Subject: ***Phase I Environmental Site Assessment, Proposed Office Building and Workshop, 26501 Madison Avenue, City of Murrieta, Riverside County, California, APN: 910-230-003.***

INTRODUCTION

LGC Geo-Environmental, Inc. (LGC) is pleased to submit herewith our Phase I Environmental Site Assessment (ESA) report regarding proposed office building and workshop development of the subject property (the Property), which is located at 26501 Madison Avenue, City of Murrieta, Riverside County, California. The Property is identified as Assessor's Parcel Number (APN) 910-230-003. Our Phase I ESA was performed in accordance with American Society for Testing and Materials (ASTM) Standard E1257-13.

This report also presents and evaluates the results of LGC's site reconnaissance, review of previous reports, historical review, regulatory records review, and other information and documentation.

This Phase I ESA have been performed for the exclusive use and benefit of the addressee identified on the cover of this report, or agents directly specified by the addressee, for the transaction at issue concerning the Property described in this report. This Phase I ESA shall not be used or relied upon by others without the prior written consent of LGC, and of the addressee identified on the cover of this report.

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 40 CFR §312.10. I have the specific qualifications based on education, training and experience to assess a *property* of the nature, history, and setting of the *subject property.* I have developed and performed the All Appropriate Inquiries in conformance with the standard and practices set forth in 40 CFR Part 312.

The objective of this Phase I ESA was to ascertain the potential presence or absence of recognized environmental conditions that could impact the Property, as delineated in the scope of services and limitations identified in this report and in the service agreement. The procedure was to perform reasonable steps in accordance with the existing regulations, currently available technology, and generally accepted environmental consulting practices, to accomplish the stated objective.

Our services were performed using the degree of care and skill ordinarily exercised, under similar circumstances, by reputable engineers and geologists practicing in this or similar localities. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this report. The surface observations made by LGC are believed representative of the entire project. Sub-surface soil and geologic conditions, however, may be different from our preliminary findings. If this occurs, the changed conditions must be evaluated by the project soils engineer and geologist for alternative recommendations.

The findings of this report are valid as of the present date. Changes in the conditions of a property, however, can and do occur with the passage of time, whether due to natural and/or manmade processes on the Property or adjacent properties.

In addition, changes in applicable or appropriate standards may occur, whether they result from legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated wholly or partially by changes outside our control.

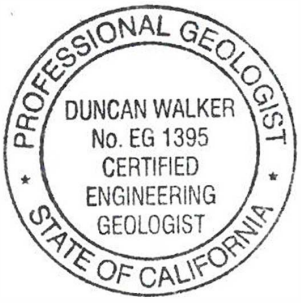

CLOSING

It has been a pleasure to be of service to you on this project. Should you have any questions, regarding the contents of this report or should you require additional information, please contact this office at your earliest convenience.

Respectfully submitted,

LGC GEO-ENVIRONMENTAL, INC.

Duncan Walker, CEG 1395
Environmental Professional/Certified Engineering Geologist

Distribution: (4) Addressee

EXECUTIVE SUMMARY

Overview – LGC Geo-Environmental, Inc. (LGC) was retained by Lyles Diversified, Inc. to perform a Phase I Environmental Site Assessment (ESA) regarding the proposed office building and workshop development located at 26501 Madison Avenue, City of Murrieta, Riverside County, California (the Property). The Property is identified as Assessor's Parcel Number (APN) 910-230-003.

This Phase I ESA was performed in accordance with the scope and limitations of the *American Society for Testing and Materials (ASTM) Standard E1527-13.* The following summarizes LGC's independent conclusions and best professional judgment based upon information available to us during this Phase I ESA.

The purpose and scope of this Phase I ESA are to make preliminary conclusions regarding potential presence of recognized environmental conditions (RECs), including controlled RECs (CRECs), on, at, in, or to the Property. ASTM defines RECs as the presence or likely presence of hazardous substance or petroleum products on, at, in, or to a property. Historical RECs (HRECs) and de minimis conditions are not considered RECs.

When making any decisions concerning the findings of this Phase I ESA, please also refer to the remainder of this report, which may provide additional information regarding the items below and/or present other items of interest that are not discussed in this Executive Summary.

Property Description – Located along the southwest side of Madison Avenue at its intersection with Golden Gate Circle, the Property is approximately rectangular and comprises approximately 5.83 acres. The Property is vacant and unfenced. The paved portion of Madison Avenue ends at its intersection with Golden Gate Circle north of the Property. The Property is bounded on the northwest by a vacant parcel, on the northeast by Madison Avenue (dirt road) followed by a vacant parcel, on the southwest by commercial parcels and on the southeast by commercial parcels and Warm Springs Creek. Warm Springs Creek (a blueline stream) also crosses the southeast portion of the Property. The southeast part of the Property is within a 100-year flood zone associated with Warm Springs Creek; the flood zone extends approximately to the top of the west streambank.

Property Observations – At the time of our site reconnaissance on February 13, 2019, the Property was vacant. Vehicular access to the Property is via: 1) an onsite dirt road in the north extending from Madison Avenue, and 2) an onsite dirt road in the southwest extending from an adjoining commercial development. Dirt roads and trails crisscross most of the Property, which is covered with patchy annual grasses/weeds and scattered bushes and trees. The area along Warm Springs Creek in the southeast is heavily vegetated with numerous trees and bushes. In the northwest there is a steel standpipe with a welded cap which protects an unused water well which was installed in 2017. Along the upper bank of Warm Springs Creek in the south portion there are a number of wood chipper waste piles, which were apparently imported from unknown source(s). Scattered pieces of concrete, asphalt, and wood are visible on the surfaces of the chipper waste piles, but no stained areas and no chemical/petroleum odors were noted. There is also a pile of concrete slab pieces along the upper bank of Warm Springs Creek and other scattered trash (apparently non-hazardous solid waste) along the upper bank and near the north property corner. No stressed vegetation was observed.

Property Background – Historical aerial photographs of the Property dating back to 1938, as well as historical topographic maps dating back to 1901, were reviewed as part of this Phase I ESA. During the 1980s and early 1990s, there was apparently a single-family residence (SFR) and another structure on the northeast part the Property along Madison Avenue. Rural/agricultural development of surrounding area apparently began in the late 1800s, with rural residential development and most of the current major streets dating back to the 1940s. The area began transitioning from rural residential to mixed residential/commercial during the 1970s.

Potable Water Source – Potable water service provided by Rancho California Water District (RCWD is available to the Property, and there is a water main in the intersection of Madison Avenue and Golden Gate Circle. RCWD records indicate that the Property would have to apply to RCWD for annexation to get water service. The RCWD 2017 *Consumer Confidence Report* states that its drinking water is in compliance with federal health-based drinking water standards.

Onsite Wastewater Treatment Systems – Public sewer service provided by East Municipal Water District (EMWD) is available to the Property, and there is a sewer main in the intersection of Madison Avenue and Golden Gate Circle. EMWD records indicate that the Property is not connected to the public sewer service. The former SFR that was located on the northeast part the Property was probably served by an onsite wastewater treatment system (OWTS). If there is or was an OWTS on the Property, its location is unknown.

Environmental Data Resources Report – LGC utilized Environmental Data Resources, Inc. (EDR) to conduct a search of available environmental databases, records and resources regarding the Property. EDR searched the databases for sites surrounding the Property to meet the requirements of *ASTM Standard E1527-13*. The results of EDR's research are contained in *The EDR Radius Map™ Report with GeoCheck®, Inquiry 5547658.2s*, dated January 29, 2019. To supplement the EDR Report, LGC additionally reviewed online databases for four environmental agencies.

The Property and adjoining properties are not listed in any of the databases searched by EDR or in the four additional online databases reviewed by LGC. The EDR Report also lists and describes 15 sites (14 sites after combining apparent duplicate listings) located within ASTM-specified search radii surrounding the Property, some of which were also listed in the four additional online databases reviewed by LGC. None of sites identified by EDR and/or in the four additional online databases is considered to a concern as regards the Property.

Findings – A summary of our findings is provided below. Details are not included or fully developed in this section, and the Phase I ESA report must be read in its entirety for a comprehensive understanding of these findings.

- The Property is located along the southwest side of Madison Avenue southeast of its intersection with Golden Gate Circle and consists of a rectangular parcel comprising approximately 5.83 acres. The Property is vacant and unfenced.
- The southeast part of the Property is within a 100-year flood zone associated with Warm Springs Creek; the flood zone extends approximately to the top of the west streambank.
- Historical aerial photographs of the Property dating back to 1938, as well as historical topographic maps dating back to 1901, were reviewed as part of this Phase I ESA. During the 1980s and early 1990s, there was apparently an SFR and another structure on the northeast part the Property adjacent to Madison Avenue.
- The former SFR that was located on the northeast part the Property was probably served by an OWTS. If there is or was an OWTS on the Property, its location is unknown.
- The Property and adjoining properties were not identified in the databases in the EDR Report or in the four additional online databases reviewed by LGC.
- No evidence of pesticides or herbicides spills was observed on the Property during our site reconnaissance. Other than incidental residential use associated with the former SFR, possibly including application of termiticides around and/or under former structures, there is no indication that pesticides or herbicides were used on the Property.
- No evidence of current or past storage or use of hazardous materials or petroleum products was identified on the Property during our site reconnaissance and records review.
- Along the upper bank of Warm Springs Creek in the south portion there are a number of wood chipper waste piles, which were apparently imported from unknown source(s). Scattered pieces of concrete, asphalt, and wood are visible on the surfaces of the chipper waste piles, but no stained areas and no chemical/petroleum odors were noted.
- There is also a pile of concrete slab pieces along the upper bank of Warm Springs Creek and other scattered trash (apparently non-hazardous solid waste) along the upper bank and near the north property corner.
- In the northwest there is an inactive public water supply well (drilled and installed in 2017) with a steel standpipe and a welded cap.
- No stained surface soil or other visible evidence of petroleum products or hazardous materials spills was observed on the Property. No stressed vegetation was observed.
- No evidence of aboveground storage tanks was observed on the Property during our site reconnaissance or identified during record review.
- No evidence of underground storage tanks, sumps, clarifiers, or other storage or treatment structures for hazardous materials or petroleum products was observed on the Property during our site reconnaissance or identified during record review.
- No evidence of known regulatory actions, regarding hazardous materials or petroleum products cleanup that have been issued or are being issued for the Property, was identified during our records review.

Opinions – A summary of our opinions is provided below. Details are not included or fully developed in this section, and the Phase I ESA report must be read in its entirety for a comprehensive understanding of these opinions.

- No apparent or potential threat of past or present hazardous material releases exists regarding the Property based on the EDR Report and the Agency Contact and Database Search, including the 14 sites identified within the ASTM-specified search radii surrounding the Property.
- A Vapor Encroachment Condition does not exist or is not likely to exist in connection with the Property.
- No RECs, including CRECs, were identified on, at, in, or to the Property.
- No significant data gaps were identified that affect the ability of the Environmental Professional to identify RECs.
- There are no unusual circumstances where greater certainty is required regarding RECs.

Conclusions and Recommendations – LGC has performed a Phase I ESA of the Property in conformance with the scope and limitations of *ASTM E1527-13*. There were no exceptions to, or deletions from *ASTM E1527-13* in conducting this Phase I ESA. This Phase I ESA has revealed no evidence of RECs in connection with the Property.

LGC recommends the following, based on the results of this Phase I ESA:

- The wood chipper waste piles along the upper bank of Warm Springs Creek, which were apparently imported from unknown source(s), should be removed and properly disposed of offsite.
- The pile of concrete slab pieces along the upper bank of Warm Springs Creek and other scattered trash (apparently non-hazardous solid waste) along the upper bank and near the north property corner should be removed and properly disposed of offsite.
- If an OWTS (associated with the former SFR) is encountered during future grading and development onsite, then it should be removed in accordance with applicable city and/or county regulations.

Non-Scope Issues – The following Non-Scope Issues, which are outside the scope of *ASTM E1527-13*, were assessed in connection with this Phase I ESA of the Property.

Building construction materials that could contain hazardous materials, including asbestos-containing building materials (ACBMs) and lead-based paint (LBP), were considered during this Phase I ESA. There are no structures on the Property. No trash or debris indicative of potential ACBMs and/or LBP related to the former structures were observed on the Property. Therefore, ACBMs and LBP are not considered to be concerns regarding the Property.

Indoor radon levels on the Property were considered during this Phase I ESA. Available information indicates that the Property is in Radon Zone 2 and has a predicted average indoor radon screening level which is less than or equal to the USEPA's radon action level. Radon is therefore not a concern regarding the Property.

Natural occurrences of asbestos near the Property were considered during this Phase I ESA. Available information indicates that there are no reported natural asbestos occurrences or historic asbestos/prospects mines located within 1 mile of the Property. Natural asbestos occurrences and historic asbestos mines/prospects are therefore not concerns regarding the Property.

1.0 INTRODUCTION

1.1 Purpose

LGC Geo-Environmental, Inc. (LGC) was retained by Lyles Diversified, Inc. to perform a Phase I Environmental Site Assessment (ESA) regarding the proposed office building and workshop development located at 26501 Madison Avenue, City of Murrieta, Riverside County, California (the Property). The Property is identified as Assessor's Parcel Number (APN) 910-230-003.

This Phase I ESA was performed in accordance with the scope and limitations of *American Society for Testing and Materials (ASTM) E1527-13: Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.* This Phase I ESA report summarizes LGC's independent conclusions and best professional judgment based upon information available to us during this Phase I ESA.

The purpose and scope of this Phase I ESA are to make preliminary conclusions regarding the potential presence of recognized environmental conditions (RECs), including controlled RECs (CRECs), on, at, in, or to the Property. Historical RECs (HRECs) are not considered RECs. ASTM defines REC as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. de minimis conditions are not recognized environmental conditions."

1.2 Scope of Services

LGC's Scope of Services included the following:

- Reconnaissance of the Property to visually assess current conditions on the Property and adjoining properties.
- Locate and document the potential onsite presence and possible use or storage of hazardous materials or petroleum products, in addition to any signs of surface or subsurface contamination.
- Review of historical aerial photographs and topographic maps.
- Review of available reports and documents previously prepared for the Property.
- Review of the soil and groundwater conditions on the Property.
- Review of available environmental and geologic maps which may have been prepared for the Property.
- Review of state and federal environmental databases regarding the Property and surrounding area.
- Environmental analysis of data to address environmental issues relative to hazardous wastes associated with the Property.
- Review of available regulatory agency files.
- Access to the current purchase price and the fair market value of the Property.

There are no data gaps to *ASTM Standard E1527-13* which affect the ability of the Environmental Professional to identify conditions indicative of releases or threatened releases of hazardous substances on, at, in, or to the Property.

1.3 User Questionnaire

A *User Questionnaire* was completed by Charley Black of Lee & Associates on behalf of Lyles Diversified, Inc. (the User of this Phase I ESA) and returned to LGC (Appendix F). Charley Black indicated that: 1) the purchase price/loan amount for the Property reasonably reflects the fair market of the Property, and 2) he had geotechnical studies and reports regarding hydrogeologic conditions on the Property or surrounding area. He also indicated that he had no other information or documents regarding the Property, including no information regarding recorded environmental cleanup liens or recorded Activity and Use Limitations (AULs). LGC was not provided with a preliminary title report for the Property.

1.4 Interviews

LGC interviewed the following, an Interview Log (Appendix F) summarizes these interviews:

- Todd R. Sheller (Lyles Diversified, Inc.) regarding the *User Questionnaire* and general information about the Property.
- Charley Black (Lee & Associates) regarding the *User Questionnaire* and general information about the Property.

- Bryan Clendenen (Clendenen Development Co.) regarding the *User Questionnaire*.
- East Municipal Water District (EMWD) Engineering Department regarding water and sewer service to the Property.
- Rancho California Water District (RCWD) Engineering Services Department regarding water and sewer service to the Property.

2.0 PROPERTY OVERVIEW

2.1 Location and Property Description

Located along the southwest side of Madison Avenue at its intersection with Golden Gate Circle, the Property is approximately rectangular and comprises approximately 5.83 acres (Property Location Map, Figure 1). The Property is vacant and unfenced. The paved portion of Madison Avenue ends at its intersection with Golden Gate Circle north of the Property. The Property is bounded on the northwest by a vacant parcel, on the northeast by Madison Avenue (dirt road) followed by a vacant parcel, on the southwest by commercial parcels and on the southeast by commercial parcels and Warm Springs Creek. Warm Springs Creek (a blueline stream flowing toward the west-southwest) also crosses the southeast portion of the Property. The southeast part of the Property is within a 100-year flood zone associated with Warm Springs Creek; the flood zone extends approximately to the top of the west streambank.

2.2 Existing Improvements and Vegetation

At the time of our site reconnaissance on February 13, 2019, the Property was vacant. Vehicular access to the Property is via: 1) an onsite dirt road in the north extending from Madison Avenue, and 2) an onsite dirt road in the southwest extending from an adjoining commercial development. A number of dirt roads and trails crisscross most of the Property, which is covered with patchy annual grasses/weeds and scattered bushes and trees. The area along Warm Springs Creek in the southeast is heavily vegetated with numerous trees and bushes. In the northwest there is a steel standpipe with a welded cap which protects an unused water well which was installed in 2017. Along the upper bank of Warm Springs Creek in the south portion there are a number of wood chipper waste piles, which were apparently imported from unknown source(s). Scattered pieces of concrete, asphalt, and wood are visible on the surfaces of the chipper waste piles, but no stained areas and no chemical/petroleum odors were noted. There is also a pile of concrete slab pieces along the upper bank of Warm Springs Creek and other scattered trash (apparently non-hazardous solid waste) along the upper bank and near the north property corner. No stressed vegetation was observed.

2.3 Historical Property Description

Historical aerial photographs of the Property dating back to 1938, as well as historical topographic maps dating back to 1901, were reviewed as part of this Phase I ESA. During the 1980s and early 1990s, there was apparently a single-family residence (SFR) and another structure on the northeast part the Property along Madison Avenue. Rural/agricultural development of surrounding area apparently began in the late 1800s, with rural residential development and most of the current major streets dating back to the 1940s. The area began transitioning from rural residential to mixed residential/commercial during the 1970s.

2.4 Topography

The regional surface slope for the Property and surrounding area is toward the southwest. Ground surface elevations on the Property range from approximately 1,086 feet above mean sea level (msl) along the northwest property line to approximately 1,041 feet above msl in the channel of Warm Springs Creek near the south property corner. There is an elevated L-shaped area in the northwest and northeast, which is partially underlain by undocumented artificial fill. The northwest portion is a bench; a cut slope ascends northwest from the bench toward higher ground offsite. The bench and a small adjoining pad, together with the access road from Madison Avenue in the northeast, were graded in 2017 for equipment access to drill and install the onsite water well. A cut slope descends southwest from the end of the bench and pad toward an offsite parking area. The northeast portion consists of an arcuate pad which includes the site of the former SFR; graded slopes descend southwest, southeast and northeast from the pad. The south portion of the Property is apparently ungraded natural ground, including the

0 ft. 50 ft. 100 ft. 200 ft.

Map distances are approximate

Map base reproduced from Google Earth photo (08/13/2018).

Date	February 2019

steeply-sloped, incised channel of Warm Springs Creek. Most onsite stormwater, together with tributary runoff from the elevated offsite area to the northwest, apparently flows into Warm Springs Creek.

2.5 Geology

Regionally, the Property is within the Peninsular Ranges Geomorphic Province of California. The Peninsular Ranges are characterized by steep, elongated valleys and mountain ranges that trend west and northwest. The mountainous areas are underlain by Pre-Cretaceous metasedimentary and metavolcanic rocks and Cretaceous plutonic rocks of the Southern California Batholith. The valleys are underlain by young alluvial deposits followed by Quaternary and Tertiary bedrock units (sandstones, mudstones and conglomerates, as well as volcanics). The Property and surrounding area are primarily underlain by sandstone bedrock of Pauba formation (Pleistocene). In Warm Springs Creek, young alluvial fan deposits (Holocene and late Pleistocene) overlie Pauba formation bedrock.

The northwest-southeast trending topography for the area is controlled by the Elsinore fault zone (EFZ), which extends northwesterly approximately 190 miles from San Diego County through Riverside County to southeastern Los Angeles County. The EFZ separates the Perris Block on the northeast, which includes the Property, from the Santa Ana Mountains Block on the southwest. The Property is not underlain by active faults. A short trace of the Wildomar fault, which is not designated an active fault, is located approximately 0.10 mile southwest of the Property. The nearest active fault is the Wildomar fault, which is part of the EFZ and is located approximately 0.19 mile southwest of Property. A narrow portion of the Property along the southwest property line is within the County Fault Zone, which has been established by Riverside County regarding the Wildomar fault (California Geologic Survey (CGS), 2018b and Riverside County, 2018).

2.6 Groundwater

The California Department of Water Resources (DWR) *Water Data Library* was researched online regarding historical groundwater depths in wells near the Property. The *Water Data Library* indicates State Well Number 335381N1171759W001 is the nearest well that is located on same side of Warm Springs Creek as the Property. This well is located approximately 0.21 mile northeast of the Property, and the only groundwater depth was recorded at 34 feet below ground surface (bgs) in 1968. In July and August 2017, a public water supply well was drilled and installed onsite in the northwest. This well is inactive (capped), and the recorded groundwater depth was 380 feet bgs on August 2, 2017 (Eric Haley dba Heritage Well Service, 2017).

2.7 Potable Water Source

Potable water service provided by RCWD is available to the Property, and there is a water main in the intersection of Madison Avenue and Golden Gate Circle. RCWD records indicate that the Property would have to apply to RCWD for annexation to get water service. The RCWD *2017 Consumer Confidence Report* states that its drinking water is in compliance with federal health-based drinking water standards.

2.8 Onsite Wastewater Treatment Systems

Public sewer service provided by EMWD is available to the Property, and there is a sewer main in the intersection of Madison Avenue and Golden Gate Circle. EMWD records indicate that the Property is not connected to the public sewer service. There is no information available regarding the former SFR that was located on the northeast part the Property, but it was probably served by an onsite wastewater treatment system (OWTS). If there is or was an OWTS on the Property, its location is unknown. If an OWTS is encountered during future grading and development onsite, then it should be removed in accordance with applicable city and/or county regulations.

3.0 RECORDS REVIEW

3.1 Historical Aerial Photograph Review

The following table describes the historical aerial photographs provided by Environmental Data Resources, Inc. (EDR) that were reviewed during this Phase I ESA (Appendix C). These historical aerial photographs were reviewed for evidence of potential past usage, storage, and/or disposal of hazardous materials or petroleum products on the Property and vicinity, which include, but are not limited to: landfills, oil wells, storage drums, underground storage tanks (USTs), aboveground storage tanks (ASTs), gas stations, agricultural operations known to use pesticides or herbicides, waste disposal pipes, and waste disposal areas.

HISTORICAL AERIAL PHOTOGRAPH REVIEW

Date	Observations
1938	The Property is vacant. Jefferson Ave. is visible. There are rural SFRs to the east & south & agricultural fields in the surrounding area.
1949	No significant changes since 1938.
1953	There is an unnamed highway to the NE approximately along the current alignment of I-15, & there are more roads in the surrounding area. No other significant changes since 1949.
1961	No significant changes since 1953.
1967	There are more SFRs & agriculture in the surrounding area. No other significant changes since 1961.
1978	There are more SFRs & agriculture in the surrounding area. Madison Ave. (dirt) is NW of the Property. The highway to the NE is now a divided road. No other significant changes since 1967.
1985	There is an SFR & 2nd structure on the Property in the NE. There are more SFRs & less agriculture in the surrounding area. No other significant changes since 1978.
1989	Commercial development has begun to the south & SE, & the former residential area nearby to the south is being regraded. No other significant changes since 1985.
1996	The SFR & structure are gone from the Property. Commercial development has increased to the south & SE, including adjoining SE. Madison Ave. is paved NW of the Property, & many of the current streets are visible. No other significant changes since 1989.
2002	The Property is crisscrossed with dirt roads & trails similar to the present. Commercial development has increased to the south & SE. No other significant changes since 1996.
2006	Commercial development has increased to the south & SE & has begun to the north and NW. No other significant changes since 2002.
2009	Commercial development has increased in the surrounding area. No significant changes since other 2006.
2012	No significant changes since 2009.
2016	The surrounding area are developed in approx. current conditions. No other significant changes since 2012.

3.2 ***Historical Topographic Map Review***

The following table describes the historical topographic maps provided by EDR that were reviewed during this Phase I ESA (Appendix C). These historical topographic maps were reviewed for evidence of potential past usage, storage, and/or disposal of hazardous materials or petroleum products on the Property and vicinity, which include, but are not limited to: landfills, oil wells, storage drums, USTs, ASTs, gas stations, agricultural operations known to use pesticides or herbicides, waste disposal pipes, and waste disposal areas.

HISTORICAL TOPOGRAPHIC MAP REVIEW

Date	Observations
1901	The Property is apparently vacant. Warm Springs Creek is visible, together with Murrieta Creek, Santa Gertrudis Creek & a number of unnamed blueline streams south & west of the Property. Temecula Line railroad is southwest of the Property, and there are a number of unnamed streets in the area.
1942	There are a number of structures (probably SFRs) in the area. Jefferson Ave., Webster Ave. & Banana Ave. are visible, together with many of the other current major streets. The railroad line is gone. No other significant changes since 1901.
1943	No significant changes since 1942.
1947	No significant changes since 1943.
1953	There is an unnamed highway approximately along the current alignment of I-15. There is a levee along Murrieta Creek. There are scattered small orchards & reservoirs in the area No other significant changes since 1947.
1973	The highway is now divided & named US 995 / SR 71; to the north it splits to follow both I-15 & I-215 alignments. There is a trailer park to the NE. No other significant changes since 1953.
1979	The highway now has interchanges & both highways to north are now divided. The Property & surrounding area have a magenta background & have no structural details. No other significant changes since 1973.
2012	The highways are now I-15 & I-215; Webster Ave. & Banana Ave. are now Murrieta Hot Springs Rd. & Winchester Rd. The Property & surrounding area are developed in approx. current conditions. No other significant changes since 1979.

3.3 City Directories

EDR provided the following historical City Directories listings for the 26501 Madison Avenue address related to the Property (Appendix E). In 1990, Teri L. Kelly, Frank McGavran, Steve L. Obrien and Kristi Seguzn were listed; and in 1985, Frank McGavran was listed.

3.4 Sanborn Insurance Maps

No Sanborn Fire Insurance Maps were available for the Property and surrounding area.

3.5 Assessor's Parcel Number

Riverside County Assessor's Office records indicate that the Property consists of APN 910-230-003.

3.6 Prior Environmental Site Assessment Reports

Based on research and data obtained during this Phase I ESA, there are no records of prior ESA Reports regarding the Property. LGC was provided the following documents and plans referenced in Appendix A: *Phase I Cultural Resources Assessment* (Archaeological Associates, 2018), *Geotechnical Investigation* (Global Geo-Engineering, Inc. (Global), 2017), *Preliminary Hydrology and Hydraulics Report* (Saxon Engineering Services, Inc. (Saxon), 2017), *Non-Specific Rough Grading Plan* (Saxon, undated), *Preliminary Street Improvement Plan* (Saxon, undated). The perforated pipe that Global placed in its 2017 boring P-1 remains in the south part of the Property. Review of these documents and plans indicated that they provide no other information of use for this Phase I ESA.

3.7 Environmental Data Resources Report

LGC utilized EDR to conduct a search of available environmental databases, records and resources regarding the Property. EDR searched the databases for sites surrounding the Property to meet the requirements of *ASTM Standard E1527-13*, including ASTM-specified search radii of up to 1.000 mile and data currency. The results of EDR's research are contained in *The EDR Radius Map™ Report with GeoCheck®, Inquiry 5547658.2s*, dated January 29, 2019 (Appendix D). The Government Records Searched and Data Currency Tracking section in EDR's Report describes the databases that were searched, including data currency.

The Property and adjoining properties are not listed in any of the databases searched by EDR. The EDR Report lists and describes 15 sites located within ASTM-specified search radii surrounding the Property. Based on name and address information, two of the 15 sites were combined into one site, resulting in the following 14 sites located within ASTM-specified search radii surrounding the Property:

MAP FINDINGS SUMMARY – EDR REPORT

EDR MAP ID	SITE NAME	SITE ADDRESS	EDR DATABASE ACRONYMS	REL. ELEV.	DIST. (mi), DIR.
1	RANCHO CALIFORNIA WATER DISTRICT WELL#309	26585 MADISON ST	RCRA-LQG	Lower	0.026, ESE
2	OUTDOOR MEDIA GROUP	26525 JEFFERSON AVE	RCRA-SQG, ~~HAZNET~~, ~~FINDS~~, ~~ECHO~~	Lower	0.107, SW

Notes: Strike-Through of an EDR database acronym indicates the Site is beyond the search radius for that database.
"(2)" indicates two apparent duplicate EDR database acronym listings for the same Site.

The following is a discussion of the Standard Federal, State, and Tribal Environmental Record Sources (*ASTM Standard E1527-13*), including the above 14 sites listed in the EDR Report.

3.7.1 National Priority List (NPL), Proposed NPL, Delisted NPL, and NPL Liens

The NPL is a USEPA listing of uncontrolled or abandoned hazardous waste sites undergoing long-term remedial action under the Superfund Act. The Proposed NPL is a USEPA listing of sites proposed for the NPL. The Delisted NPL is a USEPA listing of sites which were once considered to be NPL sites but have been reviewed and removed from the NPL. This may be because they have been remediated or reevaluated based on additional information. The NPL Liens is a listing of filed notices of Superfund Liens. No NPL, Proposed NPL or Delisted NPL sites were identified within 1.000 mile of the Property, and no NPL Liens sites were identified within 0.001 mile of the Property.

3.7.2 Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) List

CERCLIS is a USEPA listing of sites that are either proposed or on the NPL and sites that are in the screening and assessment phase for possible inclusion on the NPL. No CERCLIS sites were identified within 0.500 mile of the Property.

3.7.3 CERCLIS No Further Remedial Action Planned (NFRAP) List

CERCLIS-NFRAP is a USEPA listing of CERCLIS sites where following an initial investigation, no contamination was found, contamination was quickly removed, or contamination was not serious enough to require Federal Superfund action or NPL consideration. No CERCLIS-NFRAP sites were identified within 0.500 mile of the Property.

3.7.4 Resource Conservation and Recovery Act (RCRA) Corrective Actions (CORRACTS) List

RCRA CORRACTS is a USEPA listing of RCRA facilities that are undergoing corrective action. Corrective actions may be required beyond the facility's boundary and can be required regardless of when the release occurred. No RCRA CORRACTS sites were identified within 1.000 mile of the Property.

3.7.5 RCRA Non-CORRACTS Treatment, Storage, and Disposal (TSD) Facilities List

USEPA maintains a list of RCRA Non-CORRACTS TSD facilities, which have permits to manage hazardous material. No RCRA Non-CORRACTS TSD facilities were identified within 0.500 mile of the Property.

3.7.6 ***RCRA Generators List***

The RCRA Generators List contains facilities that generate, store, transport, treat, or dispose of hazardous waste. Large Quantity Generator (LQG) facilities generate at least 1,000 kilograms (kg) per month of hazardous waste or 1 kg per month of acutely hazardous waste. Small Quantity Generator (SQG) facilities generate between 100 and 1,000 kg per month of hazardous waste. There are five RCRA-SQGs and one RCRA-LQG within 0.250 mile of the Property (see table above). These five RCRA-SQGs and one RCRA-LQG have "No Violations Found" and are therefore not considered to be concerns regarding the Property.

3.7.7 ***Federal Institutional Control/Engineering Control Registries***

Institutional controls and engineering controls are forms of AULs which are an explicit recognition that residual levels of hazardous substances or petroleum products may be present on the Property and unrestricted use of the Property may not be acceptable. The Property was not identified the Federal Institutional Control/Engineering Control Registries Lists.

3.7.8 ***Emergency Response Notification System (ERNS) List***

ERNS is a USEPA listing of reported Comprehensive Environmental Response Compensation and Liability Act (CERCLA) hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center (NRC). The Property was not identified on the ERNS List.

3.7.9 ***State- and Tribal-Equivalent NPL (RESPONSE)***

The State- and Tribal-Equivalent NPL (RESPONSE) list identifies confirmed release sites where Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. RESPONSE sites are generally high-priority and high potential risk. No RESPONSE sites were identified within 1.000 mile of the Property.

3.7.10 ***State- and Tribal-Equivalent CERCLIS (ENVIROSTOR)***

The *ENVIROSTOR* database identifies sites that have known contamination or sites for which there may be reasons to investigate further. There are four *ENVIROSTOR* sites within 1.000 mile of the Property (see table above). These four School Investigation sites each have a "No Action Required" or "No Further Action" Status and are also listed in section 3.8.4 with the same Status. Based on their reported statuses, these four School Investigation sites are therefore not considered to be concerns regarding the Property.

3.7.11 ***State and Tribal Landfill and/or Solid Waste Disposal Site Lists***

The Solid Waste Information System (SWIS) list contains Solid Waste Facilities/Landfill (SWF/LF) site records of Active, Closed and Inactive Landfills. There are no SWF/LF sites within 0.500 mile of the Property.

3.7.12 ***State and Tribal Leaking Underground Storage Tank (LUST) Sites***

Lists of LUST sites registered with the state (including *GeoTracker*) and USEPA (tribal). There are no LUST sites within 0.500 mile of the Property.

3.7.13 ***State and Tribal Registered UST Sites***

An inventory of USTs registered with the state (including *GeoTracker*) and USEPA (tribal). There are no UST sites within 0.250 mile of the Property.

3.7.14 ***Registered Aboveground Storage Tank Sites***

A list of AST sites registered with the SWRCB. There is one registered AST site (apparent duplicate database listings for the same site) within 0.250 mile of the Property (see table above). This AST site is not considered to be a concern regarding the Property because no releases or violations were reported.

3.7.15 State and Tribal Voluntary Cleanup Program (VCP) Sites

A listing of low threat level sites with confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities. No VCP sites were identified within 0.500 mile of the Property.

3.7.16 State and Tribal Brownfields Sites

A listing of Brownfields sites which have come to the SWRCB through the Memorandum of Agreement (MOA) Process. No Brownfields sites were identified within 0.500 mile of the Property.

3.7.17 Recycling Facilities in California Database (SWRCY)

A listing of recycling facilities in California. There one SWRCY site within 0.500 mile of the Property (see table above). This SWRCY site has no listed violations and is therefore not considered to be a concern regarding the Property.

3.7.18 RCRA Non-Gen / NLR List

The RCRA NonGen / NLR (RCRA Non-Generators / No Longer Regulated) is a list of sites that do not presently generate hazardous waste. There is one RCRA NonGen / NLR site within 0.250 mile of the Property (see table above). This RCRA NonGen / NLR site is not considered to be a concern regarding the Property because no violations have been reported.

3.7.19 EDR Hist Auto List

The EDR Hist Auto (EDR Historical Auto Station) is a listing of potential gas station/filling station/service station sites based on a review that included, but was not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. There is one EDR Hist Auto site within 0.125 mile of the Property (see table above). This EDR Hist Auto site is not considered to be a concern regarding the Property because reconnaissance revealed no indication of petroleum storage or dispensing activities on the site.

3.8 Agency Contact and Database Search

To supplement the EDR Report, LGC reviewed online databases for the following environmental agencies:

- Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR).
- SWRCB.
- South Coast Air Quality Management District (AQMD).
- DTSC.

The review results for each online database are summarized below:

3.8.1 Division of Oil, Gas, and Geothermal Resources

The DOGGR *WellFinder* database and map were reviewed online regarding oil and gas wells near the Property. The *WellFinder* map indicates that the nearest oil and gas well is located approximately 0.91 mile north-northwest (upslope) of the Property. The well is identified as API: 0406500124, Well Number 1, Operator: Petroleum Product Engineers. The well is a plugged dry hole. This oil and gas well is not considered to be a concern regarding the Property.

3.8.2 State Water Resources Control Board

The SWRCB *GeoTracker* database and map were reviewed online regarding the Property. The *GeoTracker* database contains information about Permitted USTs, LUST Cleanup Sites, Cleanup Program Sites, Land Disposal Sites, Military Sites, Waste Discharge Requirements (WDR) Sites, and Irrigated Lands Regulatory Program Sites. The *GeoTracker* map indicates the following:

- There are no Permitted USTs within 0.250 mile of the Property and no LUST Cleanup Sites within 0.500 mile of the Property.

- There are no Cleanup Program Sites, Land Disposal Sites, Military Sites, WDR Sites, or Irrigated Lands Regulatory Program Sites within ASTM-specified search radii surrounding the Property.

3.8.3 South Coast Air Quality Management District

The South Coast AQMD *Facility INformation Detail* (*FIND*) database and map were reviewed online regarding the Property. The *FIND* database contains information about facilities having AQMD permits. Based on the *FIND* map, there are 14 AQMD permit sites within 0.250 mile of the Property. Ten of these 14 AQMD permit sites either have no Notices Of Violations (NOVs) or Closed Violations and either have no Notices To Comply (NTCs) or NTCs that are In Compliance. The remaining four AQMD permit sites each has one NOV, but the NOVs involve only recordkeeping and/or permitting. Therefore, these 14 sites are not considered to be concerns regarding the Property.

3.8.4 Department of Toxic Substances Control

The DTSC *ENVIROSTOR* database and map were reviewed online regarding the Property. The *ENVIROSTOR* database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The *ENVIROSTOR* map indicates the following:

- There are no Federal NPL, State NPL, Voluntary Cleanup, School Cleanup, Evaluation, Military Evaluation, Tiered Permit, and Corrective Action sites within ASTM-specified search radii surrounding the Property.
- There are the following four School Investigation sites located within 1.000-mile of the Property: Elementary School No. 9, Elementary School Site No. 10, Vista Murrieta High School, and Sykes Elementary School No. 12. These four School Investigation sites each have a "No Action Required" or "No Further Action" Status. The EDR Report lists the same Status for each of these four School Investigation sites. Based on their reported statuses, these four School Investigation sites are therefore not considered to be concerns regarding the Property.

4.0 SITE RECONNAISSANCE

4.1 Site Reconnaissance Methodology

On February 13, 2019, LGC performed a site reconnaissance of the Property to observe and evaluate its current use and onsite environmental conditions. The site reconnaissance involved walking the Property while observing for evidence of existing and potential environmental concerns. Property photographs are provided in Appendix B.

4.2 Limiting Conditions

LGC encountered no limiting conditions during the site reconnaissance on February 13, 2019.

4.3 Interior Observations of Property

During the site reconnaissance on February 13, 2019, LGC observed no structures on the Property and therefore made no interior observations of the Property.

4.4 Exterior Observations of Property

During the site reconnaissance on February 13, 2019, LGC made the following observations regarding the exterior of the Property:

EXTERIOR OBSERVATIONS OF PROPERTY

Item or Condition	Observed Evidence	No Evidence Observed	Comments
Hazardous Substances & Petroleum Products:	☐	☒	
Storage Tanks & Related Equipment:	☐	☒	
Odors:	☐	☒	

Item or Condition	Observed Evidence	No Evidence Observed	Comments
Standing Surface Water or Other Pools of Liquid:	☐	☒	
Drums of Hazardous Substances, Petroleum Products, or Unidentified Contents:	☐	☒	
Transformers or Equipment containing Polychlorinated Biphenyls (PCBs):	☐	☒	
Pits, Ponds, or Lagoons:	☐	☒	
Drains and Sumps:	☐	☒	
Stained Soil or Pavement:	☐	☒	
Stressed Vegetation (other than from insufficient water):	☐	☒	
Evidence of Mounds, Depressions or Filled or Graded Areas Suggesting Trash or Other Solid Waste Disposal:	☐	☒	
Wastewater or any discharge (including storm water) into a Drain, Ditch, or Stream on or Adjacent to the Property:	☒	☐	Most onsite storm water, together with tributary runoff from the elevated offsite area to the northwest, discharges into Warm Springs Creek on the south portion of the Property.
Wells (active, inactive, or abandoned):	☒	☐	In 2017, a public water supply well was drilled and installed onsite in the northwest. The groundwater depth in this well was 380 feet bgs on 08-02-2017. The well is inactive (capped).
Septic Systems or Cesspools:	☐	☒	If there is or was an OWTS onsite associated with the former SFR, its location is unknown.
Prior Structures:	☒	☐	During the 1980s and early 1990s, there was apparently an SFR and another structure on the northeast part the Property along Madison Ave.
Roads, Tracks, Railroad Tracks or Spurs:	☐	☒	

4.5 ***Adjoining Property Observations***

As defined in *ASTM Standard E1527-13*, an adjoining property is any real property whose border is contiguous or partially contiguous with the Property, or would be contiguous or partially contiguous with the Property if that property were not separated from the Property by a roadway, street or other public thoroughfare.

The Property is bordered by the following:

Northwest: A vacant parcel.

Northeast: Madison Avenue (dirt road) followed by a vacant parcel.

Southeast: Commercial parcels and Warm Springs Creek.

Southwest: Commercial parcels.

5.0 ***FINDINGS***

A summary of our findings is provided below. Details are not included or fully developed in this section, and the Phase I ESA report must be read in its entirety for a comprehensive understanding of these findings.

- The Property is located along the southwest side of Madison Avenue southeast of its intersection with Golden Gate Circle and consists of a rectangular parcel comprising approximately 5.83 acres. The Property is vacant and unfenced.
- The southeast part of the Property is within a 100-year flood zone associated with Warm Springs Creek; the flood zone extends approximately to the top of the west streambank.
- Historical aerial photographs of the Property dating back to 1938, as well as historical topographic maps dating back to 1901, were reviewed as part of this Phase I ESA. During the 1980s and early 1990s, there was apparently an SFR and another structure on the northeast part the Property adjacent to Madison Avenue.
- The former SFR that was located on the northeast part the Property was probably served by an OWTS. If there is or was an OWTS on the Property, its location is unknown.
- The Property and adjoining properties were not identified in the databases in the EDR Report or in the four additional online databases reviewed by LGC.
- No evidence of pesticides or herbicides spills was observed on the Property during our site reconnaissance. Other than incidental residential use associated with the former SFR, possibly including application of termiticides around and/or under former structures, there is no indication that pesticides or herbicides were used on the Property.
- No evidence of current or past storage or use of hazardous materials or petroleum products was identified on the Property during our site reconnaissance and records review.
- Along the upper bank of Warm Springs Creek in the south portion there are a number of wood chipper waste piles, which were apparently imported from unknown source(s). Scattered pieces of concrete, asphalt, and wood are visible on the surfaces of the chipper waste piles, but no stained areas and no chemical/petroleum odors were noted.
- There is also a pile of concrete slab pieces along the upper bank of Warm Springs Creek and other scattered trash (apparently non-hazardous solid waste) along the upper bank and near the north property corner.
- In the northwest there is an inactive public water supply well (drilled and installed in 2017) with a steel standpipe and a welded cap.
- No stained surface soil or other visible evidence of petroleum products or hazardous materials spills was observed on the Property. No stressed vegetation was observed.
- No evidence of ASTs was observed on the Property during our site reconnaissance or identified during record review.
- No evidence of USTs, sumps, clarifiers, or other storage or treatment structures for hazardous materials or petroleum products was observed on the Property during our site reconnaissance or identified during record review.
- No evidence of known regulatory actions, regarding hazardous materials or petroleum products cleanup that have been issued or are being issued for the Property, was identified during our records review.

6.0 OPINIONS

A summary of our opinions is provided below. Details are not included or fully developed in this section, and the Phase I ESA report must be read in its entirety for a comprehensive understanding of these opinions.

- No apparent or potential threat of past or present hazardous material releases exists regarding the Property based on the EDR Report and the Agency Contact and Database Search, including the 14 sites identified within the ASTM-specified search radii surrounding the Property.
- A Vapor Encroachment Condition does not exist or is not likely to exist in connection with the Property.
- No RECs, including CRECs, were identified on, at, in, or to the Property.
- No significant data gaps were identified that affect the ability of the Environmental Professional to identify RECs.
- There are no unusual circumstances where greater certainty is required regarding RECs.

7.0 CONCLUSIONS AND RECOMMENDATIONS

LGC has performed a Phase I ESA of the Property in conformance with the scope and limitations of *ASTM E1527-13*. There were no exceptions to, or deletions from *ASTM E1527-13* in conducting this Phase I ESA. This Phase I ESA has revealed no evidence of RECs in connection with the Property.

LGC recommends the following, based on the results of this Phase I ESA:

- The wood chipper waste piles along the upper bank of Warm Springs Creek, which were apparently imported from unknown source(s), should be removed and properly disposed of offsite.
- The pile of concrete slab pieces along the upper bank of Warm Springs Creek and other scattered trash (apparently non-hazardous solid waste) along the upper bank and near the north property corner should be removed and properly disposed of offsite.
- If an OWTS (associated with the former SFR) is encountered during future grading and development onsite, then it should be removed in accordance with applicable city and/or county regulations.

8.0 NON-SCOPE ISSUES

The following Non-Scope Issues, which are outside the scope of *ASTM E1527-13*, were assessed in connection with this Phase I ESA of the Property.

8.1 Building Construction Materials

Building construction materials that could contain hazardous materials, including asbestos-containing building materials (ACBMs) and lead-based paint (LBP), were considered during this Phase I ESA. There are no structures on the Property. No trash or debris indicative of potential ACBMs and/or LBP related to the former structures were observed on the Property. Therefore, ACBMs and LBP are not considered to be concerns regarding the Property.

8.2 Indoor Radon

The *Map of Radon Zones in California*, based on USEPA data, was reviewed online. The map indicates that Riverside County, including the Property, is in Radon Zone 2 and has a predicted average indoor radon screening level between 2 and 4 picocuries per liter (pCi/L), which is considered "Moderate Potential". This screening level is less than or equal to the USEPA's radon action level of 4 pCi/L, and radon is therefore not a concern regarding the Property.

8.3 Natural Asbestos Occurrences

The map of *Reported Historic Asbestos Mines, Historic Asbestos Prospects, and Other Natural Occurrences of Asbestos in California* by the CGS and USGS was reviewed. The map depicts historic asbestos mines/prospects and natural asbestos occurrences and indicates that there are no reported natural asbestos occurrences or historic asbestos/prospects mines located within 1 mile of the Property. Natural asbestos occurrences and historic asbestos mines/prospects are therefore not concerns regarding the Property.

9.0 LIMITATIONS

This Phase I ESA was performed using the degree of care and skill ordinarily exercised, under similar circumstances, by reputable engineers, geologists, and environmental professionals practicing in this or similar localities. No other warranty, expressed or implied, is made as to the conclusions and professional advice included in this report. The current observations made in the field and the review of available records and other documentation are believed to be representative of the entire project. However, soil, geologic and other conditions revealed by excavation may be different from our preliminary findings. If this occurs, the changed conditions must be evaluated by the environmental professional, and the recommendations within this Phase I ESA are subject to change. Changes in the conditions of the Property can and do occur with the passage of time, whether they be due to natural processes or the works of man on this or adjacent properties.

This report is issued with the understanding that it is the responsibility of the owner and/or owner's representative to ensure that the information and recommendations contained herein are adhered to and made clear.

The conclusions, opinions and recommendations contained in this Phase I ESA report represent our professional judgment and are based on the results of the described review of available records and other documentation.

The conclusions, opinions and recommendations contained in this Phase I ESA report are valid up to a period of one (1) year from the date of this report in accordance with the All Appropriate Inquiries (AAI) Final Rule. Changes in the conditions on the Property can and do occur with the passage of time, due to natural processes and/or the works of man. In addition, changes in applicable or appropriate codes, regulation and/or standards may occur, whether they result from legislation or the broadening of knowledge. Accordingly, the findings of this Phase I ESA may be invalidated wholly

or partially by changed conditions outside LGC's control. Therefore, if any of the abovementioned situations occur, then this report must be updated.

This report has been prepared solely for use by the parties and purposes named and/or designed above. It may not contain sufficient and/or applicable information for use by other parties or other purposes. LGC reserves the right to the information, conclusions, recommendations, and findings of this Phase I ESA should the client decide to forfeit their ownership of the Property.

LGC appreciates the opportunity to be of service to you and looks forward to the opportunity to work with you in the future. Should you have any questions, or should you require additional information, regarding the contents of this Phase I ESA please do not hesitate to contact this office at your earliest convenience.

10.0 PREPARERS

Duncan Walker
Environmental Professional and Certified Engineering Geologist

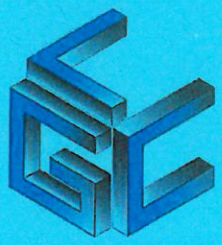

B.S., Geology, California University at Los Angeles, 1980.
California Professional Geologist, #4105
California Certified Engineering Geologist, #1395

Environmental Division Manager and Certified Engineering Geologist at LGC. Mr. Walker has more than 30 years of experience in the fields of Environmental Due Diligence including conducting and managing Phase I and Phase II Environmental Site Assessments, as well as Preliminary Environmental Assessments, Supplemental Site Investigations and Removal Action Work Plans/Implementation. Current duties include business development, client liaison, technical oversight, and review and preparation of proposals and reports.

Principal areas of responsibility for this Phase I ESA: Project Management, Client Point of Contact, Research, Site Reconnaissance, Interviews, and Report Preparation.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by LGCGEOENV were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
RANCHO CALIFORNIA WA EPA ID:: CAC002620568	26585 MADISON STREET	ESE 0 - 1/8 (0.026 mi.)	1	8

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/29/2018 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category. depending on the level of threat to public health and safety or the. environment they pose.

A review of the SCH list, as provided by EDR, and dated 10/29/2018 has revealed that there are 3 SCH sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: D040
. Waste name: TRICHLOROETHYLENE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/12/2018

Proposed NPL: Proposed National Priority List Sites
A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/12/2018
Date Data Arrived at EDR: 12/28/2018
Date Made Active in Reports: 01/11/2019

Next Scheduled EDR Contact: 04/15/2019
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/12/2018

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016
Date Data Arrived at EDR: 01/05/2017
Date Made Active in Reports: 04/07/2017
Number of Days to Update: 92

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database
The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

GEOCHECK®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

LYLES DIVERSIFIED
26501 MADISON AVE
MURRIETA, CA 92562

TARGET PROPERTY COORDINATES

Latitude (North):	33.534566 - 33° 32' 4.44"
Longitude (West):	117.176648 - 117° 10' 35.93"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	483598.1
UTM Y (Meters):	3710372.5
Elevation:	1074 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5641304 MURRIETA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

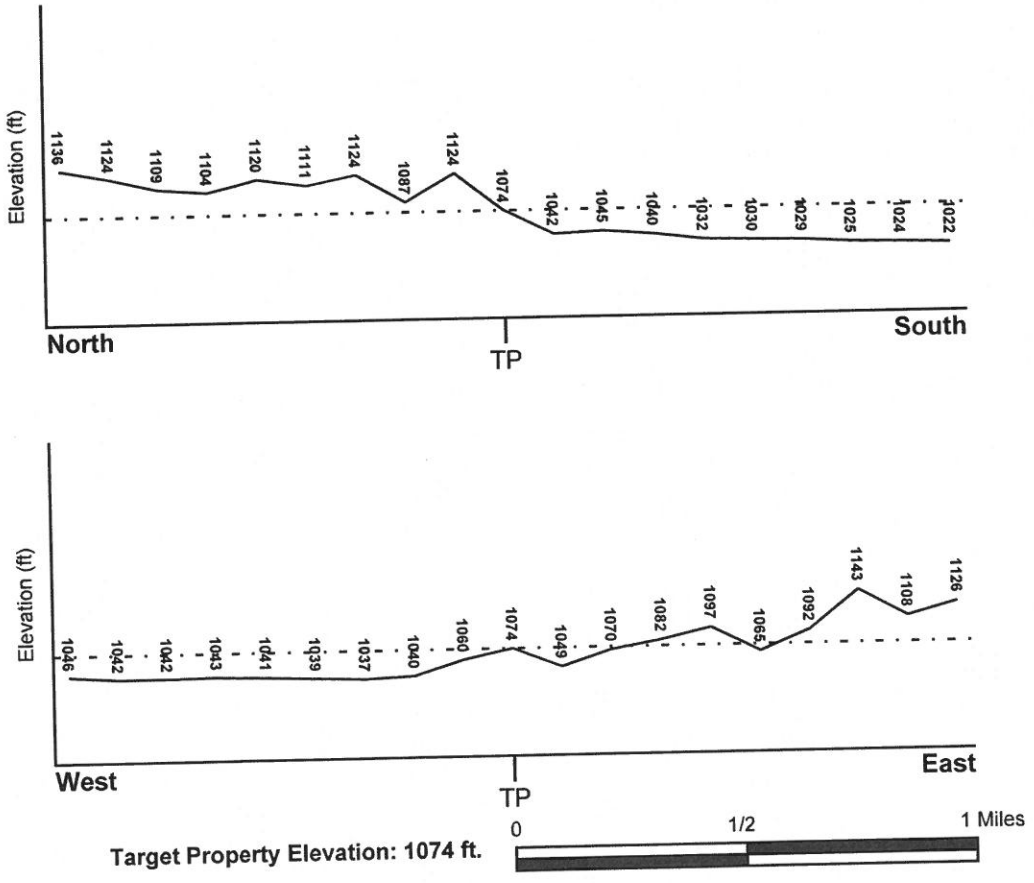

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06065C2720G	FEMA FIRM Flood data

06065C2715G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
MURRIETA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: ARLINGTON

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.6
2	11 inches	24 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.6
3	24 inches	35 inches	cemented	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.6

2	14 inches	27 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
3	27 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 12

Soil Component Name: CORTINA

Soil Surface Texture: sandy loam

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	22 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 8.4 Min: 5.6
2	22 inches	38 inches	stratified very gravelly loamy sand to very gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 8.4 Min: 5.6
3	38 inches	59 inches	stratified very gravelly sand to very gravelly loamy sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 8.4 Min: 5.6

Soil Map ID: 13

Soil Component Name: RAMONA

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
