An ASTM Transaction Screening Investigation Environmental Report (TSI) was conducted for 144-148 E. Santa Clara Street, San Jose, CA 95113 (SITE), in June 2012 by ACS Associates (ACS). Far East National Bank ordered the TSI Report in connection with a loan application. Field inspection of the SITE by ACS personnel took place on June 8, 2012.

## I. SCOPE OF WORK

The TSI included the following scope of work, using the current American Society for Testing and Materials (ASTM) specifications, guidelines, and form (ASTM E-1528-05):

- A visual investigation of the property for potential hazardous materials, including building materials, storage materials, etc.

- A visual survey of the adjacent land uses and determination of any current nearby operations, which may potentially impact the subject site.

- A government document search of records compiled by various government agencies for on-site or nearby operations (past and present) to aid in the identification of any potential contamination sources.

- A tenant checks to identify any potential past on-site operations, which may have environmental implications. A historical tenant report, if available, will be included.

The property surveyed includes the subject site and the adjacent area. Attachment 1 presents the ASTM Questionnaire. Attachment 2 presents the results of an environmental record search of government files from government agency database searches. Attachment 3 presents the Site Investigation Checklist and other documents.

## II. FINDINGS

### II.1. SITE DESCRIPTION

The subject SITE consists of nine studio apartments on the second floor and three ground level retail units, driveways, and parking areas. It is under the jurisdiction of the city of San Jose (the City), Santa Clara County (the County). The SITE is part of the County tax Assessor Parcel Number (APN): 467-23-035.The building was constructed in the 1940s, per county records. The combined lot is approximately rectangular in shape, and is about 0.13 acres, per property profile. The total building size is about 11,566 sq ft. The address, 148 E. Santa Clara Street, is used in the Report and other documents to represent the entire SITE.

The SITE is located in a topographically flat area, at an elevation of about 90 feet above sea level. The local ground water is expected to flow to the north, according to the topography.

### II.2. FIELD SURVEY RESULTS

The field survey included two parts:
1) An investigation of the property for potential hazardous materials.
2) An adjacent land uses survey.

© 2012 ACS Asso.

Investigation of the potentially hazardous materials at the SITE included building materials, storage materials, and paving materials.

**II.2.1 THE PROPERTY**

The SITE consists of a mixed use commercial/residential property with three retail units (a pizza shop and psychic reading store) and nine apartments, parking areas, and ancillary structures. Figure 1, Attachment 3, presents the location map. The building was constructed in the 1940s. The SITE plan map (Figure 2, Attachment 3) shows the subject SITE and the approximate location of the building on the lot. The conditions of the building appeared to be excellent. The building was constructed of concrete, bricks and wood frame. It has limited landscaping.

There appeared to be no underground tanks at the SITE. A visual inspection of the SITE revealed no evidence of existing vent pipes or product delivery pipes for underground storage tanks. The sidewalks are covered with concrete, and they appeared to be in very good condition. The trash bin area at the SITE appeared to be in excellent operating condition. The vegetation near the SITE appeared to be healthy. There were no drums or other potentially hazardous waste and material containers present at the building and the surrounding area during the SITE visit. More detailed information of the SITE is recorded in the ASTM Questionnaire, Attachment 1, and Site Inspection Checklist, Attachment 3.

Mr. and Mrs. Caruso, the owner, filled out the owner's portion of the ASTM Questionnaire. They indicated that there are no underground storage tanks at the SITE.

**II.2.1 THE ADJACENT AREAS**

The SITE faces Santa Clara Street to the north and 4$^{th}$ Street to the east**.** The neighbor to the east is the City Hall of San Jose. The neighbor to the north and west, along Santa Clara St., are retail shops. The south neighbor is a restaurant. Additional details of the neighbors are included in the SITE plan map (Attachment 3). No underground fuel tanks are present at these neighbors. All of the neighboring buildings are low-rise buildings.

These neighboring properties are very well maintained, and the ground surface does not show any sign of surface stains or discoloration that might indicate chemicals or hazardous material has been discharged into the ground.

Because the building at the SITE was constructed before 1978, when the government banned the use of asbestos, there appears to be some concern that asbestos building material might be present at the SITE. The issue of asbestos, however, is not part of the scope of this report.

**II.3. RECORD SEARCH**

An electronic government record search was conducted. The search was performed to aid the identification of companies or facilities located within a one-mile radius to the subject property, which might pose a potential threat to the environment at the SITE. The results of this search are included in Attachment 2. These search results are summarized below.

No facilities are found to have significant environmental threat to the SITE. The SITE has no outstanding violations.

Based on the results of the record search, it is concluded that there were no significant environmental concerns for the SITE and its immediate neighbors.

The aforementioned investigations indicated that there is no evidence of potentially hazardous material resulting from tenants or neighbors' previous activities that could have degraded the environment at the SITE.

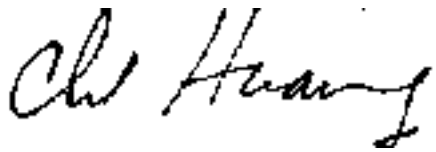
## III. CONCLUSIONS

The subject SITE is a mixed use commercial/residential property in San Jose, CA. There was no evidence of hazardous material and waste-containing facility at the SITE or its immediate neighbors discovered based on ACS's SITE visit, and all of the available government document searches.



A few facilities or locations within the one-mile radius of the SITE were identified during government record search as having hazardous waste or underground storage tanks. None of these appear to be a significant environmental condition in connection with the SITE. There are also no known past or present activities associated with the subject property that have resulted in known current contamination of the subsurface. There are no recognized environmental conditions in connection with the subject SITE. No additional environmental investigation is recommended at present.

POTENTIAL_CONTAMINANTS_OF_CONCERN: Fuel Oxygenates, Gasoline

POTENTIAL_MEDIA_AFFECTED: Other Groundwater (uses other than drinking water)

SITE_HISTORY: 12/83, a leak in the gasoline product line was discovered near the southwestern edge of the fuel dispenser island and a corroded section of pipe was replaced to stop the leak. 1/84, 6 groundwater monitoring wells were installed and commenced weekly monitoring for free product (FP). 2/84, one inch of FP measured in well MW-5 and also present in monitoring wells located near the USTs. 6/84, a ôpinholeö sized leak was detected and repaired in the dispenser filter located at the southeastern edge of the fuel dispenser island. 2 additional monitoring wells were installed 10/84. 11/84 a hole was discovered near the northwest corner of a UST containing regular gasoline. The gasoline was pumped out of the UST, and the UST was removed from service until it was replaced in 1985. 5/85, USTs and piping were replaced. Product conveyance piping was also replaced with cathodic-protected conveyance piping. 11/89, advanced 6 soil borings, installed 2 wells, and determining the hydraulic conductivity and transmissivity after performing slug tests. Three areas containing soil and/or groundwater contamination were identified in the investigation: UST complex; waste oil UST and steam-cleaning area; and dispsenser islands in the southeast portion of the Site. 3/90, wells MW-6 and MW-8 located near the waste oil UST and steam-cleaning area were destroyed. Both wells had contained measurable amounts of FP and it was suspected that oily residue from the steam cleaning process was collecting in them and providing an additional source of groundwater contamination. Well MW-11 was installed as a replacement. Jan-Aug 1990, 5 soil borings advanced onsite; 19 borings and 1 monitoring well were advanced off-site. 4 extraction wells were also installed onsite along the northern border of the property. 4/90, conducted hydraulic testing and a soil vapor extraction (SVE) pilot study. The results of the SVE pilot study indicated that a full-scale SVE system could be used to remediate hydrocarbons in the unsaturated soils beneath the Site. 12/91, 4 off-site monitoring wells were installed. Groundwater extraction and treatment (GWET) system operated 2/92-6/96 and removed approximately 1,765,354 gal. of water and removed approximately 17 pounds of petroleum hydrocarbons. 5/00, 11 soil borings and 2 piezometers were advanced. 2002, a risk-based corrective action (RBCA) assessment was conducted to determine if the petroleum hydrocarbons in the soil and groundwater on and off-site presented a risk to human health. The RBCA indicated that all soil concentrations were below risk-based screening levels (RBSLs) assigned by the Regional Water Quality Control Board for the specified receptors (commercial workers, construction workers on and residents). Residents were included as on-site receptors based on the proximity of the Site to the senior apartment complex and the potential for the dissolved hydrocarbon plume to migrate beneath the building. The only exposure pathway of concern identified in the RBCA assessment was inhalation of benzene vapors in indoor air. The theoretical excess cancer risks and hazard quotients (for non carcinogens) were less than the respective Cal-EPA limits of one in a million. 1/04 a 2-phase extraction and treatment (TPET) system began operating and ran through 11/06. 9/08, 9 soil borings were advanced to collect confirmation soil samples.

SITE_HISTORY: Phase II Assessment was conducted June 2008. Former gasoline service station believed to have been in operation from 1915 through 1965. Soil borings resulted in finding soil and groundwater contamination as follow:In soil 1,200 ppm TPHd, 297 ppm TPHg, 0.22 ppm n-Propylbenzene at 17.5 ft bgs and in groundwater 12,200 ppb TPHd, 2,300 ppb TPHg, 69.2 ppb n-Propylbenzene. Additional soil and groundwater investigation took place August 2008 and showed high levels of TPHg and TPHd. Work Plan was requested to be submitted in July 2009 for additional site assessment report to inlcude determination of groundwater flow direction and the gradient and efforts to locate the UST. Extension to submit the work plan was given to April 2010.

SITE_HISTORY: 1985 û In February, 2 soil samples were collected from 9 and 10 feet below the ground surface (ft bgs) prior to closing an underground storage tank (UST) in place. These samples were reported to contain 740 and 4,600 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg). The USTs had not been in use for approximately 15 years and were reported to be empty. 1986 û In July, the 500-gallon UST was reportedly removed. No documentation of the UST removal was found in the file. 1 soil sample was reported to have been collected at 14 ft bgs and contained 11,000 ppm TPHg. It is reported in a later report that approximately 20 cubic yards of soil were removed at this time. In September, the remaining USTs were reported to have been closed in-place by filling them with slurry. 1992 û In August, 2 monitoring wells (MW1 and MW2) were installed onsite to 19.5-20.5 ft bgs. 6 soil samples were collected and reported to contain maximum concentrations of 170 ppm TPHg, 9.3 ppm Benzene, 3.9 ppm Toluene, 12 ppm Ethylbenzene, and 11 ppm Xylenes in samples collected from MW1. Well MW1 is located near the closed in-place USTs. In September, the initial groundwater samples were collected from the wells and reported to contain maximum concentrations of 36,000 parts per billion (ppb) TPHg, 6,800 ppb Benzene, 4,500 ppb Toluene, 1,800 ppb Ethylbenzene, and 3,600 ppb Xylenes. The wells have been sampled sporadically since this time. 1994 û In November, well MW3 was installed onsite to approximately 22 ft bgs. 3 soil samples were collected and reported to contain 2,200 ppm TPHg, 7.1 ppm Benzene, 0.36 ppm Toluene, 11 ppm Ethylbenzene, and 2.1 ppm Xylenes. This well was added to the groundwater monitoring program. 1996 û In July, 2 monitoring wells (MW4 and MW5) were installed offsite to depths of 17.5 and 20.5 ft bgs. 7 soil samples were collectyed and reported to contain low to non-detectable concentrations of the Constituents of Concern (COCs). These wells were added to the groundwater monitoring program. 1998 û In April, monitoring well MW6 was installed offsite to 20 ft bgs. 2 soil samples were collected. The sample collected at 14 ft bgs was reported to contain 3,200 ppm TPHg, 3.9 ppm Benzene, 3 ppm Toluene, 23 ppm Ethylbenzene, 40 ppm Xylenes. Methyl tert-Butyl Ether (MtBE) was not reported to be present above the laboratory reporting limits. This well was added to the groundwater monitoring program. 2008 û In May, 11 soil borings (EB1 through EB11) were advanced on and offsite. 11 soil samples were collected and reported to have maximum concentrations of 1,100 ppm TPHg, 6.3 ppm Benzene, 28 ppm Toluene, 9.8 ppm Ethylbenzene, and 51 ppm Xylenes. The highest TPHg concentrations were reported for samples collected from EB9 and EB11. 12 depth discrete grab groundwater samples were collected and reported to contain maximum concentrations of 3,000 ppb TPHg, 3.7 Benzene, 3.8 ppb Toluene, 0.6 ppb Ethylbenzene, and 2.1 ppb MtBE. The highest TPHg concentration was reported for the sample collected from EB8. In March 2010, a vapor extraction well was installed along with air sparge wells. Remedial feasibility testing is scheduled to be conducted.

CASE_TYPE: Cleanup Program Site

Status Date: 2002-07-01 00:00:00

LEAD_AGENCY: SAN FRANCISCO BAY RWQCB (REGION 2)

CASEWORKER: NMK

RB_CASE_NUMBER: 43S0253

FILE_LOCATION: Regional Board

POTENTIAL_CONTAMINANTS_OF_CONCERN: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride, Other Petroleum

POTENTIAL_MEDIA_AFFECTED: Aquifer used for drinking water supply, Sediments, Soil, Soil Vapor, Surface water

SITE_HISTORY: The area of the Site is approximately 13 acres, centered on Old West Julian Street, bounded on the west by the Guadalupe River, on the east by the Guadalupe Parkway (Route 87), on the north by the Union Pacific Railroad, and on the south by West Julian Street. The Site is under development by Sobrato Development Companies (SDC), the current owner. Two buildings and a parking structure have been completed. Construction on a third building was discontinued prior to completion due to economic reasons. FMC and predecessor companies occupied the Site from the early 1900s through 1986. Manufacturing operations, including production of agricultural machinery, food-processing equipment, and military tracked vehicles, occurred at the Site beginning in the early 1900s. Manufacturing operations at the Site ceased in 1986 and the facility was leased for warehousing and other storage purposes. In June 1998, FMC sold the property to SDC.FMC initiated environmental investigations at the Site in 1986. Soil sampling in former manufacturing and product storage areas revealed the presence of petroleum hydrocarbons, volatile organic compounds (VOCs), and metals. Further investigations included the installation of groundwater monitoring wells that detected VOC constituents in two shallow water-bearing zones beneath the Site. Quarterly groundwater monitoring was conducted from the third quarter of 1989 through the first quarter of 2001. Semi-annual groundwater monitoring and reporting began in April 2001. On June 21, 1989, the State of California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) adopted Order Number 89-107, Site Cleanup Requirements for FMC Corporation-Ground Systems Division, 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 1989). On August 15, 1990, Order Number 90-122 (RWQCB, 1990) was adopted by the RWQCB, amending Order Number 89-107 with respect to the adoption of final Site cleanup levels. On January 21, 1998, Order Number 98-006 was adopted (RWQCB, 1998) for the Site, amending Orders 89-107 and 90-122 with respect to revising soil cleanup standards and adding additional tasks to protect groundwater and address risks associated with exposure to residual soil contamination. On March 21, 2001, Order No. 01-031, Final Site Cleanup Requirements and Rescission of Orders Nos. 89-107, 90-122, and 98-006 for FMC Corporation, for the property located at 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 2001) was adopted by the RWQCB. This annual compliance report is being submitted to the RWQCB as required by Order No. 01-031, Provision D.5. FMC implemented VOC source removal using a Soil Vapor Extraction system in the southwest portion of the Site from 1991 through March 1994. In addition, a groundwater extraction and treatment system for the A-level aquifer operated at the Site from March 1992 through January 1997, when it was discontinued due to changed groundwater flow directions, limited mass removal over time, and completion of effective source removal. Authorization to discontinue operation of the groundwater extraction and treatment system was given by the RWQCB in their letter to FMC, dated January 2, 1997 (RWQCB, 1997). The RWQCB documented the achievement of meeting the Site soil cleanup goals forchlorinated solvents in prior Order No. 98-006. FMC performed a natural attenuation evaluation in 2000 (HSI GeoTrans, 2000) to consider methods of remediating the residual VOCs present in Site groundwater. The evaluation concluded that VOC degradation could be accelerated through the introduction of an electron donor that would enhance the biodegradation. Cheese whey was selected as the electron donor material, and, in accordance with Task C.2. of Order Number 01-031 and the Work Plan for In-Situ Bioremediation Using Cheese Whey Injection (Work Plan) dated May 30, 2001 (GeoTrans, 2001), cheese whey injection was conducted at ten Site

Such properties are known as Formerly Used Defense Sites (FUDS). The Army is the executive agent for the program and the U.S. Army Corps of Engineers manages and directs the program's administration. The scope and magnitude of the FUDS program are significant, with more than 9,900 properties identified for potential inclusion in the program. Information about the origin and extent of contamination, land transfer issues, past and present property ownership, and program policies must be evaluated before DoD considers a property eligible for Defense Environment Restoration Account (DERA) funding under the FUDS program. Environmental cleanup procedures at FUDS are similar to those at active DoD installations.

Subject: Fuel Leak Site Case Closure Chevron Station No. 9-4259, 147 East Santa Clara Street, San Jose, CA; Case No. 03-014, SCVWDID No. 07S1E09L01f

Dear Mr. Robb:

This letter transmits the enclosed underground storage tank (UST) case closure letter for the subject case in accordance with Chapter 6.75 (Section 25296.10 [g]). The State Water Resources Control Board adopted this letter on February 20, 1997. As of March 1, 1997, all Local Oversight Programs (LOP) in the State are required to use this case closure letter for UST leak sites. The Santa Clara Valley Water District began transferring the LOP and all cases to the County of Santa Clara Department of Environmental Health on July 1, 2004. The County of Santa Clara is responsible for the issuance of the attached closure letter. The case closure summary is also enclosed. These documents confirm the completion of the investigation and cleanup of the reported release at the subject site. The subject fuel leak case is closed.

Please note the following conditions still remain at the site: residual contamination remains in soil of 2,200 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 2,900 ppm Total Oil and Grease (TOG), 1 ppm Benzene, 0.65 ppm Toluene, 43 ppm Ethylbenzene, 195 ppm Xylenes, 0.014 ppm Methyl tert-Butyl Ether (MtBE), and 0.97 ppm Acetone; and in groundwater of 5,200 parts per billion (ppb) TPHg, 1,000 ppb TPH as Diesel (TPHd), 100 ppb Benzene, 3.4 ppb Toluene, 200 ppb Ethylbenzene, 14 ppb Xylenes, 56 ppb MtBE, 6,600 ppb Tert Butyl Alcohol (TBA), 61 ppb Acetone, 2 ppb Vinyl Chloride (VC), and 61 ppb 1,2-Dichloroethane (DCA).

Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activites such as site grading, excavation, or the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.

Board of Supervisors: Donald F. Gage, George Shirakawa, Dave Cortese, Ken Yeager, Liz Kniss
County Executive: Jeffrey V. Smith

If you have any questions regarding the enclosed case closure form, please call Ms. Lani Lee of the Local Oversight Program at (408) 918-1977 Thank you.

Sincerely,

Michael Ballet

## IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan?
Yes

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan?
Yes

Does corrective action protect public health for current land use? Environmental Health Department staff does not make specific determinations concerning public health risk. However, it does not appear that the release would present a risk to human health

Site Management Requirements: The site is an active retail gasoline station Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time
Should corrective action be reviewed if land use changes? Yes; See Site Management Requirements

## V. ADDITIONAL COMMENTS, DATA, ETC.

Site History

1983 – In December approximately 148 gallons of gasoline was lost due to a piping leak The piping line was replaced

1984 – In January, 6 monitoring wells (1 through 6) were installed onsite to 20 feet below the ground surface (ft bgs). Free product (FP) was found in well 5 and product bailing commenced It is not

reported that soil samples were collected during this investigation.

In November, a gauge stick hole was discovered in a gasoline underground storage tank (UST). It was estimated that approximately 657 gallons of product had been lost. The UST was emptied and taken out of service prior to removal.

Reports of FP removal or groundwater monitoring conducted between 1984 and 1989 were not found in the file. Total volume of FP removed is not known.

Based on information in other reports, wells MW7 and MW8 were installed in October; however, no report of well installation was found in the file.

1985 – It is reported that all USTs (fuel and waste oil) were replaced at this time, however no report of UST removal was found in the file.

1989 – In May, groundwater samples were collected from 5 of the 8 wells onsite; wells 3 and 5 were found to be dry and well 8 had FP. Maximum concentrations were reported of 110,000 parts per billion (ppb) Total Petroleum Hydrocarbons as Gasoline (TPHg), 61,000 ppb TPH as Oil (TPHo), 4,200 ppb Benzene, 6,000 ppb Toluene, 2,000 ppb Ethylbenzene, 11,000 ppb Xylenes.

In November 4 soil borings (SB1 through SB4) and 2 monitoring wells (SB9/MW9 and SB10/MW10) were advanced onsite. The borings were advanced to 31.5 ft bgs and the wells were advanced to 40 ft bgs, but completed at 31.5 and 40 ft bgs. 11 soil samples were collected and reported to contain maximum concentrations of 1,300 ppm TPHg, 1,300 ppm Total Oil and Grease (TOG), 6.1 ppm Benzene, 41.5 ppm Toluene, 102 ppm Ethylbenzene and 9.2 ppm Xylenes. The highest concentrations were reported for the sample collected from boring SB3 at 15 ft bgs, which was located near well 5. The maximum TOG concentration was reported for the sample collected from MW10 at 15 ft bgs.

Well MW10 was located downgradient of the waste oil UST and well MW6, which was reported to contain FP in a May 1989 report. Due to it's proximity to the waste oil UST, the groundwater was analyzed for chlorinated hydrocarbons and was reported to contain 190 ppb Vinyl Chloride, 6.5 ppb 1,1-Dichloroethene, 5 ppb 1,1,2 Trichloroethane, 5.5 ppb Chlorobenzene, and 23 ppb 1,2-Dichloroethene.

In this report it states: "The first-encountered saturated zone beneath the site occurs at a depth of 15 to 20 feet below ground level ("BGSL") within clays, silts, and silty sands (see Figure 4 and Appendix A). This unit was found in every boring and is assumed to be continuous. An underlying sandy gravel logged at a depth of between 36 and 40 feet BGL in SB-10 was not fully saturated. This suggests that the first encountered saturated soil is perched."

1990 It is reported that in March, wells 6 and 8 were destroyed, but a report of well destruction was not found in the file.

Between March and May 24 soil borings (WP1 through WP5, WPS1 through WPS4 and OS1 through OS15) and 5 wells (11 and EW1 through EW4) were advanced on and offsite. Boring OS15 was completed as well MW12 to 40 ft bgs; well 11 was completed to 33 ft bgs and the extraction wells were completed to 33-40 ft bgs. 40 soil samples were collected and reported to have maximum concentrations of 1,900 ppm TPHg, 2,900 ppm TOG, 1,900 ppm Benzene, 160 ppm Toluene, 61 ppm Ethylbenzene, and 290 ppm Xylenes.

Grab groundwater samples were collected from the OS, WPS and WP borings, including the boring for MW12. The grab groundwater samples were reported to contain maximum concentrations of 32,000 ppb TPHg, 5,500 ppb Benzene, 13,000 ppb Toluene, 3,500 ppb Ethylbenzene, and 14,000 ppb Xylenes. The highest concentrations were reported for OS1 and OS6 located offsite in the parking lot north of the site.

1991 – In August, 4 groundwater monitoring wells (MW13 through MW16) were installed offsite north of the site to approximately 35 ft bgs. Soil samples were not collected due to the close proximity to the previous investigation. The new wells were sampled and reported to have maximum concentrations in well MW15 of 5,300 ppb TPHg, 640 ppb Benzene, 300 ppb Toluene, 150 ppb Ethylbenzene, and 410 ppb Xylenes. The new wells were incorporated into the groundwater monitoring program.

1992 – In January, a groundwater extraction system was started onsite. Groundwater remediation operation reports were not found in the file. The system was reported to have operated through June 26, 1996. It is reported in a later report that the system extracted 1,785,354 gallons of groundwater and 17 pounds of hydrocarbons.

1994 – In June, the product lines were replaced. 8 soil samples (T1 through T8) were collected from 3 ft bgs and were reported to have low to non-detectable concentrations of the Constituents of Concern (COCs). Approximately 150 cubic yards of soil were removed from the site during this investigation.

2000 – In May, 11 soil borings (B1 through B11) and 2 piezometers (PZ1 and PZ2) were advanced on and offsite. The soil borings were advanced to depths of 17-32 ft bgs and the piezometers were completed to 20 and 32 ft, respectively. 27 soil samples were collected and reported to contain low to non-detectable concentrations of COCs. The samples were analyzed for Methyl tert Butyl Ether (MtBE) and there was only one detection of 0.586 ppm in the sample collected at 11.5 ft bgs in B5.

26 depth discrete grab groundwater samples were collected from the borings and reported to have maximum concentrations of 34,500 ppb TPHg, 8,550 ppb Benzene, 257 ppb Toluene, 908 ppb Ethylbenzene, 2,650 ppb Xylenes, 2,460 ppb MtBE, and 1,430 ppb Ethyl tert-Butyl Ether (EtBE). The highest concentrations were reported for samples collected from borings B2 and B4 located near the dispensers.

2002 – In January, a Risk Based Corrective Action (RBCA) Assessment was completed. According to the report, the groundwater extraction system was successful in reducing chemical concentrations in groundwater and therefore, historical data obtained before June 1996 (system shut down) were not considered in the RBCA. The RBCA concluded that the results indicated that, "(1) adverse noncancer health effects are not anticipated for any receptor, either on- or offsite, under the conservative exposure conditions evaluated in this RBCA Assessment, and (2) unacceptable excess lifetime cancer risks are not anticipated for any receptor under the conservative exposure conditions evaluated."

In June, a two-phase extraction (TPE) test was conducted using wells EW1 and EW4 for 4 days. Approximately 48.4 pounds of TPHg and 0.7 pounds of Benzene were removed by soil vapor extraction and 0.1 pounds of petroleum hydrocarbons by groundwater extraction. It was concluded that TPE was a feasible remedial method.

2004 – In January, a TPE treatment (TPET) system was started onsite. The system operated through November 2006 and extracted 1,223,140 gallons of groundwater. The vapor extraction portion of the system removed approximately 5,373 pounds of TPHg, 23 pounds Benzene, and 4 pounds MtBE.

2008 – In September, 9 confirmation soil borings were advanced on and offsite. 27 soil samples were collected and reported to have maximum concentrations of 2,200 ppm TPHg, 0.98 ppm Benzene, 0.54 ppm Toluene, 43 ppm Ethylbenzene, 195 ppm Xylenes and 0.96 ppm Acetone. With the exception of the Acetone detection, the maximum concentrations were reported for the soil sample collected from boring B18 at 20 ft bgs located in the apartment parking lot. It should be noted that this sample was collected from the saturated zone.

2009 – In September, the final groundwater monitoring event was conducted and reported maximum concentrations of 5,200 ppm TPHg, 100 ppb Benzene, 3.4 ppb Toluene, 200 ppb Ethylbenzene, 14 ppb Xylenes, 56 ppb MtBE, 6,600 ppb TBA, 33 ppb EtBE, 0.6 ppb Di-isopropyl Ether (DiPE), 2 ppb Vinyl Chloride, 2 ppb DCA, 59 ppb Chlorobenzene, 4 ppb 1,2-Dichlorobenzene, and 61 ppb Acetone

Considerations and/or Variances:
The site is an active retail gasoline service station. Based on records, two releases occurred at the site an released approximately 800 gallons of gasoline to the subsurface. Free Product (FP) was present on the groundwater. FP removal activities occurred between 1984 and 1989, but the volume of FP removed was not documented.

The USTs were removed from the site. Piping was removed later and approximately 150 cubic yards of soil were removed at that time. Groundwater extraction (1992-1996) and two-phase extraction (2004-2006) were utilized onsite for remediation. Approximately 2,988,494 gallons of groundwater were extracted from the ground. Approximately 17 pounds of petroleum hydrocarbons were removed from the groundwater and 5,421 pounds of petroleum hydrocarbons, 24 pounds of Benzene and 4 pounds of MtBE were removed through vapor extraction.

In 2002, a Risk Based Corrective Action (RBCA) Assessment was completed (prior to completion of remediation activities onsite). The RBCA concluded that the results indicated that "(1) adverse noncancer health effects are not anticipated for any receptor, either on- or offsite, under the conservative exposure conditions evaluated in this RBCA Assessment; and (2) unacceptable excess lifetime cancer risks are not anticipated for any receptor under the conservative exposure conditions evaluated."

Concentrations in groundwater have been reduced from the presence of FP to 5,200 ppb TPHg, 1,000 ppb TPHd, 100 ppb Benzene, 3.4 ppb Toluene, 200 ppb Ethylbenzene, 14 ppb Xylenes, 56 ppb MtBE, 6,600 ppb TBA, 61 ppb Acetone, 2 ppb Vinyl Chloride, and 61 ppb DCA. The residual concentration of TBA was reported for well MW3 which is located onsite. There is a trend in this well of decreasing MtBE and increasing TBA. When MtBE breakdowns, TBA is formed and therefore the concentration increases.

Residual contamination remains in soil of 2,200 ppm TPHg, 1 ppm Benzene, 0.65 ppm Toluene, 43 ppm Ethylbenzene, 195 ppm Xylenes, 0.014 ppm MtBE, 0.97 ppm Acetone, 2,900 ppm TOG, and 64 ppm Lead. The TPHg concentration was reported in a soil sample collected from the saturated zone in 2008. It is like that the concentrations of TPHg remaining in unsaturated soils at the site are lower. No confirmation soil samples were collected and analyzed for TOG and it is likely that the concentrations present today are lower. The maximum Lead concentration of 190 ppm reported appears to be anomalous. All other soil samples analyzed for Lead were reported to contain between 9.9-64 ppm.

Residual contamination in soil and groundwater will continue to degrade by natural processes.

There is one inactive water supply well located in the up to cross gradient direction from the site. Based on the location of this well, it is unlikely that the release from this will impact this well.

Site Management Requirements have been established for this site.

Conclusion:
The Department of Environmental Health believes that the residual soil and groundwater contamination at the site does not pose a continuing, significant threat to groundwater resources, human health, or the environment. Regional Water Quality Control Board objectives have not been compromised. The investigation was performed in accordance with state and local guidelines. The Department of Environmental Health recommends that this site be closed.

San Jose, California

**EXPLANATIONS:**

Groundwater monitoring data and laboratory analytical results prior to June 5, 2000 were compiled from reports prepared by Blaine Tech Services, Inc.
Groundwater monitoring data and laboratory analytical results from June 5, 2000 to March 6, 2009 were provided by Gettler-Ryan, Inc.
Current groundwater monitoring data was provided by Blaine Tech Services, Inc and current laboratory analytical results were provided by Lancaster Laboratories.

TOC = Top of Casing
(ft.) = Feet
GWE = Ground Water Elevation
(msl) = Mean sea level
DTW = Depth to Water
TPH = Total Petroleum Hydrocarbons
DRO = Diesel Range Organics
GRO = Gasoline Range Organics
B = Benzene
T = Toluene
E = Ethylbenzene
X = Xylenes
MTBE = Methyl Tertiary Butyl Ether
TOG = Total Oil and Grease
(µg/L) = Micrograms per liter
-- = Not Measured/Not Analyzed
(D) = Duplicate
QA = Quality Assurance/Trip Blank
NP = No Purge
PER = Peristaltic Pump

1 TOC elevations were surveyed on July 17, 2005 by MID Coast Engineering. Vertical datum is NGVD29 from GPS Observations.
TOC surveyed on June 14, 2000, by Mid Coast Engineers. The benchmark is City of San Jose BM# 26-L, USC&GS I-18#56, set in concrete 12.1 ft feet north of Santa Clara Street center line and 28.6 feet west of Fourth Street center line. (Elevation = 77.93, NGVD 29 (msl))

2 Broken case.
3 Sample was analyzed past the EPA recommended holding time
4 Laboratory report indicates gasoline C6-C12
5 MTBE by EPA Method 8260
6 BTEX values are reported off a one point calibration due to rejection of the Internal Standard
7 Laboratory report indicates gasoline C6-C12 + unidentified hydrocarbons >C10
8 Laboratory report indicates that this sample was originally analyzed within holding time. Re-analysis for confirmation or dilution was performed past the recommended holding time
9 Laboratory report indicates unidentified hydrocarbons C6-C12
10 Laboratory report indicates the analysis was performed from a previously opened vial and the results are, therefore, estimated
11 Due to the installation of an extraction system the TOC has been altered, unable to calculate the GWE.
12 Connected to remediation system
13 Not Purge, Grab sample taken.
14 Unable to purge, due to insufficient water
15 Sampled dry well.
16 Laboratory reports indicates that due to the presence of an interferent near its retention time the normal reporting limit was not attained for ethylbenzene. The presence or concentration of the compound cannot be determined due to the presence of this interferent.
17 Laboratory report indicates surrogate recoveries are outside of QC limits for the GC/MS volatile fraction. The analysis was repeated several times and the surrogate recoveries were within QC limits but were unable to be reported due to other QC issues. The re-analysis results confirmed the reported results for the target compounds
18 Laboratory reports indicates due to excessive foaming of the sample, normal reporting limits were not attained
19 Laboratory reports indicates reporting limits for GC/MS volatile compounds were raised due to sample foaming
20 Laboratory reports indicates due to the presence of an interferent near its retention time the normal reporting limit was not attained for total xylenes. The presence or concentration of the compound cannot be determined due to the presence of this interferent.
21 BTEX by EPA Method 8260
22 Laboratory reports indicates due to the presence of an interferent near its retention time, the normal reporting limit was not attained for benzene. The presence or concentration of the compound cannot be determined due to the presence of this interferent.

## SECTION 1: INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (ESA) performed at 130-134 East Santa Clara Street in San Jose, California (Site) as shown on Figures 1 and 2. This work was performed for Bayview Development Group, Inc. in accordance with our April 22, 2019 Agreement (Agreement).

### 1.1 PURPOSE

The scope of work presented in the Agreement was prepared in general accordance with ASTM E 1527-13 titled, "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (ASTM Standard). The ASTM Standard is in general compliance with the Environmental Protection Agency (EPA) rule titled, "Standards and Practices for All Appropriate Inquiries; Final Rule" (AAI Rule). The purpose of this Phase I ESA is to strive to identify, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the property.

As defined by ASTM E 1527-13, the term Recognized Environmental Condition means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not Recognized Environmental Conditions.

Cornerstone Earth Group, Inc. (Cornerstone) understands that Bayview Development Group, Inc. intends to purchase the Site for development of a hotel. We performed this Phase I ESA to support Bayview Development Group, Inc. in evaluation of Recognized Environmental Conditions at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

### 1.2 SCOPE OF WORK

As presented in our Agreement, the scope of work performed for this Phase I ESA included the following:

- A reconnaissance of the Site to note readily observable indications of significant hazardous materials releases to structures, soil or groundwater.
- Drive-by observation of adjoining properties to note readily apparent hazardous materials activities that have or could significantly impact the Site.

- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents at nearby facilities.
- Review of readily available information on file at selected governmental agencies to help evaluate past and current Site use and hazardous materials management practices.
- Review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Interviews with persons reportedly knowledgeable of existing and prior Site uses.
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Phase I ESA are presented in Section 10; the terms and conditions of our Agreement are presented in Appendix A.

### 1.3 ASSUMPTIONS

In preparing this Phase I ESA, Cornerstone assumed that all information received from interviewed parties is true and accurate. In addition, we assumed that all records obtained by other parties, such as regulatory agency databases, maps, related documents and environmental reports prepared by others are accurate and complete. We also assumed that the boundaries of the Site, based on information provided by Bayview Development Group, Inc., are as shown on Figure 2. We have not independently verified the accuracy or completeness of any data received.

### 1.4 ENVIRONMENTAL PROFESSIONAL

This Phase I ESA was performed by Stason I. Foster, P.E. and Peter M. Langtry, P.G., C.E.G., Environmental Professionals who meet the qualification requirements described in ASTM E 1527-13 and 40 CFR 312 § 312.10 based on professional licensing, education, training and experience to assess a property of the nature, history and setting of the Site.

## SECTION 2: SITE DESCRIPTION

This section describes the Site as of the date of this Phase I ESA. The location of the Site is shown on Figures 1 and 2. Tables 1 through 3 summarize general characteristics of the Site and adjoining properties. The Site is described in more detail in Section 7, based on our on-Site observations.

### 2.1 LOCATION AND OWNERSHIP

Table 1 describes the physical location, and ownership of the property, based on information provided by Bayview Development Group, Inc.

## SECTION 3: USER PROVIDED INFORMATION

The ASTM standard defines the User as the party seeking to use a Phase I ESA to evaluate the presence of Recognized Environmental Conditions associated with a property. For the purpose of this Phase I ESA, the User is Bayview Development Group, Inc. The "All Appropriate Inquiries" Final Rule (40 CFR Part 312) requires specific tasks be performed by or on behalf of the party seeking to qualify for Landowner Liability Protection under CERCLA (*i.e.*, the User).

Per the ASTM standard, if the User has information that is material to Recognized Environmental Conditions, such information should be provided to the Environmental Professional. This information includes: 1) specialized knowledge or experience of the User, 2) commonly known or reasonably ascertainable information within the local community, and 3) knowledge that the purchase price of the Site is lower than the fair market value due to contamination. A search of title records for environmental liens and activity and use limitations also is required.

### 3.1 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

An environmental lien is a financial instrument that may be used to recover past environmental cleanup costs. Activity and use limitations (AULs) include other environmental encumbrances, such as institutional and engineering controls. Institutional controls (ICs) are legal or regulatory

restrictions on a property's use, while engineering controls (ECs) are physical mechanisms that restrict property access or use.

The regulatory agency database report described in Section 4.1 did not identify the Site as being in 1) US EPA databases that list properties subject to land use restrictions (*i.e.*, engineering and institutional controls) or Federal Superfund Liens or 2) lists maintained by the California Department of Toxic Substances Control (DTSC) of properties that are subject to AULs or environmental liens where the DTSC is a lien holder.

ASTM E 1527-13 categorizes the requirement to conduct a search for Environmental Liens and AULs as a User responsibility. A search of land title records for environmental liens and AULs was not within the scope of the current Phase I ESA.

### 3.2 SPECIALIZED KNOWLEDGE AND/OR COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Based on information provided by or discussions with Bayview Development Group, Inc., we understand that Bayview Development Group, Inc. does not have specialized knowledge or experience, commonly known or reasonably ascertainable information regarding the Site, or other information that is material to Recognized Environmental Conditions.

## SECTION 4: RECORDS REVIEW

### 4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency databases provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E 1527-13. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix B.

The purpose of the records review was to obtain reasonably available information to help identify Recognized Environmental Conditions. Accuracy and completeness of record information varies among information sources, including government sources. Record information is often inaccurate or incomplete. The Environmental Professional is not obligated to identify mistakes or insufficiencies or review every possible record that might exist with the Site. The customary practice is to review information from standard sources that is reasonably available within reasonable time and cost constraints.

#### 4.1.1 On-Site Database Listings

G. B. Hall was identified on-Site at 134 East Santa Clara Street in EDR's database of historical "cleaners and dyers." This potential dry cleaning business was noted to have been present in 1922.

#### 4.1.2 Nearby Spill Incidents

The existing Chevron gasoline station at 147 E. Santa Clara Street was identified as a closed LUST case. This gasoline station is located across East Santa Clara Street to the northwest of the Site.

Based on the information presented in the agency database report, no other off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or groundwater beneath the Site. The potential for impact was based on our interpretation of the types of incidents, the locations of the reported incidents in relation to the Site and the assumed groundwater flow direction.

### 4.1.3 Further Review of Database Listings

To obtain additional information regarding the nearby Chevron LUST case, a cursory review of readily available documents obtained from the state Geotracker database (http://geotracker.-waterboards.ca.gov) was performed. Geotracker is a database and geographic information system (GIS) that provides online access to environmental data. It tracks regulatory data about leaking underground storage tank (LUST), Department of Defense, Site Cleanup Program and Landfill sites. A brief summary of the spill incident is presented below.

*4.1.3.1 Chevron LUST Case*

The existing Chevron gasoline station at 147 E. Santa Clara Street is a closed LUST case located across East Santa Clara Street to the northwest of the Site, down-gradient with respect to the reported northwesterly groundwater flow direction.

Based on available case closure documentation pertaining to the Chevron spill incident, free product was identified on the groundwater table during the 1980s. Numerous subsequent studies have been completed to characterize the extent of impact. A groundwater extraction and treatment system was operated between 1992 and 1996, which reportedly resulted in a reduction of contaminant concentrations. Subsequent remedial measures included the operation of a groundwater and soil vapor extraction system between 2004 and 2006.

The LUST case was closed by the DEH in 2010. Impacted groundwater from the Chevron property does not appear to have migrated below the Site.

## 4.2 ADDITIONAL ENVIRONMENTAL RECORD SOURCES

The following additional sources of readily ascertainable public information for the Site also were reviewed during this Phase I ESA.

### 4.2.1 City and County Agency File Review

Cornerstone requested available files pertaining to 130, 132 and 134 East Santa Clara Street at the following public agencies: the San Jose Building Department (BD), San Jose Fire Department (FD), and the Santa Clara County Department of Environmental Health (DEH). The information reviewed is summarized in Table 4. The DEH indicated that they have no files pertaining to the Site.

Information obtained from the City's website (https://www.sanjoseca.gov) indicates that the Site is located in the Downtown Commercial Historic District, which is listed in the National Register of Historic Places and composed of both architecturally and historically significant buildings dating from the 1870s to the early 1940s. The District is composed of two city blocks located between East Santa Clara Street to the north, East San Fernando Street to the south, South Third Street to the east, and South First Street to the west. The District continues on the south side of East Santa Clara between South Third and South Fourth Streets.

The City of San Jose Historic Resources Inventory lists the on-Site building at 130-134 East Santa Clara Street as an Identified Site/Structure. The category of Identified Site/Structure (IS) is used when further evaluation of the historic or architectural significant of the structure should be undertaken.

## SECTION 5: PHYSICAL SETTING

We reviewed readily available geologic and hydrogeologic information to evaluate the likelihood that chemicals of concern released on a nearby property could pose a significant threat to the Site and/or its intended use.

### 5.1 RECENT USGS TOPOGRAPHIC MAP

A 1980 USGS 7.5 minute topographic map was reviewed to evaluate the physical setting of the Site. The Site's elevation is approximately 85 to 90 feet above mean sea level; topography in the vicinity of the Site slopes downward gently to the north towards the San Francisco Bay.

### 5.2 HYDROGEOLOGY

Based on our experience and information presented in the California Geotracker database pertaining to nearby properties, the shallow groundwater beneath the Site is likely present at depths of approximately 10 to 20 feet. Groundwater likely flows toward the northwest.

## SECTION 6: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the property. The ASTM standard requires the identification of all obvious uses of the property from the present back to the property's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources.

### 6.1 HISTORICAL SUMMARY OF SITE

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 5.

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1939 and 2012 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix C.

- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historical topographic maps dated 1899, 1953, 1961, 1968, 1973 and 1980; copies of historical topographic maps reviewed are presented in Appendix C.

- **Historical Fire Insurance Maps:** We reviewed Sanborn fire insurance maps dated 1884, 1891, 1915, 1950, 1969 and 1984 obtained from EDR; copies of Sanborn maps are presented in Appendix C.

**Table 5. Summary of Historical Source Information for Site**

Additional Site observations are summarized in Table 6. Photographs of the Site are presented in Section 7.2.1.

### 7.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on May 7, 2019. The Site reconnaissance was conducted by walking representative areas of the Site, including the interiors of the on-Site structures, the periphery of the structures and the Site periphery. Cornerstone staff only observed those areas that were reasonably accessible, safe, and did not require movement of equipment, materials or other objects. Physical obstructions that limited our ability to view the ground surface at the Site included the existing buildings and associated paved areas (typical of developed properties).

### 7.2 OBSERVATIONS

At the time of our visit, the Site was developed with a two story building fronting East Santa Clara Street with commercial space on the first floor and residential space on the second floor. The commercial space was occupied by Seven Seas Sushi at 130 East Santa Clara Street and Frank the Barber at 134 East Santa Clara Street. A basement within the building was observed

to be used be used for storage of restaurant supplies and other miscellaneous items. Grease traps connected to sanitary sewer lines also were observed.

An adjacent on-Site building on the southeast portion of the Site was observed to be used mainly for storage of miscellaneous household items and for parking of a single vehicle. A mezzanine within the structure was observed to have been converted into a residential unit.

Except for common janitorial cleaning supplies, no hazardous materials were observed on-Site. Electricity and/or natural gas fuel sources appeared to be used for building heating/cooling purposes. Potable water appeared to be supplied by the local water service provider. The building presumably is connected to the publically owned sanitary sewer system; no on-Site septic systems were obvious.

## SECTION 8: ENVIRONMENTAL QUESTIONNAIRE AND INTERVIEWS

### 8.1 ENVIRONMENTAL QUESTIONNAIRE / OWNER INTERVIEW

To help obtain information on current and historical Site use and use/storage of hazardous materials on-Site, we provided an environmental questionnaire to the Site owner. The completed questionnaire was not returned to us as of the date of this report.

### 8.2 INTERVIEWS WITH PREVIOUS OWNERS AND OCCUPANTS

Contact information for previous Site owners and occupants was not provided to us. Therefore, interviews with previous Site owners and occupants could not be performed.

## SECTION 9: FINDINGS, OPINIONS AND CONCLUSIONS (WITH RECOMMENDATIONS)

Cornerstone performed this Phase I ESA in general accordance with ASTM E1527-13 to support Bayview Development Group, Inc. in evaluation of Recognized Environmental Conditions. Our findings, opinions and conclusions are summarized below.

### 9.1 HISTORICAL SITE USAGE

Based on the information obtained during this study, the Site was developed by 1884 with what appears to have been a dwelling. By 1915, the existing commercial building fronting East Santa Clara Street was constructed and occupied by two stores. In 1922, G.B. Hall at 134 East Santa Clara Street was included in a city directory listing of cleaning and dying businesses. Subsequent occupants have predominantly been retail stores and restaurants on the first floor and residential space (hotel/rooming house) on the second floor. A barber shop and a sushi restaurant currently occupy the first floor, and residential units are located on the second floor.

In 1915, a structure occupied by a sausage factory also was located on the southeast portion of the Site, along with a stable; these structures were removed by 1950. The existing structure on the southeastern portion of the Site appears to have been constructed as an auto parts

warehouse in 1955. In 1968, Hillis Printing was identified as an occupant of the Site and may have occupied this building for warehouse and printing uses. By 1969, the building was used for grocery storage. The building currently is used mainly for storage of miscellaneous household items and for parking of a single vehicle, and a mezzanine within the structure has been converted into a residential unit.

### 9.2 CHEMICAL STORAGE AND USE

Except for common janitorial cleaning supplies, no hazardous materials were observed on-Site during our visit.

The G.B. Hall cleaning and dying business, and Hillis Printing, indentified as Site occupants in 1922 and 1968, respectively, may have used hazardous materials at the Site such as petroleum based solvents and volatile organic compounds (VOCs). Details regarding operations at these businesses were not indentified within the data sources researched during this study. To evaluate if these business may have impacted the Site, we recommend that sampling and laboratory analyses be conducted to assess subsurface conditions.

Additionally, the Site is located in the Downtown Commercial Historic District which has been used for commercial purposes since the mid- to late-1800s. There is an increased potential for residual contaminants to be present in soil on properties located in areas with a long developed history. If earthwork activities are planned at the Site, or if a higher degree of confidence regarding soil quality is desired, soil sampling should be performed to establish appropriate soil management/disposal practices. If groundwater dewatering activities are anticipated, ground water quality also should be evaluated.

### 9.3 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no hazardous material spill incidents have been reported in the Site vicinity that would be likely to significantly impact the Site. However, as is typical to many commercial areas, several facilities in the vicinity were reported as hazardous materials users. If leaks or spills occur at these facilities, contamination could impact the Site, depending upon the location of the property, the magnitude of the release, and the effectiveness of cleanup efforts.

### 9.4 ASBESTOS CONTAINING BUILDING MATERIALS (ACBMS)

Due to the age of the on-Site structures, building materials may contain asbestos. If demolition, renovation, or re-roofing of the buildings is planned, an asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable ACBMs prior to building demolition or renovation that may disturb the ACBM.

### 9.5 LEAD-BASED PAINT

The Consumer Product Safety Commission banned the use of lead as an additive in paint in 1978. Based on the age of the buildings, lead-based paint may be present. If demolition is planned, the removal of lead-based paint isn't required if it is bonded to the building materials. However, if the lead-based paint is flaking, peeling, or blistering, it should be removed prior to demolition. In either case, applicable OSHA regulations must be followed; these include

requirements for worker training, air monitoring and dust control, among others. Any debris or soil containing lead must be disposed appropriately.

The Residential Lead-Based Paint Hazard Reduction Act of 1992 recognizes that families have a right to know about lead-based paint and potential lead hazards in their homes. Congress directed EPA and HUD to work together to develop disclosure requirements for sales and leases of older (pre-1978) housing. The disclosure of known lead paint hazards and distribution of a lead-based paint information pamphlet to prospective buyers or lessees is required. These and other applicable regulations should be followed if continued use of the on-Site structures for residential purposes is planned.

### 9.6 DATA GAPS

ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by ASTM Standard Designation E 1527-13 despite good faith efforts by the Environmental Professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- Contact information for the former occupants and owners of the Site was not provided to us. Thus, former occupants and owners were not interviewed during this study. Additionally, the environmental questionnaires provided for completion by the Site owners were not returned to us as of the date of this report. The general environmental setting of the Site appears to have been established based on the information reviewed from other data sources. We do not consider these data gaps to be significant.

### 9.7 DATA FAILURES

As described by ASTM Standard Designation E 1527-13, a data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the historical research objectives have not been met. Data failures are not uncommon when attempting to identify the use of a Site at five year intervals back to the first use or to 1940 (whichever is earlier). ASTM Standard Designation E 1527-13 requires the Environmental Professional to comment on the significance of data failures and whether the data failure affects our ability to identify Recognized Environmental Conditions. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data failures were identified:

- The ASTM standard requires the identification of all obvious uses of the Site from the present back to the Site's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources. The earliest record obtained during this study was a Sanborn map from 1884 that shows the Site to have already been developed with a residence. Although earlier records were not available, the Site's first developed use was likely similar to that shown on the 1884 Sanborn map. Thus, this data failure is not considered to be significant.

### 9.8 RECOGNIZED ENVIRONMENTAL CONDITIONS

Cornerstone has performed a Phase I ESA in general conformance with the scope and limitations of ASTM E 1527-13 of 130-134 East Santa Clara Street, San Jose, California. This assessment identified the following Recognized Environmental Conditions[1].

- The G.B. Hall cleaning and dying business, and Hillis Printing may have used hazardous materials at the Site such as petroleum based solvents and VOCs. If released at the Site, there is potential that underlying soil, soil vapor and/or groundwater quality may have been impacted.

## SECTION 10: LIMITATIONS

Cornerstone performed this Phase I ESA to support Bayview Development Group, Inc. in evaluation of Recognized Environmental Conditions associated with the Site. Bayview Development Group, Inc. understands that no Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. Bayview Development Group, Inc. understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Findings, opinions, conclusions and recommendations presented in this report are based on readily available information, conditions readily observed at the time of the Site visit, and/or information readily identified by the interviews and/or the records review process. Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information or from interviews of persons knowledgeable of Site use. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater, soil vapor and/or air samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E 1527-13, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

Bayview Development Group, Inc. may have provided Cornerstone environmental documents prepared by others. Bayview Development Group, Inc. understands that Cornerstone reviewed and relied on the information presented in these reports and cannot be responsible for their accuracy.

[1] The presence or likely presence of hazardous substances or petroleum products on the Site: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

This report, an instrument of professional service, was prepared for the sole use of Bayview Development Group, Inc. and may not be reproduced or distributed without written authorization from Cornerstone. It is valid for 180 days. An electronic transmission of this report may also have been issued. While Cornerstone has taken precautions to produce a complete and secure electronic transmission, please check the electronic transmission against the hard copy version for conformity.

Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

# APPENDIX A – TERMS AND CONDITIONS

**CORNERSTONE EARTH GROUP, INC.**
**TERMS AND CONDITIONS**

**1. Agreement**

1.1 Cornerstone Earth Group, Inc.'s ("Cornerstone") services are defined by and limited to (a) those services (the "Work") described in the attached proposal, which is incorporated herein by this reference, and (b) these Terms and Conditions of Agreement ("Terms and Conditions"). Together, the proposal and Terms and Conditions form the "Agreement." This Agreement represents the entire agreement between the Client and Cornerstone (collectively, the "Parties") and supersedes all prior negotiations, representations, or agreements, either written or oral. The Agreement can only be amended by a written instrument signed by both the Client and Cornerstone. In the event that the Client authorizes the Work by means of a purchase order or other writing ("Confirmation"), it is expressly agreed that these Terms and Conditions shall apply, and any terms, conditions or provisions appearing in the Confirmation are void and inapplicable except to the extent the Confirmation authorizes the Work and binds the Client to this Agreement.

1.2. Failure to immediately enforce any provision in this Agreement shall not constitute a waiver of the right to enforce that provision or any other provision. No waiver by the Parties of a breach of any term or covenant contained in this Agreement, whether by conduct or otherwise, in any one or more instances shall be deemed to be or construed as a further or continuing waiver of any such breach or as a waiver of a breach of any other term or covenant in this Agreement.

**2. Scope of Services**

2.1 Cornerstone will serve the Client by providing professional counsel and technical advice based on information furnished by the Client. The Client will make available to Cornerstone all known information regarding existing and proposed conditions of the site, and will immediately transmit any new information that becomes available or any change in plans. The Client and Cornerstone agree that Cornerstone, its officers, directors, employees, agents and/or subcontractors shall not be liable for any claims, damages, costs, or losses arising from or in any way related to conditions not actually encountered during the course of Cornerstone's Work and Cornerstone shall not have any liability or responsibility for losses resulting from inaccurate or incomplete information supplied by the Client, and the Client agrees to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against claims, damages, costs or losses arising therefrom. Cornerstone, its officers, directors, employees, agents and/or subcontractors shall not be liable for failing to discover any condition the discovery of which would reasonably require the performance of services not authorized by the Client.

**3. Terms of Payment**

3.1 The Client's obligation to pay for the Work is in no way dependent upon the Client's ability to obtain financing. The Client's obligation to pay for the Work is in no way dependent upon the Client's successful completion of the Client's project. No provision of this Agreement shall be construed to constitute a "Pay-When-Paid" clause or a "Pay-If-Paid" clause.

3.2 Payment for the Work shall be due and payable upon receipt of Cornerstone's invoice. To be recognized, any dispute over charges must be claimed in writing within thirty (30) calendar days of the billing date. Any dispute over an invoice amount shall not affect the Client's obligation to pay invoice amounts not in dispute. Amounts unpaid thirty (30) calendar days after the issue date of Cornerstone's invoice shall be assessed a service charge of 1 percent per month on balances outstanding.

3.3 Timely payment is a substantial condition of the Client's performance under this Agreement. Cornerstone may at its option withhold delivery of reports or other work product or suspend performance of the Work pending receipt of payments for all past due invoices and Cornerstone, its officers, directors, employees, agents and/or subcontractors shall have no liability to the Client for delay or damage caused because of such withholding or suspension. In the event that Cornerstone must take legal action to enforce this Agreement for payment for the Work performed and Cornerstone prevails, Cornerstone will be reimbursed by the Client for all expenses, including but not limited to reasonable attorney's fees and litigation costs.

**4. Standard of Care**

4.1 While performing the Work under this Agreement, Cornerstone shall exercise the degree of care and skill ordinarily exercised under similar circumstances by members of the environmental and geotechnical engineering consulting professions, as applicable, performing the kind of services to be performed hereunder and practicing in the same or similar locality at the same period of time.

4.2 Except for the express promise set forth in Subsection 4.1 herein, Cornerstone neither makes, nor offers, nor shall Cornerstone be liable to the Client for any express or implied warranties with respect to the performance of the Work.

**5. Force Majeure**

5.1 Cornerstone will diligently proceed with its services and will complete the Work in a timely manner, but it is expressly agreed to and understood by the Client that Cornerstone shall not be held responsible for delays occasioned by factors beyond its control, nor by factors which could not reasonably have been foreseen at the time of the execution of the Agreement between the parties.

5.2 Except for the obligation to pay for the Work performed and expenses incurred, neither Cornerstone nor the Client shall be liable for its failure to perform hereunder, in whole or in part, due to contingencies beyond its reasonable control, included, but not limited to, strikes or other concerted acts of workmen not in Cornerstone's employ, whether direct or indirect, riots, war, acts of terrorism, fire, floods, storms, washouts, acts of God or the public enemy, explosions, accidents, epidemics, breakdowns, injunctions, compliance with any law, regulation or order, whether valid or invalid, of the United States of America or any governmental body or any instrumentality thereof, whether now existing or hereafter created.

**6. Effect of Delay or Impediment to Work**

6.1 If any event occurs which causes or may cause Cornerstone: (a) to be impeded in its performance of the Services; or (b) to be delayed in the completion of the Work within the time provided in the attached proposal and/or in an applicable Change Order due to any act or omission of the Client, its officers, directors, employees and agents, or the Client's contractors, or due to any contingency beyond Cornerstone's control as provided in Section 5 herein, Cornerstone shall notify the Client in writing within ten (10) business days of the date on which Cornerstone becomes aware of such event.

6.2 The Client shall notify Cornerstone in writing of the Client's agreement or disagreement with Cornerstone's claim of an impediment or delay to performance within five (5) business days after receipt of Cornerstone's notice under Subsection 6.1. If the Client agrees with Cornerstone's claim, the time for performance of such requirement may be extended as mutually agreed in writing by the parties as provided in Subsection 1.1. If the Client disputes Cornerstone's assertion of an impediment or delay, such dispute shall be resolved pursuant to Section 17.

6.3 Impediments or delays to performance, addressed pursuant to this Section, shall not (a) constitute a breach hereunder; (b) give rise to any special right to terminate this Agreement; or (c) give rise to a claim by the Client for damages or other relief, if and to the extent that such impediment or delay is due to any act or omission of the Client, its officers, directors, employees and agents, or the Client's contractors, or due to any contingency beyond Cornerstone's control as provided in Section 5.

**7. Right of Entry**

7.1 Unless otherwise agreed in writing, the Client shall furnish and/or secure right of entry to the Site described in the proposal for Cornerstone personnel and equipment in order for Cornerstone to perform the Work. The Client shall waive any claim against Cornerstone, its officers, directors, employees, agents and/or subcontractors and agree to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors from any claims arising from entry onto the Site which is the subject of the Work.

7.2 The Parties acknowledge and agree that although Cornerstone will take reasonable precautions to minimize damage to property, including landscapes, hardscapes, crops and underground utilities, any and all damages, losses or expenses which could result from damage to such property due to Cornerstone's performance of the Work under this Agreement shall be the sole and exclusive responsibility of the Client provided that such damages, losses or expenses are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein. The Client shall indemnify, defend and hold harmless Cornerstone, its officers, directors, employees, agents and/or subcontractors from any damages, losses or expenses including, without limitation, attorney's fees, sustained or incurred by Cornerstone, its officers, directors, employees, agents and/or subcontractors as a result of any and all claims arising out of any damage to subsurface utilities due to Cornerstone's performance of the Work under this Agreement, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.

**8. Monitoring of Construction**

8.1 The Client acknowledges and understands that unanticipated or changed conditions may be encountered during construction. There is a substantial risk to the Client and to Cornerstone if Cornerstone is not engaged to provide complete services, including but not limited to, construction observation services. Such risks include the increased likelihood of misinterpretation of Cornerstone's findings and conclusions and error in implementing recommendations by Cornerstone. If Client fails to retain Cornerstone to provide complete services, the Client agrees, notwithstanding any other provisions of this Agreement, to the fullest extent permitted by law, to indemnify and hold harmless Cornerstone, its officers, partners, employees and Cornerstones from and against any and all claims, suits, demands, liabilities, losses, damages or costs, including reasonable attorneys' fees and defense costs arising out of or in any way connected with the Work or arising out of implementing or interpreting Cornerstone's work product except when the Claim arises from the sole negligence of Cornerstone or where the Claim arises from the willful, wanton or reckless conduct of Cornerstone.

8.2 Cornerstone shall not be required to make exhaustive or continuous on-site observations to check the quality or quantity of the Work and shall not be responsible for any contractor's failure to carry out the work in accordance with the contract documents.

8.3 Cornerstone shall not be responsible for the acts or omissions of any contractor or subcontractor or any of the contractors' or subcontractors' agents or employees or other persons performing any work on the Project.

**9. Changed Conditions**

9.1 If, during the term of this Agreement, circumstances or conditions that were not originally contemplated by or known to Cornerstone are revealed, to the extent that they affect the scope of services, compensation, schedule, allocation of risks or other material terms of this Agreement, Cornerstone may call for renegotiation of appropriate portions of this Agreement. Cornerstone shall notify the Client of the changed conditions necessitating renegotiation, and Cornerstone and the Client shall promptly and in good faith enter into renegotiation of this Agreement to address the changed conditions. If terms cannot be agreed to, the parties agree that either party has the absolute right to terminate this Agreement, in accordance with the termination provision hereof.

**10. Jobsite Safety**

10.1 Neither the professional activities of Cornerstone nor the presence of Cornerstone or its employees, subconsultants and subcontractors shall relieve the Client or the Client's General Contractor of its obligations, duties and responsibilities, including, but not limited to, health and safety programs. Cornerstone and its personnel have no authority to exercise any control over the site or any construction contractor or its employees in connection with their work or any health or safety programs or procedures. The Client acknowledges and agrees that Cornerstone shall not be responsible for jobsite safety.

**11. Hazardous Materials and Environmental Contamination**

11.1 The Client hereby warrants that if it knows or has any reason to assume or suspect that hazardous or toxic substances, or any other type of environmental hazard, contamination or pollution may exist at the Site, the Client will immediately inform Cornerstone to the best of the Client's knowledge of such hazardous or toxic substances, environmental hazard, contamination or pollution's type, quantity and location.

11.2 Cornerstone, its officers, directors, employees, agents and/or subcontractors shall have no title to, ownership of, or legal responsibility and/or liability for any and all contamination at the Site, including, but not limited to, the groundwater thereunder. "Contamination at the Site" includes but is not limited to any hazardous or toxic substance, or any other type of environmental hazard, contamination or pollution present at or under the Site, including, but not limited to the ground water thereunder, which is not brought onto the Site by Cornerstone, its officers, directors, employees, agents and/or subcontractors.

11.3 Cornerstone and the Client agree that the discovery of unanticipated Contamination at the Site may constitute a changed condition mandating renegotiation and/or termination of this Agreement. Cornerstone and the Client agree that the discovery of unanticipated Contamination at the Site may make it necessary for Cornerstone to take immediate measures to protect the public health, safety and the environment. The Client agrees that Cornerstone may take any or all measures that in Cornerstone's professional opinion are justified to preserve and protect the health and safety of Cornerstone's personnel, the public and the environment, and the Client agrees to compensate Cornerstone for the cost of such services.

11.4 The Client agrees to indemnify, defend and hold harmless Cornerstone, its officers, directors, employees, agents and/or subcontractors from any and all damages, losses or expenses, including, but not limited to, reasonable attorney's fees and legal costs connected therewith, liabilities, penalties and fines sustained by Cornerstone, its officers, directors, employees, agents and/or subcontractors as a result of any and all claim with respect to and arising out of any and all Contamination at the Site, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.

11.5 Subsurface sampling may result in unavoidable contamination of certain subsurface areas, as when a probe or boring is advanced or drilled through a contaminated area into a clean soil or water-bearing zone. Because of the risks posed by such work, and because subsurface sampling is often a necessary part of Cornerstone's Work, the Client hereby agrees to waive all claims against Cornerstone, its officers, directors, employees, agents and/or subcontractors with respect to and arising out of any and all subsurface sampling, including but not limited to claims relating to cross-contamination occurring because of such subsurface sampling, provided that such claims are not the result of Cornerstone's breach of the standard of care set forth in Subsection 4.1 herein.

**12. Disposal of Samples and Drill Cuttings**

12.1 Unless mutually agreed in writing by the Parties as provided in Subsection 1.1 herein, Cornerstone shall hold samples collected during the performance of the Work no longer than thirty (30) calendar days after their date of collection. Drill cuttings and waste materials will be left on-Site. In the event that soil, rock, water, drill cuttings and/or other samples or materials are contaminated or are suspected to contain hazardous materials or other toxic substances hazardous or detrimental to public health, safety or the environment as defined by federal, state or local law, Cornerstone will, after completion of testing, notify the Client of the same in order for the Client to arrange for the disposal of the samples and/or materials. The Client recognizes and agrees that Cornerstone at no time assumes title to said samples and/or materials, and that the Client is responsible for the disposal of such samples and/or materials. The Client agrees to pay all costs associated with any storage, transport and/or disposal of samples and/or materials, and to defend and indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors from any and all claims arising out of or in any way related to the storage, transport and/or disposal of asbestos, hazardous or toxic substances, and/or pollutants, including but not limited to any samples and/or materials.

**13. Use and Ownership of Documents**

13.1 All reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents and instruments prepared by Cornerstone as instruments of service shall remain the property of Cornerstone. Cornerstone shall retain all common law, statutory and other reserved rights, including copyright thereto. In the event the Client, the Client's contractors or subcontractors, or anyone for whom the Client is legally liable makes or permits to be made any changes to reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents prepared by Cornerstone without obtaining Cornerstone's prior written consent, the Client shall assume full responsibility for the results of such changes. Therefore, the Client agrees to waive any claim against Cornerstone and to release Cornerstone from any liability arising directly or indirectly from such changes. In addition, the Client agrees, to the

fullest extent permitted by law, to indemnify and hold harmless Cornerstone from any damages, liabilities or costs, including reasonable attorney's fees and costs of defense, arising from such changes.

The Client agrees that all reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents and other services furnished to the Client or its agents and/or employees by Cornerstone, which are not paid for, shall be immediately returned upon demand and may not be used by the Client for any purpose. Any reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents, advice or opinions provided by Cornerstone to the Client as part of the Work are provided for the sole and exclusive use of the Client for specific application to the Site detailed in this Agreement. Any third party use of any drafts, reports, letters, plans, figures, specifications, computer files, field data, logs, notes and other documents, advice or opinion of Cornerstone is the sole responsibility of the Client.

**14. Insurance**

14.1 Cornerstone, its officers, directors, employees and agents have and shall maintain during the term of this Agreement insurance in the following types: (a) Worker's Compensation Insurance; (b) Employer's Liability Insurance; (c) Commercial General Liability Insurance (GLI); and (d) Professional Liability Insurance.

14.2 Cornerstone shall, at the Client's request, provide the Client with a certificate of insurance or other satisfactory evidence that such insurance has been obtained and are maintained in force through the term of this Agreement. Any additional insurance policy or increase in the coverage of existing insurance required by the Client shall constitute an additional expense under this Agreement, and the Client shall reimburse Cornerstone for any additional premiums and costs incurred by Cornerstone in connection with obtaining such additional insurance.

**15. Prevailing Wage Obligations**

15.1 The Client shall notify Cornerstone in writing if the Work contemplated by this Agreement constitutes a "public work" under any and all federal, state and/or local prevailing wage laws, and/or living wage laws, including but not limited to the Davis-Bacon Act and the provisions of California Labor Code §§ 1720 *et seq.* In addition, the Client shall notify Cornerstone if Cornerstone is obligated by statute, any public contracting authority and/or a developer to pay prevailing wages and benefits and/or any predetermined wages or benefits (collectively, "prevailing wage obligations"). In the event that Cornerstone must adhere to federal, state and/or local prevailing wage obligations for the Work performed, the Client shall provide Cornerstone with any and all prevailing wage determinations applicable to the Work to be performed under this Agreement. Any prevailing wage obligations might affect the payment terms contemplated by this Agreement and thus constitute a changed condition mandating renegotiation and/or termination of this Agreement. The Client understands and agrees that Cornerstone will rely on the representations made by the Client with regard to prevailing wage obligations and the Client agrees to indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney's fees and legal costs, arising from Cornerstone's reliance upon the Client's representations regarding prevailing wage obligations.

**16. Limitations—THIS CLAUSE LIMITS CORNERSTONE'S LIABILITY**

16.1 Cornerstone shall not be responsible for the validity or accuracy of data collected by others or for interpretations made by others.

16.2 Cornerstone's relationship with the Client under this Agreement shall be that of an independent contractor. Nothing in this Agreement shall be construed to designate Cornerstone, its officers, directors, employees, agents and/or subcontractors as employees, agents, joint ventures or partners of the Client. Cornerstone shall have no authority to bind, commit or obligate the Client in any manner and shall not hold itself out to third parties as being capable of doing so.

16.3 The Client and Cornerstone have discussed the risks and rewards associated with this project, as well as Cornerstone's fee for services. After negotiation, the Client and Cornerstone have expressly agreed to allocate certain of the risks so that, to the fullest extent permitted by law, the total aggregate liability of Cornerstone, its officers, directors, employees, agents and subcontractors to the Client and all third-parties is limited to $50,000 or the amount of Cornerstone's fee, whichever is greater, for any and all injuries, damages, claims, losses, expenses, or claim expenses (including attorney's fees) arising out of this Agreement from any cause or causes. Such causes include but are not limited to Cornerstone's negligence, errors, omissions, strict liability, breach of contract or breach of warranty. In no event shall Cornerstone, its officers, directors, employees, agents and/or subcontractors be liable in contract, tort, strict liability, warranty or otherwise, for any special, incidental or consequential damages, such as but not limited to delay, disruption, loss of product, loss of anticipated profits or revenue, loss of use of any equipment or system, non-operation or increased expense of operation of any equipment or systems, cost of capital, or cost of purchase or replacement equipment systems or power.

16.4 Notwithstanding any other provision of this Agreement , the total aggregate liability of Cornerstone, its officers, directors, employees, agents and subcontractors to the Client and all third parties, including attorney's fees awarded pursuant to this Agreement, for claims, damages or losses arising out of the treatment, transport, storage, discharge, dispersal or release of hazardous materials, shall be limited to $50,000 or the amount of Cornerstone's fee, whichever is greater and regardless of the legal theory under which liability is imposed.

16.5 For an additional 5% of Cornerstone's total fee or $500, whichever is greater, Cornerstone will raise the limitation of liability up to the amount that actually would be paid by Cornerstone's insurance carriers if Client and Cornerstone initial below:

LIMITATION INCREASE: THE LIMITATION OF LIABILITY IS INCREASED TO THE ACTUAL AMOUNT PAID BY CORNERSTONE'S INSURANCE CARRIERS IN EXCHANGE FOR AN ADDITIONAL FEE OF 5% OF THE TOTAL SERVICE CHARGE OR $500, WHICHEVER IS GREATER.

16.6 The Client shall indemnify, defend and hold harmless Cornerstone and its officers, directors, employees, agents and subcontractors from any and all damages, losses, or expenses, included but not limited to reasonable legal expenses and attorney's fees connected therewith, sustained by Cornerstone, its officers, directors, employees, agents and subcontractors as a result of any and all claims, demands, suits, causes of action, proceedings, judgments and liabilities for property damage, statutory penalty and/or personal injury with respect to and arising out of the Client's negligent acts, omissions or material breach of this Agreement. In the event a claim is the result of joint negligent acts or omissions of the Client and Cornerstone, the Client's duty of indemnification shall be in proportion to its respective allocable share of the joint negligence.

16.7 Client acknowledges and agrees that in no event shall any action or proceeding be brought against Cornerstone or proceeding be brought against Cornerstone by Client or its assignees for any claim or cause of action arising from or in any way related to the Work or this Agreement unless such action or proceeding is commenced within three (3) years from the Date of Completion of Work provided by Cornerstone under this Agreement. The Date of Completion shall be the date of the final invoice for the Work performed under this Agreement.

16.8 If Client requests that Cornerstone's work product be relied upon by a third party, including, but not limited to a lender, Client agrees to provide the third party with a copy of these terms and conditions, and Client agrees to require said third party to agree to limit Cornerstone's total liability to Client and any third party as described in paragraph 16.4 and Client agrees to indemnify Cornerstone, its officers, directors, employees, agents and/or subcontractors against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney's fees and legal costs, arising from third party claims, damages, costs and losses arising our of or in any way related to Work.

**17. Disputing Cornerstone's Performance**

17.1 Except as provided in Section 6 and Subsection 17.2 herein, if Cornerstone shall breach any provision herein, the Client shall notify Cornerstone within five (5) business days of the Client's knowledge of such breach. Except as provided in Subsections 17.3 herein, upon receipt of the Client's notice, Cornerstone shall have the option to take such corrective measures, if any, to remedy the breach, and shall notify the Client within five (5) business days after receipt of the

Client's notification of the corrective measures Cornerstone shall take and the estimated time period within which the corrective measures shall be taken. In no event shall Cornerstone be liable to the Client for any damages without being given a reasonable opportunity to remedy its breach as provided herein.

17.2 The Client shall make no claim for professional negligence unless the Client has first provided Cornerstone with a written certification executed by an independent Consultant currently practicing in the same discipline and locality as Cornerstone and licensed in the State of California. This certification shall (a) contain the name and license number of the certifier; (b) specify the acts or omissions that the certifier contends are not in conformance with the standard care for a Cornerstone performing professional services under similar circumstances; and (c) state in detail the basis for the certifier's opinion that such acts or omissions do not conform to the standard of care. This certificate shall be provided to Cornerstone no less than thirty (30) calendar days prior to the presentation of any claim or the institution of any mediation, arbitration or judicial proceeding.

17.3 Cornerstone agrees that upon receipt of written notice from the Client pursuant to Subsection 17.2 herein it will implement necessary corrections to the Work performed by Cornerstone that fails to conform to the standard of care that Cornerstone has accepted pursuant to Subsection 4.1, as mutually agreed in writing by the Parties as provided in Subsection 1.1. herein, if such written notice is received within one (1) year of the performance of the Work failing to conform to Subsection 4.1. If Cornerstone has been paid by the Client for such Work, Cornerstone shall perform the corrections at its own expense. If Cornerstone has not been paid by the Client for such Work, and the Work is subsequently corrected to conform with the standard of care that Cornerstone has accepted pursuant to Subsection 4.1, the Client shall pay Cornerstone in accordance with Section 3 herein.

17.4 In no event shall Cornerstone, its officers, directors, employees, agents and/or subcontractors be liable for any special, incidental or consequential damages, such as but not limited to delay, disruption, loss of product, loss of anticipated profits or revenue, loss of use of any equipment or system, non-operation or increased expense of operation of any equipment or systems, cost of capital, or cost of purchase or replacement equipment systems or power, or any other incidental, special, indirect or consequential damages of any kind or nature whatsoever resulting from Cornerstone's performance or failure to perform the Work in accordance with the standard of care that Cornerstone has accepted pursuant to Subsection 4.1.

**18. Termination**

18.1 Cornerstone shall have the right to terminate this Agreement ten (10) business days after written notice is sent to the Client if (a) the Client fails to pay any of Cornerstone's undisputed invoices within sixty (60) days from the date of the invoice; or (b) Cornerstone's attached proposal and/or the Work was based upon misinformation, whether by the Client or a third party, or upon information not fully disclosed to Cornerstone, whether by the Client or a third party.

18.2 Except as provided for in Section 6, and after compliance with Section 17, the Client shall have the right to terminate this Agreement ten (10) business days after written notice is sent to Cornerstone if Cornerstone fails to comply in any material respect with any of the material provisions herein and subsequently fails to notify the Client pursuant to Subsections 17.1 and 17.3 of the corrective measures Cornerstone intends to take.

18.3 The termination of this Agreement by Cornerstone under Subsection 18.1 herein, or by the Client under Subsection 18.2 herein, shall not relieve the Client of its obligations to pay Cornerstone for any of the Work performed and expenses incurred as of the date of termination, and shall not constitute a waiver by Cornerstone or the Client of any cause of action for breach of this Agreement or any provision herein.

**19. Miscellaneous Provisions.**

19.1 "Indemnity" Defined. The term "indemnify" shall mean indemnify, defend and hold harmless from and against any and all claims, liabilities, suits, demands, losses, costs and expenses, including but not limited to reasonable attorney's fees and all legal costs incurred on appeal, and all interest thereon, accruing or resulting to any and all persons, firms, or any other legal entities, on account of any damages or losses to property or persons, including death or economic losses, arising out of the item, matter, action or inaction specified in the specific provision.

19.8 Publicity. Unless otherwise mutually agreed in writing by the parties as provided in Subsection 1.1, Cornerstone may use and publish the Client's name and a general description of Cornerstone's services with respect to the Work in describing Cornerstone's experience and qualifications to other clients or prospective clients.

**SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

**STANDARD ENVIRONMENTAL RECORDS**

***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/11/2019 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 10 CA ENVIROSTOR sites within approximately 1 mile of the target property.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 15 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 17 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

| Potential Media Affect: | Other Groundwater (uses other than drinking water) |
| Potential Contaminants of Concern: | MTBE / TBA / Other Fuel Oxygenates, Gasoline |
| Site History: | 12/83, a leak in the gasoline product line was discovered near the southwestern edge of the fuel dispenser island and a corroded section of pipe was replaced to stop the leak. 1/84, 6 groundwater monitoring wells were installed and commenced weekly monitoring for free product (FP). 2/84, one inch of FP measured in well MW-5 and also present in monitoring wells located near the USTs. 6/84, a pinhole sized leak was detected and repaired in the dispenser filter located at the southeastern edge of the fuel dispenser island. 2 additional monitoring wells were installed 10/84. 11/84 a hole was discovered near the northwest corner of a UST containing regular gasoline. The gasoline was pumped out of the UST, and the UST was removed from service until it was replaced in 1985. 5/85, USTs and piping were replaced. Product conveyance piping was also replaced with cathodic-protected conveyance piping. 11/89, advanced 6 soil borings, installed 2 wells, and determining the hydraulic conductivity and |

transmissivity after performing slug tests. Three areas containing soil and/or groundwater contamination were identified in the investigation: UST complex; waste oil UST and steam-cleaning area; and dispsenser islands in the southeast portion of the Site. 3/90, wells MW-6 and MW-8 located near the waste oil UST and steam-cleaning area were destroyed. Both wells had contained measurable amounts of FP and it was suspected that oily residue from the steam cleaning process was collecting in them and providing an additional source of groundwater contamination. Well MW-11 was installed as a replacement. Jan-Aug 1990, 5 soil borings advanced onsite; 19 borings and 1 monitoring well were advanced off-site. 4 extraction wells were also installed onsite along the northern border of the property. 4/90, conducted hydraulic testing and a soil vapor extraction (SVE) pilot study. The results of the SVE pilot study indicated that a full-scale SVE system could be used to remediate hydrocarbons in the unsaturated soils beneath the Site. 12/91, 4 off-site monitoring wells were installed. Groundwater extraction and treatment (GWET) system operated 2/92-6/96 and removed approximately 1,765,354 gal. of water and removed approximately 17 pounds of petroleum hydrocarbons. 5/00, 11 soil borings and 2 piezometers were advanced. 2002, a risk-based corrective action (RBCA) assessment was conducted to determine if the petroleum hydrocarbons in the soil and groundwater on and off-site presented a risk to human health. The RBCA indicated that all soil concentrations were below risk-based screening levels (RBSLs) assigned by the Regional Water Quality Control Board for the specified receptors (commercial workers, construction workers on and residents). Residents were included as on-site receptors based on the proximity of the Site to the senior apartment complex and the potential for the dissolved hydrocarbon plume to migrate beneath the building. The only exposure pathway of concern identified in the RBCA assessment was inhalation of benzene vapors in indoor air. The theoretical excess cancer risks and hazard quotients (for non carcinogens) were less than the respective Cal-EPA limits of one in a million. 1/04 a 2-phase extraction and treatment (TPET) system began operating and ran through 11/06. 9/08, 9 soil borings were advanced to collect confirmation soil samples.

Potential Contaminants of Concern: Heating Oil / Fuel Oil
Site History: UST found in basement of apartment building. It is believed that it was installed after 1926 to store bunker fuel for boilers located in the basement. The boilers were reportedly used until the mid to late 1950s. In January 2015, the UST was found and it contained dark black viscous material. Approximately 1,950 gallons of mostly water and bunker fuel was pumped from the tank. Due to location, UST will be closed in place. Background: In January 2015 the property owner initiated the process of closing the UST in place by removing any residual contents and filling it with a cement slurry. Part of this closure in place included soil and groundwater sampling from areas around the UST. Petroleum hydrocarbons were detected on soil and groundwater samples around the UST. Contaminants detected in soil and groundwater include Total Petroleum Hydrocarbons as gasoline (TPHg), Total Petroleum Hydrocarbons and diesel (TPHd), and Oil and Grease range hydrocarbons. No wells were installed and only grab groundwater samples collected. Two phases of investigation have adequately defined the nature and extent of contamination which is limited in extent.

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

| Site History: | The "Block 2 - City of San Jose Parking Lot Site" is located at 8 East San Fernando Street, between South First Street and South Second Street, in downtown San Jose. This 1-acre parcel has been used as a paved parking lot since at least 1980. Prior to 1980, the Site was occupied by several small stores and the OB Hale and Company Department Store. Prior to 1900, the Site operation included a paint shop. Block 3, an adjacent lot, has similar land use histories and has detected VOCs and TPHs in soil and groundwater. A former coal gasification plant was formerly located about 300 feet away. The Redevelopment Agency of the City of San Jose (the Agency) is currently planning to construct a new mixed-use building complex and underground parking structure. Specifically, the planned development includes excavation of the entire site to a depth of about 40 feet below the current surface to accommodate a three-level, underground parking structure. The space above the parking structure at ground level is planned for commercial use. The space above the commercial area is planned for hotel and residential use. To date, three rounds of site investigation have been conducted to study Site soil, groundwater, and soil gas. Investigation results were used in a Human Health Risk Evaluation and compared to screening levels such as CHHSL, ESLs and PRGs for the proposed exposure scenarios. Overall, the Site data compare favorably to these screening levels. |

**BLOCK 2 CITY OF SAN JOSE PARKING LOT (Continued)** **S108937591**

Exceedances of those screening levels were found in only one soil sample for mercury (21 mg/kg vs. 18 mg/kg) and in soil gas samples for 1,3-butadiene (16.0 vs. 4.85 ug/cubic meter). However, the targeted exposure pathway may not even be complete when considering the proposed land use scenario (i.e., with the underground parking) and construction method.
