Unless a shorter period of time has been established by an official action, plan check approval expires one and a half years after the fee has been paid. This permit expires two years after the fee has been paid or 180 days after the fee has been paid and construction has not commenced; or if work is suspended, discontinued or abandoned for a continuous period of 180 days (Sec.98.0603 L.A.M.C). Claims for refund of fees paid on permits must be filed within one year from the date of expiration for building permits granted by the Department of Building and Safety (Sec. 22.12 & 22.13 L.A.M.C.).

OWNER-BUILDER DECLARATION

I hereby affirm, under penalty of perjury, that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business & Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chap. 9 commencing with Sec. 7000 of Div. 3 of the Business & Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Sec. 7031.5 by any applicant for a permit, subjects the applicant to a civil penalty of not more than five hundred dollars ($500)

☐ I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to the owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not intend to improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law).

☐ I am exempt under Sec. _____, Bus. & Prof. Code for the following reason _____

FINAL DECLARATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein. Also, that it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, that neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed.

21. OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 commencing with Sec. 7000 of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500)):

☒ I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year from completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale)

☐ I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

☐ I am exempt under Sec. _____, Bus. & Prof. Code for the following reason: _____

Print: ANTHONY GIAPAPAS Sign: _____ Date: 11/13/98 ☐ Owner ☒ Authorized Agent

22. FINAL DECLARATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein. Also that it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, that neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

Unless a shorter period of time has been established by an official action, plan check approval expires one and a half years after the plan check fee has been paid. This permit expires two years after the building permit fee has been paid or 180 days after the fee has been paid and construction has not commenced or if work is suspended, discontinued or abandoned for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by the Dept. of Building & Safety (Sec. 22.12 & 22.13 LAMC).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. If doing work on a residential property, I certify that I hold a valid certification as a Home Improvement contractor per B&P Code, Section 7150.2c. The following applies to B contractors only: I understand the limitations of Section 7057 related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: B1 Lic. No.: 773716 Print: R P S Sign: R P S

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

☐ I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers's compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: _____ Policy Number: _____

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Sign: R P S Date: 6 12 01 ☒ Contractor ☐ Authorized Agent ☐ Owner

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

Lender's name: _____ Lender's address: _____

20. ASBESTOS REMOVAL

Notification of asbestos removal: ☒ Is not applicable ☐ Letter was sent to the AQMD or EPA Sign: R P S Date: 6 12 01

21. OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 commencing with Sec. 7000 of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

☐ I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year from completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale)

☐ I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business & Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

☐ I am exempt under Sec. _____, Bus. & Prof. Code for the following reason: _____

Print: _____ Sign: _____ Date: / / ☐ Owner ☐ Authorized Agent

22. FINAL DECLARATION

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein. Also that it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, that neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

PERMIT EXPIRATION

This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by the Dept. of Building & Safety (Sec. 22.12 & 22.13 LAMC).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: C45 Lic. No.: 351019 Contractor: SAN PEDRO SIGN CO

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

( ) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(✓) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: CLARENDON Policy Number: 04LCR 00825 575

( ) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or was sent to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Due to the possible presence of lead-based paint, lead safe work practices are required on all repairs in pre-1979 buildings that disturb paint. Failure to do so could create lead hazards that violate California Health and Safety Code Section 17920.10 and Section 105256 and may be subject to a $1000 fine or criminal prosecution. For more information call LA County's Department of Health Services at (800)524-5323. In order to locate a Lead Certified Professional and obtain additional information, call California DHS at (800)597-5323 or go to the DHS Website at http://www.dhs.ca.gov/childlead/html/GENclist.html.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).
Lender's name (if any):_____ Lender's address:_____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration and Final Declaration; and
(2) This permit is being obtained with the consent of the legal owner of the property.

In the event that any box (i.e. 1-16) is filled to capacity, it is possible that additional information has been captured electronically and could not be printed due to space restrictions. Nevertheless, the information printed exceeds that required by Section 19825 of the Health and Safety Code of the State of California.

15. Building Relocated From:

16. CONTRACTOR, ARCHITECT, & ENGINEER NAME	ADDRESS		CLASS	LICENSE#	PHONE #
(C) Storm Western Development Inc	23223 Normandie Avenue,	Torrance, CA 90501	B	798652	

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: **B** Lic. No.: **798652** Contractor: **STORM WESTERN DEVELOPMENT INC**

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

(__) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(✓) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: **Comp West Ins. Co.** Policy Number: **CA005001636**

(__) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is avaiable at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).
Lender's name (if any):_____ Lender's address:_____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration and Final Declaration; and
(2) This permit is being obtained with the consent of the legal owner of the property.

SUPPLEMENTAL NOTES:

IMPORTANT NOTICE

* **Prior to the start of any construction work adjacent to any public way, pedestrian protection shall be provided (Sec. 91.3303 L.A.M.C.).**
* Inspection(s) may be requested anytime via the internet or touch tone phone. To request an inspection via the internet, go to www.ladbs.org and click on "Request an Inspection" under Online Services. To request an inspection via touch tone phone, call toll free (888) LA4BUILD (888-524-2845) and select option 1 for Automated Request System. To request an inspection via the Customer Call Center, call 3-1-1 within the City of Los Angeles or (213) 473-3231 outside the City of Los Angeles between 7:00 a.m. and 10:00 p.m.. When requesting an inspection, the following are required: (1) The job address, (2) Type of inspection, (3) Use of building, (4) Permit number, (5) Phone number of a contact person should the department need to reach someone.
* Inspection requests received before 4:00 p.m. Monday through Friday (excluding holidays) will normally be made the next business day. Requests received after 4:00 p.m. will be made following the next business day. The Automated Inspection Call Back System (AICBS) will attempt to telephone the contact phonenumber to confirm the inspection.
* Permit fees provide for a limited number of inspections. A reinspection fee may be assessed when the work for which an inspection was requested is not complete, when the inspection record or plans are not available, or when there is failure to provide site access to department staff.
* No person shall perform any construction or repair work between the hours of 9:00 p.m. (6:00 p.m. grading) and 7:00 a.m. the following day which results in loud noises to the disturbance of persons occupying sleeping quarters in any dwelling, hotel, motel, apartment, or other place of residence (Sec. 41.40 L.A.M.C.).
* No person, other than an individual homeowner engaged in the repair or construction of his/her single-family dwelling, shall perform any construction or repair work of any kind upon any building or structure located on land developed with residential buildings or perform work within 500 feet of land so occupied, before 8:00 a.m. or after 6:00 p.m. on any Saturday or at any time on Sunday (Sec. 41.40 L.A.M.C.).
* Dust control measures to prevent dust from being blown or deposited over or upon any private property in any residential area must be implemented during any excavation or earth-moving phase of construction, sand blasting, or demolition.
* A separate permit from the State of California Division of Industrial Safety is required prior to starting certain work involving substantial risk to workers such as: construction or demolition exceeding 3 stories or 36 feet in height, or excavations or trenches over 5 feet in depth involving entry by workers.
* Building permits are valid for two years or expire on the 180th day from the date of issuance if the work permitted has not commenced. The department reserves the right to expire any permit where work has been suspended for a period of 180 days or more.
* Inspection services will not be provided when there is an unleashed dog on the premises.

In the event that any box (i.e. 1-16) is filled to capacity, it is possible that additional information has been captured electronically and could not be printed due to space restrictions. Nevertheless the information printed exceeds that required by section 19825 of the Health and Safety Code of the State of California.

15. BUILDING RELOCATED FROM:

16. CONTRACTOR, ARCHITECT & ENGINEER NAME	ADDRESS	CLASS	LICENSE #	PHONE #
(O) OWNER-BUILDER			0	

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors' State License Law for the following reason (Section 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).):

(X) I, as the owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year from completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

OR

(_) I, as the owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

(_) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(X) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: _____ Policy Number: _____

(_) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is available at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

20. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:

(1) I accept all the declarations above namely the Owner-Builder Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, and Final Declaration; and

(2) This permit is being obtained with the consent of the legal owner of the property.

CITY LA DBS
DEPARTMENT OF BUILDING AND SAFETY

OWNER'S ACKNOWLEDGMENT AND VERIFICATION OF INFORMATION

(OWNER-BUILDER DECLARATION)

Application Number: 18026-10000-00110

Project Address: 1351 W. Sepulveda Blvd.

DIRECTIONS: Read and initial each statement below to signify you understand or verify this information.

JW 1. I understand a frequent practice of unlicensed persons is to have the property owner obtain an "Owner-Builder" building permit that erroneously implies that the property owner is providing his or her own labor and material personally. I, as an Owner-Builder, may be held liable and subject to serious financial risk for any injuries sustained by an unlicensed person and his or her employees while working on my property. My homeowner's insurance may not provide coverage for those injuries. I am willfully acting as an Owner-Builder and am aware of the limits of my insurance coverage for injuries to workers on my property.

JW 2. I understand building permits are not required to be signed by property owners unless they are *responsible* for the construction and are not hiring a licensed Contractor to assume this responsibility.

JW 3. I understand as an "Owner-Builder" I am the responsible party of record on the permit. I understand that I may protect myself from potential financial risk by hiring a licensed Contractor and having the permit filed in his or her name instead of my own.

JW 4. I understand Contractors are required by law to be licensed and bonded in California and to list their license numbers on permits and contracts.

JW 5. I understand if I employ or otherwise engage any persons, other than California licensed Contractors, and the total value of my construction is at least five hundred dollars ($500), including labor and materials, I may be considered an "employer" under state and federal law.

JW 6. I understand if I am considered an "employer" under state and federal law, I must register with the state and federal government, withhold payroll taxes, provide workers' compensation disability insurance, and contribute to unemployment compensation for each "employee." I also understand my failure to abide by these laws may subject me to serious financial risk.

JW 7. I understand under California Contractors' State License Law, an Owner-Builder who builds single-family residential structures cannot legally build them with the intent to offer them for sale, unless *all* work is performed by licensed subcontractors and the number of structures does not exceed four within any calendar year, or all of the work is performed under contract with a licensed general building Contractor.

JW 8. I understand as an Owner-Builder if I sell the property for which this permit is issued, I may be held liable for any financial or personal injuries sustained by any subsequent owner(s) that result from any latent construction defects in the workmanship or materials.

JW 9. I understand I may obtain more information regarding my obligations as an "employer" from the Internal Revenue Service, the United States Small. Business Administration, the California Department of Benefit Payments, and the California Division of Industrial Accidents. I also understand I may contact the California Contractors' State License Board (CSLB) at 1-800-321-CSLB (2752) or www.cslb.ca.gov for more information about licensed contractors.

As a covered entity under Title II of the Americans with Disabilities Act, the City of Los Angeles does not discriminate on the basis of disability and, upon request, will provide reasonable accommodation to ensure equal access to its programs, services and activities. For efficient handling of information internally and in the internet, conversion to this new format of code related and administrative information bulletins including MGD and RGA that were previously issued will allow flexibility and timely distribution of information to the public.

OWNER'S ACKNOWLEDGMENT AND VERIFICATION OF INFORMATION

(OWNER-BUILDER DECLARATION, cont.)

Application Number: 18026-10000-00110

Project Address: 1351 W. Sepulveda Blvd.

GP 10. I am aware of and consent to an Owner-Builder building permit applied for in my name, and understand that I am the party legally and financially responsible for proposed construction activity at the following address: 1351 W SEPULVEDA BLVD.

GP 11. I agree that, as the party legally and financially responsible for this proposed construction activity, I will abide by all applicable laws and requirements that govern Owner-Builders as well as employers.

GP 12. I agree to notify the issuer of this form immediately of any additions, deletions, or changes to any of the information I have provided on this form. Licensed contractors are regulated by laws designed to protect the public. If you contract with someone who does not have a license, the Contractors' State License Board may be unable to assist you with any financial loss you may sustain as a result of a complaint. Your only remedy against unlicensed Contractors may be in civil court. It is also important for you to understand that if an unlicensed Contractor or employee of that individual or firm is injured while working on your property, you may be held liable for damages. If you obtain a permit as Owner-Builder and wish to hire Contractors, you will be responsible for verifying whether or not those Contractors are properly licensed and the status of their workers' compensation insurance coverage. Before a building permit can be issued, this form must be completed and signed by the property owner and returned to the agency responsible for issuing the permit.

Note: A copy of the property owner's driver's license, form notarization, or other verification acceptable to the agency is required to be presented when the permit is issued to verify the property owner's signature.

Overall Inspection Comments

Consent to enter, inspect and take photographs was given by: Chelsey Montufar, Manager.

The Business Activities, Owner/Operator Identification, Hazardous Materials Inventory, Site Map, Emergency Response/Contingency Plan and Employee Training Plan sections were reviewed in CERS and field verified. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation.

NOTE:
The LAMC, Sections (L.A.M.C. SECTION 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA
**** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year.

Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change. As a reminder, you must complete all the required sections in CERS. This includes the owner/operator and business activities section, inventory and site map section, and the contingency plan and employee training section. The CERS site has a very detailed help section for any question that you may have.

Upon completion of the required CERS submittals and the resolution of all the above mentioned violations, please respond via email to the issuing inspector to have the submittals reviewed and the violations cleared.

Reports emailed to:

This report shall serve as a “NOTICE TO COMPLY” for Minor Violations, and a “NOTICE OF VIOLATION” for Major violations. Formal enforcement and/or penalty assessment may be initiated for any violations noted, and for those not corrected in a timely manner. You are, hereby, ordered by the Fire Chief to correct the above noted violations **WITHIN 30 DAYS, OR FORTHWITH IF INDICATED IN THE CORRECTION SUMMARIES PROVIDED.**

Spoke with Kevin Altobelli, General Manager, regarding CERS. He was informed that State law mandates all regulated businesses electronically submit their Hazardous Materials Business Plan (HMBP) via the California Environmental Reporting System (CERS). Electronic submittal shall be completed within the next 30 days.

In addition, I advised him that his HMBP will need to be reviewed and certified annually, between January 1st and March 1st, for complete and accurate information. It is also mandatory to submit any substantial change in operation within 30 days.

This report shall serve as a "NOTICE TO COMPLY" for Minor Violations, and a "NOTICE OF VIOLATION" for Major violations. Formal enforcement and/or penalty assessment may be initiated for any violations noted, and for those not corrected in a timely manner. You are, hereby, ordered by the Fire Chief to correct the above noted violations **WITHIN 30 DAYS, OR FORTHWITH IF INDICATED IN THE CORRECTION SUMMARIES PROVIDED.**

CONSTRUCTION SITE WELL INSPECTION

District Ref. No. _____

Field: Torrance City/County Torrance/Los Angeles Sec. 24 T. 4S R. 14W S.B. B.&M.

Location (major cross streets): Sepulveda & Normandie

Development Representative: Kent Phillips, Mulligan Fun Center Phone: (310) 325-9806

Describe the exact location of the excavation or well at the building site (from a reference point on a Division map): 360' S and 42' E from N.W. property corner.

How the location was determined: Measured ☐ Surveyed ☒ Other ☐

Describe: _____

Well designation: "Knape" #1, API No. 037-18504

Operator: Henry Wertalia

SAFETY PRECAUTIONS AND UNSAFE EXCAVATIONS

CAUTION! Oil and gas wells may produce hydrogen sulfide gas, which is highly poisonous, and will accumulate and concentrate in low areas such as excavations. Before entering an excavation area, test to ensure that there is sufficient oxygen and that the flammable/toxic gas readings are within safe limits.

LOS ANGELES, CALIFORNIA

Gentlemen:

For your records, the property on Sepulveda Blvd. Torrance Field, known as 1 acre, part of Lot 2, "150 acre tract of Maria Machado de Rocha" has been transferred to Homer A. Crowley and Geo Peters, and the old lease held by Henry Wertella has been given cleared dated, Dec. 28th, 1937. The transfer of the property as of December 15th 1937.

Emily U. Knape,

H. Wertella.
"Knape" 1
24 4/14.

629 South Hill Street
Los Angeles, California
September 6, 1934.

Mr. G. L. Graham, Contractor,
2906 Cherry Avenue,
Long Beach, Calif.

Dear Sir:

Your report of abandonment of Henry Wertalla well No. "Knape" 1, Sec. 24, T. 4 S., R. 14 W., S. B.B.& M., Torrance oil field, Los Angeles County, dated August 29, 1934, received August 31, 1934, and submitted to this Division on our form 102, has been examined in conjunction with records filed in this office.

A review of the reports and records shows that the requirements of this Division, which are based on all information filed with it, have now been fulfilled.

Yours truly,

R. D. Bush
State Oil and Gas Supervisor

By _____
Deputy Supervisor.

Special Report on Operations Witnessed

No. T 1-27144

Los Angeles, Cal. July 27, 1934

Mr. G. L. Graham,
Long Beach, Cal.

Agent for G. L. GRAHAM, CONTRACTOR Company

DEAR SIR: HENRY WERTALLA

Operations at your well No. "KNAPE" 1 Section 24, T. 4 S., R. 14 W., S. B. B. & M.,
Torrance Oil Field, in Los Angeles County, were witnessed by
Loyde H. Metzner, representative of the supervisor,
on July 21, 1934. There was also present Earl Emmons, Driller and
Lloyd Emmons, Tooldresser

Casing Record 15½" cem. 747'; 10" cem. 3621', pulled from 727'; 8¼" landed 3875', perf. 3627'-3875', pulled from 3105'. T. D. (present hole) 3875', plugged with cement 3727'-3520', with 10 sacks of cement at 3105', with cement 615'-600' and with 5 sacks of *

The operations were performed for the purpose of testing the location and hardness of a cement plug placed from 615' to about 595' in the process of abandonment.

and the data and conclusions are as follows:

*cement at 600'. Junk: (1st hole) 8¼" 3640'-3890'; 6¼" 3657'-3887'. T. D. (1st hole) 3890'.

THE INSPECTOR VISITED THE WELL AT 12:30 P. M. ON JULY 18, 1934 AND NOTED THE FOLLOWING:
1. The top of the 8¼" casing was located at 3105'.
2. Ten sacks of Victor cement was dumped on a wooden plug driven into the stub of the 8¼" casing at 3105'.
3. The 10" casing was shot and parted at 727' with a collar shot.

The shooting operations were completed at 4:05 p. m.

THE INSPECTOR VISITED THE WELL AT 1:45 P. M ON JULY 20, 1934 AND MR. EARL EMMONS REPORTED THE FOLLOWING:
1. The 10" casing was pulled from 727'.
2. The hole could not be cleaned out below 610' due to sand coming in.

THE INSPECTOR NOTED THE FOLLOWING:
1. The hole was open to 615' and the bailer brought up sand.
2. Twenty sacks of Victor cement was dumped at 615'.

The cementing operations were completed at 4:00 p. m.

THE INSPECTOR VISITED THE WELL AT 8:50 A M. ON JULY 21, 1934 AND NOTED THAT the bailer could not be spudded below 600' and brought up a sample of set cement.

(CONTINUED ON PAGE 2)

Special Report on Operations Witnessed

No. T 1-27143

Los Angeles, Cal. July 27, 1934

Mr. G. L. Graham,
Long Beach, Cal.

~~Agent for~~ G. L. GRAHAM, CONTRACTOR ~~Company~~

DEAR SIR: HENRY WERTALLA

Operations at ~~your~~ well No. "KNAPE" 1 Section 24, T. 4 S., R. 14 W., S. B. B. & M., Torrance Oil Field, in Los Angeles County, were witnessed by Loyde H. Metzner, representative of the supervisor, on July 18, 1934. There was also present Earl Emmons, Driller and Lloyd Emmons, Tooldresser.

Casing Record 15½" cem. 747'; 10" cem. 3621', W. S. O.; 8¼" landed 3875', perf. 3627'-3875', pulled from 3100'. T. D. (present hole) 3875', plugged with cement 3727'-3520'. Junk: (1st hole) 8¼" 3640'-3890'; 6¼" 3657'-3887'. T. D. (1st hole) 3890'.

The operations were performed for the purpose of testing the location and hardness of a cement plug placed from 3727' to 3520' in the process of abandonment.

and the data and conclusions are as follows:

INSPECTOR FRANK B. CARTER VISITED THE WELL AT 11:00 A. M. ON JULY 16, 1934 AND NOTED THE FOLLOWING:
1. The bailer couldnot be spudded below 3727' and brought up a sample of mud.
2. Twenty-one sacks of Victor Oil Well cement was dumped at 3727'.

The operations were suspended at 5:00 p. m.

INSPECTOR CARTER VISITED THE WELL AT 8:30 A. M. ON JULY 17, 1934 AND NOTED THE FOLLOWING:
1. The top of the cement was located at approximately 3657'.
2. Twenty-one sacks of Victor Oil Well cement was dumped at 3657'±.

The cementing operations were completed at 1:00 p. m.

INSPECTOR LOYDE H. METZNER ARRIVED AT THE WELL AT 10:30 A. M. ON JULY 18, 1934 AND NOTED THAT the bailer could not be spudded below 3520' and brought up a sample of set cement.

The test was completed at 11:45 a. m.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT 3520' ARE APPROVED.

~~Agent for~~ G. L. GRAHAM, CONTRACTOR ~~Company~~

HENRY WERTALLA

Dear Sir:

Your proposal to abandon / Well No. "KNAPE" 1,

Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated July 14, 1934, received July 18, 1934, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

Records in addition to, or at variance with those shown in the notice.

15½" cem. 747'.
10" cem. 3621'. W. S. O.
8¼" landed 3875'. perf. 3627'-3875', pulled from 3100'.
Total depth (present hole) 3875'.
Total depth (1st hole) 3890'. Junk: 8¼", 3640'-3890', 6¼", 3657'-3887'.

The last production reported from this well was during 29 days in May, 1934, when the daily average yield was 14 bbl. of oil and no bbl. of water.

THE NOTICE STATES:

"The present condition of the well is as follows:
15½" casing Set at 747'.
10¾" " " " 3621'.
8-5/8" " " 3889'.
The 8-5/8 casing Bad near the Shoe and a Liner 296' with 252' perforated Landed 3887'
The 8-5/8" casing Recovered from 3100'"

PROPOSAL:

"The proposed work is as follows:
Clean out to Bottom if possible plug with oil well cement to 3614'
Then plug with cement to 3571'
Cap Stub of 8-5/8" casing with 20' cement plug.
Shoot and pull 10¾" casing from 727'
Cap Stub of 10¾" casing. with 20' cement plug
Cap Stub of Surface casing at bottom of cellar."

DECISION:

THE PROPOSAL IS APPROVED PROVIDED THAT:

1. The hole shall be plugged with cement from the cleanout depth to 3607'.
2. The 8¼" casing stub shall be capped as proposed.
3. THIS DIVISION SHALL BE NOTIFIED TO WITNESS:
   (a) All cementing operations at the well.
   (b) All shooting or ripping operations for the removal of casing.
   (c) The location and hardness of cement plugs at 3607' and 707'.

A complete report in duplicate on our form 102 should be filed with this division after the completion of the above work.

Spudded on January 27, 1924, using 24" fishtail bit and 6" drill pipe. Drilled to and cemented 15⅜" 70# Marks casing at 747' on February 2, 1924, using 300 sacks V.O.W. cement, all treated, Perkins Process. Drilled out cement on February 4, 1924 and made 15" rotary hole to 3621' and cemented 10" 45# D.B.X. casing at 3621' on March 8, 1924, using 350 sacks V.O.W. cement, last 100 sacks treated, Perkins Process. Bailed to 1500' for casing test. Stood 4 hours, O.K. Drilled cement out from 3606' and made hole to 3626'. Bailed to 1800'. Stood 18 hours. Found top of fluid at 1800'. Shutoff approved O.K.

Drilled ahead to 3890' and landed 8¼" 36# D.B.X. casing at 3890' including 252' of 80 Mesh standard slotted. Ran 3" tubing to 2955' and swabbed well in on March 24, 1924.

Thirty days after completion the production was:

Flow 340 bbls. - 19.8° gravity - 0.8% cut.

Report on Proposed Operations

No. P 1-11597

Los Angeles, Cal. September 21, 1925

Mr. B. L. Cunningham,

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to redrill oilstring Well No. "KNAPE" 1,

Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Sept. 8, 1925, received Sept. 8, 1925, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

RECORDS: The condition of the well is as stated in the notice.

THE NOTICE STATES:

"The present condition of the well is as follows:

Casing: 15½" cemented 747'.
10" " 3621' W.S.O.
8¼" landed 3889' inc. 252' of 80M S.S. on bottom.

TOTAL DEPTH: 3890'

HISTORY: This well was completed on March 22, 1924 and in the five months, March to July 1924, produced 47900 bbl. of practically clean oil. In July 1924 the 8¼" oilstring was slightly bad so a 6¼" liner was set inside of the 8¼" oilstring, 296'1" of 6¼" including 253'2" of 80 Mesh Standard Slotted landed at 3887'. The well then produced for 11 months, September 1924 to July 1925 returning 12700 bbl. of oil. The 6¼" and 8¼" casing are now bad at 3653' and cannot get down with bailer."

PROPOSAL:

"The proposed work is as follows:

1. Remove 6¼" liner and 8¼" casing from about 3640'.
2. Redrill with oil sidetracking below about 3640' to 3875'.
3. Land new 8¼" oilstring at 3875'.

RECOMMENDATION:

THE PROPOSAL AS QUOTED ABOVE IS APPROVED WITH THE RECOMMENDATION THAT the 6¼" and 8¼" casing to be sidetracked be plugged with cement, if possible.

Notice of Intention to Deepen, Redrill, Plug or Alter Casing in Well

This notice must be given fifteen days before work begins when possible

Los Angeles, Cal. September 8, 1925

MR. E. Huguenin,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 17, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to commence the work of ~~deepening~~, redrilling, ~~plugging or altering~~ casing at well number "KNAPE" 1
(Cross out unnecessary words)

....., Sec. 24, T. 4 S., R. 14 W., S.B. B. & M.

Torrance Oil Field, Los Angeles County.

The present condition of the well is as follows:

CASING: 15½" cemented 747'.
10" " 3621' W.S.O.
8¼" landed 3889' inc. 252' of 80M S.S. on bottom.

TOTAL DEPTH: 3890'

HISTORY: This well was completed on March 22, 1924 and in the five months, March to July 1924, produced 47900 bbls. of practically clean oil. In July 1924 the 8¼" oilstring was slightly bad so a 6¼" liner was set inside of the 8¼" oilstring, 296'1" of 6¼" including 253'2" of 80 Mesh Standard Slotted landed at 3887'. The well then produced for 11 months, September 1924 to July 1925 returning 12700 bbls. of oil. The 6¼" and 8¼" casing are now bad at 3653' and cannot get down with bailer.

The proposed work is as follows:

1. Remove 6¼" liner and 8¼" casing from about 3640'.
2. Redrill with oil sidetracking below about 3640' to 3875'.
3. Land new 8¼" oilstring at 3875'.

Redrill 0.5.

CALI RNIA STATE MINING BU..EAU

DEPARTMENT OF PETROLEUM AND GAS

Report on Test of Water Shut-off

(BAILING)

No. T -1-6480

Los Angeles Cal. March, 26, 1924

Mr. B. L. Cunningham

Los Angeles Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your well No. "KNAPE" 1, Section 24, T. 4-S., R. 14-W. S.B. B. & M.,

Torrance Oil Field, in Los Angeles County, was tested for

shut-off of water on March, 15, (Time and date), 1924 Mr. V. C. Peet,

designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present

L. M. Crans, Superintendent and F. M. Smith, Geologist.

Location of water tested above 3621' and normal fluid level unknown

Depth and manner of water shut-off: { 3621 ft. of 10 in. 45 lb. / ft. of in. lb. } casing was { cemented / landed } in sticky brown shale (Formation)

at 3621 ft. with 350 sacks Victor cement by Perkins method; with 450# pressure. 15" rotary (Size and kind) tools

were used in landing water string.

Casing record of well 15½" cemented 747'; 10" as above.

Reported total depth of hole 3626 ft. Hole bridged from x ft. to x ft. Hole cleaned out to 3626 ft. for this test.

At time of test depth of hole measured 3626 ft. and bailer brought up sample of shale

At 12:00 midnight March, 14, 1924 (Time and date) oil bailed to x ft., water bailed to 1800 ft.

At 6:00 p.m. March, 15, 1924 (Time and date) top of oil found at x ft., top of water found at 1800 ft.

Result of bailing test:

MR. SMITH REPORTED:

1. No fluid entered the well when bailed to 1500' and allowed to stand 3 hr. for a casing test.
2. In drilling ahead for test 15' of set cement was found inside the 10" casing.

THE INSPECTOR NOTED:

That while standing 18 hr bailed to 1800' no fluid entered the well.

THE SHUT-OFF IS APPROVED.

cc--J. C. Anderson

Notice of Test of Water Shut-off

This notice must be given at least five days before the test, and a longer time is desirable.

Los Angeles, Cal. March 11, 1924

MR. C. C. Thoms,
Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 19, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to test the shut-off of water in well number "Knape" 1, Section 24, T. 4 S., R. 14 W., S.B. B. & M., ~~Long Beach~~ Torrance Oil Field, Los Angeles County, on the 15th day of March 1924

10 inch 45 lb. casing was ~~landed~~/cemented in sticky brown shale (Formation) at 3621' (Depth)

on March 8, (Date) 1924

350 sacks Victor (Kind) of cement were used. Last 100 sks. were treated with McDuffie's re-agent.

The Perkins method was used in placing the cement.

Fluid level will be bailed to a depth of 1800 feet and left undisturbed for at least 12 hours before your inspection.

The well is 3621 feet deep. There ~~is~~/is not a plug or bridge from 0 feet to 3621 feet.

Report on Proposed Operations

No. P -1-7937

Los Angeles, Cal Feb. 11, 1924

Mr. B. L. Cunningham,

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to drill Well No. "KNAPE" 1, Section 24 T. 4S. R. 14W., S.B. B. & M.

Torrance Oil Field Los Angeles County, dated Jan. 30, 1924,

has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:

"The well is 360 feet S. and 42 feet E. from N.W. Property corner.
The elevation of the derrick floor above sea level is 62.6 feet.
We estimate that the first productive oil or gas sand should be encountered at a depth of about 3660 feet, more or less."

PROPOSAL:

"We propose to use the following strings of casing either cementing or landing them as here indicated.

Size of Casing	Wt. Lb. Per Ft.	New or 2nd Hand	Depth	Landed or Cemented
15½"	70#	New	500	Cemented
10"	45#	New	3650	Cemented
8¼"	36#	New	3820	Landed

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing."

Recommendation:

We estimate that the formations open to production in this area, should be encountered at a depth of about 3640' at this location. However, the latest data available indicate that there may be productive formations between 3580' and 3640'.

The exact top of the first known productive zone should be located by careful coring below a depth of 3560'.

The proposal is approved with the following recommendation:
This Department shall be consulted in regard to the cementing depth for the 10" casing, after coring to locate the top of the first known productive zone and before drilling below a depth of 3640'.

KINDLY NOTIFY THIS DEPARTMENT TO WITNESS A BAILING TEST OF THE 10" SHUT-OFF.

CC--J. C. Anderson

This notice must be given before drilling begins

HENRY WERTALLA

Los Angeles, Cal. January 30, 1924

Mr. C. C. Thoms,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 17, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to commence the work of drilling well number "Knape" 1 Section 24 T. 4S. R. 14W., S.B. B. & M., TORRANCE Oil Field, Los Angeles County.

The well is 360 feet N. or S., and 42 feet E. or W. from N.W. Property corner
(Give location in distance from section corners or other corners of legal subdivision)

The elevation of the derrick floor above sea level is 62.6 feet.

3580
3640

We propose to use the following strings of casing either cementing or landing them as here indicated:

Size of Casing, Inches	Weight, Lb. Per Foot	New or Second Hand	Depth	Landed or Cemented
15½"	70#	New	500	Cemented
10"	45#	New	3650	Cemented
8¼"	36#	New	3820'	Landed

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing.

We estimate that the first productive oil or gas sand should be encountered at a depth of about 3660 feet, more or less.

Los Angeles, California.

Dear Sir: Lease P-56 - House Lease - Torrance Field.

This is to advise you that under date of January 18, 1933 the Pan American Petroleum Company relinquished all of its right, title and interest in and to its Lease P-56, known as the House Lease, in the Torrance Field, to Mr. T. B. House, whose address is Western Trust and Savings Bank, 130 East 1st Street, Long Beach, California. The House Lease covers the following described property:

> The North 1 (1) acre of the East 2 acres of the West 3 acres of that portion of Lot 2 of the 750 acre tract of Maria Machado de Rocha, as per map recorded in Book 6, Page 161,Miscellaneous Records, described as follows: Beginning at the Southeast corner of said Lot, thence North along the East line thereof to a point distant 1056 feet south from the Northeast corner of said Lot; thence West parallel with the North line of said Lot 432.96 feet; thence south parallel with the East line of said Lot to the Southwesterly line thereof; thence Southeasterly along said Southwesterly line to the place of beginning.

It will be appreciated if you will kindly change your records accordingly.

Yours very truly,

William C. McDuffie, as Receiver for

LOG OF OIL OR GAS WELL

FIELD TORRANCE COMPANY PAN AMERICAN PETROLEUM COMPANY

Township 4 S., *Range* 14 W., *Section* 24, *Number of Well* "HOUSE" 1

In compliance with the provisions of Chapter 718, Statutes 1915, as amended, the information given herewith is a complete and correct record of all **work done on the well since the previous record,** dated November 14, 1925., was filed.

Signed R. L. Cunningham
(President, Secretary or Agent)

Date February 1, 1926. Title Geologist.

The well was cleaned out to 3875'. A 40# shot was exploded at 3875' and the shot cavity cleaned out to 3875'. Victor Oil Well cement, treated with chemical was dumped as follows:

6	sacks	at 3875'	on	11-29-25,	found top	at 3870'
2	"	" 3870'	"	11-30-25	" "	" 3870'
8	"	" 3870'	"	11-30-25	" "	" 3870'
15	"	" 3870'	"	12-1-25	" "	" 3868'
16	"	" 3868'	"	12-1-25	" "	" 3718'

The cement was cleaned out to 3825' at which depth the location and hardness of the plug was approved by Mining Bureau Inspector.

A 40# shot was exploded at 3640' and the shot cavity cleaned out to 3640'. 10 sacks of Victor Oil Well cement, treated with chemical was dumped at 3640'. Top of cement at 3639'. 4 sacks of Victor Oil Well cement, treated with chemical was dumped at 3639' filling to 3630' at which depth the location and hardness of the cement plug was approved by the Mining Bureau Inspector on December 7, 1925. 14 sacks of Victor Oil Well cement, treated with chemical was dumped at 3630' to complete the second stage of the plug.

The 8¼" casing was cut at 900' and 880' from which depth it was pulled. A wooden plug with two sacks of cement on top was placed in the 12½" casing at the surface.

Work completed December 14, 1925.

FORM 109-A. 39906 7-25 3M

CALIFORNIA STATE MINING BUREAU
DEPARTMENT OF PETROLEUM AND GAS

Special Report on Operations Witnessed

No. T.-1-9589

Los Angeles, Cal. December 24, 1925.

Mr. B. L. Cunningham,
Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Operations at your well No. "HOUSE" 1 Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, in Los Angeles County, were witnessed by D. C. Roberts, representative of the supervisor, on December 7, 1925. There were also present H. E. Bennett, Driller and Z. B. Ingham, Helper

Casing Record 12½" cem. 919'; 8¼" cem. 3626', W.S.O.; 6¼" liner landed 3891'; top at 3461'; 278' of perf. on bottom, bad at 3634', 3844', 3860' and 3875'. (See below)

The operations were performed for the purpose of testing the location and hardness of a cement plug proposed to be placed at 3630'.

and the data and conclusions are as follows: (casing record continued)

Total depth 3891'; plugged with cement 3875'-3821', 3640'-3629'.
Junk: 6¼" - 60 mesh slotted sidetracked 3647'-3890'; 4½ - 80 mesh slotted sidetracked 3653'-3870', inside of 6¼" sidetracked junk. Two slip bushings at 3655'. Bailer bottom at 3875' inside of present 6¼" liner.

MR. BENNETT REPORTED THE FOLLOWING:

1. The hole was filled with heavy mud from 3821' to 3640'.
2. On December 5, 1925 the 6¼" liner was shot at 3640' with one 3" x 10' - 80% gelatin shell. The hole was cleaned out to 3640' and 10 sacks of Victor cement, all treated with quick-setting chemical, was dumped at this depth, filling the hole to 3639'.
3. On December 6, 1925 four more sacks of Victor cement, all treated with quick-setting chemical, was dumped at 3639, filling the hole to 3629'.

THE INSPECTOR NOTED THE FOLLOWING:
The bailer could not be spudded below 3629' and brought up a sample of set cement.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT 3629' ARE APPROVED.

cc J. C. Anderson

R. D. BUSH,
State Oil and Gas Supervisor

By E. Huguenin Deputy

FORM 109-A. 39806 7-25 3M

CALIFORNIA STATE MINING BUREAU

DEPARTMENT OF PETROLEUM AND GAS

Special Report on Operations Witnessed

No. T.-1-9567

Los Angeles Cal. Dec. 9 1925

Mr. B. L. Cunningham

Los Angeles Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Operations at your well No. "HOUSE" 1 Section 24, T. 4 S, R. 14 W, S.B. B. & M., Torrance Oil Field, in Los Angeles County, were witnessed by A. B. Hendrickson, representative of the supervisor, on Dec. 4, 1925. There were also present R. S. Doss, Driller and E. R. Ferguson, Tooldresser

Casing Record 12½" cem. 919';8¼" cem. 3626',W.S.O.6¼" liner landed 3891', top at 3461', 278' of perf. on bottom bad at 3634', 3844', 3860' and 3875'. Total depth 3891'.(see below)

The operations were performed for the purpose of testing the location and hardness of a cement plug proposed to be placed at 3860'.

and the data and conclusions are as follows: Casing record--plugged with cement 3875-3821'. Junk: 6¼" 60 mesh slotted sidetracked 3647-3890'; 4½" 80 mesh slotted sidetracked 3653-3870',inside of 6¼" sidetracked junk. Two slip bushings at 3655'. Bailer bottom at 3875' inside of present 6¼" liner.

On Dec. 3, 1925, Inspector Roberts visited the well and H. E. Bennett, Driller on tour, reported the following:

1. Owing to bad casing and a bailer bottom at 3875', the hole could not be cleaned out below this depth.
2. On Nov. 29, 1925 the 6¼" casing was shot at 3875' with a 40# 80% gelatin charge.
3. The hole was cleaned out to 3875' and 6 sacks of Victor cement, treated with quick setting chemical dumped at 3875'. The top of cement was found at 3870'.
4. On Nov. 30, 1925 10 sacks of Victor cement, treated with quick setting chemical was dumped at 3870'. The top of the cement was found at the same depth.
5. On Dec. 1, 1925 31 sacks of Victor cement, treated with quick setting chemical was dumped at 3870'.

On Dec. 3, 1925, Inspector Roberts noted the following:

1. The bailer stopped at 3718', spudded to 3818' and brought up asample of soft unset cement. The Inspector recommended that the hole be cleaned out to the top of the hard cement and the department called to witness the location and hardness of the cement.

On Dec. 4, 1925 Inspector Hendrickson visited the well and R. S. Doss, Driller on tour, reported that the hole was cleaned out to the top of the hard cement at 3821'.

On Dec. 4, 1925 Inspector Hendrickson noted that the bailer could not be spudded below 3821' and brought up a sample of set cement.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT 3821' ARE APPROVED.

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

This well was spudded on April 3, 1924. Cemented 12½" 45# D.B.X. casing at 919' on April 5, 1924 with 350 sacks of Victor cement, all treated with chemical, Perkins Process.

Found top plug at 919' April 8, and drilled ahead making 12" hole to 3626' taking no cores and cemented 8¼" 36# D.B.X. casing at 3626' on April 29, 1924 with 350 sacks of Victor cement, last 100 sacks treated with chemical, Perkins Process. Casing test showed 8¼" casing tight, found cement at 3610' and 8¼" shoe at 3621' on May 5, 1924. Made hole to 3636' bailed to 2000' left stand 25 hours, found 5' rise with oil colors and shutoff was approved by Inspector Mason of the S.M.B. on May 7, 1924.

Drilled ahead to 3891' reamed hole and landed 6¼" casing 26# Marks on bottom at 3891' on May 13, 1924, carrying 254' of 60 mesh Standard Slotted on bottom. Did very little bailing to get mud out; ran in 3" tubing and started swabbing and well started flowing at 7 a.m. on May 15, which was two days after we landed the oil string. The well produced but 10 days averaging 291 barrel rate 15.8 gravity, no water and sanded up on May 24, 1924.

Moved in acleanout string and bailed out lots of sand and rotary mud but could not make well produce. We were still cleaning out on June 10, 1924 when the pipe went bad at 3685'. Swedged on pipe for a week and started moving in bobtailed rotary on June 20, 1924, and rolled the pipe out to bottom and on July 1, 1924, set a liner of 11 joints 4¾" 80 mesh Standard Slotted with a shoe on bottom 249'2" below 3 joints 4¾" blank pipe 66'7" total liner length 315'9" with top at 3575'. Run in 3504' of 3" tubing and set packer at 2910' and started swabbing on July 2, 1924, but could not make well flow. Bailed through 3" tubin g for 10 days then pulled tubing out and bailed through 6¼" casing for 5 days, run tubing back to 2506' and put on pump on July 18, 1924.

The well would not pump so pulled out tubing and cleaned out sand and mud, no water, for three weeks and left bailer in hole and could not fish out on account of sanding up above it. Started moving in bobtailed rotary on August 17, 1924. Took hold of 4¾" liner and jarred on same, pulling up 25' when Kammindiner jars broke. Started fishing and got out all fish but 2 slip bushings which had fallen in the hole and were washed down to 3655'. On September 8, 1924 cut 4¾" liner at 3653' and brought out 4 and 1/2 joints, leaving all slotted in the hole from 3653' to 3870'. On September 10, 1924, cut 6¼" casing at 3647' and pulled from above that depth leaving 6¼" casing all slotted from 3647' to 3890' in the hole.

Started sidetracking 6¼" casing at 3647' and redrilled to 3890' reamed hole and on September 19, 1924, run 3890' of 6¼" 26# casing including 12 joints or 278'1" of D.B.X. Seamless Pot Shop drilled 5/32"x 1¼" centers, round holes on bottom and landed at

Page 2

3890'. Bailed mud for 3 days, run in 2549' of 2½" tubing and put well on the pump on September 23, 1924. The well was a sand and mud hole and recovered only 620 barrels of oil up to January 1925 and about 2000 barrels more up to April 1925, when we started fishing for a bailer and a string of tools left in the hole by the cleanout crew.

Could not recover the fish so on May 7, 1925 the 6¼" casing was cut at 3461' and pulled from above that depth. We then went in with 4" I.H. drill pipe and backed off 63' of casing containing two strings of tools and removed from the hole leaving top of 6¼" in the hole at 3525'. On May 15, 1925 we fished out the bailer, cleaned out to bottom inside of the 6¼" liner and put the well back on production.

The well was an unsatisfactory producer from May until August 1925, returning a total of only about 800 barrels of 11 gravity oil in this time. The production seemed to have been effectively mudded off and the well has been idle for 3 months to the present date November 14, 1925.

CALIFORNIA STATE MINING BUREAU

DEPARTMENT OF PETROLEUM AND GAS

Report on Proposed Operations

No. P -1-11958

Los Angeles, Cal. November 20, 1925

Mr. B. L. Cunningham,

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to abandon Well No. "HOUSE" 1,

Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Nov. 14, 1925, received Nov. 16, 1925, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

RECORDS: The well has been idle since August, 1925.

THE NOTICE STATES:

"The present condition of the well is as follows:

CASING: 12½" cemented 919'
8¼" " 3626' W.S.O.
6¼" liner landed 3891' - Top at 5461'

TOTAL DEPTH: 3891'

JUNK: 6¼" 60 Mesh slotted sidetracked 3647' to 3890'.
4¾" 80 Mesh " " 3653' " 3870'. Inside sidetracked 6¼" junk.
Two slip bushings at 3655'.

The hole shows no water but makes so much sand and mud we cannot produce. See complete history filed with this notice."

PROPOSAL:

"The proposed work is as follows:

1. Clean out to bottom, explode 30 lb. shot at 3875' and plug with cement to about 3860' to shutoff probable encroaching edge water.
2. Leave full of heavy mud to 3650', explode 20 lb. shot at 3640', and put in two-stage plug at shoe of the 8¼" water string. If liner comes loose above 3640' will remove it from hole.
3. Rip 8¼" casing loose not deeper than 900'; put in surface plug and abandon location."

RECOMMENDATION:

THE PROPOSAL AS QUOTED ABOVE IS APPROVED.

KINDLY NOTIFY THIS DEPARTMENT TO WITNESS the location and hardness of the cement plugs at 3860' and 3630'.

Notice of Intention to Abandon Well

This notice must be given at least five days before work is to begin

Los Angeles, Cal. November 14, 1925

MR. E. Huguenin,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 16, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to abandon well number "HOUSE" NO. 1, Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County, commencing work ~~on the~~ On approval day of, 192.

The present condition of the well is as follows:

CASING: 12½" cemented 919'
8¼" " 3626' W.S.O.
6¼" liner landed 3891' - Top at 3461'

TOTAL DEPTH: 3891'
JUNK: 6¼" 60 Mesh Slotted sidetracked 3647' to 3890'.
4¾" 80 Mesh " " 3653' " 3870'. Inside sidetracked 6¼" junk.
Two slip bushings at 3655'.
The hole shows no water but makes so much sand and mud we cannot produce. See complete history filed with this notice.

The proposed work is as follows:

1. Clean out to bottom, explode 30 lb. shot at 3875' and plug with cement to about 3860' to shutoff probable encroadhing edge water.
2. Leave full of heavy mud to 3650', explode 20 lb. shot at 3640', and put in two-stage plug ~~a two stage plug~~ at shoe of the 8¼" water string. If liner comes loose above 3640' will remove it from hole.
3. Rip 8¼" casing loose not deeper than 900'; put in surface plug and abandon location.

Respectfully yours,

PAN AMERICAN PETROLEUM COMPANY.

Report on Proposed Operations

No. P-1-9343

Los Angeles, Cal. Sept. 12, 1924

Mr. B. L. Cunningham

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to redrill oil string Well No. "HOUSE" 1,

Section 24, T. 4S., R. 14W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Sept. 8, 1924., received Sept. 8, 1924., has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

RECORDS: The records are as stated in the notice quoted below.

THE NOTICE STATES:
"The present condition of the well is as follows:
Casing:- 12½" cemented 919'.
8¼" " 3621'. W.S.O.
6¼" landed 3891', 354' 60 Mesh Standard Slotted pipe on bottom.
Depth:- 3891'.
This well produced at rate of about 240 bbls. of clean oil per day for 10 days in May 1924. Sand trouble developed and found 6¼" casing bad at 3682'. Rolled out 6¼" casing to 3870' and set 316' of 4¾" liner on bottom inside of 6¼" casing. Tried to lift out and pulled up 25' when Kamindiner jars broke. Got out all fish except two slip bushings which washed down to 3655'."

PROPOSAL:
"The proposed work is as follows:
1. Place 40# shot at 3655' and pull 6¼" and 4¾" pipe from that depth.
2. Redrill with oil to 3890' and land 6¼" oilstring on bottom.
Note:- There is no water in this hole."

RECOMMENDATION:
The proposal as quoted above is approved with the recommendation that the casing to be side-tracked be plugged with cement if possible.

CALIFORNIA STATE MINING BUREAU

DEPARTMENT OF PETROLEUM AND GAS

Report on Test of Water Shut-off

(BAILING)

No. T -1-6924

Los Angeles Cal. May. 27. 1924

Mr. B. L. Cunningham

Los Angeles Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your well No. "HOUSE" 1, Section 24, T. 4S., R. 14W., S.B. B. & M.,

Torrance Oil Field, in Los Angeles County, was tested for

shut-off of water on May 7, (Time and date) 1924 Mr. A. J. Mason,

designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present Bruce Barkis, Engineer and R. O. Graham, Driller.

Location of water tested above 3621' and normal fluid level x

Depth and manner of water shut-off: { 3621 ft. of 8¼ in. 36 lb. } casing was { cemented / landed } in sticky shale (Formation)
{ ft. of in. lb. }

at 3621 ft. with 350 sacks last 100 treated Victor cement by Perkins method; 12" rotary (Size and kind) tools

were used in landing water string. 550# pressure

Casing record of well 12½" cemented 919'; 8¼" as above.

Reported total depth of hole 3626 ft. Hole bridged from x ft. to x ft. Hole cleaned out to 3636 ft. for this test.

At time of test depth of hole measured 3627 ft. and bailer brought up sample of brown shale

At 2:30 p.m. May 6, 1924 (Time and date) oil bailed to no oil ft., water bailed to 2000 ft.

At 3:30 p.m. May 7, 1924 (Time and date) top of oil found at oil colors ft., top of water found at 1995 ft.

Result of bailing test:

MR. BARKIS REPORTED:

1. When bailed to 1200' for a casing test, no fluid entered the well in 4 hr.
2. The top of the hard cement was found 16' above the shoe.
3. Some gas issued during bailing.

The Inspector noted that the fluid level rose 5' in 25 hr.(equivalent to 0.3 bbl. per 24 hr.)

THE SHUT-OFF IS APPROVED.

cc--J. C. Anderson

Notice of Test of Water Shut-off

This notice must be given at least five days before the test, and a longer time is desirable.

Los Angeles, Cal. April 30, 1924

MR. C. C. Thoms,
Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 19, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to test the shut-off of water in well number "House" 1, Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County, on the 6th day of May 1924 8¼" inch 36# lb. casing was ~~landed~~ cemented in sticky shale (Formation) at ~~3626'~~ 3621 (Depth) Corrected at test 5-7-24 am. on April 29, 1924 (Date)

350 sacks Victor (Kind) of cement were used. Last 100 sks. were treated with McDuffie's re-agent.

The Perkins method was used in placing the cement.

Fluid level will be bailed to a depth of 2000 feet and left undisturbed for at least 12 hours before your inspection.

The well is 3626' feet deep. There ~~is~~/is not a plug or bridge from 0 feet to 3626' feet.

Respectfully yours,

DEPARTMENT OF PETROLEUM AND GAS

Report on Proposed Operations

No. P -1-8353

Los Angeles Cal. April. 8. 1924

Mr. B. L. Cunningham

Los Angeles Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to drill Well No. "HOUSE" 1,

Section 24, T. 4 S., R. 14 W. S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Mar. 24., 1924, received Mar. 25., 1924, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:
"The well is 150' S. from N. prop. line and 50' W. from E. property line.
The elevation of the derrick floor above sea level is 61.15'.
We estimate that the first productive oil or gas sand should be encountered at a depth of about 3655', more or less."

PROPOSAL:
"We propose to use the following strings of casing either cementing or landing them as here indicated:

SIZE OF CASING	WT. LB. PER FT.	NEW OR 2ND HAND	DEPTH	LANDED OR CEMENTED
12½"	55	New	500'	Cemented
8¼"	36	"	3625'	"
6¼"	26	"	3900'	Landed

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing."

RECOMMENDATION:
We estimate that the formations open to production in this area should be encountered at a depth of 3620' - 3630'.

THE PROPOSAL IS APPROVED.

Kindly notify this Department to witness a bailing test of the 8¼" shut-off.

cc--J. C. Anderson

SAFETY PRECAUTIONS AND UNSAFE EXCAVATIONS

CAUTION! Oil and gas wells may produce hydrogen sulfide gas, which is highly poisonous, and will accumulate and concentrate in low areas such as excavations. Before entering an excavation area, test to ensure that there is sufficient oxygen and that the flammable/toxic gas readings are within safe limits.

LOG OF OIL OR GAS WELL

FIELD Torrance COMPANY Pan American Petroleum Company

Sec. 24, T. 4-S, R. 14-W, S.B. B. & M., Well No. "Hub" 1

In compliance with the provisions of Chapter 718, Statutes 1915, as amended, the information given herewith is a complete and correct record of all work done on the well since the previous record, dated March 10, 1926, was filed.

SIGNED F. L. Campbell

Date April 28, 1930 Title Resident Engineer
(President, Secretary or Agent)

On April 10, 1930, the hole was cleaned out to 3700' and 14 sacks of cement was dumped at 3700', applying 450-500# after each stage. This filled the hole to 3627' where the 6-1/4" casing was shot with a 3" x 10' - 30# shot.

The shot cavity was cleaned out to 3627' and 9 sacks of cement was dumped. The Division of Oil and Gas approved the plug at 3595'. Report #T-1-20751.

Two sacks of cement was dumped at 3595', filling to 3580'. The 6-1/4" casing was shot and pulled from 2999'. The stub was capped with 8 sacks filling to 2972'.

The 8-1/4" casing was shot at 927' with a 3" x 10' - 30# shot. The cavity was cleaned to 927' and 8 sacks was dumped, filling to 900'. Eight additional sacks was dumped accidently at 854'.

On April 14, the Division of Oil and Gas approved the plug at 825'. Report #T-1-20750. The 8-1/4" casing was pulled from 793' and the stub capped with 8 sacks of cement. A plug was set at 40' and 23 sacks was dumped.

The hole was capped at the surface and abandoned.

No. T-1-20750

Los Angeles, Cal. April 22, 1930.

Mr. L. E. Porter,
Los Angeles, Cal.

121

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Operations at your well No. "HUB" 1 Section 24, T. 4-S., R. 14-W., S.B. B. & M., Torrance Oil Field, in Los Angeles County, were witnessed by F. C. Hodges, representative of the supervisor, on April 14, 1930. There was also present F. L. Campbell, Engineer, and Jessie Bush, Driller.

Casing Record 12½" S.P. cem. 907'; 8¼" cem. 3607'; 6¼" landed 3889', perf. 3613'-3880' re-perf. 3650'-3750', bad 3665' and 3708' drilled thru 3843' and sidetracked to 3889', pulled from 2999'. T.D. 3889', shot 3888'-3878', 3872'-3862', 3848'-3838', 3825'-3815', 3627'-3617' *(See below)

The operations were performed for the purpose of testing the location and hardness of a cement plug proposed to be placed from 927' to 887' in the process of abandonment.

and the data and conclusions are as follows:

*Casing Record continued: 2999' and 927'-917', plugged with cement 3889'-3781', 3700'-3580', 2999'-2972', 927'-900' and about 854'-825'. Junk Sidetracked: 6¼" perf. casing 3843'-3889'; Roller, Sub, tap, sub and safety joint 3843'-3865' inside 6¼" casing.

MR. CAMPBELL REPORTED THE FOLLOWING:

1. 2 sacks of Santa Cruz cement was dumped at 3595' and the top of the cement was located at 3580'.
2. The 6¼" casing was shot and pulled from 2999'.
3. 8 sacks of Santa Cruz cement was dumped on top of a wooden plug driven into the stub of the 6¼" casing at 2999'. The top of the cement was then located at 2972'.
4. The 8¼" casing was shot at 927' with a 3"x10' shot containing 30 lb. of 80% gelatin.
5. On April 12, 1930, 8 sacks of Santa Cruz cement was dumped at 927'. The top of the cement was then located at 900'. 8 more sacks of Santa Cruz cement was dumped at about 854'. This cement was dumped at 854' instead of 900' due to the bailer accidentally dumping.

THE INSPECTOR NOTED THAT the bailer could not be spudded below 825' and brought up a sample of set cement.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT 825' ARE APPROVED.

Section 24, T. 4-S., R. 14-W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Nov. 26. 1929, received Nov. 29. 1929, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

Records in addition to or at variance with those shown in the notice:
Production reports on file in this office show this well produced 6 days in January 1929 at the average daily rate of 9.3 bbl. of oil and 17 bbl. of water.

THE NOTICE STATES:
"The present condition of the well is as follows: (Confirming conversation Norris-Campbell)
12½" cem. 907'
8¼" cem. 3607', W.S.O.
6¼" ld. 3889', inc. 276' perf., bad at 3665' and 3708'
Plugged w/c to 3781'."

PROPOSAL:
"The proposed work is as follows:
1. Clean out to 3708', plug w/c under 500 lb. pressure to 3627'; shoot with a 10' shot; clean out shot cavity, plug with cement to 3607' and call you to witness.
2. Continue the plug to 3587'.
3. Pull the 6¼" above 3587', and cap with 20' of cement.
4. Pull, shoot or rip the 8¼" at 927', plug with cement to 887' and call you to witness.
5. Cap at surface and abandon."

DECISION:
THE PROPOSAL IS APPROVED PROVIDED THAT THIS DIVISION SHALL BE NOTIFIED TO WITNESS the location and hardness of cement plugs at 3607' and 887'.

Notice of Intention to Abandon Well

This notice must be given at least five days before work is to begin

Long Beach, Cal. November 26, 1929

MR. E. Huguenin,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 16, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to abandon well No. Hub #1, Sec. 24, T. 4-S R. 14-W, S.B. B. & M., Torrance Oil Field, Los Angeles County, commencing work on the 1 day of December 1929

The present condition of the well is as follows: (Confirming conversation Norris-Campbell)

12½" cem. 907'
8¼" cem. 3607', W.S.O.
6¼" ld. 3889', inc. 276' perf., bad at 3665' and 3708'

Plugged w/c to 3781'.

The proposed work is as follows:

1. Clean out to 3708', plug w/c under 500 lb. pressure to 3627'; shoot with a 10' shot; clean out shot cavity, plug with cement to 3607' and call you to witness.
2. Continue the plug to 3587'.
3. Pull the 6¼" above 3587', and cap with 20' of cement.
4. Pull, shoot or rip the 8¼" at 927', plug with cement to 887' and call you to witness.
5. Cap at surface and abandon.

The 6¼" casing was rolled out from 3659' to 3865', twisted off leaving roller and sub in hole, top at 3860'. Fished for 22 days leaving tap, sub and safety joint in the hole, top at 3843'. Shot at 3843' with 3"x5' shot and drilled out through 6¼", sidetracking to 3889'.

Put in 2½"x10' shots at 3888' to 3878' and 3862' to 3872'. Cleaned out to 3844' and shot with 2½"x10' shot at 3838' to 3848'. Cleaned out to 3888' and pumped in cement plug to 3888' using 20 sacks V.O.W. cement, treated with Konset, Hamer Process. Found top of cement at 3840'.

Dumped 6 sacks cement at 3840' - top at 3840'
" 14 " " " " " " 3838'
" 14 " " " 3838' " " 3828'

Bailed to 2185' and cleaned out to 3836'. The well was put on a pumping test but water was found not shut off.

The hole was cleaned out to 3825' and the 6¼" found bad at 3785'. A 3"x10' shot was exploded at 3815' to 3825' and the shot cavity cleaned out and filled with resin and steel shavings to 3822'. 12 sacks of cement was dumped at 3822' filling to 3781'. Bailing and production tests showed no fluid entering the well. The fluid level remaining at about 2900'.

The 6¼" casing was reperforated from 3650' to 3750' with 2 rows 1/4"x1/2"x7" centers (Baasch Ross) and washed with Torrance Perforating Co., washer under 700# pressure for two days. The well is now pumping, the average production being 28 bbl. - 19.3 gravity - 3.5% cut.

Date March 10, 1926. Title Agent.

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

Spudded on April 8, 1924, and cemented 12½" 45# D.B.X. casing at 907' on April 10, 1925, using 150 sacks V.O.W. cement, last 100 sacks treated, Perkins process. Drilled out cement on August 13, 1924 and made 12" rotary hole to 3671'.

8¼" 36# Youngstown casing was cemented at 3607' on May 3, 1924, using 350 sacks V.O.W. cement, last 100 sacks treated, Perkins Process. A bridge was pumped in while cementing from 3607' to 3627'. The fluid was bailed to 1200" and allowed to stand 4 hours for a casing test. No fluid entered. Hard cement was drilled out from 3594'. Fluid was bailed to 2000' and allowed to stand 19 hours. 27' entered. The shutoff was approved.

Hole was drilled to 3889' and 6¼" 26# Marke casing landed at 3889' including 276' of 60 mesh standard slotted. 3" tubing and packer were run and the well started flowing May 19, 1924.

Thirty days after completion the well flowed 135 bbl. - 18.3 gravity - 7.6% cut. (sand, mud and water)

Report on Proposed Operations

No. P-1-10322

Los Angeles, Cal. March 4, 1925

Mr. B. L. Cunningham

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to plug Well No. "HUB" 1,

Section 24, T. 4S, R. 14W, S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Feb. 21, 1925, received Feb. 24, 1925, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

RECORDS: The records are as stated in the notice quoted below.

THE NOTICE STATES:
"The present condition of the well is as follows:
Casing: 12½" cemented 907'
8¼" cemented 3607' W.S.O. approved
6¼" landed 3889' inc. 276' of 60 M Standard slotted - bad at 3665'.
Total depth - 3889'
This well was completed May 19th, 1924, with an initial production of 185 bbls. per day cutting 4.4%, on pump January 9th, 1925, and off production February 2, 1925.
Average daily production 60 bbls. cutting 40%.
Suspect bottom water."

PROPOSAL:
"The proposed work is as follows:
1. Roll out bad casing at 3665' and clean out to bottom at 3889'
2. Explode about 10# shot at 3875', clean out cavity and plug with cement.
3. Make pumping test."

RECOMMENDATION:
THE PROPOSAL AS QUOTED ABOVE IS APPROVED.

Nov. 26, 1929
Norris - Campbell
Abandonment.
C.O. to 3708' - Pipe bad at 3708'
Tools would not go below.
Plug underpres. to 3627'
shoot 3627' with 10' shot.
Plug 3607' witness,
Cont. 3587'
Pull 8¼" to 927'
Plug to 827' witness.
Cap & abandon. O.K.

Notice of Intention to Deepen, Redrill, Plug or Alter Casing in Well

This notice must be given fifteen days before work begins when possible

Los Angeles Cal. February 21st 1925.

MR. C. C. Thoms,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 17, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to commence the work of deepening, redrilling, plugging or altering casing at well number "Hub" 1

(Cross out unnecessary words)

, Sec. 24, T. 4-S, R. 14-W, S.B. B. & M.

Torrance Oil Field, Los Angeles County.

The present condition of the well is as follows:

CASING:

12½" cemented 907'
8¼" " 3607' W.S.O. approved
6¼" landed 3889' inc. 276' of 60 M Standard slotted - bad at 3665'.

TOTAL DEPTH -3889'

This well was completed May 19th, 1924, with an initial production of 185 bbls. per day cutting 4.4% on pump January 9th, 1925, and off production February 2, 1925. Average daily production 60 bbls. cutting 40%.

Suspect bottom water.

The proposed work is as follows:

1. Roll out bad casing at 3665' and clean out to bottom at 3889'

2 Explode about 10# shot at 3875', clean out cavity and plug with cement.

3 Make pumping test.

Report on Test of Water Shut-off

(BAILING)

No. T.-1-6251

Los Angeles Cal. June. 4, 1924

Mr. B. L. Cunningham

Los Angeles Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your well No. "HUB" 1, Section 24, T. 4S., R. 14W., S.B. B. & M.,

Torrance Oil Field, in Los Angeles County, was tested for

shut-off of water on May. 12, (Time and date) 1924 Mr. V. Austin,

designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present

Bruce Barkis, Engineer and L. M. Crane Superintendent.

Location of water tested above 3607' and normal fluid level x

Depth and manner of water shut-off: { 3607 ft. of 8¼ in. 36 lb. / ..... ft. of ..... in. ..... lb. } casing was { cemented / 5/3/24 landed } in sandy shale Formation

at 3607 ft. with 350 sacks Victor cement by Perkins method; 12" rotary (Size and kind) tools

were used in landing water string.

Casing record of well 12½" cemented 907'; 8¼" as above.

Reported total depth of hole 3672 ft. Hole bridged from 3607 ft. to 3627 ft. Hole cleaned out to 3614 ft. for this test.

At time of test depth of hole measured 3612 ft. and bailer brought up sample of sandy shale

At 6:30 p.m. May. 11, 1924 (Time and date) oil bailed to x ft., water bailed to 2000 ft.

At 1:30 p.m. May. 12, 1924 (Time and date) top of oil found at x ft., top of water found at 1973 ft.

Result of bailing test:

MR. BRUCE BARKIS REPORTED:

1. A cement bridge was placed in the hole from 3607' to 3627' before running the 8¼" casing.
2. No fluid entered the well when bailed to 1200' and allowed to set 4 hr. for a casing test.
3. In drilling ahead for test 13' of set cement was found inside the 8¼" casing.

THE INSPECTOR NOTED:

1. The fluid level rose 27' in 19 hr. (equivalent to 2.1 bbl. in 24 hr.)
2. The fluid showed a small amount of gas and oil colors.

THE SHUT OFF IS APPROVED.

cc—J. C. Anderson

Deputy State Oil and Gas Supervisor
Los Angeles, Cal.

DEAR SIR:

In compliance with Section 19, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to test the shut-off of water in well number "Hub" No. 1, Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County, on the 10th. day of May 1924

8¼" inch 36 lb. casing was ~~landed~~/cemented in sticky shale (Formation) at 3620' (Depth)

on May 3, (Date) 1924

350 sacks Victor (Kind) ~~M~~ cement were used. -Treated with McDuffie's re-agent (Last 100 sacks)

The Perkins method was used in placing the cement.

Fluid level will be bailed to a depth of 2000 feet and left undisturbed for at least 12 hours before your inspection.

The well is 3671 feet deep. There is/~~was~~ a plug or bridge from 3620 feet to 3640 feet.

Drilled to 3671' in error

Pumped in cement plug 3640' to 3620' through casing while cementing.

Respectfully yours,

PAN AMERICAN PETROLEUM COMPANY
(Name of Company or Operator)

DEPARTMENT OF PETROLEUM AND GAS

Report on Proposed Operations

No. P -1-8352

Los Angeles Cal. April. 8. 1924

Mr. B. L. Cunningham

Los Angeles Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to drill Well No. "HUB" 1,

Section 24, T. 4 S., R. 14 W. S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Mar. 24., 1924, received Mar. 25., 1924, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:

"The well is 154' N. from S. property line and 100' W. from E. property line.
The elevation of the derrick floor above sea level is 60'.
We estimate that the first productive oil or gas sand should be encountered at a depth of about 3650', more or less."

PROPOSAL:

"We propose to use the following strings of casing either cementing or landing them as here indicated:

SIZE OF CASING	WT. LB. PER FT.	NEW OR 2ND HAND	DEPTH	LANDED OR CEMENTED
12½"	55	New	500'	Cemented
8¼"	36	"	3620'	"
6¼"	26	"	3900'	Landed

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing."

RECOMMENDATION:

We estimate that the formations open to production in this area should be encountered at a depth of 3610' - 3620'.

THE PROPOSAL IS APPROVED.

Kindly notify this Department to witness a bailing test of the 8¼" shut-off.

cc--J. C. Anderson

NOTICE OF INTENTION TO DRILL NEW WELL

This notice must be given before drilling begins

037-17111

Atlantic Richfield Co. Los Angeles, Cal. March 24, 1924

Mr. C. C. Thoms,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

Dear Sir:

In compliance with Section 17, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to commence the work of drilling well number "Hub" 1 Section 24 T. 4S R. 14W, S.B. B. & M., Torrance Oil Field, Los Angeles County.

The well is 154 feet N. ~~or S.~~, and 100 feet ~~E. or~~ W. from from S. property line E. property line

(Give location in distance from section corners or other corners of legal subdivision)

The elevation of the derrick floor above sea level is 60 feet.

We propose to use the following strings of casing either cementing or landing them as here indicated:

Size of Casing, Inches	Weight, Lb. Per Foot	New or Second Hand	Depth	Landed or Cemented
12½"	55#	New	500	Cemented
8¼"	36#	New	3620'	Cemented O K
6½"	26#	New	3900	Landed

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing.

We estimate that the first productive oil or gas sand should be encountered at a depth of about 3650 feet, more or less.

Respectfully yours,

LOG OF OIL OR GAS WELL

FIELD Torrance COMPANY Pan American Petroleum Company

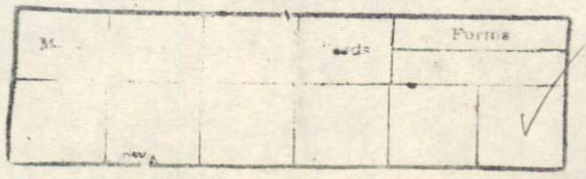
Sec. 24, T. 4-S, R. 14-W, S.B. B. & M., Well No. "Hub" 2

In compliance with the provisions of Chapter 718, Statutes 1915, as amended, the information given herewith is a complete and correct record of all work done on the well since the previous record, dated March 10, 1926, was filed.

SIGNED J. L. Campbell

Date April 21, 1930. Title Resident Engineer

(President, Secretary or Agent)



On April 2, 1930, the hole was cleaned out to 3860' and 45 sacks of cement was dumped, applying 450 to 500# pressure after each stage. The cement was located at 3635'. The 6-5/8" liner was shot at 3635' with a 3" x 10' - 30# shot. The cavity was cleaned to 3635' and 4 sacks was dumped.

The Division of Oil and Gas approved the plug at 3619'. Report #T-1-20753. Six sacks of cement was dumped at 3619', filling to 3596'.

The 8-1/4" casing was shot and pulled from 2482' and the stub was plugged with a wood plug and 10 sacks of cement filling to 2460'. The 10" casing was shot at 800' to 810' with a 4" x 10' - 30# shot. The cavity was cleaned to 810' and plugged with 31 sacks of cement. On April 9, the Division of Oil and Gas approved the plug at 790'. Report #T-1-20752. Five sacks of cement was dumped at 790', filling to 780'. The 10" casing was shot and pulled from 750' and the stub was plugged with 41 sacks of cement, filling to 712'.

The hole was filled with heavy mud, cap at the surface and abandoned.

Special Report on Operations Witnessed

No. T-1-20752

Los Angeles Cal. April 21, 1930.

Mr. L. E. Porter,
Los Angeles, Cal.

121

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Operations at your well No. "HUB" 2 Section 24, T. 4-S., R. 14-W., S.B. B. & M., Torrance Oil Field, in Los Angeles County, were witnessed by Edward J. Kaplow, representative of the supervisor, on April 9, 1930. There was also present F. L. Campbell, Engineer, and J. Bush, Driller.

Casing Record 15½" cem. 800'; 10" cem. 3620', drilled thru at 3416'; 8¼" cem. 3615', shot & pulled from 2482'; 6¼" liner ldd. 3860', top at 3498', perf. 3625'-3860'. T.D. present hole 3860'. Plugged with cement 3860'-3596', 2482'-2460', 810'-790'. T.D. original hole 3880'. *(See below)

The operations were performed for the purpose of testing the location and hardness of a cement plug proposed to be placed from 820' to 780' in the process of abandonment.

and the data and conclusions are as follows:

*Casing record continued: Junk Sidetracked: 10" csg. 3416'-3620'; 8¼" csg. 3416'-3880'; 6¼" csg. 3700'-3880'.

MR. CAMPBELL REPORTED THE FOLLOWING:

1. The hole was cleaned out to 3619'.
2. On April 4, 1930, 6 sacks of Santa Cruz cement was dumped at 3619'.
3. The top of the cement was found at 3596'.
4. The 8¼" casing was shot and pulled from 2482'.
5. On April 7, 1930, 10 sacks of Santa Cruz cement was dumped on a wooden plug at 2482'.
6. The top of the cement was found at 2460'.
7. The 10" casing was shot from 810'-820' with one 4"x10' shot containing 30 lb. of 80% gelatin.
8. The hole was cleaned out to 810'.
9. On April 8, 1930, 31 sacks of cement was dumped at 810'. The top of the cement was found at 790'.
10. The plug will be continued to 780'.

THE INSPECTOR NOTED THAT the bailer could not be spudded below 790' and brought up a sample of set cement.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT 790' ARE APPROVED.

Report on Proposed Operations

No. P-1-20961

Los Angeles, Cal. November 30, 1929.

MR. D. R. Thompson, 121

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to abandon Well No. "HUB" 2,

Section 24, T. 4-S., R. 14-W., S. B. B. & M., Torrance Oil Field, Los Angeles County,

dated Nov. 26, 1929, received Nov. 29, 1929, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

Records in addition to or at variance with those shown in the notice:

Total depth old hole 3880'
Total depth present hole 3860'
The 8¼" shut-off was approved.
Production reports on file in this office show this well produced 13 days in September 1928 at the average daily rate of 13 bbl. of oil and 11.3 bbl. of water.

THE NOTICE STATES:

"The present condition of the well is as follows: (Confirming conversation Norris-Campbell)
15½" cem. 800'
10" cem. 3620', drilled thru at 3416'
8¼" cem. 3615'
6¼" liner 3498'-3860', perf. 3625'-3860'.
Sidetracked junk: 10" casing 3416'-3620', 8¼" casing 3416'-3880',
6¼" casing 3700'-3880'."

PROPOSAL:

"The proposed work is as follows:
1. Clean out to 3860'; plug w/c under pressure to 3635'; shoot with a 10' shot; clean out shot cavity, plug with cement to 3615' and call you to witness.
2. Continue the plug to 3595'.
3. Pull the 8¼" above 3595' and cap with 20' of cement.
4. Pull, rip or shoot the 10" at 820', plug with cement to 780', and call you to witness.
5. Cap at surface and abandon."

DECISION:

THE PROPOSAL IS APPROVED PROVIDED THAT:

1. The cement plug from 3860' to 3635' shall be placed under a minimum pressure of 500 lb.
2. THIS DIVISION SHALL BE NOTIFIED TO WITNESS the location and hardness of cement plugs at 3615' and 780'.

Notice of Intention to Abandon Well

This notice must be given at least five days before work is to begin

Long Beach, Cal. November 26, 1929

MR. E. Huguenin,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 16, Chapter 718, Statutes of 1915, as amended; notice is hereby given that it is our intention to abandon well No. Hub #2, Sec. 24, T. 4-S R. 14-W, S.B. B. & M., Torrance Oil Field, Los Angeles County, commencing work on the 1 day of December 1929

The present condition of the well is as follows: (Confirming conversation Norris-Campbell)

15½" cem. 800'
10" cem. 3620', drilled thru at 3416'
8¼" cem. 3615'
6¼" liner 3498'-3860', perf. 3625'-3860'

Sidetracked junk: 10" casing 3416'-3620', 8¼" casing 3416'-3880', 6¼" casing 3700'-3880'.

The proposed work is as follows:

1. Clean out to 3860'; plug w/c under pressure to 3635'; shoot with a 10' shot; clean out shot cavity, plug with cement to 3615' and call you to witness.
2. Continue the plug to 3595'.
3. Pull the 8¼" above 3595' and cap with 20' of cement.
4. Pull, rip or shoot the 10" at 820', plug with cement to 780', and call you to witness.
5. Cap at surface and abandon.

Respectfully yours

Report on Test of Water Shut-off

(BAILING)

No. T -1-9124

Los Angeles Cal. Sept. 3 1925

Mr. B. L. Cunningham

Los Angeles Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your well No. "HUB" 2, Sec. 24, T. 4 S, R. 14 W, S.B. B. & M.,

Torrance Oil Field, in Los Angeles County, was tested for

shut-off of water on Aug. 17 (Time and date), 1925 Mr. F. A. Graser,

designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present

Bruce Barkis, Engineer and L. M. Crans, Supt.

Location of water tested above 3615' and normal fluid level not reported

Depth and manner of water shut-off: { 3615 ft. of 8¼ in. 36 lb. / ft. of in. lb. } casing was { cemented 8/9/25 / landed } in sticky shale (Formation)

at 3615 ft. with 100 sacks Victor cement by Perkins method; 9¾" rotary (Size and kind) tools

all treated with quick setting chemical were used in landing water string.

Casing record of well 15½" cem. 800';10" cem. 3620',W.S.O., bad 3419' and 3509', sidetracked from 3416';8¼" as above. Junk: 10" sidetracked 3416-3620' as above;8¼" perforated(see below) New hole drilled to 3622'

Reported total depth of hole 3880 ft. Hole bridged from - ft. to - ft. Hole cleaned out to 3622 ft. for this test.

At time of test depth of hole measured 3625 ft. and bailer brought up sample of brown shale

At 12 noon Aug. 16, 1925 (Time and date), oil bailed to - ft., water bailed to 2000 ft.

At 1:15 p.m. Aug. 17, 1925 (Time and date), top of oil found at - ft., top of water found at 1993 ft.

Result of bailing test: Casing record: 3880-3625', sidetracked 3416-3880', heaving plug at 3700'; 6¼" perforated inside of 8¼", 3700-3880'.

MR. BARKIS REPORTED THE FOLLOWING:

1. The 8¼" was cut and pulled from 3416' and sidetracked to 3600'.
2. The sidetracked 8¼" and 10" casings were not plugged with cement under pressure and no fluid could be pumped away under 350# pressure.
3. The hole was shot at 3600' with a 50# 80% gelatin shot. Again no fluid could be forced away under 350# pressure.
4. No fluid entered the well when bailed to 1800' and allowed to stand 5 hr. for casing test.
5. 14' of set cement was drilled out of the 8¼" casing.

THE INSPECTOR NOTED THE FOLLOWING:

1. The fluid level rose 7' in 25½ hr. (equivalent to 0.4 bbl. per 24 hr.)

THE SHUT OFF IS APPROVED.

Nov. 26, 1929
C.O. to 3860'
Plug under pres. to 3635'
shoot 10' shot at 3635'
Plug 3615 witness
Cont. plug 20'
Pull, rip or shoot 8¼" at 820'
Plug to 780' witness
cap & abandon O.K.

Notice of Test of Water Shut-off

This notice must be given at least five days before the test, and a longer time is desirable

Los Angeles Cal. August 11th 1925.

MR. E. Huguenin,
Deputy State Oil and Gas Supervisor

Los Angeles Cal.

DEAR SIR:

In compliance with Section 19, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to test the shut-off of water in well number "HUB" 2, Sec. 24, T. 4-S, R. 14-W, S.B. B. & M., ~~Inglewood~~ Torrance Oil Field, Los Angeles County, on the 17th day of August 1925 8¼ inch 36 lb. D.B.X. casing was ~~landed~~/cemented in tough shale (Formation) at 3620' (Depth) on August 9th (Date) 1925

100 sacks Victor (Kind) of cement were used. All treated with McDuffie's reagent.

The Perkins method was used in placing cement.

Fluid level will be bailed to a depth of 2000 feet and left undisturbed for at least 12 hours before your inspection. Redrilled from 3420'

The well is 3880 feet deep. There is/~~is not~~ a plug or bridge from 0 feet to 3620 feet.

The 8¼" string carried 198'8" new D.B.X. casing with turned down collars on the bottom - balance was second hand.

Final pump pressure was 550 lbs. per square inch.

Respectfully yours,

PAN AMERICAN PETROLEUM COMPANY

CALIFORNIA STATE MINING BUREAU

DEPARTMENT OF PETROLEUM AND GAS

Report on Proposed Operations

No. P.-1-11224

Los Angeles, Cal. July 16, 1925

Mr. R. L. Cunningham

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your water string proposal to redrill oil and / Well No. "HUB" 2,

Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated July 11, 1925, received July 11, 1925, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

RECORDS: The 10" shut-off was approved.
" 8½" casing is perforated from 3880' to 3625'.
" 6½" " " all perforated.
Otherwise the records are as stated in the notice.

THE NOTICE STATES:
"The new conditions are as follows:
Casing: 15½" cemented 800'.
10" cemented 3620' bad at 3419' and 3509'.
8½" landed 3880'
6½" liner landed 3880' top at 3700'.
Total depth: 3880'.
Cut and pulled 6½" liner from 3700', set 8½" heaving plug at 3700' and bailed well to 3000' showing very little oil and gas. When bailed to 3000' the 8½" casing went bad at 3419'. Rolled the 8½" casing out to 3422' and went outside the pipe showing formation at 3422'."

PROPOSAL:
"We now propose
1. Cut and pull 8½" casing from 3415'.
2. Pump in cement plug under pressure through 4" drill pipe hanging at 3415' to plug top of fish.
3. Redrill with 9½" bit sidetracking to 3600', explode 40 lb. shot at 3600' and sidetrack to 3620'.
4. Run 8½" casing and cement at 3620' to shut off water.
5. Drill ahead to 3880' and land 6½" oil string on bottom at 3880', and put well on production.

RECOMMENDATION:
THE PROPOSAL AS QUOTED ABOVE IS APPROVED.

Kindly notify this department to witness a bailing test of the 8½" shut-off.

cc--J. C. Anderson

SUPPLEMENTARY NOTICE

Los Angeles, Cal. July 11th, 1925.

MR. C. C. Thoms,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

Please be advised that our notice to you dated June 10th, 1925,

stating our intention to Redrill (Drill, deepen, redrill, abandon) well number "HUB" 2,

Sec. 24, T. 4-S, R. 14-W, S.B. B. & M. Torrance Oil Field,

Los Angeles County, must be amended on account of changed or recently discovered conditions.

The new conditions are as follows:

CASING:
15½" cemented 800'
10" " 3620' bad at 3419' and 3509'
8¼" landed 3880'
6¼" liner landed 3880' top at 3700'

TOTAL DEPTH: 3880'

Cut and pulled 6¼" liner from 3700', set 8¼" heaving plug at 3700' and bailed well to 3000' showing very little oil and gas. When bailed to 3000' the 8¼" casing went bad at 3419'.
Rolled the 8¼" casing out to 3422' and went outside the pipe showing formation at 3422'.

We now propose

1. Cut and pull 8¼" casing from 3415'.
2. Pump in cement plug under pressure through 4" drill pipe hanging at 3415' to plug top of fish.
3. Redrill with 9½" bit sidetracking to 3600', explode 40 lb. shot at 3600' and sidetrack to 3620'.
4. Run 8¼" casing and cement at 3620' to shut off water.
5. Drill ahead to 3880' and land 6¼" oilstring on bottom at 3880', and put well on production.

Respectfully yours,

Report on Proposed Operations

No. P 1-11014

Los Angeles, Cal. June 15, 1925

Mr. B. L. Cunningham

Los Angeles, Cal.

Agent for PAN-AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to alter casing Well No. "HUB" 2, Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County, dated June 10, 1925, received June 11, 1925, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

RECORDS: The condition of the well is as stated in the notice.

THE NOTICE STATES:
"The present condition of the well is as follows:
CASING: 15½" cemented 800'
10" " 3620' W.S.O.
8¼" landed 3880' has 255' of 60 mesh standard slotted on bottom.
TOTAL DEPTH 3880'
The 8¼" casing went bad at 3540', rolled it out and set 382' of 6¼" liner bottom 277' perforated inside of 8¼" oilstring top of liner 3498'. Lost two 3" bailers in hole tops at 3627' and 3449' with casings now bad at 3509'.
The last production from this well was in April 1925 when it averaged 20 bbls. of oil and one barrel of water per day for 26 days."

PROPOSAL:
"The proposed work is as follows:
1. Wash over and fish out bailer with top at 3449'.
2. Roll out bad casing at 3509' and cut and pull such joints from top of 6¼" liner as we can.
3. File supplementary notice dependent on conditions below 3509'."

RECOMMENDATION:
THE PROPOSAL IS APPROVED.

Report on Proposed Operations

No. P -1-10344

Los Angeles, Cal. March 12, 1925

Mr. B. L. Cunningham

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to alter casing Well No. "HUB" 2,

Section 24, T. 4S, R. 14W, S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Mar. 2, 1925, received Mar. 3, 1925, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

RECORDS: The records are as stated in the notice quoted below.

THE NOTICE STATES:
"The present condition of the well is as follows:
Casing: 15½" cemented 800'
10" cemented 3620' Water shut off
8¼" landed 3880' inc. 256' of 60 M. S. S. on bottom
Total depth - 3880'
The last production of this well was in January 1925, when it made 2140 bbls. of oil and 73 bbls. of water in 30 days. Off production on January 31, 1925, found well sanded up to 2600', clean out to 3535' and found 8¼" casing bad at that depth. Rolled casing out with bob tailed rotary and cleaned out to bottom."

PROPOSAL:
"The proposed work is as follows:
1. Set about 400' of 6½" perforated liner on bottom to reinforce bad 8¼" oil string.
2. Make pumping test and if well shows an excessive amount of water will file supplemental notice."

RECOMMENDATION:
THE PROPOSAL AS QUOTED ABOVE IS APPROVED.

CALIFORNIA STATE MINING BUREAU
DEPARTMENT OF PETROLEUM AND GAS

Report on Test of Water Shut-off
(BAILING)

No. T-1-7132

Los Angeles, Cal. July 12, 1924

Mr. B. L. Cunningham,
Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your well No. "HUB" 2, Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, in Los Angeles County, was tested for shut-off of water on June 27, (Time and date) 1924 Mr. V. Austin, designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present Bruce Barkis, Engineer and Joe Milles, Driller.

Location of water tested above 3620' and normal fluid level unknown

Depth and manner of water shut-off: { 3620 ft. of 10 in. 45 lb. / ____ ft. of ____ in. ____ lb. } casing was {cemented / landed} 6/19/24 in brown shale (Formation)

at 3620 ft. with 350/ last 100 treated sacks Victor cement by Perkins method; 15" rotary (Size and kind) tools were used in landing water string.

Casing record of well 15½" cemented 800'; 10" as above.

Reported total depth of hole 3625 ft. Hole bridged from -- ft. to -- ft. Hole cleaned out to 3625 ft. for this test.

At time of test depth of hole measured 3625 ft. and bailer brought up sample of brown shale

At 2:00 a.m. June 27, 1924 (Time and date) oil bailed to -- ft., ~~water~~ mud fluid bailed to 1800 ft.

At 3:00 p.m. June 27, 1924 (Time and date) top of oil found at -- ft., top of ~~water~~ mud fluid found at 1795 ft.

Result of bailing test:

MR. BARKIS REPORTED:

1. No fluid entered the well when bailed to 1200' and allowed to stand 4 hr. for casing test.
2. In drilling ahead for test, 15' of set cement was found inside the 10" casing.

THE INSPECTOR NOTED:

1. The fluid level rose 5' in 13 hr. (equivalent to .8 bbl. in 24 hr.)
2. The fluid samples were as follows:
   Top - light mud fluid.
   Bottom - heavy mud fluid.

THE SHUT-OFF IS APPROVED.

CC—J. C. Anderson

CALIFORNIA STATE MINING BUREAU RECEIVED JUN 23 1924 Department of Petroleum and Gas LOS ANGELES, CALIFORNIA.

Notice of Test of Water Shut-off

This notice must be given at least five days before the test, and a longer time is desirable.

Los Angeles, Cal. June 23, 1924

MR. C. C. Thoms,
Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 19, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to test the shut-off of water in well number "Hub" 2, Section 24, T. 4 S., R. 14 W., S.B. B. & M., TORRANCE Oil Field, Los Angeles County, on the 26th day of June 1924

10 inch 45 lb. casing was ~~landed~~ cemented in tough shale (Formation) at 3620' (Depth)

on June 19, 1924 (Date)

350 sacks Victor (Kind) of cement were used. Last 100 sacks treated with McDuffie's re-agent.

The Perkins method was used in placing the cement.

Fluid level will be bailed to a depth of 1800 feet and left undisturbed for at least 12 hours before your inspection.

The well is 3620 feet deep. There ~~is~~/is not a plug or bridge from 0 feet to 3620 feet.

Closed in under 550 lbs. pressure.

CALIFORNIA STATE MINING BUREAU

DEPARTMENT OF PETROLEUM AND GAS

Report on Proposed Operations

No. P-1-8744

Los Angeles, Cal. June. 2. 1924

Mr. B. L. Cunningham

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to drill Well No. "HUB" 2,

Section 24, T. 4S., R. 14W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated May. 19., 1924., received May. 20., 1924., has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:
"The well is 150' S. and 100' W. from N.E. property corner.
The elevation of the derrick floor above sea level is 61.4'.
We estimate that the first productive oil or gas sand should be encountered at a depth of about 3635', more or less."

PROPOSAL:
"We propose to use the following strings of casing either cementing or landing them as here indicated:

SIZE OF CASING	WT. LB. PER FT.	NEW OR 2ND HAND	DEPTH	LANDED OR CEMENTED
12½"	55	New	500'	Cemented
8¼"	36	"	3620'	"
6¼"	26	"	3890'	Landed

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing."

RECOMMENDATION:
We estimate that the formations open to production in this area, should be encountered at a depth of about 3620' at this location.

YOUR PROPOSAL IS APPROVED.

Kindly notify this Department to witness a bailing test of the 8¼" shut-off.

cc--J. C. Anderson

1310 Manuel Ave.,
Torrance, Calif.
March 10, 1953.

Division of Oil & Gas,
Los Angeles, Calif.

Gentlemen:

This is to notify you that as of this date I have assigned my Oil and Gas lease on the Sloan No. 1 well to Ernest Z. Lopp,
Box 325,
Lomita, California.

Yours truly

Edward Pietzschke

Edward Pietzschke

629 South Hill Street
Los Angeles, California
January 24, 1935.

Mr. R. D. Bush,
State Oil and Gas Supervisor,
San Francisco, Calif.

Dear Sir:

The following wells in the Torrance oil field were taken over by Edward Pietzschke from Ed Pietzschke and J. D. Phalen, as of December 20, 1934:

No.	"Meacham" 1,	Sec.	15,	T. 4 S.,	R. 14 W.
"	"Sloan" 1,	Sec.	24,	"	"
"	"Thomas" 1,	"	"	"	"
"	"Thomas" 2,	"	"	"	"

This information was contained in letters received from J. D. Phalen and Ed Pietzschke, dated January 17 and January 19, 1935, respectively. Our records are being changed accordingly.

Request for designation of agent for Los Angeles County should be addressed to Edward Pietzschke, Route 1, Box 206, Torrance, Calif.

Yours truly,

E. Huguenin

Deputy Supervisor.

RMP:EMS

629 South Hill Street
Los Angeles, California
January 8, 1935.

Mr. Ed Pietzschke,
Route 1, Box 206,
Torrance, Calif.

Dear Sir:

This will acknowledge receipt of your card received on January 2, 1935, in which you advise this Division that J. D. Phalen has assigned all his right, title and interest in the following wells to Edw Pietzschke, as of January 1, 1935:

No. "Meacham" 1, Sec. 15, T. 4 S., R. 14 W.
No. "Sloan" 1, Sec. 24, T. 4 S., R. 14 W.
No. "Thomas" 1, Sec. 24, T. 4 S., R. 14 W.
No. "Thomas" 2, Sec. 24, T. 4 S., R. 14 W.,

all in the Torrance oil field.

Before our records can be changed to your name confirmation of this transfer to you and the effective date thereof must be obtained from Mr. Phalen.

I note that your new mailing address is Route 1, Box 206, Torrance.

Yours truly,

E. Huguenin

Deputy Supervisor.

629 South Hill Street,
Los Angeles, California.

Dear Sir:

This letter corrects our letter to you of April 21, 1933, regarding the quitclaiming of the Pan American Petroleum Company Sloan Lease in the Torrance Field. This lease was quitclaimed to the present owners of record, as follows:

Lila J. Miller, 314 N. 2nd St., Yakima, Washington.
A. P. Summy, 609 Jergins Trust Bldg., Long Beach, Cal.
Otto G. Wildey, 301 Edwards & Wildey Bldg., Los Angeles, Cal.
Lillie E. Adams, 219 S. Highland, Los Angeles, Cal.
G. F. Sloan and Minnie E. Sloan, 219 S. Highland, Cal.

The well and equipment has by bill of sale passed to Edward Pietzschke and James D. Phalen, 860 Cedar Avenue, Hawthorne, California.

The lease is described as follows:

The South One (1) Acre of the East Two (2) Acres of the West Three (3) Acres of that portion of Lot Two (2) of the "750 Acre Tract of Maria Machado de Rocha", Book 6, Page 161, Miscellaneous Records, described as follows: Beginning at the Southeast corner of said lot; thence North along the East line thereof to a point distant 1056 feet South from the Northeast corner of said lot; thence West parallel with the North line of said lot 432.96 feet; thence South parallel with the East line of said lot to the Southwesterly line thereof; thence Southeasterly along said Southwesterly line to the place of beginning; Reserving the right of way for ingress and egress over and across the West 20 feet to said property.

Report on Proposed Operations

No. P-1-24627

Los Angeles, Cal. September 23, 1932.

MR. J. D. Phalen,
Hawthorne, Cal.
xAgent for ED. PIETZSCHKE & J. D. PHALEN xCompanyxx

DEAR SIR:

Your proposal to redrill oil string Well No. "SLOAN" 1,
Section 24, T4 S., R.14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County,
dated Sept. 19, 1932, received Sept. 22, 1932, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

Records in addition to, or at variance with those shown in the notice:
Production: The last production reported from this well was during 12 days in October, 1929, when the daily average yield was 7.3 bbl. of oil and less than 1.0 bbl. of water.

THE NOTICE STATES:
"The present condition of the well is as follows:
Total depth 3890'.
12½" cemented 892'
8¼" cemented 3610, W.S.O.
6¼" landed 3890', perf. 3626'-3890', bad at 3670'. Cannot get a 2" bailer below 3670'."

PROPOSAL:
"The proposed work is as follows:
To clean out to 3670', & pull 6¼" from as low below 3610' as possible. Will plug top of 6¼" stub, if possible. Redrill with cable tools to 3890' & land a new 6¼" liner and place well on production."

DECISION:
THE PROPOSAL IS APPROVED.

NOTE: A complete report, in duplicate, on our form 102 should be filed with this Division after completion of the above work.

Notice of Intention to Deepen, Redrill, Plug or Alter Casing in Well

This notice must be given fifteen days before work begins when possible

Los Angeles Cal. Sept 19 1932

MR. E. Huguenin

Deputy State Oil and Gas Supervisor

Los Angeles Cal.

DEAR SIR:

In compliance with Section 17, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to commence the work of ~~deepening~~, redrilling, ~~plugging or altering~~ oil string casing at well No. "Sloan" 1
(Cross out unnecessary words)

, Sec. 24, T. 4S., R. 14~~W~~E, SB B. & M.

Torrance Oil Field, L. A. County.

The present condition of the well is as follows:

Total depth 3890'.
12½" cemented 892'.
8¼" cemented 3610, W.S.O.
6¼" landed 3890', perf. 3626-3890', bad at 3670'
cannot get a 2" bailer below 3670'.

The proposed work is as follows:

To clean out to 3670', & pull 6¼" from as low below 3610' as possible. Will plug top of 6¼" stub if possible. Redrill with cable tools to 3890' & land a new 6¼" liner and place well on production.

HISTORY OF OIL OR GAS WELL

FIELD Torrance COMPANY PAN AMERICAN PETROLEUM COMPANY

Township 4-S., *Range* 14-W., *Section* 24, *Number of well* "SLOAN" 1

Signed J. M. Garatt

Date March 12, 1926. Title Agent.
(*President, Secretary or Agent*)

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

Spudded on March 29, 1924. Drilled to and cemented 12½" 45# D.B.X. casing at 892' on March 31, 1924, using 350 sacks V.O.W. cement, all treated, Perkins Process. Drilled plugs out from 878' on April 2, 1924 and made hole to 3610'.

8½" 36# D.B.X. casing was cemented at 3610' on April 24, 1924, using 350 sacks V.O.W. cement, last 100 sacks treated, Perkins Process. Fluid was bailed to 1200' for a casing test and after standing 4 hours showed no rise. Hard cement was drilled out from 3594' and hole made to 3615'. Fluid was bailed to 1800' and allowed to stand 19 hours for test. No fluid entered. The shut-off was approved.

Hole was drilled to 3890' and 6¼" 26# Marks casing landed at 3890'; including 264' of 60 Mesh Standard slotted. 3" tubing was run and the well swabbed in on May 8, 1924.

Thirty days after completion the well flowed 265 bbl. - 19.7 gravity - 2.4 cut.

CALIFORNIA STATE MINING BUREAU

DEPARTMENT OF PETROLEUM AND GAS

Report on Test of Water Shut-off

(BAILING)

No. T. -1-6879

Los Angeles, Cal. May, 21, 1924

Mr. B. L. Cunningham

Los Angeles, Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your well No. "SLOAN" 1, Section 24, T. 4S., R. 14W., S.B. B. & M., Torrance Oil Field, in Los Angeles County, was tested for shut-off of water on May, 1, (Time and date), 1924 Mr. A. J. Mason, designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present L. M. Crans, Superintendent and Bruce Barkis, Engineer.

Location of water tested above 3610' and normal fluid level x

Depth and manner of water shut-off: 3610 ft. of 8¼ in. 36 lb. / last 100 ft. of treated in. lb. casing was cemented 4/24/24 / landed in brown shale (Formation) at 3610 ft. with 350 sacks / Victor cement by Perkins method / 12" rotary (Size and kind) tools were used in landing water string. 500# pressure

Casing record of well 12½" cemented 892'; 8¼" as above.

Reported total depth of hole 3615 ft. Hole bridged from x ft. to x ft. Hole cleaned out to 3615 ft. for this test.

At time of test depth of hole measured 3613 ft. and bailer brought up sample of hard shale

At 7:30 p.m. April, 30, 1924 (Time and date) oil bailed to no oil ft., water bailed to 1800 ft.

At 2:30 p.m. May, 1, 1924 (Time and date) top of oil found at no oil ft., top of water found at 1800 ft.

Result of bailing test:

MR. BARKIS REPORTED:

1. When bailed to 1200' for a casing test, no fluid entered the well in 4 hr.
2. The top of the hard cement was found 16' above the shoe.

The Inspector noted that the fluid remained unchanged after standing bailed to 1800' for 19 hr.

THE SHUT-OFF IS APPROVED.

Notice of Test of Water Shut-off

This notice must be given at least five days before the test, and a longer time is desirable.

Los Angeles, Cal. April 26, 1924

MR. C. C. Thoms,
Deputy State Oil and Gas Supervisor
Los Angeles, Cal.

DEAR SIR:

In compliance with Section 19, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to test the shut-off of water in well number "Sloan" 1, Section 24, T. 4 S., R. 14 W., S.B. B. & M., TORRANCE Oil Field, Los Angeles County, on the 1st. day of May 1924.

8¼" inch 36 lb. casing was ~~landed~~ cemented in brown shale (Formation) at 3610' (Depth)

on April 24, 1924 (Date)

350 sacks Victor (Kind) ~~xx~~ cement were used. Last 100 sacks treated.

The Perkins method was used in placing the cement.

Fluid level will be bailed to a depth of 2000 feet and left undisturbed for at least 12 hours before your inspection.

The well is 3610 feet deep. There ~~is~~ is not a plug or bridge from 0 feet to 3610 feet.

Respectfully yours,

Report on Proposed Operations

No. P-1-8364

Los Angeles, Cal. April. 9. 1924

Mr. B. L. Cunningham

Los Angeles Cal.

Agent for PAN AMERICAN PETROLEUM Company

DEAR SIR:

Your proposal to drill Well No. "SLOAN" 1,

Section 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Mar. 24., 1924, received Mar. 25., 1924, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:
"The well is 154' N. from S. property line and 50' W. from E. property line.
The elevation of the derrick floor above sea level is 61.45'.
We estimate that the first productive oil or gas sand should be encountered at a depth of about 3650', more or less."

PROPOSAL:
"We propose to use the following strings of casing either cementing or landing them as here indicated:

SIZE OF CASING	WT. LB. PER FT.	NEW OR 2ND HAND	DEPTH	LANDED OR CEMENTED
12½"	55	New	500'	Cemented
8¼"	36	"	2620'	"
6¼"	26	"	3900'	Landed

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing."

RECOMMENDATION:
According to our estimates the proposed shut-off depth will be in stratigraphic uniformity with the shut-offs in nearby wells.

THE PROPOSAL IS APPROVED.

Kindly notify this Department to witness a bailing test of the 8¼" shut-off.

cc--J. C. Anderson

R. D. BUSH,
State Oil and Gas Supervisor

COILLIER INVESTMENT INC.

Los Angeles, Cal. March 24, 1924

Mr. C. C. Thoms,

Deputy State Oil and Gas Supervisor

Los Angeles Cal.

DEAR SIR:

In compliance with Section 17, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to commence the work of drilling well number "Sloan" 1 Section 24 T. 4S R. ~~14W~~, S.B. B. & M.,

Torrance Oil Field, Los Angeles County.

The well is 154 feet ~~N~~ from S. property line., and 50 feet ~~E~~ W. from E. property line

(Give location in distance from section corners or other corners of legal subdivision)

The elevation of the derrick floor above sea level is 61.45 feet.

We propose to use the following strings of casing either cementing or landing them as here indicated:

Size of Casing, Inches	Weight, Lb. Per Foot	New or Second Hand	Depth	Landed or Cemented
12½"	55	New	500	Cemented
8¼"	36	New	2620'	Cemented
6¼"	26#	New	3900'	Landed

3620 OK

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing.

We estimate that the first productive oil or gas sand should be encountered at a depth of about 3650' feet, more or less.

Respectfully yours,

Mr. Chen – as promised – please find attached the site plan for our project – which now includes the surveyed location coordinates of the oil wells, in NAD83 Lat./Long. format to six decimal degrees. Let me know if this is what you were looking for.

I have made contact with both LA City and LA County with regards to witnessing a preliminary leak test at this stage. I'm waiting to hear back from them. If a leak test is scheduled with either of the agencies – I will immediately give you advance notice so you can put it on your calendar.

I will look forward to hearing from within the next week in regards to our Construction Site Plan Review. I plan to get you the one (1) missing plan checker contact information for the City of LA later this week – once the plan checker is assigned to our project. Per my email below - sent on Thursday, June 21st – you have all the other contacts for LA City & LA County. I have made on correction on the contact info I had sent you. Jennifer Boscoe is with LA City and not LA County. I have corrected this below.

Thanks for all your help on this.

Thanks Mr. Chen for responding. I appreciate it as I know you are busy. Here are some answers and information to certain points within your email:

1. **Leak Test** - I will call both my LA County & LA City Fire Department contacts with regards to the leak test – since we have an oil well within each jurisdiction. I will ask them if they require a leak test at this stage

Date March 21, 1951

REPORT OF PROPERTY AND WELL TRANSFER

Former Owner: Continental Exploration Company

Description and list of wells: "Bluemle" 1, "Bluemle" 4, "Bluemle" 6, "Bluemle" 7, "Bluemle" 8, "Bluemle" 9.

Sec. 24 , T. 4 S. , R. 14 W., S. B. B. & M., Torrance field,

New Owner: F. D. Davison ; date acquired: March 14, 1951
Address: 2450 Cerritos Ave., Long Beach 6, Calif.

Request for designation of agent for Los Angeles County should be sent to:
Name: F. D. Davison
Address: (See above)

Reported by: Continental Exploration Company (Letter of August 26, 1950)
Confirmed by: F. D. Davison (Letter of March 20, 1951)

Type of organization: Individual
(Individual, partnership, corporation, etc.)

Our records are being changed accordingly.

Remarks: On July 31, 1950, Continental Exploration Company quitclaimed the property to the landowners, R. H. Bluemle and Veda T. Bluemle. The landowners sold the property to Western Brass Works on March 10, 1951. Western Brass Works sold the wells on the property to F. D. Davison on March 14, 1951.

The bond filed by Continental Exploration Company on well No. "Bluemle" 8 is not eligible for release as the well has never been satisfactorily completed or abandoned.

Gentlemen:

On March 10th 1951 we purchased W. L. Blumle property at the corner of Normandy and Sepulveda Boulevard described as follows:

"Lots 4, 5 and 6 of Tract 5351, in the City of Los Angeles, as per map recorded in book 58 page 46 of Maps, in the office of the county recorder of said county."

On this property are located some oil wells, which were sold on March 14th to Mr. F. D. Davison.

Yours very truly,

WESTERN BRASS WORKS

W. V. Storm

WDS:ek

3/26/51 P.S. The above statement is true and correct. The oil wells involved are listed in your files as Continental Exploration Company "Bluemle" 6, "Bluemle" 7 and "Bluemle" 8.

Gentlemen: Attention Mr. E. H. Musser

In reply to your letter of August 28, 1950:

The property which was quit-claimed to us by the Continental Exploration Co. on July 31, 1950, is in the Torrance Field, and the legal description is:

Lots 4 - 5 and 6, Tract #5351.

This property is to be sold to the Western Brass Co., of Los Angeles, Calif., as described in a letter from their attorney dated September 12, and was put into Escrow on August 10, 1950, and as agreed in their letter they will either operate the wells or abandon them.

Respectfully,

R. H. BLUEMLE

Attention: Mr. E. H. Musser

Gentlemen:

Re: R. H. Bluemle

Reference is made to your letter of August 28, 1950, subject as above.

The property was quit-claimed to the Bluemles on July 31, 1950, and the legal description is Lots 4, 5 and 6 of Tract 5351, in the City and County of Los Angeles, per Map recorded in Book 58, Page 46 of Maps.

Mr. Bluemle has contracted to sell the above described land to the Western Brass Works and an escrow has been opened. Some delay is anticipated in closing the escrow due to the fact that it will be necessary to close off two streets crossing the property. As soon as the escrow is closed, the purchaser will decide whether to operate or plug the wells in the property, and will advise you at that time.

Sincerely yours,

DEMETRIOU & VINEY

Gentlemen: Attention: E. H. Musser,

Re: Torrance Field
Bluemle Lease
Sec. 24, T. 4 S., R. 14 W., S. B. B. & M.

The entire Bluemle lease has been quit claimed by us to the landowner

R. H. Bluemle and Veda T. Bluemle,
602 No. Walden Drive,
Beverly Hills, California.

When the quit claim deed was delivered to Mr. Bluemle he had not decided, as far as we know, what further was to be done in the premises.

As between Mr. Bluemle and ourselves he agreed to do whatever was necessary to clear the matter with your department in abandoning the wells and released us from all liability under the bond.

The quit claim deed was delivered through an Escrow that closed about July 31, 1950. We do not have the date at hand when it was executed, the document itself, of course, having been delivered to the Bluemles.

Trusting the foregoing explains the matter, we remain,

Very truly yours,

Continental Exploration Company

By S. H. Woodruff

629 South Hill Street,
Los Angeles 14, California,
September 21, 1944.

Mr. R. D. Bush,
State Oil and Gas Supervisor,
San Francisco 11, California.

Dear Sir:

In a letter dated September 18, 1944, Continental Exploration Company has informed me that on April 27, 1944, it acquired a lease on Lots 4, 5, and 6 of Tract 5351 in Sec. 24, T. 4 S., R. 14 W., S. B. B. & M., Torrance field. This lease was made by the landowner, R. H. Bluemle. The wells affected by the transaction are Shell Oil Company, Incorporated wells No. 1, 2, 3, 4, 8, and 9, all of which are abandoned. Our records are being changed accordingly.

Continental Exploration Company has requested that the designation of well No. "Bluemle" 2 be changed to "Bluemle" 6. I recommend that the request be granted. The company intends to redrill this well.

As soon as Shell Oil Company, Incorporated informs me of the date upon which the property was quitclaimed, I shall inform you.

Yours truly,

E. H. Musser

Attention: Mr. Bloom.

Gentlemen:

This is to advise you that we have taken over by sub-lease the well known as Shell Oil Company "Bluemle" No. 2, Sec. 24, TS 4S, R. 14W, Torrance Field and request that this well hereafter be designated as Continental Exploratinn Company "Bluemle" No. 6.

An oil and gas lease was executed on the 15 day of December, 1943 between R. H. Bluemle and Veda T. Bluemle, husband and wife, as Lessors and K. H. Day and V. P. Mooney, Jr. as Lessees, who in turn made a sub-lease to the Continental Exploration Company, dated 27 day of April 1944,.

The description of the property is Lots 4, 5, and 6, Tract 5351 as per Map recorded in Book 58, Page 46 of Maps in the office of the County Recorder of Los Angeles County, California.

The wells which were located on this tract and since been abandoned are Shell Oil Company's "Bluemle" No. 1, 2, 3, 4, 8 and 9.

Enclosed you will find "Notice of Intention to Redrill" and properly executed bond covering the same.

Yours very truly,

Continental Exploration Company

Special Report on Operations Witnessed

No. T 1-40272

Los Angeles, Calif. November 3, 1941.

Mr. A. W. Gentry,
Long Beach, Calif.

Agent for SHELL OIL COMPANY, INCORPORATED.

DEAR SIR:

Operations at your well No. "BLUEMLE" 1 Sec. 24, T. 4 S., R. 14 W., S.B. B. & M., Torrance Field, in Los Angeles County, were witnessed by C. V. Bloom, Engineer, representative of the supervisor, on October 22, 1941. There was also present Gordon Graham, Contractor, and R. Rooker, Driller.

Casing Record	Junk
15-1/2" cem. 1133'; 10" cem. 3609', bad at 3218', pulled from 778'; 8-1/4" ld. 3539'-3880', perf. 3622'-3880'. T.D. 3880', plugged with cement 3218'-3174' and 776'-755'.	None.

The operations were performed for the purpose of testing the location and hardness of a cement plug proposed to be placed on the 10" casing stub in the process of abandonment,

and the data and conclusions are as follows:

INSPECTOR J. H. SHOW WAS PRESENT AT THE WELL FROM 12:15 TO 12:35 AND FROM 1:10 TO 1:20 P. M., OCTOBER 17, 1941, AND NOTED THAT the 10" casing was shot at 1094' and at 990' but did not come loose.

ENGINEER BLOOM WAS PRESENT AT THE WELL FROM 12:30 TO 1:30 P. M., OCTOBER 20, AND MR. GRAHAM REPORTED THAT the 10" casing was shot at 1094', 990' and 778' and was pulled from 778'.

THE ENGINEER NOTED THAT a precast cement plug was run to 776' and plugging operations were started by dumping 4 sacks of cement at 776'.

THE ENGINEER WAS AGAIN PRESENT AT THE WELL FROM 1:00 TO 1:30 P. M., OCTOBER 22, AND MR. GRAHAM REPORTED THE FOLLOWING:

1. On October 20, 23 sacks of Riverside construction cement was dumped at 776'. This cement did not set.
2. On October 21, 23 additional sacks of Riverside construction cement was dumped at 776' which filled the hole to 755'.

THE ENGINEER NOTED THAT the bailer could not be spudded below 755' and brought up a sample of set cement.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT 755' ARE APPROVED.

DEAR SIR:

Operations at your well No. "BLUEMLE" 1 Sec. 24, T. 4S., R. 14W. S. B. B. & M., Torrance Field, in Los Angeles County, were witnessed by C. V. Bloom, Engineer, representative of the supervisor, on August 20, 1941. There was also present L. W. Dillard, Driller, and C. S. Williams, Helper.

Casing Record 15-1/2" cem. 1133', 10" cem. 3609', bad at 3218', 8-1/4" ld. 3539'-3880', perf. 3622'-3880'. Total depth 3880', plugged with cement 3218'-3174'.	Junk None

The operations were performed for the purpose of testing the location and hardness of a cement plug placed from 3218' to 3174' in the process of abandonment,

and the data and conclusions are as follows:

THE ENGINEER WAS PRESENT AT THE WELL FROM 11:15 to 11:45 A. M. AUGUST 20, 1941, AND MR. DILLARD REPORTED THE FOLLOWING:

1. The hole could not be cleaned out below 3218' because of collapsed 10" casing at that depth.
2. On August 18-19, 18 sacks of Victor construction cement was dumped at 3218', filling the hole to 3174'.

THE ENGINEER NOTED THAT the bailer could not be spudded below 3174' and brought up a sample of set cement.

THE LOCATION AND HARDNESS OF THE CEMENT PLUG AT 3174' ARE APPROVED.

Report on Proposed Operations

No. P 1-36434

Los Angeles, Calif. June 4, 1941.

MR. A. W. Gentry,
Long Beach, Calif.
Agent for SHELL OIL COMPANY, INCORPORATED

DEAR SIR:

Your proposal to abandon Well No. "BLUEMLE" 1,
Section 24, T. 4S., R. 14W., S. B. B. & M., Torrance Field, Los Angeles County,
dated May 27, 1941, received June 2, 1941, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

Records in addition to, or at variance with those shown in the notice:
10" cem. 3609', def. dec.
The last production reported from this well was during 30 days in January 1934, when the daily average yield was 2 bbl. of oil and 8 bbl. of water.

THE NOTICE STATES:
"The present condition of the well is as follows:
Depth: 3880'
Casing: 15-1/2" cemented 1133'
10" cemented 3609'.
8-1/4" Landed 3880', top 3539', perforated 3622'-3880'."

PROPOSAL:
"The proposed work is as follows:
1. Bail to 3880' or as low as possible.
2. Plug inside 8-1/4" and 10" casings to 3519' or higher.
3. Recover 10" casing from 1110'±.
4. Cap stub of 10" casing with 20' cement plug.
5. Fill 15-1/2" casing from 1090'± to 25' with 70# rotary mud.
6. Place 25' concrete plug in top of 15-1/2" casing.
7. Weld plate on flange of 15-1/2" casing."

DECISION:
THE PROPOSAL IS APPROVED PROVIDED THAT this division shall be notified to witness the location and hardness of cement plugs at or above 3519' and on the 10" casing stub.

NOTE: In the event the proposed work is done by a contractor this division shall be consulted regarding additional requirements.

Notice of Intention to Abandon Well

This notice must be given at least five days before work is to begin

Long Beach Cal. May 27 19 41

MR. E. Huguenin

Deputy State Oil and Gas Supervisor

Los Angeles Cal.

DEAR SIR:

In compliance with Section 16, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to abandon well No. Bluemle 1, Sec. 24, T. 4S R. 14W, S.B. B. & M., Torrance Oil Field, Los Angeles County, commencing work on the 1 day of June 19 41

The present condition of the well is as follows:

Depth: 3880'

Casing: 15½" Cemented 1133'.
10" Cemented 3609'.
8¼" Landed 3880', top 3539', perforated 3622'-3880'.

The proposed work is as follows:

1. Bail to 3880' or as low as possible.
2. Plug inside 8-1/4" and 10" casings to 3519' or higher.
3. Recover 10" casing from 1110'±.
4. Cap stub of 10" casing with 20' cement plug.
5. Fill 15-1/2" casing from 1090'± to 25' with 70# rotary mud.
6. Place 25' concrete plug in top of 15-1/2" casing.
7. Weld plate on flange of 15-1/2" casing.

ADDRESS NOTICE TO DEPUTY STATE OIL AND GAS SUPERVISOR IN CHARGE OF DISTRICT WHERE WELL IS LOCATED

Box 290
Long Beach, California
September 28, 1939

Mr. E. Huguenin
Deputy Oil & Gas Supervisor
629 South Hill Street
Los Angeles, California

Dear Sir:

The derrick at the location of our Redondo Community 10 in Section 8, T. 4 S., R. 14 W., S.B. B & M, in the Torrance field was destroyed during the recent storm, and we do not plan to replace the structure.

Also the following derricks in the same field are in a weakened condition, and we request your approval to remove them:

Kettler 2	Section	23,	T. 4 S.,	R. 14 W.	S.B. B & M
Kettler 4	"	"	"	"	"
Kettler 12	"	24	"	"	"
Bluemle 1	"	"	"	"	"

Suitable derricks will be erected at these locations if future operations require them.

Yours very truly,

SHELL OIL COMPANY,
INCORPORATED

HISTORY OF OIL OR GAS WELL

FIELD Redondo-Torrance COMPANY SHELL COMPANY OF CALIFORNIA

Township 4 S, *Range* 14 W, *Section* 24, *Number of well* BLUEMLE #1

Signed Walter Holmes
(*President, Secretary or Agent*)

Date October 29th 1924 Title Agent

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

15⅝" Casing. Spudded March 31st, 1924. Drilled 23" rotary hole to 1134' April 5th. Cemented new 15⅝" 70# DBX casing at 1133' with plain shoe and guide on April 7th, with 400 sax Victor cement, last 300 sax treated, Perkins method. Final pressure 400#. Dumped 92 sax of cement around top of 15⅝" casing April 8th.

10" Casing. Located top of cement plug at 1155'. Cleaned out cement and drilled 14⅜" rotary hole from 1134' April 9th to 3613' on May 11th.

Cemented new 10" 45# DBX casing at 3609' with reinforced joint for shoe on May 13th, with 400 sax Victor cement, last 300 sax treated, Perkins method. Final pressure 800#.

Located top of cement at 3595', May 16th. Bailed fluid to 1500', stood 4 hours and casing tested dry May 17th. Cleaned out cement and drilled pocket to 3614'. Bailed to 1800' on May 18th. Stood 12 hours and Mining Bureau located top of fluid at 1760'. Bailer sample from top showed 5' of clean oil. Hole was open to 3613' and sample from that depth showed shale, sand and gas cut mud fluid with slight show of oil. Shut-off approved by Mining Bureau.

8¼" Liner. Drilled 9-5/8" rotary hole from 3614' on May 19th to 3880' on May 21st. Reamed hole twice to bottom. Set 341'-1" of 8¼" liner on bottom on May 25th, including 258'-3" of 50 mesh P.O.T. slotted, then 82' 10" of blank collar pipe, with left hand collar on top of liner, solid shoe guide on bottom of liner.

Ran in 3" tubing to 3850' and washed hole with water. Pulled tubing back to 3438' on May 27th. Swabbed well in 3:A.M. May 28th 1924. Turned into tanks 10:P.M. May 28th. First 24 hours production 620 barrels, tubing pressure 300#, casing pressure 755#, orifice 7/16".

Average first 30 days 460 barrels day. At end of 30 days gravity 18.8°, cut 0:7% emulsion, tubing pressure 270#, casing pressure 600#, orifice 7/16".

The gravity of oil was 40.0 degr[redacted]ter in oil amounted to [redacted] per cent.

DEPARTMENT OF PETROLEUM AND GAS

Report on Test of Water Shut-off

(BAILING)

No. T. 1-6984

Los Angeles, Cal. June 6, 1924.

Mr. Walter Holmes

Torrance, Cal.

Agent for SHELL COMPANY OF CALIFORNIA Company

1 21

DEAR SIR:

Your well No. "Bluemle" 1, Section 24, T. 4 S., R. 14 W., S.B. B. & M.,

Torrance Oil Field, in Los Angeles, County, was tested for

shut-off of water on May 19, (Time and date), 1924 Mr. V. Austin,

designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present Messrs. Walter Holmes, engineer and H.D.Egner, driller.

Location of water tested above 3609' and normal fluid level unknown

Depth and manner of water shut-off: { 3609 ft. of 10 in. 45 lb. / ..... ft. of ..... in. ..... lb. } casing was { cemented 5-15-24 / ~~landed~~ } in brown shale (Formation)

at 3609 ft. with 400 ~~Mixtax~~ last 300 treated sacks Victor cement by Perkins method; 15" rotary (Size and kind) tools

were used in landing water string.

Casing record of well 15½" cemented 1133', 10" as above

Reported total depth of hole 3614 ft. Hole bridged from x ft. to x ft. Hole cleaned out to 3614 ft. for this test.

At time of test depth of hole measured 3614 ft. and bailer brought up sample of brown shale mud fluid

At 11:00 p.m. May 18, 1924 (Time and date) oil bailed to x ft., ~~water~~ bailed to 1800 ft.

At 11:00 a.m. May 19, 1924 (Time and date) top of oil found at 1760 ft., top of ~~water~~ mud fluid found at 1765 ft.

Result of bailing test:

MR. HOLMES REPORTED:

1. No fluid entered the well when bailed to 1500' and allowed to stand 4 hours for a casing test.
2. In drilling ahead for test, 14' of set cement was found inside the casing.

THE INSPECTOR NOTED:

1. While standing 12 hr.for test, 5' of oil and 35' of ~~mixtax~~ mud fluid entered the well (equivalent to 1.0 bbl.of oil and 6.7 bbl.of water.)
2. The sample from bottom was oily gas cut mud.

The test indicates that the 10" shut off is probably effective, but is not conclusive. A decision on the effectiveness of the 10" Shut off is deferred pending the results of a production test to be witnessed by this department after completion of the well.

Notice of Test of Water Shut-off

This notice must be given at least five days before the test, and a longer time is desirable

Torrance, Cal. May 14th 1924

MR. C. C. Thoms,
Deputy State Oil and Gas Supervisor
Los Angeles, Cal.

DEAR SIR:

In compliance with Section 19, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to test the shut-off of water in well number BLUEMLE #1, Section 24, T. 4S, R. 14W, S. B. B. & M., Redondo-Torrance Oil Field, Los Angeles County, on the 18th day of May 1924.

10 inch 45 lb. casing was ~~tested~~/cemented in Shale (Formation) at 3609' (Depth) on May 13th 1924. (Date) 192

400 sacks Victor (Kind) of cement were used. (Last 300 sax treated).

The Perkins method was used in placing the cement.

Fluid level will be bailed to a depth of 1800' feet and left undisturbed for at least 12 hours before your inspection.

14¾" hole to 3610'. Core taken from 3610' to 3613'.

The well is 3613' / feet deep. There ~~is~~/is not a plug or bridge from feet to feet.

Respectfully yours,

Report on Proposed Operations

No. P-1-8389

Los Angeles, Cal. April 10, 1924

Mr. Walter Holmes,

Torrance Cal.

Agent for SHELL COMPANY OF CALIFORNIA Company

DEAR SIR:

Your proposal to drill Well No. "BLUEMLE" 1

Section 24, T. 4S., R. 14W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated March 25, 1924, received March 26, 1924, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:

"The well is 193.0' Northeasterly at right angles from center line of Long Beach-Redondo Road and 100.0' Easterly at right angles from West line Bluemle Lease.
The elevation of the derrick floor above sea level is 53.4 feet. (L. A. County Datum.)
We estimate that the first productive oil or gas sand should be encountered at a depth of about 3625 feet, more or less."

PROPOSAL:

"We propose to use the following strings of casing either cementing or landing them as here indicated:

Size of Casing	Wt. lb. per Ft.	New or 2nd Hand	Depth	Landed or Cemented
15½"	70	New	1150'	Cemented
10"	45	"	3620	Cemented
8¼"	36	"	Depending on future dev.	Landed

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing."

RECOMMENDATION:

We estimate that the formations open to production in this area should be encountered at a depth of about 3620' at this location.

THE PROPOSAL IS APPROVED WITH THE FOLLOWING RECOMMENDATION:

The 10" casing shall not be cemented below a depth of 3620' without the approval of this Department.

KINDLY NOTIFY THIS DEPARTMENT TO WITNESS A BAILING TEST OF THE 10" SHUT-OFF."

NOTICE OF INTENTION TO DRILL NEW WELL

This notice must be given before drilling begins

F. D. Davison

Torrance Cal. March 25th 1924

Mr. C. C. Thoms,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

Dear Sir:

In compliance with Section 17, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to commence the work of drilling well number "Bluemle" 1 Section 24 T. 4S R. 14W., S. B. B. & M.,

Redondo-Torrance Oil Field, Los Angeles County.

The well is 193.0' Northeasterly at right angles from center line of Long Beach-Redondo Road feet N. or S., and feet E. or W. from and 100.0' Easterly at right angles from West line Bluemle Lease.
(Give location in distance from section corners or other corners of legal subdivision)

The elevation of the derrick floor above sea level is 53.4 feet. (L. A. County Datum).

We propose to use the following strings of casing either cementing or landing them as here indicated:

Size of Casing, Inches	Weight, Lb. Per Foot	New or Second Hand	Depth	Landed or Cemented
15½"	70	New	1150 ±	Cemented
10"	45	New	3620	Cemented.
8¼"	36	New	Depending on future dev.	Landed.

OK

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing.

We estimate that the first productive oil or gas sand should be encountered at a depth of about 3625 feet, more or less.

Respectfully yours,

REPORT OF PROPERTY AND WELL TRANSFER

Former Owner: Continental Exploration Company

Description and list of wells: "Bluemle" 1, "Bluemle" 4, "Bluemle" 6, "Bluemle" 7, "Bluemle" 8, "Bluemle" 9.

Sec. 24, T. 4 S., R. 14 W., S. B. B. & M., Torrance field,

New Owner: F. D. Davison ; date acquired: March 14, 1951
Address: 2450 Cerritos Ave., Long Beach 6, Calif.

Request for designation of agent for Los Angeles County should be sent to:
Name: F. D. Davison
Address: (See above)

Reported by: Continental Exploration Company (Letter of August 26, 1950)
Confirmed by: F. D. Davison (Letter of March 20, 1951)

Type of organization: Individual
(Individual, partnership, corporation, etc.)

Our records are being changed accordingly.

Remarks: On July 31, 1950, Continental Exploration Company quitclaimed the property to the landowners, R. H. Bluemle and Veda T. Bluemle. The landowners sold the property to Western Brass Works on March 10, 1951. Western Brass Works sold the wells on the property to F. D. Davison on March 14, 1951.

The bond filed by Continental Exploration Company on well No. "Bluemle" 8 is not eligible for release as the well has never been satisfactorily completed or abandoned.

Mr. R. D. Bush,
State Oil and Gas Supervisor,
San Francisco 11, California.

Dear Sir:

In a letter dated September 18, 1944, Continental Exploration Company has informed me that on April 27, 1944, it acquired a lease on Lots 4, 5 and 6 of Tract 5351 in Sec. 24, T. 4 S., R. 14 W., S. B. B. & M., Torrance field. This lease was made by the landowner, R. H. Bluemle. The wells affected by the transaction are Shell Oil Company, Incorporated wells No. 1, 2, 3, 4, 8 and 9, all of which are abandoned. Our records are being changed accordingly.

Continental Exploration Company has requested that the designation of well No. "Bluemle" 2 be changed to "Bluemle" 6. I recommend that the request be granted. The company intends to redrill this well.

As soon as Shell Oil Company, Incorporated informs me of the date upon which the property was quitclaimed, I shall inform you.

Yours truly,

E. H. Musser

CLEANING OUT AND REDRILLING

The well pumped from July 24, 1924 to August 12, 1924 when it pumped 17 barrels in 4 hours, gravity 19.8°, cut 0.1% sand and 0.1% emulsion. Pulled rods and tubing. Found hole filled to 3125' with sand. Lost 3" section bailer when bailing at 3060', on the 13th. Recovered on August 16th. Cleaned out from 3125' to 3175' when formation heaved to 3140'. Bailer sample from 3140' was clear salt water and large pieces of cement, very little oil in hole. Unable to lower fluid below 175' on August 18th. Rigged up rotary August 19th to 22nd. Ran in 4" drill pipe with 7-5/8" diamond point bit on the 23rd and found hole bridged at 2549'. Circulated with 7-5/8" diamond point to 3125' where same stopped going. 10" casing had at 3125'. Unable to get circulation back of 10" casing at 600# pressure. Rigged up cable tools August 26th to 28th. 4" bit on tools stopped at 3124' on the 28th. Ran 5½" ball face bit from 3124' to 3145' and 6½" ball face bit from 3140' to 3147'. 5½" flat bottom bit went to 3153' on August 31st. Swaged 10" casing from 3124' to 3197' with 9½" swage and cleaned out to 3247', considerable sand entered well. Washed hole with 7½" bit to 3255' where bit hung up. Ran 9-5/8" bit on tools to 3255'. Hole made lots of mud and it was thought that the 10" casing had been drilled thru at 3249'. Dumped 24 sax of Victor cement treated at 3255', filling hole to 3205' on September 13th and another 16 sax of Victor cement treated at 3205' on the 14th filling hole to 3118'. Cleaned out cement to 3120'. Placed 1 cannister of lathe cuttings at 3120' and tamped down to 3115'. Ran 9½" bit to 3127'. Placed 7 cannisters of lathe cuttings at 3127' filling hole to 3120' on September 20th. Drilled on iron from 3120' to 3172' trying to drill out of 10" casing. Shot 10" casing 3120' to 3126' with 5"X6' shell (85# of 80% Gelatine) on October 1st, 1924. 9-11/16" solid reamer stopped at 2176'. Swaged out 10" casing from 2175' to 2185' on October 2nd. Cleaned out to 3150' and bridged back with lathe cuttings to 3120' on October 4th. Swaged bad 10" casing from 2175' to 2185' with 9½" swage. Drilled on iron from 3120' to 3136' where 10" casing was drilled thru October 7th. Redrilled from 3136' to 3172' October 25th. Ran 8¼" casing to 3140' on the 27th. Started reaming ahead of 8¼" casing when sand filled in hole and 8¼" casing was pulled back to 3101' on October 30th. Cleaned out sand 3112' to 3145' and underreamed to 3115'. Sand continued to run in hole. Pulled all of 8¼" casing on November 5th to redrill with rotary. Pumped inmud. Solid reamer stopped at 3080', went to 3100' on the 5th. Rigged up rotary November 5th to 9th. Ran 9-5/8" taper mill which stopped at 3088' on November 9th. Milled with 9-5/8" Hughes mill and bits from 3088' to 3344' on November 26th. 8¼" feeler stopped at 3198' on the 27th. Reamed with 9-5/8" Hughes and Reed bits to 3344' on November 30th. The hole seems to be crooked from 3150' to 3180'. Redrilled with 9-5/8" bit from 3344' on November 30th to 3578' on December 9th. Lost circulation onthe 9th and small returns were noticed in cellar between 10" & 15½" casings. Unflanged T. & B. head. Found 10" casing unscrewed 4 joints below all thread nipple. Screwed 10" together with die collar on the 10th. Redrilled from 3578' to 3621' on December 12, 1924. Shot hole from 3616' to 3621' with 4½"x5' shell (50# of 80% Gelatine) on the 13th.

CLEANING OUT AND REDRILLING

Ran in 9-5/8" fish tail bit to clean out and same stopped at 2534'. 9½" impression block stopped at 2534' and impression showed slivers of parted casing. Swaged out 10" casing with 9½" and 9¾" swage. Cleaned out and made 3' of new hole from 3621' to 3624' on December 16th. 9-5/8" Reed bit stopped at 3200', went to 3236' on December 18th. Four way reamer took its weight at 3185'. Ran 9-5/8" fish tail bit and cleaned out to 3624' on December 21st. Ran 4 way reamer and taper mills thru bad place at 3212' to 3216' when tools began to hang up at 2552'. Swaged out bad place at 2552' on December 25th. Unable to get 9-5/8" fish tail bits below 3212'. Hughes mill would not rotate at 2554'. 9-5/8" Hughes bit stopped at 2534' worked thru bad place and stopped again at 3206' on December 27th. Started redrilling new hole at 3206' on December 27th,1924 and redrilled to 3624' 2nd time on January 11, 1925. Ran 4 joints of 8¼" collar casing as feeler, stopped at 3511'. Cleaned out with 9-5/8" Hughes bit to 3624'. Ran 2 joints of inserted 8¼" casing as feeler. Stopped at 3511' on January 13th. Ran two 9-5/8" taper mills and one 9-5/8" Hughes mill on two 6" and two 5" drill collars to mill bad place at 3511', but mills stopped at 2540'. Ran 9½" swage thru bad place in pipe at 2540' and followed it up with 9-5/8" and 9¾" swages. Ran two 9-5/8" taper mills and one 9-5/8" Hughes mill again and same stopped at 3224'. Worked mills from 3224' to 3511'. Milled 3511' to 3516' on January 15th. Ran 9-5/8" Hughes cone mill to 3624'. Taper mills stopped again at 2553'. 9-5/8" Reed bit hung up at 2542' and 2557' and stopped at 3511'. Reamed from 3511' to 3624' with 9-5/8" Reed and Hughes bits on January 20th. Ran 2 joints of 8¼" inserted casing as feeler, stopped at 3571'. Reamed from 3571' to 3576' on the 22nd. Ran 2 joints of inserted 8¼" casing as feeler, stopped at 3578'. Ran two 9¼" taper and 9½" flat bottom mills, stopped at 2544'. Put Hughes cone mill on in place of flat bottom mill and same turned thru 10" casing at 2544' on the 23rd. Milled with 9¼" & 9-5/8" taper and Hughes mills from 3580' to 3624' from January 24th to 29th. Mills hang up at 3594'. Ran Hughes bit on the 30th, stopped at 3590'. Pulled Hughes bit back to 3215' turned bit and same went to 3624'. Bit was free at 3624' but hard to turn when in old hole at 3590'. Ran in 3" upset tubing toplug old hole with cement. Tubing went to 3624' in new hole instead of old hole. Pulled tubing back to 3215' to try and work same in old hole. No success. Pulled tubing on January 31, 1925. Ran 8¼" inserted feeler, went to 3595' in old hole. Pulled feeler back to 3200'. Ran feeler again and same went to 3595'. Ran in 3" tubing, stopped at 3595' (old hole). Pumped in 150 sax of Victor cement treated thru 3" tubing hung at 3590' on February 3rd. Pulled tubing on the 4th. Ran in 9-5/8" Hughes bit on February 5th, same went to 3590'. Think Hughes bit went innew hole. Ran 9-5/8" Reed bit, hung up at 3210' and 3241' and stopped at 3340'. Think 3340' is top of cement plug in old hole. Milledhole from 3215' to 3314' with 9-3/8" bottom and side hill mill on 8" and 6" drill collars on the 7th. Broke down 5" drill pipe and rigged up cable tools on February 8,1925. Ran 8¼" cable tool string to 3201' on February 11th. Started underreaming at 3215', on the 11th. Lost set of underreamer lugs at 3216' and another set when underreaming at 3245'. Recovered only small pieces.

CLEANING OUT AND REDRILLING

Underreamed to 3550' carrying 8¼" casing to 3510' on March 26th when 8¼" began hanging up and dragging badly. Unable to keep casing free by circulating oil. Pulled all of 8¼" casing on the 27th, pipe pulled freely above 2600'. Ran 9⅛" swage, hesitated at 2552' and went to 3093' where same stopped going. Swaged 10" casing from 3093' to 3097' on March 28th. 7⅞" ball face bit stopped at 3109', worked to 3115'. Ran 9-9/16" swage, stopped at 2551', swagged to 3085'. 9⅛" swage stopped at 2551', went to 2569'. 7⅞" ball face bit stopped at 3106', worked same to 3135'. Ran 9-5/8" ball face bit, stopped at 3089', worked same to 3098'. Ran 6"X44' flush joint bailer and stuck same at 3089' on March 30th. Pulled and parted sand line leaving bailer and 183' of line in hole. Recovered bailer and 183' of line with center rope spear on the 31st. Ran 9-5/8" ball face bit to 3135'. Ran 8¼" cable tool string to 3120' on April 2, 1925. Cleaned out with tools from 3135' to 3150'. Underreamed to 3094' and ran 8¼" casing to 3079' on the 4th. Casing started sticking on April 5th. Took out 1 joint of 8¼" casing. Reamed with 9⅛" cutters from 3081' to 3089' on April 8th when well started flowing salt water between 8¼" and 10" casings. Tried to put in 8¼" casing and same stopped at 3085'.

ABANDONING

Filled hole with mud. Pulled and layed down all 8¼" casing on April 9th, 10th and 11th. Unflanged 10" casing. Ripped 10" casing 1140' to 1156' on the 13th. Pulled all 10" casing above 1156'. Placed wooden plug on top of 10" casing at 1156' and filled hole with brick and sacks to 1145'. Dumped 20 sax of Victor cement treated at 1145' on April 15th. Located top of cement plug at 1124'. Mining Bureau located top of cement plug at 1124' and approved hardness on April 16th. Placed wooden plug in 15½" casing 7' from top of hole. Placed 8 sax of Victor cement treated on top of wooden plug. Abandoned well on April 17, 1925.

Special Report on Operations Witnessed

No. T -1-8474

Los Angeles, Cal. April 30, 1925

Mr. Walter Holmes,

Compton, Cal.

Agent for SHELL COMPANY OF CALIFORNIA ~~Company~~

DEAR SIR:

Operations at your well No. "BIHEMIE" 4 Section 24, T. 4 S, R. 14 W, S.B. B. & M., Torrance Oil Field, in Los Angeles County, were witnessed by V. Austin, representative of the supervisor, on April 16, 1925. There were also present B. F. Klingensmith, Driller and E. Laughlin, Tooldresser.

Casing Record See below.

The operations were performed for the purpose of testing the location and hardness of a cement plug proposed to be placed at 1126'.

and the data and conclusions are as follows:

CASING RECORD:
15½" cemented at 1186'.
10" cemented at 3611', - found bad at 2175', 2552', 3124', 3185' and 3210'. shot at 3120-3126', drilled out at 3135' and sidetracked to 3172' with cable tools, redrilled hole to 3621' shot hole 3616'-3621' and drilled out to 3624', reamed to 3215' with Reed bit and found it impossible to get below this point. (pumped in 150 sacks of Victor cement, all treated with quick setting chemical, through tubing hung at 3590').
8¼" liner 3569' to 3875'

MR. KLINGENSMITH REPORTED THE FOLLOWING:
1. The 10" casing was cut and pulled from 1156'.
2. A 5' wooden plug was driven into the stub of 10" casing and the hole bridged with cement sacks and brick to 1145'.
3. On April 14, 1925, 20 sacks of Victor Cement, all treated with quick setting chemical, was placed by dump bailer at 1145'.

THE INSPECTOR NOTED THAT the bailer could not be spudded below 1124' and brought up a sample of set cement.

THE LOCATION AND HARDNESS OF A CEMENT PLUG AT 1124' ARE APPROVED.

wooden plug place @ 7' and fill w/ cem. up to surface

Report on Proposed Operations

No. P -1-10689

Los Angeles, Cal. April 30, 1925.

Mr. Walter Holmes,

Compton, Cal.

Agent for SHELL COMPANY OF CALIFORNIA Company

DEAR SIR:

Your proposal to abandon Well No. "BUBBLE" 4,

Section 24, T. 4 S, R. 14 W, S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Apr. 13, 1925, received Apr. 15, 1925, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

RECORDS: The well was completed July 24, 1924 and 16 days later produced 87 bbl. of oil per day with a cut of 1% water and 4% emulsion.
The well has not produced since August 1924.
Otherwise the records are as stated in the notice quoted below.

THE NOTICE STATES:
"The present condition of the well is as follows:
15½" casing cemented at 1186'.
10" casing cemented at 3611'. Water shut off O.K.
8¼" liner set on bottom at 3875', top at 3569'.
Redrilling unsuccessful.
10 " casing bad at 2552', 3124', 3185' and 3210' and later found bad at 2175'.
When started to redrill found hole filled to 2549'.
Cleaned out 2549' to 3255'.
Dumped 40 sax of Victor cement treated, filling hole 3255'-3118'.
Cleaned out 3118'-3127' and bridged back with cannisters of steel shavings 3127'-3120'.
Unable to drill out of 10" casing.
Shot 10" 3120'-3126'.
Probably drill out of 10" casing at 3135' after shooting.
Carried 8¼" cable tool string and sidetracked 10" to 3172', took off cable tools and pulled 8¼" casing.
Redrilled with rotary to 3621', shot hole 3616'-3621', cleaned out to 3621' and drilled hole to 3624' after shooting.
Unable to get down to 3624', so redrilled second time with rotary to 3624'.
Reamed with 9-5/8" Hughes and 9-5/8" Reed bits several times to 3624' and 8¼" feeler would not go to 3624'.
Reamed to 3215' with Reed bit, unable to get below that depth.
Pumped in 150 sax of Victor cement, treated, thru tubing hung at 3590', believe cement filled hole to 3340'.
Unable to get below 3217' with rotary.
Cleaned out with cable tools to 3546', carrying 8¼" casing to 3510', had to circulate oil to keep 8¼" free.
Pulled 8¼" cable tool string from 3510'.
Ran 8¼" back to 3057', would not go below that depth.

Notice of Intention to Abandon Well

This notice must be given at least five days before work is to begin

Compton, Cal. April 13, 1925

MR. C. C. Thoms,

Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

DEAR SIR:

In compliance with Section 16, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to abandon well number BLUEMLE #4, Section 24, T. 4 S., R. 14 W., S.B. B. & M., Redondo-Torrance Oil Field, Los Angeles County, commencing work on the 11th day of April, 1925.

The present condition of the well is as follows:

15½" casing cemented at 1186'.
10" casing cemented at 3611'. Water shut off O.K.
8¼" liner set on bottom at 3875', top at 3569'.
Redrilling unsuccessful.
10" casing bad at 2552', 3124', 3185' and 3210' and later found bad at 2175'.
When started to redrill found hole filled to 2549'.
Cleaned out 2549' to 3255'.
Dumped 40 sax of Victor cement treated, filling hole 3255'-3118'.
Cleaned out 3118'-3127' and bridged back with cannisters of steel shavings 3127'-3120'.
Unable to drill out of 10" casing.
Shot 10" 3120'-3126'.

~~The proposed work is as follows:~~

Probably drill out of 10" casing at 3135' after shooting.
Carried 8¼" cable tool string and sidetracked 10" to 3172', took off cable tools and pulled 8¼" casing.
Redrilled with rotary to 3621', shot hole 3616'-3621', cleaned out to 3621' and drilled hole to 3624' after shooting.
Unable to get down to 3624', so redrilled second time with rotary to 3624'.
Reamed with 9-5/8" Hughes and 9-5/8" Reed bits several times to 3624' and 8¼" feeler would not go to 3624'.
Reamed to 3215' with Reed bit, unable to get below that depth.
Pumped in 150 sax of Victor cement, treated, thru tubing hung at 3590', believe cement filled hole to 3340'.
Unable to get below 3217' with rotary.
Cleaned out with cable tools to 3546', carrying 8¼" casing to 3510', had to circulate oil to keep 8¼" free.

Respectfully yours,

SHELL COMPANY OF CALIFORNIA

Date September 24th 1924 Title Agent

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

15½" casing. Spudded May 21, 1924 and drilled 23" rotary hole to 1188' on May 26th.

Cemented new 15½" 70# DBX casing at 1186' on May 27th, 1924 with 400 sax Victor cement, last 300 sax treated, Perkins method. Final pressure 500#. Dumped 78 sax cement around top of 15½" casing. Located top of cement plug at 1031' on May 29th 1924.

10" casing. Cleaned out cement and drilled 14¾" rotary hole from 1188' on May 30th to 3613' on June 27th.

Cemented new 10" 45# DBX casing at 3611' on June 29th, 1924 with 400 sax Victor cement, last 300 sax treated, Perkins method, final pressure 600#. Located top of cement plug in 10" casing at 3585' on July 2nd. Cleaned out cement to 3598', bailed fluid to 1500', stood 4 hours and casing tested dry. Cleaned out cement and drilled pocket to 3616'. Bailed fluid to 1800' on July 5th, stood 44 hours and Mining Bureau located top of thin gas cut mud with oil at 1777'. Hole was open to 3616' and sample from that depth showed heavy mud, oil, gas and shale. Bureau approved shut-off.

8¼" liner. Drilled 9-5/8" rotary hole from 3616' on July 7th to 3875' on July 10th.

Set 305'-8" of 8¼" liner on bottom at 3875' on July 12th 1924, including 263'-8" of seamless 60 mesh Smith slotted, then 42' of blank collar pipe. Solid shoe guide on bottom of liner, left hand collar on top.

Washed hole with water thru 3"tubing at 3860'. Pulled tubing back to 3533' July 16th. 10" started leaking at flange, while swabbing on July 18th. Killed well and installed new 10" nipple. Washed hole thru 3" tubing hung at 3868'. Pulled tubing back to 3533' on July 19th. Swabbed from the 19th to 22nd. Unable to make well flow. Tubed with 3" at 2308' on the 23rd, and brot well in pumping on July 24th 1924.

The gravity of oil was 17.9° degrees Baumé. Water in oil amounted to 1.0 per cent. & 4.0% Emulsion

Report on Proposed Operations

No. P-1-9407

Los Angeles, Cal. Sept. 19, 1924

Mr. Walter Holmes

Torrance, Cal.

Agent for SHELL COMPANY OF CALIFORNIA ~~xCompany~~

DEAR SIR:

Your redrill oil and water strings proposal to Well No. "RIEUMIE" 4,

Section 24, T. 4S, R. 14W, S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated Sept. 13, 1924, received Sept. 16, 1924, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

RECORDS: Our records show that the 16" casing was cemented at 1144'.
Otherwise the records are as stated in the notice quoted below.

THE NOTICE STATES:
"The present condition of the well is as follows:
15½" casing cemented 1186'.
10" casing cemented 3611'. Water shut-off.
8¼" liner set on bottom at 3875'. Including 263'-8" of seamless 60 mesh Smith slotted, then 42' of blank collar pipe.
10" casing bad, 3124'-3141', 3205'-3210'.
Unable to clean out below 3255'.

Production

Month	Oil-Bbl.	Gravity	Percentage B.S.	Days pumped.
Aug. 1924	928	16.6°	7.6	9½ "

PROPOSAL:
"The proposed work is as follows:
Plug with cement from 3255' to top of bad 10" casing at 3124'.
Drill out of 10" casing at 3124', sidetrack to 3611' and shoot opposite 10" shoe joint, then cement a string of 8¼" casing at about 3621'.
Redrill to oil bottom (3875') and set 6¼" oil string or 6¼" liner at 3875'.
Produce well from 3875'."

RECOMMENDATION:
THE PROPOSAL AS QUOTED ABOVE IS APPROVED.

KINDLY NOTIFY THIS DEPARTMENT TO WITNESS THE FOLLOWING:
1. Location and hardness of the cement plug at 3124'.
2. A bailing test of the 8¼" shut-off.

NOTE:
This report is issued with the understanding that the log and history will be filed with this department at once.

cc--H. H. Dubendorf

Notice of Intention to Deepen, Redrill, Plug or Alter Casing in Well

O & W Sturgis

This notice must be given fifteen days before work begins when possible

Torrance, Cal. September 13 1924

Mr. C. C. Thoms,
Deputy State Oil and Gas Supervisor

Los Angeles, Cal.

Dear Sir:

In compliance with Section 17, Chapter 718, Statutes of 1915, as amended, notice is hereby given that it is our intention to commence the work of ~~deepening~~, redrilling, ~~plugging or altering casing~~ at well number BLUEMLE #4
(Cross out unnecessary words)

_____, Sec. 24, T. 4S., R. 14 W., S.B. B. & M.,

Redondo-Torrance Oil Field, Los Angeles County.

The present condition of the well is as follows:

15½" casing cemented 1186'.
10" casing cemented 3611'. Water shut-off.
8¼" liner set on bottom at 3875'. Including 263'-8" of seamless 60 mesh Smith slotted, then 42' of blank collar pipe.
10" casing bad, 3124'-3141', 3205'-3210'.
Unable to clean out below 3255'.

Production

Month	Oil-Bbl.	Gravity	Percentage B.S.	Days Pumped.
Aug. 1924	928	16.6°	7.6	9½

The proposed work is as follows:

Plug hole with cement from 3255' to top of bad 10" casing at 3124'.
Drill out of 10" casing at 3124', sidetrack to 3611' and shoot opposite 10" shoe joint, then cement a string of 8¼" casing at about 3621'.
Redrill to old bottom (3875') and set 6¼" oil string or 6¼" liner at 3875.
Produce well from 3875'.

Report on Test of Water Shut-off
(BAILING)

No. T -1-7202

Los Angeles Cal. July. 26, 1924

Mr. Walter Holmes

Torrance Cal.

DEAR SIR: Agent for SHELL COMPANY OF CALIFORNIA ~~XXXXX~~ Company

Your well No. "BLUEMLE" 4, Sec. 24, T. 4S., R. 14W., S.B. B. & M.,

Torrance Oil Field, in Los Angeles County, was tested for

shut-off of water on July 7, (Time and date) 1924. Mr. V. Austin,

designated by the supervisor, was present as prescribed in Section 19, Chapter 718, Statutes 1915, as amended, and there were also present C. H. Montgomery, Assistant Engineer, L. Hampton, Foreman, and F. R. Dukes, Driller.

Location of water tested above 3611' and normal fluid level unknown

Depth and manner of water shut-off: { 3611 ft. of 10 in. 45 lb. / ft. of in. lb. } casing was { cemented 6/29/24 / ~~landed~~ } in brown shale Formation

at 3611 ft. with 400 sacks Victor cement by Perkins method; 14¾" rotary Size and kind tools

were used in landing water string. last 300 treated

Casing record of well 16" cemented 1144'; 10" as above.

Reported total depth of hole 3616 ft. Hole bridged from - ft. to - ft. Hole cleaned out to 3616 ft. for this test.

At time of test depth of hole measured 3616 ft. and bailer brought up sample of brown shale

At 3:00 p.m. July 5, 1924 (Time and date) oil bailed to - ft., water bailed to mud fluid 1800 ft.

At 11:00 a.m. July 7, 1924 (Time and date) top of oil found at - ft., top of water found at mud fluid 1777 ft.

Result of bailing test:

MR. MONTGOMERY REPORTED:
1. The well was cleaned out to 3598' for a casing test.
2. No fluid entered the well when bailed to 1500' and allowed to stand 4 hr. for a casing test.
3. In drilling ahead for test, 31' of set cement was found inside the 10" casing.

THE INSPECTOR NOTED:
1. The fluid level rose 23' in 44 hr. (equivalent to 1.1 bbl. in 24 hr.)
2. The fluid samples were as follows:
   Top - thin gas cut mud fluid showing little oil.
   Bottom - heavy mud fluid showing some oil and gas.

THE SHUT-OFF IS APPROVED.

Report on Proposed Operations

No. P -1-8746

Los Angeles Cal. June. 3. 1924

Mr. Walter Holmes

Torrance Cal.

Agent for SHELL COMPANY OF CALIFORNIA ~~Company~~

DEAR SIR:

Your proposal to drill Well No. "BLUEMLE" 4,

Section 24, T. 4S., R. 14W., S.B. B. & M., Torrance Oil Field, Los Angeles County,

dated May. 19., 1924, received May. 22., 1924, has been examined in conjunction with records filed in this office.

Present conditions as shown by the records and the proposal are as follows:

THE NOTICE STATES:
"The well is 514.96' Northerly along West line of Bluemle Lease from intersection of West line and center line of Redondo-Long Beach Road, thence 100.0' Easterly at right angles from West line of Bluemle Lease.
The elevation of the derrick floor above sea level is 57.5' (L. A. County datum.)
We estimate that the first productive oil or gas sand should be encountered at a depth of about 3615', more or less."

PROPOSAL:
"We propose to use the following strings of casing either cementing or landing them as here indicated:

SIZE OF CASING	WT. LB. PER FT.	NEW OR 2ND HAND	DEPTH	LANDED OR CEMENTED
15½"	70	New	1150' ±	Cemented
10 "	45	"	3610	"
8¼" Liner	36	"	3880	Landed.

It is understood that if changes in this plan become necessary we are to notify you before cementing or landing casing."

RECOMMENDATION:
We estimate that the formations open to production in this area should be encountered at a depth of about 3610' at this location.

THE PROPOSAL IS APPROVED.

Kindly notify this Department to witness a bailing test of the 10" shut-off.

1.0 INTRODUCTION

This report summarizes the findings of the observations, soil sampling, and chemical analysis conducted during the excavation, permanent removal, and closure of a 12,000-gallon diesel fuel underground storage tank (UST) from the former Associated Ready Mix and Concrete, Inc. plant, located at 1361 Sepulveda Boulevard, in the City of Torrance, California (Site). The purpose of this report is to provide proper documentation, including permitting, disposal manifests, certificate of recycling, and soil observations and analytical testing results to satisfy the requirements of Los Angeles City Fire Department (LAFD) permit No. SR0028841 for tank abandonment.

The property owner and responsible party is:

Georgia Claessens Trust
9 Portuguese Bend Road
Rancho Palos Verdes, California 90275

The Site was formerly used as a ready-mix concrete batch plant and is in the process of being razed and leveled for future use as a parking lot. Aside from the ready-mix tower along the southern property boundary, there are no permanent buildings at the Site.

2.0 SITE DESCRIPTION

The Site is located on the north side of Sepulveda Boulevard, between Western and Normandie Avenues in the City of Los Angeles, California, see Figure 1, Site Location Map. Because it is located on the "Los Angeles Strip" the Site assumes the address 1361 Sepulveda Boulevard, Torrance, California. The Site is a nearly rectangular, approximately 35,170 square foot (sf) parcel of land, bounded to the south by Sepulveda Boulevard and to the east, north, and west by Mulligan Family Fun Center, a recreational miniature golf, arcade, and batting cage facility. The Site is historically a part of the Torrance Oil Field and oil production activities are still evident to the north, across Sepulveda Boulevard. The former UST was located at the central-north portion of the property and was used to fuel the fleet of concrete ready mix trucks that supported former on-site operations.

3.0 SOILS AND HYDROGEOLOGY

Soils at the Site were observed to consist of brown, moist, silty fine sand. The sands were clean and uniform with no observed staining. There was a slight hydrocarbon odor within the

excavation likely related to heavy oils from former oil field operations at the Site and in the surrounding area. No groundwater was encountered in the excavation to the total depth excavated, 15 feet bgs. Based on knowledge of local area hydrogeology, first groundwater is expected at depths greater than 50 feet below ground surface (bgs).

4.0 REMOVAL OF UST

A UST removal permit was obtained from the LAFD on July 26, 2012, see Appendix A. In accordance with the permit, the LAFD Inspector assigned to the Site, Inspector Stevens, was notified at least 48-hours prior to removal and was on-site during all removal and soil sampling activities. On July 26, 2012, the concrete apron above the UST was removed and the UST was excavated by Gaunt Construction of Torrance, California. The UST was pumped dry of liquids and triple rinsed prior to removal by Adams Services of Gardena, California, and certified clean by Nancy Carraway, a Certified Industrial Hygienist, as recyclable metal. The UST was then lifted by a crane and loaded into a truck to be transported to SA Recycling in Long Beach, California. The rinsate from triple rinsing the UST was hauled to Demenno Kerdoon by Adams Services. Manifests and disposal tickets are attached in Appendix B. Photographs are presented in Appendix C.

5.0 SAMPLING PROCEDURES & CHEMICAL ANALYSES

All the work was performed under the direct supervision of a California Professional Geologist. Soil samples were collected from native soils 2 feet beneath the center and ends of the UST using an excavator bucket (3 samples total). The former dispenser island was over the top of the UST and within the excavation boundaries and there was no piping leading away from the tank pit. Therefore, it was only necessary to collect the three samples from beneath the UST see Figure 3, UST Excavation and Soil Sampling Locations.

Samples representative of native soils were collected from behind the teeth of the excavator bucket and put into new, laboratory supplied 4-oz. glass jars with teflon-lined screw lids. Samples from each location also were subcored and preserved in the field using procedures consistent with United States Environmental Protection Agency (USEPA) Method 5035. The sampling locations are shown on Figure 3.

Soil samples were labeled and placed in a chilled ice chest for transport under strict chain of custody documentation to American Analytics, a State certified analytical laboratory in Chatsworth, California.

Based on historical knowledge of the tank contents and observations made in the field, soils samples were initially analyzed for total petroleum hydrocarbons as carbon chain (TPH-cc) by USEPA Method 8015M. Consistent with field observation (and discussed below), laboratory results confirmed the absence of any light end petroleum hydrocarbons in the samples and therefore, no additional laboratory analyses were deemed necessary.

Laboratory results for TPH-cc showed non-detect concentrations (<10 milligrams per kilogram [mg/kg]) for hydrocarbons in the gasoline range (C6-C10); detectable concentrations between 7 and 150 mg/kg for hydrocarbons in the diesel range (C10-C28); and detectable concentrations between 20 and 100 mg/kg for hydrocarbons in the heavy oil range (C28-C44). The general screening concentrations used in evaluating potential impacts from petroleum hydrocarbon releases are 100 mg/kg, 1,000 mg/kg, and 10,000 mg/kg for hydrocarbons in the gasoline, diesel, and heavy oil ranges, respectively. When applied to the Site, the sample concentrations are well below the screening criteria.

The chemical laboratory reports and chain-of-custody forms are included in Appendix D. The results of the chemical laboratory tests are summarized below in Table 1.

6.0 DISCUSSION, CONCLUSIONS, & RECOMMENDATIONS

A 12,000-gallon diesel fuel UST was excavated and removed from the Site under the supervision of a LAFD Inspector on July 26, 2012. Prior to its removal, the UST was triple rinsed and certified clean by an industrial hygienist. The UST was lifted by crane onto a truck, removed from the Site, and disposed at a recycling facility.

During UST removal work, no evidence of staining was observed in the tank pit. There was a slight hydrocarbon odor within the excavation, which is likely related to heavy oils from former oil field operations at the Site. Groundwater was not encountered in the excavation to the total depth excavated, 15 feet bgs. Three soil samples were collected from beneath the UST and

analyzed for TPH-cc. Consistent with visual observations, reported concentrations of hydrocarbons were low and well below general screening criteria.

Based on the information provided in this report, including soil sampling results during UST removal, Roux Associates recommends no further investigations for the Site related to the former 12,000-gallon UST.

Respectfully submitted,

ROUX ASSOCIATES, INC.

Re : Gaunt Ready Mix - UST Removal

A84104 / 2G27015

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 07/27/12 10:23 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile

Operations Manager

UST SOIL REPORT REVIEW

FACILITY ADDRESS: 1361 W. Sepulveda Blvd.

FACILITY NO.: 261166 - Permit # 28841 DATE: 10/25/12

☑ Checked Geotracker Database (ONGOING CASE WITH THE SWRCB?)
☑ Checked Envision (Site assessment tracking sheet is used to manage cases)

DOCUMENTS INCLUDED IN THE REPORT:

☑ A copy of the Los Angeles Fire Department Division 5-Permit
☑ Marine Chemist Certificate
☑ Copy of the Hazardous Waste Manifest for Disposal of Tank's Rinsate
☑ Certificate of Tank Disposal/Destruction and associated piping
? ☐ Soil manifest for soil removed from the site N/A
☑ Scaled plot plan, clearly illustrating the location and depth of all the samples collected
☑ The report was signed by a registered professional

Below FD Action Levels	Chemical		LAFD Minimum Action Levels In mg/kg
☑	Total Petroleum Hydrocarbon-Gasoline	TPH-G	<100*
☐ ↑	Total Petroleum Hydrocarbon-Diesel	TPH-D	<100*
☑	Total Recovered Petroleum Hydrocarbon	TRPH	<100*
☐ ?	Benzene, Toluene, Ethylbenzene and Xylene	BTEX	<Benzene-1,TEX-50*
☐	Methyl Tertiary-butyl ether	MTBE	ANY>MDLs*
☐	Diisopropyl ether	DIPE	<1*
☐	Ethyl tertiary-butyl ether	ETBE	<1*
☐	Tertiary-amyl methyl ether	TAME	<1*
☐	Tertiary-butyl alcohol	TBA	<20*
☐	Methyl alcohol**	Methanol	<100*
☐	Ethyl alcohol**	Ethanol	<100*

? ☐ If analysis results exceed LAFD action levels an Unauthorized Release Report (URR) was included in the report.

Gasoline tanks: Shall be tested for TPH-G, BTEX and Fuel Oxygenates (MTBE, DIPE, ETBE, TAME TBA)
Diesel tanks: Shall be tested for TPH-D and BTEX
Waste Oil Tanks: Shall be tested for TRPH, BTEX, VOCs, **Methanol and Ethanol

ACTION TAKEN:

☐ No Further Action, soil analytical results did not exceed the LAFD minimum action levels
☐ Referred to the SWRCB, groundwater impacted or SWRCB is the lead agency
☐ Referred to DTSC, the UST location is a school site
☐ *Issued a NOV, soil analysis exceed the LAFD action levels, request an URR if one not provided with the report, create a case in Geotracker and manage the case through the closure process
☐ Requested Additional Information, report incomplete to render a decision
☐ Moved to the Site Assessment Group, site assessment in progress
☐ Updated case status in Envision after each action taken

Torrnace, California

Dear Ms. Claessens:

The Fire Department has reviewed the Underground Storage Tank Removal - Soils Report report dated September 5, 2012, as submitted by Roux Associates, Incorporated. Based on the information provided, the level of soil contamination at this site has exceeded the Fire Department's action levels. Therefore, Fire/Safety Violation Notice Number **201210** has been issued.

You are required to submit all of the following items as a complete package:

- ☐ A Work Plan for Site Assessment.
- ☐ A Community Health and Safety Plan must be included as a section in your Work Plan. To assist you, guidelines are available at: ***www.lafd.org/prevention/pdfforms/sa_workplan_guide.pdf***
- ☐ Payment of **$2112.00** for Invoice Number **IN0188726** dated **November 21, 2012.** Please submit payment with the report. The Work Plan will not be reviewed until the invoice is paid. Unpaid invoices past 60 days will be assessed a $936 penalty.
- ☐ The *Required Information Form,* completed according to the instructions.
- ☐ **The *Unauthorized Release Form* must be completed and returned according to the instructions.**

The report and payment are due no later than December 21, 2012. Your submission must use the Site Address and Permit Number at the top of this letter, and your report must be titled: **WORK PLAN FOR SITE ASSESSMENT.** To facilitate processing, submit all required documents, forms and payment together, following the instructions and guidelines.

Please mail your documents to:

Los Angeles Fire Department,
Underground Storage Tanks – Plan Check Unit,
221 North Figueroa Street, Suite 1500,
Los Angeles, CA 90012.

If you have any questions regarding this matter, please contact Inspector David Riles of the Underground Storage Tanks – Plan Check Unit, at (213) 482-6524.

Very truly yours,

BRIAN L. CUMMINGS
Fire Chief

Responsible Party: Ms. Georgia Claessens **Emergency Phone:**

COMPLY WITH REQUIREMENTS AS NOTED

[X] A Work Plan must be submitted and approved prior to conducting any site assessment work. The Work Plan must describe all activities to be undertaken and appropriate protocols to be used. CCR Title 23, Div. 3, Chapter 16, Article 11 s2720 thru 2728; L.A.M.C. (57.31.30), (57.31.38), (57.31.38.01)

[X] Payment of **$2112.00** is due **December 21, 2012**. Submit payment with Work Plan. Invoice is attached. Work Plans will not be reviewed unless the invoice is paid. Unpaid invoices past 60 days will be assessed a **$1056** penalty.

[X] Provide a site assessment certified by a Professional Civil Engineer (PE), Professional Geologist (PG), Certified Engineering Geologist (CEG), Certified Hydrogeologist (CHG) or Professional Petroleum Engineer (PPE). This report shall describe all assessment activities you intend to conduct. Address and justify any and all deviations from the site assessment workplan. The vertical and lateral extent of contamination shall be defined by providing soil borings and laboratory soil testing. L.A.M.C. (57.31.30), (57.31.38), (57.31.38.01)

[X] The following compounds shall be tested using the indicated analytical method: **BTEX:** EPA method 8260B(8021B) – **MTBE, DIPE, ETBE, TAME, TBA;** EPA Method 8260B – **TPHg:** Cal-LUFT GC/FID or GC/MS- TPHd. Laboratory testing shall meet the State of California Regional Water Quality Control Board Los Angeles Region General Requirements for Petroleum Hydrocarbon Impacted Sites table 1: Analytical Requirements dated 09/06. L.A.M.C. (57.31.30), (57.31.38), (57.31.38.01)

[X] Methanol or ethanol must also be tested if gasoline was used historically or is currently used. Use Analytical Method **METHANOL:** Cal-LUFT GC/FID – **ETHANOL:** Cal-LUFT GC/FID (EPA 8260B). EPA Method 5035 shall be applied for soil sample preparation and preservation. L.A.M.C. (57.31.30), (57.31.38), (57.31.38.01), CCR Title 23, Div. 3, Chapter 16, Article 11 s2649

[X] All borings shall extend a minimum of 20 feet below the lowest level of non-detect levels. L.A.M.C. (57.31.30), (57.31.38), (57.31.38.01)

[X] Secure the area from unauthorized entry. L.A.M.C. (57.31.30) (57.31.38) (57.31.38.01) (57.31.50).

[X] Positive analytical results for MTBE shall require boring(s) of a minimum 40 feet below non-detect levels. L.A.M.C. (57.31.30) (57.31.38) (57.31.38.01)

[X] A remedial action plan must be submitted and approved prior to conducting any remediation. L.A.M.C. 57.31.30, CCR Title 23, Div. 3, Chapter 16, Article 11 s2720 thru 2728. (A separate permit will be required for remediation.)

October 29, 2012

Dear Facility Owner:

Site Assessment Billing

As mandated by the State of California and directed by the Los Angeles City Council, Ordinance No. 172043 was approved to establish fire code revisions including cost recovery. New fees establish for the Unified Program, including fees for Underground Storage Tanks (UST) were effective October 29, 2012 (see attached fee schedule). **Services related to UST site mitigation such as inspection and monitoring will be charged $2112.00 (based on the hourly rate of $176, Twelve (12) hour minimum). Site mitigation in progress will be invoiced before completion.** When the site mitigation is completed and all billings are paid in full, your facility will receive a "Closure Letter" from the Fire Department, indicating that no further action is required.

Enclosed please find the invoice for site assessment in the amount of $2112. FAILURE TO PAY FOR THE INVOICE WILL DELAY THE PROCESSING OF THIS SITE.

To ensure proper credit, please return one copy of the invoice with a check, made payable to "The City of Los Angeles."

Please mail the check and invoice to the following address:

LOS ANGELES FIRE DEPARTMENT

UNDERGROUND STORAGE TANK PROGRAM
SITE ASSESSMENT WORK PLAN REQUIREMENTS

A work plan (proposal) must be submitted and approved prior to conducting any site assessment activities; the Responsible Party shall modify the work plan, an necessary, at the direction of the Los Angeles Fire Department (LAFD), pursuant to Article 11, Section 2722 (c) and (d) of the California Code of Regulations, July, 2001, and Division 31 of the City of Los Angeles Fire Code, 1998 Edition. The work plan must describe all activities to be undertaken and appropriate protocols to be used. All reported data shall be properly referenced as applicable. All analytical results shall be tabulated by sampling point name and number and presented in chronological order.

A work plan must contain a **wet ink signature in blue ink and a seal** indicating expiration date of one of the following California licensed professionals:

- Professional Civil Engineer (PE)
- Professional Geologist (PG)
- Certified Engineering Geologist (CEG)
- Certified Hydrogeologist (CHG)
- Professional Petroleum Engineer (PPE)

All work must be performed under the direct supervision of a PE, PG, CEG, CHG or PPE.

A. Site information

1. Name and address of the site and Responsible Party.
2. Name and telephone number of the appropriate contact person.
3. LAFD case number.
4. Complete mailing list of all record fee title owners and written certification that the landowner notification requirement has been met.

B. Site History

1. Current and previous type(s) of business activities on site,
2. Hazardous material(s) spill/release history at the site.
3. Location, capacity, content, and construction material of existing and removed tank systems.

4. Current site conditions including summary of all previous site investigations, soil vapor study, remedial actions, etc.

C. Maps

1. Site Map to include the following:
   - The location of all tanks (past and present) with associated product piping; chemical storage and processing areas; and transfer/drain lines.
   - The location of all previous sampling points, borings, and monitoring wells.
   - The location of surface and subsurface features and structures (buildings, pump islands, and planters).
   - The location of utilities (sewer, water, gas and power lines).
   - Tank excavations (past, existing, and proposed).
   - The location of proposed sampling points, borings, trenches, and monitoring wells.
   - Scale, legend, date, and compass direction.

2. Vicinity Map to include the following:
   - An index map showing the regional area and site boundaries. U.S. Geological Survey topographic map or a street guide map is recommended.
   - The location of geographic features (surface waters, water wells, schools, and hospitals).
   - The location of topographic features (depressions, slopes, cliffs, etc.)
   - Scale, legend, date, and compass direction.

D. Regional and Site-Specific Geology

1. Describe lithology of soil and any bedrock formations using the United Soil Classification System.
2. Include color, grain distribution, and general characteristics of the subsurface soil and/or bedrock.

E. Regional and Site-Specific Hydrogeology

1. Indicate both the current depth to shallowest groundwater and the historic high groundwater level. If LAC DWP Hydraulic/Water Conservation Division records are used, indicate the depth of the well and screening interval.
2. Provide groundwater basin information including known and potential beneficial uses.

F. Description of Proposed Work

1. Provide a brief summary of the objectives of the proposed site assessment activities and demonstrate how these goals will be accomplished through the proposed activities.

2. Provide a sampling and analysis plan including the locations and number of samples to be obtained and analyzed, type(s) of drilling and sampling equipment, soil and/or groundwater sampling procedures, and sample collection and field handling protocol.
3. Indicate the analytical methods to be performed on the soil and/or groundwater samples collected.
4. Include equipment decontamination procedures.
5. Include waste disposal procedures.

G. Schedule of Proposed Work

Provide a detailed schedule for implementation and completion of proposed work.

H. Interim Remedial Actions

1. Treatment system design, type of equipment, and operation specifications.
2. Description of monitoring method and schedule to evaluate system effectiveness and to ensure receptors are protected.
3. Remedial waste determination and management of remedial wastes.
4. Verification sampling plan.

I. Community Health and Safety Plan

LAFD has the responsibility to promote a safe and healthy environment for the public in areas where soils and other materials contaminated with hazardous substances are excavated, removed, or handled. It is the legal responsibility of property owners, RPs, contractors, and consultants to conduct all on-site activities so as not to create public health and safety hazards or nuisances. Every precaution must be taken to prevent impacts to the surrounding community. RPs (and their consultants and contractors) are expected to comply with applicable fire, health and safety, building, and construction laws and regulations.

To promote public health and safety, corrective actions must be performed in accordance with a site-specific Community Health and Safety Plan (Plan) that has been approved by LAFD. A Plan must be submitted as part of any work plan.

The primary objective of the Plan is to promote a safe and healthy environment for the public by:

- Minimizing community exposures to hazards from site activities and/or releases which may migrate off-site, and
- Assuring community awareness.

The Plan should be developed in close coordination with the RPs. All persons conducting on-site activities should be familiar with the content and responsibilities described in the Plan. The community (or public) refers to anyone who is not an RP

For the release and/or is not conducting specific activities relative to the site investigation or remediation.

Please be advised that LAFD has no authority to regulate worker health and safety. While there are similarities between a "worker health and safety plan" and a *Community Health and Safety Plan*, one should not be substituted for the other, and both should be kept separated. Do not submit "worker health and safety plans" to LAFD. They are not required by LAFD and will not be reviewed by LAFD.

A Plan should adequately address the following topics. If any of the following informational requirements are not relevant to the work being proposed, please state that fact clearly in the Plan. While this section discusses a Plan as though it were a stand-alone document, it may actually be incorporated into a work plan, depending on the scope of work performed.

1. Evaluation of potentials public health hazards and exposure pathways.
2. Site monitoring protocol and equipment.
3. Administrative and/or engineering controls to prevent or minimize public exposure to chemical and physical hazards:
    - Site security
    - Vapors
    - Dust
    - Noise
    - Open excavations
    - Stockpile soil.
4. Site Safety Manager: name and 24-hour emergency telephone number.
5. Emergency planning.
6. Public notification program.

If you require additional information from the Los Angeles Fire Department, please contact the Environmental Unit Plan Check at 213-482-7115.

Dear Ms. Claessens:

The Fire Department has reviewed the "Work Plan for Site Assessment" dated January 21, 2013, as submitted by Roux Associates.

Based on the information provided, this Department approves your work plan provided the following conditions are met:

- Soil samples shall be collected and prepared in accordance with EPA Method 5035.
- All soil and water samples should be analyzed in accordance with EPA Method CAL-LUFT GC-FID for TPH-diesel. EPA Method 8260B for BTEX and oxygenates. Include Naphthalene as part of the analysis.
- Comply with State of California Regional Water Quality Control Board, Los Angeles Region's analytical test methods and detection limits (MDL's).
- Prior to commencing fieldwork, the Fire Department must be given a minimum of **14 days** advance notice in writing or **3-working days** by phone notification, so that one of our staff may be present at our discretion.

Using the Site Address and Permit Number shown at the top of this letter, label the title of your pending report as **Site Assessment Report**. To facilitate processing, complete and return the enclosed **"Required Information Form"** according to the instructions at the top of the form.

The site assessment report and **Required Information Form** are **due** no later than **June 6 2013**. If you require information regarding this matter, please contact Inspector David Riles of the Underground Storage Tanks – Plan Check Unit, at (213) 482-6524.

Please mail your documents to:

Los Angeles Fire Department,
Underground Storage Tanks – Plan Check Unit,
221 North Figueroa Street, Suite 1500,
Los Angeles, CA 90012.

Very truly yours,

BRIAN L CUMMINGS
Fire Chief

Hani Malki, CUPA Manager

A. Laboratory Analytical Data

1.0 INTRODUCTION AND BACKGROUND

The Former Associated Ready Mix and Concrete, Inc. Plant is located at 1361 Sepulveda Boulevard in Torrance, California (Site). The Site is a nearly rectangular, approximately 35,170 square foot (sf) parcel, bounded to the south by Sepulveda Boulevard and to the east, north, and west by Mulligan Family Fun Center, a recreational miniature golf, arcade, and batting cage facility (Figures 1 and 2).

On January 21, 2013, Roux Associates, Inc. (Roux Associates) submitted a Workplan to the Los Angeles Fire Department (LAFD) on behalf of Gaunt Construction (Gaunt), to confirm the conclusions and recommendations of Roux Associates' September 5, 2012, "Underground Storage Tank – Soils Report", and to satisfy the requirements of the LAFD, as presented in a letter dated November 21, 2012. Gaunt was originally contracted by the Site owner, the Georgia Claessens Trust (9 Portuguese Bend Road, Rancho Palos Verdes, CA 90275), to excavate, dispose, and obtain regulatory closure for a 12,000 gallon diesel fuel underground storage tank (UST) formerly located at the Site; the UST was removed on July 26, 2012. Roux Associates' Workplan was approved by the LAFD in a letter dated, March 6, 2013.

2.0 SITE HISTORY

The Site was historically part of the Torrance Oil Field and oil production activities are still evident to the immediate south of the Site, across Sepulveda Boulevard. The former 12,000 gallon diesel UST was located at the central-north portion of the Site (Figure 2) and was used by Associated Ready Mix and Concrete, Inc. to fuel a fleet of concrete ready-mix trucks. As documented by Roux Associates in its September 2012 report, there were no immediate observations during the UST excavation, removal, or confirmatory sampling that suggested significant leaks or spills. However, because concentrations in soils from one of three confirmation samples beneath the UST exceeded 100 milligrams per kilogram (mg/kg) for total petroleum hydrocarbons as diesel range organics (TPH-DRO), the LAFD requested additional investigations in a letter dated, November 21, 2012 (Fire/Safety Violation Notice Number 201210). Following the UST removal from the Site, all asphalt, concrete, and above-ground structures, except for the former concrete/batch tower, were removed. As of the date of this Site Assessment Report, the Site remained an empty, flat, unpaved lot surrounded by 6-foot block walls and fencing (Figure 3).

3.0 GEOLOGY AND SOILS

The Site is located within the Coastal Plain of Los Angeles Groundwater Basin and is underlain by Quaternary sedimentary deposits consisting of gravels, sands, silts, and clays. Regional topography in the vicinity of the Site slopes to the south-southeast towards Machado Lake.

As described in the September 2012 report and confirmed during this investigation, soils at the Site consist of brown, moist, silty fine sand overlying a silty clay above a yellow, silty fine sand. The sands encountered were clean and uniform with no observed staining. The clay was soft, dark grayish brown, with a very strong hydrocarbon odor, which likely was related to heavy oils from former oil field operations at the Site and in the surrounding area. The sand underlying the clay had no observed staining and no hydrocarbon odor.

4.0 HYDROGEOLOGY

Based on information available on Geotracker (http://geotracker.waterboards.ca.gov/) for a former Shell service station at the southeastern corner of Sepulveda Boulevard and Western Avenue, first groundwater is encountered at a depth of approximately 80 feet below ground surface (bgs) and regional groundwater flow is to the southeast. According to information available on the Department of Public Works (DPW) website (http://dpw.lacounty.gov/general/wells/) the closest drinking water well to the Site (Well ID 769) is located approximately 1.5 miles to the southwest, near the corner of Lomita Boulevard and Crenshaw Boulevard. The last reported depth to water measurement in Well ID 769 was 82 feet bgs in 2008. Groundwater was not encountered to the total depth explored at the Site during this investigation.

5.0 COMMUNITY HEALTH AND SAFETY PLAN

Because the Site is secured by 6-foot fencing and block wall on all sides; the area of the Site where drilling occurred was well away from any potential receptors of noise or dust; and, the drilling methodology employed (push-probe drilling) did not generate any cuttings, so no nuisance was created during implementation of the scope of work described herein. Roux Associates prepared a site-specific Health & Safety Plan (HASP) prior to initiating fieldwork to ensure worker and subcontractor health and safety during the work, in compliance with State and Federal Occupational Safety and Health Administration (OSHA) requirements.

6.0 OBJECTIVE

Based on the observations made during removal of the UST and laboratory results for soil samples collected from beneath the UST, Roux Associates recommended Site closure in the September 2012 report. However, because petroleum hydrocarbon concentrations in one confirmation sample exceeded the LAFD action level, a Workplan for additional assessment was requested for the Site by the LAFD in a letter dated, November 21, 2012. The objective of this investigation was to confirm the conclusions and recommendations of the September 2012 report and satisfy the requirements of the LAFD.

7.0 DESCRIPTION OF FIELD ACTIVITIES

On March 13, 2013, Roux Associates notified the LAFD of fieldwork to be conducted at the Site (personal communication with LAFD Inspector David Riles). On March 18, 2013, Roux Associates and its drilling contractor, Vironex, Inc., mobilized to the Site to drill one push-probe soil boring (GC-UST-CTR-2) directly beneath confirmatory sample Roux-GC-UST-Pit-CTR, which was collected during the UST removal event in July 2012 (Figure 4). Soil samples were collected at five foot intervals beginning at 15 feet bgs and the boring was extended to a total depth of 40 feet bgs, which based on field screening, appeared to be free from hydrocarbon impacts for at least three consecutive samples. Soils were field-screened for volatile organic compounds (VOCs) by placing soils into a Ziploc bag, allowing time for potential vapors to off-gas, and measuring the headspace gas with a photo-ionization detector (PID). In addition, soils were logged by an experienced Roux Associates Geologist, using the United Soils Classification System (USCS). As mentioned, field observations and measurements were used to guide the total depth of the investigation and all observations were recorded in a field log book. All work was performed under the direct supervision of a California Registered Professional Geologist.

8.0 SOIL SAMPLING

Beginning at 15 feet bgs, soil samples were retrieved at regular 5-foot intervals and collected into 18-inch acetate sleeves. Samples were initially subcored and put into laboratory supplied vials with preservative, consistent with United States Environmental Protection Agency (USEPA) Method 5035. Soil samples were capped with Teflon tape and plastic caps, labeled, and put on ice for transportation, under proper chain of custody, to American Analytics Laboratory (AAL), a State accredited analytical laboratory in Chatsworth, California. Consistent with LAFD requirements, all soil samples were analyzed for benzene, toluene, ethylbenzene, and total xylenes (BTEX) by USEPA Method 8260B and total petroleum hydrocarbons as diesel range organics (TPH-DRO) by USEPA Method 8015M. Because confirmatory soil samples collected during UST removal had TPH gas range organic (TPH-GRO) concentrations below the laboratory Method Reporting Limit (MRL) of 10 mg/kg and because the Site history does not include use of gasoline for the former operations, it was agreed that TPH-GRO and fuel oxygenates would not be included as part of the analytical suite for this investigation.

9.0 FIELD OBSERVATIONS AND LABORATORY ANALYTICAL RESULTS

Screening and visual observation of soil samples collected during the investigation suggested that little to no hydrocarbon impacts were present at the depths sampled during UST removal (15 feet bgs), which was consistent with the conditions reported in the September 2012 report. However, heavy staining and hydrocarbon odor were encountered in a clay layer at 25 feet bgs. The impacts appeared relatively isolated, as sandy soils encountered directly beneath this layer and to the terminus of the boring (40 feet bgs) did not exhibit any evidence of staining or hydrocarbon odor. The soil profile from 15 feet bgs was logged by a Roux Associates Geologist, as follows:

- 15 to 21 feet bgs – Dark yellowish brown sand with some silt and trace gravel; sand; moist; mild hydrocarbon odor; PID readings between 2.7 and 20.8 parts per million by volume (ppmv);
- 21 to 28 feet bgs – Dark grayish brown silty clay; moist; strong hydrocarbon odor; plastic; PID reading of 368.7 ppmv; and
- 26 to 40 feet bgs –Pale yellow fine sand with trace silts; moist; no odor; PID readings between 0 and 0.1 ppmv.

Below, Table 1 presents the results of laboratory analyses conducted on all samples collected during this investigation.

Table 1. Soil Analytical Results

Boring ID	Sample Depth (ft)	TPH-DRO (C10 - C28)	Benzene	Ethylbenzene	Toluene	o-Xylene	m,p-Xylenes
		EPA 8015 (mg/kg)	EPA 5035/8260B (mg/kg)	EPA 5035/8260B (mg/kg)	EPA 5035/8260B (mg/kg)	EPA 5035/8260B (mg/kg)	EPA 5035/8260B (mg/kg)
GC-UST-CTR-2	15	**110**	**0.0037**	**0.036**	**0.0027**	**0.0023**	**0.017**
	20	**580**	<0.0020	**0.2**	**0.0021**	**0.024**	**0.17**
	25	**19000**	**0.0024**	**0.57**	<0.0020	**0.16**	**0.46**
	30	<5.0	<0.0020	<0.0020	<0.0020	<0.0020	<0.0020
	35	<5.0	<0.0020	<0.0020	<0.0020	<0.0020	<0.0020
	40	<5.0	<0.0020	<0.0020	<0.0020	<0.0020	<0.0020

TPH-DRO concentrations consistent with those reported during the UST removal were reported for samples collected from 15 and 20 feet bgs (110 mg/kg and 580 mg/kg, respectively). Consistent with field screening and visual observations, the sample collected from 25 feet bgs had a TPH-DRO concentration of 19,000 mg/kg. Also consistent with field screening and visual

observations, the TPH-DRO concentration of samples collected from 30, 35, and 40 feet bgs were below the laboratory method reporting limit (MRL) of 5 mg/kg.

BTEX concentrations were low for all samples, including below MRLs (0.0020 mg/kg) for all constituents in the samples collected from 30, 35, and 40 feet bgs. All detectable BTEX concentrations were below 1 mg/kg for individual constituents with maximum reported concentrations, as follows:

- benzene – maximum of 0.0037 mg/kg in the sample collected from 15 feet bgs;
- ethylbenzene – maximum of 0.57 mg/kg in the sample collected from 25 feet bgs;
- toluene – maximum of 0.0027 mg/kg in the samples collected from 15 feet bgs;
- o-xylenes – maximum of 0.16 mg/kg in the sample collected from 25 feet bgs; and
- m,p-xylenes – maximum of 0.46 mg/kg in the sample collected from 25 feet bgs.

The hydrocarbon impacts observed in the field at 25 feet bgs and confirmed through laboratory analytical testing, suggest that elevated hydrocarbon concentrations are found in a thin lens in the vicinity of the former UST at the Site. It is possible these hydrocarbons are related to a former release at the Site or the aforementioned oil field operations that are common to the Torrance area. Regardless, field observations and laboratory analytical testing confirm that impacts do not extend below 25 feet bgs at the Site, and are therefore, shallow and localized.

10.0 CONCLUSIONS AND RECOMMENDATIONS

At the request of LAFD and on behalf of Gaunt Construction, Roux Associates successfully implemented the scope of work presented in the January 21, 2013 Workplan for the Site, which was approved by the LAFD on March 6, 2013. The activities described in this report, in conjunction with the activities presented in the September 2012 report, have addressed all of the requirements of the LAFD with respect to the Site. Based on the known Site history, observations made during fieldwork, and analytical data generated for soil samples collected during this investigation and UST removal, it appears that hydrocarbons present in soils in the vicinity of the former UST are shallow and localized. Additionally, there is reason to suspect that some or all of the hydrocarbons found in soils at the Site may be associated with former oil field operations. Regardless, hydrocarbons in soils do not extend below 25 feet bgs.

Based on the above, Roux Associates recommends no further investigation at the Site and respectfully requests that the LAFD issue a letter of No Further Action for the former on-Site UST.

Please call me with any questions related to the work performed at the Site. I can be reached by telephone at 310-879-4920 or by email at mescobar@rouxinc.com. Thank you.

Re : Gaunt Ready Mix - UST Removal - 2013

A84113 / 3C18007

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 03/18/13 15:57 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile

Operations Manager

Facility ID#: 26166
RE: Permit#: 29081

Formerly Ready Mix & Concrete
1361 West Sepulveda Boulevard
Torrance, California

Dear Ms. Claessens:

The Fire Department has reviewed the "Site Assessment Report" dated April 19, 2013, submitted by Roux Associates, Incorporated.

This letter confirms the completion of a site investigation conducted under Division 5, Permit No. 29081 at the above site address. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquires are greatly appreciated. The Fire Department has determined that no further action is required at this site.

Based on information in the above-referenced file, and provided that the information provided to this agency was accurate and representative of site conditions, this Agency finds that the site investigation and corrective action carried out at your site under permit number «PermitNo» is in compliance with the requirements of Subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required. This notice is issued pursuant to Subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please note, this correspondence does not exempt you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at this site. Additionally, you maintain responsibility to correct additional or previously unidentified conditions at the site, which cause, or may thereafter cause, pollution or nuisance, or otherwise pose a threat to water quality or public health.

If you require additional information regarding this matter, please contact Inspector David Riles of the Los Angeles Fire Department - Environmental Unit, at (213) 482-6524.

Very truly yours,

BRIAN L. CUMMINGS
Fire Chief

RE Phase I Environmental Site Assessment of
Mulligan's Family Fun Center
1351 Sepulveda Boulevard
Torrance, California 90501
BBG Project No.: 0515001075

To whom it may concern:

Aaron & Wright Assessment, LLC dba BBG Assessment (BBG) has completed a Phase I Environmental Site Assessment (ESA) of the above referenced property. The assessment was conducted in accordance with the ASTM International (ASTM) E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, any client specific scope of work provided, and generally accepted industry standards.

This report was prepared solely for the use of Symetra Life Insurance Company and First Symetra National Life Insurance Company of New York (hereinafter "Client" or "User") and any party specifically referenced in Section 2.6 of this report. No other party shall have the right to rely on this report or the finding herein, without the prior written consent of BBG.

Sincerely,
BBG ASSESSMENT

Richard Dagnall
Senior Managing Director

1.0 EXECUTIVE SUMMARY

1.1 Property Description

Property Name:	Mulligan's Family Fun Center
Property Address:	1351 Sepulveda Boulevard
City, State Zip Code:	Torrance, California 90501

The Property consists of three parcels of land totaling 7.4 acres. The Property is improved with one commercial single-story building. The building is of concrete masonry unit (CMU) construction built on a reinforced concrete slab-on-grade foundation. The building was originally constructed in 1968 with addition in 1972. Other improvements include go-cart tracks, batting cage, miniature golf, power boat peddler, service structure, storage yard, concrete driveways and parking, concrete sidewalks and landscaping. At the time of the assessment, the Property was occupied by Mulligan's Family Fun Center. The center consists of arcades, dinning, go-cart, rock-wall climbing, batting cage, miniature golf, laser tags and power boat peddler.

A Property Location Map and a Property Diagram are included in Appendix 1. Photographs of the Property are provided in Appendix 2.

1.2 Findings, Opinions and Conclusions

BBG has a performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of 1351 Sepulveda Boulevard, Torrance, California, the Property. Any exceptions to, or deletions from, this practice are described in Section 12 of this report. This assessment has revealed no evidence of RECs in connection with the Property except for the following:

- The Property was utilized for oil production purposes from 1928 to 1952. A 2013 limited subsurface investigation conducted near the central portion of the Property as part of a UST removal indicated that heavy staining and hydrocarbon odor were encountered in a clay layer at 25 feet. The impacts appeared relatively isolated, as sandy soils encountered directly below this layer and to a depth of 40 feet did not exhibit staining or hydrocarbon odor. Based on the Phase II results and the years of operation for oil production, BBG considers the historical uses of the Property a REC.

A de minimis condition is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. This assessment has revealed no evidence of de minimis conditions.

An historical recognized environmental condition (HREC) refers to an environmental condition which would have been considered a REC in the past, but which is no longer considered a REC based on subsequent assessment and/or remediation of any contaminants to below the most restrictive (generally residential) cleanup target concentrations or regulatory closure with no formal or implied restricted uses. The assessment has revealed no evidence of HRECs in connection with the Property, except for the following:

- A 12,000-gallon diesel fuel UST was removed from the Property on July 6, 2012. One closure sample exceeded the LAFD action level and a release was reported. A sampling was conducted and the incident was closed. Based on a No Further Action (NFA) letter with no stipulated institutional or engineering controls, BBG considers the former UST an HREC.

No significant data gaps were identified that would affect the ability of the environmental professional to identify RECs at the Property.

The ASTM Standard was designed solely to meet the requirements of the USEPA's All Appropriate Inquiries (AAI) to permit the potential purchaser to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. It is possible for there to be business environmental risks (BERs) related to ASTM scope considerations that do not meet the definition of a BER. This assessment has revealed no evidence of BERs associated with the standard ASTM scope considerations except for the following:

- The surrounding properties were utilized for oil production purposes from as early as 1928 until as late as 1963; and was developed for commercial, industrial and residential use and occupied by industrial structures and single family residences from 1970 to the present. It appears that the adjoining properties have experienced at least 50 years of industrial usage and would not necessarily be considered "pristine." BBG, however, did not identify a specific release or indication of a release that would meet the definition of a REC. Given that much of the operations occurred during a period with little or no environmental regulations concerning the storage, handling, use or disposal of hazardous substances, BBG does consider the historical usage of the adjoining properties a BER.

At the request of Client, BBG conducted a preliminary evaluation for asbestos-containing material (ACM), radon, lead-based paint (LBP), drinking water quality, mold, floodplains and wetlands which are considered ASTM Non-Scope Considerations. This assessment has revealed no concerns relating to these ASTM Non-Scope Considerations in connection with the Property except for the following:

- Based on the pre-1989 date of construction, it is possible that friable and non-friable ACM is present. Suspect materials observed during the property reconnaissance include vinyl flooring, vinyl flooring mastic, ceiling tiles, roofing materials, drywalls and joint compound. The suspect materials were observed to be in good condition.

- Based on the pre-1979 date of construction, it is LBP was used at the Property. The painted surfaces observed were in good condition. The Property is not used residentially. The possible presence of LBP is considered a BER.

1.3 Recommendations

A previous subsurface investigation has shown that there are likely localized areas of contamination due to historical oil production operations at the Property. Additionally, the surrounding properties have been used for oil production and industrial uses. Any future redevelopment of the Property should take into consideration that areas of subsurface contamination could be encountered and may need to be addressed.

Suspect ACM was identified on the Property. These materials were observed to be in good condition. ACM typically do not release measurable amounts of asbestos fibers unless the materials are disturbed or damaged. Based on the condition of the materials observed BBG recommends that these materials be managed under an asbestos operations and maintenance (O&M) program until such time as renovation or demolition activities necessitate their abatement, or analytical testing proves the material to be non-ACM. The O&M program should follow the USEPA Guidance Document: *Managing Asbestos in Place – A Building Owner's Guide to Operation and Maintenance Programs for Asbestos-Containing Materials.* The objective of the O&M program is to implement a practical management approach to controlling ACM at the Property, by monitoring its condition, controlling any activities that might impact the ACM, and responding promptly should the material be damaged.

NESHAP regulations require sampling of potential ACM prior to any renovation or demolition activities likely to disturb the material, regardless of the date of construction. If such activities are planned, an asbestos survey of the entire facility, or the portion slated for the renovation or demolition activities, is warranted prior to initiating these activities. No survey was conducted as part of this assessment. The survey should be conducted by a licensed firm and should include an assessment of all suspect ACM including those which are not normally accessible. Any material found to be ACM should be handled in accordance with applicable regulations.

While LBP may be present, based on the date of construction of the existing improvements, the Property is not used for residential purposes. Based on non-residential usage of the property, no further action or study with regard to LBP at the Property is recommended at this time. The paint should, however, be sampled prior to any actions likely to impact the painted surfaces, such as sanding, scraping or heat-gun removal; otherwise the paint should be assumed to be LBP. Any proven or assumed LBP should be removed and handled in a controlled manner in accordance with applicable regulations.

BBG recognizes that there may be various options for dealing with the concerns identified.

The options provided by BBG are not necessarily the only acceptable alternatives for dealing with a particular concern. Factors such as planned changes to property use, planned renovations, capital restraints or other variables may change what would be considered the most appropriate or prudent alternative. BBG provides these options solely as guidance for further action.

2.0 INTRODUCTION

2.1 Purpose

The purpose of the ESA is to identify Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs) and Historical Recognized Environmental Conditions (HRECs) and de minimis conditions as defined by ASTM E1527-13.

The term REC is defined as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

The term CREC is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls."

The term HREC is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls."

The term de minimis condition is defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are neither RECs nor CRECs."

The term Business Environmental Risk (BER) is used to describe environmental risks from ASTM scope considerations that do not rise to the level of a REC, but which BBG is of the opinion should be brought to the attention of Client, and environmental risks associated ASTM non-scope considerations addressed during this assessment.

2.2 Scope of Work

The ESA was conducted in accordance with ASTM E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (Standard Practice), the scope of work provided by the Client, and generally accepted industry standards, and is designed to meet the United States Environmental Protection Agency (USEPA) Standards

and Practices for All Appropriate Inquiries (AAI) pursuant to 40 Code of Federal Regulations (CFR) Part 312.

Additionally, BBG addressed certain ASTM non-scope considerations. These non-scope considerations include asbestos-containing materials (ACM), radon, lead-based paint (LBP), microbial growth, drinking water quality, flood zones, and wetlands.

A more detailed scope of work is provided in Section 14.

2.3 Significant Assumptions

- BBG assumes the Property has been correctly identified by the User, designated representative of the User, property owner or operator, and/or the designated representative of the property owner or operator.

- BBG assumes that the User, designated representative of the User, property owner or operator, and/or the designated representative of the property owner or operator used good faith in answering questions about and providing information for the Property.

- BBG assumes the direction of groundwater is consistent with the contours depicted on the Unites States Geological Survey (USGS) topographic map covering the Property, unless otherwise specified by actual well data for the Property or properties in the area, or BBG's experience and knowledge of the area.

2.4 Limiting Conditions

- The scope of work completed was designed solely to meet the needs of BBG's Client. BBG shall not be liable for any unintended usage of this report by another party. Additionally, based on the ASTM Standard Practice, the ESA is only valid if completed within 180 days of an acquisition or the transaction necessitating the ESA, unless updated in accordance with terms outlined within the Standard Practice.

- No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. This ESA was designed to reduce but not eliminate uncertainty regarding the existence of such conditions in a manner that recognizes reasonable limits of time and cost. BBG has completed this ESA in accordance with generally accepted consulting practices, and makes no other warranties, either expressed or implied, as to the character and nature of such services or product.

- An ESA is intended to be a non-intrusive investigation and generally does not include sampling or testing of air, soil, water, or building materials. No destructive testing was completed and concealed areas, such as behind walls or within machinery, were not accessed. Any testing, including that for ACM, LBP and radon, is designed solely to meet the needs of

the Client, not to meet any local, state or federal regulations and should not be utilized as such. Any test results obtained are for the personal use of Client only and are not intended for submittal to any regulatory agency.

- Information needed to complete the ESA is based on personal interviews, government records, published resources, and various historical documents. Accuracy and completeness of information varies among information sources and is often inaccurate or incomplete. An environmental professional is not required by the ASTM Standard Practice to verify independently the information provided but may rely on information provided unless the environmental professional has actual knowledge that certain information is incorrect or unless it is obvious that certain information is incorrect based on other information obtained or otherwise actually known to the environmental professional.

- BBG shall have no on-going obligation to obtain and include information that was not reasonably ascertainable, practically reviewable, or provided to BBG in a reasonable timeframe to formulate an opinion and complete the assessment by the agreed upon due date.

- An ESA includes some information that may be relevant to regulatory compliance, but is not intended and shall not be construed as a compliance audit and cannot be considered a verification of regulatory compliance. Depending on its past, present or future intended use, the property under review may or may not be subject to regulation and permitting under environmental and health and safety laws, such as, but not limited to, the Clean Air Act, the Clean Water Act, the Solid Waste Disposal Act, the Occupational Safety and Health Act, and other federal, state and local regulations. BBG assumes no responsibility or liability respecting regulatory permitting or compliance issues.

2.5 Special Terms and Conditions

There are no special terms and conditions associated with this ESA.

2.6 Reliance

This investigation was conducted on behalf of and for the exclusive use of Symetra Life Insurance Company and First Symetra National Life Insurance Company of New York (Client). This report, and the findings contained herein, shall not, in whole or part, be disseminated or conveyed to or used by any other party without the prior written consent of BBG.

3.0 PROPERTY DESCRIPTION

3.1 Property Details

Property Size:	7.4 acres
Source:	Los Angeles County Assessor's Office
Property Usage:	Family Fun Center
Number of Buildings:	One
Date of Construction:	1968
Source:	Los Angeles County Assessor's Office
Building Size:	11,592 SF (gross)
Source:	Los Angeles County Assessor's Office
Legal Description:	Legal descriptions for each of the lots are provided in Appendix 3.
Tenants:	The Property is a single-tenant facility and is occupied by Mulligan's Family Fun Center. The center consists of arcades, dinning, go-cart, rock-wall climbing, batting cage, miniature golf, laser tags and power boat peddler.

3.2 Utility and Service Providers

Electricity:	Los Angeles Department of Water and Power
Gas:	The Gas Company
Potable Water:	City of Los Angeles
Sanitary Sewer:	City of Los Angeles
Storm Water:	City of Los Angeles

3.3 Adjoining Properties

The ASTM Standard Practice defines adjoining properties as "any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them." The following adjoining properties were noted.

North: The Property is bordered to the north by Murad Beauty Supply (1340 Storm Parkway), Room & Board Delivery Center (1330 Storm Parkway) and All Access Staging & Products (1320 Storm Parkway).

East: The Property is bordered to the east by vacant land (1309-1313 Sepulveda Boulevard).

South: The Property is bordered to the south by Sepulveda Boulevard, followed by single family residences and oil wells.

West: The Property is bordered to the west by Signtronix (1445 Sepulveda Boulevard).

4.0 PHYSICAL SETTING

Information regarding topography, geology and hydrology are used to evaluate the likelihood of hazardous substances and petroleum products to migrate onto, within or from the Property. BBG attempted to determine the general physical setting of the Property using one or more of the physical setting sources outlined in Section 8.2.4 of the ASTM Standard Practice.

4.1 Topography

Property Elevation:	Approximately 60 feet above mean sea level (MSL)
Topography:	The Property is relatively flat or moderately sloped, with a slight gradient to the northeast. The areas surrounding the Property slope to the northeast.
Source:	Property elevation and topography are based upon a review of the applicable USGS topographic map. The relevant portion of the topographic map is included in Appendix 1.

4.2 Surface Water Bodies

On-Site Water Bodies:	There are no surface water bodies on or bordering the Property.
Nearest Surface Water Body:	The nearest off-site surface water body is Dominguez Channel located approximately 2.25 miles to the northeast of the Property.

4.3 Geology and Hydrology

Geology and Soils:	The Property is located on the southeastern portion of the Torrance Plain. The rectangular shaped Torrance Plain extends approximately 28 miles from Santa Monica in the northwest to Long Beach to the southeast and is 5 to 12 miles wide. The relatively flat Torrance Plain consists of marine and non-marine sediments.
Source:	GeoTracker
Depth to Groundwater:	Between 78 and 81 feet below grade
Anticipated Flow Direction:	Southeast
Basis of Flow Direction:	According to the Groundwater Monitoring report for the former Shell Station site located approximately 1,700 feet to the northwest of the Property, the direction of groundwater flow

beneath the Property is inferred to be to the southeast.

4.4 Minerals Exploration and Production

Oil and Gas Wells:	No oil or gas wells or oil and gas production equipment were observed at the Property during the site reconnaissance; however, according to the California Department of Oil, Gas and Geothermal Resources (DOGGR) online mapping system, six oil wells (F D Davison Wells 1 and 4, Atlantic Richfield Wells House 1 & 2 and Hub 1 and Collier Investment Inc. Well 1) were located on the Property. These oil wells were plugged and abandoned in accordance with California Department of Conservation, Division of Oil and Gas requirements.
Pipelines:	No petroleum pipelines were observed on or adjoining the Property. No pipelines were depicted on the USGS Topographic Map.
Mining Activities:	No mining activities were observed on or adjoining the Property. No mining activities were depicted on the USGS Topographic Map.

5.0 INTERVIEWS, RECORDS AND MUNICIPAL INFORMATION

5.1 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the Property. According to the ASTM Standard Practice and EPA's AAI Rule, the following items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the environmental professional. The responsibility for qualifying for Landowner Liability Protections (LLPs) by conducting the following inquiries ultimately rests with the User, and providing the following information to the environmental professional would be prudent if such information is available. The AAI rule does not require submission of this information to the environmental professional.

- Recorded Land Title Records

User did not provided BBG the results of a search of recorded land title records for the purpose of identifying environmental liens filed or recorded against the Property or activity and use limitations (AULs) in place at the Property under federal, tribal, state or local law.

- Specialized or Actual Knowledge or Experience

User did not inform BBG of specialized knowledge of conditions indicative of releases or threatened releases at the Property or at adjoining properties which could impact the Property. User did not inform BBG of actual knowledge of environmental liens or AULs encumbering the Property or in connection with the Property.

- Significantly Lower Purchase Price

User did not provide information to BBG indicating the purchase price of the Property was below the fair market price for a comparable property, or that any difference in price was likely the result of the presence of hazardous substance or petroleum products.

- Commonly Known or Reasonably Ascertainable Information

User did not inform BBG of any commonly known or reasonably ascertainable information within the local community about the Property.

- Degree of Obviousness

User did not indicate any reason to suspect or have knowledge of obvious presence or likely presence of releases or threatened releases at the Property.

- Reason for Performing the Phase I ESA

User indicated the reason for conducting the ESA was to assist in the underwriting of a proposed mortgage loan backed by the Property, not to qualify for a landowner liability protection (LLP) to CERCLA liability.

5.2 Owners, Operators and/or Neighboring Properties

Key Site Manger:	Robert Thomas, Mulligan's Family Fun Center
Telephone/Email/Website:	(714) 484-6799
Pertinent Information:	Mr. Robert Thomas had no records or recollection of any releases, likely releases or imminent threat of releases of hazardous substance or petroleum products at the Property. Mr. Robert Thomas was not aware of environmental liens filed against the Property or any AULs filed or recorded against the Property, or any past, threatened or pending lawsuits or administrative proceedings related to environmental issues. Mr. Robert Thomas was not aware of USTs or ASTs on the Property or any specific past or present chemical releases or spills.
Property Contact/Escort:	Vanessa Sanchez, Facility Manager of Mulligan Family Fun Center
Pertinent Information:	Ms. Vanessa Sanchez was unaware of any RECs, HRECs, environmental liens or AULs associated with the Property. She did not provide any significant historical use information regarding the Property.

5.3 Municipal/Government Agencies

Fire Department Contact:	Los Angeles Fire Department
Telephone/Email/Website:	(213) 978-3700
Pertinent Information:	BBG submitted a Freedom of Information Act (FOIA) request to the fire department in an effort to obtain information pertaining to USTs, ASTs, reported incidents of hazardous material releases, or other similar circumstances that could be of environmental concern at the Property. BBG has not received a response as of the date of this report. Based on the other information obtained during this assessment, the lack of a response is not considered significant in identifying RECs associated with the Property.

Building Department Contact:	Los Angeles Building Department
Telephone/Email/Website:	(213) 482- 6862
Pertinent Information:	BBG contacted the building department in an effort to obtain information pertaining to USTs, ASTs, reported incidents of hazardous material releases, or other similar circumstances that could be of environmental concern at the Property. According to the building department records, the Property was occupied by single family residence prior to the construction of current structure in 1968 and the addition in 1972. The Property was converted into current family fun center in 1993/94.
Health Department Contact:	Los Angeles County Public Health Investigation
Telephone/Email/Website:	(323) 890 7801
Pertinent Information:	BBG submitted a Freedom of Information Act (FOIA) request to the health department in an effort to obtain information pertaining to USTs, ASTs, reported incidents of hazardous material releases, or other similar circumstances that could be of environmental concern at the Property. BBG has not received a response as of the date of this report. Based on the other information obtained during this assessment, the lack of a response is not considered significant in identifying RECs associated with the Property.
Planning Department Contact:	Los Angeles Planning Department
Telephone/Email/Website:	http://zimas.lacity.org
Pertinent Information:	According to the website, the Property is zoned light manufacturing (M2).
Assessor Contact:	Los Angeles County Assessor's Office
Telephone/Email/Website:	http://maps.assessor.lacounty.gov
Pertinent Information:	According to the website, the Property is identified by Assessor Parcel Numbers (APNs) 7347-018-078, 7347-018-085 and 7347-018-003. The current building is approximately 11,592 SF and was constructed in 1968. The three lots total approximately 7.4 acres,

6.0 ENVIRONMENTAL RECORDS

BBG obtained a commercially-available regulatory records database report containing the standard environmental record sources identified in ASTM 1527-05 as well as any additional environmental record source determined to be: 1) reasonably ascertainable; 2) sufficiently useful, accurate and complete; and 3) generally obtained, pursuant to local good commercial or customary practice in initial ESAs in the type of commercial real estate transaction involved. A detailed description of the records reviewed and a listing of all of the identified sites are provided in Appendix 4. Accuracy and completeness of record information varies among information sources and is often inaccurate or incomplete. BBG cannot warrant the accuracy of the information, but has made reasonable efforts to compensate for mistakes or insufficiencies in the information reviewed that are obvious in light of other information of which BBG has actual knowledge. BBG reviewed the environmental record sources to identify sites involved in the storage, use, generation, disposal, or release of petroleum products and/or hazardous substance and has evaluated the potential for releases at the Property or the migration of contaminants onto the Property from off-site sources via soil, groundwater, or vapor.

6.1 Environmental Records Sources

ENVIRONMENTAL RECORD SOURCES	SEARCH DISTANCE	PROPERTY LISTED	TOTAL PLOTTED
Federal NPL	1.0 miles	No	0
Federal Delisted NPL	0.5 miles	No	0
Federal CERCLIS	0.5 miles	No	0
Federal CERCLIS NFRAP	0.5 miles	No	0
Federal RCRA CORRACTS	1.0 miles	No	0
Federal RCRA TSD	0.5 miles	No	0
Federal RCRA generators	Property and adjoining	No	22
Federal institutional/engineering controls	Property only	No	0
Federal ERNS	Property only	No	0
State and tribal-equivalent NPL	1.0 miles	No	1
State and tribal-equivalent CERCLIS	0.5 miles	No	11

ENVIRONMENTAL RECORD SOURCES	SEARCH DISTANCE	PROPERTY LISTED	TOTAL PLOTTED
State and tribal landfill and solid waste	0.5 miles	No	0
State and tribal leaking storage tanks	0.5 miles	No	20
State and tribal registered storage tanks	Property and adjoining	No	2
State and tribal institutional/engineering controls	Property only	No	0
State and tribal voluntary cleanup	0.5 miles	No	0
State and tribal Brownfield	0.5 miles	No	0
Additional environmental record sources	Various	Yes	40
EDR exclusive records	Various	No	1

Anticipated Groundwater flow direction: Southeast

The groundwater flow direction is used to determine whether sites are located up-, cross- or down-gradient of the Property, which provides an indication of their potential to impact the Property.

- Property

The Property was identified on the HAZNET database. According to the database report, Mulligan's Family Fun Center generated waste oil & mixed oil, other organic solids, unspecified solvent mixture, and other inorganic solid wastes between 2007 and 2011, which was transported off-site under manifest and disposed at a disposal facility. HAZNET does not track violators and the presence of a facility on the database does not indicate that an environmental concern exists. Based on the nature of the listing, a file review is not warranted. Activities at the Property are discussed in Section 8.

The Property is identified as Andre Cailler/A & A Ready Mixed Company at 1361 Sepulveda Boulevard. One diesel tank was present at the Property but has been removed.

The Property was identified as Torrance Plant, at 1361 Sepulveda Boulevard. According to the database report, a release of petroleum hydrocarbon was reported in 2011. The release reportedly impacted soil only. The City of Los Angeles is the lead agency for this site. Case closure was granted on February 13, 2014. BBG reviewed an April 19, 2013 Site Assessment Report

prepared by Roux Associates, Inc. (Roux). A 12,000-gallon diesel fuel UST was removed from the Property on July 6, 2012. No obvious signs of a release were noted. One closure sample exceeded the LAFD action level. Roux conducted additional sampling. Screening and visual observations of soils samples collected suggested little to no hydrocarbon impacts were present at depths of 15 feet. Heavy staining and hydrocarbon odor were encountered in a clay layer at 25 feet. The impacts appeared relatively isolated, as sandy soils encountered directly below this layer and to a depth of 40 feet did not exhibit staining or hydrocarbon odor. Roux concluded "Based on the known Site history, observations made during fieldwork, and analytical data generated for soil samples collected during this investigation and UST removal, it appears that hydrocarbons present in soils in the vicinity of the former UST are shallow and localized. Additionally, there is reason to suspect that some or all of the hydrocarbons found in soils at the Site may be associated with former oil field operations. Regardless, hydrocarbons in soil do not extend below 25 bgs." The site was granted closure. A copy of the NFA letter is included in Appendix 3. Based on the media affected and the current regulatory status, this site is not considered REC to the Property. Based on the NFA with no stipulated institutional or engineering controls, BBG considers the former UST an HREC.

- Federal RCRA Generator Facilities

The Resource Conservation and Recovery Act (RCRA) generator database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA. While ASTM only requires reviewing the RCRA generator database for the Property and adjoining properties, the database search looked at a wider radius to cover mapping errors. Twenty two (22) generator facilities were identified. BBG reviewed the sites identified and determined that one of the identified sites is an adjoining property. RCRA generator sites located beyond the Property and adjoining properties are generally not considered RECs.

The adjoining facility is listed as Industrial Parts Department at 1309 W. Sepulveda Boulevard. This is the vacant lot to the east. This facility is not listed as having violations. . BBG accessed the USEPA Envirofacts database for additional information. The database indicated the facility was a small-quantity generator (SQG). Based on the Enforcement and Compliance History Online (ECHO) report, the current compliance status is listed as "No Violations." According to the ECHO Report, no inspections have been conducted at and no enforcement actions have been taken against the facility in the last five years. Based on the lack of noted violations or enforcement actions, lack of visual indication of concern noted during the reconnaissance and the fact the facility is not listed on a database of sites with suspected or confirmed releases, this facility is not considered a REC in connection with the Property and a file review is not warranted.

- State and Tribal-equivalent NPL Sites

Many states maintain their equivalent of the Federal National Priorities List (NPL), which contains a list of sites the state has prioritized for remediation. One state-equivalent NPL site was

identified. This site, identified as Halbert's Lumber at 2026 Abalone Avenue, is located in excess of 0.75 miles northwest of the Property. The site involved illegal dumping of wood products resulting in lead, chromium, copper and zinc contaminated soils. Based on the nature of the contamination and the distance, this site is not considered a REC in connection with the Property.

- State and Tribal-equivalent CERCLIS Sites

Many states maintain their equivalent of the Federal Comprehensive Environmental, Response, Compensation and Liability Information System (CERCLIS), which contains the state's list of known or suspected hazardous waste sites. Eleven state-equivalent CERCLIS (ENVIROSTOR) sites identified. The closest site, Oil Well Property at 22800 S. Normandie Avenue, is located in excess of 0.2 miles northeast and cross-gradient of the Property; therefore, it is not considered a REC in connection with the Property. The remaining sites are in excess of 0.3 miles of the Property; therefore, none of these sites is considered a REC in connection with the Property.

- State and Local Leaking Storage Tank Sites

Twelve (12) leaking underground storage tank (LUST) and eight Spills Leaks, Investigations & Cleanup Cost Recovery (SLIC) sites were identified. Two sites are located within 1/8-mile of the Property. The first is for the Property, listed as Torrance Plant at 1361 Sepulveda Boulevard. This release was discussed above.

The second site, identified as Dexol Industries, at 1450 W 228th Street, is located adjacent to the northwest and up-gradient of the Property. According to the database report, this site reported a release of heating oil in 1992. The release reportedly impacted soil only. The City of Los Angeles is the lead agency for this site. Case closure was granted on July 2, 1997. A copy of the NFA letter is included in Appendix 3. Based on the media affected, the case closed status and the almost 20 years that have passed since the case was closed, this site is not considered REC in connection with the Property and a file review is not warranted.

The remaining listed LUST and SLIC sites are located greater than 0.125 miles of the Property. Given the distance, direction, regulatory status, topographic separation, low permeability soils, intervening waterway, intervening urban development, etc., these sites are not considered to pose an environmental concern and are not considered RECs to the Property

- State and Local Registered Storage Tank Facilities

While ASTM only requires reviewing the registered storage tank database for the Property and adjoining properties, the database search looked at a wider radius to cover mapping errors. Thirteen registered underground storage tank (UST) sites were identified, including the Property (listed twice) and discussed above. One additional adjacent site was noted. This is the previously discussed Dexol Industries site to the northwest.

For the reasons previously provided, this site is not considered a REC in connection with the Property. The remaining sites are located in excess of 0.125 miles of the Property.

- Additional Environmental Databases

California historically maintained numerous state and county UST databases, which are generally redundant with the UST, LUST and SLIC databases discussed above. EDR searched the Historical UST database, Facility Inventory Database (FID UST), and the Statewide Environmental Evaluation and Planning System (SWEEPS UST), none of which has been updated since the 1990s. No additional adjacent sites were identified.

Two Resource Conservation and Recovery Act non-generator (RCRA-NonGen) sites were identified in the Other Ascertainable Records reviewed. RCRA-NonGen sites are facilities that no longer generate hazardous wastes. BBG reviewed the identified RCRA-NonGen sites and determined the sites are not located adjacent to the Property; therefore, the RCRA non-generator sites are not considered a REC in connection with the Property.

One Drycleaner facility was identified. This site is identified as Village Cleaners and is located over 0.2 miles southeast and down-gradient of the Property. This site is not listed not any release database that would impact the Property. Based on the lack of a documented release, this site is not expected to represent a significant environmental concern.

EDR provided a review of the Historical Cal-sites and Historical CORTESE databases, neither of which has been updated since the 2000s. Based on BBG's review, no additional sites were noted on these databases that would be considered a REC in connection with the Property.

- EDR Exclusive Records

One Historical Auto Stations was identified within the EDR Proprietary Records reviewed. EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. BBG reviewed the identified EDR Historical Auto Station site and determined the site is not located adjacent to the Property; therefore, the EDR Historical Auto Station site is not considered a REC in connection with the Property.

- Unplottable Sites

The environmental records search sometimes includes a list of "unplottable" or "orphan" sites which may or may not be located within the minimum search distances. BBG reviewed the list of unplottable sites. Based on locations, compliance status and/or the nature of the listing, none of these sites is believed to be a REC in connection with the Property.

6.2 Environmental Records Summary

BBG did not identify environmental records for the Property that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the Property or into the ground, ground water, or surface water of the Property that would be considered a REC in connection with the Property. BBG did not identify environmental records indicating a release of hazardous substances or petroleum products from neighboring properties likely to migrate onto the Property via soil, groundwater or vapor pathways that would be considered a REC or a VEC in connection with the Property.

A 12,000-gallon diesel fuel UST was removed from the Property on July 6, 2012. One closure sample exceeded the LAFD action level and a release was reported. A sampling was conducted and the incident was closed. Based on a No Further Action (NFA) letter with no stipulated institutional or engineering controls, BBG considers the former UST an HREC.

7.0 HISTORICAL USES

BBG attempted to develop a history of the previous uses of the Property and surrounding area in order to help identify the likelihood of past uses having led to RECs in connection with the Property. Efforts were made to identify the uses of the Property back to the Property's first use, or back to 1940, whichever is earlier. BBG relied upon the standard historical sources listed in Section 8.3.4 of the ASTM Standard Practice. Only the sources deemed both reasonably ascertainable and likely to be useful were used.

7.1 Aerial Photographs

Aerial photographs, which are of a sufficient resolution to allow identification of development and activities of areas encompassing the Property, can be used in documenting the historical usage of a property. BBG reviewed the following aerial photographs as provided by EDR, Inc., which are included in Appendix 5.

Date:	1928	
Property:	The Property appears to be developed with four oil wells, one pond, six small aboveground storage tanks and several small structures.	
Adjoining Properties:	North:	The adjoining property to the north appears to be developed with an oil well.
	East:	The adjoining property to the east appears to be developed with oil wells, ponds and small structures.
	South:	The adjoining property to the south appears to be developed with an oil well and Sepulveda Boulevard followed by oil wells and small structures.
	West:	The adjoining property to the west appears to be developed with oil wells, aboveground storage tanks and small structures

Date:	1947	
Property:	The south-southeastern portion of the Property appears to be developed with an oil well, several small structures and a single family residence while the remaining portion of the Property appears to be vacant land.	
Adjoining Properties:	North:	The adjoining property to the north appears to be developed with an oil well and a pond.

	East:	The adjoining property to the east appears to be developed with small structures.
	South:	The adjoining property to the south appears to be Sepulveda Boulevard, followed by oil wells and a pond.
	West:	The adjoining property to the west appears to be developed with oil wells and small structures
Date:	1952	
Property:	The south-southeastern portion of the Property appear to be developed with an oil well, an aboveground storage tank and three to four residential structures while the remaining portion of the Property appears to be vacant land	
Adjoining Properties:	North:	No significant changes visible.
	East:	The adjoining property to the east appears to be developed with two commercial structures and a storage yard.
	South:	The adjoining property to the south appears to be Sepulveda Boulevard, followed by oil well and a pond.
	West:	The adjoining property to the west appears to be developed with small structures
Date:	1963	
Property:	The southeastern portion of the Property appears to be developed with residential structures. The south central portion of the Property is developed with a concrete mix facility. The remaining portion of the Property appears to be vacant land.	
Adjoining Properties:	North:	The adjoining property to the north appears to be vacant land.
	East:	The adjoining property to the east appears to be developed with several industrial structures and a storage yard.
	South:	The adjoining property to the south appears to be Sepulveda Boulevard, followed by vacant land.

	West:	The adjoining property to the west appears to be developed with oil wells and aboveground storage tanks
Date:	1970	
Property:	The northern portion of the Property appears to be developed with a storage yard. The eastern portion of the Property appears to be developed with a small structure & storage yard. The central portion of the Property appears to be developed with a commercial structure with parking lot. The south-central portion of the Property appears developed with a concrete mix facility.	
Adjoining Properties:	North:	The adjoining property to the north appears to be developed with a lumber yard.
	East:	The adjoining property to the east appears to be developed with several industrial structures.
	South:	The adjoining property to the south appears to be Sepulveda Boulevard, followed by single family residence and an oil production area.
	West:	The adjoining property to the west appears to be developed with industrial structures
Date:	1977	
Property:	The northern portion of the Property appears to be vacant land. The eastern portion of the Property appears to be developed with a small structure with storage yard. The central portion of the Property appears to be developed with a commercial structure with parking lot. The south-central portion of the Property appears to be developed with a concrete mix facility.	
Adjoining Properties:	North:	The adjoining property to the north appears to be developed with a lumber yard.
	East:	The adjoining property to the east appears to be developed with several industrial structures.
	South:	The adjoining property to the south appears to be Sepulveda Boulevard, followed by single family residence and an oil production area.

	West:	The adjoining property to the west appears to be developed with an additional industrial structures
Date:	1983	
Property:	The eastern portion of the Property appears to be developed with a small structure with storage yard. The western portion of the Property appears to be developed with a commercial structure with parking lot. The south-central portion of the Property appears to be developed with a concrete mix facility.	
Adjoining Properties:	North:	The adjoining property to the north appears to be developed with a large industrial facility.
	East:	The adjoining property to the east appears to be developed with additional industrial structures.
	South:	No significant changes visible.
	West:	No significant changes visible
Date:	1989	
Property:	The eastern portion of the Property appears to be developed with a small structure with storage yard while the western portion of the Property appears to be developed with a larger commercial structure with parking lot. The south-central portion of the Property appears to be developed with a concrete mix facility.	
Adjoining Properties:	North:	The adjoining property to the north appears to be developed with a storage yard
	East:	No significant changes visible.
	South:	No significant changes visible.
	West:	No significant changes visible

Date:	1994	
Property:	The eastern portion of the Property appears to be developed with a small structure with storage yard while the western portion of the Property appears to be developed with current amusement facility. The south-central portion of the Property appears to be developed with a concrete mix facility.	
Adjoining Properties:	North:	The adjoining property to the north appears to be vacant land
	East:	No significant changes visible.
	South:	No significant changes visible.
	West:	No significant changes visible

Date:	2002 and 2005	
Property:	The Property appears to be developed with current amusement facility and the concrete mix facility.	
Adjoining Properties:	North:	No significant changes visible.
	East:	No significant changes visible.
	South:	No significant changes visible
	West:	No significant changes visible.

Date:	2009, 2010, and 2012	
Property:	No significant changes visible	
Adjoining and Surrounding Properties:	North:	The adjoining property to the north appears to be developed with industrial structures.
	East:	No significant changes visible.
	South:	No significant changes visible
	West:	No significant changes visible.

7.2 Fire Insurance Maps

A number of publishers formerly produced maps that showed the location and use of structures on a property at a given point in time. These maps were widely available for areas that were significantly developed during the late 1800s through the 1950s, though coverage exists for some areas through the 1990s.

BBG attempted to obtain historical maps from EDR, Inc. covering the Property. No historical Sanborn maps were identified. The "no coverage" notification is included in Appendix 5.

7.3 Property Tax Files

Tax files are files kept for property tax purposes by the local jurisdiction where the property is located and may include records of past ownership, appraisals, maps, sketches, and photographs. BBG reviewed the property tax files for the Property available on line from the Los Angeles County Assessor's Office. The website included general property information such as property size, building size and date of construction, which has been incorporated into the applicable sections on this report. No significant historical use information was provided. No indications of environmental concern were noted.

7.4 Recorded Land Title Records

Land title records are records of historical fee ownership, which may include leases, land contracts and AULs on or of the property recorded in the place where land title records are, by law or custom, recorded for the local jurisdiction in which the property is located, often such records are kept by a municipal or county recorder or clerk. Such records may be obtained from title companies or directly from the local government agency. A chain-of-title was not provided to BBG for review.

7.5 Historical USGS Topographic Maps

Historical topographic maps can indicate whether an area is undeveloped, lightly developed or heavily developed. They can also indicate if roads, railroad tracks, quarrying operations or water bodies were previously or near a property. No historical topographic maps were reviewed as part of this assessment due to the sufficient prior use history obtained through the other standard historical sources.

7.6 Local Street Directories

Local street directories identify the name of the individual or company located at a given address. BBG accessed local street directories at the Sherman Library of Corona Del Mar. The following local street directories were reviewed:

Date:	1956
Property:	There are no listings for Property.
Adjoining Properties:	There are no listings for the adjoining properties.

Date:	1958
Property:	The Property is listed as Brady Howard.
Adjoining Properties:	The east adjoining property is listed as Westrac Company, Cal Metal Corporation and Musselman H A Electric Company. There are no listings for the north, south, and west adjoining properties.

Date:	1962
Property:	The Property is listed as Brady L M.
Adjoining Properties:	The east adjoining property is listed as Westrac Company, Cal Metal Corporation and Musselman H A Electric Company. There are no listings for the north, south, and west adjoining properties.

Date:	1967
Property:	The Property is listed as Pony Ride and A & A Ready Mix Concrete.
Adjoining Properties:	The east adjoining property is listed as Pettibone and Westrac Company, Cal Metal Corporation and Musselman H A Electric Company. The west adjoining property is listed as Danna of California. There is not listing for the south adjoining property.

Date:	1972
Property:	The Property is listed as Cal Metal Corporation and A & A Ready Mix Concrete.
Adjoining Properties:	The east adjoining property is listed as Doud William E & Co. Inc., Industrial Parts Depot, and Torrance Machinery & Engineering. The west adjoining property is listed as Danna of California. There is not listing for the south adjoining property.

Date:	1977
Property:	The Property is listed as Cal Metal Corporation, Pacific Railroad Construction and A & A Ready Mix Concrete.
Adjoining Properties:	The east adjoining property is listed as Industrial Parts Depot, and Torrance Machinery & Engineering. The west adjoining property is listed as Danna of California. There is not listing for the south adjoining property.
Date:	1982
Property:	The Property is listed as Murray Western Foods, Pacific Railroad Construction and A & A Ready Mix Concrete.
Adjoining Properties:	The east adjoining property is listed as Industrial Parts Depot, and Torrance Machinery & Engineering. The west adjoining property is listed as Danna of California.
Date:	1987
Property:	The Property is listed as Champagne Sunny, Douglas R V Storage and A & A Ready Mix Concrete.
Adjoining Properties:	The east adjoining property is listed as V O Engineering, Conlisk Electric and Torrance Machinery & Engineering. The west adjoining property is listed as Gulf Development.
Date:	1992
Property:	The Property is listed as Douglas R V Storage, Douglas Development and A & A Ready Mix Concrete.
Adjoining Properties:	The north adjoining property is listed as Tokico America Inc. The east adjoining property is listed as Storm Industries, West Walk Corporation, Western Brass Industries, Conlisk Electric. The west adjoining property is listed as Gulf Development.

Date:	2002
Property:	The Property is listed as Mulligan's Family Fun Center and A & A Ready Mix Concrete.
Adjoining Properties:	The north adjoining property is listed as California Outdoor Decorators. The east-adjoining property is listed as Storm Industries, West Walk Corporation, Western Brass Industries, Conlisk Electric. The west adjoining property is listed as Gulf Development.

Date:	2009
Property:	The Property is listed as Mulligan's Family Fun Center and A & A Ready Mix Concrete.
Adjoining Properties:	The north adjoining property is listed as All Access Staging & Productions and California Outdoor Decorators. The east adjoining property is listed as National Charity Support Foundation.

Date:	2011
Property:	The Property is listed as Mulligan's Family Fun Center and A & A Ready Mix Concrete.
Adjoining Properties:	The north adjoining property is listed as All Access Staging & Productions and California Outdoor Decorators. The east adjoining property is listed as National Charity Support Foundation.

7.7 Building Department Records

Review local building department records to determine construction dates for the existing and past improvements, records of the installation or removal of USTs and ASTs, records of when the Property was connected to municipal water and/or sewer, and the names of prior owners or tenants.

Building department records generally consist of local government records indicating permission of the local government to construct, alter, or demolish improvements on the property. Often building department records are located in the building department of a municipality or county. BBG reviewed the building department records for the Property at the Los Angeles Building Department. Based on these records, the Property was occupied by single family residence prior to the construction of current structure in 1968 with addition in 1972. The Property was converted into current family fun center in 1993/94.

7.8 Zoning/Land Use Records

Zoning or land use records generally consist of local government records indicating the uses permitted by the local government in particular zones within its jurisdiction. The records may consist of maps and/or written records. The records are often located in the planning department of a municipality or county. BBG reviewed zoning/land use records for the Property at the Los Angeles Planning Department. Based on these records, the Property is zoned light manufacturing (M2).

7.9 Previous Assessment/Reports

BBG reviewed the report listed below. Pertinent information from the reports is summarized below.

Title:	Site Assessment Report
Prepared by:	Roux Associates, Inc. (Roux)
Date:	April 19, 2013
Pertinent Information:	A 12,000-gallon diesel fuel UST was removed from the Property on July 6, 2012. No obvious signs of a release were noted. One closure sample exceeded the LAFD action level. Roux conducted additional sampling. Screening and visual observations of soils samples collected suggested little to no hydrocarbon impacts were present at depths of 15 feet. Heavy staining and hydrocarbon odor were encountered in a clay layer at 25 feet. The impacts appeared relatively isolated, as sandy soils encountered directly below this layer and to a depth of 40 feet did not exhibit staining or hydrocarbon odor. Roux concluded "Based on the known Site history, observations made during fieldwork, and analytical data generated for soil samples collected during this investigation and UST removal, it appears that hydrocarbons present in soils in the vicinity of the former UST are shallow and localized. Additionally, there is reason to suspect that some or all of the hydrocarbons found in soils at the Site may be associated with former oil field operations. Regardless, hydrocarbons in soil do not extend below 25 bgs."

7.10 Other Historical Sources

Other historical sources include sources that are credible to a reasonable person and that identify past uses of the property. This category includes, but is not limited to: miscellaneous maps, newspaper archives, internet sites, community organizations, local libraries, historical societies,

current owners or occupants of neighboring properties, or records in the files and/or personal knowledge of the property owner and/or occupants. BBG did not review other historical sources for the Property based on prior use history obtained through the other standard historical sources.

7.11 Data Failure

Based on the information above, it is BBG's opinion that following data failures, as defined in Section 8.3.2.3 of the ASTM guidelines, have occurred in attempting to document the historical uses of the Property:

- While BBG was able to document the historical uses of the Property back prior to 1940, the Property was already developed at the earliest documented source as an oil field. This data failure is not considered a significant data gap.

- Some of the intervals between documented sources exceeded five years; however, based on the similar usage during the periods documented, this data failure is not considered a significant data gap.

Neither of the data failures affected the ability of the Environmental Professionals involved in this assessment to identify RECs in connection with the Property; therefore, they are not considered significant data gaps.

7.12 Historical Use Summary

The Property was utilized for oil production purposes from as early 1928 until as late as 1952; was occupied by residential structures from 1937 to 1967; and was developed for commercial use and occupied by Cal Metal Corporation, Pacific Railroad Construction, Murray Western Food, Douglas RV Storage, Douglas Development and A & A Ready mix Concrete from 1968 to 1992 and Mulligan's Family Fun Center from 1993 to the present.

A 2013 limited subsurface investigation conducted near the central portion of the Property as part of a UST removal indicated that heavy staining and hydrocarbon odor were encountered in a clay layer at 25 feet. The impacts appeared relatively isolated, as sandy soils encountered directly below this layer and to a depth of 40 feet did not exhibit staining or hydrocarbon odor. Roux concluded "Based on the known Site history, observations made during fieldwork, and analytical data generated for soil samples collected during this investigation and UST removal, it appears that hydrocarbons present in soils in the vicinity of the former UST are shallow and localized. Additionally, there is reason to suspect that some or all of the hydrocarbons found in soils at the Site may be associated with former oil field operations. Regardless, hydrocarbons in soil do not extend below 25 bgs." Based on the Phase II results and the years of operation for oil production, BBG considers the historical uses of the Property a REC.

The surrounding properties were utilized for oil production purposes from as early as 1928 until as late as 1963; and was developed for commercial, industrial and residential use and occupied by industrial structures and single family residences from 1970 to the present. It appears that the adjoining properties have experienced at least 50 years of industrial usage and would not necessarily be considered "pristine." BBG, however, did not identify a specific release or indication of a release that would meet the definition of a REC. Given that much of the operations occurred during a period with little or no environmental regulations concerning the storage, handling, use or disposal of hazardous substances, BBG does consider the historical usage of the adjoining properties a BER.

8.0 PROPERTY RECONNAISSANCE AND INVESTIGATION

8.1 Methodology and Limiting Conditions

Assessor:	Nasim Ahmed, REPA A copy of the Assessor's qualifications is included in Appendix 6.
Date of Reconnaissance:	November 11, 2015
Weather Conditions:	At the time of the reconnaissance, it was clear with temperatures around 72 degrees Fahrenheit.
Property Escort:	Vanessa Sanchez, Facility Manager
Methodology:	The property reconnaissance consisted of visual observations of the Property and improvements, adjoining properties, as viewed from the Property boundaries, and the surrounding area based on visual observations made from adjacent public thoroughfares. Building exteriors were observed along the perimeter from the ground, unless described otherwise. Representative interiors areas were observed as they were made safely accessible, unless described otherwise.
Areas Accessed:	BBG access representative areas of the Property.
Inaccessible Areas:	No areas were inaccessible during the assessment.
Other Limitations:	No other significant limitations or physical obstruction were encountered during the property reconnaissance.

8.2 Visual Observations

OBSERVATION	YES	NO
Hazardous Substance and Petroleum Products in Connection with Identified Uses	X	
Hazardous Substance and Petroleum Products in Connection with Unidentified Uses		X
Drums and Containers of Unidentified Substance or Petroleum Products		X
Aboveground and Underground Storage Tanks	X	
Strong, Pungent or Noxious Odors		X
Pools of Liquids		X
Electrical or Hydraulic Equipment likely to Contain Fluids	X	

OBSERVATION	YES	NO
Heating and Cooling Source	X	
Interior Stains or Corrosion other than from Water		X
Floor Drains, Sumps, Clarifiers and Oil/Water Separators		X
Pits, Ponds and Lagoons		X
Exterior Stained Soils or Pavement		X
Stressed Vegetation		X
Onsite Solid Waste Disposal or Unknown Fill		X
Wastewater	X	
Wells		X
Septic Systems and Cesspools		X

- Hazardous Substances and Petroleum Products in Connection with Identified Uses

BBG noted the following hazardous substances and petroleum products in connection with identified uses.

MATERIAL	QUANTITY/LOCATION	CONDITION
Diesel	1 x 200-gallon and 2 x 55-gallon/Next to Go-Cart Area	No leaks or spills
Engine Oil	1 x 55-gallon/Service Area	No leaks or spills
Used Oil	2 x 55-gallon/Storage Yard	No leaks or spills
Parts Cleaners	1 x 55-gallon/Service Area	No leaks or spills
Paint	1-gallon and 5-gallon containers/Service Area	No leaks or spills

- Aboveground and Underground Storage Tanks

BBG observed one 200-gallon aboveground storage tank (AST) for the storage of diesel on the Property. The AST is located on the southeastern portion of the Property. No staining, leaks or spills were noted in the vicinity of the AST, and no releases have been reported to the local agency.

- Electrical or Hydraulic Equipment Likely to Contain Fluid

BBG noted one pad-mounted transformer located on the Property. No signs of leakage were noted; therefore, the electrical equipment is considered a REC.

- Heating and Cooling Source

Heating and cooling systems are fueled natural gas and electricity provided by Southern California Edison and the Gas Company.

- Wastewater

No wastewater streams were noted or reported to BBG with the exception of standard sanitary waste and storm water discharges. Sanitary wastes discharge to the municipal wastewater treatments system. Storm water flows off the Property by sheet flow, percolates into the ground or discharges to the municipal storm water system.

8.3 Visual Observations Summary

No visual, olfactory or other observations were made during the property reconnaissance that would indicate a REC in connection with the Property.

9.0 ASTM NON-SCOPE CONSIDERATIONS

9.1 Asbestos Containing Materials (ACM)

Asbestos is a mineral fiber that has been used commonly in a variety of building construction materials for insulation and as a fire-retardant. Because of its fiber strength and heat resistant properties, asbestos was used in roofing shingles, ceiling and floor tiles, insulation products, asbestos cement products, and a host of other building materials. ACM is often classified as either friable or non-friable. Friable ACM, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure. Non-friable ACM can be crumbled, pulverized, or reduced to powder during machining, cutting, drilling, or other abrasive procedures. When asbestos-containing materials are damaged or disturbed by repair, remodeling or demolition activities, microscopic fibers become airborne and can be inhaled into the lungs, where they can cause significant health problems. Friable ACM is more likely to release fibers when disturbed or damaged than non-friable ACM.

BBG conducted a limited visual screening for the presence of ACM at the Property. The potential for the presence of ACM was evaluated based on the age of the improvements, dates of renovation, and other relevant information. For this assessment, materials listed in Appendix G of the USEPA Guidance Document: *Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials*, which were installed prior to 1989, are suspected of containing asbestos. It should be noted that, while less likely, asbestos may still be found in current building materials, particularly non-friable products, such as sheet vinyl flooring, vinyl floor tiles, floor tile mastic, joint compound, asbestos-cement board and roofing materials.

This limited visual screening does not constitute an asbestos survey, during which all suspect ACM would have been identified and sampled. The possibility exists for ACM, not identified by this screening, to be present at the Property.

Based on the pre-1989 date of construction, it is possible that friable and non-friable ACM is present. Suspect materials observed during the property reconnaissance include vinyl flooring, vinyl flooring mastic, ceiling tiles, roofing materials, drywalls and joint compound. The suspect materials were observed to be in good condition.

9.2 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The USEPA guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is

commonly used for comparison purposes to suggest whether further action at a building may be prudent.

A preliminary evaluation of the potential for concerns relating to radon was made using the USEPA Map of Radon Zones. The USEPA Map is based solely on averages in order to identify areas in the country with the potential for elevated indoor radon levels. Elevated levels of radon have been found in all radon zones. A finding that a property is located in a zone with predicted levels of radon below the USEPA action level does not mean a specific property does not have elevated levels of radon. The evaluation considered the location of the Property, previous test results, if available, type of construction and usage of the Property.

The Property is located in Radon Zone 2, counties which have a predicted average indoor radon screening between 2 pCi/L and the USEPA action level of 4 pCi/L. The Property is not used residentially.

9.3 Lead-Based Paint (LBP)

Lead was added to paint as a pigment, to speed drying, increase durability or to resist moisture. Although lead improves paint, it was found to pose a health hazard, particularly to children under the age of six, whose bodies are still developing. A paint is considered LBP if it contains lead equal to or exceeding 1.0 milligram per square centimeter or 0.5 percent by weight, or 5,000 parts per million (ppm) by weight.

A preliminary evaluation for the presence of LBP was conducted. The evaluation was based on the age of the improvements, the extent of renovations, property usage, and past analytical testing, if available. The Consumer Product Safety Commission banned the use of lead in paint in 1978, 16 CFR 1303. Most manufacturers, however, had ceased using lead well before this time. Paint applied after 1978 is not considered suspect LBP.

A comprehensive LBP survey was not conducted as part of this assessment. Conclusions are based on observations of representative areas only. A finding that LBP is not a significant concern cannot be interpreted as the building is free of LBP.

Based on the pre-1979 date of construction, it is LBP was used at the Property. The painted surfaces observed were in good condition. The Property is not used residentially.

9.4 Drinking Water

The potential for concerns relating to elevated levels of contaminants, particularly lead, was evaluated. The evaluation looked at the source of drinking water and analytical data, if available. The Property receives its water from Los Angeles Department of Water and Power. According to 2014 Consumer Confidence Report, the water that is supplied meets or exceeds the federal and

state drinking water standards, including those for lead; therefore, drinking water quality is not considered a BER in connection with the Property.

9.5 Microbial Growth

Molds are usually not a problem indoors, unless mold spores land on a wet or damp spot and begin growing. Molds have the potential to cause health problems. Molds produce allergens (substances that can cause allergic reactions), irritants, and in some cases, potentially toxic substances (mycotoxins). Inhaling or touching mold or mold spores may cause allergic reactions in sensitive individuals. Allergic responses include hay fever-type symptoms, such as sneezing, runny nose, red eyes, and skin rash (dermatitis). Allergic reactions to mold are common. They can be immediate or delayed. Molds can also cause asthma attacks in people with asthma who are allergic to mold. In addition, mold exposure can irritate the eyes, skin, nose, throat, and lungs of both mold-allergic and non-allergic people. Symptoms other than the allergic and irritant types are not commonly reported as a result of inhaling mold. Research on mold and health effects is ongoing.

BBG conducted a preliminary visual screening for readily observable mold and conditions conducive to mold at the Property. Observations were limited solely to the portions of the Property walked and the evaluation should not be construed as a comprehensive mold survey for the property. No sampling was conducted and no assessment of areas behind walls or in any other way generally inaccessible was performed. In addition, BBG interviewed property representatives regarding past or current water leaks, infiltration or ponding, tenant complaints of mold or health problems, known current mold problems or other concerns relating to indoor air quality at the Property.

No visual or olfactory indications of microbial growth or water infiltration were noted during the property reconnaissance. According to Vanessa Sanches, there are known areas of leaks or water infiltration at the Property and no known problems related to microbial growth. Microbial growth is not considered a BER in connection with the Property.

9.6 Flood Zone and Wetlands

BBG attempted to determine if the Property was located in a flood hazard area or contained jurisdictional wetlands. This screening was based solely on a review of available FEMA Flood Insurance Rate Maps (FIRM) and the United States Fish and Wildlife Service National Wetlands Inventory (NWI) website. This screening should not be considered a formal flood hazard determination or wetlands delineation.

Based on the FEMA FIRM, relevant portions of which are included in Appendix 3, the Property is located in Zone X Unshaded, defined as areas of minimal flood hazard.

Based on the United States Fish & Wildlife Service National Wetlands Inventory website, there are no federally-regulated wetlands located on or adjacent to the Property. A print out of the USFWS Wetlands Mapper system is included in Appendix 3.

9.7 ASTM Non-Scope Consideration Summary

Based on date of construction ACM may be present on the Property and is considered a BER. The materials observed were in good condition or describe the damage.

Based on the pre-1979 date of construction, it is LBP was used at the Property. The painted surfaces observed were in good condition. The Property is not used residentially. The possible presence of LBP is considered a BER.

10.0 FINDINGS, OPINIONS AND CONCLUSIONS

BBG has a performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527 of 1351 Sepulveda Boulevard, Torrance, California, the Property. Any exceptions to, or deletions from, this practice are described in Section 12 of this report. This assessment has revealed no evidence of RECs in connection with the Property except for the following:

- The Property was utilized for oil production purposes from 1928 to 1952. A 2013 limited subsurface investigation conducted near the central portion of the Property as part of a UST removal indicated that heavy staining and hydrocarbon odor were encountered in a clay layer at 25 feet. The impacts appeared relatively isolated, as sandy soils encountered directly below this layer and to a depth of 40 feet did not exhibit staining or hydrocarbon odor. Based on the Phase II results and the years of operation for oil production, BBG considers the historical uses of the Property a REC.

A de minimis condition is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. This assessment has revealed no evidence of de minimis conditions.

An historical recognized environmental condition (HREC) refers to an environmental condition which would have been considered a REC in the past, but which is no longer considered a REC based on subsequent assessment and/or remediation of any contaminants to below the most restrictive (generally residential) cleanup target concentrations or regulatory closure with no formal or implied restricted uses. The assessment has revealed no evidence of HRECs in connection with the Property, except for the following:

- A 12,000-gallon diesel fuel UST was removed from the Property on July 6, 2012. One closure sample exceeded the LAFD action level and a release was reported. A sampling was conducted and the incident was closed. Based on a No Further Action (NFA) letter with no stipulated institutional or engineering controls, BBG considers the former UST an HREC.

No significant data gaps were identified that would affect the ability of the environmental professional to identify RECs at the Property.

The ASTM Standard was designed solely to meet the requirements of the USEPA's All Appropriate Inquiries (AAI) to permit the potential purchaser to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. It is possible for there to be business environmental risks (BERs) related to ASTM scope considerations that do not meet the definition of a BER. This assessment has revealed no evidence of BERs associated with the standard ASTM scope considerations except for the following:

- The surrounding properties were utilized for oil production purposes from as early as 1928 until as late as 1963; and was developed for commercial, industrial and residential use and occupied by industrial structures and single family residences from 1970 to the present. It appears that the adjoining properties have experienced at least 50 years of industrial usage and would not necessarily be considered "pristine." BBG, however, did not identify a specific release or indication of a release that would meet the definition of a REC. Given that much of the operations occurred during a period with little or no environmental regulations concerning the storage, handling, use or disposal of hazardous substances, BBG does consider the historical usage of the adjoining properties a BER.

At the request of Client, BBG conducted a preliminary evaluation for asbestos-containing material (ACM), radon, lead-based paint (LBP), drinking water quality, mold, floodplains and wetlands which are considered ASTM Non-Scope Considerations. This assessment has revealed no concerns relating to these ASTM Non-Scope Considerations in connection with the Property except for the following:

- Based on the pre-1989 date of construction, it is possible that friable and non-friable ACM is present. Suspect materials observed during the property reconnaissance include vinyl flooring, vinyl flooring mastic, ceiling tiles, roofing materials, drywalls and joint compound. The suspect materials were observed to be in good condition.

- Based on the pre-1979 date of construction, it is LBP was used at the Property. The painted surfaces observed were in good condition. The Property is not used residentially. The possible presence of LBP is considered a BER.

11.0 RECOMMENDATIONS

A previous subsurface investigation has shown that there are likely localized areas of contamination due to historical oil production operations at the Property. Additionally, the surrounding properties have been used for oil production and industrial uses. Any future redevelopment of the Property should take into consideration that areas of subsurface contamination could be encountered and may need to be addressed.

Suspect ACM was identified on the Property. These materials were observed to be in good condition. ACM typically do not release measurable amounts of asbestos fibers unless the materials are disturbed or damaged. Based on the condition of the materials observed BBG recommends that these materials be managed under an asbestos operations and maintenance (O&M) program until such time as renovation or demolition activities necessitate their abatement, or analytical testing proves the material to be non-ACM. The O&M program should follow the USEPA Guidance Document: *Managing Asbestos in Place – A Building Owner's Guide to Operation and Maintenance Programs for Asbestos-Containing Materials.* The objective of the O&M program is to implement a practical management approach to controlling ACM at the Property, by monitoring its condition, controlling any activities that might impact the ACM, and responding promptly should the material be damaged.

NESHAP regulations require sampling of potential ACM prior to any renovation or demolition activities likely to disturb the material, regardless of the date of construction. If such activities are planned, an asbestos survey of the entire facility, or the portion slated for the renovation or demolition activities, is warranted prior to initiating these activities. No survey was conducted as part of this assessment. The survey should be conducted by a licensed firm and should include an assessment of all suspect ACM including those which are not normally accessible. Any material found to be ACM should be handled in accordance with applicable regulations.

While LBP may be present, based on the date of construction of the existing improvements, the Property is not used for residential purposes. Based on non-residential usage of the property, no further action or study with regard to LBP at the Property is recommended at this time. The paint should, however, be sampled prior to any actions likely to impact the painted surfaces, such as sanding, scraping or heat-gun removal; otherwise the paint should be assumed to be LBP. Any proven or assumed LBP should be removed and handled in a controlled manner in accordance with applicable regulations.

BBG recognizes that there may be various options for dealing with the concerns identified. The options provided by BBG are not necessarily the only acceptable alternatives for dealing with a particular concern. Factors such as planned changes to property use, planned renovations, capital restraints or other variables may change what would be considered the most appropriate or prudent alternative. BBG provides these options solely as guidance for further action.

12.0 DEVIATIONS AND ADDITIONAL SERVICES

The following items deviated from the ASTM 1527-13 Standard:

- The Standard offers a "Recommended Table of Contents and Report Format." While BBG's report includes all of the information required by the Standard, BBG did not follow the recommend table of contents and report format for all sections of the report.

- The Standard only requires that the preparer of the report determine the presence of RECs, CRECs and HREC, if any, or data gaps that prevent a conclusion regarding the presence of RECs, CRECs and HRECs be made. At the request of Client, BBG has included recommendations in this report.

- At the request of Client asbestos-containing materials, radon, lead-based paint, drinking water quality, and mold were addressed in this ESA. These are considered Non-Scope Considerations by the Standard.

- At the request of Client, a preliminary evaluation was made to determine if the Property was located in a flood plain or if portions of the Property could be classified as wetlands. These are considered Non-Scope Considerations by the Standard.

- The results of additional inquiries required under section 312.22 of 40 CFR 312 were not provided to BBG. All appropriate inquiry does not require submission of this information to the environmental professional.

13.0 DECLARATION OF ENVIRONMENTAL PROFESSIONAL

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared By:

Nasim Ahmed, REPA

Richard Dagnall

14.0 DETAILED SCOPE OF WORK

This ESA was conducted in accordance with ASTM *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* E1527-13 (Standard), the All Appropriate Inquiries (AAI) Rule 40 CFR Part 312, and any additional requirements of Client. While the AAI rule still references the E1527-05 as demonstrating compliance with AAI, the USEPA's position is that the revised standard includes improvements to the previous standard and its use will provide greater clarity with regard to potential contamination at a property; therefore the USEPA recommends that environmental professionals and prospective purchasers use E1527-13 standard.

The scope of services for this assessment included an evaluation of the following:

- Physical characteristics – Consistent with Section 8.2.4 of the ASTM Standard Practice, a current USGS 7.5 Minute Topographic Map (or equivalent) showing the area on which the property is located shall be reviewed. It is the only standard physical setting source and the only physical setting source that is required to be obtained (and only if it is reasonably ascertainable). One or more additional physical setting sources may be obtained in the discretion of the environmental professional. Because such sources provide information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of a site, discretionary physical setting sources shall be sought when deemed necessary by the environmental professional.
- Environmental Records – Consistent with Section 8.2.1 of the ASTM Standard Practice, a review of the standard federal, state and tribal environmental records will be reviewed. Pursuant to Section 8.2.3 of the ASTM Standard Practice, additional local records and/or additional federal, state, or tribal records shall be checked when, in the judgment of the environmental professional, such additional records (1) are reasonably ascertainable, (2) are sufficiently useful, accurate, and complete in light of the objective of the records review, and (3) are generally obtained, pursuant to local good commercial and customary practice, in initial environmental site assessments in the type of commercial real estate transaction involved. If the property or any of the adjoining properties is identified on one or more of the standard environmental record sources, pertinent regulatory files and/or records associated with the listing will be reviewed provided the records are reasonably ascertainable and are available within a reasonable distance, cost and timeframe. If, in the environmental professional's opinion, such a review is not warranted, the environmental professional will provide an explanation within the report the justification for not conducting the regulatory file review.
- Uses of the Property – Consistent with Section 8.3.2 of the ASTM Standard Practice, all obvious uses of the property shall be identified from the present, back to the property's first developed use, or back to 1940, whichever is earlier. This task requires reviewing only as many of the standard historical sources in 8.3.4.1 through 8.3.4.8 as are necessary and both reasonably ascertainable and likely to be useful. The term "developed use" includes agricultural uses and placement of fill dirt. The report shall describe all identified uses, justify the earliest date identified, and explain the reason for any gaps in the history of use. Review of standard historical sources at less than approximately five year intervals is not required by this practice (for example, if the property had

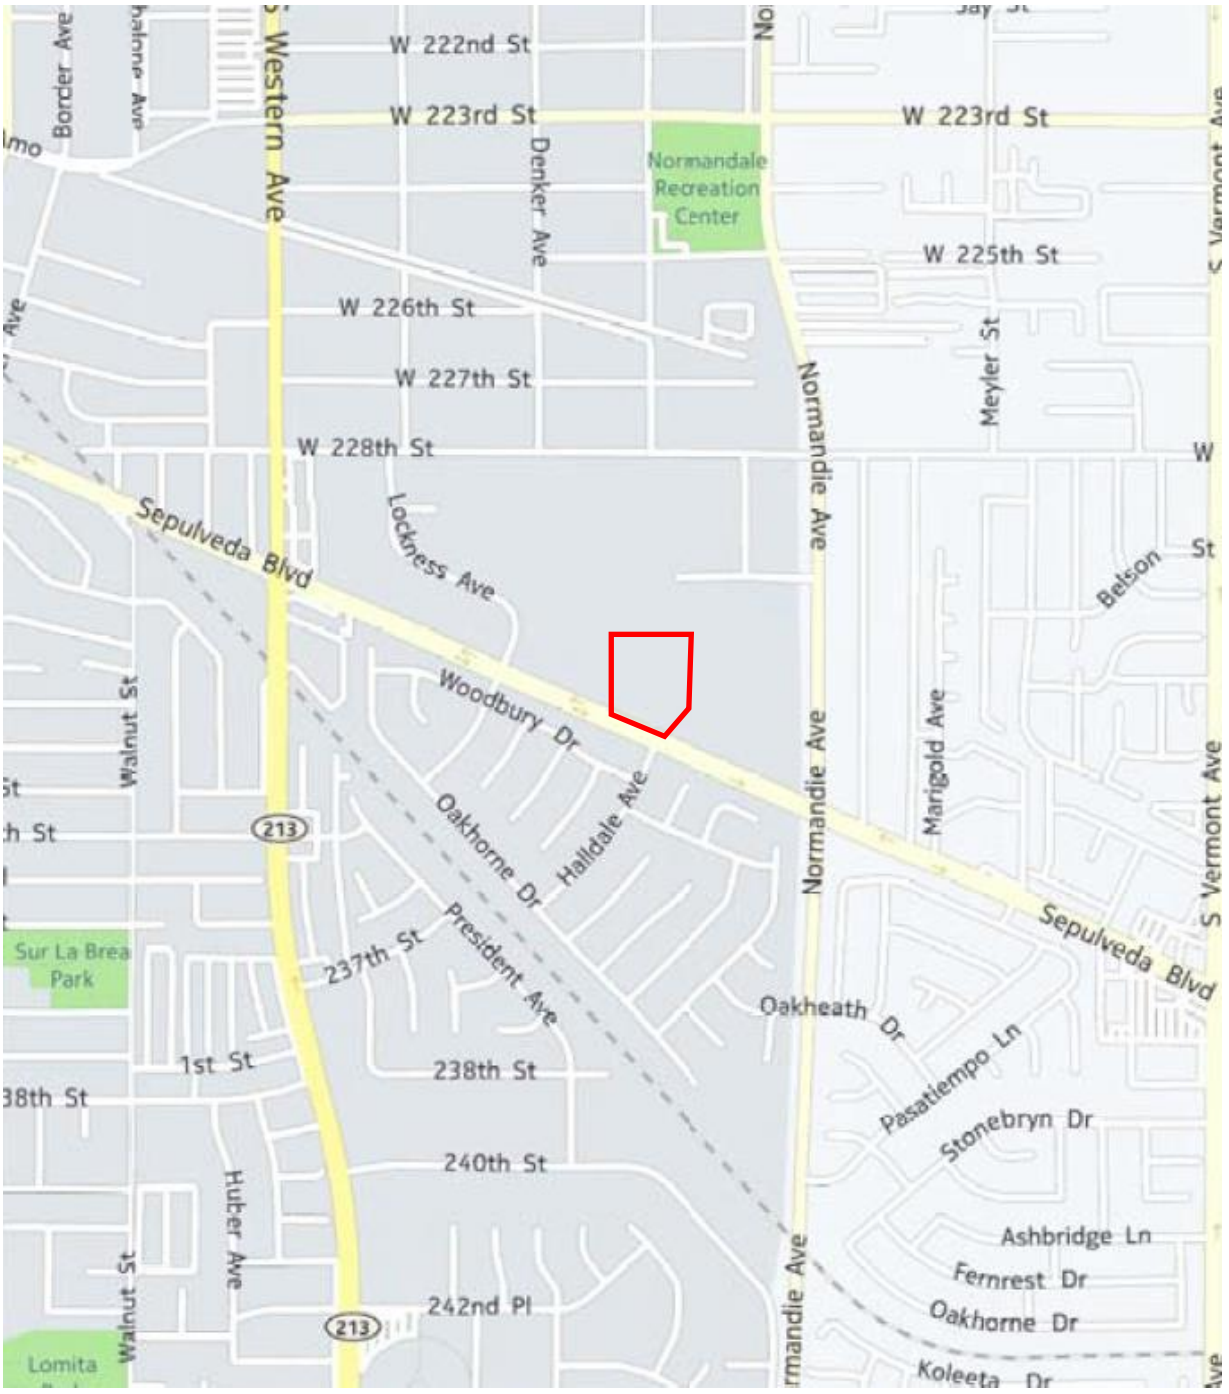
one use in 1950 and another use in 1955, it is not required to check for a third use in the intervening period). If the specific use of the property appears unchanged over a period longer than five years, then it is not required by this practice to research the use during that period.

- Site Reconnaissance – Consistent with Sections 9.2.1 and 9.2.2 of the ASTM Standard Practice, on a visit to the property (the site visit), the property shall be visually and/or physically observed and any structure(s) located on the property to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles shall be observed. The periphery of the property shall be visually and/or physically observed, as well as the periphery of all structures on the property, and the property shall be viewed from all adjacent public thoroughfares. If roads or paths with no apparent outlet are observed on the property, the use of the road or path shall be identified to determine whether it was likely to have been used as an avenue for disposal of hazardous substances or petroleum products. On the interior of structures on the property, accessible common areas expected to be used by occupants or the public (such as lobbies, hallways, utility rooms, recreation areas, etc.), maintenance and repair areas, including boiler rooms, and a representative sample of occupant spaces, shall be visually and/or physically observed. It is not necessary to look under floors, above ceilings, or behind walls.

The ASTM Standard Practice recognizes that there may be environmental issues or conditions at a property that parties may wish to consider. These are considered ASTM Non-Scope Considerations. The following ASTM non-scope considerations were included:

- Asbestos Containing Material (ACM) - The potential for the presence of ACM was evaluated based on the age of the improvements, dates of renovation, and other relevant information. Appendix G of the USEPA Guidance Document: *Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials* (the Green Book) was used as a guide in identifying suspect materials and the definition of suspect ACM and presumed asbestos containing material is taken from 29 CRF Parts 1910, et al. *Occupational Exposure to Asbestos; Final Rule*. Only readily accessible building materials were observed. No destructive means were utilized to gain access to hidden or inaccessible areas such as pipe chases, wet columns, wall voids and ceiling cavities. The level of this preliminary assessment was not intended to comply with the survey requirements of the Asbestos Hazard Emergency Response Act (AHERA) 40 CFR Part 763, National Emission Standard for Hazardous Air Pollutants (NESHAP) 40 CFR 61; the General Duty Clause, 29 USC 654, Section 5; or other federal, state or local regulation.

- Radon – The potential for elevated levels of indoor radon was based on available analytical results, published regional average levels, the usage of the buildings, and the type of construction and mechanical systems present. This evaluation was not designed or intended to comply with any regulatory agency requirements. Sampling, if any, was conducted using short-term radon detectors. The results of such testing are intended solely as a screen and may not be indicative of long-term average radon levels.



- Lead-Based Paint (LBP) – The potential for the presence of LBP at the property was based on available analytical data, the age of the improvements, dates of renovation, and the current and proposed usage of the property. This evaluation was not designed or intended to comply with survey requirements outlined in Housing and Urban Development (HUD) regulations or other federal, state or local regulation.

- Lead in Drinking Water – The potential for elevated levels of lead in the drinking water at the property was based on available analytical data, a determination of the source of the drinking water supply and a review of publically available compliance data reports.
- Microbial Growth – The potential for microbial growth at the property was based on visual observations for signs of water intrusion, water damage, and suspect mold growth and interviews with property representatives. These observations were limited to the areas walked and should not be considered a comprehensive survey of the Property. A finding in this report that "mold is not a significant concern" or "no significant mold was identified" should not be interpreted as the building is free of mold.
- Flood Plains and Wetlands - Evaluation based solely on a review of was based solely on a review of available Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRM), or equivalent, and the United States Fish and Wildlife Service National Wetlands Inventory website. This screening should not be considered a formal flood hazard determination or a wetlands delineation.

AARON & WRIGHT ASSESSMENT, LLC dba BBG ASSESSMENT, LLC

PHASE I ENVIRONMENTAL SITE ASSESSMENT

USER QUESTIONNAIRE & DISCLOSURE STATEMENT

In accordance with ASTM E1527-05, these inquiries of our client must be made, or, if the client is not the final user, then the inquiries must be made to the final user by the client and provided to Aaron & Wright Assessment, LLC (AWA) for our review. Please indicate **Yes** or **No** in each column in response to each question and provide detail where appropriate. In order to qualify for one of the *Landowner Liability Protections (LLPs)*35 offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *user* must provide the following information (if available) to the *environmental professional.* Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

The completed form may be sent by e-mail to mhohne@bbgres.com.

Property Name: Mulligan Family Fun Address: 1351 W. Sepulveda

City/State/Zip Torrance, CA 90501

This questionnaire was completed by:

Name: Robert Thomas Title: President

Company: Mulligan LTD Years Associated with Property: 15

Signature: [signature] Date: 11/25/15

Item	Response
(1.) Environmental cleanup liens that are filed or recorded against the site 40 CFR 312.25). Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?	☐ Yes ☑ No
(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?	☐ Yes ☑ No
(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐ Yes ☑ No
(4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower	☑ Yes ☐ No

purchase price is because contamination is known or believed to be present at the *property*?	
(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30). Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*, (a.) Do you know the past uses of the *property*? (b.) Do you know of specific chemicals that are present or once were present at the *property*? (c.) Do you know of spills or other chemical releases that have taken place at the *property*? (d.) Do you know of any environmental cleanups that have taken place at the *property*?	☑ Yes ☐ No
(6.) The degree of obviousness of the presence of likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?	☐ Yes ☑ No
Reason for performing the ESA: ☐ Qualify for Innocent Landowner defense to CERCLA Liability. ☑ Other: (state below) Land Purchase	

In addition, certain information should be collected, if available, and provided to the *environmental professional* selected to conduct the Phase I. This information is intended to assist the *environmental professional* but is not necessarily required to qualify for one of the *LLPs*. The information includes:

(a) the reason why the Phase I is required,

(b) the type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.,

(c) the complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful),

(d) the scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered),

(e) identification of all parties who will rely on the Phase I *report*,

(f) identification of the site contact and how the contact can be reached,

(g) any special terms and conditions which must be agreed upon by the *environmental professional*, and

(h) any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning he *property* and its environmental condition).

DEPARTMENT OF BUILDING AND SAFETY

BUILDING DIVISION

Application to Alter, Repair, Move or Demolish

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Applicant is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Superintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit:

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley or other public place or portion thereof.

Second: That the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

16. CONTRACTOR, ARCHITECT, & ENGINEER NAME	ADDRESS		CLASS	LICENSE#	PHONE #
(C) Storm Western Development Inc	23223 Normandie Avenue,	Torrance, CA 90501	B	798652	

PERMIT EXPIRATION/REFUNDS: This permit expires two years after the date of the permit issuance. This permit will also expire if no construction work is performed for a continuous period of 180 days (Sec. 98.0602 LAMC). Claims for refund of fees paid must be filed within one year from the date of expiration for permits granted by LADBS (Sec. 22.12 & 22.13 LAMC). The permittee may be entitled to reimbursement of permit fees if the Department fails to conduct an inspection within 60 days of receiving a request for final inspection (HS 17951).

17. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. The following applies to B contractors only: I understand the limitations of Section 7057 of the Business and Professional Code related to my ability to take prime contracts or subcontracts involving specialty trades.

License Class: **B** Lic. No.: **798652** Contractor: **STORM WESTERN DEVELOPMENT INC**

18. WORKERS' COMPENSATION DECLARATION

I hereby affirm, under penalty of perjury, one of the following declarations:

(__) I have and will maintain a certificate of consent to self insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

(X) I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier: **Comp West Ins. Co.** Policy Number: **CA005001636**

(__) I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

19. ASBESTOS REMOVAL DECLARATION / LEAD HAZARD WARNING

I certify that notification of asbestos removal is either not applicable or has been submitted to the AQMD or EPA as per section 19827.5 of the Health and Safety Code. Information is available at (909) 396-2336 and the notification form at www.aqmd.gov. Lead safe construction practices are required when doing repairs that disturb paint in pre-1978 buildings due to the presence of lead per section 6716 and 6717 of the Labor Code. Information is avaiable at Health Services for LA County at (800) 524-5323 or the State of California at (800) 597-5323 or www.dhs.ca.gov/childlead.

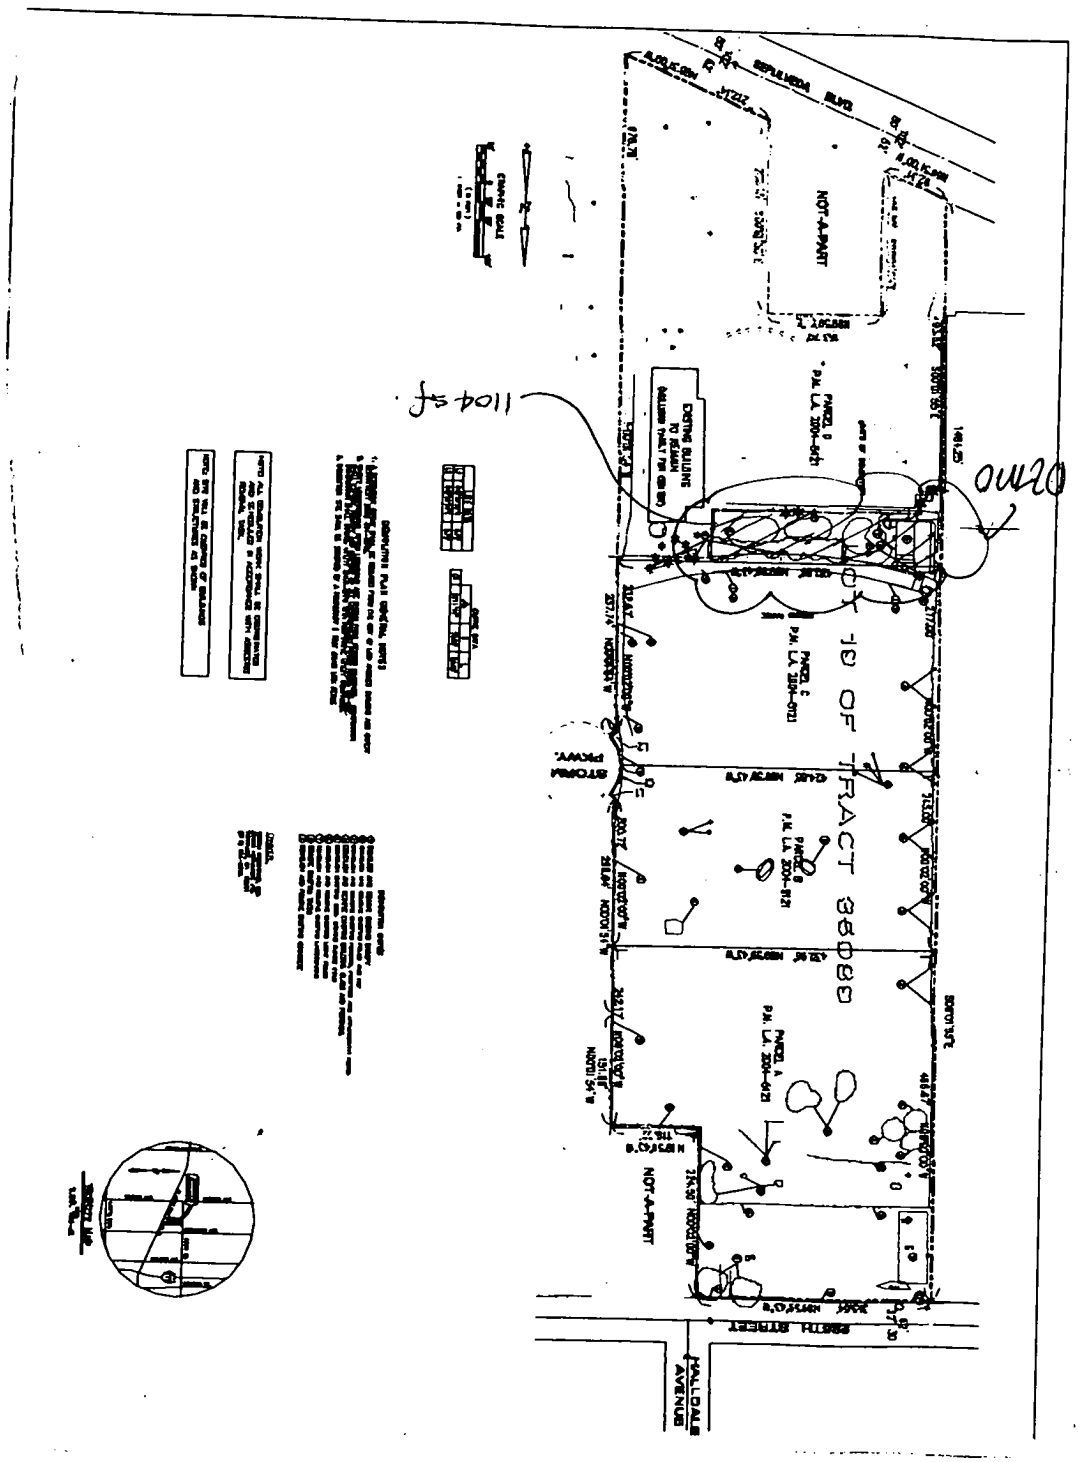
20. CONSTRUCTION LENDING AGENCY DECLARATION

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).
Lender's name (if any): _____ Lender's address: _____

21. FINAL DECLARATION

I certify that I have read this application **INCLUDING THE ABOVE DECLARATIONS** and state that the above information **INCLUDING THE ABOVE DECLARATIONS** is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes. I realize that this permit is an application for inspection and that it does not approve or authorize the work specified herein, and it does not authorize or permit any violation or failure to comply with any applicable law. Furthermore, neither the City of Los Angeles nor any board, department officer, or employee thereof, make any warranty, nor shall be responsible for the performance or results of any work described herein, nor the condition of the property nor the soil upon which such work is performed. I further affirm under penalty of perjury, that the proposed work will not destroy or unreasonably interfere with any access or utility easement belonging to others and located on my property, but in the event such work does destroy or unreasonably interfere with such easement, a substitute easement(s) satisfactory to the holder(s) of the easement will be provided (Sec. 91.0106.4.3.4 LAMC).

By signing below, I certify that:



(1) I accept all the declarations above namely the Licensed Contractor's Declaration, Workers' Compensation Declaration, Asbestos Removal Declaration / Lead Hazard Warning, Construction Lending Agency Declaration and Final Declaration; and
(2) This permit is being obtained with the consent of the legal owner of the property.

Rancho Palos Verdes, CA. 90275

Facility ID#: 26166
RE: Permit#: 29081

Formerly Ready Mix & Concrete
1361 West Sepulveda Boulevard
Torrance, California

Dear Ms. Claessens:

The Fire Department has reviewed the "Site Assessment Report" dated April 19, 2013, submitted by Roux Associates, Incorporated.

This letter confirms the completion of a site investigation conducted under Division 5, Permit No. 29081 at the above site address. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquires are greatly appreciated. The Fire Department has determined that no further action is required at this site.

Based on information in the above-referenced file, and provided that the information provided to this agency was accurate and representative of site conditions, this Agency finds that the site investigation and corrective action carried out at your site under permit number «PermitNo» is in compliance with the requirements of Subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required. This notice is issued pursuant to Subdivision (g) of Section 25296.10 of the Health and Safety Code.

Please note, this correspondence does not exempt you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at this site. Additionally, you maintain responsibility to correct additional or previously unidentified conditions at the site, which cause, or may thereafter cause, pollution or nuisance, or otherwise pose a threat to water quality or public health.

If you require additional information regarding this matter, please contact Inspector David Riles of the Los Angeles Fire Department - Environmental Unit, at (213) 482-6524.

Very truly yours,

BRIAN L. CUMMINGS
Fire Chief

A. Laboratory Analytical Data

1.0 INTRODUCTION AND BACKGROUND

The Former Associated Ready Mix and Concrete, Inc. Plant is located at 1361 Sepulveda Boulevard in Torrance, California (Site). The Site is a nearly rectangular, approximately 35,170 square foot (sf) parcel, bounded to the south by Sepulveda Boulevard and to the east, north, and west by Mulligan Family Fun Center, a recreational miniature golf, arcade, and batting cage facility (Figures 1 and 2).

On January 21, 2013, Roux Associates, Inc. (Roux Associates) submitted a Workplan to the Los Angeles Fire Department (LAFD) on behalf of Gaunt Construction (Gaunt), to confirm the conclusions and recommendations of Roux Associates' September 5, 2012, "Underground Storage Tank – Soils Report", and to satisfy the requirements of the LAFD, as presented in a letter dated November 21, 2012. Gaunt was originally contracted by the Site owner, the Georgia Claessens Trust (9 Portuguese Bend Road, Rancho Palos Verdes, CA 90275), to excavate, dispose, and obtain regulatory closure for a 12,000 gallon diesel fuel underground storage tank (UST) formerly located at the Site; the UST was removed on July 26, 2012. Roux Associates' Workplan was approved by the LAFD in a letter dated, March 6, 2013.

2.0 SITE HISTORY

The Site was historically part of the Torrance Oil Field and oil production activities are still evident to the immediate south of the Site, across Sepulveda Boulevard. The former 12,000 gallon diesel UST was located at the central-north portion of the Site (Figure 2) and was used by Associated Ready Mix and Concrete, Inc. to fuel a fleet of concrete ready-mix trucks. As documented by Roux Associates in its September 2012 report, there were no immediate observations during the UST excavation, removal, or confirmatory sampling that suggested significant leaks or spills. However, because concentrations in soils from one of three confirmation samples beneath the UST exceeded 100 milligrams per kilogram (mg/kg) for total petroleum hydrocarbons as diesel range organics (TPH-DRO), the LAFD requested additional investigations in a letter dated, November 21, 2012 (Fire/Safety Violation Notice Number 201210). Following the UST removal from the Site, all asphalt, concrete, and above-ground structures, except for the former concrete/batch tower, were removed. As of the date of this Site Assessment Report, the Site remained an empty, flat, unpaved lot surrounded by 6-foot block walls and fencing (Figure 3).

3.0 GEOLOGY AND SOILS

The Site is located within the Coastal Plain of Los Angeles Groundwater Basin and is underlain by Quaternary sedimentary deposits consisting of gravels, sands, silts, and clays. Regional topography in the vicinity of the Site slopes to the south-southeast towards Machado Lake.

As described in the September 2012 report and confirmed during this investigation, soils at the Site consist of brown, moist, silty fine sand overlying a silty clay above a yellow, silty fine sand. The sands encountered were clean and uniform with no observed staining. The clay was soft, dark grayish brown, with a very strong hydrocarbon odor, which likely was related to heavy oils from former oil field operations at the Site and in the surrounding area. The sand underlying the clay had no observed staining and no hydrocarbon odor.

4.0 HYDROGEOLOGY

Based on information available on Geotracker (http://geotracker.waterboards.ca.gov/) for a former Shell service station at the southeastern corner of Sepulveda Boulevard and Western Avenue, first groundwater is encountered at a depth of approximately 80 feet below ground surface (bgs) and regional groundwater flow is to the southeast. According to information available on the Department of Public Works (DPW) website (http://dpw.lacounty.gov/general/wells/) the closest drinking water well to the Site (Well ID 769) is located approximately 1.5 miles to the southwest, near the corner of Lomita Boulevard and Crenshaw Boulevard. The last reported depth to water measurement in Well ID 769 was 82 feet bgs in 2008. Groundwater was not encountered to the total depth explored at the Site during this investigation.

5.0 COMMUNITY HEALTH AND SAFETY PLAN

Because the Site is secured by 6-foot fencing and block wall on all sides; the area of the Site where drilling occurred was well away from any potential receptors of noise or dust; and, the drilling methodology employed (push-probe drilling) did not generate any cuttings, so no nuisance was created during implementation of the scope of work described herein. Roux Associates prepared a site-specific Health & Safety Plan (HASP) prior to initiating fieldwork to ensure worker and subcontractor health and safety during the work, in compliance with State and Federal Occupational Safety and Health Administration (OSHA) requirements.

6.0 OBJECTIVE

Based on the observations made during removal of the UST and laboratory results for soil samples collected from beneath the UST, Roux Associates recommended Site closure in the September 2012 report. However, because petroleum hydrocarbon concentrations in one confirmation sample exceeded the LAFD action level, a Workplan for additional assessment was requested for the Site by the LAFD in a letter dated, November 21, 2012. The objective of this investigation was to confirm the conclusions and recommendations of the September 2012 report and satisfy the requirements of the LAFD.

7.0 DESCRIPTION OF FIELD ACTIVITIES

On March 13, 2013, Roux Associates notified the LAFD of fieldwork to be conducted at the Site (personal communication with LAFD Inspector David Riles). On March 18, 2013, Roux Associates and its drilling contractor, Vironex, Inc., mobilized to the Site to drill one push-probe soil boring (GC-UST-CTR-2) directly beneath confirmatory sample Roux-GC-UST-Pit-CTR, which was collected during the UST removal event in July 2012 (Figure 4). Soil samples were collected at five foot intervals beginning at 15 feet bgs and the boring was extended to a total depth of 40 feet bgs, which based on field screening, appeared to be free from hydrocarbon impacts for at least three consecutive samples. Soils were field-screened for volatile organic compounds (VOCs) by placing soils into a Ziploc bag, allowing time for potential vapors to off-gas, and measuring the headspace gas with a photo-ionization detector (PID). In addition, soils were logged by an experienced Roux Associates Geologist, using the United Soils Classification System (USCS). As mentioned, field observations and measurements were used to guide the total depth of the investigation and all observations were recorded in a field log book. All work was performed under the direct supervision of a California Registered Professional Geologist.

8.0 SOIL SAMPLING

Beginning at 15 feet bgs, soil samples were retrieved at regular 5-foot intervals and collected into 18-inch acetate sleeves. Samples were initially subcored and put into laboratory supplied vials with preservative, consistent with United States Environmental Protection Agency (USEPA) Method 5035. Soil samples were capped with Teflon tape and plastic caps, labeled, and put on ice for transportation, under proper chain of custody, to American Analytics Laboratory (AAL), a State accredited analytical laboratory in Chatsworth, California. Consistent with LAFD requirements, all soil samples were analyzed for benzene, toluene, ethylbenzene, and total xylenes (BTEX) by USEPA Method 8260B and total petroleum hydrocarbons as diesel range organics (TPH-DRO) by USEPA Method 8015M. Because confirmatory soil samples collected during UST removal had TPH gas range organic (TPH-GRO) concentrations below the laboratory Method Reporting Limit (MRL) of 10 mg/kg and because the Site history does not include use of gasoline for the former operations, it was agreed that TPH-GRO and fuel oxygenates would not be included as part of the analytical suite for this investigation.

9.0 FIELD OBSERVATIONS AND LABORATORY ANALYTICAL RESULTS

Screening and visual observation of soil samples collected during the investigation suggested that little to no hydrocarbon impacts were present at the depths sampled during UST removal (15 feet bgs), which was consistent with the conditions reported in the September 2012 report. However, heavy staining and hydrocarbon odor were encountered in a clay layer at 25 feet bgs. The impacts appeared relatively isolated, as sandy soils encountered directly beneath this layer and to the terminus of the boring (40 feet bgs) did not exhibit any evidence of staining or hydrocarbon odor. The soil profile from 15 feet bgs was logged by a Roux Associates Geologist, as follows:

- 15 to 21 feet bgs – Dark yellowish brown sand with some silt and trace gravel; sand; moist; mild hydrocarbon odor; PID readings between 2.7 and 20.8 parts per million by volume (ppmv);
- 21 to 28 feet bgs – Dark grayish brown silty clay; moist; strong hydrocarbon odor; plastic; PID reading of 368.7 ppmv; and
- 26 to 40 feet bgs –Pale yellow fine sand with trace silts; moist; no odor; PID readings between 0 and 0.1 ppmv.

Below, Table 1 presents the results of laboratory analyses conducted on all samples collected during this investigation.

Table 1. Soil Analytical Results

Boring ID	Sample Depth (ft)	TPH-DRO (C10 - C28)	Benzene	Ethylbenzene	Toluene	o-Xylene	m,p-Xylenes
		EPA 8015 (mg/kg)	EPA 5035/8260B (mg/kg)	EPA 5035/8260B (mg/kg)	EPA 5035/8260B (mg/kg)	EPA 5035/8260B (mg/kg)	EPA 5035/8260B (mg/kg)
GC-UST-CTR-2	15	**110**	**0.0037**	**0.036**	**0.0027**	**0.0023**	**0.017**
	20	**580**	<0.0020	**0.2**	**0.0021**	**0.024**	**0.17**
	25	**19000**	**0.0024**	**0.57**	<0.0020	**0.16**	**0.46**
	30	<5.0	<0.0020	<0.0020	<0.0020	<0.0020	<0.0020
	35	<5.0	<0.0020	<0.0020	<0.0020	<0.0020	<0.0020
	40	<5.0	<0.0020	<0.0020	<0.0020	<0.0020	<0.0020

TPH-DRO concentrations consistent with those reported during the UST removal were reported for samples collected from 15 and 20 feet bgs (110 mg/kg and 580 mg/kg, respectively). Consistent with field screening and visual observations, the sample collected from 25 feet bgs had a TPH-DRO concentration of 19,000 mg/kg. Also consistent with field screening and visual

observations, the TPH-DRO concentration of samples collected from 30, 35, and 40 feet bgs were below the laboratory method reporting limit (MRL) of 5 mg/kg.

BTEX concentrations were low for all samples, including below MRLs (0.0020 mg/kg) for all constituents in the samples collected from 30, 35, and 40 feet bgs. All detectable BTEX concentrations were below 1 mg/kg for individual constituents with maximum reported concentrations, as follows:

- benzene – maximum of 0.0037 mg/kg in the sample collected from 15 feet bgs;
- ethylbenzene – maximum of 0.57 mg/kg in the sample collected from 25 feet bgs;
- toluene – maximum of 0.0027 mg/kg in the samples collected from 15 feet bgs;
- o-xylenes – maximum of 0.16 mg/kg in the sample collected from 25 feet bgs; and
- m,p-xylenes – maximum of 0.46 mg/kg in the sample collected from 25 feet bgs.

The hydrocarbon impacts observed in the field at 25 feet bgs and confirmed through laboratory analytical testing, suggest that elevated hydrocarbon concentrations are found in a thin lens in the vicinity of the former UST at the Site. It is possible these hydrocarbons are related to a former release at the Site or the aforementioned oil field operations that are common to the Torrance area. Regardless, field observations and laboratory analytical testing confirm that impacts do not extend below 25 feet bgs at the Site, and are therefore, shallow and localized.

10.0 CONCLUSIONS AND RECOMMENDATIONS

At the request of LAFD and on behalf of Gaunt Construction, Roux Associates successfully implemented the scope of work presented in the January 21, 2013 Workplan for the Site, which was approved by the LAFD on March 6, 2013. The activities described in this report, in conjunction with the activities presented in the September 2012 report, have addressed all of the requirements of the LAFD with respect to the Site. Based on the known Site history, observations made during fieldwork, and analytical data generated for soil samples collected during this investigation and UST removal, it appears that hydrocarbons present in soils in the vicinity of the former UST are shallow and localized. Additionally, there is reason to suspect that some or all of the hydrocarbons found in soils at the Site may be associated with former oil field operations. Regardless, hydrocarbons in soils do not extend below 25 feet bgs.

Based on the above, Roux Associates recommends no further investigation at the Site and respectfully requests that the LAFD issue a letter of No Further Action for the former on-Site UST.

Please call me with any questions related to the work performed at the Site. I can be reached by telephone at 310-879-4920 or by email at mescobar@rouxinc.com. Thank you.

Re : Gaunt Ready Mix - UST Removal - 2013

A84113 / 3C18007

Enclosed is an analytical report for the above-referenced project. The samples included in this report were received on 03/18/13 15:57 and analyzed in accordance with the attached chain-of-custody.

Unless otherwise noted, all analytical testing was accomplished in accordance with the guidelines established in our Quality Assurance Program Manual, applicable standard operating procedures, and other related documentation. The results in this analytical report are limited to the samples tested and any reproduction thereof must be made in its entirety.

If you have any questions regarding this report or require additional information please call me at American Analytics.

Sincerely,

Viorel Vasile

Operations Manager

Dear Ms. Donalson:

Dexol Industries, Incorporated
1450 West 228th Street
Los Angeles, California

The Fire Department has reviewed the Remediation Confirmation Assessment dated June 6, 1997, as submitted by Aqua Science Engineers, Incorporated.

Based on the information provided to date, no further action is required at this time.

Please note that this correspondence does not exempt you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at this site. Nor does it exempt you of the responsibility to correct additional or previously unidentified conditions at the site which cause, or thereafter to cause, pollution or nuisance, or otherwise pose a threat to water quality or public health.

If you require additional information from the Los Angeles City Fire Department, contact Inspector Michael R. Nealy of the Environmental Unit, at (213) 485-7543.

Very truly yours,

WILLIAM R. BAMATTRE
Chief Engineer and General Manager

Demographic Profile

Demographic Profile of Surrounding Area (3 Miles)

This section provides demographic information regarding the community surrounding the facility. ECHO compliance data alone are not sufficient to determine whether violations at a particular facility had negative impacts on public health or the environment. Statistics are based upon the 2010 US Census and American Community Survey data, and are accurate to the extent that the facility latitude and longitude listed below are correct. The latitude and longitude are obtained from the EPA Locational Reference Table (LRT) when available.

Radius of Area:	3	Land Area:	99%	Households in Area:	69,623
Center latitude:	33.81507	Water Area:	1%	Housing Units in Area:	72,617
Center Longitude:	-118.29966	Population Density:	7,739/sq.mi.	Households on Public Assistance:	2,418
Total Persons:	216,910	Percent Minority:	79%	Persons Below Poverty Level:	67,731

Race Breakdown	Persons (%)	Age Breakdown	Persons (%)
White:	88,767 (40.92%)	Child 5 years and younger:	14,276 (6.58%)
African-American:	12,867 (5.93%)	Minors 17 years and younger:	53,165 (24.51%)

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting

the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/09/2015 has revealed that there are 18 RCRA-SQG sites within approximately 0.25 miles of the target property.

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 08/03/2015 has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/03/2015 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 13 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/09/2015 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.125 miles of the target property.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best

MK DIAMOND PRODUCTS (Continued) **1000595364**

management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015
Date Data Arrived at EDR: 04/08/2015

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/09/2015

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/01/2015

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board?s review found that more than one-third of the region?s active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR US Hist Cleaners: EDR Exclusive Historic Dry Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

MULLIGANS FAMILY FUN CENTER
1351 SEPULVEDA BLVD
TORRANCE, CA 90501

TARGET PROPERTY COORDINATES

Latitude (North):	33.8154 - 33° 48' 55.44''
Longitude (West):	118.3016 - 118° 18' 5.76''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	379534.0
UTM Y (Meters):	3742256.0
Elevation:	60 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5633779 TORRANCE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

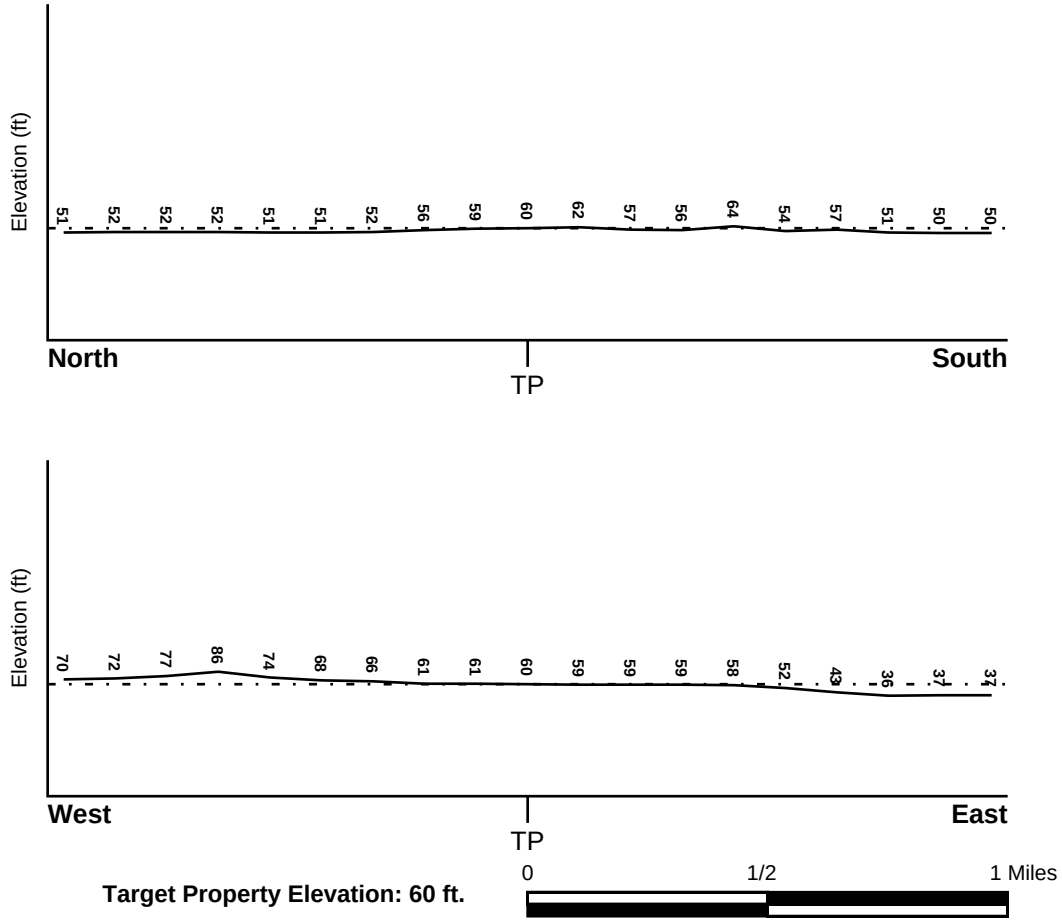
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 60 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
LOS ANGELES, CA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
TORRANCE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish & Game
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Torrance, CA 90501

Client Name:
Aaron Wright
4801 Glenwood, Suite 200
Raleigh, NC 27607

EDR Inquiry # 4455346.3

Contact: Kim Sweeney

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Aaron Wright were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

PERSONNEL QUALIFICATIONS

NASIM AHMED

Education and Technical Training

B.S., Chemical Engineering, BUET, Bangladesh, 1988

M.S., Chemical Engineering, USC, Los Angeles, California, 1991

Licenses and Certifications

Registered Environmental Property Assessor, (REPA-118102)

Asbestos Building Inspector (ABII011612000BN1986)

Experience

Mr. Ahmed has performed Phase I Environmental Site Assessments on numerous multi-acre, multi-tenant industrial, multi-family residential, commercial office, retail and multi-regional retail mall complexes throughout the United States. Nasim has developed and implemented asbestos, lead-based paint, and radon Operations and Maintenance Program.

- Performed Phase I Environmental Site Assessments and Phase II Subsurface Investigations, and Regulatory Compliance Assessments throughout the United States.
- Performed assessments and subsurface evaluation, including but not limited to, evaluation of current and historical dry cleaning operations, current and historical industrial operations and gasoline service station operations at commercial and industrial properties.
- Regulatory compliance assessment duties included facility inspection, permit determination, regulatory agency requirement determination, and hazard communication compliance (including plans and programs determined by local agencies) for various light and heavy industrial operations.
- Subsurface assessment duties included budgeting, proposal, subcontractor coordinator, regulatory agency coordinator, drilling oversight, soil and groundwater sample collection, monitoring well installation oversight, laboratory oversight and report preparation.
- Developed and implement asbestos, lead-based paint, and radon Operations and Maintenance Program.

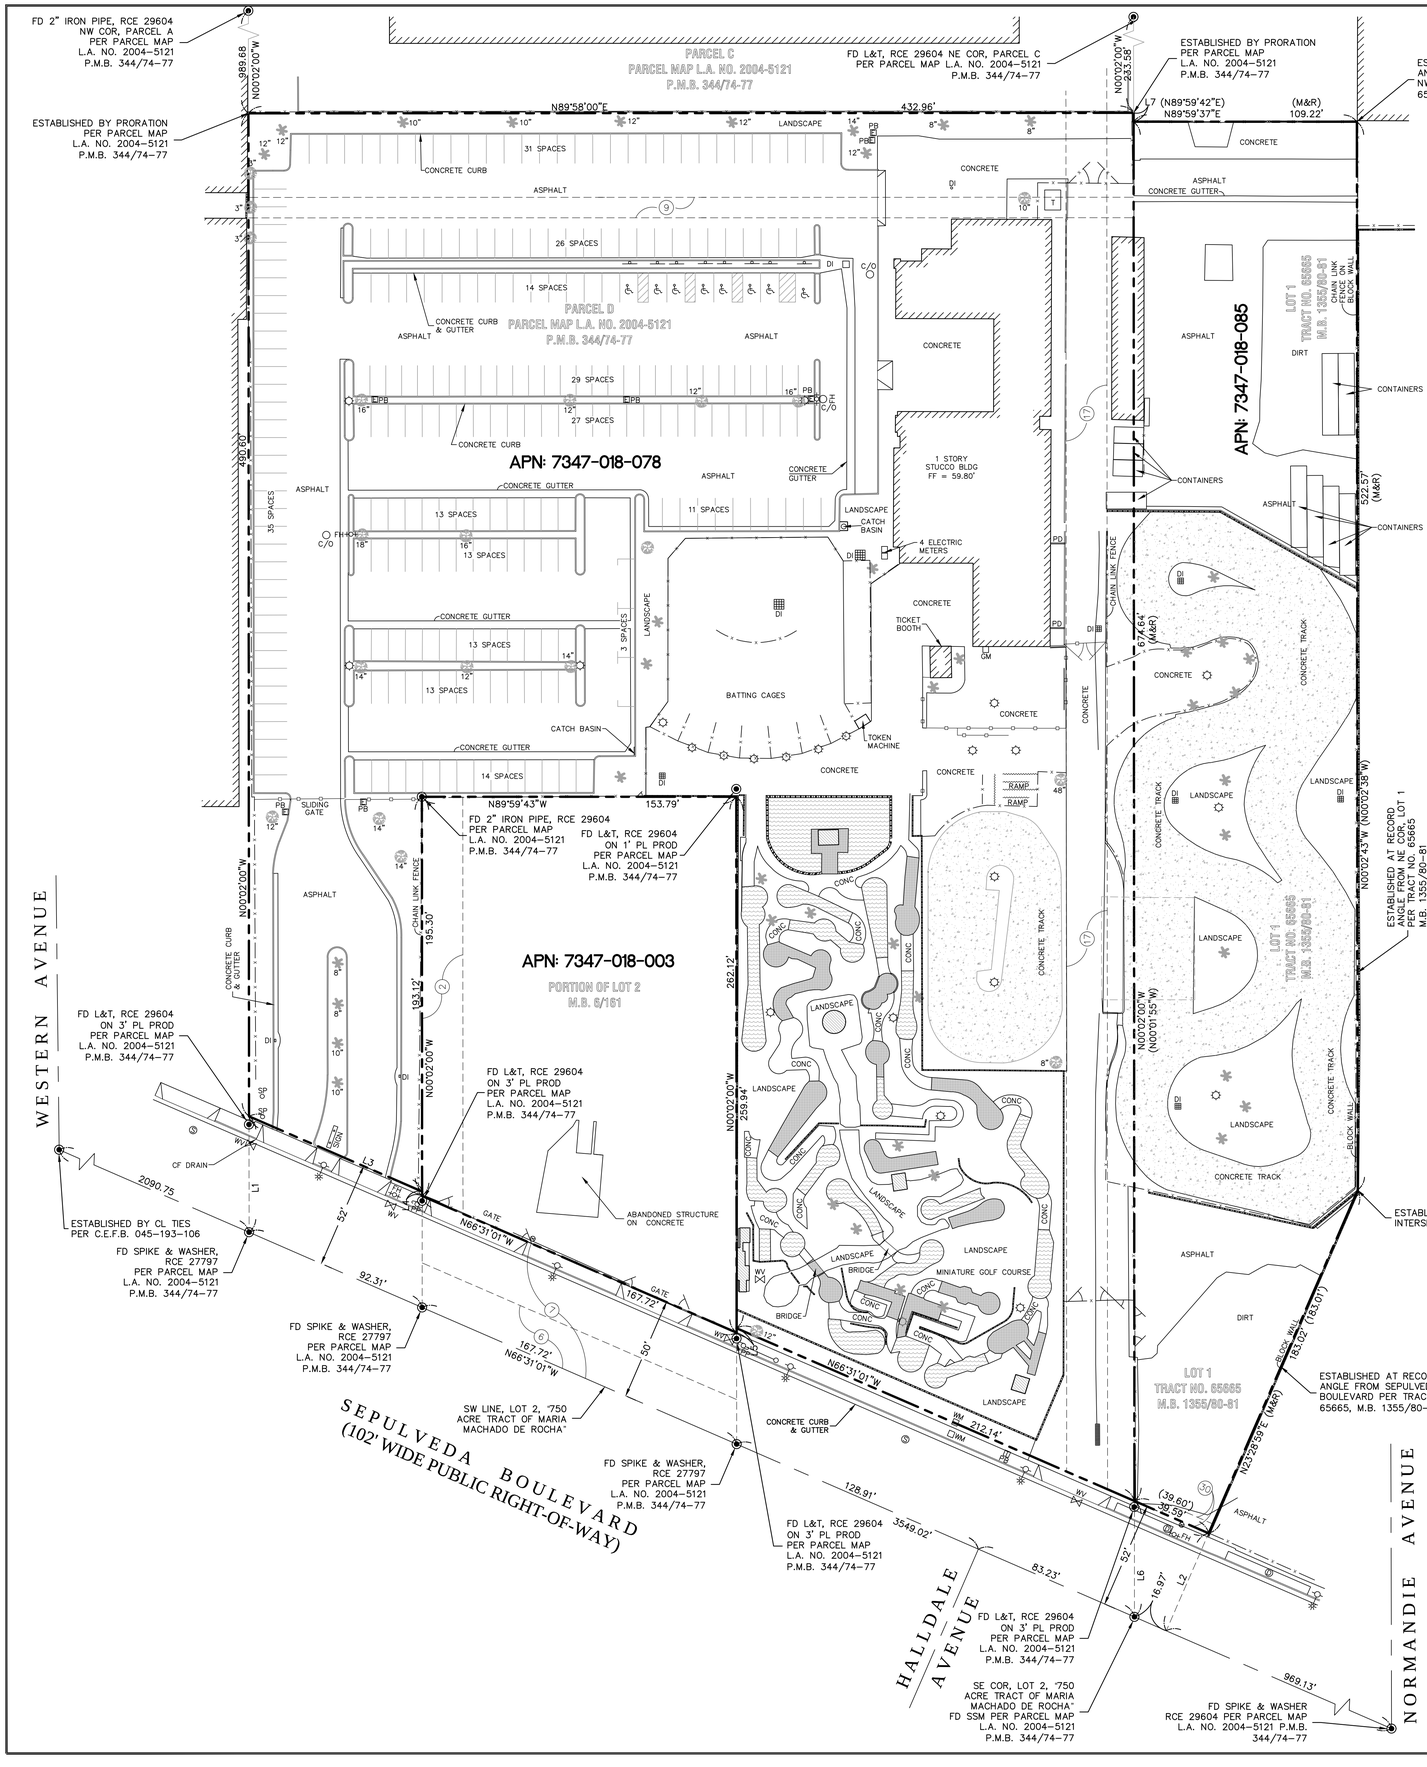
RICHARD DAGNALL

Education and Technical Training

B.S., Chemical Engineering, University of Akron
M.B.A. Applied Finance, University of Chicago

Experience



Mr. Dagnall has worked in the due diligence industry for over 25 years, specializing in environmental site assessment and property condition assessment for the commercial for the real estate industry. During this period, He has inspected or reviewed assessments of thousands of properties throughout the country. The inspections have covered industrial, commercial, multifamily residential and undeveloped properties. His clientele has included investment banking firms, national and regional banks, agency lenders, insurance companies, developers and law firms. Mr. Dagnall has a strong understanding of the applicable ASTM standards, Freddie Mac Seller/Servicer Guide, Fannie Mae Delegated Underwriting Service guidelines, and other client specific scopes of work.

Mr. Dagnall spent four years getting hands-on experience with environmentally tainted properties, first as a contractor to the United States Environmental Protection Agency (EPA), investigating hazardous waste sites for possible inclusion on the Superfund National Priorities List (NPL), and later as an EPA employee overseeing the investigation and remediation of NPL sites. Additionally, he is well versed in the risks posed by asbestos-containing materials, lead-based paint, radon, and vapor encroachment.

Mr. Dagnall has significant experience in evaluating the condition of commercial properties, including identifying areas of physical deficiencies or deferred maintenance and estimating on-going capital expenditure requirements. Additionally, he is knowledgeable in accessibility issues relating to the Americans with Disabilities Act and the Fair Housing Act.

In 1989, he started RERC Environmental, Inc., which became one of the first firms to offer both environmental site assessment and property condition assessment services. In 1994 he started Aaron & Wright Technical Services, Inc., a sister company of the valuation firm Aaron & Wright Incorporated, creating the first due diligence firm designed to provide both assessment and valuation services under One roof. Mr. Dagnall later spent five years on the senior management team of LandAmerica Assessment Corp. (LAC) where he oversaw the Frankfurt, Germany, operations and the integration of CNP, Ltd., a building consultancy firm headquartered in the United Kingdom, which was acquired by LAC. Mr. Dagnall started the Assessment & Consulting Services group for CBRE, Inc. in 2009 and grew it into one of the leading providers of assessment services. He joined Aaron & Wright Assessment/BBG Assessment in 2015.

December 13, 2019

Mr. Fred M. Whitaker, P.C.
Cummins & White, LLP
2424 Southeast Bristol Street, Suite 300
Newport Beach, California

Re: Phase II Subsurface Investigation Letter Report
1351-1361 Sepulveda Boulevard, Torrance (City of Los Angeles), California

Dear Mr. Whitaker:

Roux Associates, Inc. (Roux) has prepared this Letter Report to summarize the findings of the Phase II Subsurface Investigation (Phase II) conducted at the Mulligan Family Fun Center located at 1351-1361 Sepulveda Boulevard, Torrance (City of Los Angeles), California (the Site; Figures 1 and 2). The investigation was performed at the direction of Cummins & White LLP (Client) to address recognized environmental conditions (RECs) as summarized in the Phase I Environmental Site Assessment (Phase I ESA) prepared concurrently by Roux, dated December 13, 2019. The data reported herein were not requested or required by a regulatory agency. The primary purpose of the Phase II scope of work was.

Aside from addressing RECs, the scope of work was intended to establish baseline conditions at the Site at the time of investigation. The work included soil and soil gas sampling and was conducted in accordance with Roux's *Proposal for Phase II Subsurface Investigation, 1351-1361 Sepulveda Boulevard, Torrance (Los Angeles), California* dated September 5. 2019.

Background

The Site consists of three contiguous parcels located in the Harbor Gateway neighborhood of Los Angeles, California (Figure 1). The parcels are identified by Los Angeles Assessor's Parcel Numbers (APNs) 7347-018-078 (1351-1355 Sepulveda Boulevard, subsequently identified as Parcel 1), 7347-018-003 (1361 Sepulveda Boulevard, Parcel 2), and 7347-018-085 (no physical addressed associated, Parcel 3). Parcels 1 and 3 are currently occupied by the Mulligan Family Fun Center (1351 Sepulveda Boulevard), a family amusement facility. Site improvements include two buildings (Building A and Building B; see Figure 2) a miniature golf course, two go-kart tracks (East Track and West Track; see Figure 2), a paddle boat pond, batting cages, a rock-climbing wall, and asphalt-paved parking areas. Building A is occupied by a laser tag facility, café, kitchen, arcade, event space, and offices. Building B is occupied by repair shops for the go-karts and arcade games as well as storage. Additional improvements include numerous sheds, canopies, picnic tables, concrete paved walkways, and landscaping. The southern portion of Parcel 3 is currently a vacant, fenced lot which appears to be

5150 East Pacific Coast Highway, Suite 450 ■ Long Beach, California 90804 ■ +1.310.879.4900 ■ www.rouxinc.com

partially paved. Parcel 2 (1361 Sepulveda Boulevard) is currently a vacant former concrete batch plant with a large piece of equipment remaining on-Site and an unpaved lot.

The RECs identified in the Phase I ESA were described as follows:

- **REC 1 – Former and Current Oil Development On-Site and in the Site Vicinity.** The Site is located in the active Torrance Oil Field and was historically used for oil development activities circa 1924 to 1964. Although oil production in the Torrance Oil Field has decreased significantly since the 1950s, production continues on adjacent and nearby properties. According to the Division of Oil, Gas, and Geothermal Resources (DOGGR) records, historical aerial photographs, and an Land Title Associate (ALTA)/National Society of Professional Surveyors (NSPS) Land Title Survey for the Site dated September 17, 2019, prepared by Plotnik and Associates Civil Engineering and Land Surveying (ALTA/NSPS Survey), six oil wells were formerly located on-Site and were used for oil production. The six wells were drilled in 1924 and were subsequently abandoned between 1930 and 1964 in accordance with the DOGGR standards at their respective times of abandonment. Additional features associated with oil development activities were observed in historical aerial photographs dated 1928 to 1963 including suspected oil pits, and storage and staging areas; the approximate locations of these features are depicted in Figure 3. Drilling of oil wells is known to generate drill cuttings and drilling mud that could be impacted by hydrocarbons encountered in the subsurface. Operation of oil wells is also known to cause near-surface hydrocarbon impacts to soil and soil gas.

- **REC 2 – Fill Material.** During the construction of the on-Site miniature golf course and East Track of Mulligan Family Fun Center, unknown fill material was likely imported to create the present varied terrain. Due to the unknown origins of the fill, it is possible that the fill materials may be impacted.

- **REC 3 – Industrial Operations On-Site and in the Site Vicinity.** The Site vicinity has been used for heavy industrial activity since at least 1952. A rail spur was visible in a 1952 aerial photographs on the eastern adjacent property and several industrial structures and storage/staging areas were present to the east and northeast of the Site by 1963. The storage/staging areas extended onto Parcel 3 and a portion of one of the industrial structures extended onto the southeastern portion of Parcel 3. Possible staining was noted in a 1983 historical aerial photograph, following the removal of the stored products. Industrial structures were present on the Site until at least 2005 and industrial operations on adjacent properties continue as of this report date. Materials typically used in industrial operations include chlorinated solvents or petroleum products. Although the specific operations and associated materials of the nearby industrial facilities are unknown, it is possible that subsurface conditions at the Site may have been impacted.

- **REC 4 – Off-Site Tetrachloroethylene (PCE) and Trichloroethylene (TCE) Release Case.** The facility identified as Multi-Tenant Office-Warehouse Property, located at 1500-1510 West 228th Street (approximately 531 feet north-northwest from the Site) identified PCE and TCE contamination in groundwater, soil, and soil gas. According to the most recent quarterly groundwater monitoring report dated July 8, 2019, MW-3, located approximately 708 feet

northwest from the Site, had a PCE concentration of 29 µg/L and a TCE concentration of 5.1 µg/L. MW-4, located approximately 627 feet northwest from the subject Site had a PCE concentration of 300 µg/L and a TCE concentration of 45 µg/L (ADR 2019). The concentrations detected in groundwater exceeded the California MCLs for both TCE and PCE. The impacts have not been delineated in the direction of the Site.

Additionally, one historical REC (hREC) and several other environmental features (OEFs) were identified in the Phase I ESA:

- **hREC 5 – Former UST.** According to previous on-Site investigations, a 12,000-gallon diesel UST was formerly located at the central-north portion of Parcel 2 and was used to fuel the fleet of trucks associated with the former ready-mix concrete batch plant operations. This UST was removed in July 2012 and a November 2012 investigation found that the level of soil contamination at the Site exceeded the LAFD's action levels. Concentrations in soil from one of three confirmation samples beneath the UST exceeded the action level of 100 mg/kg for TPH-DRO. Further investigations concluded that hydrocarbons were not related to the former UST. In June 2013, the LAFD stated that no further action related to the former UST was required.

- **OEF 6 – On-Site Use of Gasoline and Maintenance Materials.** The current occupant of Parcels 1 and 3, Mulligan Family Fun Center, uses small amounts of gasoline and maintenance materials to fuel the gasoline go-karts for West Track and to perform maintenance on the go-karts and arcade games in Building B. A storage shed located southwest of East Track on Parcel 1 is used to store gasoline and waste oil is stored north of East Track on Parcel 3. Based on the small quantities and the lack of evidence indicating a release, the storage and use of these materials was not identified as a significant environmental concern.

- **OEF 7 – Pressurized Oil Pipelines.** Based on the National Pipeline Mapping System (NPMS) Public View database, is suspected that one active crude oil pipeline is located adjacent to the Site along Sepulveda Boulevard. Eight additional petroleum pipelines are located within approximately 1,000 feet of the Site. No indication of a release from any of the pipelines was identified by Roux in the preparation of this Phase I ESA.

- **OEF 8 – Methane Zone.** According to the City of Los Angeles Department of City Planning, the Site is located within a Methane Zone indicating that methane mitigation is likely required for on-Site buildings. The City of Los Angeles should be contacted prior to Site redevelopment activities to determine the specific methane mitigation requirements for the Site.

Scope of Investigation

The Phase II scope of work was developed to address RECs identified in the Phase I ESA. Pertinent features and RECs are depicted on Figures 2 and 3 to the extent possible.

A total of 15 boring locations were drilled to assess baseline soil and soil gas conditions in areas associated with the RECs described above. Although not specifically targeted, hREC and OEF locations coincide with some proposed investigation locations.

The Phase II investigation locations were as follows:

- One combined soil/soil gas boring (SV-1) in the vicinity of historical oil development features;
- One combined soil/soil gas boring (SV-2) in the vicinity of historical oil development features, near the current arcade game and go-kart repair areas, and near the current waste oil storage area;
- One combined soil/soil gas boring (SV-3) in the vicinity of historical oil development features and the former concrete batch plant;
- One combined soil/soil gas boring (SV-4) in the vicinity of historical oil development features and within the miniature golf course;
- One combined soil/soil gas boring (SV-5) in the vicinity of historical oil development features and near the current gasoline storage area;
- One combined soil/soil gas boring (SV-6) in the vicinity of historical oil development features and within East Track;
- Two soil borings (SB-1 and SB-2) in the vicinity of historical oil development features
- One soil boring (SB-3) in the vicinity of historical oil development features and within East Track;
- One soil boring (SB-4) in the vicinity of historical oil development features and within the miniature golf course;
- One soil boring (SB-5) in the vicinity of historical oil development features and the former concrete batch plant; and
- Four soil borings (SB-6, SB-7, SB-8, and SB-9) for Site-wide metals analysis.

The approximate boring locations are provided in Figure 4. According to groundwater monitoring data reviewed during the preparation of the Phase I ESA for a release case approximately 0.25 miles west of the Site, groundwater is flowing to the southeast and the depth to groundwater is approximately 65-69 feet bgs in the vicinity of the Site. Groundwater was not encountered during this investigation.

Pre-Field Activities

All fieldwork associated with the investigation was performed in accordance with the Site-specific Health and Safety Plan (HASP). The HASP identified the potential physical and chemical hazards at the Site that could present a threat to workers and other Site users. Field workers acknowledged their familiarity with all safety procedures and indicated their intent to follow the HASP by signing the HASP after the tailgate safety meeting, which took place at the beginning of each field day. The field work was completed without health and safety incidents of any kind.

Roux pre-marked the proposed boring locations with white paint and notified Underground Service Alert of Southern California at least 48 hours in advance of intrusive subsurface work to identify potentially buried utility lines (e.g. natural gas, electric, water, sewer, telephone, fiber optic etc.) situated within the bounds of the Site.

Roux contracted with Subsurface Surveys and Associates, Inc. (Subsurface Surveys) of Carlsbad, California to evaluate the proposed boring locations and mitigate the risk of potentially encountering buried utility lines or other subsurface features. On September 9, 2019, Subsurface Surveys & Associates, Inc. cleared the proposed locations prior to intrusive work.

Methods of Investigation

Boring Advancement

On September 9, 2019, under the direction of Roux, Strongarm Environmental Field Services, Inc. (Strongarm) advanced five combined soil and soil gas borings (SV-1 through SV-5) to terminal depths of 15 feet below ground surface (bgs). The sixth combined soil and soil gas boring (SV-6) was only advanced to terminal depth of 10.5 feet bgs due to refusal. The combined soil and soil gas borings were initially advanced to a depth of five feet bgs using hand-auger drilling for clearance of potential subsurface utilities. A direct-push drilling rig was used to advance borings SV-1, SV-2, SV-3, SV-5, and SV-6 to terminal depth. Hand-auger drilling was used to advance SV-4 to terminal depth due to drilling rig access limitations.

On September 9 and 10, 2019, Roux advanced five soil borings (SB-1 through SB-5) to terminal depths of 5 feet bgs and four soil borings (SB-6 through SB-9) to terminal depths of 2 feet bgs (Figure 4) using hand-auger drilling.

Soil Sampling

Soil samples were collected at select intervals from all 15 of the borings as indicated in the table below. The samples were analyzed per the schedule below for the presence of total petroleum hydrocarbons across the carbon chain (TPH-cc) using United States Environmental Protection Agency (EPA) Method 8015B(M); volatile organic compounds (VOCs) using EPA Method 8260B/5035; and Title 22 Metals (metals) using EPA Method 6010B.

Boring ID	Depth (Feet bgs)	EPA Soil Analysis Methods

SB-7	0.5, 2			X
SB-8	0.5, 2			X
SB-9	0.5, 2			X

X = Sample(s) analyzed by method indicated

All soil samples were appropriately labeled with the boring location, date/time, and sample depth, and then stored on ice in a cooler. After sample collection, soil samples were transported under strict chain-of-custody protocol to Eurofins Calscience (Eurofins) of Garden Grove, California, a California certified laboratory. No visual/olfactory observations or photoionization detector (PID) readings indicated significant soil impacts at other intervals to warrant any additional sample collection. The results are summarized in Tables 1 and 2. Copies of field boring logs are included in Attachment A.

Soil Gas Probe Installation

Dual nested soil gas probes were installed in boings SV-1 through SV-6. Borings SV-1 through SV-5 featured soil gas probes at 5 and 15 feet bgs. However, due to soil conditions limiting gas flow, no sample could be retrieved at SV-1-15. Boring SV-6 featured soil gas probes at 5 and 10.5 feet bgs.

The soil gas probes consisted of an expendable soil gas tip and screen affixed to either Teflon® or Nylaflo® tubing. The probes were constructed by first placing a minimum of two-inches of coarse sand into the bottom of the borehole. The tip and tubing were then lowered into the borehole through a tremie pipe for support. Additional sand was then placed in the borehole via tremie to create an approximately 1-foot sand pack interval around the tip. Approximately one-foot of dry granular bentonite was placed on top of the sand pack followed by hydrated bentonite grout to the bottom depth of the upper-sand

pack hosting the shallow soil gas sampling probe. After the installation of each soil gas probe, a minimum 48-hour equilibrium period was observed prior to sampling five-foot probes and a minimum two-hour equilibrium period was observed prior to sampling 10.5-foot and 15-foot probes, as stipulated by the California Environmental Protection Agency, DTSC, Los Angeles Regional Water Quality Control Board, and San Francisco Regional Water Quality Control Board, and the July 2015 Advisory, Active Soil Gas Investigations (Soil Gas Advisory). Once sampled, soil gas probes were abandoned by pulling the tubing from the ground and filling any void space in the probes with hydrated bentonite.

Soil gas samples were collected in one-liter Summa cannisters and submitted to Eurofins for VOC analysis using EPA Method TO-15. The results are summarized in Table 3.

Results

Soil Results

A total of 47 soil samples (43 primary and four duplicates) collected from the soil borings were analyzed as described above. The complete soil analytical laboratory reports are included in Attachment B.

TPH

A total of 35 soil samples (32 primary and three duplicates) were collected from 11 soil borings and analyzed for TPH-cc as part of this investigation. TPH levels were compared to the California Regional Water Quality Control Board (RWQCB) Remediation Guidance for Petroleum and VOC Impacted Sites (May 1996) Maximum Soil Screening Levels (SSLs) for TPH above Drinking Water Aquifers (20 to 150 feet above groundwater). Detections of TPH were broken down into the following ranges for comparison to SSLs: TPH in the gasoline range (TPH-g; C6-C-12), TPH in the diesel range (TPH-d; C13-C22), and TPH in the oil range (TPH-o; C23-C32). TPH was detected across the Site; however, no detections exceeded their SSLs. Soil results for TPH are summarized in Table 1 and Figure 5.

VOCs

A total of 13 soil samples (12 primary and one duplicate) collected from 6 soil borings were analyzed for VOCs as part of this investigation. VOC levels were compared to the EPA Regional Screening Levels (RSLs) for industrial soil, updated April 2019. Only one analyte, acetone, was detected above its laboratory reporting limit in one sample (59 µg/kg at SV-1-5; located in the northwest corner of the Site); however, the detection did not exceed the RSL for industrial soil. It is also noted that acetone is a common laboratory artifact. Absent any credible source for acetone at the Site, the detection is more likely to be laboratory contamination than representative of field conditions. Soil results for VOCs have not been tabulated; the complete soil analytical laboratory reports are included in Attachment B.

Metals

A total of 28 soil samples (26 primary and two duplicates) collected from 15 soil borings were analyzed for metals as part of this investigation. Numerous metals were detected above laboratory reporting limits across the Site. Metals detections were compared to RSLs for industrial soil as well as the *Background Concentrations of Trace and Major Elements in California Soils, Kearney Foundation of Soil Sciences Special Report, Division of Agriculture and Natural Resources, University of California*, Bradford, G.R., Chang, A.C., Page, A.L., Bakhtar, D., Frampton, J.A., and Wright, H., 1996. All detections of metals were

below their respective RSLs and/or within expected background concentrations for California soils. Soil results for metals are summarized in Table 2.

Soil Gas Results

A total of 12 soil gas samples (11 primary and 1 duplicate) were collected from the temporary soil gas probes (SV-1 through SV-6) installed at the depths described above and analyzed for the presence of VOCs. The laboratory report for soil gas samples is included in Attachment C. Soil gas detections were compared to the RSLs for industrial air calculated using an attenuation factor of 0.03 per the most recent Department of Toxic Substances Control (DTSC) guidance. The highlighted results are as follows:

- One detection of benzene exceeded the RSL for industrial air of 53 µg/m^3 at SV-5-15 (150 µg/m^3);
- One detection of ethylbenzene exceeded the RSL for industrial air of 37 µg/m^3 at SV-5-15 (93 µg/m^3);
- One detection of PCE exceeded the RSL for industrial air of 1,600 µg/m^3 at SV-2-15 (1,900 µg/m^3); and
- One detection of TCE exceeded the RSL for industrial air of 100 µg/m^3 at SV-3-15 (410 µg/m^3).

Boring SV-5 was located in the vicinity of historical oil development features and near the current gasoline storage area. Boring SV-2 was located in the vicinity of historical oil development features, near the current arcade game and go-kart repair areas, and near the current waste oil storage area. Boring SV-3 was located in the vicinity of historical oil development features and the former concrete batch plant. Soil gas results for VOCs are summarized in Table 3 and Figure 6.

Conclusions

The Phase I ESA issued by Roux on December 13, 2019 identified the following RECs, hREC, and OEF associated with the Site:

- REC 1 – Former and Current Oil Development On-Site and in the Site Vicinity;
- REC 2 – Fill Material;
- REC 3 – Industrial Operations On-Site and in the Site Vicinity;
- REC 4 – Off-Site PCE and TCE Release Case;
- hREC 5 - Former UST;
- OEF 6 – On-Site Use of Gasoline and Maintenance Materials;
- OEF 7 – Pressurized Oil Pipelines; and
- OEF 8 – Methane Zone.

To develop an understanding of baseline conditions at the Site, this Phase II specifically targeted:

- Historical oil development features (SV-1 through SV-6 and SB-1 through SB-5);

- Current arcade game and go-kart repair areas and current waste oil storage area (SV-2);
- Former concrete batch plant operations (SV-3 and SB-5);
- Miniature golf course (SV-4 and SB-4);
- Current gasoline storage area (SV-5);
- East Track (SV-6 and SB-3); and
- Site-wide metals analysis (SB-6, SB-7, SB-8, and SB-9).

An evaluation of the findings of the Phase II with respect to the targeted RECs is provided below:

- **REC 1 – Former and Current Oil Development On-Site and in the Site Vicinity**. Low levels of TPH and metals were detected in soil in areas of the Site associated with historical oil development operations. Detections of TPH were typically in the diesel and motor oil ranges and generally decreased with depth below 5 feet bgs, indicating that impacts appear to be limited to the shallow subsurface. One detection of TPH-d exceeded its SSL at SB-5-2; levels of TPH-d at this location decreased significantly with depth. All other detections of TPH and all detections of metals in soil did not exceed SSLs for TPH or RSLs for industrial soil and/or typical background levels for metals in California soil.

  Several VOCs associated with TPH and oil development operations were detected in soil gas on-Site; of these only benzene and ethylbenzene were found to exceed RSLs for industrial air. Benzene and ethylbenzene levels exceeding RSLs were detected at SV-5-15, located toward the southeastern corner of the Site (corresponding concentrations at 5 feet bgs were much lower or non-detect).

  The Site is located within a Methane Zone, requiring any future buildings to be equipped with a vapor intrusion mitigation system (VIMS). A VIMS would mitigate soil gas impacts from benzene and ethylbenzene as well as methane.

- **REC 2 – Fill Material**. Low levels of TPH and metals were detected in shallow soil samples (0.5 to 5 feet bgs) collected from the areas with possible imported fill: the miniature golf course and East Track. Detections did not exceed SSLs for TPH or RSLs for industrial soil and/or typical background levels for metals in California soil. Based on the results of this Phase II, the Site does not appear to be significantly impacted by fill material imported on-Site for grading purposes.

- **REC 3 – Industrial Operations On-Site and in the Site Vicinity**. Low levels of TPH and metals were detected in soil along the northern and eastern portions of the Site, where possible storage and/or staging operations associated with adjacent industrial properties were historically conducted. Detections did not exceed SSLs for TPH or RSLs for industrial soil and/or typical background levels for metals in California soil.

  Soil gas results in the areas of former industrial operations indicated that benzene and ethylbenzene impacts are present at 15 feet bgs at one boring location in the southeastern

corner of Parcel 1, and PCE impacts are present at 15 feet bgs at one boring location in the northwestern portion of Parcel 3.

The Site is located within a Methane Zone, requiring any future buildings to be equipped with a VIMS which would mitigate soil gas impacts from benzene, ethylbenzene, and PCE as well as methane.

REC 4 – Off-Site PCE and TCE Release Case. PCE and TCE were detected in two on-Site locations. Detections at these boring locations generally increased with depth, more consistent with migration of the VOCs from an off-Site source than with an on-Site source.

TCE exceeding its RSL was detected at SV-3-15, located within the former concrete batch plant area. PCE exceeding its RSL was detected at SV-2-15, located southeast of Building B. The Site is located within a Methane Zone, requiring any future buildings to be equipped with a VIMS which would mitigate soil gas impacts from benzene, ethylbenzene, PCE, and TCE as well as methane.

- **hREC 5 – Former UST**. One combination soil and soil gas boring was advanced in the vicinity of the former concrete batch plant, near the location of the removed UST (SV-3). Low levels of TPH and metals were detected in soil. However, detections did not exceed SSLs for TPH or RSLs for industrial soil and/or typical background levels for metals in California soil.

  PCE and TCE were detected in soil gas at 15 feet bgs; however, PCE and TCE were not encountered in the shallow soil or 5-foot soil gas samples. The TCE detection at SV-3-15 exceeded its RSL for industrial soil and was discussed previously in the context of nearby industrial operations. Benzene and ethylbenzene were detected at both 5 and 15 feet bgs below their respective RSLs. Based on the results of this Phase II, the Site does not appear to be significantly impacted by the former concrete batch plant operations or the associated diesel UST.

  The Site is located within a Methane Zone, requiring any future buildings to be equipped with a VIMS which would mitigate soil gas impacts from TCE as well as methane.

- **OEF 6 – On-Site Use of Gasoline and Maintenance Materials**. Boring SV-2 was located near the arcade game and go-kart maintenance and repair areas housed in Building B as well as the waste oil storage area. SV-5 was located in the vicinity of the gasoline storage area. Low levels of TPH and metals were detected in soil samples collected from these areas. However, detections did not exceed SSLs for TPH or RSLs for industrial soil and/or typical background levels for metals in California soil.

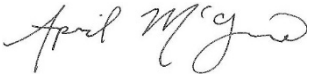
  Based on the results of this Phase II, the Site does not appear to be significantly impacted by the current on-Site use of gasoline and maintenance materials.

- **OEF 7 – Pressurized Oil Pipelines**. Pressurized pipelines located in the Site vicinity were not identified as a REC as no releases associated with the pipelines in the Site vicinity were

identified in the Phase I ESA. On this basis, pressurized oil pipelines were not specifically targeted as part of this Phase II.

- **OEF 8 – Methane Zone**. Sampling for methane was not included in the scope of this Phase II. Roux understands that the planned redevelopment of the Site includes an industrial building equipped with a VIMS which would satisfy City of Los Angeles Department of City Planning Methane Zone requirements as well as mitigate impacts from elevated levels of benzene, ethylbenzene, PCE, and TCE detected in soil gas previously discussed.

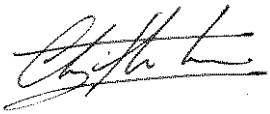
Limitations



The Phase II is limited in scope, the primary purpose of which is to identify (not delineate) potential impacts in the subsurface. No investigation is thorough enough to describe all conditions of interest at a given site. If conditions are not identified during the Phase II, such a finding should not be construed as a guarantee of the absence of such conditions at the site, but rather as the result of the services performed within the scope, limitations, and cost of the work performed. Roux will not be able to report on, or accurately predict events that may change the Site conditions after the described services are performed.

Closing

If you have any questions regarding the contents of this letter report, please do not hesitate to contact April McGuire by telephone at 562-445-8624 or by email at amcguire@rouxinc.com, or Chris Rose by telephone at 310-879-4923 or by email at crose@rouxinc.com, or Mauricio Escobar by telephone at 310-879-4920 or by email at mescobar@rouxinc.com.



Sincerely,

ROUX ASSOCIATES, INC.

Notes:
bgs = below ground surface
LCC = Leak Check Compound
EPA = United States Environmental Protection Agency
EPA RSL = EPA Regional Screening Level (RSL) for industrial air, updated November 2018.
Screening levels calculated using an attenuation factor of 0.03 per most recent Department of Toxic Substances Control (DTSC) guidance.
NS = No standard currently established
Only compounds that have been found above laboratory reporting limits (RLs) at least once in soil vapor are posted.
<X = Analyte not detected above laboratory RL of "X"
Italicized = Duplicate sample
Bold = Detected above laboratory RL
Shaded = Concentration exceeds one or more screening levels

NOTES

LOCATIONS OF UNLABELED WELLS WERE IDENTIFIED BASED ON HISTORICAL AERIAL PHOTOGRAPHS, THEREFORE NO WELL NAMES WERE IDENTIFIED.

WELL BLUEMLE 4 WAS IDENTIFIED ON DOGGR MAPS; HOWEVER, IT WAS NOT OBSERVED IN HISTORICAL AERIAL PHOTOGRAPHS OR IDENTIFIED IN THE ALTA/NSPS SURVEY.

▽ Static Water Depth: _____
Measuring Point Elev.: _____
Ground Surface Elev.: _____
Stick-up/Flush-mount: _____

Depth (feet)	Sample Interval	Blow Counts	Recovery Length (Inches)	OVM/PID (ppm)	Soil Description	USCS Classification	Boring/Well Completion Details	Depth (feet)
	X			0.1	10YR4/4 dark yellowish brown, 90% silt, 10% fine sand moist soft			
	X			0.7	90% clay 10% fine sand, 10YR4/4			
					75% coarse - med sand 25% silt, moist, soft			
	X			0.0	10YR5/6 yellowish brown, 85% silt, 15% sand moist firm			

Soil Description

Color (H/V/C), Primary Unit, Minor Unit(s) Relative %; moisture; relative density/consistency, grain size/plasticity; gradation; supplementary descriptors/observations.

Supplementary Descriptors/Observations:
- Nature of deposit (fill, topsoil, geologic formation, etc.)
- Maximum gravel diameter
- Cementation
- Structure
- Presence of mica, shells, roots/root holes, organic material, etc.
- Sand/gravel angularity
- Staining
- Odor (mention only if organic or unusual)
- Caving or sloughing of borehole
- Difficult drilling

Relative Percentages
"some" = 30 to 45%
"little" = 15 to 25%
"few" = 5 to 10%
"trace" = 0 to 5%

Roll Test for Fine Grained Soils:
- If sample breaks easily it contains little clay (=SILT)
- If it can be rolled into a thread of 1/8" in diameter without breaking, it contains clay (=SILT/CLAY)
- If the thread can be rolled and re-rolled it likely contains mostly clay (=CLAY).

F1	MS and/or MSD Recovery is outside acceptance limits.
L	A negative instrument reading had an absolute value greater than the reporting limit

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 570-7002-1

Laboratory: Eurofins Calscience LLC

Narrative

Job Narrative
570-7002-1

Comments
No additional comments.

Receipt
The samples were received on 9/11/2019 1:30 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 2 coolers at receipt time were 2.7º C and 3.0º C.

Receipt Exceptions

Per the request of April McGuire (Roux Associates) - the sample ID for sample #18, SV-6-15 was revised to SV-6-10.5.

GC/MS VOA
Method 8260B: The initial calibration curve analyzed in batch 570-18660 was outside method criteria for the following analyte(s): Bromomethane. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte(s) is considered an estimated concentration.

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-18660.

Method 8260B: The initial calibration curve analyzed in batch 570-18939 was outside method criteria for the following analyte(s): Bromomethane. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte(s) is considered an estimated concentration.

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-18939.

Method 8260B: The following sample was diluted due to the nature of the sample matrix: SV-3-5 (570-7002-31). Elevated reporting limits (RLs) are provided.

Method 8260B: The initial calibration curve analyzed in batch 570-19228 was outside method criteria for the following analyte(s): Bromomethane. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte(s) is considered an estimated concentration.

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-19228.

Method 8260B: The initial calibration curve analyzed in batch 570-20143 was outside method criteria for the following analyte(s): Bromomethane. As indicated in the reference method, sample analysis may proceed; however, any detection or non-detection for the affected analyte(s) is considered an estimated concentration.

Method 8260B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 570-20143 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
Method 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 570-19162 and analytical batch 570-19773 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Job ID: 570-7002-1 (Continued)

Laboratory: Eurofins Calscience LLC (Continued)

Method 6010B: The absolute response for Molybdenum, Antimony, and Selenium was greater than the method reporting limit (RL) in the following samples: SV-6-0.5 (570-7002-15) and SB-4-2 (570-7002-28).
The instrument raw data has been manually reviewed and the result can be reported as ND.

Method 6010B: The absolute response for Selenium was greater than the method reporting limit (RL) in the following sample: SB-2-2 (570-7002-24).
The instrument raw data has been manually reviewed and the result can be reported as ND.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep
Method 5035: The following sample was received in pre-weighed containers with a label that was added in the field, which would cause a slight low bias in the final results. SV-3-5 (570-7002-31). Vial B

Method 5035: The following sample was received in pre-weighed containers with a label that was added in the field, which would cause a slight low bias in the final results. SV-3-5 (570-7002-31) Vial C & D

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Detection Summary

Subject: RE: Eurofins Calscience files from 570-7002-1 Mulligan / 2367.0009

EXTERNAL EMAIL*

Hi Virendra,

Correct. The project number is 2367.0009.

Also, there should be a separate COC for the waste disposal sample. Page 1 of 1, also from 9/10. Was that COC also received?

Subject: Eurofins Calscience files from 570-7002-1 Mulligan / 2367.0009

This message originated outside your organization. Please use caution!

Hello,

Attached please find the files for job 570-7002-1; Mulligan / 2367.0009.

Please confirm the project number is still 2367.0009 - not listed on the COC?

Please feel free to contact me if you have any questions.

Thank you.

Login Number: 7002

List Number: 1

Creator: Castro, Joy

List Source: Eurofins Calscience

Question	Answer	Comment
Radioactivity wasn't checked or is </= background as measured by a survey meter.	N/A	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	True

Virendra Patel, Project Manager I
(714)895-5494
virendrapatel@eurofinsus.com

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Definitions/Glossary

Client: Roux Associates, Inc.
Project/Site: Mulligan / 2367.0009

Job ID: 570-7003-1

Qualifiers

Metals

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
F1	MS and/or MSD Recovery is outside acceptance limits.
L	A negative instrument reading had an absolute value greater than the reporting limit

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Comments
No additional comments.

Receipt
The samples were received on 9/11/2019 1:30 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 3.2º C.

GC/MS VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
Method(s) 6010B: The absolute response for Antimony and Selenium was greater than the method reporting limit (RL) in the following sample: SB-1-0.5 (570-7003-1).
The instrument raw data has been manually reviewed and the result can be reported as ND.

Method(s) 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 570-19118 and analytical batch 570-19541 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method(s) 6010B: Due to the high concentration of Barium, the matrix spike / matrix spike duplicate (MS/MSD) for preparation batch 570-19118 and analytical batch 570-19541 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

Method(s) 6010B: The absolute response for Molybdenum was greater than the method reporting limit (RL) in the following sample: SB-7-0.5 (570-7003-2).
The instrument raw data has been manually reviewed and the result can be reported as ND.

Method(s) 6010B: The absolute response for Molybdenum, Antimony, and Selenium was greater than the method reporting limit (RL) in the following sample: SB-7-2 (570-7003-3).
The instrument raw data has been manually reviewed and the result can be reported as ND.

Method(s) 6010B: The absolute response for Antimony and Selenium was greater than the method reporting limit (RL) in the following sample: SB-9-0.5 (570-7003-4).
The instrument raw data has been manually reviewed and the result can be reported as ND.

Method(s) 6010B: The absolute response for Antimony was greater than the method reporting limit (RL) in the following samples: SB-5-0.5 (570-7003-8), SB-8-0.5 (570-7003-11), SB-8-2 (570-7003-12) and SB-6-2 (570-7003-15).
The instrument raw data has been manually reviewed and the result can be reported as ND.

Method(s) 6010B: The absolute response for Selenium was greater than the method reporting limit (RL) in the following sample: SB-5-2 (570-7003-9).
The instrument raw data has been manually reviewed and the result can be reported as ND.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.
