Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 01/07/2022. As noted on the SPCC Plan: Elevator hydraulic oil reservoirs exceed 55 gallons; add them to the hazmat inventory for Building 1701. Addition of these reservoirs will serve the purposes of APSA tank facility statement (authored for the campus-wide APSA/SPCC Plan for 1701/1801/1851 Harbor Bay Parkway) and EPCRA reporting. Electronically submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities: ADD the elevator hydraulic reservoirs claimed on the SPCC Plan for 1701 Harbor Bay Parkway.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-15-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Routine triennial hazardous waste generator inspection. Based on ACDEH CUPA Inspector calculations: Exelixis is a CA non-RCRA large quantity generator and RCRA small quantity generator. Note that Exelixis utilizes one EPA ID for both 1701 and 1801 Harbor Bay Parkway. Maximum tons shipped in any one month (CA non-RCRA): 2021 = 1.8975 2020 = 0.8425 2019 = 1.5938 2018 = 1.3266 Maximum tons shipped in any one month (RCRA): 2021 = 0.6615 2020 = 0.551 2019 = 0.5985 2018 = 0.3345 Buildings 1701 and 1801 house principal research laboratories. Building 1851 houses general administration offices. Buildings 1801 and 1851 are listed on Exelixis, Inc (1801) (CERSID: 10189707) while Building 1701 is listed on Exelixis Inc (CERSID: 10877659). EPA ID CAR000282103 - EXELIXIS INC Status: ACTIVE. EPA ID for 1701 and 1801 Harbor Bay Parkway. All buildings where hazardous waste is generated are continguous and comprise a multi-buil... Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Violation Description: Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: This was a primary and secondary tank test for the new generator at the SE corner of the facility. The primary was at 3 psi and the secondary was at 2.5 psi. The test started at 1010 and finished thirty minutes later at 1040. Neither gauge moved whatsoever. The technician from Cummins West was unable to do the leak detection, low fuel level, or high fuel level alarms. He said a few parts needed to be added before those systems would become operable. I left him my card and told him to give me a call. DRD, 3/12/14

Eval Notes: (1) Present SPCC was certified on 1/20/17. It is a non-qualified SPCC. It must be recertified again by 1/20/22 - this January. (2) The 5,000 gallon diesel tank at the SW corner of the main lot looked good, paint still good with no rust, properly labeled, and all AST requirements met. (3) The 2,000 gallon diesel tank serving the standby generator OK, in excellent condition, properly labeled, proper venting including fire arrestor (fire code requirement at the time), no leaks, weeps, or staining near it. (4) The standby generator is in brand new condition with no leaks or weeps. Cabinet in excellent condition, paint OK with no rust or chipping, emergency shut off switch OK, and all required labeling. (5) This was not a full SPCC audit. A full audit will take place once they have a newly certified SPCC. No SPCC violations were observed.

Eval Notes: (1) There were two 55-gallon waste oil tanks that did not have their bungs in place. A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. Install the bungs and instruct employees on proper procedures. (2) Hazardous waste storage in pole barn much cleaner and much less storage than in the past. (3) All other containers were properly sealed. (4) All containers were properly labeled. (5) I saw no spillage during this year's inspection. (6) Hazardous waste records are retained indefinitely. No other hazardous waste violations were observed.

Eval Notes: This was a primary and secondary tank test for the new generator at the SE corner of the facility. The primary was at 3 psi and the secondary was at 2.5 psi. The test started at 1010 and finished thirty minutes later at 1040. Neither gauge moved whatsoever. The technician from Cummins West was unable to do the leak detection, low fuel level, or high fuel level alarms. He said a few parts needed to be added before those systems would become operable. I left him my card and told him to give me a call. DRD, 3/12/14

Eval Notes: (1) Present SPCC was certified on 1/20/17. It is a non-qualified SPCC. It must be recertified again by 1/20/22 - this January. (2) The 5,000 gallon diesel tank at the SW corner of the main lot looked good, paint still good with no rust, properly labeled, and all AST requirements met. (3) The 2,000 gallon diesel tank serving the standby generator OK, in excellent condition, properly labeled, proper venting including fire arrestor (fire code requirement at the time), no leaks, weeps, or staining near it. (4) The standby generator is in brand new condition with no leaks or weeps. Cabinet in excellent condition, paint OK with no rust or chipping, emergency shut off switch OK, and all required labeling. (5) This was not a full SPCC audit. A full audit will take place once they have a newly certified SPCC. No SPCC violations were observed.

Eval Notes: This was a primary and secondary tank test for the new generator at the SE corner of the facility. The primary was at 3 psi and the secondary was at 2.5 psi. The test started at 1010 and finished thirty minutes later at 1040. Neither gauge moved whatsoever. The technician from Cummins West was unable to do the leak detection, low fuel level, or high fuel level alarms. He said a few parts needed to be added before those systems would become operable. I left him my card and told him to give me a call. DRD, 3/12/14

(2) The 5,000 gallon diesel tank at the SW corner of the main lot looked good, paint still good with no rust, properly labeled, and all AST requirements met. (3) The 2,000 gallon diesel tank serving the standby generator OK, in excellent condition, properly labeled, proper venting including fire arrestor (fire code requirement at the time), no leaks, weeps, or staining near it. (4) The standby generator is in brand new condition with no leaks or weeps. Cabinet in excellent condition, paint OK with no rust or chipping, emergency shut off switch OK, and all required

Eval Notes: (1) There were two 55-gallon waste oil tanks that did not have their bungs in place. A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. Install the bungs and instruct employees on proper procedures. (2) Hazardous waste storage in pole barn much cleaner and much less storage than in the past. (3) All other containers were properly sealed. (4) All containers were properly labeled. (5) I saw no spillage during this year's inspection. (6) Hazardous waste records are retained indefinitely. No other hazardous waste violations were observed.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Kelly was unsure of how long the drums of waste had been stored, although he stated that the wash rack drain and sump were cleaned approx. 3 weeks prior. Weekly container inspections have not been occurring. Advised Kelly and Amin to designate an area of Repair Bay 2 to be a waste consolidation area for drums of used filters and hazwaste such as sludge and mixed fuels to avoid losing track of the drums elsewhere in the facility, and to train key employees on labeling and performing weekly inspections of the waste storage area (will provide a inspection checklist as an example).

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Site History:	The Grace facility is a manufacturer primarily of can sealants. Two releases of reagent-grade toluene from subsurface product transfer lines were reported in the southern portion of the site in April 1985 and January 1987, respectively. Source removal, product recovery, and groundwater monitoring were performed in the mid to late 1980's. Residual contamination remains. Grace sold the property to Alco Iron & Metal Co. in late 2008 but retained the responsibility of site cleanup.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-13-2020
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: This site was inspected with the scrap yard across Doolittle Drive WDID 1 01I019272. The Davis Street site houses company office, outdoor storage in open bins, a sales area and warehouse for finished metal product, and bio swales for storm water treatment. The driveway to the bin storage area is unpaved except near the street. I observed sediment and track out in the paved section of the driveway and the street. The bio swale along Davis street had sparse vegetation and needs maintenance. MB said he would follow up.

Eval Notes: ACDEH completed an unannounced inspection for a precision machine tool manufacturing company. Business operates a quartz glass machining and precision glass tool fabrication shop. Review of documents submitted to CERS was completed and all information in CERS is current and accurate. However, the EPA generator ID number for the facility is currently inactive and must be reactivated. CNC and other precision machines cut, polish and fabricate quartz parts for the semiconductor manufacturing industry. The quartz parts may be subjected to fusion in a electric kiln resulting in a transparent, ultra high purity quartz. The facility operates a high pressure water jet cutting table using a garnet sand and water cutting stream, with residual sludge material generated during the cutting process that is dessicated and disposed of non-hazardous waste, with previous testing completed and documents provided for the sludge material that demonstrates the material is non-hazardous. Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LANDFILL GAS (LFG) RECOVERY
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Completed Date: 08/04/2021
Comments: The Department of Toxic Substances Control (DTSC) has reviewed the Vapor Intrusion Human Health Risk Assessment for Future Commercial Worker Receptors (HHRA) for the Former Kaiser Aerotech Facilities site (Site) located at 880 Doolittle Drive and 498 Hester Street, San Leandro, California, submitted by RMD Environmental Solutions, Inc. (RMD) and dated July 22, 2021. The Site is planned for commercial redevelopment, which is expected to include demolition of the existing buildings and construction of a new 97,240 square-foot commercial building in the north-central portion with associated parking, loading, and staging areas, and an above-grade parking area on a canopy structure. This HHRA evaluated potential human health risks from vapor intrusion of volatile organic compounds (VOCs) into indoor air for future commercial worker receptors. A vapor intrusion mitigation system (VIMS) has been incorporated into redevelopment plans, and a VIMS design has been submitted to the Department of Toxic Substances Control (DTSC) for review by the Engineering and Special Projects Office (ESPO).

Comments: The revised Health and Safety Plan (HASP) was received by DTSC on February 13, 2020. Previous comments on the HASP by the DTSC was transmitted in an email to Cornerstone Earth dated January 22, 2020. Based upon its review, DTSC has on further comments or recommendations. The revised HASP contain valuable information to ensure community health and safety during planned site activities. The DTSC review of the HASP does not constitute a guarantee that all potential community hazards and exposure routes have been anticipated, recognized, and addressed, or that the HASP will be properly and safely implemented. Effective implementation and regulatory compliance are the employer's responsibilities. Continuous surveillance of the Site with a site-specific HASP by the employer should lead to reduced community exposures and subsequent liabilities. Not reported

Leandro, California, submitted by RMD Environmental Solutions, Inc. (RMD) and dated July 22, 2021. The Site is planned for commercial redevelopment, which is expected to include demolition of the existing buildings and construction of a new 97,240 square-foot commercial building in the north-central portion with associated parking, loading, and staging areas, and an above-grade parking area on a canopy structure. This HHRA evaluated potential human health risks from vapor intrusion of volatile organic compounds (VOCs) into indoor air for future commercial worker receptors. A vapor intrusion mitigation system (VIMS) has been incorporated into redevelopment plans, and a VIMS design has been submitted to the Department of Toxic Substances Control (DTSC) for review by the Engineering and Special Projects Office (ESPO).

Completed Date: 02/27/2020
Comments: The revised Health and Safety Plan (HASP) was received by DTSC on February 13, 2020. Previous comments on the HASP by the DTSC was transmitted in an email to Cornerstone Earth dated January 22, 2020. Based upon its review, DTSC has on further comments or recommendations. The revised HASP contain valuable information to ensure community health and safety during planned site activities.
The DTSC review of the HASP does not constitute a guarantee that all potential community hazards and exposure routes have been anticipated, recognized, and addressed, or that the HASP will be properly and safely implemented. Effective implementation and regulatory compliance are the employer's responsibilities. Continuous surveillance of the Site with a site-specific HASP by the employer should lead to reduced community exposures and subsequent liabilities.

Comments: DTSC has reviewed and conditional approve below monitoring plan with one recommendation for next monitoring report. In the text the rise in concentration of cis-1 2-dichloroethene (cis-1,2-DCE) and vinyl chloride at well PZ-1 are noted. However, there is no discussion of potential causes of this increase or planned remediation. Recommendation: Please include a discussion of possible mechanisms for this observed increase, and if any additional injection activities are planned in the former oil/solvent storage area around PZ-1 to address these increasing concentrations in next groundwater monitoring report.

Background Info:	REDEMCO, LLC currently owns the Site and has owned the 880 Doolittle Drive and the 498 Hester Street properties since 2001. Kaiser Industries Corporation owned the 880 Doolittle Drive Property from 1957 through 1963. Kaiser Aerospace & Electronics Corporation (KAEC) owned the property from 1963 through 2001. During that time KAEC manufactured rocket nozzles and aircraft parts on the property. Kaiser Industries Corporation acquired the 498 Hester Street Property on September 6, 1963, and transferred it to KAEC on December 2, 1963. KAEC owned the property from 1963 through 2001. During that time KAEC used the property for employee parking, light manufacturing and storage. The Site is made up of two properties totaling 14 acres. The 880 Doolittle Drive property has several buildings and is otherwise almost entirely paved with asphalt. The 498 Hester Street property has one building and was recently paved. The Site is located approximately 3,000 feet east of San Francisco Bay. Both properties are fenced and are currently occupied by an airport park-and-fly business. Groundwater at the site has been divided into three zones. The A-zone is the groundwater which is encountered between 0 and 15 feet below ground surface (bgs). The B-zone is the groundwater which is encountered between 15 and 40 feet bgs. The C-zone is the groundwater encountered below 40 feet bgs. The following substances have been detected in the groundwater at the Site: 1,1-dichloroethane; 1,2-dichloroethane; 1,2-dichloroethylene; 1,1,2,2-tetrachloroethane; trichloroethylene; and vinyl chloride.

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: Alameda County Department of Environmental Health (ACDEH) was onsite to conduct a routine triennial hazardous materials business plan (HMBP) inspection. ACDEH was granted consent to inspect by Jesus DeHaro. The facility makes aluminum honeycomb panels. The hazardous material on site above reporting threshold includes resin, acetone, and liquified petroleum gasoline. Aluminum dust is generated during processing. A dust collector is used and Alco Iron & Metal Company recycles the dust and other metal scraps. Please correct violations noted above within 30 days and provide documentation that they have been corrected. Continue to annually update/recertify HMBP in CERS. A complete HMBP certification consists of Facility Information, Hazardous Materials Inventory, and Emergency Response and Training Plans. Alameda County HMBP permit is current and expires 6/30/2023.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: ACDEH completed an unannounced inspection for a precision machine tool manufacturing company. Business operates a quartz glass machining and precision glass tool fabrication shop. Review of documents submitted to CERS was completed and all information in CERS is current and accurate. However, the EPA generator ID number for the facility is currently inactive and must be reactivated. The facility also stores liquid oxygen, compressed hydrogen and propane, with the hydrogen and oxygen used in various manufacturing processes and the propane used to fuel forklifts. The facility also uses polyethylene glycol mixed with silica grit as a cutting media for the wire saw cutting equipment. CNC and other precision machines cut, polish and fabricate quartz parts for the semiconductor manufacturing industry. The quartz parts may be subjected to fusion in a electric kiln resulting in a transparent, ultra high purity quartz. Other process at the facility involve cutting and CNC [Truncated]

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: ACDEH completed an unannounced inspection for a precision equipment metal finishing and electro polishing operation. The Facility has multiple chemical process and treatment lines: the aluminum process line consists of a sodium metasilicate, sodium phosphate with 75% phosphoric acid with 25% alum additive solution for electro polishing, followed by 10 % nitric acid dip tank, with a DI rinse water between chemical dips; the stainless steel process line utilizes a dip tank solution of 20% sulfuric acid with 80% phosphoric acid followed by DI water rinse. The facility has secondary containment surrounding all chemical process lines and drag out is captured in floor drains throughout the facility. All process water, drag out water, and rinse water is circulated into two 2,000-gallon poly holding tanks prior to treatment. Lastly, after the process water treatment is complete, the water is then processed through a reverse osmosis water treatment system for final treatment prior [Truncated]

Eval Notes: Routine triennial hazardous waste generator (HWG) inspection. Business provides electro-polishing of aluminum and stainless steel. There is one aluminum electro-polishing line (tanks 7, 7B, 8, 8B) and three stainless steel electro-polishing lines (tanks 1, 2, 2A; 3A, 3B, 4; 5, 6). The electro-polishing utilizes phosphoric acid, sulfuric acid, and nitric acid, and several alkaline cleaner solutions (sodium hydroxide, sodium metasilicate, sodium carbonate). The facility was purpose-built for electro-polishing to contain the chemicals from entering the environment: The floor consists of a HDPE liner, concrete, and epoxy coating. All process piping is aboveground; all tanks are situated within epoxy-lined concrete berms with any drag-out, drips, or rinse water captured in sumps that is pumped into the cleaning area. Liquids from the cleaning area are pumped into the wastewater treatment plant. Analytical testing (provided to ACDEH) indicat... [TRUNCATED: Refer to full Inspection Report]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description:	Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.
Violation Notes:	Returned to compliance on 07/11/2019. The business failed to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions. The facility representative stated that a written property owner notification was not made. A copy of the written property owner notification was not available for review at the time of the inspection. Notify the property owner in writing that the business is subject to the business plan program and has complied with its provisions. Submit documentation of correction to the Alameda County Department of Environmental Health (ACDEH). ACDEH provided an example template of the property owner notification. Facility representative wrote the property owner notification into the Microsoft Word document at the time of inspection.

Violation Date: 07-20-2022
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 09/12/2022. Observed one 185 gallon tank of diesel fuel on site in fire suppression control room. All hazardous materials above the reporting threshold on site must be reported to the state on the California Environmental Reporting System (CERS). Managers state that the diesel on site at the facility is managed by the property owner. Location of tank is within bounds of property used by Benjamin Moore. Facility must either report diesel in CERS inventory or have the property owner create a new CERS account and submit information for the 185gal diesel tank in the fire suppression room and any additional hazardous materials on site and under their total control. A separate CERS submittal from the property owners will create a new Hazardous Materials Business Plan (HMBP) program with Alameda County and the property owners will be invoiced annually for the hazardous materials on site under their control. Include diesel in Benjamin Moore's inventory on... [TRUNCATED: Refer to full Inspection Report]
