Project Title: Rosamond South Solar Project; Amendment No. 4 to the Western Joshua Tree Conservation Act (WJTCA) Incidental Take Permit (ITP) No. 1927-ITP-2023-018-04.

Project Location: The Rosamond South Solar Project (Project), which is comprised of four conditional use permit (CUP) areas, is located approximately six miles southwest of the town of Rosamond in the Southeastern portion of unincorporated Kern County.

Project Description: The Project includes the construction and operation of photovoltaic (PV) solar facilities and associated infrastructure necessary to generate up to 165 megawatt (MW) alternating current (MW-AC) of renewable energy, including up to 245 MW (or 980 megawatt hours (MWh)) of energy storage, on approximately 1,302 acres of privately-owned land.

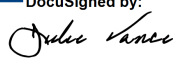

The Project will result in incidental take of 1,354 western Joshua trees (WJT, *Yucca brevifolia*), which are protected under the WJTCA and the California Endangered Species Act. The WJTCA ITP referenced above as issued by CDFW authorizes incidental take of WJT that may occur as a result of Project implementation. Amendment No. 1 revised the number of impacted WJT from 1,346 to 1,347 adding one additional live Class B WJT. Amendment No. 2 revised the number of impacted WJT from 1,347 to 1,371 trees. Amendment No. 3 authorized take of an additional 229 WJT and removes take authorization for 246 WJT, further revising the number of impacted WJT from 1,371 to 1,354. Amendment No.4 amends the WJT Preservation Condition of Approval and extends the deadline for recordation of the conservation easement.

This is to advise that CDFW, acting as [☐ the lead agency / ☒ a responsible agency] approved the above-described project on the date signed below and made the following determinations regarding the above-described project:
