Description:	RP states, A mechanical malfunction occurred during the refueling of an aircraft which caused the release of 10 to 20 gallons of jet fuel. The release has been stopped. Approx less than 1 gallon of material entered a storm drain which eventually flows to the San Francisco Bay, however it is expected to never reach the bay. No drinking water will be impacted. Cleanup will be conducted in-house by one of the tenants of the airport.

Eval Notes: Routine triennial hazardous waste generator inspection at Port of Oakland's Airport Recovery and Firefighting Facility (ARFF). EPA ID CAL000128338 - PORT OF OAKLAND encompasses nine Port of Oakland, Oakland Airport facilities. The ARFF itself is a small quantity generator. In 1Q2021 the Port of Oakland underwent a hazardous materials business plan and hazardous waste generator reorganization. Because of the reorganization, the ARFF will become a large quantity generator once it is rolled into the Oakland International Airport South Field umbrella. The EPA ID CAL000128338 encompasses the entire Oakland International Airport, South Field, Building M-104, and Vicinity (including Bldg. M-911, the ARFF). The ARFF has one hazardous waste tank: A 275 gallon double walled AST for used oil. Number of HazWaste Manifest Signers = 7; Number of HazWaste employees trained, 2018 = 28; and Number of HazWaste employees trained, 2019 = 19.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated

SWISSPORT FUELING, INC (Continued) **1015950629**

Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

AIR MINOR
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Completed Document Type:	Land Use Restriction
Completed Date:	06/10/2016
Comments:	The Land Use Covenant (LUC)restricts the deed of the property due to residual contaminants that are present is soils at the site. The contaminants include metals, polychlorinated biphenyls (PCBs), and polynuclear aromatic hydrocarbons (PAHs). The LUC runs with the land in the event that the property is acquired by other entities. Prohibited activites under the LUC includes usage as a residence, hospital, school or day care facility. Maintenance of the asphalt and concrete ground surfaces (Cap) which cover the property is required and any breaches of the Cap and soil handling activities require a Soil Management Plan (SMP) under DTSC oversight and prior approval.

The report described the soil cleanup at the site which was contaminated with metals, polycyclic aromatic hydrocarbons (PAHs), polychlorinated biphenyls (PCBs), hydrocarbons and volatile organic compounds (VOCs). The cleanup activities included construction of the tunnel, trenching for utilities, planter installations, excavations, groundwater dewatering with temporary wells, placement of approximately 3,200 cubic yards of contaminated soil in on-site consolidation areas, off-site disposal of approximately 80 tons of contaminated soil, and construction of an asphalt cap (approximately 52,000 square feet) across the site.

Eval Notes: Alameda County Dept. of Environmental Health (ACDEH) arrived on-site to conduct a routine inspection at The Waterfront (1801) located at 1801 Harbor Bay Pkwy Alameda, CA 94502. OBSERVATION: - Upon arrival, ACDEH observed that the facility is under construction and no access to the hazardous materials stored on-site including diesel-fueled generator with a belly tank of 650 gallons, and batteries (electrolyte/sulfuric acid). ACDEH initially contacted Lynn Westhoven the Waterfront's engineer and Mr. Westhoven states that the electrician had placed a lock-out/tag-out on the generator and would not be able to access the generator. Mr. Westhoven also states that the facility has gone through an ownership change and that the construction should be finalized by late summer. - The facility is no longer under The Waterfront's management, the building is transferred
