RE: MARB D-1 GATEWAY AVIATION PROJECT

Dear Mr. Reeves:

This letter is pursuant to a request from DRC Engineering, Inc., expressing the developer's wish to move forward with the MARB D-1 Gateway Aviation project and request for a status update from Western Municipal Water District (Western Water) staff.

As previously discussed, Western Water has an existing Interconnection Agreement with Eastern Municipal Water District (Eastern) for supplemental water to the March Air Reserve Base (MARB) for potable and fire flow service. This is achieved through various interconnections between our agencies, including the newly constructed Connection No. 6 located at Cactus Avenue and Riverside Avenue. However, you are requesting a modification of how an existing interconnection is used which would require an amendment to the Agreement between Western Water and Eastern. Once these terms are determined, the amendment to the Agreement is brought before each member agencies Board (Western Water and Eastern) for approval to authorize its execution.

Additionally, Western Water was made aware that a proponent for the development contacted Eastern staff directly on February 26, 2024, to inquire about sewer service to the site. As the D-1 Gateway Aviation project falls within Western Water's jurisdictional area, coordination efforts for this project must be made with Western Water staff rather than Eastern staff. If a direct connection for service to Eastern's facilities is approved for the development, Western Water staff will contact Eastern staff on your behalf. Please direct your staff and engineer to contact Western Water staff directly for any of your future developments for water, recycled water, and sanitary sewer services located within Western Water's jurisdiction. It is important to note that a direct connection to Eastern's sanitary sewer system will also require approval from Western Water's Board of Directors.

Please note any requests made to Western Water's Board of Directors require an additional one to two months to allow staff time to prepare the necessary documentation for review. We will keep you informed with any updates and appreciate your patience as we are progressing with your project.

Should you have any further questions regarding this matter, please contact me at (951) 571-7250 or by email at ghan@wmwd.com.
