Subject: **Phase I Environmental Site Assessment**
19 North 2nd Street
San Jose, California 95113
AEI Project No. 443737
Client Reference Name: North 2nd Affordable

Dear Loida Kirkley:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (408) 829-8679 or TGolino@aeiconsultants.com.

Sincerely,

Tory Golino
Senior Vice President
AEI Consultants

PROJECT SUMMARY

19 North 2nd Street, San Jose, Santa Clara County, California 95113
AEI Project No. 443737

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Roygbiv Real Estate Development LLC to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 19 North 2nd Street, San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	19 North 2nd Street, San Jose, Santa Clara County, California 95113 The following addresses are associated with the subject property: 15, 17, 21, 23 and 25 North 2nd (aka Second) Street
Property ID (APN or Block/Lot)	467-21-028
Location	Southwest side of North 2nd Street, bound by East Santa Clara Street to the southeast and East St. John Street to the northwest
Property Type	Mixed-Use (Office, Retail)
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.2/Santa Clara County Assessor
Number of Buildings	One
Building Construction Date(s)/Source	1928/Assessor
Building Square Footage (SF)/Source	15,040/Client provided
Number of Floors/Stories	Two
Basement or Subgrade Area(s)	None identified or reported by the key site contact
Number of Units	13
Additional Improvements	None identified
On-site Occupant(s)	See table below
Current On-site Operations/Use	See table below
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	HWTS (x3), HAZNET (x2)

Tenant Information

Subject Property Address/Unit	Tenant	Use	Accessed
15 North Second Street	Vacant	None	No
17 North Second Street	Gente Cafe	Retail food facility	No

Subject Property Address/Unit	Tenant	Use	Accessed
19 North Second Street (ground, second floors)	First Place For Youth/19 North Second Street (ground floor), Suite 102 Bakery and Kiwibot Repair Shop/ 19 North Second Street (ground floor), No Suite Designations Vacant/19 North Second Street (second floor), Suites 201-207	Commercial Office/ Suite 102 Bakery and Light Electronic Repair/No Designated Suites	Yes; only Realty Building Hallway, Kiwibot, and vacant offices
21 North Second Street	Angelou's Mexican Food	Retail food facility	No
25 North Second Street	Cheap Squad LLC	Computer Repair	No

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1884	Unknown use/Data failure; refer to Section 1.6.1	Sanborn maps
1884-1891	Developed with a commercial building, occupied by a church (15-23 North Second Street)	Sanborn maps
1915	Developed with a commercial building, occupied by a former movie theater, Moose Club Motion Pictures (19 North Second Street)	Sanborn maps
1916-1927	Unknown use/Data failure; refer to Section 1.6.1	Sanborn maps, agency records
1928	Construction of the current commercial building	Agency records
1928-Present	Existing building has been occupied by various commercial and retail tenants including cafes/restaurants, commercial offices, and a printers/litho-plating manufacturing facility (1930-2004) (15-25 North Second Street)	Interviews, aerial photographs, agency records, city directories, site observation

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	North Second Street followed by: Multi-tenant retail/commercial office building (75 East Santa Clara Street) occupied by: • Ike's Sandwiches; • Safe and Sound Security; • WeWork Office Space; • Burnham Construction;	HAZMAT, CERS, CUPA LISTINGS, EMI, RCRA-NONGEN/NLR (x4)

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
	• ABC Silicon Valley; • Vanir Construction Management; • Gigante Consulting; • various law offices; and • IBC Beer Shop and Room	
Southeast	Multi-tenant commercial office building (35-45 East Santa Clara Street, 2 North 2nd Street) occupied by: • Backyard Event Venue; and • American Standard Security Guard Service Multi-tenant retail/commercial office building (29-31 East Santa Clara Street) occupied by: • AK's Square In and Out Market	CPS-SLIC, CERS (35, 43 East Santa Clara Street) RCRA-SQG, SWEEPS UST, HIST UST, FINDS, ECHO, CUPA LISTINGS (2 North 2nd Street) HAZNET, HIST UST, HWTS (2, 4 North Second Street) EDR HIST CLEANER (43, 49 East Santa Clara Street)
Southwest	Multi-tenant retail/commercial office building (18-28 North 2nd Street) occupied by: • Giz Hookah Lounge; • CAD Cat Consulting; • San Jose Downtown Association; and • Starlight Cinemas	None identified
Northwest	Multi-tenant commercial office building (31-51 North 2nd Street) occupied by: • Santa Clara County Attorney Bar Association; • Bay Area Medical Academy; • BAMA Institute; and • various law offices	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- The southeastern adjoining property is listed as an open SLIC release case in the regulatory database. The Bassler-Haynes Building and Dr. EU Building, located in an up-gradient direction at 35 and 43 East Santa Clara Street, are listed as the same active CPS-SLIC case (SLT2O287178). The SF Bay RWQCB is providing regulatory oversight of this CPS-SLIC case. Based on information reviewed on the GeoTracker online database, the Bassler-Hayne building was formerly occupied by a hotel. A dry-cleaner, located in the hotel basement, operated at the site from approximately 1950 to 1969 and released tetrachloroethene (PCE). Since 1997, several environmental investigations have been conducted which included the advancement of soil borings (soil and grab groundwater samples were obtained), installation of groundwater monitoring wells, collection of soil-gas samples, and collection of indoor air samples. Results from these investigations indicated the presence of halogenated volatile organic compounds (HVOCs), including PCE, in soil, soil-gas, indoor air and shallow groundwater at concentrations above their respective regulatory screening criteria at the site. In addition, elevated HVOC levels have been detected in soil, soil-gas, groundwater and indoor air samples collected from the properties located north/northeast of the site (cross- to down-gradient) including the subject property. Soil, groundwater, soil vapor, and indoor air samples were collected from the subject property during an investigation in September 2014. Indoor air samples were re-collected in November 2018 and January 2019. Soil samples were collected from borings at the north, eastern, and southern portions of the subject property. PCE was detected in soil at a maximum concentration of 0.32 milligrams per kilogram (mg/kg) in two samples from on-site boring GP-3, while TCE was detected in soil at a concentration of 0.027 mg/kg in one sample from this boring. PCE was detected in soil at a maximum concentration of 0.62 mg/kg in all three samples from on-site boring GP-1. No detectable concentrations of PCE or TCE were reported in soil from a boring advanced along the southern portion, boring GP-2. Grab groundwater samples were collected from borings at the north, eastern, and southern portions of the subject property. PCE, cis-1,2-DCE, and TCE were detected in on-site grab groundwater sample GP-1 at concentrations of 54 micrograms per liter (ug/L), 8.2 ug/L, and 34 ug/L, respectively. PCE, cis-1,2-DCE, and TCE were detected in on-site grab groundwater sample GP-3 at concentrations of 30 ug/L, 23 ug/L, and 2.0 ug/L, respectively. PCE was detected in grab groundwater sample GP-2, located at the southern property boundary, at a concentration of 0.73 ug/L. Soil vapor samples were collected from borings at the northern and southern portions of the subject property. Two soil vapor samples were collected immediately southeast of subject property. PCE and TCE were detected in on-site soil vapor sample SVP-1 at concentrations of 60,000 micrograms per cubic meter (ug/m3) and 200 ug/m3, respectively, while PCE was detected in the other on-site soil vapor sample at 650 ug/m3. PCE was detected in soil vapor samples SS-1 and SS-2, located at the eastern property boundary, at concentrations of 73.9 ug/m3 and 27.9 ug/m3, respectively. Indoor air samples were collected from throughout the subject property building. PCE and TCE were detected during the initial round of indoor air sampling

(IAQ-1 through IAQ-3) in September 2014 at maximum concentrations of 4.5 ug/m3 and 0.21 ug/m3, respectively. PCE was detected in outdoor air sample OAA-1 at a concentration of 1.1 ug/m3. PCE was detected during a subsequent round of indoor air sampling (IA-9 through IA-12) in November 2018 at a maximum concentration of 5.22 ug/m3. Additional indoor air sampling was performed on November 2018 and January 2019; PCE was detected at maximum concentrations of 5.22 ug/m3 (IA-11) and 4.86 ug/m3 (IA-14), respectively. Cumulative investigation results indicate that the release of HVOCs from the adjoining release case has impacted soil, soil vapor, groundwater, and indoor air of the subject property, and therefore the adjoining open release case constitutes a REC. AEI understands that the subject property is slated for redevelopment. Therefore it may be prudent to develop/implement a Soil Management Plan (SMP) for the proposed construction, related excavation and grading activities to address plans for encountering, handling and disposing of soil potentially impacted by hazardous substances.

- Based on available historical sources, including city directories and Sanborn maps, the subject property was identified to consist of printing and litho-plate manufacturing operations from at least 1930 to 2004. Identified regulated wastes generated in the mid-1990s as part of on-site operations included photochemcials/ photoprocessing wastes. No documented releases are associated with the business names and regulated wastes discussed above. Many printing industries generate waste ink and ink sludges that might contain solvents or heavy metals. Photographic processes are also typically associated with major printing operations for image conversion and plate making. Photographic wastes, including heavy metal solutions, developers, hardeners, plating chemicals, and spent solvents, make up a large portion of the hazardous waste generated in these industries. Records pertaining to the use of hazardous materials for the previous industrial tenants were not available as they operated during a time when the regulatory measures governing the use of hazardous materials of this nature were not as stringent as they are today. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Based on the length of time these operations were conducted and the lack of specific information regarding the on-site operations and types of materials used by these facilities, the historical printing and litho-plate manufacturing operations are considered a REC. However, while printing operations may have occurred on-site for over 70 years, environmental investigations performed on-site relating to the southeastern adjoining SLIC case to date do not appear to suggest an on-site volatile organic compound (VOC) source. Sample analyses for heavy metals does not appear to have been conducted on the subject property related to the adjoining SLIC case; therefore based on the duration of printing operations, elevated heavy metals may exist beneath the subsurface. AEI understands that the subject property is slated for redevelopment. Therefore it may be prudent to develop/implement a Soil Management Plan (SMP) for the proposed construction, related excavation and grading activities to address plans for encountering, handling and disposing of soil potentially impacted by hazardous substances.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- According to the key site contact, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.
- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that renovation and/or demolition activities of the subject property buildings are planned. AEI presumes that the planned renovation and/or demolition activities will be performed in accordance with applicable regulations. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 19 North 2nd Street, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

- Subsurface Investigation
- Implementation of a Soil Management Plan (SMP)

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 19 North 2nd Street, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.

- The subject property owner was not interviewed during this assessment. Based on information obtained from other sources, including the key site manager, this limiting condition is not expected to alter the overall findings of this assessment.

- AEI was not provided access to the interior of retail units 15, 17, 21, and 25 North 2nd Street, as well as certain locations within the ground floor area of 19 North 2nd Street. However, based on the quality of information obtained from other sources, this limitation is not expected to significantly alter the findings of this assessment.

- Due to the large volume of stored products within accessed portions of the building, direct visual observation of many of the floor and wall areas of the building was not possible. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment. However, features may be present that are not visible to AEI.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was a Sanborn map from 1884 indicating that the subject property was developed commercially. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records, interviews

Data Failure	Historical sources were not obtained at five-year intervals dating back to first developed use. AEI was not able to track the history of the subject property between the years 1916 and 1927 as none of the historical sources utilized as part of this assessment covered this time period. In the 1915 Sanborn map. In 1928, the current commercial building was constructed. Thus, it is assumed that during this time period the subject property would have been used for commercial purposes. Therefore, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records, interviews

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of Roygbiv Real Estate Development LLC. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with

AEI's contract and Terms and Conditions executed by Roygbiv Real Estate Development LLC on July 16, 2021. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 SITE LOCATION AND DESCRIPTION

PROPERTY INFORMATION	
Site Address(es)	19 North 2nd Street, San Jose, Santa Clara County, California 95113 The following addresses are associated with the subject property: 15, 17, 21, 23 and 25 North 2nd (aka Second) Street
Property ID (APN or Block/Lot)	467-21-028

15 North Second Street	Vacant	None	No
17 North Second Street	Gente Cafe	Retail food facility	No
19 North Second Street (ground, second floors)	First Place For Youth/19 North Second Street (ground floor), Suite 102	Commercial Office/ Suite 102 Bakery and Light Electronic Repair/No Designated Suites	Yes; only Realty Building Hallway, Kiwibot, and vacant offices

Subject Property Address/Unit	Tenant	Use	Accessed
	Bakery and Kiwibot Repair Shop/ 19 North Second Street (ground floor), No Suite Designations Vacant/19 North Second Street (second floor), Suites 201-207		
21 North Second Street	Angelou's Mexican Food	Retail food facility	No
25 North Second Street	Cheap Squad LLC	Computer Repair	No

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	Electricity
Potable Water	San Jose Water
Sewage Disposal/Treatment	City of San Jose Public Works/Sanitary Sewer

Utility source/system information listed in the table above is provided by Ms. Loida Kirkley of Roygbiv Real Estate Development, LLC, unless otherwise noted above.

2.3 Site and Vicinity Characteristics

The subject property is located in a mixed commercial, retail, and residential area of San Jose, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	North Second Street followed by: Multi-tenant retail/commercial office building (75 East Santa Clara Street) occupied by: • Ike's Sandwiches; • Safe and Sound Security; • WeWork Office Space; • Burnham Construction; • ABC Silicon Valley; • Vanir Construction Management; • Gigante Consulting; • various law offices; and • IBC Beer Shop and Room	HAZMAT, CERS, CUPA LISTINGS, EMI, RCRA-NONGEN/NLR (x4)

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Southeast	Multi-tenant commercial office building (35-45 East Santa Clara Street, 2 North 2nd Street) occupied by: • Backyard Event Venue; and • American Standard Security Guard Service Multi-tenant retail/commercial office building (29-31 East Santa Clara Street) occupied by: • AK's Square In and Out Market	CPS-SLIC, CERS (35, 43 East Santa Clara Street) RCRA-SQG, SWEEPS UST, HIST UST, FINDS, ECHO, CUPA LISTINGS (2 North 2nd Street) HAZNET, HIST UST, HWTS (2, 4 North Second Street) EDR HIST CLEANER (43, 49 East Santa Clara Street)
Southwest	Multi-tenant retail/commercial office building (18-28 North 2nd Street) occupied by: • Giz Hookah Lounge; • CAD Cat Consulting; • San Jose Downtown Association; and • Starlight Cinemas	None identified
Northwest	Multi-tenant commercial office building (31-51 North 2nd Street) occupied by: • Santa Clara County Attorney Bar Association; • Bay Area Medical Academy; • BAMA Institute; and • various law offices	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Qa: Dissected clay, silt, sand, and gravel, deposited in an alluvial environment, representing undifferentiated stream alluvium in drainages and younger fan deposits at base of fan slopes, undeformed, age Quaternary/USGS and United States Department of the Interior
Soil Series: Description/Source	Urban Land-ElPaloAlto Complex (0 to 2 percent slopes): the Urban Land designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures; due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property/ USDA Soil Survey

Groundwater Flow Direction/Source	Northwest/Topographic map interpretation and groundwater monitoring in vicinity of subject property
Estimated Depth to Groundwater/ Source	17-27 feet bgs/Groundwater sampling for southeast adjoining property (35, 43 East Santa Clara Street)
Surface waters on the subject property or adjoining sites	None
Additional notes	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1884	Unknown use/Data failure; refer to Section 1.6.1	Sanborn maps
1884-1891	Developed with a commercial building, occupied by a church (15-23 North Second Street)	Sanborn maps
1915	Developed with a commercial building, occupied by a former movie theater, Moose Club Motion Pictures (19 North Second Street)	Sanborn maps
1916-1927	Unknown use/Data failure; refer to Section 1.6.1	Sanborn maps, agency records
1928	Construction of the current commercial building	Agency records
1928-Present	Existing building has been occupied by various commercial and retail tenants including cafes/restaurants, commercial offices, and a printers/litho-plating manufacturing facility (1930-2004) (15-25 North Second Street)	Interviews, aerial photographs, agency records, city directories, site observation

The following addresses are associated with the subject property: 15, 17, 21, 23 and 25 North 2nd (aka Second) Street. These addresses were also researched as part of this assessment.

Environmental concerns associated with the historical on-site printers/litho-plating manufacturing facility are further discussed in Section 5.1.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939, 1948, 1950, 1956, 1968	Developed with existing structure	NORTHEAST: Roadway followed by commercial structures SOUTHEAST: Commercial structures SOUTHWEST: Commercial structures NORTHWEST: Commercial structures
1974, 1982, 1993, 1998, 2005, 2006, 2009, 2010,	No significant changes visible	NORTHEAST: Appears to be developed with roadway and existing structure SOUTHEAST: No significant changes visible SOUTHWEST: No significant changes visible NORTHWEST: No significant changes visible

Year(s)	Subject Property Description	Adjoining Site Descriptions
2012, 2014*, 2016*, 2018*		

*Reviewed using online resources (NetRonline.com)

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the aerial photograph review.

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1884	Depicted with a former two-story building occupied by the M.E. Church (15-23 North Second Street)	NORTHEAST: Depicted with East Santa Clara Street, followed several former structures occupied by several unspecified storefronts, a restaurant, carriage house, residential dwellings, a plumber, and a carpenter and painter contractor SOUTHEAST: Depicted with former/ existing structures occupied by several unspecified storefronts, drugstores, and offices SOUTHWEST: Depicted with former structures occupied by several unspecified storefronts, an armory, a carriage trimming shop, a glove manufacturing facility, and offices NORTHWEST: A residence and ancillary structures
1891	No significant changes depicted (19 North Second Street)	NORTHEAST: Depicted with East Santa Clara Street, followed several former structures occupied by several unspecified storefronts, a drugstore, a candy shop, a livery, and offices SOUTHEAST: No significant changes depicted SOUTHWEST: Depicted with former structures occupied by several unspecified storefronts, the St. Andrews House Lodge, a picture framer, a wallpaper and paints/oil shop, a store room, a liquor store, restaurant, and offices NORTHWEST: No significant changes depicted
1915	Depicted with a former two-story structure occupied by the Moose Club Motion Pictures theater (19 North Second Street)	NORTHEAST: No significant changes depicted SOUTHEAST: Depicted with former/ existing structures occupied by several unspecified storefronts, restaurants, a

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
		drugstore, a **printing facility**, and offices SOUTHWEST: Depicted with former/existing structures occupied by several unspecified storefronts, a drug store, a sign painter, a **sign printing facility**, a saloon, a lodge, a dance room, and offices NORTHWEST: An undertaker facility and residence
1950	Depicted with existing structure occupied by several offices and **a former printing facility** at the rear (15-25 North Second Street)	NORTHEAST: Depicted with East Santa Clara Street, followed by former structures occupied by unspecified storefronts, a drugstore, a furniture store, offices, and a **printing facility** SOUTHEAST: Depicted with existing structures occupied by several unspecified storefronts, a restaurant, and a **dry cleaning facility** SOUTHWEST: Depicted with existing structures occupied by several unspecified storefronts, a restaurant, and offices NORTHWEST: Depicted with a parking garage (auto repairing not performed on-site)
1969	Depicted with existing structure occupied by several offices and a former **litho-plate manufacturing facility** at the rear of the building (15-25 North Second Street)	NORTHEAST: Depicted with East Santa Clara Street, followed by vacant land SOUTHEAST: Depicted with existing structures occupied by several unspecified storefronts, a restaurant, a hotel, and a **dry cleaning facility** SOUTHWEST: No significant changes depicted NORTHWEST: Depicted with existing structure occupied by a parking garage and offices
1984	No significant changes depicted	NORTHEAST: Depicted with East Santa Clara Street, followed by the existing structure used for offices SOUTHEAST: Depicted with existing structures occupied by several unspecified commercial units, a hotel, a restaurant, and an unspecified storefront SOUTHWEST: Depicted with existing structures occupied by unspecified storefronts and commercial units and offices NORTHWEST: No significant changes depicted

The subject property was identified to consist of printing/litho-plate manufacturing operations from at least 1950 to 1969. Information regarding on-site printing/manufacturing operations are further discussed in Section 5.1.

The southeastern adjoining property was depicted as a printing facility in 1915 and a dry cleaning facility in Sanborn maps from at least 1950 and 1969. Refer to Section 5.1 for further discussion for discussion of environmental investigations performed at this adjoining site.

Based on distance and the expected groundwater flow direction, no other adjoining historical operations depicted are expected to represent a significant environmental concern.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from 1922 to 2017. The first listing for the subject property appeared in 1930. The following table summarizes the results of the city directory search.

Year(s)	Address - Occupant Listed
1922, 1925, 1926	Subject property not listed
1930	15 North 2nd Street - WL Atkinson & Co. Real Estate, Mortgage Guaranty Co. 17 North 2nd Street - Garden City Finance Co., Macaulay Finance Co. Auto Loans 19 North 2nd Street - Realty Building, **Ely Wright Printing Co.**, Wolfe & Higgins Architects, McMillan Civil Engineers, Long Advertising Services 21 North 2nd Street - Crothers Realty Col, Homeowners Build and Loan Association 25 North 2nd Street - Realty Associates
1931	Subject property not listed
1935	15 North 2nd Street - WL Atkinson & Co. If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

The subject property was identified to consist of printing and litho-plate manufacturing operations from at least 1930 to 2004. Information regarding on-site printing/manufacturing operations are discussed in Section 5.1.

3.4 HISTORICAL TOPOGRAPHIC MAPS

In an attempt to close any data failure, AEI reviewed historical topographic maps at NETR's www.historicaerials.com. No additional historical information was obtained from available topographic maps.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Department of Environmental Health (SCCDEH)	July 23, 2021	Website	Ms. Melissa Belloso, SCCDEH Staff	No records on file

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
California Environmental Protection Agency (CalEPA)	August 8, 2021	Website	N/A	No records on file in the CalEPA's Regulated Site Portal database.

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Fire Department (SJFD)	July 23, 2021	Email	Ms. Erica Lopez, Sr. Office Specialist	No hazardous substances records on file

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Building Division (SJBD)	August 8, 2021	Website	N/A	Records discussed below

Building permits were available for addresses 15, 17, 19, and 21 North Second Street for years 1972 to 2017. Building permits related to tenant improvement work such as mechanical, electrical, and and plumbing upgrades, as well as interior remodeling signage work, and a sidewalk cafe. Also included were related administrative documents, related applications, invoices, architecture plans, building inspections, fire inspections, structural calculations, and certificates of occupancies. Identified operations include commercial offices, salons, a tattoo parlor, cafes, and restaurants.

An undated floor plan was on file with the SJBD records, indicating that a printing facility was located behind four front offices. No features of concern were depicted on the floor plan. Environmental concerns associated with the historical on-site printers/litho-plating manufacturing facility are further discussed in Section 5.1.

4.4 PLANNING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Planning Division (SJPD)	August 8, 2021	Website	N/A	No evidence indicating the existence of AULs on file for the subject property

4.5 ASSESSOR'S OFFICE

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Assessor's Office	August 8, 2021	Website and telephone	N/A	Information obtained is discussed below

Records Summary

APN	467-21-028
Acreage	0.2 acres
Construction Date	1928
Building Square Footage	Not provided
Current Owner	Not provided
Additional Information	According to online research (PropertyShark.com), current property ownership is vested in Wendy B Warren since 02/21/2013.

4.6 OTHER AGENCIES SEARCHED

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	August 8, 2021	Website	N/A	No records on file
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	August 8, 2021	Website	N/A	Records discussed below
CA DTSC EnviroStor	August 8, 2021	Website	N/A	No records on file
Bay Air Quality Management District (BAAQMD)	July 23, 2021	Email	Ms. Rochele Henderson, Public Records Section	No records on file
Valley Water (formerly Santa Clara Valley Water District)	August 8, 2021	Website	N/A	Records discussed below

CalEPA HWTS

Holmes Typography, with an address of 19 North 2nd Street, is listed as generating a total of approximately 1.75 tons of photochemicals/photoprocessing wastes in 1994, 1995, 1996, and 1998. Laser Reflections, with an address of 25 North 2nd Street, is listed as generating total of approximately 0.604 tons of photochemicals/photoprocessing wastes between 1996 and 1997. Refer to Section 5.1 for further discussion.

Valley Water Online Well Database

Two groundwater monitoring wells (MW-1 and MW-2) and one soil vapor extraction well (SVE-5) are noted as active on the subject property; these wells are related the open adjoining SLIC case to the southeast, refer to Sections 5.1 and 6.3 for further discussion.

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	August 8, 2021	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	August 8, 2021	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

Facility Name	The Realty Building, Holmes Typography, Laser Reflections
Address	19, 25 North Second Street, San Jose
Distance & Direction	Subject Property
Hydrologic Position	N/A
Databases Listed	HWTS (x3), HAZNET (x2)
Comments	Holmes Typography, with an address of 19 North 2nd Street, is listed as generating and transporting approximately 4.33 tons of photochemicals/ photoprocessing waste between 1994 and 1998. Laser Reflections, with an address of 25 North 2nd Street, is listed as generating and transporting approximately 1.2 tons of photochemicals/photoprocessing waste between 1996 and 1997. The wastes are listed as having been off-hauled for processing. The Realty Building, with an address of 19 North Second Street, is listed as filing for an EPA ID for the transport of hazardous waste in November 2017; however, no waste manifest data is available. Based on available historical sources, including city directories and Sanborn maps, the subject property was identified to consist of printing/litho-plate manufacturing operations from at least 1930 to 2004. Identified regulated wastes generated as part of on-site operations are listed as photochemcials/ photoprocessing waste in the mid-1990s. No releases are associated with the business names and regulated wastes discussed above. Many printing industries generate waste ink and ink sludges that might contain solvents or heavy metals. Photographic processes are also typically associated with major printing operations for image conversion and plate making. Photographic wastes, including heavy metal solutions, developers, hardeners, plating chemicals, and spent solvents, make up a large portion of the hazardous waste generated in these industries. Records pertaining to the use of hazardous materials for the previous industrial tenants were not available as they operated during a time when the regulatory measures governing the use of hazardous materials of this nature were not as stringent as they are today. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Based on the length of time these operations were conducted and the lack of specific information regarding the on-site operations and types of materials used by these facilities, the historical printing and litho-plate manufacturing operations

	are considered a REC. However, while printing operations may have occurred on-site for over 70 years, environmental investigations performed on-site relating to the southeastern adjoining SLIC case to date do not appear to suggest an on-site volatile organic compound (VOC) source. Sample analyses for heavy metals does not appear to have been conducted on the subject property related to the adjoining SLIC case; therefore based on the duration of printing operations, elevated heavy metals may exist beneath the subsurface.

Facility Name	Bassler-Haynes Building, Dr. EU Building, Foto Express, Horizon Center, Pacific Bell, Gordon Otto, Economy Cleaners and Launderers, Level 3 Communications
Address	35, 43, 49 East Santa Clara Street and 2, 4 North Second Street, San Jose, CA
Distance & Direction	Adjoining to the southeast
Hydrologic Position	Up-gradient
Databases Listed	CPS-SLIC, CERS (35, 43 East Santa Clara Street) RCRA-SQG, SWEEPS UST, HIST UST, FINDS, ECHO, CUPA LISTINGS (2 North 2nd Street) HAZNET, HIST UST, HWTS (2, 4 North Second Street) EDR HIST CLEANER (43, 49 East Santa Clara Street)
Comments	*Open SLIC Case* The following is based on information available on the SWRCB GeoTracker database and documents provided by the client further discussed in Section 6.3. The northeastern adjoining property is listed as an open SLIC case. Facility names Bassler-Haynes Building and Dr. EU Building, with addresses of 35 and 43 East Santa Clara Street, are listed as the same active CPS-SLIC case (SLT2O287178) with the SF Bay RWQCB presently providing oversight. Per the regulatory database, the SLIC case has a facility status of "Open - Site Assessment." Information regarding the open SLIC case obtained from documents available on the SWRCB GeoTracker online database is as follows. Historical tenants of the Bassler-Haynes building included several retail businesses, including a jeweler, a clothing store, and a hotel. A dry-cleaning operation associated with the hotel reportedly released tetrachloroethene (PCE) and was located in the building's basement. The dry-cleaning operation reportedly operated between 1950 and 1969. Several phases of environmental investigation have been conducted by the responsible party's (RP's) consultant, Terraphase Engineering Inc. (Terraphase), at the site since 1997. The investigations performed have included the advancement of soil borings for soil and grab groundwater sampling, installation of groundwater monitoring wells, collection of soil-gas samples, and collection of indoor air samples. Results from these investigations indicated the presence of halogenated volatile organic compounds (HVOCs), including (PCE), in soil, soil-gas, and shallow groundwater at the site at concentrations above regulatory screening criteria (Commercial/ Industrial Environmental Screening Levels; RWQCB 2016). PCE was also detected in indoor air samples collected from the site in 2004 at concentrations above regulatory screening levels (Commercial/Industrial Environmental

	Screening Levels; RWQCB 2016). Trichloroethene (TCE) and cis-1,2-dichloroethene (cis-1,2-DCE), breakdown products of PCE, have also been detected in groundwater beneath the site. Chlorinated volatile organic compounds have been detected in soil, soil-gas, groundwater, and indoor air samples collected from the following neighboring properties located to the north of the site in the downgradient direction: 1) the subject property, 15-25 North Second Street, located adjoining to the site to the northwest on Second Street; 2) Planned Marshall Squares, 50, 52, 60, 66, 80, and 90 North 1st Street and 65 North Second Street, located approximately 150 feet west and northwest of the site between North 1st Street and North Second Street; 3) Silicon Valley Towers, 4 North Second Street and 75 East Santa Clara Street, located northeast of the site across North Second Street; and 4) 70 North Second Street, located north of the site, adjacent to the Silicon Valley Towers property to the northwest. Soil, groundwater, soil vapor, and indoor air samples were collected from the subject property during an off-site investigation in September 2014. Indoor air samples were re-collected in November 2018 and January 2019. *Soil* Soil samples were collected from borings at on the north, eastern, and southern portions of the subject property. PCE was detected in soil at a maximum concentration of 0.32 milligrams per kilogram (mg/kg) in two samples from on-site boring GP-3, while TCE was detected in soil at a concentration of 0.027 mg/kg in one sample from this boring. PCE was detected in soil at a maximum concentration of 0.62 mg/kg in all three samples from on-site boring GP-1. No detectable concentrations of PCE or TCE were reported in soil collected from a boring advanced along the southern property building, boring GP-2. *Groundwater* Grab groundwater samples were collected from borings at on the north, eastern, and southern portions of the subject property. PCE, cis-1,2-DCE, and TCE were detected in on-site grab groundwater sample GP-1 at concentrations of 54 micrograms per liter (ug/L), 8.2 ug/L, and 34 ug/L, respectively. PCE, cis-1,2-DCE, and TCE were detected in on-site grab groundwater sample GP-3 at concentrations of 30 ug/L, 23 ug/L, and 2.0 ug/L, respectively. PCE was detected in grab groundwater sample GP-2, located at the southern property boundary, at a concentration of 0.73 ug/L. *Soil Vapor* Soil vapor samples were collected from a boring at the northern and southern portions of the subject property. Two soil vapor samples were collected immediately southeast of subject property. PCE and TCE were detected in on-site soil vapor sample SVP-1 at concentrations of 60,000 micrograms per cubic meter (ug/m3) and 200 ug/m3, respectively, while only PCE was detected at the other on-site soil vapor sampling location at 650 ug/m3. PCE was detected in soil vapor samples SS-1 and SS-2, located at the eastern property boundary, at concentrations of 73.9 ug/m3 and 27.9 ug/m3, respectively.

	Indoor Air Indoor air samples were collected from throughout the subject property building. PCE and TCE were detected during the initial round of indoor air sampling (IAQ-1 through IAQ-3) in September 2014 at maximum concentrations of 4.5 ug/ m3 and 0.21 ug/m3, respectively. PCE was detected in outdoor air sample OAA-1 at a concentration of 1.1 ug/m3. PCE was detected during a subsequent round of indoor air sampling (IA-9 through IA-12) in November 2018 at a maximum concentration of 5.22 ug/m3. Additional indoor air sampling was performed on November 2018 and January 2019; PCE was detected at maximum concentrations of 5.22 ug/m3 (IA-11) and 4.86 ug/m3 (IA-14), respectively. In an attempt to protect human health from potential vapor intrusion, a Soil Vapor Extraction (SVE) Pilot Test was conducted in June 2020 by the responsible party's (RP's) consultant. The Pilot Test included the installation of a horizontal SVE well (SVE-1) and baseline monitoring of HVOCs in the four existing soil-vapor monitoring wells utilized for the test (SG-6 through SG-9). The Pilot Test demonstrated the feasibility of SVE technologies to remediate chemicals present in the vadose zone at the site. A full-scale SVE system was recommended to be implemented. As of the most recent Bimonthly Status Report (June 2021) prepared by the RP's consultant, full-scale implementation of the SVE system is ongoing. Cumulative investigation results indicate that the release of HVOCs from the adjoining release case has impacted soil, soil vapor, groundwater, and indoor air of the subject property, and therefore the adjoining open release case constitutes a REC. AEI understands that the subject property is slated for redevelopment. Therefore it may be prudent to develop/implement a Soil Management Plan (SMP) for the proposed construction, related excavation and grading activities to address plans for encountering, handling and disposing of soil potentially impacted by hazardous substances. *Other Listings* Horizon Center, with an address of 2 North 2nd Street, is listed as operating a 1,000-gallon diesel, carbon steel UST installed in 1972. The owner of the UST is listed as Pacific Bell. Horizon is also listed as generating and off-hauling approximately 12 tons of asbestos-containing waste between 1996 and 1998. Foto Express, with an address of 2 North 2nd Street, is listed as a hazardous waste generator, reportedly generating silver waste only at a rate between 100+ kilograms a year and less than 100 kilograms a month. Pacific Bell, with an address of 2 North 2nd Street, is listed as a small-generator of hazardous waste (RCRA-SQG), filed in September 1996, with no noted evaluations or violations. The facility is listed as possessing one 1,000-gallon diesel UST installed in 1972, as discussed above for Horizon Center. Pacific Bell is also listed as a FINDS and ECHO site in association with the RCRA listing. No violations or enforcement actions were identified on the EPA websites Envirofacts and ECHO.

	Gordon Otto, with an address of 43 East Santa Clara Street, is listed in the EDR HIST CLEANER database as a former hat cleaner and blocker in 1930. Economy Cleaners & Launders (also known as David Rosenthal Inc.), with an address of 49 East Santa Clara Street, is listed in the EDR HIST CLEANER database as a dry cleaner from 1966 to 1975. This dry cleaner may be related to the SLIC case discussed above. No releases are associated with the facility names and regulated wastes discussed above. Based on this, these other listings are not expected to represent a significant environmental concern.

Facility Name	BSRECP II SJ Towers LLC, SV Towers Investments C/O Harvest Properties, Stantec Consulting Services, Towers@2nd
Address	75 North Second Street, San Jose, CA
Distance & Direction	Adjoining to the northeast across North Second Street
Hydrologic Position	Cross-gradient
Databases Listed	HAZMAT, CERS, CUPA LISTINGS, EMI, RCRA-NONGEN/NLR (x4)
Comments	BSRECP II SJ Towers LLC is listed as a chemical storage facility subject to a Hazardous Materials Business Plan (HMBP) for 1-3 chemicals under SCCDEH oversight. The facility appears to operate an emergency generator with a 500-gallon diesel AST. HMBP-related violations were issued by the SCCDEH during a compliance site inspection in February 2020. No violations were issued during a compliance site inspection performed by the SCCDEH in November 2016. SV Towers Investments C/O Harvest Properties is listed as discharging organic gases to the atmosphere between 2015 and 2018. Towers@2nd is listed as a HAZMAT listing; however, no detailed information is available. Harvest Properties, Towers@2nd, and Stantec Consulting Services filed as non-generators of hazardous waste (RCRA-NONGEN/NLR between July 2018 and June 2021 with no noted evaluations or violations. No releases are associated with the facility names and regulated wastes discussed above. Based on the non-release nature of the listings, the nature of occupancy and the inferred direction of groundwater flow, the review of regulatory files for this adjoining site was not deemed necessary and this listing is not expected to represent a significant environmental concern.

Facility Name	Private Residence
Address	No address specified
Distance & Direction	Approximately 635 feet to southeast
Hydrologic Position	Up-gradient
Databases Listed	LUST

Comments	According to the regulatory database, a release of waste/motor/hydraulic/ lubricating oil occurred in August 2002 which impacted soil only. The LUST case was granted closure by the SCCDEH in a letter dated June 13, 2005. Based on the closed regulatory status of the LUST case, the lack of reported impact to groundwater, and distance from the subject property, it is not expected to represent a significant environmental concern.

Facility Name	Century Center
Address	62 South Second Street, San Jose, CA
Distance & Direction	Approximately 684 feet to southeast
Hydrologic Position	Up-gradient
Databases Listed	LUST
Comments	According to the July 2002 Case Closure Summary, a release of petroleum hydrocarbons occurred following the removal of four fuel oil, gasoline, and unknown content USTs in October 2000. While no groundwater monitoring wells were installed on-site, the groundwater flow direction was deemed to be toward the west. Remedial activities included the removal and disposal of impacted soil during overexcavation activities. The LUST case was granted closure by the SCVWD in a letter dated November 1, 2002. At the time of closure, the following maximum residual concentrations of contaminants were reported: 9,100 parts per billion (ppb) gasoline, 4,300 ppb diesel, 64 ppb benzene, 1,700 ppb xylenes, and 270 ppb ethylbenzene. Based on the closed regulatory status of the LUST case, reported maximum residual groundwater contamination at the time of closure, and distance from the subject property, it is not expected to represent a significant environmental concern.

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Potential vapor migration concerns for the subject property are discussed in Section 5.1.

During the course of this assessment, AEI identified the following off-site source as potential vapor migration concerns which could potentially impact the subject property:

- 35 and 43 East Santa Clara Street

The potential vapor migration concern is discussed in Section 5.1.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner/Owner Representative	Wendy B Warren	N/A	N/A	2013	Not interviewed; refer to Section 1.5
Key Site Manager/ Buyer	Ms. Loida Kirkley, CEO, Roygbiv Real Estate Development LLC	August 2, 2021	In Person	2019	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	Unknown	No
Do you have any knowledge of previous environmental investigations conducted on site?	Unknown	Yes; Ms. Kirkley was aware of the environmental concerns discussed in Section 5.1 and provided the documents further discussion in Section 6.3
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	Unknown	No
Are you aware of any known plans for site redevelopment or change in site use?	Unknown	Yes; the existing structure's interior will be demolished to allow the construction of a mixed-use project (25 stories above ground and one basement level) including 37,240 square feet of commercial space and 210 units of senior housing with no proposed parking.
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	Unknown	No

Question	Owner (Representative) Response/ Comment	Key Site Manager Response/Comment
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	Unknown	No
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	Unknown	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	Unknown	No
Additional information provided:	N/A	None

6.1.2 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User Questionnaire was completed by Ms. Loida Kirkley, CEO/Roygbiv Real Estate Development LLC/Developer/Owner. The following table represents information contained therein.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)	No

Question	Response/ Comment
Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	No
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes; No
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	No
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	No

6.3 PREVIOUS REPORTS AND OTHER PROVIDED DOCUMENTATION

Documentation was provided to AEI by Roygbiv Real Estate Development LLC during this assessment. A summary of this information follows:

Status of Property with Respect to Vapor Intrusion (15-25 North Second Street, San Jose, CA), prepared by the SF Bay SWRCB (March 27, 2015)

The letter explained the status of the subject property in March 2015 with respect to tetrachloroethene (PCE) in soil vapor and indoor air due to groundwater pollution in the vicinity, specifically the southeastern adjoining property, 35 and 43 East Santa Clara site. The subject property owner had informed the agency that she was planning to sell the subject property.

The SF Bay SWRCB indicated that the presence of PCE in indoor air in the building at subject property is indicative of a vapor intrusion pathway from upgradient, contaminated groundwater and soil vapor into the overlying building. If mitigation measures are needed to prevent potential human health effects from vapor intrusion at a property due to a pollutant release from an off-site source, the Regional Water Board would require the responsible party for the pollutant release to perform the necessary mitigation.

Based on information currently available to Regional Water Board staff, they concluded that PCE pollution beneath the subject property, including PCE in soil vapor and indoor air, is likely the result of the migration of pollutants in groundwater and soil vapor from the adjoining release site. In general, the Regional Water Board does not pursue enforcement action against a property owner whose land overlies contaminated groundwater if that contamination is solely the result of the migration of groundwater contaminants from an off-site source or sources. Accordingly, the Regional Water Board will not name current and future owners of the subject property as dischargers with respect to groundwater pollution from upgradient sources. However, the Regional Water Board may hold such a property owner responsible for investigation or cleanup tasks if he or she refuses to provide reasonable access to an upgradient discharger attempting to investigate and cleanup off site groundwater pollution. Additionally, if the responsible party was unable to perform the mitigation measures, the Regional Water Board may require that the offsite property owner perform the mitigation measures and the Regional Water Board may inform the County Health Department of any health risks due to vapor intrusion.

Notification of Indoor Air Sampling Results (15-25 North Second Street, San Jose, CA), prepared by Terraphase Engineering Inc. (February 20, 2019)

On November 20, 2018 and January 28, 2019, Terraphase Engineering Inc. (Terraphase) collected indoor air samples from four locations on the 1st floor of the tenant spaces located on the subject property. The sampling was conducted as part of an on-going environmental investigation of the property located at 35 and 43 East Santa Clara Avenue in San Jose, California ("the Bassler-Haynes building"). In addition to the recent Terraphase sampling, on September 29, 2014 and September 30, 2014, All West Environmental Inc. collected indoor air samples from two locations on the 1st floor of the tenant spaces in the 15-25 North Second Street building and two non-tenant locations (basement and crawl space), as well as one outdoor ambient air sample. Terraphase indicated that the analyses of these samples indicated the presence of tetrachloroethene (PCE) in indoor air at concentrations ranging from 0.31 – 5.22 micrograms per cubic meter (ug/m3). While the presence of PCE could be related in some part to indoor sources, its presence is suspected to be mostly due to the volatilization of PCE in groundwater under the building and the subsequent migration into indoor air through the subject property building's slab. The presence of PCE in groundwater under the building is believed to be the result of historical impacts from former dry-cleaning activities in the adjoining Bassler-Haynes building.

Terraphase indicated that the indoor concentrations of PCE were below the RWQCB's conservative generic indoor air screening level for commercial/industrial workers of 2.1 micrograms per cubic meter (ug/m3), except for samples collected from 25 North Second Street. This generic screening level represents a concentration at or below which PCE in indoor air can be assumed to pose no potentially significant threat to human health, including for individuals who would be considered sensitive receptors. This screening level is used to help support cleanup decisions under California EPA's and the RWQCB's site cleanup programs; however, they do not represent limits of safety for inhalation exposure. Limits such as the American Conference of Governmental Industrial Hygienists (ACGIH)'s Threshold Limit Values (TLVs), are more consistent with levels that would be considered limits of safety for workers. The ACGIH TLV for PCE is 170,000 ug/m3. The concentrations of PCE observed in indoor air are well below this occupational exposure level.

As noted above by Terraphase, the generic commercial/industrial screening level for PCE (2.1 ug/m3), as calculated by the RWQCB, corresponds to an assuredly protective concentration to which a worker could be exposed for continuously over their entire working life (i.e., 8-hours/ day, 250-days/year, over a 25-year period). However, Terraphase understood that the business currently occupying 25 North Second Street has not occupied the space for 25-years, but rather has been present for approximately 10 years. Assuming a 10-year exposure period, and worker exposure to the maximum concentration of PCE observed, a conservative estimate of the potential increased lifetime cancer risk workers, as a result of being exposed to PCE in indoor air, is 1 in 100,000 (+0.001%). For context, this estimated increased risk is within the risk range (i.e., 1 to 1,000,000 to 1 in 10,000) that the United States Environmental Protection Agency (EPA) believes is representative of generally acceptable levels for exposure to chemical contaminants. For additional context, according to the American Cancer Society, men and women in the United States have a risk of incurring cancer in their lifetime of 1 in 3 (33%). With regards to other health effects besides cancer, the concentrations of PCE in indoor air in 25 North Second Street are also not at levels that would not be expected to pose an increased risk to the tenants' employees.

As next steps, in order to further evaluate the 15-25 North Second Street building, the SF Bay SWRCB requested that indoor air samples be collected from the previously unsampled tenant spaces on the 1st floor (17 North Second Street – Chromatic Coffee; 19 North Second Street, Suite 101 – Chromatic Coffee Storage Space; 21 North Second Street – Angelou's Grill) as well as two upstairs locations. Terraphase requested access to perform this sampling on a mutually agreeable date during the week of February 25, 2019. Based on the results of previous investigations conducted at the Bassler-Haynes building, the owner and Terraphase had submitted a Remedial Action Workplan (RAP) to the RWQCB on January 7, 2019 that proposed cleanup at the Site using in-situ groundwater treatment (ISGT) and soil-vapor extraction (SVE). ISGT involves injection of reagents or chemical oxidants into groundwater or the use of thermal probes in order to accelerate the degradation of VOCs. SVE uses vacuum blowers and extraction wells to remove and treat VOCs in soil. The remedy also includes monitored natural attenuation (MNA), which uses long-term groundwater monitoring to track the progress of naturally occurring biological, chemical, and physical processes that reduce concentrations of contaminants in groundwater. Upon approval, remedial activities would commence.

Copies of provided documents are included in the appendices.

Note: As the above documentation was not prepared by AEI, the information obtained was not verified for accuracy and a critique of the information contained therein is beyond the scope of this assessment.

6.4 ENVIRONMENTAL LIEN SEARCH

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	August 2, 2021
AEI Site Assessor(s)	Adrian Angel
Property Escort(s)/ Relationship(s) to Property	Ms. Loida Kirkley, CEO, Roygbiv Real Estate Development LLC/Buyer.
Units/Areas Observed	Limited access was provided by the key site contact. AEI was able to inspect the following areas only: • Ground floor hallway of 19 North Second Street, as well as the bakery with no given facility name and Kiwibot; and • Second floor offices (19 North 2nd Street, Suites 201-207). AEI was not provided access to the following areas: • Interior areas of 15 (vacant), 17 (Gente Cafe), 21 (Angelou's Mexican Grill), and 25 (Cheap Squad) North 2nd Street. According to the key site contact, the subject property building is not equipped with a basement.
Area(s) not accessed and reason(s)	Areas not discussed above. Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	Volume of materials. Refer to Section 1.5 for discussion of limiting condition(s).

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use		
Unidentified Substance Containers		
Electrical or Mechanical Equipment Likely to Contain Fluids		
Interior Stains or Corrosion		
Strong, Pungent, or Noxious Odors		
Pools of Liquid		
Drains, Sumps, and Clarifiers	✔	✔
Pits, Ponds, and Lagoons		
Stained Soil or Pavement		
Stressed Vegetation		

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Solid Waste Disposal or Evidence of Fill Materials		
Waste Water Discharges		
Wells		
Septic Systems		
Biomedical Wastes		
Other	✔	

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.1.1 DRAINS, SUMPS, AND CLARIFIERS

Various floor drains were noted within the kitchen area of Kiwibot (no unit designation given). The drains appear to be related to a prior restaurant. No storage of hazardous substances or petroleum products appeared present near the drains. Based on these observations, the presence of the drains is not expected to represent a significant environmental concern.

7.1.2 OTHER

Small quantities of cleaning and building maintenance supplies were observed on the ground floor of the subject property building. All chemicals were packaged in consumer quantities. Based on the small quantities observed and reported by the key site contact in unobserved areas, the presence of cleaning supplies at the subject property is not expected to represent a significant environmental concern.

7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 DRAINS, SUMPS, AND CLARIFIERS

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property building, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to the key site contact, demolition of the subject property building is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 LEAD-BASED PAINT

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI presumes that the planned demolition activities will be performed in accordance with applicable regulations. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

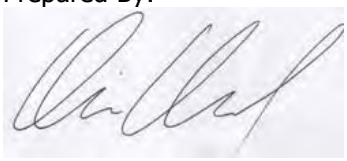
8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth.

Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

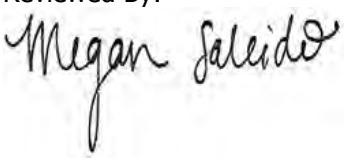
This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.



AEI observed interior areas of the subject property building to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.



We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status

indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 11 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent NPL

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1 mile of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to,

identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 10 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 22 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there is 1 CA UST site within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

CA VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the CA VCP list, as provided by EDR, and dated 04/23/2021 has revealed that there is 1 CA VCP site within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 5 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 48 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 49 CA CUPA Listings sites within approximately 0.25 miles of the target property.

CA HWT: A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

A review of the CA HWT list, as provided by EDR, and dated 04/05/2021 has revealed that there is 1 CA HWT site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
GARDEN CITY GAS WORK	W. ST JOHN AND MONTG	WSW 1/2 - 1 (0.685 mi.)	295	917
Lower Elevation	**Address**	**Direction / Distance**	**Map ID**	**Page**
SAN JOSE GAS WORKS	E. SAN FERNANDO AND	ESE 1/8 - 1/4 (0.220 mi.)	V176	511

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 11 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

BASSLER-HAYNES BUILDING (Continued) **S125952647**

Facility Status:	**Open - Site Assessment**
Status Date:	03/08/2001
Global Id:	SLT2O287178
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.3367598346785
Longitude:	-121.889898777008
Case Type:	Cleanup Program Site
Case Worker:	MD
Local Agency:	Not reported
RB Case Number:	43S0564
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	* Chlorinated Solvents - PCE
Site History:	This site is an historical building in downtown San Jose. It was formerly a hotel that had a dry cleaning facility in the basement. There has been a release of tetrachloroethene (PCE), a solvent used in dry cleaning, to soil and groundwater. Soil and groundwater investigation is underway and a remedial action plan is required.

Address:	75 E SANTA CLARA ST
City,State,Zip:	SAN JOSE, CA 95113
Site ID:	43906
CERS ID:	10355494
CERS Description:	Chemical Storage Facilities

Violations:

Site ID:	43906
Site Name:	BSREP II SJ TOWERS, LLC
Violation Date:	02-25-2020
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes:	Returned to compliance on 03/04/2020. The most current copy of the emergency response/contingency plan found on CERS as of 08/16/2019 needs to be completely filled out including section H. Earthquake Vulnerability. This section needs to include the aboveground tank at this location. Within 30 days update this information via CERS/or Front Counter.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

BSREP II SJ TOWERS, LLC (Continued) **S120713439**

Site ID:	43906
Site Name:	BSREP II SJ TOWERS, LLC
Violation Date:	02-25-2020
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes:	Returned to compliance on 03/04/2020. The current Business Owner/Operator page needs to be updated to reflect the correct owner name; BSREP II SJ TOWERS, LLC from SV Towers Investors LLC. Additionally, the e-mail information for the Environmental Contact needs to be updated to reflect the change in e-mail address.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	02-25-2020
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Notes; 1) The most recent HMBP was submitted on 08/16/2019 via Front Counter/or CERS. The hazardous materials inventory/waste is current. 2) According to Mr. Klipfel a fire drill and annual training on emergency response is provided to all employees in this building including floor wardens. However, a list of employees trained was not available for review during this inspection. Provide a copy of the trained employees to our office. 3) A fire extinguisher was not available at the location of the aboveground tank outside on the court. It is recommended that a fire extinguisher is placed in this location. 4) A copy of this report was e-mailed to; Amancio Felix-afelix@harvestproperties.com and Todd Klipfel-tklipfel@harvestproperties.com
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-30-2016
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous materials business plan inspection. Facility's last HMBP submittal was 3/11/16 via FrontCounter and was accepted. Facility has 1 reportable chemical: 500 gallons diesel fuel Facility is correctly permitted at BP01 Documented annual employee training was reviewed on site.

BT AMERICAS (Continued) **S102414987**

Address: 4 N 2ND ST
City,State,Zip: SAN JOSE, CA 95113
Site ID: 43905
CERS ID: 10352554
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 43905
Site Name: BSREP II SJ TOWERS, LLC
Violation Date: 02-25-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Returned to compliance on 03/04/2020. The most current copy of the emergency response/contingency plan found on CERS as of 11/21/2019 needs to be completely filled out including section H. Earthquake Vulnerability. This section needs to include the aboveground tank at this facility. Within 30 days update this information via CERS/or Front Counter.
Violation Division: Santa Clara County Environmental Health

Violation Source: CERS

Site ID: 43905
Site Name: BSREP II SJ TOWERS, LLC
Violation Date: 02-25-2020
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 03/04/2020. The current Business Owner/Operator page needs to be updated to reflect the correct owner name; BSREP II SJ TOWERS, LLC from SV Towers Investors LLC. Additionally, the e-mail information for the Environmental Contact needs to be updated to reflect the change in e-mail address.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-25-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Notes; 1) The most recent HMBP was submitted on 11/21/2019 via Front Counter/or CERS. The hazardous materials inventory/waste is current. 2) According to Mr. Klipfel a fire drill and annual training on emergency response is provided to all employees in this building including floor wardens. However, a list of employees trained was not available for review during this inspection. Provide a copy of the trained employees to our office. 3) A copy of this report was e-mailed to; Amancio Felix-afelix@harvestproperties.com and Todd Klipfel-tklipfel@harvestproperties.com

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource

WALGREENS #5219 (Continued) **1004676053**

Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CHEVRON #9-4259 (Continued) **U001602681**

Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: 12/83, a leak in the gasoline product line was discovered near the southwestern edge of the fuel dispenser island and a corroded section of pipe was replaced to stop the leak. 1/84, 6 groundwater monitoring wells were installed and commenced weekly monitoring for free product (FP). 2/84, one inch of FP measured in well MW-5 and also present in monitoring wells located near the USTs. 6/84, a pinhole sized leak was detected and repaired in the dispenser filter located at the southeastern edge of the fuel dispenser island. 2 additional monitoring wells were installed 10/84. 11/84 a hole was discovered near the northwest corner of a UST containing regular gasoline. The gasoline was pumped out of the UST, and the UST was removed from service until it was replaced in 1985. 5/85, USTs and piping were replaced. Product conveyance piping was also replaced with cathodic-protected conveyance piping. 11/89, advanced 6 soil borings, installed 2 wells, and determining the hydraulic conductivity and transmissivity after performing slug tests. Three areas containing soil and/or groundwater contamination were identified in the investigation: UST complex; waste oil UST and steam-cleaning area; and dispsenser islands in the southeast portion of the Site. 3/90, wells MW-6 and MW-8 located near the waste oil UST and steam-cleaning area were destroyed. Both wells had contained measurable amounts of FP and it was suspected that oily residue from the steam cleaning process was collecting in them and providing an additional source of groundwater contamination. Well MW-11 was installed as a replacement. Jan-Aug 1990, 5 soil borings advanced onsite; 19 borings and 1 monitoring well were advanced off-site. 4 extraction wells were also installed onsite along the northern border of the property. 4/90, conducted hydraulic testing and a soil vapor extraction (SVE) pilot study. The results of the SVE pilot study indicated that a full-scale SVE system could be used to remediate hydrocarbons in the unsaturated soils beneath the Site. 12/91, 4 off-site monitoring wells were installed. Groundwater extraction and treatment (GWET) system operated 2/92-6/96 and removed approximately 1,765,354 gal. of water and removed approximately 17 pounds of petroleum hydrocarbons. 5/00, 11 soil borings and 2 piezometers were advanced. 2002, a risk-based corrective action (RBCA) assessment was conducted to determine if the petroleum hydrocarbons in the soil and groundwater on and off-site presented a risk to human health. The RBCA indicated that all soil concentrations were below risk-based screening levels (RBSLs) assigned by the Regional Water Quality Control Board for the specified receptors (commercial workers, construction workers on and residents). Residents were included as on-site receptors based on the proximity of the Site to the senior apartment complex and the potential for the dissolved hydrocarbon plume to migrate beneath the building. The only exposure pathway of concern identified in the RBCA assessment was inhalation of benzene vapors in indoor air. The theoretical excess cancer risks and hazard quotients (for non carcinogens) were less than the respective Cal-EPA limits of one in a million. 1/04 a 2-phase extraction and treatment (TPET) system began operating and ran through 11/06. 9/08, 9 soil borings were advanced to collect confirmation soil samples.

Site ID: 31389
Site Name: FOURTH & SANTA CLARA CHEVRON
Violation Date: 07-22-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when

CHEVRON #9-4259 (Continued) **U001602681**

the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: The technician found about 4 inches of used oil inside the overfill prevention riser during this inspection. There were no alarms to demonstrate that the used oil tank had overfill. At this time the used oil tank is not equipped with an approved/functional overfill prevention equipment. Within 30 days conduct the required testing for the overfill prevention for this tank and provide to our office in writing how this issue will be resolved.

Violation Program:	UST
Violation Source:	CERS
Site ID:	31389
Site Name:	FOURTH & SANTA CLARA CHEVRON
Violation Date:	07-22-2019
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	The following spill container failures were observed during this inspection as follows; - Diesel spill bucket failed to hold 5-gallons of liquid when it was hydrostatically tested for 60 minutes by the technician. - 91 spill bucket failed to hold 5-gallons of liquid when it was hydrostatically tested for 60 minutes by the techncian. - 87 spill bucket failed to hold 5-gallons of liquid when it was hydrostatically tested for 60 minutes by the technician. All spill buckets above were measured by using a calibrated canister by the technician. All spill containment must have a minimum 5 gallon capacity in size. Replacement of the spill buckets will require a permit from our Department. Within 30 days notify our office in writing how this issue will be resolved.

Violation Date:	07-08-2020
Citation:	23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description:	Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes:	THE USED OIL ANNULAR WAS CONVERTED FROM A DRY TO A WET SPACE JULY 2019. THE SENSOR WAS IN ALARM SINCE SEPTEMBER OF 2019. THE ALARM WENT UNATTENDED UNTIL THE TANK ANNUAL WAS OPENED JULY 7, 2020. THE TECHNICIAN SAW A DROP IN THE BRINE CAUSING THE ALARM. ***INVESTIGATE THE REASON FOR THE DROP IN BRINE AND ALL FUTURE ALARMS ARE TO BE INVESTIGATED.

Violation Date:	06-30-2020
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 07/30/2020. THE FOLLOWING MONTHLY DESIGNATED OPERATOR INSPECTION DISCREPANCIES WERE NOTED: 1. MONTHLY INSPECTIONS ARE NOT BEING CONDUCTED AT LEAST EVERY 30 DAYS FOR EXAMPLE 8/20/19 TO 9/23/2019. 2. FUEL ALARM DATED 11/20/2019 NOTED IN SECTION III WAS NOT ACKNOWLEDGED IN SECTION V.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: During this inspection and based on records review, there were no testing records to indicate that the overfill prevention equipment has been inspected as required by 10/13/18 and every 36 moths thereafter. Within 30 days conduct the required inspection of the overfill prevention devices for all UST's at this location. Additionally, provide a copy of the testing report to our office.

Eval Notes:	On-site to witness triennial secondary containment testing performed by Aneil Chand with Pinnacle Fuel Compliance Services, Inc. Mr. Chand has all required certifications to perform testing (eg. tank tester, Caldwell). The following components were tested: Annular Spaces (87,91, Diesel) - tested at 10 inches hg of vacuum for 1 hour. PASS. Sumps (87,91, Diesel) - hydrostatically tested for 30 minutes using Caldwell. PASS. Piping (87, 91, Diesel) - pressure tested at 5 psi for 1 hour. PASS. UDCs (1/2, 3/4) - hydrostatically tested for 30 minutes using Caldwell. PASS. Components yet to be tested today: Annular space (used oil) - To be tested at 10 inches hg of vacuum for 1 hour. UDC (5/6, 7/8) - To be tested hydrostatically for 30 minutes using caldwell.

	11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 08/10/2020. Observed 1 x 1 quart container of oil in the trash can that still contained free-flowing liquid. Containers must be emptied of all pourable materials before disposal in the trash.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of

ANT SMOG CHECK (Continued) **S126138697**

hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 08/10/2020. Facility employees stated that used oil is picked up once year. Facility may hold used oil in a container or tank for up to 180 days. Schedule a disposal of this waste and forward a copy of the receipt to HMCD (or forward a receipt to show that used oil has not accumulated for greater than 180 days).

Citation: 22 CCR 16 66266.130 - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.130
Violation Description: Failure to properly handle, manage, label, and recycle used oil and fuel filters.
Violation Notes: THE 55 GALLON DRUM USED TO COLLECT USED OIL FILTERS WAS FOUND WITH APPROXIMATELY 2 INCHES OF WASTE OIL IN THE BOTTOM OF A 1/6TH FILLED DRUM. THIS SHOWS THAT OIL FILTERS ARE NOT BEING PROPERLY DRAINED. RE-DRAIN ALL FILTERS IN A SECURE SYSTEM THAT WILL NOT INCREASE THE RISK OF SPILL OR DISCHARGE. UNLESS THIS DRUM AND THE CURRENT CONTENTS IS TO BE MANAGED AS HAZARDOUS WASTE, THIS DRUM SHALL HAVE ALL OF FILTERS REMOVED AND DRAINED COMPLETELY, IN A SECURE SYSTEM THAT WILL NOT INCREASE THE RISK OF SPILL OR DISCHARGE. THEN REMOVE THE POUR-ABLE WASTE OIL AND MANAGED AS HAZARDOUS WASTE. THE PAPER FILTERS SHALL BE SEPARATED FROM THE METAL FILTERS AND DISPOSED OF AS SOLID HAZARDOUS WASTE. BRAKE PARTS SHALL BE SEPARATED FROM THE METAL FILTERS AND RECYCLED OR DISPOSED OF PROPERLY.

Violation Date:	07-11-2018
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Returned to compliance on 08/10/2020. Observed 1 x 55 gallon drum of oil filters containing the following: paper and metal-cased used oil filters, free-flowing liquid used oil, and oily rags. REMOVE FREE LIQUID, PAPER FILTERS, AND RAGS. PLACE RAGS AND PAPER FILTERS IN A CLOSED AND LABELED HAZARDOUS WASTE CONTAINER. Observed paper and metal filters in the "drained used oil and fuel filters" container. Per section 66266.130, only metal-cased filters are exempt from regulation as a hazardous waste under the scrap metal provision found in federal law. All paper filters must be disposed as hazardous waste and may be sent off with other oil contaminated solids (absorbents and saturated rags).

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-11-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site with Michelle Santos of HMCD. A walk-through of the facility was conducted with Owner, Valentin Vasquez. The following hazardous material was observed at HMBP State-reportable threshold: - 1 x 200 gal used oil underground tank The following was also observed below HMBP State-reportable thresholds: Outdoor Storage Shed - 2 x 55 gal drums of used oil filters - 2 x 55 gal drums, empty, belonging to the gas station Shop: - 1 x 280 cubic ft cylinder Ar/ CO2 - 1 x approx. 336 cubic ft cylinder N2 - <55 gal per type of new oil in quarts

Violation Source:	CERS
Site ID:	375321
Site Name:	ANT SMOG CHECK
Violation Date:	07-11-2018
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 08/10/2020. Observed 1 x 1 quart container of oil in the trash can that still contained free-flowing liquid. Containers must be emptied of all pourable materials before disposal in the trash.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 08/10/2020. Facility employees stated that used oil is picked up once year. Facility may hold used oil in a container or tank for up to 180 days. Schedule a disposal of this waste and forward a copy of the receipt to HMCD (or forward a receipt to show that used oil has not accumulated for greater than 180 days).

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Source:	CERS
Site ID:	439228
Site Name:	7-Eleven Inc. Store #38411
Violation Date:	10-31-2019
Citation:	HSC 6.95 25505(c) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(c)
Violation Description:	Failure to have a business plan readily available to personnel of the business or the unified program facility with responsibilities for emergency response or training.
Violation Notes:	Facility's most recent HMBP was not available for review. Obtain a printed copy to keep on-site or request access to CERS ID: 10765615.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	439228
Site Name:	7-Eleven Inc. Store #38411
Violation Date:	10-31-2019
Citation:	HSC 6.95 25505.1 - California Health and Safety Code, Chapter 6.95, Section(s) 25505.1
Violation Description:	Failure to provide a copy of the business plan to the owner or the owner's agent within five working days after receiving a request for a copy from the owner or the owner's agent.
Violation Notes:	Facility was unable to provide documentation that their property owner has been notified in writing, that the facility is subject to and in compliance with Hazardous Materials Business Plan (HMBP) requirements. Template form provided.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-31-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site to perform a routine Hazardous Materials Business Plan (HMBP) inspection. Facility handles liquid carbon dioxide above HMBP State-reportable thresholds for their soda machines. Consent to conduct a walk-through of the facility was granted by the cashier, but he declined to provide his name and signature. Confirmed the following: - 1 liquid carbon dioxide dewar (approx. 35 gal). A complete HMBP was submitted on 4/23/2019 via the California Environmental Reporting System (CERS), CERS ID:10765615. This was ACCEPTED.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Case Worker:	AVC
Local Agency:	SAN JOSE, CITY OF
RB Case Number:	43S1110
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Waste Oil / Motor / Hydraulic / Lubricating, * Metals
Site History:	The "Block 2 - City of San Jose Parking Lot Site" is located at 8 East San Fernando Street, between South First Street and South Second Street, in downtown San Jose. This 1-acre parcel has been used as a paved parking lot since at least 1980. Prior to 1980, the Site was occupied by several small stores and the OB Hale and Company Department Store. Prior to 1900, the Site operation included a paint shop. Block 3, an adjacent lot, has similar land use histories and has detected VOCs and TPHs in soil and groundwater. A former coal gasification plant was formerly located about 300 feet away. The Redevelopment Agency of the City of San Jose (the Agency) is currently planning to construct a new mixed-use building complex and underground parking structure. Specifically, the planned development includes excavation of the entire site to a depth of about 40 feet below the current surface to accommodate a three-level, underground parking structure. The space above the parking structure at ground level is planned for commercial use. The space above the commercial area is planned for hotel and residential use. To date, three rounds of site investigation have been conducted to study Site soil, groundwater, and soil gas. Investigation results were used in a Human Health Risk Evaluation and compared to screening levels such as CHHSL, ESLs and PRGs for the proposed exposure scenarios. Overall, the Site data compare favorably to these screening levels. Exceedances of those screening levels were found in only one soil

BLOCK 2 CITY OF SAN JOSE PARKING LOT (Continued) **S108937591**

sample for mercury (21 mg/kg vs. 18 mg/kg) and in soil gas samples for 1,3-butadiene (16.0 vs. 4.85 ug/cubic meter). However, the targeted exposure pathway may not even be complete when considering the proposed land use scenario (i.e., with the underground parking) and construction method.

Lead Agency:	SANTA CLARA COUNTY LOP
Lead Agency Case Number:	2017-15s
Latitude:	37.33833
Longitude:	-121.88725
Case Type:	Cleanup Program Site
Case Worker:	GOR
Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Lead, Diesel, Gasoline, Total Petroleum Hydrocarbons (TPH)
Site History:	Site is planned for development of two 28 story towers with 3 levels of below grade parking. Residual contamination from past site use has been reported at the site. Select areas of the site with elevated levels of lead will be excavated down to 3 feet and disposed of off-site. The remaining soils will then be excavated to approximately 40 feet and disposed of off-site. Please refer to the Soil and Groundwater Management Plan to review details of the reported contamination as well as the mitigation measures proposed to protect human health and the environment.

Violation Date: 06-08-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: DURING THE REVIEW OF THE HAZARDOUS MATERIALS BUSINESS PLAN IT WAS OBSERVED THE CHEMICAL INVENTORY STATEMENT WAS MISSING DETAILED LOCATIONS OF WHERE THE CHEMICALS WERE STORED (SUCH AS FLOOR OR ROOM NUMBERS). THE LOCATION ONLY REFERENCED BUILDING WHICH MADE IT ALMOST IMPOSSIBLE FOR REFERENCE THE CHEMICAL LOCATION WITH THE INVENTORY AS THE FACILITY WAS A 15 STORY HIGH RISE BUILDING. UPDATE THE CHEMICAL INVENTORY LOCATION STATEMENT TO REFERENCE FLOOR AND ROOM NUMBER. SUBMIT THIS UPDATE ELECTRONICALLY USING THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM WITHIN 30 DAYS. THE CHEMICAL INVENTORY STATEMENT HAS THE BATTERIES LISTED IN THE UNINTERRUPTED POWER SUPPLY ROOMS IN POUNDS NOT GALLONS OF ELECTROLYTE (SULFURIC ACID). SEE CERS GUIDANCE DOCUMENT ON ELECTROLYTE BATTERY REPORTING REQUIREMENTS. SUBMIT ALL BATTERIES LOCATED IN THE CORRECT UNIT OF MEASUREMENT (GALLONS OF ELECTROLYTES NOT POUNDS OF BATTERIES) ELECTRONICALLY USING THE CALIFORNIA

Name:	HEART OF THE CITY - BLOCK 3
Address:	100 SOUTH SECOND STREET
City,State,Zip:	SAN JOSE, CA
Region:	STATE
Facility Status:	**Open - Inactive**
Status Date:	09/15/2015
Global Id:	SL0608548367
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.33481
Longitude:	-121.888049
Case Type:	Cleanup Program Site
Case Worker:	UUU
Local Agency:	Not reported
RB Case Number:	43S1109
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	* Petroleum - Automotive gasolines, * Solvents, Stoddard solvent / Mineral Spriits / Distillates
Site History:	Development of site is in two phases. Phase I is complete. About one half of the site is included in Phase 1. Phase 1 was excavated to 30-40 feet and dewatered during construction. Contaminated soil and groundwater were handled in accordance with an approved RAP. An nfa letter was issued for the Phase 1 portion of the site. Phase 2 is currently a parking lot. A RAP was being developed for Phase 2 prior to the elimination of the redevelopment agency. Currently the site R.P. for the Phase 2 portion of the site is the Sucessor Agency to the San Jose Redevelopment Agency.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: The site map currently available on CERS needs to be updated to include the location of the generator and emergency equipment.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 22768
Site Name: CITY OF SAN JOSE - 4TH/SAN FERNANDO PARKING GARAGE
Violation Date: 05-01-2018
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Operations/Maintenance - General
Violation Notes: The fire extinguisher located at the generator site was last serviced on 2016. All fire extinguishers must be serviced at a minimum annually. Replace fire extinguisher with one that has been serviced. In the future, make sure that all fire extinguishers located at the generator are serviced annually by a third party company.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 22768
Site Name: CITY OF SAN JOSE - 4TH/SAN FERNANDO PARKING GARAGE
Violation Date: 05-01-2018
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description: Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training

CITY OF SAN JOSE - 4TH/SAN FERNANDO PARKING GARAGE (Continued) **S106916623**

records for a minimum of three years.

Violation Notes: Annual training records for Tony Murphy and Danny Carmada were not available for review during this inspection. Make sure that emergency response and safety procedures training is provided and documented to the employees above. Keep records of these training for all future inspections.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-01-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site with Danny Camara to inspect the emergency generator at this site. Notes: 1) This emergency generator is re-fueled by a City of San Jose employee; Tony Murphy. The refueling truck used is equipped with spill control equipment. 2) The most current copy of the CERS submittal is of; 11/29/17.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-14-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: THERE IS AN EMERGENCY GENERATOR LOCATED ON THE SAN FERNANDO ST.. ENTRANCE TO THE PARKING STRUCTURE. THE EMERGENCY GENERATOR IS FOR THE FIRE SUPPRESSION SYSTEM AT THE PARKING STRUCTURE AS WELL AS BACK UP POWER. THE PARKING STRUCTURE IS OWNED BY THE CITY OF SAN JOSE. THE EMERGENCY GENERATOR IS AN ONAN GENERATOR. THE BELLY TANK OF THE GENERATOR HOLDS 200 GALLONS OF DIESEL. THE EMERGENCY GENERATOR IS SERVICED BY EMPLOYEES OF THE CITY OF SAN JOSE-PUBLIC WORKS DIVISION ON A ROUTINE BASIS. IN CASE OF AN ALARM AT THE GENERATOR THIS GETS RELAYED TO THE CITY OF SAN JOSE COMMUNICATIONS LINE. THEN AN EMPLOYEE WILL BE DISPATCHED TO THE EMERGENCY GENERATOR IN QUESTION. I WAS INFORMED BY MR. JOHNSON THAT ONCE A YEAR THE RUPTURE BASIN AND OVERFILL ALARMS ARE SERVICED TEC-ACCUTITE FOR FUNCTIONALITY. NOTES: DURING THIS INSPECTION REVIEWED THE EMERGENCY GENERATOR LOGS AND FIRE EXTINGUISHER IS CURRENT IT WAS LAST SERVICED ON JULY 2015. IT IS NOW REQUIRED TO KEEP TRAINING RECORDS [Truncated]

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-08-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Notes; 1) The most recent CERS submittal was done on 03/26/19 and the hazardous materials inventory is current. 2) Employee training is being documented on ICE Safety Solutions- Safety Training Program Roster. The last fire drill training conducted was on 07/20/2018 for the entire building. This was reviewed during this inspection. 3) Based on CERS and this inspection the ownership for this site has changed to; 50West San Fernando Owner, LLC C/O CBRE. Our records with our Department will be updated to reflect this change. 4) The property owner is the same entity as above. 5) A copy of the Return to Compliance (RTC) for inspection report on 09/28/2016 was received during this inspection.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 05-08-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Based on my observations during this inspection, this facility is no longer subject to the APSA program as the 950 gal. diesel tank was no longer observed. This tank was closed under City of San Jose Fire Department oversight. Mike Murtiff, Fire Inspector with the City of San Jose oversaw the closure of this tank. The APSA permit will be inactivated with our Department.
Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-28-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous materials business plan inspection. CERS ID: 10353421 Facility has 2 reportable chemicals 1,475 gallons diesel fuel (3 generator sizes: 950 gallons, 275 gallons, 250 gallons) 55 gallons latex paint Facility is correctly permitted at BP01 Documented annual training was reviewed on site

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

ABOVENET COMMUNICATIONS INC (Continued) **1001967550**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to provide the following training to all oil-handling personnel: 1. Operation and maintenance of equipment to prevent discharges. 2. Discharge procedure protocols. 3. Applicable pollution control laws, rules, and regulations. 4. General facility operations. 5. Contents of the SPCC Plan.
Violation Notes: Returned to compliance on 01/21/2021. The oil-handler/facility engineer was trained on operations and maintenance of the fuel tank, but was not familiar with the contents of the SPCC.

NEW SANTA CLARA FAMILY JUSTICE CENTER, JCC 43-B5 (Continued) **S121781117**

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to comply with one or more of the following requirements: 1. Have record of inspections and tests, including integrity tests, signed by the appropriate supervisor or inspector. 2. Keep written procedures and records of inspections and tests, including integrity tests, for at least three years. 3. Keep comparison records.
Violation Notes:	Returned to compliance on 01/21/2021. As per the SPCC Section , monthly and annual inspections are conducted in accordance with STI SP001 Tank Inspection Standards using custom checklist for monthly inspections and the STI SP001 standard annual inspection checklist, both located in Appendix C. However, the facility engineer stated that he was unfamiliar with these checklists. He demonstrated that he conducts an annual and quarterly tank inspection using an on-site generated checklist. He also conducts an abbreviated monthly PMS checklist related to running the generator. This "generator inspection log sheet" is missing SP001-standard items to check such as security measures and secondary containment inspections. Additionally, the on-site generated annual tank inspection PMS does not meet industry standards in that it is missing multiple items, including but not limited to, solenoid valve testing, interstitial leak detection equipment and emergency vent cover testing. Ensure that the monthly and annual [Truncated]

Citation:	HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description:	Failure to include in the SPCC Plan: 1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge 2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.
Violation Notes:	Returned to compliance on 01/21/2021. During the initial inspection preparation process, it was discovered that the primary emergency

NEW SANTA CLARA FAMILY JUSTICE CENTER, JCC 43-B5 (Continued) **S121781117**

contact person (Pella McCormick) is no longer in this capacity. Update all contact information to reflect the current Facility Response Coordinator. Note: There are multiple locations throughout the SPCC that Pella McCormick is mentioned as the primary contact. Facility must ensure that all emergency contact numbers in the SPCC plan are accurate.

Violation Description: Failure to conduct spill prevention briefing for oil-handling personnel at least once a year to assure adequate understanding of the SPCC Plan.
Violation Notes: Returned to compliance on 01/21/2021. The building engineer, Jeff Hancock, stated that he receives regular hazardous materials awareness training, but was unaware of any annual training program related to the Spill Prevention Briefings requirements. PROVIDE THE INSPECTOR DOCUMENTATION INDICATING THAT ALL OIL-HANDLERS HAVE RECEIVED REQUIRED SPILL PREVENTION BRIEFINGS.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-22-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Conducted an Aboveground Petroleum Storage Act (APSA) Inspection walk through with Rob Ward on 3/09/2020. Due to the global pandemic and California-mandated Shelter-In-Place Order, the report has been issued on today's date. The facility has 1000 gallons of regulated diesel fuel storage and is a Tier I Qualified Facility. Facility created an SPCC Full plan that was last certified on 01/18/2018 by a PE. The SPCC Plan was provided by request via email prior to the inspection by Jerry Ripperda. The Annual Facility Tank Statement was last certified by the facility 2/13/2020. CERS ID #10723117. There is 1 TIUGA (tank in an underground area) at this facility. This tank is a Convault TIUGA that uses automated software to monitor the fuel system. The overfill prevention system includes a visual indicator gauge at the fill port with audible and visual alarms. There is also an automatic shut off valve located in the fill line that activates at 90% full. *Note: [Truncated]

CERS ID: 10416403
CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-02-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site with Robin Ward of HMCD to conduct a routine APSA inspection. On facility's 2/28/18 CERS submittal, 20,240 gallons of diesel fuel, 1,100 gallons of hydraulic oil and 350 gallons of motor oil were reported. During inspection it was clarified that the 20,240 gallons of diesel fuel and 350 gallons of motor oil belong to DataPipe, a tenant in the same building. DataPipe has their own CERS ID# and facility information and is correctly permitted for APSA. 150 South First Street maintains control of 4 elevator rooms, each with one oil-containing hydraulic lift tank. Tank capacities are equal to 1,100 gallons, which is below SPCC and APSA thresholds. Facility's APSA permit will be inactivated.
Eval Division: Santa Clara County Environmental Health
Eval Program: APSA
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 05-02-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On site with Robin Ward of HMCD to conduct a follow up hazardous materials business plan inspection. Facility's HMBP submittal on 2/28/18 indicated that 8 reportable chemicals are located at this facility and that they are subject to APSA. Mr. Cabanayan indicated that some of the inventory items submitted on CERS actually belong to DataPipe, which has their own CERS ID# and facility information. Observed the following reportable chemicals on site: 65 gallons of hydraulic oil Facility is incorrectly permitted at BP02. Permit will be revised to reflect 1 reportable chemical, BP01.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-25-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous materials business plan inspection CERS ID: 10416403 Facility's last HMBP submittal was via CERS 4/20/17 No reportable quantities of material were observed on site CERS submittal 4/20/17 included reportable quantities of material that belong to DataPipe located in Suite 100 of 150 South First Street. 150 South First Street does own 1 generator on site, located on the roof and accessed via ladder. A photograph was taken of the tank tag by Ron Cabanayan and it indicated that the generator capacity was 40 gallons. Facility no longer has reportable quantities of material. BP01 permit will be removed from facility.

Eval Notes:	A ABOVEGROUND PETROLEUM STORAGE ACT INSPECTION WAS CONDUCTED WITH MR. HUGO GARAY- DATA CENTER CHIEF ENGINEER WITH DATAPIPE ON SEPTEMBER 14, 2017. A facility walk through was conducted and the two 10,000 gallon diesel fuel tanks were inspected. Both tanks have adequate secondary containment and are electronically monitored by a Veeder Root TLS-350 monitoring system. The last annual monitoring certification was conducted in April 10, 2017. The two 10,000 gallon diesel fuel tanks have overflow prevention monitoring alarms. Two bulk storage aboveground diesel fuel tanks were also inspected on the roof (one 100 gallon and one 228 Gallon diesel tanks). The facility also has three Step-down electrical transformers containing insulating oil for a total storage capacity of 3,777 gallons and three Single -walled elevator steel reservoirs containing hydraulic oil. The facility had a current Spill Prevention, Control and Countermeasures Plan (SPCC) that was dated July [Truncated]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID:	170824
Site Name:	WELLS FARGO BANK BUILDING
Violation Date:	11-22-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	THe last time the annual Hazardous Materials Business Plan (HMBP) was re-certified was on 12/11/2017. The HMBP needs to be re-certified every year. Within 30 days re-certify your HMBP via CERS.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

WELLS FARGO BANK BUILDING (Continued) **S112347139**

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-13-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct a routine hazardous materials business plan inspection. CERS ID:10344901 Facility has 1 reportable chemical on site: 1,000 gallons of diesel Facility is correctly permitted at BP01 Documented annual employee training was reviewed on site
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	11-22-2019
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Notes; 1) A full building evacuation drill took place on 8/13/19- 10:00am - 11:30am and the names of the employees that participated on this drill is recorded on a floor/fire warden form. 2) The last time the AGT overfill alarms and rupture basin sensors were last services was on 05/23/19 by Shields & Harper Co. a copy of the testing report was reviewed during this inspection. 3) Wells Fargo building has Universal Waste recycling program with Waste Management to disposed of all of the Universal Waste generated at this site. Records were reviewed during this inspection for the past 3 years.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Case Number: 07S1E08M03f
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Benzene, Toluene, Trichloroethylene (TCE), Xylene, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History: In 1997 a Phase I Environmental Site Assessment (ESA) was performed and a potential UST was noted near the northern site boundary. In January 1998, a Phase II ESA was performed and discovered the presence of petroleum hydrocarbons and related constituents in soil

SAN JOSE MERCURY NEWS (Continued) **S103473094**

and groundwater beneath the site. In May 1998 two USTs were removed from the site. On May 10, 1998 a UST (Tank 1) with an estimated volume of 8,000 gallons was removed and was suspected to have contained leaded gasoline. On May 19, 1998 a second UST (Tank 2) with an estimated volume of was removed and was suspected to have also contained leaded gasoline. The UST removal included overexcavation of the impacted soils. However, excavation of visibly impacted soils to the north was stopped due to concerns regarding the integrity of Carlysle Street. The maximum level of TPH-g detected below the tank were was 3,300 ppm. At that time 460 tons of soil was removed to Kirby Canyon landfill in Morgan Hill. In September 1999 additional soil sampling was performed. The maximum level of contamination in soil was 280 ppm TPH-g, 2 ppm benzene, 9 ppm toluene, 8.5 ppm ethylbenzene and 38 ppm xylenes. Groundwater contamination was up to 2,400 ppb TPH-g, 11 ppb benzene, 44 ppb toluene, 28 ppb ethylbenzene and 170 ppb xylenes. MTBE was not detected. On December 9, 1999 additional soil was excavated from the area around the former USTs. Approximately 344 tons of soil was removed and disposed of at the Forward Landfill in Manteca on December 17, 1999. Eight soil samples were collected in and around the excavated area. The maximum detected soil concentrations were 14 ppm lead, 19 ppm TPG-g and 0.22 ppm benzene. On December 29, 1999 approximately 93 tons of soil was excavated from the area near the former USTs (between shoring columns 10 and 14) and eventually disposed of at the Forward Landfill in Manteca. Confirmation soil samples detected TPH-g and benzene up to 250 and 1.6 ppm, respectively in sample location E-1-19'). On December 30, 1999 302 tons of soil was excavated and transported to Forward Landfill. Confirmation soil samples collected from sample location E-13 identified an area of concern. Consequently, on December 31, 1999 further excavation was performed between columns 17 and 19 and confirmation samples E-14 through E-16 were collected for chemical analyses. It was determined that the area of concern had been removed. Approximately 302 tons of soil was removed to the Forward Landfill. On February 10, 2000 approximately 20 tons of soil was excavated and disposed at Forward Landfill. Confirmation soil samples taken from the excavation indicated that all constituents were below the affected zone criteria. Prior to March 13, 2000 13 soil samples were collected from the base of the northern portion of the site excavation area. A sample collected between columns 13 and 14 at a depth of 23.5 feet contained 0.83 ppm benzene. Approximately 5 cubic yards (7 tons) of soil was excavated at this location and disposed of off-site. Two additional soil samples collected at this location on January 10, and February 18, 2000. The soils samples were below the affected zone criteria. Groundwater extraction was used to dewater the site to allow for construction activities beginning on October 11, 1999. Extraction rates varied between 5 and 30 gallons per minute (gpm) from the eleven extraction wells. The permit to discharge water was terminated on March 9, 2000. Approximately 7,176,000 gallons of impacted water was discharged to the sanitary sewer during site development activities.

Violations:

Site ID: 29482
Site Name: FAIRMONT HOTEL SAN JOSE
Violation Date: 11-13-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to address in the SPCC Plan the type of oil and storage capacity for each fixed container, and either the type of oil and storage capacity for each mobile or portable container, or an estimate of the potential number of mobile or portable containers, the types of oil, and anticipated storage capacities.
Violation Notes: Plan does not include storage capacities of dry cleaning machine, or hydraulic lift reservoirs that have a shell capacity of 55 gallons or above. Add these to table G2 and G4.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 29482
Site Name: FAIRMONT HOTEL SAN JOSE
Violation Date: 11-13-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to discuss in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards: 1. On a regular schedule. 2. After material repairs are made. 3. By qualified personnel. 4. The frequency and type of testing and inspections based on container size, configuration, and design.
Violation Notes: Plan does not address the following: -frequency of inspections -industry standard used for inspections -facility is not currently documenting inspections using attachment 3.1 as stated in the plan.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA
Violation Source: CERS

Site ID: 29482
Site Name: FAIRMONT HOTEL SAN JOSE
Violation Date: 11-13-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to describe in the SPCC Plan facility security measures including: 1. How access to the oil handling, processing, and storage areas is secured and controlled. 2. How master flow and drain valves are secured. 3. How unauthorized access to starter controls on oil pumps is prevented. 4. How out-of-service and loading/unloading connections of oil pipelines is secured. 5. The appropriateness of security lighting to both prevent acts of vandalism and assist in the discovery of oil discharges.
Violation Notes: Plan does not discuss security lighting and access to outdoor diesel generator or access the remote fill port for 4000 gallon diesel tank.
Violation Division: Santa Clara County Environmental Health
Violation Program: APSA

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: The following items are missing from facility's 11/6/18 CERS submittal: -4,000 gallons diesel fuel -6,000 pounds Sure Soft Cubes Plus -80 gallons DF2000
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

FAIRMONT HOTEL SAN JOSE (Continued) **S103946068**

Site ID: 29482
Site Name: FAIRMONT HOTEL SAN JOSE
Violation Date: 11-13-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: "Failure to test or inspect each aboveground container for integrity based on industry standards as discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each containerG s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas."
Violation Notes: All tanks are subject to integrity testing in accordance with industry standard and current inspections do not appear to meet an industry standard. Begin conducting and documenting these tests. NOTE: Facility may use any applicable industry standard, including Steel Tank Institute SP001. Under STI SP001, all tanks are category 1 tanks and tank integrity testing may be satisfied by completing and AST record, 12 monthly inspections, and 1 annual inspection for each tank. All mentioned forms are available for free download online. Inspections may be conducted by any employee with sufficient knowledge to complete the forms.

Violation Date: 07-15-2015
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: _____ Hazardous waste containers must be inspected weekly when placed in the hazardous waste storage area (not in Point of Generation accumulation areas, where they are at or near the point of generation). Per discussion with Chief Engineer, weekly inspections have not been performed in the hazardous waste storage area on P1 Level when waste containers were stored there. However, monthly inspections have been performed. One container of spent DF2000 filters generated in 2014 was reportedly stored in this waste storage area prior to the 1/31/2015 waste pick up by Safety Kleen.

Site Name: FAIRMONT HOTEL SAN JOSE
Violation Date: 11-13-2018
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to adequately describe in the SPCC Plan, overfill prevention methods, including a description of the systems or procedures used to prevent overfills for each container.
Violation Notes: Tanks appear to rely on a fast response system for overfill prevention, but filling procedures are not properly detailed in the plan. If 4000 gallon diesel fuel tank remains in the plan, plan must accurately describe any overfill prevention mechanisms on the tank or specify how a procedure will be used to prevent overfill. ** In order for facility to determine liquid level of the tank to prevent overfilling, liquid level gage on the 4000 gallon diesel tank must be repaired.

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine Aboveground Petroleum Storage Act Program inspection began on 7/9/2015 and concluded on 7/15/2015. Aboveground petroleum storage includes: -4,000 gallon diesel tank on P2 Level -200 gallon diesel tank on P2 Level -493 gallon diesel tank in a generator unit at the South Tower ground level *Note: The 4,000 gallon diesel tank on P2 level contains approximately 300 gallons according to the tank level measuring device. This tank was previously used to fuel boilers prior to switching to natural gas as a fuel. This tank is reportedly not in use at this time and has been disconnected from discharge piping. It is no longer capable of being used as originally designed. If this tank is emptied, cleaned and designated as "Permanently Closed", this facility will no longer be subject to APSA requirements.

Eval Notes:	On-site to conduct a follow-up inspection to confirm that all hazardous materials/wastes generated as a result of the incident that occurred on 08/31/19 were properly managed by staff of The Fairmont Hotel. Spoke with Mr. Wick regarding incident occurred that occurred on Saturday, August 31, 2019 at the Fairmont Hotel. Mr. Wick informed me that emergency response units responded to this facility around 9:00-10:00am for unknown fumes coming from this facility. It was confirmed by the agencies that responded (San Jose Fire Dept., and San Jose Police Dept.,) that one person has died following a possible suicide attempt using unknown chemicals. Other news media indicated that as many as eight others were injured. Following the initial response, the hotel was evacuated as a precaution. Mr. Wick indicated that some of the Fairmont Hotel employees were taken to the hospital for minor exposure and were cleared. Mr. Wick indicated that the entire Floor 19 was out service until [Truncated]

Eval Notes:	Facility last submitted their annual tank facility statement via CERS on 3/26/2018. SPCC Tier 1 Template plan for this facility was first created in 2015 and was certified by the Chief Engineer on 8/10/2015. Facility has the following bulk storage containers: 1x 496 gallon diesel fuel emergency generator belly tank. Tank appears to have no overfill prevention valve and relies on a high liquid level alarm and an attendant near the tank while fueling. Tank is double-walled and interstice is monitored by an electronic leak sensor. 1x 200 gallon diesel fuel emergency generator belly tank. Tank is located in a basement below grade and meets all requirements to be considered a G Tank in an underground areaG (TIUGA). Tank has no overfill prevention valve or high liquid level alarms and relies solely on a fast response system to prevent overfills. Qualitative dial gages are used to show liquid level. 1x 220 gallon diesel fuel fire pump tank (TIUGA-level P1). Tank has a [Truncated]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Case Number:	07S1E08G03f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Heating Oil / Fuel Oil
Site History:	UST found in basement of apartment building. It is believed that it was installed after 1926 to store bunker fuel for boilers located in the basement. The boilers were reportedly used until the mid to late 1950s. In January 2015, the UST was found and it contained dark black viscous material. Approximately 1,950 gallons of mostly water and bunker fuel was pumped from the tank. Due to location, UST will be closed in place. Background: In January 2015 the property owner initiated the process of closing the UST in place by removing any residual contents and filling it with a cement slurry. Part of this closure in place included soil and groundwater sampling from areas around the UST. Petroleum hydrocarbons were detected on soil and groundwater samples around the UST. Contaminants detected in soil and groundwater include Total Petroleum Hydrocarbons as gasoline (TPHg), Total Petroleum Hydrocarbons and diesel (TPHd), and Oil and Grease range hydrocarbons. No wells were installed and only grab groundwater samples collected. Two phases of investigation have adequately defined the nature and extent of contamination which is limited in extent.

AT&T CALIFORNIA - N1011 (Continued) **S111217095**

Local Case Number: 07S1E08N03f
Potential Media Affect: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Diesel
Site History: The site is currently an AT&T property occupying an entire city block. The surrounding area is primarily commercial properties. Currently a nine story office building which originally dates back to approximately 1950 when AT&T purchased land from the Greyhound bus lines company. In 1992, five 10,000 gallon underground storage tanks (USTs) containing diesel fuel and all associated piping were removed from the southwest corner of the site. Soil samples collected during the UST removal contained elevated concentrations of petroleum hydrocarbons. Three new 20,000 gallon USTs were subsequently installed approximately 90 feet to the north of the original UST pit. In 1995 six monitoring wells were installed on-site to monitor groundwater contamination. In 1996 free product was observed in monitoring wells MW-1 and MW-6 and both passive and active free product removal activities were initiated. Groundwater monitoring and free product recovery continued through 2001 when a corrective action plan (CAP) was approved. The CAP approved injection of oxygen-releasing compound (ORC) into the subsurface to promote biodegredation. In 2002 passive free product recovery skimmers were installed in wells MW-1 and MW-6 and currently remain in these wells. In 2008 another CAP was submitted recommending the removal of remaining contamination through excavation. In 2012 the pre-excavation design investigation was performed during which two direct push soil borings and nineteen CPT UVOST borings were drilled to determine the extent of soil contamination in order to help finalize and excavation design. Groundwater monitoring is currently being performed on a semi-annual basis in the first and third quarters.

RICHARDSONS AUTO SERVICE (Continued) **S103645849**

Potential Contaminants of Concern: Gasoline
Site History: 1985 In February, 2 soil samples were collected from 9 and 10 feet below the ground surface (ft bgs) prior to closing an underground storage tank (UST) in place. These samples were reported to contain 740 and 4,600 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg). The USTs had not been in use for approximately 15 years and were reported to be empty. 1986 In July, the 500-gallon UST was reportedly removed. No documentation of the UST removal was found in the file. 1 soil sample was reported to have been collected at 14 ft bgs and contained 11,000 ppm TPHg. It is reported in a later report that approximately 20 cubic yards of soil were removed at this time. In September, the remaining USTs were reported to have been closed in-place by filling them with slurry. 1992 In August, 2 monitoring wells (MW1 and MW2) were installed onsite to 19.5-20.5 ft bgs. 6 soil samples were collected and reported to contain maximum concentrations of 170 ppm TPHg, 9.3 ppm Benzene, 3.9 ppm Toluene, 12 ppm Ethylbenzene, and 11 ppm Xylenes in samples collected from MW1. Well MW1 is located near the closed in-place USTs. In September, the initial groundwater samples were collected from the wells and reported to contain maximum concentrations of 36,000 parts per billion (ppb) TPHg, 6,800 ppb Benzene, 4,500 ppb Toluene, 1,800 ppb Ethylbenzene, and 3,600 ppb Xylenes. The wells have been sampled sporadically since this time. 1994 In November, well MW3 was installed onsite to approximately 22 ft bgs. 3 soil samples were collected and reported to contain 2,200 ppm TPHg, 7.1 ppm Benzene, 0.36 ppm Toluene, 11 ppm Ethylbenzene, and 2.1 ppm Xylenes. This well was added to the groundwater monitoring program. 1996 In July, 2 monitoring wells (MW4 and MW5) were installed offsite to depths of 17.5 and 20.5 ft bgs. 7 soil samples were collectyed and reported to contain low to non-detectable concentrations of the Constituents of Concern (COCs). These wells were added to the groundwater monitoring program. 1998 In April, monitoring well MW6 was installed offsite to 20 ft bgs. 2 soil samples were collected. The sample collected at 14 ft bgs was reported to contain 3,200 ppm TPHg, 3.9 ppm Benzene, 3 ppm Toluene, 23 ppm Ethylbenzene, 40 ppm Xylenes. Methyl tert-Butyl Ether (MtBE) was not reported to be present above the laboratory reporting limits. This well was added to the groundwater monitoring program. 2008 In May, 11 soil borings (EB1 through EB11) were advanced on and offsite. 11 soil samples were collected and reported to have maximum concentrations of 1,100 ppm TPHg, 6.3 ppm Benzene, 28 ppm Toluene, 9.8 ppm Ethylbenzene, and 51 ppm Xylenes. The highest TPHg concentrations were reported for samples collected from EB9 and EB11. 12 depth discrete grab groundwater samples were collected and reported to contain maximum concentrations of 3,000 ppb TPHg, 3.7 Benzene, 3.8 ppb Toluene, 0.6 ppb Ethylbenzene, and 2.1 ppb MtBE. The highest TPHg concentration was reported for the sample collected from EB8. In March 2010, a vapor extraction well was installed along with air sparge wells. Remedial feasibility testing is scheduled to be conducted. In November 2010, air sparge feasibility testing and vapor extraction feasibility testing was conducted. High concentrations were reported in the recovered soil vapor, which demonstrates mass is still present in areas near the building onsite. CAP to do SVE, AS and GWE at the site was approved 5/1/13. Delays have been encountered with obtaining necessary permits for the City of San Jose Building department. Proposed remedial action should be successful in reducing the mass remaining near and possibly under the onsite building.

Completed Sub Area Name: Not reported
Completed Document Type: Phase 1
Completed Date: 06/14/1994
Comments: Pursuant to the MOU, DTSC has reviewed a Phase I Environmental Site Assessment and other documents for the Family Health Foundation of Alviso, Inc., St. James Health Center (FHFA). The subject property is an existing health clinic which is owned and operated by FHFA. No change in use is being proposed. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property there is no contamination on the property.

RB Case Number: 14-790
Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E08G02f
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Diesel, Gasoline
Site History: Phase II Assessment was conducted June 2008. Former gasoline service station believed to have been in operation from 1915 through 1965. Soil borings resulted in finding soil and groundwater contamination as follow:In soil 1,200 ppm TPHd, 297 ppm TPHg, 0.22 ppm n-Propylbenzene at 17.5 ft bgs and in groundwater 12,200 ppb TPHd, 2,300 ppb TPHg, 69.2 ppb n-Propylbenzene. Additional soil and groundwater investigation took place August 2008 and showed high

MERCADOS SUVIANDA (Continued) **S109229642**

levels of TPHg and TPHd. Work Plan was requested to be submitted in July 2009 for additional site assessment report to inlcude determination of groundwater flow direction and the gradient and efforts to locate the UST. Extension to submit the work plan was given to April 2010.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

SAN JOSE STATE UNIVERSITY (Continued) **1000121110**

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D011
Waste Description: SILVER

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

SAN JOSE STATE UNIVERSITY (Continued) **1000121110**

CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: P105
Waste Description: SODIUM AZIDE

Waste Code: P106
Waste Description: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

Waste Code: U029
Waste Description: METHANE, BROMO- (OR) METHYL BROMIDE

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U046
Waste Description: CHLOROMETHYL METHYL ETHER (OR) METHANE, CHLOROMETHOXY-

Waste Code: U125
Waste Description: 2-FURANCARBOXALDEHYDE (I) (OR) FURFURAL (I)

Waste Code: U134
Waste Description: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

Waste Code: U188
Waste Description: PHENOL

Waste Code: U246
Waste Description: CYANOGEN BROMIDE (CN)BR

RB Case Number:	43S1105

235 WEST JULIAN STREET (Continued) **S108992047**

File Location: Regional Board
Potential Media Affected: Under Investigation
Potential Contaminants of Concern: * Metals, Diesel
Site History: The approximately 0.65-acre Site is located at 235 West Julian Street near the intersection of Terraine Street and West Julian Street in San Jos, California in a commercial/light industrial area. The Site was occupied by Ropers Fruit Packing Depot in 1891; Bean Spray and Pump Company (with on-Site spray mixing, spray storage and machine shop activities) in 1915; a U.S. Government Warehouse in 1950; and foundry and lithograph businesses in 1969. A 2005 SECOR environmental investigation (Phase I and II) revealed elevated metal concentrations (arsenic, chromium, copper, lead, nickel and zinc in the upper 2 feet of soil. Diesel ranged petroleum hydrocarbons also were at depths ranging from 15 to 20 feet. Secor also reported elevated diesel ranged petroleum hydrocarbons in ground water (SB-8 @ 12,000 ppm). The results of the human health risk assessment indicated that potential on-Site construction workers and potential future residents will not incur significant carcinogenic or noncarcinogenic health effects via indoor and outdoor inhalation of the Chemicals of Concern in soil, soil vapor and ground water. The Site is zoned for commercial/industrial use but will be rezoned to high density residential use. The proposed Site use is for a 10 to 16 story residential tower. Construction is planned to commence in 2014 but could be as early as 2011. The discharger is proposing capping the Site with the development effectively limiting exposure to future residents.

RB Case Number:	14-806
Local Agency:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08P02f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Heating Oil / Fuel Oil
Site History:	Underground heating oil tank located within the basement of the building. In 1992, a water main/line ruptured near this building and flooded the basement. The flooding caused the product to come out of the tank. The tank was taken out of service and the tank was left in place. Subsurface investigation conducted in 2010 found soil and groundwater contamination. The UST will be properly closed in place.

Potential Media Affected:	Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Dichloroethane (DCA), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Benzene
Site History:	August 2018 Block BF LLC is planning to construct a 5-story podium-style apartment building with one full level of ventilated, subterranean parking. Prior commercial operations at the site date back to 1884 and have included underground storage tanks, oil water separators, associated piping, a railroad spur(s), and manufacturing of specialty bicycle parts. The Regional Water Board has issued several no further action letters for parcels within the site when the site was zoned for commercial use. Block BF LLC has submitted a vapor intrusion mitigation system (VIMS) VIMS Design Report that includes the following elements: Excavation of soil at the entire site to approximately10 feet below ground surface (bgs) to allow for the subterranean parking Excavation of soil at the elevator pit locations to approximately 15 feet bgs Vapor barrier under the entire building footprint Vapor collection system installed beneath the vapor barrier with 50 spacing Ventilation risers to the roof fitted with active fans on the rooftop Implementation of a construction quality assurance plan under the oversight of VIMS design engineer Subslab sampling layer and four subslab sampling points Two rounds of

Violation Date: 03-20-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 08/24/2018. _____ The facility has not reviewed and submitted a complete HMBP on CERS since 2/21/2014, as noted in the 3/24/2015 and 3/22/2016 Official Notice of Inspection Reports. Ensure all items noted in the 3/24/2015 inspection report are addressed and submit a complete HMBP to CERS. Ensure that the HMBP is properly updated within 30 days of changes to personnel, chemicals stored, and operations. Ensure that the HMBP is certified at least annually and all hazardous materials/wastes at or above HMBP reportable thresholds are included. If you would like assistance with your HMBP submittal, contact Molly Pritz at molly.pritz@cep.sccgov.org or Michelle Santos at (408)918-1981. THIS VIOLATION HAS BEEN ESCALATED TO A CLASS I VIOLATION AS THIS IS A CONTINUOUS, REPEAT, AND UNCORRECTED CLASS II VIOLATION FROM THE OFFICIAL NOTICE OF INSPECTION REPORT ISSUED ON 3/22/2016 AND A CONTINUOUS, REPEAT, AND UNCORRECTED MINOR VIOLATION FROM [Truncated]
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP

Violation Date: 03-20-2017
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: One black 55 gallon drum labeled only as G Diesel 55 gallons 9-4-12G was observed next to the day tank in the emergency generator room on the 27th floor. Ms. Walker stated that she was unsure of the drumG s contents. A hazardous waste determination must be conducted on the drumG s contents. Determine if the contents are still usable or a waste. If determined to be a waste, determine whether the contents are a hazardous waste using generator knowledge or through laboratory testing as outlined below. If determined to still be usable contents, adequately label the container within 10 days. Provide documentation of the waste and hazardous waste determinations to HMCD for review.

Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 04/10/2014.

Certification of Financial Responsibility (CFR) submitted in CERS 2/21/2014 lists the prior owner as does the insurance policy. An updated CFR was observed at the facility. Please verify the dates of coverage and submit in CERS an updated CFR and a copy of the insurance summary including the UST endorsement language listing the facility as one of the covered locations.

SAN JOSE MARRIOTT (Continued) **S108219554**

Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)
Violation Description: Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the UPA, for the life of the UST.
Violation Notes: This is an uncorrected Minor violation that has been elevated to Class II. No Monitoring System Certification forms, spill bucket test reports, reports documenting periodic secondary containment testing, or other UST system maintenance records are available on-site. Keep all UST system maintenance records available for review during inspections as specified below.

Violation Date: 03-13-2018
Citation: HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: This is an uncorrected violation. Permit application information submitted via CERS on 3/13/2018 still identifies the UST Operator as San Jose Marriott, which appears to be an unregistered fictitious business name, not the name of a legal entity. Property records identify the owner of the real estate on which the hotel is located as CWI 2 San Jose Hotel LP / Ryan LLC since 5/10/2013 when the property was purchased from PR SJM Hotel LLC. Correct and resubmit the UST Facility Information in CERS. Along with your written response to this Notice of Violation, include an explanation of the current and historic relationships between Marriott International Inc., CWI 2 San Jose Hotel LP, CWI 2 San Jose Hotel GP LLC, Ryan LLC, SP6 San Jose Hotel Owner LLC, SP6 San Jose Hotel Lessee LLC, and SP6 TRS LLC (i.e., parent/subsidiary and/or partnership relationships, and exactly who currently owns and operates the hotel and the UST).

SAN JOSE MARRIOTT (Continued) **S108219554**

Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes: This is a violation originally cited on 3/20/2017, 3/22/2016 and 3/24/2015. Secondary piping pressure test ports for supply line and return line have had their valve cores removed as required to allow drainage of the secondary lines into the monitored sump, but valves for both lines appeared to be in the closed position at the time of inspection, isolating them from the fuel in the UST. Ms. Walker stated during the inspection that repairs have been made, but no records are available to document any repairs. Submit documentation showing how, when, and by whom any repairs to these lines were made. (Note: No work plan was submitted as directed in the 3/20/2017 Official Notice of Inspection.)

Violation Date: 03-20-2017
Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes: _____ Diesel was observed to be pooling the piping sump and pipe transition sump during todayG s inspection. In aggregate, approximately 0.5 gallons of diesel was removed from the piping sump and pipe transition pump. Diesel has previously been observed in the pipe transition sump during the 3/23/2015 and 3/22/2016 inspections and in the piping sump during the 3/23/2015 inspection. Per maintenance records and Ms. WalkerG s statements, no repairs or corrective actions have been taken to repair the piping. IMMEDIATELY begin investigating the source of the fuel leak and submit a work plan for any necessary repairs to HMCD for review. Depending on the scope of work necessary, a permit from HMCD may be required for the repairs. THIS IS A CONTINUOUS, REPEAT, AND UNCORRECTED CLASS I VIOLATION FROM THE OFFICIAL NOTICE OF INSPECTION REPORT ISSUED ON 3/22/2016 AND A CONTINUOUS, REPEAT, AND UNCORRECTED CLASS II VIOLATION THE [Truncated]

Violation Date:	03-24-2015
Citation:	23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description:	Failure to maintain secondarily contained piping to allow liquid in the event of a leak to drain into sump (i.e. failure to remove test boot, pipe swelling).
Violation Notes:	Schrader valve secondary piping pressure test ports for both supply lines and both return lines in the tank top piping sump had valve cores left installed after last secondary containment test. Secondary piping for the new supply and return lines were similarly plugged in the piping transition sump. This prevented the secondary pipes from draining into the monitored sumps. The valve cores and plugs were removed today during this inspection. Ensure that the lines remain free to drain into monitored sumps when not undergoing triennial pressure testing.

Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: This is an uncorrected and repeat Class I violation. UST information submitted via CERS on 3/23/2019 is missing the required UST Certification of Financial Responsibility (CFR). The most recent CFR for this facility expired on 9/30/2014. The CFR must be updated annually with current insurance policy information and electronically submitted via CERS. Prepare and submit a current CFR form. Financial responsibility must be demonstrated by the UST owner and/or the UST operator.

Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes: _____ The Veeder-Root 794380-208 sensor was observed to be in a location that does not provide the earliest opportunity of leak detection. The sensorG s improper location was verified by the fact that the diesel accumulating in the sump was at a different location than the sensor (i.e. the sensor was dry while there was diesel in the sump). The sensor was re-located to a location that provides leak detection at the earliest opportunity. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED. However, ensure that the

SAN JOSE MARRIOTT (Continued) **S108219554**

sensor remains in the proper location.

OUR LADY OF LA VANG (Continued) **S112935775**

Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Tetrachloroethylene (PCE)
Site History:	The church is undergoing a redevelopment project and site assessment data reported chlorinated solvent contamination in groundwater beneath the property. The contaminated groundwater is from an up-gradient dry cleaner currently regulated by the Regional Water Quality Control Board. Additional assessment is underway to determine vapor intrusion risk.

Case Type:	Cleanup Program Site
Case Worker:	GOR
Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Arsenic, Lead, Nickel
Site History:	The approximately 0.6-acre Site is located at the northwest corner of Bassett and Terraine Streets in San Jose, California. The Site is bounded by: Bassett Street to the south; the terminus of Terraine Street to the east; the Union Pacific Rail Road (UPRR; formerly Southern Pacific) right-of-way to the north; and Highway 87 to the west. The Assessors Parcel Numbers (APNs) for the Site are: 259-23-027; 259-23-016; and a portion of 259-51-006. The proposed Site development includes construction of an approximately 75,600 square-foot six-story apartment building with hardscapes and landscaping. The building will be constructed with a first floor parking garage and 135 one-bedroom and studio apartments between the 2nd and 6th floors. The Site Management Plan (SMP) states that soil containing polycyclic aromatic hydrocarbons (PAHs), arsenic and lead is present in the upper 5-feet at the site above applicable human health screening criteria. During site development, soil within the upper 3-feet of current grade (approximately 3,100 cubic yards), will be excavated during grading and construction of engineered foundations at the site and transported off-site for disposal as hazardous waste. The remaining 2-feet of contaminated soil will be managed on-site (encapsulated) for reuse as engineered fill. The 2-feet of contaminated soil will be encapsulated between 5 feet and 10 feet below future (pad) grade. An orange delineation non-woven geotextile (or equivalent) will be installed to demarcate the soil containing chemicals above applicable screening criteria (approximately 5 feet below pad grade) and the soil above it. Site redevelopment is proposed to begin in 2019.

Potential Media Affected:	Aquifer used for drinking water supply, Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Gasoline
Site History:	The site is an inactive dry cleaner. Previous site investigations indicated that the dry cleaning chemical tetrachoroethene had contaminated soil and groundwater beneath the site. The Regional Water Board has required the responsible parties to define the extent of contamination originating from the site. Investigation is still ongoing with the remedial actions to be evaluated by June 2016.

SAN JOSE SPORTS ARENA (Continued) **S105954447**

Completed Document Type: Other Report
Completed Date: 06/27/2003
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 05/23/2003
Comments: A Deed Restriction limiting future use of property including the material encapsulation areas which requires no disturbance of the encapsulated areas and the slurry wall. If the areas are disturbed, DTSC is to be notified, a health and safety plan prepared, the material from the encapsulation area will be handled properly, and repairs to the area will be done as quickly as possible.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 04/27/2007
Comments: No problems noted during inspection.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 05/30/2012
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Completed Date: 05/02/2008
Comments: The remedy (cap) continues to be protective of public health, safety and the aenvironment. the next 5 year review is due March 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/20/1991
Comments: Report of Completion of Interim Remedial Measure/Removal Action (IRM/RA). Polynuclear aromatic hydrocarbons (PAHs) contaminated soil (23,000 cubic yards(CY)) resulting from a former PG&E gas manufacturing site was excavated and encapsulated into the nearby parking lots. Gasoline contaminated soil (17,000 CY) was also excavated and stockpiled nearby for vapor extraction treatment. The excavated area was backfilled with clean fill.

SAN JOSE SPORTS ARENA (Continued) **S105954447**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 04/28/2015
Comments: The City of San Jose notified DTSC in an email of its plans to repair asphalt at the site, which is currently the location of the San Jose Arena (SAP Center). An attachment was included with the email shown the locations where the asphalt repairs would be done.

Completed Document Type: Removal Action Completion Report
Completed Date: 06/28/1991
Comments: Completion of Phase I Construction Documentation Report. Required a deed restriction to be filed. PNA contaminated soil from a former PG&E site was excavated and encapsulated into a nearby parking lot. Gasoline contaminated soil was also excavated and stockpiled on a nearby lot for vapor extraction treatment. The excavated areas were backfilled with clean soil. The volume of excavation for PNA contaminated soil was approximately 23,000 cubic yards. The volume of excavation for gasoline contaminated soil was approximately 17,000 cubic yards. Groundwater treatment was performed under San Francisco RWQCB's requirements. Current files at the RWQCB list the site closed on 06/20/97.

Completed Document Type:	Soils Management Plan
Completed Date:	07/21/2006
Comments:	Comments on the report were: a soil management plan is required; asphalt removal, if needed and liquifaction issues for the SE corner will need to be addressed, and any other project ("Ball Park") that might involve a parking structure to be added to the parking lot at the HP pavilion.

SAN JOSE SPORTS ARENA (Continued) **S105954447**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/27/2003
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Completed Document Type: Land Use Restriction
Completed Date: 05/23/2003
Comments: A Deed Restriction limiting future use of property including the material encapsulation areas which requires no disturbance of the encapsulated areas and the slurry wall. If the areas are disturbed, DTSC is to be notified, a health and safety plan prepared, the material from the encapsulation area will be handled properly, and repairs to the area will be done as quickly as possible.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 04/27/2007
Comments: No problems noted during inspection.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 05/30/2012
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Background Info:	The current address on the building is 525 West Santa Clara Street. The site is bounded by Autumn Street to the east; West Santa Clara Street to the south; Julian Street, Montgomery Street, and St. John Street to the north; and the Southern Pacific Railroad tracks to the west. In May 1987, a site screening identified contaminants in the soil as polycyclic aromatic hydrocarbons (PAH's) from a former Pacific Gas & Electric (PG&E) site with concentrations ranging from non-detect to above 3,000 ppm in localized areas. EPA completed screening site inspection in 1989. The City of San Jose Redevelopment Agency (SJRA) acquired 22 parcels in a former industrial area in

SAN JOSE SPORTS ARENA (Continued) **S105954447**

downtown San Jose that had a former Pacific Gas & Electric (PG&E) coal gasification plant, various automobile repair and service businesses, underground storage tanks, oil/water clarifers, and drums.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 12/27/1991
Comments: Completed Site Screening. In January 1989, additional sampling was conducted at the site. Soil boring results detected total oil and grease (TOG) and total petroleum hydrocarbons as diesel (TPHd) in excess of 1000 ppm. Lead was detected at 938 ppm. In May 1989, two groundwater monitoring wells (MW-1 and MW-2) were installed at the property. Lead was detected in groundwater at a concentration of 0.181 ppm. In May 1989, contaminated soil was removed from the previous sampled area. Final soil sample results indicated only one sample contained TOG at 780 ppm and lead at 191 ppm. The sample that contained the TOG and lead was collected beneath the foundation of the building. The excavations were backfilled with clean, imported fill.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 02/22/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.
