Subject: **Phase I Environmental Site Assessment**
Mulligan Family Fun Center
1351, 1355, and 1361 West Sepulveda Boulevard
Los Angeles, California

Dear Ms. Andes:

Ardent Environmental Group, Inc. (Ardent) has performed a Phase I Environmental Site Assessment (ESA) of the above-referenced property (site). Work was completed in general accordance with Ardent's proposal dated June 6, 2020. The attached report presents our methodology, findings, opinions, and conclusions regarding the environmental conditions at the site. We appreciate this opportunity to be of service to you. If there are any questions, please feel free to call the undersigned at your convenience.

Sincerely,
Ardent Environmental Group, Inc.

EXECUTIVE SUMMARY

Ardent Environmental Group, Inc. (Ardent) was retained by Allen Matkins Leck Gamble Mallory & Natsis LLP (Allen Matkins) on behalf of its client, Bridge Acquisition LLC (Bridge), to perform a Phase I Environmental Site Assessment (ESA) for the property located at 1351, 1355, and 1361 West Sepulveda Boulevard in the city of Los Angeles, California (site). It should be noted that the site mailing address was found to be in the city of Torrance, California. The site is located within an oil field and comprises three separate parcels. The site has historically been used for oil production, residential purposes, industrial operations, concrete distribution, office space, and as a family amusement park. The site is currently unoccupied. Bridge is considering purchasing the site for redevelopment with a commercial warehouse building. Document review and site assessment activities for this report were conducted between July 7, 2020 and July 29, 2020.

In summary, the following items were noted:

- The site is located within the Torrance Oil Field. Six oil wells were installed throughout the site between 1924 and 1925. Five of the wells were plugged and abandoned by 1930. One oil well, identified as Sloan 1, remained in intermittent operation until it was plugged and abandoned in 1965. Historical aerial photographs indicate that the site was primarily used for residential purposes or was vacant land from approximately 1947 to at least 1952.
- Western Brass Works, an industrial facility, was historically located along the eastern border of the site. From approximately 1952 to 1994, Western Brass works expanded its operations onto Parcel 3 and used the site for staging, storage, and other unknown operations. An outbuilding of unknown usage was noted in the northeastern portion of the Parcel 3 from at least 1970 through 1994. There is no evidence that Western Brass Works used PCE or other VOCs onsite.
- Associated Ready Mix and Concrete occupied Parcel 2 as a concrete batch plant from at least 1963 through 2012. A 12,000-gallon diesel underground storage tank (UST), used to fuel fleet vehicles, was installed at an unknown date and was removed by Associated Ready Mix and Concrete as part of their site closure activities. Removal of the 12,000-gallon diesel UST was completed under the oversight of the city of Los Angeles Fire Department (LAFD) and documented by Roux Associates, Inc. (Roux). Three confirmation soil samples were collected from the excavation as part of the removal. According to Roux, one sample contained elevated concentrations of petroleum hydrocarbons in the diesel range above the LAFD action threshold. Following the completion of supplemental investigation by Roux, the elevated levels of petroleum hydrocarbons were determined to be limited in extent and potentially due to historical oil production activities. Based on this information, the Los Angeles County Fire Department issued a No Further Action (NFA) for the former feature.
- From approximately 1952 to at least 1963, Parcel 1 was used for residential purposes or was vacant land (in addition to oil well operation). By 1970, an office building was constructed in the northeastern portion and the surface was paved for use as a parking lot.

From at least 1970 to approximately 1977, Western Brass Works used the northern portion of the parcel for storage. In 1993, Mulligan Family Fun Center (Mulligan) redeveloped Parcel 1 for use as a family amusement park, including a mini golf course, go-kart track, batting cages, parking lot, and expansion of the existing office building into an arcade, kitchen, and laser tag building. Mulligan incorporated Parcel 3 into the property in 2001, including redevelopment of the parcel for use as a parking lot, maintenance building, and go-kart racetrack. An office building was constructed in the northwestern portion of the site for use by the northern adjacent golf driving range in 2001, and was demolished by 2009. In 2020, the maintenance building on Parcel 3 was demolished.

- Groundwater has been reported in the site vicinity at a depth of approximately 65 to 69 feet below the ground surface (bgs) and has been reported with variable flow from southwest to southeast.
- In 2019, Roux completed Phase I and Phase II work at the site, comprising the outlining of eight areas of environmental concern and the collection of soil and soil gas samples to investigate these areas. Laboratory results of soil gas samples indicated elevated concentrations of volatile organic compounds (VOCs), specifically benzene (150 micrograms per cubic meter [µg/m^3]) and ethylbenzene (93 µg/m^3) in the southeastern portion of the site, tetrachloroethylene (PCE; 1,900 µg/m^3) in the northeastern portion of the site, and trichloroethylene (TCE; 410 µg/m^3) in the southwestern portion of the site. Additionally, Roux noted that the site is located within a methane zone in the City of Los Angeles. Based on the results of these investigations, Roux concluded that a vapor intrusion mitigation system (VIMS) should be installed prior to redevelopment to mitigate methane emissions and possible vapor intrusion from VOCs.
- Elevated concentration of VOCs (primarily PCE and TCE) have been detected in soil, soil vapor, and groundwater at the Multi-Tenant Office-Warehouse facility located approximately 0.1-mile northwest of the site, indicating a historical release at this facility. Based on this information and the elevated concentrations of VOCs detected in previous investigations on-site, contaminants may have migrated onto the site from this release.
- Due to the presence the site within a known Methane Zone in the City of Los Angeles, future redevelopments will be required to comply with local (LADBS) and state (CalGEM) requirements for abandoned oil wells, which may include leak tests and/or re-abandonment of wells in accordance with current standards. Prior to redevelopment, a licensed petroleum engineer should be retained to review the records of each abandoned well and provide recommendations based on these regulatory requirements.
- Due to the presence of VOCs detected in previous soil gas sampling conducted at the site, historical oil production activities, possible historical degreasing operations, and the off-site release noted above, additional investigations should be conducted to better characterize the impacted subsurface media and a vapor barrier will likely be required to be installed and maintained under any future buildings.
- No other on- or off-site environmental concerns were noted.

CONCLUSIONS

Ardent has performed this Phase I ESA in general conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527-13, ASTM Standard E 2600-15, and the EPA Standards and Practices for All Appropriate Inquiries (AAI), Final Rule (40 CFR, Part 312), for the property located at 1351, 1355, and 1361 West Sepulveda Boulevard, in the city of Los Angeles, California. Any limitations or exceptions encountered during completion of this report are stated in Section 1.4. No evidence or indication of RECs, historical-RECs (HRECs), controlled-RECs (CRECs), or de minimis environmental conditions (i.e., conditions that generally do not present a material risk of harm to public health or the environment) have been revealed, except for the following:

RECs

- Petroleum hydrocarbon impacted shallow soil from historical oil field production activities at the site.
- Potential for migration of VOCs into soil, soil gas, and groundwater on-site from the historical release at the Multi-Tenant Office-Warehouse located northwest of the site.
- Potential VOC contamination from possible historical degreasing operations at the Western Brass Works outbuilding in the northeastern portion of the site.
- The site is located within a known methane zone in the city of Los Angeles.

HRECs

- The 12,000-gallon diesel UST formerly located on Parcel 2.

CRECs

- No CRECs have been identified during completion of this Phase I ESA.

De Minimis Conditions

- No de minimis conditions have been identified during completion of this Phase I ESA.

RECOMMENDATIONS

Based on the information obtained during this assessment, Ardent recommends the following:

- A subsurface investigation should be completed to assess possible contamination in areas not previously investigated.
    - Soil borings should be advanced to screen for possible shallow contamination from oil field activities.

  - Soil gas samples should be collected to screen for the possible presence of VOCs originating from the off-site plume and former on-site industrial activities.

- Prior to redevelopment of the site, a work plan must be submitted to the LADBS for review and approval in accordance with Ordinance No. 175790 and Site Testing Standards for Methane (Public Building Code Document No. P/BC 2014-101). The LADBS will require future buildings to be constructed with a methane mitigation system with a design based on the investigation results.
- A licensed petroleum engineer should review the well logs for each of the on-site oil wells and the locations of the wells with respect to proposed redevelopment to assess whether the wells will need to be re-abandoned.

1. INTRODUCTION

Ardent Environmental Group, Inc. (Ardent) was retained by Allan Matkins Leck Gamble Mallory & Natsis LLP (Allen Matkins) on behalf of its client, Bridge Acquisition LLC (Bridge), to perform a Phase I Environmental Site Assessment (ESA) the property located at 1351, 1355, and 1361 West Sepulveda Boulevard in the city of Los Angeles, California (site; Figure 1). Work was conducted in general accordance with Ardent's proposal dated June 6, 2020. The site is located within an oil field and comprises three separate parcels. The site has historically been used for oil production, residential purposes, industrial operations, concrete distribution, office space, and as a family amusement park. The site is currently unoccupied. Bridge is considering purchasing the site for development with a commercial warehouse building. The following sections identify the purpose, the involved parties, the scope of work, and the limitations and exceptions associated with the Phase I ESA.

1.1. Purpose of Phase I ESA

In accordance with the American Society for Testing and Materials (ASTM) E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM Standard E 1527-13), the objective of the Phase I ESA was to identify, to the extent feasible pursuant to ASTM Standard E 1527-13, recognized environmental conditions (RECs), historical-RECs (HRECs), controlled-RECs (CRECs), or conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the subject property.

ASTM defines RECs as "…the presence or likely presence of any hazardous substance or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." ASTM defines HRECs as "…a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." ASTM defines CRECs as a REC "…resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority

(for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

Other environmental considerations include Site features or conditions that may have an environmental component of interest but which do not meet the ASTM definition of a REC, CREC, or HREC. ASTM does not necessarily require any actions to address the presence or condition, but such conditions are identified for the sake of thoroughness and completeness.

The United States Environmental Protection Agency ("USEPA" or "EPA") has stated that ASTM Standard E 1527-13, is consistent with the Standards and Practices for All Appropriate Inquires (AAI), Final Rule (40 Code of Federal Regulations [CFR], Part 312) and is compliant with the statutory criteria for all appropriate inquires. All appropriate inquires, as defined in the AAI Final Rule, must be conducted by persons seeking the landowner liability protections under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) prior to acquiring a property or seeking or receiving federal Brownfields grants under the authorities of CERCLA. The purpose of AAI, as defined in the AAI Final Rule, was to identify releases and threatened releases of hazardous substances which cause or threaten to cause the incurrence of response costs.

As part of this Phase I ESA, Ardent also assessed whether a vapor encroachment condition (VEC) exists at the site. The VEC assessment was completed following the ASTM E 2600-15 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (ASTM Standard E 2600-15). The objective of this work was to evaluate whether possible contaminants (e.g. volatile organic compounds [VOCs]) are present in soil and/or groundwater in the site vicinity which might pose a possible vapor intrusion into existing or future buildings at the site.

1.2. Involved Parties

Mr. Matthew Penksaw of Ardent conducted the historical research, site reconnaissance, regulatory inquiries, and document review. Mr. Craig Metheny of Ardent completed oversight

and management. Mr. Metheny meets the definition of an environmental professional as set forth in the AAI Final Rule.

1.3. Scope of Work

Ardent's scope of work for this Phase I ESA is consistent with ASTM Standard E1527-13. The scope of work included the activities listed below.

- **Review of User Provided Information** – Review of information regarding title and judicial records for environmental liens or activity and use limitations, recorded environmental liens, actual or specialized knowledge or commonly known information regarding environmental conditions at the site, the relationship of the purchase price of the property to the fair market value, readily available maps, environmental reports, and other environmental documents pertaining to the site, as available and obtained from the user/client.
- **Records Review** – Acquisition and review of records, including federal, state, tribal, and local regulatory agency databases, for the site and for properties located within a specified radius of the site; local regulatory agency files for the site and selected nearby properties of potential environmental concern; physical setting sources, including topographic maps, geologic maps, and geologic and hydrogeologic reference documents; and historic land use information including aerial photographs, historical fire insurance rate maps, building department records, and city directories, as necessary, that are reasonably ascertainable, publicly available, can be obtained within reasonable time and cost, and are practically reviewable.
- **Vapor Encroachment Condition (VEC)** – Review available regulatory and client provided data to assess Tier 1 non-numeric screening for the site. Ardent evaluated whether contaminants were present in soil and/or groundwater in the site vicinity which might pose a VEC at the site.
- **Site Reconnaissance** – Performance of a site reconnaissance to visually observe the site and any structure(s) located on the site to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles. The purpose of the site reconnaissance is to obtain information indicating the likelihood of identifying RECs in connection with the site, including the general site setting, site usage, use and storage of hazardous materials and petroleum products, disposal of waste products and materials, sources of polychlorinated biphenyls (PCBs), and evidence of releases and possible risks of contamination from activities at adjacent properties.
- **Interviews** – Interviews with site representatives, including owners, occupants, and site managers, regarding the environmental condition of the site to the extent necessary and such persons are available. Interviews with state and/or local government officials as necessary.
- **Report** – Evaluation of the information and data obtained by the Phase I ESA process outlined above and preparation of this Phase I ESA report documenting findings and providing opinions and conclusions regarding possible environmental impacts and RECs at the site.

1.4. Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard-of-care exercised by environmental consultants performing similar work in the project area. No warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ardent should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

The findings, opinions, and conclusions are based on an analysis of the observed site conditions and the referenced literature. It should be understood that the conditions of a site could change with time as a result of natural processes or the activities of man at the subject property or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ardent has no control. Ardent cannot warrant or guarantee that not finding indicators of any particular hazardous material means that this particular hazardous material or any other hazardous materials do not exist on the site. Additional research, including invasive testing, can reduce the uncertainty, but no techniques now commonly employed can eliminate the uncertainty altogether.

1.5. Special Terms and Conditions

As indicated in Section 13.1.5 of ASTM Standard E 1527-13, the following, which is not intended to be all inclusive, represents out-of-scope items with respect to a Phase I ESA: asbestos-containing materials (ACMs), radon, lead-based paint (LBP), lead in drinking water, wetlands, regulatory compliance, cultural and historic risk, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, biological agents, and mold. As part of our agreement with the client and as included within the Phase I Environmental Site Assessment Scope of Work, Ardent visually assessed site buildings (if present) for possible ACMs, LBP, and mold and researched the potential for radon exposure

at the site. In addition, ASTM Standard E 2600-15 supplements the ASTM Standard E 1527-13 to include evaluation of VEC using Tier 1 screening.

This study did not include an evaluation of geotechnical conditions or potential geologic hazards. In addition, Ardent did not address interpretations of zoning regulations, building code requirements, or property title issues.

1.6. User Reliance

This report may be relied upon and is intended exclusively for use by Bridge, its partners, members, investors, affiliates, successors and assigns, and lenders. Any use or reuse of the findings, opinions, and/or conclusions of this report by parties other than the foregoing parties is undertaken at said parties' sole risk.

1.7. Physical Limitations

No physical limitations were encountered during the completion of this Phase I ESA report.

1.8. Data Gaps

No significant data gaps were noted during the preparation of this Phase I ESA report.

2. GENERAL SITE CHARACTERISTICS

The following sections describe the location and the current uses of the site and adjacent properties. A site location map is presented as Figure 1, and a site plan and vicinity map is presented as Figure 2. Selected photographs of the site and surrounding properties are provided in Appendix A.

2.1. Location and Legal Description

The site comprises three parcels, identified by the Los Angeles County Assessor's Parcel Numbers (APNs) and addresses as follows (Figure 2):

Parcel 1: 7347-018-078; 1351 and 1355 Sepulveda Boulevard
Parcel 2: 7347-018-003; 1361 Sepulveda Boulevard
Parcel 3: 7347-018-085; No address associated

It should be noted that while the properties are registered in the city of Los Angeles, their postal addresses are listed in Torrance. The site consists of an irregular-shaped property,

including Parcel 1 (0.8-acre), Parcel 2 (5-acres), and Parcel 3 (1.6-acres) comprising approximately 7.4-acres in total.

The site is bounded to the north by Murad Skincare, to the east by Seacrest Homes Apartments, to the south by West Sepulveda Boulevard, and to the west by Guru Digital Media (Figure 2). Site boundary information was provided during the site reconnaissance and from information provided by the client.

2.2. Site Description and Current Site Uses/Operations

The following paragraphs present a description of the structures present at the site, the tenants currently occupying the site, the activities being conducted on-site, the heating and cooling systems utilized in the site building, the sewage disposal system, and the potable water provider for the site, if any.

2.2.1. Site Description

The site is currently unoccupied, but was most recently used as a concrete batch plant and as a family amusement park. Parcels 1 and 3 contain the former family amusement park facilities and Parcel 2 contains a former concrete batch plant (Figure 2).

2.2.2. Occupants

The site is currently unoccupied.

2.2.3. Heating and Cooling Systems

Heating and cooling systems utilized by the former occupant of the site, Mulligan Family Fun Center (Mulligan), were powered by electricity and/or natural gas provided by the local municipal provider.

2.2.4. Sewage Disposal

On-site septic systems, such as septic tanks or leach fields were not historically reported for the site.

2.2.5. Potable Water

Potable water was provided to the site by the municipal water provider.

2.3. Adjacent Properties

In general, the site vicinity is used for mixed residential, commercial, retail, and oil production (Figure 2). Murad Skincare, a skin care products manufacturing facility, is located immediately north of the site. Seacrest Homes Apartments is located immediately east. West Sepulveda Boulevard bounds the site to the south, followed by residential neighborhoods and one active oil well. Guru Digital Media, a manufacturer of signs and electronic message centers, bounds the site to the west. Site boundary information was provided during the site reconnaissance and information provided by the client.

No above ground storage tanks (ASTs), evidence of underground storage tanks (USTs), or possible hazardous materials or wastes were noted being used or stored by off-site facilities along the property line with the site. These off-site properties would not be considered an environmental concern to the site.

3. USER PROVIDED INFORMATION

The following sections summarize information provided by the user to assist the environmental professional in identifying the possibility of RECs in connection with the subject property. A copy of the user questionnaire as completed by Mr. Rosendo Solis of Bridge is presented in Appendix B.

3.1. Current Title Information

A Preliminary Title Report, dated August 6, 2019, prepared by Fidelity National Title Company was provided by the client for review. According to the Preliminary Title Report, the site is currently owned by “Thomas Grzywacz, Successor Trustee of the Georgia S. Claessens Living Trust.” A copy of the Preliminary Title Report is included in Appendix B.

3.2. Environmental Liens or Activity and Use Limitations

Based on a review of the provided Preliminary Title Report, no records of environmental liens or activity and use limitations (AULs) associated with the site were noted. According to the client, no Land Use Covenant (LUC) has been recorded against the property.

3.3. Specialized Knowledge

According to Mr. Solis, no specialized knowledge or experience pertaining to the site or the adjacent properties that is material to RECs in connection with the subject property were noted.

3.4. Commonly Known or Reasonably Ascertainable Information

Mr. Solis was aware of the former oil production on the site. No other commonly known or reasonably ascertainable information was provided by Bridge.

3.5. Valuation Reduction for Environmental Issues

In a transaction involving the purchase of a parcel of commercial real estate, the user shall consider the relationship of the purchase price of the property to fair market value of the property if the property was not affected by hazardous substances or petroleum products. According to Mr. Solis, the purchase price of the property reflects the fair market value.

3.6. Reason for Performing Phase I ESA

Ardent was retained by Allen Matkins, on behalf of Bridge, to perform the Phase I ESA as part of its due diligence activities associated with the purchase of the site.

3.7. Other User Provided Information

Ardent obtained documentation of the removal of a 12,000-gallon diesel UST formerly located on Parcel 2 by searching the State Water Quality Control Board (SWQCB) GeoTracker database. The client also provided Ardent with copies of two reports completed by Roux Associates, Inc. (Roux) for the site. The following is a summary of the information contained in these documents.

3.7.1. Former 12,000-Gallon Diesel UST

Based on Ardent's review of the *Soils Report Underground Storage Tank Removal*, dated September 5, 2012, prepared by Roux, a 12,000-gallon diesel fuel UST was previously located on Parcel 2. The former 12,000-gallon UST was used to refuel fleet vehicles associated with the former concrete batch plant. On July 26, 2012, the 12,000-gallon UST was removed and confirmation samples were collected at 15 feet bgs from beneath the former UST in the eastern, central, and western areas of the excavation under the supervision of the City of Los Angeles Fire Department (LAFD). Laboratory

results of the central soil sample (Roux-GC-UST-Pit-CTR) indicated low levels of petroleum hydrocarbons in the diesel range (C_{10} – C_{28}) at 150 milligrams per kilogram (mg/kg), which exceeded the LAFD action levels of 100 mg/kg. The LAFD issued a Fire/Safety Violation to the site on November 21, 2012, which required additional investigation of the area.

To satisfy these requirements, Roux submitted a *Site Assessment Report,* dated April 19, 2013, documenting the completion of additional work under the oversight of the LAFD. This investigation comprised the advancement of one soil boring to 40 feet below the ground surface (bgs) in the location of sample Roux-GC-UST-Pit-CTR and the collection of soil samples at five-foot intervals from 15 to 40 feet bgs. Laboratory results of the soil samples indicated no detectable to low concentrations of VOCs. Petroleum hydrocarbons in the diesel range were detected at low concentrations in the 15 and 20 foot samples, (110 and 580 mg/kg), elevated concentrations in the 25 foot sample (19,000 mg/kg), and no detectable concentrations below the laboratory reporting limit (<5 mg/kg) in the 30, 35, and 40 foot samples. Based on these results and previously noted field observations, Roux concluded that the elevated levels of petroleum hydrocarbons were limited in extent, terminating at 25 feet bgs, and was likely due to factors other than the former 12,000-gallon UST (e.g. previous oil field activities). Based on this report, the LAFD issued a no further action (NFA) letter to the site on June 12, 2013. Based on this information, the former UST would not be considered an environmental concern to the site. However, shallow petroleum hydrocarbon impacted soil is present and may be encountered during future redevelopment activities.

3.7.2. Roux Phase I and Phase II

Ardent reviewed the *Phase I Environmental Site Assessment* (Phase I ESA), dated December 13, 2019 and the *Phase II Subsurface Investigation Letter Report* (Phase II), dated December 13, 2019, prepared by Roux for Cummins & White, LLP.

According to Roux, at the time these reports were prepared, Parcel 2 was unoccupied and vacant with the exception of the derelict concrete batch plant. Parcels 1 and 3 were occupied by Mulligan and site improvements included two buildings (one occupied by a laser tag facility, café, kitchen, arcade, event space, and offices; the other by storage

space and repair shops for go-karts and arcade games), a miniature golf course, two go-kart tracks, a paddle boat pond, batting cages, a rock-climbing wall, asphalt-paved parking areas, and miscellaneous other improvements (e.g. sheds, canopies, picnic tables, concrete paved walkways, and landscaping).

Based on the results of the Phase I, Roux identified the following RECs, hRECs, and other environmental features (OEFs; defined as environmental conditions that do not meet the definition of a REC, but which may warrant mention in a comprehensive Phase I ESA) on the site:

- REC 1 – Former and current oil development on-site and in the site vicinity.
- REC 2 – Unknown fill material imported during construction of the miniature golf course and go-kart track.
- REC 3 – Industrial operations on-site and in the site vicinity.
- REC 4 – Off-site PCE and TCE release case.
- hREC 5 – Former 12,000- gallon diesel UST.
- OEF 6 – On-site use of gasoline and maintenance materials.
- OEF 7 – Pressurized oil pipelines along Sepulveda Boulevard.
- OEF 8 – Methane zone.

The concurrent Phase II work completed by Roux comprised the advancement 15 borings for the collection of soil and soil gas samples at specified depths to investigate the RECs, hRECs, and OEFs outlined in the Phase I. A total of 43 soil samples and 11 soil gas samples were collected and analyzed for chemicals of concern.

With the exception of elevated petroleum hydrocarbons in the diesel range (1040 mg/kg) in a sample collected adjacent to the concrete batch plant, laboratory results of soil samples indicated no detectable to low concentrations of total petroleum hydrocarbons (TPH), volatile organic compounds (VOCs), and Title 22 Metals below laboratory reporting limits and/or regulatory screening levels for the protection of human health.

Laboratory results of soil gas samples were compared to Environmental Protection Agency (EPA) regional screening levels for the protection of human health for industrial air, updated November 2018, calculated using the EPA approved attenuation factor of

0.03 micrograms per cubic meter (µg/m^3). Elevated concentrations VOCs were noted, specifically benzene (150 micrograms per cubic meter [µg/m^3]) and ethylbenzene (93 µg/m^3) in the southeastern portion of the site, tetrachloroethylene (PCE; 1,900 µg/m^3) in the northeastern portion of the site, and trichloroethylene (TCE; 410 µg/m^3) in the southwestern portion of the site. Based on these elevated concentrations of VOCs and the site's location within a methane zone in the city of Los Angeles, Roux concluded that a vapor intrusion mitigation system (VIMS) should be installed prior to redevelopment.

According to Roux, the Phase II report was prepared with the primary purpose of identifying potential impacts to the subsurface. Delineation of the identified concerns was not considered a part of the scope of work in this report, and minimal recommendations for mitigation of the identified concerns were offered. Based on this information, additional Phase II work should be completed on-site to better characterize the extent of impacted subsurface media and further work should be completed to provide strategies for mitigation.

Based on our review of these reports, Ardent recommends that additional soil and soil gas sampling should be completed to screen for potential petroleum impacted soil and further assess the extent of impacted soil gas. Specifically, potential impacts to the site due to historical industrial operations on Parcel 3 should be further investigated.

4. PHYSICAL SETTING

The following sections include discussions of topographic, geologic, and hydrogeologic conditions in the vicinity of the site, based upon our document review and our visual reconnaissance of the site and adjacent areas.

4.1. Site Topography

Based on the review of the United States Geological Survey (USGS) 7.5 Minute Series, Torrance, Topographic Quadrangle Map, dated 2012, the site has an approximate elevation of 60 feet above mean sea level (msl). The local topography is generally flat.

4.2. Geology

The site is located within the Coastal Plain of the Los Angeles Groundwater Basin and is underlain by alluvium deposits of Quaternary (Recent) age, primarily consisting of gravel,

sand, sandy silt, silt, and clay with shale pebbles. The site is bounded by the Santa Monica Mountains to the north and the San Gabriel Mountains to the northeast.

4.3. Oil and Gas Maps

Based on a review of the California Geologic Energy Management (CalGEM) Division online well finder, the site lies within the Torrance Oil Field. Six plugged oil wells were located on the site. The locations of these wells are shown on Figure 3 and were determined using the CalGEM online well-finder map and during our site reconnaissance (Figure 3). There are two environmental concerns regarding oil wells, (1) oil production activities, and (2) methane gas. The following presents data obtained during this assessment.

4.3.1. Oil Production

Evidence of former oil production activities was noted in Ardent's review of historical aerial photographs between 1928 and 1952, including the presence of six drilling sumps in 1928. Oil wells are sometimes drilled using mud-rotary drilling methods, which use "drilling muds" to keep the borehole open during drilling activities. These "muds" consist of a bentonite slurry that is stored during drilling activities in earth-lined pits dug next to the well (referred to herein as "drilling sumps"). Once the oil well encountered an oil-producing zone, petroleum hydrocarbons would be introduced to the drilling materials. After drilling operations ceased, these and other unknown materials would typically be dumped into the sumps. Therefore, sumps sometimes contain petroleum hydrocarbon impacted materials.

Six plugged oil wells are located on-site. The following presents the information obtained regarding these wells. The data was obtained from the CalGEM website, Ardent's site reconnaissance, and historical documentation reviewed during this assessment. CalGEM files for these oil wells are provided on-line. Copies of these files are presented in Appendix F. Approximate well locations are presented on Figure 3.

The following presents a list of the oil wells located on-site and the dates on which the wells were installed and abandoned, based on Ardent's review of records retrieved from the CalGEM Well Finder database:

- **Bluemle 4 (API 0403717325)**
  Bluemle 4 is a plugged oil well located in the northeastern portion of the site. The well reportedly operated from July to August 1924. On March 7, 1928, The California State Mining Bureau, Department of Petroleum and Gas (referred to hereafter as the Department of Petroleum and Gas) issued a letter acknowledging that the well had been abandoned in accordance with regulatory requirements. During our site reconnaissance, this well was not observed.

- **Hub 1 (API 0403717111)**
  Hub 1 is a plugged oil well located in the southern portion of the site. The well was reportedly operated from May 1924 through February 1925 and was abandoned in April 1930. The Department of Petroleum and Gas issued a letter acknowledging the well's abandonment in accordance with regulatory requirements on May 9, 1930.

  On July 21, 1993, as part of the site redevelopment for use as a family amusement park, Hub 1 was located by the excavation of a 10' by 12' pit and inspected for fluid and/or gas leaks. No leaks were noted. During our site reconnaissance, this well was not observed

- **Hub 2 (API 0403717112)**
  Hub 2 is a plugged oil well located in the northern portion of the site. The well reportedly operated from July 1924 until its abandonment in April 1930 The Department of Petroleum and Gas issued a letter acknowledging the well's abandonment on April 29, 1930. During our site reconnaissance, this well was not observed.

- **Sloan 1 (API 0403717291)**
  Sloan 1 is a plugged oil well located in the southern portion of the site. Operation of the well began in April of 1924. In May of 1933, the well was re-drilled. On June 15, 1964, the well was abandoned. On January 21, 1965, the Resources Agency of California Department of Conservation Division of Oil and Gas (DOGGR) issued a letter recognizing the well's abandonment in accordance with regulatory requirements. During our site reconnaissance, this well was not observed.

- **House 1 (API 0403717110)**
  House 1 is a plugged oil well located in the northern portion of the site. The well operated from May 1924 to December 1925. On April 15, 1926, the Department of Petroleum and Gas issued a letter granting regulatory closure. During our site reconnaissance, this well was not observed.

- **Knape 1 (API 0403718504)**
  Knape 1 is a plugged oil well located in the southwestern portion of the site. The well reportedly operated from April 1924 until its abandonment in July, 1934. On September 6, 1934, the Department of Petroleum and Gas issued a letter acknowledging the well's abandonment in accordance with regulatory requirements.

  On July 21, 1993, as part of the site redevelopment for family amusement park, Knape 1 was located by the excavation of a 10' by 12' pit and inspected for fluid

and/or gas leaks. No leaks were noted. During our site reconnaissance, this well was not observed.

Historical activities associated with these wells (i.e. drilling sumps and possible petroleum hydrocarbon impacts) would be considered an REC. A licensed petroleum engineer should review the oil well construction details and abandonment details and proposed redevelopment plans to assess whether the oil wells need to be re-abandoned in accordance with current regulatory standards prior to redevelopment.

4.3.2. Methane Gas

The Los Angeles Department of Building and Safety (LADBS) would be the lead regulatory agency for methane gas investigations associated with the site. Prior to redevelopment of the site, a work plan must be submitted to the LADBS for review and approval in accordance with Ordinance No. 175790 and Site Testing Standards for Methane (Public Building Code Document No. P/BC 2014-101). The LADBS will require future buildings to be constructed with a methane mitigation system with a design based on the investigation results.

4.4. Site Hydrology

The following sections discuss the site hydrology in terms of both surface waters and groundwater.

4.4.1. Surface Waters

No natural and/or artificial water bodies are located on site or in the immediate site vicinity. The Pacific Ocean is located approximately five miles to the south, southeast, and west.

4.4.2. Groundwater

No groundwater information was available for the site. To obtain information regarding groundwater conditions, Ardent reviewed the State Water Resources Control Board (SWRCB) GeoTracker website for nearby properties undergoing groundwater monitoring activities. Upon review of the GeoTracker website, a facility located approximately 0.15-mile northwest of the site reported groundwater at a depth of approximately 65 to 69 feet below the ground surface (bgs), with variable flow direction from southwest to southeast.

5. HISTORICAL LAND USE

Ardent conducted a historical record search for both the site and surrounding areas. This included a review of one or more of the following sources that were found to be both reasonably ascertainable and useful for the purposes of this Phase I ESA: historical aerial photographs, historical fire insurance maps, historical city directories, building permits and plans, topographic maps, property tax records, zoning/land use records, and a review of prior environmental assessment reports regarding the site. Copies of historical data are provided in Appendix D.

5.1. Summary of Historical Land Use of the Property

The site is located within the Torrance Oil Field. Six oil wells were installed throughout the site between 1924 and 1925. Five of the wells were plugged and abandoned by 1930. One oil well, identified as Sloan 1, remained in intermittent operation until it was plugged and abandoned in 1965. Historical aerial photographs indicate that the site was primarily used for residential purposes or was vacant land from approximately 1947 to at least 1952.

Western Brass Works, an industrial facility, was historically located along the eastern border of the site. From approximately 1952 to 1994, Western Brass works expanded its operations onto Parcel 3 and used the site for staging, storage, and other unknown operations. An outbuilding of unknown usage was noted in the northeastern portion of the Parcel 3 from at least 1970 through 1994. There is no evidence that Western Brass Works used PCE or other VOCs onsite. Associated Ready Mix and Concrete occupied Parcel 2 from at least 1963 through 2012.

From approximately 1947 to at least 1963, Parcel 1 was used for residential purposes or was vacant land (other than oil well operation). By 1970, an office building was constructed in the northeastern portion and the surface was paved for use as a parking lot. From at least 1970 to approximately 1977, Western Brass Works used the northern portion of the parcel for storage. In 1993, Mulligan redeveloped Parcel 1 for use as a family amusement park, including a mini golf course, go-kart track, batting cages, parking lot, and expansion of the existing office building into an arcade, kitchen, and laser tag building. Mulligan incorporated Parcel 3 into the property in 2001, including redevelopment of the parcel for use as a parking lot, go-kart maintenance building, and go-kart racetrack. An office building was constructed in the northwestern portion of the site for use by the northern adjacent driving

range in 2001 and was demolished by 2009. In 2020, the maintenance building on Parcel 3 was demolished.

5.2. Summary of Historical Land Use of Adjoining Properties

From at least 1928, the site vicinity was used for agricultural and oil production. West Sepulveda Boulevard and two railroad tracks, located east and southwest of the site, were present. In 1952, Western Brass Works developed an industrial facility immediately east of the site. By 1970, residential dwellings were developed south of the site, across West Sepulveda Boulevard. By 1977, commercial buildings were developed immediately west of the site. In 1994, a driving range was developed north of the site. By 2009, the current commercial buildings located north of the site were developed.

5.3. Fire Insurance Rate Maps

Historical Sanborn maps were requested from Environmental Database Resources (EDR) of Shelton, Connecticut. According to EDR, there are no Sanborn maps available for the site or surrounding properties.

5.4. Historical Aerial Photographs

Historical aerial photographs for selected years between 1928 and 2016 were provided by EDR. The following presents a summary of our review.

- **1928 –** The site was used for oil production. Four oil derricks, six possible sumps, several storage sheds, and additional miscellaneous oil field equipment were located on the site. West Sepulveda Boulevard was present, adjoining the site to the south. The site vicinity was used for mixed agricultural and oil production. A railroad line was present to the east of the site and another to the southwest.
- **1947 –** By 1947**,** one oil derrick and sump were visible in the southwestern portion of the site. The remainder of the site comprised several dirt roads, trees, and sections of vacant land. Individual residential properties replaced many of the oil derricks in the site vicinity. By 1952, several residential structures were developed on-site. Two buildings and several small structures were developed immediately east of the site.
- **1963 –** The on-site oil derrick was removed and a concrete batch plant was installed. Western Brass Works developed industrial buildings immediately east of the site and began using Parcel 3 for staging, storage, and parking. West Sepulveda Boulevard was widened and paved.
- **1970 –** Western Brass Works expanded their storage area across the northern portion of the site and developed an outbuilding on the northeastern portion of Parcel 3. Commercial buildings were developed northwest of the site. The property south of the

site, across West Sepulveda Boulevard, was developed for residential use. One active oil well remained.

- **1977, 1983, 1989, 1990 –** By 1977, commercial buildings were developed along the western site boundary. By 1983, a dirt racetrack was developed north of the site.
- **1994 –** Parcel 1 was redeveloped as a family amusement park, including a repaved parking lot, expanded site building, and the installation of batting cages and a mini golf course. The northern adjacent property was redeveloped as a golf driving range.
- **2002, 2005, 2009, 2012, 2016 –** By 2002, Parcel 1 was further developed with a go-kart racetrack and Parcel 3 was incorporated into the family amusement park, including the development of a parking area, maintenance building, and go-kart racetrack. By 2009, the golf driving range north of the site was redeveloped with commercial buildings and the Western Brass Works adjoining the site to the east was demolished.

5.5. Building Department

Building permits for the site are issued by the LACDPW Division of Building and Safety (LACDBS). According to the LACDBS, building records for Parcels 1 and 2 are uploaded on the Building Permit Viewer database. Since there was no address associated with Parcel 3, no records were identified. Based on Ardent's review, the following is a summary of the relevant building permits issued for the site from approximately 1937 to the present:

1351 and 1355 West Sepulveda Boulevard – Parcel 1

Year	Date	Permit Description
1937	November 16	(Illegible handwriting) alteration, repair, movement, or demolition of one structure on the site.
1941	January 15	Construction of one single-story building measuring 20-foot wide by 36-foot long.
1961	August 15	Grading of an unspecified soil volume.
1963	January 18, March 11, April 10, April 25, October 2, October 9.	Grading of unspecified soil volumes.
1965	May 10	Grading of 288,629-cubic yards of soil
1966	April 10	Grading of 288,000-cubic yards of soil.
1967	July 10	Grading of 2,000-cubic yards of soil
1968	April 30	Grading of an unspecified soil volume.
1972	March 7	Addition to existing building of office space in the northeastern portion of Parcel 1 measuring 24-foot wide by 28-foot long

1985	March 10	Grading of 8,700-cubic yards of soil
	June 11	Unspecified electrical permit.
1993	March 17 and April 12	Grading of unspecified soil volumes
	June 3	Operation of a sump pump
	June 8	Grading of 15,000 cubic yards of soil to re-contour soil the northern portion of the site and northern adjoining property for use as a driving range
	June 23	Demolish a portion of the existing building located on Parcel 1.
	August 4	Addition to existing structure measuring 37-foot wide by 112-foot long
		Grading of 7,200 cubic yards.
	September 1	Batting cage installation
	September 10	Installation of pole lighting along northern border of site
	September 23	Remodel of 72-foot wide by 77-foot long existing building on Parcel 1, tenant improvements on existing office building, addition of a 37-foot wide by 40-foot long building adjoining the existing structure to the south and a 40-foot by 75-foot building adjoining the existing structures to the north.
	September 28	Installation of a cave structure in miniature golf course.
	December 8	Installation of a new sign.
	December 27	Certificates of occupancy issued for newly constructed features (mini golf course, batting cages, and cave).
1994	January 10	Certificate of occupancy for modified one-story building, measuring 75-foot 10-inches wide and 208-foot 6-inches long.
1995	January 10	Installation of and certificate of occupancy for a new storage building measuring 15-foot long, 14-foot wide, and 12-foot high.
1997	December 1	Use of southeastern portion of the site as a Christmas tree sales lot.
1998	November 11	Use of southeastern portion of the site as a Christmas tree sales lot.
2001	March 14	Installation of a 24-foot wide by 46-foot long office building in northwestern portion of Parcel 1.
	May 24	Grading of Parcel 3 for use as a go-kart racetrack, including the import of 350 cubic yards of soil
	June 26	Construction of a concrete retaining wall along the southeastern border of Parcel 3.
	August 6	Certificate of occupancy for new 24-foot wide by 46-foot long office building, for use in association with the northern adjacent golf driving range.
2004	December 29	Installation of a new electronic sign in the southwestern portion of the site measuring 4-foot wide by 14-foot long.
2006	August 4	Demolition of a canopy measuring 20-foot long by 272-foot wide, located on the northwestern portion of the site

2012	February 24	Replacement of a commercial electric water heater.
2018	April 24	Installation of a bumper rail to slab-on-grade concrete for use as a bumper car attraction.

1361 West Sepulveda Boulevard – Parcel 2

Year	Date	Permit Description
1973	May 25	Construction of a new single-story office in the southeastern portion of Parcel 2 measuring 12-foot wide by 45-foot long.
1974	September 27	Certificate of occupancy for new office
1977	March 14	Installation of new sign on Parcel 2.

5.6. City Directories

City directories were obtained from EDR for the site. Selected city directories from 1920 through 2014 were reviewed. Records for the site were listed under the three addresses associated with the site, as shown below.

1351 Sepulveda Boulevard and 1351 West Sepulveda Boulevard

These addresses were listed as “Howard Brady” from 1940 to 1950, as “Cal-Metal Corp Pipe” in 1975, as “Pacific Railroad Constructors” in 1980 and 1985, as “Murray Western Foods Inc” in 1985, as “Champagnie Sunny, Douglas, RV Storage, Humphreys William F, and Kobald George” in 1990, and as Mulligan Family Fun from 2001 through 2014.

1355 Sepulveda Boulevard and 1355 West Sepulveda Boulevard

This address was listed as “Plaza Golf at Mulligan” in 1995 and as “Mulligan Landscape” in 2010.

1361 Sepulveda Boulevard and 1361 West Sepulveda Boulevard

This address was listed as A&A Ready Mixed Concrete Company Incorporated from 1975 to 2010.

City directories for the site vicinity comprised primarily residential entries with sporadic business entries. From 1975 to 1980, Industrial Parts Depot Inc. was listed at 1309 Sepulveda Boulevard. From 1954 to 1970, “Cal Metal Corp” was listed at 1313 Sepulveda Boulevard. From 1981 to 1986, Torrance Machinery and Engineering was listed at 1313

Sepulveda Boulevard. In 2010, K&M Motors LLC was listed at 23337 Brightwater Place. Based on the type of facilities and direction from the site, these facilities would not be considered an environmental concern to the site.

5.7. Historical Topographic Maps

Historical topographic maps for selected years between 1896 and 2012 were provided by EDR. The site and site vicinity appear to have been used for oil production from approximately 1896 to at least 1951, including the presence of oil tanks approximately 0.75-mile northeast of the site until at least 1981. From 1961 to the present, the site vicinity was incrementally redeveloped for residential, commercial, and industrial use.

5.8. Interviews

Interviews were conducted by Ardent with key site personnel (e.g., past and present owners, operators, and/or occupants), with the objective of obtaining information indicating RECs in connection with the subject property. The following are the site personnel interviewed for purposes of this assessment, and a summary of their comments with regards to site conditions.

5.8.1. Interview with Owner

The site owner was not available to interview.

5.8.2. Interview with Site Manager

A Site Manager was not available for interview.

5.8.3. Interviews with Occupant

Mr. David Fernassi, a member of the former Mulligan maintenance staff, was interviewed during the site reconnaissance. Information obtained from Mr. Fernassi is further discussed in Section 6.

5.8.4. Interviews with Local Government Officials

Ardent interviewed government officials during completion of the agency file review. The results of these interviews are presented throughout the report.

5.8.5. Interviews with Others

No other interviews were completed during this Phase I ESA.

5.9. Previous Reports and Documents

No previous reports or documents were available for review.

6. SITE RECONNAISSANCE

The site and site vicinity reconnaissance was completed by Ardent on July 15, 2020. Access to the site was provided by Mr. David Fernassi of Mulligan. The site reconnaissance involved a walking tour of the site and visual observations of adjoining properties. At the time of the site reconnaissance, the weather was clear and no weather-related obstructions were noted. Selected photographs taken during these activities are included in Appendix A.

At the time of the site reconnaissance, the site was unoccupied. Several features from the previous site usage remained in place, including an asphalt parking lot, arcade building, ticket booth, go-kart track, batting cage area, and mini golf course on Parcel 1, a former batch plant on Parcel 2, and a go-kart track on Parcel 3 (Figure 3).

Active oil production equipment, including two pump-jacks, were noted south of the site across Sepulveda Boulevard.

6.1. Use and Storage of Hazardous Substances and Petroleum Products

No use or storage of hazardous substances or petroleum products was noted at the site.

6.2. Storage and Disposal of Hazardous Wastes

No on-site storage or disposal of hazardous waste was observed.

6.3. Unidentified Substance Containers

No unidentified substance containers were observed.

6.4. Aboveground Storage Tanks (ASTs) and Underground Storage Tanks (USTs)

According to historical site documents, one UST, removed in 2012, was formerly located in the central portion of Parcel 2. During the site reconnaissance, no visual evidence of the former UST was noted. The former UST is discussed further in Section 3.7.1

6.5. Evidence of Releases

No evidence of a release was observed.

6.6. Polychlorinated Biphenyls (PCBs)

Historically, PCBs (a group of hazardous substances and suspected human carcinogens) were widely used as an additive in cooling oils for electrical components. Typical sources of PCBs can include electrical transformers. One pad-mounted transformer was noted along the northeastern corner of the on-site building. The transformer appeared to be in good condition with no evidence of leaks. Based on this information, the presence of this feature would not be considered an environmental concern to the site.

6.7. Suspect Asbestos-Containing Building Materials (ACMs)

The manufacture of most ACMs was phased out in the 1970s, ending in 1980. Previously manufactured ACMs that were in stock continued to be used through approximately 1981. Some non-friable ACMs are still manufactured (e.g. roofing mastics). In general, buildings constructed after 1981 have a negligible potential to contain friable ACMs and a low potential for most non-friable ACMs, with the exception of roofing materials. However, due to the possible presence of ACMs in the on-site building, ticket booth, and plaster mini golf castle, an asbestos survey should be completed before demolition of these structures.

6.8. Lead Based Paint (LBP)

The manufacture of LBP was phased out in approximately 1978. Due to the age of the building, LBP is not likely to be present.

6.9. Indications of Water Damage or Mold Growth

No visual indications of water damage or visible mold growth were noted.

6.10. Wastewater Systems

No wastewater systems were noted during the site reconnaissance. According to Mr. Fernassi, the two floor drains located in the former kitchen are connected directly to the municipal storm drain system.

6.11. Stormwater Systems

Several storm drains were noted throughout the former go-kart racetrack, in the former batting cage area, and across the site. According to Mr. Fernassi, these drains connect to the municipal sewer system.

6.12. Wells

Six plugged oil wells are located on-site (Figure 3). These features are further discussed in Section 4.3.1. The wells were not observed during the site reconnaissance.

6.13. Other Subsurface Structures

No other subsurface structures were noted on-site.

6.14. Other Issues

No other on- or offsite issues of environmental concern were noted.

7. ENVIRONMENTAL DATABASE SEARCH

A computerized environmental information database search was performed by EDR for this Phase I ESA on July 7, 2020. The database search included federal, state, local, and tribal databases. A summary of the environmental databases searched, their corresponding search radii, and number of noted facilities of environmental concern is presented in Appendix E. In addition, a description of the assumptions and approach to the database search is provided in Appendix E. The review was conducted to evaluate whether the site or properties within the vicinity of the site have been reported as having experienced significant unauthorized releases of hazardous substances or other events with potentially adverse environmental effects.

Nine unmapped properties, due to poor or inadequate address information, were identified in the database report. Based on the location and/or database, these listings do not represent a significant environmental concern to the site.

The following paragraphs describe the databases that contain noted properties of environmental concern, and include a discussion of the regulatory status of the facilities and potential environmental impact to the subject site.

7.1. Federal National Priorities List (NPL): Distance Searched – 1 mile

The NPL is the USEPA's database of uncontrolled or abandoned hazardous waste properties identified for priority remedial actions under the Superfund program. This database includes proposed NPL listings.

Neither the site nor properties located within the search radius were listed on this database.

7.2. Federal Delisted NPL: Distance Searched – 1 mile

This database contains delisted NPL properties under the Superfund program. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the USEPA uses to delete properties from the NPL. In accordance with 40 Code of Federal Regulations (CFR) 300.425. (e), properties may be deleted from the NPL where no further response is appropriate.

Neither the site nor properties located within the search radius were listed on this database.

7.3. Federal Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) List: Distance Searched – 0.5 mile

The CERCLIS database has been replaced by the Superfund Enterprise Management System (SEMS) database, which tracks hazardous waste sites and remedial activities performed in support of the EPA's Superfund Program. This database also includes properties listed on the SEMS-ARCHIVE database for facilities with statuses of No Further Remedial Action Planned (NFRAP).

Neither the site nor properties located within the search radius were listed on this database.

7.4. Federal Corrective Action Report (CORRACTS): Distance Searched – 1 mile

The USEPA maintains this database of Resource Conservation and Recovery Act (RCRA) facilities that are undergoing corrective action. A corrective action order is issued when there has been a release of hazardous waste or constituents into the environment from a RCRA facility.

Neither the site nor properties located within the search radius were listed on this database.

7.5. Federal Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal Facilities (TSDF) List: Distance Searched – 0.5 mile

The RCRA TSDF database (non-CORRACTS) is a compilation by the EPA of facilities that report generation, storage, transportation, treatment, or disposal of hazardous waste.

Neither the site nor properties located within the search radius were listed on this database.

7.6. Federal RCRA Generators List: Distance Searched – Site and Adjoining Properties

This list identifies sites that generate hazardous waste as defined by RCRA. Inclusion on this list is for permitting purposes and is not indicative of a release.

Neither the site nor adjoining properties were listed on this database.

7.7. Federal Institutional Control/Engineering Control Registries: Distance Searched – Site

These lists identify properties with engineering and/or institutional controls. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on the site. Deed restrictions are generally required as part of the institutional controls.

The site was not listed on this database.

7.8. Federal Emergency Response Notification System (ERNS) List: Distance Searched – Site

The ERNS database, maintained by the USEPA, contains information on reported releases of oil and hazardous substances.

The site was not listed on this database.

7.9. Federal Brownfield List: Distance Searched – 0.5 mile

The USEPA Brownfield database, entitled Targeted Brownfield's Assessments (TBA), lists properties for which the USEPA is providing funding and/or technical support for environmental assessments and investigations. The objective of the TBA is to promote cleanup and redevelopment of undesirable properties with environmental issues.

Neither the site nor properties located within the search radius were listed on this database.

7.10. State Equivalent NPL: Distance Searched – 1 mile

The State equivalent NPL identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Neither the site nor properties located within the search radius were listed on this database.

7.11. State Calsites Database (Calsites) or State-Equivalent CERCLIS: Distance Searched – 1 mile

The Calsites database, also known as the State-equivalent CERCLIS, is maintained by the Cal-EPA DTSC. This database contains information both known and potentially contaminated properties.

The site was not listed on this database. “Oil Well Property (Former),” located approximately 0.25-mile northeast from and potentially upgradient of the site was listed with a status of “Evaluation.” Eleven additional facilities located at least 0.39-mile from and cross- to downgradient of the site were listed on this database. Based on the distance, direction, depth to groundwater and/or regulatory status, these facilities would not be considered an environmental concern to the site.

7.12. State Solid Waste Landfill Sites (SWLF): Distance Searched – 0.5 mile

The SWLF database consists of open and closed solid waste disposal facilities and transfer stations. The data comes from the Integrated Waste Management Board’s Solid Waste Information System (SWIS) and the SWRCB Waste Management Unit Database (WMUD) database.

Neither the site nor properties located within the search radius were listed on this database.

7.13. State Leaking Underground Storage Tank (LUST) Lists: Distance Searched – 0.5 mile

The LUST information system is obtained from by the SWRCB and the RWQCB.

The site was listed on this database due to the former 12,000-gallon diesel UST removed from Parcel 2 in 2012. This removal is discussed further in Section 3.7.1, and based on the regulatory status would not be considered a REC.

Western Brass Works, located approximately 0.15-mile east of the site, was listed with a regulatory status of closed case. Chevron, located at 23903 South Normandie Avenue, approximately 0.48-mile south-southeast from and potentially downgradient of the site, was listed with a status of "leak being confirmed" which was last updated on September 7, 2004. Eight additional facilities with a regulatory status of closed case, located at least 0.18-mile from and potentially cross- to downgradient of the site were listed within the search radius. Based on the distance, direction, depth to groundwater and/or regulatory status, these facilities would not be considered an environmental concern to the site.

7.14. State Underground Storage Tank (UST) and Aboveground Storage Tank (AST) Registration List: Distance Searched – Site and Adjoining Properties

UST and AST databases are provided by the SWRCB. Inclusion on these lists is for permitting purposes and is not indicative of a release.

The site was listed on this database as "George Claessens Trust" and "Andre Cailler" with no additional details. These listings are likely due to the former 12,000-gallon diesel UST that was removed from Parcel 2. Based on this information, these listings would not be considered an environmental concern to the site.

7.15. State Voluntary Cleanup Programs (VCPs): Distance Searched – 0.5 mile

The State VCP database lists low threat level properties with either confirmed or unconfirmed releases. Project proponents have requested that the DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Neither the site nor properties located within the search radius were listed on this database.

7.16. Indian Reservations: Distance Searched – 1 mile

This list depicts Indian administered lands of the United States that have an area equal to or greater than 640-acres. No Indian Reservations were listed within a 1-mile radius from the site. Due to the lack of Indian Reservations within 1-mile of the site, other tribal database listings required by ASTM and AAI were deemed not applicable. These listings would include tribal-equivalent NPL, CERCLIS, Landfill and/or Solid Waste Disposal, LUST, UST and AST Registrations, Institutional Control/Engineering Control Registries, VCPs, and Brownfields.

Neither the site nor properties located within the search radius were listed on this database.

7.17. Other Non-ASTM and AAI Database: Distance Searched – Site

Other databases were included in the EDR Report but are not required by ASTM or AAI. The site was listed as follows:

7.17.1. California Integrated Water Quality Systems (CIWQS)

The CIWQS is a database used by the State of California and RWQCB to track information about places of environmental interest, manage permits, track inspections, and manage violations and enforcement activities. Listing on these databases is not indicative of a release.

The site is listed as Associated Ready Mix Concrete for an industrial storm water program, which was active from June 2, 1992 until May 5, 2012.

7.17.2. Waste Discharge System (WDS)

The WDS database documents facilities that have been issued waste discharge requirements. Listing on these databases is not indicative of a release.

The site is listed on this database as “Associated Ready Mix Concrete” as an active industrial facility. This listing is likely out of date, since Associated Ready Mix Concrete ceased on-site operations in 2012.

7.17.3. Facility Index System Identification Program Summary Report (FINDS)

The FINDS database contains information obtained from other regulatory databases. The FINDS database is maintained by EPA. Listings on this database are for permitting purposes only and are not indicative of a release.

The site was listed on this database as “Formerly Ready Mix &” at the address 1361 Sepulveda Boulevard due the LUST case regarding the former 12,000-gallon UST, as discussed in Section 3.7. Based on the regulatory status, this listing would not be considered and environmental concern to the site.

7.17.4. Hazardous Waste Information System (HAZNET)

The information presented in the HAZNET database is obtained from copies of hazardous waste manifests received by the DTSC. Listing on these databases is not indicative of a release.

The site was listed on this database as “A&A” for the disposal of approximately 0.83-tons of tank bottom wastes and still bottom wastes with halogenated organics in 2012. This listing likely concerns the residual wastes disposed of during the removal of the former 12,000-gallon diesel UST during its removal in 2012.

7.17.5. Cal-EPA Environmental Regulated Site (CERS) Portal Data

Cal-EPA maintains a database that combines data regarding environmentally regulated properties and facilities in California. This database combines information obtained from a number of state and federal databases and includes hazardous materials and wastes, state and federal cleanups, impacted ground and surface waters, and toxic materials.

The site is listed on this database as Formerly Ready Mix & Concrete due to its former status as a leaking underground storage tank cleanup site. No further details were included. Based on the information presented in Section 3.7.1, this listing would not be considered an environmental concern to the site.

7.17.6. Hazardous Waste Tracking System (HWTS)

The HWTS is a database of hazardous waste identification numbers and manifest information maintained by the DTSC. Listing on these databases is not indicative of a release.

The site is listed on this database as “Associated Ready Mix Concrete #2” for unspecified activity between 2001 and 2013. No further information was required.

8. VAPOR ENCROACHMENT CONDITION (VEC)

Ardent completed a VEC study for the site using Tier 1 criteria as recommended by ASTM E 2600-15. The Tier 1 screening identifies surrounding facilities that pose a possible vapor intrusion source to the site based on the results of the Phase I ESA investigations and certain criteria outlined by ASTM. These criteria include a certain distance from the target site (referred to by ASTM as within the “area of concern”); the types of chemicals used (referred to by ASTM

as the “chemicals of concern”); and a plume test to determine if the plume associated with a source of contamination is close enough to the site to impact indoor air quality. A VEC is defined by ASTM as *“…the presence or likely presence of chemicals of concern vapors in the vadose zone of the target property caused by the release of vapors from contaminated soil and/or groundwater either on or near the target property identified by the Phase I ESA.”*

Based on our review of data obtained during this investigation, a potential VEC may exist at the site. As noted in Section 3.7.2, previous investigations at the site have indicated the presence elevated concentrations of VOCs in soil gas above the regulatory guidelines for the protection of human health. As noted in Section 9.2, a historical release which has impacted soil gas and groundwater is under current remediation at a facility approximately 0.1-mile northwest of the site. Based on this information, the site should be further evaluated for a potential VEC prior to commercial redevelopment.

9. REGULATORY RECORDS REVIEW

The South Coast Air Quality Management District (SCAQMD), DTSC, SWQCB, City of Los Angeles Fire Department (LAFD), and Los Angeles County Department of Public Works (LACDPW) are the lead regulatory agencies for permitting and regulating USTs, ASTs, LUST cases, and/or facilities that use, store, or generate hazardous waste or hazardous materials. Ardent submitted public records requests to these agencies. Ardent requested file reviews using the addresses associated with the site.

9.1. Department of Toxic Substances Control (DTSC)

Ardent reviewed the online DTSC EnviroStor database. No records for the site were noted in the EnviroStor database.

9.2. State Water Quality Control Board, Los Angeles Region (SWQCB)

Ardent reviewed the online RWQCB GeoTracker database. Records for the site were obtained from the GeoTracker database, including two reports prepared by Roux as part of the removal of the former 12,000-gallon diesel UST and three regulatory letters from the LACFD. These documents are discussed in Section 3.7.

The Multi-Tenant Office-Warehouse property located at 1500-1510 West 228th Street, approximately 0.1-mile northwest of the site, is listed on the GeoTracker database as an

active remediation case. According to the most recent *Additional Well Installation and 4th Quarter 2018 Groundwater Monitoring Report,* dated December 21, 2018, VOCs (primarily PCE and TCE) have been detected in soil, soil vapor, and groundwater beneath the facility going back to 2013. In 2018, a soil vapor extraction (SVE) remediation system began operation. The extent of contamination from this facility has not been defined. Based on this information, the release would be considered an environmental concern to the site and may have impacted the soil gas and/or groundwater under the site.

9.3. South Coast Air Quality Management District (SCAQMD)

Ardent reviewed the online SCAQMD Facility Information Detail (FIND) database. No information was provided for the site.

9.4. City of Los Angeles Fire Department (LAFD)

The LAFD is the designated Certified Unified Program Agency (CUPA) for the region, and maintains records of ASTs, USTs, hazardous materials, and hazardous wastes. Ardent submitted a public records request to the LAFD for the site and received several documents related to the removal of the former 12,000-gallon UST (discussed in Section 3.7) and records of hazardous materials inspections conducted at the site.

On March 21, 2016, the LACFD performed an inspection of the site and issued a notice of violation to the site based on its failure to file a business plan for the storage and use of hazardous materials. The inspection report contained details of the substances noted on-site, including 330-gallons of gasoline, 55-gallons of gear oil, 55-gallons of motor oil, 110-gallons of oil waste, 70-gallons of waste cooking oil, and 110-gallons of diesel fuel, and 1168-cubic feet of helium.

An additional notice of violation for failure to renew its hazardous materials business plan was issued to the site on April 2, 2019. Based on the small quantities of hazardous materials reportedly used at the site, their removal from the site prior to this investigation, and the lack of evidence of a significant release at the site, these violations would not be considered and environmental concern.

9.5. Los Angeles County Department of Public Works (LACDPW)

Records for the site were requested from the LACDPW. According to the LACDPW, no records for the site were found.

10. FINDINGS, OPINIONS AND CONCLUSIONS

Based upon the results of this Phase I ESA, the following findings, opinions and conclusions are provided.

10.1. Findings and Opinions

The following presents a summary of findings and opinions associated with this Phase I ESA performed for the site, including known or suspect RECs, HRECs, CRECs, and de minimis environmental conditions (i.e., conditions that generally do not present a material risk of harm to public health or the environment).

- The site is located within the Torrance Oil Field. Six oil wells were installed throughout the site between 1924 and 1925. Five of the wells were plugged and abandoned by 1930. One oil well, identified as Sloan 1, remained in intermittent operation until it was plugged and abandoned in 1965. Historical aerial photographs indicate that the site was primarily used for residential purposes or was vacant land from approximately 1947 to at least 1952.
- Western Brass Works, an industrial facility, was historically located along the eastern and northern borders of the site. From approximately 1952 to 1994, Western Brass Works expanded its operations onto Parcel 3 and used the site for staging, storage, and other unknown operations. An outbuilding of unknown usage was noted in the northeastern portion of the Parcel 3 from at least 1970 through 1994. There is no evidence that Western Brass Works used PCE or other VOCs onsite.
- Associated Ready Mix and Concrete occupied Parcel 2 as a concrete batch plant from at least 1963 through 2012. A 12,000-gallon diesel UST, used to fuel fleet vehicles, was installed at an unknown date and was removed by Associated Ready Mix and Concrete as part of their site closure activities. Removal of the 12,000-gallon diesel UST was completed under the oversight of the LAFD and documented by Roux. Three confirmation soil samples were collected from the excavation as part of the removal. According to Roux, one sample contained elevated concentrations of petroleum hydrocarbons in the diesel range above the LAFD action threshold. Following the completion of supplemental investigation by Roux, the elevated levels of petroleum hydrocarbons were determined to be limited in extent and potentially due to historical oil production activities. Based on this information, the LAFD issued a No Further Action (NFA) for the former feature.
- From approximately 1952 to at least 1963, Parcel 1 was used for residential purposes or was vacant land (in addition to oil operation). By 1970, an office building was constructed in the northeastern portion and the surface was paved for use as a parking lot. From at least 1970 to approximately 1977, Western Brass Works used the northern

portion of the parcel for storage. In 1993, Mulligan redeveloped Parcel 1 for use as a family amusement park, including a mini golf course, go-kart track, batting cages, parking lot, and expansion of the existing office building into an arcade, kitchen, and laser tag building. Mulligan incorporated Parcel 3 into the property in 2001, including redevelopment of the parcel for use as a parking lot, maintenance building, and go-kart racetrack. An office building was constructed in the northwestern portion of the site for use by the northern adjacent golf driving range in 2001 and was demolished by 2009. In 2020, the maintenance building on Parcel 3 was demolished.

- Groundwater has been reported in the site vicinity at a depth of approximately 65 to 69 feet below the ground surface (bgs) and has been reported with variable flow direction from southwest to southeast.
- In 2019, Roux completed Phase I and Phase II work at the site, comprising the outlining of eight areas of environmental concern and the collection of soil and soil gas samples to investigate these areas. Laboratory results of soil gas samples indicated elevated concentrations of VOCs, specifically benzene (150 µg/m^3) and ethylbenzene (93 µg/m^3) in the southeastern portion of the site, PCE (1,900 µg/m^3) in the northeastern portion of the site, and TCE (410 µg/m^3) in the southwestern portion of the site. Additionally, Roux noted that the site is located within a methane zone in the City of Los Angeles. Based on the results of these investigations, Roux concluded that a VIMS should be installed prior to redevelopment to mitigate methane emissions and possible vapor intrusion from VOCs.
- Elevated VOC contaminants (primarily PCE and TCE) have been detected in soil, soil vapor, and groundwater at the Multi-Tenant Office-Warehouse facility located approximately 0.1-mile northwest of the site, indicating a historical release at this facility. Based on this information and the elevated concentrations of VOCs detected in previous investigations on-site, there is a potential VEC at the site.
- Due to the presence the site within a known Methane Zone in the City of Los Angeles, future redevelopments will be required to comply with local (LADBS) and state (CalGEM) requirements for abandoned oil wells, which may include leak tests and/or re-abandonment of wells in accordance with current standards. Prior to redevelopment, a licensed petroleum engineer should be retained to review the records of each abandoned well and provide recommendations based on these regulatory requirements.
- Due to the presence of VOCs detected in previous soil gas sampling conducted at the site, the site's location within an oil field, and the off-site release noted above, additional investigations should be conducted to better characterize the impacted subsurface media. A methane and vapor mitigation system will likely be required to be installed and maintained under any future buildings.
- No other on- or off-site environmental concerns were noted.

10.2. Conclusions

Ardent has performed this Phase I ESA in general conformance with the scope and limitations of the ASTM Practice E 1527-13, ASTM Standard E 2600-15, and the EPA Standards and Practices for AAI, Final Rule (40 CFR, Part 312), for the property located at

1351, 1355, and 1361 West Sepulveda Boulevard, in the city of Los Angeles, California. Any limitations or exceptions encountered during completion of this report are stated in Section 1.4. No evidence or indication of RECs, HRECs, CRECs, or de minimis environmental conditions (i.e., conditions that generally do not present a material risk of harm to public health or the environment) have been revealed, except for the following:

RECs

- Petroleum hydrocarbon impacted soil from historical oil field production activities at the site.
- Former industrial activities on Parcel 3 on the east part of the site
- The site is located within a known methane zone in the city of Los Angeles.
- Potential for migration of VOCs into soil, soil gas, and groundwater on-site from the historical release at the Multi-Tenant Office-Warehouse located northwest of the site.

HRECs

- The 12,000-gallon diesel UST formerly located on Parcel 2.

CRECs

- No CRECs have been identified during completion of this Phase I ESA.

De Minimis Conditions

- No de minimis conditions have been identified during completion of this Phase I ESA.

11. RECOMMENDATIONS

Based on the information obtained during this assessment, Ardent recommends the following:

- A subsurface investigation should be completed to assess possible contamination in areas not previously investigated.
    - Soil borings should be advanced to screen for possible shallow contamination from oil field activities.
    - Soil gas samples should be collected to screen for the possible presence of VOCs originating from the off-site plume and former on-site industrial activities.
- Prior to redevelopment of the site, a work plan must be submitted to the LADBS for review and approval in accordance with Ordinance No. 175790 and Site Testing Standards for Methane (Public Building Code Document No. P/BC 2014-101). The LADBS will require future buildings to be constructed with a methane mitigation system with a design based on the investigation results.

- A licensed petroleum engineer should review the well logs for each of the on-site oil wells and the locations of the wells with respect to proposed redevelopment to assess whether the wells will need to be re-abandoned.

13. QUALIFICATIONS STATEMENT AND SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

Mr. Craig Metheny states that the Phase I ESA was performed under his direct supervision, and that he has reviewed and approved the report, and the methods and procedures employed in the development of the report conform to the minimum industry standards. Mr. Metheny certifies that Ardent project personnel and subcontractors are properly licensed and/or certified to do the work described herein.

Pursuant to Paragraph 12.13 of the ASTM Standard E1527-13:

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDIX B

CLIENT PROVIDED INFORMATION

PHASE I ENVIRONMENTAL SITE ASSESSMENT (ESA)
USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user of the Phase I ESA* must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

Project Information	
Facility Name and Address:	1355 W. Sepulveda, Torrance CA 90501
Reason for the Phase I ESA:	Due Diligence for Acquisition
Type of Property:	Commercial and Industrial use
Site Owner and Contact Information:	Alan Kwan, Director of Acquisitions, Storm Properties, Inc; Direct: (310) 986-2432 Cell: (310) 938-8574 Email: akwan@storm-properties.com
Site Contact Name and Contact Information:	Alan Kwan, Director of Acquisitions, Storm Properties, Inc; Direct: (310) 986-2432 Cell: (310) 938-8574 Email: akwan@storm-properties.com
Tax Assessors Parcel Number (APN):	7347-018-078 (1351-1355 Sepulveda, subsequently identified as Parcel 1), 7347-018-003 (1361 Sepulveda Boulevard, Parcel 2) and 7347-018-085 (no associated address, Parcel 3)

	Yes	No
1. Are you aware of any environmental cleanup liens against the subject property that are filed or recorded under federal, state, or local law?		X
2. Are you aware of any activity use limitations, such as engineering controls (engineered caps, liners, treatment methods, etc.), land use restrictions, or institutional controls (administrative measures restricting groundwater use, construction, or property use, etc.) that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?		X
3. Do you have any specialized knowledge or experience related to the subject property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the subject property so that you would have specialized knowledge of the chemicals or processes used by this type of business?		X
4a. Does the purchase price being paid for the subject property reasonably reflect the fair market value of the subject property?		X
4b. If you conclude that there is a difference in fair market price, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?		X
5. Are you aware of any commonly known or reasonably ascertainable information about the subject property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as a user,		X
5 (a) Do you know of the past uses of the property?		X
5 (b) Do you know of any specific chemicals that are present or were once present on the subject property?		X
5 (c) Do you know of spills or other chemical releases that have taken place at the subject property?		X

5 (d) Do you know of any environmental cleanups that have taken place at the subject property?		X
6. As the user of this ESA, based on your knowledge and experience related to the subject property, are there any obvious indicators that point to the presence or likely presence of contamination at the subject property?		X

If you answered "yes" to any of the questions (except 4a) above, please provide more detail below, or attach additional information to this document:

Issuing Policies of Fidelity National Title Insurance Company

Title Officer: Steven Gomez/Andrew Margo (BS-RIV)
Escrow Officer: Builder Services OAC

Order No.: 989-**30034123**-SG4

TO:

Storm Properties
23223 Normandie Avenue
Torrance, CA 90501

ATTN: .**Alan Kwan**
YOUR REFERENCE:

PROPERTY ADDRESS: 1355 and 1361 Sepulveda Blvd., Los Angeles, CA

PRELIMINARY REPORT

In response to the application for a policy of title insurance referenced herein, ***Fidelity National Title Company*** *hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.*

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(s) of title insurance to be issued hereunder will be policy(s) of Fidelity National Title Insurance Company, a Florida Corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

33. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

34. Matters which may be disclosed by an inspection and/or by a correct ALTA/NSPS Land Title Survey of said Land that is satisfactory to the Company, and/or by inquiry of the parties in possession thereof.

PLEASE REFER TO THE "INFORMATIONAL NOTES" AND "REQUIREMENTS" SECTIONS WHICH FOLLOW FOR INFORMATION NECESSARY TO COMPLETE THIS TRANSACTION.

END OF EXCEPTIONS

REQUIREMENTS SECTION

1. The Company will require either (a) a complete copy of the trust agreement and any amendments thereto certified by the trustee(s) to be a true and complete copy with respect to the hereinafter named trust, or (b) a Certification, pursuant to California Probate Code Section 18100.5, executed by all of the current trustee(s) of the hereinafter named trust, a form of which is attached.

   Name of Trust: The Georgia S. Claessens Living Trust

2. Unrecorded matters which may be disclosed by an Owner's Affidavit or Declaration. A form of the Owner's Affidavit/Declaration is attached to this Preliminary Report/Commitment. This Affidavit/Declaration is to be completed by the record owner of the land and submitted for review prior to the closing of this transaction. Your prompt attention to this requirement will help avoid delays in the closing of this transaction. Thank you.

   The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit/Declaration.

END OF REQUIREMENTS

Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. DO NOT use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened**. DO NOT send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do NOT reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

FIDELITY NATIONAL FINANCIAL, INC.
PRIVACY NOTICE

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

Types of Information Collected
We may collect two types of information from you: Personal Information and Browsing Information.

Personal Information. FNF may collect the following categories of Personal Information:

- contact information (*e.g.,* name, address, phone number, email address);
- demographic information (*e.g.,* date of birth, gender, marital status);
- identity information (*e.g.,* Social Security Number, driver's license, passport, or other government ID number);
- financial account information (*e.g.,* loan or bank account information); and
- other personal information necessary to provide products or services to you.

Browsing Information. FNF may automatically collect the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or mobile device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website

How Personal Information is Collected
We may collect Personal Information about you from:

- information we receive from you on applications or other forms;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

How Browsing Information is Collected
If you visit or use an FNF Website, Browsing Information may be collected during your visit. Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics
Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to other websites. FNF is not responsible for the privacy practices or the content of any of those other websites. We advise you to read the privacy policy of every website you visit.

Use of Personal Information
FNF uses Personal Information for three main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and third parties' products and services, jointly or independently.

When Information Is Disclosed
We may make disclosures of your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;
- to nonaffiliated third party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or

Copyright © 2018. Fidelity National Financial, Inc. All Rights Reserved

- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Please see "**Choices With Your Information**" to learn the disclosures you can restrict.

Security of Your Information
We maintain physical, electronic, and procedural safeguards to guard your Personal Information. We limit access to nonpublic personal information about you to employees who need to know that information to do their job. When we provide Personal Information to others as discussed in this Privacy Notice, we expect that they process such information in compliance with our Privacy Notice and in compliance with applicable privacy laws.

Choices With Your Information
If you do not want FNF to share your information with our affiliates to directly market to you, you may send an "opt out" request by email, phone, or physical mail as directed at the end of this Privacy Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you.

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information and Browsing Information with nonaffiliated third parties, except as permitted by California law.

For Nevada Residents: You may be placed on our internal Do Not Call List by calling (888) 934-3354 or by contacting us via the information set forth at the end of this Privacy Notice. Nevada law requires that we also provide you with the following contact information: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: BCPINFO@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information and Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Vermont Residents: We will not share information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

Information From Children
The FNF Websites are meant for adults and are not intended or designed to attract persons under the age of eighteen (18).We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users
FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence for any of the purposes described in this Privacy Notice. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans
Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except (1) as required or authorized by contract with the mortgage loan servicer or lender, or (2) as required by law or in the good-faith belief that such disclosure is necessary to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes
By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The revised Privacy Notice, showing the new revision date, will be posted on the FNF Website. Each time you provide information to us following any amendment of this Privacy Notice, your provision of information to us will signify your assent to and acceptance of the terms of the revised Privacy Notice for all previously collected information and information

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the field rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for each discount. These discounts only apply to transaction involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

FNF Underwritten Title Company
FNTC - Fidelity National Title Company
FNTCCA –Fidelity National Title Company of California

FNF Underwriter
FNTIC - Fidelity National Title Insurance Company

Available Discounts

CREDIT FOR PRELIMINARY REPORTS AND/OR COMMITMENTS ON SUBSEQUENT POLICIES (FNTIC)
Where no major change in the title has occurred since the issuance of the original report or commitment, the order may be reopened within 12 or 36 months and all or a portion of the charge previously paid for the report or commitment may be credited on a subsequent policy charge.

DISASTER LOANS (FNTIC)
The charge for a lender's Policy (Standard or Extended coverage) covering the financing or refinancing by an owner of record, within 24 months of the date of a declaration of a disaster area by the government of the United States or the State of California on any land located in said area, which was partially or totally destroyed in the disaster, will be 50% of the appropriate title insurance rate.

CHURCHES OR CHARITABLE NON-PROFIT ORGANIZATIONS (FNTIC)
On properties used as a church or for charitable purposes within the scope of the normal activities of such entities, provided said charge is normally the church's obligation the charge for an owner's policy shall be 50% to 70% of the appropriate title insurance rate, depending on the type of coverage selected. The charge for a lender's policy shall be 40% to 50% of the appropriate title insurance rate, depending on the type of coverage selected.

OWNER'S DECLARATION

The undersigned hereby declares as follows:

1. (Fill in the applicable paragraph and strike the other)

   a. Declarant ("Owner") is the owner or lessee, as the case may be, of certain premises located at _____, further described as follows: See Preliminary Report/Commitment No. 30034123-989-989-SG4 for full legal description (the "Land").

   b. Declarant is the _____ of _____ ("Owner"), which is the owner or lessee, as the case may be, of certain premises located at _____, further described as follows: See Preliminary Report/Commitment No. 30034123-989-989-SG4 for full legal description (the "Land").

2. (Fill in the applicable paragraph and strike the other)

   a. During the period of six months immediately preceding the date of this declaration no work has been done, no surveys or architectural or engineering plans have been prepared, and no materials have been furnished in connection with the erection, equipment, repair, protection or removal of any building or other structure on the Land or in connection with the improvement of the Land in any manner whatsoever.

   b. During the period of six months immediately preceding the date of this declaration certain work has been done and materials furnished in connection with _____ upon the Land in the approximate total sum of $_____, but no work whatever remains to be done and no materials remain to be furnished to complete the construction in full compliance with the plans and specifications, nor are there any unpaid bills incurred for labor and materials used in making such improvements or repairs upon the Land, or for the services of architects, surveyors or engineers, except as follows: _____. Owner, by the undersigned Declarant, agrees to and does hereby indemnify and hold harmless Fidelity National Title Company against any and all claims arising therefrom.

3. Owner has not previously conveyed the Land; is not a debtor in bankruptcy (and if a partnership, the general partner thereof is not a debtor in bankruptcy); and has not received notice of any pending court action affecting the title to the Land.

4. Except as shown in the above-referenced Preliminary Report/Commitment, there are no unpaid or unsatisfied mortgages, deeds of trust, Uniform Commercial Code financing statements, claims of lien, special assessments, or taxes that constitute a lien against the Land or that affect the Land but have not been recorded in the public records.

5. The Land is currently in use as _____; _____occupy/occupies the Land; and the following are all of the leases or other occupancy rights affecting the Land:

   _____

6. There are no other persons or entities that assert an ownership interest in the Land, nor are there unrecorded easements, claims of easement, or boundary disputes that affect the Land.

7. There are no outstanding options to purchase or rights of first refusal affecting the Land.

This declaration is made with the intention that Fidelity National Title Company (the "Company") and its policy issuing agents will rely upon it in issuing their title insurance policies and endorsements. Owner, by the undersigned Declarant, agrees to indemnify the Company against loss or damage (including attorneys fees, expenses, and costs) incurred by the Company as a result of any untrue statement made herein.

I declare under penalty of perjury that the foregoing is true and correct and that this declaration was executed on ____ at _____.

CALIFORNIA LAND TITLE ASSOCIATION

STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;

d. improvements on the Land;
e. land division; and
f. environmental protection.

This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.

   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% % of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% % of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 5,000.00

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;

   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;

(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13 or 14); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

(Except as provided in Schedule B - Part II,(t(or T)his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

(PART I

(The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:)

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
      (i) the occupancy, use, or enjoyment of the Land;
      (ii) the character, dimensions, or location of any improvement erected on the Land;
      (iii) the subdivision of land; or
      (iv) environmental protection;
      or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or

(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.

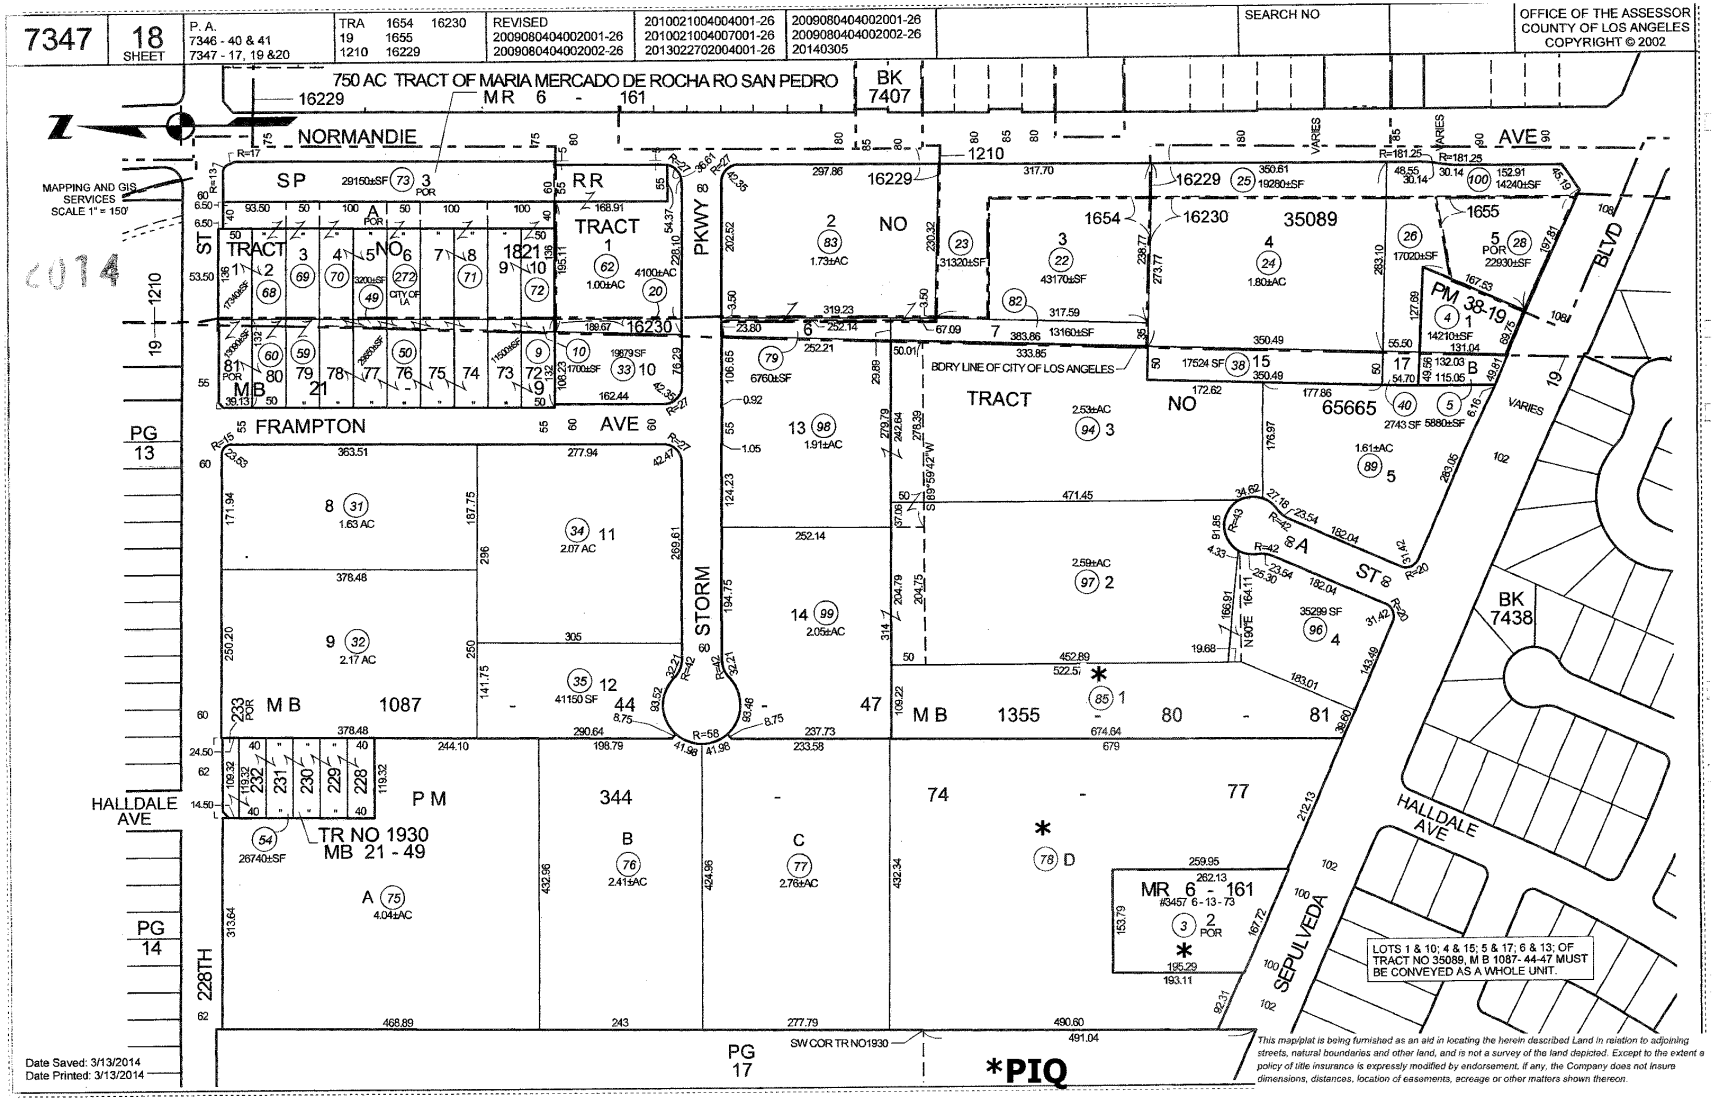
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of: (The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown in the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and that are not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.
7. (Variable exceptions such as taxes, easements, CC&R's, etc. shown here.)



ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (04-02-15)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.

8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

CERTIFICATION OF TRUST
California Probate Code Section 18100.5

The undersigned declare(s) under penalty of perjury under the laws of the State of California that the following is true and correct:

1. The Trust known as _____, executed on _____, is a valid and existing trust.

2. The name(s) of the settlor(s) of the Trust is (are): _____
_____

3. The name(s) of the currently acting trustee(s) is (are): _____
_____

4. The trustee(s) of the Trust have the following powers (initial applicable line(s)):
_____Power to acquire additional property.
_____Power to sell and execute deeds.
_____Power to encumber, and execute deeds of trust.
_____Other: _____

5. The Trust is (check one): _____ Revocable _____ Irrevocable

   The name of the person who may revoke the Trust is: _____

6. The number of trustees who must sign documents in order to exercise the powers of the Trust is (are): _____, whose name(s) is (are): _____

7. Title to Trust assets is to be taken as follows: _____

8. The Trust has not been revoked, modified or amended in any manner which would cause the representations contained herein to be incorrect.

9. I (we) am (are) all of the currently acting trustees.

10. I (we) understand that I (we) may be required to provide copies of excerpts from the original Trust documents which designate the trustees and confer the power to act in the pending transaction.

OWNER'S DECLARATION

Escrow No.: 30034123-989-989-SG4
Property Address: 1355 and 1361 Sepulveda Blvd.
Los Angeles, CA 90501

The undersigned hereby declares as follows:

1. (Fill in the applicable paragraph and strike the other)
   a. Declarant ("Owner") is the owner or lessee, as the case may be, of certain premises located at 1355 and 1361 Sepulveda Blvd., Los Angeles, CA 90501, further described as follows: See Preliminary Report/Commitment No. for full legal description (the "Land").
   b. Declarant is the _____ of _____ ("Owner"), which is the owner or lessee, as the case may be, of certain premises located at 1355 and 1361 Sepulveda Blvd., Los Angeles, CA 90501, further described as follows: See Preliminary Report/Commitment No. for full legal description (the "Land").
2. (Fill in the applicable paragraph and strike the other)
   a. During the period of six months immediately preceding the date of this declaration no work has been done, no surveys or architectural or engineering plans have been prepared, and no materials have been furnished in connection with the erection, equipment, repair, protection or removal of any building or other structure on the Land or in connection with the improvement of the Land in any manner whatsoever.
   b. During the period of six months immediately preceding the date of this declaration certain work has been done and materials furnished in connection with _____ upon the Land in the approximate total sum of $_____, but no work whatever remains to be done and no materials remain to be furnished to complete the construction in full compliance with the plans and specifications, nor are there any unpaid bills incurred for labor and materials used in making such improvements or repairs upon the Land, or for the services of architects, surveyors or engineers, except as follows: _____. Owner, by the undersigned Declarant, agrees to and does hereby indemnify and hold harmless Fidelity National Title Company against any and all claims arising therefrom.
3. Owner has not previously conveyed the Land; is not a debtor in bankruptcy (and if a partnership, the general partner thereof is not a debtor in bankruptcy); and has not received notice of any pending court action affecting the title to the Land.
4. Except as shown in the above-referenced Preliminary Report/Commitment, there are no unpaid or unsatisfied mortgages, deeds of trust, Uniform Commercial Code financing statements, regular assessments, special assessments, periodic assessments or any assessment from any source, claims of lien, special assessments, or taxes that constitute a lien against the Land or that affect the Land but have not been recorded in the public records. There are no violations of the covenants, conditions and restrictions as shown in the above-referenced Preliminary Report/Commitment.
5. The Land is currently in use as _____; _____ occupy/occupies the Land; and the following are all of the leases or other occupancy rights affecting the Land:

   _____
6. There are no other persons or entities that assert an ownership interest in the Land, nor are there unrecorded easements, claims of easement, or boundary disputes that affect the Land.
7. There are no outstanding options to purchase or rights of first refusal affecting the Land.
8. Between the most recent Effective Date of the above-referenced Preliminary Report/Commitment and the date of recording of the Insured Instrument(s), Owner has not taken or allowed, and will not take or allow, any action or inaction to encumber or otherwise affect title to the Land.

This declaration is made with the intention that Fidelity National Title Company (the "Company") and its policy issuing agents will rely upon it in issuing their title insurance policies and endorsements. Owner, by the undersigned Declarant, agrees to indemnify the Company against loss or damage (including attorneys fees, expenses, and costs) incurred by the Company as a result of any untrue statement made herein.

I declare under penalty of perjury that the foregoing is true and correct and that this declaration was executed on _____ at _____.

Executive Summary

Cummins & White, LLP (the User) retained Roux Associates, Inc. (Roux) to perform a Phase I Environmental Site Assessment (ESA) of the property located at 1351 Sepulveda Boulevard in the Harbor Gateway neighborhood of the City of Los Angeles, California (Site). It should be noted that the Site has a Torrance postal address, which has been used to identify the Site throughout this report. The Site consists of three parcels are identified by Los Angeles Assessor's Parcel Numbers (APNs) 7347-018-078 (1351-1355 Sepulveda Boulevard, subsequently identified as Parcel 1), 7347-018-003 (1361 Sepulveda Boulevard, Parcel 2), and 7347-018-085 (no associated address, Parcel 3). The Site location is shown in Figure 1 and the Site and vicinity are shown in Figure 2. Roux performed this Phase I ESA in general accordance with the American Society for Testing Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM E1527-13) in an effort to identify, to the extent feasible, the presence of Recognized Environmental Conditions (RECs) with respect to the Site as defined in ASTM E1527-13.

The Site is located in a mixed commercial and residential area within the Harbor Gateway neighborhood of the City of Los Angeles, California. According to Los Angeles County Assessor data, the area of Parcel 1 is 5.01 acres, the area of Parcel 2 (located inside of Parcel 1 to the south) is 0.81 acres, and the area of Parcel 3 (located east of Parcel 1) is 1.58 acres, for a combined total of 7.40 acres. At the time of Site reconnaissance, Parcels 1 and 3 were occupied by Mulligan Family Fun Center (1351 Sepulveda Boulevard), a family amusement facility. Site improvements include two buildings (Building A and Building B; see Figure 2) a miniature golf course, two go-kart tracks (East Track and West Track; see Figure 2), a paddle boat pond, batting cages, a rock-climbing wall, and asphalt-paved parking areas. Building A is occupied by a laser tag facility, café, kitchen, arcade, event space, and offices. Building B is occupied by repair shops for the go-karts and arcade games as well as storage. Additional improvements include numerous sheds, canopies, picnic tables, concrete paved walkways, and landscaping. The southern portion of Parcel 3 is a vacant, fenced lot which appears to be partially paved. Parcel 2 (1361 Sepulveda Boulevard) is a vacant former ready-mix concrete batch plant with a tower used by the former facility remaining on-Site and an unpaved lot.

On August 27, 2019, Roux personnel visually assessed the Site for potential RECs, including, but not limited to, underground storage tanks (USTs), aboveground storage tanks (ASTs), polychlorinated biphenyl (PCB)-containing equipment, hazardous materials storage or handling areas, containerized or bulk wastes, and visual indications of impacted soil.

Roux also performed a records review in an effort to identify RECs in connection with the Site. This records review addressed the Site and surrounding properties. Roux reviewed commercially available records associated with the Site and nearby properties to assess potential concerns associated with the migration of hazardous substances. The records review also included reasonably ascertainable historical data, which can be helpful in identifying the past uses of the Site and surrounding areas, as it may relate to the environmental condition of the Site.

Roux performed interviews and/or file reviews with various government agencies and other parties with possible knowledge of the Site and surrounding properties in an effort to identify current and past uses of the Site and surrounding areas, as they may relate to the environmental condition of the Site.

ASTM E 1527-13 defines a Recognized Environmental Condition (REC) as:

> "The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

A controlled Recognized Environmental Condition (cREC) as:

> "A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

And a historical Recognized Environmental Condition (hREC) as:

> "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a *recognized* environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition."

This Executive Summary provides a brief overview of the findings of this Phase I ESA. Although the Executive Summary is an integral part of a report, it does not substitute for reading the entire report or the appended or referenced documents in order to fully understand the findings and potential environmental concerns associated with the Site.

Based on the information obtained through the performance of this ESA, Roux identified the following RECs in connection with the current and historical operations at the Site or adjacent properties. To the extent possible, the locations of the RECs are shown in Figure 2.

- **REC 1 – Former and Current Oil Development On-Site and in the Site Vicinity.** The Site is located in the active Torrance Oil Field and was historically used for oil development activities circa 1924 to 1964. Although oil production in the Torrance Oil Field has decreased significantly since the 1950s, production continues on adjacent and nearby properties. According to the Division of Oil, Gas, and Geothermal Resources (DOGGR) records, historical aerial photographs, and an Land Title Associate (ALTA)/National Society of Professional Surveyors (NSPS) Land Title Survey for the Site dated September 17, 2019, prepared by Plotnik and Associates Civil Engineering and Land Surveying (ALTA/NSPS Survey), six oil wells were formerly located on-Site and were used for oil production. The six wells were drilled in 1924 and were subsequently abandoned between 1930 and 1964 in accordance with the DOGGR standards at their respective times of abandonment. Additional

features associated with oil development activities were observed in historical aerial photographs dated 1928 to 1963 including suspected oil pits, and storage and staging areas; the approximate locations of these features are depicted in Figure 3. Drilling of oil wells is known to generate drill cuttings and drilling mud that could be impacted by hydrocarbons encountered in the subsurface. Operation of oil wells is also known to cause near-surface hydrocarbon impacts to soil and soil gas.

- **REC 2 – Fill Material.** During the construction of the on-Site miniature golf course and East Track of Mulligan Family Fun Center, unknown fill material was likely imported to create the present varied terrain. Due to the unknown origins of the fill, it is possible that the fill materials may be impacted.

- **REC 3 – Industrial Operations On-Site and in the Site Vicinity.** The Site vicinity has been used for heavy industrial activity since at least 1952. A rail spur was visible in a 1952 aerial photographs on the eastern adjacent property and several industrial structures and storage/staging areas were present to the east and northeast of the Site by 1963. The storage/staging areas extended onto Parcel 3 and a portion of one of the industrial structures extended onto the southeastern portion of Parcel 3. Possible staining was noted in a 1983 historical aerial photograph, following the removal of the stored products. Industrial structures were present on the Site until at least 2005 and industrial operations on adjacent properties continue as of this report date. Materials typically used in industrial operations include chlorinated solvents or petroleum products. Although the specific operations and associated materials of the nearby industrial facilities are unknown, it is possible that subsurface conditions at the Site may have been impacted.

- **REC 4 – Off-Site Tetrachloroethylene (PCE) and Trichloroethylene (TCE) Release Case.** The facility identified as Multi-Tenant Office-Warehouse Property, located at 1500-1510 West 228th Street (approximately 531 feet north-northwest from the Site) identified PCE and TCE contamination in groundwater, soil, and soil gas. According to the most recent quarterly groundwater monitoring report dated July 8, 2019, MW-3, located approximately 708 feet northwest from the Site, had a PCE concentration of 29 µg/L and a TCE concentration of 5.1 µg/L. MW-4, located approximately 627 feet northwest from the subject Site had a PCE concentration of 300 µg/L and a TCE concentration of 45 µg/L (ADR 2019). The concentrations detected in groundwater exceeded the California MCLs for both TCE and PCE. The impacts have not been delineated in the direction of the Site.

Roux did not identify cRECs in connection with the current or historical operations at the Site or adjacent properties.

Based on the information obtained through the performance of this ESA, Roux identified the following hRECs in connection with the current and historical operations at the Site or adjacent properties. To minimize possible confusion, the REC and hREC identification numbers are sequential.

- **hREC 5 – Former UST.** According to previous on-Site investigations, a 12,000-gallon diesel UST was formerly located at the central-north portion of Parcel 2 and was used to fuel the fleet of trucks associated with the former ready-mix concrete batch plant operations. This UST was removed in July 2012 and a November 2012 investigation found that the level of soil contamination at the Site exceeded the LAFD's action levels. Concentrations in soil from one of three confirmation samples beneath the UST exceeded the action level of 100 mg/kg for TPH-DRO. Further investigations concluded that hydrocarbons were not related to the former UST. In June 2013, the LAFD stated that no further action related to the former UST was required.

The term Recognized Environmental Condition is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Other environmental features (OEFs) are environmental conditions that do not meet the definition of a REC, but which may warrant mention in a comprehensive Phase I ESA. Based on the subject Phase I ESA, Roux identified the following OEFs. To the extent possible, the locations of the OEFs are shown in Figure 2. To minimize possible confusion, the REC and OEF identification numbers are sequential.

- **OEF 6 – On-Site Use of Gasoline and Maintenance Materials.** The current occupant of Parcels 1 and 3, Mulligan Family Fun Center, uses small amounts of gasoline and maintenance materials to fuel the gasoline go-karts for West Track and to perform maintenance on the go-karts and arcade games in Building B. A storage shed located southwest of East Track on Parcel 1 is used to store gasoline and waste oil is stored north of East Track on Parcel 3. Based on the small quantities and the lack of evidence indicating a release, the storage and use of these materials was not identified as a significant environmental concern.

- **OEF 7 – Pressurized Oil Pipelines.** Based on the National Pipeline Mapping System (NPMS) Public View database, is suspected that one active crude oil pipeline is located adjacent to the Site along Sepulveda Boulevard. Eight additional petroleum pipelines are located within approximately 1,000 feet of the Site. No indication of a release from any of the pipelines was identified by Roux in the preparation of this Phase I ESA.

- **OEF 8 – Methane Zone.** According to the City of Los Angeles Department of City Planning, the Site is located within a Methane Zone indicating that methane mitigation is likely required for on-Site buildings. The City of Los Angeles should be contacted prior to Site redevelopment activities to determine the specific methane mitigation requirements for the Site.

1. Introduction

Roux Associates, Inc. (Roux) completed this Phase I Environmental Site Assessment (ESA) of the property located at 1351 Sepulveda Boulevard in the Harbor Gateway neighborhood of the City of Los Angeles, California (Site). It should be noted that the Site has a Torrance postal address, which has been used to identify the Site throughout this report. The Site location is shown in Figure 1 and the Site and vicinity are shown in Figure 2. Roux performed this Phase I ESA in compliance with the scope and limitations of American Society for Testing Materials (ASTM) E1527-13 and the terms and conditions of Roux's proposal dated August 17, 2019. Roux conducted this Phase I ESA for the benefit of Cummins & White, LLP (the User).

The following sections of this report present our Phase I ESA findings and conclusions. A glossary containing terms and definitions presented in ASTM E1527-13 is included in Appendix A – Glossary of Terms. Other appendices presented at the end of the report include historical topographic maps, historical aerial photographs, regulatory records review documentation, applicable historical records, and personnel qualifications.

1.1 Purpose

The purpose of this Phase I ESA is to identify and report, to the extent feasible, Recognized Environmental Conditions (RECs) with respect to the Site. Performing a Phase I ESA in general compliance with ASTM E 1527-13 may enable a User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. That is, the practice that constitutes one of the requirements for "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in 42 USC Section 9601(35) (B).

1.2 Scope of Services

The scope of services for this Phase I ESA included, but was not limited to, the activities listed below.

- A review of reasonably ascertainable and practicably reviewable topographic maps, historical aerial photographs, and city directories, if available, to investigate past Site conditions;
- A review of specific government lists pursuant to ASTM Standard E 1527-13 regarding environmental activities for the Site and local area properties;
- A review of recorded land title records, building, assessors, and fire department records, for permits, citations, and reports connected to the Site that were reasonably ascertainable, practicably reviewable, and publicly available within reasonable time and cost;
- An inspection by an environmental professional to investigate the current use of the Site and to identify environmental concerns including but not limited to, the presence of hazardous substances or petroleum products, wastes, underground storage tanks (USTs), aboveground storage tanks (ASTs), or other environmental concerns;
- Interviews with available representatives of the owner of the Site, occupants, and local government officials by an environmental professional; and

- Preparation of this Phase I ESA report.

Roux initiated this Phase I ESA pursuant to receipt of written authorization to proceed on March 26, 2019.

1.3 Standard of Care

Roux conducted this Phase I ESA using a defined scope of services considered appropriate and agreed upon by all parties on the date the service was authorized, unless the scope of services or the methods used were later modified, in writing, and accepted by all parties prior to performance. Roux conducted this Phase I ESA in accordance with generally accepted practices in a manner consistent with that level of care exercised by other members of our profession in the same locality and under similar conditions of time and accessibility of improvements and information. No other representations, expressed or implied, and no warranty or guarantee is included or intended to be part of this Phase I ESA.

Please note that the scope of services performed in execution of this assessment may not be appropriate to satisfy the needs of other parties. We, therefore, are not responsible for independent conclusions, opinions, or recommendations of others based on our assessment. Furthermore, this Phase I ESA relates to the environmental conditions of the Site and does not address issues raised in transactions such as business risk, purchase of business entities, or interests therein, or of their assets, that may well involve environmental liabilities pertaining to properties previously owned or operated or other offsite liabilities.

Additionally, the findings of this Phase I ESA are based on Roux's observations, inquiries, and historical research using reasonably ascertainable and practically reviewable information obtained within reasonable time and cost constraints. Roux does not represent that this Phase I ESA is an exhaustive investigation that reflects the findings of all of the information available for the Site, nor is it representative of future Site conditions. If additional information is generated from the Site, it should be provided to Roux so that we may evaluate its impact on our conclusions. As such, activities or episodes that transpire subsequent to this Phase I ESA are not considered in this assessment. It is not intended that a Phase I ESA in accordance with ASTM E1527-13 be an exhaustive assessment of a property nor can it wholly eliminate uncertainty regarding the potential for RECs in connection with a property.

1.4 Assumptions

This Phase I ESA Report, including the exhibits attached hereto, describes the results of Roux's investigation to identify the presence of RECs connected with the Site in accordance with ASTM E1527-13, as allowed by and consistent with the regulatory requirements of the All Appropriate Inquiry Rule, 40 CFR Part 312, Amendment to Standards and Practices for All Appropriate Inquires Under CERCLA, Final Rule, published December 30, 2013 (AAI Rule). Specifically, the preamble to the amended AAI Rule states:

> *The Environmental Protection Agency (EPA) today is taking final action to amend the standards and practices for conducting all appropriate inquiries under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) to reference a standard practice recently made available by ASTM International, a widely recognized standards development organization. Specifically, this final rule amends the "All Appropriate Inquiries Rule" at 40 CFR Part 312 to reference ASTM International's E1527–13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site*

Assessment Process'' and make clear that persons conducting all appropriate inquiries may use the procedures included in this standard to comply with the All Appropriate Inquiries Rule[1].

One of the requirements that a person acquiring real property must meet in order to qualify for either the innocent landowner, contiguous owner, or bona fide prospective purchaser (collectively hereinafter "Prospective Purchaser") defense to liability under the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986, and the Small Business Liability Relief and Brownfields' Revitalization Act of 2002, 42 U.S.C. 9601-9675 (collectively referred to hereafter as "CERCLA") is that person must conduct all appropriate inquiries into the previous ownership and uses of the property in conformance with the AAI Rule (or the ASTM E1527-13) prior to acquisition of the property. The User has acknowledged that, under the AAI Rule, Roux's performance of this Phase I ESA in accordance with ASTM E1527-13 will not alone result in the User satisfying all requirements of the AAI Rule and will not in itself provide a defense to CERCLA liability. The User has acknowledged that the AAI Rule also requires that the Prospective Purchaser undertake certain additional inquiries and post-acquisition activities to satisfy the CERCLA AAI requirements. Accordingly, Roux makes no guarantees or warranties, expressed or implied, regarding this Phase I ESA, including without limitation, that this Phase I ESA will qualify the User for a defense to CERCLA liability.

Roux has performed this Phase I ESA in a professional manner using that degree of skill and care exercised for similar projects under similar conditions by reputable and competent environmental consultants. Professional judgments expressed herein are based on the facts currently available to Roux.

The AAI Rule requires, and the conclusions and recommendations stated herein represent, the application of a variety of engineering and technical disciplines to material facts and conditions associated with the Site. As such, these conclusions and recommendations are based on subjective interpretations and the exercise of discretion based on the facts available to Roux and conditions at the time of the performance of this Phase I ESA. Many of these facts and conditions are subject to change over time. Accordingly, the conclusions and recommendations must be considered within this context.

The User has agreed that Roux shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time this Phase I ESA was performed. To the extent practicable, Roux has identified data gaps, and has evaluated the potential significance of such data gaps. Recommendations to address those data gaps are presented herein and are based on the data available at the time of the performance of this Phase I ESA. Implementation of the recommendations may not fully address the data gaps, and the information obtained from execution of those recommendations may alter and/or modify the interpretation of the Site conditions and conclusions, herein. This Phase I ESA does not include consideration of matters specifically excluded by ASTM E1527-13, including but not limited to, asbestos-containing building materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, and mold unless specifically identified herein.

Roux has not collected any soil and/or groundwater samples on the Site for Phase I purposes, and is relying on information presented by others, often in preliminary, draft, or verbal form. By referencing this information, Roux does not accept responsibility for the accuracy of the underlying data, sampling methods, laboratory analysis, or documentation.

[1] Federal Register: December 30, 2013 (Volume 78, Number 250) Page 79319

This Phase I ESA Report should not be considered a legal interpretation of existing environmental laws and regulations. This Phase I ESA was conducted with a reasonable degree of inquiry to identify RECs, but uncertainty is not eliminated. No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. The Phase I ESA process is intended to reduce, but not eliminate, the uncertainty involved with identifying RECs.

This Phase I ESA Report is not an appraisal or value judgment of the Site. The User has agreed that Roux shall not be liable for any use of this Phase I ESA Report as an appraisal or value judgment of the Site.

This Phase I ESA Report has been prepared for the exclusive use of the User for specific application to the Site covered by this Phase I ESA Report. The User has agreed that any third-party use of this Phase I ESA Report, upon disclosure by the User, is the sole responsibility and at the sole liability of the User.

1.5 User Reliance

This report is confidential and has been prepared at direction of Counsel for the exclusive use of the User. No additional parties may use the information contained in this report without obtaining the written permission of Roux or the User. Roux's duties and obligations extend to the User and to no other party. Roux's duties and obligations to the User are not transferable to persons, corporations, or organizations without the express written consent of the User and Roux. The User may rely upon the information provided in this Phase I ESA report for a period of 180 days from the date of issue. After 180 days, this Phase I ESA should be updated in accordance with ASTM guidance. Roux will not be liable for any consequential damages arising from the use of this report for other than its intended purpose, for use of this report beyond 180 days of its issue date, or from unauthorized use by third parties.

This Phase I ESA report must be read and interpreted as a whole and can only be considered representative of the conditions of the Site as of the date of our Site reconnaissance described herein. Roux makes no representation whatsoever concerning the condition of the Site beyond the date of our Site reconnaissance described herein. Individual sections and appendices of this report are dependent on the balance of this report, and on the terms, conditions, and stipulations contained in the proposal and written amendments accepted by Roux.

2. Site Description

2.1 Location and Legal Description

The Site consists of three contiguous parcels located in the Harbor Gateway neighborhood of the City of Los Angeles, California (Figure 1). The three parcels are identified by Los Angeles Assessor's Parcel Numbers (APNs) 7347-018-078 (1351-1355 Sepulveda Boulevard, subsequently identified as Parcel 1), 7347-018-003 (1361 Sepulveda Boulevard, Parcel 2), and 7347-018-085 (no physical addressed associated, Parcel 3).

According to Los Angeles County Assessor data, the area of Parcel 1 is 5.01 acres, the area of Parcel 2 is 0.81 acres, and the area of Parcel 3 is 1.58 acres, for a combined total of 7.40 acres. The Site is bounded by Sepulveda Boulevard to the south, and mixed commercial, industrial, and residential properties to the west, north, and east (Figure 2).

2.2 Site and Vicinity General Characteristics

As depicted in the Torrance, California (2012) 7.5-minute quadrangle topographic map published by the United States Geological Survey (USGS), the elevation of the Site is approximately 60 feet above mean sea level (amsl). The topography of the Site and surrounding areas is generally flat with a gentle slope toward the southwest.

At the time of Site reconnaissance, Parcels 1 and 3 were occupied by Mulligan Family Fun Center (1351 Sepulveda Boulevard), a family amusement facility. Site improvements include two buildings (Building A and Building B; see Figure 2) a miniature golf course, two go-kart tracks (East Track and West Track; see Figure 2), a paddle boat pond, batting cages, a rock-climbing wall, and asphalt-paved parking areas. Building A is occupied by a laser tag facility, café, kitchen, arcade, event space, and offices. Building B is occupied by repair shops for the go-karts and arcade games as well as storage. Additional improvements include numerous sheds, canopies, picnic tables, concrete paved walkways, and landscaping. The southern portion of Parcel 3 is a vacant, fenced lot which appears to be partially paved. Parcel 2 (1361 Sepulveda Boulevard) is a vacant former ready-mix concrete batch plant with a tower used by the former facility remaining on-Site and an unpaved lot.

2.3 Past and Current Use of the Site

Based on Roux's review of historical sources and previous reports for the Site, the Site is located within the Torrance Oil Field, and at least five oil wells and other features associated with oil development activities were historically located on the Site (circa 1924-1964). Although most of the oil production in the Torrance Oil Field has significantly decreased since 1928, active oil production operations were observed adjacent to the Site across Sepulveda Boulevard to the south. From at least 1963 to 1994, the northern and eastern areas of the Site appeared to be in use for storage and/or staging operations associated with the adjacent industrial facilities. From at least 1963 to 2010, Parcel 2 was used as a concrete batch plant. By 1993, Parcel 1 was developed with the present facility, the Mulligan Family Fun Center. By 2001, the Mulligan Family Center had expanded onto Parcel 3. The Site is currently located in a mixed commercial, industrial, and residential area and continues operations as a family amusement facility.

2.4 Physical Setting

Roux obtained and reviewed published, reasonably ascertainable information concerning the physical setting of the Site. The following is a summary of our review of those physical setting sources.

2.4.1 Surface Water and Drainage

There are no surface water bodies in proximity to the Site. The closest surface water body is the Dominguez Channel which is located approximately 2.25 miles northeast of the Site.

2.4.2 Physiographic Setting

The Site is located within the southern portion of the Torrance Plain, which extends approximately 28 miles south from Santa Monica in the northwest to Long Beach in the southeast and ranges from 5 to 12 miles wide (The Source Group, Inc., 2009). This relatively flat, low relief plain is enhanced by its proximity to the Palos Verdes Hills, a prominent topographic feature, in the southwest margin of the Torrance Plain.

2.4.3 Regional and Local Geology

The primary geologic feature in the vicinity of the Site is the Newport-Inglewood fault zone (NIFZ), which traverses the Site in a northwest-southeast direction. The term fault zone refers to the occurrence of a series of interconnected fault planes, rather than a single defining fault plane. Tertiary and younger sediments are structurally folded and deformed along the NIFZ. According to prior investigations, the Site is underlain by Quaternary sedimentary deposits that consist of gravels, sands, silts, clays (Roux, 2013).

2.4.4 Regional and Local Hydrogeology

According to a prior investigation by Roux in 2013, the Site lies within the Coastal Plain of Los Angeles County, which gently slopes down to the south-southwest. The Site is located within the West Coast Basin which is divided into four structural blocks delineated by zones of faulting and flexure. It is bounded on the north by the Ballona Escarpment, on the east by the NIFZ, and on the south and west by the Pacific Ocean and consolidated rocks of the Palos Verdes Hills (Groundwater Bulletin 118, February 2004). The NIFZ forms a partial barrier to the groundwater movement in the area and is marked by thinning, folding, and offsetting of the aquifers. The West Coast Basin is underlain by a series of marine and continental deposits ranging in age from Holocene to Middle Miocene.

The general groundwater flow direction in the region is southward and westward from the Central Coastal Plain toward the ocean. However, groundwater studies in the vicinity of the Site indicate that groundwater is flowing to the southeast. Groundwater monitoring in the vicinity of the Site indicates that the depth to groundwater is approximately 65-69 feet bgs (ADR 2019).

3. Sources of Information

Sources of information utilized in preparing this Phase I ESA report included historical topographic maps; historical aerial photographs; in-person reconnaissance of the Site and adjoining properties; discussions with User and tenant personnel; a review of records available at selected local and state regulatory agencies; a review of databases maintained by local, state, and federal government agencies; and other records available from commercial and online sources.

3.1 Topographic Maps

To help understand the history of the Site and past land uses, copies of historical U.S. Geological Survey topographic maps published between 1896 and 2012 were obtained from Environmental Data Resources, Inc. (EDR), of Shelton, Connecticut. These maps have been included, in reverse chronological order as Appendix B.

3.2 Aerial Photographs

To supplement the information from the topographic maps, a "Decade Package" of aerial photographs taken between 1928 and 2016 was obtained from EDR. The aerial photographs obtained by EDR have been consolidated and included, in reverse chronological order, as Appendix C.

3.3 Fire Insurance Maps

At Roux's request, EDR conducted a search for fire insurance map coverage of the Site. EDR indicated that no fire insurance map coverage was available for the Site. A copy of the Certified Sanborn Map Report to that effect is included as Appendix D to this report.

3.4 City Directories

City directories have been published for cities and towns across the United States since the 1700s. Originally a list of residents, the city directories subsequently developed into a useful tool for locating individuals or businesses in certain areas. A copy of "The EDR-City Directory Abstract" is included as Appendix E to this report.

3.5 Government Databases

To document potential sources of contamination at or near the Site, a government records search was conducted by EDR. The search included local, state, and federal records for the Site and for other properties within ASTM-standard distances of the Site. The records search is summarized in Section 7.0 and a copy of "The EDR Radius Map™ Report with GeoCheck®," dated August 20, 2019, is included in its entirety as Appendix F. As recommended by ASTM, all but a few of the databases searched were "current," i.e., had been updated within 90 days prior to the search date.

3.6 Site Reconnaissance

On August 27, 2019, Roux personnel conducted reconnaissance of the Site. During the Site reconnaissance, Roux were accompanied by Mr. Robert Thomas, Manager of the Mulligan Family Fun Center. A detailed description of the reconnaissance is provided in Section 4.2. Selected photographs taken during the reconnaissance have been annotated and are included in Appendix G.

3.7 Information from Regulatory Agencies

Roux contacted selected federal, state, and local regulatory agencies to determine whether they have potentially relevant environmental records pertaining to the Site, in particular including records relating to USTs, aboveground storage tanks (ASTs), environmental permits, enforcement orders, reports and correspondence related to Site investigation/assessment, soil sampling, monitoring, clean up/remediation, removal actions, closures, or any records related to conditions in air, soil, surface water, groundwater, or other environmental media. The agencies contacted and Roux's interactions with them are documented below. Roux contacted or reviewed information from the following agencies:

- Federal;
    - United States Environmental Protection Agency (EPA),
    - National Pipeline Mapping System (NPMS),
- State;
    - State Water Resources Control Board (SWRCB): GeoTracker,
    - SWRCB: Storm Water Multiple Application and Report Tracking System (SMARTS),
    - Department of Toxic Substances Control (DTSC),
    - DTSC: EnviroStor,
    - DTSC: Hazardous Waste Tracking System (HWTS),
    - California Air Resources Board (CARB),
    - California Office of Environmental Health Hazard Assessment (OEHHA),
    - CalEPA: CalRecycle,
    - CalRecycle: Solid Waste Information System (SWIS),
    - State of California Department of Conservation: Division of Oil, Gas and Geothermal Resources (DOGGR),
- County/Regional;
    - Los Angeles Regional Water Quality Control Board (LA-RWQCB),
    - South Coast Air Quality Management District (SC-AQMD),
    - Los Angeles County Fire Department (LACoFD): Health Hazardous Materials Division (HHMD),
    - Los Angeles County Department of Public Works (LACDPW),
    - LACDPW: Building & Safety Department,
    - LACDPW: Geotechnical and Materials Engineering Division (GMED),
    - LACDPW: Solid Waste Information Management System (SWIMS),
    - County of Los Angeles Sanitation District (LACSD), and
- City/Local;
    - City of Los Angeles - Department of City Planning,

- City of Los Angeles -Fire Department,
- City of Los Angeles -Department of Building and Safety.

The following sections summarize Roux's review of those records. Copies of the records are provided in Appendix H – Regulatory Records Documentation.

3.7.1 Federal Agencies

3.7.1.1 United States EPA

Roux submitted an online Public Records Request on FOIAonline on August 19, 2019. On September 11, 2019 the EPA responded indicating that they did not find additional records pertaining to the Site other than the information found on the EPAs MyProperty website.

Roux also queried the EPA's MyProperty website on August 19, 2019. One facility was found associated with the 1351 Sepulveda Boulevard address: The Mulligan Family Fun Center (EPA Registry ID: 1 10066625165). This Site is referenced in two information systems: California-Enviroview and Resource Conservation and Recovery Act Information System. Relevant information collected from the MyProperty website has been incorporated into this Phase I ESA report as appropriate.

3.7.1.2 NPMS

Roux queried the online NPMS Public View database on August 20, 2019. The following pipeline is located along Sepulveda Boulevard which borders the Site:

- An active (unfilled) crude oil pipeline (pipeline ID: CAG3787D) operated by Chevron Pipeline Co. (operator ID: 2731). The pipeline is part of the Wilmington Torrance system and is 1.55 miles total in length.

Eight additional pipelines are located within approximately 1,000 feet of the Site.

- An active (unfilled) crude oil pipeline (pipeline ID: CAG3862) operated by Chevron Pipeline Co. (operator ID: 2731). The pipeline is part of the Wilmington Torrance system and is 0.34-mile total in length.

- An active (unfilled) crude oil pipeline (pipeline ID: 12010) operated by Torrance Basin Pipeline Company LLC (operator ID: 39532). The pipeline is part of the Thums Crude MP Gathering system and is 1.02 miles total in length.

- An active (filled) pipeline containing "non-HVL product" (pipeline ID: 1997_2) operated by Phillips 66 Pipeline LLC (operator ID: 31684). "Non-HVL product" indicates a refined and/or petroleum product that is not a highly volatile liquid (HVL). The pipeline is part of the 12 In Torrance to Lat Products system and is 6.30 miles total in length.

- An active (filled) pipeline containing "non-HVL product" (pipeline ID: 78) operated by Shell Pipeline Co. L.P. (operator ID: 31174). The pipeline is part of the Ventura Products system and is 10.97 miles total in length.

- An active (filled) pipeline containing “non-HVL product” (pipeline ID: 78) operated by Phillips 66 Pipeline LLC (operator ID: 31684). The pipeline is part of the 6 In Lat Ethanol system and is 10.76 miles total in length.

- An active (filled) pipeline containing “non-HVL product” (pipeline ID: 1998_26) operated by Phillips 66 Pipeline LLC (operator ID: 31684). The pipeline is part of the 8 In LAX Turbine Fuel system and is 17.64 miles total in length.

- An active (filled) pipeline containing “non-HVL product” (pipeline ID: 2221_5) operated by Phillips 66 Pipeline LLC (operator ID: 31684). The pipeline is part of the 20 In Torrance to Watson Produ system and is 8.89 miles total in length.

- An abandoned pipeline (pipeline ID: 2250). The pipeline is part of the Redondo Wilmington Crude system and is 0.64-mile total in length.

No information regarding environmental concerns or releases associated with the pipelines was identified during the review of historical sources or agency records. Any releases associated with a pipeline would be the responsibility of the respective pipeline operator. Roux did not identify any spills, leaks, or other releases associated with the subsurface oil pipelines located within or adjacent to the Site. On this basis, the presence of the oil pipelines is not considered a REC for Phase I ESA purposes; for completeness, it is considered an other environmental feature (OEF).

3.7.2 State Agencies

3.7.2.1 SWQCB: GeoTracker

Roux queried the online SWRCB GeoTracker database on August 20, 2019. The following release cases were identified within 1,000 feet of the Site.

- Formerly Ready Mix & Concrete, 1361 Sepulveda Boulevard (the Site), was listed as a closed Leaking Underground Storage Tank (LUST) cleanup case, further discussed in Section 6.0.

- Dexol Industries, 1450 West 228th Street, was listed as a closed LUST Cleanup case. This facility is further discussed in Section 7.1.2.

- Western Brass, 1338 West 228th Street, was listed as a closed LUST Cleanup case. This facility is further discussed in Section 7.1.2.

- Multi-Tenant Office-Warehouse Property, 1500-1510 West 228th Street, was listed as an open Cleanup Program case. This facility is further discussed in Section 7.1.2.

- Baker Fence and Roof Co., 23308 Normandie Avenue, was listed as a closed LUST Cleanup case. Based on the distance from the Site, relative hydrological position, and/or the regulatory status, this facility was not identified as a significant concern to the Site and is therefore not discussed further.

- Chevron #9-5697, 1250 Sepulveda Boulevard, was listed as a closed LUST Cleanup case. Based on the distance from the Site, relative hydrological position, and/or the regulatory status, this facility was not identified as a significant concern to the Site and is therefore not discussed further.

According to GeoTracker, the cleanup status of Formerly Ready Mix & Concrete, 1361 Sepulveda Boulevard (the Site), was listed as completed. A leak was discovered on September 5, 2012. The case was closed as of February 13, 2014 and reportedly involved diesel, benzene, toluene, and xylenes. A potential media of concern was not listed. Refer to Section 6.0 for discussion of previous on-Site investigations.

Refer to Section 7.1 for discussion regarding the remaining release cases of potential concern located within 1,000 feet of the Site.

3.7.2.2 SWQCB: SMARTS

Roux queried the online SWRCB SMARTS database on August 20, 2019. There were no facilities associated with the Site.

3.7.2.3 DTSC

Roux submitted a Public Records Requests via email to DTSC offices in Chatsworth, Cypress, and Sacramento on August 19, 2019. The Sacramento office responded on August 20, 2019 and did not have any records for the Site. As of the date of this report, Roux has not received any additional information pertaining to the Site from the Chatsworth or Cypress offices.

3.7.2.4 DTSC: EnviroStor

Roux queried the online DTSC EnviroStor database on August 8, 2019. No listings or records pertaining to the Site or facilities within 1,000 feet of the Site were identified.

3.7.2.5 DTSC: HWTS

Roux queried the online DTSC HWTS database on August 20, 2019. The query came back with information for the Site. The address 1351 Sepulveda Boulevard is listed as an active site with the ID number CAL000282371. The address 1361 Sepulveda Boulevard had four associated listings: Associated Ready Mixed Concrete #2, Associated Ready Mix, Storm Industries/Georgia Claessens Living Trust, and A&A.

- Associated Ready Mix (ID number CAC001490472) was listed as inactive since October 2000. In 1999, 2.085 tons of “tank bottom waste” (California waste code 241) was generated.

- Storm Industries/Georgia Claessens Living Trust (ID number CAC002689506) was listed as inactive since September 2012 and did not have any other records.

- A&A (ID number CAC002698415) was listed as inactive since October 2012. In 2012, 0.834 tons of “tank bottom waste” (California waste code XXX) was generated.

- Associated Ready Mixed Concrete #2 (ID number CAL000240062) was listed as inactive since December 2013. In 2003, 0.836 tons of “waste oil and mixed oil” (California waste code 221) was generated. In 2008, 0.3375 tons of “off-spec, aged, or surplus inorganics” (California waste code 331) was generated. In 2011, 0.924 tons of “AQ SOL (2 < PH < 12.5) W ORG RESIDUES < 10%” (California waste code 134) was generated.

- Mulligan Family Fun Center (ID number CAL000282371) was listed as active as of the date of this report. Below is the amount of waste generated (in tons) from this facility.

Calif. Code	Description	2004	2006	2007	2008	2011	2017
181	OTHER INORGANIC SOLID WASTE	--	--	1.5	--	1.125	--
214	UNSPECIFIED SOLVENT MIXTURE	--	--	--	--	0.27	--
221	WASTE OIL AND MIXED OIL	0.836	0.627	0.418	0.209	0.703	--
331	OFF-SPEC, AGED, OR SURPLUS ORGANICS	1.452	--	--	--	--	--
343	UNSPECIFIED ORGANIC LIQUID MIXTURE	--	--	--	--	--	0.17
	Total	2.288	0.627	1.918	0.209	2.098	0.17

No information regarding a release or mishandling of the hazardous waste was provided on the DTSC HWTS database.

3.7.2.6 CARB

Roux submitted a Public Records Request via email on August 19, 2019. On August 27, 2019 Roux received a response from the agency via email stating there were no records associated with the Site were identified.

3.7.2.7 California OEHHA

Roux submitted a Public Records Request via email on August 19, 2019. The agency responded on August 21, 2019 via email and stated that no records associated with the Site were identified.

3.7.2.8 CalEPA: CalRecycle

Roux submitted a Public Records Request via email on August 19, 2019. On August 28, 2019, the agency responded that they could not find records pertaining to the Site.

3.7.2.9 CalRecycle: SWIS

Roux queried the online SWIS Facility and Site database on August 20, 2019. The query did not result in any additional information for the Site.

3.7.2.10 DOGGR

Roux queried the online DOGGR database on August 20, 2019. According to the database, there are six wells listed at the Site and an additional 52 wells within 1,000 feet of the Site.

Records on the DOGGR website were reviewed for the six wells that appeared to be located on the Site in addition to a well identified in an Land Title Associate (ALTA)/National Society of Professional Surveyors (NSPS) Land Title Survey for the Site dated September 17, 2019, prepared by Plotnik and Associates Civil Engineering and Land Surveying (ALTA/NSPS Survey) provided by the User. Based on the DOGGR records reviewed, the wells were drilled in 1924 and all on-Site wells were used for oil production. All seven wells were reportedly abandoned between 1930 and 1964 in accordance with the DOGGR standards at their respective times of abandonment.

The ALTA/NSPS Survey provided the locations of the following oil wells: House 1, Knape 1 (API: 0403718504), Sloan 1, Hub 1, and Bluemle 1. The ALTA/NSPS Survey is included in Appendix I The locations of the wells generally coincided with features observed in historical aerial photographs. Note that Well Knape 1 (API: 0403718504) was depicted on DOGGR maps as located west of the Site. However, Well Knape 1 was located in the ALTA/NSPS Survey, therefore records are discussed below.

The historical on-Site oil wells represent a REC. Additional well details obtained from DOGGR records are provided below. Information has been incorporated into other sections of the report as appropriate, particularly Section 4.1.

- **Well API: 0403718504, Well Name: Knape 1** (Subsequently identified as Well Knape 1)

  According to DOGGR records, Well Knape 1 was located west of the Site. However, the well was identified in the ALTA/NSPS Survey in the southwestern portion of the Site.

A Notice of Intention to Drill New Well dated July 14, 1934 was submitted by Pan American Petroleum Company. The first productive oil or gas sand was estimated at 3,660 feet bgs and the total depth of the well was 3,890 feet bgs. The well was spudded on January 27, 1924 and it produced oil from March 1924 to July 1925. A report of abandonment was submitted on August 29, 1934 and an agency letter dated September 6, 1934 stated that the well had been abandoned in accordance with agency requirements. The approximate location of Well Knape 1 is depicted in Figure 3.

- **Well API: 0403717110, Well Name: House 1** (Subsequently identified as Well House 1)

  According to DOGGR records, Well House 1 was located in the central portion of Parcel 1. A Notice of Intention to Drill New Well dated March 24, 1924 was submitted by Pan American Petroleum Company. The first productive oil or gas sand was estimated at 3,655 feet bgs and the total depth of the well was 3,891 feet bgs. The well was spudded on April 4, 1924 and it began producing oil on May 15, 1924. Well House 1 was abandoned on December 14, 1925 and an agency letter dated April 25, 1926 stated that the well had been abandoned in accordance with agency requirements. Well House 1 was located in the ALTA/NSPS Survey and its approximate location is depicted in Figure 3.

- **Well API: 0403717111, Well Name: Hub 1** (Subsequently identified as Well Hub 1)

  According to DOGGR records, Well Hub 1 was located in the southeastern portion of Parcel 1. A Notice of Intention to Drill New Well dated March 24, 1924 was submitted by Pan American Petroleum Company. The first productive oil or gas sand was estimated at 3,650 feet bgs and the total depth of the well was 3,889 feet bgs. The well was spudded on April 8, 1924 and it began producing oil on May 19, 1924. Well Hub 1 was abandoned on April 14, 1930 and an agency letter dated May 9, 1930 stated that the well had been abandoned in accordance with agency requirements. Well Hub 1 was located in the ALTA/NSPS Survey and its approximate location is depicted in Figure 3.

- **Well API: 0403717112, Well Name: Hub 2** (Subsequently identified as Well Hub 2)

  According to DOGGR records, Well Hub 2 was located in the northern portion of Parcel 1. A Notice of Intention to Drill New Well dated March 19, 1924 was submitted by Pan American Petroleum Company. The first productive oil or gas sand was estimated at 3,635 feet bgs and the total depth of the well was 3,880 feet bgs. The well was spudded on May 20, 1924 and it began producing oil on July 5, 1924. Well Hub 2 was abandoned on April 21, 1930 and an agency letter dated May 6, 1930 stated that the well had been abandoned in accordance with agency requirements. Well Hub 2 was not located in the ALTA/NSPS Survey; the approximate location depicted in Figure 3 is based on historical aerial photographs and DOGGR records.

- **Well API: 0403717291, Well Name: Sloan 1** (Subsequently identified as Well Sloan 1)

  According to DOGGR records, Well Sloan 1 was located in the central portion of Parcel 2. A Notice of Intention to Drill New Well dated March 24, 1924 was submitted by Pan American Petroleum Company. The first productive oil or gas sand was estimated at 3,650 feet bgs and the total depth of the well was 3,890 feet bgs. The well was spudded on March 29, 1924 and it began producing oil on

May 8, 1924. Well Sloan 1 was abandoned on June 15, 1964 and an agency letter dated January 21, 1965 stated that the well had been abandoned in accordance with agency requirements. Well Sloan 1 was located in the ALTA/NSPS Survey and its approximate location is depicted in Figure 3.

- **Well API: 0403717324, Well Name: Bluemle 1** (Subsequently identified as Well Bluemle 1)

  According to DOGGR records, Well Bluemle 1 was located along the southeastern border of Parcel 3; located within 20 feet of the Site, but not located on-Site. A Notice of Intention to Drill New Well dated March 25, 1924 was submitted by Pan American Petroleum Company. The first productive oil or gas sand was estimated at 3,625 feet bgs and the total depth of the well was 3,880 feet bgs. The well was spudded on March 31, 1924 and it began producing oil on May 28, 1924. Well Bluemle 1 was abandoned on November 19, 1941 and an agency letter dated December 29, 1941 stated that the well had been abandoned in accordance with agency requirements. Well Bluemle 1 was located in the ALTA/NSPS Survey on the eastern adjacent property and its approximate location is depicted in Figure 3.

- **Well API: 0403717325, Well Name: Bluemle 4** (Subsequently identified as Well Bluemle 4)

  According to DOGGR records, Well Bluemle 4 was located in the northern portion of Parcel 3, southeast of Building B. A Notice of Intention to Drill New Well dated May 19, 1924 was submitted by Pan American Petroleum Company. The first productive oil or gas sand was estimated at 3,615 feet bgs and the total depth of the well was 3,875 feet bgs. The well was spudded on May 21, 1924 and it began producing oil on July 24, 1924. Well Bluemle 4 was abandoned on April 17, 1925 and an agency letter dated March 7, 1928 stated that the well had been abandoned in accordance with agency requirements. Well Bluemle 4 was not located in the ALTA/NSPS Survey or identified in historical aerial photographs. The approximate location of Bluemle 4 based on DOGGR records is depicted in Figure 3.

3.7.3 County/Regional Agencies

3.7.3.1 LA-RWQCB

Roux submitted a Public Records Request via email on August 19, 2019. On August 28, 2019 the Regional Board responded that it did not have any records pertaining to the request.

3.7.3.2 SCAQMD

Roux queried the online SC-AQMD database on August 20, 2019. Although there were no facilities listed for the Site, there were four that were on Sepulveda Boulevard between South Western Avenue and Normandie Avenue. All four of the facilities are active and are listed as: SO PAC Rail (120457), Sport Car Classic (172025), El Pollo Loco #5544 (65232), and Bob's Grinder Inc. (79964).

Roux also submitted a Public Records Request via the SC-AMQD online request form on August 19, 2019. As of this report date, a response has not been received from the agency.

3.7.3.3 LACoFD: HHMD

Roux submitted a Public Records Request online on August 19, 2019. The agency responded on August 20, 2019 and stated that they could not find any records pertaining to the Site.

3.7.3.4 LACDPW

Roux queried the Online File Review database for industrial waste, underground storage tanks, and stormwater records on August 20, 2019. The database did not have any information associated with the Site.

3.7.3.5 LACDPW: Building & Safety Department

Roux queried the online Building Permits Viewer database on August 20, 2019. The database did not have any permits for the Site.

3.7.3.6 LACDPW: GMED

Roux submitted a Public Records Request online via email on August 19, 2019. The LACDPW: GMED indicated on August 20, 2019 via email that the location was outside of their jurisdiction.

3.7.3.7 LACDPW: SWIMS

Roux queried the online SWIMS Methane Hazards Search database on August 20, 2019. Due to the location within the City of Los Angeles, the Site is subject to the City's methane code.

3.7.3.8 LACSD

Roux submitted a Public Records Request via email on August 19, 2019. The agency responded on August 20, 2019 and stated that they could not find any records associated with the Site.

3.7.3.9 LASB: Industrial Waste Management Division

Roux submitted a Public Records Request via email on August 19, 2019. Roux received a letter from the Agency on September 24, 2019 stating that no records were found associated with the Site.

1.7.4.0 City of Los Angeles: Department of City Planning

Roux queried the Zone Information and Map Access System (ZIMAS) database on August 20, 2019. The database indicated that the Site is located within a Methane Zone indicating that methane mitigation may be required for on-Site buildings. The City of Los Angeles should be contacted prior to Site redevelopment activities to determine the specific methane mitigation requirements for the Site.

3.7.4.1 City of Los Angeles: Fire Department

Roux submitted a Public Records Request via email on August 19, 2019. The Los Angeles Fire Department responded on August 20, 2019 with several records for the Site. The records reviewed are listed below:

- March 2016 Hazardous Materials System listing. Seven chemicals were listed as being on the Site: gasoline (maximum quantity 330 gallons), gear oil (maximum quantity 55 gallons), helium (maximum quantity 1168 cubic feet), motor oil (maximum quantity 55 gallons), oil waste (maximum quantity 110 gallons), waste cooking oil (maximum quantity 70 gallons), and diesel fuel (maximum quantity 110 gallons).

- March 2016 Hazardous Materials Business Plan (HMBP) Facility Inspection. The inspection found four issues out of compliance; two were minor violations and two were Class II violations. None of the violations indicate a release of the hazardous materials.

- April 2019 HMBP Facility Inspection. One violation was found on the Site which was the failure to electronically submit the business plan before the annual due date.

Information from building records has been incorporated into other sections of the report as applicable, particularly Section 4.1.

3.7.4.2 City of Los Angeles: Department of Building and Safety

Roux queried the LADBS database on August 20, 2019. The database indicated several files that were available to view for the Site. The records reviewed are listed below.

1351 Sepulveda Boulevard

- 1938 application to alter, repair, move, or demolish, owner: H. Brady.
- 1942 application for the erection of a building, owner: Howard Brady.
- February 1972 application to add office space to existing, owner: Cal-Metal Corp.
- June 1993 application to demolish an office building, includes rough blueprint of the Site, owner: Mulligan Ltd.
- June 1993 application for grading for golf driving range and family entertainment center, owner: Mulligan Ltd.
- August 1993 application for new building inspection for driving range pole fencing, includes rough drawing of the facility, owner: Mulligan Ltd.
- August 1993 application for new building inspection for new building (Building A), includes rough drawing of the facility, owner: Mulligan Ltd.
- September 1993 application for new building inspection for driving range pole lights, includes rough drawing of the facility, owner: Mulligan Ltd.
- September 1993 application for new building inspection for amusement cave, includes rough drawing of the facility, owner: Mulligan Ltd.
- September 1993 application for inspection and certificate of occupancy for batting cages, owner: Mulligan Ltd.
- September 1993 application for inspection for Building A, owner: Mulligan Ltd.
- September 1993 revisions to the application for grading for golf driving range and family entertainment center, owner: Mulligan Ltd.
- October 1993 application for inspection for Building A, owner: Mulligan Ltd.
- November 1993 application for new building inspection for miniature golf, driving range, and family entertainment center, includes rough drawing of the facility, owner: Mulligan Ltd.

- December 1993 application and permit for pole sign, includes rough drawing of the facility, owner: Georgia Classens.
- December 1993 application for inspection for Building A and to add a restaurant, owner: Mulligan Ltd.
- December 1993 application for inspection for the batting cages, owner: Mulligan Ltd.
- December 1993 application for inspection for the “amusement cave,” owner: Mulligan Ltd.
- December 1993 certificate of occupancy for the batting cages, owner: Mulligan Ltd.
- December 1993 certificate of occupancy for the miscellaneous amusement building (cave), owner: Mulligan Ltd.
- December 1993 certificate of occupancy for the use of land – miniature golf – driving range and family entertainment center, owner: Mulligan Ltd.
- January 1994 certificate of occupancy for Building A, owner: Mulligan Ltd.
- January 1995 application for building permit and certificate of occupancy for the storage building (Building B), includes rough drawing of the facility owner: Mulligan Ltd.
- March 1995 application to alter the pole fencing to be braced poles and include netting material, owner: Mulligan Limited.
- July 1995 certificate of occupancy for Building B, owner: Mulligan Ltd.
- December 1997 application for a Christmas tree lot, according to the attached drawing it is located adjacent to the baseball field, authorized agent: Tony Giapapas.
- December 1998 application for a Christmas tree lot, according to the attached drawing it is located adjacent to the baseball field, authorized agent: Tony Giapapas.
- March 2001 application for building permit and certificate of occupancy for an office for existing driving range, detailed map of facility included agent for owner: Rob Wetherell Rps.
- May 2001 application for grading permit for the race track, includes detailed map of the facility, contractor: Rob Wetherell- R.P.S.
- June 2001 application for building permit and certificate of occupancy for new retaining wall, detailed map included, wall to be installed directly to the east of East Track, owner: Western Brass Development Corp.
- August 2001 certificate of occupancy for driving range office, owner: Torrance Machinery & Engineering, Inc.
- December 2004 application for building permit and certificate of occupancy for new sign.

- August 2006 application for demolishing the canopy on the driving range.
- February 2012 mechanical permit application for changing out the commercial electric water heater, owner: Georgia Claessens Living Trust.
- April 2018 application for building permit and certificate of occupancy for bumper cars area.

1361 Sepulveda Boulevard

- May 1973 application for inspection of a new building and certificate of occupancy. Includes rough drawing of the concrete batch plant. Owner: Caillier Investment
- September 1974 certificate of occupancy, owner: Caillier Investment.
- May 1977 application for inspection of signs, owner: Andre Caillier.

Information from building records has been incorporated into other sections of the report as applicable, particularly Section 4.1.

3.8 User Provided Information

ASTM E1527-13 provides that the User perform certain tasks. The purpose of this section is to present select User-provided information that can assist in identifying possible RECs in connection with the Site. According to ASTM E1527-13, these tasks do not require the technical expertise of an environmental professional and the environmental professional generally does not perform these tasks.

Roux administered a questionnaire to the User at the beginning of this Phase I ESA to assist them with these tasks. Mr. Alan Kwan of Storm Properties, Inc. provided feedback during Site reconnaissance on August 27, 2019. Mr. Kwan was not aware of any environmental liens, activity and land-use limitations, engineering or institutional controls, chemical releases or contamination on the Site, or environmental cleanups in connection with the Site not otherwise addressed in this report.

3.8.1 Environmental Liens or Activity and Use Limitations

The User indicated that they have no knowledge regarding environmental liens or activity and use limitations (engineering/institutional controls) with respect to the Site.

3.8.2 Specialized Knowledge

The User did not report any specialized knowledge in relation to the Site not otherwise addressed.

3.8.3 Valuation Reduction for Environmental Issues

The User indicated that they have no knowledge regarding valuation reduction for environmental issues.

3.8.4 Commonly Known or Reasonably Ascertainable Information

The User did not have any knowledge regarding commonly known or reasonable ascertainable information about the Site not otherwise addressed.

3.8.5 Obvious Indicators of the Presence or Likely Presence of Contamination of the Site

The User did not have any knowledge regarding obvious indicators of the presence or likely presence of contamination of the Site not otherwise addressed.

4. Site History and Condition

This section documents the history of the Site and describes current conditions and existing or former environmental features. Pursuant to ASTM, Roux requested the following standard historical sources as described in Section 3.0:

- Historical aerial photographs;
- Historical fire insurance maps;
- Historical topographic maps; and
- Local street directories.

Historical sources from the EDR reports have been supplemented by information obtained from the records requests as described in Section 3.7.

4.1 Site History

The history of the Site and, to a lesser extent, the surrounding area, including previous land use, has been compiled based on information from the sources above, particularly the historical aerial photographs and historical topographic maps.

Summary of Historical Sources		
Date Range	**Site Description**	**Historical Sources**
<1900	The earliest topographic map reviewed for Phase I ESA purposes was published in 1896 and depicted the Site as undeveloped and located adjacent to a paved road. Small structures, likely ranch-style residences, were present nearby to the east and west of the Site.	-1896 Historical Topographic Map: Redondo (15-minute)
1901-1920	No significant changes were noted in the 1905, 1910, and 1916 topographic maps relative to the 1896 topographic map.	-1905, 1910, and 1916 Historical Topographic Maps (Nationwide Environmental Title Research, LLC HistoricalAerials.com)

Summary of Historical Sources		
Date Range	**Site Description**	**Historical Sources**
1921-1930	According to DOGGR, six wells located on the Site were all constructed in 1924 and started producing oil the same year. In April 1925, Well Bluemle 4 was abandoned and in December 1925, Well House 1 was abandoned. A 1928 EDR Aerial Photograph showed the Site located in an oil field with numerous features associated with oil development activities, including apparent oil derricks and ponds in the Site vicinity. On the Site itself, there appeared to be four oil wells with derricks and several small dark rectangles, apparent small ponds associated with oil production. Several small structures or storage features were also present. The approximate locations of these features are depicted on Figure 3. A road adjoined the Site to the south (later identified as Sepulveda Boulevard). Similar oil development features were apparent on adjacent and nearby properties (oil derricks, ponds, small structures, storage features). Possible small-scale agricultural features were also observed on surrounding properties. Two railroads were visible in the Site vicinity approximately 0.14 mile to the east of the Site and 0.24 mile southwest of the Site. In April and May 1930 respectively, Well Hub 2 and Well Hub 1 were abandoned.	-1924,1925, and 1930 DOGGR Records -1928 EDR Aerial Photograph
1931-1940	The combined 1930, 1934 topographic map depicted numerous circular features identified as oil wells in the Site vicinity. Four oil wells were depicted on-Site, with a fifth along the western Site boundary, possibly also on-Site. A small structure was depicted in the southern portion of the Site. Several small structures (including circular features possibly indicative of tanks) were depicted on adjoining and nearby properties. A road adjoined the Site to the south (later identified as Sepulveda Boulevard). The two railroads were identified approximately 0.14 mile to the east of the Site (Pacific Electric Railway) and 0.24 mile southwest of the Site (Atchison, Topeka, and Santa Fe Railway). The township of Lomita was labeled approximately 0.42 mile west-southwest of the Site and Los Palos Verdes was labeled approximately 0.57 mile southeast of the Site. Approximately 1.27 miles east of the Site there appeared to be tanks and covered reservoirs, likely used for oil storage. A building permit application dated 1932 indicated that an existing residential structure was altered. A building permit dated 1940 indicated that the Site was still being used for residential purposes and a private garage was constructed. City directory listings appeared to be residential in nature in 1940.	-1930 and 1934 Historical Topographic Map: Compton (7.5-minutes) -1932 Los Angeles Department of Building and Safety Records -1940 Los Angeles Department of Building and Safety Records -1940 Western Directory Company City Directory Listings
1941-1950	In November 1941, Well Bluemle 1 was abandoned in accordance with agency requirements. A 1946 city directory listing appeared to be residential in nature, with the same name as the 1940 building permit owner. Features characteristic of oil development were still apparent in the 1947 aerial photograph; however, they were fewer in number. Features are less distinguishable compared to the 1928 aerial photograph, so it is difficult to discern how many oil wells are still	-1941 DOGGR Records -1946 Western Directory Company City Directory Listings -1947 EDR Aerial Photograph -1948 Historical Topographic Map: Redondo (15-minute) -1950 Pacific Telephone City Directory Listings

Summary of Historical Sources		
Date Range	**Site Description**	**Historical Sources**
	active on-Site. At least one derrick appeared to remain on-Site. The pond features formerly visible were also significantly less prominent, and some areas appeared to be no longer in use. To the north of the Site, approximately 0.20 miles, several new small structures were present, possibly residential in nature. No significant changes were noted in the 1948 topographic map, however the area located approximately 1.27 miles east of the Site was labeled as “oil tanks” By this time. Oil development was still evident in the Site vicinity, however individual wells were no longer depicted. A 1950 city directory listing suggested continued residential use of the Site, with the same name as the 1946 city directory listing.	
1951-1960	According to the 1951 historical topographic map, only one oil well was located on the southern portion of the Site and a small structure was also present in the southern portion of the Site. An unpaved road was depicted along the western boundary of the Site. Fewer oil wells were depicted in the Site vicinity as shown previously in the 1947 aerial photograph. Additional structures and built-up land were depicted on nearby properties. The area to the south of the Site, across Sepulveda Boulevard was identified as "Ironsides." Approximately 1.5 miles northwest of the Site, several large structures were depicted (later identified as “US Naval Res”). Approximately two miles southeast of the Site a sewage disposal facility was present. No other significant changes were noted. In the 1952 aerial photograph an oil derrick was still visible on the Site along with a few buildings. Since the 1947 aerial photograph, several larger buildings had been constructed adjacent to the Site’s eastern boundary. Parcel 3 appeared to be associated with the eastern adjacent property during this time with disturbed land and possible storage on-Site. Within the Site vicinity, there were fewer oil derricks. To the east of the Site there appeared to be a rail spur leading into the property adjacent to the Site.	-1951 Historical Topographic Map: Torrance (7.5-minute) -1952 EDR Aerial Photograph
1961-1970	According to the 1963 aerial photograph, the oil derrick on the Site was no longer visible, and appears to have been replaced by the concrete batch plant. Several industrial structures and storage/staging areas were present to the east and northeast of the Site. According to interviews with Site personnel, these areas were occupied by Western Brass Works, a storage, office, and machining facility, during this time. The storage/staging areas extended onto Parcel 3 during this time as well as a portion of one of the industrial structures located on the southeastern portion of Parcel 3. The rail spur located east of the Site appeared less defined, indicating that it may no longer have been in use. Features associated with oil development in the Site vicinity continued to diminish relative to the 1952 aerial photograph, The 1964 historical topographic map depicted three small structures on-Site fronting Sepulveda Boulevard as well as the structure observed in the 1963 aerial to the east of the Site that extends into Parcel 3. Three oil wells were depicted directly adjacent to the Site’s western boundary. Within the Site vicinity an	-1963 and 1970 EDR Aerial Photograph -1964 Historical Topographic Map: Torrance (7.5-minute) -1964 DOGGR Records -Interviews with Site personnel

Summary of Historical Sources		
Date Range	**Site Description**	**Historical Sources**
	eight-lane highway (presently identified as Harbor Freeway and Transit Way Interstate 110) was depicted approximately one mile to the east of the Site. In June 1964, Well Sloan 1 (the last remaining oil well on the Site, which had been active until at least 1961) was abandoned in accordance with the agency requirements of the time. By 1970, one building and associated parking area were located on Parcel 1. Several small structures and/or storage and parking areas were present on the concrete batch plant within Parcel 2 and it appeared to be enclosed by a fence. The apparent storage/staging operations of Western Brass Works expanded north of the Site and extended into the northern portion of Parcel 1 by 1970. Parcel 3 still appeared to be associated with Western Brass Works as well. Two large buildings were built on the western border off-Site. Additional buildings that appeared to be industrial in nature were present to the north of the Site, fronting West 228th Street.	
1971-1980	The 1972 historical topographic map reflected improvements observed in the 1970 aerial photograph. A structure was depicted toward the northeast corner of the Site. Additional structures were depicted in the area surrounding the Site including two new buildings adjacent to the western edge of the Site. No other changes of note were observed relative to the 1964 historical topographic map. According to a building permit in 1972, an addition to the existing building was built for office space at 1351 Sepulveda Boulevard (Parcel 1). Meanwhile, 1361 Sepulveda Boulevard (Parcel 2) was owned by Caillier Investment and occupied by the concrete batch plant; additional office space was constructed in 1973. According to the 1980 city directories, A & A Ready Mixed Concrete Co Inc occupied 1361 Sepulveda Boulevard and Cal-Metal Corp Pipe occupied 1351 Sepulveda Boulevard. By the time of the 1977 aerial photograph, the storage/staging areas located on the northern portion of Parcel 1 and Parcel 3 and on the northern and eastern adjacent properties appear to have diminished. Areas of disturbed land were present as well as possible staining in the footprints of the former storage/staging areas. Although the buildings associated with the storage/staging areas in Parcel 3 had diminished by 1977, one building to the southeast of the Site still extended onto the southeastern corner of Parcel 3. Additional residential and commercial improvements were visible in the Site vicinity. According to the 1980 city directories, A & A Ready Mixed Concrete Co Inc still occupied 1361 Sepulveda Boulevard (Parcel 2), and Pacific Railroad Constructors occupied 1351 Sepulveda Boulevard (Parcel 1).	-1972 Historical Topographic Map: Torrance (7.5-minute) -1972-1977 Los Angeles Department of Buildings and Safety Records -1975 and 1980 Pacific Telephone City Directory Listings -1977 EDR Aerial Photograph
1981-1990	No significant changes were noted in the 1981 historical topographic map relative to the 1972 historical topographic map,	-1985 Pacific Telephone City Directory Listings

Summary of Historical Sources		
Date Range	**Site Description**	**Historical Sources**
	other than the addition of several buildings in the area surrounding the Site. According to the 1983 aerial photograph, the Site did not appear to change significantly relative to the 1977 aerial photograph, with the exception of more possible staining within the footprints within the storage/staining areas in the southeastern portion of Parcel 3. Parcel 3 still appeared to be associated with the adjacent Western Brass Works industrial facility. The rail spur to the east of the Site was hardly visible in the aerial photograph. Approximately 600 feet to the north of the Site appeared an unpaved track fronting West 228th Street. According to city directories, Pacific Railroad Constructors and Murray Western Foods Inc both occupied 1361 Sepulveda Boulevard (Parcel 2) in 1985. By the time of the 1989 aerial photograph, several new structures that appeared to be industrial in nature were built to the east and northeast of the Site. Parcel 3 appeared to be used as parking and/or storage areas for the adjacent industrial buildings. Possible staining was no longer present on the Site or adjacent properties. Some of the new structures were built where the rail spur had previously been to the east of the Site. The 1990 aerial photograph was largely consistent with the 1989 aerial photograph. According to the 1990 city directory; 1351 Sepulveda Boulevard (Parcel 1) was occupied by Sunny Champagnie, Douglas RV Storage, William F Humphreys and George Kobold.	-1981 Historical Topographic Map: Torrance (7.5-minute) -1983, 1989, and 1990 EDR Aerial Photographs -1990 Pacific Bell City Directory Listings
1991-2000	By 1993, 1351 Sepulveda Boulevard (Parcel 1) was owned by Mulligan Ltd. The Mulligan Family Fun Center was under construction circa 1993 to 1994, according to LADBS Records. The aerial photograph from 1994 indicated that the southeast area of Parcel 1 (presently occupied by a miniature golf course) was under construction. Building A, Building B and the batting cages had been built on the Site by that time. Additionally, the area to the north of the Site had been acquired by Mulligan and developed into a driving range in 1993 (according to building records); replacing the former dirt track. Parcel 3 was still associated with the eastern and northeastern adjacent industrial properties during this time. The first city directory listing for 1355 Sepulveda Boulevard (Parcel 1) appeared in 1995 and was for “Plaza Golf at Mulligan”.	-1993-1998 LADBS Records -1994 EDR Aerial Photograph -1995 Pacific Bell City Directory Listings
2001-2010	In 2001, the Mulligan Family Fun Center (1351 Sepulveda Boulevard; Parcel 1) and A & A Ready Mixed Concrete Inc (1361 Sepulveda Boulevard; Parcel 2) still occupied the Site according to city directory listings. Additionally, building permits indicated that the Mulligan Family Fun Center was improved with additional parking and a race track in 2001. The permit for the race track (East Track) included a blueprint which showed the expansion of the facility onto Parcel 3.	-2001 Haines & Company, Inc. City Directory Listings -2001-2006 Los Angeles Department of Building and Safety Records -2002, 2005, 2009 EDR Aerial Photograph -2002 Google Earth Aerial Photograph

Summary of Historical Sources		
Date Range	**Site Description**	**Historical Sources**
	By the time of the 2002 aerial photograph, the Site was improved with the present East Track (primarily located on Parcel 3 and extending onto Parcel 1) and miniature golf course on Parcel 1. Although the Mulligan Family Fun Center extended into Parcel 3 during this time, the southern portion of Parcel 3 was still associated with the eastern adjacent industrial properties. The industrial building extending onto the southeastern portion of Parcel 3 remained in 2002. The driving range to the north of the Site was still present in 2002 and it appeared to have been improved with a canopy along the northern border of the Site. The "oil tanks" that were previously observed 1.27 miles east of the Site on all previous topographic maps had been removed by 2002 according to a historical aerial from Google Earth. The 2005 aerial photograph did not show any significant changes to the Site or vicinity. The aerial photograph from 2009 showed that the driving range was no longer present and three large industrial-type buildings had been constructed. However, the buildings that were in the lot adjacent to the Site on the eastern side (including the building that extended into Parcel 3) had been demolished and the area was vacant in the 2009 aerial.	
2010-Present	Fewer details were available in the 2012 topographic map, therefore, no significant changes relative to the 1981 topographic map could be discerned. The aerial photograph from 2012 also did not show any significant changes from the 2009 aerial photograph. The 2016 aerial photograph indicated that possible large shipping containers were located on Parcel 2 surrounding the concrete mixer. The vacant lot to the east was improved with a new road leading into it. In 2016, the Mulligan Family Fun Center was listed in the Hazardous Material System for the LAFD for storing hazardous materials on-Site. The hazardous materials were previously discussed in Section 3.7.4.2.	-2012 Historical Topographic Map: Torrance (7.5-minute) -2012 and 2016 EDR Aerial Photograph -2016-2018 Los Angeles Department of Buildings and Safety Records -2016 Los Angeles Fire Department Hazardous Material System -2016 and 2019 Los Angeles Fire Department Official Inspection Report

4.2 Site Reconnaissance

Roux representatives conducted a reconnaissance of the Site and surrounding areas on August 27, 2019. Roux was accompanied by Mr. Robert Thomas, Manager of the Mulligan Family Fun Center during the Site reconnaissance. Roux also visually and/or physically observed adjoining properties from reasonably accessible locations on the Site and public thoroughfares. During the Site reconnaissance, the weather was clear and warm. Roux personnel took representative photographs of the Site and surrounding area which have been annotated and included in Appendix G. The following sections summarize observations during the inspection.

4.2.1 Current Site Condition and Limitations

The Site is situated in a mixed commercial, industrial, and residential area and can be accessed from Sepulveda Boulevard to the south. At the time of Site reconnaissance, Parcels 1 and 3 were occupied by

Mulligan Family Fun Center (1351 Sepulveda Boulevard), a family amusement facility. Site improvements include two buildings (Building A and Building B; see Figure 2) a miniature golf course, two go-kart tracks (East Track and West Track; see Figure 2), a paddle boat pond, batting cages, a rock-climbing wall, and asphalt-paved parking areas. Building A is occupied by a laser tag facility, café, kitchen, arcade, event space, and offices. Building B is occupied by repair shops for the go-karts and arcade games as well as storage. Additional improvements include numerous sheds, canopies, picnic tables, concrete paved walkways, and landscaping. The southern portion of Parcel 3 is a vacant, fenced lot which appears to be partially paved. Parcel 2 (1361 Sepulveda Boulevard) is a vacant former ready-mix concrete batch plant with a tower used by the former facility remaining on-Site and an unpaved lot.

4.2.2 Phase I ESA Observations

During Site reconnaissance, Roux personnel attempted to identify any environmental features that may be relevant in the context of the Phase I ESA. Any such features are discussed in the sections below.

4.2.2.1 Gasoline Storage

In the southwest corner of East Track, Roux observed an enclosed area where containers holding gasoline were stored. At the time of the Site reconnaissance, there were two 30-gallon containers, one empty and one full. According to Mr. Thomas, prior to the use of electric go-karts, approximately five 55-gallon drums of gasoline were housed in the area. With the majority of go-karts currently being electric, less gasoline is stored on-Site. The use of gasoline along with the use of maintenance materials for arcade game and go-kart repair and the presence of waste oil drums was identified as an OEF

4.2.2.2 Historical and Current Oil Production

As previously stated, the Site is located is located within the Torrance Oil Field. Many of the oil wells in the area, including those that were operated on-Site, have been abandoned. Roux was unable to observe any remaining evidence of the former wells on-Site. However, across Sepulveda Boulevard to the south, active oil wells with pumpjacks were observed. The pumpjacks were operational during the Site reconnaissance. The presence of the Site within the Torrance Oil Field and associated oil development represents a REC.

4.2.2.3 Former UST

One diesel UST was formerly located on Parcel 2 associated with the historical concrete batch plant operations. The former UST represents a hREC; refer to Section 6.1 for further discussion.

4.2.2.4 Arcade Game and Go-Kart Repair

Roux observed the arcade game and go-kart repair areas within Building B. Building B contained various repair materials such as paints, gasoline, and water-based solvents for the maintenance of the games and go-karts. These chemicals were in small quantities and Roux noted no significant sign of releases in the vicinity of the repair area, therefore the use of maintenance materials along with the use of gasoline and presence of waste oil drums was identified as an OEF.

4.2.2.5 Fill Material on Miniature Golf Course and Go-Kart Tracks

Small rolling hills were observed on the on-Site miniature golf course and the East Track of the Mulligan Family Fun Center. According to Site personnel, unknown fill material was reportedly imported during construction of these features to create the present varied terrain. Due to the unknown origins of the fill, it is possible that the fill materials may be impacted and therefore represent a REC.

4.2.2.6 Waste Oil Drums

Roux observed two 55-gallon drums containing waste oil in the eastern parking lot. No secondary containment was observed. Roux noted no significant sign of releases or staining in the vicinity of the drums, therefore the waste oil drums along with the use of maintenance materials was identified as an OEF.

4.2.2.7 Other Features

The following features were not observed by Roux during the August 27, 2019 Site Reconnaissance:

- Areas of stressed vegetation
- Areas which receive flood or storm water from potentially contaminated areas
- Air compressor vent discharges
- Discolored or Spill Areas
- Drainage Swales and Culverts
- Dumping
- Former Agricultural Applied Pesticide Area
- Electrical Transformers
- Hydraulic Lifts
- Incinerators
- Landfills or Land Farms
- Loading and Unloading Areas
- Monitoring Wells
- Non-Contact Cooling Water Discharge
- Oil-Water Separators
- Open Areas Away from Production Areas
- Process Area Sinks and Piping
- Rail Cars/Railroad Spurs
- Septic Systems Leach Fields or Seepage Pits
- Silos
- Sprayfields
- Storm Sewer and Spill Containment Collection System
- Storm Water Detention Pond
- Underground / Aboveground Storage Tanks and Associated Piping
- Waste Piles

5. Adjoining Properties

Adjoining and selected nearby properties are shown in Figure 2 and are described below.

5.1 Mixed Commercial and Residential to the East

The Site is bordered to the east by multi-family residential buildings and a restaurant (San Pedro Fish Market) closest to the Site. No environmental concerns associated with the current operations were noted; however, these areas were formerly used for industrial purposes, part of Western Brass Works. Refer to Section 7.1.2 for further discussion.

5.2 Industrial Properties to the West

Several industrial buildings are located adjacent to the west of the Site. No concerns were noted on these properties during Site reconnaissance. One closed LUST case is associated with the address 1450 West 228th Street for the facility Dexol Industries. Refer to Section 7.1.2 for further discussion.

5.3 Industrial Properties to the North

The Site is bordered to the north by several industrial properties. No concerns were noted on these properties during Site reconnaissance. This area, as well as the properties to the east of the Site were formerly part of Western Brass Works. Refer to Section 7.1.2 for further discussion.

5.4 Residential and Active Oil Wells to the South

Across Sepulveda Boulevard, to the south of the Site are residential neighborhoods as well as active oil wells with operational pumpjacks. Refer to Section 4.2.2.2 for further discussion of nearby and on-Site features associated with current and historical oil development activities.

6. Summary of Key Previous Investigations and Documents

The following sections include Roux's review of documents provided by the User and obtained from regulatory agencies related to key previous environmental investigations.

6.1 Soils Report UST Removal (Roux, 2012)

Roux reviewed a *Soils Report UST Removal, Former Associated Ready Mix and Concrete, Inc. Plant, 1361 Sepulveda Boulevard*, prepared by Roux, dated September 5, 2012. The report was available on the LA-RWQCB GeoTracker website. According to the report, a 12,000-gallon diesel UST was located at the central-north portion of Parcel 2 and was used to fuel the fleet of trucks associated with the former ready-mix concrete batch plant operations.

The UST was removed on July 26, 2012. The former dispenser island was located on top of the UST, within the excavation boundaries, therefore no piping leading away from the tank pit was present. No staining was observed in the tank pit; however, a slight hydrocarbon odor was noted within the excavation. Soil samples were collected from native soils two feet beneath the center and ends of the UST. The soil samples were analyzed for total petroleum hydrocarbons as carbon chain (TPH-cc) by EPA Method 8015M. Laboratory results for TPH-cc were less than 10 milligrams per kilogram (mg/kg) for hydrocarbons in the gasoline range (C6-C10); between 7 and 150 mg/kg for hydrocarbons in the diesel range (C10-C28); and between 20 and 100 mg/kg for hydrocarbons in the heavy oil range (C28-C44). Laboratory results confirmed the absence of light end petroleum hydrocarbons in the samples; therefore, no additional laboratory analyses were deemed necessary. The observed hydrocarbon odor was deemed likely related to heavy oils from former oil field operations at the Site.

Following the issue of the 2012 report, A UST Soil Report Review was performed on October 25, 2012 and the LAFD issued a letter on November 21, 2012. The letter stated that the level of soil contamination at the Site exceeded the LAFD's action levels. Concentrations in soil from one of three confirmation samples beneath the UST exceeded the action level of 100 mg/kg for total petroleum hydrocarbons as diesel range organics (TPH-DRO).

A subsequent letter issued by the LAFD issued on March 6, 2013 approved a *Work Plan for Site Assessment* dated January 21, 2013; however, this report was not available on GeoTracker for review.

6.2 Site Assessment Report (Roux, 2013)

Roux reviewed a *Site Assessment Report, Former Associated Ready Mix and Concrete, Inc. Plant, 1361 Sepulveda Boulevard*, prepared by Roux, dated April 19, 2013. The report was available on the LA-RWQCB GeoTracker website.

On March 18, 2013, Roux advanced one soil boring to a total depth of 40 feet bgs for the collection of soil samples, directly beneath the confirmation soil sample which exceeded the LAFD's action level. Samples were collected at five-foot intervals from 15 to 40 feet bgs.

Field screening and visual observation of soil samples collected during the investigation suggested that little to no hydrocarbon impacts were present at the depths sampled during UST removal (approximately 15 feet

bgs), which was consistent with the conditions reported in the September 2012 report. Heavy staining and hydrocarbon odor were encountered at approximately 25 feet bgs in a clay layer. The impacts appeared to be relatively isolated, as sandy soils encountered directly beneath this layer and to the maximum boring depth of 40 feet bgs did not exhibit evidence of staining or hydrocarbon odor.

Concentrations of TPH-DRO were consistent with those reported during the UST removal at 110 mg/kg (15 feet bgs) and 580 mg/kg (20 feet bgs). At 25 feet bgs, TPH-DRO was detected at 19,000 mg/kg which was consistent with field screening and visual observations. Concentrations of TPH-DRO in deeper samples (30, 35, and 40 feet bgs) were below the method reporting limit of 5 mg/kg. The concentrations of BTEX compounds were below 1 mg/kg in all the samples analyzed.

Based on the results of the investigation, Roux concluded that hydrocarbons present in soils in the vicinity of the former UST were shallow (not extending below 25 feet bgs) and localized. Furthermore, some or all of the hydrocarbons found in soils at the Site were identified as potentially associated with former oil field operations. Roux recommended no further investigation and regulatory closure of the former UST.

The LAFD issued a letter dated June 12, 2013 which confirmed completion of Site investigation and stated that no further action was required. Based on the regulatory status and available results, the removed UST and associated impacts represent an hREC.

6.3 Phase I ESA (BBG, 2015)

Roux was provided a prior Phase I ESA performed by Aaron & Wright Assessment, LLC dba Butler Burgher Group Assessment (BBG) dated December 3, 2015 (BBG Phase I ESA). The report was prepared for Symetra Life Insurance Company and First Symetra National Life Insurance Company of New York; however, the purpose of the report is unknown. The scope of the BBG Phase I ESA included the entire Site (Parcels 1, 2, and 3).

BBG identified one REC due to historical oil production operations that reportedly occurred on-Site from 1928 to 1952. During a 2013 limited subsurface investigation, heavy staining and hydrocarbon odor were encountered in a clay layer at 25 feet bgs.

BBG identified one hREC, a 12,000-gallon diesel fuel UST that was removed in 2012. One of the closure samples exceeded the LAFD action level and a release was reported. Following additional sampling, the incident was closed and a No Further Action (NFA) letter was issued.

Additionally, BBG identified one business environmental risk (BER) that did not meet the ASTM Standard of a REC, the industrial and oil productions on the surrounding properties. The surrounding properties were used for oil production purposes from at least 1928 to 1963 and industrial operations from at least 1970 to present. Due to the long-term industrial uses of the surrounding properties (greater than 50 years), BBG stated that the properties would not be considered “pristine” although a specific release meeting the definition of a REC was not identified.

Two ASTM Non-Scope Considerations were identified by BBG related to the possible presence of asbestos containing materials (ACMs) and lead-based paint (LBP) within the Site structures.

BBG's recommendations included consideration of areas of subsurface contamination during future redevelopment activities as well as recommendations for ACMs and LBP. Roux considered ACMs and LBP outside the scope of this Phase I ESA and they are therefore not discussed further.

7. Records Review

7.1 Standard Environmental Record Sources

According to ASTM Standard E1527-13, the purpose of reviewing regulatory records is to obtain and review records that will help identify RECs in connection with the Site. In addition, some records to be reviewed pertain not only to the Site, but also to properties within an additional “approximate minimum search distance” in order to help assess the likelihood of problems from migrating hazardous substances or petroleum products. The basis of the “approximate minimum search distance” is the Site boundary.

Roux retained EDR of Shelton, Connecticut to provide an ASTM Radius Map Report for this Site. This report is a computerized search of select state and federal environmental databases that identify various properties with a record of environmental activity. Roux reviewed the report and summarized the relevant findings in the following sections. A copy of the compiled EDR Report has been included as Appendix F. The EDR report includes a detailed description of each of the databases searched, with a summary of the type of information provided by each.

The following section describes the findings of the database search. Roux have used professional judgement in determining which EDR-listed sites to include in the narrative of this report. Facilities adjoining the Site are included due to their proximity to the Site and the potential for surface water discharges (e.g., storm water runoff, surface water effluent discharges) to enter the Site or subsurface releases to do the same through the migration of groundwater. Sites with listings indicative of a release (e.g. SHWS, LUST, RELEASE) with a reasonable likelihood of affecting subsurface conditions at the Site are likewise discussed below. Nonadjacent sites with database listings not necessarily indicative of a release (e.g. hazardous waste generator, FINDS, ECHO, NPDES, HAZNET, AST, or UST), or sites sufficiently distant from the subject Site, will not be discussed unless considered potentially relevant in context of the Phase I ESA. A list of all the facilities listed in the EDR Report can be found in Appendix F.

7.1.1 Target Property

The target property is listed in a number of the federal, state, and local databases searched under different addresses and/or with different owner/operators. Based on the available information, the target property listings are summarized in the table below. They are not, in themselves, indicative of a release at the property and are often an indication that good housekeeping measures are being implemented with regard to hazardous substances. Inclusion in other database records are summarized in the comments column of the table below. No listings for the Site were indicative of a REC that was not otherwise addressed in this report.

Address	Owner/Operator	Database	Comment
1351 W Sepulveda Boulevard	Mulligan Family Fun Center	RCRA NONGEN/ NLR, HAZNET, CERS, HAZMAT, FINDS, ECHO	ID: CAL000282371. 	A & A Ready Mixed Concrete	SWEEPS UST	UST listing. No indication of a release.
1361 W Sepulveda Boulevard	Georgia Claessens Trust	UST	UST listing. No indication of a release.
	A & A Ready Mixed Concrete Inc	HIST UST, SWEEPS UST, CA FID UST, EMI, HAZMAT	No other information

7.1.2 Site Vicinity

EDR identified the following properties located within one mile of the Site from the databases searched. Roux has reviewed each of the database listings with a focus on any property that experienced a release of hazardous or petroleum product with the potential to affect subsurface conditions at the Site. Properties where listings did not contain any information suggestive of a release with the potential to have impacted conditions at the Site have not been included in this section.

- **Western Brass Works- 1338 228th Street**

  According to historical sources the former Western Brass Works facility was located directly north of the Site and parts of its activity extended onto the northern portions of Parcel 1 and Parcel 3. According to the GeoTracker website, in 1995 there was a release from a UST on the property and the potential concern was diesel impacting soil. The LA-RWQCB was the lead agency on the case. The case was considered closed in September 1996. Based on the no further action required status and the potential impacts to soil only, it is considered unlikely that this event at the Western Brass Works facility would have adversely impacted subsurface conditions at the Site. However, Section 4.1 discussed the storage/staging areas owned by Western Brass Works that extended onto the northern portion of Parcel 1 and the entirety of Parcel 3. Possible staining was noted in a 1983 historical aerial photograph, following the removal of the stored products. Although the specific operations and associated materials of Western Brass Works is unknown, it is possible that subsurface conditions at the Site may have been impacted. The historical industrial operations of Western Brass Works therefore represent a REC.

- **Dexol Industries- 1450 West 228th Street**

  The former Dexol Industries facility was located at 1450 West 228th Street and was approximately 435-feet north-northeast of the Site per Google Earth. According to GeoTracker, in 1992 there was a release from a UST on the property and the potential concern was heating oil/fuel oil impacting soil. The City of Los Angeles Fire Department was the lead agency on the case. The case was considered closed in July 1997.Based on the no further action required status, and the potential impacts to soil only, it is considered unlikely that the operations at the Dexol Industries facility would have adversely impacted subsurface conditions at the Site.

- **Multi-Tenant Office-Warehouse Property- 1500-1510 West 228th Street**

  This multi-tenant office warehouse property is located approximately 531 feet north-northwest of the Site per Google Earth. The facility is listed on the CPS-SLIC and CERS databases. The database listings identify an open remediation action case with LA-RWQCB as the lead agency as of July 2017. The facility was previously used for oil production from the 1920s to the 1960s and then was used for other industrial businesses since 1960 including a nursery, machine shops, manufacturing tenants, auto restoration operations and auto/boat parts manufacturing. Soil and groundwater beneath the property are impacted with petroleum hydrocarbons, metals, and volatile organic compounds per GeoTracker and the Responsible Party is currently delineating offsite groundwater impacts and conducting an interim remedial measure to remediate the source area.

  In October 2013, soil borings were advanced on the property and groundwater grab samples were collected. Analysis of the groundwater samples indicated the presence of tetrachloroethene (PCE,

240 µg/L) and trichloroethene (TCE, 28 µg/L). In May 2016, three groundwater wells were constructed at the facility in order to observe the vertical and horizontal extent of impacts.

To remediate and mitigate the impacts of PCE and TCE in the subsurface, soil vapor extraction (SVE) systems were initiated in November of 2018 and are ongoing. As of this report, groundwater has not been remediated, however, there have been several groundwater sampling events. In December 2018, an additional well was proposed with two different depths. The most recent quarterly groundwater monitoring report dated July 8, 2019, indicated that the new well had been installed and stated that PCE and TCE were detected in two of the wells when sampled on June 19, 2019 (ADR 2019). The depth to groundwater in the wells ranged from 64.89 to 69.27 feet bgs. The two wells where the contaminants were detected are located on the south side of the property, MW-3 and MW-4S and have well screens at 70-85 feet bgs and 65-80 feet bgs, respectively. MW-3, located approximately 708 feet northwest from the Site, had a PCE concentration of 29 µg/L and a TCE concentration of 5.1 µg/L. MW-4, located approximately 627 feet northwest from the subject Site had a PCE concentration of 300 µg/L and a TCE concentration of 45 µg/L. The concentrations detected exceeded the California Maximum Contaminant Levels (MCLs) for both TCE (5 µg/L) and PCE (5 µg/L; SWRCB, 2018). The impacts have not been delineated in the direction of the Site and therefore represent a REC in the context of this Phase I ESA.

8. Findings

Roux has performed this Phase I ESA in general compliance with the scope and limitations of ASTM Standard Practice E1527-13. Roux separated the findings of this assessment into the following four categories: Recognized Environmental Conditions (RECs), controlled Recognized Environmental Conditions (cRECs), historical Recognized Environmental Conditions (hRECs) and other environmental features (OEFs).

8.1 Data Gaps

During conduct of this ESA, the following data gaps, as defined in ASTM Standard E1527-13 were identified:

- Previous Site owners/operators were not available for an interview. This data gap is not considered significant due to sufficient information regarding Site history available from current Site operators, EDR historical documents and FOIA requests.

- As of this report date, the following agency records requests are pending: DTSC Chatsworth and Cypress offices, and SCAMQD. Considering the responsiveness of other agencies and the breadth of information provided, it is not suspected that these pending responses constitute a significant data gap.

8.2 Recognized Environmental Conditions

Based on the information obtained through the performance of this ESA, Roux identified the following RECs in connection with the current and historical operations at the Site or adjacent properties. To the extent possible, the locations of the RECs are shown in Figure 2.

- **REC 1 – Former and Current Oil Development On-Site and in the Site Vicinity.** The Site is located in the active Torrance Oil Field and was historically used for oil development activities circa 1924 to 1964. Although oil production in the Torrance Oil Field has decreased significantly since the 1950s, production continues on adjacent and nearby properties. According to DOGGR records, six oil wells were formerly located on-Site and were used for oil production. The six wells were drilled in 1924 and were subsequently abandoned between 1930 and 1964 in accordance with the DOGGR standards at their respective times of abandonment. Additional features associated with oil development activities were observed in historical aerial photographs dated 1928 to 1963 including suspected oil pits, and storage and staging areas; the approximate locations of these features are depicted in Figure 3. Drilling of oil wells is known to generate drill cuttings and drilling mud that could be impacted by hydrocarbons encountered in the subsurface. Operation of oil wells is also known to cause near-surface hydrocarbon impacts to soil and soil gas.

- **REC 2 – Fill Material.** During the construction of the on-Site miniature golf course and East Track of Mulligan Family Fun Center, unknown fill material was likely imported to create the present varied terrain. Due to the unknown origins of the fill, it is possible that the fill materials may be impacted.

- **REC 3 – Industrial Operations On-Site and in the Site Vicinity.** The Site vicinity has been used for heavy industrial activity since at least 1952. A rail spur was visible in a 1952 aerial photographs on the eastern adjacent property and several industrial structures and storage/staging areas were present to the east and northeast of the Site by 1963. The storage/staging areas extended onto

Parcel 3 and a portion of one of the industrial structures extended onto the southeastern portion of Parcel 3. Possible staining was noted in a 1983 historical aerial photograph, following the removal of the stored products. Industrial structures were present on the Site until at least 2005 and industrial operations on adjacent properties continue as of this report date. Materials typically used in industrial operations include chlorinated solvents or petroleum products. Although the specific operations and associated materials of the nearby industrial facilities are unknown, it is possible that subsurface conditions at the Site may have been impacted by metals, TPH or VOCs.

- **REC 4 – Off-Site PCE and TCE Release Case.** The facility identified as "Multi-Tenant Office-Warehouse Property", located at 1500-1510 West 228th Street (approximately 531 feet north-northwest from the Site) identified PCE and TCE contamination in groundwater, soil, and soil gas. According to the most recent quarterly groundwater monitoring report dated July 8, 2019, MW-3, located approximately 708 feet northwest from the Site, had a PCE concentration of 29 µg/L and a TCE concentration of 5.1 µg/L. MW-4, located approximately 627 feet northwest from the subject Site had a PCE concentration of 300 µg/L and a TCE concentration of 45 µg/L (ADR 2019). The concentrations detected in groundwater exceeded the California MCLs for both TCE and PCE. The impacts have not been delineated in the direction of the Site.

8.3 Controlled Recognized Environmental Conditions

Roux did not identify cRECs in connection with the current and historical operations at the Site or adjacent properties.

8.4 Historical Recognized Environmental Conditions

Based on the information obtained through the performance of this ESA, Roux identified the following hRECs in connection with the current and historical operations at the Site or adjacent properties. To minimize possible confusion, the REC and hREC identification numbers are sequential.

- **hREC 5 – Former UST.** According to previous on-Site investigations, a 12,000-gallon diesel UST was formerly located at the central-north portion of Parcel 2 and was used to fuel the fleet of trucks associated with the former ready-mix concrete batch plant operations. This UST was removed in July 2012 and a November 2012 investigation found that the level of soil contamination at the Site exceeded the LAFD's action levels. Concentrations in soil from one of three confirmation samples beneath the UST exceeded the action level of 100 mg/kg for TPH-DRO. Further investigations concluded that hydrocarbons were not related to the former UST. In June 2013, the LAFD stated that no further action related to the former UST was required.

8.5 Other Environmental Features

OEFs are environmental conditions that do not meet the definition of a REC or cREC/hREC, but which may warrant mention in a comprehensive Phase I ESA. Based on the subject Phase I ESA, Roux identified the following OEFs at or adjacent to the Site. To minimize possible confusion, the REC, hREC, and OEF identification numbers are sequential.

- **OEF 6 – On-Site Use of Gasoline and Maintenance Materials.** The current occupant of Parcels 1 and 3, Mulligan Family Fun Center, uses small amounts of gasoline and maintenance materials to fuel the gasoline go-karts for West Track and to perform maintenance on the go-karts and arcade

games in Building B. A storage shed located southwest of East Track on Parcel 1 is used to store gasoline and waste oil is stored north of East Track on Parcel 3. Based on the small quantities and the lack of evidence indicating a release, the storage and use of these materials was not identified as a significant environmental concern.

- **OEF 7 – Pressurized Oil Pipelines.** Based on the NPMS Public View database, is suspected that one active crude oil pipeline is located adjacent to the Site along Sepulveda Boulevard. Eight additional petroleum pipelines are located within approximately 1,000 feet of the Site. No indication of a release from any of the pipelines was identified by Roux in the preparation of this Phase I ESA.

- **OEF 8 – Methane Zone.** According to the City of Los Angeles Department of City Planning, the Site is located within a Methane Zone indicating that methane mitigation is likely required for on-Site buildings. The City of Los Angeles should be contacted prior to Site redevelopment activities to determine the specific methane mitigation requirements for the Site.

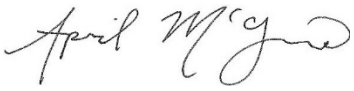
10. Signature of Environmental Professional

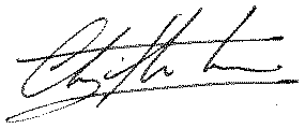
Roux performed this assessment in accordance with the generally accepted practices for environmental assessments at the time of implementation. Roux made a reasonable effort to ensure that the information presented in this report is materially complete and accurate.

Roux completed a Phase I ESA in general compliance with the scope and limitations of ASTM Practice E1527-13 of the commercial property located at 7820 Balboa Avenue and 4595 Convoy Street, San Diego, California.



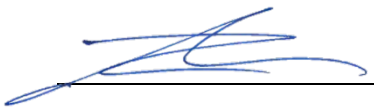
"We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental professional as defined in §312.10 of 40 CFR 312" and,

"We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."



Roux performed this Phase I ESA by, or under direct supervision of, the undersigned environmental professionals.

Respectfully Submitted,



ROUX ASSOCIATES, INC.

April McGuire
Project Engineer

Chris Rose, P.E.
Senior Engineer

Mauricio H. Escobar, P.G.
Principal Geologist

NOTES

LOCATIONS OF UNLABELED WELLS WERE IDENTIFIED BASED ON HISTORICAL AERIAL PHOTOGRAPHS, THEREFORE NO WELL NAMES WERE IDENTIFIED.

WELL BLUEMLE 4 WAS IDENTIFIED ON DOGGR MAPS; HOWEVER, IT WAS NOT OBSERVED IN HISTORICAL AERIAL PHOTOGRAPHS OR IDENTIFIED IN THE ALTA/NSPS SURVEY.

APPENDIX A

Glossary of Terms

GLOSSARY OF KEY TERMS

This appendix provides definitions, description of terms, and a list of acronyms for many of the words used in ASTM E 1527-13. These terms are an integral part of ASTM E 1527-13 and are critical to understanding ASTM E 1527-13 and its use.

DEFINITIONS:

Abandoned Property – *property* that can be presumed to be deserted, or an intent to relinquish possession or control can be inferred from the general disrepair or lack of activity thereon such that a reasonable person could believe that there was an intent on the part of the current *owner* to surrender rights to the *property*.

Activity and Use Limitations – Legal or physical restrictions or limitations on the use of, or access to, a site or facility: *(1)* to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil, soil vapor, groundwater, and/or surface water on the *property*, or *(2)* to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or *engineering controls*, are intended to prevent adverse impacts to individuals or populations that may be exposed to *hazardous substances* and *petroleum products* in the soil, soil vapor, groundwater, and/or surface water on the *property*.

Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) – The list of sites compiled by EPA that EPA has investigated, or is currently investigating, for potential hazardous substance contamination for possible inclusion on the National Priorities List.

Construction debris – Concrete, brick, asphalt, and other such building materials discarded in the construction of a building or other improvement to property.

Contaminated public wells – Public wells used for drinking water that have been designated by a government entity as contaminated by toxic substances (for example, chlorinated solvents), or as having water unsafe to drink without treatment.

Contiguous Property Owner Liability Protection – a person may qualify for the *contiguous property owner liability protection* if, among other requirements, such person owns real *property* that is contiguous to, and that is or may be contaminated by *hazardous substances* from other real *property* that is not owned by that person. Furthermore, such person conducted *all appropriate inquiries* at the time of acquisition of the *property* and did not know or have reason to know that the *property* was or could be contaminated by a *release* or threatened *release* from the contiguous *property*. The *all appropriate inquiries* must not result in knowledge of contamination. If it does, then such person did “know” or “had reason to know” of contamination and would not be eligible for the *contiguous property owner liability protection*.

Controlled Recognized Environmental Condition – a *recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

CORRACTS list – a list maintained by EPA of *hazardous waste* treatment, storage, or disposal facilities and other RCRA-regulated facilities (due to past interim status or storage of *hazardous waste* beyond 90 days)

that have been notified by the U.S. Environmental Protection Agency to undertake corrective action under RCRA. The *CORRACTS list* is a subset of the EPA database that manages RCRA data.

Demolition debris – Concrete, brick, asphalt, and other such building materials discarded in the demolition of a building or other improvement to property.

Drum – A container (typically, but not necessarily, holding 55 gal (208 L) of liquid) that may be used to store *hazardous substances* or *petroleum products.*

Dry wells – Underground areas where soil have been removed and replaced with pea gravel, coarse sand, or large rocks. Dry wells are used for drainage, to control storm runoff, for the collection of spilled liquids (intentional and non-intentional), and wastewater disposal (often illegal).

Dwelling – Structure of portion thereof used for residential habitation.

Engineering controls – Physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to contaminants in the soil or groundwater on the property.

Environmental lien – A charge, security, or encumbrance upon title to a *property* to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of *hazardous substances* or *petroleum products* upon a *property*, including (but not limited to) liens imposed pursuant to CERCLA 42 USC § 9607(1) and similar state or local laws.

ERNS list – EPA's emergency response notification system list of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center. Notification requirements for such releases or spills are codified in 40 CFR parts 302 and 355.

Federal Register (FR) – Publication of the Untied States government published daily (except for federal holidays and weekends) containing all proposed and final regulations and some other activities of the federal government. When regulations become final, they are included in the Code of Federal Regulations (CFR), as well as published in the Federal Register.

Fire insurance maps – Maps produced for private fire insurance map companies that indicate uses of properties at specified dates and that encompass the property. These maps are often available in local libraries, historical societies, private resellers, or from the map companies who produced them. See Question 23 of the transaction screen process in Practice E 1528 and 7.3.4.2 of this practice.

Hazardous substance – A substance defined as hazardous pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts: "(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Soil Waste Disposal Act (42 USC § 6921) (but not including any waste the regulation of which under the Solid Waste Disposal Act (42 USC § 6901 *et seq.*) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 USC § 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof, which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A)

through (F) of this paragraph; the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

Hazardous waste – Any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Cat (42 USC § 6921) (but not including any waste the regulation of which under the Solid Waste Disposal Act (42 USC § 6901 *et seq.*) has been suspended by Act of Congress). The Solid Waste Disposal Act of 1980 amended RCRA. RCRA defines hazardous waste, in 42 USC § 6903, as: "a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may – (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."

Institutional control – A legal or administrative restriction (e.g., deed restriction, restrictive zoning) on the use of, or access to, a site or facility to reduce or eliminate potential exposure to contaminants in the soil or groundwater on the property.

Landfill – A place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term *solid waste disposal site* and is also known as a garbage dump, trash dump, or similar term.

Local street directories – Directories published by private (or sometimes government) sources that show ownership, occupancy, and/or use of sites by reference to street addresses. Often, local street directories are available at libraries of local governments, colleges or universities, or historical societies.

Material safety data sheet (MSDS) – Written or printed material concerning a hazardous substance which is prepared by chemical manufacturers, importers, and employers for hazardous chemicals pursuant to OSHA's Hazard Communication Standard, 29, CFR 1910.1200.

National Contingency Plan (NCP) – The National Oil and Hazardous Substances Pollution Contingency Plan, found at 40 CFR § 300, that is the EPA's blueprint on how hazardous substances are to be cleaned up pursuant to CERCLA.

National Priorities List (NPL) – List compiled by the EPA, pursuant to CERCLA 42 USC § 9605(a)(8)(B), of properties with the highest priority for cleanup pursuant to EPA's Hazard Ranking System. See 40 CFR Part 300.

Occupants – Those tenants, subtenants, or other persons or entities using the *property* or a portion of the *property.*

Owner – Generally the fee owner of record for the *property*.

Petroleum exclusion – The exclusion from CERCLA liability provided in 42 USC § 9601(14), as interpreted by the courts and EPA: "The term (hazardous substance) does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

Petroleum products – Those substances included within the meaning of the *petroleum exclusion* to CERCLA, 42 USC § 9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 USC § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to *Standard Definitions of Petroleum Statistics*[1]*.)*

Phase I Environmental Site Assessment – The process described in this practice.

Pits, ponds, or lagoons – Man-made or natural depressions in the ground surface that are likely to hold liquids or sludge containing *hazardous substances* or *petroleum products*. The likelihood of such liquids or sludge being present is determined by evidence of factors associated with the pit, pond, or lagoon, including, but not limited to, discolored water, distressed vegetation, or the presence of an obvious wastewater discharge.

Property – The real property that is the subject of the *environmental site assessment* described in this practice. Real property includes buildings and other fixtures and improvement located on the property and affixed to the land.

Property tax files – The files kept for property tax purposes by the local jurisdiction where the property is located and includes records of past ownership, appraisals, maps, sketches, photos, or other information that is reasonable ascertainable and pertaining to the property.

RCRA generators – Those persons or entities that generate hazardous waste, as defined and regulated by RCRA.

RCRA generators list – List kept by the EPA of those persons or entities that generate hazardous wastes as defined and regulated by RCRA.

RCRA TSD facilities – Those facilities at which treatment, storage, and/or disposal of hazardous wastes takes place, as defined and regulated by RCRA.

RCRA TSD facilities list – List kept by the EPA of those facilities at which treatment, storage, and/or disposal of hazardous wastes takes place, as defined and regulated by RCRA.

Recorded land title records – Records of fee ownership, leases, land contracts, easements, liens, and other encumbrances on or of the property recorded in the place where land title records are, by law or custom, recorded for the local jurisdiction in which the *property* is located. (Often such records are kept by a municipal or county recorder or clerk.) Such records may be obtained from title companies or directly from the local government agency. Information about the title to the property that is recorded in a U.S. district court or any place other than where land title records are, by law or custom, recorded for the local jurisdiction in which the property is located, are not considered part of recorded land title records.

Records of emergency release notifications (SARA § 304) – Section 304 of EPCRA or Title III of SARA requires operators of facilities to notify their local emergency planning committee (as defined in EPCRA) and the state emergency response commission (as defined in EPCRA) of any release beyond the facility's boundary of any reportable quantity of any extremely hazardous substance. Often the local fire department is the local emergency planning committee. Records of such notifications are "Records of Emergency Release Notifications" (SARA§ 304).

Report – The written record of a transaction screen process as required by Practice E 1528 or the written report prepared by the environmental professional and constituting part of a "Phase I Environmental Site Assessment," as required by this practice.

Solid waste disposal site – A place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term *landfill* and is also known as a garbage dump, trash dump, or similar term.

Solvent – A chemical compound that is capable of dissolving another substance and may itself be a *hazardous substance,* used in a number of manufacturing/industrial processes including, but not limited to, the manufacture of paints and coatings for industrial and household purposes, equipment clean-up, and surface degreasing in metal fabricating industries.

State registered USTs – State lists of underground storage tanks required to be registered under Subtitle I, Section 9002 of RCRA.

Sump – A pit, cistern, cesspool, or similar receptacle where liquids drain, collect, or are stored.

TSD facility – Treatment, storage, or disposal facility (*see RCRA TSD facilities*).

Underground storage tank (UST) - Any tank, including underground piping connected to the tank, that is or has been used to contain *hazardous substances* or *petroleum products* and the volume of which is 10% or more beneath the surface of the ground.

USGS 7.5 Minute Topographic Map – The map (if any) available from or produced by the United States Geological Survey, entitled "USGS 7.5 Minute Topographic Map," and showing the property.

Wastewater – Water that (1) is or has been used in an industrial or manufacturing process, (2) conveys or has conveyed sewage, or (3) is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. Wastewater does not include water originating on or passing through or adjacent to a site, such as storm water flows, that has not been used in industrial or manufacturing processes, has not been combined with sewage, or is not directly related to manufacturing, processing, or raw materials storage areas at an industrial plant.

Zoning/land use records – Those records of the local government in which the *property* is located, indicating the uses permitted by the local government in particular zones within its jurisdiction. The records may consist of maps and/or written records. They are often located in the planning department of a municipality or county.

DEFINITIONS SPECIFIC TO ASTM E 1527-13:

Actual knowledge – The knowledge actually possessed by an individual who is a real person, rather than an entity. Actual knowledge is to be distinguished from constructive knowledge that is knowledge imputed to an individual or entity.

Adjoining properties – Any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them.

Aerial photographs – Photographs taken from an airplane or helicopter (from a low enough altitude to allow identification of development and activities) of areas encompassing the property. Aerial photographs are often available from government agencies or private collections unique to a local area.

Appropriate inquiry – That inquiry constituting "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in CERCLA, 42 USC § 9601(35)(B), that will give a party to a *commercial real estate* transaction the *innocent landowner defense* to the CERCLA liability (42 USC § 9601(A) and (B) and § 9607(b)(3)), assuming compliance with other elements of the defense. See Appendix X1.

Approximate minimum search distance – The area for which records must be obtained and reviewed pursuant to Section 7 subject to the limitations provided in that section. This may include areas outside the *property* and shall be measured from the nearest *property* boundary. This term is used in lieu of radius to include irregularly-shaped properties.

Building department records – Those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property. Often, building department records are located in the building department of a municipality or county.

Business environmental risk – A risk which can have a material environmental or environmentally-driven financial impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of *business environmental risk* issues may necessitate that an *environmental professional* address one or more non-scope considerations, some of which are identified in Section 12.

Commercial real estate – Any real property except a dwelling or property with no more than four dwelling units exclusively for residential use (except that a dwelling or property with no more than four dwelling units exclusively for residential use is included in this term when it has a commercial function, as in the building of such dwellings for profit). This term includes, but is not limited to, undeveloped real property and real property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; property used for residential purposes that has more than four residential dwelling units; and any property with no more than four dwelling units for residential use when it has a commercial function, as in the building of such dwellings for profit.

Commercial real estate transaction – A transfer of title to or possession of real property or receipt of a security interest in real property, except that it does not include transfer of title to or possession of real property or the receipt of a security interest in real property with respect to an individual dwelling or building containing fewer than five dwelling units, nor does it include the purchase of a lot or lots to construct a dwelling for occupancy by a purchaser, but a commercial real estate transaction does include real property purchased or leased by persons or entities in the business of building or developing dwelling units.

Controlled Recognized Environmental Condition – a *recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

Due diligence – The process of inquiring into the environmental characteristics of a parcel of *commercial real estate* or other conditions, usually in connection with a commercial real estate transaction. The degree and kind of due diligence vary for different properties and differing purposes.

Environmental audit – The investigative process to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations. This term should not be used to describe Practice E 1528 or this practice, although an environmental audit may include an *environmental site assessment* or, if prior audits are available, may be part of an environmental site assessment.

Environmental professional – A person processing sufficient training and experience necessary to conduct a *site reconnaissance, interviews,* and other activities in accordance with this practice, and from the information generated by such activities, having the ability to develop opinions and conclusions regarding *recognized environmental conditions* in connection with the *property* in question. An individual's status as an environmental professional may be limited to the type of assessment to be performed or to specific segments of the assessment for which the professional is responsible. The person may be an independent contractor or an employee of the *user.*

Environmental site assessment (ESA) – The process by which a person or entity seeks to determine if a particular parcel of real *property* (including improvements) is subject to *recognized environmental conditions.* At the option of the *user*, an environmental site assessment may include more inquiry than that constituting *appropriate inquiry* or, if the user is not concerned about qualifying for the *innocent landowner defense,* less inquiry than that constituting *appropriate inquiry.* An environmental site assessment is both different from and less rigorous than an *environmental audit.*

Fill dirt – Dirt, soil, sand, or other earth, obtained off-site, that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.

Hazardous waste/contaminated sites – Sites on which a release has occurred, or is suspected to have occurred, of any *hazardous substance, hazardous waste,* or *petroleum products,* and that release or suspected release has been reported to a government entity.

Historical Recognized Environmental Condition – a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*). Before calling the past *release* a *historical recognized environmental condition*, the *environmental professional* must determine whether the past *release* is a *recognized environmental condition* at the time the *Phase I Environmental Site Assessment* is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past *release* to be a *recognized environmental condition* at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a *recognized environmental condition*.

Innocent landowner defense – That defense to CERCLA liability provided in 42 USC § 9601(35) and § 9607(b)(3). One of the requirements to qualify for this defense is that the party make "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice." There are additional requirements to qualify for this defense.

Interviews – Those portions of this practice that are contained in Section 9 and 10 thereof and address questions to be asked of *owners* and *occupants* of the *property* and questions to be asked of local government officials.

Key site manager – The person identified by the *owner* of a *property* as having good knowledge of the uses and physical characteristics of the property.

Local government agencies – Those agencies of municipal or county government having jurisdiction over the *property.* Municipal and county government agencies include, but are not limited to, cities, parishes, townships, and similar entities.

LUST sites – State lists of leaking underground storage tank sites. Section 9003 (h) of Subtitle I of RCRA gives EPA and states, under cooperative agreements with EPA, authority to clean up releases from UST systems or require owners and operators to do so.

Major occupants – Those tenants, subtenants, or other persons or entities each of which uses at least 40% of the leasable area of the *property* or any anchor tenant when the *property* is a shopping center.

Material threat – A physically observable or obvious threat which is reasonable likely to lead to a release that, in the opinion of the *environmental professional,* is threatening and might result in impact to human health and the environment. An example might include an aboveground storage tank that contains a hazardous substance and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

Obvious – That which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer while *visually* or *physically observing the property.*

Other historical sources – Any source or sources other than those designated in 7.3.4.1-7.3.4.8 that are credible to a reasonable person and that identify past uses of the property. The term includes, but is not limited to, miscellaneous maps, newspaper archives, and records in the files and/or personal knowledge of the *property owner* and/or *occupants.*

Physical setting sources – sources that provide information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of a *property.*

Practically reviewable – Information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the *property* without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the *property* or a geographic area in which the *property* is located are not generally *practically reviewable.* Most databases of public records are *practically reviewable* if they can be obtained from the source agency by the county, city, zip code, or other geographic area of the facilities listed in the record system. Records that are sorted, filed, organized, or maintained by the source agency only chronologically are not generally practically reviewable. Listings in publicly available records which do not have adequate address information to be located geographically are not generally considered practically reviewable. For large databases with numerous facility records (such as RCRA hazardous waste generators and registered underground storage tanks), the records are not *practically reviewable* unless they can be obtained from the source agency in the smaller geographic area of zip codes. Even when information is provided by zip code for some large databases, it is common for an unmanageable number of sites to be

identified within a given zip code. In these cases, it is not necessary to review the impact of all of the sites that are likely to be listed in any given zip code because that information would not be *practically reviewable*. In other words, then so much data is generated that it cannot be feasibly reviewed for its impact on the *property,* it is not *practically reviewable.*

Preparer – The person preparing the *transaction screen questionnaire* pursuant to Practice E 1528, who may be either the user or the person to whom the user has delegated the preparation of the *transaction screen questionnaire.*

Publicly available – Information that is publicly available means that the source of the information allows access to the information by anyone upon request.

Reasonably ascertainable – For purposes of both this practice and Practice E 1528, information that is (1) *publicly available,* (2) obtainable from its source within reasonable time and cost constraints, and (3) *practically reviewable.*

Recognized Environmental Conditions – the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (*1*) due to release to the environment; (*2*) under conditions indicative of a *release* to the *environment*; or (*3*) under conditions that pose a *material threat* of a future *release* to the *environment*. *De minimis conditions* are not *recognized environmental conditions*.

Records review – That part that is contained in Section 7 of this practice addresses which records shall or may be reviewed.

Site reconnaissance – That part that is contained in Section 8 of this practice and addresses what should be done in connection with the *site visit.* The site reconnaissance includes, but is not limited to, the *site visit* done in connection with such a Phase I Environmental Site Assessment.

Site visit – The visit to the property during which observations are made constituting the *site reconnaissance* section of this practice and the *site visit* requirement of Practice E 1528.

Standard environmental record sources – Those records specified in 7.2.1.1.

Standard historical sources – Those sources of information about the history of uses of the property specified in 7.3.4.

Standard physical setting source – A current USGS 7.5-minute topographic map (if any) showing the area on which the property is located.

Standard practice(s) – The activities set forth in either and both this practice and Practice E 1528.

Standard sources – Sources of environmental, physical setting, or historical records specified in Section 7 of this practice.

Transaction screen process – The process described in Practice E 1528.

Transaction screen questionnaire – The questionnaire provided in Section 6 of Practice E 1528.

User – The party seeking to use Practice E 1528 to perform an *environmental site assessment* of the *property*. A user may include, without limitation, a purchaser of *property,* a potential tenant of *property,* an *owner* of *property,* a lender, or a property manager.

Visually and/or physically observed – During a *site visit* pursuant to Practice E 1528, or pursuant to this practice, this term means observations made by vision while walking through a *property* and the structures located on it and observations made by the sense of smell, particularly observations of noxious or foul odors. The term "walking through" is not meant to imply that disabled persons who cannot physically walk may not conduct a *site visit;* they may do so by the means at their disposal for moving through the *property* and the structures located on it.

ACRONYMS:

CERCLA – Comprehensive Environmental Response, Compensation and Liability Act of 1980 (as amended, 42 USC § 9601 *et seq.*)

CERCLIS – Comprehensive Environmental Response, Compensation and Liability Information System (maintained by EPA)

CFR – Code of Federal Regulations

CORRACTS – Facilities subject to corrective action under RCRA

EPA – United States Environmental Protection Agency

EPCRA – Emergency Planning and Community Right to Know Act (also known as SARA Title III), 42 USC § 11001 *et seq.*)

ERNS – Emergency response notification system

ESA – Environmental site assessment (different than an *environmental audit*)

FOIA – U.S. Freedom of Information Act (5 USC 552 *et seq.*)

FR – Federal Register

LUST – Leaking underground storage tank

MSDS – Material safety data sheet

NCP – National Contingency Plan

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Roux Associates were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

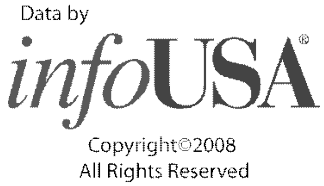
EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.



Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 18 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 12 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 11 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 12 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 11 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 27 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/15/2019 has revealed that there is 1

FINDS site within approximately 0.001 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there are 2 HAZNET sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 04/09/2019 has revealed that there is 1 CERS site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Site Name: MULLIGAN FAMILY FUN CENTER
Violation Date: 03-21-2016
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 04/06/2016.
Violation Division: Los Angeles City Fire Department
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-21-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Permission to inspect granted by, Jasmine Golley, Manager. Spoke with Kevin Altobelli, General Manager, regarding CERS. He was informed that State law mandates all regulated businesses electronically submit their Hazardous Materials Business Plan (HMBP) via the California Environmental Reporting System (CERS). Electronic submittal shall be completed within the next 30 days. In addition, I advised him that his HMBP will need to be reviewed and certified annually, between January 1st and March 1st, for complete and accurate information. It is also mandatory to submit any substantial change in operation within 30 days.
Eval Division: Los Angeles City Fire Department
Eval Program: HMRRP

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FINDS:

Registry ID: 110002716035

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	CalEPA has replaced the existing five (5) federal hazard categories available in CERS used for the completion of chemical inventories as part of the annual hazardous materials business plan submittal with twenty-four (24) new federal hazard categories adopted by the United States Environmental Protection Agency (U.S. EPA) as a result of changes to the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (HCS). Effective December 28, 2017, CalEPA replaced the five federal hazard categories in CERS with 24 new federal hazard categories. The following federal hazard categories are now obsolete ? fire, reactive, pressure release, acute health, chronic health. A review of your submittal has determined that you DID NOT SELECT ANY OF THE 24 FEDERAL HAZARD CATEGORIES for your chemical inventory. Please review your hazardous material inventory and complete the following steps: FOR A DETAILED LIST OF THE NEW FEDERAL CATEGORIES & ADDITIONAL [Truncated]

requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. In order to receive/maintain a Consolidated Permit, you must satisfy the listed requirements and correct the violations below: NOTE: PLEASE UPDATE YOUR FACILITY'S HAZARDOUS MATERIALS BUSINESS PLAN IN CERS. YOUR LAST SUBMISSION WAS FEBRUARY 27,2017 AND YOU ARE OUT OF COMPLIANCE. All regulated businesses MUST annually submit their hazardous materials disclosures via the California Environmental Reporting System (CERS) website between, January 1st and March 1st. It is also mandatory to submit any substantial change in operation and/or any change in chemical inventory greater than 100 percent, within 30 days. If you need further assistance or have technical questions, [Truncated]

Violation Source: CERS

Site ID: 38219
Site Name: INSPECTORATE AMERICA CORP
Violation Date: 06-01-2018
Citation: 22 CCR 15 66262.41 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66262.41
Violation Description: Failure of a large quantity RCRA generator to prepare the Biennial report (Form 8700), and submit to DTSC by March 1st on even numbered years ; and maintain it onsite for three years.
Violation Notes: Returned to compliance on 09/24/2018. OBSERVATION: The Biennial report was not prepared and submitted to DTSC. A generator who ships any hazardous waste offsite to a TSDF within the United States shall prepare and submit a Biennial Report, U.S. EPA Form 8700, to the DTSC by March 1 of each even-numbered year, and shall cover generator activities during the previous calendar year. CORRECTIVE ACTION: Immediately prepare a report for the calendar year and submit it to the DTSC. Ensure that this report is done in a timely manner.
Violation Division: Los Angeles County Fire Department
Violation Program: HWLQG
Violation Source: CERS

Site ID: 38219
Site Name: INSPECTORATE AMERICA CORP
Violation Date: 03-25-2015
Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)
Violation Description: Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment: 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order; 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste; 3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design; 4) The construction

INSPECTORATE AMERICA CORP (Continued) **S123514740**

materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and 5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).

Violation Notes: Returned to compliance on 06/03/2015. OBSERVATION: The facility conducts weekly inspections of the hazardous waste tank system. The owner/operator shall inspect, and document, where present, at least once each operating day: 1) Overfill/spill control equipment; 2) Aboveground portions of the tank system to detect corrosion or releases of water; 3) Data gathered from monitoring and leak-detection equipment; 4) Outside areas of the tank system including secondary containment to detect erosion or signs of releases of hazardous waste; 5) For uncovered tanks, the level of waste in the tank; and 6) cathodic protection, if present. CORRECTIVE ACTION: Immediately begin daily inspections of the hazardous waste tank system and document the items inspected.

Violation Source: CERS

Site ID: 38219
Site Name: INSPECTORATE AMERICA CORP
Violation Date: 03-25-2015
Citation: 22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or f

Violation Notes: Returned to compliance on 05/27/2015. OBSERVATION: The facility does not have a hazardous waste tank system assessment meeting the requirements in 22CCR Section 66265.192(k) for the two 250-gallon used oil tanks. The owner or operator of a hazardous waste tank system shall obtain a written assessment reviewed and certified by an independent, qualified, professional engineer, registered in California, attesting that the system has sufficient structural integrity, is acceptable for the transferring, storing, and treating of hazardous waste, and that the tanks and containment system are suitably designed. CORRECTIVE ACTION: Immediately have an assessment meeting the requirements in 22CCR Section 66265.192(k) prepared for the two 250-gallon used oil tanks.

Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 09/24/2018. OBSERVATION: Documented training of personnel was not available at the time of inspection. Reviewed employee training's records to show the last RCRA Waste Handling-California trainings were done in 2015. Please provide a more recent RCRA Waste Handling-California training documentation. CORRECTIVE ACTION: Locate more recent RCRA Waste Handling-California training documentation or conduct training with applicable personnel and document it. Submit a copy of the training documentation to the CUPA.
Violation Division: Los Angeles County Fire Department

Site ID: 38219
Site Name: INSPECTORATE AMERICA CORP
Violation Date: 06-01-2018
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 09/24/2018. OBSERVATION: Observed the following hazardous waste containers/tanks to be open during the inspection. - 1 x 2-gallon pail containing used/waste oils with flammable liquid waste located in the engine room was observed without a HW label and open; - 2 x 25-gallon drums containing flammable liquid waste located inside the equipment cleaning room were observed without

INSPECTORATE AMERICA CORP (Continued) **S123514740**

a HW label and open; - 2 x 250-gallon tanks containing used/waste oils were observed to be open; CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed.

Site ID: 38219
Site Name: INSPECTORATE AMERICA CORP
Violation Date: 03-25-2015
Citation: 22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description: Failure to include all of the following in the Contingency Plan: 1) A description of actions the facility personnel shall take response to fires, explosions, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water at the facility; 2) A description of arrangements agreed to by local police departments, fire departments, hospitals, contractors, and State and local emergency response teams to coordinate emergency services; 3) All names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator and this list shall be kept up to date. Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates; 4) A list of all emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment), where this equipment is required. This list shall be kept up to date. In addition, the plan shall include the location and a physical description of each item on the list, and a brief outline of its capabilities; 5) An evacuation plan for facility personnel where there is a possibility that evacuation could be necessary. This plan is to describe signal(s) to be used to begin evacuation, evacuation routes, and alternate evacuation routes (in cases where the primary routes could be blocked by releases of hazardous waste or fires); 6) The current telephone number of the California Emergency Management Agency; and 7) If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions that are sufficient to comply with the requirements of this chapter.
Violation Notes: Returned to compliance on 04/30/2015. OBSERVATION: The facility?s contingency plan is incomplete and does not include a list of all emergency equipment, which includes location, physical description, and a brief outline of its capabilities. The contingency plan must include: 1) Description of actions facility personnel will take in response to fires, explosions, or any sudden or non-sudden release of hazardous waste to air, soil or surface water at the facility; 2) Description of arrangements made with local police departments, fire departments, hospitals, contractors and State and local emergency response teams to coordinate emergency services; 3) List name, address, and phone numbers (office/home/cell) of all persons qualified to act as emergency coordinator. Where more than one person is listed, one shall be named as the primary emergency coordinator and all others in order in which they will assume responsibilities; 4) List all

FINDS:

Registry ID: 110002692319

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 394

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 19

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 56

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 64

Site ID: 69725
Site Name: SOUTHERN CALIFORNIA ICE
Violation Date: 03-17-2015
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 03/18/2015. OBSERVATION: The Business Activities page for the 3/12/2015 submittal to the California Environmental Reporting System (CERS) shows that the facility consolidates hazardous waste generated at a remote site and recycles more 100 kilograms of excluded or exempted recyclable materials. However, inspection shows that the facility does not consolidate hazardous waste or recycle excluded or exempted recyclable materials. CORRECTIVE ACTION: Revise the information submitted to CERS on 3/12/2015 to show that the facility does not consolidate hazardous waste or recycle excluded or exempted recyclable materials.

FINDS:

Registry ID: 110002813849

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 273555
Site Name: Storm Manufacturing Group, Inc.
Violation Date: 07-25-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 08/21/2017. OBSERVATION: The California Environmental Reporting System (CERS) shows for CERS ID 10625068 the emergency response plan submitted on 6/19/2017 did not include the phone number for the local unified program agency [323-890-4317]. CORRECTIVE ACTION: Revise the emergency response plan as indicated and electronically resubmit to CERS.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 273555
Site Name: Storm Manufacturing Group, Inc.
Violation Date: 07-25-2017
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 08/22/2017. OBSERVATION: Two yellow plastic containers containing waste coolant located in the used oil storage area were labeled as hazardous waste and were observed open. Containers of hazardous waste shall be kept closed, except when it is necessary to add or remove waste. CORRECTIVE ACTION: Maintain containers of hazardous waste closed, except when it is necessary to

ALLEN BRADLEY (Continued) **S102064175**

add or remove waste.
Violation Division: Los Angeles County Fire Department

Violation Date: 07-25-2017
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: APSA Program - Training - General
Violation Notes: Returned to compliance on 08/22/2017. OBSERVATION: Documentation that all oil-handling personnel had received training regarding: 1. The operation and maintenance of equipment to prevent discharges; 2. Discharge procedure protocols; 3. Applicable pollution control laws, rules, and regulations; 4. General facility operations; and 5. The contents of the SPCC Plan. CORRECTIVE ACTION: Provide documentation that all oil-handling personnel had received training regarding: 1. The operation and maintenance of equipment to prevent discharges; 2. Discharge procedure protocols; 3. Applicable pollution control laws, rules, and regulations; 4. General facility operations; and 5. The contents of the SPCC Plan.

Violation Date: 07-25-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 09/07/2017. OBSERVATION: A 55-gallon plastic drum of ammonia vapor test waste adjacent to the asembly area and two 330-gallon plastic IBCs containing waste water from the parts washer in the exterior used oil storage area were not marked with all of the following information: 1) the words "Hazardous Waste"; 2) generator name and address; 3) contents/composition; 4) physical state; 5) hazardous properties; and 6) accumulation start date. CORRECTIVE ACTION: Properly label these hazardous waste containers and ensure that all hazardous waste containers are marked with all the required information.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 273555
Site Name: Storm Manufacturing Group, Inc.
Violation Date: 07-25-2017
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a

ALLEN BRADLEY (Continued) **S102064175**

facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.

Violation Notes: Returned to compliance on 10/13/2017. OBSERVATION: At the time of inspection, it could not be demonstrated that employees who handle hazardous waste were properly trained. The generator must ensure that all employees who handle hazardous waste are thoroughly familiar with proper waste handling and emergency procedures and maintain the following documents and records at the facility: (1) the job title for each position at the facility related to hazardous waste management and the name of the employee filling each job; (2) a written job description for each position listed under (1). This description may be consistent in its degree of specificity with descriptions for other similar positions in the same company location or bargaining unit, but shall include the requisite skill, education, or other qualifications, and duties of facility personnel assigned to each position; (3) a written description of the type and amount of both introductory and continuing training that will be given to each person filling a [Truncated]

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 09/12/2017. OBSERVATION: The business handles propane at reportable amounts, but the California Environmental Reporting System (CERS) shows for CERS ID 10625068 the hazardous materials inventory submitted on 6/19/2017 did not include propane. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for propane to CERS.

Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes: Returned to compliance on 08/22/2017. OBSERVATION: Documentation that initial and annual training was provided to employees in safety procedures in the event of a release or threatened release of a hazardous material, including familiarity with the emergency response plan, was not available for review at the time of inspection.

ALLEN BRADLEY (Continued) **S102064175**

CORRECTIVE ACTION: Provide documentation either electronically or by hard copy that initial and annual training has been provided to employees in safety procedures in the event of a release or threatened release of a hazardous material, including familiarity with the emergency response plan, and maintain training records for a minimum of three years.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-14-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by BOBBY HARDISON-COMPLIANCE SUPERVISOR Observed the facility and inspected hazardous materials storage. Annual employee safety training records were not maintained. Facility has also not electronically disclosed the onsite hazardous materials inventory or submitted a business emergency plan in California Environmental Reporting System (CERS). Please go to https://cersbusiness2.calepa.ca.gov to complete a chemical inventory disclosure and business emergency plan. The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically)within 30 days of the change.

Eval Notes: Facility ID#: FA0001259 / CERS ID#: 10240204 Brandi A. Pilato, Inspector I, LAFD Environment Unit/CUPA, on site to verify business' Hazardous Material Business Plan, Consolidated Permit and to conduct a routine visual inspection of this facility's Hazardous Material. The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the requirements and correct the violations listed below: 1. Our records list CARLEY LAMPS, INC as the owner on record and CARLEY LAMPS as the business name. Please resubmit with correct owner and business name. Please note if this is owned by a corporation, the corporation should be listed as the owner. If there has been a change in ownership or business name, please contact the Los Angeles Fire [Truncated]

FINDS:

Registry ID: 110002658197

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Hazardous Waste Summary:

- Waste code: D001
- Waste name: IGNITABLE WASTE

- Waste code: D002
- Waste name: CORROSIVE WASTE

- Waste code: F003
- Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

QUALITY FORMING, LLC (Continued) **1016139880**

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:
Name: AUTO COLORS PAINT & BODY
Address: 23022 S NORMANDIE AVE
City,State,Zip: TORRANCE, CA 90502
Site ID: 9551
CERS ID: 10299838
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 9551
Site Name: AUTO COLORS PAINT & BODY
Violation Date: 07-10-2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 07/11/2017. OBSERVATION: The generator's EPA ID number is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an active EPA ID number. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have reactivated the facility's EPA ID number. EPA ID number: CAL000340162
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 9551
Site Name: AUTO COLORS PAINT & BODY
Violation Date: 07-10-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 07/10/2017. OBSERVATION: The following containers were observed without Hazardous Waste labels: Waste Paint Booth Filters-1 x 55 gal. drum Waterborne Paint Waste- 1 x 35 gal. drum (label faded) Solvent borne Paint Waste- 1 x 35 gal. drum CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled. Corrected on site-labels provided
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 9551
Site Name: AUTO COLORS PAINT & BODY
Violation Date: 07-10-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A

BRENTS COACHWORKS (Continued) **S113036410**

container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 07/10/2017. OBSERVATION: Solvent borne Paint Waste- 1 x 35 gal. drum located in paint mixing area was observed open with paint containers, paint spray guns and brushes stored in funnel and on top of drum . CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed. Corrected on site. All items removed and container closed.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002837994

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: HSC 6.95 25505(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)
Violation Description: Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes: Returned to compliance on 04/29/2013. Submit accurate HM and HMBP to CERS. Include Nitrogen and Propane.
Violation Division: Los Angeles County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 390290
Site Name: COASTCRAFT RUBBER CO
Violation Date: 05-11-2018
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: ? Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. ? Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. ? The generator complies with section 66265.171, 66265.172, and 66265.173(a). ? The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words ?Hazardous Waste? including specified information ? Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a ?90 day? accumulation area ? 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 06/08/2018. OBSERVATION: Observed one 5-gallon and one 3-gallon of acetone waste liquid containers located outside of a flammable cabinet were both observed without a satellite accumulation HW label. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.
Violation Division: Los Angeles County Fire Department

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

D & M ENG (Continued) **1004676618**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110002740384

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS ID: 10269940
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 20700
Site Name: COASTCRAFT RUBBER CO
Violation Date: 05-11-2018
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 06/08/2018. OBSERVATION: The following containers of hazardous waste were observed with incomplete or no hazardous waste labels: - 1 x 55-gallon drum containing HW used sand blasting/polishing materials was observed without an accumulation date info on the HW label; - 1 x 55-gallon drum containing HW used hydraulic fluid was observed without an accumulation date info on the HW label; CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 20700
Site Name: COASTCRAFT RUBBER CO
Violation Date: 05-11-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: OBSERVATION: Observed one 55-gallon drum located outside of the shed containing HW used hydraulic fluid was partially covered with a metal lid but the lid was not entirely secured. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly closed.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 20700

Violation Date: 05-11-2018
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes: OBSERVATION: The following used and empty drums/pails were all observed without a proper empty label. - 10 plus 5-gallon used and empty pails located inside the HW/HW storage shed; - 6 x 55-gallon used and empty drums located outside of the HW/HW storage shed; CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

JIFFY LUBE TROUPE #902 (Continued) **S123516051**

Violation Description:	Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Returned to compliance on 09/03/2015. OBSERVATION: The Owner/Operator failed to maintain the following documents and records at the facility: 1) the job title for each position at the facility related to hazardous waste management, and the name of each employee filling each job; 2) written job description for each position listed above; and 3) written description of the type and amount of both introductory and continuing training that will be given to each person filing positions listed in 1) above. All employees shall be trained within six months of assignment and take part in an annual review of the initial training received. At a minimum, the training program shall be designed to ensure that facility personnel are able to respond effectively to emergencies by familiarizing them with emergency procedures, emergency equipment, and emergency systems, including where applicable: 1) procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment; 2) key parameters for [Truncated]

Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 08/19/2015. OBSERVATION: This facility does not have a valid EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately obtain an EPA ID number through DTSC to manage hazardous waste and submit evidence to the PA by 09/12/15. DTSC 1358 form was faxed to DTSC at time of inspection. EPA ID# Pending

Violation Date: 04-13-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Effective December 28, 2017, CalEPA has replaced the previously existing five federal hazard categories in CERS with twenty-four new federal hazard categories. The following federal hazard categories are now obsolete ? fire, reactive, pressure release, acute health, chronic health. A review of your submittal has determined that you DID NOT SELECT ANY OF THE 24 FEDERAL HAZARD CATEGORIES for your chemical inventory. Please review your hazardous material inventory and complete the following steps: 1) Update your hazardous material inventory and select all applicable federal hazard categories from the 24 newly listed categories for all chemical inventory stored at your facility. You may refer to Section 2 of a current Safety Data Sheets (SDS) (previously called an MSDS) to determine which of the new federal hazard categories apply. 2) Resubmit your hazardous materials inventory in CERS. FOR A DETAILED LIST OF THE NEW FEDERAL CATEGORIES & ADDITIONAL INFORMATION, THE [Truncated]

Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Effective December 28, 2017, CalEPA has replaced the previously existing five federal hazard categories in CERS with twenty-four new federal hazard categories. The following federal hazard categories are now obsolete ? fire, reactive, pressure release, acute health, chronic health. A review of your submittal has determined that you DID NOT SELECT ANY OF THE 24 FEDERAL HAZARD CATEGORIES for your chemical inventory. Please review your hazardous material inventory and complete the following steps: 1) Update your hazardous material inventory and select all applicable federal hazard categories from the 24 newly listed categories for all chemical inventory stored at your facility. You may refer to Section 2 of a current Safety Data Sheets (SDS) (previously called an MSDS) to determine which of the new federal hazard categories apply. 2) Resubmit your hazardous materials inventory in CERS. FOR A DETAILED LIST OF THE NEW FEDERAL CATEGORIES & ADDITIONAL INFORMATION, [Truncated]

FINDS:

Registry ID: 110002820733

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description:	Industrial Facility Storm Water

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-24-2018
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Mr. Orlando H. Gonzalez, Regional Board Staff (Staff) visited and inspected the facility to determine compliance with the Storm Water Industrial General Permit (IGP). At the facility, Staff met with Mr. Rey Javier, Vice President, and Mr. Orlando Flores, Area Foreman. Mr. Javier provided authorization to access and gave permission to take photos of the facility during the inspection (Photos 1-9). He also designated Mr. Flores to accompany Staff during the inspection. The inspection consisted of reviewing the facility?s storm water pollution prevention plan (SWPPP) and inspecting the premises. The facility has secondary containment throughout the industrial area. Storm water collected at the secondary containments is pump into water holding tanks for reuse/reinjection through the injection wells. Also, there is a closed-circuit water and storm collection system at the loading and unloading area. This water is also pumped into the water tank for reinjection. Corroded pipe casings were observed outdoors and exposed to storm water. Mr. Flores indicated that the pipes are awaiting pickup by the pipe supplier company. Also, there are some electric motors and parts from crude oil pumping systems stored outdoors exposed to storm water. Mr. Flores stated that the electric motors are also awaiting pickup by a scrap metal company, and the well pumping system parts are being used to repair other pumping systems. At the time of the inspection, the facility?s yard was clean and maintained, with the exemption of those areas where the pipes, electric motor, and parts were temporarily stored. In general, good BMP implementation were observed throughout the facility. Also, good documentation and records of inspection and training were observed at the facility. The facility was in compliance with IGP during the inspection.

CERS Description:	Industrial Facility Storm Water

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-01-2018
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Mr. Orlando H. Gonzalez, Regional Board Staff (Staff) visited and inspected the facility to determine compliance with the Storm Water Industrial General Permit (IGP). At the facility, Staff met with Dr. Wei Chen, Director of Environmental Division. Dr. Chen provided authorization to access the facility and gave permission to take photos during the inspection (Photos 1-10). She also accompanied Staff during the inspection. The inspection consisted of reviewing the facility?s storm water pollution prevention plan (SWPPP), site maps, Monitoring Program, sampling data, and inspecting the premises. Review of the SWPPP and Monitoring Program indicated that the SWPPP need minor updates to incorporate new BMPs as follows: 1. Frequency of sweeping and cleaning of areas used to stockpile rims, 2. Covering of scrap metals and trash roll-off containers, and 3. BMPs to be used to handle scrap metals from the maintenance shop. A NTC was issued for these minor BMP violations. The Monitoring Program met the IGP requirements and all laboratory data are within baseline levels. The outdoor areas housekeeping needs improvement as indicated above. On

MAXIMA ENT INC (Continued) **S101480806**

November 9, 2018, proof of corrective measures taken were provided via email (see attached), including photos and a summary table of accomplished activities.

Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-19-2010
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On April 19, 2010, Regional Board staff conducted a compliance inspection to this facility. Based in our inspection and file review , the company is in compliance with the General Industrial Storm Water NPDES permit.

Comments: Site was referred to DTSC by US EPA as a result of EPA doing a Preliminary Assessment. EPA found site to be NFA according to their criteria. However, due to the evidence of contamination at the site, a PEA is required by DTSC. A letter was sent to RP dated 2-23-95 recommending that a PEA be done.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/11/2019
Date Data Arrived at EDR: 04/18/2019
Date Made Active in Reports: 05/14/2019
Number of Days to Update: 26

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019
Date Data Arrived at EDR: 04/18/2019
Date Made Active in Reports: 05/14/2019

Next Scheduled EDR Contact: 10/14/2019
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

USGS TOPOGRAPHIC MAP

Target Property Map:	5633779 TORRANCE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

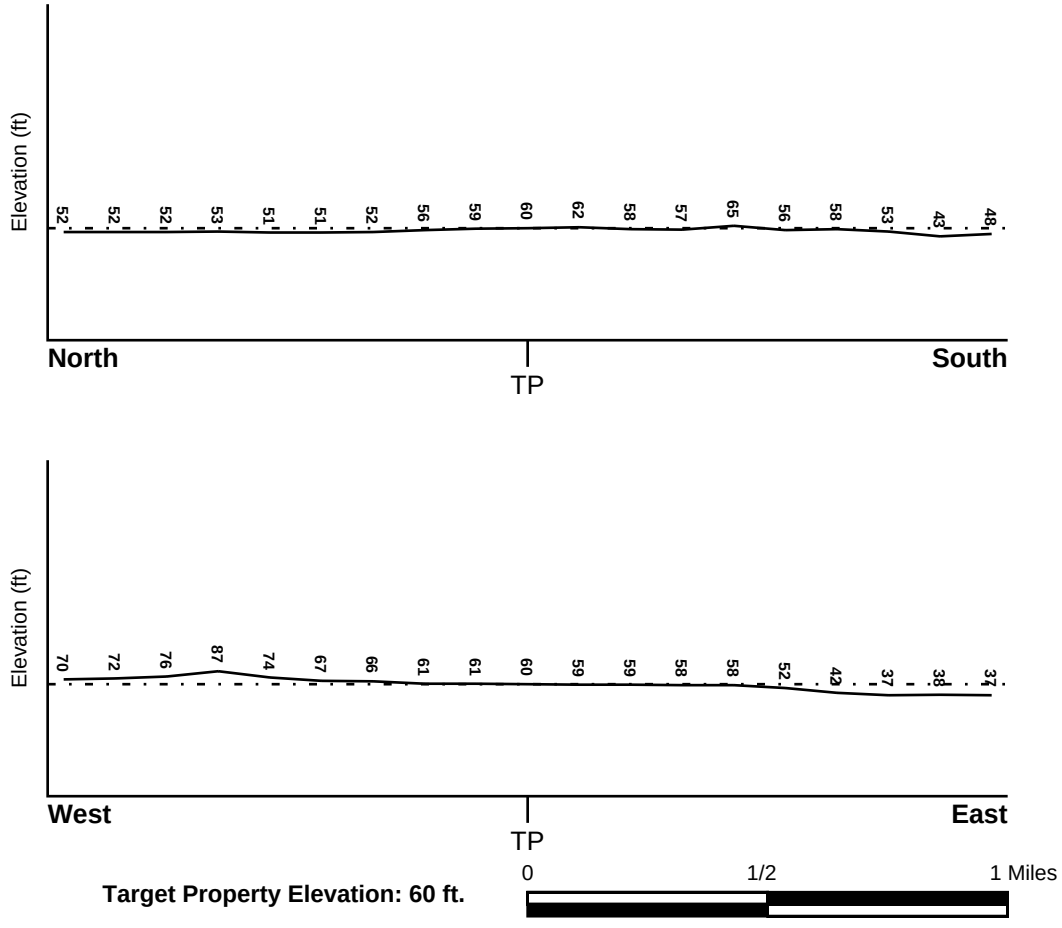
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 60 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

06037C1945F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
TORRANCE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

CITY OF LOS ANGELES

DEPARTMENT OF BUILDING AND SAFETY

BUILDING DIVISION

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 8/2/93 Lic. Class B-1 Lic. Number 650756 Contractor [signature] (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

18. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

Policy No. B0094693 Insurance Company SF FUND

☐ Certified copy is hereby furnished.

☐ Certified copy is filed with the Los Angeles City Dept. of Bldg. & Safety.

Date 8/2/93 Applicant's Signature [signature]

Applicant's Mailing Address 2699 WHITE Road #200, IRVINE, CA 92714

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

19. I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

Date _____ Applicant's Signature _____

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

20. I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____ Lender's Address _____

21. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I realize that this permit is an application for inspection, that it does not approve or authorize the work specified herein, that it does not authorize or permit any violation or failure to comply with any applicable law, that neither the city of Los Angeles nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein or the condition of the property or soil upon which such work is performed. LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. Number _____ Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

16. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

✓ Date 6/23/93 Lic. Class C-21 Lic. Number 626374 Contractor G.D. Heil (Signature)

OWNER-BUILDER DECLARATION

17. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

DECLARATIONS AND CERTIFICATIONS

LICENSED CONTRACTORS DECLARATION

17. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date _____ Lic. Class _____ Lic. No. _____ Contractor _____ (Signature)

OWNER-BUILDER DECLARATION

18. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

Date _____ Owner's Signature _____

WORKERS' COMPENSATION DECLARATION

19. I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Worker's Compensation Insurance, or a certified copy thereof (Sec. 3800, Lab. C.).

LICENSED CONTRACTORS DECLARATION

15. I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Date 9-10-93 Lic. Class C13 Lic. No. 634530 Contractor's Signature Greg Veers

Contractor's Mailing Address 17200 BOLSA CHICA AVE HUNTINGTON BCH, LA 92649

OWNER-BUILDER DECLARATION

16. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

OWNER-BUILDER DECLARATION

20. I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

☐ I am exempt under Sec. _____, B. & P. C. for this reason _____

HVAC CONTRACTOR

I hereby affirm, under penalty of perjury, that I am the HVAC contractor named on the reverse side of this permit and I am licensed under the provisions of Chapter 9, commencing with Section 7000, of Division 3 of the Business and Professions Code, and my license is in full force and effect. I am responsible only for the HVAC permit.

I hereby affirm, under penalty of perjury, one of the following declarations

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued

☐ I have and will maintain workers' compensation insurance, as required by Sec. 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are

Carrier _____ Policy No. _____

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the provisions of Sec. 3700 of the Labor Code, I shall forthwith comply with those provisions

Sign _____ Date _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL AND SHALL BE SUBJECT TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF THE COMPENSATION DAMAGES AS PROVIDED FOR IN SEC. 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

2

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury, that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code)

Lender's Name _____ Lender's Address _____

3

ASBESTOS REMOVAL

☒ I declare that notification of Asbestos Removal is not applicable ☐ I declare that a notification letter has been sent to the AQMD or EPA Sign _____ Date 1-10-95

4

OWNER-BUILDER DECLARATION

I hereby affirm, under penalty of perjury, that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business & Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chap. 9 commencing with Sec. 7000 of Div. 3 of the Business & Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☒ I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to the owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not intend to improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Sec. _____ Bus. & Prof. Code for the following reason _____

FINAL DECLARATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein. Also, that it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, that neither the City of Los Angeles nor any board, department, office, or employee thereof, makes any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed.
