Mr. Steve Guzowski
Great Scott Tree Service, Inc.
10761 Court Avenue
Stanton California, 90680

RE: Phase I Environmental Site Assessment
20865-20795 Canada Road
Lake Forest, California 92630
Hillmann Project No: C3-8091

Dear Mr. Guzowski:

Hillmann Consulting, LLC, is pleased to provide the results of our Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in general accordance with the scope and limitations of ASTM Practice E 1527-13, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 714-634-9500.

Sincerely,

Hillmann Consulting, LLC

Shilpa Sunil
Environmental Project Manager

Ryan Terwilliger
West Coast Operations Manager

List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM	– Asbestos Containing Material
AOC	– Area of Concern
AST	– Aboveground Storage Tank
ASTM	– American Society for Testing Materials
BER	– Business Environmental Risk
CEA	– Classification Exception Area
CERCLA	– Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	– Comprehensive Environmental Response Compensation and Liability Information System
CESQG	– Conditionally Exempt Small Quantity Generator
COC	– Chemicals of Concern
CORRACTS	– Corrective Action Sites
CREC	– Controlled Recognized Environmental Condition
DNPL	– Delisted National Priority List
DTSC	– Department of Toxic Substances Control
ENG	– Engineering
ERNS	– Emergency Response Notification System
CUPA	– Certified Unified Program Agency
FOI/FOIA/FOIL	– Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	– Heating Ventilation & Air Conditioning
HREC	– Historic Recognized Environmental Condition
IAQ	– Indoor Air Quality
INST	– Institutional
ISRA	– Industrial Site Recovery Act
LBP	– Lead-Based Paint
LQG	– Large Quantity Generator
LTANK	– Leaking Storage Tank
LUST	– Leaking Underground Storage Tank
SDS/MSDS	– Safety Data Sheet / Material Safety Data Sheet
NA	– Not Applicable
NFA	– No Further Action
NFRAP	– No Further Remedial Actions Planned
NPDES	– National Pollutant Discharge Elimination System
NPL	– National Priority List
OPRA	– Open Public Records Act
PAH	– Polycyclic Aromatic Hydrocarbon
PCE	– Perchloroethylene
RAO	– Response Action Outcome
RCRA	– Resource Conservation and Recovery Act
RWQCB	– Regional Water Quality Control Board
SCAQMD	– South Coast Air Quality Management District
RCRIS	– Resource Conservation and Recovery Information System
REC	– Recognized Environmental Condition
SDG	– Significant Data Gap
SEMS	– Superfund Enterprise Management System
SRP	– Site Remediation Program
SQG	– Small Quantity Generator
SVOC	– Semi-Volatile Organic Compound
TCE	– Trichloroethylene
TSDF	– Treatment Storage and/or Disposal Facility
USEPA	– United States Environmental Protection Agency
UST	– Underground Storage Tank
VEC	– Vapor Encroachment Condition
VOC	– Volatile Organic Compound

1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of 20865-20795 Canada Road, Lake Forest, California 92630 (the Property). This assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-13 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions, and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

1.1 Summary of Project Details

Project Name:		N/A			
Primary Street Address:		20865 -20795 Canada Road			
City:	Lake Forest	**County:**	Orange	**State:**	California
Tax ID/Parcel Number:		610-301-07 and 610-301-20, 601-301-21			
Property Owner:		Mr. Brian Hess			
Zoning Designation:		A General Plan Amendment to change the General Plan designation from OS to Light Industrial; A Zone Change to change the zoning of the property from General Agriculture (A-1) to Light Industrial (M-1) to establish a contractor storage yard use (Great Scott Tree Services Inc.). Submitted on March 22, 2018. Under review.			
Approx. Property Area:		APN 610-301-07 – 5.54 acres APN 610-301-20 – 0.82 acres APN 610-301-21 – 0.35 acres			
Buildings/# of Floors		One single story house converted to office use, one single story residential house, and a wooden barn			
Approx. Building Area:		House: 3,500 SF and Barn: 2,800 SF Former residential house used as Office: 2,600 SF			
Approx. Year Built:		Residential house prior to 1910/1952 and Office 1928; Barn 1848			
Commercial Occupants:		N/A			
Current Use:		20865 Canada Road- Residential with a barn, horse stalls, and farm animals 20795 Canada Road- Office, ancillary structures used as storage shed			
Prior Uses:		Orchards, residential / farm houses			
Inspected By:		Ms. Shilpa Sunil			
Property Contact/Company:		Mr. Steve Guzowski/Great Scott tree Service Inc.			
Property Escort/Company:		Mr. Steve Guzowski Great Scott tree Service Inc.			
Inspection Date:		August 27, 2020			
Weather Conditions:		Clear Sunny, 85 degrees F			

1.2 Findings Summary Table

PHASE I ENVIRONMENTAL SITE ASSESSMENT				
Assessment Subject	**No Notable Finding**	**Notable Findings**	**REC?**	**Rep. Ref.**
User Provided Info	X			3.0
Data Gaps	X	Hillmann was not able to access the western portion of the Property due to thick and overgrown vegetation.		2.3
Property Regulatory Records Review	X	The Property is not listed in any regulatory databases.		4.3.1
Property Historical Records Review		Historical site uses include citrus and avocado orchards and a residential home.	REC	4.2
Site Reconnaissance		Property consists of two parcels. The northwestern portion of the Property includes Serrano creek, hiking trail and the remainder portion of the Property is covered with dense vegetation. The southern parcel is developed with a single-family residential house that has 4 bedrooms, 2 bathrooms and approximately 2,400 square feet of floor space; and a barn. A horse stall and farm animal storage area were observed at the northwestern portion of the Property. A horse corral was observed at the southwest side of the Property. Remaining portion of the parcel is undeveloped, currently covered by brushes and trees. The north eastern portion of the Property is currently occupied by the tenant- Richard Cohen Landscape and Construction, Inc. This Property has 4 bedrooms, 2 bathrooms and approximately 2,600 square feet of floor space that is currently converted to office use.	No	5.0
Interviews		Mr. Steve Guzowski of Great Scott Tree Service, Inc. indicated a 500-gallon underground gasoline tank with pump was on the Property until 1984-1985, and used for agricultural purposes. A leak was detected approximately in 1984. Under the guidance of the local environmental jurisdiction, the pump was removed and the tank was filled with water. Mr. Steve indicated that the underground storage tank was still underground. Due to overgrown vegetation, there were no visible signs of the former UST at the Property. Hillmann reviewed online Geotracker records and there were no files pertinent to the underground storage tank found. Based on the age of the construction of the residential home, the home was connected to a septic system. A septic system cleanout was observed at the north side of the 20795 Canada Road building. At the time of the site inspection, Hillmann observed Los Alisos Water District has recently put a new sewer system in place.	REC No	6.0

Adjoining & Nearby Properties	X	The northwest adjacent Property at 20697 Prism Place located approximately 277 feet northwest is listed under UST and SWEEPS UST, RCRA NON-GEN/NLR, HAZNET, CERS, CERS HAZ Waste databases. The south-southeast adjacent Property at 20845 Canada Road located approximately 103 feet down gradient of the Property is listed under RCRA NONGEN/NLR database.	No No	4.3.2 5.2.8
BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE				
BER	**Not Applicable**	**Findings**		**Rep. Ref.**
Asbestos Containing Materials (ACM)		Based on the age of the construction of the single-family residential home there is potential for ACM.		7.1
Lead Based Paint (LBP)				7.2
Radon		The Property located in USEPA Radon Zone 3.		7.3
Mold				7.4

1.3 Findings and Conclusions

1.3.1 Recognized Environmental Conditions

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of the Property as described in Section 2 of this report. Any additions to, exceptions to or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

RECOGNIZED ENVIRONMENTAL CONDITIONS	
REC 1	The former UST at the Property is considered to be REC to the Property.
REC 2	The historical usage of the Property as a citrus and avocado grove is considered a REC in connection with the Property.
HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No HRECs were identified.
CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No CRECs were identified.
SIGNIFICANT DATA GAPS	
	No SDGs were identified.

1.3.2 REC Response Action Recommendations

The following table presents recommended response actions to the identified RECs for further investigation and/or corrective action:

REC RESPONSE ACTION SUMMARY TABLE	
REC #	**Response Action**
REC 1 and 2	Hillmann recommends a limited Phase II subsurface investigation to determine whether elevated pesticide compounds are present due to the history of agricultural/orchard use. Additionally, Hillmann recommends soil sampling to determine whether the owner reported gasoline underground storage tank has adversely impacted the Property. A subsurface investigation would be necessary to evaluate to the extent of residual impact. In addition, due to the residual impact in shallow soil and groundwater, a subsurface soil vapor survey is recommended prior to any planned redevelopment of the Property.

1.3.3 Additional Findings

The following environmental conditions were identified, but are not considered to be a REC in connection with the Property:

NOTABLE ENVIRONMENTAL CONDITIONS	
1.	The site appears to have been utilized as citrus and avocado orchard from circa 1938 to 1940. There is the potential for soil contamination due to current and historic pesticide applications; this is considered to be a REC in connection with the Property.
2.	Site contact Mr. Guzowski of Great Scott Tree Service, Inc. indicated a 500-gallon underground gasoline tank with pump was on Property until 1984-1985 and was used for agricultural purposes. Property owner reported that a leak was detected approximately in 1984. Under the guidance of the local environmental jurisdiction, the pump was removed and the tank was filled with water. Mr. Steve indicated that the underground storage tank was still underground. Due to overgrown vegetation, there were no visible signs of the former UST at the Property. There were no records of date of installation of the UST and no leaks were recorded. Hillmann reviewed online Geotracker records and there were no files pertinent to the underground storage tank found. Hillmann reviewed the GPR investigation report prepared by C Below, dated August 31, 2020, the investigation results did not identify any tank, other than possible resident's septic tank measuring 10x12 and possible old water pump foundation near the drive way measuring 2x2 were identified. The GPR report is attached under Appendix C. Based on the lack of tank removal records, Hillmann recommends further soil sampling to determine if the subsurface has been impacted by the former UST leak and analyze for suspect compounds such as total petroleum hydrocarbons (TPHcc), volatile organic compounds (VOCs), and Ca Assessment Metals (CAM).
3.	Mr. Steve Guzowski mentioned that the residential property had a septic system in place. Due to the overgrown vegetation, septic system was not visible. There were new sewer lines in places laid out by the city observed in the vicinity of the Property. Additionally, Hillmann observed a septic system cleanout exists at the north side of the Property (20795 Canada Road); however, the capacity of the septic tank is unknown. The only pertinent information Hillmann was able to obtain was that the septic tank is serviced by vacuuming out the contents periodically approximately twice a month. Hillmann recommends to remove the septic system and be capped under current regulations.
4.	Hillmann observed one above ground storage tank stored on a secondary containment in the barn building. No evidence of leaks or staining was observed in vicinity of the tank. The above ground storage tank is not considered to be a REC; however, it should be properly removed and disposed of at an authorized off-site location. Additionally, there were small containers of degreaser observed in the barn building. Hillmann observed de-minimis oil staining in the barn building.
5.	Several 5-gallon pails containing grout and flooring construction material were observed in the northeast covered storage yard. Five 5-gallon containers and a 5-gallon pail of oil and small containers of paint was observed inside the garage.

6.	XPO Logistics Freight Inc - UIV (20697 Prism Place). This site is adjoining to the northwest and is cross-upgradient of the Property. The site is listed under UST, SWEEPS UST, RCRA NONGEN/NLR, CERS Hazwaste, CERS tanks, HAZZNET databases. This site is registered on the UST database with Facility ID # FA0024234. The SWEEPS UST listing indicates the 10,000-gallon motor vehicle fuel diesel UST was installed in 1988. Based on the absence of reported releases or violations, this listing is not considered a REC in connection with the Property. The CERS Hazwaste listing indicates that hazardous waste treatment occurs onsite, several administrative violations are noted. The CERS listing indicates that the site operates as a chemical storage facility with several administrative violations. The CERS listing indicates that the site returned to compliance on 3/17/2017 after the violation for not collecting waste in a container was issued on 3/13/2017. Due to a lack of reported spills, the relatively minor violation, and hydrologic gradient, these listings are not considered to be RECs in connection with the Property

1.4 Environmental Professional Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Ryan Terwilliger
Environmental Professional

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-13. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the "landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The primary goal of the processes established by ASTM E1527-13 is to identify *recognized environmental conditions* in connection with the Property.

The term *recognized environmental condition (REC)* is defined by the ASTM as the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The ASTM has also defined the terms *historical recognized environmental conditions* and *controlled recognized environmental conditions* as two additional types of RECs. The term *historical recognized environmental condition (HREC)* is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls or engineering controls).

The term *controlled recognized environmental condition (CREC)* is defined as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

Conditions determined to be *"de minimis conditions"* are not considered to be RECs, HRECs or CRECs. *De minimis condition* is defined by the ASTM, "…as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports, and interviews, etc., to determine prior uses of the Property from the present, back to the Property's first developed use, or back to 1940, whichever is earlier.

- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Property, adjoining properties, and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

2.1.1 Business Environmental Risks/Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-13 standard:

Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if more certainty is desired regarding ACM and potential asbestos hazards at the Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

USEPA Designated Radon Potential: Review of general non-site-specific data published by the USEPA regarding the Radon Zone classification for the area of the Property.

Mold: A cursory non-intrusive visual screening within the accessed areas of buildings on the Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Property.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:		20865 Canada Road			
City:	Lake Forest	**County:**	Orange	**State:**	California
Tax ID/Parcel Number:		610-301-07 and 610-301-20			
Approx. Land Area:		610-301-07 – 5.54 acres APN 610-301-20 – 0.82 acres APN 610-301-21 – 0.35 acres			
Approx. Latitude/Longitude:		North 33.6605380 degrees/West 117.6751250 degrees			
Additional Details (if appl.):		NA			

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	See Section 4.2.9
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 User Reliance

This report is for the exclusive use of the User(s) named on the front cover. No other party(ies) shall have any right to rely on the content of this report without first obtaining the consent of the original report User; and without obtaining written consent from Hillmann in the form of a letter of reliance or report recertification.

2.5 Significant Assumptions

The following significant assumptions are made:

- Hillmann has assumed that the site operations at the time of the site visit reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, Hillmann has also assumed that no areas of the Property with potential environmental concerns or RECs were concealed or otherwise not made known to us, intentionally or unknowingly, by the Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, Hillmann has assumed that the gradient of groundwater flow follows the surface topography of the Property and immediate surrounding area.

2.6 General Limitations and Exceptions

2.6.1 Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to Hillmann's ability to access and review pertinent regulatory agency records. Such limitations, if encountered, are further specified in Section 4.4.

Significant limitations related to the condition or accessibility of the Property at the time of the site reconnaissance, if encountered, are reported in Section 5.1.

2.6.2 Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-13 are reported.

2.6.3 Special Terms and Conditions

Hillmann has prepared this Phase I Environmental Site Assessment using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes, and petroleum products at the Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. Hillmann makes no representation or warranty that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions, and recommendations presented in this report are based on our visual observations of the Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Hillmann relies upon the information, whether written, graphic or verbal, provided by the Property contact(s) or as shown on any documents reviewed or received from the Property contact, owner or agent, or municipal source; and assumes that information to be true and correct. Although there may have been some degree of overlap in the information provided by these various sources, Hillmann did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this assessment. Hillmann can neither warrant nor guarantee the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The regulatory research is designed to meet the requirements of ASTM Standard E 1527-13. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. “Reasonable efforts” are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

Hillmann is not a professional title insurance firm and makes no guarantee, explicit or implied, that the records which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-13 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User’s analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

The recommended response actions to the identified RECs presented in Section 1.3, if any, are not intended to represent the only course(s) of action to take; nor does it imply any opinion as to the timing of the action. Furthermore, it is emphasized that additional response actions may become warranted depending on the outcome of the initial action(s) taken. Hillmann advises that consultation with legal counsel familiar with environmental and real estate law may be beneficial to the decision-making process for the type and timing of a response action to identified RECs if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term "User" is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Property; specifically, the entities named on the front cover to which the report has been addressed.

3.1 Prior Environmental Reports/Documentation

Phase I Environmental Site Assessment, 20865 Canada Road, Lake Forest, California 92630 prepared by Hillmann Consulting and dated December 2, 2019.

The prior Phase I identified two RECs in connection with the Property. The first, was due to the owner reported UST on the Property, with lack of records of removal of UST. The second was due to historical usage of the Property as a citrus and avocado grove is considered to be a REC to the Property.

Hillmann recommends a limited Phase II subsurface investigation to determine the historic agricultural use and whether the owner reported gasoline underground storage tank has adversely impacted the Property.

3.2 User Questionnaire

Section 6 of the ASTM E1527-13 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, and as recommended by the ASTM E1527-13 standard, a Questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 has been provided to the original report User. The following is a summary of the User's response:

Question:	Yes/No:	Detail:
Environmental liens that are filed or recorded against the property: Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	NR	
Activity and use limitations that are in place on the property or that have been filed or recorded against the property: Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	NR	
Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	NR	

Relationship of the purchase price to the fair market value of the property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	NR	
Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,		
-Do you know the past uses of the property?	NR	
-Do you know of specific chemicals that are present or were once present at the property?	NR	
-Do you know of spills or other chemical releases that have taken place at the property?	NR	
-Do you know of any environmental cleanups that have taken place at the property?	NR	
The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	NR	
Litigation/Administrative Proceedings/Government Notices As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	NR	

NR-no response

3.3 Reason for Performing Phase I ESA

Hillmann assumes that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

4.0 RECORDS REVIEW

4.1 Physical Setting Sources

The following physical setting sources were reviewed:

Source	Discussion
USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum)	The Property lies at an elevation of approximately 631 feet above mean sea level on the El Toro, CA Quadrangle map. The topography indicated by the map appeared to be gently sloping downward towards the west. The closest down gradient water body is Serrano Creek located approximately 198 feet to the west.
USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum)	The soil type at the Property is classified as "Riverwash". The "Riverwash" designation is described as soils with a sand surface texture with a Very slow infiltration rates. Soils are clayey, have a high-water table or are shallow to an impervious layer.
Geologic Data: (EDR Geocheck-Physical Setting Source Addendum)	The geologic formation in the vicinity of the Property is described as a stratified sequence of the Cenozoic Era, Tertiary System, and Miocene Series.
Additional Sources/ Data:	N/A
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be generally to north.

4.2 Historical Use – Property and Adjoining Properties

Hillmann has conducted research in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Property. Standard historical sources have been sought in an attempt to document the past uses of the Property as far back as it can be shown that the Property contained structures; or from the time the Property was first used for residential, agricultural, commercial, industrial or governmental purposes.

4.2.1 Fire Insurance Maps

Hillmann obtained a Certified Sanborn Map Report from EDR in order to research published historic fire insurance maps for the Property and surrounding area. A copy of the report is included in Appendix D. The following is a summary of site use information interpreted from a review of the report:

Year(s)	Description	
	Property	(No Coverage)
	Adjoining Properties	

4.2.2 City Directories

The following is a generalized summary of the findings of City Directory Research for past occupants of the Property, indicating occupants and the years indicated by the listings.

Property	
Occupant(s)	**Appr. Date Range**
Canada Ranch Stables / Hess Ronald Construction	2000-2010
Don Hess	1992-1995

Hillmann also reviewed the EDR City Directory Abstract report for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

Adjoining Properties		
Address(es)	**Historic Occupant(s)**	**Appr. Date Range**
20941 Canada Road	American Mini Storage	1995-2014
	Private individual	1992
20845 Canada Road	Commercial/industrial	2010-2014

4.2.3 Historical Topographic Map Review

Hillmann reviewed historic topographic maps of the Property from EDR. The following details related to site usage were indicated by the topographic maps:

Year(s)	Summary	
1902, 1935	**Property**	The Property is depicted as undeveloped land.
	Adjoining Properties	The adjoining properties are depicted as undeveloped land.
1942	**Property**	The Property is depicted as an orchard.
	Adjoining Properties	The adjoining properties are depicted as orchards. Serrano Creek is depicted to the northwest.
1949, 1950	**Property**	The Property is depicted as an orchard. Serrano Creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties are depicted as orchards. Adjacent property to the northeast is depicted with three small structures. Canada Road is shown on the map.
1968	**Property**	The Property is depicted as undeveloped land with a small structure depicted to the southwest. Serrano Creek is depicted to the northwest.
	Adjoining Properties	Adjacent property to the northeast is depicted with three small structures. Canada Road is shown on the map.
1978, 1981, 1982	**Property**	The Property is depicted as an orchard with a small structure depicted to the southwest. Serrano Creek is depicted to the northwest.
	Adjoining Properties	Adjacent property to the northeast is depicted with three small structures. The adjoining properties to the northwest are depicted as commercial/light industrial structure.
1997	**Property**	The Property is depicted as an orchard. Serrano Creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties to the northwest and southwest are depicted with existing commercial/light industrial structures.
2012	**Property**	No building development is depicted on the topographic map.
	Adjoining Properties	No building development is depicted on the topographic map.

4.2.4 Aerial Photograph Review

Hillmann reviewed historic aerial photographs of the Property from EDR. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Summary	
1938, 1946, 1949	**Property**	The Property appears to be developed with small residential structure surrounded by orchard. Serrano Creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties appear to be orchards. Small structures are depicted to the northeast.
1952, 1963, 1967, 1972, 1974, 1980	**Property**	The southwest corner of the Property appears to be developed with the existing residential home and barn; the remainder of the Property appears to be orchards.
	Adjoining Properties	The adjoining properties appear to be orchards. Small structures are depicted to the northeast and to the south.
1990, 1994,	**Property**	The Property appears to be developed with the existing structures including a residential home and a barn. Serrano creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties to the north, east and southwest are depicted to be developed with existing commercial/light industrial structures. The south adjacent property is depicted to be undeveloped land.
2005, 2009, 2012 and 2016	**Property**	The Property appears to be developed with the existing structures including a residential home and a barn. Serrano creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties to the north, east, west, and southwest are depicted to be developed with existing commercial/light industrial structures.

4.2.5 EDR High-Risk Historical Records

The EDR Radius Map™ report, which will be discussed in greater detail in Section 4.3, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

EDR Historic Cleaners	No on-site or adjoining listings identified.
EDR Historic Auto	No on-site or adjoining listings identified.
EDR MGP	No listings identified within 1-mile search distance.

4.2.6 Petroleum/Natural Gas Well Review

Hillmann reviewed historical record sources for evidence of historic petroleum and/or natural gas wells at the Property. In addition, Hillmann conducted a search of the property location on the Division of Oil, Gas & Geothermal Resources Well Finder database (http://maps.conservation.ca.gov/doggr/index.html). No record of any historical petroleum/natural gas wells at the Property was identified.

4.2.7 Additional Historical Data

No additional historical data was reviewed and/or obtained.

4.2.8 Summary of Identified Historic Uses

The following table presents a summary of the types and approximate timeframes of identified prior uses of the Property:

Property	
Years (Approx.)	**Use**
1938 to 1980	Orchards, Serrano Creek
1990 to Present	Residential, Barn, Serrano Creek

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Adjoining Properties	
Years (Approx.)	**Use**
1938 to 1980	Orchards
1990	Undeveloped land (south adjacent property)
1990 to Present	Undeveloped land

4.2.9 Historical Records Data Failure

The ASTM E1527-13 standard defines data failure as a failure to achieve the ASTM specified historical research objectives after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions should be sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval.

Objective	Met?	Detail	Significant Data Gap?
First developed use/date determined?	Yes	The Property was developed as Orchard and a Bran in 1800s. A residential home circa 1938.	No
Record sources at 5-year intervals back to 1940 or first developed use?	No	Records gaps between 1952 and 1963, 1980 and 1989, and 1994 and 2005; however, site conditions likely unchanged during these intervals.	No
All obvious prior uses identified?	Yes	See Section 4.2.8.	No

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

4.2.10 Historic Uses REC Discussion

A portion of the Property appears to have been utilized as orchards since circa 1930. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. There is the potential for soil contamination due to current and historic pesticide applications, this is considered to be a REC in connection with the Property.

The owner of the Property reported a 500-gallon underground gasoline tank with a pump that was used as part of the agricultural purposes is considered to be REC to the Property. According to the Property owner, a leak was detected in 1984 and the pump was removed from the Property under the guidance of the local environmental jurisdiction. Hillmann reviewed records for the agencies and there are no records obtained in regards to the underground storage tank. There have been no records of the UST as having been removed and it is considered to be a REC in connection with the Property. Hillmann recommends a limited Phase II investigation to determine whether the UST is still present and whether the historical operation of the UST have negatively impacted the Property.

4.3 Standard Environmental Record Sources

Hillmann obtained a regulatory database report, titled EDR Radius Map™ Report, from Environmental Data Resources of Shelton, CT. The report provided a search of standard environmental record sources in general accordance with the requirements of the ASTM E1527-13. Hillmann has reviewed the regulatory database report, and a summary of findings has been presented in the following tables and report sections. Hillmann has also reviewed the list of unmapped sites (a.k.a. "Orphan List" sites). Unmapped sites identified as falling within an applicable specific search distance or warranting discussion in the report, if any, have been included in the information presented below. Detailed descriptions of the meaning and significance of the regulatory databases can be found in the regulatory database report in Appendix E.

Regulatory Database	Search Distance	Property Listed?	Adj. Properties Listed?	Total Listings Within Search Distance
Fed. NPL/Proposed NPL	1-mile	No	No	0
Fed. Delisted NPL	½-mile	No	No	0
Fed. SEMS	½-mile	No	No	0
Fed. SEMS-ARCHIVE	½-mile	No	No	0
Fed. RCRA CORRACTS	1-mile	No	No	0
Fed. RCRA TSD	½-mile	No	No	0
Fed. RCRA LQG	Site & Adj.	No	No	
Fed. RCRA SQG	Site & Adj.	No	No	
Fed. RCRA CESQG	Site & Adj.	No	No	
Fed. ENG Control List	Site	No		
Fed. INST Control List	Site	No		
Fed. ERNS	Site	No		
State/Tribal Hazardous Waste Site	1-mile	No	No	0
State/Tribal Landfill/Solid Waste	½-mile	No	No	0
State/Tribal Leaking Storage Tanks	½-mile	No	No	2
State/Tribal Registered Storage Tanks	Site & Adj.	No	No	
State/Tribal Eng. Control List	Site	No		

State/Tribal Inst. Control List	Site	No		
State/Tribal Voluntary Cleanup Sites	½-mile	No	No	0
State/Tribal Brownfields	½-mile	No	No	0
Supplemental Regulatory Databases	Site & Adj.	No	No	

4.3.1 Property Listings

The Property address was identified in the following databases.

PEST LIC, FINDS, ECHO, RCRA Non-Gen/ NLR, HWTS, – Richard Cohen Landscape and Construction Inc at 20795 Canada Road. The Property is listed under PEST LIC with facility type as MGB and QAC. This site is listed as a Non-generator of hazardous waste. There were no reported violations. Based on the absence of reported violations or releases and the relative hydraulic gradient this listing is not considered a REC in connection with the Property.

4.3.2 Adjoining Property Listings

RCRA NonGen NLR/ – Global Power Technologies Group at 20692 Canada Road. This site is adjoining to the north-northwest and approximately 85 feet up/crossgradient of the Property. This site is listed as a Non-generator of hazardous waste. There were no reported violations. Based on the absence of reported violations or releases and the relative hydraulic gradient this listing is not considered a REC in connection with the Property.

RCRA NonGen NLR/ – Camila Corp at 20845 Canada Road. This site is adjoining to the south-southeast and approximately 103 feet downgradient of the Property. This site is listed as a Non-generator of hazardous waste. There were no reported violations. Based on the absence of reported violations or releases and the relative hydraulic gradient this listing is not considered a REC in connection with the Property.

UST, SWEEPS UST, RCRA NonGEN/ NLR, HAZNET, CERS, CERS HAZWASTE – XPO Logistics Freight INC. UIV at 20697 Prism Place. The site is adjoining to the northwest and is approximately 277 feet cross- gradient of the Property. This site is registered on the UST database with Facility ID # FA0024234. The SWEEPS UST listing indicates a 10,000-gallon motor vehicle fuel - diesel underground storage tank was installed in 1988. RCRA NonGen/NLR listing indicates the site is non generator of hazardous waste. CERS HAZWASTE describes the site as a hazardous waste generator. The listings indicate several violations issued since 2012 to 2017 and were returned to compliance immediately. Several compliance evaluation inspection results are listed for the site. Based on the absence of reported violations or releases and the upgradient position relative to the Property, this site is not considered a REC in connection with the Property.

4.3.3 ASTM Search Distance Findings

The following is a summary of the findings of the regulatory database review with regard to sites identified as located within the ASTM specified search distance surrounding the Property. In order to keep this report informative and yet concise, Hillmann has provided a brief discussion of the listed site(s) for each database category that appears most likely to impact the Property based

on distance, topography and/or case status. A copy of the full regulatory database report, including available details of all listed sites, is included in Appendix E.

Note that listings for the following databases, if identified, would be discussed above in Sections 4.3.1 and 4.3.2: Registered Storage Tanks, Federal RCRA Generators, Federal and State INST and ENG Controls, ERNS.)

Federal NPL: No NPL listing was identified within a one-mile radius of the Property.

Federal Delisted NPL: No DNPL listings were identified within a ½-mile radius of the Property.

Federal SEMS (formerly CERCLIS): No SEMS listing was identified within a ½-mile radius of the Property.

Federal SEMS-ARCHIVE (former CERC-NFRAP): No SEMS-ARCHIVE listings were identified within a ½-mile radius of the Property.

Federal RCRA-CORRACTS: No CORRACTS listing was identified within a one-mile radius of the Property.

Federal RCRA-TSD: No TSD listings were identified within a ½-mile radius of the Property.

State/Tribal Hazardous Waste Sites: No SHWS listings were identified within a one-mile radius of the Property on the EnviroStor database.

No SHWS listings were identified within a one-mile radius of the Property on the RESPONSE database.

State/Tribal Landfill/Solid Waste Disposal Sites: No SWF/LF listings were identified within a ½-mile radius of the Property.

State/Tribal Leaking Storage Tanks: Five (5) LUST listings were identified within a ½-mile radius of the Property. The closest listing is described as Chevron at 20731 Lake Forest located 1968 feet east of the Property. The site is listed with completed case -closed status dated 04/20/1998. Based on the distance, hydraulic gradient and case closed status the listed sites are not considered to be concern to the Property.

Based on the regulatory closure received and the relative distance from the Property, other LUST listing is not considered a REC in connection with the Property.

No SLIC listings were identified within a ½-mile radius of the Property.

State/Tribal Voluntary Cleanup Sites: No VCP listings were identified within a ½-mile radius of the Property.

State/Tribal Brownfields: No BROWNFIELDS listings were identified within a ½-mile radius of the Property.

Review of the sites identified within the ASTM search parameters did not identify any nearby or surrounding area sites that are considered to be a REC in connection with the Property, unless as discussed otherwise previously in this section.

4.3.4 Tier I Vapor Encroachment Screening

Hillmann reviewed adjoining and vicinity database sites to identify potential off-site sources of sub-surface vapor encroachment. This review was based upon the current ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also utilizing the "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Property in the up-gradient direction, 365 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Property in the up-gradient direction, 165 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the subject property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Property when reviewing applicable sites within those distances.

The 500- gallon gasoline underground storage tank is considered to be potential vapor instruction and therefore, considered to be REC to the Property.

4.4 Additional Environmental Record Sources

4.4.1 Supplemental Database Listings

Hillmann reviewed the regulatory database report for listings on supplemental databases that were searched in addition to the Standard Environmental Record Sources. Any property or adjoining property listings on such databases, if identified, would be discussed in Section 4.3.1 and 4.3.2. None of the other supplemental database listings identified by the regulatory database report are considered to be a REC in connection with the Property.

4.4.2 Local Agency & Internet Research

Hillmann has submitted requests to local and municipal agencies for pertinent records pertaining to the Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage, and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Hillmann also conducted online research of government environmental regulatory databases where available, as well as a general cursory internet search of the Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
Environmental Protection Agency (EPA)	FOIA Request	The Property address was searched. No results for the Property were found.
Irvine Ranch Water District	FOIA Request	The Property address was searched. No results for the Property were found.
Department of Toxic Substances Control (DTSC)	FOIA Request	The Property address was searched. No results for the Property were found.
Regional Water Quality Control Board (RWQCB) – Santa Ana Region (8)	FOIA Request	The Property address was searched. No results for the Property were found.
South Coast Air Quality Management District (SCAQMD)	FOIA Request	The Property address was searched. No results for the Property were found.
Orange County Geographical Information System (GIS)	On-line search	No information indicative of a REC was identified.
CA DTSC EnviroStor database http://www.envirostor.dtsc.ca.gov/public/	Internet	The Property address was searched. No results for the Property were found.
CA GeoTracker database http://geotracker.waterboards.ca.gov/	Internet	The Property address was searched. No results for the Property were found.
USEPA Envirofacts search http://www.epa.gov/enviro/index.html	Internet	The Property address was searched. No results for the Property were found.
www.google.com	On-line search	The Property address search returns no results
www.realquest.com	On-line search	Basic Property information such as parcel number, date of construction, and building square footages were collected. Pertinent information, where obtained, is referenced in the appropriate sections of this report.
Other:	NA	

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of the Property and improvements, adjoining properties as viewed from the Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares. Building exteriors were observed at ground level unless otherwise indicated. Where applicable, Hillmann accessed and observed representative areas of building interiors to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Ms. Shilpa Sunil
Property Escort/Company:	Mr. Steve Guzowski/ Great Scott Tree Service, Inc.
Inspection Date:	August 27, 2020
Weather Conditions:	Clear Sunny, 85 degrees F

5.1.1 Significant Inaccessible Areas

Hillmann was not able to access the western portion of the Property due to thick and overgrown vegetation.

5.2 General Site Setting

5.2.1 Site and Vicinity Characteristics

The Property consists of irregular shaped is approximately 6.71-acres in size. Property consists of three parcels. Serrano Creek borders the Property to the north side of the Property. There are hiking trails observed along the border of the creek. The southern parcel is developed with two single-family residential houses and a barn.

The vicinity of the Property is improved primarily by commercial/light industrial properties.

5.2.2 Topographic Characteristics

The terrain of the Property appeared to be relatively flat that slopes to the north. Serrano Creek borders northern portion of the Property.

5.2.3 General Description of Structures

The southern parcel is developed with a single story single-family residential house that has 4 bedrooms, 2 bathrooms and approximately 2,400 square feet of floor space; and a barn. A single-story wooden barn and a single-family residential house that is converted to office use are located at the northeast of the Property.

5.2.4 Sources of Heating and Cooling

Heating and cooling are provided by natural gas and electric powered systems.

5.2.5 Potable Water Source/Sewage Disposal System

Potable water and sewer services are provided via the public utility.

5.2.6 Current Use(s) of the Property

The current owner of the property currently resides at the residential home. The northwest portion of the site is used for storage of farm animals and horses. The northeastern portion of the Property is currently been occupied by the tenant- Richard Cohen Landscape and Construction, Inc.

5.2.7 Past Use(s) of the Property

No obvious indication of past Property usage likely to have involved the use, treatment, storage, disposal or generation of hazardous substances or petroleum products was observed at the time of the site visit. Please refer to Section 4.2 for findings of historical site use research.

5.2.8 Current Use(s) of the Adjoining Properties

The following table describes the current uses of the adjoining properties:

Dir	Street Address	Description
NW	20697 Prism Pl, Lake Forest	XPO Logistics
NE	20692 Prism Place	Global Power Technologies Group
S	20845 Canada Road	Camilo Corporation
SW	20941 Canada Road	American mini Storage

No visual observations indicative of a potential environmental concern was noted on the adjoining properties.

5.2.9 Past Use(s) of the Adjoining Properties

No indication of past uses of the adjoining properties was noted at the time of the site visit. Please refer to Section 4.2 for the findings of historical site use research.

5.2.10 Current/Past Uses of Surrounding Area

The vicinity of the Property consists primarily of commercial and light industrial properties. No indications of past Property use that differ substantially from current conditions were observed at the time of the site visit.

5.3 Interior & Exterior Observations

5.3.1 Storage/Usage of Hazardous Substances and Petroleum Products

The following hazardous substances and petroleum products were observed to be stored and used by property occupants:

Occupant	Substance	Qty/Container Type	Storage Conditions
20795 Canada Rd	Misc. Lubricants	Approximately 15 containers of various sizes	Stored on shelves inside the garage. No signs of staining or leaking
(Robert Cohen Landscape)		Various	Large amounts of pesticides are stored in a storage building and a shed in the pesticide storage area by the maintenance area.

5.3.2 Drums

No drums were identified on the Property.

5.3.3 Unidentified Substance Containers

No unidentified containers suspected of containing hazardous substances or petroleum products were noted on the Property.

5.3.4 Other Hazardous Substances/Petroleum Products

No other containers of hazardous substances or petroleum products were noted on the Property at the time of the site visit.

5.3.5 Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/ UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
UST	None	500-gal	Steel	Unknown	Inactive	Owner of Property reported the former UST was located at the front of the residential building 20865 Canada Road.
AST	Motor oil	110-gal	Steel	Unknown	Inactive	Stored on secondary containment inside the barn. There were no spills or leaks observed by the above ground storage tank.

5.3.6 PCBs in Electrical/Hydraulic Equipment

There were no transformers noted on the Property. No signs of leaking or staining were observed in the area of the transformers.

No other electrical or hydraulic equipment suspected of containing PCBs was identified at the

Property.

5.3.7 Odors

No strong, unusual or pungent odors were noted on the Property.

5.3.8 Pools of Liquid

No standing water or pools of liquid likely to contain hazardous substances or petroleum products were noted at the Property.

5.3.9 Interior Stains or Corrosion

Hillmann observed de-minimis oil staining in the barn building.

5.3.10 Interior Drains/Sumps

No floor drains or sump pits were noted at the Property other than for storm water or sewage management.

5.3.11 Exterior Pits/Ponds/Lagoons

No evidence of exterior pits, ponds or lagoons was identified on the Property in connection with waste treatment or disposal.

5.3.12 Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed at the Property.

5.3.13 On-Site Solid Waste Disposal/Fill Material

No evidence of any on-site solid waste dumping was noted at the Property.

No evidence of recently deposited fill materials was observed at the Property.

5.3.14 Wastewater

Sanitary sewage and storm water runoff generated on-site are discharged into municipal sewer systems. No other waste discharges were noted at the Property.

5.3.15 Septic Systems

Mr. Steve Guzowski mentioned that the residential property had a septic system in place. Due to the overgrown vegetation, septic system was not visible. There were new sewer lines in place laid out by the city observed in the vicinity of the Property. Hillmann recommends to remove the septic system and it be capped under current regulations.

Additionally, Hillmann observed a septic system cleanout that exists at the north side of the Property (20795 Canada Rod); however, the capacity of the septic tank is unknown. The only pertinent information Hillmann was able to obtain was that the septic tank is serviced by vacuuming out the contents periodically, approximately twice a month.

5.3.16 Wells

No indication of a well was noted on the Property.

5.3.17 Railroad Spurs

No railroad spurs were noted on the Property at the time of the assessment.

6.0 INTERVIEWS

6.1 Interviews with Past and Present Owners and Occupants

Subject	Name/Affiliation	Summary
Property Owner / Representative	Mr. Steve Guzowski/Great Scott tree Service Inc.	Mr. Steve Guzowski, of Great Scott Tree Service Inc., was provided with an environmental questionnaire with instructions to have it completed by a party knowledgeable of the Property. As of the date of this report, the environmental questionnaire has not been returned.
Property Occupants	Not applicable	Property occupants were not available for interview at the time of the assessment.
Past Owners, Occupants, Operators	Not applicable	Past owners/occupants of the Property were not available for interview at the time of the assessment.
Owners/Occupants of Adjoining or Nearby Properties	Not applicable	The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.

6.2 Interviews with State and/or Local Government Officials

Written and on-line requests for environmental records of the Property from State and Local governmental agencies are detailed in Section 4.4.2.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as "Non-Scope Considerations"). The ASTM E1527-13 standard defines the term business environmental risk (BER) as, *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

Suspected ACM noted during a cursory visual screening of 20865 Canada Road included sheetrock wall systems, ceiling acoustical spray on material, suspended ceiling tiles, carpet mastics, and floor tile with associated mastics. Although not observed, the roofing materials may contain asbestos. Additional types of suspect ACM may exist in enclosed areas or areas not accessed during the assessment. It is emphasized that this limited screening does not constitute a comprehensive asbestos survey of the premises and is meant only to provide a cursory evaluation regarding the potential presence of ACM at the Property.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

In general, interior painted surfaces within the space were observed to be in fair condition.

7.3 Radon

Hillmann reviewed data compiled by the USEPA, as summarized by the regulatory database report, which indicated that the Property is located in an area with a low potential for radon concentrations that exceed current USEPA action guidelines. Orange County is classified as a Zone 3 or 'low risk' area for radon.

7.4 Mold/Microbial Damage

As per the contracted scope of work, Hillmann conducted a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth. Hillmann did not observe any other evidence of significant problems with moisture intrusion or mold/microbial growth at the Property.

Hillmann did not observe any evidence of significant problems with moisture intrusion or mold/microbial growth at the Property.

Work Summary - Area Dimensions, Surface Conditions, Subsurface Indications Found, Marking Method, Unlocatable Facilities, Etc.

Attempted to locate possible underground storage tank withing work area provided by client on site

Utilities: Underground Storage Tank, Unknown

Performed GPR scan to locate unknown positive indications and non conductive utilities throughout designated work area

Provided direction of utilities and possible edges off structures

Marking Methods: (APWA) Uniform Color Code, (CGA) Best Practices

Equipment Used: GPR LMX100, Dowsing Rods

Unable to locate a possible abandoned underground storage tank within the work scope but I did find indications for possibly the residents septic tank measuring 10x12 and possible pump for former underground storage tank near the drive way measuring 2x2

Went over findings and any issues or concerns with onsite contact before departing job

CAUTION

WHEN EXCAVATING WITHIN THE TOLERANCE ZONE (24 INCHES ON EACH SIDE), PERFORM EXCAVATION WITH HAND TOOLS UNTIL THE MARKED FACILITY IS EXPOSED.
FOR CONCRETE AND MASONRY STRUCTURES, DO NOT CUT, CORE OR DRILL WITHIN 3 INCHES OF ANY MARKED INDICATION.

Investigation results provided by C Below, Inc. (CBI), are given in good faith and to the best of our knowledge. However, in the unlikely event that such information proves to be inaccurate, the extent of liability assumed by CBI if any, is limited to the amount billed for labor and materials on the day that the information was provided and alleged to have been inaccurate. The services being provided by CBI do not relieve the Client and/or property owner of the responsibility of having to comply with California Government Code §§4216-4216.9. It is expressly understood by the Client and/or owner that CBI's services are not a substitute for compliance with the California Code §§4216-4216.9. This daily is based on observations made during a walk-through investigation of the property and is not intended to create any sort of warranty and/or certification that the work performed by the contractor and/or subcontractors was completed in compliance with the governing building codes, architectural plans and specifications or contract documents.
Please Note: Certain low-density material such as PVC and plastic conduit may not be located accurately, if at all, using any investigation method. Always use caution when excavating.

RE: Phase I Environmental Site Assessment
20865 Canada Road
Lake Forest, California 92630
Hillmann Project No: C3-7524

Dear Mr. Guzowski:

Hillmann Consulting, LLC, is pleased to provide the results of our Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in general accordance with the scope and limitations of ASTM Practice E 1527-13, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 714-634-9500.

Sincerely,

Hillmann Consulting, LLC

Shilpa Sunil

List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM	– Asbestos Containing Material
AOC	– Area of Concern
AST	– Aboveground Storage Tank
ASTM	– American Society for Testing Materials
BER	– Business Environmental Risk
CEA	– Classification Exception Area
CERCLA	– Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	– Comprehensive Environmental Response Compensation and Liability Information System
CESQG	– Conditionally Exempt Small Quantity Generator
COC	– Chemicals of Concern
CORRACTS	– Corrective Action Sites
CREC	– Controlled Recognized Environmental Condition
DNPL	– Delisted National Priority List
DTSC	– Department of Toxic Substances Control
ENG	– Engineering
ERNS	– Emergency Response Notification System
CUPA	– Certified Unified Program Agency
FOI/FOIA/FOIL	– Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	– Heating Ventilation & Air Conditioning
HREC	– Historic Recognized Environmental Condition
IAQ	– Indoor Air Quality
INST	– Institutional
ISRA	– Industrial Site Recovery Act
LBP	– Lead-Based Paint
LQG	– Large Quantity Generator
LTANK	– Leaking Storage Tank
LUST	– Leaking Underground Storage Tank
SDS/MSDS	– Safety Data Sheet / Material Safety Data Sheet
NA	– Not Applicable
NFA	– No Further Action
NFRAP	– No Further Remedial Actions Planned
NPDES	– National Pollutant Discharge Elimination System
NPL	– National Priority List
OPRA	– Open Public Records Act
PAH	– Polycyclic Aromatic Hydrocarbon
PCE	– Perchloroethylene
RAO	– Response Action Outcome
RCRA	– Resource Conservation and Recovery Act
RWQCB	– Regional Water Quality Control Board
SCAQMD	– South Coast Air Quality Management District
RCRIS	– Resource Conservation and Recovery Information System
REC	– Recognized Environmental Condition
SDG	– Significant Data Gap
SEMS	– Superfund Enterprise Management System
SRP	– Site Remediation Program
SQG	– Small Quantity Generator
SVOC	– Semi-Volatile Organic Compound
TCE	– Trichloroethylene
TSDF	– Treatment Storage and/or Disposal Facility
USEPA	– United States Environmental Protection Agency
UST	– Underground Storage Tank
VEC	– Vapor Encroachment Condition
VOC	– Volatile Organic Compound

1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of APNs 610-301-07 and 610-301-20, Lake Forest, California (the Property). This assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-13 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions, and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

1.1 Summary of Project Details

Project Name:		N/A			
Primary Street Address:		20865 Canada Road			
City:	Lake Forest	**County:**	Orange	**State:**	California
Tax ID/Parcel Number:		610-301-07 and 610-301-20			
Property Owner:		Mr. Brian Hess			
Zoning Designation:		A General Plan Amendment to change the General Plan designation from OS to Light Industrial; A Zone Change to change the zoning of the property from General Agriculture (A-1) to Light Industrial (M-1) to establish a contractor storage yard use (Great Scott Tree Services Inc.). Submitted on March 22, 2018. Under review.			
Approx. Property Area:		610-301-07 – 5.54 acres 610-301-20 – 0.82 acres			
Buildings/# of Floors		Single- story residential house, and a wooden barn			
Approx. Building Area:		House: 3,500 SF and Barn: 2,800 SF			
Approx. Year Built:		House prior to 1910/1952; Barn 1848			
Commercial Occupants:		N/A			
Current Use:		Residential with a barn and horse stalls and farm animals			
Prior Uses:		Orchards			
Inspected By:		Ms. Shilpa Sunil			
Property Contact/Company:		Mr. Steve Guzowski/Great Scott tree Service Inc.			
Property Escort/Company:		Mr. Steve Guzowski			
Inspection Date:		June 12, 2019 and June 26, 2019			
Weather Conditions:		Clear Sunny, 85 degrees F			

1.2 Findings Summary Table

PHASE I ENVIRONMENTAL SITE ASSESSMENT				
Assessment Subject	**No Notable Finding**	**Notable Findings**	**REC?**	**Rep. Ref.**
User Provided Info	X			3.0
Data Gaps	X	Hillmann was not able to access the western portion of the Property due to thick and overgrown vegetation.		2.3
Property Regulatory Records Review	X	The property is not listed in any regulatory databases.		4.3.1
Property Historical Records Review		Historical site uses include citrus and avocado orchards and residential home.	REC	4.2
Site Reconnaissance		Property consists of two parcels. The northwestern portion of the Property includes Serrano creek, hiking trail and the remainder portion of the Property is covered with dense vegetation. The southern parcel is developed with a single-family residential house that has 4 bedrooms, 2 bathrooms and approximately 2,400 square feet of floor space; and a barn. A horse stall and farm animal storage area were observed at the northwestern portion of the Property. A horse corral was observed at the southwest side of the Property. Remaining portion of the parcel is undeveloped currently covered by brushes and trees. The north eastern portion of the Property is currently been occupied by the tenant- Richard Cohen Landscape and Construction, Inc. Several 55-gallon drums of an unspecified oil were observed on the Property. One of the drums was stored on bare dirt.	No	5.0
Interviews		Mr. Steve Guzowski of Great Scott Tree Service, Inc. indicated a 500-gallon underground gasoline tank with pump was on Property until 1984-1985 used for agricultural purposes. A leak was detected approximately in 1984. Under the guidance of the local environmental jurisdiction, the pump was removed and the tank was filled with water. Mr. Steve indicated that the underground storage tank was still underground. Due to overgrown vegetation, there were no visible signs of the former UST at the Property. Hillmann reviewed online Geotracker records and there were no files pertinent to the underground storage tank found on file. Based on the age of the construction of the residential home, the home was connected to a septic system. At the time of the site inspection, Hillmann observed Los Alisos Water District has recently placed new sewer system in place.	REC No	6.0
Adjoining & Nearby Properties	X	The northwest adjacent Property at 20697 Prism Place located approximately 277 feet northwest is listed under UST and SWEEPS UST, RCRA NON-GEN/NLR, HAZNET, CERS, CERS HAZ Waste databases. The south-southeast adjacent Property at 20845 Canada Road located approximately 103 feet down gradient of the Property is listed under RCRA NONGEN/NLR database.	No No	4.3.2 5.2.8

BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE			
BER	**Not Applicable**	**Findings**	**Rep. Ref.**
Asbestos Containing Materials (ACM)		Based on the age of the construction of the single-family residential home there is potential for ACM.	7.1
Lead Based Paint (LBP)			7.2
Radon		The Property located in USEPA Radon Zone 3.	7.3
Mold			7.4

1.3 Findings and Conclusions

1.3.1 Recognized Environmental Conditions

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of the Property as described in Section 2 of this report. Any additions to, exceptions to or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

RECOGNIZED ENVIRONMENTAL CONDITIONS	
REC 1	The UST at the Property and the historic agricultural use of the Property is considered to be REC to the Property.
REC 2	The historical usage of the Property as a citrus and avocado grove is considered a REC in connection with the Property.
HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No HRECs were identified.
CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No CRECs were identified.
SIGNIFICANT DATA GAPS	
	No SDGs were identified.

1.3.2 REC Response Action Recommendations

The following table presents recommended response actions to the identified RECs for further investigation and/or corrective action:

REC RESPONSE ACTION SUMMARY TABLE	
REC #	**Response Action**
REC 1 and 2	Hillmann recommends a limited Phase II subsurface investigation to determine the historic agricultural use and whether the historical gasoline underground storage tank has adversely impacted the Property. Hillmann also recommends a geophysical survey to determine if a UST system is still located on the Property. Hillmann recommends the 55-gallon drums observed in the barn should be properly removed and disposed of at an authorized off-site location.

1.3.3 Additional Findings

The following environmental conditions were identified, but are not considered to be a REC in connection with the Property:

NOTABLE ENVIRONMENTAL CONDITIONS	
1.	The site appears to have been utilized as citrus and avocado orchard from circa 1938 to 1940. There is the potential for soil contamination due to current and historic pesticide applications; this is considered to be a REC in connection with the Property.
2.	Site contact Mr. Guzowski of Great Scott Tree Service, Inc. indicated a 500-gallon underground gasoline tank with pump was on Property until 1984-1985 and was used for agricultural purposes. A leak was detected approximately in 1984. Under the guidance of the local environmental jurisdiction, the pump was removed and the tank was filled with water. Mr. Steve indicated that the underground storage tank was still underground. Due to overgrown vegetation, there were no visible signs of the former UST at the Property. There were no records of date of installation of the UST and no leaks were recorded. Hillmann reviewed online Geotracker records and there were no files pertinent to the underground storage tank on file. Hillmann recommends the soil sampling to determine if the subsurface has been impacted and analyze for suspect compounds such as total petroleum hydrocarbons (TPHcc), volatile organic compounds (VOCs), and Ca Assessment Metals (CAM). Hillmann recommends a geophysical survey to determine if the unknown existing UST system is still in ground using electro-magnetics and GPR if necessary.
3.	Hillmann observed four 55-gallon drums of unspecified oil was stored on pallets and one of the drums was stored on bare dirt located in the barn building. No evidence of leaks or staining was observed in vicinity of the drums. The drums are not considered to be a REC; however, they should be properly removed and disposed of at an authorized off-site location.
4.	XPO Logistics Freight Inc - UIV (20697 Prism Place). This site is adjoining to the northwest and is cross-upgradient of the Property. The site is listed under UST, SWEEPS UST, RCRA NONGEN/NLR, CERS Hazwaste, CERS tanks, HAZZNET databases. This site is registered on the UST database with Facility ID # FA0024234. The SWEEPS UST listing indicates the 10,000-gallon motor vehicle fuel diesel UST was installed in 1988. Based on the absence of reported releases or violations, this listing is not considered a REC in connection with the Property. The CERS Hazwaste listing indicates that hazardous waste treatment occurs onsite, several administrative violations are noted. The CERS listing indicates that the site operates as a chemical storage facility with several administrative violations. The CERS listing indicates that the site returned to compliance on 3/17/2017 after the violation for not collecting waste in a container was issued on 3/13/2017. Due to a lack of reported spills, the relatively minor violation, and hydrologic gradient, these listings are not considered to be RECs in connection with the Property

1.4 Environmental Professional Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Ryan Terwilliger
Environmental Professional

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-13. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the "landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The primary goal of the processes established by ASTM E1527-13 is to identify *recognized environmental conditions* in connection with the Property.

The term *recognized environmental condition (REC)* is defined by the ASTM as the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The ASTM has also defined the terms *historical recognized environmental conditions* and *controlled recognized environmental conditions* as two additional types of RECs. The term *historical recognized environmental condition (HREC)* is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls or engineering controls).

The term *controlled recognized environmental condition (CREC)* is defined as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

Conditions determined to be *"de minimis conditions"* are not considered to be RECs, HRECs or CRECs. *De minimis condition* is defined by the ASTM, "…as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports, and interviews, etc., to determine prior uses of the Property from the present, back to the Property's first developed use, or back to 1940, whichever is earlier.

- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Property, adjoining properties, and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

2.1.1 Business Environmental Risks/Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-13 standard:

Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if more certainty is desired regarding ACM and potential asbestos hazards at the Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

USEPA Designated Radon Potential: Review of general non-site-specific data published by the USEPA regarding the Radon Zone classification for the area of the Property.

Mold: A cursory non-intrusive visual screening within the accessed areas of buildings on the Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Property.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:		20865 Canada Road			
City:	Lake Forest	**County:**	Orange	**State:**	California
Tax ID/Parcel Number:		610-301-07 and 610-301-20			
Approx. Land Area:		610-301-07 – 5.54 acres 610-301-20 – 0.82 acres			
Approx. Latitude/Longitude:		North 33.6605360 degrees/West 117.6751220 degrees			
Additional Details (if appl.):		NA			

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	See Section 4.2.9
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 User Reliance

This report is for the exclusive use of the User(s) named on the front cover. No other party(ies) shall have any right to rely on the content of this report without first obtaining the consent of the original report User; and without obtaining written consent from Hillmann in the form of a letter of reliance or report recertification.

2.5 Significant Assumptions

The following significant assumptions are made:

- Hillmann has assumed that the site operations at the time of the site visit reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, Hillmann has also assumed that no areas of the Property with potential environmental concerns or RECs were concealed or otherwise not made known to us, intentionally or unknowingly, by the Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, Hillmann has assumed that the gradient of groundwater flow follows the surface topography of the Property and immediate surrounding area.

2.6 General Limitations and Exceptions

2.6.1 Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to Hillmann's ability to access and review pertinent regulatory agency records. Such limitations, if encountered, are further specified in Section 4.4.

Significant limitations related to the condition or accessibility of the Property at the time of the site reconnaissance, if encountered, are reported in Section 5.1.

2.6.2 Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-13 are reported.

2.6.3 Special Terms and Conditions

Hillmann has prepared this Phase I Environmental Site Assessment using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes, and petroleum products at the Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. Hillmann makes no representation or warranty that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions, and recommendations presented in this report are based on our visual observations of the Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Hillmann relies upon the information, whether written, graphic or verbal, provided by the

Property contact(s) or as shown on any documents reviewed or received from the Property contact, owner or agent, or municipal source; and assumes that information to be true and correct. Although there may have been some degree of overlap in the information provided by these various sources, Hillmann did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this assessment. Hillmann can neither warrant nor guarantee the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The regulatory research is designed to meet the requirements of ASTM Standard E 1527-13. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. “Reasonable efforts” are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

Hillmann is not a professional title insurance firm and makes no guarantee, explicit or implied, that the records which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-13 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User’s analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

The recommended response actions to the identified RECs presented in Section 1.3, if any, are not intended to represent the only course(s) of action to take; nor does it imply any opinion as to the timing of the action. Furthermore, it is emphasized that additional response actions may become warranted depending on the outcome of the initial action(s) taken. Hillmann advises that consultation with legal counsel familiar with environmental and real estate law may be beneficial

to the decision-making process for the type and timing of a response action to identified RECs if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term "User" is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Property; specifically, the entities named on the front cover to which the report has been addressed.

3.1 Prior Environmental Reports/Documentation

No prior reports were provided.

3.2 User Questionnaire

Section 6 of the ASTM E1527-13 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, and as recommended by the ASTM E1527-13 standard, a Questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 has been provided to the original report User. The following is a summary of the User's response:

Question:	Yes/No:	Detail:
Environmental liens that are filed or recorded against the property: Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	No	
Activity and use limitations that are in place on the property or that have been filed or recorded against the property: Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	No	
Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Yes	
Relationship of the purchase price to the fair market value of the property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Yes	

Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,		
-Do you know the past uses of the property?	Yes	Agricultural use.
-Do you know of specific chemicals that are present or were once present at the property?	No	
-Do you know of spills or other chemical releases that have taken place at the property?	No	
-Do you know of any environmental cleanups that have taken place at the property?	No	
The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	No	
Litigation/Administrative Proceedings/Government Notices As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	No	

NR-no response

3.3 Reason for Performing Phase I ESA

Hillmann assumes that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

4.0 RECORDS REVIEW

4.1 Physical Setting Sources

The following physical setting sources were reviewed:

Source	Discussion
USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum)	The Property lies at an elevation of approximately 631 feet above mean sea level on the El Toro, CA Quadrangle map. The topography indicated by the map appeared to be gently sloping downward towards the west. The closest down gradient water body is Serrano Creek located approximately 198 feet to the west.
USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum)	The soil type at the Property is classified as "Riverwash". The "Riverwash" designation is described as soils with a sand surface texture with a Very slow infiltration rates. Soils are clayey, have a high-water table or are shallow to an impervious layer.
Geologic Data: (EDR Geocheck-Physical Setting Source Addendum)	The geologic formation in the vicinity of the Property is described as a stratified sequence of the Cenozoic Era, Tertiary System, and Miocene Series.
Additional Sources/ Data:	N/A
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be generally to north.

4.2 Historical Use – Property and Adjoining Properties

Hillmann has conducted research in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the Property. Standard historical sources have been sought in an attempt to document the past uses of the Property as far back as it can be shown that the Property contained structures; or from the time the Property was first used for residential, agricultural, commercial, industrial or governmental purposes.

4.2.1 Fire Insurance Maps

Hillmann obtained a Certified Sanborn Map Report from EDR in order to research published historic fire insurance maps for the Property and surrounding area. A copy of the report is included in Appendix D. The following is a summary of site use information interpreted from a review of the report:

Year(s)	Description	
	Property	(No Coverage)
	Adjoining Properties	

4.2.2 City Directories

The following is a generalized summary of the findings of City Directory Research for past occupants of the Property, indicating occupants and the years indicated by the listings.

Property	
Occupant(s)	**Appr. Date Range**
Canada Ranch Stables / Hess Ronald Construction	2000-2010
Don Hess	1992-1995

Hillmann also reviewed the EDR City Directory Abstract report for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

Adjoining Properties		
Address(es)	**Historic Occupant(s)**	**Appr. Date Range**
20941 Canada Road	American Mini Storage	1995-2014
	Private individual	1992
20845 Canada Road	Commercial/industrial	2010-2014

4.2.3 Historical Topographic Map Review

Hillmann reviewed historic topographic maps of the Property from EDR. The following details related to site usage were indicated by the topographic maps:

Year(s)	Summary	
1902, 1935	**Property**	The Property is depicted as undeveloped land.
	Adjoining Properties	The adjoining properties are depicted as undeveloped land.
1942	**Property**	The Property is depicted as an orchard.
	Adjoining Properties	The adjoining properties are depicted as orchards. Serrano Creek is depicted to the northwest.
1949, 1950	**Property**	The Property is depicted as orchard. Serrano Creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties are depicted as orchards. Adjacent property to the northeast is depicted with three small structures. Canada Road is shown on the map.
1968	**Property**	The Property is depicted as undeveloped land with a small structure depicted to the southwest. Serrano Creek is depicted to the northwest.
	Adjoining Properties	Adjacent property to the northeast is depicted with three small structures. Canada Road is shown on the map.
1978, 1981, 1982	**Property**	The Property is depicted as orchard with a small structure depicted to the southwest. Serrano Creek is depicted to the northwest.
	Adjoining Properties	Adjacent property to the northeast is depicted with three small structures. The adjoining properties to the northwest are depicted as commercial/light industrial structure.
1997	**Property**	The Property is depicted as orchard. Serrano Creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties to the northwest and southwest are depicted with existing commercial/light industrial structures.
2012	**Property**	No building development is depicted on the topographic map.
	Adjoining Properties	No building development is depicted on the topographic map.

4.2.4 Aerial Photograph Review

Hillmann reviewed historic aerial photographs of the Property from EDR. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Summary	
1938, 1946, 1949	**Property**	The Property appears to be developed with small residential structure surrounded by orchard. Serrano Creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties appear to be orchards. Small structures are depicted to the northeast.
1952, 1963, 1967, 1972, 1974, 1980	**Property**	The southwest corner of the Property appears to be developed with the existing residential home and barn; the remainder of the Property appears to be orchards.
	Adjoining Properties	The adjoining properties appear to be orchards. Small structures are depicted to the northeast and to the south.
1990, 1994,	**Property**	The Property appears to be developed with the existing structures including a residential home and a barn. Serrano creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties to the north, east and southwest are depicted to be developed with existing commercial/light industrial structures. The south adjacent property is depicted to be undeveloped land.
2005, 2009, 2012 and 2016	**Property**	The Property appears to be developed with the existing structures including a residential home and a barn. Serrano creek is depicted to the northwest.
	Adjoining Properties	The adjoining properties to the north, east, west, and southwest are depicted to be developed with existing commercial/light industrial structures.

4.2.5 EDR High-Risk Historical Records

The EDR Radius Map™ report, which will be discussed in greater detail in Section 4.3, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

EDR Historic Cleaners	No on-site or adjoining listings identified.
EDR Historic Auto	No on-site or adjoining listings identified.
EDR MGP	No listings identified within 1-mile search distance.

4.2.6 Petroleum/Natural Gas Well Review

Hillmann reviewed historical record sources for evidence of historic petroleum and/or natural gas wells at the Property. In addition, Hillmann conducted a search of the property location on the Division of Oil, Gas & Geothermal Resources Well Finder database (http://maps.conservation.ca.gov/doggr/index.html). No record of any historical petroleum/natural gas wells at the Property was identified.

4.2.7 Additional Historical Data

No additional historical data was reviewed and/or obtained.

4.2.8 Summary of Identified Historic Uses

The following table presents a summary of the types and approximate timeframes of identified prior uses of the Property:

Property	
Years (Approx.)	**Use**
1938 to 1980	Orchards, Serrano Creek
1990 to Present	Residential, Barn, Serrano Creek

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Adjoining Properties	
Years (Approx.)	**Use**
1938 to 1980	Orchards
1990	Undeveloped land (south adjacent property)
1990 to Present	Undeveloped land

4.2.9 Historical Records Data Failure

The ASTM E1527-13 standard defines data failure as a failure to achieve the ASTM specified historical research objectives after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions should be sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval.

Objective	Met?	Detail	Significant Data Gap?
First developed use/date determined?	Yes	The Property was developed as Orchard and a Bran in 1800s. A residential home circa 1938	No
Record sources at 5-year intervals back to 1940 or first developed use?	No	Records gaps between 1952 and 1963, 1980 and 1989, and 1994 and 2005; however, site conditions likely unchanged during these intervals.	No
All obvious prior uses identified?	Yes	See Section 4.2.8.	No

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

4.2.10 Historic Uses REC Discussion

A portion of the Property appears to have been utilized as Orchards since circa 1930. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. There is the potential for soil contamination due to current and historic pesticide applications, this is considered to be a REC in connection with the Property.

The 500-gallon underground gasoline tank with a pump that was used as part of the agricultural purposes is considered to be REC to the Property. According to the owner, a leak was detected in 1984 and the pump was removed from the Property under the guidance of the local environmental jurisdiction. Hillmann reviewed records for the agencies and there are no records obtained in regards to the underground storage tank. There have been no records of the UST as having been removed and it is considered to be a REC in connection with the Property. Hillmann recommends a limited Phase II investigation to determine whether the UST is still present and whether the historical operation of the UST have negatively impacted the Property.

4.3 Standard Environmental Record Sources

Hillmann obtained a regulatory database report, titled EDR Radius Map™ Report, from Environmental Data Resources of Shelton, CT. The report provided a search of standard environmental record sources in general accordance with the requirements of the ASTM E1527-13. Hillmann has reviewed the regulatory database report, and a summary of findings has been presented in the following tables and report sections. Hillmann has also reviewed the list of unmapped sites (a.k.a. "Orphan List" sites). Unmapped sites identified as falling within an applicable specific search distance or warranting discussion in the report, if any, have been included in the information presented below. Detailed descriptions of the meaning and significance of the regulatory databases can be found in the regulatory database report in Appendix E.

Regulatory Database	Search Distance	Property Listed?	Adj. Properties Listed?	Total Listings Within Search Distance
Fed. NPL/Proposed NPL	1-mile	No	No	0
Fed. Delisted NPL	½-mile	No	No	0
Fed. SEMS	½-mile	No	No	0
Fed. SEMS-ARCHIVE	½-mile	No	No	0
Fed. RCRA CORRACTS	1-mile	No	No	0
Fed. RCRA TSD	½-mile	No	No	0
Fed. RCRA LQG	Site & Adj.	No	No	
Fed. RCRA SQG	Site & Adj.	No	No	
Fed. RCRA CESQG	Site & Adj.	No	No	
Fed. ENG Control List	Site	No		
Fed. INST Control List	Site	No		
Fed. ERNS	Site	No		
State/Tribal Hazardous Waste Site	1-mile	No	No	0
State/Tribal Landfill/Solid Waste	½-mile	No	No	0
State/Tribal Leaking Storage Tanks	½-mile	No	No	2
State/Tribal Registered Storage Tanks	Site & Adj.	No	No	
State/Tribal Eng. Control List	Site	No		
State/Tribal Inst. Control List	Site	No		
State/Tribal Voluntary Cleanup Sites	½-mile	No	No	0
State/Tribal Brownfields	½-mile	No	No	0
Supplemental Regulatory Databases	Site & Adj.	No	No	

4.3.1 Property Listings

The Property address was not identified on any of the databases searched.

4.3.2 Adjoining Property Listings

RCRA NonGen NLR/ – Camila Corp at 20845 Canada Road. This site is adjoining to the south-southeast and approximately 103 feet downgradient of the Property. This site is listed as a Non-generator of hazardous waste. There were no reported violations. Based on the absence of reported violations or releases and the relative hydraulic gradient this listing is not considered a REC in connection with the Property.

UST, SWEEPS UST, RCRA NonGEN/ NLR, HAZNET, CERS, CERS HAZWASTE – XPO Logistics Freight INC. UIV at 20697 Prism Place. The site is adjoining to the northwest and is approximately 277 feet cross- gradient of the Property. This site is registered on the UST database with Facility ID # FA0024234. The SWEEPS UST listing indicates a 10,000-gallon motor vehicle fuel - diesel underground storage tank was installed in 1988. RCRA NonGen/NLR listing indicates the site is non generator of hazardous waste. CERS HAZWASTE describes the site as a hazardous waste generator. The listings indicate several violations issued since 2012 to 2017 and were returned to compliance immediately. Several compliance evaluation inspection results are listed for the site. Based on the absence of reported violations or releases and the upgradient position relative to the Property, this site is not considered a REC in connection with the Property.

4.3.3 ASTM Search Distance Findings

The following is a summary of the findings of the regulatory database review with regard to sites identified as located within the ASTM specified search distance surrounding the Property. In order to keep this report informative and yet concise, Hillmann has provided a brief discussion of the listed site(s) for each database category that appears most likely to impact the Property based on distance, topography and/or case status. A copy of the full regulatory database report, including available details of all listed sites, is included in Appendix E.

Note that listings for the following databases, if identified, would be discussed above in Sections 4.3.1 and 4.3.2: Registered Storage Tanks, Federal RCRA Generators, Federal and State INST and ENG Controls, ERNS.)

Federal NPL: No NPL listing was identified within a one-mile radius of the Property.

Federal Delisted NPL: No DNPL listings were identified within a ½-mile radius of the Property.

Federal SEMS (formerly CERCLIS): No SEMS listing was identified within a ½-mile radius of the Property.

Federal SEMS-ARCHIVE (former CERC-NFRAP): No SEMS-ARCHIVE listings were identified within a ½-mile radius of the Property.

Federal RCRA-CORRACTS: No CORRACTS listing was identified within a one-mile radius of the Property.

Federal RCRA-TSD: No TSD listings were identified within a ½-mile radius of the Property.

State/Tribal Hazardous Waste Sites: No SHWS listings were identified within a one-mile radius of the Property on the EnviroStor database.

No SHWS listings were identified within a one-mile radius of the Property on the RESPONSE database.

State/Tribal Landfill/Solid Waste Disposal Sites: No SWF/LF listings were identified within a ½-mile radius of the Property.

State/Tribal Leaking Storage Tanks: Two (2) LUST listings were identified within a ½-mile radius of the Property. The closest listing is described as Chevron at 20731 Lake Forest located 1968 feet east of the Property. The site is listed with completed case -closed status dated 04/20/1998. Based on the distance, hydraulic gradient and case closed status the listed sites are not considered to be concern to the Property.

Based on the regulatory closure received and the relative distance from the Property, other LUST listing is not considered a REC in connection with the Property.

No SLIC listings were identified within a ½-mile radius of the Property.

State/Tribal Voluntary Cleanup Sites: No VCP listings were identified within a ½-mile radius of the Property.

State/Tribal Brownfields: No BROWNFIELDS listings were identified within a ½-mile radius of the Property.

Review of the sites identified within the ASTM search parameters did not identify any nearby or surrounding area sites that are considered to be a REC in connection with the Property, unless as discussed otherwise previously in this section.

4.3.4 Tier I Vapor Encroachment Screening

Hillmann reviewed adjoining and vicinity database sites to identify potential off-site sources of sub-surface vapor encroachment. This review was based upon the current ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also utilizing the "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Property in the up-gradient direction, 365 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Property in the up-gradient direction, 165 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the subject property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Property when reviewing applicable sites within those distances.

The 500- gallon gasoline underground storage tank is considered to be potential vapor instruction and therefore, considered to be REC to the Property.

4.4 Additional Environmental Record Sources

4.4.1 Supplemental Database Listings

Hillmann reviewed the regulatory database report for listings on supplemental databases that were searched in addition to the Standard Environmental Record Sources. Any property or adjoining property listings on such databases, if identified, would be discussed in Section 4.3.1 and 4.3.2. None of the other supplemental database listings identified by the regulatory database report are considered to be a REC in connection with the Property.

4.4.2 Local Agency & Internet Research

Hillmann has submitted requests to local and municipal agencies for pertinent records pertaining to the Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage, and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Hillmann also conducted online research of government environmental regulatory databases where available, as well as a general cursory internet search of the Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
Environmental Protection Agency (EPA)	FOIA Request	The Property address was searched. No results for the Property were found.
Irvine Ranch Water District	FOIA Request	The Property address was searched. No results for the Property were found.
Department of Toxic Substances Control (DTSC)	FOIA Request	The Property address was searched. No results for the Property were found.
Regional Water Quality Control Board (RWQCB) – Santa Ana Region (8)	FOIA Request	The Property address was searched. No results for the Property were found.
South Coast Air Quality Management District (SCAQMD)	FOIA Request	The Property address was searched. No results for the Property were found.
Orange County Geographical Information System (GIS)	On-line search	No information indicative of a REC was identified.
CA DTSC EnviroStor database http://www.envirostor.dtsc.ca.gov/public/	Internet	The Property address was searched. No results for the Property were found.
CA GeoTracker database http://geotracker.waterboards.ca.gov/	Internet	The Property address was searched. No results for the Property were found.

Source	Type of Request	Outcome
USEPA Envirofacts search http://www.epa.gov/enviro/index.html	Internet	The Property address was searched. No results for the Property were found.
www.google.com	On-line search	The Property address search returns no results
www.realquest.com	On-line search	Basic Property information such as parcel number, date of construction, and building square footages were collected. Pertinent information, where obtained, is referenced in the appropriate sections of this report.
Other:	NA	

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of the Property and improvements, adjoining properties as viewed from the Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares. Building exteriors were observed at ground level unless otherwise indicated. Where applicable, Hillmann accessed and observed representative areas of building interiors to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Ms. Shilpa Sunil
Property Escort/Company:	Mr. Steve Guzowski/ Great Scott Tree Service, Inc.
Inspection Date:	June 12, 2019 and June 26, 2019
Weather Conditions:	Clear Sunny, 85 degrees F

5.1.1 Significant Inaccessible Areas

Hillmann was not able to access the western portion of the Property due to thick and overgrown vegetation.

5.2 General Site Setting

5.2.1 Site and Vicinity Characteristics

The Property consists of irregular shaped is approximately 0.82-acres in size. Property consists of two parcels. Serrano Creek borders the Property to the north side of the Property. There are hiking trails observed along the border of the creek. The southern parcel is developed with a single-family residential house and a barn.

The vicinity of the Property is improved primarily by commercial/light industrial properties.

5.2.2 Topographic Characteristics

The terrain of the Property appeared to be relatively flat that slopes to the north. Serrano Creek borders northern portion of the Property.

5.2.3 General Description of Structures

The southern parcel is developed with a single story single-family residential house that has 4 bedrooms, 2 bathrooms and approximately 2,400 square feet of floor space; and a barn. A single-story wooden barn is located at the northeast of the Property.

5.2.4 Sources of Heating and Cooling

Heating is provided by fire place. There are no sources of heating or cooling at the Property.

5.2.5 Potable Water Source/Sewage Disposal System

Potable water and sewer services are provided via the public utility.

5.2.6 Current Use(s) of the Property

The current owner of the property currently resides at the residential home. The northwest portion of the site is used for storage of farm animals and horses. The northeastern portion of the Property is currently been occupied by the tenant- Richard Cohen Landscape and Construction, Inc.

5.2.7 Past Use(s) of the Property

No obvious indication of past Property usage likely to have involved the use, treatment, storage, disposal or generation of hazardous substances or petroleum products was observed at the time of the site visit. Please refer to Section 4.2 for findings of historical site use research.

5.2.8 Current Use(s) of the Adjoining Properties

The following table describes the current uses of the adjoining properties:

Dir	Street Address	Description
NW	20697 Prism Pl, Lake Forest	XPO Logistics
NE	20692 Prism Place	Global Power Technologies Group
S	20845 Canada Road	Camilo Corporation
SW	20941 Canada Road	American mini Storage

No visual observations indicative of a potential environmental concern was noted on the adjoining properties.

5.2.9 Past Use(s) of the Adjoining Properties

No indication of past uses of the adjoining properties was noted at the time of the site visit. Please refer to Section 4.2 for the findings of historical site use research.

5.2.10 Current/Past Uses of Surrounding Area

The vicinity of the Property consists primarily of commercial and light industrial properties. No indications of past Property use that differ substantially from current conditions were observed at the time of the site visit.

5.3 Interior & Exterior Observations

5.3.1 Storage/Usage of Hazardous Substances and Petroleum Products

The following hazardous substances and petroleum products were observed to be stored and used by property occupants:

Occupant	Substance	Qty/Container Type	Storage Conditions
Owner	Oil	4 / 55-gallon drums	No evidence of leaks or staining was observed in the vicinity of the drums.

5.3.2 Drums

Hillmann observed four 55-gallon drums of an unspecified oil located in the barn building. No evidence of leaks or staining was observed in vicinity of the drums. The drums are not considered to be a REC; however, they should be properly removed and disposed of at an authorized off-site location.

5.3.3 Unidentified Substance Containers

No unidentified containers suspected of containing hazardous substances or petroleum products were noted on the Property.

5.3.4 Other Hazardous Substances/Petroleum Products

No other containers of hazardous substances or petroleum products were noted on the Property at the time of the site visit.

5.3.5 Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/ UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
UST	None	500-gal	Steel	Unknown	Inactive	Reportedly located

5.3.6 PCBs in Electrical/Hydraulic Equipment

There were no transformers noted on the Property. No signs of leaking or staining were observed in the area of the transformers.

No other electrical or hydraulic equipment suspected of containing PCBs was identified at the Property.

5.3.7 Odors

No strong, unusual or pungent odors were noted on the Property.

5.3.8 Pools of Liquid

No standing water or pools of liquid likely to contain hazardous substances or petroleum products were noted at the Property.

5.3.9 Interior Stains or Corrosion

No interior stains or corrosion due to hazardous substance/petroleum products spills/releases were observed.

5.3.10 Interior Drains/Sumps

No floor drains or sump pits were noted at the Property other than for storm water or sewage management.

5.3.11 Exterior Pits/Ponds/Lagoons

No evidence of exterior pits, ponds or lagoons was identified on the Property in connection with waste treatment or disposal.

5.3.12 Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed at the Property.

5.3.13 On-Site Solid Waste Disposal/Fill Material

No evidence of any on-site solid waste dumping was noted at the Property.

No evidence of recently deposited fill materials was observed at the Property.

5.3.14 Wastewater

Sanitary sewage and storm water runoff generated on-site are discharged into municipal sewer systems. No other waste discharges were noted at the Property.

5.3.15 Septic Systems

Mr. Steve Guzowski mentioned that the residential property had a septic system in place. Due to the overgrown vegetation, septic system was not visible. There were new sewer lines in place that was laid out by the city observed in the vicinity of the Property. Hillmann recommends to remove the septic system and be capped under current regulations.

5.3.16 Wells

No indication of a well was noted on the Property.

5.3.17 Railroad Spurs

No railroad spurs were noted on the Property at the time of the assessment.

6.0 INTERVIEWS

6.1 Interviews with Past and Present Owners and Occupants

Subject	Name/Affiliation	Summary
Property Owner / Representative	Ms. Steve Guzowski/Great Scott tree Service Inc.	Ms. Steve Guzowski, of Great Scott tree Service Inc., was provided with an environmental questionnaire with instructions to have it completed by a party knowledgeable of the Property. As of the date of this report, the environmental questionnaire has not been returned.
Property Occupants	Not applicable	Property occupants were not available for interview at the time of the assessment.
Past Owners, Occupants, Operators	Not applicable	Past owners/occupants of the Property were not available for interview at the time of the assessment.
Owners/Occupants of Adjoining or Nearby Properties	Not applicable	The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.

6.2 Interviews with State and/or Local Government Officials

Written and on-line requests for environmental records of the Property from State and Local governmental agencies are detailed in Section 4.4.2.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as "Non-Scope Considerations"). The ASTM E1527-13 standard defines the term business environmental risk (BER) as, *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

Suspected ACM noted during a cursory visual screening of 20865 Canada Road included sheetrock wall systems, ceiling acoustical spray on material, suspended ceiling tiles, carpet mastics, and floor tile with associated mastics. Although not observed, the roofing materials may contain asbestos. Additional types of suspect ACM may exist in enclosed areas or areas not accessed during the assessment. It is emphasized that this limited screening does not constitute a comprehensive asbestos survey of the premises and is meant only to provide a cursory evaluation regarding the potential presence of ACM at the Property.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

In general, interior painted surfaces within the space were observed to be in fair condition.

7.3 Radon

Hillmann reviewed data compiled by the USEPA, as summarized by the regulatory database report, which indicated that the Property is located in an area with a low potential for radon concentrations that exceed current USEPA action guidelines. Orange County is classified as a Zone 3 or 'low risk' area for radon.

7.4 Mold/Microbial Damage

As per the contracted scope of work, Hillmann conducted a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth. Hillmann did not observe any other evidence of significant problems with moisture intrusion or mold/microbial growth at the Property.

Hillmann did not observe any evidence of significant problems with moisture intrusion or mold/microbial growth at the Property.

QUESTIONNAIRES/USER PROVIDED INFORMATION

HILLMANN CONSULTING

Phase I ESA - Environmental Questionnaire

Instructions: The following questionnaire should be completed by a person designated by the Property Owner/Manager that is most knowledgeable about its usage, condition and history. Please complete and return to Hillmann via email, fax at 908-686-2636, or in person during the site inspection.

General:

Property Name: Hess Property
Street Address: 20865 Canada
Lake Forest
City, ST Zip: CA
Completed by: Steve Guzowski (Name)
Company: Great Scott Tree Service, Inc.
Signature: _____
Date: 06-11-2019

Number of years at or familiar with the Property: 2yrs

Site Description:

Block & Lot #(s): APN 610-301-07, 610-391-20
Property Size: 2+ Acres
Number of building(s): 2
Building Size(s) ~70' x 50'; 70' x 40'
Year(s) Built: House Prior to 1910; Barn 1848
of units: (if appl.)
Type of Property: Agriculture & Commercial

Utilities and Services: (please check "Yes", "No" or "NA-Not Applicable") and indicate provider if "Yes".

HILLMANN CONSULTING

Instructions: Please answer each question. Check "D/K" if you don't know, or otherwise lack sufficient knowledge of the Property to answer the question.

PREVIOUS INVESTIGATIONS		
1.	Have any previous environmental investigations (e.g.- Phase I Environmental Site Assessment, soil/groundwater testing, radon testing, asbestos survey, tank closure/removal reports, etc.) been performed at the Property?	☐ Yes ☑ No ☐ D/K
2.	If yes, what concerns were indicated or recommendations made? *(please provide a copy of all previous environmental reports)* No Reports Available	
PROPERTY USAGE		
3.	To the best of your knowledge, is the Property or any adjoining property currently occupied or formerly occupied for industrial purposes? If yes, please elaborate:	Property: ☐ Yes ☑ No ☐ D/K Adj. Property: ☐ Yes ☑ No ☐ D/K
4.	Is the property or any adjoining property currently used, or have they ever been used, as a gasoline filling station, dry cleaning facility, automotive service/repair shop, auto body repair shop, commercial printing facility, photo development laboratory shop, junkyard, landfill, or as a waste treatment, storage disposal, recycling or processing facility? If yes, please elaborate: Current Owner Purchased in 1980 from Osterman Family. A 500 gal underground gas tank with pump was on property until 1984-1985 for Agriculture purposes. Under the guidance of the local environmental jurisdiction the pump was removed and the tank filled with water. The tank is still underground	Property: ☑ Yes ☐ No ☐ D/K Adj. Property: ☐ Yes ☑ No ☐ D/K
5.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries,, or any other waste materials been dumped above grade, buried and/or burned on the property?	☐ Yes ☑ No
BULK STORAGE TANKS		
6.	Are there currently, or have there been previously, any registered or unregistered above ground or underground storage tanks located at the Property? *If YES, please provide number, size, age of tanks, permits, closure reports, regulatory agency correspondence, and related information.* A 500 gal underground gas tank with pump was on property until 1984-1985 for Agriculture purposes. Under the guidance of the local environmental jurisdiction the pump was removed and the tank filled with water. The tank is still underground	Current Tanks: ☑ Yes ☐ No ☐ D/K Previous Tanks: ☐ Yes ☑ No ☐ D/K
7.	Are there currently, or have there been previously, any vent pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property? See Item 5&6. All are capped.	Current: ☑ Yes ☐ No ☐ D/K Previous: ☐ Yes ☐ No ☐ D/K
8.	Are there currently, or have there been previously, any leakage of hazardous substances or petroleum products from above ground or underground storage tank systems at the Property? Leak from Gasoline Tank - approximately 1984	Current: ☑ Yes ☐ No ☐ D/K Previous: ☐ Yes ☐ No ☐ D/K

HILLMANN CONSULTING

SPILLS, RELEASES, WASTES		
9.	Are there currently, or have there been previously, any waste discharges on or adjacent to the property, other than storm water or into a municipal sanitary sewer system? If yes, please elaborate: Septic System	Current: ☑ Yes ☐ No ☐ D/K Previous: ☐ Yes ☐ No ☐ D/K
10.	Are there currently, or have there been previous, any septic systems, dry wells or leach fields on the property? If yes, please elaborate: Septic System Currently still in use	Current: ☑ Yes ☐ No ☐ D/K Previous: ☐ Yes ☐ No ☐ D/K
11.	Are there currently, or have there been previously, any flooring, drains or walls located within the facility that are, or have been, stained by substances (or, in the case of drains, used for) other than water or are emanating foul odors? If yes, please elaborate:	Current: ☐ Yes ☑ No ☐ D/K Previous: ☐ Yes ☑ No ☐ D/K
12.	Are there currently, or have there been previously, any spills or releases of hazardous substances or petroleum products within the building(s) or on the exterior of the Property?	Current: ☐ Yes ☑ No ☐ D/K Previous: ☐ Yes ☑ No ☐ D/K
13.	Has any non-native and/or contaminated fill material been deposited on the Property?	☐ Yes ☑ No ☐ D/K
14.	Have any current or former property occupants generated hazardous wastes or other wastes (such as waste oil, or medical wastes) that required non-conventional storage, handling and/or disposal methods? *If YES, please indicate type of waste and the name of the waste handling contractor:* _____	☐ Yes ☑ No ☐ D/K
TRANSFORMERS/HYDRAULIC EQUIPMENT		
15.	Are any power transformers, capacitors or hydraulic equipment present at the Property? If yes, please elaborate:	☐ Yes ☑ No ☐ D/K
16.	If power transformers are present, who owns them? _____	☐ Yes ☑ No ☐ D/K
17.	If hydraulic equipment is present, indicate age of equipment and name/telephone # of service contactor: _____	☐ Yes ☑ No ☐ D/K

HILLMANN CONSULTING

REGULATORY DISCLOSURE		
18.	Have there been any environmental liens or governmental notification or involvement relating to past or current use or disposal of hazardous substances with respect to the property of any facility or structure located on the property?	☐ Yes ☑ No ☐ D/K
19.	If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system, or has the well been designated as contaminated by any government environmental/health agency? *(if not applicable, please check* NO*)*	☐ Yes ☑ No ☐ D/K
20.	Is there any environmental litigation, administrative action or cleanup action involving the property related to a release or threatened release of any hazardous substance or petroleum product?	☐ Yes ☑ No ☐ D/K
21.	Are you aware of testing of any environmental media (soil, groundwater, surface water, etc.) at the property which identified levels of contaminants in excess of regulatory standards and/or cleanup guidelines?	☐ Yes ☑ No ☐ D/K
ENVIRONMENTAL/BUILDING CONDITIONS		
22.	Has asbestos testing ever been conducted at the Property? *If YES, please forward a copy of test results and/or survey reports:*	☐ Yes ☑ No ☐ D/K
23.	Are any asbestos containing materials present at the Property? If yes, please elaborate: Possible Building Materials - Acoustic Ceiling and Room addition drywall (1964)	☐ Yes ☑ No ☐ D/K
24.	Has lead paint testing ever been conducted at the Property? *If YES, please forward a copy of test results.*	☐ Yes ☑ No ☐ D/K
25.	Is lead-based paint present at the Property? If yes, please elaborate:	☐ Yes ☑ No ☐ D/K
26.	Has radon testing ever been conducted at the Property? *If YES, please forward a copy of test results.*	☐ Yes ☑ No ☐ D/K
27.	Are there any problems with water intrusion, water damaged surfaces or excessive mold growth within the buildings? If yes, please elaborate:	☐ Yes ☑ No ☐ D/K

COMMENTS:

For any questions answered "YES" that warrant further elaboration, please use the following space as necessary:

HILLMANN
CONSULTING

Phase I ESA - User Questionnaire

Instructions: This form should be completed by a representative of the USER of the Phase I ESA report and returned to Hillmann via email, fax at 908-686-2636, or in person during the site inspection. Typically, the report USER is the entity on whose behalf the report is being prepared.

In order to qualify for one of the Landowner Liability Protections (LLPs)187 offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"),188 the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete. Please complete the following questionnaire and provide any of the referenced information (if available) to Hillmann.

Respondent Name:	Steven J Guzowski
Company/Affiliation:	Great Scott Tree Service, Inc.
Address:	10761 Court Ave Stanton, CA 90680
Response Date:	06-06-19

1. Environmental liens that are filed or recorded against the property (40 CFR 312.25).

Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

Yes ☐ *No* ☑

2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)).

Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

Yes ☐ *No* ☑

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes ☐ *No* ☑

4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes ☑ *No* ☐

5. Commonly Known or Reasonably Ascertainable Information

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

5a. Do you know the past uses of the property?

Yes ☑ *No* ☐

5b. Do you know of specific chemicals that are present or were once were present at the property?

Yes ☑ *No* ☑

5c. Do you know of spills or other chemical releases that have taken place at the property?

Yes ☐ *No* ☑

5d. Do you know of any environmental cleanups that have taken place at the property?

Yes ☐ *No* ☑

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation:

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Yes ☐ *No* ☑

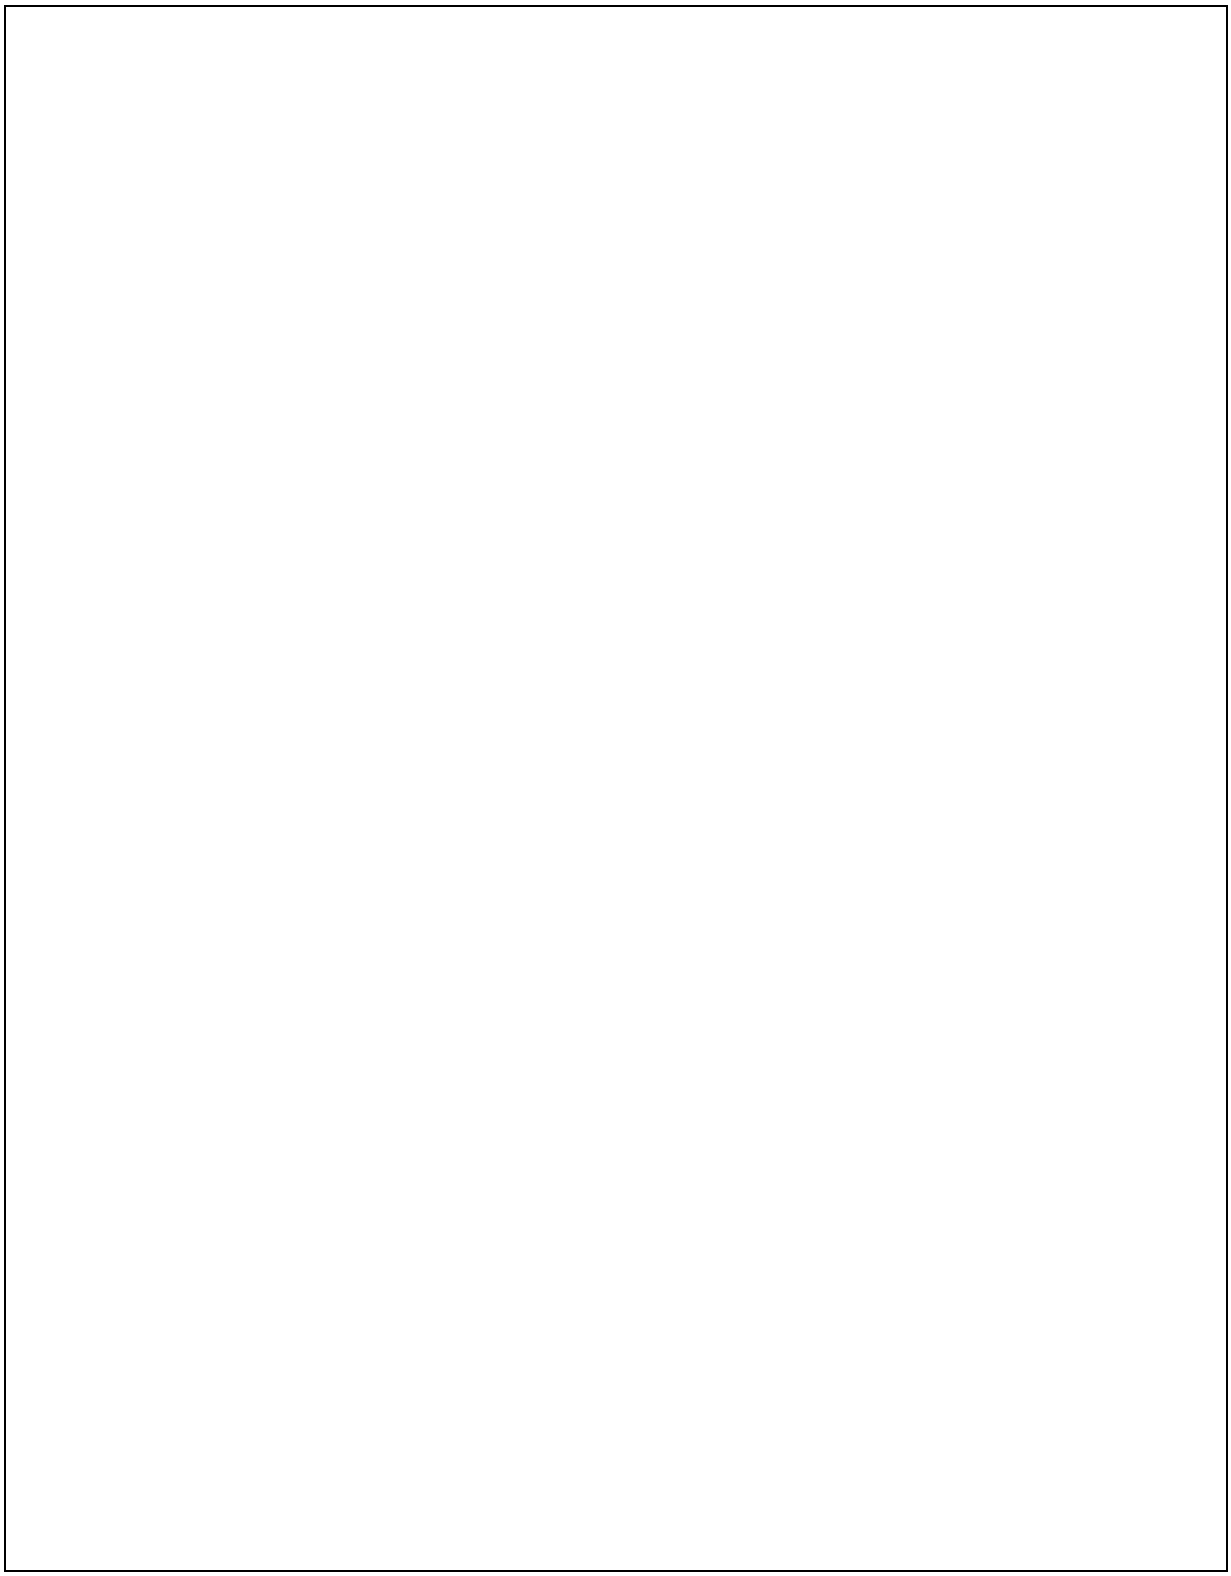

7. Litigation/Administrative Proceedings/Government Notices

As the User of this ESA, do have knowledge of *(1)* any pending, threatened, or past litigation relevant to *hazardous substances* or *petroleum products* in, on, or from the *property*; *(2)* any pending, threatened, or past administrative proceedings relevant to *hazardous substances* or *petroleum products* in, on or from the *property*; and *(3)* any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to *hazardous substances* or *petroleum products*.

Yes ☑ *No* ☑

Where applicable, provide additional details regarding any questions that were answered "Yes".

8. Reason for Performing Phase I ESA: Purchase, Financing, Development

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction orforecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

EXECUTIVE SUMMARY

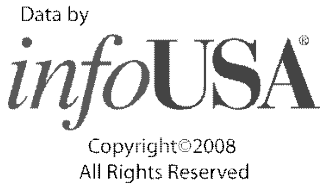

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # A9E3-49F7-8156

PO # C3-7524

Project C3-7524

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: A9E3-49F7-8156

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

Limited Permission To Make Copies

Hillmann Environmental Co. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 12/10/2018 has revealed that there are 4 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Evaluation:

Eval General Type:	Other/Unknown
Eval Date:	03-08-2017
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	I received email from company contact, Pamela Nixon, in response to inspection report with violation regarding failure to conduct annual monitoring system certification within 365 days of last test. A copy of monitoring system report for tests conducted on 2/21/17 was attached to the email. I was not on site since I had not received notification. I checked UST Notification Calendar and site history (7800 report) to determine if this agency received notification of testing. Notification was not received. I emailed Pamela back explaining that notification for testing was not received by this agency and that test must be conducted again so that it can be witnessed by this agency. I received notification to conduct test on 3/13/17.

Eval Notes:	On February 7, 2001 Regional Board Staff, Marc Brown conducted a compliance inspection at the above referenced facility. Brown met with Corky Wyrick, the facility contact. The facility is a merchandise transportation hub, which has a single storage area with multiple loading docks surrounding its perimeter. This loading docks lie in the interior of the facility's parking area. The parking area houses numerous semi-tractor trailers awaiting use. At the southeast corner of the facility, near the entrance is a diesel fueling station (UST). This area is equipped with spill kits. Further west, along the fenceline is the facility's propane storage area, where individual

XPO LOGISTICS FREIGHT, INC.-UIV (Continued) **S113051905**

propane fuel tanks are stored for use with forklifts. Review of the SWPPP indicated the facility had weekly inspections and employee training (last conducted on 1/16/01). The SWPPP had a facility map, but no flow directions were illustrated. A site walk was conducted and revealed general housekeeping efforts were well maintained. However, further attention was needed around the facility's fenceline, which borders and drains directly into a storm channel. Debris and sediment build up was identified and noted during the walk through. Mr. Wyrick was instructed to include inspecting these areas as part of the routine inspection and maintenance program in the SWPPP.

Eval Notes:	Received email from company headquarters contact stating that new BOE# was not obtained since they did not have to obtain a new Federal Tax ID#. I emailed her back stating that I was not aware the Federal Tax ID# makes a difference in not having to obtaining State BOE# and that it appears that two corporations merged or one took over the other business or a parent company took over a subsidiary and that is considered ownership change. I notified her that BOE# matter will not be pursued since my comments are in CERS.

Eval Notes:	Inspected UST facility with Kevin Jansen. Double walled tanks with pressurized piping and leak detector. Sump sensor appeared to be at the low point and the Bravo Box float was dry. Site has flappers for overfill prevention. Valid permit, designated operator documentation, monthly inspection reports, response plan, employee training records, certification of financial responsibility, copies of monitoring system certification and secondary containment reports are available for review. Copies of electronically submitted monitoring plan and tank page were not available on site. Results of secondary containment test (SB989) for activities conducted on 8/15/14, still have not been received by this agency. copy to: pickford.joseph@con-way.com

Evaluation:

Eval General Type: Other/Unknown
Eval Date: 03-08-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: I received email from company contact, Pamela Nixon, in response to inspection report with violation regarding failure to conduct annual monitoring system certification within 365 days of last test. A copy of monitoring system report for tests conducted on 2/21/17 was attached to the email. I was not on site since I had not received notification. I checked UST Notification Calendar and site history (7800 report) to determine if this agency received notification of testing. Notification was not received. I emailed Pamela back explaining that notification for testing was not received by this agency and that test must be conducted again so that it can be witnessed by this agency. I received notification to conduct test on 3/13/17.

Eval Notes: Inspector Comments:

_____ Please be advised that in the inspection report dated 3/3/14, this Agency requested electronic submittal of hazardous materials inventory for hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet, business emergency plan and site map. To date, the requested documents have not been submitted. The violations listed above must be complied with, in order to prevent enforcement action.

Eval Date: 09-11-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Documents submitted to CERS on 7/29/15 were reviewed and declined with the following considerations: Diesel Exhaust Fluid: ?Yes? under ?Fire? under Federal Hazard Categories section must be deleted since this mixture is mostly water. Based on the provided SDS, Windshield Washer Fluid form must be revised as follows: - As requested previously, ?Windshield Washer Fluid? should also be listed as the Chemical Name. - The Hazardous Component for this material (listed on SDS) is ?Methanol? with CAS# 67-56-1 at 1% by weight. Motor Oil form must be revised as follows: - Hazardous Material Type must be changed from ?Pure? to ?Mixture? since Mixture Components are provided. - Fire Code Hazard Classes must be changed from ?Combustible Liquid, Class II? to ?Combustible Liquid, Class III.? - CAS# 6474X-XX-X listed for ?Various Lubricating Base Oils? in Mixture Components section is not acceptable, especially that this material is the main component at 85%. Eval Date: 02-07-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On February 7, 2001 Regional Board Staff, Marc Brown conducted a compliance inspection at the above referenced facility. Brown met with Corky Wyrick, the facility contact. The facility is a merchandise transportation hub, which has a single storage area with multiple loading docks surrounding its perimeter. This loading docks lie in the interior of the facility's parking area. The parking area houses numerous semi-tractor trailers awaiting use. At the southeast corner of the facility, near the entrance is a diesel fueling station (UST). This area is equipped with spill kits. Further west, along the fenceline is the facility's propane storage area, where individual propane fuel tanks are stored for use with forklifts. Review of the SWPPP indicated the facility had weekly inspections and employee training (last conducted on 1/16/01). The SWPPP had a facility map, but no flow directions were illustrated. A site walk was conducted and revealed general housekeeping efforts were well maintained. However, further attention was needed around the facility's fenceline, which borders and drains directly into a storm channel. Debris and sediment build up was identified and noted during the walk through. Mr. Wyrick was instructed to include inspecting these areas as part of the routine inspection and maintenance program in the SWPPP.

Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct routine hazardous waste inspection. Joseph Pickford granted consent to conduct inspection. Waste is generated when packages/boxes are broken during shipping. EPA ID# CAL000078604, assigned to previous business, Conway Freight, is being used to haul off hazardous waste rather than obtaining a new EPA ID# after this company took over this business. Owner information has been changed/updated with the state (DTSC). Please be advised EPA ID#s are owner and/or site specific and a new number should have been obtained. I walked through facility and inspected waste storage area in the dock. I did not observe any hazardous waste in trash cans throughout the dock or the dumpster at the end of the dock. There is no hazardous waste stored on site currently. Manifests were reviewed. Emergency contact information and procedures (spill cleanup) is posted throughout the facility.

Eval Notes:	On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Joseph Pickford granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage areas. There has been no changes in types and/or volumes of the hazardous material stored on site since last inspection or previous reporting period, except for facility stores only one drum of Windshield Washer Fluid. Propane tank is in a locked enclosure. Propane cylinders are on forklifts, in cage and/or on rack. All 55 gallons storing material are in a shed next to fuel island. Safety meeting that include hazardous materials management are held annually. Training records are available for review on site. Emergency contact information and procedures (spill cleanup) is posted throughout the facility. Annual Hazardous Materials Business Plan (HMBP) have not been submitted. Please be advised that HMBP documents must be submitted [Truncated]

Eval Notes:	Weather: sunny and cool. On entry, explained to front office staff that I was there to conduct a storm water inspection. Staff person went to back office, returned, and instructed me to go out back. I asked to see the SWPPP. Staff appeared confused and brought me to the manager, John Heilman, who then told me that I could not go out back unless their safety staff, Don Anderson, was present. He explained that Mr. Anderson was "domiciled" in Fontana and I would need to make an appointment. Mr. Heilman stated that this was their policy and acknowledged that he was responsible for implementing the SWPPP. He declined to allow me to review the SWPPP unless Mr. Anderson was present and again explained that this was their policy.

Eval Notes:	On February 7, 2001 Regional Board Staff, Marc Brown conducted a compliance inspection at the above referenced facility. Brown met with Corky Wyrick, the facility contact. The facility is a merchandise transportation hub, which has a single storage area with multiple loading docks surrounding its perimeter. This loading docks lie in the

XPO LOGISTICS FREIGHT, INC.-UIV (Continued) **S113051905**

interior of the facility's parking area. The parking area houses numerous semi-tractor trailers awaiting use. At the southeast corner of the facility, near the entrance is a diesel fueling station (UST). This area is equipped with spill kits. Further west, along the fenceline is the facility's propane storage area, where individual propane fuel tanks are stored for use with forklifts. Review of the SWPPP indicated the facility had weekly inspections and employee training (last conducted on 1/16/01). The SWPPP had a facility map, but no flow directions were illustrated. A site walk was conducted and revealed general housekeeping efforts were well maintained. However, further attention was needed around the facility's fenceline, which borders and drains directly into a storm channel. Debris and sediment build up was identified and noted during the walk through. Mr. Wyrick was instructed to include inspecting these areas as part of the routine inspection and maintenance program in the SWPPP.

Eval Type: Routine done by local agency
Eval Notes: On site to conduct routine hazardous waste inspection. John Heilman granted consent to conduct inspection. Waste is generated when packages/boxes are broken during shipping. I walked through the facility, perimeter and inspected waste storage areas. Debris contaminated with diesel (1), toxic solid (1) and waste aerosols (1) containers are stored closed. The diesel debris drum has a federal label without waste characteristics. I discussed the requirement to include waste characteristics with Mr. Heilman. The toxic solid and aerosol containers were labeled during the inspection. Manifests were reviewed. Emergency number is posted throughout the faciltiy.

XPO LOGISTICS FREIGHT, INC.-UIV (Continued) **S113051905**

Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Weather: sunny and cool. On entry, explained to front office staff that I was there to conduct a storm water inspection. Staff person went to back office, returned, and instructed me to go out back. I asked to see the SWPPP. Staff appeared confused and brought me to the manager, John Heilman, who then told me that I could not go out back unless their safety staff, Don Anderson, was present. He explained that Mr. Anderson was "domiciled" in Fontana and I would need to make an appointment. Mr. Heilman stated that this was their policy and acknowledged that he was responsible for implementing the SWPPP. He declined to allow me to review the SWPPP unless Mr. Anderson was present and again explained that this was their policy.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 03-08-2017
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: I received email from company contact, Pamela Nixon, in response to inspection report with violation regarding failure to conduct annual monitoring system certification within 365 days of last test. A copy of monitoring system report for tests conducted on 2/21/17 was attached to the email. I was not on site since I had not received notification. I checked UST Notification Calendar and site history (7800 report) to determine if this agency received notification of testing. Notification was not received. I emailed Pamela back explaining that notification for testing was not received by this agency and that test must be conducted again so that it can be witnessed by this agency. I received notification to conduct test on 3/13/17.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-07-2001
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On February 7, 2001 Regional Board Staff, Marc Brown conducted a compliance inspection at the above referenced facility. Brown met with Corky Wyrick, the facility contact. The facility is a merchandise transportation hub, which has a single storage area with multiple loading docks surrounding its perimeter. This loading docks lie in the interior of the facility's parking area. The parking area houses numerous semi-tractor trailers awaiting use. At the southeast corner of the facility, near the entrance is a diesel fueling station (UST). This area is equipped with spill kits. Further west, along the fenceline is the facility's propane storage area, where individual propane fuel tanks are stored for use with forklifts. Review of the SWPPP indicated the facility had weekly inspections and employee training (last conducted on 1/16/01). The SWPPP had a facility map, but no flow directions were illustrated. A site walk was conducted and revealed general housekeeping efforts were well maintained. However, further attention was needed around the facility's fenceline, which borders and drains directly into a storm channel. Debris and sediment build up was identified and noted during the walk through. Mr. Wyrick was instructed to include inspecting these areas as part of the routine inspection and maintenance program in the SWPPP.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-13-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Chad Jackson granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage area. There has been no changes in types of hazardous material, new and waste machine coolant, stored on site. However, volumes of the hazardous material stored on site has changed since last inspection or previous reporting period. Discussed updating volume of material stored on site in the annual HMBEP certification in CERS. Facility currently stores the following material at reportable volumes on site: - 855 gallons of new machine coolant (includes coolant stored in machines) - 275 gallons of waste machine coolant Safety meeting that include hazardous materials management are held annually. Training records are available for review. Emergency contact information is posted in the shop. Evacuation site maps are posted throughout the [Truncated]

SHMAZE CUSTOM COATINGS (Continued) **S113746989**

Eval Notes:	Inspector Comments: On site to conduct routine hazardous waste inspection. Mike Shamassian granted consent to conduct inspection. I walked through the facility and inspected waste storage area. I did not observe any hazardous waste in trash cans throughout the facility. Waste acetone/paint drums are stored closed and labeled. Manifests were reviewed. Emergency card is posted.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	03-04-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Inspector Comments: On site for follow up inspection to discuss documents submitted electronically and the necessary corrections. I met with Mike Shamassian. We walked through the facility and verified that the only reportable material stored on site are new acetone and waste acetone/paint. Also discussed adding the locations of water shutoff, spill kit/containers, loading area and storm drain(s) to site map.

Eval Date:	04-04-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Mike Shamassian granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage area. There has been no changes in types of the hazardous material stored on site since last inspection or previous reporting period but the volume of waste acetone has increased from 110 to 165 gallons. Inventory form will be updated in CERS. Annual hazardous materials management is provided for the employees and training records are available on site. Emergency card is posted on a bulletin board in the shop.

Eval Notes: Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 9/4/13 and 9/22/14, your facility was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business [Truncated]

Eval Notes: On site to conduct new hazardous materials chemical inventory and business emergency plan inspection. Mary Davis granted consent to conduct inspection. I walked through the facility and inspected hazardous materials storage area. The facility has hazardous materials, compressed gases, (200 cubic feet or greater) that meet the required disclosure. Facility is required and has been notified to electronically submit the following documents within 30 days of this inspection: - Business Activities form - Owner/Operator Identification form - Hazardous Material Chemical Inventory forms - Facility Site Map - Business Emergency Plan Documents must be electronically submitted by going to www.esubmit.ocgov.com and requesting a username and password. User guides and tutorials are located on the home page to help you get started. If you are having trouble, please call (714) 433-6000 and request to speak to the portal administrator.

Eval Notes: Inspector Comments: On site to conduct routine hazardous waste inspection. James Davis granted consent to conduct inspection. I walked through the facility, perimeter and inspected waste storage areas. I did not observe any hazardous waste in trash cans throughout the facility or municipal trash. Waste paint (1), spent waterborne cleaning solution (1), waste oil (1) and waste antifreeze (1) drums are stored closed and labeled. The "accumulation start date" on the labels is the date when the last waste pick up occurred. Please be advised that in order to extend waste storage period, the "accumulation start date" may be written on the label(s) when there is 27 gallons of waste on site, then have all waste hauled off site by a registered transporter for proper disposal within 180 days of that date. Manifests were reviewed. Emergency card is posted on the wall in the shop by the door leading into the reception area.

Eval Notes:	Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 9/4/13 and 9/22/14, your facility was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business [Truncated]

CERS HAZ WASTE:
Site ID: 415084
CERS ID: 10721305
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 415084
Site Name: ARB INC
Violation Date: 01-19-2018
Citation: 23 CCR 16 2632(c)(2)(A)&(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(c)(2)(A)&(B)
Violation Description: Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.
Violation Notes: Returned to compliance on 01/19/2018. Annular sensor for UST supplying fuel for dispensers 1,2 and 7 was stuck in riser and could not be removed. A new sensor, "like for like", was installed (ensuring that sensor is at bottom of tank) and passed when retested. This violation has been corrected.
Violation Division: Orange County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 415084
Site Name: ARB INC
Violation Date: 02-01-2019
Citation: 23 CCR 16 2637(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637(f)
Violation Description: Failure to submit a copy of the secondary containment test results on the ?Secondary Containment Testing report Form? to the UPA within 30 days after the test.
Violation Notes: This agency received notification to conduct secondary containment test at this facility on 11/15/18. To date, a copy of the secondary containment report has not been received by this agency. Copies of test results must be submitted to this agency within 30 days of testing. A copy of the report must be submitted by 2/15/19.

Eval Type: Routine done by local agency
Eval Notes: Inspector Comments: On site to witness monitoring system certification testing activities and to conduct routine UST inspection. All annular and sump sensors alarmed properly (visual and audible) and shut down all turbines when submerged in water. UDCs have float and chain mechanism. Water was poured in all UDCs and all float and chains functioned properly. Line leak detectors were tested and passed. The tank system does not have fail safe. Therefore, line test was conducted and passed. Site has flappers for overfill prevention. Spill buckets were tested visually without any changes in water level. Valid permit is posted in a glass covered bulletin board behind warehouse counter. Designated operator documentation, monthly inspection reports, monitoring plan, response plans, employee training records, tank pages, certification of financial responsibility (expires 1/16/16), copies of monitoring system certification and secondary containment reports [Truncated]

Eval Notes:	On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Ron Sutherland granted consent to conduct inspection. I inspected hazardous material storage area (fuel island). There has been no changes in types and/or volumes of the hazardous material stored on site since last inspection or previous reporting period. Training that includes hazardous material management is provided annually. Evacuation site map is posted in shop. Emergency plan is available on site.

Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	Inspector Comments: On site to witness monitoring system certification testing activities and to conduct routine UST inspection. All annular and sump sensors alarmed properly (visual and audible) and shut down all turbines when submerged in water. UDCs have float and chain mechanism. Water was poured in all UDCs and all float and chains functioned properly. Line leak detectors were tested and passed. The tank system does not have fail safe. Therefore, line test was conducted and passed. Site has flappers for overfill prevention. Spill buckets were tested visually without any changes in water level. Valid permit is posted in a glass covered bulletin board behind warehouse counter. Designated operator documentation, monthly inspection reports, monitoring plan, response plans, employee training records, tank pages, certification of financial responsibility (expires 1/16/16), copies of monitoring system certification and secondary containment reports [Truncated]

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Date:	01-18-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Jim Middleton granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage areas, inside building and outside where the diesel aboveground tank is located. There has been no changes in types and/or volumes of the hazardous material stored on site since last inspection or previous reporting period, except one of the diesel aboveground tank has been removed from the facility. Diesel inventory and site map were updated to reflect removal of aboveground tank from the facility. Emergency card is posted in dispatch office and an additional card was provided to be posted on the main bulletin board in the shop. Evacuation site maps are posted throughout the facility. I assisted him in correcting inventory forms, upload new site map and submitted annual certification documents for 2017.

Eval Notes: Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 1/8/14, your facility was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities [Truncated]

Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Jim Middleton granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage areas, inside building and outside where the diesel aboveground tank is located. There has been no changes in types and/or volumes of the hazardous material stored on site since last inspection or previous reporting period, except one of the diesel aboveground tank has been removed from the facility. Diesel inventory and site map were updated to reflect removal of aboveground tank from the facility. Emergency card is posted in dispatch office and an additional card was provided to be posted on the main bulletin board in the shop. Evacuation site maps are posted throughout the facility. I assisted him in correcting inventory forms, upload new site map and submitted annual certification documents for 2017.

Eval Notes:	Received email from accounting department asking if the APST charge should be refunded since they wrote there is less than 1000 gallon of petroleum products in aboveground storage tanks. I called and left message for Steve Albright at the facility to make sure that the information provided on 8/1/13 regarding APST inventory (2400 total capacity) is still correct. I emailed accounting and let them know not refund APST fee. Steve A. called back and left message stating that the APST capacity is still 2400 and there was miscommunication at their facility.

Eval Notes:	Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 1/8/14, your facility was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities [Truncated]

inspection conducted on 1/24/14 and inspection report dated 10/1/14 that included violations for failure to submit documents electronically. Argon and helium volumes observed on site are below reportable quantity 0f 1000 cubic feet for each gas. Three cylinders of nitrogen (one in shop and two in enclosure outside) were observed on site. However, the total volume could not be verified since the cylinders did have tags. Nitrogen must be reported if total volume stored on site is equal to or greater than 1000 cubic feet. Facility has the following hazardous materials that meet the required disclosure quantities: - 3987 cubic feet of oxygen - 601 cubic feet of acetylene - 700 gallons of waste oil - 150 gallons of transmission oil - 350 gallons of hydraulic oil - 350 gallons of motor oil - 55 gallons of waste antifreeze [Truncated]

Eval Notes: Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 1/24/14 your company was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and

Eval Notes: On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Craig Stark granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage areas, inside and outside facility. There has been no changes in types and/or volumes of the hazardous material stored on site since last inspection or previous reporting period. The location of hazardous waste drums has changed. Site map must be updated to show the new location of the hazardous waste drums and be electronically submitted. Compressed gas cylinders that are not in use are stored in metal cages. Training that includes hazardous material management is provided annually. Training records are maintained at the safety office. Emergency contact information is available on site.

Eval General Type:	Other/Unknown
Eval Date:	01-23-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Inspector Comments: On site for follow up inspection since facility was notified to electronically submit HMBP documents during the onsite inspection conducted on 1/24/14 and inspection report dated 10/1/14 that included violations for failure to submit documents

ARB INC (Continued) **S123517196**

electronically. Argon and helium volumes observed on site are below reportable quantity 0f 1000 cubic feet for each gas. Three cylinders of nitrogen (one in shop and two in enclosure outside) were observed on site. However, the total volume could not be verified since the cylinders did have tags. Nitrogen must be reported if total volume stored on site is equal to or greater than 1000 cubic feet. Facility has the following hazardous materials that meet the required disclosure quantities: - 3987 cubic feet of oxygen - 601 cubic feet of acetylene - 700 gallons of waste oil - 150 gallons of transmission oil - 350 gallons of hydraulic oil - 350 gallons of motor oil - 55 gallons of waste antifreeze [Truncated]

Eval Notes: Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 1/24/14 your company was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities - [Truncated]

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/25/2019
Date Data Arrived at EDR: 03/27/2019
Date Made Active in Reports: 04/17/2019

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/25/2019
Date Data Arrived at EDR: 03/27/2019

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/25/2019
Date Data Arrived at EDR: 03/27/2019
Date Made Active in Reports: 04/17/2019

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Last EDR Contact: 05/29/2019
Next Scheduled EDR Contact: 09/09/2019
Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/31/2019

Next Scheduled EDR Contact: 08/12/2019
Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

LAKE FOREST
20865 CANADA ROAD
LAKE FOREST, CA 92630

TARGET PROPERTY COORDINATES

Latitude (North):	33.660536 - 33° 39' 37.93''
Longitude (West):	117.675122 - 117° 40' 30.44''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	437405.1
UTM Y (Meters):	3724529.0
Elevation:	631 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5636489 EL TORO, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

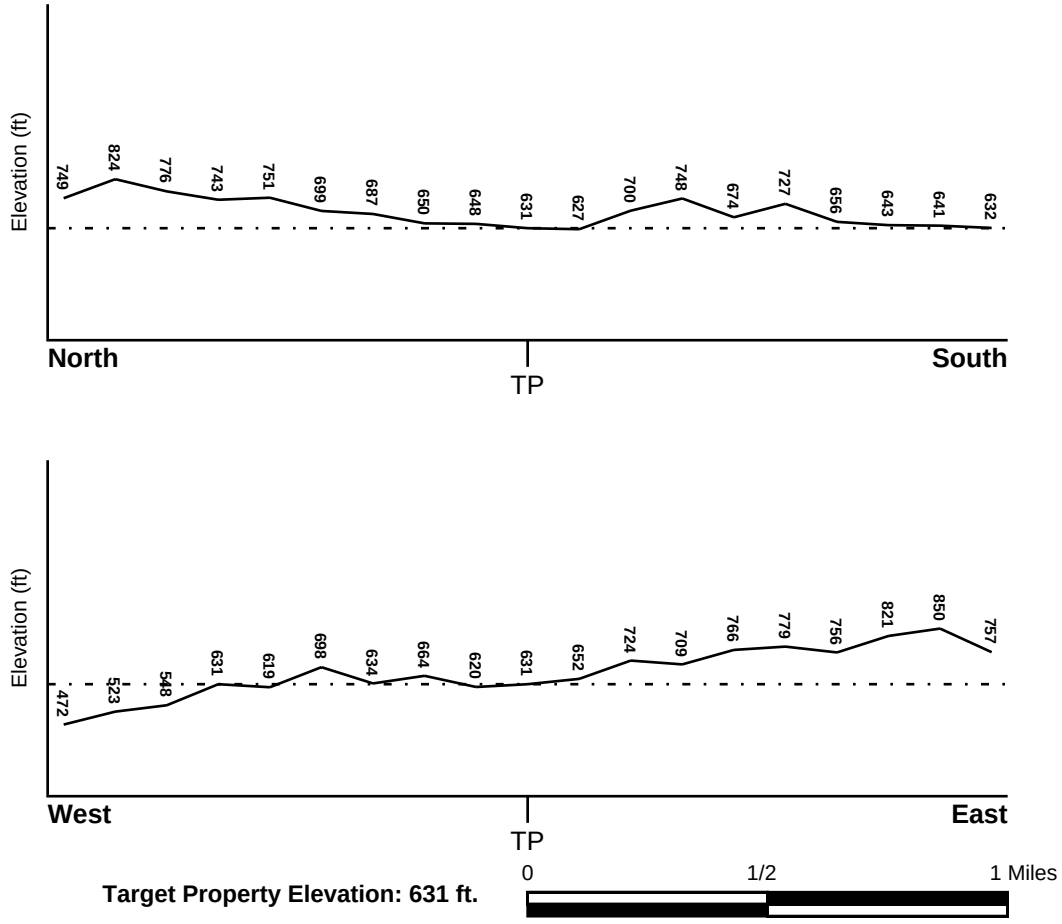

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0316J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06059C0315J	FEMA FIRM Flood data
06059C0314J	FEMA FIRM Flood data
06059C0318J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EL TORO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: RIVERWASH

Soil Surface Texture: sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified coarse sand to sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 2

Soil Component Name: SORRENTO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	11 inches	61 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	61 inches	72 inches	stratified loamy fine sand to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: CIENEBA

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	7 inches	11 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 4

Soil Component Name: CAPISTRANO

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	27 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 5.6
2	27 inches	64 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 5.6

Soil Map ID: 5

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Public Records Request Number:
Location: 20865 Canada Road, Lake Forest CA 92630

Dear Requestor:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

Our vendor has processed and uploaded TSDF manifest data with a generation date on or before June 29, 2018. Any TSDF copies with a generation date on or after June 30, 2018 are submitted to the e-Manifest system or processed by the federal EPA. Data processed by the federal EPA is not available in HWTS at this time.

After a thorough review of our files we have found that no EPA ID Number in HWTS records exist at this office pertaining to the sites/facilities referenced above.

If you have any questions, or would like further information regarding your request, please contact me at hwtsreports@dtsc.ca.gov.

Sincerely,

Bridget Fitzsenry

RE: Request for Records
Request: Dear Sir/Madam:

Property address: 20865 Canada Road, Lake Forest Ca

Hillmann Consulting, LLC is conducting an environmental investigation of the above referenced property. Under the Freedom of Information Act, we would like to request any information your office has regarding this property-Permits to Operate, Equipment Lists, Notices of Violation, Notices to Comply, and Emissions Summaries. If any records are located, we would like to obtain copies or schedule a file review. If no records are available, please contact me to confirm. Thank you for your assistance.

Sincerely,

Your request for records has been received by the Public Records Unit and will be assigned for processing. A Control Number will be issued for your request and should be referenced in all future communications and correspondence.

Should you have any questions or need additional information, please do not hesitate to contact me at (909) 396-3700, Tuesday through Friday, between the hours of 8:00 a.m. 4:30 p.m.

Sincerely,

COLLEEN PAINE

INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.

2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.

3. A search for facility records can only be conducted by one or all of the following:

-- a) Facility Name, Address, or Identification Number

-- b) Facility Application Number, or Permit to Operate Number; or

-- c) Facility Notice of Violation/Notice to Comply Number.

4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.

5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.

6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.

7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.

8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.

9. The charge for the direct cost of duplication is as follows: Paper Copies, $0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, $5.00 each. After a preliminary estimate, advance payment may be required.

10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs $10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

COUNTY OF ORANGE
HEALTH CARE AGENCY

ENVIRONMENTAL HEALTH
www.ochealthinfo.com/regulatory/environ.htm

MAILING ADDRESS:
1241 E. DYER ROAD STE 120
SANTA ANA, CA 92702

TELEPHONE: (714) 433-6000
FAX: (714) 433-6424

REQUEST FOR ENVIRONMENTAL HEALTH RECORDS INSTRUCTION SHEET

1. Complete the "Request for Environmental Health Records" form

- ✓ Please **Print** all information on request forms.
- ✓ Describe the reason the records are being requested so that our staff may be able to narrow your search.
- ✓ If you require site-specific information, give the exact address of the site.
- ✓ If you are asking for information on multiple sites (for example, all sites on a street) you must give an address for each location (for example, 1001, 1003, 1009, etc.).
- ✓ Note that we cannot enter a "range" of addresses as search criteria.

2. Complete the appropriate "Information Checklist" form

- ✓ Check only the desired records associated with the site you have submitted.
- ✓ Remember that you will be charged for each page of copied records, so be sure to specify which records you want.
- ✓ Please note that lists of information can be very lengthy and therefore costly. You can ask about the length of the list before completing the request form to ensure a list is what you desire.

3. Return the completed forms to the Custodian of Records Representative at 1241 E. Dyer Road, Ste. 120, Santa Ana, CA 92705.

- ✓ Blank Records Request forms can be downloaded from the Records page on the Environmental Health website at *www.ochealthinfo.com/regulatory/environ/records.htm*.
- ✓ Please note that you can ask for an appointment to review multiple records.

4. Most requests take approximately ten (10) days to process. However, if your request requires more processing time, we will notify you of the extension and the estimated date.

5. Upon completion of the search, we will notify you by phone or by mail. You may return to the Environmental Health office to pick up the requested records, or arrange to have them mailed to your address.

6. RECORDS THAT HAVE NOT BEEN PICKED UP WITHIN 60 DAYS OF NOTIFICATION WILL BE DESTROYED.

REQUEST FOR ENVIRONMENTAL HEALTH RECORDS

The undersigned hereby requests a copy of the records prepared and maintained by the Health Care Agency in the ordinary course of business, at or near the time of the act, condition, or event which they depict.

The records requested are maintained under the Public Records Act Government Code § 6250 – 6276.48. Some information held in the documents may be exempt from release pursuant to the Public Records Act.

The undersigned understands that the Health Care Agency will charge $0.15 per page copied. In the case of a request for a large number of copies, the Health Care Agency may provide the requestor an estimate of copy costs prior to making said copies. If any request is to be canceled, this office must be notified at the above number within ten (10) days of receipt of request, otherwise cost incurred will be charged to the undersigned.

In order to assist you, please describe the reason for your request:

Any documents pertaining to violations or concerns with regard to the property(s) listed

Please list addresses here (no more than 10 addresses per request):

Public Records Request Number: 1-061119-05
Location(s): 20865 Canada Road, Lake Forest, CA

Dear Requestor:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control (DTSC).

After a thorough review of our files, no records were found at our Sacramento office pertaining to the sites/facilities referenced above.

We would like to inform you about EnviroStor (www.envirostor.dtsc.ca.gov) which provides non-confidential, public access to DTSC's data management system and may assist with your future research. The system tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or potential contamination, providing data and documentation of over 13,000 cleanup and hazardous waste facilities across California.

If you have any questions or would like further information regarding your request, please contact us at (916) 255-3758.

Sincerely,

Andrea Drushell
Regional Records Coordinator

To: Shilpa Sunil
Subject: Environmental Files - 20865 Canada Road in Lake Forest
Attachments: Bonkowski, Leslie.vcf

Hello Shilpa,

In response to your Public Records Act request dated June 13, 2019, the Irvine Ranch Water District (District) doe not have any records responsive to your request (as the District does not maintain records for septic tanks).

The referenced property at 20865 Canada Road in Lake Forest receives domestic water service from the District; however, does not have sewer service which is a good indication that the property maintains a septic system.

Please note that the District does not have any records of a well at this site, which is most likely why this address is being serviced with domestic water. Since the District consolidated with the Los Alisos Water District in 2000, and historic documentation provided to the District is very limited.

Please confirm receipt of my email, so I may file your request.

Thank you,
Leslie

Dear Sir/Madam:

Property address: **20865 Canada Road, Lake Forest Ca**

Hillmann Consulting, LLC is conducting an environmental investigation of the above referenced

property. Under the Freedom of Information Act, We would like to request any information your office has regarding this property such as environmental files (UST, groundwater, wells, etc.). The property appears to have septic system based on the age of the residential home and barn developed at the Property. Is there any way to find out further details about the septic system location if it's still in place or capped? If capped are there any records we could reference.

If any records are located, we would like to obtain copies or schedule a file review. If no records are available, please contact me to confirm. Thank you for your assistance.

Sincerely,

Thank You,

Shilpa Sunil

APPENDIX G

PROJECT PERSONNEL QUALIFICATIONS

HILLMANN
CONSULTING

J. Ryan Terwilliger

Operations Director, West Coast

EDUCATION:

B.S. Environmental Science, University of Southern California, Los Angeles, CA -2006

CERTIFICATION:

Cal-OSHA Certified Asbestos Consultant
CDPH Accredited Lead Inspector/Assessor/ Project Monitor

CA Certified Site Surveillance Technician

OSHA 40 - Hr HAZWOPER

YEARS OF EXPERIENCE:

With Hillmann: 6 years

Total: 12 years

PROFESSIONAL EXPERIENCE:

Mr. Terwilliger is responsible for business operations, fiscal management and field staff management for Hillmann's California Office. He also performs asbestos surveys and investigations to identify asbestos and lead materials associated with occupational hazards. He supervises work practices and controls in accordance with job specifications, current EPA, OSHA and State Regulations for Asbestos remediation projects in commercial, industrial and multi-family residential buildings. Mr. Terwilliger performs IAQ, mold and moisture investigations in commercial, industrial and residential facilities nationwide. He also performs awareness training for asbestos, lead and microbial agents. Mr. Terwilliger provides litigation support consultation.

Representative Experience Includes:

Tishman Speyer Properties, Various locations: Hillmann has provided the complete environmental program for Tishman Speyer's properties since 1987. Our services include environmental health and safety, industrial hygiene, phase I environmental site assessments, asbestos surveys, air monitoring, bid administration, O&M programs and indoor air quality programs on various commercial, industrial and multi-family residential properties. Mr. Terwilliger is an Environmental Scientist on this contract, conducting on-site environmental services including phase I site assessments and NPDES water quality testing.

Westfield – Environmental Program, Various locations: Since 2000, Hillmann has been providing an environmental program encompassing environmental health and safety, Phase I environmental site assessments, asbestos and lead surveys, air monitoring, bid administration and O&M programs, industrial hygiene and indoor air quality programs, and hazardous materials assessments on their mall properties throughout the county. Mr. Terwilliger is an Environmental Scientist on this contract performing industrial hygiene services that include indoor air quality monitoring, Phase I environmental site assessments, asbestos and lead surveys.

Brookfield Office Properties, Various sites, CA: Hillmann has been providing hazardous materials surveys, development abatement specifications, and managing the oversight activities during the abatement at various Brookfield owned sites throughout California. Mr. Terwilliger functions as a Project Manager for this contract.

California Department of Transportation, Central Valley and Northern CA: Hillmann has been performing asbestos and Lead-based Paint Surveys for the California Department of Transportation. Performed comprehensive asbestos containing materials and lead-based paint surveys of residential and commercial buildings that were slated for demolition and generated report of findings in order to aid the Department of Transportation (DOT) in facilitating the road improvement programs and building renovations throughout the

HILLMANN CONSULTING

Central Valley area. Also during the abatement of asbestos from DOT owned buildings, provided contractor oversight and air monitoring services for regulatory compliance.

Verizon, Various Sites, CA. Hillmann conducted hazardous materials surveys, development abatement specifications, and project monitoring during abatement at various Verizon owned sites throughout California. Mr. Terwilliger functioned as the Project Manager.

Public Storage, Los Angeles, CA: Hillman preformed comprehensive asbestos, lead-based paint and universal waste materials survey of commercial and industrial buildings throughout Southern California. Hazardous materials surveys were conducted prior to renovation for the storage units. Mr. Terwilliger developed abatement specifications and managed the abatement activities during the renovations of the buildings. He functioned as the Project Manager on this contract.

EXECUTIVE SUMMARY

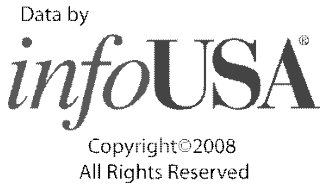

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

Certified Sanborn® Map Report

06/10/19

Site Name:

Lake Forest
20865 Canada Road
Lake Forest, CA 92630
EDR Inquiry # 5678687.3

Client Name:

Hillmann Environmental Co.
1745 W Orangewood Avenue
Orange, CA 92868-0000
Contact: Shilpa Sunil

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # A9E3-49F7-8156

PO # C3-7524

Project C3-7524

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: A9E3-49F7-8156

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Hillmann Environmental Co. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# C3-7524

Project: C3-7524

Coordinates:

Latitude:	33.660536 33° 39' 38" North
Longitude:	-117.675122 -117° 40' 30" West

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting

the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 26 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

XPO LOGISTICS FREIGHT INC. - UIV (Continued) **S113051905**

Eval Notes:	Weather: sunny and cool. On entry, explained to front office staff that I was there to conduct a storm water inspection. Staff person went to back office, returned, and instructed me to go out back. I asked to see the SWPPP. Staff appeared confused and brought me to the manager, John Heilman, who then told me that I could not go out back unless their safety staff, Don Anderson, was present. He explained that Mr. Anderson was "domiciled" in Fontana and I would need to make an appointment. Mr. Heilman stated that this was their policy and acknowledged that he was responsible for implementing the SWPPP. He declined to allow me to review the SWPPP unless Mr. Anderson was present and again explained that this was their policy.

Eval Notes: Inspector Comments: I received a copy of Monitoring System Certification, Line Leak Detector Test Form and Spill Bucket Testing Report Form for activities conducted on 3/2/16. All components passed test. Violation I205 regarding failure to submit monitoring system certification report within 30 days of testing cited in the inspection report dated 5/6/16, has been corrected. Please be advised that this facility has an outstanding violation regarding failure to submit and maintain a current certification of financial responsibility (CFR), cited during routine inspection conducted on 3/2/16. A copy of current CFR was not available on site. In addition, the copy of CFR submitted to CERS on 4/18/16 was not accepted since a copy of the insurance policy was not included.

Eval Notes: On site to witness monitoring system certification test after completion of modification activities (replacing Veeder Root Panel from TLS 300-C to TLS 350). Only components monitored by the Veeder Root panel were tested. The sump sensor (205) was replaced with a 208 sensor since it was not functioning properly. The annular and sump sensors alarmed properly (visual and audible) and shut down respective turbine when submerged in water. An updated monitoring plan documenting the installation of the new Veeder Root panel and sump sensor must be submitted within 30 days of this inspection. Fail-safe, sensor out and emergency shut off were tested and passed.

Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On February 7, 2001 Regional Board Staff, Marc Brown conducted a compliance inspection at the above referenced facility. Brown met with Corky Wyrick, the facility contact. The facility is a merchandise transportation hub, which has a single storage area with multiple loading docks surrounding its perimeter. This loading docks lie in the interior of the facility's parking area. The parking area houses numerous semi-tractor trailers awaiting use. At the southeast corner of the facility, near the entrance is a diesel fueling station (UST). This area is equipped with spill kits. Further west, along the fenceline is the facility's propane storage area, where individual propane fuel tanks are stored for use with forklifts. Review of the SWPPP indicated the facility had weekly inspections and employee training (last conducted on 1/16/01). The SWPPP had a facility map, but no flow directions were illustrated. A site walk was conducted and revealed general housekeeping efforts were well maintained. However, further attention was needed around the facility's fenceline, which borders and drains directly into a storm channel. Debris and sediment build up was identified and noted during the walk through. Mr. Wyrick was instructed to include inspecting these areas as part of the routine inspection and maintenance program in the SWPPP.

Eval Notes:	On site to witness monitoring system certification test after completion of modification activities (replacing Veeder Root Panel from TLS 300-C to TLS 350). Only components monitored by the Veeder Root panel were tested. The sump sensor (205) was replaced with a 208 sensor since it was not functioning properly. The annular and sump sensors alarmed properly (visual and audible) and shut down respective turbine when submerged in water. An updated monitoring plan documenting the installation of the new Veeder Root panel and sump sensor must be submitted within 30 days of this inspection. Fail-safe, sensor out and emergency shut off were tested and passed.

Eval Notes:	On site to conduct routine hazardous waste inspection. Joseph Pickford granted consent to conduct inspection. Waste is generated when packages/boxes are broken during shipping. EPA ID# CAL000078604, assigned to previous business, Conway Freight, is being used to haul off hazardous waste rather than obtaining a new EPA ID# after this company took over this business. Owner information has been changed/updated with the state (DTSC). Please be advised EPA ID#s are owner and/or site specific and a new number should have been obtained. I walked through facility and inspected waste storage area in the dock. I did not observe any hazardous waste in trash cans throughout the dock or the dumpster at the end of the dock. There is no hazardous waste stored on site currently. Manifests were reviewed. Emergency contact information and procedures (spill cleanup) is posted throughout the facility.

Eval Notes:	On February 7, 2001 Regional Board Staff, Marc Brown conducted a compliance inspection at the above referenced facility. Brown met with Corky Wyrick, the facility contact. The facility is a merchandise transportation hub, which has a single storage area with multiple loading docks surrounding its perimeter. This loading docks lie in the interior of the facility's parking area. The parking area houses numerous semi-tractor trailers awaiting use. At the southeast corner of the facility, near the entrance is a diesel fueling station (UST). This area is equipped with spill kits. Further west, along the fenceline is the facility's propane storage area, where individual propane fuel tanks are stored for use with forklifts. Review of the SWPPP indicated the facility had weekly inspections and employee training (last conducted on 1/16/01). The SWPPP had a facility map,

XPO LOGISTICS FREIGHT INC. - UIV (Continued) **S113051905**

but no flow directions were illustrated. A site walk was conducted and revealed general housekeeping efforts were well maintained. However, further attention was needed around the facility's fenceline, which borders and drains directly into a storm channel. Debris and sediment build up was identified and noted during the walk through. Mr. Wyrick was instructed to include inspecting these areas as part of the routine inspection and maintenance program in the SWPPP.

Eval Notes: On site to conduct new hazardous materials chemical inventory and business emergency plan inspection. Mary Davis granted consent to conduct inspection. I walked through the facility and inspected hazardous materials storage area. The facility has hazardous materials, compressed gases, (200 cubic feet or greater) that meet the required disclosure. Facility is required and has been notified to electronically submit the following documents within 30 days of this inspection: - Business Activities form - Owner/Operator Identification form - Hazardous Material Chemical Inventory forms - Facility Site Map - Business Emergency Plan Documents must be electronically submitted by going to www.esubmit.ocgov.com and requesting a username and password. User guides and tutorials are located on the home page to help you get started. If you are having trouble, please call (714) 433-6000 and request to speak to the portal administrator.

cleaning solution (1), waste oil (1) and waste antifreeze (1) drums are stored closed and labeled. The "accumulation start date" on the labels is the date when the last waste pick up occurred. Please be advised that in order to extend waste storage period, the "accumulation start date" may be written on the label(s) when there is 27 gallons of waste on site, then have all waste hauled off site by a registered transporter for proper disposal within 180 days of that date. Manifests were reviewed. Emergency card is posted on the wall in the shop by the door leading into the reception area.

Eval Notes: Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 9/4/13 and 9/22/14, your facility was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business [Truncated]

Evaluation:

Eval General Type:	Other/Unknown
Eval Date:	03-09-2016
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Documents submitted on 2/27/16 was reviewed and declined with the following considerations: One Hazardous Materials Inventory form reporting 240 gallons of G Various Paints, Reducers, and Hardners (small quantities)G has been submitted. Please be advised that chemicals/materials cannot be combined and reported on one form. If there is 55 gallons or greater of any one of the material stored on site, then a Hazardous Materials Inventory form for that material must be submitted. The G Hazardous WasteG Hazardous Materials Inventory form is missing G Chemical NameG , G Common NameG , G Annual Waste AmountG and G Hazardous ComponentG information such as %WT and the CAS# for at least one of the chemicals. The following chemicals are not reportable since the volume stored on site is not equal to or greater than 55 gallons and must be removed: - 255C259 (Thinner 259) - 25J13830 (Charcoal Metallic Paint) - 455S0503 (Matte Clear) - 82C11890

Eval Notes:	On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Mike Shamassian granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage area. There has been no changes in types of the hazardous material stored on site since last inspection or previous reporting period but the volume of waste acetone has increased from 110 to 165 gallons. Inventory form will be updated in CERS. Annual hazardous materials management is provided for the employees and training records are available on site. Emergency card is posted on a bulletin board in the shop.

Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-18-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Jim Middleton granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage areas, inside building and outside where the diesel aboveground tank is located. There has been no changes in types and/or volumes of the hazardous material stored on site since last inspection or previous reporting period, except one of the diesel aboveground tank has been removed from the facility. Diesel inventory and site map were updated to reflect removal of aboveground tank from the facility. Emergency card is posted in dispatch office and an additional card was provided to be posted on the main bulletin board in the shop. Evacuation site maps are posted throughout the facility. I assisted him in correcting inventory forms, upload new site map and submitted annual certification documents for 2017.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-18-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct routine hazardous waste inspection. Jim Middleton granted consent to conduct inspection. I walked through the facility, perimeter and inspected waste storage area. I did not observe any hazardous waste in trash cans or municipal trash. Waste oil is stored in an aboveground tank that is kept closed and is labeled. Waste antifreeze (1) and used oil filter (1) drums are stored closed and labeled. Manifests were reviewed. Emergency card is posted in dispatch office. An additional emergency card was provided to be posted on main bulletin board in the shop.
Eval Division:	Orange County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	01-20-2015

Eval Notes:	Received email from accounting department asking if the APST charge should be refunded since they wrote there is less than 1000 gallon of petroleum products in aboveground storage tanks. I called and left message for Steve Albright at the facility to make sure that the information provided on 8/1/13 regarding APST inventory (2400 total capacity) is still correct. I emailed accounting and let them know not refund APST fee. Steve A. called back and left message stating that the APST capacity is still 2400 and there was miscommunication at their facility.

Eval Notes:	Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 1/8/14, your facility was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-19-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct routine hazardous waste inspection. Laura Hergesheimer granted consent to conduct inspection. I walked through the facility, perimeter and inspected waste storage area by roll up door. I did not observe any hazardous waste in trash cans throughout the facility or municipal trash. Waste oil is stored in an aboveground tank that is kept closed and labeled. Used oil filter drum is stored closed and labeled. Business does not store waste antifreeze since it is placed back in vehicle if drained. Manifests were reviewed. Emergency card is posted in reception/front desk area.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date:	07-30-2013
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes:	Returned to compliance on 09/11/2013. Manifests are not available for review. Consolidated manifests and bills of lading must be available during normal business hours. Copies must be kept for a minimum of three years from date of disposal. Obtain a set of applicable copies for your files. Forward a set dated from 7/2012 to most current to this Agency for review within 30 days of this inspection.

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	04-01-2019
Violations Found:	No

FABRICANTE AUTO BODY LLC (Continued) **S113158556**

Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct routine hazardous waste inspection. Laurie Gates granted consent to conduct inspection. I walked through the facility, perimeter and inspected waste storage areas inside and outside building. I did not observe any hazardous waste in municipal trash or trash cans throughout the facility. Waste oil (1) and waste antifreeze (1) drums are stored closed outside building inside enclosures and are labeled. Waste paint (1) and waste waterborne cleaning solutions (1) drums inside paint mixing room, are stored closed and labeled. Manifests were reviewed. Emergency card is posted on wall in hallway leading into shop. Evacuation route site map is posted in shop.

Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct routine hazardous waste inspection. I walked through the facility, perimeter and inspected waste storage areas. Waste paint (1), spent waterborne cleaning solution (1), waste oil (1) and waste antifreeze (1) drums are stored closed and labeled. Manifests are not available on site since the facility's environmental consultant has taken the file with him to prepare a report. Please be advised that copies of manifests must be available during business hours. Emergency card is posted in the office.

Eval Notes:	Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 11/25/13 your company was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities [Truncated]

Eval Notes:	Inspector Comments: On site to conduct routine hazardous waste inspection. Rose Poer granted consent to conduct inspection. I walked through the facility, perimeter and inspected waste storage area. I did not observe any hazardous waste in trash cans throughout the facility or municipal trash. Facility evaporates spent machine coolant. Waste coolant has been analyzed and is not hazardous. Waste stripper/parts cleaning solution (petroleum distillates) drum is stored closed and labeled. Manifests were reviewed. Emergency card is posted in CNC machine room.

Eval Type:	Routine done by local agency
Eval Notes:	Inspector Comments: On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Rose Poer granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage area in back of building. There has been no changes in types and/or volumes of the hazardous material, new material or waste, stored on site since last inspection or previous reporting period. Employees are trained annually in hazardous materials management and safety/evacuation procedures. Emergency card is posted in shop. I notified business E-submit is not in operation and that annual HMBP certification documents must be submitted via CERS. I assisted him in creating account in CERS, corrected inventory form and showed how to submit annual certification documents.

Eval General Type: Other/Unknown
Eval Date: 01-23-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Inspector Comments: On site for follow up inspection since facility was notified to electronically submit HMBP documents during the onsite inspection conducted on 1/24/14 and inspection report dated 10/1/14 that included violations for failure to submit documents electronically. Argon and helium volumes observed on site are below reportable quantity 0f 1000 cubic feet for each gas. Three cylinders of nitrogen (one in shop and two in enclosure outside) were observed on site. However, the total volume could not be verified since the cylinders did have tags. Nitrogen must be reported if total volume stored on site is equal to or greater than 1000 cubic feet. Facility has the following hazardous materials that meet the required disclosure quantities: - 3987 cubic feet of oxygen - 601 cubic feet of acetylene - 700 gallons of waste oil - 150 gallons of transmission oil - 350 gallons of hydraulic oil - 350 gallons of motor oil - 55 gallons of waste antifreeze [Truncated]

Eval Notes:	Inspector Comments: Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. In addition, during the onsite inspection conducted on 1/24/14 your company was notified again to submit HMD/BEP electronically. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit the following HMD/BEP forms within the next 30 days: - Business Activities - [Truncated]

Eval Date:	01-20-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct routine hazardous waste inspection. Craig Stark granted consent to conduct inspection. I walked through the facility, perimeter and inspected waste storage areas, inside and outside shop. I did not observed any hazardous waste in trash cans or municipal trash. Waste oil is stored in aboveground storage tanks (one inside shop and one outside) that are kept closed and are labeled. Waste antifreeze (1), used oil filter (2), oily absorbent (3) and waste aerosols (1) drums are stored closed and labeled. Manifests were reviewed. Emergency contact and phone numbers are posted in the shop.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 01-30-2018

PANASONIC AVIONICS CORPORATION BUILDING 3 (Continued) **S123517495**

Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Reviewed and accepted annual certification documents submitted to CERS on 1/9/18 with the following comments: - Inventory forms conditionally accepted and requested that Federal Hazard Categories be updated in next submission. - Locations of fire extinguishers, if there are any near or inside generator enclosure, be added to site map and revised map be submitted with next submission.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	02-24-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Documents submitted to E-submit on 2/18/15 were reviewed and declined with the following considerations: The "Yes" box for facility generating hazardous waste should not be checked since facility does not generate hazardous waste. The site map does not show the locations of the evacuation staging areas, emergency response equipment (not clear if shown), electrical shutoff, water shutoff, storm and sewer drains. A revised site map must be provided.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	06-14-2017
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Reviewed Emergency Response and Training Plan submitted to CERS on 6/8/17. It is the same as the one that was submitted on 3/1/17 and missing information/phone number regarding reporting spills/emergencies to state and local agencies, including this agency. Aso, I changed status of Hazardous Materiral Inventory submitted on 3//1/17 to "Not accepted" since a new submittal adding Fire Code Hazard Classes on invenory form and emergency water shutoff to site map were not submitted as requested.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	06-18-2014
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site for new aboveground petroleum storage tank (APST) inspection. The facility has an emergency back up generator that has a 1800 gallon diesel tank. Annual employee training is provided. SPCC plan dated August 2009 is available on site. The SPCC will be reviewed this year and will be updated if necessary.
Eval Division:	Orange County Environmental Health
Eval Program:	APSA

Eval General Type:	Other/Unknown
Eval Date:	06-24-2014
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	The documents submitted on 4/1/14 has been reviewed and declined with the following considerations: The G yesG box for recycling more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2) is checked. Please provide Recyclable Materials Report to this Agency. Helium gas is not reportable since there is less than 1000 cubic feet on site. This chemical must be removed. The site map shows two locations with Lead Acid Batteries. However, during the onsite inspection conducted on 6/18/14, it was stated that lead acid batteries are not stored in this building. The presence of batteries must be verified and inventory sheet for Sulfuric acid removed if there are no batteries in this building. If there are lead acid batteries in this building, the Sulfuric acid must be reported in gallons and not in pounds. The CAS# (7664-93-9) for sulfuric acid listed beneath the common name must be removed since this a mixture and not pure. The reported volume [Truncated]

PANASONIC AVIONICS CORPORATION BUILDING 3 (Continued) **S123517495**

Eval Type:	Routine done by local agency
Eval Notes:	On site to conduct hazardous materials chemical inventory and business emergency plan inspection. I walked through the facility and inspected hazardous materials storage area. Facility has diesel for generator that meets the required disclosure quantities. All required documents have been electronically submitted to E-submit and will be reviewed for approval by this Agency.
Eval Division:	Orange County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Other/Unknown
Eval Date:	07-08-2015
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Documents submitted to E-submit on 7/6/15 were reviewed and declined with the following considerations: The "Yes" box for facility generating hazardous waste was unchecked based on 2/24/15 agency's review of documents. As discussed during the on site inspection conducted on 6/30/15, agency's previous comments regarding unchecking the "Yes" box for facility generating hazardous waste should not be followed, since hazardous waste is generated at this site. Please check "yes" for site generating hazardous waste again. The site map does not show water and electrical shutoffs.

TSD EPA ID: CAD008364432
CA Waste Code: 352 - Other organic solids
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.03

Year: 2015
Gepaid: CAL000212254
TSD EPA ID: CAD008364432
CA Waste Code: 221 - Waste oil and mixed oil
Disposal Method: H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons: 0.175

Year: 2015
Gepaid: CAL000212254
TSD EPA ID: CAD008364432
CA Waste Code: 212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
Disposal Method: H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons: 0.175

Year: 2015
Gepaid: CAL000212254
TSD EPA ID: CAD008364432
CA Waste Code: 352 - Other organic solids
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.45

Year: 2013
Gepaid: CAL000212254
TSD EPA ID: CAT080013352
CA Waste Code: 133 - Aqueous solution with total organic residues 10 percent or more
Disposal Method: H039 - Other Recovery Of Reclamation For Reuse Including Acid Regeneration, Organics Recovery Ect
Tons: 0.1251

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Last waste pick up occurred on 11/28/18. There is approximately 55 gallons of waste paint stored on site. Waste storage time has been exceeded. Waste paint must be disposed of properly within 30 days of this inspection and a copy of the manifest be submitted to this Agency.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-17-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct hazardous materials chemical inventory and business emergency plan inspection. Michael Tilander granted consent to conduct inspection. I walked through the facility and inspected hazardous material storage areas in between spray booths and in shop. Seven empty 55 gallon drums were observed throughout the shop. There has been changes in types and/or volumes of the hazardous material stored on site since last inspection or previous reporting period. Business is now storing waste oil and waste antifreeze in 55 gallons drums. Inventory forms for waste oil and waste antifreeze were uploaded into CERS during the inspection. Emergency card is posted on the first aid kit box in the shop. I discussed revising site map to show locations of the waste oil and waste antifreeze to be submitted when documents are certified for 2017.

Eval Date: 02-11-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct routine hazardous waste inspection. Micheal Tilander granted consent to conduct inspection. I walked through the facility, perimeter and inspected waste storage areas. I did not observe any hazardous waste in trash cans or municipal trash. Waste paint (1), spent waterborne cleaning solution (1), waste oil (1),

EURO AMERICAN COLLISION CENTER (Continued) **S113107395**

waste antifreeze (2) and spent spray booth filters (2) drums are stored closed and labeled. Manifests were reviewed. Please be advised that the spent spray booth filter may be managed as non-hazardous waste by analyzing a representative sample(s) of the spent spray booth filters for CA metals to determine whether or not they are hazardous. A copy of the laboratory results must be submitted to this Agency for evaluation. Emergency card was provided to be filled out and posted.

Eval Notes:	On site to conduct routine hazardous waste inspection. Charlie Smith granted consent to conduct inspection. I walked through the facility, perimeter and inspected waste storage area. I did not observe any hazardous waste in trash cans throughout the facility. Waste oil is stored in an aboveground storage tank that is kept closed and with faded label. Waste antifreeze drum is stored closed with label falling off. Used oil filer drum is stored closed without label. New labels were placed on the waste oil tank, waste antifreeze and used oil filter drums during the inspection. Manifests were reviewed. Emergency card is posted in the shop.

Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

. Waste name: 2,4,5-TRICHLOROPHENOL

. Waste code: D042
. Waste name: 2,4,6-TRICHLOROPHENOL

. Waste code: D043
. Waste name: VINYL CHLORIDE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F004
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F010
. Waste name: QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F011
. Waste name: SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.

. Waste code: F012
. Waste name: QUENCHING WASTEWATER TREATMENT SLUDGES FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

. Waste code: F020
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- OR TETRACHLOROPHENOL OR OF INTERMEDIATES USED TO PRODUCE THEIR PESTICIDE DERIVATIVES. (THIS LISTING DOES NOT INCLUDE WASTES FROM THE PRODUCTION OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

. Waste code: F021
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF PENTACHLOROPHENOL, OR OF INTERMEDIATES USED TO PRODUCE DERIVATIVES.

. Waste code: F022
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENES UNDER ALKALINE CONDITIONS.

. Waste code: F023
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE PRODUCTION OR MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TRI- AND TETRACHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE WASTES FROM EQUIPMENT USED ONLY FOR THE PRODUCTION OR USE OF HEXACHLOROPHENE FROM HIGHLY PURIFIED 2,4,5-TRICHLOROPHENOL.)

. Waste code: F024
. Waste name: PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES,

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)

. Waste code: F025
. Waste name: CONDENSED LIGHT ENDS, SPENT FILTERS AND FILTER AIDS, AND SPENT DESICCANT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION.

. Waste code: F026
. Waste name: WASTES (EXCEPT WASTEWATER AND SPENT CARBON FROM HYDROGEN CHLORIDE PURIFICATION) FROM THE PRODUCTION OF MATERIALS ON EQUIPMENT PREVIOUSLY USED FOR THE MANUFACTURING USE (AS A REACTANT, CHEMICAL INTERMEDIATE, OR COMPONENT IN A FORMULATING PROCESS) OF TETRA-, PENTA-, OR HEXACHLOROBENZENE UNDER ALKALINE CONDITIONS.

. Waste code: F027
. Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

. Waste code: F028
. Waste name: RESIDUES RESULTING FROM THE INCINERATION OR THERMAL TREATMENT OF SOIL CONTAMINATED WITH EPA HAZARDOUS WASTE NOS. F020, F021, F022, F023, F026, AND F027.

. Waste code: F032
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

. Waste code: F034
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE CREOSOTE FORMULATIONS. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F035
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F037
. Waste name: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

. Waste code: F038
. Waste name: PETROLEUM REFINERY SECONDARY (EMULSIFIED) OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE AND/OR FLOAT GENERATED FROM THE PHYSICAL AND/OR CHEMICAL SEPARATION OF OIL/WATER/SOLIDS IN PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH WASTES INCLUDE, BUT ARE NOT LIMITED TO, ALL SLUDGES AND FLOATS GENERATED IN INDUCED AIR FLOTATION (IAF) UNITS, TANKS AND IMPOUNDMENTS, AND ALL SLUDGES GENERATED IN DAF UNITS. SLUDGES GENERATED IN STORMWATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND F037, K048, AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

. Waste code: F039
. Waste name: LEACHATE RESULTING FROM THE TREATMENT, STORAGE, OR DISPOSAL OF WASTES CLASSIFIED BY MORE THAN ONE WASTE CODE UNDER SUBPART D, OR FROM A MIXTURE OF WASTES CLASSIFIED UNDER SUBPARTS C AND D OF THIS PART. (LEACHATE RESULTING FROM THE MANAGEMENT OF ONE OR MORE OF THE FOLLOWING EPA HAZARDOUS WASTES AND NO OTHER HAZARDOUS WASTES RETAINS ITS HAZARDOUS WASTE CODE(S): F020, F021, F022, F023, F026, F027, AND/OR F028.)

. Waste code: K001
. Waste name: BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATERS FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: K002
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHROME YELLOW AND ORANGE PIGMENTS.

. Waste code: K003
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF MOLYBDATE ORANGE PIGMENTS.

. Waste code: K004

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF ZINC YELLOW PIGMENTS.

. Waste code: K005
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHROME GREEN PIGMENTS.

. Waste code: K006
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHROME OXIDE GREEN PIGMENTS (ANHYDROUS AND HYDRATED).

. Waste code: K007
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF IRON BLUE PIGMENTS.

. Waste code: K008
. Waste name: OVEN RESIDUE FROM THE PRODUCTION OF CHROME OXIDE GREEN PIGMENTS.

. Waste code: K009
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.

. Waste code: K010
. Waste name: DISTILLATION SIDE CUTS FROM THE PRODUCTION OF ACETALDEHYDE FROM ETHYLENE.

. Waste code: K011
. Waste name: BOTTOM STREAM FROM THE WASTEWATER STRIPPER IN THE PRODUCTION OF ACRYLONITRILE.

. Waste code: K013
. Waste name: BOTTOM STREAM FROM THE ACETONITRILE COLUMN IN THE PRODUCTION OF ACRYLONITRILE.

. Waste code: K014
. Waste name: BOTTOMS FROM THE ACETONITRILE PURIFICATION COLUMN IN THE PRODUCTION OF ACRYLONITRILE.

. Waste code: K015
. Waste name: STILL BOTTOMS FROM THE DISTILLATION OF BENZYL CHLORIDE.

. Waste code: K016
. Waste name: HEAVY ENDS OR DISTILLATION RESIDUES FROM THE PRODUCTION OF CARBON TETRACHLORIDE.

. Waste code: K017
. Waste name: HEAVY ENDS (STILL BOTTOMS) FROM THE PURIFICATION COLUMN IN THE PRODUCTION OF EPICHLOROHYDRIN.

. Waste code: K018
. Waste name: HEAVY ENDS FROM THE FRACTIONATION COLUMN IN ETHYL CHLORIDE PRODUCTION.

. Waste code: K019
. Waste name: HEAVY ENDS FROM THE DISTILLATION OF ETHYLENE DICHLORIDE IN ETHYLENE DICHLORIDE PRODUCTION.

. Waste code: K020
. Waste name: HEAVY ENDS FROM THE DISTILLATION OF VINYL CHLORIDE IN VINYL CHLORIDE

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

MONOMER PRODUCTION.

. Waste code: K021
. Waste name: AQUEOUS SPENT ANTIMONY CATALYST WASTE FROM FLUOROMETHANE PRODUCTION.

. Waste code: K022
. Waste name: DISTILLATION BOTTOM TARS FROM THE PRODUCTION OF PHENOL/ACETONE FROM CUMENE.

. Waste code: K023
. Waste name: DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.

. Waste code: K024
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM NAPHTHALENE.

. Waste code: K025
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF NITROBENZENE BY THE NITRATION OF BENZENE.

. Waste code: K026
. Waste name: STRIPPING STILL TAILS FROM THE PRODUCTION OF METHYL ETHYL PYRIDINES.

. Waste code: K027
. Waste name: CENTRIFUGE AND DISTILLATION RESIDUES FROM TOLUENE DIISOCYANATE PRODUCTION.

. Waste code: K028
. Waste name: SPENT CATALYST FROM THE HYDROCHLORINATOR REACTOR IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K029
. Waste name: WASTE FROM THE PRODUCT STEAM STRIPPER IN THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K030
. Waste name: COLUMN BOTTOMS OR HEAVY ENDS FROM THE COMBINED PRODUCTION OF TRICHLOROETHYLENE AND PERCHLOROETHYLENE.

. Waste code: K031
. Waste name: BY-PRODUCT SALTS GENERATED IN THE PRODUCTION OF MSMA AND CACODYLIC ACID.

. Waste code: K032
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF CHLORDANE.

. Waste code: K033
. Waste name: WASTEWATER AND SCRUB WATER FROM THE CHLORINATION OF CYCLOPENTADIENE IN THE PRODUCTION OF CHLORDANE.

. Waste code: K034
. Waste name: FILTER SOLIDS FROM THE FILTRATION OF HEXACHLOROCYCLOPENTADIENE IN THE PRODUCTION OF CHLORDANE.

. Waste code: K035
. Waste name: WASTEWATER TREATMENT SLUDGES GENERATED IN THE PRODUCTION OF CREOSOTE.

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

. Waste code: K036
. Waste name: STILL BOTTOMS FROM TOLUENE RECLAMATION DISTILLATION IN THE PRODUCTION OF DISULFOTON.

. Waste code: K037
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE PRODUCTION OF DISULFOTON.

. Waste code: K038
. Waste name: WASTEWATER FROM THE WASHING AND STRIPPING OF PHORATE PRODUCTION.

. Waste code: K039
. Waste name: FILTER CAKE FROM THE FILTRATION OF DIETHYLPHOSPHORODITHIOIC ACID IN THE PRODUCTION OF PHORATE.

. Waste code: K040
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF PHORATE.

. Waste code: K041
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF TOXAPHENE.

. Waste code: K042
. Waste name: HEAVY ENDS OR DISTILLATION RESIDUES FROM THE DISTILLATION OF TETRACHLOROBENZENE IN THE PRODUCTION OF 2,4,5-T.

. Waste code: K043
. Waste name: 2,6-DICHLOROPHENOL WASTE FROM THE PRODUCTION OF 2,4-D.

. Waste code: K044
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE MANUFACTURING AND PROCESSING OF EXPLOSIVES.

. Waste code: K045
. Waste name: SPENT CARBON FROM THE TREATMENT OF WASTEWATER CONTAINING EXPLOSIVES.

. Waste code: K046
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE MANUFACTURING, FORMULATION, AND LOADING OF LEAD-BASED INITIATING COMPOUNDS.

. Waste code: K047
. Waste name: PINK/RED WATER FROM TNT OPERATIONS.

. Waste code: K048
. Waste name: DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K049
. Waste name: SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K050
. Waste name: HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K051
. Waste name: API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K052
. Waste name: TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

. Waste code: K060
. Waste name: AMMONIA STILL LIME SLUDGE FROM COKING OPERATIONS.

. Waste code: K061
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM THE PRIMARY PRODUCTION OF STEEL IN ELECTRIC FURNACES.

. Waste code: K062
. Waste name: SPENT PICKLE LIQUOR FROM STEEL FINISHING OPERATIONS OF PLANTS THAT PRODUCE IRON OR STEEL.

. Waste code: K069
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

. Waste code: K071
. Waste name: BRINE PURIFICATION MUDS FROM THE MERCURY CELL PROCESS IN CHLORINE PRODUCTION, IN WHICH SEPARATELY PREPURIFIED BRINE IS NOT USED.

. Waste code: K073
. Waste name: CHLORINATED HYDROCARBON WASTE FROM THE PURIFICATION STEP OF THE DIAPHRAGM CELL PROCESS USING GRAPHITE ANODES IN CHLORINE PRODUCTION.

. Waste code: K083
. Waste name: DISTILLATION BOTTOMS FROM ANILINE PRODUCTION.

. Waste code: K084
. Waste name: WASTEWATER TREATMENT SLUDGES GENERATED DURING THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

. Waste code: K085
. Waste name: DISTILLATION OR FRACTIONATION COLUMN BOTTOMS FROM THE PRODUCTION OF CHLOROBENZENES.

. Waste code: K086
. Waste name: SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.

. Waste code: K087
. Waste name: DECANTER TANK TAR SLUDGE FROM COKING OPERATIONS.

. Waste code: K088
. Waste name: SPENT POTLINERS FROM PRIMARY ALUMINUM REDUCTION.

. Waste code: K093
. Waste name: DISTILLATION LIGHT ENDS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.

. Waste code: K094
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF PHTHALIC ANHYDRIDE FROM ORTHO-XYLENE.

. Waste code: K095
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K096

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

. Waste name: HEAVY ENDS FROM THE HEAVY ENDS COLUMN FROM THE PRODUCTION OF 1,1,1-TRICHLOROETHANE.

. Waste code: K097
. Waste name: VACUUM STRIPPER DISCHARGE FROM THE CHLORDANE CHLORINATOR IN THE PRODUCTION OF CHLORDANE.

. Waste code: K098
. Waste name: UNTREATED PROCESS WASTEWATER FROM THE PRODUCTION OF TOXAPHENE.

. Waste code: K099
. Waste name: UNTREATED WASTEWATER FROM THE PRODUCTION OF 2,4-D.

. Waste code: K100
. Waste name: WASTE LEACHING SOLUTION FROM ACID LEACHING OF EMISSION CONTROL DUST/SLUDGE FROM SECONDARY LEAD SMELTING.

. Waste code: K101
. Waste name: DISTILLATION TAR RESIDUES FROM THE DISTILLATION OF ANILINE-BASED COMPOUNDS IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

. Waste code: K102
. Waste name: RESIDUE FROM THE USE OF ACTIVATED CARBON FOR DECOLORIZATION IN THE PRODUCTION OF VETERINARY PHARMACEUTICALS FROM ARSENIC OR ORGANO-ARSENIC COMPOUNDS.

. Waste code: K103
. Waste name: PROCESS RESIDUES FROM ANILINE EXTRACTION FROM THE PRODUCTION OF ANILINE.

. Waste code: K104
. Waste name: COMBINED WASTEWATERS GENERATED FROM NITROBENZENE/ANILINE PRODUCTION.

. Waste code: K105
. Waste name: SEPARATED AQUEOUS STREAM FROM THE REACTOR PRODUCT WASHING STEP IN THE PRODUCTION OF CHLOROBENZENES.

. Waste code: K106
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE MERCURY CELL PROCESS IN CHLORINE PRODUCTION.

. Waste code: K107
. Waste name: COLUMN BOTTOMS FROM PRODUCT SEPARATION FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE (UDMH) FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K108
. Waste name: CONDENSED COLUMN OVERHEADS FROM PRODUCT SEPARATION AND CONDENSED REACTOR VENT GASES FROM THE PRODUCTION OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K109
. Waste name: SPENT FILTER CARTRIDGES FROM PRODUCT PURIFICATION FROM THE PRODUCT OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K110
. Waste name: CONDENSED COLUMN OVERHEADS FROM INTERMEDIATE SEPARATION FROM THE

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

PRODUCTION OF 1,1-DIMETHYLHYDRAZINE FROM CARBOXYLIC ACID HYDRAZIDES.

. Waste code: K111
. Waste name: PRODUCT WASHWATERS FROM THE PRODUCTION OF DINITROTOLUENE VIA NITRATION OF TOLUENE.

. Waste code: K112
. Waste name: REACTION BY-PRODUCT WATER FROM THE DRYING COLUMN IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K113
. Waste name: CONDENSED LIQUID LIGHT ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K114
. Waste name: VICINALS FROM THE PURIFICATION OF TOLUENEDIAMINE IN PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K115
. Waste name: HEAVY ENDS FROM PURIFICATION OF TOLUENEDIAMINE IN THE PRODUCTION OF TOLUENEDIAMINE VIA HYDROGENATION OF DINITROTOLUENE.

. Waste code: K116
. Waste name: ORGANIC CONDENSATE FROM THE SOLVENT RECOVERY COLUMN IN THE PRODUCTION OF TOLUENE DIISOCYANATE VIA PHOSGENATION OF TOLUENEDIAMINE.

. Waste code: K117
. Waste name: WASTEWATER FROM THE REACTOR VENT GAS SCRUBBER IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

. Waste code: K118
. Waste name: SPENT ADSORBENT SOLIDS FROM PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

. Waste code: K123
. Waste name: PROCESS WASTEWATER (INCLUDING SUPERNATES, FILTRATES, AND WASHWATERS) FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K124
. Waste name: REACTOR VENT SCRUBBER WATER FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K125
. Waste name: FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS FROM THE PRODUCTION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K126
. Waste name: BAGHOUSE DUST AND FLOOR SWEEPINGS IN MILLING AND PACKAGING OPERATIONS FROM PRODUCTION OR FORMULATION OF ETHYLENEBISDITHIOCARBAMIC ACID AND ITS SALTS.

. Waste code: K131
. Waste name: WASTEWATER FROM THE REACTOR AND SPENT SULFURIC ACID FROM THE ACID DRYER FROM THE PRODUCTION OF METHYL BROMIDE.

. Waste code: K132
. Waste name: SPENT ABSORBENT AND WASTEWATER SEPARATOR SOLIDS FROM THE PRODUCTION OF

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

METHYL BROMIDE.

. Waste code: K136
. Waste name: STILL BOTTOMS FROM THE PURIFICATION OF ETHYLENE DIBROMIDE IN THE PRODUCTION OF ETHYLENE DIBROMIDE VIA BROMINATION OF ETHENE.

. Waste code: K141
. Waste name: PROCESS RESIDUES FROM THE RECOVERY OF COAL TAR, INCLUDING, BUT NOT LIMITED TO, TAR COLLECTING SUMP RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL. THIS LISTING DOES NOT INCLUDE K087 (DECANTER TANK SLUDGE FROM COKING OPERATIONS).

. Waste code: K142
. Waste name: TANK STORAGE RESIDUES FROM THE PRODUCTION OF COKE FROM COAL OR FROM THE RECOVERY OF COKE BY-PRODUCTS FROM COAL.

. Waste code: K143
. Waste name: PROCESS RESIDUES FROM THE RECOVERY OF LIGHT OIL, INCLUDING, BUT NOT LIMITED TO, THOSE GENERATED IN STILLS, DECANTERS, AND WASH OIL RECOVERY UNITS FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

. Waste code: K144
. Waste name: WASTEWATER SUMP RESIDUES FROM LIGHT OIL REFINING, INCLUDING, BUT NOT LIMITED TO, INTERCEPTING OR CONTAMINATION SUMP SLUDGES FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

. Waste code: K145
. Waste name: RESIDUES FROM NAPHTHALENE COLLECTION AND RECOVERY OPERATIONS FROM THE RECOVERY OF COKE BY-PRODUCTS PRODUCED FROM COAL.

. Waste code: K147
. Waste name: TAR STORAGE RESIDUES FROM COAL TAR REFINING.

. Waste code: K148
. Waste name: RESIDUES FROM COAL TAR DISTILLATION, INCLUDING, BUT NOT LIMITED TO, STILL BOTTOMS.

. Waste code: K149
. Waste name: DISTILLATION BOTTOMS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, RING-CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS. [THIS WASTE DOES NOT INCLUDE STILL BOTTOMS FROM THE DISTILLATION OF BENZOYL CHLORIDE]

. Waste code: K150
. Waste name: ORGANIC RESIDULES EXCLUDING SPENT CARBON ADSORBENT, FROM THE SPENT CHLORINE GAS AND HYDROCHLORIC ACID RECOVERY PROCESSES ASSOCIATED WITH THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

. Waste code: K151
. Waste name: WASTEWATER TREATMENT SLUDGES, EXCLUDING NEUTRALIZATION AND BIOLOGICAL SLUDGES, GENERATED DURING THE TREATMENT OF WASTEWATERS FROM THE PRODUCTION OF ALPHA (OR METHYL-) CHLORINATED TOLUNES, BENZOYL CHLORIDES, AND COMPOUNDS WITH MIXTURES OF THESE FUNCTIONAL GROUPS.

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

. Waste code: K156
. Waste name: ORGANIC WASTE (INCLUDING HEAVY ENDS, STILL BOTTOMS, LIGHT ENDS, SPENT SOLVENTS, FILTRATES, AND DECANTATES) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K157
. Waste name: WASTEWATERS (INCLUDING SCRUBBER WATERS, CONDENSER WATERS, WASHWATERS, AND SEPARATION WATERS) FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K158
. Waste name: BAG HOUSE DUSTS AND FILTER/SEPARATION SOLIDS FROM THE PRODUCTION OF CARBAMATES AND CARBAMOYL OXIMES.

. Waste code: K159
. Waste name: ORGANICS FROM THE TREATMENT OF THIOCARBAMATE WASTES.

. Waste code: K161
. Waste name: PURIFICATION SOLIDS (INCLUDING FILTRATION, EVAPORATION, AND CENTRIFUGATION SOLIDS), BAG HOUSE DUST AND FLOOR SWEEPINGS FROM THE PRODUCTION OF DITHIOCARBAMATE ACIDS AND THEIR SALTS. (THIS LISTING DOES NOT INCLUDE K125 OR K126).

. Waste code: K169
. Waste name: CRUDE OIL STORAGE TANK SEDIMENT FROM PETROLEUM REFINING OPERATIONS

. Waste code: K170
. Waste name: CLARIFIED SLURRY OIL TANK SEDIMENT AND/OR IN-LINE FILTER/SEPARATION SOLIDS FROM PETROLEUM REFINING OPERATIONS

. Waste code: K171
. Waste name: SPENT HYDROTREATING CATALYST FROM PETROLEUM REFINING OPERATIONS,INCLUDING GUARD BEDS USED TO DESULFURIZE FEEDS TO OTHER CATALYTIC REACTORS (THIS LISTING DOES NOT INCLUDE INERT SUPPORT MEDIA)

. Waste code: K172
. Waste name: SPENT HYDROREFINING CATALYST FROM PETROLEUM REFINING OPERATIONS, INCLUDING GUARD BEDS USED TO DESULFURIZE FEEDS TO OTHER CATALYTIC REACTORS (THIS LISTING DOES NOT INCLUDE INERT SUPPORT MEDIA)

. Waste code: K174
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE PRODUCTION OF ETHLYENE DICHLORIDE OR VINYL CHLORIDE

. Waste code: K175
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF VINYL CHLORIDE MONOMER..

. Waste code: K176
. Waste name: BAGHOUSE FILTERS FROM THE PRODUCTION OF ANTIMONY OXIDE, INCLUDING FILTERS FROM THE PRODUCTION OF INTERMEDIATES (E.G.,ANTIMONY METAL OR CRUDE ANTIMONY OXIDE)

. Waste code: K177
. Waste name: SLAG FROM THE PRODUCTION OF ANTIMONY OXIDE THAT IS SPECULATIVELY ACCUMULATED OR DISPOSED,INCLUDING SLAG FROM THE PRODUCTION OF INTERMEDIATES (E.G.,ANTIMONY METAL OR CRUDE ANTIMONY OXIDE)

PANASONIC AVIONICS CORPORATION (Continued) **1024877571**

. Waste code: K178
. Waste name: RESIDUES FROM MANUFACTURING AND MANUFACTURING-SITE STORAGE OF FERRIC CHLORIDE FROM ACIDS FORMED DURING THE PRODUCTION OF TITANIUM DIOXIDE USING THE CHLORIDE-ILMENITE PROCESS.

. Waste code: K181
. Waste name: Nonwastewaters from the production of dyes and/or pigments.

. Waste code: LABP
. Waste name: LAB PACK

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P002

CERS ID:	852856
CERS Description:	Industrial Facility Storm Water

Violations:

Site ID:	538961
Site Name:	Panasonic
Violation Date:	10-02-2017
Citation:	2014-0057-DWQ - Industrial General Permit
Violation Description:	SW - Failure to Obtain Permit
Violation Notes:	DISCHARGER FAILED TO RECERTIFY THE NEC BY OCTOBER 1, 2017
Violation Division:	Water Boards
Violation Program:	INDSTW
Violation Source:	SMARTS

Site ID:	538961
Site Name:	Panasonic
Violation Date:	04-23-2019
Citation:	2014-0057-DWQ - Industrial General Permit
Violation Description:	SW - Failure to meet NEC criteria
Violation Notes:	Pallets of baled cardboard were observed around the facility. Parts for cubicles were stored outside under tarps and metal parts in boxes were observed nearby. A wooden container with a large gap at the top was observed storing metal shelving.
Violation Division:	Water Boards
Violation Program:	INDSTW
Violation Source:	SMARTS

Site ID:	538961
Site Name:	Panasonic
Violation Date:	12-26-2018
Citation:	2014-0057-DWQ - Industrial General Permit
Violation Description:	SW - Failure to meet NEC criteria
Violation Notes:	Regional Board staff conducted a No Exposure Certification (NEC) inspection of the above facility on December 26, 2018. Multiple pallets containing cardboard remnants were observed near an open topped dumpster in the southeastern corner of the facility. In addition, multiple wooden crates and pallets containing miscellaneous

PANASONIC (Continued) **S121023442**

materials (cardboard and wood) were noted in areas without cover. Overall, the facility yard is disorganized and contains large amounts of exposed materials. Therefore, this facility is currently in violation of the NEC requirements as set for in the Industrial General Permit. The Legally Responsible Person will be notified about the violations. The facility will be given until Monday, January 7, 2019 to come into compliance. If evidence is not provided by said deadline, the Regional Board will deny NEC coverage and issue a Notice of Non-Compliance.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-23-2019
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board Staff conducted a No Exposure Certification compliance inspection for the above facility on April 23, 2019. Staff met with Mr. Daniel Baumbach, Security. Pallets of baled cardboard were observed around the facility. Parts for cubicles were stored outside under tarps and metal parts in boxes were observed nearby. A wooden container with a large gap at the top was observed storing metal shelving. As this does not meet the NEC requirements, staff informed Mr. Baumbach that the materials will need to be moved indoors or placed under a storm-resistant shelter.

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 02-02-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Reviewed and accepted annual certification documents submitted to CERS on 1/9/18 with comment regarding adding locations of fire extinguisher(s) in and/or near disclosed material must be added to site map and submitting revised site map in next submission.
Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-18-2014
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to site to conduct hazardous materials chemical inventory and business emergency plan inspection. I walked through the facility and inspected hazardous materials storage ares. The facility has liquid nitrogen that meets the required disclosure quantities. Facility conducts employee training and maintains records of topics covered and employees trained. All required documents have been electronically submitted to E-submit and will be reviewed for approval by this Agency.

Eval Date:	06-20-2014
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	The documents submitted on 4/1/14 has been reviewed and declined with the following considerations: The yes box for recycling more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2) is checked. Please provide Recyclable Materials Report to this Agency. During the onsite inspection conducted on 6/18/14, it was stated that the largest container of isopropyl alcohol (IPA) is 1 gallon and there is less than 55 gallons stored on site. Therefore, IPA must not be reported and the Hazardous Materials Inventory Chemical Description sheet must be removed. Sulfuric acid in lead acid batteries is reportable, if sulfuric acid electrolyte (40% by weight) is at or greater than 55 gallons. Sulfuric acid must be reported in gallons and not in pounds, as reported. The reported volume (35 pounds) for one forklift battery, as confirmed during onsite inspection conducted on 6/18/14, appears to be high. If this is a reportable chemical, the CAS# [Truncated]

Eval Notes:	On site to conduct routine hazardous waste inspection. Dan Smolinka and Paul Paxton granted consent to conduct inspection. I walked through all buildings where hazardous waste is stored and inspected waste storage areas. Facility has purchased CNC machines and is generating machine coolant waste. According to Mr. Smolinka, the hauler has tested the spent coolant and determined that it may managed as "non hazardous." Tests results are not available on site and analytical method is not known. Test results will be obtained from the hauler and a copy will be provided to this Agency to determine whether or not the spent coolant is hazardous or not. Spent coolant must be managed as hazardous waste until hazardous waste determination is made. All containers and two drums storing solids contaminated with isopropyl alcohol are closed and labeled properly. Manifests were reviewed. Facility has emergency contingency plan.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/29/2020
Date Data Arrived at EDR: 08/03/2020
Date Made Active in Reports: 08/25/2020
Number of Days to Update: 22

Source: EPA
Telephone: N/A
Last EDR Contact: 08/03/2020
Next Scheduled EDR Contact: 10/12/2020
Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

20865-20795 CANADA ROAD
20865-20795 CANADA ROAD
LAKE FOREST, CA 92630

TARGET PROPERTY COORDINATES

Latitude (North):	33.660538 - 33° 39' 37.94''
Longitude (West):	117.675125 - 117° 40' 30.45''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	437404.8
UTM Y (Meters):	3724529.2
Elevation:	631 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5636489 EL TORO, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

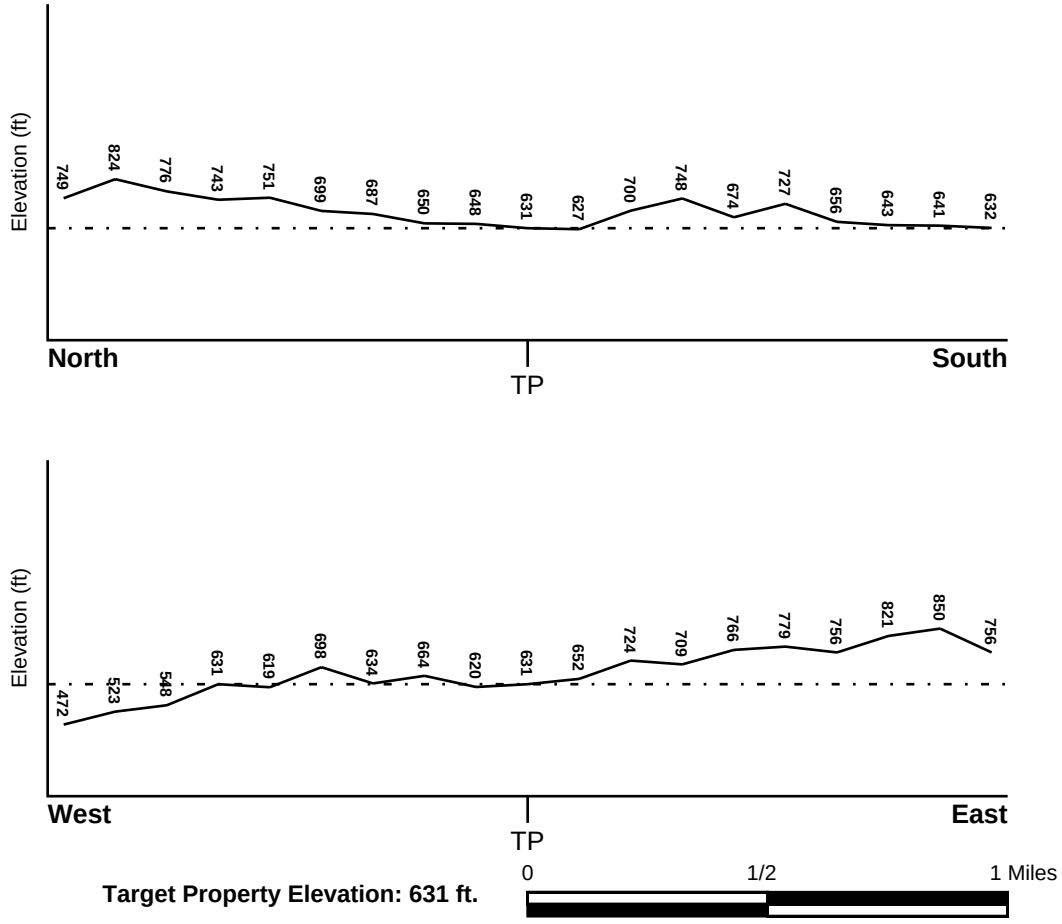

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06059C0316J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06059C0315J	FEMA FIRM Flood data
06059C0314J	FEMA FIRM Flood data
06059C0318J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
EL TORO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: RIVERWASH

Soil Surface Texture: sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified coarse sand to sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 2

Soil Component Name: SORRENTO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	11 inches	61 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 7.9
3	61 inches	72 inches	stratified loamy fine sand to silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: CIENEBA

Soil Surface Texture: sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:
2	7 inches	11 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0.42 Min: 0	Max: Min:

Soil Map ID: 4

Soil Component Name: CAPISTRANO

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	27 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 5.6
2	27 inches	64 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 5.6

Soil Map ID: 5

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 6.5 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones

Public Records Request Number:
Location: 20865 Canada Road, Lake Forest CA 92630

Dear Requestor:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

Our vendor has processed and uploaded TSDF manifest data with a generation date on or before June 29, 2018. Any TSDF copies with a generation date on or after June 30, 2018 are submitted to the e-Manifest system or processed by the federal EPA. Data processed by the federal EPA is not available in HWTS at this time.

After a thorough review of our files we have found that no EPA ID Number in HWTS records exist at this office pertaining to the sites/facilities referenced above.

If you have any questions, or would like further information regarding your request, please contact me at hwtsreports@dtsc.ca.gov.

Sincerely,

Bridget Fitzsenry

Attachments: 2019_0019_Shilpa_Sunil_No records found.doc

Hello Shilpa,

Please see attached, information related to your PRA request for:

20865 Canada Road, Lake Forest Ca

In this case after a thorough review of our files we have found that no EPA ID Number in HWTS records exist at this office pertaining to the sites/facilities referenced above.

Please let me know if you have any questions.

Enjoy your day!
Bridget

Bridget Fitzsenry

Hello Shilpa,

In response to your Public Records Act request dated June 13, 2019, the Irvine Ranch Water District (District) doe not have any records responsive to your request (as the District does not maintain records for septic tanks).

The referenced property at 20865 Canada Road in Lake Forest receives domestic water service from the District; however, does not have sewer service which is a good indication that the property maintains a septic system.

Please note that the District does not have any records of a well at this site, which is most likely why this address is being serviced with domestic water. Since the District consolidated with the Los Alisos Water District in 2000, and historic documentation provided to the District is very limited.

Please confirm receipt of my email, so I may file your request.

Thank you,
Leslie

Dear Sir/Madam:

Property address: **20865 Canada Road, Lake Forest Ca**

Hillmann Consulting, LLC is conducting an environmental investigation of the above referenced

property. Under the Freedom of Information Act, We would like to request any information your office has regarding this property such as environmental files (UST, groundwater, wells, etc.). The property appears to have septic system based on the age of the residential home and barn developed at the Property. Is there any way to find out further details about the septic system location if it's still in place or capped? If capped are there any records we could reference.

If any records are located, we would like to obtain copies or schedule a file review. If no records are available, please contact me to confirm. Thank you for your assistance.

Sincerely,

Thank You,

Shilpa Sunil

Dear Requestor:

We have received your Public Records Act Request for records from Department of Toxic Substances Control (DTSC). After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

DTSC's Hazardous Waste Tracking System (HWTS) may have records that pertain to this request. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database http://hwts.dtsc.ca.gov/report_search.cfm?id=5. If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS by email at hwtsreports@dtsc.ca.gov or by phone at 800-6186942 for further information. For copies of manifest, please send an email to mcr@dtsc.ca.gov.

A large number of our records are available on EnviroStor, an online database that provides non-confidential, public access to DRSCs data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library- anywhere Internet access is available. Just go to www.envirostor.dtsc.ca.gov. You'll find a step-by-step tour of EnviroStor under the "How To Use EnviroStor" menu on the website.

If you have any questions, would like further information regarding your request, please contact me at (714) 484-5337 or via email at CypressFileRoom@dtsc.ca.gov.

PROJECT PERSONNEL QUALIFICATIONS

HILLMANN CONSULTING

Shilpa Sunil

Environmental Project Manager

EDUCATION:

M.S. Environmental Engineering
University of California, Irvine

B.S. Environmental Engineering
University of Mysore (SJCE), Mysore, India

CERTIFICATIONS:

OSHA/ 10-hr Certification

CEQA Certification

YEARS OF EXPERIENCE:

With Hillmann: 2 years

Total: 10 years

PROFESSIONAL EXPERIENCE:

Ms. Sunil is an Environmental Professional with 10 years of experience in Environmental Engineering. Ms. Sunil is experienced in supporting several areas of Hillmann's practice including coordination of projects, project scope creation, investigatory projects, and corrective plan implementation.

As an Environmental Project Manager, Ms. Sunil has experience writing reports for site remediation for commercial property owners and preparing respective groundwater monitoring reports. She also writes Phase I and Phase II Environmental Site Assessments and Investigation reports as well as Supplemental Site Investigation Reports. She has experience working in a variety of buildings including multifamily residential properties, commercial office buildings, retail shopping centers, gasoline service stations, hotels, dry cleaning plants, auto repair shops, industrial buildings, aerospace manufacturers, plating facilities, and various manufacturing operations.

Representative experience includes:

Environmental Engineer, John L. Hunter and Associates, Inc: From 2015 to 2017, Ms. Sunil worked as an Environmental Engineer for John L. Hunter and Associates. Her responsibilities included reviewing Water Quality Management Plans, grading & drainage plans and conducting site verification inspections. She reviewed Standard Urban Storm Water Mitigation Plans; utilized SWRCB SMARTS database, assisted in Industrial Waste Plan review. She performed detailed review of grading plans, design specifications, hydro modifications analysis, and Storm Water Best Management Practice (BMP) calculations. She assisted with annual report preparation as part of NPDES permit requirements. Additionally, Ms. Sunil was responsible for reviewing work of private Professional Engineers for compliance with City standards and she assisted in determining engineering requirements for new developments.

Engineering Tech II, Orange County Public Works- OC Engineering: From July 2013 to December 2014, Ms. Sunil worked as an Engineer for Orange County Public Works. In this position, she reviewed permits requests, provided support of capital improvement and maintenance projects, and integrated environmental values into capital improvement projects by verifying the implementation of the federal National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA).

Staff Aid II, Orange County Public Works- OC Road, Capital Projects: From July 2012- July 2013, Ms. Sunil served as a Staff Aid for Orange County. In this position, she was responsible for the preparation of Water Quality Management Plans and Micro Station Drafting. She provided detailed review of grading plans, design specifications, hydro modification analysis, and Storm Water Best Management Practice Calculations. She assisted with annual report preparation as part of NPDES permit requirements.

HILLMANN CONSULTING

Staff Aid II, Orange County Road, Traffic Engineering: From March 2010 to July 2012, Ms. Sunil was a Staff Aid for the Orange County Road and Traffic Engineering team. She performed traffic investigation, assisted the traffic committee and aided in work order preparation. She analyzed traffic flows, parking issues, and intersection capacities. Ms. Sunil provided written and verbal responses to residents of unincorporated Orange County.

Assistant Engineer, RBF Consulting, Irvine, CA: From August 2007 to January 2010, Ms. Sunil was an Assistant Engineer at RBF Consulting where she conducted comprehensive evaluations of watersheds including National Pollution Discharge Elimination Systems (NPDES) compliance, incorporated BMPs, assisted public and private sector clients with NPDES compliance services, and prepared and reviewed Storm Water Pollution Prevention Plans and Water Quality Management Plans.

HILLMANN
CONSULTING

J. Ryan Terwilliger

Operational Manager, West Coast

EDUCATION:

B.S. Environmental Science, University of Southern California, Los Angeles, CA

CERTIFICATION:

Cal-OSHA Certified Asbestos Consultant
CDPH Accredited Lead Inspector/Assessor/ Project Monitor

CA Certified Site Surveillance Technician

OSHA 40 - Hr HAZWOPER

YEARS OF EXPERIENCE:

With Hillmann: 4 years

Total: 8 years

PROFESSIONAL EXPERIENCE:

Mr. Terwilliger is responsible for business operations, fiscal management and field staff management for Hillmann's California Office. He also performs asbestos surveys and investigations to identify asbestos and lead materials associated with occupational hazards. He supervises work practices and controls in accordance with job specifications, current EPA, OSHA and State Regulations for Asbestos remediation projects in commercial, industrial and multi-family residential buildings. Mr. Terwilliger performs IAQ, mold and moisture investigations in commercial, industrial and residential facilities nationwide. He also performs awareness training for asbestos, lead and microbial agents. Mr. Terwilliger provides litigation support consultation.

Representative Experience Includes:

Tishman Speyer Properties, Various locations: Hillmann has provided the complete environmental program for Tishman Speyer's properties since 1987. Our services include environmental health and safety, industrial hygiene, phase I environmental site assessments, asbestos surveys, air monitoring, bid administration, O&M programs and indoor air quality programs on various commercial, industrial and multi-family residential properties. Mr. Terwilliger is an Environmental Scientist on this contract, conducting on-site environmental services including phase I site assessments and NPDES water quality testing.

Westfield – Environmental Program, Various locations: Since 2000, Hillmann has been providing an environmental program encompassing environmental health and safety, Phase I environmental site assessments, asbestos and lead surveys, air monitoring, bid administration and O&M programs, industrial hygiene and indoor air quality programs, and hazardous materials assessments on their mall properties throughout the county. Mr. Terwilliger is an Environmental Scientist on this contract performing industrial hygiene services that include indoor air quality monitoring, Phase I environmental site assessments, asbestos and lead surveys.

Brookfield Office Properties, Various sites, CA: Hillmann has been providing hazardous materials surveys, development abatement specifications, and managing the oversight activities during the abatement at various Brookfield owned sites throughout California. Mr. Terwilliger functions as a Project Manager for this contract.

California Department of Transportation, Central Valley and Northern CA: Hillmann has been performing asbestos and Lead-based Paint Surveys for the California Department of Transportation. Performed comprehensive asbestos containing materials and lead-based paint surveys of residential and commercial buildings that were slated for demolition and generated report of findings in order to aid the Department of Transportation (DOT) in facilitating the road improvement programs and building renovations throughout the

HILLMANN CONSULTING

Central Valley area. Also during the abatement of asbestos from DOT owned buildings, provided contractor oversight and air monitoring services for regulatory compliance.

Verizon, Various Sites, CA. Hillmann conducted hazardous materials surveys, development abatement specifications, and project monitoring during abatement at various Verizon owned sites throughout California. Mr. Terwilliger functioned as the Project Manager.

Public Storage, Los Angeles, CA: Hillman preformed comprehensive asbestos, lead-based paint and universal waste materials survey of commercial and industrial buildings throughout Southern California. Hazardous materials surveys were conducted prior to renovation for the storage units. Mr. Terwilliger developed abatement specifications and managed the abatement activities during the renovations of the buildings. He functioned as the Project Manager on this contract.

1.0 INTRODUCTION / BACKGROUND

Hillmann Consulting, LLC (Hillmann) conducted a Limited Subsurface Investigation at 20865-20795 Canada Road, Lake Forest, California. The subject site consists of three adjoining parcels that together occupy approximately 6.71 acres. The Property is occupied by residential buildings and a horse barn and features extensive vegetative cover. The site is located in a mixed use commercial/residential area of Lake Forest and adjoins Serrano creek to the north-northwest (**Figure 1**). The site is being considered for purchase and reuse for parking or for commercial purposes.

In August 2020, Hillmann conducted a Phase I Environmental Site Assessment for the site. Results indicate the smallest of the three parcels (20795 Canada Road, occupying about 0.35 acres) was used for pesticide application and storage. In addition, a gasoline underground storage tank system (UST) was reported to have been used at 20865 Canada Road as indicated by interviews with on-site personnel, but no records were identified confirming that a UST had ever been used at the site. To determine if an existing UST or former UST excavation was present, a geophysical study was conducted at the Property on August 30, 2020 by C-Below. Results indicated no evidence of a UST, but a small anomaly was detected just south of the paved driveway, and upon physical investigation of the area, this appeared to be the former dispenser. In addition, the survey detected a septic system along the east side of the existing residence. The geophysical survey report is included as **Appendix E**. The layout of the site is shown on **Figure 2A** (20865 Canada Road) and **Figure 2B** (20795 Canada Road).

In September 2020, Hillmann completed a Limited Phase II Subsurface Investigation at the Property that included soil and soil gas sampling to identify potential contamination from the possible UST system (20865 Canada Road) and from past pesticide use and storage (20795 Canada Road). The objective of this work was to provide a preliminary assessment of the subsurface conditions in targeted areas of the site. The current investigation is an independent assessment of the site that was constrained by time and cost factors as part of a self-directed effort. The investigation included installation of three soil borings and soil gas sampling probes in targeted locations, and near-surface soil sampling for pesticide content. This investigation was not intended to meet the more stringent requirements of a regulatory driven assessment.

2.0 GEOLOGY/HYDROGEOLOGY

Based on the drilling logs, soils beneath the site consist of mixed deposits of silty sand, silty clay, and sand from near surface to 10 feet, the maximum depth of exploration. Groundwater was not encountered during drilling to 10 feet below grade. Descriptions of the sediments encountered during drilling are presented in the drilling logs (**Appendix C**).

Based on information provided by representatives of the Irvine Ranch Water District (IRWD) and Los Alisos Water District (LAWD) for another nearby site, groundwater in the vicinity of the subject Property varies seasonally between 70 feet and 140 feet below grade. IRWD and LAWD personnel indicated that the nearest well to the subject Property is located near the intersection of Lake Forest Drive and Regency Lane (Non-potable Well #4). Static

groundwater levels in this well have reportedly ranged from approximately 75 to 140 feet below grade surface.

3.0 SITE INVESTIGATION

On September 15, 2020, Hillmann installed three soil borings (B1-B3) to total depths ranging from 6 to 10 feet below grade in targeted locations near the possible former UST area and adjacent to the existing septic system at 20865 Canada Road. The borings were installed using hand auger tools and the locations are indicated on **Figure 2A**. In addition, four near surface soil samples were obtained at 0.5 feet below grade from the 0.35 acre parcel located at 20795 Canada Road, near the pesticide shed and in areas of likely application. The locations of the soil samples are indicated on **Figure 2B**.

During drilling, a California Professional Geologist described the soil using the Unified Soil Classification System. Soil samples were obtained at select depths in target borings and were preserved for analysis in laboratory glass jars sealed with Teflon tape and threaded caps. Select samples were analyzed for carbon chain hydrocarbons corresponding to gasoline, diesel fuel, and oil weights (C4-C12, C13-C22, and C23-C40 ranges, respectively) by EPA Method 8015M. The near surface samples were analyzed for organo-chlorine pesticides (OCP) by EPA Method 8081A and for arsenic, lead, and mercury by EPA Method 6010B/7471A. The soil samples were analyzed by A&R Laboratories of Ontario, California.

Each boring drilled within the former UST area was completed as a soil gas sampling probe (SG1-SG3) with sampling tips installed at maximum depth. The soil gas sampling probes consists of a plastic micro-porous vapor implants that are approximately 2 inches long with a 0.5-inch outside diameter, connected to 0.25-inch outside diameter nylaflow tubing that extended above the surface. The annulus around each vapor implant was backfilled with approximately 1 foot of screen-washed #3 sand. Six inches of dry bentonite was placed immediately above the sand pack, followed by one-foot of bentonite that was hydrated during placement. The bentonite was further sealed with neat cement to grade to provide a secure borehole seal. The probes were finished with gas-tight fittings at the surface pending vapor purging and sampling.

The probes were allowed to equilibrate for at least 48 hours before purging and sampling. Prior to vapor sampling, shut-in and leak tests were conducted on the probes. The probe head was attached to the sampling train assembly of Nylaflow tubing, valves, and fittings and connected to a purge pump. The pump was used to evacuate the sealed system using an applied vacuum of 100 inches of water column (in. WC). The vacuum on each probe was monitored for 90 seconds with the sampling train system sealed. After the shut-in test was validated, the sampling train was leak tested. Liquid isopropyl alcohol was applied around all connections in the sampling train to evaluate whether the system was sealed from ambient air leaks. A detection of 10 times the reporting limit of this compound might suggest that ambient air leakage had occurred.

The purpose of purging is to remove stagnant air from the vapor sampling train to ensure representative samples are obtained. The probes were purged using an adjustable vacuum pump set at 200 mL/minute. During purging, the soil gas was monitored for VOC, oxygen, and

carbon dioxide content using a Mini-Rae 2000 multi gas detector to ensure that non-atmospheric formation air was being sampled (**Appendix D**).

After purging three volumes through the system, vapor samples were collected from the probes on September 17, 2020. During sampling, the purge pump was operated at 200 mL/minute, and the vacuum was monitored to ensure it was below 100 in. WC. Vacuum applied below this level helps ensure chemical partitioning from pore water to soil gas and the stress on the air seals are both minimized. The samples were containerized in Tedlar bags which were delivered to the laboratory for analysis. Fresh tubing was used on each sampling train between holes. The soil gas samples were tested for VOC using EPA Method 8260B by A&R Laboratories of Ontario, California.

3.1 Laboratory Results

Results from soil sampling indicated none of the samples selected for analysis had detectable concentrations of petroleum hydrocarbons. These results are summarized in **Table 1A**. The results from near surface soil sampling at 20795 Canada Road indicated low concentrations of DDE and chlordane were detected in one sample (S1-0.5), and low concentrations of arsenic and/or lead were detected in each sample (S1-S4). No mercury was detected in any of the soil samples. The detected concentrations were compared to the Regional Screening Levels (RSLs) for soil which are based on human health risk factors for residential and commercial settings and are commonly used as screening tools. Results indicated none of the concentrations exceeds current residential or commercial screening levels. These result are summarized in **Table 1B**. The laboratory report from soil sampling is included in **Appendix B**.

Results from soil gas sampling indicated one sample had detectable concentrations of chloroform, with 0.21 ug/L in SG2-10. No other VOC was detected in any of the samples. There is no known or suspected source of chloroform at the site. The detected concentrations were compared to the Regional Screening Levels (RSLs) for soil gas which are based on human health risk factors for residential and commercial settings and are commonly used as screening tools. The screening criteria uses defined indoor air concentrations based on human health risk factors that are modified using attenuation factors provided by EPA (0.03) and DTSC (0.001). DTSC policy on which attenuation factor to use is currently under review but our understanding is that the current accepted screening level for commercial applications for chloroform is 0.53 ug/L. The more stringent screening levels (if applied) would be 0.018 ug/L. Results indicated the detected concentration does not exceed the current commercial screening level (although it would exceed the proposed commercial level if applied). Nevertheless, a significant release in the vicinity of the UST area was not identified during this assessment. These results are summarized in **Table 2**. The laboratory report from soil gas sampling is included in **Appendix B**.

4.0 CONCLUSIONS AND RECOMMENDATIONS

The subject site is a mixed use residential-ranch property that includes three adjoining parcels. One of the parcels reportedly had a gasoline UST system, though no records were identified indicating a UST had ever been used at the Property and the results of a geophysical survey indicated only a small anomaly. Another smaller parcel reportedly had been used for pesticide

storage and application as part of a limited agricultural application. Based on these results a subsurface investigation was recommended. The Property is being considered for purchase and re-use as parking. Our understanding is that no future residential use is anticipated for the Property.

In September 2020, Hillmann installed 3 soil borings and soil gas sampling probes in the possible former UST and septic tank areas at 20865 Canada Road, and obtained near surface soil samples from the pesticide use and storage area at 20795 Canada Road. The results from soil sampling indicated no detectable concentrations of petroleum hydrocarbons. Results from soil gas sampling indicated low levels of chloroform, a chemical with no known or suspected use at the Property. The detected chloroform concentration does not exceed current commercial screening levels. The results from pesticide sampling indicated none of the samples had concentrations of OCP, arsenic, lead or mercury that exceed current residential or commercial screening levels.

Based on these results we recommend no further sampling at the site, although if the Property is continued for residential use, additional testing of soil gas may be warranted to ensure that the unexpected chloroform detection does not pose a significant human health threat.

5.0 LIMITATIONS

This Subsurface Investigation was performed in accordance with generally and currently accepted engineering practices and principles; however, the procedures and methodologies used in this investigation are not intended to meet all specific regulatory guidelines as this work was completed as a self-directed effort. Although the data in this report is indicative of subsurface conditions in areas investigated, no further conclusions regarding the absence or presence of subsurface contamination in other areas of the site should be construed or inferred other than those expressly stated in this report. The conclusions made are based on information obtained from field observations, independent laboratory analytical results, and from current and relevant Federal, State, regional, and local agencies.

TABLE 1A
Summary of Petroleum Hydrocarbons Soil Sampling Results (mg/Kg)

Sample ID	TPHg C4-C12	TPHd C13-C22	TPH-Oil C23-C40
Sampled September 15, 2020			
B1-5	ND<0.20	ND<10	ND<25
B1-10	ND<0.20	ND<10	ND<20
B2-5	ND<0.20	ND<10	ND<20
B2-10	ND<0.20	ND<10	ND<20
Residential RSL	***82***	***82***	***82***
Commercial RSL	***420***	***420***	***420***

Notes: ND - Not Detected. EPA Regional Screening Levels (RSLs) are human health risk based screening levels used by EPA and DTSC in residential and commercial settings. The RSL levels for total petroleum hydrocarbons are divided into six non-descript categories that depend on the relative speciation of aromatic and aliphatic hydrocarbons in the source contaminant. The most conservative screening level for petroleum hydrocarbons used. Please refer to lab report for complete results.

TABLE 1B
Summary of Pesticide Soil Sampling Results (mg/Kg)

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
B1 = BOD dilution water is over specifications . The reported result may be biased high.
D = Surrogate recoveries are not calculated due to sample dilution.
E = Estimated value; Value exceeds calibration level of instrument.
H = Analyte was prepared and/or analyzed outside of the analytical method holding time
I = Matrix Interference.
J = Analyte concentration detected between RL and MDL.
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
RL = Reporting Limit, Adjusted by DF
MDL = Method Detection Limit, Adjusted by DF
Qual = Qualifier
Tech = Technician

As regulatory limits change frequently, A & R Laboratories advises the recipient of this report to confirm such limits with the appropriate federal, state, or local authorities before acting in reliance on the regulatory limits provided.

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
B1 = BOD dilution water is over specifications . The reported result may be biased high.
D = Surrogate recoveries are not calculated due to sample dilution.
E = Estimated value; Value exceeds calibration level of instrument.
H = Analyte was prepared and/or analyzed outside of the analytical method holding time
I = Matrix Interference.
J = Analyte concentration detected between RL and MDL.
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
RL = Reporting Limit, Adjusted by DF
MDL = Method Detection Limit, Adjusted by DF
Qual = Qualifier
Tech = Technician

As regulatory limits change frequently, A & R Laboratories advises the recipient of this report to confirm such limits with the appropriate federal, state, or local authorities before acting in reliance on the regulatory limits provided.

For any feedback concerning our services, please contact Jenny Jiang, Project Manager at 951.779.0310. You may also contact Ken Zheng, President at office@arlaboratories.com.

The data and information on this, and other accompanying documents, represent only the sample(s) analyzed and is rendered upon condition that it is not to be reproduced, wholly or in part, for advertising or other purposes without approval from the laboratory.

- [ ] Utility Locating
- [ ] Utility Locating/GPR
- [ ] Other_____

Work Summary - Area Dimensions, Surface Conditions, Subsurface Indications Found, Marking Method, Unlocatable Facilities, Etc.

Attempted to locate possible water tank wthin work area provided by client on site

Utilities: water tank, Unknown

Performed GPR scan to locate unknown positive indications and non conductive utilities throughout designated work area

Provided direction of utilities and possible edges off structures

Marking Methods: (APWA) Uniform Color Code, (CGA) Best Practices

Equipment Used: GPR LMX100, Dowsing Rods

Unable to locate a possible abandoned water tank within the work scope but I did find indications for possibly the residents septic tank measuring 10x12 and possible old water pump foundation near the drive way measuring 2x2

Went over findings and any issues or concerns with onsite contact before departing job

CAUTION

WHEN EXCAVATING WITHIN THE TOLERANCE ZONE (24 INCHES ON EACH SIDE), PERFORM EXCAVATION WITH HAND TOOLS UNTIL THE MARKED FACILITY IS EXPOSED.
FOR CONCRETE AND MASONRY STRUCTURES, DO NOT CUT, CORE OR DRILL WITHIN 3 INCHES OF ANY MARKED INDICATION.

Investigation results provided by C Below, Inc. (CBI), are given in good faith and to the best of our knowledge. However, in the unlikely event that such information proves to be inaccurate, the extent of liability assumed by CBI if any, is limited to the amount billed for labor and materials on the day that the information was provided and alleged to have been inaccurate. The services being provided by CBI do not relieve the Client and/or property owner of the responsibility of having to comply with California Government Code §§4216-4216.9. It is expressly understood by the Client and/or owner that CBI's services are not a substitute for compliance with the California Code §§4216-4216.9. This daily is based on observations made during a walk-through investigation of the property and is not intended to create any sort of warranty and/or certification that the work performed by the contractor and/or subcontractors was completed in compliance with the governing building codes, architectural plans and specifications or contract documents.
Please Note: Certain low-density material such as PVC and plastic conduit may not be located accurately, if at all, using any investigation method. Always use caution when excavating.
