VOC ..... volatile organic compound
WASTEWATER PITS ..... Oil Wastewater Pits Listing
WDR ..... Waste Discharge Requirements Listing
WDS ..... Waste Discharge System
WELL STIM PROJ ..... Well Stimulation Project
WIP ..... Well Installation Program
WMUDS/SWAT ..... Waste Management Unit Database System
WRD ..... Water Replenishment District of Southern California

EXECUTIVE SUMMARY

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed for the proposed Los Angeles County Metropolitan Transportation Authority's (Metro) C Line (Green) Extension to Torrance Project (Proposed Project). The ESA was performed in general conformance with the scope and limitations of ASTM International (ASTM) E1527-13 and in accordance with the Metro Rail Design Criteria ([MRDC] Metro, 2019a), Section 5.6.6 Hazardous Materials Investigation and Analysis.

A Proposed Project with two Options, between Redondo Beach (Marine) Station and 190th street, Trench Option and Hawthorne Option, is being studied as part of the Draft Environmental Impact Report (EIR) in pursuant to California Environmental Quality Act (CEQA). The Proposed Project includes aerial and at-grade configuration and follows the existing Metro-owned Harbor Subdivision right-of-way (Metro ROW). The Trench Option includes a trench/at-grade configuration along the Metro ROW. The Hawthorne Option includes an aerial configuration along I-405 and Hawthorne Boulevard. This report discusses the Proposed Project and Trench Option, as both follow the same alignment. The analysis for Hawthorne Option is discussed in a separate report.

The project area consists of an approximately 4.5-mile-long north-south corridor from the existing Metro C Line (Green) Redondo Beach (Marine) Station to the Torrance Transit Center (TC). The project area includes portions of the Cities of Lawndale, Redondo Beach, and Torrance. There are two stations planned for the Proposed Project and Trench Option at Redondo Beach TC and Torrance TC.

The ESA is intended to provide environmental input regarding the potential presence of hazardous substances (including petroleum products) in, on, or at the project alignment that have potential to impact project construction activities. Such sites would be considered recognized environmental conditions (RECs) based on the guidelines and procedures of ASTM E1527-13. Any exceptions to or deletions from this practice have been described in Section 1 and Section 10 of this report.

The Phase I ESA revealed evidence of RECs within and adjacent to the Proposed Project and Trench Option limits that should be addressed as part of a Phase II subsurface investigation (SI) or using specifications as summarized in Table ES-1.

Several parcels may be impacted to accommodate the Proposed Project and Trench Option. For the purpose of this report, parcels acquisitions for the Advanced Conceptual Engineering were reviewed and potential impacts were evaluated. If the proposed acquisition list is revised to add sites, then such sites must be re-evaluated. The review of publicly available online data suggested that some of the potentially affected parcels showed indicators of hazardous materials or petroleum products use. Parcel-specific ESAs to evaluate the presence or absence of hazardous materials are recommended for parcels (or portions thereof) that will be acquired as part of the Proposed Project and Trench Option.

Table ES-1. Summary of RECs Within and Adjacent to Proposed Project and Trench Option

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
1	Voi-Shan Aerospace, Inc. (former) 4001 Inglewood Avenue, Redondo Beach	Total Petroleum Hydrocarbons (TPH), Volatile Organic Compounds (VOC), Semi VOC, and metals	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for the contaminants of potential concern if the Proposed Project disturb groundwater along the Proposed Project and Trench Option alignment between Marine Avenue and Manhattan Beach Boulevard.
2	Merrell Paint Co., Inc. 15624 Inglewood Avenue, Lawndale	TPH, VOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils, up to depth of 15 feet below existing ground surface (bgs) or to proposed disturbance depth, whichever is lower, and groundwater for the contaminants of potential concern along the Proposed Project and Trench Option alignment between Manhattan Beach Boulevard and Inglewood Avenue. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II subsurface investigation (SI) is recommended to evaluate the existing conditions of subsurface contamination.
3	Westwood Building Materials, 15708 Inglewood Avenue, Lawndale	TPH, VOC	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils, up to depth of 15 feet bgs or to proposed disturbance depth, whichever is lower, and groundwater for the contaminants of potential concern along the Proposed Project and Trench Option alignment between Manhattan Beach Boulevard and Inglewood Avenue. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II SI is recommended to evaluate the existing conditions of subsurface contamination.
4	Tosco-76 Station #4817, 3601 Inglewood Avenue, Redondo Beach	TPH	Soil	Section 4.2	The site is not a REC to the Proposed Project. However, if the subject property will be acquired, then a site-specific investigation is recommended to determine the status of residual contamination onsite.
5	City of Lawndale Garage, 4722 W Manhattan Beach, Lawndale	TPH	Soil	Section 4.2	The site is not a REC to the Proposed Project. However, if the subject property will be acquired, then a site-specific investigation is recommended to determine the status of residual contamination onsite.

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
6	Union Carbide Corporation (UCC) 19500 Mariner Avenue, Torrance	TPH, VOC, SVOC, Dripolene, and metals.	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) for contaminants of potential concern along the Proposed Project alignment adjacent to the subject property.
7	North Posse Site 3041 Del Amo Boulevard, Torrance	TPH, VOC, SVOC, ACM, metals, and methane	Soil, Soil Vapor, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils, soil vapor, and groundwater (if disturbed) for the contaminants of potential concern along the Proposed Project alignment between Prairie Avenue and Del Amo Boulevard. In addition, it is recommended to identify the existing and abandoned oil pipelines in the subject property vicinity prior to construction.
8	Former Amp-Matrix Facility 355-455 Maple Avenue, Torrance	TPH, VOC	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for the contaminants of potential concern if the proposed construction results in groundwater disturbance along the Proposed Project alignment near the Torrance TC Station.
9	The DOW Chemical Company 305 Crenshaw Boulevard, Torrance	TPH, VOC, SVOC, and metals	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for the contaminants of potential concern if the proposed construction results in groundwater disturbance at the proposed Torrance TC Station.
10	Torrance/ Dowell Schlumberger, Inc 301 Crenshaw Boulevard, Torrance	TPH, VOC, SVOC, and metals	Soil	Section 4.2	A Phase II SI is recommended to evaluate soils up to the proposed depth of disturbance for the contaminants of potential concern along the northern portion of the proposed Torrance TC Station.
11	PPG Industries, Inc. 465 Crenshaw Boulevard, Torrance	TPH, VOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) at the proposed parking structure for the contaminants of potential concern. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II SI is recommended to evaluate the existing conditions of subsurface contamination.
12	Vought Aircraft Industries, Inc. 640 Alaska Avenue, Torrance	TPH, VOC	Soil	Section 4.2	A Phase II SI is recommended to evaluate soils, up to depth of 15 feet bgs or to proposed disturbance depth, whichever is lower for the contaminants of potential concern along the Proposed Project alignment adjacent to the proposed Torrance TC Station.

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
13	Exxon Mobil Oil Torrance Refinery, 3700 West 190 street, Torrance	TPH, VOC, SVOC, and metals	soil and groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) for the contaminants of potential concern along the Proposed Project alignment between Prairie Avenue and Del Amo Boulevard. In addition, it is recommended to identify the existing and abandoned oil pipelines in the area prior to construction.
--	Proposed Project and Trench Option ROW	Herbicides, Pesticides, Treated Wood Waste, TPH, Metals	Soil	Section 7.2	A Phase II SI is recommended to evaluate shallow soils for potential contaminants of concern along the Metro ROW.
--	Existing Bridges	Asbestos Containing Material (ACM), Lead- based Paint (LBP)	Existing Bridge Bearing Pads, Hinge and Joint Seal materials, Coatings, Graffiti	Sections 7.1 & 7.2	Prior to disturbance of the existing bridge structures, ACM and LBP surveys are recommended as part of a Phase II SI.
--	Proposed Acquisitions for Proposed Project and Trench Option construction	Hazardous Materials	Soil	Section 2.2	Parcel-specific Phase I ESAs are recommended to evaluate the presence or absence of hazardous materials for parcels (or portions thereof) that will be acquired as part of the Proposed Project and Trench Option.
--	Proposed Project and Trench Option ROW	Oil and gas pipelines	Soil	Section 5	It is recommended that where construction activities will disturb soil adjacent to the oil and gas pipelines, the soils be screened for hydrocarbon contamination prior to construction.
--	Proposed Project and Trench Option ROW	LBP, Chromium	Yellow Thermoplastic Striping	Section 7.2	Yellow Thermoplastic Striping materials should be handled in accordance with Caltrans Standard Specifications (Caltrans, 2018a) and the corresponding Standard Special Provisions (SSPs) (Caltrans, 2018c).
Note(s): Map ID numbers correspond to site numbers shown on Figure 4-1 through Figure 4-3.					

1. INTRODUCTION

1.1. REPORT PURPOSE

This Environmental Site Assessment (ESA) was performed in general conformance with the scope and limitations of ASTM International (ASTM) E1527-13 and in accordance with the Metro Rail Design Criteria ([MRDC] Metro, 2019a), Section 5.6.6 Hazardous Materials Investigation and Analysis.

The intent of this ESA is to evaluate the presence or likely presence of hazardous substances (including petroleum products) in, on, or at a site that has potential to impact project construction activities. The U.S. Environmental Protection Agency (EPA) All Appropriate Inquiry (AAI) was used as a basis of general procedures followed in preparation of this ESA but was not explicitly applied. The AAI references the ASTM Designation E1527, "Standard Practice for Environmental Project Site Assessments: Phase I Environmental Property Assessment Process," for conducting the AAI. The purpose of a Phase I ESA, according to ASTM, is to identify recognized environmental conditions (REC), controlled RECs (CREC), and historical RECs (HREC) with regard to a commercial real estate transaction of a specific parcel of land. Definitions for REC, CREC, and HREC are summarized, as follows, for ease of reference:

RECs are defined as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

A CREC is defined as a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls; ASTM, 2013).

An HREC is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls; ASTM, 2013).

In contrast to a Phase I ESA for a commercial real estate transaction, the purpose of this assessment was limited to the identification of significant potential impacts of hazardous substances during the construction of a transportation project. Because of the scale of transportation projects like the Proposed Project, it is often not possible or practical to conclusively determine the standard to which sites with documented past releases have been remediated. This limitation generally precludes Metro from distinguishing between REC, CREC, and HREC. Therefore, for the purpose of this assessment, only the REC classification was used for sites with known or suspected presence of hazardous materials that could impact the Project. Section 8 of this report summarizes any identified RECs that may be a potential environmental concern to the Project.

1.2. STUDY METHODOLOGY

The relevant findings of this study were obtained from a desktop review of readily available federal, state, and local references as well as other documents, with conclusions and recommendations based on these sources. No site reconnaissance was performed at the time of developing this report due to site access constraints. This study was not intended to represent an exhaustive examination of all the potential hazards that may have existed, but instead, was limited to identification of the significant potential impacts of hazardous substances during the construction of the Project.

In 2018, the Metro Board approved two alternatives recommended for further study in the Supplemental Alternatives Analysis Study. The Draft EIR evaluates the three alignments: Metro ROW Elevated/At-Grade alignment (approved for further study in 2018), Trench Option (included in Draft EIR based on community input), and Hawthorne Option (approved for further study in 2018). For the purposes of CEQA, Metro must define one of the three alignments as the Proposed Project. The Metro ROW Elevated/At-Grade Alignment is referred to as the Proposed Project in the Draft EIR and this document as it is alignment that has been studied and advanced over the years. This term does not convey any preference or recommendation. Metro staff will prepare a recommendation in Spring 2023 based on findings from the Draft EIR, public comments made during the comment period, technical analysis, stakeholder input, and other factors such as cost, ridership, and project objectives. This report discusses the Proposed Project and Trench Option together, as both follow same alignment along the Metro ROW. The analysis for the Hawthorne Option is discussed in a separate report.

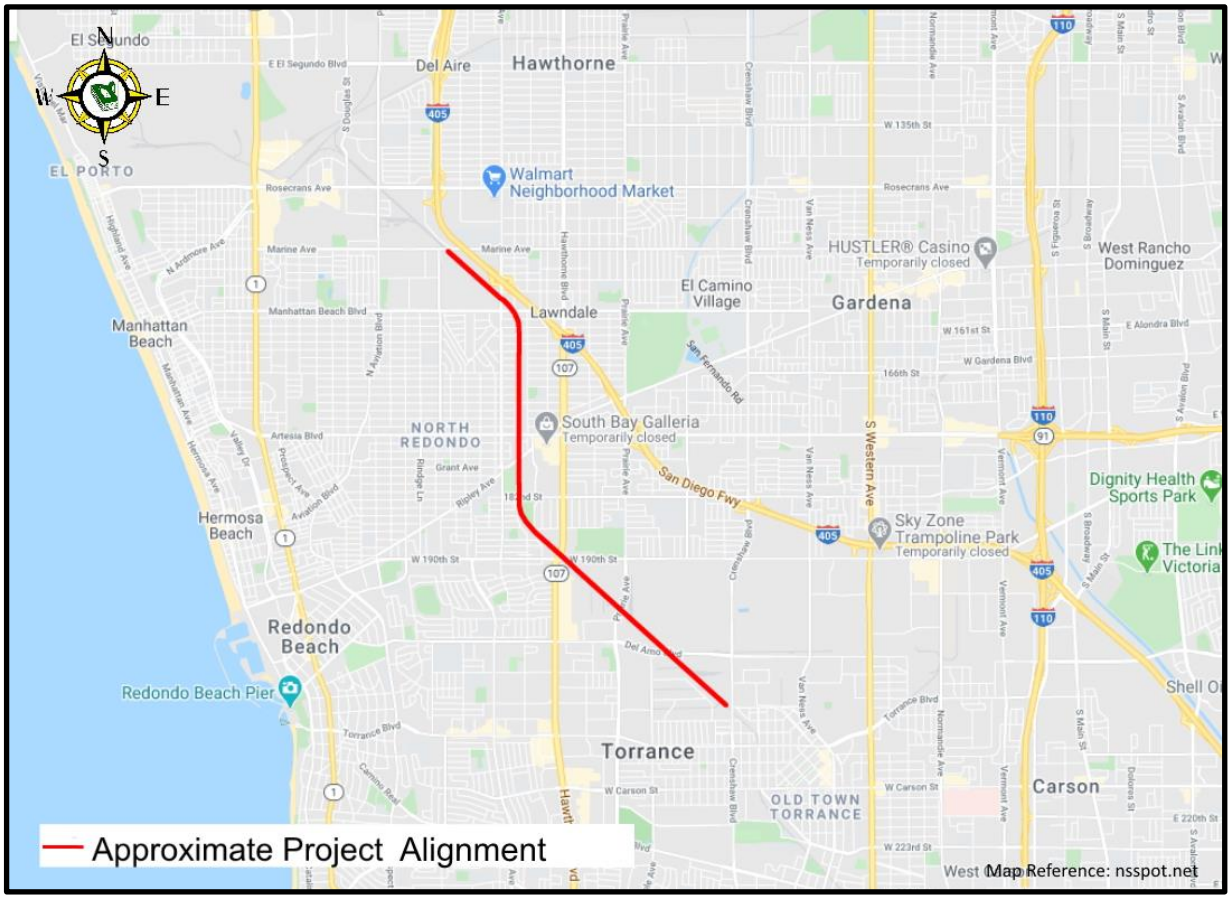
1.3. PROJECT LOCATION

The project area consists of an approximately 4.5-mile-long north-south corridor from existing Redondo Beach (Marine) Metro Green Line Station to the Torrance Transit Park and Ride Regional Terminal (referred to as the Torrance Transit Center (TC)) located in Los Angeles County, as shown in Figure 1-1. The project area includes portions of the Cities of Lawndale, Redondo Beach, and Torrance.

1.4. RESOURCE STUDY AREA

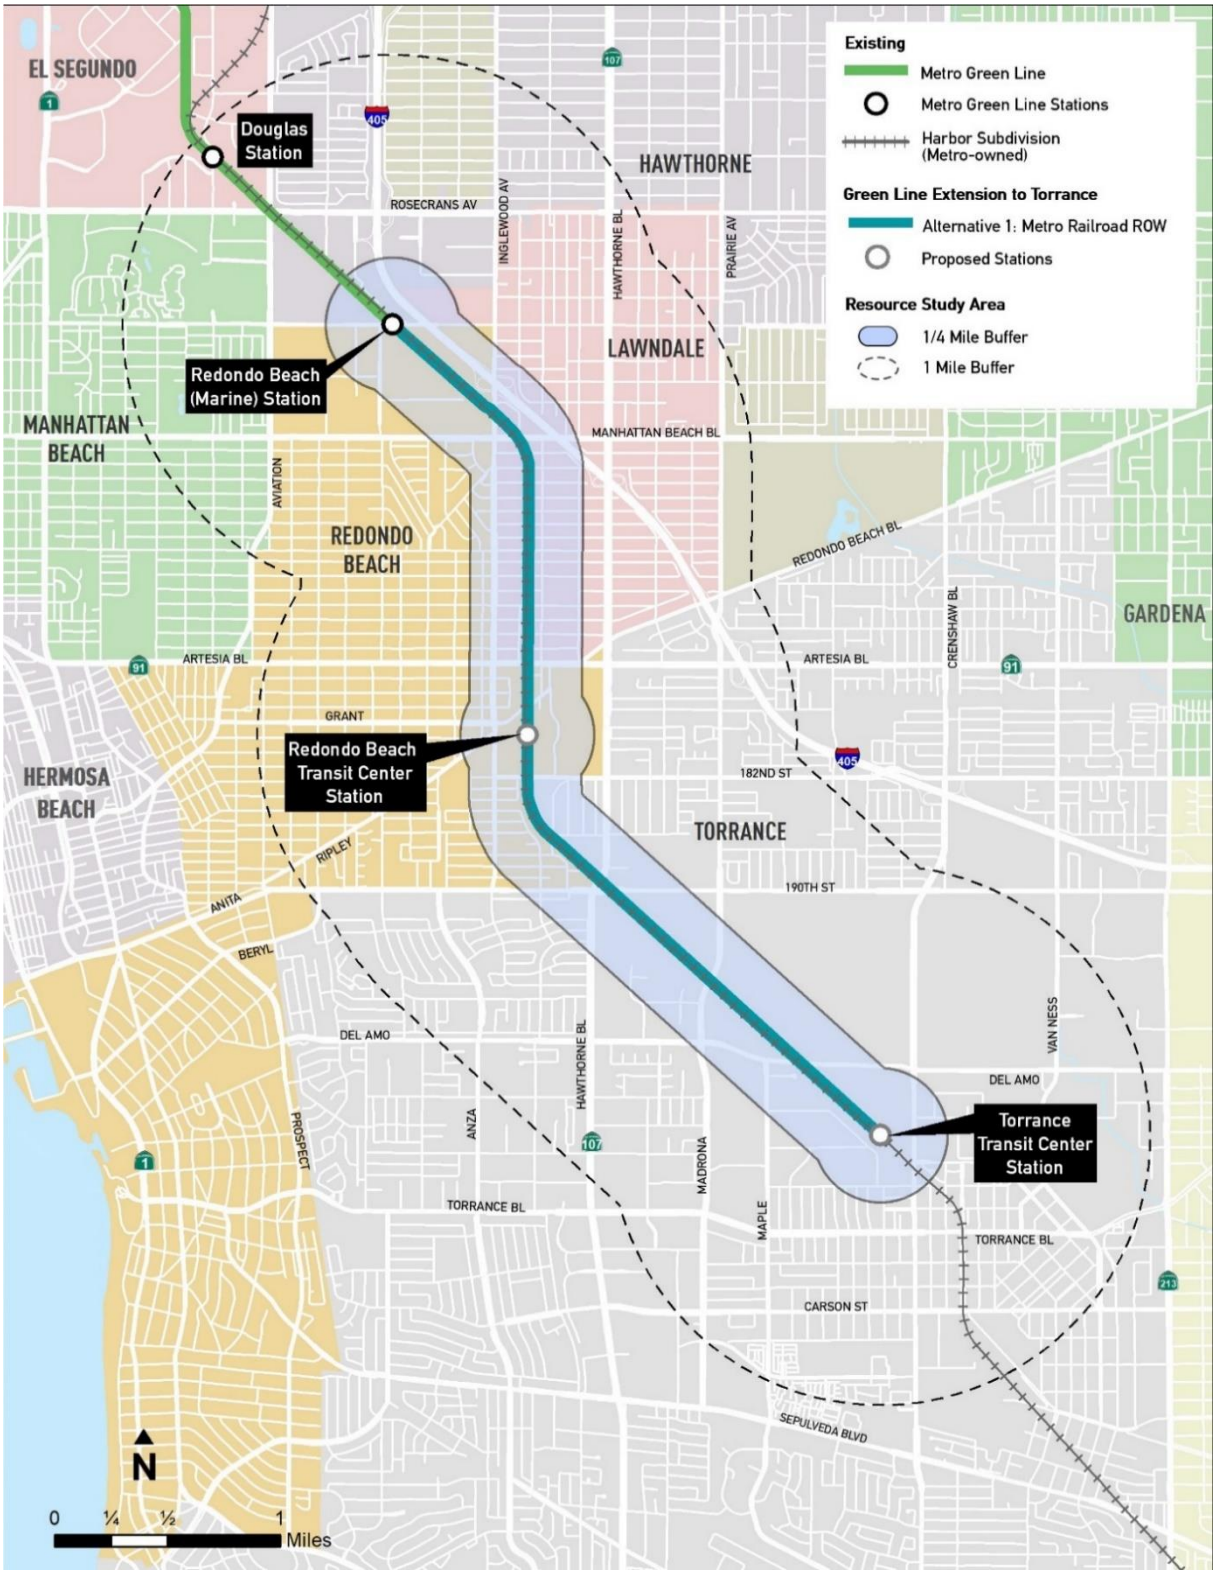
The Resource Study Area (RSA) for Hazards and Hazardous Materials varies from a quarter-mile to one-mile radius around the project footprint based on specific search distances in accordance with federal, state, and local environmental databases. (See Figure 1-2 for the RSA). The project footprint, also referred to as the ROW in this report, is defined as the area necessary to construct, operate, and maintain the Proposed Project.

Figure 1-1. Vicinity Map



Source: Google Maps, 2021

Figure 1-2. Proposed Project/ Trench Option – Hazards and Hazardous Materials Resource Study Area



Source: STV, 2020

1.5. PROJECT DESCRIPTION

The Proposed Project consists of a combination of at-grade and elevated structures. The alignment would follow the existing Metro ROW for the entire length of the Proposed Project. The Metro ROW is approximately 75 to 150 feet wide and varies in width along the 4.5 mile project corridor. In most areas, it is approximately 100 feet wide and typically can accommodate the construction of two new light rail tracks in addition to the existing freight tracks. Two stations are proposed: Redondo Beach Transit Center and Torrance Transit Center. The Proposed Project and Trench Option alignment overview is shown on Figure 1-3 and discussed in the following sub section.

1.5.1. Alignment

The existing Metro ROW is relatively wide (approximately 100 feet) in most areas along the project corridor. In the north part of the project area (between Manhattan Beach Blvd and Hawthorne Blvd), there is an existing freight track within the Metro ROW on which BNSF operates. South of 190th Street, there are multiple freight tracks to support BNSF operations, storage and staging, and spurs tracks. As part of the Proposed Project, existing freight tracks would be relocated in some areas to accommodate two new light rail tracks.

The Proposed Project would begin at the existing Redondo Beach (Marine) Station, where the existing tracks and station are aerial. The existing station platform is currently configured for two-car trains. In the future, as part of a separate project, Metro would extend the platform by 90 feet to support three-car train service.

The aerial alignment would travel within the existing Metro ROW, running parallel to and west of the existing freight tracks. Just west of Inglewood Avenue, the aerial alignment would cross over to the east side of the freight tracks within the existing Metro ROW. The existing freight track crossings at Inglewood Avenue and Manhattan Beach Boulevard would remain at-grade.

South of Manhattan Beach Boulevard, the aerial alignment would continue to follow the existing Metro ROW, crossing over 159th Street, 160th Street, 161st Street, and 162nd Street; these streets would remain open to traffic. The existing freight track crossings at these streets would remain at-grade.

The aerial alignment would return to at-grade near 166th Street and would run parallel to the existing freight tracks. The alignment would cross 170th Street at-grade, then would cross over Artesia Boulevard on a new bridge adjacent to the existing railroad bridge.

Continuing south, the alignment would cross Grant Avenue on a bridge adjacent to the existing railroad bridge. The freight tracks would be shifted west within the Metro ROW. A station would be located within the Metro ROW adjacent to the Redondo Beach TC. The alignment would then cross 182nd Street at-grade and then cross Hawthorne Boulevard and 190th Street on aerial structures adjacent to the existing railroad bridges over these roads.

South of 190th Street, existing freight tracks on the east side of the Metro ROW would be relocated, and the freight tracks on the west side of the railroad ROW would be shifted further west. The alignment would pass under the existing Prairie Avenue and Del Amo Boulevard roadway bridges. South of Del Amo Boulevard, the alignment would rise onto retained fill and an aerial structure would be needed to allow the freight track on the east side of the corridor to cross under the alignment, maintaining BNSF operations on the east. The alignment would continue south on a low retained fill structure and end at a

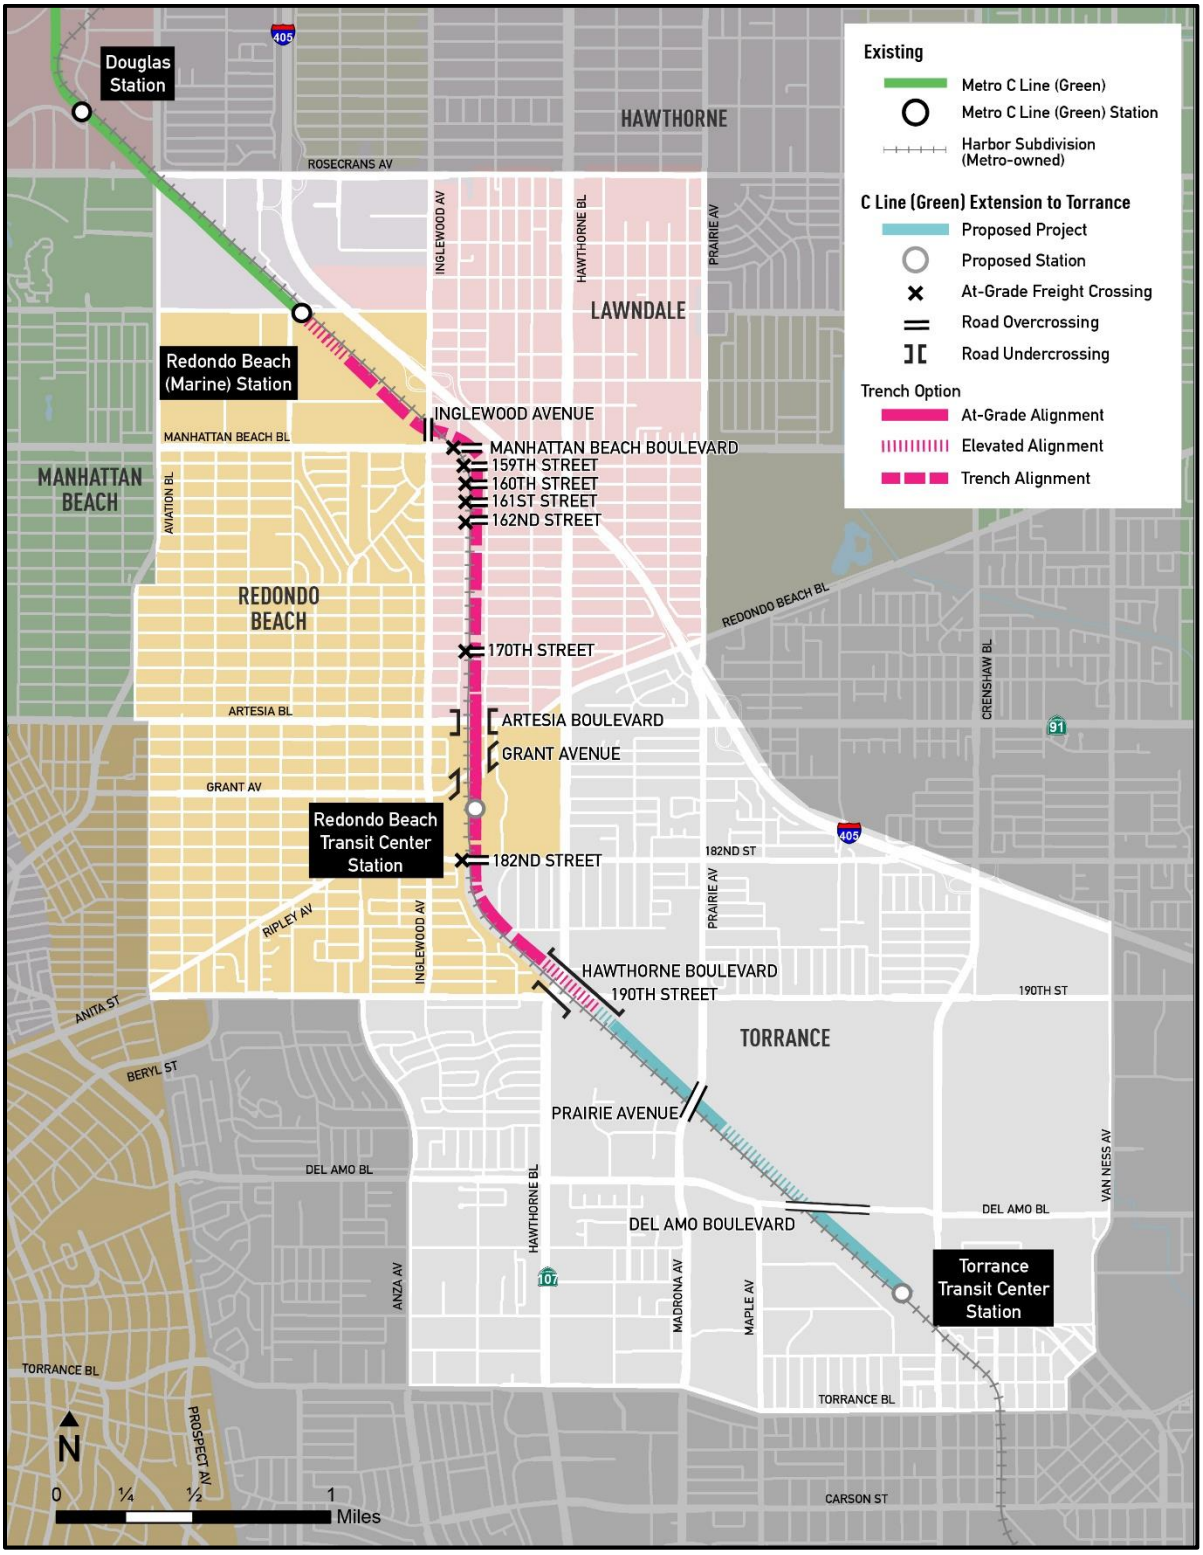
terminus station adjacent to the Torrance TC, just west of where the Metro ROW meets Crenshaw Boulevard.

The Trench Option would be similar to the Proposed Project except that after the tracks descend from aerial guideway south of the existing Redondo Beach (Marine) Station, they would continue into a below-ground trench passing under seven streets between Inglewood Avenue and 170th Street. The existing freight track would be realigned and travel at-grade as it does today. The trench would continue southwards on the east side of the existing rail corridor before ascending at 170th Street to reach existing ground level north of Artesia Blvd. South of Grant Ave, the light rail would descend into a short trench to cross under 182nd Street. South of 182nd Street, the Trench Option rises to street level and joins the Proposed Project alignment at around 190th Street. South of 190th Street, the alignment would be the same as the Proposed Project. The proposed station at the Redondo Beach Transit Center Station would be a lower elevation than the configuration for the Proposed Project. There will be eight OCs, two OHs, and four UCs planned for the Trench Option.

Figure 1-3. Proposed Project – Overview

Source: STV, 2022

Figure 1-4. Trench Option – Overview



Source: STV, 2022

1.5.2. Stations

The Proposed Project and Trench Option propose two new stations. The stations would follow Metro's Systemwide Station Design Criteria, and share common elements such as canopy design, signage, communications equipment, fare collection equipment, shelters, and safety and security systems. All the stations are proposed with a center-platform configuration, allowing passengers to access trains from either direction from the same platform. The station platforms would be capable of accommodating three-car trains and would allow level-boarding and full accessibility to comply with the Americans with Disabilities Act (ADA).

Metro station design guidelines allow elements of variability to respond to the character of the surrounding community and promote a sense of place, safety, and walkability. Further details about each station and the areas they serve are provided in this section.

Redondo Beach TC Station

The proposed aerial station would be located at the planned Redondo Beach TC (shown in Figure 1-3). The Redondo Beach TC would be located just south of the intersection of Grant Avenue and Kingsdale Avenue on the east side of the Metro ROW, south of the Target. The station would be accessible by a ramp and pedestrian pathways from the Redondo Beach TC parking and bus plaza. The Redondo Beach TC would be a regional hub for local and regional bus line, and include parking for Redondo Beach TC bus patrons, and a drop-off/pick-up area.

Torrance TC Station

The proposed at-grade station would serve the future Torrance TC, which is currently under construction. The Torrance TC itself will be located on the triangular parcel at the intersection of the Metro ROW and Crenshaw Boulevard. The station would be accessible by pedestrian pathways and crosswalks from the Redondo Beach TC bus plaza and parking areas. The Torrance TC will be a hub for local and regional bus lines and provide parking and a drop-off/pick-up area. A Metro surface parking lot would also be located at the Torrance TC.

1.5.3. Vehicles

Light rail vehicles on the Project would be designed for Automatic Train Operations and compatible with those currently used on existing Metro light rail lines. These vehicles are typically six-axle, double ended and articulated, and can be combined in trains up to three cars in length. The light rail would operate at speeds of up to 65 miles per hour and would carry approximately 200 seated passengers on a three-car train. The light rail vehicles would be configured with a driver's cab at either end so that the train could run in either direction without the need to turn around.

1.5.4. Supporting Facilities

Multiple additional elements are required to support light rail vehicle operations, including an overhead contact system (OCS), traction power substations (TPSS), and communications and signaling buildings.

- **OCS** – An OCS is a network of overhead wires that distributes electricity to light rail vehicles. The OCS poles would be approximately 25 feet tall, generally located between the two light rail tracks and spaced 90 to 170 feet apart. In some locations, the poles would be located on both sides of the tracks.

- **TPSS** – TPSS supply the electricity for light rail operations by receiving high voltage power from utility companies and converting the power to direct current for distribution to the light rail vehicles. The TPSS are enclosed structures that would be spaced approximately one mile apart along the alignment. Between four and six TPSS would be needed for each alternative, with access provided to each via maintenance roadways from the nearest public street.
- **Communications and Signaling Buildings** – Communications and signaling buildings house train control and communications equipment and would be located at each station as well as at each grade crossing. These facilities are typically constructed as enclosures either underneath the station platforms or as small standalone structures along the guideway.

1.6. SCOPE

The scope of this study is intended to identify hazardous materials/ waste information including methane gas to help Metro in selection of preferred alternative. The study area is generally limited to within the Proposed Project and Trench Option and consisted of the following:

- Conducting historical research related to the use, storage, disposal, or release of hazardous materials or petroleum hydrocarbons within the Project alignment based on property records, public records, and aerial photographs;
- Reviewing environmental databases and regulatory agency information available to the public for the Proposed Project and Trench Option alignment and adjoining properties;
- Performing a site reconnaissance (access not granted at the time of assessment); and
- Preparing this report with figures showing the REC sites.

Parcel-specific ESAs for parcels (or portions thereof) that will be acquired as part of the Proposed Project are not part of the scope of this ESA. This assessment did not include a lien and title search and meeting with regulatory agency staff and persons having knowledge and usage of proposed acquisition sites to characterize the past activities, which are typically tied to a specific parcel and therefore is recommended to be conducted, where necessary, during parcel-specific studies. The recommendations to gather additional data necessary to support the completion of the environmental clearance process is summarized in Table 8-1. The study is conducted following general guidelines of ASTM E1527-13 and the data gaps identified during the study are noted in Section 9 of this report.

1.7. PREVIOUS ASSESSMENTS

An ESA was previously prepared for the Proposed Project in an earlier stage of development in 2010 (DYA, 2010). The assessment evaluated four alternatives and was performed to help comply with California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) regulations. The previously considered project alignment was along the Metro ROW, extending from Century Boulevard in the north to Crenshaw Boulevard in the south. A portion of the previously studied alignment corresponds to the Proposed Project and Trench Option alignment that is being evaluated as part of this ESA. The findings of the previous ESA related to hazardous materials/wastes were reviewed, and, where applicable, are incorporated into this ESA.

2. SITE DESCRIPTION

2.1. EXISTING RIGHT-OF-WAY

The Proposed Project and Trench Option would begin at the existing Redondo Beach Marine Station and run south along the Metro ROW up to the Crenshaw Boulevard. The Proposed Project crosses the cities of Redondo Beach, Torrance, and Lawndale and is served by freeway and arterial roadway systems. I-405 runs north-south through the project area east of the Metro ROW, SR-91 bisects the project area in an east-west direction along Artesia Boulevard, and SR-107 (Hawthorne Boulevard) runs north-south through the project area in the Cities of Lawndale and Torrance. Major arterial roadways in the project area are generally located one mile apart and include the following:

East-West

- Manhattan Beach Boulevard
- Artesia Boulevard
- 190th Street
- Del Amo Boulevard
- Torrance Boulevard

North-South

- Inglewood Avenue
- Grant Avenue
- Hawthorne Boulevard
- Prairie Avenue
- Crenshaw Boulevard

2.2. POTENTIAL RIGHT-OF-WAY ACQUISITIONS

Multiple parcel acquisitions are anticipated to accommodate Proposed Project and Trench Option. The list of parcel acquisitions was not available at the time of the assessment; however, for the purpose of this report, parcels acquisitions for Metro ROW alternative based on the Draft Environmental Impact Statement/ Environmental Impact Report (Metro, 2014) were reviewed and potential impacts were evaluated. If the proposed acquisition list is revised to add sites, then such sites must be reevaluated.

A preliminary review of publicly available online databases suggested that some of the potentially affected parcels showed indicators of hazardous materials or petroleum products use. Parcel-specific Phase I ESAs are not part of the scope of this ESA and are recommended to evaluate the presence or absence of hazardous materials for parcels (or portions thereof) that will be acquired as part of the Proposed Project and Trench Option.

2.3. ADJACENT LAND USE

Based on our review of existing available aerial maps (EDR, 2020b), the project corridor is in a highly urbanized area with a mix of residential neighborhoods; educational facilities; recreational, commercial, industrial, community centers; transportation corridor; and other urban uses. See Table 2-1 for adjacent land use summary.

Table 2-1. Adjacent Land Use Summary

Extent	Adjacent Land Usage	
	East	West
Redondo Beach TC to Manhattan Beach Boulevard	Freeway running parallel to the project alignment, educational facility, hotels, retail businesses, and residential units.	Primarily Industrial facilities including Northrop Grumman Aerospace systems, Commercial retail, and wholesale business.
Manhattan Beach Boulevard to 190th Street	Residential units with a few retail businesses on the northern and southern portions including auto repair shops.	Primarily residential with a few retail businesses and a cemetery northwest of the intersection of Metro ROW and 182nd street.
190th Street to Torrance TC	Heavy industrial area with large warehouses, storage units, oil refineries, and chemical plants. At the proposed Torrance TC, the land is currently undeveloped. Multiple above ground storage tanks are present in the southern portion for the project that are part of chemical plants and oil refineries.	Moderate to heavy industrial developments including auto shop, manufacturing plants, retail businesses, oil refineries. There appears to be an undeveloped vacant land between Prairie Avenue and Del Ammo Boulevard which appeared to be portion of former Dominguez reservoir.

2.4. GEOLOGY

The Proposed Project lies within the Los Angeles Coastal Plain on western portions of the Torrance Plain and eastern portions of the El Segundo Sand Hills near the northwestern boundary of the Peninsular Ranges Geomorphic Province of California. The Los Angeles Coastal Plain is within the Los Angeles Basin, a broad structural depression bounded by the Santa Monica Mountains and Puente Hills to the north, and the Santa Ana Mountains and San Joaquin Hills to the east.

The local geology under the project alignment consists of Quaternary deposits that are composed of the 1,400-foot-thick, lower Pleistocene-aged San Pedro Formation; the 1,000-foot-thick upper Pleistocene-aged Lakewood formation and older sand dunes; and approximately 300 feet of Holocene-aged alluvium capped by a 60-foot-thick veneer of aeolian deposits of the El Segundo sand dunes (California Department of Water Resources, 1961). The Quaternary deposits are underlain by Tertiary marine sedimentary rock.

The San Pedro Formation is primarily stiff clay and silt with interbeds of sand and gravel. The Lakewood Formation is dense to very dense sand, clayey sand, silty sand interbedded with very stiff to hard silty to sandy clay and clayey silt. The El Segundo sand dunes are primarily composed of medium dense to very dense, medium- to coarse-grained sand with some silt and silty sand (California Geological Survey, 1998a-c).

2.5. TOPOGRAPHY

The US Geological Service (USGS) 7.5-minute quadrangles, Redondo Beach, Venice, Inglewood, and Torrance, California are provided in Appendix C. Along the northern extent of the Project from approximately Marine Avenue to approximately 1,000 feet south of Manhattan Beach Boulevard, the topography is relatively flat with an approximate maximum grade of 0.5 percent to the east. From approximately 1,000 feet south of Manhattan Beach Boulevard to the southern end of the project area near Crenshaw Boulevard, the topography near the alignment consisted of sand dune mounds that range from 200 to 2,000 feet across and 10 to 50 feet high. The ground surface elevation varied from approximately 60 feet to 125 feet above mean sea level (MSL).

2.6. HYDROLOGY

Groundwater data available from the County of Los Angeles Department of Public Works (LADPW) groundwater monitoring wells, California Department of Water Resources (DWR, 2004), Metropolitan Water District of Southern California (MWD, 2007), Water Replenishment District of Southern California (WRD, 2008), boring logs in the project vicinity (Caltrans, 1957, 1959, 1960a-d, 1961a-b, 1989, 1990, 1995; DYA, 2000a, 2000b, 2001), and the historical high groundwater level presented in the California Geological Survey (CGS) seismic hazard zone report were reviewed.

The Proposed Project lies entirely over the West Coast Groundwater Basin, an 800- to 2,000-foot-thick aquifer composed of up to approximately 200 feet of alluvium, 300 feet of the Lakewood Formation, and 1,000 feet of the San Pedro Formation (MWD, 2007). The Charnock and Newport- Inglewood faults act as partial groundwater barriers on the eastern side of the basin, and the Pacific Ocean forms the western boundary. Groundwater within the basin is generally confined, with an unconfined Holocene and Pleistocene-aged semi perched aquifer near the surface with a maximum thickness of 60 feet (DWR, 2004; MWD, 2007). Groundwater contour maps show groundwater elevations of the confined aquifer under the project alignment to be approximately 5 to 10 feet below MSL, which corresponds to

approximately 105 to 110 feet bgs (WRD, 2008). Generally, the groundwater flows from west to east because of a sea water intrusion injection barrier near the coast and a pumping depression inland (MWD, 2007).

The historically highest groundwater levels along the project area range from approximately 30 feet to 50 feet bgs (CGS, 1998 a, b). Based on data from review of environmental subsurface investigations described in Section 4.2, the depth to shallow groundwater generally ranges from approximately 20 to 30 feet bgs beneath the northern portion down to 60 to 80 feet bgs beneath the southern portion. The gradient direction of shallow groundwater varies locally.

3. HISTORICAL LAND USE

The objective of consulting historical sources is to develop a history of previous uses along Proposed Project and Trench Option and adjoining sites to assist in identifying the likelihood of past uses having led to RECs in connection with the subject property (ASTM, 2013). For this ESA, historical topographic maps, aerial photographs, and Sanborn reports were reviewed to help evaluate the historical land usage. The findings of our review of each of the historical sources are presented in Sections 3.1 through 3.4, and a historical land usage summary is presented in Section 3.5.

3.1. HISTORICAL TOPOGRAPHIC MAPS

The USGS Topographic Maps listed in Table 3-1 were used to assess the land use and topographic history of the project area and surrounding areas.

Table 3-1. Historical Topographic Maps

Quadrangle	Map Year	Scale
Redondo	1896	1:62,500
Torrance, Inglewood	1924	1:24,000
Inglewood	1930	1:24,000
Inglewood	1934	1:24,000
Torrance	1934	1:20,000
Torrance	1941	1:24,000
Redondo	1948	1:50,000
Inglewood, Venice	1950	1:24,000
Redondo Beach, Torrance	1951	1:24,000
Inglewood	1952	1:24,000
Redondo Beach	1963	1:24,000
Inglewood, Torrance, Venice	1964	1:24,000
Redondo Beach, Inglewood, Venice, Torrance	1972	1:24,000
Redondo Beach, Inglewood, Venice, Torrance	1981	1:24,000
Redondo Beach, Inglewood, Venice, Torrance	2012	1:24,000

The mapped sections of the historical USGS topographic maps reviewed for this ESA were obtained from Environmental Data Resources, Inc. (EDR; 2020a). Copies of the representative historical topographic maps are provided in Appendix B. A summary of the land use and topographic history presented in the historical topographic maps for the Proposed Project and Trench Option alignment is presented below.

1896: Land adjacent to the Proposed Project and Trench Option ROW was largely undeveloped. The Proposed Project and Trench Option ROW is shown in a flat alluvial plain. The Redondo railway crossed the Proposed Project and Trench Option ROW approximately three quarters of a mile south of the current alignment of Redondo Beach Boulevard. Topographic features of note consist of low hills to the southwest of the Proposed Project and Trench Option ROW. The surface gradient generally descended towards the northwest.

1924: Sparse rural residential development along the Proposed Project and Trench Option ROW had increased compared to the topography maps from 1896, especially in the portion of the Proposed Project and Trench Option ROW that extends from the current alignment of Inglewood Avenue to approximately one-half mile south of the Pacific Electric railway alignment. Hawthorne Boulevard had been constructed to the current alignment of 190th Street, including a newly constructed line of the Pacific Electric Railway. The old Redondo Railway had been renamed the Pacific Electric Railway. Two lines of the Pacific Electric Railway converge approximately 0.25 miles west of the Metro ROW at the intersection of the Proposed Project ROW and 182nd Street. South of 190th Street, the land around the Proposed Project and Trench Option ROW remained largely undeveloped, except for the Dominguez Reservoir, which is located approximately 0.25 miles southwest of the Proposed Project and Trench Option ROW in the City of Torrance, and for the Pacific Electric car shops within the City of Torrance. Site topography remained largely unchanged from the 1896 map. Sparse development was observed along the Proposed Project and Trench Option alignment, with the exception of the El Nido development, which is located east of the intersection of the Proposed Project and the Pacific Electric railway.

1930, 1934: Railroad tracks were first shown in 1930, 1934 topo map along the current alignment of Metro ROW. Site topography remained largely unchanged from the 1924 map. Residential development along the Proposed Project and Trench Option alignment between Inglewood Avenue and 190th Street significantly increased from the 1924 map which appeared to be primarily for residential buildings. Along the stretch of the Proposed Project and Trench Option alignment from Inglewood Avenue to 190th Street, land usage was largely residential and commercial. South of 190th Street, the Proposed Project alignment converged with the newly constructed Atchison, Topeka, and Santa Fe railway tracks that run from the Proposed Project's northern terminus in Redondo beach to Inglewood Avenue, and to 190th Street to the southern terminus in Torrance. Additionally, approximately seventeen above ground storage tanks belonging to the General Petroleum Tank Farm were observed approximately ½-mile northeast of the southern terminus of the Proposed Project alignment in Torrance.

1941: Residential land development along the Proposed Project and Trench Option alignment generally continued to increase, especially residential development between Inglewood Avenue and 190th Street. Site topography remained largely unchanged from the 1930 to 1934 maps. Site topography remained largely unchanged from the 1930-1934 maps.

1948: Residential development along the Proposed Project and Trench Option alignment increased significantly between Inglewood Avenue and Redondo Beach Boulevard. Both sides of the Proposed Project and Trench Option alignment are shaded for urban development from Manhattan Beach Boulevard to Redondo Beach Boulevard. Riverside Boulevard had now changed its name to Redondo Beach Boulevard. Development of oil well field was noted within half a mile northeast of the Proposed Project and Trench Option alignment at the northern terminus of the Proposed Project and Trench Option, as well as in between 190th Street and the Proposed Project's southern terminus in the City of Torrance. Site topography remained largely unchanged from the 1941 maps.

1950 - 1952: Some new development along the Proposed Project and Trench Option ROW between Redondo Beach Boulevard and 190th Street was noted, but not as extensive as the development north of Redondo Beach Boulevard. New oil wells, oil tanks, and oil sumps were noted as close as 0.3 miles to the northeast of the project alignment at the northern terminus of the Proposed Project. A significant increase in oil production facilities adjacent to the Proposed Project ROW was noted northeast of the Proposed Project and Trench Option ROW between 190th Street and the Proposed Project's southern

terminus in the city of Torrance. A new oil refinery facility was constructed adjacent to the Proposed Project ROW along an approximately 0.8-mile long stretch of the existing Atchison, Topeka, and Santa Fe (ATSF) rail lines. The newly constructed oil refinery facility included new refinery structures and oil tanks, some of which were located immediately adjacent to the Proposed Project ROW. Additionally, the oil tank farm located constructed approximately 0.6 miles northeast of the Proposed Project ROW near the southern terminus of the Proposed Project alignment was noted to have double the number of tanks as first noted in the 1934 map. Site topography remained largely unchanged from the 1948 maps.

1963 - 1964: Land development increased significantly along the Proposed Project and Trench Option ROW, including residential, commercial, industrial, and transportation infrastructure development. The San Diego Freeway (i.e., Interstate 405) had been constructed since the 1950-1952 maps were prepared. New industrial development is depicted west-to-northwest of the northern terminus of the Proposed Project and Trench Option alignment. Lawndale high school had been constructed approximately 0.25 miles northwest of the Proposed Project and Trench Option alignment at the northern terminus, adjacent to the oil wells that had been constructed in that location in the 1950-1952 maps. The Proposed Project and Trench Option ROW alignment is roughly adjacent to Interstate 405 from the Proposed Project's northern terminus to Hawthorne Boulevard. The South Bay Shopping center had been constructed between Artesia Boulevard and Edison Street east of the Proposed Project and Trench Option ROW. South of 190th Street, oil refinery infrastructure north-east of the Proposed Project ROW had greatly increased, with numerous tanks and structures located adjacent to and within 0.5-miles of the existing ATSF railway tracks. Industrial development was added west of the Proposed Project ROW near the southern terminus. Site topography remained largely unchanged from the 1950-1952 maps except for the South Bay Shopping Center, which had been graded to a level grade.

1972: Land usage increased slightly along the Proposed Project and Trench Option ROW compared to the 1963-1964 maps. Additional new commercial and industrial development increased adjacent to the Proposed Project and Trench Option alignment from the Proposed Project's northern terminus to Inglewood Avenue. The previously noted oil wells adjacent to Lawndale High School had been removed prior to the development of the 1972 map. Some new industrial and commercial development was observed adjacent to the Proposed Project and Trench Option ROW between Redondo Beach Boulevard and 190th Street. South of 190th Street, few new structures had been added within the oil refinery northeast of the Proposed Project ROW. However, new commercial and industrial buildings adjacent to the Proposed Project ROW located southwest of the existing ATSF rail line had been constructed.

1981: Site topography remained largely unchanged from the 1972 maps with some new commercial development adjacent to the Proposed Project and Trench Option alignment between the Proposed Project's northern terminus and current day Inglewood Avenue. Prairie Avenue had been newly constructed south of 190th Street and now intersects with the Proposed Project alignment south of 190th Street. More new commercial buildings had been constructed within the City of Torrance southwest of the Proposed Project and Trench Option ROW terminus.

2012: Site topography remained relatively unchanged from the 1981 map. Display of structures was not available in the 2012 maps, therefore the extent to which new development had proceeded is difficult to assess. The alignment of the previously noted ATSF railway line had been removed prior to the production of the 2012 map.

3.2. HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs obtained from EDR (2020b) were reviewed for the Proposed Project and Trench Option corridor land use history. The dates, scale, and source of the photos reviewed are shown in Table 3-2.

Table 3-2. Historical Aerial Photographs

Flight Year	Scale	Source
2016, 2012, 2009, 2005	1” = 875’, 1” = 1125’	USDA/NAIP
2002	1” = 875’, 1” = 1125’	USDA
1994	1” = 875’, 1” = 1125’	USGS/DOQQ
1985, 1989	1” = 875’, 1” = 1125’	USDA, USGS
1983	1” = 875’, 1” = 1125’	EDR Proprietary Brewster Pacific
1980	1” = 875’	USGS
1979	1” = 875’, 1” = 1125’	EDR Proprietary Brewster Pacific
1977	1” = 1125’	EDR Proprietary Brewster Pacific
1976	1” = 875’	Teledyne
1970	1” = 875’	EDR Proprietary Brewster Pacific
1963	1” = 875’, 1” = 1125’	USGS
1954, 1952	1” = 875’, 1” = 1125’	USDA
1947	1” = 875’, 1” = 1125’	FAIR
1938	1” = 875’, 1” = 1125’	USDA
1928	1” = 875’, 1” = 1125’	FAIR

EDR = Environmental Data Resources, Inc.
USDA = U.S. Department of Agriculture
USGS = U.S. Geological Survey
DOQQ = Digital Orthophoto Quarter Quads
NAIP = National Agriculture Imagery Program

Copies of the historical aerial photographs reviewed for this ESA are provided in Appendix B, and a summary of the land use history presented in the historical aerial photographs of the Proposed Project and Trench Option ROW is presented below.

1928: The Proposed Project and Trench Option ROW generally coincides with the alignment of the ATSF line between the Proposed Project’s northern terminus and the intersection of the Proposed Project and Trench Option ROW with Inglewood Avenue. Land usage between the Proposed Project’s northern terminus and Inglewood Avenue was largely agricultural, with little evidence of land development. Land development adjacent to the Proposed Project and Trench Option ROW between Inglewood Avenue and Hawthorne Avenue (now Hawthorne Boulevard) consisted of scattered residential development and agriculture. Limited residential development was visible adjacent to Proposed Project and Trench Option ROW along the newly built (ATSF) rail line. At-grade crossings were observed along the existing ATSF rail line at Manhattan Beach Boulevard, 159th through 162nd Street, 170th Street, Artesia Boulevard, and Ridley Avenue/Redondo Beach Boulevard. South of Redondo Beach Boulevard and 190th Street, land development was primarily agricultural. Aerial photography of the Proposed Project ROW south of 190th

Street was largely not available at the time the 1928 aerial photographs were taken, though existing aerial photography shows largely agricultural land as the Proposed Project ROW converges with the ATSF railway line south of 190th Street.

1938: Development from the Proposed Project's northern terminus to Inglewood Avenue remained largely unchanged, with much of the land use staying largely agricultural. Residential development along the Proposed Project and Trench Option ROW between Inglewood Avenue and The Pacific Electric Railway (i.e. the current alignment of Redondo Beach Boulevard) appears to have increased, with less land use dedicated to agriculture. South of the Pacific Electric Railway line (i.e. the current alignment of Redondo Beach Boulevard), land development was largely agricultural, with the exception of the small residential community of El Nido, located immediately east of the Proposed Project and Trench Option ROW between the current alignment of 182nd and 186th Street. South of 190th Street, land use remained largely agricultural, with the exception of a series of oil tanks and a small oil refinery located as close as 0.1 miles north-east of the existing ATSF railway line. The Dominguez Reservoir located approximately 0.25 miles southwest of the Proposed Project ROW, had been constructed and appears to be unlined open to the atmosphere. Along Proposed Project ROW, a grade separation appears to have been constructed at the intersection of the ATSF rail line and Artesia Boulevard, with the rail line overcrossing Artesia Boulevard.

1947: Land development between the Proposed Project's northern terminus and Inglewood Avenue largely unchanged from that of 1947 map. Residential land usage adjacent to the Proposed Project and Trench Option ROW between Inglewood Avenue and Redondo Beach Boulevard had greatly increased, with very little evidence of remaining agricultural land. South of 190th Street, land use adjacent to the Proposed Project and Trench Option ROW was largely agricultural and industrial. Development of oil refining and storage facilities northeast of the Proposed Project ROW along the existing ATSF railway line had significantly expanded compared to the 1934 aerial photographs, with new facilities located adjacent to the railway tracks along a 0.8 mile stretch of the Proposed Project ROW between Del Amo Boulevard and 190th Street. The Dominguez Reservoir appears to have been lined with concrete sometime after the 1938 photographs were taken. South of Del Amo Boulevard, Land use appears to be largely agricultural until the Proposed Project's southern terminus in the City of Torrance.

1952: Land usage from the Proposed Project's northern terminus to Inglewood Avenue still appears to be primarily agricultural. Residential development significantly increased adjacent to the ATSF line between Inglewood Avenue and Redondo Beach Boulevard. With some new residential development, land use between Redondo Beach Boulevard and 190th Street was largely agricultural. South of 190th Street oil refinery and development infrastructure greatly increased compared to the 1947 set of aerial photographs.

1954: Aerial photography along the Proposed Project and Trench Option ROW from the Proposed Project's northern terminus to Manhattan Beach Boulevard was unavailable for this set of aerial photographs. Residential development along the Proposed Project and Trench Option alignment from Manhattan Beach Boulevard to 190th Street continued to increase, with most of the new residential development occurring in the area of the Proposed Project and Trench Option alignment between Redondo Beach Boulevard and 190th Street. The oil refinery and storage facilities south of 190th Street continued to expand, with a large increase in new facilities located along the far eastern edge of the oil refinery site along Crenshaw Boulevard. New industrial or commercial development was observed adjacent to the east side of the Proposed Project ROW south of Del Amo Boulevard in the vicinity of the Proposed Project's southern terminus in the City of Torrance.

1963: Active construction of the San Diego Freeway (currently Interstate 405) was observed adjacent to the Proposed Project and Trench Option ROW between the Proposed Project's northern terminus and Hawthorne Boulevard. No further development of the oil refining and storage facilities northeast of the Proposed Project and Trench Option ROW was noted. Industrial development and construction appears in progress south of the Proposed Project and Trench Option ROW from the Proposed Project's northern terminus to Inglewood Avenue. Residential and commercial development adjacent to the Proposed Project and Trench Option ROW between Inglewood Avenue and Redondo Beach Boulevard has continued to expand and appears to be largely complete at the time these aerial photographs was taken. The South Bay Shopping Center, a mall located adjacent to the Proposed Project ROW south of Artesia Boulevard, had finished construction and consisted of a large retail structure and extensive parking.

Residential, commercial, and industrial development appeared to significantly increase along the Proposed Project ROW between Artesia Boulevard and 190th Street. New development included large retail developments east of the existing railway tracks, a new cemetery and two new schools were observed west of the existing rail line. Land development adjacent to the Proposed Project ROW south of 190th Street continued to expand, primarily with new Industrial and commercial development located adjacent to the Proposed Project ROW southwest of the existing ATSF line in the City of Torrance.

1970: New industrial and commercial development adjacent to the Proposed Project and Trench Option ROW increased southwest of the project alignment between the Proposed Project's northern terminus and Inglewood Avenue had been completed since the 1963 photographs were taken. Construction of Interstate 405 had been completed since the 1963 photographs were taken. Residential and commercial development adjacent to the Proposed Project and Trench Option ROW between Inglewood Avenue and Redondo Beach Boulevard appears to have largely ceased, except for scattered isolated new structures. Land along the west side of the existing ATSF railway was observed to be cleared and graded between 170th Street and Artesia Boulevard.

1976: No aerial photography was available along the Proposed Project and Trench Option alignment north of 190th Street for this year. South of 190th Street, industrial and commercial development adjacent to the Proposed Project and Trench Option ROW increased significantly. The park and baseball diamond located approximately a quarter mile south of the intersection of the Proposed Project ROW and 190th Street had been replaced with new industrial and distribution facilities. Construction of Prairie Avenue from 190th Street southward had been completed, with the intersection of Prairie Avenue overcrossing the Proposed Project ROW along the ATSF line. Some of the oil refinery and storage facilities northwest of the Proposed Project ROW between 190th Street and Del Amo Boulevard had been dismantled when compared to the 1963 photos; however, most of the tanks adjacent to the Proposed Project ROW remained. Development of commercial facilities immediately south of the Proposed Project ROW between Prairie Avenue and the Proposed Project's southern terminus had significantly increased between 1963 and 1976.

1977: No aerial photography was available along the Proposed Project and Trench Option alignment between Interstate 405 and Prairie Avenue. Land usage between Interstate 405 and 190th Street did not change significantly when compared to the 1970 photographs, with the exception of isolated new buildings.

1979: New industrial and commercial development adjacent to the Proposed Project and Trench Option ROW between the Proposed Project's northern terminus and Inglewood Avenue had been constructed. A miniature golf course had been constructed adjacent to the project terminus between the Proposed Project alignment and Interstate 405, replacing a former industrial lot. Land usage along the Proposed Project and Trench Option ROW between Interstate 405 and 190th Street remained largely unchanged from the 1970 and 1977 aerial photographs. No aerial photography was available south of 190th Street.

1980: Land usage remained largely unchanged along the Proposed Project and Trench Option ROW between 190th Street and the Proposed Project's southern terminus in the City of Torrance. No aerial photography was available along the Proposed Project and Trench Option ROW between the Proposed Project's northern terminus and 190th Street.

1983: Land usage along the Proposed Project and Trench Option ROW remained largely unchanged. New industrial and commercial development south of the Proposed Project and Trench Option ROW between the Proposed Project's northern terminus and Inglewood Avenue had been constructed. Little new development was observed along the Proposed Project and Trench Option ROW between Inglewood Avenue and Prairie Avenue. Aerial photography along the Proposed Project alignment was not available south of Prairie Avenue.

1985: New residential construction was observed to have appeared along the land that had been previously cleared between 170th Street and Artesia Boulevard in the 1970 photographs.

1989: Land usage along the Proposed Project and Trench Option ROW remained largely unchanged. The Redondo Torrance Mini Storage had been constructed along the Proposed Project and Trench Option ROW at the intersection of the Proposed Project ROW and Inglewood Avenue. The South Bay Shopping Center appears to have undergone expansion when compared to the previous sets of photographs. Development of industrial and commercial facilities south of 190th Street appears to have expanded, including an expansion of the oil refining and storage facilities adjacent to the Proposed Project and Trench Option ROW between Prairie Avenue and Del Amo Boulevard. One feature to note is that the Dominguez Reservoir seems to have been either buried or filled in, as new industrial facilities appear to have replaced the site of the Dominguez Reservoir. Industrial and commercial facilities adjacent to the Proposed Project are located immediately southwest of the ROW between 190th Street and Prairie Avenue, and additionally between Del Amo Boulevard and the Proposed Project's southern terminus in the City of Torrance.

1994: Land usage along the Proposed Project and Trench Option ROW remained largely unchanged between the 1989 aerial photographs and the 1994 aerial photographs. New construction of industrial developments adjacent to the Proposed Project ROW between 190th Street and Prairie Avenue had been completed southwest of the existing rail line.

2002: Land usage along the Proposed Project and Trench Option ROW remained largely unchanged compared to the 1994 aerial photography set. Little new development appeared along the Proposed Project and Trench Option ROW, with the exception of new isolated individual buildings.

2005: Land usage along the Proposed Project and Trench Option ROW remained largely unchanged compared to the 2002 aerial photography set. Little new development appeared along the Proposed Project and Trench Option ROW, with the exception of new isolated individual buildings.

2009: Land usage along the Proposed Project and Trench Option ROW remained largely unchanged compared to the 2005 aerial photography set. Little new development appeared along the Proposed Project and Trench Option ROW, with the exception of new isolated individual buildings.

2012: Land usage along the Proposed Project and Trench Option ROW remained largely unchanged compared to the 2009 aerial photography set. Little new development appeared along the Proposed Project and Trench Option ROW, with the exception of new isolated individual buildings. The South Bay Shopping Center appears to have expanded slightly compared to the 2009 aerial photography set.

2016: Land usage along the Proposed Project and Trench Option ROW remained largely unchanged compared to the 2012 aerial photography set. Little new development appeared along the Proposed Project and Trench Option ROW, with the exception of new isolated individual buildings.

3.3. HISTORICAL SANBORN MAPS

A search of historical Sanborn library fire insurance maps covering the Proposed Project and Trench Option alignment was conducted by EDR (2020c) to evaluate the overall historical Proposed Project and Trench Option land use. Sanborn maps were not identified for the Proposed Project and Trench Option alignment. The copies of historical certified Sanborn Map reports provided by EDR are presented in Appendix D.

3.4. HISTORICAL CITY DIRECTORIES

City directory reports are used as a screening tool to identify potential environmental concerns within the Proposed Project and Trench Option from past land-use activities. The complete results of the city directory search are presented in Appendix E. Detailed discussion of city directory review was not considered practical or pertinent to the objectives of this assessment and is therefore not provided in this report. Historical environmental concerns were considered adequately researched for the purposes of this report.

3.5. HISTORICAL LAND USE SUMMARY

The Proposed Project and Trench Option alignment appears to have been a railroad ROW since at least 1930s with the area adjacent to the project alignment being largely undeveloped fields at that time. From the 1920s, the area northwest of the Proposed Project and Trench Option in El Segundo was developed into oil facilities by Standard Oil Company along with oil well activities in the general area. The Pacific Electric railroad activities were observed on the southern terminus of the Proposed Project and Trench Option, adjacent to proposed Torrance Transit Center. In the late 1920s, the current ExxonMobil refinery started to develop, along with oil well activity in the general area. In 1930s, oil facilities near the southern end of the Proposed Project increased. In 1940s and 1950s, the area northeast of the current day Redondo Beach Station was used by Oil companies. In the 1960s, I-405 was constructed and the area east and west of the northern portion of the Proposed Project and Trench Option Alignment was developed into commercial and industrial areas. The South Bay Shopping Center was also developed in the 1960s. In 1970s the area between 190th Street and Crenshaw Boulevard was developed into heavy industrial area. Otherwise, both sides of the central portion of the Proposed Project and Trench Option alignment between Manhattan Beach Boulevard and 190th Street was developed for current residential use with gradually increasing density from the 1920s through the 1970s.

Potential sources of hazardous materials that could impact the Proposed Project and Trench Option identified during our review of historical topographic maps, historical aerial photographs, and historical Sanborn maps were generally limited to the following:

> Potential hazardous substances associated with the properties within and adjoining the railroad ROW;

> Potential presence of hydrocarbon contamination at location that were or have been used as oil refining or distribution facilities in the vicinity of the Proposed Project and Trench Option ROW.

> Potential asbestos-containing materials (ACM) and lead-based paint (LBP) in structures within the Proposed Project and Trench Option ROW built prior to 1989; and

> Potential presence of aerially deposited lead (ADL) within unpaved soils adjacent to Proposed Project and Trench Option ROW.

Conclusions and recommendations regarding the hazardous substances are presented in Section 8 and Table 8-1.

4. RECORDS REVIEW

4.1. ENVIRONMENTAL DATABASE REVIEW

The purpose of the environmental database review is to obtain and review public records to identify RECs that might impact Proposed Project and Trench Option activities during construction. The records were reviewed to obtain environment-related information and the history of activities within the project corridor or adjoining properties that could impact the Proposed Project and Trench Option. The database information for facilities listed by regulatory agencies as potential environmental concerns was obtained through EDR in April 2020 and is presented in Appendix F. Due to the length of the project corridor, the study area was geographically divided into three continuous segments to obtain EDR records search to facilitate the assessment, evaluation, and organization of the large volume of data generated. However, for this report, the data is presented in its entirety for the approximately 4.5-mile project corridor.

A general search radius of one mile beyond the Proposed Project and Trench Option footprint was specified for EDR's use in identifying nearby sites registered under hazardous materials/wastes databases that could potentially impact the project activities. EDR-generated sites were reviewed within the standard search distance for each environmental database specified by ASTM D1527-13 that pertains to the objective of this assessment, which was to evaluate the potential impacts of hazardous substances that might be encountered in the soil and/or groundwater during the construction of the project improvements. The ASTM search distance for each environmental database is presented in Table 4-1 The sites identified as RECs based on our review of the available records are summarized in Section 4.2.

The information obtained for the review is gathered in a corridor format with environmental database records collected along the alignment with a general search radius of one mile beyond the Proposed Project and Trench Option alignment. Due to the length of the project corridor, the study area was geographically divided into three linear segments to facilitate the assessment, evaluation, and organization of the large volume of data generated for the project corridor. However, for this report the data is presented in its entirety for the approximately 4.5-mile project corridor.

4.2. RECOGNIZED ENVIRONMENTAL CONDITIONS

Upon review of environmental database records, sites that are potential RECs were identified based a on preliminary, first-pass, review. Such sites were evaluated in depth to determine the extent of past release(s) at a site, remedial actions completed/ongoing, and the status of the site condition and potential to impact the Proposed Project (See Appendix J for details). This review process is used to determine RECs that are discussed in Table 4-2 and the approximate locations of the REC sites are shown on Figure 4-1 through Figure 4-4.

Table 4-2. Summary of RECs

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
1	Voi-Shan Aerospace, Inc. (former)	4001 Inglewood Avenue, Redondo Beach	875 feet, north	ENVIROSTOR, HIST CORTESE, RCRA-LQG, CPS-SLIC, CERS HAZ WASTE, SWEEPS UST, HIST UST, CA FID UST, LUST	This site is a former Voi-Shan Aerospace Fastener manufacturing facility, constructed in 1970 and occupied until 1991. The 8-acre site was redeveloped as commercial property in 1993. Depth to shallow groundwater is approximately 25 to 30 feet bgs and estimated to be flowing northwest, which is generally parallel to the Proposed Project. (Waterstone, 2018.) Deep groundwater zone is encountered at 175 to 200 feet bgs and estimated to be flowing easterly, in opposite direction to the shallow zone. (Waterstone, 2019.) Site assessment began in 1986 when a leaking underground solvent storage tank was removed. Site cleanup was initiated in 1992. Previous assessments identified that the groundwater beneath the site was contaminated with VOCs including 1,1,1 trichloroethane (TCA), trichloroethene (TCE), 1,2-dichloroethane (DCE) and PCE. Source removal was performed in 1993 where more than 6,000 cubic feet of contaminated soil was removed from the site (Envirosolve, 2008). Removal of contaminated soil was verified by performing confirmation sampling for total petroleum hydrocarbons (TPH), volatile organic compounds (VOC), and metals. Remediation actions including soil vapor extraction and groundwater pump-and-treat was conducted from 1992 to 1996 and again from 2011 to 2008 Groundwater contamination plume was shown to be generally following the shallow groundwater direction. (Waterstone, 2018.) Currently, groundwater monitoring is underway to verify whether groundwater contamination is naturally attenuating or will require additional active remediation. In 2022, RWQCB determined that the VOC concentrations in the groundwater have increased from 2020 and have remained high during the past two monitoring events. (RWQCB 2022a.) RWQCB recommended that a pilot test be performed for in situ treatment of groundwater and to investigate offsite groundwater quality. Further remediation and installation of two offsite wells on parcels southwest of I-405 to identify extent of the groundwater contamination plume is underway (Waterstone, 2022). Based on the site history, existing groundwater contamination, and proximity to the Proposed Project, groundwater extracted adjacent to the former Voi Shan facility should be tested.

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
2	Merrell Paint Co., Inc.	15624 Inglewood Avenue, Lawndale	150 feet, north	CPS-SLIC, HWTS, HAZNET, CERS, HIST UST, LUST, HIST CORTESE, SWEEPS UST, CA FID UST	This site is currently occupied by Eyedeal Interiors and being used as a warehouse/storage of flooring materials. The site was used as a paint storage facility from at least the 1970s until the late 1990s. Site investigation conducted in 1989 indicated the presence of hydrocarbon contamination in soil, likely released into the subsurface from a 4000-gallon UST that was used to store paint thinner (GCI, 1989). No records are available to determine the quantity of release. UST was removed from the site in 1988. Subsequent investigations identified TPH in the groundwater samples and about 3 feet thick light non-aqueous phase liquid in onsite monitoring well MW-1. In October 1989, three groundwater monitoring wells were installed to remove any free product and to monitor the contamination levels. Initial testing indicated dissolved concentrations of TPH as gasoline, PCE, TCE were detected at a maximum concentration of 8,470 micrograms per liter (µg/L), 46300 µg/L, and 41,200 µg/L, respectively. A study conducted by others indicated that chlorinated solvents have historically not been identified as having been used or stored at the site and that the contamination is likely from an offsite source (AEI, 2020). The most recent groundwater samples collected at approximately 25 feet bgs from onsite monitoring wells in April 2021 (AEI, 2021) yielded a maximum concentration of TPH, PCE and TCE of 140 µg/L, 130 µg/L and 140 µg/L. Sampling from upgradient offsite groundwater monitoring wells indicated concertation of TPH, PCE and TCE of 27µg/L, 100 µg/L, and 120 µg/L. The concentrations of PCE and TCE slightly exceed the drinking water maximum contaminant level of 5µg/L; however, there has been a substantial decrease in the contamination concentrations over the decades. RWQCB (2022b) indicated that historical remediation at the site and apparent attenuation over the past three decades has resulted in the cleanup or abatement of the waste and there are no contaminants remaining in soil that pose a threat to the groundwater. Residual contamination in soil and soil vapor are well below the standards to cause significant threat to the public or the environment. Cleanup to background levels is not technologically and economically feasible due to site conditions and remedial technologies. Therefore, RWQCB issued no further requirements for onsite soil contamination and a covenant and environmental restrictions limiting the site use to commercial applications. Groundwater

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
					contamination beneath the site will still be continued to be addressed under RWQCB oversight (RWQCB, 2022b). Based on the site history, existing groundwater contamination, and proximity to the Proposed Project, groundwater extracted during project construction between Inglewood Avenue and Manhattan Beach Boulevard should be tested for TPH and VOCs prior to handling.
3	Westwood Building Materials	15708 Inglewood Avenue, Lawndale	Adjacent, south	LUST, CORTESE, HIST CORTESE, HIST UST, SWEEPS UST, CERS TANKS, HWTS, LUST, UST	This site is currently occupied by Westwood Building Materials and used for a construction material supply warehouse with its own fueling system, for onsite equipment and delivery trucks. The fueling system consists of a 10,000-gallon diesel UST, 2,000-gallon gasoline UST, fuel dispenser and product piping. Groundwater at the site is estimated to range from approximately 18 to 25 feet bgs with variable flow direction. Based on the recent field data, the net groundwater flow direction is easterly, and also flows to the northeast and southeast (AGE, 2019) which is towards the project footprint. The site had release associated with the UST located near the southwest portion of the property and was previously investigated by the RWQCB. RWQCB issued case closure for the site on July 15, 1998, with residual soil contamination in place. In January 2004, during a product piping upgrade, soil contamination associated with hydrocarbon release was identified. The case was reopened by RWQCB on August 25, 2009. Active remediation has not been conducted at the site. Subsequent assessments revealed that hydrocarbon contamination was detected in soil and groundwater samples and recommended the need for further assessment of the unassessed areas on site. (AGE, 2018). Five groundwater monitoring wells have been installed in 2018. According to groundwater data, residual hydrocarbon contamination appeared to be stable and shown decreasing. Historical maximum concentrations were 36,000 µ/L TPHg, 8,630 µg/L TPHd, 14.2 µg/L benzene, 1,230 µg/L ethylbenzene, 380 µg/L naphthalene, and 13.6 µg/L MTBE. Current maximums are 5,950 µg/L TPHg, 9.7 µg/L benzene, 405 µg/L ethylbenzene, 148 µg/L naphthalene, and 4.7 µg/L MTBE. (RWQCB, 2021.) In 2022, RWQCB issued a case closure status based on the fact that the residual contamination is not an immediate threat to the drinking water source. (RWQCB,

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
					2022c.) Following the directive from RWQCB, onsite monitoring wells were decommissioned (AGE, 2022). Residual petroleum hydrocarbons in soil and groundwater could pose a risk to construction worker or environment during future construction or land redevelopment activities. (RWQCB, 2022c.) Responsible parties, landowners, and contractors performing subsurface activities at the site should be prepared to encounter soil, groundwater, and soil vapor contaminated with petroleum hydrocarbons. Therefore, groundwater extracted during project construction between Inglewood Avenue and Manhattan Beach Boulevard should be tested for TPH and VOCs prior to handling.
4	Tosco-76 Station #4817	3601 Inglewood Avenue, Redondo Beach	350 feet, south	LUST, HIST CORTESE	The site is currently an active Shell gas station with registered USTs in place and formerly operated by 76 service station with two 12,000-gallon gasoline USTs. Groundwater at the site is approximately 22 feet bgs and estimated to flow northwest, parallel to the project footprint. Historical release at the site led to soil and groundwater contamination. Approximately 20 tons of contaminated soils were removed in 1998 and 300 pounds of hydrocarbon vapor were extracted. Subsequent remedial actions reduced the contamination levels to below maximum contaminant levels. The RWQCB issued a case closure in 2012 with residual onsite contamination in place considering it is a low threat to groundwater. (RWQCB, 2012.) Residual contamination is considered a low threat to groundwater, but a portion of the subject site would be acquired for the Proposed Project. Therefore, a limited Phase II SI is recommended to test for TPH to determine the status of residual contamination on site.

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
5	City of Lawndale Garage	4722 West Manhattan Beach, Lawndale	205 feet, west	SWEEPS UST	This site currently operates as a maintenance yard and previously contained one 550-gallon and two 10,000-gallon USTs. Groundwater is encountered at approximately 20 feet bgs and estimated to flow northeast. Records indicated past release of hydrocarbon contamination at the site leading to subsurface contamination. The UST system was removed from the site. Approximately 32 tons of impacted soil from on site was excavated and disposed of off-site. Subsequent investigations determined that the contamination levels in soils on site were below the acceptable contamination levels (Ninyo & Moore, 2019). Therefore, RWQCB issued a closure to the past hydrocarbon release case at the subject site. (RWQCB, 2019.)
6	Union Carbide Corporation (UCC)	19500 Mariner Avenue, Torrance	Adjacent, south	ENVIROSTOR, UST, VCP, CERS HAZ WASTE, SWEEPS UST, HIST CORTESE, DRYCLEANERS, HIST UST, CHMIRS, HWTS	The former, approximately 100 acres, UCC facility was built in 1956 for polyethylene manufacturing. The site also included an ethylene glycol blending, canning, and distribution operation; and a chemical and plastics receiving and distribution operation. The glycol production unit was demolished in 1969. 40 acres were sold for the Old Towne Mall and K-Mart complex. The remaining facility operated until 1982, when the manufacturing operations were discontinued and much of the facility was decommissioned, sold, and redeveloped. In 2008, the terminal operations were shut down except for storage of raw materials supplied to the UCC latex production facility. In the past, the facility was also used for on-site disposal, and/or discharge to county sewer lines, which resulted in soils and groundwater contamination. The surface water and sediment in the bottom of the stormwater retention basin on-site is considered a media of concern. The potential contaminants of concern include the components of dripolene, VOCs, TPH, and metals. Numerous investigations and remedial actions have been conducted since 1970s (Montgomery Watson, 2000). The facility is zoned for industrial use and is surrounded by industrial and commercial properties including Mobil oil refinery, paint manufacturers/ distributors, coolants, compressed air facilities. The site's northeastern border is adjacent to the Proposed Project. Perched groundwater at the site was encountered at approximately 55 feet bgs and the deeper aquifer at 90 feet bgs. The current,

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
					approximately 37-acre facility operating as UCC Torrance Distribution Facility is a terminal and distribution center (URS, 2010). Ethylene glycol is now brought in by rail or truck and distribution continues. The facility consists of old and new bulk terminals, a distilled spirits plant, a concrete-lined stormwater detention basin, and the heil separator. The facility also includes bulk storage, transfer, and blending of chemicals. The site has 56 ASTs, as well as 8 USTs that are currently used to store chemical products on site. One aboveground storage tank located near the eastern boundary of the facility is used to store wastewater collected from the heil separator. DTSC has indicated that portion of the subject site (Areas 1 and 2 as designated in remedial action plan), adjacent to the Proposed Project ROW were impacted with Dense Nonaqueous Phase Liquids (DNAPL) and benzene in perched groundwater and are currently under institution controls and ongoing remediation (DTSC 2022a, b).
7	North Posse Site	3041 Del Amo Boulevard, Torrance	Adjacent west	CPS-SLIC, CERS	This site consists of approximately 31 acres of predominantly undeveloped land with horse stables located on approximately 1.2 acres in the southeastern portion of the property. Historically, the site was an out-parcel ancillary to the Torrance Oil refinery located at the 3700 W 190th Street. The property was used as a borrow pit for construction of berms at the refinery site. Oil pipelines were observed on and adjacent to the property. (SCS, 2022). No oil production/processing activities were conducted on the site; however, the northwest portion of the site was used for disposal of refinery wastes between the 1940s and 1960s. Several investigations at the site confirmed that this disposal area has been contaminated with TPH, SVOCs, VOCs, ACM, and metals above regulatory screening levels. It is also indicated that the soil vapor has elevated concentrations of methane and VOCs, possibly from the groundwater contamination from potential off-site source located northeasterly to the site (SCS, 2018). Groundwater at the site is approximately 70 feet bgs and flows generally in a southwesterly direction. The site has numerous groundwater monitoring wells associated with the refinery present on the property primarily around the perimeter (SCS, 2018). In 2022, a workplan was prepared by SCS Engineers for additional assessment at the site

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
					(SCS, 2022). The facility is part of the oil refinery clean up and abatement program under the remedial action plan under the California Land Reuse and Revitalization Act. Therefore, the soil adjacent to this site should be tested for TPH, VOCs, metals, and asbestos.
8	Former Amp-Matrix Facility	355-455 Maple Avenue, Torrance	600 feet south	LUST, UST, HIST UST, SWEEPS UST, CA FID UST, SLIC	This site was formerly owned by Matrix Science Corporation, which operated a manufacturing facility to produce electronic connectors between 1968 and 1988 on six contiguous parcels. The site was acquired by AMP, Inc., in 1998 and continued similar operations until the facility was bought by the current user, Tyco Electronics Corporation. Past site use had resulted in subsurface contamination at the site. Groundwater at the site is estimated to be at approximately 105 feet bgs and flowing south-southeast. Several phases of subsurface investigation and remedial actions related to VOCs have been conducted at the site, including contaminated soil removal, soil vapor extraction, and on-site and off-site groundwater monitoring. The offsite groundwater monitoring wells were installed as part of an interim remedial action plan and monitoring of those wells is ongoing under the oversight of RWQCB (Clark, 2020).
9	The DOW Chemical Company	305 Crenshaw Boulevard, Torrance	Adjacent, north	ENVIROSTOR, HIST UST, ICE, HWP, SEMS-ARCHIVE, CORRACTS	The name on the EnviroStor website indicates that this site is owned by Hydro Chem Industrial Services, Inc. It is noted that the facility has never been regulated as a TSDF facility and so was administratively closed. (DTSC, 2020). Due to insufficient data, it is unclear whether the site has been subject to any release of hazardous materials in the past. However, the site location shown on Geo Tracker corresponds to the former DOW Chemical Company located at 301 Crenshaw Boulevard. Based on the review of historical aerial photographs, it appears that the location of these two sites is shown as one facility. Therefore, the findings corresponding to the 301 Crenshaw site applies to this location.

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
10	Hydrochem Industrial Services/ Dowell Schlumberger, Inc.	301 Crenshaw Boulevard, Torrance	Adjacent, south	SEMS-ARCHIVE, CORRACTS, RCRA-TSDF, RCRA-LQG, ENVIROSTOR, LUST, CERS HAZ WASTE, DRYCLEANERS, HIST CORTESE	The former DOW chemical facility operates on about 52 acres. The site was listed multiple times in the DTSC records. DOW began manufacturing polystyrenes, epoxy resins, and Styrofoam since 1953. When the facility was open, hazardous wastes were generated, stored, and handled on the site. All operations at the facility were closed, however, around 2015. The improper use of hazardous material resulted in the contamination of subsurface soils and groundwater. Several assessment and corrective actions were conducted at the site since at least 2002. The site is currently operated by Americas Styrenics to manufacture polystyrene plastics. The preparers of this Draft EIR found no online records showing the corrective actions reports. However, the DTSC site history summary on EnviroStor online page indicates that the final RCRA facility investigation report was approved in June of 2019, and the owner or operator has consented to conducting corrective action measures at the site. The site is currently being monitored for active groundwater contamination.
11	PPG Industries, Inc.	465 Crenshaw Boulevard, Torrance	Adjacent, north	ENVIROSTOR, LUST, VCP, HIST UST, DEED, DRYCLEANERS, CERS, CORRACTS, RCRA-TSDF, RAATS UST	This site is located at the Torrance TC adjacent to the Proposed Project alignment. Portion of this site will be used for proposed surface parking lot. Between 1950 and 2000, aqueous and solvent-based paint coatings and resins were manufactured at the site. In 2000, the manufacturing facility was demolished. Groundwater at the site is approximately 85 feet bgs and flows east (RWQCB, 2008). In 1999, a 2,000-gallon UST was removed from the site. During the UST removal, TPH and VOC contamination were discovered in the soil. Subsequent assessment determined that the groundwater was also contaminated. Extensive subsurface investigations and remediation actions, including soil removal, soil vapor extraction, and groundwater pump and treat were conducted in the late 1990s. Additional investigations conducted in 2007 and 2008 indicated residual contamination in the groundwater. In 2009, soil remediation activities were conducted, and a subsequent human health risk assessment (HHRA) was conducted to assess potential human health risks to on-site workers and possible vapor intrusion risk due to residual contaminants. The HHRA determined that the residual contaminants were not considered a risk to on-site workers or occupants; however, the risk levels exceeded residential standards. As a result, DTSC requested a land use covenant restricting the land use near the site to

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
					commercial/industrial use. DTSC issued a remedial action completion in 2010 indicating the remedial efforts were completed (Ardent, 2015). In 2015, the City of Torrance adopted a mitigated negative declaration and approved the construction and operation of the Torrance TC (City of Torrance, 2015).
12	Vought Aircraft Industries, Inc.	640 Alaska Avenue, Torrance	Adjacent, south	ENVIROSTOR	This site, which is located south of the Torrance TC, currently operates as a Triumph manufacturing facility. The facility was formerly owned and operated by Northrop Grumman Corporation (NGC) from 1968 until 2000 when it was purchased by Vought Aircraft Industries, Inc. The facility and was used by NGC to manufacture aluminum skins for Boeing 737 aircrafts. The facility was a large-quantity generator of hazardous waste and maintained a RCRA-permit until it was closed under DTSC regulations in 1992. As a part of a corrective action program for the site, DTSC has identified 10 solid waste management units (SMU) and 6 areas of concern (AOC) to evaluate. DTSC assessed that all of SMUs and AOCs were adequately characterized, and no further investigation was deemed necessary except for two areas (AOC 3 and AOC 5) where elevated concentrations of VOCs and TPH were identified in soil (DTSC, 2005). Several investigations have been completed at the facility to assess subsurface contamination beneath the site. It is also indicated that off-site sources located northwest of the site may be a contributing source of deep soil vapor at the site. Records indicate that soil vapor extraction and monitoring are still in progress (Arcadis, 2019).
13	Exxon Mobil Oil Torrance Refinery	3700 West 190 street, Torrance	Adjacent, east	ENVIROSTOR, VCP, CPS-SLIC, HIST UST, SEMS-ARCHIVE, CORRACTS, RCRA-TSDF, RCRA-LQG, CERS HAZ WASTE, CERS TANKS, US FIN ASSUR, 2020 COR ACTION,	The Exxon Mobil Oil Torrance refinery occupies approximately 700 acres on the east of the existing railroad tracks bounded by 190th Street on the north, Van Ness Avenue on the east, Del Amo Boulevard on the south, and Prairie Avenue on the west. In addition, the refinery owned an approximate 29-acre triangular piece of land on the west of the Proposed Project alignment between Prairie Avenue and Del Amo Boulevard, also referred to as North Posse Site (Refer Map ID#12). The site has been used as an oil refinery since at least the 1950s. Exxon Mobil owned the site until it was transferred to Torrance Refining Company in 2016. Past activities at the site resulted in hydrocarbon contamination to the soil and groundwater beneath the site. Groundwater was encountered at approximately 70 feet bgs, and perched groundwater was reportedly present at approximately 25 and 80 feet bgs with variable flow influenced by the stratigraphy of the lower-

Map ID[1]	Site Name	Site Address	Distance to Project Alignment (In Feet)	Database Listing(s)	Discussion
				TRIS, ICIS, FTTS, US AIRS	permeability perching layers (AECOM, 2020a). The contamination appeared to have migrated off site to the southeast and southwest, from beneath the project footprint, based on the figures shown on a study conducted by others. (AECOM, 2020a). Numerous assessments and remediation actions have been conducted including excavation and removal of soil, groundwater pump-and-treat, soil vapor extraction to contain and prevent migration of the plume, and on-site treatment of extracted groundwater. In addition, several groundwater monitoring wells were installed to monitor the contamination levels. (AECOM, 2020a.) The site is still open for remediation monitoring of groundwater. (GeoTracker, 2022.)

Note(s): Map ID numbers correspond to site numbers shown on Figure 4-1 through Figure 4-3.

Figure 4-1: Sites of Concern (RECs)

Figure 4-2 - Sites of Concern (RECs)

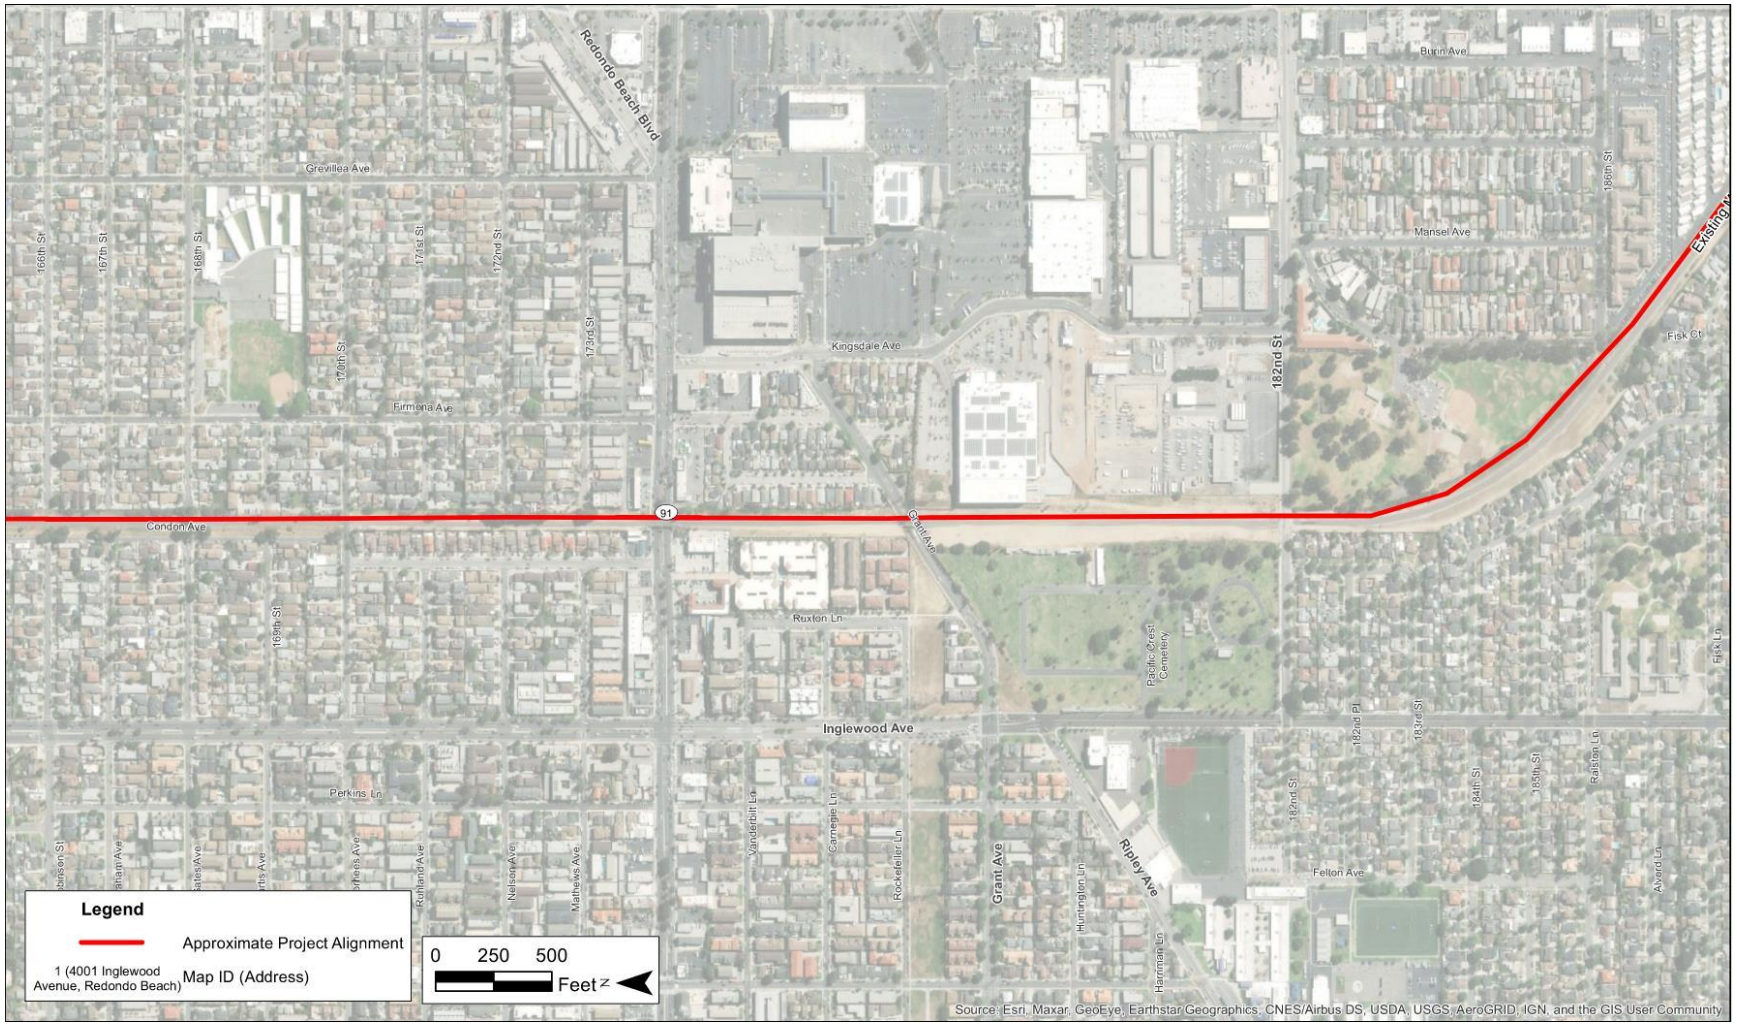

Figure 4-3 - Site of Concern (RECs)

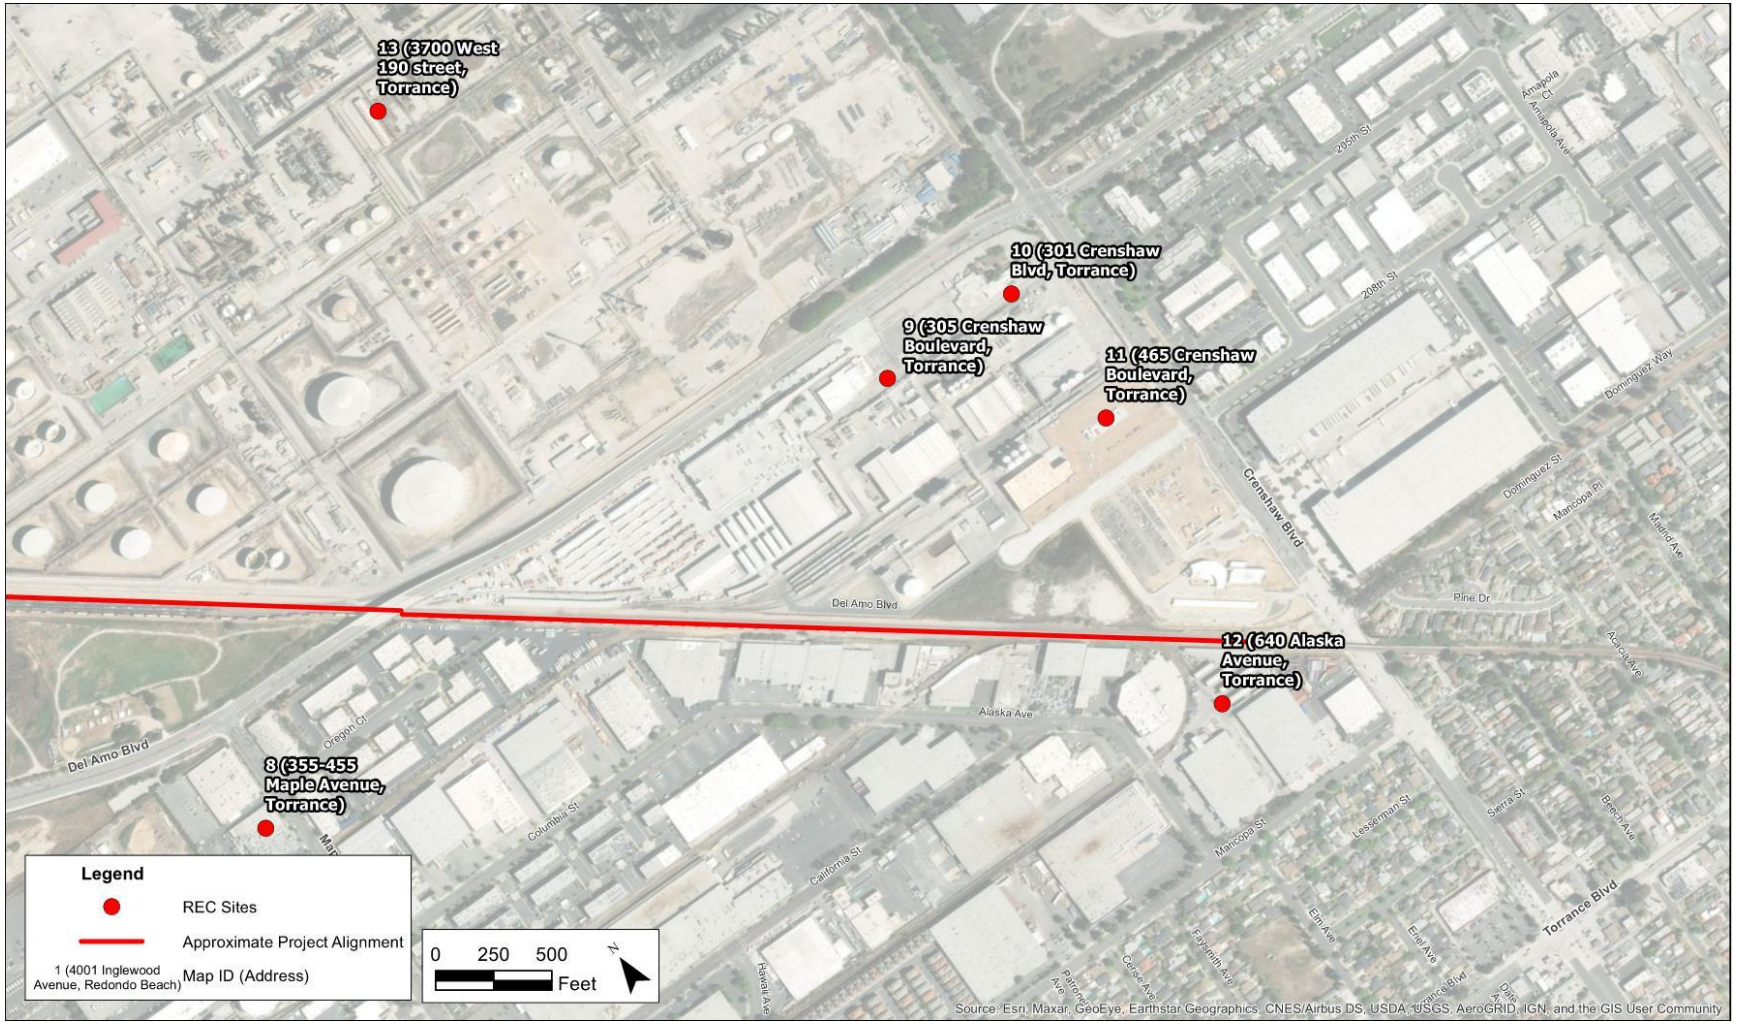
Figure 4-4 - Sites of Concern (RECs)



Environmental database records not discussed in Section 4.2 were judged not to be RECs based on one or more of the following considerations.

> The locations and depths where soil and/or groundwater would be disturbed during construction of the Proposed Project and Trench Option;

> The historical and/or recent groundwater gradient direction at the environmental-database-listed site with respect to the Proposed Project and Trench Option;

> The quantity of hazardous materials released at the environmental-database-listed site and the affected media (e.g., soil, groundwater);

> The lateral and vertical extent of the medium impacted by hazardous materials at the environmental-database-listed site;

> The degree to which previous releases at the environmental-database-listed sites have been remediated, if at all;

> The history of documented releases and/or environmental violations for the environmental-database-listed site;

> The relative distance and the existing structures between the environmental-database-listed site and the Proposed Project and Trench Option;

> The typical distance of concern for each environmental database;

> The likelihood that hazardous materials released at the environmental-database-listed site would migrate to the areas of the Project where soil and/or groundwater will be disturbed during construction of the proposed improvements (Mace et al., 1997; Buonicore, 2011); and

> Whether the ground surface at the environmental-database-listed site was upgradient, downgradient, or cross gradient from the Proposed Project and Trench Option.

In some cases, location information supplied by the database provider was insufficient to allow map-coded facility locations. These facilities are listed under the unmappable section within the EDR report. A review of the unmappable orphan facilities indicated that these facilities were either not potential sources of concern to the Proposed Project or not within the search distance for the Proposed Project.

4.3. PUBLIC AGENCY REVIEW

The EDR Radius Map™ Report was reviewed with GeoCheck® (2020e) and some local and state agency online databases to identify any current or previous records of hazardous substance use, storage, and/or unauthorized releases that may have impacted the Proposed Project and adjoining properties. At the time of this assessment, no local or state agencies were contacted to review archived records. It is recommended that local and/or state agency archived records be reviewed as part of parcel-specific Phase I ESAs performed for properties that will be acquired for the Proposed Project.

4.3.1. California Regional Water Quality Control Board

The online GeoTracker data and report resources were reviewed for regulated environmental cases provided by SWRCB and RWQCB on the internet at http://geotracker.waterboards.ca.gov/. Based on this review, records of active environmental cases listed on the GeoTracker website in the project vicinity corresponded to sites that were identified in EDR Radius Map™ Report with GeoCheck® (EDR, 2020e).

4.3.2. California Department of Toxic Substances Control

The online EnviroStor investigation data and report resources for cleanup and hazardous waste permitted facilities provided by the California Department of Toxic Substances Control (DTSC) were reviewed. Based on this review, records of active environmental cases listed on the EnviroStor website in the project vicinity corresponded to sites that were identified in the EDR Radius Map™ Report with GeoCheck® (EDR, 2020e).

4.3.3. California Department of Conservation, Division of Oil, Gas, and Geothermal Resources

According to the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Map 121 and Map 126 of District One oil fields, the Proposed Project and Trench Option is located near or within the Torrance, El Segundo, Lawndale, west portion Wilmington oil fields in Los Angeles County. The maps show numerous plugged and abandoned oil wells and a few oil field water wells scattered adjacent to the Proposed Project. However, there are no known active or abandoned oil/gas wells along or within 1000-feet of the Proposed Project and Trench Option. There are numerous oil wells scattered throughout the Proposed Project and Trench Option vicinity, many of which have since been removed, and are presented on the DOGGR maps. Table 4-3 summarizes the wells identified within a quarter-mile of the Proposed Project and Trench Option.

Table 4-3. Wells within ¼-mile of the Proposed Project and Trench Option Alignment

Well Type	Location
Active oil and gas	1500 feet southwest of the ROW and Del Amo intersection
	1900 feet southwest of the ROW and Del Amo intersection
Plugged dry holes	340 feet northwest of Redondo Beach Station
	Within the ROW near intersection of W. 171 street
Idle oil and gas	600 feet east of W. 163 street and Metro ROW

Common problems associated with oil field properties include methane and hydrogen sulfide soil gas, oil seepage, contaminated soils, leaking wells, and wells not plugged and abandoned to current standards. Although no active oil wells are located within the disturbance limits for the Proposed Project, there are a few abandoned oil wells and abandoned test borings (dry holes) along the Proposed Project within the disturbance limits, and undocumented well casings may be in this area. Individual oil wells do not, in general, appear on the regulatory database listings unless associated soil or groundwater contamination have been brought to the attention of a regulatory agency. Hydrocarbon contamination associated with oil fields can be non-point source, originating from bulk storage facilities, pipelines, sumps, and other operational features.

The pipelines may either cross the alignments or run parallel to them and be within the disturbance limits. Based on the review of previous reports for the Proposed Project and Trench Option alignment, it is reported that a 20-inch ExxonMobil pipelines runs along the Metro ROW 30 feet east of the existing tracks in the area between the proposed Manhattan Beach/ Inglewood station and the proposed Redondo Beach regional TC. In the same area, a 16-inch shell oil pipeline runs to the west of the existing tracks.

Methane gas, a hydrocarbon typically associated with petroleum production, natural seepage, or landfills, is another potential concern. In areas within or adjacent to oil and gas extraction areas, there is

a possibility of subsidence (downward falling of earth's surface) forming void spaces in subsurface which, unless refilled with fluids by repressurization techniques, may collapse causing settling in shallower earth layers between earth's surface and pumped geologic units at depth. Generally, these earth materials may become conduits for methane (or other) gas seeping upward from these petroleum-rich formations. Methane gas may accumulate in layers or pockets within the construction zone which when encountered may lead to fire or to explosion.

With the Proposed Project alignment being within one mile of state-designated oil fields, there is a potential for encountering methane gas during construction of deep foundations. In addition, the subsurface lines could potentially leak and require environmental cleanup. It is possible that abandoned or existing oil wells and underground piping exposed during construction of the Proposed Project may require mitigation. According to DOGGR, a construction site plan review should be submitted to the DOGGR construction review engineer prior to construction. The DOGGR engineer will evaluate the status and location of wells that may be encountered by Proposed Project alignment and Trench Option construction. Appropriate mitigation measures will be recommended by DOGGR. A copy of the DOGGR construction site plan review guidelines is available on the Internet.

4.3.4. California Environmental Protection Agency Regulated Site Portal

The California Environmental Protection Agency (CalEPA) Regulated Site Portal online database was reviewed. Based on this review, records of sites with environmental cases listed on the CalEPA website in the immediate project vicinity corresponded to sites that were identified in the EDR Radius Map™ Report with GeoCheck® (EDR, 2020e).

5. SITE RECONNAISSANCE

A site reconnaissance of the Proposed Project and Trench Option alignment and adjacent areas was not performed as the access to the site was not granted at the time of the assessment.

6. INTERVIEWS AND USER-PROVIDED INFORMATION

The objective of performing the interviews summarized herein was to obtain information indicating RECs in connection with the property.

6.1. QUESTIONNAIRES

A sample questionnaire is provided in Appendix H. Environmental questionnaires are usually submitted to the owners of the Proposed Project ROW and adjacent ROWs that might be impacted by the proposed improvements. Responses to the environmental questionnaires assist with identifying sources of environmental impacts to the Proposed Project that might not have been available at the time of this report. Questionnaires were used to gather known environmental releases-related information along or within the Proposed Project and Trench Option alignment. Since the Proposed Project is in the early stages of development, questionnaires were not asked to be filled out by the adjacent ROW owners whose parcels might be impacted.

6.2. ON-SITE INTERVIEWS

Because the Proposed Project and Trench Option alignment is an existing roadway and railroad, on-site interviews with ROW owners could not be performed. Interviews with owners/leaseholders of adjacent properties were not part of the assessment.

6.3. OTHER INTERVIEWS WITH CURRENT OWNERS

Interviews with the owners of neighboring/nearby properties were not performed as part of this ESA.

6.4. USER-PROVIDED INFORMATION

6.4.1. Environmental Lien/Activity and Use Limitations

Development of this report did not include searches for environmental liens or activity and use limitations (AULs) for the Proposed Project.

6.4.2. Previous Reports

At the time of this report, findings of the environmental-related project documents provided by Metro were reviewed. Such documents included a Draft Environmental Impact Statement/ Environmental Impact Report (Metro, 2014), Phase I and Phase II ESA reports for 465 Crenshaw Boulevard property in Torrance, and 1521 Kingsdale Avenue in Redondo Beach. In addition, the findings of previous environmental assessment reports were reviewed (DYA, 2010). The findings of reports for 465 Crenshaw Boulevard property were discussed in Section 4.2.

The findings of a phase II ESA prepared by EEC Environmental (EEC, 2017) for the proposed Redondo Beach TC located at 1521 Kingsdale Avenue, Redondo Beach were reviewed. The Phase II ESA evaluated soil and soil gas vapor at the property. The review of these findings determined that TPH and VOC concentrations in shallow soils were below RWQCB screening levels for commercial and industrial regional screening levels. The soil vapor samples analyzed were below their respective commercial land use. The shallow soils in the northern planter area were identified to be contaminated with ADL and is recommended to be remediated for ADL affected soil. It is recommended that the area identified by EEC as ADL impacted soil should be properly handled by the contractor prior to disturbance.

This ESA is not intended to be a definitive investigation of potential contamination at potentially impacted parcels; rather, the conclusions and recommendations presented herein are based on the review of environmental database sources discussed in Section 3 and Section 4

7. NON-ASTM SCOPE CONSIDERATIONS

7.1. PRELIMINARY ASBESTOS EVALUATION

ACM could potentially be present in the existing bearing pads of the bridge structures along and crossing the Proposed Project and in the near-surface soils within and adjacent to existing railroad ROW. If the final construction alternative involves disturbing existing bridge bearing pads or existing railroad ROW, then the structures, bridge bearing pads, and near-surface soils should be evaluated for suspect ACM.

In addition, the existing structures built prior to 1989 located within areas of proposed ROW acquisitions should be evaluated for suspect ACM prior to disturbance.

7.2. LEAD-BASED PAINT

LBP could potentially be present on the existing bridge structures crossing the Proposed Project. If the final construction alternative involves disturbing existing painted bridge surfaces (including but not limited to Graffiti), then the bridge should be evaluated for suspect LBP.

Lead and other metals, such as chromium, may be present within yellow thermoplastic paint striping on the pavement. These surfacing materials should be handled in accordance with Caltrans Standard Specifications (Caltrans, 2018b) during construction by the contractors.

7.3. HEAVY METALS INCLUDING AERIALLY DEPOSITED LEAD

Heavy metals (particularly, arsenic, lead, and chromium, but including other metals such as cobalt, nickel, etc.) have been found to be associated with historical railroad operations in many cases. Releases can result from spills of transported materials or from railroad equipment wear. Accumulations of heavy metals are typically concentrated in the shallowest surface layers of soil or roadbed.

7.4. TREATED WOOD WASTE

The Proposed Project and Trench Option alignment may contain treated wood waste (TWW) from existing and historical railroad usage. Upon removal, wood railroad ties, power poles, or guard rail posts (including previously salvaged) in the Proposed Project ROW should be managed or disposed of by the licensed contractor as hazardous waste or handled by any applicable variances set forth by the DTSC.

7.5. WEED CONTROL

Railroad operations have historically been known to use various substances for weed control along existing or historical railroad corridors. Surface soils within the railroad ROW may contain hazardous materials from the use of weed control, including herbicides and arsenic.

8. CONCLUSIONS AND RECOMMENDATIONS

A hazardous materials Phase I Environmental Site Assessment (ESA) was performed in conformance with the scope and limitations of ASTM Practice E1527-13 and in accordance with the Metro Rail Design Criteria ([MRDC] Metro, 2020a), Section 5.6.6 Hazardous Materials Investigation and Analysis for the proposed Los Angeles County Metropolitan Transportation Authority (Metro) C Line (Green) Extension to Torrance Project. Exceptions to or deletions from this practice are described in Section 11 of this report. This assessment revealed no evidence of RECs in connection with the subject property with the exception of those listed in Table 8-1.

As discussed in Section 2.2, the preliminary review of parcels listed that might be acquired as a part of the Proposed Project showed indicators of the presence of hazardous materials or petroleum products. It is recommended that the parcel-specific investigations include review of archived records for local and/or state agencies and an evaluation of the need for parcel-specific Phase II site investigation.

Conclusions and recommendations regarding RECs within and adjacent to the existing Proposed Project ROW that were identified in Section 3 through Section 7 of this report are summarized in Table 8-1.

Table 8-1. Conclusions and Recommendations

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
1	Voi-Shan Aerospace, Inc. (former), 4001 Inglewood Avenue, Redondo Beach	TPH, VOC, Semi VOC, and metals	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for the contaminants of potential concern if the Proposed Project disturb groundwater along the Proposed Project and Trench Option alignment between Marine Avenue and Manhattan Beach Boulevard.
2	Merrell Paint Co., Inc., 15624 Inglewood Avenue, Lawndale	Total Petroleum Hydrocarbons (TPH), Volatile Organic Compounds (VOC)	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils, up to depth of 15 feet bgs or to proposed disturbance depth, whichever is lower, and groundwater for contaminants of potential concern along the Proposed Project and Trench Option alignment between Manhattan Beach Boulevard and Inglewood Avenue. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II SI is recommended to evaluate the existing conditions of subsurface contamination.
3	Westwood Building Materials, 15708 Inglewood Avenue, Lawndale	TPH, VOC	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for contaminants of potential concern along the Proposed Project and Trench Option alignment between Manhattan Beach Boulevard and Inglewood Avenue. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II SI is recommended to evaluate the existing conditions of subsurface contamination.
4	Tosco-76 Station #4817, 3601 Inglewood Avenue, Redondo Beach	TPH	Soil	Section 4.2	The site is not a REC to the Proposed Project. However, if the subject property will be acquired, then a site-specific investigation is recommended to determine the status of residual contamination onsite.
5	City of Lawndale Garage, 4722 W Manhattan Beach, Lawndale	TPH	Soil	Section 4.2	The site is not a REC to the Proposed Project. However, if the subject property will be acquired, then a site-specific investigation is recommended to determine the status of residual contamination onsite.

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
6	Union Carbide Corporation (UCC), 19500 Mariner Avenue, Torrance	TPH, VOC, SVOC, Dripolene, and metals.	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater for noted contaminants of potential concern along the Proposed Project alignment adjacent to the subject property.
7	North Posse Site 3041 Del Amo Boulevard, Torrance	TPH, VOC, SVOC, ACM, metals, and methane	Soil, Soil Vapor, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils, soil vapor, and groundwater (if disturbed) along the Proposed Project alignment between Prairie Avenue and Del Amo Boulevard. In addition, it is recommended to identify the existing and abandoned oil pipelines in the area prior to construction.
8	Former Amp-Matrix Facility 355-455 Maple Avenue, Torrance	TPH, VOC	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for contaminants of potential concern if the proposed construction results in groundwater disturbance along the Proposed Project alignment near the Torrance TC.
9	The DOW Chemical Company 305 Crenshaw Boulevard, Torrance	TPH, VOC, SVOC, and metals	Groundwater	Section 4.2	A Phase II SI is recommended to evaluate groundwater for the contaminants of potential concern if the proposed construction results in groundwater disturbance at the proposed Torrance TC.
10	Torrance/ Dowell Schlumberger, Inc 301 Crenshaw Boulevard, Torrance	TPH, VOC, SVOC, and metals	Soil	Section 4.2	A Phase II SI is recommended to evaluate soils up to the proposed depth of disturbance for the contaminants of potential concern along the northern portion of the proposed Torrance TC.
11	PPG Industries, Inc. 465 Crenshaw Boulevard, Torrance	TPH, VOC	Soil, Groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) at the proposed parking structure for noted contaminants of potential concern. In addition, if the site is on the proposed acquisition list, a comprehensive Phase II SI is recommended to evaluate the existing conditions of subsurface contamination.
12	Vought Aircraft Industries, Inc., 640 Alaska Avenue, Torrance	TPH, VOC	Soil	Section 4.2	A Phase II SI is recommended to evaluate soils, up to depth of 15 feet bgs or to proposed disturbance depth, whichever is lower for potential hydrocarbon and volatile organic contamination along the Proposed Project alignment in the southern end, adjacent to the proposed Torrance TC.

Map ID[1]	Rec Source/ Location	Contaminants of Potential Concern	Potentially Affected Media	Report Section(s)	Recommendation
13	Exxon Mobil Oil Torrance Refinery, 3700 West 190 street, Torrance	TPH, VOC, SVOC, and metals	soil and groundwater	Section 4.2	A Phase II SI is recommended to evaluate soils and groundwater (if disturbed) along the Proposed Project alignment between Prairie Avenue and Del Amo Boulevard. In addition, it is recommended to identify the existing and abandoned oil pipelines in the area prior to construction.
--	Proposed Project and Trench Option ROW	Herbicides, Pesticides, Treated Wood Waste, TPH, Metals	Soil	Section 7.2	A Phase II SI is recommended to evaluate shallow soils for contaminants of potential concern along the railroad ROW.
--	Existing Bridges	Asbestos Containing Material (ACM), Lead-based Paint (LBP)	Existing Bridge Bearing Pads, Hinge and Joint Seal materials, Coatings, Graffiti	Sections 7.1 & 7.2	Prior to disturbance of the existing bridge structures, ACM and LBP surveys are recommended as part of a Phase II SI.
--	Proposed Acquisitions for Proposed Project and Trench Option construction	Hazardous Materials	Soil	Section 2.2	Parcel-specific Phase I ESAs are recommended to evaluate the presence or absence of hazardous materials for parcels (or portions thereof) that will be acquired as part of the Proposed Project and Trench Option.
--	Proposed Project and Trench Option ROW	Oil and gas pipelines	Soil	Section 5	It is recommended that where construction activities will disturb soil adjacent to the oil and gas pipelines, the soils be screened for hydrocarbon contamination prior to construction.
--	Proposed Project and Trench Option ROW	LBP, Chromium	Yellow Thermoplastic Striping	Section 7.2	Yellow Thermoplastic Striping materials should be handled in accordance with Caltrans Standard Specifications (Caltrans, 2018a) and the corresponding Standard Special Provisions (SSPs) (Caltrans, 2018b).

Note(s): Map ID numbers correspond to site numbers shown on Figure 4-1 through Figure 4-4.

9. DATA GAPS

A data gap is the inability of the environmental professional to obtain information required by ASTM E1527-13. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit) and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.). The following data gaps were identified:

> Some of the intervals between documented sources exceeded 5 years.

> Meeting with regulatory agency staff and persons having knowledge and usage of REC sites to characterize the past activities.

> Interviews with owners of the Proposed Project and owners/leaseholders of properties adjacent to the Proposed Project ROW.

> Site reconnaissance was not performed during the time of this assessment as the access was not granted.

In consideration of the available information obtained during the preparation of this report in conjunction with professional experience and judgment, no evidence exists to suggest that these data gaps might alter the conclusions of this assessment. In addition, the purpose of this ESA is to provide a planning document in general compliance with ASTM and MRDC guidelines.

10. DEVIATIONS

No deviations from ASTM E1527-13 were noted during this Phase I ESA except for those noted previously in Sections 1 and 9 of this report.

11. LIMITATIONS

This report is an instrument of service of Diaz•Yourman & Associates (DYA) and includes limited research, a review of specified and reasonable ascertainable listings to identify RECs.

This report was prepared in general compliance with the ASTM guidelines for evaluating environmental impacts due to hazardous waste during construction. ASTM E1527-13 was used as a basis of general procedures followed in preparation of this ESA but was not explicitly applied. The purpose of this assessment is limited to identification of the potential impacts of hazardous substances during construction of a transportation alignment.

RECs are defined under ASTM standards as: “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property.” These standards and this report do not address other environmental conditions such as geologic or geotechnical hazards. This ESA was performed in accordance with generally accepted practices of the profession undertaken in similar studies at the same time and in the same geographical area; DYA observed a degree of care and skill generally exercised by those of the profession under similar circumstances and conditions.

ESAs have a limited lifespan and findings and recommendations within an ESA are valid for one year from the date the initial ESA is completed. Therefore, due to the additional design refinements that may occur in the future for the Proposed Project or require change in the project footprint, an updated ESA may be required to identify impacts related to site conditions before design activities commence. This Phase I ESA has been completed to evaluate and summarize environmental concerns to the Proposed Project and is not intended as part of an effort to sell or acquire the property or portions thereof.

The study and this report have been prepared on behalf of, and for the exclusive use of STV Inc. and the project owners solely for their use and reliance in the environmental assessment of the project site. STV Inc. and the project owners are the only parties to whom DYA has explained the risks involved and that have been involved in the shaping of the scope of services needed to satisfactorily manage those risks, if any, from STV Inc.’s and the project owners’ points of view. Accordingly, reliance on this report by any other party may involve assumptions whose extent and nature lead to a distorted meaning and impact of the findings and opinions related herein. DYA’s findings and opinions related in this report may not be relied upon by any party except STV Inc., and the project owners. With the consent of DYA, STV Inc., and the project owners, DYA may be available to contract with other parties to develop findings and opinions related specifically to such other parties’ unique risk management concerns related to the project site. The DYA personnel associated with conducting this ESA have no specialized or actual knowledge regarding the project corridor.

12. QUALIFICATIONS OF PREPARER

This assessment was performed by Mr. Chaitanya Kukutla under the supervision of Mr. Gary Halbert, PG, CEG and Mr. Somadevan Niranjanan, PE, GE. The resumes of the preparers are presented in Appendix I.

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in Section 312.10 of 40 Code of Federal Regulations Section 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Diaz-Yourman & Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/30/2020 has revealed that there

is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EPA ID:: CAD000627398				

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 5

EXECUTIVE SUMMARY

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/16/2019 has revealed that there are 20 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where

environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/27/2020 has revealed that there are 17 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 14 CPS-SLIC sites within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 18 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there are 65 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that

G&M OIL CO #48 (Continued) **S113038155**

none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Site ID:	118269
Site Name:	G&M OIL CO #48
Violation Date:	12-04-2018
Citation:	23 CCR 16 2716(a) through (e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(a) through (e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CARBRO CORPORATION (Continued) **S123502989**

1, Section(s) 265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 08/15/2016. OBSERVATION: Observed one 55 gallon drum of carbide/tungsten sludge waste with the cover off. All hazardous waste containers shall be closed at all times except when adding or removing waste. CORRECTIVE ACTION: Immediately close these containers and ensure all hazardous waste containers are closed when not adding or removing waste.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D008
. Waste name: LEAD

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

NORTHROP GRUMMAN S&MSC (Continued) **1007199535**

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U159
. Waste name: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

. Waste code: U220
. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 4

Waste code: D008
Waste name: LEAD
Amount (Lbs): 5

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 4

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002935584

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 1987-05-07 00:00:00.0
Site name: VELLIOS MACH SHOP INC
Classification: Large Quantity Generator

Violation Status: No violations found

FINDS:
Registry ID: 110002761360
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002761360

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:
Name: HEADQUARTER
Address: 2501 SANTA FE AVE
City,State,Zip: REDONDO BEACH, CA 90278
Site ID: 438193
CERS ID: 10453450
CERS Description: Hazardous Waste Onsite Treatment

Violations:
Site ID: 438193
Site Name: Headquarter
Violation Date: 02-13-2014
Citation: HSC 6.95 25505(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)

TRW INC (Continued) **S113009292**

Violation Description: Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes: Must submit to C.E.R.S.
Violation Division: Redondo Beach Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 438193
Site Name: Headquarter
Violation Date: 08-19-2019
Citation: HSC 6.95 25507 - California Health and Safety Code, Chapter 6.95, Section(s) 25507
Violation Description: Failure to adequately establish and implement a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: OBSERVATION: The business failed to establish and implement a business plan when handling hazardous materials at or above the reportable threshold quantities. CERS search indicated last submittal in 2014 not accepted. Since then no submittals. Observed 14 - 15 G LPG cylinders stored at rear of the warehouse. CORRECTIVE ACTION: Establish and implement a business plan for the facility. Submit documentation of correction to the unified program agency.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Violations:

Site ID:	141137
Site Name:	PACIFIC VOLKSWAGEN
Violation Date:	04-17-2017
Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.
Violation Notes:	Returned to compliance on 03/07/2019. OBSERVATION: Failure to include inspections of tank supports/foundation, deterioration, discharges and/or accumulations of oil inside diked areas, and comparison records in the records of inspections (or customary business records). There was no inspection documentation on site at the time of the visit. CORRECTIVE ACTION: Tank inspections include supports/foundation, deterioration, discharges and/or accumulations of oil inside diked areas, and comparison records in the records of inspections (or customary business records).

FINDS:
Registry ID: 110002631830
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002631830

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 3387

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 292

Waste code: D004
Waste name: ARSENIC
Amount (Lbs): 1070

Waste code: D008

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 124188
Site Name: INDEPENDENT REPAIR
Violation Date: 06-01-2018
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 09/08/2018. OBSERVATION: Oil saturated absorbent was observed on the concrete floor of HazWaste storage room. CORRECTIVE ACTION: Submit photos/documentation to the CUPA demonstrating the spill has been properly removed and managed.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 124188
Site Name: INDEPENDENT REPAIR
Violation Date: 06-01-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/08/2018. OBSERVATION: The following containers were observed with incomplete Hazardous Waste labels: Waste Antifreeze- 1 x 100 gal. ploy container Waste Sorbent- 1 x ~30 gal. drum CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

FINDS:

Registry ID:	110001178500
Facility URL:	http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110001178500

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS ID: 10173317
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 280
Site Name: 1623 Vons A Safeway Company
Violation Date: 05-21-2013
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Administration/Documentation - General
Violation Notes: Submit to CERS
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 280
Site Name: 1623 Vons A Safeway Company
Violation Date: 08-17-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: OBSERVATION: The following Retail Hazardous Waste bin labels were missing contents and accumulation start dates: Universal Waste- 1 bin Toxic Waste- 2 bins Aerosol Flammable- 1 bin Corrosive Base- 1 bin CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 280
Site Name: 1623 Vons A Safeway Company
Violation Date: 08-17-2017
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 08/17/2017. OBSERVATION: Employees are not thoroughly familiar with proper waste handling and emergency procedures as demonstrated by the number and/or type of hazardous waste violations observed at the time of inspection. Observed bottle of Hydrogen Peroxide (leaking/bagged) in Toxic Waste bin. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that employees have been properly trained. Corrected on Site.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Longitude:	-118.362248
Case Type:	Cleanup Program Site
Case Worker:	CW
Local Agency:	Not reported
RB Case Number:	0689
File Location:	Regional Board
Potential Media Affected:	Indoor Air, Aquifer used for drinking water supply, Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), 1,4-Dioxane, Dichloroethane (DCA), Dichloroethene (DCE), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium VI
Site History:	This site is a former Voi-Shan Aerospace Fastener manufacturing facility, constructed in 1970 and occupied until 1991. The 8-acre site was redeveloped as commerical property in 1993. Depth to ground water is approximately 25 to 30 feet below ground surface. Site assessment began in 1986 when a leaking underground solvent storage tank was removed. Site cleanup was initiated in 1992. Source of 1,1,1-trichloroethane(TCA), trichloroethene (TCE), and perchloroethylene (PCE) impact was a former sump area. Source removal (soil excavation) was performed in 1993. Completion of the excavation of contaminated soil was verified by analyzing approximately 300 soil samples for TPH, VOC, and metals. Remediation actions include soil vapor extraction which was operated in vicinity of well EX-1 through 2002; pump and treat for groundwater extraction which was operated 1992-1996, 2001- 2008 under a NPDES permit. Currently, groundwater monitoring is underway to verify if groundwater contamination is naturally attenuating or will require additional active remediation.

CERS:
Name: CALIF CARBURETOR AND FUEL
Address: 4921 MARINE AVE
City,State,Zip: LAWNDALE, CA 90260
Site ID: 15145
CERS ID: 10301968
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 15145
Site Name: CALIF CARBURETOR AND FUEL

CAL CARBURETOR & FUEL INJECTIO (Continued) **S106024782**

Violation Date: 04-24-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 10/16/2017. OBSERVATION: Copies of hazardous waste disposal records for 2017 for waste coolant and used oil were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by [date, 30 days from now].
Violation Division: Los Angeles County Fire Department

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 07/19/2016. OBSERVATION: Copies of hazardous waste disposal records were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA within 30 days.

File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Dichloroethene (DCE), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Chromium VI, Benzene, Diesel, Ethylbenzene, Gasoline, Naphthalene, Toluene, Total Petroleum Hydrocarbons (TPH), Xylene
Site History:	The Site is a former and current aerospace manufacturing and testing facility. The site contained numerous underground storage tanks that contained both petroleum hydrocarbons and chlorinated solvents. Multiple site investigations involving soil, soil vapor and groundwater investigation and characterization were conducted between 1987 and 1998 as well as numerous UST removal and closure operations. Groundwater monitoring has been conducted since September 1998, beginning on a semiannual basis. Since 2004, groundwater monitoring has been conducted on an annual basis. Currently, 28 groundwater wells are included as part of the monitoring program. Three groundwater zones are present beneath the site: the upper perched zone (UPZ), the lower perched zone (LPZ) and the Gage Aquifer. The UPZ occurs within a sand unit from 50-65 feet below ground surface (bgs) and is perched on top of a clay unit at 65 feet bgs. Groundwater flow in the UPZ is primarily northwest. The LPZ is present in fine-grained sand from 70 to 80 feet bgs and is perched on top of a clay zone at 80 feet bgs. Groundwater flow in the LPZ varies from northeast to northwest.

File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: The Regional Board has initiated an inquiry into operations and potential chlorinated solvent contamination that may be emanating from the Royal Cleaners facility. The Royal Cleaners facility has operated as a dry cleaner since approximately 1987. A chemical product/substance use and storage questionaire (CUQ) was completed for the property. Based on the CUQ, South Coast Air Quality Management District Permits for solvent use at the site and groundwater contamination at down-gradient sites the Regional Board has determined that a soil and soil gas investigation is needed at the site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
