Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110002924774

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Violation Source: CERS,

Site ID: 67392
Site Name: SHERWIN-WILLIAMS CO #4397
Violation Date: 03-05-2024
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 04/30/2024. Observation: At the time of facility inspection the facility was storing hazardous material business plan (HMBP) reportable quantities of lacquer, dimethyl carbonate, and corrosive/flammable catalyst but has not complete and submitted an HMBP chemical inventory sheet for each of these reportable quantity hazardous materials. Correction: Complete/submit an HMBP chemical inventory sheet for each of the above listed hazardous materials and notify EMD Specialist Ryan Artz when this has been completed.

Violation Date: 11-12-2020
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/24/2021. Observation: The facility was observed to be storing HMBP reportable quantities of Envirolastic CR965 Polyurea Part A/B and Dimethyl Carbonate solution but has not disclosed these reportable quantity hazardous materials on an HMBP chemical inventory sheet. Correction: Complete an HMBP chemical inventory sheet for each of the reportable quantity hazardous materials noted above utilizing the CERS HMBP database. Notify Specialist Ryan Artz when this has been corrected.

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 04/07/2024. Observation: The currently submitted HMBP site map is missing the hazardous material storage location(s) in the facility warehouse area. Correction: Update the facility HMBP site map to include all hazardous material and hazardous waste storage area. Upload an updated site map to the CERS database and notify EMD Specialist Ryan Artz when this has been completed.
Violation Division: Sacramento County Env Management Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 67392
Site Name: SHERWIN-WILLIAMS CO #4397
Violation Date: 11-12-2020
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description: Failure of a storage facility, treatment facility, transfer facility, resource recovery facility, or disposal site to accept, treat, store, or dispose of a hazardous waste at the facility, area, or site, without a hazardous waste facilities permit or other grant of

SHERWIN-WILLIAMS CO #4397 (Continued) **S104583840**

authorization from the department, or a permit-by-rule, conditional authorization, or conditional exemption permit from the CUPA.

Violation Notes: Returned to compliance on 03/24/2021. Observation: A mechanical hydraulic ram was observed above the facility generated hazardous waste accumulation container of debris contaminated with solvent based paints. Per discussion with facility manager Ron Jones, the facility staff utilize the compaction ram to compress the debris contaminated with solvent paints waste stream. The facility does not currently have authorization to treat (compact) any hazardous wastes on-site. Correction: Immediately cease all unauthorized hazardous waste treatment on-site and submit written statement to Specialist Ryan Artz explaining how this violation will be corrected.

Violation Source: CERS,

Site ID: 67392
Site Name: SHERWIN-WILLIAMS CO #4397
Violation Date: 03-05-2024
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description: Failure to obtain a hazardous waste facilities permit, or other grant of authorization, prior to accepting, treating, storing, or disposing of a hazardous waste at the facility, area, or site.
Violation Notes: Returned to compliance on 03/21/2024. Observation: A mechanical hydraulic ram was observed above the facility generated hazardous waste accumulation container of debris contaminated with flammable solvent based paints. Per discussion with facility manager Jesus Martinez, the facility staff utilize the compaction ram to compress the debris contaminated with solvent paints waste stream currently on an ongoing basis. The facility does not have authorization to treat (compact) any hazardous wastes on-site. Correction: Immediately cease all unauthorized hazardous waste treatment and submit written statement to EMD Specialist Ryan Artz explaining how this violation will be corrected. Update the employee hazardous waste training to address this repeat hazardous waste violation regarding hazardous waste treatment . Submit copy of the updated employee hazardous waste training to EMD Specialist Ryan Artz.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 67392
Site Name: SHERWIN-WILLIAMS CO #4397
Violation Date: 03-05-2024
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior

SHERWIN-WILLIAMS CO #4397 (Continued) **S104583840**

	to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 04/07/2024. Observation: Approximately 12-15 - 55 gallon metal drums, which previously contained hazardous materials and were observed in the rear fenced storage area, were missing labeling identifying the drums as 'Empty' and the date when empty. Correction: Clearly label all containers greater than 5 gallons, which previously contained hazardous materials with the words 'Empty' and the date when empty. Submit photo documentation to EMD Specialist Ryan Artz showing violation correction.

Violation Description:	Failure to determine the status of any hazardous waste if a signed copy of the manifest isn t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isn t received within 60 days of the date the waste was accepted by the initial transporter.
Violation Notes:	Returned to compliance on 03/21/2024. OBSERVATION: Facility failed to determine the status of any hazardous waste if a signed copy of the manifest wasn't received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest wasn't received within 60 days of the date the hazardous waste was accepted by the initial transporter. The waste generator (Sherwin Williams Co. #4397) failed to obtain the uniform hazardous waste manifest destination facility signed copy for the following manifests: # 013894778 4/26/2023 013894777 4/26/2023 013892838 12/27/2022 013892839 12/27/2022 013891567 10/19/2022 013891568 10/19/2022 013891325 8/9/2022 015460974 3/2/2022 015459826 1/21/2022 01389127 7/27/2022 013891270 7/27/2022 CORRECTIVE ACTION: Provide documentation to EMD Specialist Ryan Artz that the hazardous waste was received by the final destination and/or an Exception Report that was submitted to DTSC within the required time frames.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	67392
Site Name:	SHERWIN-WILLIAMS CO #4397
Violation Date:	06-24-2014
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and

SHERWIN-WILLIAMS CO #4397 (Continued) **S104583840**

to maintain analysis results for three years.

Violation Notes: Returned to compliance on 06/30/2014. OBSERVATION: Facility operator stated that when the paint booth filters are changed out they are disposed of in the trash. Observed paint booth filters are being disposed of in the outside dumpster. Submit documentation to this department demonstrating that the paint booth filters have been properly characterized to determine if they are a hazardous waste. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future. Keep the test results, waste analyses, or other determinations at least three years from the date that the waste was last sent to on-site or off-site treatment, storage, or disposal.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 67392
Site Name: SHERWIN-WILLIAMS CO #4397
Violation Date: 06-24-2014
Citation: HSC 6.95 25504(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(a)
Violation Description: Failure to complete and/or submit hazardous material inventory forms for all reportable hazardous materials on site.
Violation Notes: Returned to compliance on 06/30/2014. OBSERVATION: The facility has not submitted the Hazardous Materials Inventory Chemical Description page for Methyl Ethyl Ketone, Acetone, Water Primer, Solvent Sealer, Copper Conductive Coating, Colorant, Solvent Low VOC, Vinyl Sealer, Kem Aqua Enamel, Polyurtheane Paint, Flatening Agents, Surfynol, and Platinol N to this department. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in this department's e-Reporting Portal or in the California Environmental Reporting System.

Violation Date: 11-22-2022
Citation: 23 CCR 16 2666(b)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2666(b)(2)
Violation Description: Failure to upgrade single-walled pipe to double-walled continuous interstitially monitored pipe when replacement or repair is required.
Violation Notes: OBSERVATION: Senate Bill 445 requires UST owner/ operators to permanently close single walled underground storage tank systems (USTs). Single walled UST systems include single walled tanks and/or single piping. If the UST system was designed/ constructed before 1997 in accordance with paragraph (7) of Health and Safety Code (H&SC) 25291(a) or it was designed/ constructed before 1984 and does not meet the requirements of H&SC 25291(a)(1)-(6) that UST component(s) must be permanently closed. UST test results for this facility along with tank pages submitted by the Owner/ Operator indicate that this facility has single walled piping. CORRECTIVE ACTION: Submit a UST Construction Permit to remove single walled piping and then have a licensed UST Contractor remove single walled piping. NOTE: This is a repeat violation facility has 14 days to comply. NOTE: This violation applies to all three tank systems onsite.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	OBSERVATION: Owner/ Operator has not tested UST overfill equipment to confirm that it meets one of the following req transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. CORRECTIVE ACTION: Maintain overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or trigger

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that

IC PACIFIC CARDLOCK (Continued) **S123291796**

none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: OBSERVATION: Owner/ Operator has not tested UST overfill equipment to confirm that it meets one of the following req transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. CORRECTIVE ACTION: Maintain overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or trigge

Site ID: 921483
Site Name: IC PACIFIC CARDLOCK
Violation Date: 12-17-2021
Citation: 23 CCR 16 2666(b)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2666(b)(2)
Violation Description: Failure to upgrade single-walled pipe to double-walled continuous interstitially monitored pipe when replacement or repair is required.
Violation Notes: OBSERVATION: Senate Bill 445 requires UST owner/ operators to permanently close single walled underground tank systems (USTs) which includes single walled tanks and/or single walled piping no later than December 31, 2025. If the UST system was designed/ constructed before 1997 in accordance with paragraph (7) of section 25291 (a) or it was designed/ constructed before 1984 and does not meet the requirements

IC PACIFIC CARDLOCK (Continued) **S123291796**

of H&SC 25291(a)(1)-(6), that UST component(s) must be permanently closed. Records indicate that this facility has single walled piping. CORRECTIVE ACTION: Submit a UST Construction Permit to remove single walled piping. have a licensed UST Contractor remove single walled piping. NOTE: This violation applies to all three tank systems onsite. NOTE: Low interest loans, grants and soil sampling funds are available to assist qualifying facilities. Contact EMD for additional guidance and/or assistance.

Violation Program: UST
Violation Source: CERS,

Site ID: 921483
Site Name: IC PACIFIC CARDLOCK
Violation Date: 12-29-2020
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: OBSERVATION: Owner/Operator did not maintain overfill prevention system to meet one of the following requirements:1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. CORRECTIVE ACTION: Maintain overfill prevention system to meet one of the following requirements:1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the [Truncated]

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-04-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: This was a focused inspection. The UST system at this facility has been abandoned. The property could not be accessed due to a security fence. The convenience store is non-operational. All UST sumps include sump lids that are secured. The site was red tagged on 01/28/2011 at which time the 87 and 91 tanks were confirmed empty however the diesel tank had a locked fill cap so tank level testing could not be performed. It appeared that the dispensers as well as the facility itself has no electric power.

Violations:

Site ID:	118713
Site Name:	Crash Champions - 337 Sacramento
Violation Date:	09-14-2021
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173

CRASH CHAMPIONS - 337 SACRAMENTO (Continued) **S121740389**

Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 10/11/2021. Observation: An open tote of waste fuel was observed on top of a hazardous waste accumulation drum in the outside breezeway waste accumulation area. All hazardous waste accumulation containers are required to be kept closed unless adding/removing material. Correction: Properly containerize the waste fuel noted above and submit photo documentation showing violation correction to Specialist Ryan Artz.

Violation Date:	05-23-2014
Citation:	HSC 6.95 25504(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(a)
Violation Description:	Failure to complete and/or submit hazardous material inventory forms for all reportable hazardous materials on site.
Violation Notes:	Returned to compliance on 12/02/2014. OBSERVATION: The facility has not submitted the Hazardous Materials Inventory Chemical Description page for Argon/Co2 mix to this department. CORRECTIVE ACTION: Complete and submit the Hazardous Materials Inventory Chemical Description page for all materials listed above electronically in this department's e-Reporting Portal or in the California Environmental Reporting System.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	118713
Site Name:	Crash Champions - 337 Sacramento
Violation Date:	05-23-2014
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure employees are familiar with the handling and compliance of hazardous waste regulations and emergency response.
Violation Notes:	Returned to compliance on 12/02/2014. OBSERVATION: Observed sanding pads in the dumpster located outside and in trash cans throughout the main shop. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have been trained on proper disposal of sanding pads.

Violation Description:	Failure to report program data electronically.

CRASH CHAMPIONS - 337 SACRAMENTO (Continued) **S121740389**

Violation Notes:	Returned to compliance on 10/11/2021. Observation: The primary emergency contact on the facility hazardous materials business plan (HMBP) - Owner/Operator sheet is outdated. Any significant changes to the facility HMBP are required to be updated within 30 days of the change. Correction: Update the facility HMBP - Owner/Operator emergency contact information on the CERS database and notify Specialist Ryan Artz when this has been completed.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HMRRP
Violation Source:	CERS,
Site ID:	118713
Site Name:	Crash Champions - 337 Sacramento
Violation Date:	09-14-2021
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 10/11/2021. Observations: 1. Large used oil spill under vehicle inside shop. 2. A moderate accumulation of paint sanding dust on the floor in the northeast corner of the shop. 3. A heavy accumulation of oily water spills surrounding the outside air compressor. All hazardous wastes spills are required to be cleaned up immediately. Correction: Thoroughly clean up each of the hazardous waste issues noted above and submit photo documentation showing violation correction to Specialist Ryan Artz.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	118713
Site Name:	Crash Champions - 337 Sacramento
Violation Date:	09-14-2021
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 10/11/2021. Observation: Waste fuel was observed in an open and not properly labeled tote. A 55 gallon hazardous waste accumulation drum of bondo sanding dust was missing an accumulation start date. A 5 gallon red mobile used oil container was missing a hazardous waste accumulation label. All hazardous waste accumulation containers are required to be labeled with a properly completed hazardous waste accumulation label. Correction: Properly label each of the above noted hazardous waste accumulation containers and submit photo documentation showing violation correction to Specialist Ryan Artz.

CRASH CHAMPIONS - 337 SACRAMENTO (Continued) **S121740389**

Site ID:	118713
Site Name:	Crash Champions - 337 Sacramento
Violation Date:	03-22-2018
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 04/25/2018. OBSERVATION: [INITIAL / ANNUAL] training documentation for all applicable employees was not available. CORRECTIVE ACTION: Submit documentation to this department demonstrating that employees have received training on safe handling of hazardous materials and the Emergency Response Plan.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	118713
Site Name:	Crash Champions - 337 Sacramento
Violation Date:	09-14-2021
Citation:	HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	Returned to compliance on 10/11/2021. Observation: The currently submitted facility contingency plan contains outdated emergency contact information. The hazardous materials business plan (HMBP) is required to be updated within 30 days for any significant changes. Correction: Update the facility contingency plan to reflect the current emergency person contact information and notify Specialist Ryan Artz when this has been completed.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	118713

Site ID:	118713
Site Name:	Crash Champions - 337 Sacramento
Violation Date:	05-23-2014
Citation:	HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)
Violation Description:	Failure to properly dispose of hazardous waste at an authorized location.
Violation Notes:	Returned to compliance on 05/23/2014. OBSERVATION: Observed used sanding pads in the outside dumpster and in multiple trash cans throughout the facility. CORRECTIVE ACTION: Immediately discontinue disposing of used sanding pads into the trash. Remove any hazardous waste from the trashes throughout the facility and submit a manifest/receipt demonstrating proper disposal. Submit a statement to this department demonstrating how the used sanding pads will be properly managed in the future. Operator removed the used sanding pads from the dumpster and placed them into the hazardous waste container with the sanding dust. Violation was corrected on site.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS,

Violation Date:	03-22-2018
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 05/04/2018. OBSERVATION: An approximately 5gal tub of air compressor water that was milky yellow inside the compressor cage is being disposed of in to the sewer as stated by Tom Renois. Also, a partially filled container of clear coat was observed in the trash in the shop area and a proper waste determination has not been made on either waste stream. CORRECTIVE ACTION: Immediately cease disposing of compressor waste water into the sewer and the clear coat into the trash. Submit documentation to this department demonstrating that the compressor waste water has been properly characterized to determine if it is a hazardous waste. also, submit to this department a written procedure that describes the separating of hazardous waste

CRASH CHAMPIONS - 337 SACRAMENTO (Continued) **S121740389**

from non-hazardous waste prior to disposal. If determined to be hazardous submit a manifest/receipt documenting proper disposal and a statement demonstrating how you will manage it in the future. Keep the test results, waste analyses, or other determinations at [Truncated]

NORTH 12TH STREET SOCIAL SERVICES SITE (Continued) **S110042432**

Protection Agency Targeted Site Investigation (TSI) grant and administered through DTSC. DTSC contractor, Arcadis (formerly known as LFR), completed a Phase II through the Targeted Site Investigation program. The Phase identified elevated levels of lead beneath the property. Based on the results of the TSI, the current site appears to pose a potential human health threat under the commercial/industrial land use redevelopment but unlikely under the current unoccupied vacant conditions. Further site investigation would be needed to adequately delineate the affected soil on the Site. Once the contamination had been adequately delineated, a remedial action could be evaluatedReport recommends additional investigation / remediation. The TSI Report contains a cost estimate to excavate approximately 3,400 cubic yards of soil and transport it to a Class II facility.

Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/16/1995
Comments: 5500 cu. yrds. of contaminated soil were removed from the former location of the waste oil tank. The constituents of concern were Total Petroleum Hydrocarbons-Diesel, and vola- tile organic compounds (VOC). The excavated soil was sent by railcar to the ECDC landfill in UTAH.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/01/1994
Comments: The Remedial Action (RA) for soils consisted of excavating 500 cubic yards of soil containing hazardous concentrations of lead and treating this soil with a concrete to fixate the lead. In addition, approximately 9000 cubic yards of non- hazardous soil, contaminated with oil was excavated. Both the treated soil and the non-hazardous soil were sent by rail car to the East Carbon Development Corporation Landfill in Utah. 500 Cubic Yards treated, 9500 Cubic Yards disposed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 06/24/1993
Comments: The Site Screening was completed. The County Health Department performed a tank inspection and found ground water contamination. The site was referred back to the Department of Toxic Substances Control (DTSC) for remediation and health risk assessment.

Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report

PURITY OILSITE (Continued) **S101300787**

Completed Date: 03/16/2012
Comments: This Qtrly report also recommended a NFA for Groundwater at the site. After coordination with the WB it was decided that a low-level threat closure would be applicable. Due to staff changes and promotions at the WB a concurrance letter was sent to the WB but not returned to DTSC. Many modifications later, a DTSC NFA ltr with requirements went out on 15 March, 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 10/02/1995
Comments: LNSTR Initial Study and Negative Declaration filed for removal of soil from the Lonestar portion of the site

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 04/15/1994
Comments: ORDER -- An Imminent or Substantial Endangerment Determination and Remedial Action Order was issued to the site owner, Southern Pacific Transportation Company.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 12/31/1993
Comments: CEQA - NOTICE OF EXEMPTION FOR REMOVAL ACTION -- The Dept. sent a notice of exemption to the file for a removal action involving the excavation and disposal of 2500 to 6000 cubic yards of non-hazardous, TPH contaminated soil.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 12/23/2008
Comments: LUC to restrict the use of ground water related to the Site was filed with the County on 11/4/08. Soil is unrestricted.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 12/17/2002
Comments: RIFS -- RI/RA/FS document and all addendums have been approved. The contaminants of concern are lead in a soil stock pile and chlorinated solvents in groundwater. The recommended remediation in the RI/RA/FS is to remove and properly dispose of the lead contaminated soil stockpile, and monitored natural attenuation of the groundwater. This project is ready to move on to the RAP stage.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 04/20/2010
Comments: DTSC has conditionally approved the SCM with the requirement that the final version include an additional figure that graphically depicts the information included in the text. Once written and electronic

PURITY OILSITE (Continued) **S101300787**

copies are received with the additional figure the SCM will be deemed approved. Due date for the final document is 5/21/2010.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 11/19/2008
Comments: Soils investigation is complete. Concentrations of COCs in soil are low enough for unrestricted use. GW is restricted by a LUC

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/22/2011
Comments: DTSC accepted the GW monitoring report

Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 11/04/2009
Comments: Arcadis provided information supporting their contention that 1,2 DCA found in ground water at the site is from an upgradient offsite source and requested a No Further Action for the site. After reviewing the information presented, remedial documents from 1992 to present and consulting with the Regional Board, DTSC concurs with the offsite source findings but believes a No Further Action decision for ground water associated with the site is inappropriate at this time. COCs other than 1,2 DCA are still above cleanup goals and need further evaluation. Once the required Site Conceptual Model is completed and approved UPRR and DTSC will discuss whether modifying the existing GW SAP is appropriate.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Discovery
Completed Date: 07/03/1984
Comments: On site waste disposal was identified by the Sacramento County Health Department, who is the agency in to oversee the cleanup.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 06/30/2003
Comments: RAP--The DTSC has approved the final RAP. The subject RAP was made available for public review for 30 days from 5/8/03 to 6/7/03. A notice was displayed in the Sacramento Bee newspaper and a fact sheet was mailed to the site mailing list to provide information and announce the comment period and a public meeting. On 5/15/03, DTSC held a public meeting at the Sacramento County Human Assistance Department Conference Room. An information repository was established at the Sacramento Central Public Library and at DTSC - Sacramento

PURITY OILSITE (Continued) **S101300787**

Office file room to make available for review the draft RAP, Negative declaration, and supporting documents. The final RAP outlines the conceptual process for remediation of soil and groundwater contamination. The selected remedy involves excavation of soil to meet the unrestricted land use goal at the site, monitoring of groundwater to ensure that natural biodegradation of COPCs continues, and maintaining controls to limit exposures. A total estimated volume 100 cubic yards of lead impacted soil stockpiles are to be excavated from the site. Exposure controls include imposing deed restrictions on future groundwater use.

Completed Document Type: Design/Implementation Workplan
Completed Date: 04/19/2004
Comments: DES -- THE REMEDIAL DESIGN AND IMPLEMENTATION (RDIP) FOR SOIL STOCKPILE REMOVAL AND GROUNDWATER REMEDIATION WAS APPROVED. ALL COMMENTS WERE ADDRESSED SATISFACTORILY. SOIL STOCKPILES TO BE REMOVED, PLACED IN SEALED BINS, AND THE BINS PLACED ON THE BACK OF

PURITY OILSITE (Continued) **S101300787**

RAIL CARS. CLASS I SOIL IS TO BE TRANSPORTED TO ECDC AND CLASS II SOIL IS TO BE TRANSPORTED TO FORWARD LANDFILL. GROUNDWATER IS TO BE MONITORED FOR NATURAL ATTENTUATION OF CHLORINATED SOLVENTS.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 10/02/1995
Comments: CEQA (LNSTR) - A negative declaration, an Initial Study and a Notice of Determination were completed to address the California Environmental Quality Act for the Removal Action Workplan for soil on the Lonestar Cement portion of the site. RAW (LNSTR) - It is proposed in the Removal Action Workplan to excavate approximately 1500 cubic yards of soil contaminated with petroleum hydrocarbons and moderate levels of lead and volatile organic compounds from the Lonestar Cement portion of the site. The soil will be transported by truck to the BFI landfill in Livermore, California.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 11/16/1989
Comments: In 1985 a site screening was done to address the concerns of the Sacramento County Health Department. A site assessment was done prior to sale and eight groundwater monitoring wells were installed. Ground water was sampled for metals as wells as Volatile Organic Compounds (VOCs). California Department of Health Services is waiting for The County Health Department to certify cleanup.

Site History:	The site was owned by Southern Pacific Transportation Company (SP), a portion of the site was leased for use as a waste oil re- processing facility from 1966 to 1978. The western portion of the site is currently vacant. The eastern portion of the site was formerly occupied by Lonestar Cement, and is currently used for transitional cottage housing units for the homeless. Several soil removal actions have been completed from 1985 to present. Ground water monitoring continues. Lead and oil contaminted soil and ground water with VOC's have been found at the site. The site is currently under investigation for on and offsite groundwater VOCs such as 1,2-DCA (Jan 2009). Off-site sources cited for 1,2-DCA. Site currently submitted Final Site Conceptual Model. Site currently sampling for TPH and VOCs. Currently being evaluated for "No Further Action" DTSC is lead agency. Water Board is lead support agency. Cleanup of site was certified by DTSC on 06/28/2013:

34510082

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/16/1995
Comments: 5500 cu. yrds. of contaminated soil were removed from the former location of the waste oil tank. The constituents of concern were Total Petroleum Hydrocarbons-Diesel, and vola- tile organic compounds (VOC). The excavated soil was sent by railcar to the ECDC landfill in UTAH.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/01/1994
Comments: The Remedial Action (RA) for soils consisted of excavating 500 cubic yards of soil containing hazardous concentrations of lead and treating this soil with a concrete to fixate the lead. In addition, approximately 9000 cubic yards of non- hazardous soil, contaminated with oil was excavated. Both the treated soil and the non-hazardous soil were sent by rail car to the East Carbon Development Corporation Landfill in Utah. 500 Cubic Yards treated, 9500 Cubic Yards disposed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 06/24/1993
Comments: The Site Screening was completed. The County Health Department performed a tank inspection and found ground water contamination. The site was referred back to the Department of Toxic Substances Control (DTSC) for remediation and health risk assessment.

Completed Document Type: Well Decommissioning Workplan
Completed Date: 06/18/2012
Comments: DTSC approval Letter for decom of 14 upper zone wells and 9 lower zone wells.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 03/16/2012
Comments: This Qtrly report also recommended a NFA for Groundwater at the site. After coordination with the WB it was decided that a low-level threat closure would be applicable. Due to staff changes and promotions at

PURITY OILSITE (Continued) **S101300787**

the WB a concurrance letter was sent to the WB but not returned to DTSC. Many modifications later, a DTSC NFA ltr with requirements went out on 15 March, 2012.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Initial Study/ Neg. Declaration
Completed Date: 10/02/1995
Comments: LNSTR Initial Study and Negative Declaration filed for removal of soil from the Lonestar portion of the site

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 04/15/1994
Comments: ORDER -- An Imminent or Substantial Endangerment Determination and Remedial Action Order was issued to the site owner, Southern Pacific Transportation Company.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Notice of Exemption
Completed Date: 12/31/1993
Comments: CEQA - NOTICE OF EXEMPTION FOR REMOVAL ACTION -- The Dept. sent a notice of exemption to the file for a removal action involving the excavation and disposal of 2500 to 6000 cubic yards of non-hazardous, TPH contaminated soil.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 12/23/2008
Comments: LUC to restrict the use of ground water related to the Site was filed with the County on 11/4/08. Soil is unrestricted.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 12/17/2002
Comments: RIFS -- RI/RA/FS document and all addendums have been approved. The contaminants of concern are lead in a soil stock pile and chlorinated solvents in groundwater. The recommended remediation in the RI/RA/FS is to remove and properly dispose of the lead contaminated soil stockpile, and monitored natural attenuation of the groundwater. This project is ready to move on to the RAP stage.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Implementation Workplan
Completed Date: 04/20/2010
Comments: DTSC has conditionally approved the SCM with the requirement that the final version include an additional figure that graphically depicts the information included in the text. Once written and electronic copies are received with the additional figure the SCM will be deemed approved. Due date for the final document is 5/21/2010.

Completed Area Name: PROJECT WIDE

PURITY OILSITE (Continued) **S101300787**

Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 11/19/2008
Comments: Soils investigation is complete. Concentrations of COCs in soil are low enough for unrestricted use. GW is restricted by a LUC

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 08/22/2011
Comments: DTSC accepted the GW monitoring report

Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 11/04/2009
Comments: Arcadis provided information supporting their contention that 1,2 DCA found in ground water at the site is from an upgradient offsite source and requested a No Further Action for the site. After reviewing the information presented, remedial documents from 1992 to present and consulting with the Regional Board, DTSC concurs with the offsite source findings but believes a No Further Action decision for ground water associated with the site is inappropriate at this time. COCs other than 1,2 DCA are still above cleanup goals and need further evaluation. Once the required Site Conceptual Model is completed and approved UPRR and DTSC will discuss whether modifying the existing GW SAP is appropriate.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: * Discovery
Completed Date: 07/03/1984
Comments: On site waste disposal was identified by the Sacramento County Health Department, who is the agency in to oversee the cleanup.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 06/30/2003
Comments: RAP--The DTSC has approved the final RAP. The subject RAP was made available for public review for 30 days from 5/8/03 to 6/7/03. A notice was displayed in the Sacramento Bee newspaper and a fact sheet was mailed to the site mailing list to provide information and announce the comment period and a public meeting. On 5/15/03, DTSC held a public meeting at the Sacramento County Human Assistance Department Conference Room. An information repository was established at the Sacramento Central Public Library and at DTSC - Sacramento Office file room to make available for review the draft RAP, Negative declaration, and supporting documents. The final RAP outlines the conceptual process for remediation of soil and groundwater contamination. The selected remedy involves excavation of soil to

PURITY OILSITE (Continued) **S101300787**

meet the unrestricted land use goal at the site, monitoring of groundwater to ensure that natural biodegradation of COPCs continues, and maintaining controls to limit exposures. A total estimated volume 100 cubic yards of lead impacted soil stockpiles are to be excavated from the site. Exposure controls include imposing deed restrictions on future groundwater use.

Completed Area Name: PROJECT WIDE

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	10/02/1995
Comments:	CEQA (LNSTR) - A negative declaration, an Initial Study and a Notice of Determination were completed to address the California Environmental Quality Act for the Removal Action Workplan for soil on the Lonestar Cement portion of the site. RAW (LNSTR) - It is proposed in the Removal Action Workplan to excavate approximately 1500 cubic yards of soil contaminated with petroleum hydrocarbons and moderate levels of lead and volatile organic compounds from the Lonestar Cement portion of the site. The soil will be transported by truck to the BFI landfill in Livermore, California.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	11/16/1989
Comments:	In 1985 a site screening was done to address the concerns of the Sacramento County Health Department. A site assessment was done prior to sale and eight groundwater monitoring wells were installed. Ground water was sampled for metals as wells as Volatile Organic Compounds (VOCs). California Department of Health Services is waiting for The County Health Department to certify cleanup.

Background Info:	The site is owned by Southern Pacific Transportation Company (SP) portion of the site was leased for use as a waste oil re-processing facility from 1966 to 1978. The western portion of the site, which was formerly used as a parking lot, is currently occupied by temporary buildings of the Sacramento Housing and Redevelopment Agency. The eastern portion of the site was formerly occupied by Lonestar Cement, and is currently used for transitional cottage housing units for the homeless.

Site History:	The property consists of a roughly triangular piece of land situated on the southwest corner of the intersection of North 12th and North B Streets. The property is bounded on the south and west by the former American River levee. The property is bounded on the north by North B Street and on the east by 12th Street. The property extends approximately 1,200 feet along North B Street and 640 feet along 12th Street and is separated into Study Area # 1 and Study Area # 2. Recycling operations have occurred at this location since at least the early 1950 s, and likely earlier. Associated Metals reportedly operated a recycling facility from approximately 1966 to 1974, although (except for Study Area #1), former ownership and/or lease terms and conditions are unknown for Associated Metals. From approximately 1974 to 1988 Levin metals operated a metals recycling facility. From 1988 to the present date, Sims has operated a metals recycling facility at the Site, where scrap metal, including automobiles and appliances are either sorted, cut, flattened, or compacted, and transported off-site either for further processing or for sale to steel mills. The Site uses include offices, employee parking areas, scrap metal handling and stockpiling, and truck loading areas. On October 5, 2006 DTSC received notice of completion by USEPA regarding a Preliminary Assessment of the Levine Metals site under Section 104 of CERCLA (Superfund) conducted by them. The Preliminary Assessment is to determine whether this site may qualify for placement on the National Priorities List (NPL). Based upon currently available, information USEPA has determined that no further assessment is warranted and that this site does not qualify for Superfund listing. USEPA has deferred the site to the State of California for possible further assessment or cleanup of the site under State Law.

Claim Status:	Not reported
Site History:	In August 1991 Chevron removed one 1,000-gallon waste-oil tank, two 10,000-gallon and one 5,000-gallon gasoline USTs. Low levels of fuel

CHEVRON #9-5632 (Continued) **U001615309**

hydrocarbons were detected below the tanks and none was detected below the dispensers and fuel lines. In August 2000 Chevron drilled seven soil borings to investigate the vertical and lateral extent of soil contamination, and to determine if groundwater was impacted. TPHg and MTBE was detected at low levels in groundwater samples, and in 2002 Chevron installed three groundwater monitoring wells (MW-1 through MW-3). MTBE was detected in the wells at a maximum of 17 ppb. In 2004 and 2005 Chevron installed five additional monitoring wells to define the extent of groundwater contamination (MW-4 through MW-8.) Groundwater monitoring between 2002 and the present indicated declining contaminant concentration trends. Chevron s consultant estimates that water quality objectives will be achieved through natural attenuation by 2013. On November 16, 2007 EMD and the CVRWQCB met to consider the site for no further action. Both agencies agreed that the site could be closed pending a favorable outcome of obtaining better definition of groundwater impacts around well MW-7, and needed revisions to the case closure summary. Results of the additional delineation were submitted on May 26, 2009. No problematic conditions were found. EMD and the CVRWQCB concurred with site closure on June 11, 2009. The monitoring wells were destroyed on September 22 and 23, 2009 and all drums have been removed from the site.

Violations:

Site ID:	86834
Site Name:	YELLOW CAB CO OF SACRAMENTO
Violation Date:	10-26-2021
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 11/09/2021. Observation: Hazardous waste disposal manifests were not retained and available for review during the business inspection. Hazardous waste disposal manifests are required to be retained for 3 years from the ship date. Correction: Obtain copies of all hazardous waste disposal manifest for the previous 3 years and submit copies to Specialist Ryan Artz.

YELLOW CAB COMPANY (Continued) **U001615233**

Site ID:	86834
Site Name:	YELLOW CAB CO OF SACRAMENTO
Violation Date:	03-27-2018
Citation:	HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description:	Business Plan Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 04/16/2018. OBSERVATION: The HMBP has not been updated and submitted to this department within 30 days of Greig Best becoming the Manager and Primary Emergency Contact. CORRECTIVE ACTION: Review, revise, and certify the HMBP electronically in the California Environmental Reporting System to update Primary Emergency Contact information and send and email notifying that the update was completed to: suttone@saccounty.net.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HMRRP
Violation Source:	CERS,

Site ID:	86834
Site Name:	YELLOW CAB CO OF SACRAMENTO
Violation Date:	10-26-2021
Citation:	40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description:	Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes:	Returned to compliance on 11/09/2021. OBSERVATION: Employees are not thoroughly familiar with proper hazardous waste handling and emergency procedures as demonstrated by the number and type of hazardous waste violations observed at the time of inspection. CORRECTIVE ACTION: Submit documentation to Specialist Ryan Artz demonstrating that employees have been properly trained regarding hazardous waste identification and management.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS,

Site ID:	86834
Site Name:	YELLOW CAB CO OF SACRAMENTO
Violation Date:	10-26-2021
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	Returned to compliance on 11/09/2021. Observation: 1. Spills of waste coolant were observed on top of the drum and in the drum secondary containment. 2. Spills of waste brake lathe grindings were observed built up in the lathe trough and on the floor under the lathe. All hazardous waste spills are required to be cleaned up immediately. Correction: Thoroughly clean up each of the hazardous waste spills noted above and submit photo documentation showing violation correction to Specialist Ryan Artz.
Violation Division:	Sacramento County Env Management Department
Violation Program:	HW
Violation Source:	CERS,

YELLOW CAB COMPANY (Continued) **U001615233**

Site Name: YELLOW CAB CO OF SACRAMENTO
Violation Date: 10-26-2021
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 11/09/2021. Observation: The 55 gallon waste coolant hazardous waste accumulation container was observed left open at the time of facility inspection. All hazardous waste accumulation containers are required to be kept closed unless adding/removing material. Correction: Properly close the above noted hazardous waste accumulation container and submit photo documentation showing violation correction to Specialist Ryan Artz.

Claim Status:	Not reported
Site History:	Was considered a blighted building that gave residence to the homeless. Essentially, the Sac RDA wants to redevelop the property and an initial study was published for the site back in 2004. Lead abatement through soil removal occured in 2006, and Sacramento County closed the site in 2007. It has been developed into residences in 2012.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Feature Description:	In November 1942, The Signal Section Of The California Quartermaster Sub-Depot Was Relocated From The Sacramento Fairgrounds To The Bercut-Richards Packing Plant. The Depot Was In Unofficial Status Until June 1943 When The War Department Officially Activated The Depot And Named It The Sacramento Signal Depot (Ssd). Acquisition Authorization For The Leasing Of 46.775 Acres Is Dated 10 April 1942. The Ssd Mission Was To Supply Local Troops And Operate As A Back-Up Depot For The Port Of Embarkation In San Francisco/Oakland, California. In April 1945, Authorization Was Made For The Construction Of A New Ssd Located On Fruitridge Road. The New Depot Was Completed In November 1946 And All Leased Land For The Ssd Was Terminated By The End Of 1947. The New Ssd Was Later Named Sacramento Army Depot. Sacramento Army Depot Is Scheduled To Close Under Brac In 1994.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 02/05/1996
Comments: Removal action consisted of excavation and disposal of approximately 477 cubic yards of lead contaminated soils. Soils were loaded into 27 - 18cy trucks and transported to a Class I landfill in Nevada. Historical activities included the burial of battery parts underground in two locations in the alley. Analysis results of soil samples ranged from not detected to 8370 mg/kg of lead. Confirmation sampling results indicate soils onsite are less than the target cleanup level of 220 mg/kg. Volume disposed to landfill: 477cy. Acres

SIERRA BATTERY SALES (Continued) **S101481738**

of land returned/ released for reuse: 0.4 acres, commercial/industrial use only.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 09/05/1995
Comments: Removal Action Workplan approved detailing a plan to excavate and dispose of lead contaminated soils. Soil was contaminated as a result of improper hazardous waste management practices.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 07/26/1994
Comments: In October 1992, DTSC collected surface soil samples from the site to better assess the area of contamination. Lead contamination was revealed in the private residence yard and the fence line of the mobile home park.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 01/14/1992
Comments: Site Screening Completed. In 1988 DTSC, Surveillance and Enforcement responded to a complaint alledging the improper handling of batteries. 120 cracked batteries were observed. Samples collected on-site indicated hazardous waste levels of lead as high as 8920. Site has been fenced in response to a Fence and Post Order issued 9-89. Facility owner agreed to prepare a Preliminary Endangerment Assessment as part of a CAO settlement.

SIERRA BATTERY SALES (Continued) **S101481738**

Completed Date:	02/05/1996
Comments:	Removal action consisted of excavation and disposal of approximately 477 cubic yards of lead contaminated soils. Soils were loaded into 27 - 18cy trucks and transported to a Class I landfill in Nevada. Historical activities included the burial of battery parts underground in two locations in the alley. Analysis results of soil samples ranged from not detected to 8370 mg/kg of lead. Confirmation sampling results indicate soils onsite are less than the target cleanup level of 220 mg/kg. Volume disposed to landfill: 477cy. Acres of land returned/ released for reuse: 0.4 acres, commercial/industrial use only.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Workplan
Completed Date:	09/05/1995
Comments:	Removal Action Workplan approved detailing a plan to excavate and dispose of lead contaminated soils. Soil was contaminated as a result of improper hazardous waste management practices.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Preliminary Endangerment Assessment Report
Completed Date:	07/26/1994
Comments:	In October 1992, DTSC collected surface soil samples from the site to better assess the area of contamination. Lead contamination was revealed in the private residence yard and the fence line of the mobile home park.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	01/14/1992
Comments:	Site Screening Completed. In 1988 DTSC, Surveillance and Enforcement responded to a complaint alledging the improper handling of batteries. 120 cracked batteries were observed. Samples collected on-site indicated hazardous waste levels of lead as high as 8920. Site has been fenced in response to a Fence and Post Order issued 9-89. Facility owner agreed to prepare a Preliminary Endangerment Assessment as part of a CAO settlement.

Description:	The Sierra Battery Sales site (Site) is comprised of a Quonset hut, unpaved alley and vacant lot. Adjacent to the Site are a private residence and a mobile home park. The owner of the private residence operated a battery shop in the Quonset hut since 1963. The facility bought and sold used automobile batteries and stored unsalable batteries in the alley prior to shipment off-site for recycling. The first site inspection and soil sampling was conducted in 1998 by the then Department of Health Services Surveillance and Enforcement Branch (now known as DTSC) in response to a complaint of lead-acid batteries mismanagement. Results showed up to 8,920 mg/kg of lead in the Site's soil. A Fence and Post Order was issued by DTSC for the alley and part of the vacant lot. In 1992, DTSC conducted another inspection and sampling. Signs of spillage were observed within the Quonset hut with the worst spillage located at the battery charging

SIERRA BATTERY SALES (Continued) **S101481738**

area. In 1994, a Preliminary Endangerment Assessment (PEA) was completed by DTSC. Based on the recommendations from the PEA, a removal action was completed in February 1996. Approximately 477 cubic yards of lead contaminated soil was excavated and transported to a Class I landfill in Nevada. Confirmation sampling results indicated lead in soil onsite was less than the target cleanup level of 220 mg/kg. In March 1996, a land use covenant was recorded by DTSC on Sacramento County Assessor's Parcel Number (APN) 275-162-003, where the Quonset hut is located.

Environmental Interest/Information System:
Registry ID: 110012429568

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 102549
Site Name: CALVADA SALES CO
Violation Date: 03-07-2022
Citation: HSC 6.5 25123.3(h)(2) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(2)
Violation Description: Failure to determine the status of any hazardous waste if a signed copy of the manifest isn t received within 35 days of the date the waste was accepted by the initial transporter and/or to submit an Exception Report to DTSC if a signed copy of the manifest isn t received within 60 days of the date the waste was accepted by the initial transporter.
Violation Notes: Returned to compliance on 03/10/2022. Observation: The hazardous waste generator (Calvada Sales Co.) did not obtain the hazardous waste destination facility signed copy of uniform hazardous waste manifest #022829799 (9/8/2021) within 60 days of waste shipment and submit an

CALVADA SALES COMPANY (Continued) **S101590615**

Exception report to the CA Dept of Toxic Substances Control (DTSC). Correction: Obtain the destination facility signed copy of Uniform hazardous waste manifest #022829799 and send a copy to Specialist Ryan Artz.

Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 102549
Site Name: CALVADA SALES CO
Violation Date: 03-07-2022
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 03/15/2022. Observation: Six large forklift lead acid battery units were observed stored outside adjacent to the warehouse area. Several of these units appeared to have leaked and/or boiled over acidic electrolyte onto the outside metal battery housing, storage pallet, and pavement beneath. All hazardous wastes generated on-site are required to be managed in a manner that prevents unplanned discharge to the environment. Correction: Thoroughly clean up all battery spills and manage all clean up residuals as a hazardous waste. Submit photo documentation showing battery spills clean up to Specialist Ryan Artz.
Violation Division: Sacramento County Env Management Department
Violation Program: HW
Violation Source: CERS,

Site ID: 102549
Site Name: CALVADA SALES CO
Violation Date: 07-19-2018
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 07/27/2018. OBSERVATION: Oil spilled from the compressor was observed on the floor of the compressor room of the freezer building. Also, oily soil was observed on the ground where the condenser is cleaned out at the cooler building. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating the spill has been properly removed and managed.

CA BOND EXP. PLAN:

Reponsible Party:	COST RECOVERY/OPERATION AND MAINTENANCE SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	State Bond funds were used to characterize and remediate this site. DHS will be seeking cost recovery for all direct costs plus staff costs and overhead related to the project.
Site Description:	A-1 Plating is a chrome, copper and nickel plating shop. Soils on the north, east and south sides of the building were stained. The most heavily stained area was north of the building and was orange in color. Runoff from the processing area inside the building at one time was discharged along the north side of the building to a ditch along the road in front of the site.
Hazardous Waste Desc:	Cyanide and the following metals have been found in soil on the north side of the site: cadmium, chromium, copper, nickel, lead and zinc.
Threat To Public Health & Env:	There was a potential threat to public health due to unrestricted access. The facility is in an industrial area in the City of Sacramento with residences nearby. Employees and customers of the plating shop were the population at risk because of their potential exposure to the contaminated soil on the site. One hundred sixty (160) cubic yards of contaminated soil were excavated and removed to a Class 1 Landfill.
Site Activity Status:	A preliminary site assessment was completed in August, 1986. A remedial investigation was conducted by the Department in 1987-1988. The RAP was public noticed in April - May, 1988. The selected remedial action was implemented and the site certified in June, 1988.

Environmental Interest/Information System:

THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
California's Department of Toxic Substances Control's (DTSC's)-EnviroStor database is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
CEDRI is a web application used by EPA programs and various stakeholders to manage environmental data transmitted to EPA in order to meet EPA's reporting requirements.

BIGGERS INDUSTRIAL GERLINGER (Continued) **S100275552**

Completed Date: 01/05/1988
Comments: FACILITY IDENTIFIED COMPLAINT RECEIVED INDICATING 55-GALLON DRUMS BEING DUMPED AT RAILROAD TRACKS.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 10/28/1992
Comments: PEA completed. Low levels of CrVI were detected in the shallow (15ft) ground water (.023 ppm). Elevated lead and chromium seem in 1988 S&E investigation apparently were removed with a railroad spur sometime during the transfer of ownership. Remaining lead and chromium are at acceptable levels for the current and projected land use of commercial/ industrial. No further action required by DTSC. RWQCB informed of low CrVI levels.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/19/2024
Date Data Arrived at EDR: 01/02/2025
Date Made Active in Reports: 01/21/2025
Number of Days to Update: 19

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/19/2024

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/19/2024

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/04/2024

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

West Map:	50006374 SACRAMENTO WEST, CA
Version Date:	2022

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

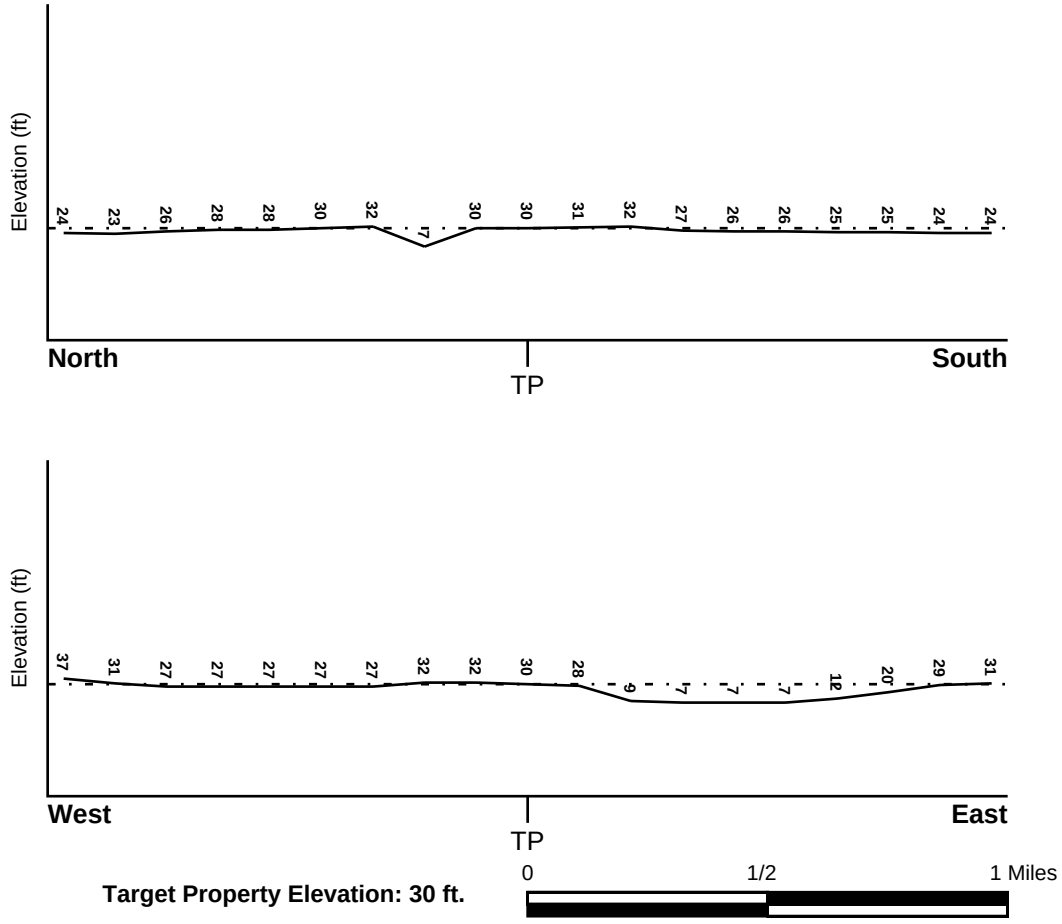
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 30 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06067C0180J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06067C0176J	FEMA FIRM Flood data
06067C0177J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SACRAMENTO EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: COLUMBIA

Soil Surface Texture: sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	11 inches	59 inches	stratified loamy sand to silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: DUMPS

Soil Surface Texture: variable

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

NOTIFICATION OF LEAD AND ARSENIC IMPACTED PROPERTY LOCATED WITHIN NORTH 12TH STREET AND EXISTING LIGHT RAIL RIGHT-OF-WAYS, BETWEEN INTERSECTIONS WITH SPROULE AVENUE AND RICHARDS BOULEVARD, SACRAMENTO, CALIFORNIA

Dear Recipients:

This Notification from the Department of Toxic Substances Control (DTSC) is to inform the City of Sacramento (City) and Sacramento Regional Transit (SacRT) of arsenic and lead concentrations in soil that exceed relevant health screening criteria within the North 12th Street and existing light rail line right of ways (ROWs), between Richards Boulevard and Sproule Avenue, in Sacramento, California.

Printed on Recycled Paper

Site Background

The Sacramento Housing and Redevelopment Agency (SHRA) owns the property known as the Twin Rivers Triangle Site (Site) located between North 12th Street, Sproule Avenue, and North 16th Street in Sacramento, California. On November 12, 2019, SHRA entered a California Land Reuse and Revitalization Act Agreement (Agreement) with DTSC for the Site. The Agreement serves as legal mechanism for SHRA to conduct environmental assessment and remediation under DTSC regulatory oversight.

Under the Agreement, SHRA prepared a Response Plan for the portion of the Site known as Light Rail Station Property (Property), located along North 12th Street, for DTSC's review and approval. The Property is a planned future light rail station. The Response Plan included excavation of contaminated soil within the Property and temporary staging of stockpiles within the remainder areas of the Site. DTSC approved the Final Response Plan in a letter dated September 15, 2022.

Excavation was performed by SHRA contractors Tetra Tech and Pacific States Environmental Contractors, Inc. (Pacific States) to limits planned in the Response Plan between September 26 and September 30, 2022. Confirmation samples were then collected to determine if the removal of excavated soils met response action goals (RAGs) or if additional excavation would be necessary. Analytical results of confirmation samples indicated that concentrations of lead and arsenic were both higher and more widespread than anticipated. Sampling results from the western edge of the Property, abutting North 12th Street, indicated that lead and arsenic concentrations exceeding RAGs may extend off the Site, to areas under North 12th Street and the existing light rail ROW.

Based on the determination that the extent of lead and arsenic concentrations were greater than anticipated, SHRA requested DTSC's approval to change the RAG for lead from the residential standard of 80 milligrams per kilogram (mg/kg) to the commercial/industrial standard of 500 mg/kg. Since the proposed use of the Property is a light rail station, lead concentrations of up to 500 mg/kg were deemed to remain protective of future users of the Property with certain institutional controls in place. DTSC approved the proposed change, but requested an Explanation of Significant Differences (ESD) for review. The ESD was approved by DTSC on April 20, 2023.

Tetra Tech and Pacific States remobilized to the Property and continued excavation activities in May 2023. On June 14, 2023, Tetra Tech provided a summary of existing confirmation results that included a figure showing sample locations. Based on review of

the summary, as well as a Draft Response Action Completion Report, DTSC concluded that lead and arsenic concentrations exceeding RAGs likely extend under North 12th Street and the existing light rail ROWs.

Lead and Arsenic Below Right-of-Way

Due to the presence of North 12th Street and existing light rail ROW, soils with lead and arsenic concentrations above RAGs have been excavated to the extent feasible in the western direction of the Property. Based on confirmation sampling data, lead in soil exceeding the RAG of 500 mg/kg remains along the western boundary at multiple points with a peak concentration of 4,900 mg/kg observed in sample TRLR-CSS-89-EX-SW-4.0. This concentration also exceeds the California hazardous waste criteria of 1,000 mg/kg for lead, meaning that if excavated, the soils must be handled and properly disposed as a California hazardous waste. In addition, workers potentially exposed to these hazardous waste concentrations should be HAZWOPER trained/certified. Lead in soil concentrations below the California hazardous waste criteria but exceeding the unrestricted (residential) standard of 80 mg/kg may also present a potential health concern for construction workers and the soil may not be suitable for reuse without additional assessment. Arsenic concentrations exceeding the RAG of 9 mg/kg, at concentrations up to 200 mg/kg, also remain in multiple points along the existing light rail ROW. The RAG for arsenic was based on site-specific background levels of arsenic.

DTSC believes that these concentrations are the result of lead and arsenic contained in imported fill material that was historically used to backfill this region and likely extends under North 12th Street and the existing light rail ROWs. There is no indication that the concentrations are due to releases or former operations on the Light Rail Property or overall Twin Rivers Triangle Site. Please refer to the enclosed figure depicting soil sample locations along the ROW that exceeded one or more of the unrestricted RAGs of 9 mg/kg for arsenic and 80 mg/kg for lead. It should be noted that these results are representative of discrete sampling locations and other locations may have different results due to the heterogeneity of the soil.

DTSC Recommendations

Based on remaining lead and arsenic concentrations that are assumed to extend under North 12th Street and the existing light rail ROWs, DTSC recommends the City and SacRT take the following precautions for any intrusive activities that may include roadwork or maintenance of utilities underlying paved surfaces in these areas to protect potential employees, subcontractors, and/or the public who may become exposed:

- Preparation of a Community Air Monitoring Plan (CAMP) per DTSC's CAMP Guidance to help minimize the amount of fugitive emissions (dust) containing these compounds generated during work;
- Preparation of a Soil Management Plan (SMP) that describes the procedures for identifying, handling, sampling, and disposing of contaminated soil. The SMP should also include information regarding the potential hazards and safety measures to be implemented during the work to ensure worker safety.

Submittal of the aforementioned documents for DTSC's review under an oversight agreement with the City and/or SacRT is recommended to ensure the protectiveness to human health and the environment. Oversight applications must be submitted via DTSC's Fluxx portal. Additional information regarding DTSC's voluntary oversight agreements is available online.

Additional information regarding the Property and overall Twin Rivers Triangle Site can be reviewed via the Site's EnviroStor profile via the link below. Please note that the EnviroStor profile is regularly updated and information contained therein is subject to change.

If you have any additional questions, please contact the DTSC Project Manager Abraham Serrato at 916-255-3657 or via email at Abraham.Serrato@dtsc.ca.gov.

Sincerely,

Lora Jameson

TYPE OF FILL: UNKNOWN; POSSIBLY RUBBISH OR STREET CLEANING MATERIAL
METHOD OF FILLING: UNKNOWN

7. APPROXIMATE PERIOD OF FILLING: (A) PRE 1961 (B) 1968-1971
TYPE OF FILL: (A) UNKNOWN; (B) GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: (A) UNKNOWN; (B) PROBABLE MODERATE COMPACTION, SOIL COVERED

8. APPROXIMATE PERIOD OF FILLING: PRE 1961
TYPE OF FILL: GARBAGE
METHOD OF FILLING: LITTLE COMPACTION, SOIL COVERED

9. APPROXIMATE PERIOD OF FILLING: PRE 1961
TYPE OF FILL: GARBAGE
METHOD OF FILLING: LITTLE COMPACTION, SOIL COVERED

10. APPROXIMATE PERIOD OF FILLING: 1961 - 1963
TYPE OF FILL: GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: DEEP BORROW EXCAVATION, LITTLE COMPACTION, SOIL COVERED, UNDERGROUND FIRES AND MAJOR SUBSIDENCE

11. APPROXIMATE PERIOD OF FILLING: 1963 - 1968
TYPE OF FILL: UNKNOWN
METHOD OF FILLING: UNKNOWN

12. APPROXIMATE PERIOD OF FILLING: (A) 1963 - 1968 (B) 1968-1971
TYPE OF FILL: GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: (A) LITTLE TO MODERATE COMPACTION, SOIL COVERED (B) PROBABLY MODERATE COMPACTION, SOIL COVERED

15. APPROXIMATE PERIOD OF FILLING: 1968 - 1971
TYPE OF FILL: GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: DEEP BORROW EXCAVATION, PROBABLY MODERATE COMPACTIOIN, SOIL COVERED

16. APPROXIMATE PERIOD OF FILLING: 1968 - 1971
TYPE OF FILL: GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: DEEP BORROW EXCAVATION, PROBABLY MODERATE COMPACTION, SOIL COVERED

17. APPROXIMATE PERIOD OF FILLING: 1968 - 1971
TYPE OF FILL: NOT KNOWN, NOT PART OF LANDFILL
METHOD OF FILLING: NOT KNOWN

25. APPROXIMATE PERIOD OF FILLING: (A) 1981 - 1984 (B) 1981 - 1986
TYPE OF FILL: SEDIMENT POND, NOT PART OF LANDFILL
METHOD OF FILLING: (A) EXCAVATED POND (B) HYDRAULIC FILL

LANDFILL AREAS

1 APPROXIMATE PERIOD OF FILLING: 1940 - 1949
TYPE OF FILL: GARBAGE
METHOD OF FILLING: OPEN DUMP, NO CELLS, LITTLE SOIL COVER, SPONTANEOUS FIRES

2 APPROXIMATE PERIOD OF FILLING: (A) PRE 1950 (B) 1950 - PRE 1961
TYPE OF FILL: (A) BURNED RUBBISH (B) GARBAGE
METHOD OF FILLING: (A) BURNED (B) LITTLE COMPACTION, SOIL COVERED

5 APPROXIMATE PERIOD OF FILLING: 1950 - 1959
TYPE OF FILL: INERT MATERIALS AND BURN PIT ASH
METHOD OF FILLING: UNKNOWN

6 APPROXIMATE PERIOD OF FILLING: PRE 1961
TYPE OF FILL: UNKNOWN; POSSIBLY RUBBISH OR STREET CLEANING MATERIAL
METHOD OF FILLING: UNKNOWN

7 APPROXIMATE PERIOD OF FILLING: (A) PRE 1961 (B) 1968-1971
TYPE OF FILL: (A) UNKNOWN; (B) GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: (A) UNKNOWN; (B) PROBABLE MODERATE COMPACTION, SOIL COVERED

8 APPROXIMATE PERIOD OF FILLING: PRE 1961
TYPE OF FILL: GARBAGE
METHOD OF FILLING: LITTLE COMPACTION, SOIL COVERED

9 APPROXIMATE PERIOD OF FILLING: PRE 1961
TYPE OF FILL: GARBAGE
METHOD OF FILLING: LITTLE COMPACTION, SOIL COVERED

10 APPROXIMATE PERIOD OF FILLING: 1961 - 1963
TYPE OF FILL: GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: DEEP BORROW EXCAVATION, LITTLE COMPACTION, SOIL COVERED, UNDERGROUND FIRES AND MAJOR SUBSIDENCE

11 APPROXIMATE PERIOD OF FILLING: 1963 - 1968
TYPE OF FILL: UNKNOWN
METHOD OF FILLING: UNKNOWN

12 APPROXIMATE PERIOD OF FILLING: (A) 1963 - 1968 (B) 1968-1971
TYPE OF FILL: GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: (A) LITTLE TO MODERATE COMPACTION, SOIL COVERED (B) PROBABLY MODERATE COMPACTION, SOIL COVERED

15 APPROXIMATE PERIOD OF FILLING: 1968 - 1971
TYPE OF FILL: GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: DEEP BORROW EXCAVATION, PROBABLY MODERATE COMPACTION, SOIL COVERED

16 APPROXIMATE PERIOD OF FILLING: 1968 - 1971
TYPE OF FILL: GARBAGE, RUBBISH, STREET CLEANINGS
METHOD OF FILLING: DEEP BORROW EXCAVATION, PROBABLY MODERATE COMPACTION, SOIL COVERED

17 APPROXIMATE PERIOD OF FILLING: 1968 - 1971

Approximate Period of Filling: 2040 - 2049
Type of Fill: Garbage
Method of Filling: Open dump, no cells, little soil cover, spontaneous fires

Approximate Period of Filling: (A) 1961-1964 (B) 1971-1984
Type of Fill: Sediment pond, not part of landfill
Method of Filling: (A) Excavated pond (B) hydraulic fill

Approximate Period of Filling: 1961-1963
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, little compaction, soil covered, underground fires and major subsidence

Approximate Period of Filling: 1966-1971
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, probably moderate compaction, soil covered

Approximate Period of Filling: Pre1961
Type of Fill: Unknown; possibly rubbish or street cleaning material
Method of Filling: Unknown

Approximate Period of Filling: 1950-1959
Type of Fill: Rubbish
Method of Filling: Operated as a public dump by a salvage operator-contractor.

Approximate Period of Filling: 1950-1959
Type of Fill: Rubbish
Method of Filling: Operated as a public dump by a salvage operator-contractor. Enclosed daily

Approximate Period of Filling: 1976-1981
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Two foot lifts, well compacted, soil covered cells

Approximate Period of Filling: 1966-1967
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Two foot lifts, well compacted, soil covered cells

Approximate Period of Filling: 1963-1964
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Two foot lifts, well compacted, soil covered cells

Approximate Period of Filling: 1974-1976
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Two foot lifts, well compacted, soil covered cells

Approximate Period of Filling: 1972-1974
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Two foot lifts, well compacted, soil covered cells

Approximate Period of Filling: 1966-1971
Type of Fill: Not known, not part of Landfill
Method of Filling: Not known

Approximate Period of Filling: Pre1961
Type of Fill: Garbage, rubbish, street cleaning
Method of Filling: Little compaction, soil covered, underground fires and major subsidence

Approximate Period of Filling: Pre1961
Type of Fill: Garbage
Method of Filling: Little compaction, soil covered

Approximate Period of Filling: 1963-1966
Type of Fill: Unknown
Method of Filling: Unknown

Approximate Period of Filling: (A) Pre1961; (B) 1966-1971
Type of Fill: (A) Unknown; (B) garbage, rubbish, street cleanings
Method of Filling: (A) Unknown; (B) probable moderate compaction, soil covered

Approximate Period of Filling: 1966-1971
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, probably moderate compaction, soil covered

Approximate Period of Filling: 1971-1972
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, probably moderate compaction, soil covered

Approximate Period of Filling: 1966-1971
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, probably moderate compaction, soil covered

Approximate Period of Filling: 1966-1971
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, probably moderate compaction, soil covered

Approximate Period of Filling: Pre1961
Type of Fill: Garbage
Method of Filling: Little compaction, soil covered

Approximate Period of Filling: (A) Pre1950; (B) 1950-Pre1961
Type of Fill: (A) burned rubbish; (B) garbage
Method of Filling: (A) burned (B) little compaction, soil covered

Approximate Period of Filling: 1963-1966
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, little to moderate compaction, soil covered

Approximate Period of Filling: (A) 1963-1966; (B) 1966-1971
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: (A) little to moderate compaction, soil covered (B) probably moderate compaction, soil covered

Approximate Period of Filling: 1971-1972
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, probably moderate compaction, soil covered

Approximate Period of Filling: 1966-1971
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, probably moderate compaction, soil covered

Approximate Period of Filling: 1966-1971
Type of Fill: Garbage, rubbish, street cleanings
Method of Filling: Deep borrow excavation, probably moderate compaction, soil covered

Approximate Period of Filling: Pre1961
Type of Fill: Garbage
Method of Filling: Little compaction, soil covered

Approximate Period of Filling: 1966-1966
Type of Fill: Soil (dike)
Method of Filling: Placed in thin lifts, compacted

Approximate Period of Filling: 1971-1972
Type of Fill: Soil (Dike)
Method of Filling: Placed in thin lifts, compacted

* ELEVATION CONTROL NOTES	* SHEET LEGEND
1. BASE SURVEY PROVIDED BY CITY OF SACRAMENTO, JUNE 11, 2024. HORIZONTAL AND VERTICAL DATUM ASSUMED FOR NORTHING AND EASTINGS PROVIDED HERE IS FOUND BRASS DISK AT PROPERTY CORNER APN:003-0032-028 & APN:003-0032-0030, ELEVATION 42.18' AND ARE BASED IN NORTH AMERICAN DATUM 1983, CALIFORNIA STATE PLANES, ZONE II.	6-IN PERFORATED HDPE TOE DRAIN (APPROX. 2010 LF)
2. ALL ELEVATIONS ARE GIVEN AS FEET MEAN SEA LEVEL.	* NOTES AND LEGEND ENTRIES FOR GHD CIVIL DESIGN
3. APPROXIMATE LOCATIONS ARE GIVEN FROM IMAGE AND GIS DATA. ACTUAL LOCATION MUST BE DETERMINED BY CONTRACTOR PRIOR TO EXCAVATION.	

LFG DESIGN NOTES:

1. TO NOT HAVE A CONDENSATE SUMP, LIMITED PIPE SLOPE MUST BE USED (AT LOCATIONS SHOWN).
2. SIX (6) LFG WELL CONFIGURATION.

LFG DESIGN LEGEND:

- CS-2 — VERTICAL LFG EXTRACTION WELL
- RWH-5 — REMOTE WELL HEAD FOR EXTRACTION WELL
- VW-2 — VENT RISER (PRESSURE RELIEF FOR CLOSURE CAP)
- VENT RISER STRIP (12.5' WIDTH)
- S-37 — LFG MIGRATION PROBE

DRAWING NOTES:

1. FOUNDATION CONTOURS PROVIDED BY GHD TO SCS FOR USE IN THIS DRAWING. DESIGN DRAWING DATED 10/17/2024.
2. SURVEY CONTROL FOR LFG IMPROVEMENTS PROVIDED BY GHD.
