Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D010
Waste Description: SELENIUM

Waste Code: D011
Waste Description: SILVER

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL

CHEMICAL STRATEGIES LLC (Continued) **1024876981**

BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006
Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste Code: F007
Waste Description: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

Waste Code: F008
Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F009
Waste Description: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: F019
Waste Description: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

FINDS:
Registry ID: 110001154447

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
Registry ID: 110070741667

Click Here for FRS Facility Detail Report:

MILES CHEMICAL COMPANY INC (Continued) **1000378372**

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Potential Contaminants of Concern:	Diesel, Gasoline
Potential Media Affected:	Aquifer used for drinking water supply, Under Investigation
Site History:	Prior to the current building the Property was occupied by Standard Oil Company/Standard Service Station (now known as: Chevron) from approximately 1954 through 1972 and a Chevron Service Station from approximately 1972 through 1980. Fire department records indicated a spill of gasoline was documented behind the building on the Property in 1969. The USTs had been removed in January of 1980 during the widening of Davis Street. The Property was purchased by the current owner in April of 1980 after the removal of the USTs. The potential sources of contamination that are associated with the former gasoline station operations included underground storage tank (UST) locations containing gasoline and/or diesel fuel, fuel pump islands and product lines connecting the USTs and pump islands. The sources of the contamination have been removed (USTs, pump islands, and product lines). The detected concentrations were above the ESLs but no significant concentrations of volatile constituents were detected. The concentrations of hydrocarbons detected were all below the concentrations that pose a threat to indoor air. ERAS (ERAS Environmental Inc.) also recommends that Alameda County Environmental Services be notified that Chevron was the last known owner/operator of the USTs, and that any further remedial investigation for this site should be pursued with Chevron.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The site was formerly owned and occupied by the Osborn Tool Company from the later 1940's to 1976. The property was then purchased and occupied by Likit Windows. In 1979, an industrial building was constructed and was occupied by Bay Extrusions. Prior to the 1979 building construction, the site was undeveloped and used primarily for the storage of materials. A former occupant (Kaiser Aerotech) on an adjacent property (880 Doolittle Drive) had released halogenated volatile compounds (HVOCs) to soil and groundwater.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-12-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: The EPA ID # expired in June of last year. The EPA ID # needs to be renewed. The necessary paperwork to renew the EPA ID # was provided during the inspection.
Eval Division: San Leandro City
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-12-2021
Violations Found: Yes

NCR (Continued) **S121774647**

Eval Type: Routine done by local agency
Eval Notes: The EPA ID # expired in June of last year. The EPA ID # needs to be renewed. The necessary paperwork to renew the EPA ID # was provided during the inspection. The last CERS submittal was done on 3/28/18 and the next was due 3/28/19. The CERS submittal is required to do annually. Some oily staining was observed in the truck parking area. Absorbent needs to be applied as needed to these area to aid in keeping the area clean. The occupant was informed that the absorbent then needs to be picked up and disposed of. The waste antifreeze, waste oil, and filters were all properly labeled with accumulation dates. The occupant was informed that the lids/bungs need to kept closed when waste is not being placed in the containers. The dumpster and parking areas were clean and well kept. Some limited staining was observed in the yard area which was discussed above.
Eval Division: San Leandro City
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-21-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Hazardous waste storage OK. All containers are in good to excellent condition. The used oil AST is in excellent condition. All containers are properly sealed and labeled. They are keeping hazardous waste records indefinitely and understand they must keep them for at least three years. The hazardous waste area is inside within a chain link and locked gated enclosure. The area is very clean. No violations were observed.
Eval Division: San Leandro City
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-01-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: They have not submitted their HMBP on CERS.
Eval Division: San Leandro City
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-21-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Their last CERS submittal was on 12/31/14. The next annual submittal was due by 12/31/15 and is now overdue. The previous CERS lead user is no longer at this facility. A new lead CERS user has been designated. The entire CERS submittal process was gone over with the new CERS lead user for this facility. Facility information was updated. The hazardous material inventories need updating and the map may need to be updated as well. The old training plan was eliminated and the emergency response/contingency plan and its link was discussed. Additionally, the annual requirement to submit all three elements in CERS was discussed. Finish and submit annual CERS hazardous material business plan.

NCR (Continued) **S121774647**

Eval Division: San Leandro City
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 04-18-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: (1) Went over HMBP requirements: 55 gallons, 500 pounds, or 200 cubic feet of compressed gas must prepare an HMBP. The website they must used is the State's California Environmental Reporting System or CERS website. (2) They must do an annual submittal where facility information, hazardous material inventories/map, and the emergency contingency plan elements must all be submitted. (3) Went over CERS and how to add or delete personnel associated with a facility. (4) Hazardous material area looked fine with all containers sealed and properly marked. No violations were observed.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	A 10,000-gallon diesel UST was removed in August 1990. Two sidewall soil samples were collected and one pit water sample was collected. The northern soil sample contained 17 mg/kg TPHd, and was nondetectable for BTEX; the southern was nondetectable for TPHd but contained 0.0067 mg/kg benzene, 0.0069 toluene, and 0.089 xylenes. Pit water was nondetectable for these compounds. No odors or discolored soil was noted by the City of San Leandro inspector. Two soil bores were installed as a part of a property transaction in August 1991 and three soil samples from each bore were submitted to an analytical laboratory; each was nondetectable for these compounds. Water was not encountered to the total explored depth of 12 feet bgs; bores were allowed to remain open for up to 4 hours.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-18-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: The facility maintains 500 gallons of waste water that is generated from the ROTO cleaning machine that washes and polishes the window cleaning handles. The generated wash water in the cleaning room is then recycled through a vacuum evaporation system located outside of the building. The waste water is separated into a clean water tank and a hazardous waste tank. The clean water is then reused. ACDEH is requesting additional sampling results of the influent material (liquid material before the vacuum evaporation process) to determine if facility qualifies for Tiered Permitting.

Eval Type: Routine done by local agency
Eval Notes: Alameda County Dept. of Environmental Health (ACDEH) inspector arrived on-site at Ettore Products to conduct a routine inspection of Hazardous Hazardous Waste Generator (HWG) program and to confirm compliance in California Code of Regulations (CCR), Title 22. Please note that the facility is the Hazardous Materials Business Plan (HMBP) and HWG programs. The HMBP routine inspection was conducted on November 16, 2018. The facility was not in the HWG program at the time. However, the facility have made a determination on their waste oily water and it will now be disposed of as hazardous waste. The facility is now in the HWG program. ACDEH met with Mr. Rufus Bunch the facility's chief operating officer who granted consent and assisted ACDEH with this inspection. Facility/Site Description: - Ettore is a window cleaning company and has a warehouse located in Alameda. - The facility generates waste oily water and disposed of as hazardou... Eval Notes: Alameda County Dept. of Environmental Health (ACDEH) inspector arrived on-site at ETTORE PRODUCTS located at 2100 N Loop Rd. Alameda to conduct a routine inspection of Hazardous Materials Business Plan (HMBP) and to confirm compliance in applicable Health and Safety Code, Div. 20 Chp. 6.95, and California Code of Regulations (CCR), Title 22. ACDEH met with Mr. Rufus Bunch the facility's chief operating officer who granted consent and assisted ACDEH with this inspection. Facility/Site Description: - Ettore is a window cleaning company that has a warehouse located in Alameda. The facility stores hazardous materials such as Tintac Wax, Hydraulic Oil, Spindle Oil, Soluble Oil, GX Grind, Xiameter AFE - 0010, and E60-Silicone. - The company manufactured and fabricate its products in San Leandro, CA. Therefore, no manufacturing activities at this location. - The warehouse mostly assembles and cleans products at this location. - The facility uses machines that use [Truncated]

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 06/24/2022. Observed two 55gal drums of lab waste and two 1gal satellite containers of lab waste without a hazardous waste label. Labels were provided to the manager. Manager marked and attached labels to containers. Violation corrected on site. No follow-up is required.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to complete and maintain at the facility the Substantial Harm Criteria certification form when owner or operator determines that the facility could not be reasonably expected to cause substantial harm to the environment.
Violation Notes:	Returned to compliance on 03/14/2022. Failure to complete and maintain at the facility the Substantial Harm Criteria certification form when the owner or operator determined that the facility could not be reasonably expected to cause substantial harm to the environment. Facility prepared a Substantial Harm Criteria while onsite. Corrected onsite.

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each container s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.
Violation Notes:	Returned to compliance on 03/16/2022. Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: The SPCC states that the Steel Tank Institute SP001 inspection standard is used. However, not all applicable items from the checklists are being inspected. The sensor in the annular space has not been pulled out and tested to ensure operability; monthly testing to see if water is in the tank; testing the tank gauge to ensure it is accurate. Begin inspecting all applicable items in the STI SP001 inspection checklist. Provide ACDEH with confirmation that the above testing has been performed.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Year:	2015
Gepaid:	CAD112932108
TSD EPA ID:	CAD008302903
CA Waste Code:	352 - Other organic solids
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	2.725

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

BUDGET TRUCK RENTAL, LLC (Continued) **S121736922**

Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes:	Returned to compliance on 05/08/2017. OBSERVATION: Unable to test the 87 2 turbine liquid sensor for turbine shutdown as well as the line leak detector for the 87 2 tank. failed to activate an audible and visual alarm when tested to ensure continuous monitoring of the tank system. All monitoring equipment shall be maintained to activate an audible and visual alarm or stop the flow of product at the dispenser when it detects a leak. Operator, Tom Garcia, stated that Budget Truck Rentals plans to remove the USTs and they did not want to add more fuel to the tanks so they can remove them. No estimated time table currently, but Mr. Garcia said that the contractor was originally planning to remove the USTs in December. CORRECTIVE ACTION: Operator will need to have the turbine sensor in the 87-2 sump tested annually to confirm that continuous monitoring activates an audible and visual alarm or stops the flow of fuel.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount

BUDGET TRUCK RENTAL, LLC (Continued) **S121736922**

	greater than one kilogram for more than 90 days.
Violation Notes:	Observed the following waste stored past accumulation limits: 55gal waste coolant/antifreeze. Manifests show no disposal within the past 180 days. All Small Quantity Generators of hazardous waste are required to properly dispose of waste within 180 days of generation. Have the cited hazardous waste disposed of by a registered hazardous waste hauler and provide documentation of disposal manifest to the inspector within 30 days.

Violation Description:	Failure to maintain monitoring and maintenance records (e.g., alarm logs) and/or maintain records of appropriate follow-up actions.
Violation Notes:	Returned to compliance on 01/30/2017. OBSERVATION: The L1:Unleaded 2 STP Sump - Fuel Alarm occurred on 1/12/16, and from observing the amount of liquid inside the Unleaded 2 STP Sump, there was enough liquid to have the sensor in alarm when arriving onsite. No actions were taken to respond to the alarm for over 18 days for an alarm that monitors product piping leaks that would drain into the turbine sump. An alarm like this must be responded to in a more timely manner to determine if a leak is present at the earliest possibility. CORRECTED ONSITE: The liquid was removed from the Unleaded 2 STP Sump by TEC Accutite during the inspection.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 06/20/2016. Observations: during the inspection ACDEH noted that the chemical inventory onsite is not accurately reflected in the chemical inventory noted in CERS, as approximately 1600 gallons of petroleum (product and used oil) is stored onsite. However, the chemical inventory in CERS indicates that approximately 650 gallons of petroleum is currently stored onsite. Corrective Action: update the chemical inventory in CERS to reflect all chemicals stored onsite and provide ACDEH with verification that the chemical inventory in CERS accurately reflects all chemical stored onsite above the regulatory threshold.

Citation: 23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description: Failure of the leak detection equipment to have an audible and visual alarm as required.
Violation Notes: Returned to compliance on 05/08/2017. OBSERVATION: Unable to test the 87 2 turbine liquid sensor for turbine shutdown as well as the line leak detector for the 87 2 tank. failed to activate an audible and visual alarm when tested to ensure continuous monitoring of the tank system. All monitoring equipment shall be maintained to activate an audible and visual alarm or stop the flow of product at the dispenser when it detects a leak. Operator, Tom Garcia, stated that Budget Truck Rentals plans to remove the USTs and they did not want to add more fuel to the tanks so they can remove them. No estimated time table currently, but Mr. Garcia said that the contractor was originally planning to remove the USTs in December. CORRECTIVE ACTION: Operator will need to have all sensors tested annually to confirm that continuous monitoring activates an audible and visual alarm. Closed due to tanks being removed on 5/8/17

Site History:	A former fuel leak case (RO0000091) at the site was closed on February 8, 2001 with site management requirements that the case was to be reviewed if redevelopment takes place in the future. This Site Cleanup Program case (RO0003147) has been opened to re-evaluate the site for redevelopment. In August 2014, a an investigation was performed which consisted of 5 bores for the collection of soil

110 HEGENBERGER LLC (Continued) **S117338919**

samples and 5 bores advanced for the recovery of soil gas samples. The soil gas borings advanced to 3 & soil borings advanced to 5'. Maximum soil gas concentrations were reported at 50,000 ug/m3 benzene with ethyl benzene <3,300 ug/m3 and naphthalene <3,300 ug/m3. Maximum soil concentrations were reported at 1,200 mg/kg TPHg, benzene at 8.6 mg/kg; ethyl benzene at 7.5 mg/kg, and naphthalene at 19 mg/kg.

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The site is used as an active package distribution facility with vehicle maintenance. The area around the site is characterized by commercial/industrial use. This case was open in January 1990 following submittal of soil and grab-groundwater analysis iresults ndicated an unauthorized release of petroleum hydrocarbons had occured from the fueling system. Meeting held on April 16, 2019 to discuss findings of the most recent investigation & GW monitoring event, case status as it relates to the LTCP and path forward. Topics included the General Criteria regarding FP removal to the extent practicable, methane generation as a nuisance condition or a VI issue, and Direct Contact as it relates to UST pit backfill using potential non-petroleum contaminated material. September 1989 UPS upgraded the dispensers on the north side of the main building. In August 1990 five exploratory borings were advanced in the northern and southern portions of the site. The borings were converted to wells and groundwater monitoring began. In April 1992, one 1,000-gallon bulk oil storage underground storage tank (UST) and one 1,000-gallon waste-oil UST (WOT) were removed from the northern fueling areas of the site. TPHd concentrations of up to 360 milligrams per kilogram (mg/kg) were reported in soil associated with the WOT removal. On April 2, 2009, three 10,000-gallon diesel USTs located on the south side of the building and product piping & dispensers were removed and soil was partially over excavated. TPHd concentrations were reported at up to 29,000 mg/kg in the UST excavation and up to 850 mg/kg in the dispenser area. Pit water was reported to have free phase hydrocarbons and a concentration of 210,000 micrograms per liter (ug/L) TPHd. Monitoring well MW-1 was destroyed in conjunction with the over excavation activities. Over excavation activities were halted when widespread impacts became evident. Petrex, a proprietary bioremediation enhancement product, was applied to the excavation prior to backfill. Free product has been observed in three areas- all associated with the southern fueling station. Two areas are adjacent to the former fuel tank pit, and one area is located northeast of the tank pit area. Free product bailing began on 2/12/2002 and continued until 6/14/2011 as needed, until a product skimmer was installed. the skimmers were operated through 2015. A total of approximately 260 gallons of free product have been removed from the site. As of 2018, measureable free product continues to be observed at the site with on-going GW monitoring. The free plume may have been delineated as a result of the addition of wells to the network in 2018. Three soil vapor wells were also

UPS (Continued) **S100278898**

installed.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

WDS:

Name:	SEBRING TRANSPORT TERMINAL
Address:	2100 CARDEN ST
City:	SAN LEANDRO
Facility ID:	San Francisco Bay 01I003898
Facility Type:	Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	2
Facility Telephone:	5105620872

POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Eval Notes: The last CERS submittal was 8/8/2019 and was due by 8/8/2020. This is required to be submitted/certified every year. This was completed during the inspection. No changes were observed since last inspection. All fire extinguishers were properly serviced. All welding gasses were chained on carts. One waste oil tank was observed which was scheduled to be pumped out. The EPA ID # was confirmed to be active. Waste manifests were available for review. Very little waste is generated on site. The yard was fairly clean with minimal debris. The dumpster was

Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-11-2022
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: The last CERS submittal was 8/8/2019 and was due by 8/8/2020. This is required to be submitted/certified every year. This was completed during the inspection. No changes were observed since last inspection. All fire extinguishers were properly serviced. All welding gasses were chained on carts. One waste oil tank was observed which was scheduled to be pumped out. The EPA ID # was confirmed to be active. Waste manifests were available for review. Very little waste is generated on site. The yard was fairly clean with minimal debris. The dumpster was kept closed when not in use. No violations were observed during the site walk.

Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	This site is to be entered into the City of Oakland Permit Tracking System due to the residual contamination on site. Not all historic documents for the fuel leak case may be available on Geotracker. A more complete historic case file for this site is located on the Alameda County Environmental Health website at: http://www.acgov.org/aceh/lop/ust.htm The subject site is currently in commercial use as a food products supplier business (Current APN: 44-5020-5-58, former APN: 44-5020-5-32). San Leandro Creek, the closest surface water body is located 480 feet northeast of and up/cross gradient to the site at its closest point. The direction of groundwater flow is towards the southwest- southwest based on the closed Fuel Leak Case RO0000869, also located at 155 98th Avenue. Two generations of underground storage tanks (USTs) have been located at the site. A case (RO0000869) was opened after the first generation USTs were removed in 1994 and was subsequently closed in 1996. The second generation of USTs consisted of an 8,000 gallon gasoline UST, a 12,000 gallon diesel UST, and a dispenser located on top of the USTs that were removed in March 2009. A water sample collected from the tank excavation detected up to 25,000 micrograms per liter (ug/L) total petroleum hydrocarbons (TPH) as gasoline, 8,790 ug/L TPH as diesel, and 1,050 ug/L benzene. In July 2014 six soil borings, B-1 through B-6 were advanced on four sides of the both the 2nd and 1st

CALIFORNIA GLASS COMPANY (Continued) **S101580325**

generation USTs and one soil vapor point SVP-1 was installed between UST pit and the building. TPH as diesel was the only analyte detected in soil at 21 milligrams per kilogram (mg/kg). TPH as diesel, benzene, and MTBE were detected in grab groundwater at 510 ug/L, 0.23 ug/L, and 4.8 ug/L, respectively. This fuel leak case has been evaluated for closure consistent with the State Water Resource Control Board Low-Threat Underground Storage Tank Closure Policy (LTCP). The case meets all the general and media-specific criteria of the LTCP with the exception of media-specific criteria of direct contact to outdoor air. ACEH has made the determination that there is low potential for direct contact exposure because the entire site is paved and the site is in current commercial land use. Due to residual contamination at the site, the site is closed as a commercial site with site management requirements. If there is a proposed change in land use to any residential, or conservative land use, or if any redevelopment occurs, Alameda County Environmental health (ACEH) must be notified as required by Government Code Section 65850.2.2. ACEH will re-evaluate the site relative to the proposed redevelopment. Excavation or construction activities in areas of residual contamination require planning and implementation of appropriate health and safety procedures by the responsible party prior to and during excavation and construction activities. This site is to be entered into the City of Oakland Permit Tracking System due to the residual contamination on site.

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The site is surrounded by commercial and light industrial properties. Currently, the property is used for freight storage and loading. The site is underlain by Quaternary alluvium. Soils encountered during previous subsurface investigations are predominantly fine-grained with clayey sand to silty sand layers to the maximum explored depth of 26.5 feet below ground surface (fbgs). The depth to groundwater is typically approximately 4 to 7 fbgs with a hydraulic gradient to the southeast. The tanks on the site have consisted of three underground 12,000 gallon diesel tanks, one underground 12,000 gallon unleaded gasoline, and one above ground 800 gallon waste oil tank. A precision test was performed on July 29, 1986 in which the waste oil tank on the site failed. The tank was deemed not repairable and was removed on December 4, 1986. Upon removal, soil around the former tank was observed to be impacted and at least three inches of free product was floating on the groundwater in the excavation. The free product was pumped and allowed to recharge twice. All impacted soil and pea gravel was removed from the excavation. After contaminated soil was removed, diesel fuel was observed seeping into the standing groundwater from the direction of the four onsite diesel USTs. The three 12,000 gallon diesel tanks were then precision tested and all passed. The cause of the diesel contamination as reported by terminal personnel was most likely damage to the product delivery line when the diesel dispenser was previously knocked over. Four soil borings (M-1 through M-4) were advanced in the vicinity of the waste oil tank and converted to monitoring wells. The highest concentration of Total Petroleum Hydrocarbons as motor oil (TPHmo) in soil was 210 parts per million (ppm), from sample M-2, collected southeast and directly adjacent to the former waste oil tank. In October, 1993, a passive light non-aqueous phase liquid (LNAPL) recovery skimmer was installed in well MW-1/RW-1. No documentation could be found that recorded the

GI TRUCKING COMPANY (Continued) **S100936066**

volume of LNAPL removed by the skimmer. On June 6, 1996, one soil boring(RW-2) was advanced to 13 fbgs in the assumed down gradient direction from the 12,000 gallon fuel USTs. A passive LNAPL recovery skimmer was installed in well RW-2. On June 9, 1999, the four 12,000 gallon underground storage tanks were removed from the property. One approximately half inch hole was observed in the top of the southeastern diesel UST. Strong diesel odors were evident in soil and floating product was observed in groundwater. The groundwater in the excavation was pumped over several days. Fifteen soil samples (EX-1 through EX-15) were collected from the sidewalls of the tank excavation. The soil samples were collected from the approximate groundwater interface at depths between 5.0 and 6.5 fbgs. The soil samples were analyzed for TPHg, TPHd, BTEX, and methyl-tert butyl ether (MTBE). Additionally, the two samples with the highest concentrations of TPHd, EX-2 and EX-10, were analyzed for Polynuclear Aromatic Hydrocarbons (PAHs). Soil samples EX-2 and EX-10 were collected from the east corner of the excavation and contained 4,500 ppm and 2,900 ppm TPHd, respectively. No PAHs were detected. Other constituents were detected at maximum concentrations in soil sample EX-10; 390 ppm TPHg, 0.45 ppm toluene, 0.45 ppm ethylbenzene, and 1.5 ppm xylenes. Groundwater monitoring was conducted quarterly from November 1988 to February 1996. Beginning in August 1996, the monitoring wells were sampled semi-annually through March 1999. Additional monitoring and sampling events have occurred on March 2, 2007, April 21, 2009, and September 14, 2009. The groundwater monitoring has indicated that groundwater in the tank pit area is impacted by TPHd and TPHmo. In order to assess whether groundwater outside the tank pit area is impacted, five soil borings (SB-1 through SB-5) were advanced on August 5, 2011. Soil samples were collected at 5, 10, and 15 fbgs. One grab groundwater sample was collected from each boring. The soil samples contained TPHd and TPHmo at maximum concentrations of 3.7 and 7.3 ppm, respectively. The only analyte detected in groundwater was TPHd, detected once in boring SB-2, located approximately five feet northwest of the former USTs, and at a concentration of 340 ppb. These data appear to indicate that residual contamination, consisting primarily of TPHd and TPHmo, remains in the tank pit area but migration beyond the tank pit area appears to be limited.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Site History: This "Non-case Information" site documents the Phase II Investigation performed as part of a property transaction. Alameda County Department of Environmental Health (ACDEH) will not re-open the subject case as no BTEX, MTBE, Naphthalene, PCE, or TCE compounds were detected in groundwater samples collected at the site, the concentrations of TPH-diesel appear to be defined on site, and site conditions appear similar to those identified in the October 7, 2010 Case Closure issued by the City of San Leandro. Hence, no additional investigation is required at this time. However, should a change in land-use, any subsurface work or modifications to existing site improvements, or site redevelopment be proposed, ACDEH must be notified, as required by Government Code Section 65850.2.2, and ACDEH will re-evaluate the risk to human health and the environment based on the proposed site improvements or redevelopment.

Violations:

Site ID: 145403
Site Name: PURRFECT AUTO SERVICE 102
Violation Date: 05-03-2017
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 05/03/2017. Second used antifreeze drum with approx. 10 gallons of used antifreeze was not properly labeled as hazwaste. Label obtained and affixed to drum during inspection. (Safety Kleen truck was in area servicing a neighboring auto shop).
Violation Division: San Leandro City
Violation Program: HW
Violation Source: CERS,

Site ID: 145403
Site Name: PURRFECT AUTO SERVICE 102
Violation Date: 07-15-2021
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 08/26/2021. Make a hazardous waste determination for the liquid in two (2) 55 gallon poly drums located in the rear storage area (most likely used antifreeze as one of the drums was labeled as such). Arrange to have the hazardous waste disposed of immediately.
Violation Division: San Leandro City
Violation Program: HW

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The Site is located in an industrial/commercial area and consists of four topographically flat parcels comprising approximately 7-acres. The property is located on the eastern corner of 98th Avenue and Bigge Street and is bound to the northwest by 98th Avenue, to the north and northeast by San Leandro Creek, to the south by Bigge Street, to the southeast by Bigge Crane at 10000 Bigge Street, and to

CALIFORNIA YARDS LLC (Continued) **S123750773**

the south and southwest by Bigge Street. Commercial and industrial operations comprise neighboring properties to the northwest, south, and southeast. A residential neighborhood lies across San Leandro Creek and north of the Site. As a result of a 2020 investigation related to former leaking underground storage tanks (UST) on the Site, a soil sample collected near the former gasoline UST was reported to contain chlorinated volatile organic compounds (CVOCs) of trichloroethene (TCE), cis-1,2-dichloroethene (DCE), and vinyl chloride above risk based screening levels. Subsequently, 14 grab ground water samples were collected from 14 locations to assess conditions related to the former USTs and general Site operations. Nine ground water samples contained measurable concentrations of CVOCs, with the groundwater sample nearest the former gasoline UST yielding the highest concentration of TCE at 210 micrograms per liter (μg/l).

Facility Project Subtype: Not reported
RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)
Site History: This case was originally opened by Alameda County Department of Environmental Health (ACDEH) as a Site Cleanup Case however was later converted to a LUST Case as the subsurface contamination is related to an unauthorized release of petroleum hydrocarbons from underground storage tanks (USTs). History: The Site is located in a mixed-use industrial/commercial and residential area of the Columbia Gardens neighborhood of Oakland. The subject site consists of four adjacent parcels totaling approximately 7-acres with associated Assessor Parcel Numbers (APNs) 44-5020-03-72, 44-5020-10, 44-5020-13 and 44-5020-14. The Property is located on the eastern corner of 98th Avenue and Bigge Street. The Site is bound to the northwest by 98th Avenue and further by an operating Chevron gasoline station and several restaurants. The Site is bound to the northeast was a concrete lined drainage channel and single-family residences; to the southeast was Bigge Crane at 10000 Bigge Street, and to the southwest by Bigge Street. Across Biggie Street are several automotive related rental and repair facilities. The Site contains five building structures and currently operates as a Enterprise vehicle rental business. A small vacant office building is located in the western corner of the Site. A larger operating office building and repair and maintenance building that contains two large wash bays is located along the northwest 98th Avenue end of the Property. A trench in the floor used for repair work and a storage area for cleaning chemicals were observed inside the maintenance building. A large canopy structure behind the maintenance building with covered a parking area was also observed at the Site. A warehouse was observed near the southeast end of the Site with approximately + the warehouse building was divided for four inflatable painting booths. The Site was vacant and undeveloped from approximately 1899 through approximately 1953 when the Site was developed for a trucking facility (Morris Drayage). Historical operations on all four parcels included numerous commercial operations including a roofing business, crane facility, and various rental vehicle business. Hsitroical information presented in the Phase I Environmental Site Assessment indicated three underground storage tanks (USTs) (1,000-gallon lubricating oil, 1,000-gallon waste oil and 10,000-gallon diesel) and a pump island were located in the vicinity of the maintenance building near the northwest end of the Property. An 8,000-gallon gasoline UST was located near a former tire storage building near the northeast side of the Property. Based on UST Removal Reports the USTs were removed in 1986. The UST removal report indicated the waste oil UST was in poor condition when removed and contamination was found near the former lubrication oil UST. Laboratory results indicated contamination was detected in soil and/or groundwater under all the USTs except the former diesel UST. A former washing area with a clarifier that has been removed was located near the eastern corner of the Property In September 2018 additional subsurface investigations were conducted without regulatory oversight including the collection soil and groundwater samples from six locations on the Site including the vicinity of all the former UST locations. Results from these subsurface investigations indicated petroleum related constituents of concern (COCs)including but not limited to diesel

MORRIS DRAYING COMPANY (Continued) **S117288962**

and motor oil range total petroleum hydrocarbons (TPH-d and TPH-mo, respectively), benzene, methyl tertiary butyl ether (MTBE,) and tert butyl alcohol (TBA) were detected in the both the soil and groundwater. Additionally non-petroleum COCs including but not limited to chloroform, methylene chloride, cis-1,2-dichloroethene (DCE), trichloroethene (TCE) and vinyl chloride were detected in soil and groundwater samples. Based on ACDEH review, the Site appears to qualify for closure under the Low Threat Underground Storage Tank Case Closure Policy, and ACDEH has therefore listed the case as eligible for closure. The non-petroleum COCs will be investigated under the related site cleanup program.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

CERS Description:	Chemical Storage Facilities

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-23-2021
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	This was the first inspection of this facility since their move from 1753 Timothy Dr. They made a CERS HMBP submittal on 3/18/21. This was gone over during the inspection. The hazardous material inventory for propane had the same amount listed for both maxim and average quantities. The hazardous materials map did not show the location of the propane storage in the rear yard. The emergency contingency plan had the incorrect CUPA phone number. Housekeeping was good inside and out. No other violations were observed. 3/25/21 CERS submittal: The hazardous materials map now includes the propane location and the emergency contingency plan now has the correct phone number. 3/26/21 CERS submittal: The hazardous material inventory now has 1782 and 891 ft3 for maxim and average quantity.
Eval Division:	San Leandro City

RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The Site is an active truck rental facility in a mixed industrial and commercial area. In October 2018, GHD removed one 2,000 gallons new oil UST and one 2,000 gallons waste oil UST from the Site. All associated product piping within the limits of the excavation, and a waste oil sump were emptied and closed in place. Soil and groundwater samples were collected. The soil samples contained low concentrations of contaminants. The groundwater sample included concentrations of Total Petroleum Hydrocarbons as diesel (TPH-d) at 182,000 μg/L and Total Petroleum Hydrocarbons as motor oil (TPH-mo) at 355,000

PENSKE TRUCK LEASING CO LP (Continued) **1000383092**

μg/L. Appox. 177 tons of soil was excavated and about 4,000 gallons of water and product were removed.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Contact:	RITA J TRUPP
Telephone:	6107756409
Mailing Name:	Not reported
Mailing Address:	RT 10 GREEN HILLS PO BOX 7635
Year:	2021
Gepaid:	CAD982361230
TSD EPA ID:	CAT080013352
CA Waste Code:	343 - Unspecified organic liquid mixture
Disposal Method:	H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons:	0.83403
Year:	2021
Gepaid:	CAD982361230
TSD EPA ID:	UTD991301748
CA Waste Code:	352 - Other organic solids
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	0.525
Year:	2021
Gepaid:	CAD982361230
TSD EPA ID:	CAD980887418
CA Waste Code:	133 - Aqueous solution with total organic residues 10 percent or more
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.70892
Year:	2021
Gepaid:	CAD982361230
TSD EPA ID:	UTD991301748
CA Waste Code:	223 - Unspecified oil-containing waste
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	1.3
Year:	2021
Gepaid:	CAD982361230
TSD EPA ID:	CAD059494310
CA Waste Code:	223 - Unspecified oil-containing waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.15
Year:	2021
Gepaid:	CAD982361230
TSD EPA ID:	CA0000084517
CA Waste Code:	134 - Aqueous solution with total organic residues less than 10 percent
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.17157
Year:	2021

CA Enviroscreen 3 Score: 86-90%
CA Enviroscreen 4 Score: 95-100% (highest scores)
Military DOD Site: No
Facility Project Subtype: Not reported
RWQCB Region: SAN FRANCISCO BAY RWQCB (REGION 2)
Site History: Site investigation activities have been conducted at the site at various times since 1989. A soil vapor extraction (SVE) was operated at the site from 1993 to 1995. The USTs and dispensers were upgraded in 1995. An SVE/air sparging system operated from March 25, 2002 to February 14, 2003. The fuel system was upgraded and overexcavation was conducted in 2004. Dual-phase extraction tests were performed between November 15 and November 24, 2004 and April 18 and April 24, 2005. The case is currently under review for case closure.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 10/01/2008
Comments: Due to the limited depth of remaining soil with pH greater than 10, the absence of any impact to groundwater, and the significant cost and minimal benefit of completely removing all remaining high pH soil at the property, asphalt cap is proposed to prevent complete exposure pathways associated with any residual subsurface impacts.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Plan
Completed Date: 10/01/2008
Comments: This O&M Plan designates areas likely affected by the high pH soil and the requirements for ongoing cap inspections. A land use covenant will be recorded to provide notice of the impacted soil to all future owners of the property. Future property owners will be responsible for cap inspections and ensuring that any maintenance or repairs to the cap are completed. No excavation work shall be conducted in the restricted portion of the property unless it is conducted in accordance with the O&M Plan and the Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 11/08/2011
Comments: The asphalt and concrete cap at the property were observed and currently comply with the land use covenant requirements. Numerous cracks and deteriorated area were observed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 07/26/2010
Comments: Letter stating that VCA would be terminated if the financial assurance is not submitted within 30 days.

Completed Document Type: Monitoring Report
Completed Date: 05/02/2012

AIRCO DISTRIBUTOR GASES (Continued) **S109036488**

Comments: The site owner conducted an annual inspection to check the condition of the soil cap and to verify compliance with the restrictions and requirements of the Land Use Covenant. The overall condition of the soil cap is good and there were no large cracks or holes, buckling, ponded surface water, or erosion of the cap. The site use and activities are in compliance with the Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 10/09/2012
Comments: The site owner conducted an annual cap inspection as required by the Operation and Maintenance Plan. No large cracks, holes, buckling, ponded surface water or erosion at the cap were observed during the inspection. DTSC had no comments and approved the report.

Completed Document Type: Proposed Determination of non-compliance
Completed Date: 07/26/2006
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/06/1993
Comments: This site is almost entirely covered by a single story metal and cinderblock building which occupies an area of approximately 8000 sq. feet. Mr. Verl Dolsby purchased the business in 1971 and building in 1975. DHC (Dolsby Hard Chrome) site operated as a chrome electroplating facility from 1956 to 1988, during dismantling of the facility in November 1988. Mr. Doslby discovered that chromium wet bath solution had leaked through the concrete lined secondary containment pits. US. EPA has made a site assessment and site does not qualify for listing as a NPL site. Currently Alameda County Dept of Environmental Health (AlCDEH) is the only agency overseeing this site. Soil samples from the bottom of the large pit contamined soluable trivalent and hexavalent chromium as high as 4,000 mg/kg and 5,400 mg/kg, respectively. In addition, it also contained soluble trivalent and hexavalent chromium in groundwater as high as 900 mg/l and 1000 mg/l at a depth of 7 feet. So there has been an observed release at the site. Groundwater is used throughout Alameda County for irrigation, industrial purposes, and domestically for drinking water. Approximately 54 domestic wells serving a population of approximately 140 people within four-miles target distance limit. According to the ALCDEH, the site remains unoccupied and also on file is a Hazardous Material Business Plan Application dated 4/20/88. Up to its closure, Dolsby Hard Chrome had no outstanding issues with the ACDEH. Mr. Dolsby does not have the necessary funds to continue remediation as proposed by EPA consultants. The number of wells used in the Alameda County domestically may be substantially higher due to the wide spread use of groundwater and the lack of an accurate record of all wells in Alameda County. Therefore the site poses a significant threat to public and environmental health. The PEA investigation is required to mitigate the site because the RWQCB did not report a listing for Dolsby Hard Chrome when searched for in its Spills, leaks, investigation and cleanup data base.

Background Info:	Major Salvage Company (MSC) was a scrap metal salvage and pallet reconditioning company and operated at the Site from 1957 to 1982. MCS purchased or obtained waste chemicals from food canneries, can manufacturers, and chemical companies. An estimated 2,000 to 6,000 drums were located onsite and many of the drums were deteriorated and leaking. Alameda County directed the removal of the drums from the site in January 1982. Soil samples indicated there was elevated levels of arsenic, cadmium, chromium, copper, nickel, lead, and zinc. Nearby wells were found to contain lead, other metals, acetone, and benzene.

CPS-SLIC:

Name:	ASSOCIATED AEROSPACE ACTIVITIES, INC. (FORMER HIGGINS MAGEE PRINTING INK AND CHEMICAL MANUFACTURERS)
Address:	2502 WILLIAMS STREET
City,State,Zip:	SAN LEANDRO, CA 94577
Region:	STATE
Facility Status:	**Open - Assessment & Interim Remedial Action**
Status Date:	01/02/2019
Global Id:	T10000008871
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.70641
Longitude:	-122.18824
Case Type:	Cleanup Program Site
Case Worker:	RL
Local Agency:	Not reported
RB Case Number:	01S0771
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Dichloroethene (DCE), Trichloroethylene (TCE), Vinyl chloride, Polychlorinated biphenyls (PCBs), Arsenic, Chromium, Copper, Other Metal, Diesel, Gasoline, Heating Oil / Fuel Oil, Kerosene, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating
EPA Region:	9
Coordinate Source:	Not reported
Cuf Case:	NO
Quantity Released Gallons:	Not reported
Begin Date:	01/01/1981
Leak Reported Date:	10/31/2014
How Discovered:	Site Assessment/Site Investigation
How Discovered Description:	Date of the report for Phase II Subsurface Investigation that discovered soil and groundwater contamination caused by VOCs, petroleum hydrocarbon constituents and metals. Soil contaminated with PCBs was addressed in the 1981.
Discharge Source:	Dispenser, Piping, STP, Tank
Discharge Cause:	Corrosion, Other, Overfill, Physc / Mech Damage, Spill, Unknown
Stop Method:	Close and Fill Tank in Place
Stop Description:	USTs were reportedly removed. UST spills not associated with 1980 PCB spill.

Military DOD Site:	No
Facility Project Subtype:	Not reported
RWQCB Region:	SAN FRANCISCO BAY RWQCB (REGION 2)
Site History:	The Site is located at 2502 Williams Street in San Leandro, Calif. and the parcel is approximately 75,374 sq-feet in size and the buildings are approximately 46,698 sq-feet in size. Associated Aerospce Activities, Inc. has occupied the Site from 1972 to 2018 and manufactures jet engine components, including aircraft parts made from high temperature alloy sheet metal. From 1955 to 1972, the Site was occupied by Higgins Magee Printing Ink and Chemical Manufacturers and by UMC Industries, Inc., from 1962 to 1970 for manufacturing pigments using chemicals and metals. the building on the north side of the property is leased out as storage space, but was historically used by a hydraulic elevator parts manufacturer and stone cutting operation. The Site has chlorinated volatile organic compounds in soil, soil vapor and groundwater. A remediation work plan dated August 15, 2018, was approved by the RWQCB in an agency letter date January 2, 2019, that requires a remediation completion report for source removal, plume delineation, and vapor intrusion evaluation by April 16, 2019. The DTSC was the lead agency for tiered permitting and cleanup of a 1981 PCB spill incident. In February 2016, the RWQCB became lead agency, in accordance with the property owner's "request for agency oversight of a brownfield site" (Brownfield Memorandum of Agreement). Additional Information on this case, can be found at the DTSC website "Envirostor", the Alameda County Environmental Health's website "acgov.org" for the "Local Oversight Program records and the CUPA records". Additionally, contact the San Leandro Fire Department for inspection and permitting records. Source removal via excavation is planned for 2022. Additional investigation will be conducted to delineate the groundwater and soil vapor plumes beyond the Site and evaluate of vapor intrusion risk at the Site.

ASSOCIATED AEROSPACE ACTIVITIE (Continued) **S102008195**

Completed Document Type: Fieldwork
Completed Date: 03/31/1981
Comments: 445 cubic feet of soil was removed in March 1981. Confirmation soil sampling showed 4,930 ppm of PCBs.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/21/2003
Comments: Confirmation soil samples indicated that the site posed no threat to the public.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 09/30/1981
Comments: Addition excavations were conducted ending in September 1981. Confirmation sample showed 0.85 ppm of PCBs.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Certification
Completed Date: 09/01/1981
Comments: Certified Site. In November 1980, a polychlorinated biphenyls (PCBs) spill occurred and 30 gallons of PCBs leaked onto the ground. The spill was caused when a truck backed into a transformer and damaged one of the insulators. Initially, 445 cubic feet of soil was removed in March 1981 and confirmation soil sampling showed 4,930 parts per million (ppm) PCBs. In March 1981, a U.S. Environmental Protection Agency (EPA) contractor conducted an inspection of the Site to verify compliance with the federal PCB disposal and marking regulations and to investigate the spill. The EPA contractor observed, sampled, and took photographs of the excavation area during the inspection. The sampling results and photographs are included in the report for this inspection. Additional soil excavations were conducted, ending in September 1981. The last confirmation sample showed 0.85 ppm PCBs. The completion of the spill cleanup is documented in a November 18, 1981 letter to the Department of Health Services, Toxic Substances Control Division (DHS), predecessor to DTSC. This letter states that after the last confirmation soil sample, EPA gave verbal approval to fill in the excavated area.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 02/11/2019. Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. The overfill inspection was not conducted before October 13, 2018. Maintain overfill prevention system to comply with the deficiencies noted above. Submit verification.

Violation Date: 01-18-2022
Citation: HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Description: Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak.
Violation Notes: Returned to compliance on 01/18/2022. Owner/Operator tampered with and/or disabled leak detection equipment in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak. CERS Tank ID#10480423-001 Regular Unleaded piping sump sensor was raised/ wrapped around a pipe and there was approximately 10 gallons of liquid inside the sump. The sensor was functioning properly when tested. The Service Technician removed the liquid from the sump and placed the sensor at the lowest point in the sump. This was corrected on site.

Violation Program:	UST
Violation Source:	CERS,
Site ID:	398497
Site Name:	Oakland Coliseum
Violation Date:	01-05-2017
Citation:	23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description:	Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been properly trained.
Violation Notes:	Returned to compliance on 01/05/2017. OBSERVATION: The designated operator had the wrong year for the Annual Monitoring System Certification from January 2016 to March 2016. CORRECTED ONSITE: Make sure that the designated operator is properly filling out the reports with the correct test dates. ACDEH spoke with the designated operator onsite.

Violation Description:	Failure to keep water out of the secondary containment of UST systems installed on or after July 1, 2003.
Violation Notes:	Returned to compliance on 01/12/2018. OBSERVATION: Owner/Operator did not maintain under-dispenser containment, sumps, and/or other secondary containment in good condition and/or free of debris/liquid. The UDC for both products had approximately 1/2 gallon of liquid inside of it. CORRECTED ON SITE: The service technician removed the liquid. This was corrected on site.

Feature Description:	In 1943, the U.S. Government acquired 18.02 acres in fee by Declaration of Taking from the estate of M.J. Kerwin. The 18.02-acre site was used by the Army as a housing site for personnel stationed or working at the Oakland Municipal Airport. DOD improvements on the site consisted of 60 buildings including barracks, dispensary, administration, recreation, utility buildings, mess hall, and theater. On 26 June 1946, the 18.02 acres was transferred to the Federal Public Housing Administration. Property once occupied by the Oakland Municipal Airport, Detachment Housing Site is currently owned by the City of Oakland and the Oakland Unified School District.

OAKLAND MUNICIPAL AIRPORT DETACHMENT HOUSING SITE (Continued) **1007211927**

Description: The 18.02-acre site is located within the City of Oakland, Alameda County, CA. It encompasses City of Oakland recreation and community center facilities and part of Brookfield Elementary School. The property is bounded on the northwest by Phelps Street, northeast by Edes Avenue, and southeast by Jones Avenue. Interstate Highway 880 is near the southwest boundary. Coordinates at the approximate center of the site are N 37 44 11 latitude, W 122 11 24 longitude.

History: In 1943, the U.S. Government acquired 18.02 acres in fee by Declaration of Taking from the estate of M.J. Kerwin. The 18.02-acre site was used by the Army as a housing site for personnel stationed or working at the Oakland Municipal Airport. DOD improvements on the site consisted of 60 buildings including barracks, dispensary, administration, recreation, utility buildings, mess hall, and theater. On 26 June 1946, the 18.02 acres was transferred to the Federal Public Housing Administration. Property once occupied by the Oakland Municipal Airport, Detachment Housing Site is currently owned by the City of Oakland and the Oakland Unified School District.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS TSCA: PFAS Manufacture and Imports Information

EPA issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. EPA publishes non-confidential business information (non-CBI) and includes descriptive information about each site, corporate parent, production volume, other manufacturing information, and processing and use information.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

Data Release Frequency: Quarterly

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991

SUMMARY OF ACM AND LBP INVESTIGATIONS

THIS PAGE INTENTIONALLY LEFT BLANK

Hazardous Building Materials Investigations and Abatement

Evaluation of hazardous conditions and materials associated with construction and/or operation of the Proposed Project is based on numerous site investigations performed for the Airport.

Terminal 1

- RGA Environmental (Report 7635 – Final Termination) completed the Supplemental Asbestos Survey Report in 2011. Only asbestos was sampled with findings ranging from 1% to 60% of Amosite (AM) and 1%-60% Chrysotile (CH). The following materials may exist in inaccessible areas: pipe and fitting insulation in sealed walls, chases, and shafts; pipe and fitting insulation, mechanical components, and unidentified materials above hard ceilings; finishes and components inside elevator shafts; vapor barriers under terrazzo, ceramic, and/or concrete floors; and electrical wiring insulation.
- SCA Environmental Inc. (Report 7787 -JRJ Summary) performed a sampling event in 2013 to determine the presence of asbestos-containing substance in building materials. 1%-5% of CH in the tiles and black mastic were discovered in the flooring within the U.S. Airways Ticketing area in Terminal 1.
- ACC Environmental Consultants (Report 9235) contracted Coastwide Environmental Technologies to remove ACM in 1997. The acoustical panels over the Alaska American West Terminal 1 ticket counter were removed by OSHA-certified contractors. The air surrounding the Project area was monitored for worker safety, and half-face respirators were worn.
- Winzler & Kelly Consulting Engineers (Report 9270) was retained to conduct contractor observation to collect air samples during the asbestos abatement. The removal was located at the baggage claim area located in Terminal 1 and performed by Sterling Environmental Inc. Carpet, floor tile, and black mastic was all removed in an encapsulated area. Air quality samples were collected for containment quality purposes with the results coming back with no exceedances (0.01 fibers per centimeters [f/cc]).
- IHI Environmental (Report 9271) with Sterling Environmental Corporation performed an abatement removal of ACM from sprayed on plaster under the scallop shaped curbside walkway cover completed in 2006. Perimeter air monitor sampling also occurred with results ranging from 0.001 f/cc to 0.006 f/cc.
- SCA Environmental Inc. (Report 9282) with Sterling Environmental Corporation as the prime contractor for asbestos abatement conducted in 2009. ACM was removed in ceiling materials within the Terminal 1 former luggage shop, which contained ACM acoustical plaster over sheetrock substrates. Airborne samples were collected outside the work zone for verifying and monitoring, with all samples at or below the action level of 0.01 fibers/cc by Phase Contrast Microscopy (PCM) analysis.
- RGA Environmental Inc. (Report 9411) with Sterling Environmental Corporation as the designated contractor for cleaning interior and exterior overhead lights. Asbestos can fall from the ceiling material and collect in the fixtures. A total of eight exterior perimeter air samples, collected for containment quality purposes, and samples resulted below the clearance criterion of 0.01 f/cc by PCM analysis.

- SCA Environmental Inc. (Report 9422) with Sterling Environmental Corporation as contracted for asbestos abatement activities in the Terminal 1 former luggage shop. Three exterior perimeter air samples, collected for containment quality purposes, and samples resulted below the clearance criterion of 0.01 f/cc by PCM analysis.
- RGA Environmental (Report 9490) conducted oversight and sir quality monitoring and sampling for Sterling Environmental Corporation for asbestos abatement in 2008. Room 1131 located in the basement of Terminal 1 had the floor tile and mastic removed. Two perimeter air samples were collected with one of the samples above 0.001 f/cc in the hallway at 0.003 f/cc. The other perimeter sample and clearance air samples were below the limit of concern.
- IHI Environmental (Report 9412) conducted a limited field sampling for the presence of lead in paint on the canopies outside Terminals 1 and 2 in 2007. Only two samples were collected: one on the canopy structure and the other on the support beam, with both samples coming back with no detections.
- SCA Environmental Inc. (Report 9414) collected a total of 24 bulk samples with 28 material samples for ACM and six samples for lead containing paint in 2014. Samples for ACM had detections of 1-5% of CH in floor tiles, hot water insulation piping, and black rubberized wrapping on chilled water system copper tubing. Other detections include 10-20 % Chrysotile in heating hot water system piping, 5-10% Chrysotile in brown caulking on HVAC ducts. 1-5 % AM was also found in both the thermal insulation and hot water system piping. No detectable concentrations were indicated from LBP samples.
- SCA Environmental Inc. (Report 9480) with Bayview Environmental Services (BES) conducting the removal process of both ACM and lead based paint in 2014. Sheet rock and wallboard and joint compounds for routing of conduit and cables were removed throughout Terminal 1. Perimeter samples were collected outside of the abatement zone from the asbestos activities, and samples were below the 0.01 f/cc action limit.
- ACC Environmental Consultants (Report 9683) performed a limited ACM and lead survey sampling event in 2016. Eleven (11) samples were collected for asbestos and one bulk sample for lead. Two samples for asbestos had detections with 5% Chrysotile in the light blue tile and black mastic. The bulk sample for lead did not have detectable amounts of lead.

Oakland Maintenance Center (OMC) Hangar

- RGA Environmental (Report 9447) conducted an asbestos and lead survey in 2008 of the Oakland Maintenance Center / United Hangar's future removal. The Hangar consists of three building cores with the building also constructed of concrete masonry. A total of 382 homogeneous potential asbestos samples were collected, as well as 85 paint samples were collected for lead. Eighty-five (85) samples of homogeneous materials tested positive for asbestos content or identified previously to contain asbestos. All 85 samples for LBP, had detectable concentrations with the highest concentration 150,000 parts per million (ppm).
- Winzler and Kelly Consulting Engineers (Report 9446) identified and sampled potential ACM in 2005. A total of 53 samples were collected with four samples with detectable ACM. The locations included wallboard and joint compound in the entire Core A, in the Fireproofing on the first floor and Mezzanine of Core A, black floor tile mastic in the Core A under various colored floor tiles, and in the 12-inch

white floor tile in the Core A under carpet and floor tiles. Not all materials were sampled and for safety, assumed to contain asbestos.

  - An additional amendment was added from Winzler and Kelly Consulting Engineers (Report 9448) regarding the results from the previous sampling report. Fireproofing (5% Chrysotile Asbestos) – on beams, decking, over-spray on conduit, wiring, and ducting, and some debris on top of ceiling panels. Joint Compound on Wallboard (2% Chrysotile Asbestos) – walls and some ceilings. Floor Tile & Black Mastic (5%/15% Chrysotile Asbestos) – sometimes under "New" non-asbestos floor tile with yellow mastic.

- RGA Environmental (Report 9483) in 2007, conducted an asbestos and lead survey of the Air Cargo building, with 74 homogeneous suspect ACM samples and 36 paint samples collected from both interior and exterior paint surfaces. Eleven (11) ACM samples had exceedances above 0.001 % f/cc located in Joint Compounds around the building perimeter, from the mastic, caulk, white glue, and white patch on metal bolts. Of the 36 samples collected for leaded paint, 17 had results above 40 mg/kg ppm.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/26/2023 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 1 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 2 RCRA-LQG sites within approximately 1 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 5 RCRA-SQG sites within approximately 1 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 2 RESPONSE sites within approximately 1 of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/23/2023 has revealed that there are 19 ENVIROSTOR sites within approximately 1 of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 6 RCRA NonGen / NLR sites within approximately 1 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/30/2023 has revealed that there is 1 PFAS ECHO site within approximately 1 miles of the target property.

PFAS PART 139 AIRPORT: Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

A review of the PFAS PART 139 AIRPORT list, as provided by EDR, and dated 03/30/2023 has revealed that there is 1 PFAS PART 139 AIRPORT site within approximately 1 miles of the target property.

EXECUTIVE SUMMARY

EPA ID: CAD983581406
Cleanup Status: CLOSED

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2021 has revealed that there are 19 HAZNET sites within approximately 1 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 01/05/2023 has revealed that there are 12 CERS sites within approximately 1 miles of the target property.

WDS:

Name:	1 AIRPORT DRIVE
Address:	1 Airport Dr.
City:	OAKLAND
Facility ID:	San Francisco Bay 019450001
Facility Type:	Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAG912002 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	2
Facility Telephone:	5106271118
Facility Contact:	Dale Klettke
Agency Name:	OAKLAND INTERNATIONAL AIRPORT
Agency Address:	530 Water Street
Agency City,St,Zip:	Oakland 94607
Agency Contact:	Dale Klettke
Agency Telephone:	5106271118
Agency Type:	City
SIC Code:	4581
SIC Code 2:	4512
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	CNWTRS
Waste Type2:	D
Waste2:	Contaminated Ground Water
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Contaminated Ground Water
Secondary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Design Flow:	1
Baseline Flow:	1
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Description:	RP states, A mechanical malfunction occurred during the refueling of an aircraft which caused the release of 10 to 20 gallons of jet fuel. The release has been stopped. Approx less than 1 gallon of material entered a storm drain which eventually flows to the San Francisco Bay, however it is expected to never reach the bay. No drinking water will be impacted. Cleanup will be conducted in-house by one of the tenants of the airport.

Target **1 AIRPORT RD** **N/A**
Property **OAKLAND, CA 94621**

Site 28 of 159 in cluster A

Actual:
8 ft.

WDS:

Name:	OAKLAND INT AIRPORT-WETLND MIT
Address:	1 AIRPORT RD
City:	OAKLAND
Facility ID:	San Francisco Bay 019415001
Facility Type:	Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	Not reported
Subregion:	2
Facility Telephone:	Not reported
Facility Contact:	Doug Herman
Agency Name:	PORT OF OAKLAND
Agency Address:	PO BOX 2064
Agency City,St,Zip:	OAKLAND 94604
Agency Contact:	JAMES MCGRATH
Agency Telephone:	5106271175
Agency Type:	Special District (Includes districts established under general acts, sanitary districts, water districts irrigation districts, etc.)
SIC Code:	0
SIC Code 2:	Not reported
Primary Waste Type:	Not reported
Primary Waste:	Not reported
Waste Type2:	Not reported
Waste2:	Not reported
Primary Waste Type:	Not reported
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity:	Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

AMERICAN AIRLINES (Continued) **1024684270**

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

SOUTHWEST AIRLINES CO (Continued) **S121747292**

	6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 04/28/2017. OBSERVATION: The annotated site map submitted to the CUPA does not include emergency response equipment (fire extinguishers and eyewash), hazardous materials storage near gate 25 (separate from the HW storage bunker), and on the west end of tarmac in shipping container. CORRECTIVE ACTION: Revise the annotated Site Map to include all required content and submit electronically in the California Environmental Reporting System (CERS).

Violation Source:	CERS,
Site ID:	155552
Site Name:	Southwest Airlines Co
Violation Date:	04-12-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/28/2017. OBSERVATION: Facility has a hazardous waste label on a 55 gallon used absorbent that was missing the physical state and hazardous properties. Facility also has a 55 gallon drum of waste adhesives, 55 gallon drum of waste aerosols, 55 gallon drum of waste paint had old labels dating 2015 and older. Inside the hazardous waste storage bunker, the 3 55 gallon drums of used oil, 55 gallon drum of castro oil, and 55 gallon drum of jet fuel were missing accumulation start dates, hazardous properties, and physical state. Each drum should have a properly filled out hazardous label attached or stored above it on the wall. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all containers are marked with all the required [Truncated]

Violation Description:	Failure to comply with the applicable requirements related to accumulation and containment standards for universal waste aerosol cans.
Violation Notes:	Returned to compliance on 04/28/2017. OBSERVATION: A 55 gallon drum of universal waste aerosol cans was found not labeled with the type of waste stored. Containers used to store aerosol cans shall be labeled or marked with one of the following phrases: Universal Waste Aerosol

SOUTHWEST AIRLINES CO (Continued) **S121747292**

Cans , Waste Aerosol Cans , or Used Aerosol Cans . The drum has an old hazardous waste label with a 2015 accumulation start date. CORRECTIVE ACTION: Immediately mark these containers and ensure that all containers of aerosol cans are marked in this manner. Submit documentation to the CUPA demonstrating what corrective actions were taken.

Violation Division: Alameda County Environmental Health
Violation Program: HW
Violation Source: CERS,

Site ID: 155552
Site Name: Southwest Airlines Co
Violation Date: 04-12-2017
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 04/28/2017. OBSERVATION: Observed open containers of Universal Waste aerosols, expired adhesives, and paints with open 55 gallon drums. Southwest needs to figure out the best management practices for this storage area. All hazardous waste containers shall be closed unless adding or removing waste. CORRECTIVE ACTION: Have the hazardous waste storage in yellow roll up container outside the storage bunker closed and provide photo documentation to ACDEH within 30 days.
