PROJECT NAME	DATE
GRANITEROCK OFFICE ADDITION	5/9/2006

DESCRIPTION	Designer	Enforcement
[X] §131(d)1 For every floor, all interior lighting systems shall be equipped with a separate automatic control to shut off the lighting. This automatic control shall meet the requirements of Section 119 and may be an occupancy sensor, automatic time switch, or other device capable of automatically shutting off the lighting.		
[X] §131(d)2 Override for Building Lighting Shut-off: The automatic building shut-off system is provided with a manual, accessible override switch in sight of the lights. The area of override is not to exceed 5,000 square feet.		
[X] §119(h) Automatic Control Devices Certified: All automatic control devices specified are certified, all alternate equipment shall be certified and installed as directed by the manufacturer.		
[X] §111 Fluorescent Ballast and Luminaires Certified: All fluorescent fixtures specified for the project are certified and listed in the Directory. All installed fixtures shall be certified.		
[X] §132 Tandem Wiring for One and Three Lamp Fluorescent Fixtures: All one and three lamp fluorescent fixtures are tandem wired with two lamp ballasts where required by Standards Section 132; or all one and three lamp fluorescent fixtures are specified with electronic high-frequency ballasts and are exempt from tandem wiring requirements.		
[X] §131(a) Individual Room/Area Controls: Each room and area in this building is equipped with a separate switch or occupancy sensor device for each area with floor-to-ceiling walls.		
[X] §131(b) Uniform Reduction for Individual Rooms: All rooms and areas greater than 100 square feet and more than 0.8 watts per square foot of lighting load shall be controlled with bi-level switching for uniform reduction of lighting within the room.		
[ ] §131(c) Daylight Area Control: All rooms with windows and skylights that are greater than 250 square feet and that allow for the effective use of daylight in the area shall have 50% of the lamps in each daylit area controlled by a separate switch; or the effective use of daylight cannot be accomplished because the windows are continuously shaded by a building on the adjacent lot. Diagram of shading during different times of the year is included on plans.		
[ ] §131(e) Display Lighting. Display lighting shall be separately switched on circuits that are 20 amps or less.

BATAFFINT CORP. 700 SO. CLAREMONT ST. SAN MATEO, CA. 94402
STOCKDRAFTING FORM NO. 101-93

GENERAL

1. **TYPICAL/GENERAL NOTES AND DETAILS:** ON THESE STRUCTURAL DRAWINGS SHALL APPLY UNLESS SPECIFICALLY SHOWN OR NOTED OTHERWISE. CONSTRUCTION DETAILS NOT FULLY SHOWN OR NOTED SHALL BE SIMILAR TO DETAILS SHOWN FOR SIMILAR CONDITIONS. ALL WORK OR CONSTRUCTION SHALL COMPLY WITH ALL APPLICABLE CURRENT BUILDING CODES, REGULATIONS AND SAFETY REQUIREMENTS.

2. **NOTES AND DETAILS:** ON THESE STRUCTURAL DRAWINGS SHALL APPLY UNLESS SPECIFICALLY SHOWN OR NOTED OTHERWISE. CONSTRUCTION DETAILS NOT SHOWN OR NOTED SHALL BE SIMILAR TO DETAILS SHOWN FOR SIMILAR CONDITIONS.

3. **DISCREPANCIES:** OMISSIONS, CONFLICTS OR MISUNDERSTANDINGS BETWEEN THE VARIOUS ELEMENTS OF THE STRUCTURAL DOCUMENTS SHALL BE BROUGHT TO THE ATTENTION OF THE ENGINEER FOR RESOLUTION BEFORE PROCEEDING WITH THE WORK. FOR CONDITIONS NOT CLEARLY UNDERSTOOD, SUBMIT SKETCHES FOR REVIEW TO THE ENGINEER. IN THE EVENT OF A DISCREPANCY IN THE STRUCTURAL DOCUMENTS, THE NOTE OR DETAIL UTILIZING THE STRICTER REQUIREMENT SHALL APPLY.

4. **THE CONTRACTOR** SHALL INFORM THE ENGINEER OF RECORD IN WRITING OF ANY DEVIATION FROM THE CONTRACT DOCUMENTS. THE CONTRACTOR SHALL NOT BE RELIEVED OF THE RESPONSIBILITY OF SUCH DEVIATION BY THE ENGINEER OF RECORD'S REVIEW OF SHOP DRAWINGS, PROJECT DATA, ETC. UNLESS THE CONTRACTOR HAS SPECIFICALLY INFORMED THE ENGINEER OF RECORD OF SUCH DEVIATION AT THE TIME OF SUBMISSION AND THE ENGINEER OF RECORD HAS GIVEN WRITTEN APPROVAL TO THE SPECIFIC DEVIATION.

5. **VERIFY** EXISTING FEATURES AND CONDITIONS (DIMENSIONS, ELEVATIONS, ETC.) UPON WHICH THESE DRAWINGS RELY.

6. **DIMENSIONS** SHALL NOT BE SCALED FROM THE PLANS, SECTIONS AND DETAILS OF THE STRUCTURAL DRAWINGS. SEE ARCHITECTURAL DRAWINGS FOR DIMENSIONS, ELEVATIONS, SLOPES, FINISHES, ETC. ALL DIMENSIONS RELATED TO THE EXISTING CONDITIONS SHALL BE VERIFIED BY THE CONTRACTOR.

7. **OTHER TRADES:** SEE ARCHITECTURAL, ELECTRICAL AND MECHANICAL DRAWINGS FOR SIZE AND LOCATION OF PIPE, VENT, DUCT AND OTHER OPENINGS AND DETAILS NOT SHOWN ON THESE STRUCTURAL DRAWINGS. ALL DIMENSIONS ARE TO BE CHECKED AND VERIFIED WITH THE ARCHITECTURAL DRAWINGS.

8. **MATERIALS AND WORKMANSHIP:** THE CONTRACTOR SHALL SUPPLY ALL LABOR, MATERIALS, EQUIPMENT AND SERVICES OF EVERY KIND, INCLUDING WATER AND POWER NECESSARY FOR THE PROPER EXECUTION OF THE WORK SHOWN OR INDICATED ON THESE DRAWINGS. ALL MATERIALS SHALL BE NEW AND MATERIALS AND WORKMANSHIP SHALL BE IN GOOD QUALITY. ALL WORKMEN AND SUBCONTRACTORS SHALL BE SKILLED IN THEIR TRADE.

9. **EXCAVATION:** THE CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR ALL EXCAVATION PROCEDURES INCLUDING LAGGING, SHORING AND PROTECTION OF ADJACENT PROPERTY, STRUCTURES, STREETS AND UTILITIES IN ACCORDANCE WITH THE LOCAL BUILDING DEPARTMENT.

10. **BRACING:** TEMPORARY BRACING SHALL BE PROVIDED AS REQUIRED TO HOLD ALL COMPONENTS OF THE STRUCTURE IN PLACE UNTIL FINAL SUPPORT IS SECURELY ANCHORED.

11. **IN PREPARING CONSTRUCTION SCHEDULE:** THE CONTRACTOR SHALL ACCOUNT FOR ORDERING, FABRICATION OF, AND DELIVERY OF SUCH ITEMS AS STRUCTURAL STEEL, PREMANUFACTURED TRUSSES, JOIST AND BEAM HANGERS AND OTHER HARDWARE.

12. **SHOP DRAWINGS** ARE AN AID FOR FABRICATION AND FIELD PLACEMENT AND ARE SUPERSEDED BY THE STRUCTURAL DRAWINGS. GENERAL CONTRACTOR IS RESPONSIBLE TO MAKE CERTAIN THAT ALL CONSTRUCTION IS IN FULL AGREEMENT WITH THE LATEST APPROVED STRUCTURAL DRAWINGS. SHOP DRAWING REVIEWS BY THE ENGINEER OF RECORD ARE FOR GENERAL CONFORMANCE WITH THE STRUCTURAL DRAWINGS AND DO NOT GUARANTEE THAT THE SHOP DRAWINGS ARE CORRECT.

13. **INSPECTIONS:** ALL INSPECTION AND TESTING SHALL BE PERFORMED ACCORDING TO BUILDING CODE AND/OR LOCAL BUILDING DEPARTMENT REQUIREMENTS. ALL REQUIRED TESTING SHALL BE PERFORMED BY AN APPROVED INDEPENDENT TESTING AGENCY AND SHALL SUBMIT REPORTS TO THE BUILDING DEPARTMENT AND ENGINEER.

14. **OPENINGS** REQUIRED BUT NOT SHOWN ON THE STRUCTURAL DRAWINGS SHALL BE SUBMITTED TO THE ENGINEER OF RECORD FOR APPROVAL BEFORE THEY ARE BUILT.

15. **MEMBERS** REQUIRED TO SUPPORT EQUIPMENT FROM THE STRUCTURAL FRAMING SHOWN ON THE DRAWINGS SHALL BE DESIGNED AND PROVIDED BY THE EQUIPMENT CONTRACTOR.

16. **REFER** TO OTHER DISCIPLINES' DRAWINGS FOR:
    a. FINISH FLOOR ELEVATIONS, FLOOR DEPRESSIONS, SLOPES, DRAINS, CURBS, PADS, EMBEDDED ITEMS, OPENINGS, ETC.
    b. SIZE AND LOCATION OF ALL NON-BEARING PARTITIONS AND ALL DOOR AND WINDOW OPENINGS.
    c. STAIR FRAMING, HANGERS AND DETAILS.
    d. DIMENSIONS NOT SHOWN ON STRUCTURAL DRAWINGS.
    e. WATERPROOFING AND WATERSTOPS.
    f. PIPE RUNS, SLEEVES, HANGERS, TRENCHES, WALL, ROOF AND FLOOR OPENINGS ETC. NOT SHOWN OR NOTED.
    g. ELECTRICAL CONDUIT RUNS, BOXES, OUTLETS, ETC. IN WALLS AND SLABS.
    h. ANCHORAGE AND BRACING FOR MECHANICAL, ELECTRICAL AND PLUMBING EQUIPMENT.
    i. SIZE, LOCATION AND DETAILS OF EQUIPMENT BASES AND ANCHORAGE.

17. **MASONRY AND STONE VENEERS:** MASONRY AND STONE VENEER SHALL NOT EXCEED 5 INCHES IN THICKNESS. WHEN APPLIED OVER STUD CONSTRUCTION, THE STUDS SHALL BE SPACED A MAXIMUM OF 16 INCHES ON CENTER AND APPROVED PAPER SHALL FIRST BE APPLIED OVER THE SHEATHING OR WIRES BETWEEN STUDS. ANCHOR TIES SHALL BE PROVIDED TO HORIZONTAL JOINT REINFORCEMENT WIRE OF NO. 9 GAUGE OR EQUIVALENT. THE JOINT REINFORCEMENT SHALL BE CONTINUOUS WITH BUTT SPLICES BETWEEN TIES. AN AIR SPACE OF AT LEAST 1 INCH SHALL BE MAINTAINED BETWEEN THE BACKING AND THE VENEER IN WHICH CASE, TEMPORARY SPOT BEDDING MAY BE USED AWAY FROM THE TIES TO ALIGN THE VENEER. SPOT BEDDING AT THE TIES SHALL BE OF CEMENT MORTAR ENTIRELY SURROUNDING THE TIES. THE HEIGHT OF ALL ANCHORED VENEERS SHALL NOT BE MORE THAN 30 FEET IN HEIGHT ABOVE THE FOUNDATION.

FOUNDATION

1. **DESIGN:** FOUNDATION TO BE IN CONFORMANCE WITH THE RECOMMENDATIONS BY _____, REPORT NO. _____, DATED _____.

2. **SOILS REPORT:** THE SOILS REPORT AND SPECIFICATIONS SHOULD BE REFERRED TO FOR ADDITIONAL ADDITIONAL INFORMATION AND ALTERNATE FOUNDATION SYSTEMS.

3. **DRILLING FLUIDS:** DRILLING FLUIDS ARE NOT ALLOWED UNLESS APPROVED BY THE SOILS ENGINEER.

4. **CONCRETE PLACEMENT:** PLACE CONCRETE IN PIERS THROUGH HOPPER OR EQUIVALENT SO THAT THE FALL OF THE CONCRETE IS VERTICAL DOWN THE SHAFT AND DOES NOT HIT THE SIDES OF THE REINFORCEMENT

5. **PIER DEPTH:** THE SOILS ENGINEER SHALL DETERMINE THE FINAL DEPTH OF ALL PIERS IN THE FIELD.

6. **REBAR GRADE:** F(y) OF REBAR = 40,000 PSI FOR #4 AND SMALLER AND 60,000 PSI FOR #5 AND LARGER.

7. **CONCRETE STRENGTH:** F'c OF CONCRETE = 2,500 PSI UNLESS NOTED OTHERWISE IN THE CONCRETE SPECIFICATIONS.

8. **OBSERVATIONS:** THE SOILS ENGINEER SHALL BE RETAINED TO PROVIDE OBSERVATIONS AND TESTING SERVICES DURING THE GRADING AND FOUNDATION PHASE OF CONSTRUCTION PER SOILS REPORT RECOMMENDATIONS. INSPECTION AND TESTING REPORTS SHALL BE SUBMITTED TO THE BUILDING DEPARTMENT, THE OWNER, AND STRUCTURAL ENGINEER.

GLUED-LAMINATED TIMBER

1. **GLUED-LAMINATED TIMBER** SHALL BE INDUSTRIAL APPEARANCE GRADE, DOUGLAS FIR-LARCH AND SHALL BE MANUFACTURED FROM GRADES OF LUMBER WHICH WILL PRODUCE DESIGN VALUES EQUAL TO OR EXCEEDING THE FOLLOWING WHEN LOADED PERPENDICULAR TO THE WIDE FACES OF THE LAMINATION:

(A) BENDING:	
TENSION ZONE STRESSED IN TENSION	2,400 ps
COMPRESSION ZONE STRESSED IN TENSION (V8)	2,400 psi
COMPRESSION ZONE STRESSED IN TENSION (V4)	1,200 psi
(B) SHEAR PARALLEL TO GRAIN	165 psi
(C) MODULUS OF ELASTICITY	1,800,000 psi
(D) COMPRESSION PERPENDICULAR TO GRAIN	
TENSION FACE	650 psi
COMPRESSION FACE	650 psi
(E) AXIALLY LOADED	
TENSION PARALLEL TO GRAIN	1,100 psi
COMPRESSION PARALLEL TO GRAIN	1,650 psi

2. **GLUED-LAMINATED TIMBER** SHALL MEET THE REQUIREMENTS OF AITC 117 (STANDARD SPECIFICATIONS FOR STRUCTURAL GLUED-LAMINATED TIMBER OF SOFTWOOD SPECIES) OR AITC 119 (DESIGN AND STANDARD SPECIFICATIONS FOR HARDWOOD GLUED-LAMINATED TIMBER.)

3. **MARKINGS:** GLUED-LAMINATED TIMBERS SHALL BE MARKED WITH QUALITY MARKINGS INDICATING CONFORMANCE WITH AITC 117 OR AITC 119 AND SHALL BE LABELED WITH RESPECT TO TOP OF MEMBER.

4. **ADHESIVES** FOR ALL GLUED-LAMINATED TIMBERS SHALL MEET THE REQUIREMENTS FOR WET CONDITION OF SERVICE.

5. **A COAT OF END SEALER** SHALL BE APPLIED TO THE ENDS OF ALL GLUED-LAMINATED TIMBERS AS SOON AS PRACTICAL AFTER END TRIMMING. SURFACES OF MEMBERS SHALL BE SEALED WITH A SEALER COAT.

6. **PROTECTION:** GLUED-LAMINATED TIMBERS SHALL BE PROTECTED FROM WEATHER AT ALL TIMES.

TRUS JOIST MACMILLIAN SILENT FLOOR SYSTEM

1. **PARALLAM PSL AND MICROLLAM LVL MEMBERS** MANUFACTURED BY TRUS JOIST MACMILLAN WITH THE FOLLOWING DESIGN VALUES:

	PARALLAM	MICROLLAM
(A) BENDING:	2,900 psi	2,600 psi
(B) SHEAR PARALLEL TO GRAIN	290 psi	285 psi
(C) MODULUS OF ELASTICITY	2,000,000 psi	1,800,000 psi
(D) COMPRESSION PERPENDICULAR TO GRAIN	650 psi	750 psi
(E) AXIALLY LOADED	2,900 psi	2,460 psi

2. **TJI JOISTS** MANUFACTURED BY TRUS JOIST MACMILLAN.

3. **HOLES:** CONSULT TRUS JOIST MACMILLAN'S SPECIFIER'S GUIDES FOR ALLOWABLE HOLES AND LOCATIONS OF HOLES IN MEMBERS.

4. **STORING, BRACING AND INSTALLATION:** CONTRACTOR TO REVIEW "BUILDER'S GUIDE TO THE SILENT FLOOR SYSTEM" FOR ALL APPLICABLE INFORMATION REGARDING THE PROPER USAGE OF THE SILENT FLOOR SYSTEM PRIOR TO CONSTRUCTION.

5. **INSTALLATION:** INSTALLATION OF SILENT FLOOR SYSTEM IS TO BE DONE ACCORDING TO MANUFACTURER'S RECOMMENDATIONS.

TIMBER

1. **WORKMANSHIP:** ALL ROUGH CARPENTRY SHALL PRODUCE JOINTS TRUE AND TIGHT AND WELL NAILED WITH MEMBERS ASSEMBLED IN ACCORDANCE WITH THE DRAWINGS AND TRIMMERS, HEADERS OF OTHER FRAMING MEMBERS SHALL NOT BE PERMITTED. ALL CAREFULLY SELECT ALL STRUCTURAL MEMBERS. INDIVIDUAL PIECES SHALL BE SELECTED OF BOLTS, PROPER NAILING OR THE MAKING OF SOUND CONNECTIONS. LUMBER MAY BE MOLD AS WELL AS FOR IMPROPER GRADE MARKINGS. DEFECTS WHICH RENDER A PIECE UNABLE TO SERVE ITS INTENDED FUNCTION SHALL BE DISCARDED. SO THAT KNOTS AND OBVIOUS MINOR DEFECTS WILL NOT INTERFERE WITH THE PLACING REJECTED BY THE ENGINEER FOR WARP, TWIST, BOW OR CROOK, MILDEW, FUNGUS OR UNABLE TO SERVE ITS INTENDED FUNCTION SHALL BE DISCARDED.

2. **GRADE MARKINGS:** EACH PIECE OF STRUCTURAL LUMBER, PLYWOOD AND TIMBER SHALL BE MARKED WITH THE GRADE BY SUCH COMPETENT AND RELIABLE ORGANIZATION WHOSE REGULAR BUSINESS IS TO ESTABLISH LUMBER GRADES.

3. **SIZING AND SURFACING:** ALL LUMBER, EXCEPT WHERE NOTED OTHERWISE, SHALL BE SIZED AND SURFACED ON FOUR SIDES. ALL SHALL BE STRAIGHT STOCK, FREE FROM WARP OR CUP AND SINGLE LENGTH PIECES. SPLICING WILL NOT BE PERMITTED EXCEPT WHERE SPECIFICALLY SO DETAILED OR AS DIRECTED BY THE ENGINEER.

4. **MOISTURE CONTENT:** MAXIMUM MOISTURE CONTENT SHALL BE 13% AT TIME OF INSTALLATION.

5. **STABILITY:** WHERE MAXIMUM DIMENSIONAL STABILITY IS DESIRED, SUCH AS EXPOSED BEAMS, FREE OF HEART CENTER (F.O.H.C.) SHOULD BE USED.

6. **HARDWARE:** JOIST HANGERS, STRAPS, HOLDOWNS, ETC. SPECIFIED IS SIMPSON STRONG-TIE AND SHALL BE INSTALLED PER MANUFACTURERS RECOMMENDATIONS USING SPECIFIED NAILS OR BOLTS. THE ENGINEER SHALL BE NOTIFIED OF ANY SUBSTITUTIONS IN HARDWARE.

7. **MACHINE BOLTS:** USE ASTM A307 GRADED BOLTS INSTALLED IN BORED HOLES 1/16 INCH LARGER THAN THE SIZE OF THE BOLT. BOLTS AND NUTS SEATED ON WOOD SHALL HAVE STANDARD CUT STEEL WASHERS UNDER HEADS AND NUTS UNLESS OTHERWISE NOTED. ENCLOSING BOLTED MEMBERS. COUNTER BORE FOR BOLTED HEADS OR NUTS ONLY WHERE SO INDICATED ON THE DRAWINGS; AND THEN ONLY TO SUFFICIENT DEPTH TO HOUSE THE BOLT HEAD OR NUT AND WASHER. CUT OFF EXCESSIVE BOLT PROJECTION WHERE NECESSARY. NICK THREADS TO PREVENT LOOSENING.

8. **LAG SCREWS:** INSTALLED SAME AS FOR MACHINE BOLTS BUT WITH PILOT HOLES 2/3 DIAMETER OF SCREW ROOT. LEAD HOLES SHALL BE UTILIZED EQUAL TO LENGTH AND DIAMETER OF SMOOTH PORTION OF SHANK WHERE SPLITTING IS ANTICIPATED.

9. **SPIKING:** WHERE SPIKING IS CALLED FOR ON THE DRAWINGS SUCH AS IN MULTIPLE JOISTS, SPIKE EACH PIECE WITH TWO ROWS OF 16d NAILS AT SIX INCHES ON CENTER STAGGERED THREE INCHES. THE TWO ROWS SHALL BE SPACED AT SIX INCHES ON CENTER MINIMUM.

10. **NOTCHING, BORING AND CUTTING:** OF WOOD MEMBERS SHALL NOT BE ALLOWED EXCEPT AS PROVIDED FOR IN THE 1997 U.B.C. OR APPROVED BY THE ENGINEER.

11. **BLOCKING AND FIRESTOPPING:** INSTALL ALL BLOCKING AS REQUIRED TO SUPPORT ALL ITEMS OF FINISH SUCH AS BULKHEADS AND DOORBUCKS. PROVIDE FIREBLOCKING TO CUT OFF ALL CONCEALED DRAFT OPENINGS, BOTH VERTICAL AND HORIZONTAL, BETWEEN CEILING AND FLOOR AREAS.

12. **BUILDING PAPER** SHALL BE THE STANDARD PRODUCT OF A MAJOR MANUFACTURER, SUITABLE FOR THE USES INTENDED, AND WEIGHING AT LEAST FOURTEEN POUNDS PER ONE HUNDRED SQUARE FEET.

13. **DOUBLE FLOOR JOISTS** SHALL BE USED UNDER ALL WALLS PARALLEL TO DIRECTION OF FRAMING.

CONCRETE

1. **CONCRETE** SHALL HAVE A 28-DAY COMPRESSIVE STRENGTH AND DENSITY IN ACCORDANCE WITH THE FOLLOWING:

	STRENGTH
GRADE BEAMS	2,500 psi
PIERS	2,500 psi
FOUNDATIONS AND ISOLATED PADS	2,500 psi
ALL OTHER CONCRETE (U.O.N.)	2,000 psi

2. **SLUMP OF CONCRETE** SHALL NOT EXCEED FOUR INCHES UNLESS A HIGH RANGE WATER-REDUCING ADMIXTURE IS USED. THE SLUMP OF CONCRETE PRIOR TO ADDITION OF A HIGH RANGE WATER-REDUCING ADMIXTURE SHALL NOT EXCEED FOUR INCHES. THE SLUMP OF CONCRETE CONTAINING A HIGH RANGE WATER-REDUCING ADMIXTURE SHALL NOT EXCEED TEN INCHES.

3. **NOMINAL MAXIMUM AGGREGATE** SIZE SHALL BE A MAXIMUM OF 3/4 INCHES IN DIAMETER.

4. **CONCRETE EXPOSED TO WEATHER** SHALL BE AIR-ENTRAINED. AIR CONTENT SHALL BE BETWEEN FOUR AND EIGHT PERCENT.

5. **CONCRETE MIX DESIGN:** CONTRACTOR SHALL SUBMIT CONCRETE MIX DESIGNS FOR REVIEW WELL IN ADVANCE OF CONCRETE PLACEMENT. CONCRETE MIX DESIGN SHALL INCLUDE ALL STRENGTH DATA NECESSARY TO SHOW COMPLIANCE WITH THE PROJECT SPECIFICATIONS FOR EITHER THE TRIAL BATCH OR FIELD EXPERIENCE METHOD AND SHALL BE CERTIFIED BY AN ENGINEER REGISTERED IN THE STATE WHERE THE STRUCTURE IS LOCATED.

6. **CONCRETE PLACEMENT** SHALL BE IN COMPLIANCE WITH ACI 304. ALL CONCRETE SHALL BE MECHANICALLY VIBRATED.

7. **CONCRETE COVER:** BASE PLATES, ANCHOR BOLTS, SUPPORT ANGLES, ETC. BELOW GRADE SHALL BE COVERED WITH A MINIMUM OF THREE INCHES OF CONCRETE.

8. **HARDWARE PLACEMENT:** ANCHOR BOLTS, INSERTS, ETC. SHALL BE RIGIDLY HELD IN PLACE PRIOR TO PLACING CONCRETE.

REINFORCING STEEL

1. **GRADES:** REINFORCING STEEL SHALL CONFORM TO ASTM A615 GRADED AS FOLLOWS:
   #4 AND SMALLER: GRADE 40 (Fy= 40,000 psi)
   #5 AND LARGER: GRADE 60 (Fy= 60,000 psi)
   WELDED WIRE FABRIC SHALL CONFORM TO ASTM A185.

2. **REINFORCING PLACEMENT** IS TO BE HELD SECURELY IN PLACE PRIOR TO POURING CONCRETE. PROVIDE SUFFICIENT SUPPORTS TO ALLOW WALKING ON REINFORCING WITHOUT DEFORMING BARS. ALL REINFORCING SHALL BE DETAILED, FABRICATED AND PLACED IN ACCORDANCE WITH THE LATEST ACI DETAILING MANUAL. ALL REINFORCING SHALL BE SUPPORTED IN FORMS, SPACED WITH NECESSARY ACCESSORIES AND SHALL BE SECURELY WIRED TOGETHER IN ACCORDANCE WITH THE LATEST CRSI "MANUAL OF STANDARD PRACTICE." STEEL SHALL BE KEPT CLEAN AND FREE OF RUST SCALES.

3. **COVER:** REINFORCING STEEL SHALL HAVE THREE INCH COVER WHERE CAST PERMANENTLY AGAINST EARTH. COVER AT ALL OTHER LOCATIONS SHALL BE ONE AND A HALF INCHES UNLESS OTHERWISE NOTED.

4. **WELDING OF REINFORCING** OR TACK WELDING OF REINFORCING BARS TO OTHER BARS OR TO PLATES IS PROHIBITED UNLESS APPROVED BY THE STRUCTURAL ENGINEER.

5. **SPLICING:** PROVIDE CONTINUOUS REINFORCEMENT WHEREVER POSSIBLE. SPLICE ONLY AS SHOWN OR APPROVED. STAGGER SPLICES WHERE POSSIBLE.

CONCRETE & MASONRY ADHESIVE ANCHOR

1. **ADHESIVE ANCHOR COMPONENT** WILL BE USED IN ALL LOCATIONS WHERE ALL-THREAD RODS ARE EMBEDDED INTO EXISTING CONCRETE OR GROUT FILLED CONCRETE MASONRY.

2. **ADHESIVE** SHALL BE SIMPSON SET HIGH-STRENGTH EPOXY (ICBO ER 5279) INSTALLED PER MANUFACTURER'S RECOMMENDATIONS. ALTERNATES WILL BE APPROVED UPON SUBMISSION OF MOST RECENT I.C.B.O. REPORT.

3. **DRILLED HOLES** SHALL BE DRILLED WITH ROTARY HAMMER. SIZE SHALL BE 1/8 INCHES IN DIAMETER LARGER THAN THE ROD OR BAR UNLESS NOTED OTHERWISE. CLEAN ALL HOLES WITH A DRILL-MOUNTED WIRE BRUSH. IMMEDIATELY BEFORE APPLYING ADHESIVE, BLOW OUT HOLES WITH OIL-FREE COMPRESSED AIR.

4. **SPECIAL INSPECTION** SHALL BE PROVIDED BY AN INDEPENDENT AGENCY TO VERIFY PROPER INSTALLATION OF ANCHOR BOLTS PER MANUFACTURER'S RECOMMENDATION.

EPOXY GROUTING

1. **EPOXY GROUTING** SHALL BE USED IN ALL LOCATIONS WHERE REBAR IS EMBEDDED INTO EXISTING CONCRETE OR GROUT FILLED CONCRETE MASONRY UNLESS NOTED OTHERWISE.

2. **EPOXY GROUT** FOR DOWNWARD HOLES MAY BE EITHER NON-SAG TYPE OR LIQUID TYPE NORMAL SET. HORIZONTAL OR OVERHEAD HOLES SHALL BE NON-SAG TYPE, NORMAL SET. LIQUID EPOXY SHALL BE POURED SLOWLY INTO HOLE TO AVOID TRAPPED AIR. NON-SAG EPOXY SHALL BE INJECTED WITH A GUN WITH AN EXTENSION NOZZLE FITTED TO REACH THE BOTTOM OF THE HOLE. IN BOTH TYPES, THE HOLE SHOULD BE FILLED APPROXIMATELY HALF FULL.

3. **DRILLED HOLES** SHALL BE DRILLED WITH ROTARY HAMMER. SIZE SHALL BE 1/8 INCHES IN DIAMETER LARGER THAN THE ROD OR BAR UNLESS NOTED OTHERWISE. CLEAN ALL HOLES WITH A DRILL-MOUNTED WIRE BRUSH. IMMEDIATELY BEFORE APPLYING ADHESIVE, BLOW OUT HOLES WITH OIL-FREE COMPRESSED AIR.

4. **MIX RESIN AND HARDENER** PER MANUFACTURER'S SPECIFICATIONS.

5. **PLACEMENT** OF BAR OR ROD SHALL BE SLOWLY INSERTED AND TURNED A MINIMUM OF ONE ROTATION. DO NOT PULL UP AND DOWN ON DOWEL WHEN INSTALLING. REMOVE ANY EPOXY GOUT AROUND HOLE BEFORE IT HAS SET.

PLYWOOD SHEAR WALLS CAN BE INSTALLED ON EITHER SIDE OF DESIGNATED SHEAR WALL.

SPECIAL INSPECTIONS IS REQUIRED FOR EPOXY ANCHOR HOLDOWN INTO EXISTING CONCRETE FOOTING.,

EPOXY ANCHOR FOR ALL PHD AND HDQ HOLDOWNS SHALL BE SIMPSON SET-22 ICBO ER-5279 . SEE SIMPSON CATALOG FOR COMPLETE INSTALLATION INSTRUCTIONS

NEW MUDSILLS SHALL BE MINIMUM 3X 6 W/ 5/8" DIA. X 12" ANCHOR BOLTS @ 4'-0" MAX. SPACING & 2" X 2" X 3/16" THK. PLATE WASHERS ANCHOR BOLT SPACING @ SHEAR WALLS PER SHEAR WALL SCHEDULE

PROVIDE 1 SQ. FT GI SCREEN VENTS FOR EACH 150- SQ. FT OF UNDER FLOOR AREA

MAINTAIN 18" MINIMUM CLEARANCE BETWEEN JOIST & 2" RATPROFING

DOUBLE UNDER ALL PARALLEL PARTITIONS
SOLID BLOCK UNDER ALL PARTITIONS PERPENDICULAR TO JOIST

ALL FRAMING HARDWARE SHALL BE SIMPSON OR ICBO APPROVED EQUAL.

ALL HOLDOWNS/ TIE-DOWNS SHOWN ON THIS PLAN SHALL BE INSTALLED AT THE BASE OF SHEAR WALLS .

SSTB HOLDOWN ANCHORAGE @ FOUNDATION SHALL BE SECURED IN PLACE PRIOR TO CONCRETE POUR.

SPECIAL INSPECTIONS

1. THE OWNER WILL EMPLOY THE SERVICES OF ONE OR MORE SPECIAL INSPECTORS TO PROVIDE SPECIAL INSPECTIONS DURING CONSTRUCTION COMPLYING TO SECTION 1701 OF **THE CURRENT UNIFORM BUILDING CODE FOR THE FOLLOWING:**

CONCRETE: DURING THE TAKING OF TEST SPECIMENS AND PLACING OF REINFORCED CONCRETE. (EXCEPTION: FOR FOUNDATION CONCRETE, OTHER THAN CAST-IN-PLACE DRILLED PILES, WHERE THE STRUCTURAL DESIGN IS BASED ON AN f'c NO GREATER THAN 2,500 POUNDS PER SQUARE INCH.)

BOLTS INSTALLED IN CONCRETE: PRIOR TO AND DURING THE PLACEMENT OF CONCRETE AROUND BOLTS WHEN USED WITH STEEL MOMENT-RESISTING FRAMES.

REINFORCING STEEL: PLACEMENT OF REINFORCING STEEL USED IN CONCRETE REQUIRED TO HAVE SPECIAL INSPECTION.

STRUCTURAL WELDING:
1. DURING THE WELDING OF ANY MEMBER OR CONNECTION UNLESS DONE IN AN APPROVED FABRICATOR'S SHOP. THE SPECIAL INSPECTOR NEED NOT BE CONTINUOUSLY PRESENT DURING THE WELDING OF SINGLE-PASS FILLET WELDS NOT EXCEEDING 5/16 INCHES, FLOOR AND DECK WELDING, AND WELDING OF STAIRS AND RAILING SYSTEMS PROVIDED THAT:
   1.1 THE MATERIALS, QUALIFICATIONS OF WELDING PROCEDURES AND WELDERS ARE VERIFIED PRIOR TO THE START OF WORK.
   1.2 PERIODIC INSPECTIONS ARE MADE OF WORK IN PROGRESS.
   1.3 A VISUAL INSPECTION OF ALL WELDS IS MADE PRIOR TO COMPLETION OR PRIOR TO SHIPMENT OF SHOP WELDING.
2. DURING THE WELDING OF SPECIAL MOMENT-RESISTING STEEL FRAMES. IN ADDITION, ALL COMPLETE PENETRATION GROOVE WELDS CONTAINED IN JOINTS AND SPLICES SHALL BE TESTED 100 PERCENT EITHER BY ULTRASONIC TESTING OR BY RADIOGRAPHY. SEE SECTION 1703 FOR FURTHER INFORMATION ON NON-DESTRUCTIVE TESTING.
3. WELDING OF REINFORCING STEEL.

HIGH-STRENGTH BOLTING: AS REQUIRED BY CHAPTER 22, DIVISION IV OF THE CURRENT UBC FOR ALL STRUCTURAL JOINTS.

PILING, DRILLED PIERS AND CAISSONS: DURING DRIVING AND TESTING OF PILES AND CONSTRUCTION OF CAST-IN-PLACE DRILLED PIERS OR CAISSONS.

HIGH-STRENGTH GROUTING: DURING PLACEMENT FOR COLUMNS AND STEEL MOMENT-RESISTING FRAME BASE PLATES.

2. **SPECIAL INSPECTOR** SHALL BE A QUALIFIED PERSON WHO SHALL DEMONSTRATE COMPETENCE, TO THE SATISFACTION OF THE BUILDING OFFICIAL, FOR INSPECTION OF THE PARTICULAR TYPE OF CONSTRUCTION OR OPERATION REQUIRING SPECIAL INSPECTION.

3. **DUTIES AND RESPONSIBILITIES OF THE SPECIAL INSPECTOR**

THE SPECIAL INSPECTOR SHALL OBSERVE THE WORK ASSIGNED FOR CONFORMANCE WITH THE APPROVED DESIGN DRAWINGS AND SPECIFICATIONS.

THE SPECIAL INSPECTOR SHALL FURNISH INSPECTION REPORTS TO THE BUILDING OFFICIAL, THE ENGINEER OF RECORD, AND OTHER DESIGNATED PERSONS. ALL DISCREPANCIES SHALL BE BROUGHT TO THE IMMEDIATE ATTENTION OF THE CONTRACTOR FOR CORRECTION, THE, IF UNCORRECTED, TO THE PROPER DESIGN AUTHORITY AND TO THE BUILDING OFFICIAL.

THE SPECIAL INSPECTOR SHALL SUBMIT A FINAL SIGNED REPORT STATING WHETHER THE WORK REQUIRING SPECIAL INSPECTION WAS, TO THE BEST OF THE INSPECTOR'S KNOWLEDGE, IN CONFORMANCE WITH THE APPROVED PLANS AND SPECIFICATIONS AND THE APPLICABLE WORKMANSHIP PROVISIONS OF THE CODE.

PLYWOOD SHEATHING

FLOOR SHEATHING

1. **SHEATHING** SHALL BE ___/32 INCH T&G APA RATED STURD-I-FLOOR, 24, EXPOSURE 1 SHEATHING OR ___/32 INCH T&G APA RATED STURD-I-FLOOR, **48/24**, EXPOSURE 1 UNLESS NOTED OTHERWISE.

2. **SPACING OF PANELS** SHALL BE 1/8 INCH AT PANEL ENDS AND EDGES.

3. **INSTALL WITH LONG DIMENSION** OR STRENGTH AXIS OF PANEL ACROSS SUPPORTS AND WITH PANEL CONTINUOUS OVER TWO OR MORE SPANS.

4. **PANEL END JOINTS** SHALL BE STAGGERED AND PLACED OVER FRAMING.

ROOF SHEATHING

1. **SHEATHING** SHEATHING SHALL BE ___/32 INCH APA RATED, 32/16, EXPOSURE 1, C-D GRADE OR BETTER.

2. **SPACING OF PANELS** SHALL BE 1/8 INCH AT PANEL ENDS AND EDGES.

3. **ORIENTATION** OF SHEATHING SHALL BE THE SAME AS FLOOR SHEATHING.

MINIMUM LUMBER GRADES

TYPE	SIZES	MINIMUM GRADE* (U.N.O. ON PLANS)
STUDS	2X4 3X4 2X6	CONSTRUCTION DF #2 DF #2
JOISTS	2X	DF #2
BEAMS	4x, 6X	DF #1
POSTS	4X, 6X	DF #1

* MAXIMUM MOISTURE CONTENT SHALL BE 13% AT TIME OF INSTALLATION.
** WHERE MAXIMUM DIMENSIONAL STABILITY IS DESIRED (SUCH AS EXPOSED BEAMS), USE FREE OF HEART CENTER (F.O.H.C.) MEMBERS SHOULD BE USED.

SIMPSON STRONG-TIE HANGERS			
	SINGLE JOIST (FACE MOUNT)	SINGLE JOIST (TOP FLANGE)	DOUBLE JOIST (FACE MOUNT)
2 X 6	LUS26		LUS26-2
2 X 8	LUS28		LUS28-2
2 X 10	LUS210		LUS210-2

1. DOUBLE ALL FLOOR JOIST BELOW PARTITIONS PARALLEL TO FRAMING.
   SOLID BLOCK BELOW PARTITIONS PERPENDICULAR TO FRAMING.
2. JOINTS IN DOUBLE TOP PLATES SHALL BE OFFSET AT LEAST 48" AND NAILED WITH A MINIMUM OF 15- 16d NAILS (5" MAX. O.C.). UNLESS OTHERWISE NOTED
3. MINIMUM HEADER SIZE FOR NON-BEARING WALL SHALL BE 4X6 OR 2- 2X6 MIN.
4. ONLY LOAD BEARING BEAMS AND HEADERS ARE SHOWN ON THE PLAN AND ARE TO BE 4 X 12 DF# 2 U.O.N.

Shear Wall Schedule :					
Shear Wall Sheathing	Shear Wall Nailing	Shear Transfer	Sill Nailing	Foundation Bolt Req. (3 x mudsill)	Foundation Bolt Req. (2 x mudsill)
1/2" CDX Plywood. Shtg. Blocked Edges	10d @ 6" o.c. E.N. 10d @ 12" o.c. F.N.	A-35 Clips @ 16" o.c.	16d @ 6" o.c.	5/8" Dia. A.B. @ 2'-6" o.c.	5/8" Dia. A.B. @ 2'-6" o.c.

1. See plans for size and location of Holdowns.
2. Hardware called out is Simpson Strong-Tie Connectors. Review 2006 Simpson Strong-Tie catalog prior to installation for requirements and procedures.
3. See foundation plan for size and spacing of A.B. U.N.O. where shear walls are shown, follow schedule.
4. Use Threaded rod for holdown down anchorage.
5. Keep minimum 1/16" clear between all plywood panel edges.
6. Use one-piece plywood sheets at all shear walls 48" or less in width.
7. All plywood panels shall be minimum 24" wide.
8. Edge nail plywood to holdown post.

Note:

All New Mudsills to be 3x minimum with 5/8" dia. x 12" Anchor bolts @ 4'-0" max o.c. Spacing.
A.B. washers at all new Mudsills & mudsills at designated shear walls to receive 2"x 2" x 3/16" thk. plate washers.

Roof General Notes

- Provide attic-venting minimum of 1/150 of total new attic area, this project requires 4# of new venting area net. Use (3) ½" dia. vent holes w/ 26 ga. at vaulted ceilings provide screen blocking at each rafter bay. Use 5 ½" x 22 ½" 26 ga. screen vents and gable end vents where possible (not shown for clarity).
- Eyebrow venting required to provide ventilation of 30 % of the upper portion of attic, (36" above plate line) if radiant barrier is used.
- Contractor will field verify and match existing roof pitch of 4 -12.
- Use ST6236 straps to tie new top plates to existing top plates (U.N.O.).
- All new headers above new windows and doors on exterior walls are to be 4x12 DF#2 min. (U.N.O.).
- Provide **radiant barrier** on the **underside** of roof assembly (U.N.O.).
- All existing rain gutters and down spouts are to remain, (U.N.O.).
- All exposed pipes or vent stacks are to be painted to match roofing color.
- Provide chimney cricket (field verify).
- Provide chimney spark arrestor.(field verify)
- **DIMENSIONS** shall not be scaled from these plans, framing sections and details of the structural drawings. See architectural drawings for dimensions, elevations, slopes, finishes, etc. Contractor shall verify all dimensions related to the existing field conditions.

FOUNDATION UPGRADE PLAN

HOLDOWN INTO FOOTING

Holdown	SSTB Anchor (Into New Ftg)	Threaded Rod (If into Existing Footing with 'SET' Epoxy)	Embedment	Drill Dia.
PHD5-SDS3	SSTB20 (4600#)	5/8" Dia.	12" (5870#)	3/4"

-Uplift Capacity for SSTB anchors and Rod Embedment with Simpson 'SET Epoxy per Simpson 2006 Catalo
-Simpson 'SET' Epoxy Adhesive ICBO ER-5279

ANCHOR BOLTS @ NEW FOUNDATION:
NEW MUDSILLS SHALL BE MINIMUM 3X W/ 5/8" DIA. X 12" ANCHOR BOLTS @ 4'-0" MAX. SPACING WITH 2" X 2" X 3/16" THK. PLATE WASHERS. PROVIDE MINIMUM TWO BOLTS PER MUDSILL EACH ONE NOT MORE THAN 12" OR LESS THAN 7 BOLT DIAMETERS
(4-3/8") FROM END CBC 1806.8

Foundation General Notes:

- Concrete subcontractor will field verify for correct placement of foundation stem wall to allow for any wall alignments as noted on drawings. Concrete subcontractor will break open any exterior finish as needed to confirm this alignment before the start of form framing of foundation.
- Weep screed to be galvanized, minimum 26 ga. at foundation plate line 4" above grade (or 2" above concrete or paving).
- Provide under floor venting minimum of 1/150 of total new under floor area, this project requires 4# of new venting area net. Provide cross flow ventilation on at least two opposite sides, equally distributed and close to corners to remove any dead air. Use 5 ½" x 14 ½" 26. screen vents. (not shown for clarity).
- Concrete subcontractor will verify with shear wall schedule notes on anchor bolt spacing.
- Contractor will use galvanized nails at all pressure treated lumber ledgers noted on drawings.
- All anchor bolts are to be 5/8" dia. embedded into concrete 7" min. and not more than 12" from corners. Installed with 2" x 2" x 3/16" plate washers.
- Concrete subcontractor will field verify new addition subfloor finish level to match existing. Break open any exterior finish as needed to confirm this level before the start of form framing of foundation.
- Concrete subcontractor will field verify any and all point loads before installation of new piers.
- Verify in the field and prep perimeter for drainage of surface water to drain away from new building.
- **DIMENSIONS** shall not be scaled from these plans, framing sections and details of the structural drawings. See architectural drawings for dimensions, elevations, slopes, finishes, etc. Contractor shall verify all dimensions related to the existing field conditions.

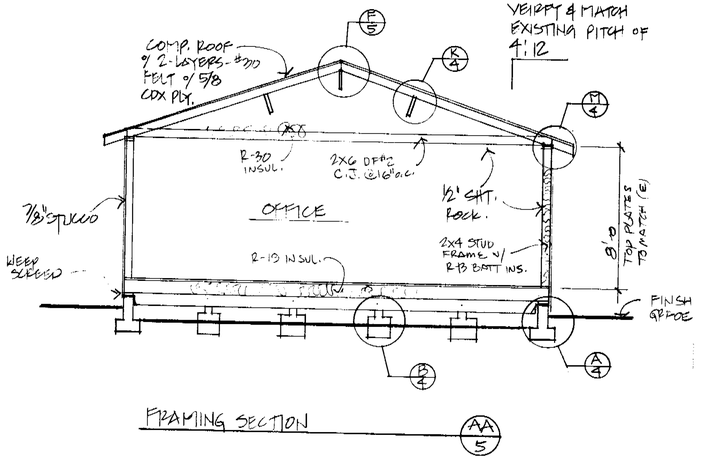
C/5 BM STIFFENER W/CAVITY



FRAMING SECTION AA/5

PLYWOOD SHEAR WALLS CAN BE INSTALLED ON EITHER SIDE OF DESIGNATED SHEAR WALL.

SPECIAL INSPECTIONS IS REQUIRED FOR EPOXY ANCHOR HOLDOWN INTO EXISTING CONCRETE FOOTING..

EPOXY ANCHOR FOR ALL PHD AND HDQ HOLDOWNS SHALL BE SIMPSON SET-.22 ICBO ER-5278 . SEE SIMPSON CATALOG FOR COMPLETE INSTALLATION INSTRUCTIONS

NEW MUDSILLS SHALL BE MINIMUM 3X 6 W/ 5/8" DIA. X 12" ANCHOR BOLTS @ 4'-0" MAX. SPACING & 2" X 2" X 3/16" THK. PLATE WASHERS ANCHOR BOLT SPACING @ SHEAR WALLS PER SHEAR WALL SCHEDULE

MAINTAIN 18" MINIMUM CLEARANCE BETWEEN JOIST & 2" RATPROFING

DOUBLE UNDER ALL PARALLEL PARTITIONS
SOLID BLOCK UNDER ALL PARTITIONS PERPENDICULAR TO JOIST

ALL FRAMING HARDWARE SHALL BE SIMPSON OR ICBO APPROVED EQUAL

ALL HOLDOWNS/ TIE-DOWNS SHOWN ON THIS PLAN SHALL BE INSTALLED AT THE BASE OF SHEAR WALLS

SSTB HD.DOWN ANCHORAGE @ FOUNDATION SHALL BE SECURED IN PLACE PRIOR TO CONCRETE POUR

1. DOUBLE ALL FLOOR JOIST BELOW PARTITIONS PARALLEL TO FRAMING. SOLID BLOCK BELOW PARTITIONS PERPENDICULAR TO FRAMING.
2. JOINTS IN DOUBLE TOP PLATES SHALL BE OFFSET AT LEAST 48" AND NAILED WITH A MINIMUM OF 15- 16d NAILS (8" MAX. O.C.). UNLESS OTHERWISE NOTED.
3. MINIMUM HEADER SIZE FOR NON-BEARING WALL SHALL BE 4X6 OR 2- 2X8 MIN
4. ONLY LOAD BEARING BEAMS AND HEADERS ARE SHOWN ON THE PLAN AND ARE TO BE 4 X 12 OR # 2 U.O.N.

CONCRETE

1. DIMENSIONS REFER TO ROUGH CONCRETE SURFACES, CENTER LINE OF COLUMNS.
2. EXCAVATIONS SHALL CONFORM TO ELEVATIONS AND DIMENSIONS SHOWN WITHIN A TOLERANCE OF +0.1'.
3. PORTLAND CEMENT SHALL CONFORM TO ASTM SPEC. C150, LATEST EDITION. TYPE II ONE BRAND OF CEMENT SHALL BE USED THROUGHOUT THE WORK
4. AGGREGATES SHALL CONFORM TO ASTM SPEC. C33, LATEST EDITION
5. TRANSPORT CONCRETE FROM MIXER TO FINAL POSITION BY A METHOD WHICH WILL PREVENT SEPARATION OR LOSS OF MATERIAL, IN ACCORDANCE WITH ASTM SPEC. C94
6. DEPOSIT CONCRETE IN CONTINUOUS OPERATIN UNTIL SECTION IS COMPLETED
7. CONSOLIDATE PLACED CONCRETE BY MECHANICAL VIBRATING EQUIPMENT SUPPLEMENTED BY HAND-SPADING, RODDING OR TAMPING.
8. CONCRETE DESIGN MIXES; 2500 PSI, 28 DAY COMPRESSIVE STRENGTH

CONCRETE REINFORCING STEEL

1. FOR # 4 BARS OR SMALLER USE GRADE 40. DEFORMED, REINFORCING BARS CONFORMING TO ASTM A 615
2. FOR # 5 BARS OR LARGER USE GRADE 60, DEFORMED, REINFORCING BARS CONFORMING TO ASTM A 6 5
3. ALL REINFORCEMENT SHALL BE CONTINUOUS WITH STAGGERED SPLICES AT ADJACENT BARS. LAP 40 DIAMETERS AT SPLICES IN CONCRETE
4. CONCRETE COVER FOR REINFORCING STEEL SHALL BE MADE AS FOLLOWS UNLESS OTHERWISE NOTED ON DRAWINGS:
   3" MINIMUM FOR CONCRETE POURED AGAINST EARTH
   2" MINIMUM FOR CONCRETE POURED AGAINST FORMS

CARPENTRY

ALL LUMBER SHALL BE GRADED DOUGLAS FIR LARCH OR REDWOOD IN ACCORDANCE WITH WCLB OR WWPA RULES, LATEST EDITION.

BEAMS LEDGERS, AND POSTS; #1 GRADE OR BETTER.
HEADERS; #2 GRADE OR BETTER.
JOISTS AND RAFTERS (SEE BELOW)
STUDS, SILLS AND PLATES; #2 GRADE OR BETTER.
(SILLS IN CONCRETE SHALL BE PRESSURE TREATED DOUGLAS FIR)
GLU-LAM. BEAMS; DOUGLAS FIR, COMB 24F-V4 EXTERIOR GLUE
PLYWOOD SHEATHING, APA RATED, EXPOSURE 1
PARALLAM & MICRO-LAM BY TRUS JOIST MACMILLAN (NER-292)

STRUCTURAL STEEL

1. ALL FABRICATION AND ERECTION TO BE IN ACCORDANCE WITH AISC SPECIFICATIONS
2. ALL STRUCTURAL STEEL SHALL BE A-36 OR BETTER
3. ALL STRUCTURAL STEEL SHALL BE PAINTED WITH ONE COAT NON LEAD RUST IF EXPOSED TO WEATHER. PREVENTIVE COAT PAINT. AFTER ERECTION. FIELD CONNECTIONS SHALL BE TOUCHED UP.

GENERAL NOTE

ALL WORK SHALL CONFORM TO THE STANDARDS, CODES AND ORDINANCES OF THE CITY OF SAN JOSE AND THE CALIFORNIA BUILDING CODE 2001 EDITION

CONTRACTOR SHALL VERIFY ALL FIELD CONDITIONS AND DIMENSIONS AND CONDITIONS INDICATED ON THESE DRAWINGS AND MAKE KNOWN ANY DISCREPANCIES PRIOR TO COMMENCING THEIR WORK

DETAILS AND NOTED SHOWN ON THESE DRAWINGS SHALL APPLY IN ALL SIMILAR CASES UNLESS SPECIFICALLY SHOWN OR NOTED OTHERWISE. CONSTRUCTION DETAILS NOT FULLY SHOWN OR NOTED SHALL BE SIMILAR TO DETAILS SHOWN FOR SIMILAR CONDITIONS

NO GUARANTEE OF QUALITY OF CONSTRUCTION IS IMPLIED OR INTENDED BY THE ARCHITECTURAL DOCUMENTS, AND THE CONTRACTOR SHALL ASSUME FULL RESPONSIBILITY FOR ANY OR ALL CONSTRUCTION DEFICIENCIES.

MATERIALS AND WORKMANSHIP: THE CONTRACTOR SHALL SUPPLY ALL LABOR, MATERIALS, EQUIPMENT AND SERVICES OF EVERY KIND, INCLUDING WATER, POWER, TELEPHONE AND TOILET FACILITIES NECESSARY FOR THE PROPER EXECUTION OF THE WORK SHOWN OR INDICATED ON THESE DRAWINGS. ALL MATERIALS SHALL BE NEW AND MATERIALS AND WORKMANSHIP SHALL BE OF GOOD QUALITY. ALL WORKMAN AND SUBCONTRACTORS SHALL BE SKILLED IN THEIR TRADE.

DISCREPANCIES: THE CONTRACTOR SHALL VERIFY ALL DIMENSIONS, ELEVATIONS AND CONDITIONS AT THE JOB SITE AND BRING ANY DISCREPANCIES TO THE ATTENTION OF OWNER PRIOR TO CONSTRUCTION OF SAME.

EXCAVATION: THE CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR ALL EXCAVATION PROCEDURES INCLUDING LAGGING, SHORING AND PROTECTION OF ADJACENT PROPERTY, STRUCTURES, STREETS AND UTILITIES IN ACCORDANCE WITH THE LOCAL BUILDING CODES

BRACING: TEMPORARY BRACING SHALL BE PROVIDED AS REQUIRED TO HOLD ALL COMPONENTS OF THE STRUCTURE IN PLACE UNTIL FINAL SUPPORT IS SECURELY ANCHORED THE CONTRACTOR SHALL MAINTAIN THE INTEGRITY OF ALL SCAFFOLDING, SHORING AND BRACING SYSTEMS AS REQUIRED FOR THE INSTALLATION OF ALL WORK.

INSPECTIONS: CONTRACTOR SHALL BE RESPONSIBLE FOR ARRANGING ALL INSPECTIONS REQUIRED FOR THE TIMELY PROGRESS OF THE JOB.

SUPERVISION: THE GENERAL CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR THE PROPER EXECUTION OF THE WORK SHOWN OR INDICATED ON THESE DRAWINGS. JOB SITE VISITS BY THE DESIGNER SHALL IN NO WAY BE CONSTRUED AS SUPERVISION OF CONTRACTOR'S WORKERS, SUB- CONTRACTORS OR TRADESMEN NOR SHALL ANY ACTION BY DESIGNER BE CONSTRUED AS AN INSPECTION OF CONTRACTOR'S WORK OR APPROVAL OF THE MATERIALS AND WORKMANSHIP ON THE JOB AND SHALL IN NO WAY RELIEVE CONTRACTOR OF RESPONSIBILITY FOR THE PROPER EXECUTION OF THE WORK

STOCKDRAFTING FORM NO. 101 55

HANDICAPPED NOTES:

A. HARDWARE: SCHLAGE LEVER ALL DOORS SHALL HAVE 18" MIN. CLR. ON THE STRIKER SIDE FOR THE HANDICAPPED

B. EXIT DOORS SHALL BE OPENABLE FROM THE INSIDE WITHOUT THE USE OF KEY OR ANY OTHER SPECIAL KNOWLEDGE OR EFFORT

C. THRESHOLD SHALL HAVE A MAX. HEIGHT OF 1/2" FROM FIN. FLOOR HANDICAPPED SIGN SHALL BE POSTED AT ALL EXTERIOR DOORS

D. EFFORT TO OPERATE DOORS SHALL NOT EXCEED 8-1/2 LBS FOR EXTERIOR DOORS AND 5 LBS FOR INTERIOR DOORS, SUCH PULL OR PUSH EFFORT BEING APPLIED AT RIGHT ANGLES TO HINGED DOORS AND AT THE CENTER PLANE OF THE SLIDING OR FOLDING DOOR

E. BOTTOM 10" OF ALL DOORS EXCEPT AUTOMATIC AND SLIDING SHALL HAVE A SMOOTH UNINTERRUPTED SURFACE

F. RESTROOM FLOOR SHALL HAVE SMOOTH, HARD, NONABSORBENT SURFACE WHICH EXTENDS 4'-0" UPWARD UNTO WALLS (MATERIAL: "MARLITE")

G. ACCESSORIES SUCH AS GRAB BARS PAPER DISPENSERS, ETC., SHALL BE INSTALLED AND SEALED TO PROTECT STRUCTURAL ELEMENTS FROM MOISTURE

H. WATER CLOSETS HEIGHT SHALL BE A MIN. OF 17" & MAX. OF 19" FROM TOP OF TOILET SEAT. CONTROLS SHALL BE OPERABLE WITH ONE HAND, AND SHALL NOT REQUIRE TIGHT GRASPING, PINCHING, OR TWISTING OF THE WRIST. THE FORCE REQUIRED TO ACTIVATE CONTROLS SHALL BE NO GREATER THAN 5 LBS PER FOOT

I. LAVATORY: CLEAR SPACE OF 30"x48" SHALL BE PROVIDED FOR KNEE SPACE ACCORDING TO SECTION 522(c)

J. MIRROR: SHALL BE MOUNTED WITH BOTTOM EDGE NO HIGHER THAN 40" FROM FIN. FLOOR

K. TOWEL, SANITARY NAPKINS, WASTE RECEPTACLES & OTHER SIMILAR FIXTURES SHALL BE LOCATED WITH ALL OPERABLE PARTS WITHIN 40" FROM FIN. FLOOR

L. TOILET TISSUE DISPENSERS SHALL BE LOCATED ON THE WALL WITHIN 12" OF THE FRONT EDGE OF THE TOILET SEAT

M. ALL DOORS TO ACCESSIBLE TOILET COMPARTMENT SHALL PROVIDE A CLEAR OPENING WITH OF AT LEAST 32" WHEN LOCATED AT THE END OF THE COMPARTMENT PER SECTION 511.1 (a) 7.

N. THE WIDTH OF LEVEL AREA ON THE SIDE TO WHICH THE DOOR SWINGS SHALL EXTEND 24" PAST THE STRIKER EDGE OF THE DOOR FOR EXTERIOR DOORS PER SECTION 3304 (i.1) 2.C.

O. HOT WATER AND DRAIN PIPES UNDER ACCESSIBLE LAVATORIES SHALL BE INSULATED PER SECTION P1504 (b)

☐ **Water Closets:**
- Seat Height: 17" - 19".
- Flush Controls: Max. 5 lb., lever or push type, located on clear side.
- Control Height: Max. 44" above floor.

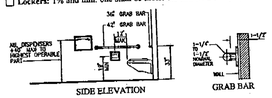
☐ **Urinals:** Min. 1 required.
- Clear Space: Min. 30" X 48" for front approach.
- Fixture Extension: Min. 14" from wall.
- Height: Max. 17" above floor.
- Faucet Controls: Max. 5 lb., lever or push type, or electronic controlled.

☐ **Toilet Tissue Dispensers:**
- Height: Min. 19" above floor.
- Location: On wall max. 12" from front of toilet seat.
- Type: continuous paper flow.

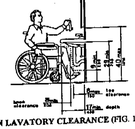
☐ **Mirrors:** Min. 1 with bottom edge max. 40" above floor.

☐ **Towel, Sanitary Napkins & Waste Receptacles:**
- Min. one each type.
- Operable Parts Heights: Max. 40" above floor.

☐ **Lockers:** 1% and min. one shall be accessible and on a 36" path of travel.



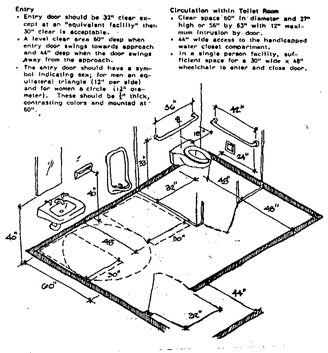
TOILET DIMENSIONS (FIG. 11B-1A)



OPEN LAVATORY CLEARANCE (FIG. 11B-1D)

Entry
- Entry door should be 32" clear except at an "equivalent facility" then 30" clear is acceptable.
- A level clear area 60" deep when entry door swings towards approach and 44" deep when the door swings away from the approach.
- The entry door should have a symbol indicating sex; for men an equilateral triangle (12" on side) and for women a circle 12" diameter). These should be 1/4" thick, contrasting colors and mounted at 60".

Circulation within Toilet Room
- Clear space 60" in diameter and 27" high or 56" by 63" with 12" maximum intrusion by door.
- 44" wide access to the handicapped water closet compartment.
- In a single person facility, sufficient space for a 30" wide x 48" wheelchair to enter and close door.



ELECTRICAL SYMBOLS

- Duplex outlet
- 220 outlet
- 1/2 hot outlet
- Ground Fault Interrupter
- Weatherproof outlet
- Junction box
- Switch
- 3 way switch
- 4 way switch
- Dimmer switch
- Wall mounted fixture
- Ceiling mounted fixture
- Recessed fixture (compact fluorescent)
- Light/Fan combination
- Fluorescent tube
- Exhaust fan
- Smoke detector
- Thermostat
- Telephone
- Cable
- Stereo Sound

EXCEPTIONAL CONDITIONS COMPLIANCE CHECKLIST

The local enforcement agency should pay special attention to the items specified in this checklist. These items require special written justification and documentation, and special verification to be used with the performance approach. The local enforcement agency determines the adequacy of the justification, and may reject a building or design that otherwise complies based on the adequacy of the special justification and documentation submitted.

The exceptional features listed in this performance approach application have specifically been reviewed. Adequate written justification and documentation for their use have been provided by the applicant.

STATEMENT OF COMPLIANCE

This Certificate of Compliance lists the building features and performance specifications needed to comply with Title 24, Parts 1 and 6 of the California Code of Regulations. This certificate applies only to a building using the performance compliance approach.

The documentation preparer hereby certifies that the documentation is accurate and complete.

DOCUMENTATION AUTHOR: FRANK R. IANNUCCI — SIGNATURE — DATE: 5/9/2006

The Principal Designer hereby certifies that the proposed building design represented in this set of construction documents is consistent with the other compliance forms and worksheets, with the specifications, and with any other calculations submitted with this permit application. The proposed building as designed meets the energy efficiency requirements contained in sections 110, 116, through 118, and 140, 142, 143 or 149 of Title 24, Part 6.

ENV. LTG. MECH.

☐ ☐ ☐ 1. I hereby affirm that I am eligible under the provisions of Division 3 of the Business and Professions Code to sign this document as the person responsible for its preparation; and that I am licensed in the State of California as a civil engineer, mechanical engineer, or I am a licensed architect.

☐ ☐ ☐ 2. I affirm that I am eligible under the provisions of Division 3 of the Business and Professions Code Section 5537.2 or 6737.3 to sign this document as the person responsible for its preparation; and that I am a licensed contractor performing this work.

☐ ☐ ☐ 3. I affirm that I am eligible under Division 3 of the Business and Professions Code to sign this document because it pertains to a structure or type of work described as exempt pursuant to Business and Professions Code Sections 5537, 5538, and 6737.1. (These sections of the Business and Professions Code are printed in full in the Nonresidential Manual.)

LIGHTING MANDATORY MEASURES — LTG-MM

PROJECT NAME: GRANITEROCK OFFICE ADDITION — DATE: 5/9/2006

DESCRIPTION	Designer	Enforcement
[X] §131(d) For every floor, all interior lighting systems shall be equipped with a separate automatic control to shut off the lighting. This automatic control shall meet the requirements of Section 119 and may be an occupancy sensor, automatic time switch, or other device capable of automatically shutting off the lighting.		
[X] §131(d) Override for Building Lighting Shut-off: The automatic building shut off system is provided with a manual, accessible override switch in sight of the lights. The area of override is not to exceed 5,000 square feet.		
[X] §119(h) Automatic Control Devices Certified: All automatic control devices specified are certified, all alternate equipment shall be certified and installed as directed by the manufacturer.		
[X] §111 Fluorescent Ballast and Luminaires Certified: All fluorescent fixtures specified for the project are certified and listed in the Directory. All installed fixtures shall be certified.		
[X] §132 Tandem Wiring for One and Three Lamp Fluorescent Fixtures: All one and three lamp fluorescent fixtures are tandem wired with two lamp ballasts where required by Standards Section 132; or all one and three lamp fluorescent fixtures are specified with electronic high-frequency ballasts and are exempt from tandem wiring requirements.		
[X] §131(e) Individual Room/Area Controls: Each room and area in this building is equipped with a separate switch or occupancy sensor device for each area with floor-to-ceiling walls.		
[X] §131(b) Uniform Reduction for Individual Rooms: All rooms and areas greater than 100 square feet and more than 0.8 watts per square foot of lighting load shall be controlled with bi-level switching for uniform reduction of lighting within the room.		
[ ] §131(c) Daylight Area Control: All rooms with windows and skylights that are greater than 250 square feet and that allow for the effective use of daylight in the area shall have 50% of the lamps in each daylit area controlled by a separate switch; or the effective use of daylight cannot be accomplished because the windows are continuously shaded by a building on the adjacent lot. Diagram of shading during different times of the year is included on plans.		
[ ] §131(e) Display Lighting. Display lighting shall be separately switched on circuits that are 20 amps or less.

DESCRIPTION	Designer	Enforcement
[X] §110(a) Installed Insulating Material shall have been certified by the manufacturer to comply with the California Quality Standards for insulating material, Title 20, Chapter 4, Article 3.		
[X] §118(c) All insulating Materials shall be installed in compliance with the flame spread rating and smoke density requirements of Sections 2602 and 707 of Title 24, Part 2.		
[X] §117(a) All Exterior Joints and openings in the building that are observable sources of air leakage shall be caulked, gasketed, weatherstripped or otherwise sealed.		
[X] §116(b) Site Constructed Doors, Windows and Skylights shall be caulked between the unit and the building, and shall be weatherstripped (except for unframed glass doors and fire doors).		
[X] §116(a)1 Manufactured Doors and Windows installed shall have air infiltration rates not exceeding those shown in Table Number 1-E of the Standards. Manufactured fenestration products must be labeled for U-value according to NFRC procedures.		
[X] §116(e) Demising Walls in Nonresidential Buildings: The opaque portions of framed demising walls in nonresidential buildings shall have insulation with an installed R-value of no less than R-13 between framing members.

Designer:
This form is to be used by the designer and attached to the plans. Listed below are all the acceptance tests for lighting systems. The designer is required to check the boxes by all acceptance tests that apply and list all equipment that require an acceptance test. If all equipment of a certain type requires a test, list the equipment description and the number of systems to be tested in parentheses. The NJ number designates the Section in the Appendix of the Nonresidential ACM Manual that describes the test. Also indicate the person responsible for performing the tests (i.e. the installing contractor, design professional or an agent selected by the owner). Since this form will be part of the plans, completion of this section will allow the responsible party to budget for the scope of work appropriately.

Building Departments:
Before an occupancy permit is granted for a newly constructed building or space, or a new lighting system system serving a building or space is operated for normal use, all control devices serving the building or space shall be certified as meeting the Acceptance Requirements for Code Compliance. In addition a Certificate of Acceptance, LTG-1-A, Forms shall be submitted to the building department that:

A. Certifies plans, specifications, installation certificates, and operating and maintenance information meet the requirements of §10-103(b) and Title 24 Part 6.

To Whom It May ~~Concern~~:

Site Condition differs from the approved plans for the Proposed Addition @ Graniterock - 120 Graniterock Way.

The top plate in the existing structure is 8'8" in height. The approved suggests the new addition to be framed at 8'0" height To Match Existing top plate. This is shown on the Framing Section detail AA/5 on plan page 5. We are requesting approval to frame at 8'8" to match existing. In addition to the approval for the aforementioned item, we are requesting approval for a blocking detail that will be needed above the Simpson Strong Wall "SW 48-8RF" in order to achieve the 8'8" needed to match the existing top plate. We are attaching a blocking detail provided by Simpson Strong-tie for approval.

Respectfully,

Matt Harris

RE: Shim block (greater than 1 ½-inches up to 12-inches) with LTP4's on Simpson Standard or RF Strong-Walls

For the Simpson Standard or RF Strong-Walls, a solid shim block may be added between the bottom of the top plates and the top of the Strong-Wall in accordance with the following provisions:

1) The shim block (maximum 4x12) shall be constructed with a solid block and may not consist of built-up 2x plates.

2) Simpson LTP4 framing anchors shall be installed horizontally and as shown on the attached drawing.

3) Out-of plane considerations and potential hinging at the top of the Strong-Wall shall be evaluated by the Engineer of Record. This may be addressed by adding king studs to the jambs of the Strong-Wall as shown in the attached drawing.

4) The allowable shear shall be taken as specified for the next higher wall model.

Sincerely,

SIMPSON STRONG-TIE CO., INC.

Re: Proposed Rear Addition
120 Granite Rock Way, San Jose, CA

To Whom It May Concern:

I have made a general review of Prefabricated Roof Truss calculations prepared by Jim Kiltinen P.E. of CompuTrus, Inc. for the above referenced address. Based on my review, the general truss layout, Girder Truss point loads, and loading on all truss chords are satisfactory and conforms to plan and my general design requirements.

Sincerely,

Johnson Chu, P.E.

WARNINGS:
1. Read all General Notes and Warnings before construction of trusses.
2. Builder and erection contractor should be advised of all General Notes and Warnings before construction commences.
3. 2x4 compression web bracing must be installed where shown +.
4. All lateral force resisting elements such as temporary and permanent bracing must be designed and provided by designer of complete structure. CompuTrus assumes no responsibility for such bracing.
5. No load should be applied to any component until all all bracing and fasteners are complete, and at no time should any loads greater than design loads be applied to any component.
6. CompuTrus has no control over and assumes no responsibility for the fabrication, handling, shipment and installation of components.
7. This design is furnished subject to the limitations on truss designs set forth by TPI in HIB-91 or TPI/WTCA in BCSI 1-03 copies of which will be furnished by CompuTrus upon request.

General Notes, unless otherwise noted
1. Design to support loads as shown.
2. Design assumes the top and bottom chords to be laterally braced at 2'-0" o.c. and at 10'-0" o.c. respectively unless braced throughout their length by continuous sheathing.
3. 2x lateral bridging or lateral bracing required where shown + +
4. Installation of truss is the responsibility of the respective contractor.
5. Design assumes trusses are to be used in a non-corrosive environment, and are for "dry condition" of use.
6. Design assumes full bearing at all supports shown. Shim or wedge if necessary.
7. Design assumes adequate drainage is provided.
8. Plates shall be located on both faces of truss, and placed so their center lines coincide with joint center lines.
9. Digits indicate size of plate in inches.
10. For basic design values of the CompuTrus Plate, indicated by the prefix "C", see I.C.B.O. R.R. 4211.
11. The CompuTrus Net Section Plate is indicated by the prefix "CN", the designator (18) indicates 18 ga. material is used. All others are 20 ga

WARNINGS:

1. Read all General Notes and Warnings before construction of trusses.
2. Builder and erection contractor should be advised of all General Notes and Warnings before construction commences.
3. 2x4 compression web bracing must be installed where shown +.
4. All lateral force resisting elements such as temporary and permanent bracing, must be designed and provided by designer of complete structure. CompuTrus assumes no responsibility for such bracing.
5. No load should be applied to any component until after all bracing and fasteners are complete, and at no time should any loads greater than design loads be applied to any component.
6. CompuTrus has no control over and assumes no responsibility for the fabrication, handling, shipment and installation of components.
7. This design is furnished subject to the limitations on truss designs set forth by TPI in HIB-91 or TPI/WTCA in BCSI 1-03 copies of which will be furnished by CompuTrus upon request.

General Notes, unless otherwise noted:

1. Design to support loads as shown.
2. Design assumes the top and bottom chords to be laterally braced at 2'-0" o.c. and at 10'-0" o.c. respectively unless braced throughout their length by continuous sheathing.
3. 2x lateral bridging or lateral bracing required where shown + +
4. Installation of truss is the responsibility of the respective contractor.
5. Design assumes trusses are to be used in a non-corrosive environment, and are for "dry condition" of use.
6. Design assumes full bearing at all supports shown. Shim or wedge if necessary.
7. Design assumes adequate drainage is provided.
8. Plates shall be located on both faces of truss, and placed so their center lines coincide with joint center lines.
9. Dims indicate size of plate in inches.
10. For basic design values of the CompuTrus Plate, indicated by the prefix "C", see I.C.B.O. R.R. 4211.
11. The CompuTrus Net Section Plate is indicated by the prefix "CN", the designator (18) indicates 16 ga. material is used. All others are 20 ga.

GENERAL NOTES

1. ALL NEW CONSTRUCTION SHALL CONFORM TO CURRENT CITY, STATE AND NATIONAL CODES, STANDARDS AND REQUIREMENTS.
2. THE CONTRACTOR, SHALL VERIFY ALL EXISTING SITE CONDITIONS IN THE FIELD BEFORE COMMENCEMENT OF THE WORK AND SHALL REPORT ANY DISCREPANCIES AND/OR INCONSISTENCIES BETWEEN THE DRAWINGS, SPECIFICATIONS AND EXISTING FIELD CONDITIONS TO THE OWNERS REPRESENTATIVE FOR CLARIFICATIONS BEFORE COMMENCEMENT OF THE WORK.
3. THE CONTRACTOR PRIOR TO BIDDING, SHALL VISIT THE JOB SITE TO BECOME ACQUAINTED WITH THE EXISTING INSTALLATION AND SYSTEMS RELATED TO HIS WORK AND SHALL INCLUDE IN THE BID PROPOSAL ALL LABOR AND MATERIALS REQUIRED FOR THE INSTALLATION TO BE COMPLETE AND OPERATIVE.
4. THE CONTRACTOR SHALL CONSULT THE ELECTRICAL, STRUCTURAL AND OTHER DRAWINGS RELATED TO THIS PROJECT FOR ADDITIONAL WORK TO BE PROVIDED.
5. THE CONTRACTOR SHALL BE RESPONSIBLE FOR SECURING ALL TRADE LICENSES, ALL PERMITS AND INSPECTIONS.
6. THE CONTRACTOR SHALL PROVIDE ALL MATERIALS LABOR AND EQUIPMENT TO COMPLETE WORK AS SET FORTH IN THESE PLANS AND SPECIFICATIONS. UNLESS OTHERWISE NOTED, THE SUBMISSION OF A BID OR PROPOSAL SHALL BE CONSIDERED AS CONCLUSIVE EVIDENCE THAT THE CONTRACTOR IS THOROUGHLY FAMILIAR WITH THE INTENT OF THE CONTRACT DOCUMENTS.
7. DRAWINGS ARE DIAGRAMMATIC IN NATURE AND EXISTING CONDITIONS SHALL BE FIELD VERIFIED FOR EXACT LOCATIONS AND SIZES OF EXISTING SYSTEMS AND NEW ROUTINGS.
8. DEMOLITION WORK SHALL BE PROVIDED AS REQUIRED TO ACCOMPLISH NEW WORK CALLED AND AS NOTED. WORK SHALL BE PERFORMED CAREFULLY TO AVOID DAMAGE TO EQUIPMENT OR SYSTEMS NOT BEING REMOVED.
9. ALL PIPING SHALL CONFORM WITH THE CALIFORNIA MECHANICAL CODE AND THE CALIFORNIA PLUMBING CODE.
10. PIPES SHALL BE SUPPORTED AND BRACED PER THE SMACNA "GUIDELINES FOR SEISMIC RESTRAINTS OF MECHANICAL SYSTEMS AND PLUMBING SYSTEM" OR R-0003 THE SUPERSTRUT "SEISMIC RESTRAINT SYSTEM" OR OTHER PRE-APPROVED SYSTEM.
11. MECHANICAL CONTRACTOR SHALL PROVIDE ADDITIONAL STRUCTURAL MEMBERS AS REQUIRED TO SUPPORT PIPING WHERE STRUCTURAL FRAME DOES NOT ALLOW FOR SUPPORT.
12. ANY UTILITY SHUTDOWNS SHALL BE COORDINATED WITH THE OWNER. A SHUTDOWN SCHEDULE SHALL BE PRESENTED TO THE OWNER FOR APPROVAL PER SPECIFICATIONS PRIOR TO COMMENCEMENT OF WORK. SHUTDOWN WORK SHALL BE PERFORMED ON OVERTIME HOURS IF SO DIRECTED BY THE OWNER.
13. CONTRACTOR SHALL ASSUME SOLE RESPONSIBILITY FOR SAFETY OF ALL PERSONS ON OR ABOUT THE CONSTRUCTION SITE, IN ACCORDANCE WITH APPLICABLE LAWS AND CODES. GUARD ALL HAZARDS IN ACCORDANCE WITH THE SAFETY PROVISIONS OF THE LATEST MANUAL OF ACCIDENT PREVENTION PUBLISHED BY THE ASSOCIATED GENERAL CONTRACTORS OF AMERICA.
14. CLEAN ALL EXPOSED SURFACES AND NEW EQUIPMENT AFTER COMPLETION.
15. PROVIDE LABELS ON ALL EQUIPMENT AND DEVICES. LABELS SHALL BE SECURED WITH MACHINE SCREWS W/LAMINATED PLASTIC, WHITE LETTERS ON BLACK BACKGROUND.
16. THE CONTRACTOR SHALL MAINTAIN AT THE JOB SITE, AN UP TO DATE "AS-BUILT" DRAWING SET. THE "AS-BUILT" DRAWING SET SHALL REFLECT ALL APPROVED CHANGES TO THE DESIGN DRAWINGS. THE "AS-BUILT" DRAWING SET SHALL BE KEPT CLEAN AND IN GOOD CONDITION AND SHALL BE TURNED OVER TO THE OWNER AT THE COMPLETION OF THE PROJECT.
17. UPON COMPLETION OF THE WORK, THE CONTRACTOR SHALL SCHEDULE AND PERFORM A COMPLETE FUNCTIONAL TEST TO DEMONSTRATE TO THE OWNER THAT THE NEW INSTALLATION IS OPERATING AS INTENDED. ANY DEFECTS OR DEFICIENCIES IN THE MATERIALS OR WORK SHALL BE CORRECTED IMMEDIATELY BY AND AT THE CONTRACTORS EXPENSE. CONTRACTOR SHALL FURNISH ALL TEST PUMPS, GAUGES AND EQUIPMENT.
18. THE CONTRACTOR SHALL GUARANTEE THAT ALL WORK DONE UNDER THIS SPECIFICATION WILL BE FREE FROM FAULTY MATERIALS OR WORKMANSHIP AND HEREBY AGREES TO REPAIR OR REPLACE WITHOUT COST TO THE AND OWNER AND TO HIS SATISFACTION ALL DEFECTS OR IMPERFECTIONS APPEARING IN SAID WORK WITHIN A PERIOD OF ONE YEAR AFTER THE DATE OF FINAL ACCEPTANCE BY THE OWNER. SEE SPECIFICATIONS FOR OTHER REQUIREMENTS.
19. IN THE AREA OF CONSTRUCTION THERE WILL BE FOUND A NUMBER OF EXISTING SERVICES. PROTECT ALL ACTIVE SERVICES, MAINTAIN SAME IN GOOD OPERATING CONDITION.
20. THE OWNER RETAINS FIRST SALVAGE RIGHTS TO ALL EXISTING EQUIPMENT REMOVED UNDER THIS CONTRACT. THE CONTRACTOR SHALL CONSULT WITH THE OWNER FOR DISPOSITION OF THE EXISTING EQUIPMENT TO BE REMOVED BY HIM. THE CONTRACTOR SHALL INCLUDE THE DISPOSAL OF EXISTING EQUIPMENT UNDER THIS CONTRACT.
21. ALL MECHANICAL AND ELECTRICAL EQUIPMENT SHALL BE CERTIFIED AND LISTED BY UL OR OTHER NATIONALLY ACCREDITED AGENCIES. ANY EQUIPMENT NOT LISTED SHALL BE FIELD TESTED AND CERTIFIED BY AN APPROVED TESTING AGENCY. CONTRACTOR SHALL NOTIFY THE BUILDING DEPARTMENT AND ARRANGE FIELD TEST AND CERTIFICATION OF UNLISTED EQUIPMENT PRIOR TO REQUESTING FINAL INSPECTION BY THE BUILDING INSPECTOR.
22. ALL COMBUSTIBLE MATERIALS SHALL NOT EXCEED A FLAME SPREAD RATING OF 25 AND A SMOKE DEVELOPED RATING OF 50.
23. EXISTING CONDITIONS REPRESENTED ON THESE DRAWINGS HAVE BEEN TAKEN FROM PREVIOUS PROJECT DRAWINGS. FIELD VERIFY ALL EXISTING CONDITIONS. THIS OFFICE MAKES NO ASSURANCES AS TO THE ACCURACY OF EXISTING CONDITIONS REPRESENTED ON THESE DRAWINGS.
24. GENERAL CONTRACTOR TO PERFORM ALL CUTTING, PAINTING, FRAMING, LEVELING, CURB INSTALLATION AND WATERPROOFING FOR MECHANICAL SYSTEMS INSTALLATION.

DRAWING INDEX

SHEET NO.	DESCRIPTION
P1.1	GENERAL NOTES, ABBREVIATIONS, SYMBOLS, SCHEDULES AND DRAWING INDEX
P1.2	PIPING SPECIFICATIONS AND DETAILS.
P2.1	PIPING FLOOR PLAN

PROJECT DESCRIPTION

1. PROVIDE NEW COLD WATER AND PROPANE GAS PIPING AS REQUIRED TO MEET THE NEW REQUIREMENTS OF THE FLOOR PLAN.
2. PROVIDE NEW PLUMBING FIXTURES AS REQUIRED TO MEET THE NEW REQUIREMENTS OF THE FLOOR PLAN.
3. THE NEW WATER RECLAIM SYSTEM RECIRCULATES ALL WASTE WATER. REMAINING SEDIMENT IS HAULED AWAY BY AN APPROVED DISPOSAL COMPANY. THEREFORE THERE IS NO WASTE OR SEWER PIPING TO THE PUBLIC SEWER SYSTEM.
4. THE COLD WATER IS USED TO MAKE-UP WATER TO THE WATER RECLAIM SYSTEM TO REPLACE WATER LOST THRU EVAPORATION. A REDUCED PRESSURE BACKFLOW PREVENTER WILL BE USED TO PROTECT THE PUBLIC WATER SUPPLY. SUPPLY WATER PRESSURE REQUIRED AT WATER RECLAIM SYSTEM IS 45 PSIG.
5. THE PROPANE GAS WILL BE SUPPLIED BY A 500 GALLON STORGE TANK LEASED BY THE OWNER. THE GAS WILL BE USED TO FUEL A HOT WATER HEATER/PRESSURE WASHER. GAS INPUT CONSUMPTION IS 330 CFH @ 6"-14" W.C.

MANDATORY MEASURES

SERVICE WATER HEATING SYSTEMS

☒ THE FOLLOWING SERVICE WATER HEATING SYSTEMS AND EQUIPMENT MAY BE INSTALLED ONLY IF THE MANUFACTURER HAS CERTIFIED THAT THE EQUIPMENT MEETS OR EXCEEDS ALL APPLICABLE EFFICIENCY REQUIREMENTS LISTED IN THE APPLIANCE EFFICIENCY REGULATIONS, OR APPENDIX B, TABLE B-9.

☐ UNFIRED SERVICE WATER HEATER STORAGE TANKS AND BACKUP TANKS FOR SOLAR WATER HEATING SYSTEMS SHALL HAVE EITHER:

- ☐ EXTERNAL ISOLATION WITH AN INSTALLED R-VALUE OF AT LEAST R-12; INTERNAL AND EXTERNAL INSULATION WITH A COMBINED R-VALUE OF AT LEAST R-16; OR
- ☐ SUFFICIENT INSULATION SO THAT THE HEAT LOSS OF THE TANK SURFACE BASED ON AN 80°F WATER AIR TEMPERATURE DIFFERENCE SHALL BE LESS THAN 6.5 BTU/HR/SF.

☒ IF A CIRCULATING HOT WATER SYSTEM IS INSTALLED, IT SHALL HAVE A CONTROL CAPABLE OF AUTOMATICALLY TURNING OFF THE CIRCULATING PUMP(S) WHEN HOT WATER IS NOT REQUIRED.

LAVATORIES IN RESTROOMS OF PUBLIC FACILITIES SHALL BE EQUIPPED WITH EITHER:

- ☐ OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 0.5 GALLONS PER MINUTE.
- ☐ FOOT ACTUATED CONTROLS VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 0.75 GALLONS PER MINUTE.
- ☐ PROXIMITY SENSOR ACTUATED CONTROL VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 0.75 GALLONS PER MINUTE.
- ☐ SELF-CLOSING VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 2.5 GALLONS PER MINUTE AND 0.25 GALLONS/CYCLE (CIRCULATING SYSTEM).
- ☐ SELF-CLOSING VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 2.5 GALLONS PER MINUTE AND 0.50 GALLONS/CYCLE (NON-CIRCULATING SYSTEM).
- ☐ SELF-CLOSING VALVES, AND OUTLET DEVICES THAT LIMIT THE FLOW OF HOT WATER TO A MAXIMUM OF 2.5 GALLONS PER MINUTE AND 0.75 GALLONS/CYCLE (FOOT SWITCHES AND PROXIMITY SENSOR CONTROLS).

☐ LAVATORIES IN RESTROOMS OF PUBLIC FACILITIES SHALL BE EQUIPPED WITH CONTROLS TO LIMIT THE OUTLET TEMPERATURE TO 110°F.

06-018655

15010 GENERAL PLUMBING REQUIREMENTS

1. ELECTRICAL DEVICES SHALL BEAR A 'UL' OR 'ETL' LISTING.
2. PROVIDE PRIME COAT ON ALL UNFINISHED DEVICES AND MATERIALS IN EXPOSED AREAS.
3. PERFORM THE FOLLOWING TESTS:
   A. WATER: FILL WITH WATER TO 150 PSIG. RETAIN FOR 4 HOURS. REPAIR LEAKING JOINTS AND RETEST AS REQUIRED UNTIL SYSTEM IS PROVEN TIGHT.
   B. PROPANE GAS: PRESSURIZE WITH AIR TO 100 PSIG AND HOLD TIGHT FOR TWENTY-FOUR HOURS WITH NO DROP IN PRESSURE; TEST JOINTS AND EQUIPMENT FOR EVIDENCE OF LEAKS AFTER SATISFACTORY PRESSURE TEST.
4. STERILIZE THE DOMESTIC WATER SYSTEM IN ACCORDANCE WITH THE REQUIREMENTS OF THE AMERICAN WATER WORKS ASSOCIATION AND THE STATE OF CALIFORNIA HEALTH AND SAFETY CODE.
5. PIPING SYSTEMS SHALL BE IDENTIFIED WITH MARKERS AND FLOW ARROWS IN COMPLIANCE WITH OSHA 1910.261-264
6. PROVIDE (6) COPIES OF OPERATION AND SERVICE MANUALS FOR ALL MECHANICAL AND PLUMBING EQUIPMENT.

15400 PIPING SPECIFICATIONS

1. WATER PIPING SHALL BE TYPE "L" DRAWN COPPER MADE UP WITH WROUGHT OR FORGED COPPER FITTINGS AND 95-5 TIN-ANTIMONY SOLDER WITH NON-CORROSIVE FLUX. CW PIPING BELOW SLAB SHALL BE TYPE "K".
2. ALL VALVES SHALL HAVE SCREWED THREADS AND INSTALLED WITH SWEAT TO SCREWED ADAPTERS.
3. INSTALL UNIONS DOWNSTREAM OF VALVES.
4. VALVES FOR SHUT-OFF SERVICE SHALL BE GATE OR FULL-PORT BALL TYPE.
5. HANGERS AND SUPPORTS SHALL BE AS MANUFACTURED BY SUPERSTRUT OR UNISTRUT. USE 3/8" HANGER ROD FOR INDIVIDUAL PIPES UP TO 2" AND ½" FOR PIPES UP TO 4". SUPPORTS SHALL BE 6' O.C. FOR PIPES 1" AND UNDER AND 8' O.C. FOR PIPES 2" AND OVER.
6. USE EPCO DIELECTRIC COUPLINGS FOR CONNECTIONS BETWEEN DISSIMILAR METALS.
7. PROPANE GAS PIPING SHAL BE STANDARD WEIGHT SCHEDULE 40 STEEL PIPE CONFORMING TO THE FOLLOWING SPECIFICATIONS:
   A. ABOVE GROUND PIPE EXPOSED TO WEATHER SHALL BE ASTM A-120, T&C GALVANIZED PIPE MADE UP WITH BANDED MALLEABLE IRON FITTINGS.
   B. CONCEALED OR EXPOSED WITHIN BUILDING: ASTM A-120, T&C BLACK PIPE MADE UP WITH BANDED BLACK MALLEABLE IRON FITTINGS. PIPING LARGER THAN 3" SHALL BE WELDED FITTINGS.
8. ALL SCREWED UNIONS IN GAS PIPE SHALL BE 150 POUND RATED GROUND JOINT TYPE.
9. ALL VALVES FOR PROPANE GAS SHALL BE WALWORTH. VALVES MANUFACTURED BY CRANE, STOCKHAM, AND NIBCO, MEETING THE REQUIREMENTS OF THIS SPECIFICATION ARE ACCEPTABLE. ALL VALVES SHALL BE LISTED FOR PROPANE GAS SERVICE.

JOSEPH HORWEDEL, DIRECTOR

DEVELOPMENT PERMIT ADJUSTMENT

PROJECT FILE NO.: **AD08-022**

PERMIT TO BE ADJUSTED: **H79-092**

PROJECT DESCRIPTION: **Permit Adjustment to install a stand-by generator within an existing chain link enclosure. Stand-by diesel generator model GENERAC SD060, DEERE 3.0 DTA Engine 60 Kw, permitted per the Bay Area Air Quality Management District.**

PROJECT LOCATION: **3616 HILLCAP AVENUE (120 GRANITE ROCK WY)**

A.P.N.(s): **46217020**

ZONING: **IP Industrial Park**

GENERAL PLAN: **CIC**

ACTION: Approved

SUBJECT TO THE FOLLOWING CONDITIONS: This permit to allow the installation of a stand-by generator, as permitted per BAAQMD, within an existing chain link enclosure, only. Generator shall not excced 70 decibels at the nearest property line.

Plan Set: **[x] Yes** **[ ] No**

Approved by: Ben Corrales **Signature:** _____

Action Date: January 07, 2008

This permit sheet is only valid when accompanied by an original signature and when fastened to a stamped plan set, if applicable.

☐ RESIDENTIAL ☐ COMMERCIAL ☒ INDUSTRIAL

TO BE COMPLETED BY THE APPLICANT *(PLEASE PRINT OR TYPE)*

PROPERTY LOCATION/ ADDRESS 3616 Hillcap Ave

ASSESSOR'S PARCEL NUMBER(S) *(Attach Map)* 462-17-016

DESCRIPTION OF THE PROPOSED MINOR CHANGE *(Approval is limited to description contained herein)*
Install Concrete slab and place permanent 60kW diesel generator with 210 gallon fuel tank. Electrically connect generator to existing equipment

DOES THE PROJECT INVOLVE HUD FEDERAL FUNDING/ASSISTANCE? ☒ NO ☐ YES

Please indicate whether HUD Funding has been awarded, is proposed, or is anticipated, for the proposed project. If **yes**, indicate type of funding (i.e. CDBG Grant, HOME Investment Partnership Program, Section 108 Loan Guarantee, etc.), funding amount, whether awarded (if known) or application is pending, and fiscal year of award or application request.

PLEASE NOTE: Projects involving 1) acquisition of real property involving a change of use, or 2) new construction require an Environmental Assessment (EA). Concurrent environmental review per the California Environmental Quality Act (CEQA) is also required. The obtainment of a qualified environmental consultant to provide documentation services (i.e. a combined Initial Study/ EA) is strongly required.

SIGNATURE OF PROPERTY OWNER REQUIRED

Check One:

☒ I hereby certify that a Homeowner's Association/Architectural Review Committee does exist and have reviewed this project. Please include a copy of their letter and comments with the application.

☐ *I hereby certify that a Homeowner's Association does not exist to comment on the requested change to my property.*

Please complete the FRONT Sheet of this application and provide the following.
INCOMPLETE APPLICATION WILL NOT BE ACCEPTED.

☐ **FILING FEE:**
$272* - Checks are made payable to the "City of San Jose".
$648* for Major Adjustment.
$545* for each adjustment after the 1st to process simultaneously
$135* per hour for consultation regarding review of a proposal prior to filing the application.

includes the General Plan Update fee

☐ **ASSESSOR'S PARCEL MAP** marked with the project location.

☐ **PHOTOGRAPHS** of existing building or subject area.

☐ **FOUR (4) COPIES** of the development plans that include:

a. A **SITE PLAN* DRAWN TO SCALE** showing the location of the proposed changes on the subject property, and
b. A **DRAWING TO SCALE** of the proposed change (elevations, floor plans, construction, details, as appropriate).

*A **Site Plan** should contain the following basic information:

- Dimensions of subject property, lot lines, and existing and proposed driveways.
- Streets adjoining the subject property.
- Existing and proposed buildings and structures, including proposed building removal.
- Dimensions of existing and proposed setbacks.
- Existing and proposed off-street parking, loading, landscape and circulation areas.
- Existing trees to be removed. Include circumference of tree at 2 feet above ground level as well as distances from existing and proposed structures and/or trees on the site.

☐ A **LETTER** from the **Homeowner's Association/Architectural Review Committee** commenting specifically on the plans it reviewed, if appicable.

HUD FEDERAL FUNDING AND ENVIRONMENTAL COMPLIANCE WITH THE NATIONAL ENVIRONMENTAL POLICY ACT (NEPA). Compliance with the national environmental policy act (nepa) is required for all projects involving property acquisition, new construction for any project that has been awarded, proposes to include, or anticipates the use of federal funding from the department of Housing and Urban Development (HUD), for any portion of the project. Additional review, reports, and/or referrals may be necessary. additional fees will be required for projects funded by hud programs other than the cdbg program. please contact the plan implementation division environmental review team principal or senior planner for more information at 408.535-7801.

PLEASE CALL THE APPOINTMENT DESK AT (408) 535-3555 FOR AN APPLICATION APPOINTMENT.

FEATURES

- **INNOVATIVE DESIGN & PROTOTYPE TESTING** are key components of GENERAC'S success in "IMPROVING POWER BY DESIGN." But it doesn't stop there. Total commitment to component testing, reliability testing, environmental testing, destruction and life testing, plus testing to applicable CSA, NEMA, EGSA, and other standards, allows you to choose GENERAC POWER SYSTEMS with the confidence that these systems will provide superior performance.

- **TEST CRITERIA:**
  - ✓ PROTOTYPE TESTED
  - ✓ SYSTEM TORSIONAL TESTED
  - ✓ ELECTRO-MAGNETIC INTERFERENCE
  - ✓ NEMA MG1-22 EVALUATION
  - ✓ MOTOR STARTING ABILITY
  - ✓ SHORT CIRCUIT TESTING
  - ✓ UL 2200

- **SOLID-STATE, FREQUENCY COMPENSATED VOLTAGE REGULATION.** This state-of-the-art power maximizing regulation system is standard on all Generac models. It provides optimized FAST RESPONSE to changing load conditions and MAXIMUM MOTOR STARTING CAPABILITY by electronically torque-matching the surge loads to the engine.

- **SINGLE SOURCE SERVICE RESPONSE** from Generac's dealer network provides parts and service know-how for the entire unit, from the engine to the smallest electronic component. You are never on your own when you own an GENERAC POWER SYSTEM.

- **ECONOMICAL DIESEL POWER.** Low cost operation due to modern diesel engine technology. Better fuel utilization plus lower cost per gallon provide real savings.

- **LONGER ENGINE LIFE.** Generac heavy-duty diesels provide long and reliable operating life.

- **GENERAC TRANSFER SWITCHES, SWITCHGEAR AND ACCESSORIES.** Long life and reliability is synonymous with GENERAC POWER SYSTEMS. One reason for this confidence is that the GENERAC product line includes its own transfer systems, accessories, switchgear and controls for total system compatibility.

GENERATOR SPECIFICATIONS

TYPE	Four-pole, revolving field
ROTOR INSULATION	Class H
STATOR INSULATION	Class H
TOTAL HARMONIC DISTORTION	<3%
TELEPHONE INTERFERENCE FACTOR (TIF)	<50
ALTERNATOR	Self-ventilated and drip-proof
BEARINGS (PRE-LUBED & SEALED)	1
COUPLING	Direct, Flexible Disc
LOAD CAPACITY (STANDBY)	100%
LOAD CAPACITY (PRIME)	110%

NOTE: Emergency loading in compliance with NFPA 99, NFPA 110, paragraph 5-13.2.6. Generator rating and performance in accordance with ISO8528-5, BS5514, SAE J1349, ISO3046 and DIN6271 standards.

EXCITATION SYSTEM

☐ BRUSHLESS	Magnetically coupled DC current ✓
	Eight-pole exciter w/ battery-driven field boost ✓
	Mounted outboard of main bearing ✓
☐ PERMANENT MAGNET EXCITER	Eighteen pole exciter ✓
	Magnetically coupled DC current ✓
	Mounted outboard of main bearing ✓
REGULATION	Solid-state ✓
	±1% regulation ✓

GENERATOR FEATURES

- Four pole, revolving field generator, directly connected to the engine shaft through a heavy-duty, flexible disc for permanent alignment.
- Generator meets the temperature rise standards for class "F" insulation as defined by NEMA MG1-32.6, while the insulation system meets the requirements for the higher class "H" rating.
- All prototype models have passed a three-phase symmetrical short circuit test to assure system protection and reliability.
- All prototype models are tested for motor starting ability by measuring the instantaneous voltage dip with a waveform data acquisition system.
- All models utilize an advanced wire harness design for reliable interconnection within the circuitry.
- Magnetic circuit, including amortisseur windings, tooth and skewed stator design, provides a minimal level of waveform distortion and an electromagnetic interference level which meets accepted requirements for standard AM radio, TV, and marine radio telephone applications.
- Voltage waveform deviation, total harmonic content of the AC waveform, and T.I.F. (Telephone Influence Factor) have been evaluated to acceptable standards in accordance with NEMA MG1-32.
- Alternator is self-ventilated and drip-proof constructed.
- Fully life-tested protective systems, including "field circuit and thermal overload protection" and optional main-line circuit breakers capable of handling full output capacity.
- System Torsional acceptability confirmed during Prototype Testing.

ENGINE SPECIFICATIONS

MAKE	GENERAC/DEERE
MODEL	5030HF270
CYLINDERS	5
DISPLACEMENT	3.0 Liter (186 cu.in.)
BORE	108 mm (4.25 in.)
STROKE	130 mm (5.12 in.)
COMPRESSION RATIO	18:1
INTAKE AIR	Turbocharged/Aftercooled
NUMBER OF MAIN BEARINGS	5
CONNECTING RODS	5-Drop Forged Steel
CYLINDER HEAD	Cast Iron
PISTONS	5-Aluminum Alloy
CRANKSHAFT	Die Forged, Induction Hardened Steel

VALVE TRAIN

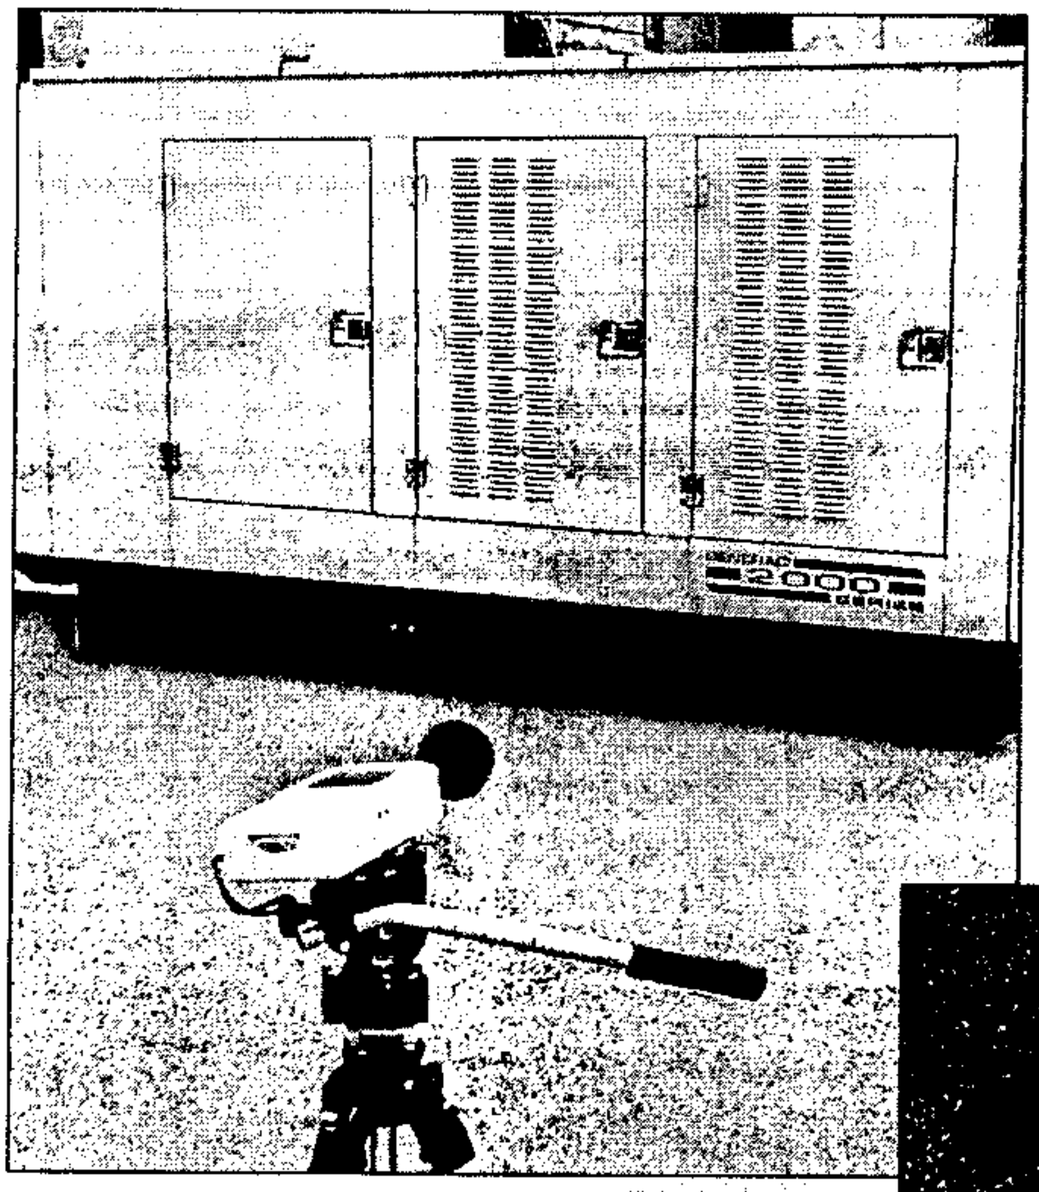
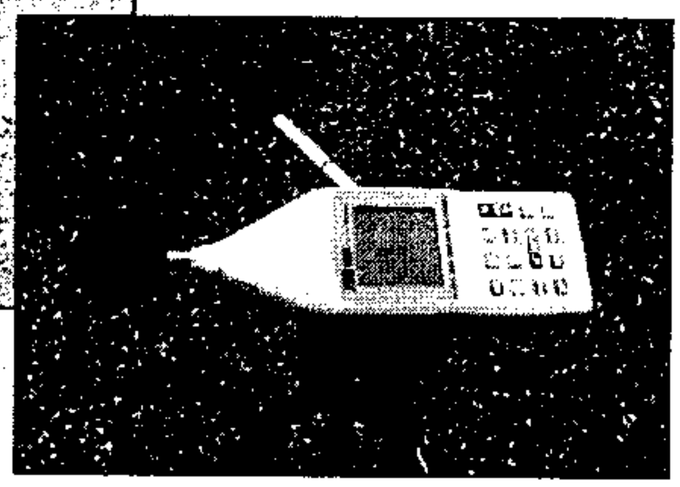
Notes:

1. Generator operating at full rated load.
2. Generator configuration includes standard exhaust system mounted within Series 2000 enclosure.
3. All measurement positions are 7 m (23 ft) from center of generator set and at 1 m (3.3 ft) height.
4. Test conducted on an asphalt surface in free field conditions.
5. Reference sound pressure is 2×10^{-5} Pa.

Technical Perspective

Sound Measurement and Attenuation





INTRODUCTION:

Noise pollution has become a serious issue and is a concern for residential, commercial and industrial environments. This Technical Perspective will explore what noise is, how it is generated, how it is measured, how to estimate what the noise levels will be when measured values are not available, and how to reduce noise sources to acceptable levels.

KEY POINTS:

- Measurement of Sound
- Sound Attenuation Options

MEASUREMENT OF SOUND

Sound in a physical sense is the vibration of gas or air particles that causes pressure variations within our eardrums. These pressure variations are translated by our hearing senses into what we call sound.

The variation in normal air pressure that is part of a sound wave is characterized by the rate at which the variation occurs and the extent of the variation. This rate is called the frequency, measured in hertz. In a normal adult, the audible frequency range is from 20 to 18,000 hertz. The extent of the variation in pressure is measured in microbars, which is one millionth of the normal atmospheric pressure. The difference between the threshold of hearing and the threshold of pain corresponds to a pressure differential of 10^6 or one million microbars. Because of this wide range, sound pressure measurements are made on a logarithmic or decibel (dB) scale. A decibel is a logarithmic ratio of two values, with the base value being the threshold of human hearing (0 dB). The second part of the ratio is the actual sound pressure measurement.

We know that human ear sensitivity varies with frequency. A low frequency sound at a certain pressure ratio (dB) does not seem as loud as a higher frequency sound of the identical pressure ratio (dB). To account for this difference, a weighting scale that takes into account the way the human ear responds was developed. This scale is called the A weighting scale and provides results which conform approximately to the response of the human ear. The A weighting scale is abbreviated dBA

Following are sound pressure levels for some common everyday sounds.

Typical Sound Pressure Levels

dBA	Source	dBA	Source
140	Engine exhaust – no muffler @ 3 ft.	60	Large store or office
130	50 HP Siren @ 100 ft.	50	Average residence
120	Jet takeoff @ 200 ft	40	Soft whisper
110	Riveting machine	30	Quiet office on Saturday
100	Large Diesel Engine @ 10 ft.	20	Mouse walking across a wood floor
90	Train @ 20 ft.	10	
80	Inside a sports car @ 60 mph	0	Threshold of hearing (young person)
70	Inside a luxury car @ 60 mph		

Source: Handbook of Noise Measurement, General Radio Company

Another term that is commonly used in evaluating sound levels is sound power or sound intensity. Sound power is the acoustical energy emitted by the sound source and is an absolute value; that is, it does not change value as the distance from the source increases. Think of sound power as the wattage of a light bulb. Sound pressure would then correspond to the brightness of the bulb in a particular part of the room. Sound pressure is what our ears hear, what sound meters measure and what ultimately determines whether a sound source is acceptable.

Noise originates from any source that vibrates or can cause the air around it to vibrate. This can come from a metal blade striking the air as in a fan or the expansion of hot gas as in an engine exhaust. What our ears hear is the combination of all the noise sources added together.

Theoretically, if noise originates from a point source and is a single frequency, the mathematics are simple. However, real world noise is very seldom simple, and thus the mathematics becomes infinitely more complex. Variations include geometrical spreading, air absorption, ground absorption, ground reflection, diffraction attenuation of a barrier, weather variability, complex acoustical structures and reflections. A complex sound can be expressed as a combined value as in the "A" weighing scale. The frequencies can also be broken down into full octave (60 hz, 120 hz, 240 hz, etc.) or 1/3 octave or even smaller bands to evaluate the intensities of the sound and where the individual frequencies are originating from. This becomes critical when developing sound attenuation because different frequencies require different methods of attenuation.

As an example, noise sources from a typical engine generator set are exhaust, mechanical noise from the rotating and reciprocating parts, fan noise, intake air and turbocharger noise. The exhaust noise is the most predominant. The type of muffler and the position of the exhaust exit will have the most effect on radiated noise. The second most predominant noise source is the engine cooling fan and the associated air flow. Additional noise sources from the alternator fan and mechanical noise from the engine and engine accessories add to the overall noise level.

The most predominant problem in controlling a noise source is that a high degree of noise reduction is required to make a difference that is perceptible to the human ear. Using a simple listening test with everyday sounds, a 2 to 3 dB difference is about the smallest perceptible difference that we can hear. To achieve a 3 dB reduction requires a 50% reduction in sound energy. A 10 dB reduction would require a 90% reduction in sound energy.

Government regulatory bodies are concerned about the amount of noise emitted for overall health reasons and for short and long term protection of our hearing ability. OSHA is very specific about the noise level the human ear can tolerate over time.

OSHA Sound Exposure Limits

Hours	dBA (continuous)	Hours	dBA (continuous)
8	90	4	95
6	92	1	100

Source: Handbook of Noise Measurement, General Radio Company

In addition to federal control, local ordinances establish a tolerable or safe sound level in dBA at a specific distance from the source or at the perimeter of an individual property where the sound source originates. Measuring techniques are almost always in a straight line from the source at a specific distance, and the standard distance used for most equipment is 1, 3 and 7 meters.

When the sound level at a specific distance is not available, how can one estimate these sound levels at required or specified distances? Since sound pressure is inversely proportional to the square of the distance from the source, a formula can be developed to determine the dB values at any specific distance from the sound source. These estimations are not totally accurate, but can approximate sound levels in lieu of actual measurements.

$12 \log_{10} (D2 / D1)$

D2 = Distance from the source for the 2nd sound source
D1 = Distance from the source for the 1st sound source

Example:
D1 = 1 meter from the noise source
D2 = 7 meters from the noise source

$12 \log_{10}(7) = 10$ dBA reduction from 1 to 7 meters from the sound source

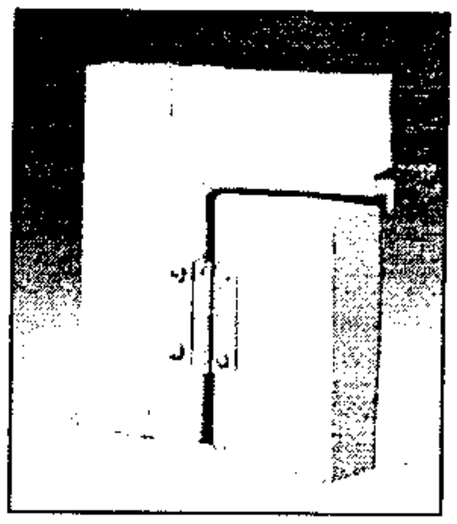
When adding two noise sources the following table can be used:

When 2 decibels values differ by	Add the following amount	When 2 decibels values differ by	Add the following amount
0 to 1 dB	3 dB	4 to 9 dB	1 dB
2 to 3 dB	2 dB	10 dB or more	0 dB

Source: Handbook of Noise Measurement, Generel Radio Company

If more than 2 sources are to be added, add two at a time and continue until only one value remains.

SOUND ATTENUATION OPTIONS



The three most important methods of noise attenuation are sound barriers, sound absorbers, and vibration dampers. Sound barriers are the most effective for reducing noise, but not always the most cost effective. Sound absorbers such as foam padding, resonant tunnels and baffles cost less but are generally not quite as effective. Vibration control can reduce or even eliminate specific frequencies, which may have a major effect on the total sound level. In addition, sound measurement in a sound laboratory might yield totally different results from a field sound test. In any situation where sound parameters are important, it's necessary to consider not only where the source is, but when it will be emitting noise. What is tolerable at 1:00 pm might not be so tolerable at 2:00 am. What is the area around the noise source like? Have variables such as geometrical spreading, air absorption, ground absorption, ground reflection, diffraction, attenuation barriers, weather variability, complex acoustical structures and reflections all been taken into account? Who will be affected by the noise? Is it near a hospital, nursing home, residential area or a manufacturing facility?

Another consideration is tonal quality and consistency. The noise from a ventilation system is hardly noticeable unless it stops, or starts whining or squealing. Machinery that is unbalanced or has repeated impacts, or pulsating flows of liquids or gases are almost always objectionable. Noise features that make us take notice are annoying tones and abrupt changes in sound level. The more prominent the tone and the more abrupt the change in sound level, the more noticeable the noise is. The lower frequencies tend to be less annoying and thus can be of a higher intensity than the higher frequencies. Knowing the type of noise helps in identifying the method of sound attenuation and often the simplest method is to use our ears to pinpoint annoying features of the noise before attempting to attenuate it.

Lastly, does the additional cost of sound attenuation justify the reduction in noise? This is not always a consideration when federal or local noise standards are enforced. Typically, to reduce an engine generator set from a standard enclosure at 78 - 82 dBA to a sound attenuated enclosure at 73 - 75 dBA will add 20% additional cost to the enclosure. To reduce the sound pressure levels to the 65 - 68 dBA range will add 35%. To reduce the levels to the 55 - 60 dBA range can easily double or triple the cost of the enclosure as well as cause significant dimensional increases.

It is also important to consider any pre-existing noise levels before additional equipment is installed. These existing noise sources could be close to the maximum dB levels defined by a local code. Then, additional equipment, even with specifications within the requirements of the code, would exceed the maximum noise level permitted on site.

Loud and objectionable noises polluting our environment can have serious physical as well as economic consequences. Having an understanding of sound measurements and the basic principles of sound attenuation can simplify noise reduction efforts and eliminate potential site problems and the additional costs associated with those problems.

*If exempt, then contractor's information sheet must be submitted with application.

WORK PROPOSED: (Select One)

- ☐ Closure
- ☐ Repair
- ☒ New Installation
- ☐ Removal
- ☐ Alteration
- ☐ Temporary
- ☐ Facility Partial Closure
- ☐ Facility Full Closure

TYPE OF PROJECT/SYSTEM: (Select One)

- ☐ Hazard Compressed Gas/Cryogenic System
- ☐ Inert Compressed Gas System
- ☐ Underground Tank/Piping System (liquid)
- ☐ Aboveground Tank/Piping System (liquid)
- ☐ Other Hazardous Material System
- ☐ Variance
- ☐ Battery System
- ☐ Metal Finishing/Plating Line
- ☐ Facility Closure
- ☒ LPG Tank Piping System

Note: Underground Tank/Piping System or Variance, must have specific applications attached.

SYSTEM COMPONENTS		PRIMARY CONTAINMENT		SECONDARY CONTAINMENT	
	Hazardous Materials Stored	Material (s) of Construction	Size (Volume, pipe, diam., etc.)	Material (s) of Construction	Size (Volume, Pipe Diam., etc.)
1	Propane	Steel	500 gall		
2					
3					
4					
5					

Important Note:

- This permit application or approved permit will expire after 180 days of inactivity.
- Plans submitted with this application must be approved by the Fire Department before work can begin.
- A final inspection approving the project must be conducted before the system may be placed into service, or considered closed.
- Call the Hazardous Materials Division at least 48 hours in advance to schedule an inspection.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that, to the best of my knowledge, the license(s) listed above are those required for the work to be performed and are in full force and effect, or if exempt, that the exemptions meet the requirements of the Contractor's State license Law as contained in the business and Professions Code, Division 3, Chapter 9. If there is any change, which would materially affect the above information or plans submitted, I will notify the Bureau of Fire Prevention.

Memorandum

DATE: 10/31/06

TO: Reena Mathew
FROM: Nadia Naum-Stoian

Re: Plan Review Comments
PLANNING NO: H06-081
DESCRIPTION: Site Development Permit to construct 2,400 square feet for industrial purposes (truck washdown area) on a 5.51 gross acres site
LOCATION: east side of Granite Rock Way from approximately 220 feet east of Hilltop Avenue to the terminus of Granite Rock Way
ADDRESS: east side of Granite Rock Way from approximately 220 feet east of Hilltop Avenue to the terminus of Granite Rock Way (120 GRANITE ROCK WY)
FOLDER #: 06 030807 DV

The Fire Department's review was limited to verifying compliance of the project to Article 9, Appendix III-A, and Appendix III-B of the 2001 California Fire Code with City of San Jose Amendments (SJFC). Compliance with all other applicable fire and building codes and standards relating to fire and panic safety shall be verified by the Fire Department during the Building Permit process.

- These comments are based on information from drawings dated 6/13/06 by Central Coast Eng.

Fire Apparatus Access and Fire Flow requirements are not impacted by the scope of work.
A new 500 gal. Propane tank is shown on the drawings submitted. The applicant should contact the Hazardous Materials Division at (408) 535-7750 as soon as possible to initiate the process if applicable.

ENVIRONMENTAL SERVICES (ESD)

TO:	Reena Mathew Department of Planning, Building, & Code Enforcement	**FROM:**	Matt Krupp Environmental Services
SUBJECT:	Response to Development Application	**DATE:**	Staff Review Agenda November 2, 2006
APPROVED:		**DATE:**	11/6/06

PLANNING NO. :	H06-081
LOCATION:	East side of Granite Rock Way from approximately 220 feet east of Hilltop Avenue
DESCRIPTION:	Site Development Permit to construct 2,400 square feet for industrial purposes (truck washdown area) on a 5.51 gross acres site
APN:	46217020

ESD received the subject project and is submitting the following conditions and comments. Questions regarding these comments may be directed to the program contact given or to me at (408) 975-2578.

Stormwater Runoff

Please cover trunk-wash area and make sure that the area drains to the sanitary sewer.

Source Control

Industrial

The proposed development must conform to the City of San Jose (City) industrial waste discharge regulations[1]. Industrial process flow and/or non-domestic wastewater discharge into the sanitary

[1] In accordance with the San Jose Municipal Code, Chapter 15.14 - Industrial Waste Discharge Regulations

sewer system will require Source Control staff to review and approve the final plans. An Industrial Wastewater Discharge Permit may be required. Implementation of Reasonable Control Measures (RCMs) and Best Management Practices (BMPs) adopted by the City for specific industry groups may also be required. Contact Source Control staff at (408) 945-3000, if you have questions.

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Department of Planning, Building and Code Enforcement
JOSEPH HORWEDEL, DIRECTOR

PUBLIC HEARING NOTICE

The Planning Director of the City of San José will consider a **Site Development Permit** at a public hearing in accordance with the San José Municipal Code on:

Wednesday, January 10, 2007
9:00 a.m.
City Council Chambers
City Hall
200 East Santa Clara Street
San Jose, CA 95113

The project being considered is:

H06-081. Site Development Permit to construct a 2,400 square feet concrete pad for a truck washdown area and water system for vehicle washing on a 5.51 gross acres site in the IP Industrial Park Zoning District, located at on the east side of Granite Rock Way from approximately 220 feet east of Hilltop Avenue to the terminus of Granite Rock Way (120 Granite Rock Way) (Granite Rock Company, Owner). Council District 7. SNI: None. CEQA: Exempt.

Reports, drawings, and documents along with a draft permit and recommendations will be available for review during the week of the public hearing from 9:00 a.m. to 5:00 p.m., Monday through Friday at:

Department of Planning, Building and Code Enforcement
200 East Santa Clara Street
San José, CA 95113
(408) 535-7800
http://www.sanjoseca.gov/planning/hearings/

You are welcome to attend and to speak on this issue. To arrange an accommodation under the Americans with Disabilities Act to participate in this meeting, please call (408) 535-7800 (Voice)/TYY# (408) 294-9337 at least 48 hours before the meeting. **Muốn biết tin tức bằng tiếng Việt Nam về tờ thông tin này, xin quý vị liên lạc Trung Nguyen ở số (408) 535-7883. Para información en Español acerca de esta solicitud, comuníquese con Juan Borrelli al (408) 535-3555.** The decision of the Director may be appealed in accordance with the requirements of the San José Municipal Code. Instructions for filing a permit appeal are available from the Department of Planning, Building and Code Enforcement.

** If you choose to challenge this land use decision in court, you may be limited to only those issues you, or someone else, raised and discussed at the public hearing or in written correspondence delivered to the City at or prior to the public hearing.*

Comments and questions should be referred to the **Project Manager, Reena Mathew**, at the e-mail address: *reena.mathew@sanjoseca.gov* in the Department of Planning, Building and Code Enforcement. Please refer to the above file number for further information on this project.

Memorandum

TO: Reena Mathew
Planning and Building

FROM: Michael Liw
Public Works

SUBJECT: **FINAL RESPONSE TO DEVELOPMENT APPLICATION**

DATE: 11/14/06

PLANNING NO.: H06-081
DESCRIPTION: Site Development Permit to construct 2,400 square feet for industrial purposes (truck washdown area) on a 5.51 gross acres site
LOCATION: East side of Granite Rock Way from approximately 220 feet east of Hilltop Avenue to the terminus of Granite Rock Way
P.W. NUMBER: 3-04243

Public Works received the subject project on 10/19/06. We have no comments or requirements.

Please contact the Project Engineer, Mirabel Aguilar, at (408) 535-6822 if you have any questions.

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Department of Planning, Building and Code Enforcement
JOSEPH HORWEDEL, DIRECTOR

DEVELOPMENT PERMIT ADJUSTMENT

PROJECT FILE NO.: **AD08-658**

PERMIT TO BE ADJUSTED: **H79-092**

PROJECT DESCRIPTION: **Permit Adjustment to install a stand-by generator within the new extension of an existing chain link enclosure. Stand-by diesel generator model GENERAC SD060, DEERE 3.0 DTA Engine 60 Kw, permitted per the Bay Area Air Quality Management District.**

PROJECT LOCATION: **120 GRANITE ROCK WY**

A.P.N.(s): **46217020**

ZONING: **IP Industrial Park**

GENERAL PLAN: **CIC**

ACTION: Approved

SUBJECT TO THE FOLLOWING CONDITIONS: This permit to allow the installation of a stand-by generator, as permitted per BAAQMD, within the new extension of an existing chain link enclosure, only. Generator shall not exceed 70 decibels at the nearest property line.

Conformance with Municipal Code. No part of this approval shall be construed to permit a violation of any part of the San José Municipal Code, including, but not limited to, use of property and off-street parking requirements.

Plan Set: **[X] Yes** **[ ] No**

Approved by: Meera Nagaraj, AICP **Signature:**

Action Date: May 20, 2008

This permit sheet is only valid when accompanied by an original signature and when fastened to a stamped plan set, if applicable.

PROPERTY LOCATION/ ADDRESS 120 Granite Rock Way
QUAD # 115
ZONING IP
PD ZONING FILE # —
PERMIT FILE# H79-092

RECEIPT # 495983
DATE 5/20/08
AMOUNT $292.00
BY Meera

☐ RESIDENTIAL ☐ COMMERCIAL ☒ INDUSTRIAL

TO BE COMPLETED BY THE APPLICANT *(PLEASE PRINT OR TYPE)*

PROPERTY LOCATION/ ADDRESS 3616 Hillcap Ave (120 Granite Rock Way)
ASSESSOR'S PARCEL NUMBER(S) *(Attach Map)* 462-17-016

DESCRIPTION OF THE PROPOSED MINOR CHANGE *(Approval is limited to description contained herein)*
Install concrete pad and place permanent 60KW Standby generator (diesel) with 210 gallon fuel tank. Electrically connect generator to existing equipment.

DOES THE PROJECT INVOLVE HUD FEDERAL FUNDING/ASSISTANCE? ☐ NO ☐ YES
Please indicate whether HUD Funding has been awarded, is proposed, or is anticipated, for the proposed project.
If **yes**, indicate type of funding (i.e. CDBG Grant, HOME Investment Partnership Program, Section 108 Loan Guarantee, etc.), funding amount, whether awarded (if known) or application is pending, and fiscal year of award or application request.

PLEASE NOTE: Projects involving 1) acquisition of real property involving a change of use, or 2) new construction require an Environmental Assessment (EA). Concurrent environmental review per the California Environmental Quality Act (CEQA) is also required. The obtainment of a qualified environmental consultant to provide documentation services (i.e. a combined Initial Study/ EA) is strongly required.

SIGNATURE OF PROPERTY OWNER REQUIRED

Check One:

☐ I hereby certify that a Homeowner's Association/Architectural Review Committee does exist and have reviewed this project. Please include a copy of their letter and comments with the application.

☒ *I hereby certify that a Homeowner's Association does not exist to comment on the requested change to my property.*

Please complete the FRONT Sheet of this application and provide the following.
INCOMPLETE APPLICATION WILL NOT BE ACCEPTED.

☒ **FILING FEE:**
$292* - Checks are made payable to the "City of San Jose".
$702* for Major Adjustment.
$583* for each adjustment after the 1st to process simultaneously
$146* per hour for consultation regarding review of a proposal prior to filing the application.

includes the General Plan Update fee

☒ **ASSESSOR'S PARCEL MAP** marked with the project location.

☒ **PHOTOGRAPHS** of existing building or subject area.

☒ **FOUR (4) COPIES** of the development plans that include:

a. A **SITE PLAN* DRAWN TO SCALE** showing the location of the proposed changes on the subject property, and
b. A **DRAWING TO SCALE** of the proposed change (elevations, floor plans, construction, details, as appropriate).

*A **Site Plan** should contain the following basic information:

- Dimensions of subject property, lot lines, and existing and proposed driveways.
- Streets adjoining the subject property.
- Existing and proposed buildings and structures, including proposed building removal.
- Dimensions of existing and proposed setbacks.
- Existing and proposed off-street parking, loading, landscape and circulation areas.
- Existing trees to be removed. Include circumference of tree at 2 feet above ground level as well as distances from existing and proposed structures and/or trees on the site.

☐ A **LETTER** from the **Homeowner's Association/Architectural Review Committee** commenting specifically on the plans it reviewed, if appicable.

HUD FEDERAL FUNDING AND ENVIRONMENTAL COMPLIANCE WITH THE NATIONAL ENVIRONMENTAL POLICY ACT (NEPA). Compliance with the national environmental policy act (nepa) is required for all projects involving property acquisition, new construction for any project that has been awarded, proposes to include, or anticipates the use of federal funding from the department of Housing and Urban Development (HUD), for any portion of the project. Additional review, reports, and/or referrals may be necessary. additional fees will be required for projects funded by hud programs other than the cdbg program. please contact the plan implementation division environmental review team principal or senior planner for more information at 408.535-7801.

PLEASE CALL THE APPOINTMENT DESK AT (408) 535-3555 FOR AN APPLICATION APPOINTMENT.

GENERAL NOTES

1. THE FIRE ALARM SAFETY INSTALLATION SHALL COMPLY WITH 2016 CALIFORNIA BUILDING CODE (CBC), 2016 CALIFORNIA FIRE CODE (CFC), THE 2016 EDITION OF THE NATIONAL FIRE PROTECTION ASSOCIATION PAMPHLET 72 (NFPA 72), 2016 NATIONAL ELECTRICAL CODE (NEC), CITY OF SAN JOSE FIRE DEPARTMENT REQUIREMENTS, AND ANY APPLICABLE LOCAL ORDINANCES.
2. CLASSIFICATION: "F-1" OCCUPANCY. NON-SPRINKLERED.
3. TYPE OF SYSTEM: CENTRAL STATION
4. THE PRIMARY POWER SOURCE FOR THE FACP SHALL BE FROM A DEDICATED CIRCUIT. THIS CIRCUIT SHALL BE LABELED, AT BOTH THE ELECTRICAL SUBPANEL AND ON THE INSIDE OF THE FACP DOOR AND PROVIDED WITH A CIRCUIT LOCK.
5. ALL CABLING IS FIRE POWER LIMITED.
6. MANUAL PULL STATIONS SHALL BE MOUNTED SUCH THAT OPERABLE PORTION WILL BE LOCATED NO LESS THAN 42" ABOVE FINISHED FLOOR AND NO MORE THAN 48" ABOVE FINISHED FLOOR PER NFPA 72 2016.
7. STROBES AND HORN-STROBES SHALL BE MOUNTED SUCH THAT ENTIRE LENS SHALL BE MOUNTED NO LESS THAN 80" ABOVE FINISHED FLOOR AND NO MORE THAN 96" ABOVE FINISHED FLOOR PER NFPA 72 2016.
8. EXTERIOR DEVICES AND JUNCTION BOXES WILL BE TAMPER RESISTANT AND WEATHER PROOF.
9. ALL SPLICES TO BE MADE ONLY WITH TERMINAL BLOCKS/STRIPS – NO WIRE NUTS.
10. ALL FIRE ALARM CIRCUITS AND EQUIPMENTS TO BE GROUNDED IN ACCORDANCE WITH ARTICLE 250, 2016 NEC.
11. ALL CIRCUITS SHALL BE INSTALLED IN A NEAT AND WORKMANLIKE MANNER. CABLES SHALL BE SUPPORTED BY THE BUILDING STRUCTURE IN SUCH A MANNER THAT THE CABLE WILL NOT BE DAMAGED BY NORMAL BUILDING USE.
12. ALL CIRCUITS SHALL BE IDENTIFIED AT TERMINAL AND JUNCTION LOCATIONS, IN A MANNER THAT WILL PREVENT UNINTENTIONAL INTERFERENCE WITH THE SIGNALING CIRCUIT DURING TESTING AND SERVICING.
13. FIRE ALARM WIRING SHALL BE INSTALLED PER NEC AND THE LOCAL AUTHORITY HAVING JURISDICTION.
14. UDACT WILL PROVIDE POINT TO POINT REPORTING TO MONITORING STATION.
15. CONTRACTOR MUST TEST THE ENTIRE SYSTEM AND VERIFY 100% COMPLETION BEFORE SCHEDULING FIRE DEPARTMENT TESTS.
16. ALL WIRING SHALL BE IN ACCORDANCE WITH CEC ARTICLE 760.
17. ALL UNDERGROUND WIRING SHALL BE LISTED FOR WET LOCATIONS PER CEC.
18. DUCT SMOKE DETECTOR USED FOR FIRE SMOKE DAMPER CONTROL SHALL BE INSTALLED WITHIN 5 FEET OF UPSTREAM SIDE OF THE DAMPER.
19. ALARM DEVICE CABLE AND WIRE SHALL BE RECOMMENDED BY THE ALARM EQUIPMENT MANUFACTURER AND SHALL MEET THE NATIONAL ELECTRICAL CODE AND LOCAL AND STATE ELECTRICAL CODE.
20. SMOKE DETECTORS SHALL NOT BE LOCATED IN A DIRECT AIR FLOW NOR CLOSER THAN 3 FEET FROM AN AIR SUPPLY DIFFUSER.
21. SMOKE DETECTORS SHALL BE MOUNTED TO 4/0 BOX.
22. STROBES AND HORN STROBES SHALL BE MOUNTED TO 4" SQUARE X 2-1/8" DEEP BACK BOX AND 1 GANG RING.
23. STROBES AND HORN STROBES MOUNTED IN BETWEEN DOOR JAMBS SHALL REQUIRE A SINGLE GANG BOX.
24. MONITOR MODULES SHALL BE LOCATED IN THE NEAREST ASSOCIATED JUNCTION BOX.
25. 4" SQ BACK BOXES SHALL BE MOUNTED NO CLOSER THAN 3" TO EACH OTHER, TO ACCOMMODATE COVE/DEVICE.
26. SMOKE DETECTORS SHALL NOT BE LOCATED CLOSER THAN 4" FROM THE SIDE WALL.
27. PROVIDE STRAIN RELIEF FOR ALL JUNCTION BOXES.
28. DO NOT USE CONDUITS FOR CABLE SUPPORT.
29. DO NOT USE T-BAR WIRES FOR CABLE SUPPORT.
30. FOR ALL FIRE ALARM CABLE IN WALLS, RUN CONDUIT OR ATTACH CABLE TO STUDS.
31. INSTALL CONDUIT SLEEVES FOR CABLE PASSING THROUGH WALLS.
32. ALL DEVICES SHALL BE LABELED WITH THEIR ADDRESS OR CIRCUIT NUMBER.
33. PROVIDE PRETEST PRINT OUT.
34. PROVIDE ADDRESS OR ZONE LIST FOR REVIEW OF DESCRIPTIONS.
35. WHEN POWERING UP THE FACP OR REMOTE POWER SUPPLIES BE SURE TO APPLY AC VOLTAGE BEFORE DC VOLTAGE. WHEN POWERING DOWN REMOVE DC SUPPLY BEFORE AC DISCONNECT.
36. PROVIDE FACP SIGN ON EXTERIOR DOOR TO ELECTRICAL ROOM.
37. PROVIDE PLAN AND DOCUMENT STORAGE IN ELECTRICAL ROOM.

GRANITE ROCK - SHOP BUILDING
120 GRANITE ROCK WAY
SAN JOSE, CA 95136

SAN JOSE FIRE DEPARTMENT
Approved as submitted subject to our requirements and inspections
By: _____ Date: 11/22/17
The San Jose Fire Department is not responsible for enforcement of the Americans with Disabilities Act (ADA). Compliance with the ADA is required. These plans have not been reviewed for compliance with the ADA.

THE FOLLOWING IS REQUIRED AT THE FINAL INSPECTION:
1. A SET OF SJFD APPROVED AND STAMPED PLANS
2. RECORD DRAWINGS THAT INCLUDE AS-BUILT DOCUMENTATION
3. PRINTOUT FROM MONITORING COMPANY OF COMPLETED TEST OF SYSTEM
4. ALL FIELD DEVICES SHALL HAVE LABELS
5. RECORD OF COMPLETION
6. UL CERTIFICATION — RECVD

Granite Rock
120 Granite Rockway
Permit # 17-031773
Fire Alarm System
Notes:

1. Before proceeding with the test, have the technician change the supervision interval time to 5 minutes for test purposes only. After inspection is done, make sure the supervision interval time can be set back to 60 minutes.
2. Trouble-test new FACU and GSM communicator (verify AC and DC fail and loss of communication (GSM antenna or component failure (complete power outage) after the supervision interval time).
3. Provide printout from monitoring company of AC fail/out and perform 5-min alarm test on final inspection. Turn off disconnecting means for FACU and communicator 24 hours prior to scheduled test/inspection.
4. Perform a complete "PRETEST" of F/A system components (devices/appliances) and provide the inspector a pre-test report from the monitoring station prior to start of each inspection. Inspection will not be conducted without report.
5. Provide points list to the inspector before the inspection begins.
6. Verify all devices and notification appliances.
7. Verify remote annunciator functions.
8. Verify audibility and make sure strobes are sync when 2 or more are in the field of view and with proper spacing. Verify the phone rooms for audibility.
9. Make sure that the maximum duration between the **initiation of an alarm signal** at the protected premises, transmission of the signal, and subsequent display and recording of the alarm signal at the supervising station **shall not exceed 90 seconds.**
10. As-built required at time of inspection. Revise plans to reflect in-field changes.

Labeling:

11. Batteries shall be marked with the month and year of manufacture using the month/year format.
12. Location and circuit # of the disconnecting means (breaker) shall be labeled on corresponding FACU and GSM. Fire alarm system circuit breaker shall be identified as "FIRE ALARM" in red marking and provided with lock.
13. Location of all remotely located power supply shall be identified at the master control unit.
14. Provide a documentation cabinet labeled as 'SYSTEM RECORD DOCUMENTS'. Make sure the plans, document and program copy in flash or disk drive are stored in the box.

PROJECT DATA

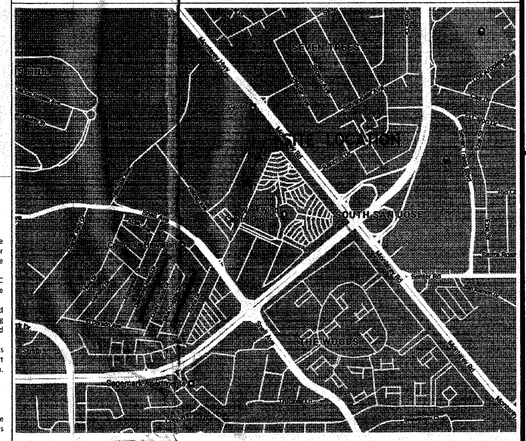
BUILDING ADDRESS:
120 GRANITE ROCK WAY SAN JOSE, CA 95136

APPLICABLE CODES:
2016 CALIFORNIA BUILDING CODE , 2016 CFC, AND NFPA 72 2016 AS AMENDED BY STATE OF CALIFORNIA

BUILDING OCCUPANCY – F-1
BUILDING IS NON-SPRINKLERED

LEGAL JURISDICTION:
SAN JOSE FIRE DEPARTMENT

LOCATION MAP



FIRE ALARM SUBCONTRACTOR

FIRST ALARM
2365 PARAGON DRIVE, SUITE E, SAN JOSE, CALIFORNIA 95131
PHONE NUMBER: 408-866-1111

CENTRAL STATION INFORMATION

CENTRAL STATION FIRE ALARM SYSTEM (24 HOUR STANDBY)
MONITORED BY:
FIRST ALARM
1111 ESTATES DRIVE, APTOS, CA 95003
PHONE NUMBER: 831-476-1111
UL CERTIFICATE # UUFX S2661

SCOPE OF WORK

THE BUILDING IS A NON-SPRINKLERED AUTOMOTIVE EQUIPMENT REPAIR FACILITY

THE SCOPE OF WORK IS TO INSTALL AND PROVIDE CENTRAL STATION MONITORING OF AN AUTOMATIC AND MANUAL FIRE ALARM SYSTEM. THIS SYSTEM IS BEING INSTALLED AS A VOLUNTARY SYSTEM AND IS NOT BEING REQUIRED BY THE CFC OR THE CITY OF SAN JOSE.

THIS SYSTEM WILL COMMUNICATE TO THE SUPERVISING STATION USING A CELLULAR CONTROL PANEL AS A SINGLE PATH COMMUNICATOR. AS ALLOWED BY NFPA 72, 2016 SECTION 26.6.3.3

DRAWING INDEX

FA-0 COVER SHEET LEGEND AND NOTES
FA-1 SITE PLAN AND ELEVATION DETAILS
FA-2 FIRE ALARM SYSTEM FLOOR PLAN AND CALCULATIONS
FA-3 SINGLE LINE RISER DIAGRAM, WIRING DETAILS AND ELEVATIONS

WIRING LEGEND

- A — 14/2 FPL FOR INDICATING CIRCUITS
- B — 18/2 FPL DATA TO INITIATING DEVICES
- C — 18/4 FPL FOR ANNUNCIATOR COMMUNICATION
- D — 16/2 FPL DATA TO SLC CIRCUITS

ALL CABLE IS FIRE RATED CABLE AND IS OPEN WIRE UNLESS SHOWN OTHERWISE. ALL UNDERGROUND WIRING SHALL BE LISTED FOR WET LOCATIONS PER CEC.

GENERAL NOTES:

THE SMOKE AND HEAT DETECTOR SPACING IS BASED ON A SMOOTH CEILING

THERE ARE NO ATTIC SPACES IN THIS BUILDING.

THERE ARE NO HVAC UNITS OVER 2000 CFM

AUDIBILITY NOTES:

THE SOUND PRESSURE LEVEL IN NORMAL MODE IS APPROXIMATELY 70dBA

THE SOUND PRESSURE IN ALARM IS EXPECTED TO BE 85dBA

SHEET NOTES:

1. FIRE ALARM CONTROL UNIT MOUNTED @ 66" AFF TO DISPLAY. MAINTAIN 36" CLEARANCE.
2. MANUAL FIRE ALARM BOX MOUNTED @ 48" AFF.
3. SIGN MOUNTED ON DOOR: "FIRE ALARM CONTROL UNIT INSIDE".
4. ANNUNCIATOR MOUNTED @ 60" AFF.
5. FIRE ALARM DOCUMENTATION CABINET LOCATION.

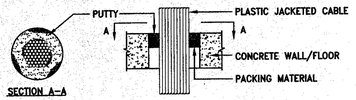
PLASTIC JACKETED CABLE THRU CONCRETE WALLS/FLOORS



NOTES:

Fill, Void or Cavity Material* – Putty – Moldable putty material kneaded by hand and applied to fill annular space (and interstices between cables to max. extent possible) to a min. depth of 1 in., flush with top surface of floor or sleeve in wall assemblies, required putty depth to be installed symmetrically on both sides of wall.

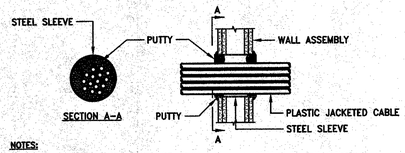
Minnesota Mining & Mfg. Co. – Type MPS–2

* Bearing the UL Classification Marking.

UL System #C–AJ–3021

3M1.DWG

PLASTIC JACKETED CABLE THRU GYPSUM WALLS



NOTES:

Fill, Void or Cavity Material* – Putty – Min. 1 in. thickness moldable putty packed tightly into annular space between cables and sheet steel sleeve (and interstices between cables, if possible), flush with each end of steel sleeve. A nom 1/4 in. diam continuous "rope" of putty shall be applied around the circumference of the steel sleeve at its egress from the gypsum wallboard layers on both sides of the wall assembly.

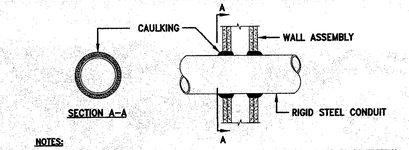
Minnesota Mining & Mfg. Co. – Type MPS–2

* Bearing the UL Classification Marking.

UL System #W–L–3031

3M2.DWG

METAL PIPE THRU GYPSUM WALLS



NOTES:

FILL, VOID OR CAVITY MATERIAL* – CAULK – CAULK FILL MATERIAL INSTALLED TO COMPLETELY FILL ANNULAR SPACE BETWEEN PIPE OR CONDUIT AND GYPSUM WALLBOARD AND WITH A MIN. 1/4 IN. DIAM BEAD OF CAULK APPLIED TO PERIMETER OF PIPE OR CONDUIT AT ITS EGRESS FROM THE WALL. CAULK INSTALLED SYMMETRICALLY ON BOTH SIDES OF WALL ASSEMBLY. THE HOURLY F RATING OF THE FIRESTOP SYSTEM IS DEPENDENT UPON THE HOURLY FIRE RATING OF THE WALL ASSEMBLY IN WHICH IT IS INSTALLED, AS SHOWN IN THE FOLLOWING TABLE. THE HOURLY T RATING OF THE FIRESTOP SYSTEM IS DEPENDENT UPON THE TYPE OR SIZE OF THE PIPE OR CONDUIT AND THE HOURLY FIRE RATING OF THE WALL ASSEMBLY IN WHICH IT IS INSTALLED, AS TABULATED BELOW:

MAX PIPE OR CONDUIT DIAM, IN	ANNULAR SPACE, IN	F RATING, HR	T RATING, HR
1	0 TO 3/16	1 OR 2	0(B), 1 OR 2
1	1/4 TO 1/2	3 OR 4	3 OR 4
4	0 TO 1/4	1 OR 2	0
4	0 TO 1–1/2(A)	1 OR 2	0
6	1/4 TO 1/2	3 OR 4	0
12	3/16 TO 3/8	1 OR 2	0

MINNESOTA MINING & MFG. CO. – TYPE CP 25WB+

(A) WHEN COPPER PIPE IS USED, T RATING IS 0 HR.

(B) 0 TO 1–1/2 IN. ANNULAR SPACE APPLIES ONLY WHEN TYPE CP–25 WB+ CAULK IS USED AND ONLY WHEN THE MIN THICKNESS OF THE GYPSUM WALLBOARD IS 5/8 IN. FOR 1 HR. RATED WALLS AND 1–1/4 IN. FOR 2 HR. RATED WALLS.

* BEARING THE UL CLASSIFICATION MARKING.

FireWarden-50(E)

Intelligent Addressable FACP with Built-In Communicator

NOTIFIER® by Honeywell

Addressable Fire Alarm Control Panels

General

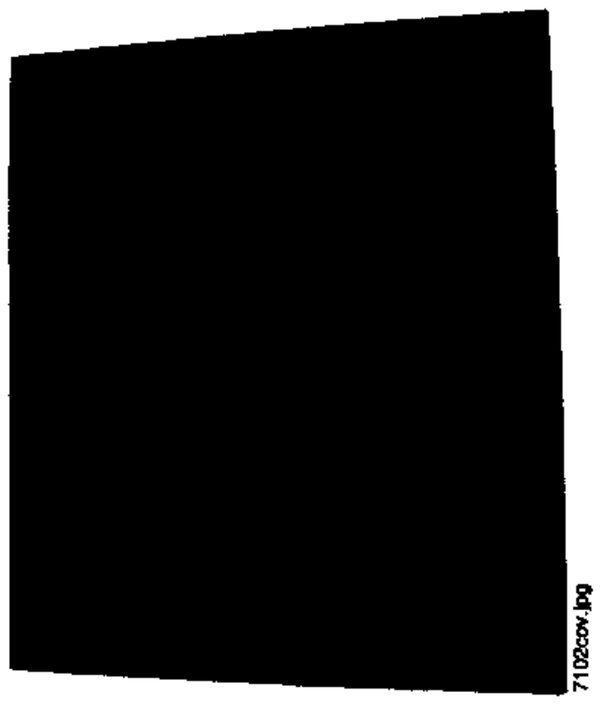
The **NOTIFIER FireWarden-50 (NFW-50)** is a Fire Alarm Control Panel (FACP) and Digital Alarm Communicator/Transmitter (DACT) combined into one circuit board. This compact, intelligent addressable control panel supports up to 50 addressable devices in any combination of detectors or modules. With an extensive list of powerful features, the FireWarden-50 programs just like FireWarden-100 products, yet fits into applications previously served only by conventional panels.

The FireWarden-50's integral DACT transmits system status (alarms, troubles, AC loss, etc.) to a Central Station via the public switched telephone network. It also allows remote and local programming of the control panel using the PS-Tools Upload/Download utility. In addition, the control panel may be programmed or interrogated off-site via the public switched telephone network. Any personal computer with Windows™ 95 or greater, and compatible modem with a speed of 14.4 kbps or faster and Upload/Download software, may serve as a Service Terminal. This allows download of the entire program or upload of the entire program, history file, walk-test data, current status and system voltages.

The power supply and all electronics are contained on a single circuit board supported on a new quick install chassis and housed in a metal cabinet. Available accessories include local and remote upload/download software, remote annunciators, and reverse polarity/city box transmitter. (4XTM)

The FireWatch Series internet monitoring modules IPDACT-2 and IPDACT-2UD permit monitoring of alarm signals over the Internet, saving the monthly cost of two telephone lines. Although not required, the secondary telephone line may be retained providing backup communication over the public switched telephone line.

***NOTE:** Unless otherwise specified, the term FireWarden-50 is used in this data sheet to refer to both the FireWerden-50 and the FireWarden-50E FACPs. For FireWarden-50C, refer to DN-60446.*



Features

- Listed to UL Standard 864, 9th edition.
- Auto-program (learn mode) reduces installation time. Reports two devices set to the same address.
- On-board DACT.
- Two independently programmable Style Z (Class A) or Style Y (Class B) NAC circuits.
- Selectable strobe synchronization for System Sensor, Wheelock, and Gentex devices.
- Remote Acknowledge, Silence, Reset and Drill via addressable monitor modules.
- Two programmable relays and one fixed trouble relay.
- Built-in Programmer.
- Telephone Line Active LEDs.
- EIA-232 PC interface.
- Integral 80-character LCD display with backlighting.
- Real-time clock/calendar with automatic daylight savings control.
- History file with 500 event capacity.
- Automatic detector sensitivity testing (NFPA 72 compliant).
- Automatic device type-code verification.
- Point trouble identification.
- Waterflow selection per module point.
- Alarm verification selection per detector point.
- Maintenance alert warns when smoke detector dust accumulation is excessive.
- One-person audible or silent walk test with walk-test log and printout.
- System alarm verification selection per detector point.
- PAS (Positive Alarm Sequence) and Pre-signal per point (NFPA 72 compliant).
- Up to eight ANN-BUS annunciators
- Remote Acknowledge, Alarm Silence, Reset and Drill via addressable modules or remote annunciator.
- Upload/Download (local or remote) of program and data via integral DACT.

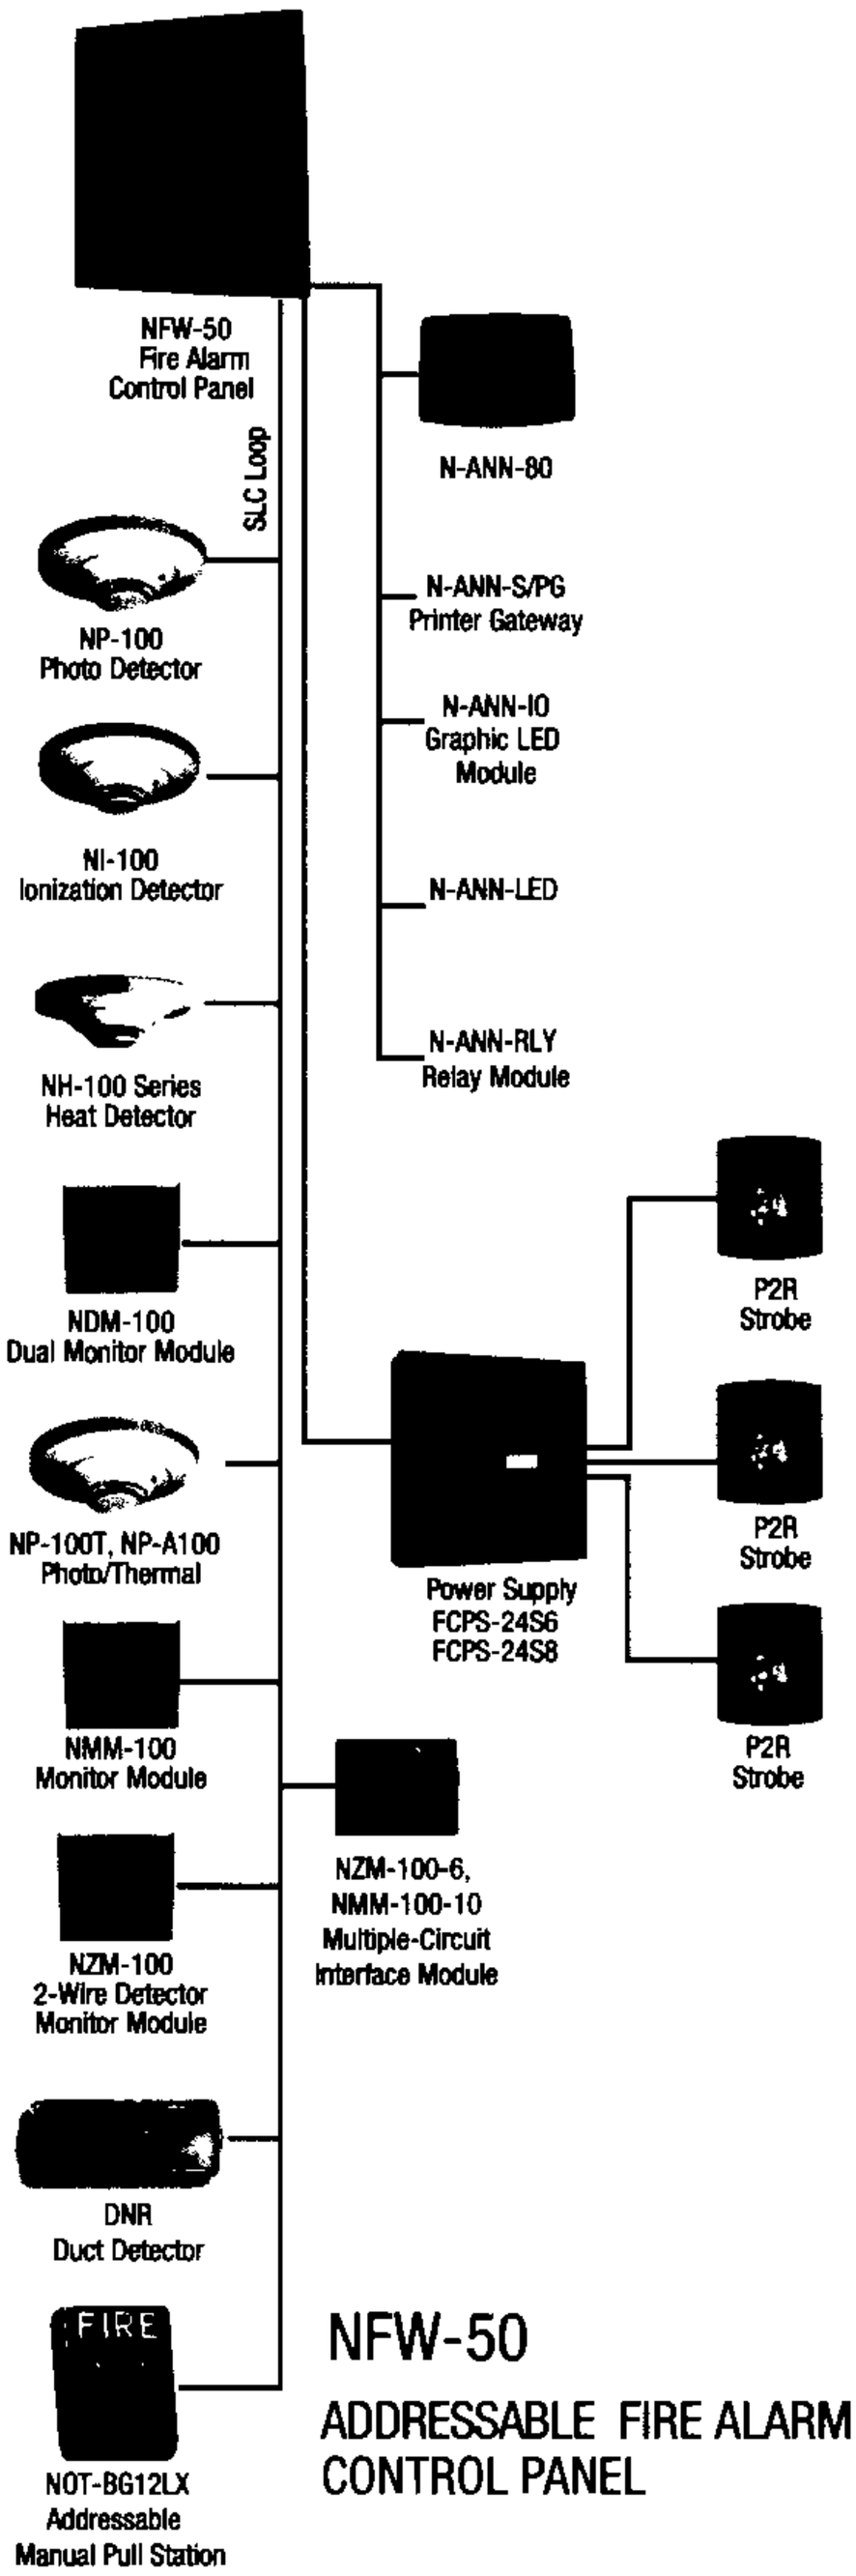
SLC COMMUNICATION LOOP

- Single addressable SLC loop which meets NFPA Style 4, 6 and 7 requirements.
- 50 addressable device capacity (any combination of addressable detectors and modules).
- Compatible with NOTIFIER FireWarden addressable devices (refer to the *FireWarden SLC Wiring Manual*).

NOTIFICATION APPLIANCE CIRCUITS (NACS)

- Two independently programmable output circuits. Circuits can be configured for the following outputs:
  - **Style Y** (Class B)
  - **Style Z** (Class A)
  - **Door Holder Service** (cannot be used for notification appliances)
  - **Aux Power Source** (cannot be used for notification appliances)
- Silence Inhibit and Autosilence timer options.
- Continuous, March Time, Temporal or California code for main circuit board NACs with two-stage capability.
- Selectable strobe synchronization per NAC.
- 2.5 A total power for NACs.

***NOTE:** Maximum or total 24VDC system power shared between all NAC circuits and the ANN-BUS is 2.7 A.*



NFW-50

ADDRESSABLE FIRE ALARM CONTROL PANEL

PROGRAMMING AND SOFTWARE

- Autoprogram (learn mode) reduces installation time.
- Custom English labels (per point) may be manually entered or selected from an internal library file.
- Two programmable Form-C relay outputs.
- 20 software zones.
- Continuous fire protection during online programming at the front panel.
- Program Check automatically catches common errors not linked to any zone or input point.
- **OFFLINE PROGRAMMING:** Create the entire program in your office using PS-Tools, Windows®-based software package, and upload/download system programming locally. PS-Tools is available on www.magni-fire.com.

User interface

LED INDICATORS

- AC Power (green)
- Fire Alarm (red)
- Supervisory (yellow)
- Trouble (yellow)
- Alarm Silenced signals (yellow)

KEYPAD

- 16 key alpha-numeric pad
- Acknowledge/Step
- Alarm Silenced
- Drill (Manual Evacuate)
- Reset (lamp test)

Product Line Information

NFW-50: Combination DACT/Fire Alarm Control Panel with one SLC loop. Includes main circuit board with display, chassis with transformer, backbox with door, plastic bag containing screws, cables, key, etc., manual. *(For NFW-50C, refer to DN-60446.)*

NFW-50E: Same as NFW-50, but operates at 240 VAC.

NFW-50R: Same as NFW-50, with red backbox and door.

DP-51050B: Optional dress panel for NFW-50 (black).

DP-51050: Optional dress panel for the NFW-50R (red).

TR-CE-B: Optional trim ring for semi-flush mounting. (Black. For red, order **TR-CE**.)

BB-XP: Optional cabinet for one or two modules.

BB-25: Optional cabinet for up to six modules mounted on CHS-6 chassis.

BB-26: Battery backbox, holds up to two 25 AH batteries and CHG-75.

NFS-LBB: Battery box, houses two 55 AH batteries

CHS-6: Chassis, mounts up to six multi-modules in a BB-25 cabinet.

CHG-75: Battery charger for lead-acid batteries with a rating of 25 to 75 AH.

CHG-120: Remote battery charging system for lead-acid batteries with a rating of 55 to 120 AH. Requires additional NFS-LBB for mounting.

***NOTE:** CHG-120 or CHG-75 required for batteries larger than 18AH.*

BAT Series: Batteries, see data sheet DN-6933.

PRT/PK-CABLE: Cable printer/personal computer interface cable.

PRN-6: UL listed compatible event printer. Uses tractor-fed paper.

IPDACT, IPDACT-2/2UD Internet Monitoring Module: Mounts in bottom of enclosure with optional mounting kit (PN IPBRKT). Connects to primary and secondary DACT telephone output ports for internet communications over customer provided ethernet internet connection. Requires compatible Teldat Visoralarm Central Station Receiver. Can use DHCP or static IP. *(See data sheet dn-60408 for more information.)*

IPBRKT: Mounting kit for IPDACT-2/2UD in common enclosure.

IPSPLT: Y-adaptor option allows connection of both panel dialer outputs to one IPDACT-2/2UD cable input.

AC-TRMBLK: AC Terminal Block mounts to a metal bracket, in turn, mounts to the FACP chassis. Use AC-TRMBLK when wire nuts are not allowed for AC connections to the transformer.

OPTIONAL MODULES

4XTM Reverse Polarity Transmitter Module: Provides a supervised output for local energy municipal box transmitter, alarm and trouble. Includes a disable switch and disable trouble LED.

ANN-SEC: Optional secondary ANN-BUS interface module. *Note: Used only with firmware 3.0 or higher.*

COMPATIBLE ANNUNCIATORS

N-ANN-60(-W): Remote LCD annunciator mimics the information displayed on the FACP LCD display. Recommended wire type is un-shielded. (Basic model is black; order -W for white; see DN-7114.)

N-ANN-I/O: LED Driver Module provides connections to a user supplied graphic annunciator. (See DN-7105.)

N-ANN-LED: Annunciator Module provides three LEDs for each zone: Alarm, Trouble, and Supervisory. Ships with red enclosure. *(See DN-60242.)*

N-ANN-RLED: Provides alarm (red) indicators for up to 30 input zones or addressable points. *(See DN-60242.)*

N-ANN-RLY: Relay Module provides 10 programmable Form-C relays. Can be mounted inside the cabinet. (See DN-7107.)

N-ANN-S/PG: Serial/Parallel Printer Gateway module provides a connection for a serial or parallel printer. *(See DN-7103.)*

ADDRESSABLE DEVICES

All feature a polling LED and rotary switches for addressing.

NI-100: Addressable low-profile ionization smoke detector.

NP-100: Addressable low-profile photoelectric smoke detector.

NP-100T: Addressable low-profile photoelectric smoke detector with thermal sensor.

NP-100R: Remote test capable addressable photoelectric smoke detector for use with DNR(W) duct detector housing.

NH-100: Fast-response, low-profile heat detector.

NH-100R: Fast-response, low-profile heat detector with rate-of-rise option.

NH-100H: Fast-response, low-profile heat detector that activates at 190°F/88°C.

NP-A100: Addressable low-profile multi-sensor detector.

DNR: InnovairFlex low-flow non-relay duct-detector housing. (Order NP-100R separately.)

DNRW: InnovairFlex low-flow non-relay duct-detector housing, with NEMA-4 rating. Watertight. (Order NP-100R separately.)

NMM-100: Addressable Monitor Module for one zone of normally-open dry-contact initiating devices. Mounts in standard 4.0" (10.16 cm.) box. Includes plastic cover plate and end-of-line resistor. Module may be configured for either a Style B (Class B) or Style D (Class A) IDC.

NDM-100: Dual Monitor Module. Same as NMM-100 except it provides two Style B (Class B) only IDCs.

NMM-100P: Miniature version of NMM-100. Excludes LED and Style D option. Connects with wire pigtails. May mount in device backbox.

NZM-100A: Similar to NMM-100A. Addressable Monitor Module for one zone of conventional two-wire detectors. Requires resettable 24 VDC power. Refer to the *Device Compatibility Document* for listed compatible devices and quantity limitation.

NZM-100-6: Six-zone interface module. Mount one or two modules in a BB-XP cabinet (optional). Mount up to six modules on a CHS-6 chassis in a BB-25 cabinet.

NMM-100-10: Ten-input monitor module. Mount one or two modules in a BB-2 cabinet (optional). Mount up to six modules on a CHS-6 chassis in a BB-25 cabinet.

NC-100: Addressable Control Module for one Style Y/Z (Class B/A) zone of supervised polarized Notification Appliances. Mounts directly to a 4.0" (10.16 cm.) electrical box. Notification Appliance Circuit option requires external 24 VDC to power notification appliances.

NC-100R: Addressable relay module containing two isolated sets of Form-C contacts, which operate as a DPDT switch. Mounts directly to a 4.0" (10.16 cm.) box, surface mount using the SMB500.

NOT-BG12LX: Addressable manual pull station with interface module mounted inside.

N100-ISO: Fault Isolator Module.

SMB500: Used to mount all modules except the NMM-100P.

***NOTE:** For more information on Compatible Addressable Devices for use with the FireWarden-50, see the following data sheets (document numbers): N100-ISO (DN-6994), NP-100 series (DN-6995), NI-100 (DN-6996), NH-100/NH-100R (DN-6997), DNR/InnovairFlex (DN-60424, DN-60429), NP-A100 (DN-6998), NMM-100/NMM-100P/NDM-100/NZM-100 (DN-6999), NC-100 (DN-7000), NC-100R (DN-60383), NMM-100-10 (DN-6990), and NOT-BG12LX (DN-7001).*

ADDRESSABLE DEVICE ACCESSORIES

End-of-Line Resistor Assembly (R-47K and R-3.9K): The 47k ohm assembly supervises the NMM-100-10, NDM-100, NMM-100P, and NC-100 module circuits. The 3.9k ohm assembly supervises the NZM-100-6 module circuit. These resistors are included with each module.

Power Supervision Relay: Supervises the power to 4-wire smoke detectors and notification appliances.

Wiring Requirements

While shielded wire is not required, it is recommended that all SLC wiring be twisted-pair to minimize the effects of electrical interference. Refer to the panel manual for wiring details.

SYSTEM SPECIFICATIONS

System Capacity

- Intelligent Signalling Line Circuits 1
- Addressable device capacity 50
- Programmable software zones 20
- Annunciators 8

Electrical Specifications

AC Power: FireWarden-50: 120 VAC, 60 Hz, 3.0 A. FireWarden-50E: 240 VAC, 50 Hz, 1.5 A. Wire size: minimum 14 AWG (2.00 mm2) with 600 V insulation. Nonpower-limited, supervised.

Battery: Two 12 V 18 AH lead-acid batteries. Battery Charger Capacity: 7-18 AH (FireWarden-50 cabinet holds maximum of two 18 AH batteries.)

Communication Loop: Supervised and power-limited.

Notification Appliance Circuits: Terminal Block provides connections for two NACs, Style Y (Class B) or Style Z (Class A). Special Application power. Power-limited, supervised circuitry. Maximum signaling current per circuit: 2.5 A. End-of-Line Resistor: 4.7k ohm, ½ watt (P/N 71252 UL listed) for Style Y (Class B) NAC. Refer to the *NOTIFIER Device Compatibility Document* for listed compatible devices.

Two Programmable Relays and One Fixed Trouble Relay: Contact rating: 2.0 A @ 30 VDC (resistive), 0.5 A @ 30 VAC (resistive). Form-C relays, nonpower-limited, nonsupervised.

Cabinet Specifications

Door: 19.26" (48.92 cm.) high x 16.82" (42.73 cm.) wide x 0.72" (1.82 cm.) deep. **Backbox:** 19.00" (48.26 cm.) high x 16.65" (42.29 cm.) wide x 5.25" (13.34 cm.) deep. **Trim Ring (TR-CE/B):** 22.00" (55.88 cm.) high x 19.65" (49.91 cm.) wide.

Shipping Specifications

Weight: 26.9 lbs. (12.20 kg.) **Dimensions:** 20.00" (50.80 cm.) high x 22.5" (57.15 cm.) wide x 8.5" (21.59 cm.) deep.

Temperature and Humidity Ranges

This system meets NFPA requirements for operation at 0 – 49°C/32 – 120°F and at a relative humidity 93% ± 2% RH (noncondensing) at 32°C ± 2°C (90°F ± 3°F). However, the useful life of the system's standby batteries and the electronic components may be adversely affected by extreme temperature ranges and humidity. Therefore, it is recommended that this system and its peripherals be installed in an environment with a normal room temperature of 15 – 27°C/60 – 80°F.

NFPA Standards

The FireWarden-50 complies with the following NFPA 72 Fire Alarm Systems requirements:

- **LOCAL** (Automatic, Manual, Waterflow and Sprinkler Supervisory).
- **AUXILIARY** (Automatic, Manual and Waterflow) (requires 4XTM).
- **REMOTE STATION** (Automatic, Manual and Waterflow) (Where a DACT is not accepted, the alarm, trouble and supervisory relays may be connected to UL 864 listed transmitters. For reverse polarity signaling of alarm and trouble, 4XTM is required.)
- **PROPRIETARY** (Automatic, Manual and Waterflow).
- **CENTRAL STATION** (Automatic, Manual and Waterflow, and Sprinkler Supervised).
- **OT, PSDN** (Other Technologies, Packet-switched Data Network)

Agency Listings and Approvals

The listings and approvals below apply to the basic FireWarden-50 control panel. In some cases, certain modules may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.

- **UL:** S635
- **FM approved**
- **CSFM:** 7165-0028:239
- **MEA:** 442-06-E Vol. 2

***NOTE:** See DN-60446 for ULC-listed model.*

N-ANN-80

80-Character LCD Serial Annunciator

NOTIFIER® by Honeywell

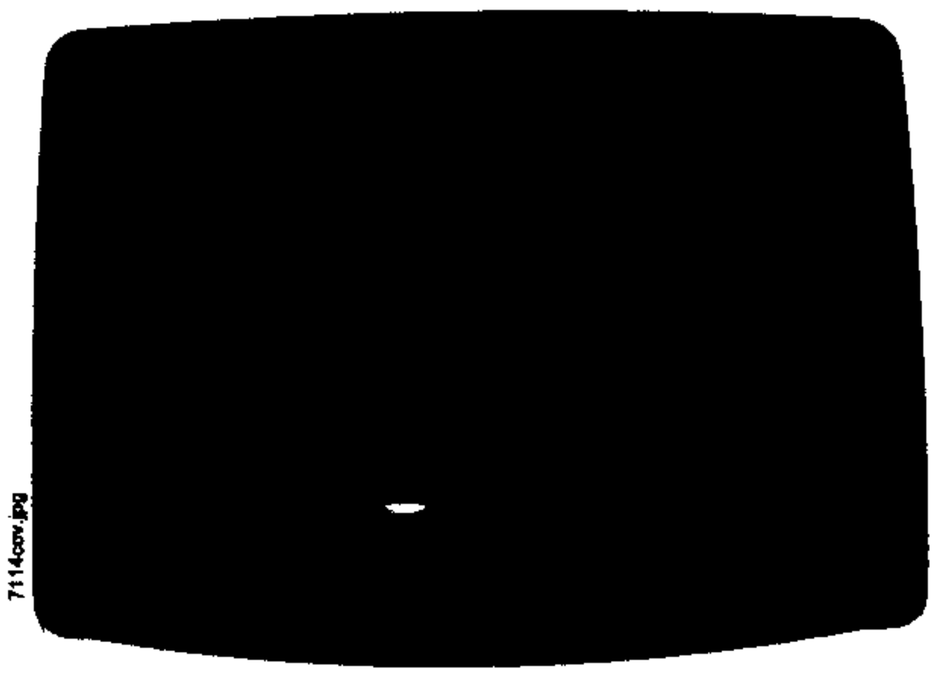
Annunciators

General

The N-ANN-80 annunciator is a compact, backlit, 80-character LCD fire annunciator that mimics the Fire Alarm Control Panel (FACP) display. It provides system status indicators for AC Power, Alarm, Trouble, Supervisory, and Alarm Silenced conditions. The N-ANN-80 and the FACP communicate over a two-wire serial interface employing the ANN-BUS communication format. Connected devices are powered, via two additional wires, by either the host FACP or a remote UL-listed, filtered power supply. N-ANN-80 is black; for white order N-ANN-80-W.

The N-ANN-80 displays English-language text of system point information including device type, zone, independent point alarm, trouble or supervisory status, as well as any custom alpha labels programmed into the control panel. It includes control switches for remote control of critical system functions. (A kayswitch prevents unauthorized operation of the control switches.)

Up to eight N-ANN-80s may be connected to the ANN-BUS of each FACP. Minimal programming is required, which saves time during system commissioning. The N-ANN-80 is compatible with NOTIFIER FACPs with an ANN-BUS, such as the NFW-50.



Features

- Listed to UL Standard 864, 9th Edition.
- Backlit 80-character LCD display (20 characters x 4 lines).
- Mimics all display information from the host panel.
- Control switches for System Acknowledge, Signal Silence, Drill, and Reset.
- Control switches can be independently enabled or disabled at the FACP.
- Keyswitch enables/disables control switches and mechanically locks annunciator enclosure
- Keyswitch can be enabled or disabled at the FACP.
- Enclosure supervised for tamper.
- System status LEDs for AC Power, Alarm, Trouble, Supervisory, and Alarm Silence.
- Local sounder can be enabled or disabled at the FACP.
- N-ANN-80 connects to the ANN-BUS terminal on the FACP and requires minimal panel programming.
- Displays device type identifiers, individual point alarm, trouble, supervisory, zone, and custom alpha labels.
- Time-and date display field.
- Surface mount directly to wall or to single, double, or 4" square electrical box.
- Semi-flush mount to single, double, or 4" square electrical box. Use ANN-SB80KIT for angled view mounting.
- Can be remotely located up to 6,000 feet (1,800 m) from the panel.
- Backlight turns off during AC loss to conserve battery power but will turn back on if an alarm condition occurs.
- May be powered by 24 VDC from the host FACP or by remote power supply (requires 24 VDC).
- Up to eight N-ANN-80s can be connected on the ANN-BUS.

Controls and Indicators

- AC Power
- Alarm
- Trouble
- Supervisory
- Alarm Silenced

Specifications

- **Operating voltage range:** 18 VDC to 28 VDC.
- **Current consumption @** 24 VDC nominal (filtered and non-resettable): 40 mA maximum.
- **Ambient temperature:** 32°F to 120°F (0°C to 49°C).
- **Relative humidity:** 93% ± 2% RH (noncondensing) at 32°C ± 2°C (90°F ± 3°F).
- 5.375" (13.65 cm.) high x 6.875" (17.46 cm.) wide x 1.375" (3.49 cm.) deep.
- For use indoors in a dry location.
- All connections are power-limited and supervised.

Agency Listings and Approvals

The listings and approvals below apply to the N-ANN-80. In some cases, certain modules may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.

- **UL:** S635
- **FM approved**
- **CSFM:** 7120-0028:240
- **MEA:** 442-06-E Vol. 2

The ANN-BUS

POWERING THE DEVICES ON THE ANN-BUS FROM AUXILIARY POWER SUPPLY

The ANN-BUS can be powered by an auxiliary power supply when the maximum number of ANN-BUS devices exceeds the ANN-BUS power requirements. See the FACP manual for more information.

ANN-BUS DEVICE ADDRESSING

Each ANN-BUS device requires a unique address (ID Number) in order to communicate with the FACP. A maximum of 8 devices can be connected to the FACP ANN-BUS communication circuit. See the FACP manual for more information.

WIRE REQUIREMENTS: COMMUNICATIONS CIRCUIT

The N-ANN-80 connects to the FACP ANN-BUS communications circuit. To determine the type of wire and the maximum wiring distance that can be used with FACP ANN-BUS accessory modules, it is necessary to calculate the total worst case current draw for all modules on a single 4-conductor bus. The total worst case current draw is calculated by adding the individual worst case currents for each module.

NOTE: *For total worst case current draw on a single ANN-BUS refer to appropriate FACP manual.*

After calculating the total worst case current draw, the following table specifies the maximum distance the modules can be located from the FACP on a single wira run. The table ensures 6.0 volts of line drop maximum. In general, the wire length is limited by resistance, but for heavier wire gauges, capacitance is the limiting factor.

These cases are marked in the chart with an asterisk (*). Maximum length can never be more than 6,000 feet (1,800 m), regardless of gauge used. See table below.

WIRE REQUIREMENTS: POWER CIRCUIT

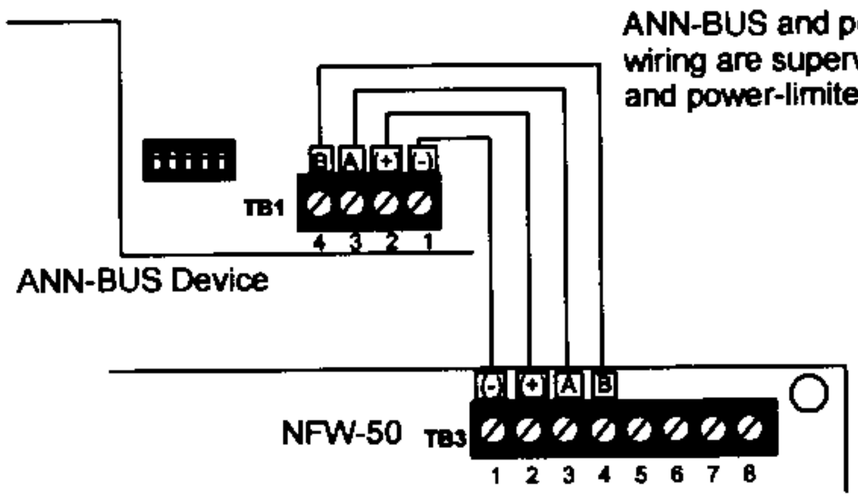
- 14 to 18 AWG (0.75 - 2.08 mm^2) wire for 24 VDC power circuit is acceptable.
- All connections are power-limited and supervised.
- A maximum of eight N-ANN-80 modules may be connected to this circuit.

Communication Pair Wiring Distance: FACP to Last ANN-BUS Module

Total Worst Case Current Draw (amps)	22 Gauge	18 Gauge	16 Gauge	14 Gauge
0.100	1,852 ft.	4,688 ft.	* 6,000 ft.	*6,000 ft.
0.200	926 ft.	2,344 ft.	3,731 ft.	5,906 ft.
0.300	617 ft.	1,563 ft.	2,488 ft.	3,937 ft.
0.400	463 ft.	1,172 ft.	1,866 ft.	2,953 ft.
0.500	370 ft.	938 ft.	1,493 ft.	2,362 ft.
0.600	309 ft.	781 ft.	1,244 ft.	1,969 ft.
0.700	265 ft.	670 ft.	1,066 ft.	1,687 ft.
0.800	231 ft.	586 ft.	933 ft.	1,476 ft.
0.900	206 ft.	521 ft.	829 ft.	1,312 ft.
1.000 (max.)	185 ft.	489 ft.	746 ft.	1,181 ft.

WIRING CONFIGURATION

The following figure illustrates the wiring between the FACP and ANN-BUS devices.



FACP Wiring to ANN-BUS Device

ORDERING OPTIONS:

N-ANN-80: Black 80 character LCD Annunciator.

N-ANN-80-W: White, 80 character LCD Annunciator.

ANN-SB80KIT-B: Black surface mount backbox with angled wedge.

ANN-SB80KIT-W: White surface mount backbox with angled wedge.

NP-100(A) Series

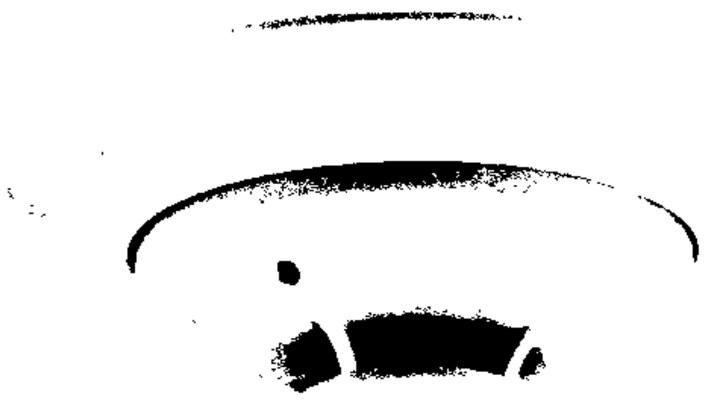
Addressable Photoelectric Detectors

NOTIFIER® by Honeywell

Addressable Devices

General

The **NP-100(A)**, **NP-100T(A)** and **NP-100R(A)** addressable, low-profile plug-in photoelectric detectors use a state-of-the-art photoelectric sensing chamber with communications to provide open area protection and are used exclusively with NOTIFIER's **FireWarden Series** (FireWarden-100-2 and FireWarden-50) and **Spartan** (NSP-25) Addressable Fire Alarm Control Panels (FACPs). The **NP-100T(A)** adds thermal sensors that will alarm at a fixed temperature of 135°F (57°C). Since these detectors are addressable, they will help emergency personnel quickly locate a fire during its early stages, potentially saving precious rescue time while also reducing property damage. Two LEDs on each sensor light to provide a local, visible sensor indication. Remote LED annunciator capability is available as an optional accessory, PN RA100Z(A). The **NP-100R(A)** is a remote test capable detector for use with DNR(A)/DNRW duct smoke detector housings.



2151_22518_CEILING.png

NP-100(A) in B210LP(A) Base

Features

SLC LOOP

- Two-wire loop connection.
- Unit uses base for wiring.

ADDRESSING

- Addressable by device.
- Rotary, decimal addressing: 01 – 99 with FireWarden-100-2 and NSP-25, and 01 – 50 with FireWarden-50.

ARCHITECTURE

- Unique single-source, dual-chamber design to respond quickly and dependably to a broad range of fires.
- Sleek, low-profile design.
- Integral communications and built-in type identification.
- Built-in tamper-resistant feature.
- Removable cover and insect-resistant screen for simple field cleaning.

OPERATION

- Withstands air velocities up to 4,000 feet-per-minute (20 m/sec.) without triggering a false alarm.
- Factory preset at 1.5% nominal sensitivity for panel alarm threshold level.
- Visible LED "blinks" when the unit is addressed (communicating with the fire panel) and latches on in alarm.

MECHANICALS

- Sealed against back pressure.
- Direct surface mounting or electrical box mounting.
- Mounts to: single-gang box, 3.5" (8.89 cm) or 4.0" (10.16 cm) octagonal box, or 4.0" (10.16 cm) square electrical box *(using a plaster ring — included)*.

OTHER SYSTEM FEATURES

- Fully coated circuit boards and superior RF/transient protection.
- 94-V0 plastic flammability rating.
- Low standby current.

OPTIONS

- Remote LED output connection, PN RA100Z(A).

Applications

Use photoelectric detectors in life-safety applications to provide a broad range of fire-sensing capability, especially where smoldering fires are anticipated. Ionization detectors are often better than photoelectric detectors at sensing fast, flaming fires.

Construction

These detectors are constructed of off-white fire resistant plastic. NP-100(A) series plug-in, low-profile smoke detectors are designed to commercial standards and offer an attractive appearance.

Installation

NP-100(A) series plug-in detectors use a detachable mounting base to simplify installation, service and maintenance.

Mount base (all base types) on an electrical backbox which is at least 1.5" (3.81 cm) deep. For a chart of compatible junction boxes, see *DN-60054*.

NOTE: *Because of the inherent supervision provided by the SLC loop, end-of-line resistors are not required. Wiring "T-taps" or branches are permitted for Style 4 (Class B) wiring. NP-100R(A) mounts in a DNR(A)/DNRW duct detector housing.*

Operation

Each NP-100(A) series detector uses one of 99 possible addresses on the FireWarden-100-2 and NSP-25, or one of 50 possible addresses on the FireWarden-50 Signaling Line Circuit (SLC). It responds to regular polls from the system and reports its type and status.

The addressable photoelectric sensor in the NP-100(A) series has a unique unipolar chamber that responds quickly and uniformly to a broad range of smoke conditions. It can withstand wind gusts up to 4,000 feet-per-minute (20 m/sec.) without sending an alarm level signal. Because of its unipolar chamber, the NP-100(A) series is approximately two times more responsive than most photoelectric sensors. This makes it a more stable detector.

Detector Sensitivity Test

Each detector can have its sensitivity tested (required per NFPA 72, Chapter 14 on *Inspection, Testing and Maintenance*) when installed/connected to a FireWarden-100-2 or FireWarden-50 addressable fire alarm control panel. The results of the sensitivity test can be printed off the FireWarden-100-2 or FireWarden-50 for record keeping.

Specification

Voltage range: 15 – 32 VDC (peak).

Standby current: 300 µA @ 24 VDC.

LED current: 6.5 mA @ 24 VDC (latched "ON").

Air velocity: 4,000 ft./min. (20 m/sec.) maximum.

Size: 2.1" (5.33 cm) high; base determines diameter.

- **B210LP(A):** 6.1" (15.5 cm) diameter.
- **B501(A):** 4.1" (10.4 cm) diameter.
- **B200SR(A):** 6.875" (17.46 cm) diameter.
- **B224RB(A):** 6.2" (15.748 cm) diameter.

Weight: 3.6 oz. (102 g).

Operating temperature range: ***for NP-100(A):*** 0°C to 49°C (32°F to 120°F); ***for NP-100T(A):*** 0°C to 38°C (32°F to 100°F). ***NP-100R(A):*** installed in a DNR(A)/DNRW -20°C to 70°C (-4°F to 158°F).

Temperature: 0°C – 49°C (32°F – 120°F).

Relative humidity: 10% – 93%, non-condensing.

Listings

Listings and approvals below apply to the NP-100(A), NP-100T(A), and NP-100R(A) detectors. In some cases, certain modules may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.

- **UL Listed:** S1115.
- **ULC Listed:** S1115.
- **CSFM**: 7272-0028:0231.
- **MEA**: 243-02-E Vol. 2.
- **Maryland Stete Fire Marshal**: permit 2173.
- **FM approved**.

Product Line Information

NOTE: *"A" suffix indicates ULC Listed model.*

NP-100: Addressable photoelectric detector; B210LP base included.

NP-100A: Sames as NP-100 with ULC Listing; B210LPA base included.

NP-100T: Same as NP-100 but with ***thermal*** element; B210LP base included.

NP-100TA: Same as NP-100T with ULC Listing; B210LPA base included.

NP-100R: Remote test capable addressable photoelectric datector for use with a DNRA/DNRW duct detector housing; B210LP base included.

NP-100RA: Same as NP-100R with ULC Listing for use with a DNRA duct detector housing; B210LPA base included.

Intelligent Bases

NOTE: *"A" suffix indicates ULC Listed model.*

NOTE: *For details about intelligent bases and their mounting, see DN-60054.*

B210LP(A): Plug-in detector base (included); standard U.S. flanged low-profile mounting base.

B210LPBP: Bulk pack of B210LP; package contains 10.

B501(A): Standard European flangeless mounting base.

B501BP: Bulk pack of B501; package contains 10.

B200SR(A): Intelligent sounder base capable of producing sound output with ANSI Temporal 3 or continuous tone. Replaces B501BH series bases in retrofit applications.

B224RB(A): Plug-in System Sensor **relay** base. Screw terminals: up to 14 AWG (2.0 mm²). Relay type: Form-C. Rating: 2.0 A @ 30 VDC resistive; 0.3 A @ 110 VDC inductive; 1.0 A @ 30 VDC inductive.

B224BI(A): Plug-in System Sensor ***isolator*** detector base. Maximum 25 devices between isolator bases *(see DN-6994)*.

Accessories

F110: Retrofit flange to convert B210LP(A) to match the B710LP(A) profile, or to convert older high-profile bases to low-profile.

F110BP: Bulk pack of F110; package contains 15.

F210: Replacement flange for B210LP(A) base.

RA100Z(A): Remote LED annunciator. 3 – 32 VDC. Mounts to a U.S. single-gang electrical box. For use with B501(A) and B210LP(A) bases only.

SMB600: Surface mounting kit

M02-04-00: Test magnet.

M02-09-00: Test magnet with telescoping handle.

XR2B: Detector removal tool. Allows installation and/or removal of detector heads from bases in high ceiling applications.

XP-4: Extension pole for XR2B. Comes in three 5-foot (1.524 m) sections.

T55-127-010: Detector removal tool without pole.

BCK-200B: Black detector covers for use with NP-100(A) only; box of 10.

WCK-200B: White detector covers for use with NP-100(A) only; box of 10.

NH-100(A) Series

Intelligent Addressable Thermal Detectors for FireWarden Series

NOTIFIER® by Honeywell

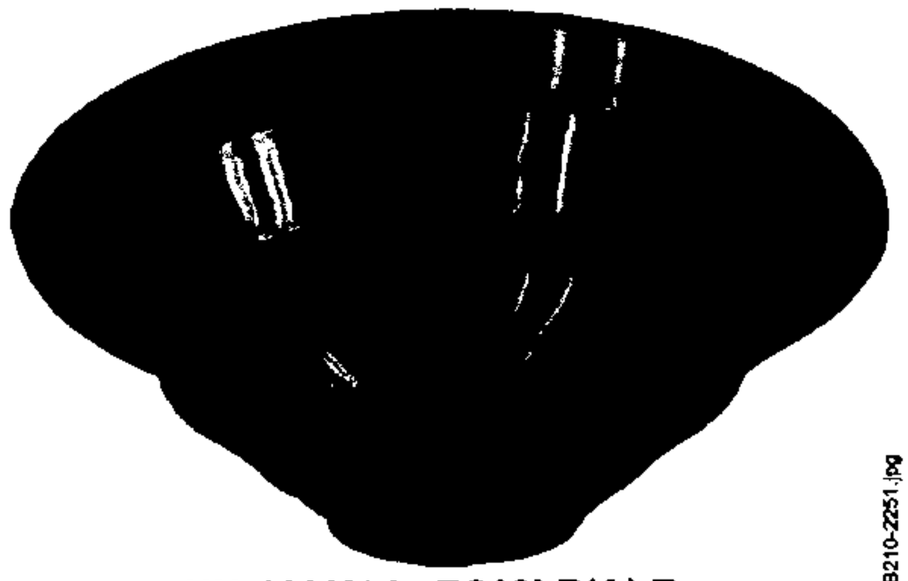
Addressable

General

The **NOTIFIER NH-100(A) Series** thermal detectors are addressable sensors that use a state-of-the-art thermistor sensing circuit for fast response. These sensors provide open-area protection and are intended for use with **FireWarden Series** (FireWarden-100-2 and FireWarden-50) and **Spartan** (NSP-25) addressable Fire Alarm Control Panels (FACPs).

The **NH-100(A)** and **NH-100R(A)** sensors provide fixed temperature alarm detection at 135°F (57°C). The **NH-100R(A)** sensor also responds to rate-of-rise conditions of greater than 15°F (8.3°C) per minute. The **NH-100H(A)** is a fixed high-temperature detector that activates at 190°F (88°C). These thermal detectors provide addressable property protection in a variety of applications.

Two LEDs on each sensor light to provide a local, visible sensor indication. Remote LED annunciator capability is available using an optional accessory, the RA100Z.



B210-2251.jpg

NH-100(A) in B210LP(A) Base

Features

SLC loop:

- Two-wire SLC loop connection.
- Unit uses base for wiring.

Addressing:

- Addressable by device.
- Rotary, decimal addressing: 01 – 99 with FireWarden-100-2, NSP-25, 01 – 50 with FireWarden-50.

Architecture:

- Sleek, low-profile, stylish design.
- State-of-the-art thermistor technology for fast response.
- Integral communications and built-in device-type identification.
- Built-in tamper resistant feature.
- Built-in functional test switch activated by external magnet.

Operation:

- Factory preset at 135°F (57°C) for the NH-100(A) and NH-100R(A); 190°F (88°C) for the NH-100H(A).
- Rate-of-rise triggers at 15°F (8.3°C) per minute for the NH-100R(A).
- 360°-field viewing angle of the visual alarm indicators (two bicolor LEDs). LEDs blink red in Normal condition and turn on steady red in Alarm.
- Visible LEDs "blink" every time the unit is addressed.

Mechanicals:

- Sealed against back pressure.
- SEMS screws for wiring of the separate base.
- Designed for direct-surface or electrical-box mounting.
- Plugs into separate base for ease of installation and maintenance.
- Separate base allows interchange of photoelectric, ionization and thermal sensors.

Other system features:

- Remote test feature from the panel.
- Walk test with address display.
- Low standby current.
- 94-5V plastic flammability rating.

Options:

- Remote LED output connection to optional RA100Z remote LED annunciator.
- Flanged surface mounting kit.

Installation

NH-100(A) Series plug-in intelligent thermal detectors use a detachable base to simplify installation, service and maintenance. Installation instructions are shipped with each detector.

Mount base (all base types) on an electrical backbox which is at least 1.5" (3.81 cm) deep. For a chart of compatible junction boxes, see *DN-60054*.

NOTE: *Because of the inherent supervision provided by the SLC loop, end-of-line resistors are not required. Wiring "T-taps" or branches are permitted for Style 4 (Class "B") wiring only.*

Applications

Use thermal detectors for protection of property.

Construction

These detectors are constructed of off-white fire-resistant plastic. The NH-100(A) Series plug-in intelligent thermal detectors are designed to commercial standards and offer an attractive appearance.

Operation

Each NH-100(A) Series detector uses one of 99 (FireWarden-100-2, NSP-25) or 50 (FireWarden-50) possible addresses on a control panel SLC loop. It responds to regular polls from the control panel and reports its type and the status. If it receives a test command from the panel (or a local magnet test), it stimulates its electronics and reports an alarm. It blinks its LEDs when polled and turns the LEDs on when commanded by the panel. The NH-100(A) Series offers features and performance that represent the latest in thermal detector technology.

Spefications

Size: 2.1" (5.3 cm) high; base determines diameter.

- **B210LP(A):** 6.1" (15.5 cm) diameter.
- **B501(A):** 4.1" (10.4 cm) diameter.
- **B200SR(A):** 6.875" (17.46 cm) diameter.
- **B224RB(A):** 6.2" (15.748 cm) diameter.

Shipping weight: 4.8 oz. (137 g).

Installation temperature:

- NH-100(A), NH-100R(A): –4°F to 100°F (–20°C to 38°C).
- NH-100H(A): –4°F to 150°F (–20°C to 66°C).

Humidity range: 10% to 93% relative humidity (noncondensing).

Voltage range: 15 to 32 VDC peak.

Standby current: 300 µA @ 24 VDC (one communication every five seconds with LED blink enabled).

LED current: 6.5 mA @ 24 VDC.

Mounting: B210LP(A) flanged base, included. See "Product Line Information: Intelligent Bases" if using a different base.

Fixed-temperature setpoint: 135°F (57°C) for the NH-100 and NH-100R(A)(A); 190°F (88°C) for the NH-100H(A).

Rate-of-rise detection: responds to greater than 15°F (8.3°C) per minute.

Listings and Approvals

Listings and approvals below apply to the NH-100(A) Series detectors. In some cases, certain modules may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.

- **UL Listed**: S747.
- **ULC Listed**: S747.
- **CSFM**: 7270-0028:0234.
- **MEA**: 387-02-E Vol. II.
- **FM approved**.

Product Line Information

NOTE: "A" suffix indicates ULC Listed model.

NH-100: Intelligent thermal sensor; 135° F (57° C); B210LP base included.

NH-100A: Same as NH-100 but with ULC Listing; B210LPA base included.

NH-100R: Same as NH-100 with *rate-of-rise* feature; B210LP base included.

NH-100RA: Same as NH-100R but with ULC Listing; B210LPA base included.

NH-100H: Intelligent fixed high-temperature thermal detector; 190° F (88° C); B210LP base included.

NH-100HA: Same as NH-100H but with ULC Listing; B210LPA base included.

INTELLIGENT BASES

***NOTE:** "A" suffix indicates ULC Listed model.*

***NOTE:** For details about intelligent bases and their mounting, see DN-60054.*

B210LP(A): Plug-in detector base (included); standard U.S. flanged low-profile mounting base.

B210LPBP: Bulk pack of B210LP; package contains 10.

B501(A): Standard European flangeless mounting base.

B501BP: Bulk pack of B501; package contains 10.

B200SR(A): Intelligent sounder base capable of producing sound output with ANSI Temporal 3 or continuous tone. Replaces B501BH series bases in retrofit applications.

B224RB(A): Plug-in System Sensor **relay** base. Screw terminals: up to 14 AWG (2.0 mm²). Relay type: Form-C. Rating: 2.0 A @ 30 VDC resistive; 0.3 A @ 110 VDC inductive; 1.0 A @ 30 VDC inductive.

B224BI(A): Plug-in System Sensor ***Isolator*** detector base. Maximum 25 devices between isolator bases *(see DN-6994)*.

ACCESSORIES

F110: Retrofit flange to convert B210LP(A) to match the B710LP(A) profile, or to convert older high-profile bases to low-profile.

F110BP: Bulk pack of F110; package contains 15.

F210: Replacement flange for B210LP(A) base.

RA100Z(A): Remote LED annunciator. 3 – 32 VDC. Mounts to a U.S. single-gang electricel box. For use with B501(A) and B210LP(A) bases only.

SMB600: Surface mounting kit

M02-04-00: Test magnet.

M02-09-00: Test magnet with telescoping handle.

XR2B: Detector removal tool. Allows installation and/or removal of detector heads from bases in high ceiling applications.

XP-4: Extension pole for XR2B. Comes in three 5-foot (1.524 m) sections.

T55-127-010: Detector removal tool without pole.

NOT-BG12LX

Addressable Manual Pull Station

NOTIFIER® by Honeywell

Intelligent/Addressable Devices

General

The Notifier NOT-BG12LX is a state-of-the-art, dual-action (i.e., requires two motions to activate the station) pull station that includes an addressable interface for FireWarden series intelligent control panels, and the NSP-25 panel. Because the NOT-BG12LX is addressable, the control panel can display the exact location of the activated manual station. This leads fire personnel quickly to the location of the alarm.

Features

- Maintenance personnel can open station for inspection and address setting without causing an alarm condition.
- Built-in bicolor LED, which is visible through the handle of the station, flashes in normal operation and latches steady red when in alarm.
- Handle latches in down position and the word "ACTIVATED" appears to clearly indicate the station has been operated.
- Captive screw terminals wire-ready for easy connection to SLC loop (accepts up to 12 AWG/3.25 mm² wire).
- Can be surface mounted (with SB-10 or SB-I/O) or semi-flush mounted. Semi-flush mount to a standard single-gang, double-gang, or 4" (10.16 cm) square electrical box.
- Smooth dual-action design.
- Meets ADAAG controls and operating mechanisms guidelines (Section 4.1.3[13]); meets ADA requirement for 5 lb. maximum activation force.
- Highly visible.
- Attractive shape and textured finish.
- Key reset.
- Includes Braille text on station handle.
- Optional trim ring (BG12TR).
- Meets UL 38, Standard for Manually Actuated Signaling Boxes.

Construction

Shell, door, and handle are molded of durable polycarbonate material with a textured finish.

Specifications

- **Shipping Weight:** 9.6 oz. (272.15 g)
- **Normal operating voltage:** 24 VDC.
- **Maximum SLC loop voltage:** 28.0 VDC.
- **Maximum SLC standby current:** 375 µA.
- **Maximum SLC alarm current:** 5 mA.
- **Temperature Range:** 32°F to 120°F (0°C to 49°C)
- **Relative Humidity:** 10% to 93% (noncondensing)
- **For use indoors in a dry location**

Installation

The NOT-BG12LX will mount semi-flush into a single-gang, double-gang, or standard 4" (10.16 cm) square electrical outlet box, or will surface mount to the model SB-10 or SB-I/O surface backbox. If the NOT-BG12LX is being semi-flush mounted, then the optional trim ring (BG12TR) may be used.

The NOT-BG12LX Addressable Manual Pull Station

The BG12TR is usually needed for semi-flush mounting with 4" (10.16 cm) or double-gang boxes (not with single-gang boxes).

Operation

Pushing in, then pulling down on the handle causes it to latch in the down/activated position. Once latched, the word "ACTIVATED" (in bright yellow) appears at the top of the handle, while a portion of the handle protrudes from the bottom of the station. To reset the station, simply unlock the station with the key and pull the door open. This action resets the handle; closing the door automatically resets the switch.

Each manual station, on command from the control panel, sends data to the panel representing the state of the manual switch. Two rotary decimal switches allow address settings (1 – 99 on NFW2-100/NFW2-100C, 1 – 50 for NFW-50/NFW-50C).

Architectural/Engineering Specifications

Manual Fire Alarm Stations shall be non-coded, with a key-operated reset lock in order that they may be tested, and so designed that after actual Emergency Operation, they cannot be restored to normal except by use of a key. An operated station shall automatically condition itself so as to be visually detected as activated. Manual stations shall be constructed of red-colored polycarbonate material with clearly visible operating instructions provided on the cover. The word FIRE shall appear on the front of the stations in white letters, 1.00 inches (2.54 cm) or larger. Stations shall be suitable for surface mounting on matching backbox SB-10 or SB-I/O; or semi-flush mounting on a standard single-gang, double-gang, or 4" (10.16 cm) square electrical box, and shall be installed

within the limits defined by the Americans with Disabilities Act (ADA) or per national/local requirements. Manual Stations shall be Underwriters Laboratories listed.

Manual stations shall connect with two wires to one of the control panel SLC loops. The manual station shall, on command from the control panel, send data to the panel representing the state of the manual switch. Manual stations shall provide address setting by use of rotary decimal switches.

Product Line Information

NOT-BG12LX: Dual-action addressable pull station. Includes key locking feature. (Listed for Canadian and non-Canadian applications.)

SB-10: Surface backbox; metal.

SB-I/O: Surface backbox; plastic.

BG12TR: Optional trim ring.

17021: Keys, set of two.

Agency Listings and Approvals

In some cases, certain modules or applications may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.

- **UL/ULC Listed:** S692 (listed for Canadian and non-Canadian applications).
- **MEA:** 67-02-E Vol. IV.
- **CSFM: 7150-0028:0199.**
- **FM Approved.**

Patented: U.S. Patent No. D428,351; 6,380,846; 6,314,772; 6,632,108.

Monitor Modules

NMM-100(A), NMM-100P(A), NZM-100(A), and NDM-100(A) for FireWarden Series Panels

NOTIFIER® by Honeywell

Intelligent Addressable Devices

General

Four different monitor modules are available for Notifier's FireWarden Series intelligent control panels for a variety of applications. Monitor modules supervise a circuit of dry-contact input devices, such as conventional heat detectors and pull stations, or monitor and power a circuit of two-wire smoke detectors (NZM-100(A)).

NMM-100(A) is a standard-sized module (typically mounts to a 4" [10.16 cm] square box) that supervises either a Style D (Class A) or Style B (Class B) circuit of dry-contact input devices.

NMM-100P(A) is a miniature monitor module a mere 1.3" (3.302 cm) H x 2.75" (6.985 cm) W x 0.5" (1.270 cm) D that supervises a Style B (Class B) circuit of dry-contact input devices. Its compact design allows the NMM-100P(A) to be mounted in a single-gang box behind the device it monitors.

NZM-100(A) is a standard-sized module that monitors and supervises compatible two-wire, 24 volt, smoke detectors on a Style D (Class A) or Style B (Class B) circuit.

NDM-100(A) is a standard-sized dual monitor module that monitors and supervises two independent two-wire Style B (Class B) dry-contact initiating device circuits (IDCs) at two separate, consecutive addresses in intelligent, two-wire systems.

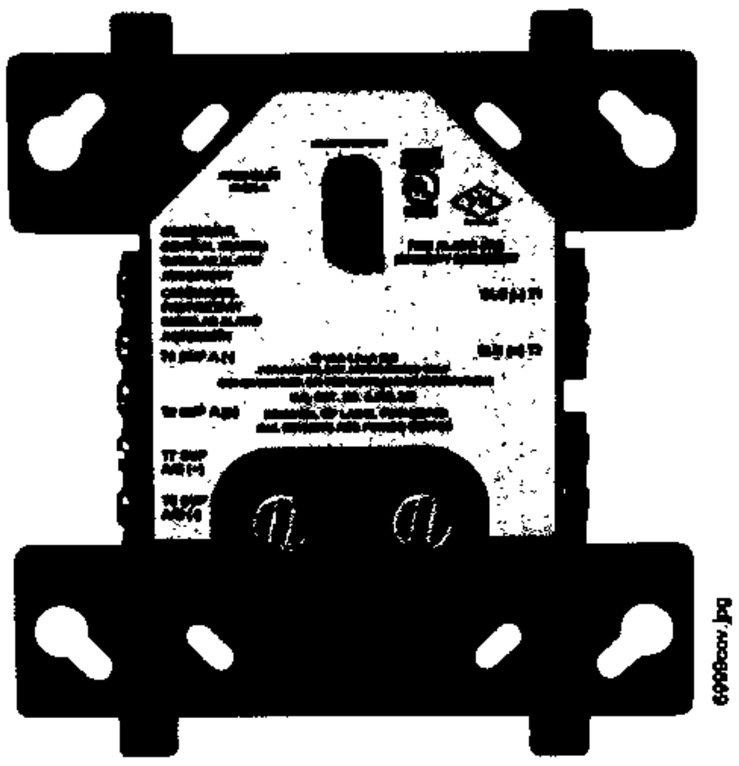
NMM-100(A) Monitor Module

- Built-in type identification automatically identifies this device as a monitor module to the control panel.
- Powered directly by two-wire SLC loop. No additional power required.
- High noise (EMF/RFI) immunity.
- SEMS screws with clamping plates for ease of wiring.
- Direct Decade entry of address: 01 – 99 on FireWarden-100-2, 01 – 50 on FireWarden-50.
- LED flashes during normal operation and latches on steady to indicate alarm.

The NMM-100(A) Monitor Module is intended for use in intelligent, two-wire systems, where the individual address of each module is selected using the built-in rotary switches. It provides either a two-wire or four-wire fault-tolerent Initiating Device Circuit (IDC) for normally-open-contact fire alarm and supervisory devices. The module has a panel-controlled LED indicetor.

NMM-100(A) APPLICATIONS

Use to monitor a zone of four-wire smoke detectors, manual fire alarm pull stations, waterflow devices, or other normally-open dry-contact alarm activation devices. May also be used to monitor normally-open supervisory devices with special supervisory indication at the control panel. Monitored circuit may be wired as an NFPA Style B (Class B) or Style D (Class A) Initiating Device Circuit. A 47K ohm End-of-Line Resistor (provided) terminates the Style B circuit. No resistor is required for supervision of the Style D circuit.



NMM-100(A) (Type H)

NMM-100(A) OPERATION

Each NMM-100(A) uses one of the available module addresses on an SLC loop. It responds to regular polls from the control panel and reports its type and the status (open/normal/short) of its Initiating Device Circuit (IDC). A flashing LED indicates that the module is in communication with the control panel. The LED latches steady on alarm (subject to current limitations on the loop).

NMM-100(A) SPECIFICATIONS

Nominal operating voltage: 15 to 32 VDC.

Maximum current draw: 5.0 mA (LED on).

Average operating current: 350 µA (LED flashing), 1 communication every 5 seconds, 47k EOL.

Maximum IDC wiring resiatance: 40 ohms.

EOL resistance: 47K ohms.

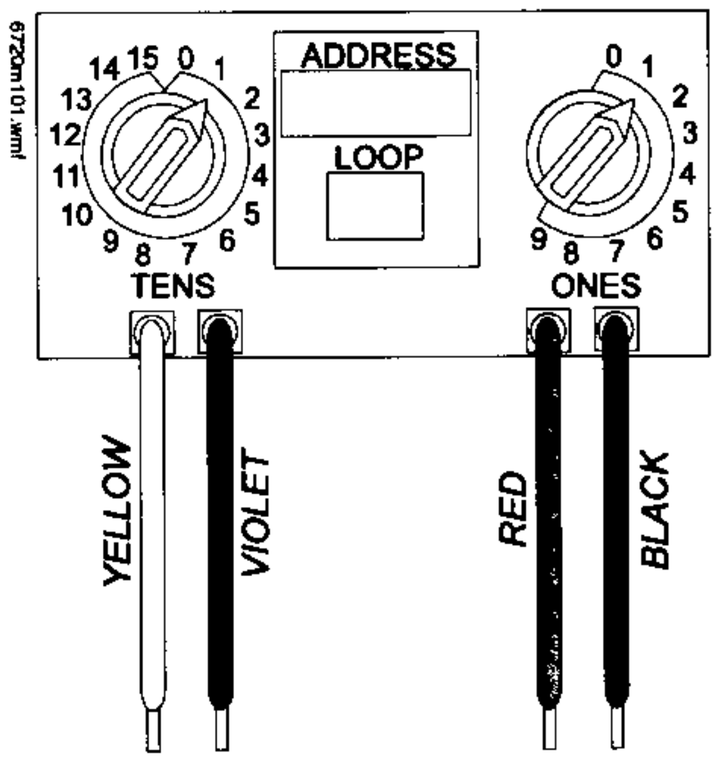
Temperature range: 32°F to 120°F (0°C to 49°C).

Humidity range: 10% to 93% noncondensing.

Dimensions: 4.5" (11.43 cm) high x 4" (10.16 cm) wide x 1.25" (3.175 cm) deep. Mounts to a 4" (10.16 cm) square x 2.125" (5.398 cm) deep box.

NMM-100P(A) Mini Monitor Module

- Built-in type identification automatically identifies this device as a monitor module to the panel.
- Powered directly by two-wire SLC loop. No additional power required.
- High noise (EMF/RFI) immunity.
- Tinned, stripped leads for ease of wiring.
- Direct Decade entry of address: 01 – 99 on FireWarden-100-2, 01 – 50 on FireWarden-50.



The NMM-100P(A) Mini Monitor Module can be installed in a single-gang junction directly behind the monitored unit. Its small size and light weight allow it to be installed without rigid mounting. The NMM-100P(A) is intended for use in intelligent, two-wire systems where the individual address of each module is selected using rotary switches. It provides a two-wire initiating device circuit for normally-open-contact fire alarm and security devices. NMM-100P(A)

NMM-100P(A) APPLICATIONS

Use to monitor a single device or a zone of four-wire smoke detectors, manual fire alarm pull stations, waterflow devices, or other normally-open dry-contact devices. May also be used to monitor normally-open supervisory devices with special supervisory indication at the control panel. Monitored circuit/device is wired as an NFPA Style B (Class B) Initiating Device Circuit. A 47K ohm End-of-Line Resistor (provided) terminates the circuit.

NMM-100P(A) OPERATION

Each NMM-100P(A) uses one of the available module addresses on an SLC loop. It responds to regular polls from the control panel and reports its type and the status (open/normal/short) of its Initiating Device Circuit (IDC).

NMM-100P(A) SPECIFICATIONS

Nominal operating voltage: 15 to 32 VDC.

Average operating current: 350 µA, 1 communication every 5 seconds, 47k EOL; 600 µA Max. (Communicating, IDC Shorted).

Maximum IDC wiring resistance: 40 ohms.

Maximum IDC Voltage: 11 Volts.

Maximum IDC Current: 400 µA.

EOL resistance: 47K ohms.

Temperature range: 32°F to 120°F (0°C to 49°C).

Humidity range: 10% to 93% noncondensing.

Dimensions: 1.3" (3.302 cm) high x 2.75" (6.985 cm) wide x 0.65" (1.651 cm) deep.

Wire length: 6" (15.24 cm) minimum.

NZM-100(A) Interface Module

- Supports compatible two-wire smoke detectors.
- Supervises IDC wiring and connection of external power source.
- High noise (EMF/RFI) immunity.
- SEMS screws with clamping plates for ease of wiring.
- Direct Decade entry of address:, 01 – 99 on FireWarden-100-2, 01 – 50 on FireWarden-50.
- LED flashes during normal operation.
- LED latches steady to indicate alarm on command from control panel.

The NZM-100(A) Interface Module is intended for use in intelligent, addressable systems, where the individual address of each module is selected using built-in rotary switches. This module allows intelligent panels to interface and monitor two-wire conventional smoke detectors. It transmits the status (normal, open, or alarm) of one full zone of conventional detectors back to the control panel. All two-wire detectors being monitored must be UL compatible with the module.

NZM-100(A) APPLICATIONS

Use the NZM-100(A) to monitor a zone of two-wire smoke detectors. The monitored circuit may be wired as an NFPA Style B (Class B) or Style D (Class A) Initiating Device Circuit. A 3.9 K ohm End-of-Line Resistor (provided) terminates the end of the Style B or D (class B or A) circuit (maximum IDC loop resistance is 25 ohms). Install ELR across terminals 8 and 9 for Style D application.

NZM-100(A) OPERATION

Each NZM-100(A) uses one of the available module addresses on an SLC loop. It responds to regular polls from the control panel and reports its type and the status (open/normal/short) of its Initiating Device Circuit (IDC). A flashing LED indicates that the module is in communication with the control panel. The LED latches steady on alarm (subject to current limitations on the loop).

NZM-100(A) SPECIFICATIONS

Nominal operating voltage: 15 to 32 VDC.

Maximum current draw: 5.1 mA (LED on).

Maximum IDC wiring resistance: 25 ohms.

Average operating current: 300 µA, 1 communication and 1 LED flash every 5 seconds, 3.9k eol.

EOL resistance: 3.9K ohms.

External supply voltage (between Terminals T3 and T4): DC voltage: 24 volts power limited. Ripple voltage: 0.1 Vrms maximum. Current: 90 mA per module maximum.

Temperature range: 32°F to 120°F (0°C to 49°C).

Humidity range: 10% to 93% noncondensing.

Dimensions: 4.5" (11.43 cm) high x 4" (10.16 cm) wide x 1.25" (3.175 cm) deep. Mounts to a 4" (10.16 cm) square x 2.125" (5.398 cm) deep box.

NDM-100(A) Dual Monitor Module

The NDM-100(A) Dual Monitor Module is intended for use in intelligent, two-wire systems. It provides two independent two-wire initiating device circuits (IDCs) at two separate, consecutive addresses. It is capable of monitoring normally open contact fire alarm and supervisory devices. The module has a single panel-controlled LED.

***NOTE:** The NDM-100(A) provides two Style B (Class B) IDC circuits ONLY. Style D (Class A) IDC circuits are NOT supported in any application.*

NDM-100(A) SPECIFICATIONS

Normal operating voltage range: 15 to 32 VDC.

Maximum current draw: 6.4 mA (LED on).

Average operating current: 750 µA (LED flashing).

Maximum IDC wiring resistance: 1,500 ohms.

Maximum IDC Voltage: 11 Volts.

Maximum IDC Current: 240 µA

EOL resistance: 47K ohms.

Maximum SLC Wiring resistance: 40 Ohms.

Temperature range: 32° to 120°F (0° to 49°C).

Humidity range: 10% to 93% (non-condensing).

Dimensions: 4.5" (11.43 cm) high x 4" (10.16 cm) wide x 2.125" (5.398 cm) deep.

NDM-100(A) AUTOMATIC ADDRESSING

The NDM-100(A) automatically assigns itself to two addressable points, starting with the original address. For example, if the NDM-100(A) is set to address "26", then it will automatically assign itself to addresses "26" and "27".

***NOTE:** "Ones" addresses on the NDM-100(A) are 0, 2, 4, 6, or 8 only. Terminals 6 and 7 use the first address, and terminals 8 and 9 use the second address.*

CAUTION:
Avoid duplicating addresses on the system.

Installation

NMM-100(A), NZM-100(A), and NDM-100(A) modules mount directly to a standard 4" (10.16 cm) square, 2.125" (5.398 cm) deep, electrical box. They may also be mounted to the SMB500 surface-mount box. Mounting hardware and installation instructions are provided with each module. All wiring must conform to applicable local codes, ordinances, and regulations. These modules are intended for power-limited wiring only.

The NMM-100P(A) module is intended to be wired and mounted without rigid connections inside a standard electrical box. All wiring must conform to applicable local codes, ordinances, and regulations.

Agency Listings and Approvals

In some cases, certain modules may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.

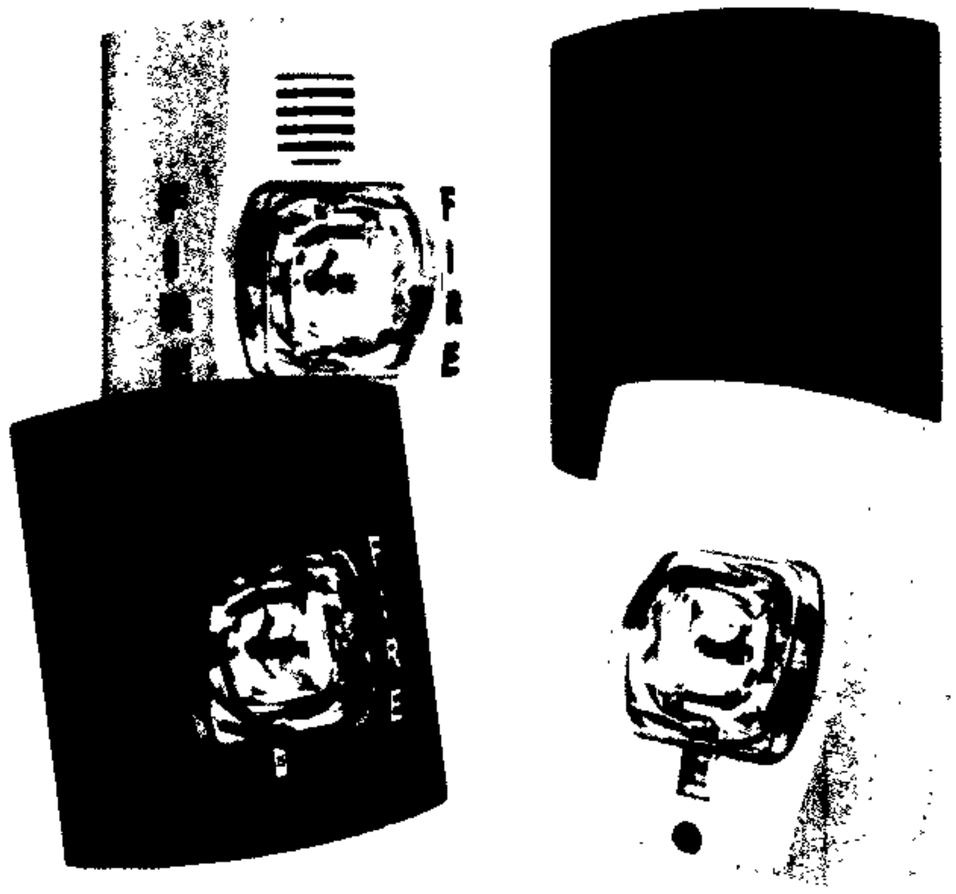
SYSTEM SENSOR®

Indoor Selectable-Output Horns, Strobes, and Horn Strobes for Wall Applications



SpectrAlert® Advance audible visible notification products are rich with features guaranteed to cut installation times and maximize profits.

Features

- Plug-in design with minimal intrusion into the back box
- Tamper-resistant construction
- Automatic selection of 12- or 24-volt operation at 15 and 15/75 candela
- Field-selectable candela settings on wall units: 15, 15/75, 30, 75, 95, 110, 115, 135, 150, 177, and 185
- Horn rated at 88+ dBA at 16 volts
- Rotary switch for horn tone and three volume selections
- Universal mounting plate for wall units
- Mounting plate shorting spring checks wiring continuity before device installation
- Electrically Compatible with legacy SpectrAlert devices
- Compatible with MDL3 sync module
- Listed for ceiling or wall mounting

The SpectrAlert Advance series offers the most versatile and easy-to-use line of horns, strobes, and horn strobes in the industry. With white and red plastic housings, wall and ceiling mounting options, and plain and FIRE-printed devices, SpectrAlert Advance can meet virtually any application requirement.

Like the entire SpectrAlert Advance product line, wall-mount horns, strobes, and horn strobes include a variety of features that increase their application versatility while simplifying installation. All devices feature plug-in designs with minimal intrusion into the back box, making installations fast and foolproof while virtually eliminating costly and time-consuming ground faults.

To further simplify installation and protect devices from construction damage, SpectrAlert Advance utilizes a universal mounting plate with an onboard shorting spring, so installers can test wiring continuity before the device is installed.

Installers can also easily adapt devices to a suit a wide range of application requirements using field-selectable candela settings, automatic selection of 12- or 24-volt operation, and a rotary switch for horn tones with three volume selections.

SpectrAlert Advance Specifications

Architect/Engineer Specifications

General
SpectrAlert Advance horns, strobes, and horn strobes shall mount to a standard 4 x 4 x 1½-inch back box, 4-inch octagon back box, or double-gang back box. Two-wire products shall also mount to a single-gang 2 x 4 x 17/8-inch back box. A universal mounting plate shall be used for mounting ceiling and wall products. The notification appliance circuit wiring shall terminate at the universal mounting plate. Also, SpectrAlert Advance products, when used with the Sync•Circuit™ Module accessory, shall be powered from a non-coded notification appliance circuit output and shall operate on a nominal 12 or 24 volts. When used with the Sync•Circuit Module, 12-volt-rated notification appliance circuit outputs shall operate between 8.5 and 17.5 volts; 24-volt-rated notification appliance circuit outputs shall operate between 16.5 and 33 volts. Indoor SpectrAlert Advance products shall operate between 32 and 120 degrees Fahrenheit from a regulated DC or full-wave rectified unfiltered power supply. Strobes and horn strobes shall have field-selectable candela settings including 15, 15/75, 30, 75, 95, 110, 115, 135, 150, 177, and 185.

Strobe
The strobe shall be a System Sensor SpectrAlert Advance Model _____ listed to UL 1971 and shall be approved for fire protective service. The strobe shall be wired as a primary-signaling notification appliance and comply with the Americans with Disabilities Act requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system.

Horn Strobe Combination
The horn strobe shall be a System Sensor SpectrAlert Advance Model _____ listed to UL 1971 and UL 464 and shall be approved for fire protective service. The horn strobe shall be wired as a primary-signaling notification appliance and comply with the Americans with Disabilities Act requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system. The horn shall have three audibility options and an option to switch between a temporal three pattern and a non-temporal (continuous) pattern. These options are set by a multiple position switch. On four-wire products, the strobe shall be powered independently of the sounder. The horn on horn strobe models shall operate on a coded or non-coded power supply.

Synchronization Module
The module shall be a System Sensor Sync•Circuit model MDL3 listed to UL 464 and shall be approved for fire protective service. The module shall synchronize SpectrAlert strobes at 1 Hz and horns at temporal three. Also, while operating the strobes, the module shall silence the horns on horn strobe models over a single pair of wires. The module shall mount to a 411/16 x 411/16 x 21/8-inch back box. The module shall also control two Style Y (class B) circuits or one Style Z (class A) circuit. The module shall synchronize multiple zones. Daisy chaining two or more synchronization modules together will synchronize all the zones they control. The module shall not operate on a coded power supply.

Physical/Electrical Specifications	
Standard Operating Temperature	32°F to 120°F (0°C to 49°C)
Humidity Range	10 to 93% non-condensing
Strobe Flash Rate	1 flash per second
Nominal Voltage	Regulated 12 DC/FWR or regulated 24 DC/FWR[1]
Operating Voltage Range[2]	8 to 17.5 V (12 V nominal) or 16 to 33 V (24 V nominal)
Operating Voltage Range MDL3 Sync Module	8.5 to 17.5 V (12 V nominal) or 16.5 to 33 V (24 V nominal)
Input Terminal Wire Gauge	12 to 18 AWG
Wall-Mount Dimensions (including lens)	5.6˝L x 4.7˝W x 2.5˝D (142 mm L x 119 mm W x 64 mm D)
Horn Dimensions	5.6˝L x 4.7˝W x 1.3˝D (142 mm L x 119 mm W x 33 mm D)
Wall-Mount Trim Ring Dimensions (sold as a 5 pack) (TR-HS)	5.7˝L x 4.8˝W x 0.35˝D (145 mm L x 122 mm W x 9 mm D)

Notes:
1. Full Wave Rectified (FWR) voltage is a non-regulated, time-varying power source that is used on some power supply and panel outputs.
2. P, S, PC, and SC products will operate at 12 V nominal only for 15 and 15/75 cd.

SYSTEM SENSOR®

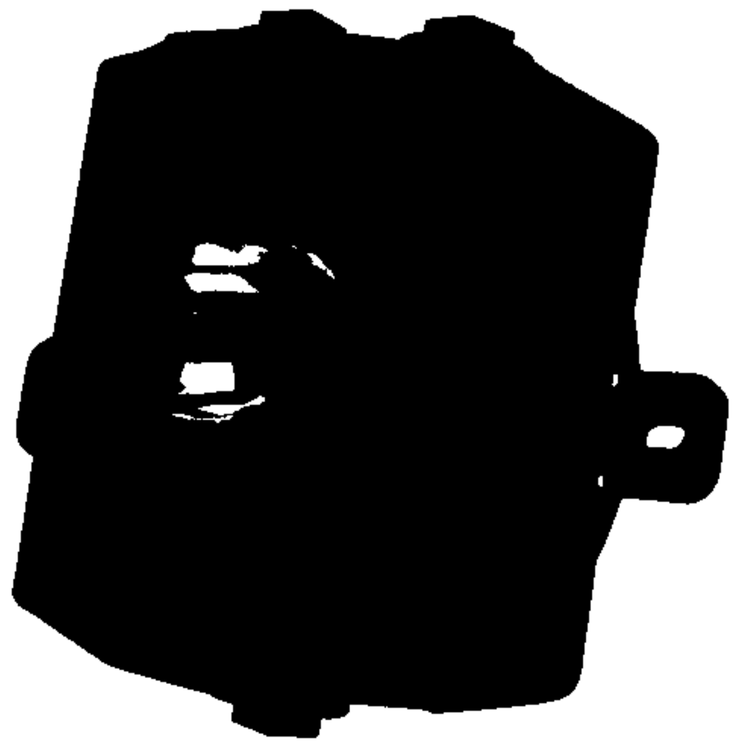
Outdoor Selectable-Output Horns, Strobes, and Horn Strobes for Wall Applications



SPECTRAlert ADVANCE From System Sensor

SpectrAlert® Advance outdoor audible visible products are rich with features that cut installation times and maximize profits.

Features

- Weatherproof per NEMA 4X, IP56
- Listed to UL 1638 (strobe) and UL 464 (horn)
- Compatible with System Sensor synchronization protocol and legacy SpectrAlert products
- Field-selectable candela settings: 15, 15/75, 30, 75, 95, 110, 115, 135, 150, 177, and 185
- Automatic selection of 12- or 24-volt operation at 15 and 15/75 candela
- Rotary switch for horn tone and three volume selections
- Horn rated at 88+ dBA at 16 volts
- Rated from –40°F to 151°F
- Universal mounting plate with an onboard shorting spring that tests wiring continuity before devices are installed
- Plug-in design with minimal intrusion into the back box
- Tamper-resistant construction
- Listed for ceiling or wall mounting

7135-1653 189 (horns, chimes)

SpectrAlert Advance offers the broadest line of outdoor horns, strobes, and horn strobes in the industry. With white or red plastic housings, wall or ceiling mounting options, and plain or FIRE-printed devices, SpectrAlert Advance can meet virtually any application requirement, including indoor, outdoor, wet, and dry applications in temperatures from –40°F to 151°F.

Like the entire SpectrAlert Advance line, outdoor horns, strobes, and horn strobes for wall applications include a variety of features that increase application flexibility and simplify installation. First, field-selectable settings, including candela, automatic selection of 12- or 24-volt operation, horn tones, and three volume options enable installers to easily adapt devices to meet requirements.

Next, SpectrAlert Advance devices use a universal mounting plate for both wall and ceiling applications. This mounting plate includes an onboard shorting spring that ensures wiring continuity before devices are installed, so installers can verify proper wiring without mounting the devices and exposing them to potential construction damage. Once the plates are mounted, all SpectrAlert Advance devices utilize a plug-in design with a single captured screw to speed installation and virtually eliminate costly ground faults.

Outdoor devices ship with weatherproof plastic back boxes (metal back boxes are available separately) that accommodate in-and-out wiring for daisy chaining devices. Plastic back boxes feature removable side flanges and improved resistance to saltwater corrosion. Knock-outs located on the back eliminate the need to drill holes for screw-in mounting. Plastic and metal weatherproof back boxes come with ¾-inch top and bottom conduit entries and ¾-inch knock-outs at the back. A screw-in NPT plug with an O-ring gasket for a watertight seal is included with each back box.

SpectrAlert Advance Outdoor Horn, Strobe, and Horn Strobe Specifications

Architect/Engineer Specifications

General

SpectrAlert Advance outdoor horns, strobes, and horn strobes shall mount to a weatherproof back box. A universal mounting plate shall be used for mounting ceiling and wall products. The notification appliance circuit wiring shall terminate at the universal mounting plate. Also, SpectrAlert Advance products, when used with the Sync•Circuit™ Module accessory, shall be powered from a non-coded notification appliance circuit output and shall operate on a nominal 12 or 24 volts. When used with the Sync•Circuit Module, 12-volt-rated notification appliance circuit outputs shall operate between 9 and 17.5 volts; 24-volt-rated notification appliance circuit outputs shall operate between 17 and 33 volts. Outdoor SpectrAlert Advance products shall operate between –40 and 151 degrees Fahrenheit from a regulated DC or full-wave rectified unfiltered power supply. Strobes and horn strobes shall have field-selectable candela settings including 15, 15/75, 30, 75, 95, 110, 115, 135, 150, 177, and 185.

Strobe

The strobe shall be a System Sensor SpectrAlert Advance Model _____ listed to UL 1971 and shall be approved for fire protective service. The strobe shall be wired as a primary-signaling notification appliance and comply with the Americans with Disabilities Act requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system. The strobe must be installed with its weatherproof back box in order to remain outdoor approved per UL. The strobe shall be suitable for use in wet environments.

Horn Strobe Combination

The horn strobe shall be a System Sensor SpectrAlert Advance Model _____ listed to UL 1971 and UL 464 and shall be approved for fire protective service. The horn strobe shall be wired as a primary-signaling notification appliance and comply with the Americans with Disabilities Act requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system. The horn shall have three audibility options and an option to switch between a temporal three pattern and a non-temporal (continuous) pattern. These options shall be set by a multiple position switch. On four-wire products, the strobe shall be powered independently of the sounder. The horn or horn strobe models shall operate on a coded or non-coded power supply. The horn strobe must be installed with its weatherproof back box in order to remain outdoor approved per UL. The horn strobe shall be suitable for use in wet environments.

Physical/Electrical Specifications	
Operating Temperature	–40°F to 151°F (–40°C to 66°C)
Strobe Flash Rate	1 flash per second
Nominal Voltage	Regulated 12 DC/FWR or regulated 24 DC/FWR[1]
Operating Voltage Range[2]	8 to 17.5 V (12 V nominal) or 16 to 33 V (24 V nominal)
Input Terminal Wire Gauge	12 to 18 AWG
Wall-Mount Dimensions (including lens)	5.6˝L x 4.7˝W x 2.5˝D (142 mm L x 119 mm W x 64 mm D)
Horn Dimensions	5.6˝L x 4.7˝W x 1.3˝D (142 mm L x 119 mm W x 33 mm D)
Wall-Mount Weatherproof Back Box Dimensions (SA-WBB)	5.7˝L x 5.1˝W x 2.0˝D (145 mm L x 130 mm W x 51 mm D)

Notes:

1. Full Wave Rectified (FWR) voltage is a non-regulated, time-varying power source that is used on some power supply and panel outputs.
2. P, S, PC, and SC products will operate at 12 V nominal only for 15 and 15/75 cd.

TELGUARD

TG-7FS LTE-V

P/N: TG7LVF01

CELLULAR ALARM COMMUNICATOR FOR LTE NETWORKS

COMMERCIAL FIRE

PRODUCT FEATURES

Certified for use on Verizon's LTE network for long, sunset-free installation.

Meets UL 864 requirements for sole, primary or backup path communications.

Minimizes false alarms by providing dual paths for self-tests.

The Telguard TG-7FS LTE-V is the ideal cellular alarm communications solution for commercial fire systems. The TG-7FS LTE-V transmits alarm signals from the fire panel over the digital cellular network to the designated monitoring station.

Compliant with the 2013 Edition of NFPA 72, the TG-7FS LTE-V can serve as the sole communications path for the fire alarm system. It replaces all of the landlines currently dedicated to the master control unit. On average, cellular monitoring costs the end user significantly less than a dedicated landline. For each landline replaced with a TG-7FS LTE-V, the monthly communications bill decreases.

By being able to signal failures to the central station within sixty minutes of an outage, the TG-7FS LTE-V can be installed as the sole path for commercial fire installations. For existing installations, all landlines can be swapped for a single TG-7FS LTE-V because of the new sixty minute supervision mode.

The TG-7FS LTE-V can also be installed as a backup path and upgraded to sole path at a later date.

Telguard Portal

Telguard makes adopting cellular easy with a secure Internet portal. The straightforward web interface allows security dealers and central stations to quickly and efficiently access Telguard based services 24/7. This advanced tool has multi-level user authorization and provides total account management of UL Listed Telguard cellular alarm communicators.

Telguard Cellular Service

Telguard Cellular Service provides Verizon LTE network coverage for all Telguard units. Telguard's Communication Center is UL compliant and provides seamless connectivity between the alarm panel, the Telguard family of products and the central station. Telguard Technical Support provides a single point of contact for both cellular service and Telguard product questions.

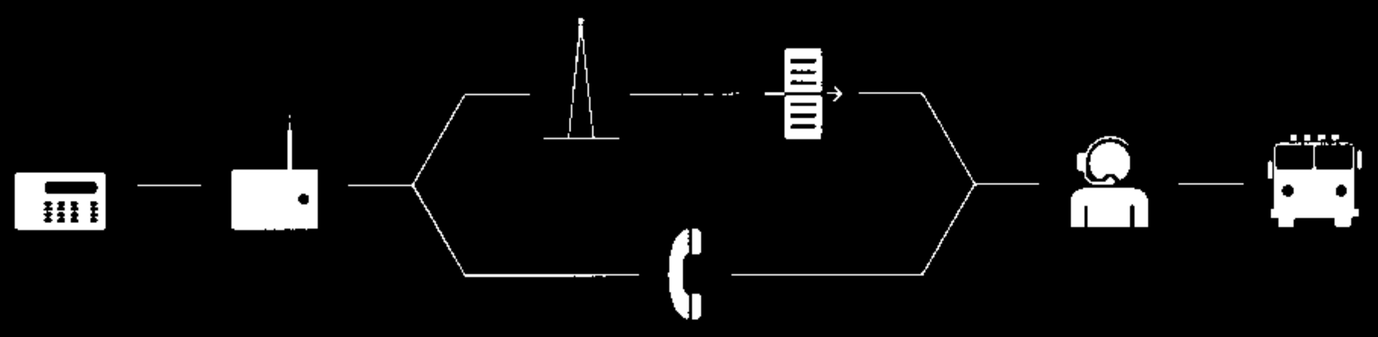
Advanced Reliability

- Features the ability to utilize multiple cellular technologies to increase availability and reduce false alarms.
- Automatic self-tests with central station notification ensure the cellular system is operating.
- Available relay output for tripping the alarm control panel when a trouble condition occurs.

TELGUARD

TG-7FS LTE-V

CELLULAR ALARM COMMUNICATOR FOR LTE NETWORKS



Power

- **Transmit Power:** 200mW in all bands.
  Power Consumption: 60mA (Standby) 250mA (Transmission).
- **Transformer:** 12VAC, 800mA UL listed plug-in.

Radio Transceiver

- **LTE Bands:** 4 & 13.
- **Antenna:** 9" dipole with 2dBi gain 12 ft of cable and universal mounting bracket.
- FCC part 15, 27 and 68 compliant.

Physical Details

- **TG-7FS LTE-V:** 7.5" H x 11.5" W x 3.5" D.
- **Shipping Weight:** 8lbs.
- **Operating Environment:** 0°C to +50°C; up to 95% humidity (non-condensing).

Standard Features

- **Full data reporting.**
- **Automatic self-test (60 min. & daily).**
- **Power supply with battery harness.**
- **Locking, red metal enclosure.**
- **Two programmable supervisory trip outputs.**
- **Supports virtually all alarm formats (Contact ID, SIA2, and others) using dial capture for universal panel compatibility.**
- **Telephone line monitor built-in, with Standard Line Security.**

Telguard technology allows full data reporting for unlimited point-to-point signal details and maximum transmitting power for superior in-building penetration.

Telguard products are easy to install, economical, and UL Listed.

Accessories

- ACD 12, ACD 35, ACD 50, ACD 100: 12/35/50/100 feet of low loss, high performance cable.
- HGDL-0: High gain directional antenna.
- EXDL-0: External antenna.

TELGUARD

HGDL-0

LTE, 3G/4G AND CDMA NETWORKS

Telguard's HGDL-0 high gain wideband directional antenna supports LTE Telguard Cellular Alarm Communicators.

Mechanically robust for both Indoor/Outdoor applications

Excellent 700 MHz LTE performance

Self-contained design requiring no ground plane

Applicable for both 3G and 4G application

Focused power captures more signals

Multiple bands: 690-2700 MHz

HGDL-0

Antenna with integral radial ground plane connector
Mounting Bracket
TNC Adapter

For TG-1 Express use CTXL-12.
For TG-1B, TG-4, and TG-7 series, use ACD-12/35/50/100.

TECHNICAL DATA

Radiation Pattern	Directional
Frequency	690-2700 MHz
Gain	8-10dBi
Bandwidth	VSWR: <1.5 1 = 690-2700 MHz

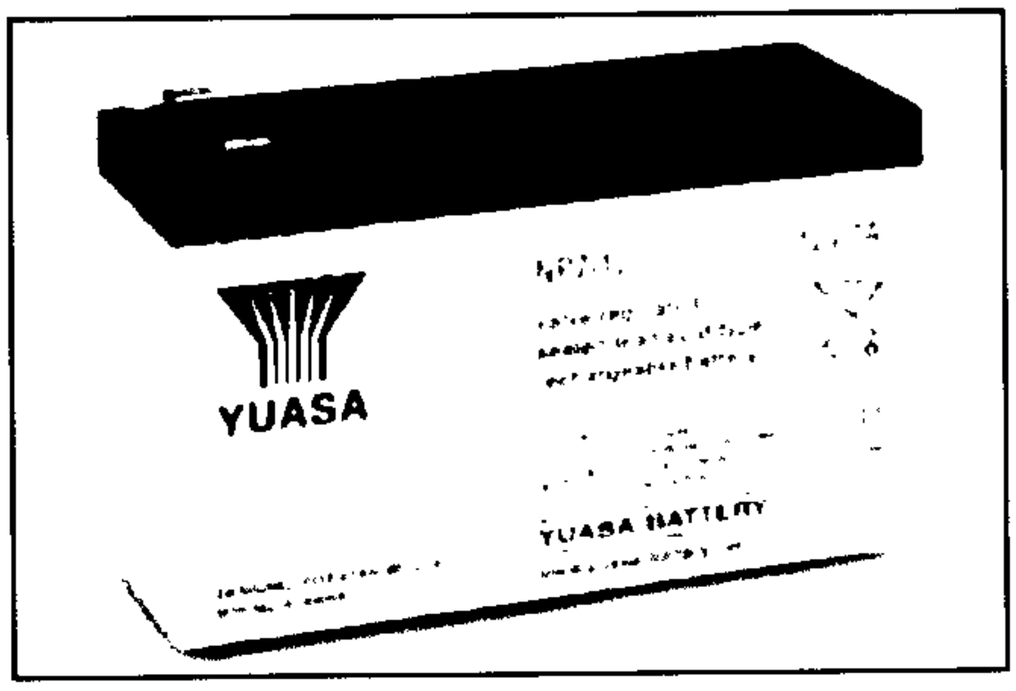
NP SERIES - **NP7-12**

Reliability is your Security

Utilizing the latest advance design Oxygen Recombination Technology, Yuasa have applied their 80 years of experience in the lead acid battery field to produce the optimum design of Sealed Lead Acid batteries.



FEATURES

- Superb recovery from deep discharge.
- Electrolyte suspension system.
- Gas Recombination.
- Multipurpose: Float or Cyclic use.
- Usable in any orientation
- Superior energy density.
- Lead calcium grids for extended life.
- Manufactured World wide.
- Application specific designs.

Technical Features

Sealed Construction
Yuasa's unique construction and sealing technique ensures no electrolyte leakage from case or terminals.

Electrolyte Suspension System
All NP batteries utilize Yuasa's unique electrolyte suspension system incorporating a microfine glass mat to retain the maximum amount of electrolyte in the cells. The electrolyte is retained in the separator material and there is no free electrolyte to escape from the cells. No gels or other contaminants are added.

Control of Gas Generation
The design of Yuasa's NP batteries incorporates the very latest oxygen recombination technology to effectively control the generation of gas during normal use.

Low Maintenance Operation
Due to the perfectly sealed construction and the recombination of gasses within the cell, the battery is almost maintenance free.

Terminals
NP batteries are manufactured using a range of terminals which vary in size and type. Please refer to details as shown.

Operation in any Orientation
The combination of sealed construction and Yuasa's unique electrolyte suspension system allows operation in any orientation, with no loss of performance or fear of electrolyte leakage.

Valve Regulated Design
The batteries are equipped with a simple, safe low pressure venting system which releases excess gas and automatically reseals should there be a build up of gas within the battery due to severe overcharge. Note. On no account should the battery be charged in a sealed container.

Data Sheet

NP SERIES - **NP7-12**

Lead Calcium Grids
The heavy duty lead calcium alloy grids provide an extra margin of performance and life in both cyclic and float applications and give unparalleled recovery from deep discharge.

Long Cycle Service Life
Depending upon the average depth of discharge, over a thousand discharge/charge cycles can be expected.

Float Service Life
The expected service life is five years in float standby applications.

Separators
The use of the special separator material provides a very efficient insulation between plates preventing inter-plate short circuits and prohibiting the shedding of active materials.

Long shelf Life
The extremely low self discharge rate allows the battery to be stored for extended periods up to one year at normal ambient temperatures with no permanent loss of capacity.

Operating Temperature Range
The batteries can be used over a broad temperature range permitting considerable flexibility in system design and location.

Charge – 15°C to 50°C
Discharge – 20°C to 60°C
Storage – 20°C to 50°C (fully charged battery)

LISTING SERVICE

LISTING No. 7165-0028:0239

CATEGORY: 7165 -- FIRE ALARM CONTROL UNIT (COMMERCIAL)

LISTEE: NotifierOne Fire-Lite Place, Northford, CT 06472-1653
Contact: Vladimir Kireyev (203) 484-6277 Fax (203) 484-7309
Email: vladimir.kireyev@honeywell.com

DESIGN: Model FireWarden-50 addressable fire alarm control unit. Unit consists of one communication loop, two bell circuits, and three relay contact outputs for alarm, trouble and supervisory. Local, auxiliary, remote station, central station and proprietary (protected premise),automatic, manual, water flow and sprinkler supervisory service. Refer to listee's data sheet for detailed product description, operational considerations and required/optional accessories. When required, accessories shall be CSFM listed.

RATING: 120 VAC, 60 Hz, 3.0 A Primary, 24 VDC Secondary

INSTALLATION: In accordance with listee's printed installation instructions, applicable codes and ordinances and in a manner acceptable to the authority having jurisdiction.

MARKING: Listee's name, model number, electrical rating and UL label.

APPROVAL: Listed as an addressable fire alarm control panel for use with separately listed compatible initiating and indicating devices. Refer to listee's Installation Instruction Manual for details.

This control unit can generate a distinctive three-pulse Temporal Pattern Fire Alarm Evacuation Signal (for total evacuation) in accordance with NFPA 72, 2002 Edition.

This control unit meets the requirements of UL-864, 9th Edition Standard.

NOTE: For Fire Alarm Verification Feature (delay of fire alarm signal), the maximum Retard/Reset/Restart period shall not exceed 30 seconds.

XLF: 7165-0075:0210

This listing is based upon technical data submitted by the applicant. CSFM Fire Engineering staff has reviewed the test results and/or other data but does not make an independent verification of any claims. This listing is not an endorsement or recommendation of the item listed. This listing should not be used to verify correct operational requirements or installation criteria. Refer to listee's data sheet, installation instructions and/or other

FIRE ENGINEERING - BUILDING MATERIALS LISTING PROGRAM

LISTING SERVICE

LISTING No. 7272-0028:0231

CATEGORY: 7272 – SMOKE DETECTOR-SYSTEM TYPE-PHOTOELECTRIC

LISTEE: NotifierOne Fire-Lite Place, Northford, CT 06472-1653
Contact: Vladimir Kireyev (203) 484-6277 Fax (203) 484-7309
Email: vladimir.kireyev@honeywell.com

DESIGN: Models NP-100, NP-100R* and NP-100T photoelectric type smoke detectors. Model NP-100T has a 135°F supplement integral heat sensor which only assists in a fire situation. The purpose of this thermal circuitry is to increase the sensitivity of the detector. This thermal circuitry is NOT approved for use as a heat detector. Refer to listee's printed data sheet for additional detailed product description and operational considerations.

RATING: 24VDC

INSTALLATION: In accordance with listee's printed installation instructions, applicable codes & ordinances and a manner acceptable to the authority having jurisdiction.

MARKING: Listee's name, model number, electrical rating and UL label.

APPROVAL: Listed as photoelectric smoke detector for use with separately listed compatible fire alarm control units and bases. All models are suitable for open areas and inside duct installations with air velocities between 0 - 4000 FPM. *Models NP-100 and NP-100R are also approved for installations inside Notifier duct detector housing ND-200 (OSFM Listing No. 3242-0028:236) and System Sensor duct detector housing DNRW (OSFM Listing No. 3242-1653:210).Refer to listee's Installation Instruction Manual for details.

NOTE: The photoelectric type detectors are generally more effective at detecting slow, smoldering fires, which smolder for hours before bursting into flames. Sources of these fires may include cigarettes burning in couches or bedding. The ionization type detectors are generally more effective at detecting fast, flaming fires, which consume combustible materials rapidly and spread quickly. Sources of these fires may include paper burning in a waste container or a grease fire in the kitchen.

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Planning, Building and Code Enforcement
ROSALYNN HUGHEY, ACTING DIRECTOR

LOT LINE ADJUSTMENT PERMIT

FILE NO.	**AT17-055**
LOCATION OF PROPERTY	**120 Granite Rock Way**
ASSESSOR PARCEL NUMBERS	**462-17-018, 462-17-019, and 462-17-020**
PROPOSED ADJUSTMENT	**Lot Line Adjustment to consolidate three parcels into one parcel on a 20.03-gross acre site, as designated on the attached map entitled, "Exhibit B, Plat to Accompany Description: Exhibit "A", dated February 5, 2018 and described in the attached legal description entitled "Exhibit A"**
ENVIRONMENTAL STATUS	**Exempt pursuant to CEQA Guidelines Section 15305 for Minor Alterations in Land Use Limitations**
OWNER/ADDRESS	**Granite Rock Company PO Box 151 Wastonville, CA 95077**
ENGINEER/ADDRESS	**Tracy Giorgetti HMH Engineers 1570 Oakland Road San Jose, CA 95131**

FACTS & FINDINGS

1. This Lot Line Adjustment request would combine three parcels, Parcel One (APN 462-17-020), Parcel Two (APN 462-17-018) and Parcel Three (APN 462-17-019), into one parcel, as depicted in the attached plat map entitled, "Exhibit "B", Plat to Accompany Description: Exhibit "A". The new single lot will be 20.03 square acres in size.

2. The subject lots are designated Combined Industrial/Commercial on the adopted Envision San José 2040 General Plan Land Use/Transportation Diagram.

3. Parcel One (APN 462-17-020) and Parcel Three (APN 462-17-019) are located within the IP Industrial Park Zoning District. Parcel Two (APN 462-17-018) is located in the IP(PD) Planned Development Zoning District. This Lot Line Adjustment results in one parcel that complies with the development standards of said Zoning District, IP(PD), File No. PD79-029, and the applicable provisions of the Zoning Ordinance, Title 20 of the Municipal Code.

4. The environmental impacts of the project will not have an unacceptable negative effect on adjacent property or properties in that:

a. Under the provisions of Section 15305(a), Minor Alterations in Land Use Limitations, of the California Environmental Quality Act (CEQA), this project is exempt from the environmental review requirements of Title 21 of the San José Municipal Code, implementing the California Environmental Quality Act of 1970, as amended. The project will not have a significant adverse effect on the environment in that minor lot line adjustments do not result in any changes in land use or density.

5. The Office of the County Assessor must approve any change of the Assessor's Parcel Numbers.

Based on the above-stated findings and subject to the condition set forth below, the Director of Planning approves, pursuant to Section 19.08.440(A)(7) of the San José Municipal Code and Section 66412(d) of the Subdivision Map Act, said Lot Line Adjustment.

APPROVED SUBJECT TO THE FOLLOWING CONDITIONS:

1. **Permit Expiration.** This Lot Line Adjustment shall automatically expire six months from and after the date of issuance hereof by the Director of Planning if within such six-month period this Lot Line Adjustment has not been recorded. In the event of a change of ownership, the applicant shall provide evidence to the satisfaction of the Director of Planning that a disclosure of this Lot Line Adjustment has been provided to all new owners prior to recordation of said Lot Line Adjustment.

APPROVED and issued on this 23rd day of March, 2018.

Rosalynn Hughey, Acting Director
Planning, Building and Code Enforcement

Deputy

Tracy Giorgetti
HMH Engineers
1570 Oakland Road
San Jose, CA 95131

Dear Tracy Giorgetti:

RE: **Lot Line Adjustment Permit, File No. AT17-055**, located at **120 Granite Rock Way**.

Your Lot Line Adjustment Permit, referenced above, was approved by the Director of Planning. To be effective, the enclosed Lot Line Adjustment Permit must be recorded **by the property owner(s)** with the Santa Clara County Recorder's Office **within six months of date of issuance**. A Grant Deed must be prepared to record simultaneously with the Lot Line Adjustment Permit. The following **original documents and one copy** are required at the time of recordation:

- Lot Line Adjustment Permit
- Exhibit "A" Map
- Legal Description
- Grant Deeds for referenced properties

After recordation, a copy of these recorded documents must be received by the Department of Planning, Building and Code Enforcement on or before **5:00 p.m., September 24, 2018.** Please forward a complete copy of the recorded documents including the County's recordation label showing their document number to:

City of San José – Planning Implementation Support Staff
200 E. Santa Clara Street, 3rd Floor Tower
San Jose, CA. 95113

You may wish to contact the Santa Clara County Recorder's Office at (408) 299-5680 to obtain a Preliminary Change of Ownership Report, a Mortgage and Transfer Tax Ownership Report and information regarding recording fees which are payable to the County Recorder at the time of recordation.

If you have any questions, please contact your Project Manager, Rhonda Buss at (408) 535-3887 or by e-mail at rhonda.buss@sanjoseca.gov.

Sincerely,

Sylvia Do
Deputy

FACTS & FINDINGS

1. This Lot Line Adjustment request would combine three parcels, Parcel One (APN 462-17-020), Parcel Two (APN 462-17-018) and Parcel Three (APN 462-17-019), into one parcel, as depicted in the attached plat map entitled, "Exhibit "B", Plat to Accompany Description: Exhibit "A". The new single lot will be 20.03 square acres in size.

2. The subject lots are designated Combined Industrial/Commercial on the adopted Envision San José 2040 General Plan Land Use/Transportation Diagram.

3. Parcel One (APN 462-17-020) and Parcel Three (APN 462-17-019) are located within the IP Industrial Park Zoning District. Parcel Two (APN 462-17-018) is located in the IP(PD) Planned Development Zoning District. This Lot Line Adjustment results in one parcel that complies with the development standards of said Zoning District, IP(PD), File No. PD79-029, and the applicable provisions of the Zoning Ordinance, Title 20 of the Municipal Code.

4. The environmental impacts of the project will not have an unacceptable negative effect on adjacent property or properties in that:

a. Under the provisions of Section 15305(a), Minor Alterations in Land Use Limitations, of the California Environmental Quality Act (CEQA), this project is exempt from the environmental review requirements of Title 21 of the San José Municipal Code, implementing the California Environmental Quality Act of 1970, as amended. The project will not have a significant adverse effect on the environment in that minor lot line adjustments do not result in any changes in land use or density.

5. The Office of the County Assessor must approve any change of the Assessor's Parcel Numbers.

Based on the above-stated findings and subject to the condition set forth below, the Director of Planning approves, pursuant to Section 19.08.440(A)(7) of the San José Municipal Code and Section 66412(d) of the Subdivision Map Act, said Lot Line Adjustment.

APPROVED SUBJECT TO THE FOLLOWING CONDITIONS:

1. **Permit Expiration.** This Lot Line Adjustment shall automatically expire six months from and after the date of issuance hereof by the Director of Planning if within such six-month period this Lot Line Adjustment has not been recorded. In the event of a change of ownership, the applicant shall provide evidence to the satisfaction of the Director of Planning that a disclosure of this Lot Line Adjustment has been provided to all new owners prior to recordation of said Lot Line Adjustment.

APPROVED and issued on this 23rd day of March, 2018.

Rosalynn Hughey, Acting Director
Planning, Building and Code Enforcement

EXHIBIT "A"

REAL PROPERTY in the City of San Jose, County of Santa Clara, State of California, being a portion of Parcel 1 and all of Parcel 2 as shown on that certain Parcel Map filed for record on October 16, 1978, in Book 428 of Maps, page 21, and all of Parcel A and Parcel B as shown on that certain Parcel Map filed for record on November 19, 1979, in Book 454 of Maps, page 27, both of Santa Clara County Records, described as follows:

BEGINNING at the westerly corner of said Parcel B being on the southeasterly line of Granite Rock Way;
Thence along the southwesterly and southeasterly line of said Parcel B the following two courses:

1. South 40°47'30" East, 299.84 feet;
2. Thence North 25°52'56" East, 1,091.07 feet, to the northeasterly line of said Parcel A;

Thence along said northeasterly line, and the northwesterly and westerly lines of said Parcel A the following four courses:

1. North 38°21'16" West, 925.39 feet;
2. Thence North 44°34'36" West, 407.48 feet;
3. Thence along a tangent curve to the left, having a radius of 2,814.84 feet, through a central angle of 00°53'37" for an arc length of 43.90 feet;
4. Thence South 47°24'35" West, 126.32 feet;

Thence along the northwesterly line of said Parcels A and 1, South 00°45'29" East, 385.77 feet;
Thence along the westerly and general southwesterly lines of said Parcel 1 the following six courses:

1. South 08°29'31" West, 132.00 feet;
2. Thence South 19°44'42" West, 132.00 feet;
3. Thence South 30°39'35" West, 17.90 feet;
4. Thence South 36°40'50" East, 660.45 feet;
5. Thence North 53°19'10" East, 235.07 feet;
6. Thence South 38°21'16" East, 108.60 feet, to the northwesterly line of Granite Rock Way;

Thence along said northwesterly line, and the northeasterly and southeasterly lines of Granite Rock Way the following five courses:

1. Northerly, along a non-tangent curve to the left, having a radius of 30.00 feet, whose center bears North 64°07'04" West, through a central angle of 33°33'26" for an arc length of 17.57 feet;
2. Thence along a reverse curve to the right, having a radius of 42.00 feet, through a central angle of 247°06'52" for an arc length of 181.14 feet;
3. Thence along a reverse curve to the left, having a radius of 30.00 feet, through a central angle of 33°33'26" for an arc length of 17.57 feet;
4. Thence South 25°52'56" West, 415.29 feet;
5. Thence along a tangent curve to the right, having a radius of 580.00 feet, through a central angle of 23°19'34" for an arc length of 236.13 feet, to the POINT OF BEGINNING.

Containing 20.03 acres, more or less.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of September 28, 2017 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Extended Loan Policy
ALTA Extended Owner Policy

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

Granite Rock Company, a California Corporation

The estate or interest in the land hereinafter described or referred to covered by this Report is:

Fee Simple

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2017-2018, a lien not yet due or payable.

2. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

3. A deed of trust to secure an original indebtedness of $36,889,840.00 recorded September 20, 2013 as Document No. 22393552 of Official Records.

Dated:	July 01, 2013
Trustor:	Granite Rock Company, a California corporation
Trustee:	American Securities Company, a corporation
Beneficiary:	Wells Fargo Bank, National Association

Affects: The land and other property.

A document recorded December 20, 2013 as Document No. 22477404 of Official Records provides that the deed of trust or the obligation secured thereby has been modified.

4. Water rights, claims or title to water, whether or not shown by the public records.

5. An ALTA/NSPS survey of recent date which complies with the current minimum standard detail requirements for ALTA/NSPS land title surveys.

6. Any facts, rights, interests or claims which would be disclosed by a correct ALTA/NSPS survey.

7. Rights of parties in possession.

The Following Matters Affect Tract 1:

8. An easement for perpetual right and easement to construct, install, maintain, renew, replace, operate and use a sanitary sewer pipe line or lines and incidental purposes, recorded September 11, 1969 as Book 8666, page 386 of Official Records.
In Favor of: City of San Jose, a municipal corporation
Affects: as described therein

9. An easement for the right from time to time to construct, install, inspect, maintain, replace, remove and use facilities of the type thereinafter specified, together with a right of way therefor, and also ingress thereto and egress therefrom and incidental purposes, recorded May 30, 1979 as Book E529, page 547 of Official Records.
In Favor of: Pacific Gas and Electric Company, a California corporation
Affects: as described therein

10. An easement for for the right from time to time to construct, install, inspect, maintain, replace, remove, and use facilities of the type thereinafter specified, together with a right of way therefor, and also ingress thereto and egress therefrom and incidental purposes, recorded November 14, 1979 as Book E943, page 584 of Official Records.
In Favor of: Pacific Gas and Electric Company, a California corporation
Affects: as described therein

11. An easement shown or dedicated on the map of Parcel Map recorded November 19, 1979 and on file in Book 454, Page 27 and 28, of Parcel Maps.
For: public service, storm drain, overland drainage release and incidental purposes.

12. An easement for the right from time to time to construct, install, inspect, maintain, replace, remove, and use facilities of the type thereinafter specified, together with a right of way therefor, and also ingress thereto and egress therefrom and incidental purposes, recorded March 28, 1980 as Book F233, page 717 of Official Records.
In Favor of: Pacific Gas and Electric Company, a California corporation
Affects: as described therein

13. The effect of a map purporting to show the land and other property, filed Book 831, Page 51 of Record of Surveys.

14. The terms, provisions and easement(s) contained in the document entitled "Easement Deed by Court Order in Settlement of Landowner Action" recorded February 13, 2014 as Instrument No. 22518872 of Official Records.

The Following Matters Affect Tract 2:

15. An easement for a perpetual right and easement to construct, install, maintain, renew, replace, operate and use a sanitary sewer pipe line or lines and incidental purposes, recorded September 11, 1969 as Book 8666, Page 386 of Official Records.
In Favor of: The City of San Jose, a municipal corporation
Affects: as described therein

16. An easement shown or dedicated on the map of Parcel Map recorded October 16, 1978 and on file in Book 428, Page 21, of Parcel Maps.
For: sanitary sewer and incidental purposes.

17. An easement shown or dedicated on the map of Parcel Map recorded November 19, 1979 and on file in Book 454, Page 27 and 28, of Parcel Maps.
For: sanitary sewer and incidental purposes.

The Following Matters Affect Tract 3:

18. TERMS AND CONDITIONS of that certain Permit
File No.: PD 79-4-29
Disclosed By: Notice of Granting of a Planned Development (PD) Permit

   (Affects Tract 3)

5. According to the latest available equalized assessment roll in the office of the county tax assessor, there is located on the land a(n) Commercial Structure known as Situs Unavailable, San Jose, California.

   (Affects Tracts 1 and 2)

6. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

7. It appears that a work of improvement is in progress or recently completed on the land. The Company will require various documents and information, including but not limited to a completed mechanics' lien risk analysis, construction contract(s), lien waivers, loan agreement, disbursement information, executed indemnity agreement and current financial information from proposed indemnitors, in order to determine whether mechanics' lien insurance can be issued. Other requirements may be made following the review of such documents and information.

8. This preliminary report/commitment was prepared based upon an application for a policy of title insurance that identified land by street address or assessor's parcel number only. It is the responsibility of the applicant to determine whether the land referred to herein is in fact the land that is to be described in the policy or policies to be issued.

9. Should this report be used to facilitate your transaction, we must be provided with the following prior to the issuance of the policy:

A. WITH RESPECT TO A CORPORATION:
   1. A certificate of good standing of recent date issued by the Secretary of State of the corporation's state of domicile.
   2. A certificate copy of a resolution of the Board of Directors authorizing the contemplated transaction and designating which corporate officers shall have the power to execute on behalf of the corporation.
   3. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
   4. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

B. WITH RESPECT TO A CALIFORNIA LIMITED PARTNERSHIP:
   1. A certified copy of the certificate of limited partnership (form LP-1) and any amendments thereto (form LP-2) to be recorded in the public records;
   2. A full copy of the partnership agreement and any amendments;
   3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
   4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
   5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

C. WITH RESPECT TO A FOREIGN LIMITED PARTNERSHIP:
   1. A certified copy of the application for registration, foreign limited partnership (form LP-5) and any amendments thereto (form LP-6) to be recorded in the public records;
   2. A full copy of the partnership agreement and any amendment;
   3. Satisfactory evidence of the consent of a majority in interest of the limited partners to the contemplated transaction;
   4. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
   5. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

D. WITH RESPECT TO A GENERAL PARTNERSHIP:
   1. A certified copy of a statement of partnership authority pursuant to Section 16303 of the California Corporation Code (form GP-I), executed by at least two partners, and a certified copy of any amendments to such statement (form GP-7), to be recorded in the public records;

2. A full copy of the partnership agreement and any amendments;
3. Requirements which the Company may impose following its review of the above material required herein and other information which the Company may require.

E. WITH RESPECT TO A LIMITED LIABILITY COMPANY:

1. A copy of its operating agreement and any amendments thereto;
2. If it is a California limited liability company, a certified copy of its articles of organization (LLC-1) and any certificate of correction (LLC-11), certificate of amendment (LLC-2), or restatement of articles of organization (LLC-10) to be recorded in the public records;
3. If it is a foreign limited liability company, a certified copy of its application for registration (LLC-5) to be recorded in the public records;
4. With respect to any deed, deed of trust, lease, subordination agreement or other document or instrument executed by such limited liability company and presented for recordation by the Company or upon which the Company is asked to rely, such document or instrument must be executed in accordance with one of the following, as appropriate:
   (i) If the limited liability company properly operates through officers appointed or elected pursuant to the terms of a written operating agreement, such documents must be executed by at least two duly elected or appointed officers, as follows: the chairman of the board, the president or any vice president, and any secretary, assistant secretary, the chief financial officer or any assistant treasurer;
   (ii) If the limited liability company properly operates through a manager or managers identified in the articles of organization and/or duly elected pursuant to the terms of a written operating agreement, such document must be executed by at least two such managers or by one manager if the limited liability company properly operates with the existence of only one manager.
5. A certificate of revivor and a certificate of relief from contract voidability issued by the Franchise Tax Board of the State of California.
6. Requirements which the Company may impose following its review of the above material and other information which the Company may require.

F. WITH RESPECT TO A TRUST:

1. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
2. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
3. Other requirements which the Company may impose following its review of the material require herein and other information which the Company may require.

G. WITH RESPECT TO INDIVIDUALS:

1. A statement of information.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American Title Insurance Company expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

APN:
462-17-018 (Affects Tract 1)
462-17-019 (Affects Tract 2)
462-17-020 (Affects Tract 3)

NOTICE I

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

If you have any questions about the effect of this new law, please contact your local First American Office for more details.

NOTICE II

As of January 1, 1991, if the transaction which is the subject of this report will be a sale, you as a party to the transaction, may have certain tax reporting and withholding obligations pursuant to the state law referred to below:

In accordance with Sections 18662 and 18668 of the Revenue and Taxation Code, a buyer may be required to withhold an amount equal to three and one-third percent of the sales price in the case of the disposition of California real property interest by either:

1. A seller who is an individual with a last known street address outside of California or when the disbursement instructions authorize the proceeds be sent to a financial intermediary of the seller, OR
2. A corporate seller which has no permanent place of business in California.

The buyer may become subject to penalty for failure to withhold an amount equal to the greater of 10 percent of the amount required to be withheld or five hundred dollars ($500).

However, notwithstanding any other provision included in the California statutes referenced above, no buyer will be required to withhold any amount or be subject to penalty for failure to withhold if:

1. The sales price of the California real property conveyed does not exceed one hundred thousand dollars ($100,000), OR
2. The seller executes a written certificate, under the penalty of perjury, certifying that the seller is a resident of California, or if a corporation, has a permanent place of business in California, OR
3. The seller, who is an individual, executes a written certificate, under the penalty of perjury, that the California real property being conveyed is the seller's principal residence (as defined in Section 1034 of the Internal Revenue Code).

The seller is subject to penalty for knowingly filing a fraudulent certificate for the purpose of avoiding the withholding requirement.

The California statutes referenced above include provisions which authorize the Franchise Tax Board to grant reduced withholding and waivers from withholding on a case-by-case basis.

The parties to this transaction should seek an attorney's, accountant's, or other tax specialist's opinion concerning the effect of this law on this transaction and should not act on any statements made or omitted by the escrow or closing officer.

The Seller May Request a Waiver by Contacting:
Franchise Tax Board
Withhold at Source Unit
P.O. Box 651
Sacramento, CA 95812-0651

Privacy Policy

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our parent company, The First American Corporation, we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information which you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its *Fair Information Values*, a copy of which can be found on our website at www.firstam.com.

Types of Information

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies, and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies, or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's *Fair Information Values*. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (02-03-10)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   - (a) building;
   - (b) zoning;
   - (c) land use;
   - (d) improvements on the Land;
   - (e) land division; and
   - (f) environmental protection.

   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   (a) that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   (b) that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   (c) that result in no loss to You; or
   (d) that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   (a) to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   (b) in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows: For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16: 1% of Policy Amount or $2,500.00 (whichever is less)	$10,000.00

ALTA RESIDENTIAL TITLE INSURANCE POLICY (6-1-87)
EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
   - (a) and use
   - (b) improvements on the land
   - (c) and division
   - (d) environmental protection

   This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date.
   This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.
2. The right to take the land by condemning it, unless:
   (a) a notice of exercising the right appears in the public records on the Policy Date

(b) the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking

3. Title Risks:
   (a) that are created, allowed, or agreed to by you
   (b) that are known to you, but not to us, on the Policy Date -- unless they appeared in the public records
   (c) that result in no loss to you
   (d) that first affect your title after the Policy Date -- this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
4. Failure to pay value for your title.
5. Lack of a right:
   (a) to any land outside the area specifically described and referred to in Item 3 of Schedule A OR
   (b) in streets, alleys, or waterways that touch your land
   This exclusion does not limit the access coverage in Item 5 of Covered Title Risks.

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
      i. the occupancy, use, or enjoyment of the Land;
      ii. the character, dimensions, or location of any improvement erected on the Land;
      iii. the subdivision of land; or
      iv. environmental protection;

      or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   a. a fraudulent conveyance or fraudulent transfer, or
   b. a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

2006 ALTA OWNER'S POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   b.Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   a. a fraudulent conveyance or fraudulent transfer; or
   b. a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) that arise by reason of:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. a. Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   i. the occupancy, use, or enjoyment of the Land;
   ii. the character, dimensions, or location of any improvement erected on the Land;
   iii. the subdivision of land; or
   iv. environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

   b. Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters

   a. created, suffered, assumed, or agreed to by the Insured Claimant;
   b. not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   c. resulting in no loss or damage to the Insured Claimant;
   d. attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   e. resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   a. a fraudulent conveyance or fraudulent transfer, or
   b. a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.

EXHIBIT "A"

REAL PROPERTY in the City of San Jose, County of Santa Clara, State of California, being a portion of Parcel 1 and all of Parcel 2 as shown on that certain Parcel Map filed for record on October 16, 1978, in Book 428 of Maps, page 21, and all of Parcel A and Parcel B as shown on that certain Parcel Map filed for record on November 19, 1979, in Book 454 of Maps, page 27, both of Santa Clara County Records, described as follows:

BEGINNING at the westerly corner of said Parcel B being on the southeasterly line of Granite Rock Way;
Thence along the southwesterly and southeasterly line of said Parcel B the following two courses:

1. South 40°47'30" East, 299.84 feet;
2. Thence North 25°52'56" East, 1,091.07 feet, to the northeasterly line of said Parcel A;

Thence along said northeasterly line, and the northwesterly and westerly lines of said Parcel A the following four courses:

1. North 38°21'16" West, 925.39 feet;
2. Thence North 44°34'36" West, 407.48 feet;
3. Thence along a tangent curve to the left, having a radius of 2,814.84 feet, through a central angle of 00°53'37" for an arc length of 43.90 feet;
4. Thence South 47°24'35" West, 126.32 feet;

Thence along the northwesterly line of said Parcels A and 1, South 00°45'29" East, 385.77 feet;
Thence along the westerly and general southwesterly lines of said Parcel 1 the following six courses:

1. South 08°29'31" West, 132.00 feet;
2. Thence South 19°44'42" West, 132.00 feet;
3. Thence South 30°39'35" West, 17.90 feet;
4. Thence South 36°40'50" East, 660.45 feet;
5. Thence North 53°19'10" East, 235.07 feet;
6. Thence South 38°21'16" East, 108.60 feet, to the northwesterly line of Granite Rock Way;

Thence along said northwesterly line, and the northeasterly and southeasterly lines of Granite Rock Way the following five courses:

1. Northerly, along a non-tangent curve to the left, having a radius of 30.00 feet, whose center bears North 64°07'04" West, through a central angle of 33°33'26" for an arc length of 17.57 feet;
2. Thence along a reverse curve to the right, having a radius of 42.00 feet, through a central angle of 247°06'52" for an arc length of 181.14 feet;
3. Thence along a reverse curve to the left, having a radius of 30.00 feet, through a central angle of 33°33'26" for an arc length of 17.57 feet;
4. Thence South 25°52'56" West, 415.29 feet;
5. Thence along a tangent curve to the right, having a radius of 580.00 feet, through a central angle of 23°19'34" for an arc length of 236.13 feet, to the POINT OF BEGINNING.

Containing 20.03 acres, more or less.

Buss, Rhonda

To: Erik Schoennauer
Subject: File No. AT17-055

Dear Erik,

Thank you for your submittal of File No. AT17-055, 120 Granite Rock Way. Your file has gone through the initial review process, and your application is deemed incomplete. Please see our comments below:

1. APN 462-17-018 is zoned (IP)PD Planned Development Zoning District. APN 462-17-018 and 462-17-020 are located in the IP Industrial Park Zoning District. The General Plan designation for these sites are Combined Industrial/Commercial (CIC) and the conforming zoning district would be CIC. In order to create a lot, with one zoning district (CIC), a rezoning of each of the three parcels to CIC would be needed. Here is a link to the Universal Application which would be used for the rezoning https://www.sanjoseca.gov/DocumentCenter/View/25302.

   If the rezoning is approved, we will be able to move forward with the lot line adjustment.

2. The plot plan should state, lot line adjustment for _____ (insert name of owner or other suitable title).

3. The lot line adjustment is under review with the Environmental Planning, and comments will be forwarded upon receipt.

Should you have any questions, please feel free to contact me.

Thank you,

Rhonda Buss
Planner

Re: 12 South First Street
Historic Preservation Permit Amendment
File No. HPA05-001-01

Dear Rhonda:

The items listed below are the responses to the Planning comments dated February 20, 2018. Included are both the comments and the associated responses.

speak vision

Project Issues and Concerns

1. Staff can support the proposed project, if the issues below are addressed.
Response: Informational only.

2. Is there any outdoor lighting proposed? If so, please show us how the outdoor lighting is consistent with the City Council Policies identified below. If not, please clarify on the project description on Sheet HPP 1.1
Response: No new exterior lighting anticipated at this time. Existing exterior fixtures will be evaluated for repair/replacement.

Permit Streamlining Act

1. The plan set received includes new solar panels. However, the application (attached) subject of amendment does not. Please update the first page of the application and staff will update the file.
Response: The application has been updated to reflect solar panels in the description.

2. Please see the items below in the Plan Clarifications and Required Additional Information section.
Response: Refer to noted items.

3. Is there any parking associated with this building? If so, please provide a parking information/table, net and gross square footages.
Response: No parking is associated with this building.

Project Description

Note any issues with the project description and needed permits (i.e. Tree Removal Permit)
We understand the proposed project to include a Historic Preservation Permit Amendment to allow solar panels, exterior and interior modifications on a 0.40 gross acre site located in the DC Downtown Core Zoning District. Please confirm the description above includes all aspects of the proposed project, and advise us immediately if any information is incorrect or omitted.

40 South Market Street
Suite 400
San Jose, CA 95113

Tel 408.294.8000
Fax 408.294.1747
www.rmw.com

Response: The description is okay, however the window washing system should also be included, since it has now been determined. This has been added to the Project Description on sheet HPP 1.1, as well as the elevations on sheets HPP 3.1 and 3.2, which includes a full description.

2. General Plan Consistency

The subject site is designated **Downtown** on the Land Use/Transportation Diagram of the Envision San Jose 2040 General Plan. This designation includes office, retail, service, residential, and entertainment uses in the Downtown. Redevelopment should be at very high intensities, unless incompatibility with other major policies within the Envision General Plan (such as Historic Preservation Policies) indicates otherwise. The proposed project is **consistent** with the following goals and polices of the Envision San Jose 2040 General Plan:

build experience

LU-13.2 Preserve candidate or designated landmark buildings, structures and historic objects, with first priority given to preserving and rehabilitating them for their historic use, second to preserving and rehabilitating them for a new use, or third to rehabilitation and relocation on-site. If the City concurs that no other option is feasible, candidate or designated landmark structures should be rehabilitated and relocated to a new site in an appropriate setting.

LU-13.6 Ensure modifications to candidate or designated landmark buildings or structures conform to the Secretary of the Interior's Standards for Treatment of Historic Properties and/or appropriate State of California requirements regarding historic buildings and/or structures, including the California Historical Building Code.

Response: Informational only.

3. Applicable City Council Policies

Please note, the City Council policies listed below may be applicable to the proposed project, and may be found in the links below.

- Preservation of Historic Landmarks; for Applicability and Findings information
- Outdoor Lighting on Private Developments; if applicable
- Exceptions to Outdoor Lighting; if applicable

Development Policy Web Pages: http://www.sanioseca.gov/index.aspx?nid=1733 and http ://www. sanjoseca. gov/index. aspx?NID=1961

Response: Informational only.

4. Zoning Consistency

The subject site is located in the DC Downtown Core Zoning District and is located within the DG Downtown Ground-Floor Space overlay area. Tenant spaces in the DG overlay district area shall include ground-floor space that can be segregated from the street frontage portion of the space, in a manner consistent with all applicable codes (as is required by existing law and practice) and that leaves a viable store front space. The clear-height for the ground-floor uses and the available depth of such space should be adequate to accommodate retail uses

consistent with the predominant character of retail uses in the immediate vicinity, or to promote a theme or identity of the larger area in which it is located. The proposed project is consistent with the Zoning designation for the subject site based on Section 20,70.100. approved File No. RCP98-007, and the proposed project description.

a. Use: There is no change of use proposed as identified above, therefore the use is consistent.

b. Setbacks: No setbacks are required pursuant to Section 20.70.210 of the code.

c. Parking: pursuant to Section 20.70.360, any structure in the downtown parking management zone legally instituted prior to April 30, 2004 shall be a legal-nonconforming use for purposes of this part.

Response: Informational only.

5. Plan Clarifications and Required Additional Information

build experience

a. Sheet HPP 1.1:

i. Please provide a separate Site Plan sheet.
Response: Separate site plan sheet (and larger scale site plan) has been provided. Refer to sheet HPP 1.2.

ii. The Site Plan property lines need to be darker and thickened. The plans indicate that there is a 0 foot setback, please clarify whether there is a 0 foot setback on each side. If so, please identify that the property line and setback are the same.
Response: Refer to site plan on sheet HPP 1.2 for darker/thickened property lines. It is our understanding that the existing setback is 0 feet on each side. We have noted this on the site plan.

iii. Please identify the Landmark Designations and the Resolution Number (Res. No. 58136)
Response: Refer to sheet HPP 1.1, Project Information and Data. This has been added.

iv. The use of all adjacent properties (indicate any other historic properties) within 50 feet of the property line.
Response: Refer to sheet HPP 1.1, new Area Map, noting the adjacent uses.

b. Sheet HPP3.2: Please provide the total height, and include the top of the existing tower on the elevations. As an option, a separate sheet including the base of the terracotta roof to the top of the tower.
Response: Refer to sheets HPP 3.1 and 3.2 for added section of tower, and notation of height.

6. Environmental Review - California Environmental Quality Act (CEQA)

Based on the project description and the provided scope of work, the proposed project is under review with Planning, Environmental.
Response: Informational only.

A Historic Report was submitted for the project, and the study is currently under review by Susan Walsh, Historic Preservation Officer. Comments are expected shortly, and will be forwarded upon receipt.
Response: Informational only. We will await any further review comments.

7. Community Outreach

At this time, a community meeting will not be required, but this is subject to change if significant public interest is generated.
Response: Informational only.

8. On-Site Sign Posting

Per the City's Public Outreach Policy, a sign describing the proposed project is required to be placed on each project site street frontage so it is legible from the street. Attached is a PDF of the on-site poster. Once the sign is posted, we would appreciate it if you could please take pictures of the on-site sign and fill out the Declaration of Posting (page 3 of the first link) and send both of those to me. Please note, this would be considered a Standard Development Proposal.

On-Site Noticing/Posting Requirements:
http://www.sanioseca.gov/DocumentCenter/Home/View/373
Public Outreach: http://www.sanioseca.gov/DocumentCenter/Home/View/374

Response: Owner will forward photos of signs on site once completed and installed, and will also provide the Declaration of Posting.

9. Next Steps

Please be advised that this summary does not constitute a final review. Additional comments may be provided upon review of any additional information and plan revisions submitted in response to this letter. In order to facilitate the development review process, **please include a detailed response letter with your resubmittal** that addresses all items contained in this letter and attached memos; Additionally, please submit four (4) 24" x 36" size revised plans and three (3) 11"x17" size plans. Please anticipate at least three weeks for departmental staff to review your responses and revisions.
Response: Requested plan sets have been provided along with this response letter.

Additional fees may be applicable for community meetings, additional public noticing, and for other processes/reviews as a result of revisions to the project description or plans, based on the adopted fee schedule. We will inform you should additional fees be required. The project will not be scheduled for hearing until all fees have been paid in full.

The project must first go to the Historic Landmarks Commission (HLC) for a recommendation. The Historic Landmarks Commission is held on the first Wednesday of the month, usually in the in the City Council Chambers or the Wing Room 120.

Once a recommendation has been made by the HLC, the project will then be referred to the Planning Director's Hearing where the decision to approve, deny, or conditionally approve this

proposal will occur. Consideration of the request may also be continued to a future hearing should issues or questions arise during or before the scheduled hearing that require additional time for analysis. Director's Hearings are held **every Wednesday at 9:00 a.m.,** in the City Council Chambers. Once the project plans are acceptable and all comments have been addressed, the project will be scheduled for public hearing. There is a minimum three-week lead time prior to the hearing for preparation, distribution and responses to the public notice, and for preparation of the draft permit.

Response: Informational only.

Please do not hesitate to call me with any questions or concerns.

Sincerely yours,

build experience

To: 'Erik Schoennauer'
Subject: File No. AT17-055

Dear Erik,

Thank you for your submittal of File No. AT17-055, 120 Granite Rock Way. Your file has gone through the initial review process, and your application is deemed incomplete. Please see our comments below.

1. APN 462-17-018 is zoned (IP)PD Planned Development Zoning District. APN's 462-17-019 and 462-17-020 are located in the IP Industrial Park Zoning District. The proposed lot line adjustment would create a lot with split lot zoning.

   Please note, the General Plan designation for these sites is Combined Industrial/Commercial (CIC) and the conforming zoning district is CIC. In order to create a lot, with one zoning district (CIC), a rezoning of each of the three parcels to CIC would be needed. If you would like to do this at this time, here is a link to the Universal Application which would be used for a rezoning https://www.sanjoseca.gov/DocumentCenter/View/25302.

2. The plot plan should state, lot line adjustment for _____ (insert name of owner or other suitable title).

3. Please provide a brief statement on a separate sheet of paper stating the reason for this application.

4. The lot line adjustment is under review with Environmental Planning and Public Works. Comments will be forwarded upon receipt.

Please note that this is not a final review, and additional comments may follow. Please submit three copies and one original of the plat and legal description.

Should you have any questions, please feel free to contact me.

Thank you,

Rhonda Buss

5. Thence North 53°19'10" East, 23
6. Thence South 38°21'16" East, 1 Way;

Closure calculation lists S02d26'12"W for a distance of 0.02' to get to the POB after the 580.00 ft. curve.

0.02' is the closure error. This is typically due to rounding errors when checking the legal description by manually inputting the courses. This falls within the standard tolerance.

Thence along said northwesterly line, and the northeasterly and southeasterly lines of Granite Rock Way the following five courses:

1. ~~Thence~~ northerly, along a non-tangent curve to the left, having a radius of 30.00 feet whose center bears North 64°07'04" West, through a central an arc length of 17.57 feet;
2. Thence along a reverse curve to the right, having a radius of 4 central angle of 247°06'52" for an arc length of 181.14 feet;
3. Thence along a reverse curve to the left, having a radius of 30. angle of 33°33'26" for an arc length of 17.57 feet;
4. Thence South 25°52'56" West, 415.29 feet;
5. Thence along a tangent curve to the right, having a radius of 5 through a central angle of 23°19'34" for an arc length of 236.13 feet, to the POINT OF BEGINNING.

Add the basis of bearing.

Not necessary. The basis of the legal description is inherent in the preamble. Typically, the first course denotes the basis of bearings, but in this case all the courses reflect the record information.

Containing 20.03 acres, more or less.

Basis of Bearing: The bearing N53d47'23"E of the centerline of Granite Rock Way as recorded in Book 428 of Maps Page 21 Santa Clara County Records is used for the basis of bearing for this description and plat map entitled Exhibit B Plat to Accompany Description

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Planning, Building and Code Enforcement
ROSALYNN HUGHEY, ACTING DIRECTOR

STATEMENT OF EXEMPTION

FILE NO.	AT17-055 and 3-04234
LOCATION OF PROPERTY	Granite Rock Way
PROJECT DESCRIPTION	A street vacation to shorten part of the existing Granite Rock Way and a Lot Line Adjustment (LLA) to consolidate three adjacent parcels into one lot on a 20.03-gross acre site located at 120 Granite Rock Way to maintain public street accessibility.

CERTIFICATION

Under the provisions of Sections 15305of the State Guidelines for Implementation of the California Environmental Quality Act (CEQA) as stated below, this project is found to be exempt from the environmental review requirements of Title 21 of the San José Municipal Code, implementing the California Environmental Quality Act of 1970, as amended.

15305. MINOR ALTERATIONS IN LAND USE LIMITATION

Class 5 consists of minor alternations in land use limitations in areas with an average slope of less than 20%, which do not result in any changes in land use or density.

ANALYSIS

The project is to vacate approximately 500 feet of Granite Rock Way and to consolidate three parcels adjacent to Granite Rock Way into one to maintain public street accessibility to the lots. The project would result in the construction of a new barricade and fencing to limit access to the proposed new private area. The project would conform to all City's standards and regulations for construction. The street vacation and lot line adjustment will result in a realignment of the property and create a minor land use alternation in an area with a slope less than 20% and, this action alone, would not change the land use or density. Therefore, this project qualifies for an exemption under Section 15305.

Exceptions:

CEQA Guidelines Section 15300.2 provides exceptions to the use of Categorical Exemptions where the use of a Categorical Exemption is prohibited under certain circumstances. The City has considered the projects applicability to all of the exceptions under Section 15300.2. An analysis of each of these exceptions in reference to this specific project is provided below.

(a) Location. Class 3, 4, 5, 6, and 11 are qualified by consideration of where the project is to be located. Section 15300.2(a) started that a project that is ordinarily insignificant in its impact on the environment may in a particularly sensitive environment be significant. The project will not impact an environmental resource of hazardous or critical concern.

(b) Cumulative Impact. Based on the above analysis, there is no evidence of a potential significant

cumulative impact on the environment from the proposed project. The project proposes the vacation of a portion of a public street that is no longer needed for public use and to consolidate three existing adjacent parcel into one. It has been determined that the project will not cumulatively impact traffic, noise, air quality, or water quality.

(c) Significant Effect. The project would not result in any significant effects on the environment due to unusual circumstances. The proposed project site does not have any unusual circumstances that would negatively impact the environment.

(d) Scenic Highways. It is not anticipated that the specific project sites will results in damage to any scenic resources. If one does, it is subject to 15300.2(d) and may not utilize this categorical exemption.

(e) Hazardous Waste Sites. The proposed project sites are not included on any list complied pursuant to Section 65962.5 of the Government Code. Therefore, the project is not subject to 15300.2(e).

(f) Historical Resources. There are no historical resources located on the proposed project site; therefore, Section 15300.2(f) does not apply.

ENVIRONMENTAL EVALUATION APPLICATION

INSTRUCTIONS

Please prepare the application form, environmental analysis, and other required information listed below and return them, in conjunction with other required forms for your project (i.e., Planned Development Permit/ Amendment, Conditional Use Permit/Amendment, Rezoning, etc.). This application is accepted by Appointment only. Please visit the Planning Division's website: http://www.sanjoseca.gov/index.aspx?nid=1725 to set up an appointment.

1. **Completed Application Form.** Each application shall be signed by the preparer of the application. Original wet signatures (not Xeroxed) are required. **One** copy of the application shall be submitted for each site.

   The application must contain the following:

   (a) Aerial photograph (8 ½" x 11" or 11" x 17")
   - Minimum scale 1"= 200'
   - Include a north arrow and the scale of the photograph
   - Include date of the photograph
   - The site shown in the center of the photograph
   - Clearly outline and identify the site

   (b) Site Plan (drawn to scale) showing the proposed project. (8 ½" X 11" or 11" X 17")

   (c) Vicinity Map that shows the surrounding roadways, schools, etc., (8 ½" X 11")
   - Include a north arrow
   - Site in the center of the map with North at the top of the page
   - Clearly outline and identify the site
   - Name each surrounding street
   - Label all land uses within 500 feet of the site

   (d) Photographs of the site and surrounding properties
   - Snapshots or Polaroid photos will be accepted
   - Mount on (8 ½" X 11") paper
   - Identify the subject of each photograph

3. **Noticing the Neighborhood.** Refer to the Public Outreach Policy for a full description of the City's public notification procedures. Public Hearing notices will be mailed for development proposals at least 10 calendar days before the date set for hearing for a project. Notices will be sent to all property owners and residents within 300 feet for Very Small projects, 500 feet for Standard Development Proposals and a minimum of 1,000 feet for large or controversial projects as detailed in the Public Outreach Policy.

4. **HUD Federal Funding and Environmental Compliance with the National Environmental Policy Act (NEPA).** Compliance with the National Environmental Policy Act (NEPA) is required for all projects anticipating the use of federal funding from the Department of Housing and Urban Development (HUD), for any portion of the project. Additional review, reports, and/or referrals may be necessary. Additional fees will be required for projects not funded by the Community Development Block Grant (CDBG) program. Please contact the Environmental Review Team for more information.

5. **Santa Clara Valley Habitat Conservation Plan (HCP).** Please provide HCP information for the project below, and refer to the HCP Geobrowser at http://www.hcpmaps.com as needed. To determine if a project eligible for coverage under the HCP, complete the Coverage Screen Form and as needed, the Fees and Conditions Worksheet. Both are available on the HCP Website at http://scv-habitatagency.org.

   Land Cover Designation: Urban - Suburban
   Private Development Area: Area 4
   Permanently Disturbed Footprints (in acres): 20.03
   Fee Zone(s): Urban Areas
   Wildlife Survey Area(s): N/A
   Plant Survey Area(s): Plant Survey Zone
   Streams and Setback: N/A

6. **Fees.** An application fee, associated Public Noticing fee(s), and the appropriate Environmental application fees are due at the time of filing (see fee schedule). Checks are made payable to the "City of San Jose".

This application is accepted by APPOINTMENT ONLY. To arrange an appointment, please visit the Planning Division's website: http://www.sanjoseca.gov/index.aspx?nid=1725. For assistance, call (408) 535-3555.

Are the following items applicable to the project or its effects? Discuss below all items checked yes (attach additional sheets as necessary):		
YES	NO	
☐	☒	Does the project involve or whether the use of Federal funding is anticipated?
☐	☒	Does the project propose the demolition or alteration of any existing structures on the project site?
☐	☒	Does the project change existing features of any bays, tidelands, beaches, lakes or hills or substantial alteration of ground contours?
☐	☒	Does the project change scenic views or vistas from existing residential areas or public lands or roads?
☐	☒	Does the project change pattern, scale or character of the general area of the project?
☐	☒	Does the project create a significant amount of solid waste or litter?
☐	☒	Does the project change the amount of dust, ash, smoke, fumes or odors in the vicinity?
☐	☒	Does the project propose to locate a feature within a riparian corridor or area subject to flooding?
☐	☒	Does the project propose a substantial change in existing noise or vibration levels in the vicinity?
☐	☒	Does the project propose to develop on land or on a slope of 15 percent or more?
☐	☒	Does the project propose the use of hazardous materials to be used as part of the operation of any of the establishments on the project site?
☐	☒	Does the project propose a substantial change in the demand for municipal services (police, fire, water, sewage, etc.)?
☐	☒	Does the project propose a substantial increase in fossil fuel consumption (electricity, oil, natural gas, etc.)?
☒	☐	Does the project have a relationship with a larger project or series of projects?
☐	☒	Does the project create one acre or more of impervious surface on the site?
☐	☒	Does the project site include any structures listed as City Landmarks, Candidate City Landmarks, Structures of Merit, or listed Determined Eligible for Listing on the National or California Register of Historic Places?

This application is accepted by APPOINTMENT ONLY. To arrange an appointment, please visit the Planning Division's website: http://www.sanjoseca.gov/index.aspx?nid=1725. For assistance, call (408) 535-3555.

Description	Source System	Program Id	Start Date	End Date	Long Description
Leaking Underground Storage Tank Cleanup Site	GeoTracker	T0608501918	04/21/1995	11/08/1996	Cleanup of an unauthorized release of petroleum hydrocarbons or petroleum surrogates, or byproducts from a Leaking Underground Storage Tank Cleanup. The cleanup is overseen by a local agency under the Local Oversight Program.
Toxic Release Inventory	Toxic Release Inventory	9513WGRNTR1GRAN	12/01/2021	12/01/2021	Toxic Release Inventory (TRI) tracks the management of certain toxic chemicals that may pose a threat to human health and the environment. Facilities must report annually how much of each regulated chemical is released to the environment and/or managed through recycling, energy recovery and treatment. A ""release"" of a chemical for TRI means that it is emitted to the air or water, or placed in some type of land disposal.

Search for a Handler (Advanced)

The Department of Toxic Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However because of the large number of manifests handled inaccuracies in the submitted data and limitations of the manifest system and the technical limitations of the database DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

About
The Zoning Ordinance (Title 20 of the San José Municipal Code) is an evolving set of regulations that promote and protect the public peace, health, safety, and general welfare.
This interactive zoning map identifies the zoning district designations, as referenced in the Zoning Ordinance, of property within the City of San José's incorporated area (City limits).
Search for an address in the map below and then left click or tap on the property for more details. Additional details about the zoning and property can also be found at www.sjpermits.org.

ASTM USER QUESTIONNAIRE

AEI Consultants

ASTM E 1527-13 USER QUESTIONNAIRE

To qualify for the protection offered under the EPA All Appropriate Inquiry (AAI) Standard, the User (entities seeking to use the ASTM E1527-13 Practice to complete an environmental site assessment of the property; i.e. Lenders and/or Borrowers) must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that AAI is not complete. This information should be the collective knowledge of the entities relying on the Phase I. **Please note that you are not being asked to evaluate the property, but rather to provide your knowledge of information on the property.**

Site Name/Address: CAPITOL YARD
120 GRANITE ROCK WAY, SAN JOSE, CA 95138

Property Owner (Name/Title/Company): GRANITE ROCK COMPANY

Phone/Email: (831) 768-2000

Key Site Personnel (Name/Title/Company): PAT MAPELLI / LAND USE MANAGER / GRANITEROCK

Phone/Email: (510) 368-0538 / PMAPELLI@GRANITEROCK.COM

Past Owner (Name/Title/Company) —

Phone/Email:

1. Environmental cleanup liens that are filed or recorded against the property (40 CFR 312.25).
Did a search of recorded land title records (or judicial records where appropriate, see NOTE 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

NOTE 1: In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

☐ Yes ☐ No If yes, please include an explanation in the space provided below:

2. Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi).
Did a search of recorded land title records (or judicial records where appropriate, see NOTE 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Engineering Controls are defined as physical modifications to a site or facility to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property). Institutional Controls are defined as a legal or administrative restriction on the use of, or access to, a site or facility to 1) reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or ground water on the property, or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment.

☐ Yes ☐ No If yes, please include an explanation in the space provided below:

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☒ Yes ☐ No If yes, please include an explanation in the space provided below:

THERE IS A CONCRETE AND CONSTRUCTION MATERIALS RECYCLE OPERATION NEXT DOOR.

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).
Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

☐ Yes ☐ No

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

☐ Yes ☐ No

Comments: N/A

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

a. Do you know the past uses of the property?
☐ Yes ☒ No

b. Do you know of specific chemicals that are present or once were present at the property? FUEL
☒ Yes ☐ No

c. Do you know of spills or other chemical releases that have taken place at the property?
☐ Yes ☒ No

d. Do you know of any environmental cleanups that have taken place at the property?
☐ Yes ☒ No

If yes for questions above, please include an explanation in the space provided below:

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

☐ Yes ☒ No If yes, please include an explanation in the space provided below:

Environmental Clean-ups	☐ Yes ☒ No	
Environmental Permits	☒ Yes ☐ No	STORMWATER, AIR, HAZARDOUS MATERIALS

OTHER ENVIRONMENTAL CONDITIONS

Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?
☐ Yes ☒ No
If yes, provide brief explanation.

Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?
☒ Yes ☐ No
If yes, provide brief explanation.
UNPERMITTED STORAGE OF PARTS CLEANING SOLVENTS. ISSUE IS BEING ADDRESSED.

Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?
☒ Yes ☐ No
If yes, provide brief explanation.
STORMWATER DISCHARGE VIOLATION. ISSUE HAS BEEN ADDRESSED WITH A STORMWATER TREATMENT SYSTEM.

Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?
☐ Yes ☒ No
If yes, provide brief explanation.

Are you aware of any cases of extreme water damage or mold throughout the building(s)?
☐ Yes ☒ No
If yes, provide brief explanation.

Person Completing Questionnaire:	PAT MAPELLI
Title/Affiliation to the subject property:	LAND USE MANAGER
Number of Years Associated with the subject property:	~5

Mr. Ray Hybarger
Santa Clara Valley Transportation Agency
3331 North First Street
San Jose, CA 95134-1906

Dear Mr. Hybarger:

Subject: Fuel Leak Site Case Closure—~~Santa Clara Valley Transportation Agency~~ SCCTA —Capitol Park and Ride, 3400 Monterey Road, San Jose, CA; Case No. 08-031

This letter transmits the enclosed underground storage tank (UST) case closure letter in accordance with Chapter 6.75 (Article 4, Section 25299.37[h]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, the Santa Clara Valley Water District is required to use this case closure letter for all UST leak sites. We are also transmitting to you the enclosed case closure summary. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

SITE INVESTIGATION AND CLEANUP SUMMARY

Please be advised that the following conditions exist at the site:

- Residual contamination exists at the site. However, the concentration levels are below regulatory concern.

If you have any questions, please call Ms. Rita Chan at (408) 265-2607, extension 2643. Thank you.

Sincerely,

ORIGINAL SIGNED BY

James S. Crowley, P.E.
Engineering Unit Manager
Leaking Underground Storage Tank Oversight Program

Mr. Ray Hybarger
Santa Clara Valley Transportation Agency
3331 North First Street
San Jose, CA 95134-1906

Dear Mr. Hybarger:

Subject: Fuel Leak Site Case Closure—Santa Clara Valley Transportation Agency—Capitol Park and Ride, 3400 Monterey Road, San Jose, CA; Case No. 08-031

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tanks(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

ORIGINAL SIGNED BY

James S. Crowley, P.E.
Engineering Unit Manager

Piping			—	—

III. RELEASE AND SITE CHARACTERIZATION INFORMATION

Cause and Type of Release: Unknown		
Site characterization complete? Yes	Date Approved By Oversight Agency: —	
Monitoring wells installed? Yes	Number: 7	Proper screened interval? *
Highest GW Depth Below Ground Surface: 21.87 feet	Lowest Depth: 59.31 feet	Flow Direction: North
Most Sensitive Current Use: Potential drinking water supply		

*MW-1, MW-2, and MW-7 have been dry since 1995. The screens of MW-5, MW-6, MW-8, and MW-9 have been submerged most of the time since 1995 although these wells were properly screened at the time during installation.

Summary of Production Wells in Vicinity: Two production wells are found within a ¼-mile radius of this site. One well is reported to be destroyed and one is reported to be active. Based upon the level of residual contamination and the proximity of these wells to the subject site, the wells identified as part of this survey are not likely to be affected by the reported release.	
Are drinking water wells affected? No	Aquifer Name: Santa Clara Valley Groundwater Basin
Is surface water affected? No	Nearest SW Name: Canoas Creek (about 1 mile southwest of site)
Off-Site Beneficial Use Impacts (Addresses/Locations): None	
Reports on file? Yes	Where are reports filed? Santa Clara Valley Water District

TREATMENT AND DISPOSAL OF AFFECTED MATERIAL

Material	Amount (Include Units)	Action (Treatment or Disposal w/Destination)	Date
Tank	One at 10,000 gallons, one at 5,000 gallons, one at 3,000 gallons, and one at 285 gallons	Shipped to H&H Service	11/29/89 11/29/89 11/29/89 12/12/89
Piping	None reported	—	—
Free Product	None reported	—	—
Soil	None reported	—	—
Groundwater	None reported	—	—
Barrels	None reported	—	—

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS

Contaminant	Soil (ppm)		Water (ppb)		Contaminant	Soil (ppm)		Water (ppb)	
	Before	After[1]	Before	After		Before	After[1]	Before	After
TPH (Gas)	5,600	160	ND	ND	Xylene	31	2.3	1	ND
TPH (Diesel)	28.5	—	—	—	Ethylbenzene	14	0.66	1.5	ND
Benzene	0.32	0.041	2.1	ND	Oil & Grease	—	—	—	—
Toluene	1.2	0.57	1	ND	Heavy Metals (Lead)	82	14	—	—
Other (8240/8270)	—	—	—	—	MTBE	—	—	<5	<5

Description of Interim Remediation Activities: None except tank removal.

[1]Soil samples analyses performed in September 1992

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Santa Clara Valley Water District staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: None		
Should corrective action be reviewed if land use changes? No		
Monitoring Wells Decommissioned: No	Number Decommissioned: 0	Number Retained: 7
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

V. ADDITIONAL COMMENTS, DATA, ETC.

Considerations and/or Variances:

November 29, 1989—Three gasoline underground storage tanks (UST) were removed at the site. The capacities of the tanks were 10,000; 5,000; and 3,000 gallons. Soil samples were collected underneath the tanks. Analytical results indicated up to 5,600 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHG), 0.32 ppm Benzene, 1.2 ppm Toluene, 14 ppm Ethylbenzene, and 31 ppm Xylenes. The tank excavation was reported to extend to approximately 25 feet below ground surface (bgs). During the removal of the three gasoline tanks, an additional underground waste oil tank was discovered.

December 12, 1989—The waste oil tank was removed. Soil samples were collected underneath the tank. Results of the analyses were not available.

January 23 and 24, 1991—Three soil borings (SB1, SB2, and SB3) were drilled. Soil and grab groundwater samples were collected for laboratory analysis. Each boring was drilled to encounter the shallowest groundwater. SB1 was drilled to a total depth of 80 feet bgs. Soil borings SB2 and SB3 were terminated at approximately 50 feet. One soil sample was selected for laboratory analysis from each of the three borings at the depth closest to, but above the respective static water level. One additional soil sample was selected for analysis in boring SB1 between 50 to 55 feet bgs. No detectable concentrations of TPHG or Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX) were found in the soil samples. Results indicated very low levels of petroleum hydrocarbon constituents (0.7 parts per billion [ppb] Benzene, 1 ppb Toluene, and 0.8 ppb Xylenes) in the groundwater sample collected from SB1.

March 14 and 15, 1991—Three monitoring wells, MW-1, MW-2, and MW-7, were installed to a depth of between 21 and 24 feet.

March 18 through 21, 1991—MW-5 and MW-6 were installed. Both wells were installed to a total depth of approximately 80 feet.

March 19, 1991—MW-1, MW-2, and MW-7 were developed. Groundwater samples did not contain detectable concentrations of TPH or BTEX.

March 27, 1991—MW-5 and MW-6 were developed. Groundwater samples did not contain detectable concentrations of TPH or BTEX.

November 15, 1991—Soil samples were collected from on-site soil stockpiles and the open excavation. Samples from the stockpiles were collected from a depth of approximately 1 foot bgs. Sample EX-1 was collected near the base of the excavation at a depth of approximately 10 feet. Sample EX-2 was collected near an exposed product line entering the excavation approximately 2 feet bgs. The soil samples collected from the open excavation contained up to 28.5 ppm Total Petroleum Hydrocarbons as Diesel, 2.9 ppm TPH as Motor Oil, and 82 ppm Lead.

September 22, 1992—Two soil borings (EB-1 and EB-2) were drilled on site. Soil samples were obtained and screened in the field for organic vapors using an organic vapor analyzer. EB-1 was terminated at 30.5 feet bgs while EB-2 was terminated at 40 feet bgs. Groundwater was not encountered in either boring. Selected soil samples were analyzed. Analytical results indicated up to 160 ppm TPHG, 0.57 ppm Toluene, 0.74 ppm Ethylbenzene, 2.3 ppm Xylenes, and 14 ppm Lead.

October 11 and 12, 1994—Two borings (MW-8 and MW-9) were drilled within 30 feet southwest and north, respectively, of the former UST excavation. MW-8 and MW-9 were drilled to a depth of 71.5 and 56.5 feet, respectively. The two borings were converted to groundwater monitoring wells. Analytical results for soil samples collected at MW-9 did not detect TPH or BTEX. Analytical results for soil samples collected at MW-8 indicated up to 8.9 ppm TPHG. No TPHG or BTEX were detected in the groundwater samples collected at MW-8 and MW-9.

1995 through 1999—Groundwater monitoring. MW-1, MW-2, and MW-7 had been dry since February 1995. MW-5, MW-6, MW-8, and MW-9 had been monitored.

Conclusion: Based upon the confirmatory soil sampling and recent groundwater monitoring results which did not indicate detection of petroleum compounds and fuel oxygenates (Methyl tert-Butyl Ether), Santa Clara Valley Water District staff does not believe that a significant threat to soil or groundwater exists at this site. Therefore, no further corrective action is required at this time.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Rita S. Chan, P.E.	Title: Assistant Civil Engineer
Signature: R Chan	Date: 1/11/2000
Approved by: James S. Crowley, P.E.	Title: Engineering Unit Manager
Signature: James S. Crowley	Date: 1/11/2000

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

VII. REGIONAL BOARD NOTIFICATION

Notes:

TPH = Total petroleum hydrocarbons
ND = Not detected at or above the reported laboratory detection limit
NA = Not analyzed
(1) = Hydrocarbon found at 53 µg/L in late gasoline range. Hydrocarbon is uncharacteristic of gasoline profile.

1995-1997 data were taken from Lee Incorporated,
"Fourth Quarter 1997 Groundwater Monitoring Report" (January 30, 1998)

Attachment 9C

January 22, 1992

Ms. Adele Hauessler
19921 Charters
Saratoga, CA 95070

Dear Ms. Hauessler:

Subject: Case Closure for Unknown/Adele Hauessler Property, 3408 Hillcap Avenue, San Jose—Site Code No. 83G

Santa Clara Valley Water District (District) staff have reviewed the file concerning the fuel leak investigation conducted at the subject site. This letter notifies you that the District has, under authority of the District contract with the State Water Resources Control Board, determined that this case does not appear to pose a threat to groundwater.

By copy of this letter, we are transmitting a Case Closure Report to the Regional Water Quality Control Board (RWQCB). The RWQCB has granted the District the authority to provide closure for cases where groundwater has not been impacted.

Based on the information provided by you, District staff have determined that groundwater is not threatened by the reported release of petroleum hydrocarbons from the former 1,000-gallon gasoline underground storage tank at the subject site. District staff have also determined that soil impacted by the reported release does not appear to pose a threat to groundwater quality at the subject site. Therefore, additional investigation and clean up of pollution related to the reported release is not required. Further work could be required if conditions change or a water quality threat is discovered at the site.

Please contact Belinda Allen at (408) 927-0710, extension 644 if you require additional information.

Sincerely,

ORIGINAL SIGNED BY
Roger B. James
Operations and Water Quality Manager

SANTA CLARA VALLEY WATER DISTRICT
FUEL LEAK CASE CLOSURE RECOMMENDATION

INTRODUCTION

The purpose of this report is to provide a basis of the Santa Clara Valley Water District (District) staff recommendation for case closure for the site listed below. It includes information regarding the site's history, site investigation methods, and source removal.

SITE INFORMATION

Site Name:	Adele Haeussler		
Contact:	Adele Haeussler	**Telephone:**	(408) 867-1066
Site Address:	3408 Hillcap Avenue, San Jose		
Site Location:			

Type of Former or Current Business/Activity at Site

☐ Residential ☐ Commercial Gas Station ☐ Fuel Storage/Transfer Facility
☒ Other: Junk Yard

Surrounding Land Use

☒ Residential ☒ Commercial ☐ Industrial
☐ Other:

Tank Information

Underground Tanks at Site:

Number	Size (Gallons)	Type	Contents	Date Removed	Age of Tank (Years)
1	1,000	steel	gasoline	1/13/88	unknown

Piping: none

Description and Dates of Known or Suspected Releases: Up to 180 ppm TPHg was detected in initial soil samples collected from beneath the tank.

Tank:

Removed: ☒ Yes ☐ No Slurry filled: ☐ Yes ☒ No Existing: ☐ Yes ☒ No

Reason for Tank Removal: The tank was no longer needed or used.

Description of Tank Conditions When Removed: Slightly rusted; small holes on the top of the tank.

List Any Leak Detection Monitoring or Inventory Results: none

Was tank tested for tightness? ☐ Yes ☒ No Result:

Tank Contents Used For:

☒ Business Use ☐ Personal Use ☐ Commercial Sale ☐ Waste Oil Disposal
☐ Other:

Responsible Party and Cost Recovery Information

The following responsible party(ies) has (have) been notified that District oversight costs are provided under contract with the State Water Resources Control Board and that oversight charges will be recovered from the responsible party(ies) by the State Board.

Company Name:			
Contact:	Adele Haeussler	**Telephone:**	(408) 867-1066

Description of Inappropriate Methods, if any Noted Above:		

Local and Regional Hydrogeology

Highest Seasonal Depth to Groundwater: 55 feet (Based on DWR Drillers Reports for Wells No. 07S1E34H01A and No. 7SIE34H02A, located approximately 300 feet and 400 feet, respectively, north of the site.

Soil Types at Site:

Depth In Feet	Major Soil Type
0-20	Fill, gravel with clay
20-24	Sandy clay
24-29	Sand
29-46	Sandy Clay

See attached boring log for additional information.

Groundwater Sensitivity (on a 1 to 4 scale, with 4 as the most sensitive):

☐ 1 ☐ 2 ☒ 3 ☐ 4

Number of water supply and monitoring wells within a 0.25 mile radius of the site:

Wells	Active	Destroyed
Domestic	0	0
Municipal	0	0
Agricultural	0	0
Industrial	1	0
Monitoring	11	0

Surface Waters

Name of Creek, Reservoir, Bay, Etc.	Distance to Site
Coyote River	two miles

Extent of Soil Contamination

The soil pollution extends less than 10 feet laterally from the source area and more than 45 feet vertically beneath the ground surface.

Sample Depth Ft.	Sample Location	TPHG	TPHD	O&G	B	T	E	X	Other
25.5	boring	nd	--	--	nd	nd	0.004	0.067	--
44.5	boring	nd	--	--	nd	nd	nd	0.004	--
Detection Limit		1			0.003	0.003	0.003	0.003	--

All results in PPM:

A summary of laboratory results is attached.

Laboratory Certified by State: ☒ Yes ☐ No

Extent of Groundwater Contamination:

Groundwater was not encountered.

Beneficial Uses

The present and future beneficial uses of the groundwater aquifers underlying and adjacent to the site, as defined in the Regional Water Quality Control Board's (RWQCB) 1986 report, "Water Quality Control Plan—San Francisco Bay Region," include water supply for domestic, municipal, agricultural, and industrial uses.

Tank and Immediate Soil Removal or Remediation

Initial soil samples were collected from approximately 16 feet bgs (below ground surface) and contained up to 180 ppm TPHg. An additional five feet of soil was excavated, and another soil sample was collected from approximately 21 feet bgs. This sample contained 35 ppm TPHg. The stockpiled soil, which contained 60 ppm TPHg was used to backfill the excavation.

Verification Monitoring

No verification monitoring is necessary.

STAFF RECOMMENDATIONS

This site should be considered for closure. Even though small holes were noted in the top of the tank, product had not been stored in the tank for at least three years prior to its removal. Although up to 35

ppm TPHg may remain at the bottom of the overexcavated pit at a depth of 21 feet bgs and the soil used for backfilling contained 60 ppm TPHg, no TPHg and only limited concentrations of BTEX were detected in soil samples collected from boring B-1 drilled through the former tank excavation, indicating that there has been limited migration of any contamination remaining in the area of the former underground storage tank. The concentrations of contamination detected in soil samples collected from the last 20 feet of the soil boring, at depths from 30.5 feet bgs to 45.5 feet bgs, were below recommended detection limits. Therefore, based on the limited extent of contamination, the clayey soils at the site, and the great depth to water, this site should be considered for closure.

Subject: Fuel Leak Site Case Closure, SBC/PacBell, 3589 Hillcap Avenue, San Jose, CA; SCVWDID No. 07S1E34H02f

Dear Mr. Taylor:

This letter transmits the enclosed underground storage tank (UST) case closure letter for the subject case in accordance with Chapter 6.75 (Section 25296.10 [g]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, all Local Oversight Programs (LOP) in the State are required to use this case closure letter for UST leak sites. The Santa Clara Valley Water District began transferring the LOP and all cases to the County of Santa Clara Department of Environmental Health on July 1, 2004. The County of Santa Clara is responsible for the issuance of the attached closure letter. The case closure summary is also enclosed. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

Site Management Requirements state residual contamination may pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.

Board of Supervisors: Donald F. Gage, Blanca Alvarado, Pete McHugh, James T. Beall, Jr., Liz Kniss
County Executive: Peter Kutras, Jr.

If you have any questions regarding the enclosed case closure form, please call Mr. Lane R. Davis of the Santa Clara Valley Water District at (408) 265-2607, extension 3756. Thank you.

Sincerely,

Ben Gale, Director

Subject: Fuel Leak Site Case Closure, SBC/PacBell, 3589 Hillcap Avenue, San Jose, CA; SCVWDID No. 07S1E34H02f

Dear Mr. Taylor:

This letter confirms the completion of a site investigation and remedial action for the underground storage tank(s) formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank(s) are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank(s) site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please contact our office if you have any questions regarding this matter.

Sincerely,

Ben Gale, Director

Board of Supervisors: Donald F. Gage, Blanca Alvarado, Pete McHugh, James T. Beall, Jr., Liz Kniss
County Executive: Peter Kutras, Jr.

Santa Clara Valley Water District

CASE CLOSURE SUMMARY
Leaking Underground Fuel Storage Tank Program

Date: June 21, 2005

I. AGENCY INFORMATION

Agency Name: Santa Clara Valley Water District	Address: 5750 Almaden Expressway
City/State/Zip: San Jose, CA 95118	Phone: (408) 265-2600
Responsible Staff Person: Lane R. Davis/DA	Title: Associate Engineer

II. CASE INFORMATION

Description of Interim Remediation Activities: Over-excavation of former UST location.									

Notes
ND – Below detection limits
NA – Not analyzed for this compound

1. Soil samples TP-01-16, TP-02-16, and TP-03-16 collected 06/19/03 @ 16 feet below ground surface (ft bgs) from the north end, center, and south end of the UST excavation, respectively
2. Soil sample TP-01-16 collected 06/19/03 @ 16 ft bgs from the north end of the UST excavation.
3. Soil samples TP-01-18 and TP-02-18 collected 06/26/03 @ 18 ft bgs from the north end and south end of the UST excavation, respectively.
4. Soil sample TP-03-16 collected 06/19/03 @ 16 ft bgs from the south end of the tank excavation.
5. Soil sample collected 06/25/03 from UST excavation.

IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes		
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes		
Does corrective action protect public health for current land use? Santa Clara Valley Water District staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health.		
Site Management Requirements: Residual contamination in soil remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. The Santa Clara County Department of Environmental Health and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.		
Should corrective action be reviewed if land use changes? No		
Number of Wells Commissioned: 0	Number of Wells Decommissioned: 0	Number of Wells Retained: 0
List Enforcement Actions Taken: None		
List Enforcement Actions Rescinded: None		

V. ADDITIONAL COMMENTS, DATA, ETC.

Considerations and/or Variances:

2003 – In June, one 10,000-gallon UST was removed from the site. A maximum 0.024 ppm Methyl tert Butyl Ether (MTBE) and 0.077 ppm Tert Butyl Alcohol (TBA) was detected in soil. Over-excavation of the former UST location was performed and subsequent soil samples were below detection limits for all constituents of concern.

Conclusion:
Based upon petroleum hydrocarbon results below detection levels in soil following over-excavation of the

former UST location, Santa Clara Valley Water District staff has concluded that a continuing threat to groundwater, human health, and the environment from residual petroleum hydrocarbons does not exist at this site and that Regional Water Quality Control Board objectives have not been compromised. The investigation was performed in accordance with state and local guidelines.

VI. LOCAL AGENCY REPRESENTATIVE DATA

Prepared by: Lane R. Davis	Title: Associate Engineer
Signature:	Date: 6-20-05
Approved by: James S. Crowley, P.E.	Title: Engineering Unit Manager
Signature: James S. Crowley	Date: 6-20-2005

This closure approval is based upon the available information and with the provision that the information provided to this agency was accurate and representative of site conditions.

MAP LEGEND

Area of Interest (AOI)

- Area of Interest (AOI)

Soils

- Soil Map Unit Polygons
- Soil Map Unit Lines
- Soil Map Unit Points

Special Point Features

- Blowout
- Borrow Pit
- Clay Spot
- Closed Depression
- Gravel Pit
- Gravelly Spot
- Landfill
- Lava Flow
- Marsh or swamp
- Mine or Quarry
- Miscellaneous Water
- Perennial Water
- Rock Outcrop
- Saline Spot
- Sandy Spot
- Severely Eroded Spot
- Sinkhole
- Slide or Slip
- Sodic Spot
- Spoil Area
- Stony Spot
- Very Stony Spot
- Wet Spot
- Other
- Special Line Features

Water Features

- Streams and Canals

Transportation

- Rails
- Interstate Highways
- US Routes
- Major Roads
- Local Roads

Background

- Aerial Photography

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Santa Clara Area, California, Western Part
Survey Area Data: Version 10, Sep 9, 2021

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Oct 31, 2020—Jun 15, 2021

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
115	Pits, mine	12.8	5.5%
131	Urban land-Elpaloalto complex, 0 to 2 percent slopes	82.1	35.1%
145	Urbanland-Hangerone complex, 0 to 2 percent slopes, drained	3.6	1.5%
180	Urbanland-Newpark complex, 0 to 2 percent slopes	117.6	50.4%
301	Montara sandy loam, 15 to 50 percent slopes	17.3	7.4%
Totals for Area of Interest		**233.5**	**100.0%**

APPENDIX H

QUALIFICATIONS

Adrian M. Angel– Associate Consultant

Education:

UC Santa Cruz, Earth Sciences, June 2004

Training/Licenses/Registrations:

Geologist-in-Training, California State Board of Geologists and Geophysicists
40 Hour Hazwoper Training

Summary of Professional Experience:

Mr. Angel has over 10 years of experience in the environmental sciences. His clients have included financial institutions, hospitals, regulatory agencies, and land developers. His broad experience includes the performance and completion of a myriad of Phase I Environmental Site Assessments, Phase II Subsurface/Site Characterization investigations, remedial action (such as soil excavations and soil vapor extraction), and case closure petitions. In addition, Mr. Angel has acted as a client-regulatory liaison to negotiate closure or redevelopment requirements for various residential and commercial/industrial sites throughout the South Bay of the San Francisco Bay Area.

Select project experience for Mr. Angel includes:

- **Property Redevelopment, Van Ness and Geary streets, San Francisco, California -** The property was formerly occupied by auto mechanic businesses and printing operations. Hazardous substances utilized on-site included petroleum hydrocarbons and chlorinated solvents. Mr. Angel managed site investigations, cleanup, and negotiated case closure and the authorization to construct a new multi-story hospital facility for Sutter Health.

- **Investigation and Cleanup, Alameda Naval Air Station, Alameda, California -** A former naval air station occupied the site from 1939 to 1993 which utilized large quantities of petroleum hydrocarbons and chlorinated solvents. In preparation for site redevelopment, Mr. Angel was involved in site investigations, cleanups, and regulatory case closure for many portions of the former naval air station.

- **Phase I ESA, Geary Street, San Francisco California -** Mr. Angel performed Phase I ESAs for a large portfolio of properties in preparation for site redevelopment for a land developer.

Megan Salcido – Senior Project Manager, Due Diligence

BA- Environmental Studies, Brown University, Providence, RI

EPA Accredited Asbestos Building Inspector

Mrs. Salcido has worked the environmental service industry since 2014. She provides senior project management and project review to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database Reviews, and Historical Records Reviews.

Project experience for Mrs. Salcido includes:

- Phase I Environmental Site Assessments
- Limited Environmental Site Assessments
- Environmental Transaction Screens
- Historical Records Review
- Records Research with Risk Assessments
- Regulatory Database Reviews
- ACM, Radon, LBP, and drinking water sampling

In addition, prior to joining the environmental consulting industry, Mrs. Salcido spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.

LIST OF COMMONLY USED ABBREVIATIONS

UNITS

µg/L	Micrograms per Liter	**pCi/L**	PicoCuries per Liter
mg/kg	Milligrams per Kilogram	**ppb**	Parts per Billion
mg/L	Milligrams per Liter	**ppm**	Parts per Million

ABBREVIATIONS AND ACRONYMS

ACM	Asbestos-Containing Material	**NESHAP**	National Emission Standards for Hazardous Air Pollutants
ADJ	Adjacent site	**NFA**	No Further Action
AEI	AEI Consultants	**NFRAP**	No Further Remedial Action Planned
AHERA	Asbestos Hazard Emergency Response Act	**NLR**	No Longer Reporting
APN	Assessor's Parcel Number	**NOV**	Notice of Violation
AST	Aboveground Storage Tank	**NPL**	National Priorities List
AUL	Activity and Use Limitation	**O&M**	Operations and Maintenance
bgs	Below Ground Surface	**OEC**	Other Environmental Considerations
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes	**OSHA**	Occupational Safety and Health Administration
CERCLA	Comprehensive Environmental Response Compensation and Liability Act	**PCB**	Polychlorinated Biphenyl
CERCLIS	Comprehensive Environmental Response Compensation and Liability Information System	**PCE, PERC**	Perchloroethylene, Tetrachloroethylene, Tetrachloroethene
CESQGs	Conditionally Exempt Small Quantity Generators	**RCRA**	Resource Conservation and Recovery Act
COC	Contaminant of Concern	**REC**	Recognized Environmental Condition
CREC	Controlled Recognized Environmental Condition	**RP**	Responsible Party
EC	Engineering Controls	**SDS**	Safety Data Sheet
EDR	Environmental Data Resources, Inc.	**SEMS**	Superfund Enterprise Management System
EPA	Environmental Protection Agency	**SF**	Square Footage/Square Feet
ERIS	Environmental Risk Information Services	**SP**	Subject Property
ERNS	Emergency Response Notification System	**SQG**	Small Quantity Generator
ESA	Environmental Site Assessment	**SWLF**	Solid Waste Landfill
GPR	Ground-Penetrating Radar	**SVOC**	Semi-Volatile Organic Compound
HREC	Historical Recognized Environmental Condition	**TCE**	Trichloroethylene, Trichloroethene
HVAC	Heating, Ventilation and Air Conditioning	**TPH**	Total Petroleum Hydrocarbons
HWS	Hazardous Waste Site	**TPHd**	Total Petroleum Hydrocarbons (diesel range)
IC	Institutional Controls	**TPHg**	Total Petroleum Hydrocarbons (gasoline range)
LBP	Lead-Based Paint	**TPHo**	Total Petroleum Hydrocarbons (oil range)
LCP	Lead-Containing Paint	**TRPH**	Total Recoverable Petroleum Hydrocarbons
LLP	Landowner Liability Protection	**TSDF**	Treatment, Storage, and Disposal Facility
LQG	Large Quantity Generator	**USDA**	United States Department of Agriculture
LUST	Leaking Underground Storage Tank	**USGS**	United States Geological Survey
MCL	Maximum Contaminant Level	**UST**	Underground Storage Tank
MTBE	Methyl Tertiary Butyl Ether	**VCP**	Voluntary Cleanup Program
ND	None Detected	**VOC**	Volatile Organic Compound
