SUBJECT: Filing of Notice of Determination pursuant to Public Resources Code section 21108

State Clearinghouse Number: 2021090076

Project Title: Chiles Pope Bridge Replacement (Notification of Lake or Streambed Alteration, No. EPIMS-NAP-30757-R3)

Project Location (Napa County): The Project is located at Chiles Creek, a tributary to Lake Hennessey, and an unnamed tributary of Chiles Creek, along Chiles Pope Valley Road, in the County of Napa, State of California; Latitude 38.519085°N, Longitude 122.349143°W; Assessor's Parcel Numbers: 025-440-003-000, 025-440-002-000, and 025-440-047-000.

Project Description: The California Department of Fish and Wildlife has executed Lake and Streambed Alteration Agreement EPIMS Notification No. EPIMS-NAP-30757-R3, pursuant to Section 1602 of the Fish and Game Code to the County of Napa.

The Project is limited to the replacement of an existing bridge structure. The new bridge will be longer than the existing bridge in order to widen the creek channel and eliminate constriction posed by the existing bridge. The new bridge structure will consist of an approximately 105-foot-long by 26-foot-wide two-span cast-in-place prestressed concrete slab bridge that is two feet in depth. Two new abutments will be installed. Abutments will consist of a seat-type abutment cap beam supported on soldier piles with ground anchors. One bent will be installed in the center of the channel to support the bridge, consisting of four 3-foot cast-in-place-drilled-hole shaft extensions. The Project will also install four new retaining walls. Pile installation for the retaining walls and abutments will be performed from the roadway. Excavation and installation of three retaining walls, abutment facing, and bent will be constructed from within the creek. A 30-foot-wide temporary access road into the creek will be created by grading the roadway approach and creek bank upstream of the existing bridge. A temporary stream diversion will be installed with cranes operated from the road and consist of an upstream cofferdam consisting of rock slope protection and sandbags, directing flow into two 24-inch diameter culverts that will extend 400 linear feet. The Project will result in temporary impacts to 0.22 acres and 450 linear feet of stream and riparian habitat from the temporary diversion of water and the installation of the temporary access road into the creek. The Project will result in permanent impacts to 239 square feet and 231 linear feet of stream and riparian habitat and will remove 24 riparian trees.

This is to advise that CDFW, acting as a Responsible Agency, approved the project described above on July 5, 2023, and has made the following determinations regarding the project pursuant to California Code of Regulations section 15096, subdivision (i):

1. The project will not have a significant effect on the environment. This determination is limited to effects within CDFW's permitting jurisdiction as a Responsible Agency.

Notice of Determination

2. CDFW considered the **Mitigated Negative Declaration** prepared by the Lead Agency for this project pursuant to California Code of Regulations section 15096, subdivision (f).
3. Mitigation measures **were** made a condition of CDFW's approval of the project.
4. A Mitigation Reporting or Monitoring Plan **was** adopted by CDFW for this project.
5. A Statement of Overriding Considerations was not adopted by CDFW for this project.
6. Findings were not made by CDFW pursuant to California Code of Regulations section 15091.

The Mitigated Negative Declaration prepared for the project is available to the general public at the office location listed above for the Lead Agency. CDFW's record of project approval as a Responsible Agency is available at

CDFW's regional office.
