12/6/2019 - This is a redevelopment project at the former Gillig "School Bus" manufacturing facility in Hayward. Soil, soil-vapor, and groundwater samples had been collected from several borings at the property. Sub-slab vapor monitoring points are present, so they can be re-sampled and monitored.

Evaluation Start Date: 20051214
Evaluation Type Description: COMPLIANCE EVALUATION INSPECTION ON-SITE
Violation Short Description: Generators - General
Return to Compliance Date: 20060321
Evaluation Agency: EPA

Handler Summary

Importer Activity: No
Mixed Waste Generator: No
Transporter Activity: No
Transfer Facility: No
Onsite Burner Exemption: No
Furnace Exemption: No
Underground Injection Activity: No
Commercial TSD: No
Used Oil Transporter: No
Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Waste Code Details

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D005
Waste Code Description: BARIUM

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: D008
Waste Code Description: LEAD

Hazardous Waste Code: D018
Waste Code Description: BENZENE

Hazardous Waste Code: F003

Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Handler Name: THERMIONICS METAL PROCESSING, INC.
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report

Waste Code Details

Hazardous Waste Code: 123
Waste Code Description: Unspecified alkaline solution

Hazardous Waste Code: 212

Waste Code Description: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

Hazardous Waste Code: 792
Waste Code Description: Liquids with pH < 2 with metals

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Handler Details

Sequence No: 4
Receive Date: 20040227
Handler Name: THERMIONICS METAL PROCESSING, INC.
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report

Waste Code Details

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Handler Details

Sequence No: 5
Receive Date: 20060227
Handler Name: THERMIONICS METAL PROCESSING, INC.
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report

Waste Code Details

Hazardous Waste Code: 135
Waste Code Description: Unspecified aqueous solution

Hazardous Waste Code: 212
Waste Code Description: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

Hazardous Waste Code: 722
Waste Code Description: Liquids with cadmium > 100 mg/l

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D004
Waste Code Description: ARSENIC

Hazardous Waste Code: D006
Waste Code Description: CADMIUM

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violations

Violation Date: 05/02/2019 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Hayward City Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 06/11/2019. re-orienate site maps for HW treatment, Bay 1 and Bay 2 areas

Violation Description:

Failure to complete and electronically submit a site map with all required content.

Violations

Violation Date: 05/02/2019 ***Violation Source:*** CERS
Violation Program: HWLQG ***Violation Division:*** Hayward City Fire Department
Citation: 22 CCR 15 66265.35 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.35
Violation Notes:

Returned to compliance on 06/11/2019. provide adequate isle space for rear tent storage of HW and raw materials acids and bases - clear isle to rear of shed

Violation Description:

Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.

Violations

Violation Date: 05/02/2019 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Hayward City Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 06/11/2019. facility needs to change incorrect EPA ID number listed on Business Activity form

Violation Description:

Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.

Violations

Violation Date: 05/02/2019 ***Violation Source:*** CERS
Violation Program: HWLQG ***Violation Division:*** Hayward City Fire Department

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Notes:

Returned to compliance on 06/11/2019. Changes container labels from re-use chemicals to hazardous waste chemicals labels

Violation Description:

Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violations

Violation Date: 10/18/2016 ***Violation Source:*** CERS
Violation Program: PBR ***Violation Division:*** Hayward City Fire Department
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Notes:

Returned to compliance on 01/30/2017. Faciliity was granted a third extension for the engineering contractor final the tank assessment

Violation Description:

Failure to include all required information in the tank system assessment.

Violations

Violation Date: 10/18/2016 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Hayward City Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 10/24/2016.

Violation Description:

Failure to establish and electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material.

Violations

Violation Date: 05/02/2019 ***Violation Source:*** CERS
Violation Program: HWLQG ***Violation Division:*** Hayward City Fire Department
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Notes:

Returned to compliance on 06/11/2019. Requested almost empty container associated with FTU -3 to have a lid/closed when not in use

Violation Description:

Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste.
(b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violations

Violation Date: 10/18/2016 ***Violation Source:*** CERS
Violation Program: HWLQG ***Violation Division:*** Hayward City Fire Department
Citation: 22 CCR 15 66265.192(k) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(k)
Violation Notes:

Returned to compliance on 01/30/2017. A third extension was granted because the specialized contractor was not able to begin the tank assessment until Dec. 2016

Violation Description:

Failure to include all required information in the new tank system assessment.

Violations

Violation Date: 05/02/2019 ***Violation Source:*** CERS
Violation Program: HWLQG ***Violation Division:*** Hayward City Fire Department
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Notes:

Returned to compliance on 06/11/2019. 2018 Training records for two employees missing

Violation Description:

Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violations

Violation Date: 10/18/2016 ***Violation Source:*** CERS
Violation Program: PBR ***Violation Division:*** Hayward City Fire Department
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Notes:

Returned to compliance on 01/30/2017. Facility was granted a third extension for the engineering contractor to complete the tank assessment

Violation Description:

Failure to include all required information in the tank system assessment.

Violations

Violation Date: 10/18/2016 ***Violation Source:*** CERS
Violation Program: PBR ***Violation Division:*** Hayward City Fire Department
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Notes:

Returned to compliance on 01/30/2017. facility granted a third extension to finish tank assessment

Violation Description:

Failure to include all required information in the tank system assessment.

Violations

Violation Date: 10/18/2016 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Hayward City Fire Department
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 10/24/2016. Reviewed changes to the site map

Violation Description:

Failure to complete and electronically submit a site map with all required content.

Disadvantaged Community:
Site History:

The site is located at 3111 Depot Road in Hayward, California, near the intersection of Depot Road and Clawiter Road. Land use in this area is industrial and commercial. A site map is attached. Beginning in 1970, East Bay Oil Company used the site as a distribution facility for various refinery products such as alcohols, ketones , and petroleum distillates. Products were stored at the site in underground storage tanks (USTs) and in 55-gallon drums, and re-packaged into retail-sized containers. Bulk storage of chemical products in USTs was phased out in the 1980s, and re-packaging was almost entirely phased out in the 1990s. All site USTs were removed during the late 1980s and 1990s. Current operations consist only of the storage and distribution of petroleum products in their original containers and limited ethyl alcohol re-packaging.

Site History:

The site is located at 3111 Depot Road in Hayward, California, near the intersection of Depot Road and Clawiter Road. Land use in this area is industrial and commercial. A site map is attached.

Beginning in 1970, East Bay Oil Company used the site as a distribution facility for various refinery products such as alcohols, ketones , and petroleum distillates. Products were stored at the site in underground storage tanks (USTs) and in 55-gallon drums, and re-packaged into retail-sized containers. Bulk storage of chemical products in USTs was phased out in the 1980s, and re-packaging was almost entirely phased out in the 1990s. All site USTs were removed during the late 1980s and 1990s. Current operations consist only of the storage and distribution of petroleum products in their original containers and limited ethyl alcohol re-packaging.

Sites from GeoTracker Search - Cleanup Action Report (as of Feb 24, 2020)

Action Type: EXCAVATION
Begin Date: 12/1/1989
Phase:
End Date: 1/1/1990
Description: During the late 1980s and the 1990s, 18 USTs were removed from the site. Contaminated soil observed during UST removals was also removed. Some of the contaminated soil was aerated to acceptable concentrations and used as backfill, while the remainder was transported to a landfill for disposal.
Contaminant Mass Removed:

Case Transfer Summary Form - July 1997

Action Type: Cleanup Action
Action Date: 12/1/1989
Received Issue Date:
Action: Excavation
Doc Link:
Title Description Comments:

During the late 1980s and the 1990s, 18 USTs were removed from the site. Contaminated soil observed during UST removals was also removed. Some of the contaminated soil was aerated to acceptable concentrations and used as backfill, while the remainder was transported to a landfill for disposal.

Action Type: Leak Action
Action Date: 1/2/1965
Received Issue Date:
Action: Leak Reported
Doc Link:

Waste Code Details

Hazardous Waste Code: D000
Waste Code Description: DESCRIPTION

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D038
Waste Code Description: PYRIDINE

Hazardous Waste Code: F002
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

LUST Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

RB Case No: 01-2586
Local Case No:
Begin Date: 2/28/1990
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Local Agency: HAYWARD, CITY OF
CUF Case: NO
Potential COC: Diesel, Gasoline
How Discovered: Tank Closure
Stop Method: Close and Remove Tank
Stop Description:
Case Worker:
File Location:
Potential Media of Concern: Other Groundwater (uses other than drinking water)
How Discovered Description:
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
DWR GW Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:
Site History:

Transfer of oversight from the Hayward Fire Department to the Regional Board 12/30/2013.

Regulatory Activity

Action Type: ENFORCEMENT
Date : 11/21/2014
Action: Closure/No Further Action Letter

Statute:	Clean Air Act
Primary Law/Section:	CAA/42 U.S.C. 7413(c)91)
Citation:	42 U.S.C. 7413(c)91)
Case Details:	

August 8,2006 Azizi was charged in an Indictment with four counts of violating the CAA {42 U.S.C. 7413(c)(1) - failure to comply with work practice standards in violation of the Asbestos - National Emission Standards for Hazardous Air Pollutants (NESHAP)}. CITATION: 42 U.S.C. 7413(c)91) August 27,2008 Azizi was sentenced to 10 months incarceration and ordered to pay a $300 special court assessment. The sentence was arrived after the judge denied the Government's motions for enhancements to the sentencing guideline calculations. May 13rd,2009 One count of the Indictment was dismissed prior to trial. Azizi was found guilty on the remaining three counts.

Case Summary:

Azizi purchased a commercial building in Hayward, California with the intent to demolish it and construct a new building. Following the purchase, Mr. Azizi discovered the building contained asbestos. Rather than hired a licensed asbestos abatement contractor to properly remove and dispose of the asbestos, Azizi hired an unlicensed handyman to commence demolition. In demolishing the building, Mr. Azizi failed to comply with the Federal Clean Air Act regulating the removal of asbestos-containing material.

RP Identification Date: 6/11/2003 12:00:00 AM
GIS Latitude: 37.6383831615
GIS Longitude: -122.1213818233
Data Source: Local Oversight Program Detailed Inventory; Local Oversight Program Inventory

--Details--
Program Element: 5602
Status: 11
Status Desc: Case transferred
Substance: 8006619
Org Name: HFD
Description 1: Case Transferred
Description 2: Not Applicable
Description 3: Gasoline-Automotive (motor gasoline and additives), leaded & unleaded
Description 4: RP Identified & Solvent
Description 5: Other Groundwater affected (uses other than drinking water)
Description 6: Substance released from Underground Storage Tank System

Program Element: 5602
Status: 11
Status Desc: Case transferred
Substance: 8006619
Org Name: OLIVER PARTNERSHIP
Description 1: Case Transferred
Description 2: Property/Fee Title Owner
Description 3: Gasoline-Automotive (motor gasoline and additives), leaded & unleaded
Description 4: RP Identified & Solvent
Description 5: Other Groundwater affected (uses other than drinking water)
Description 6: Substance released from Underground Storage Tank System

Violations

Violation Date: 06/23/2015 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Hayward City Fire Department
Citation: 23 CCR 16 2715(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(a)
Violation Notes:

Returned to compliance on 06/24/2015.

Violation Description:

Failure to submit statement of UST compliance and/or Designated Operator certification.

Violations

Violation Date: 06/20/2018 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Hayward City Fire Department
Citation: 23 CCR 16 2632(d)(1)(c),2641(h),2711(a)(8) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(d)(1)(c),2641(h),2711(a)(8)
Violation Notes:

Returned to compliance on 06/20/2018. Monitoring Site Plan submitted to CERS is incorrect. Tank ID 450-003 is listed as a tank storing gasoline 89 currently thank ID 450-003 stores gasoline 91. Please update and resubmit.

Violation Description:

Failure to submit or maintain a current facility plot plan.

Violations

Violation Date: 06/23/2015 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Hayward City Fire Department
Citation: HSC 6.7 25286(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25286(a)
Violation Notes:

Returned to compliance on 06/24/2015.

Violation Description:

Failure to submit an complete and accurate application for a permit to operate an underground storage tank, or for renewal of the permit.

Violations

Violation Date: 06/26/2019 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Hayward City Fire Department
Citation: 23 CCR 16 2632(d)(1)(c),2641(h),2711(a)(8) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(d)(1)(c),2641(h),2711(a)(8)
Violation Notes:

The tank contents listed for tank 450-003 differ from contents listed on the UST diagram and on site layout of the tanks. CERS indicates that Tank #450-003 Stores midgrade unleaded . Tank 450-003 currently stores Gasoline 91. Facility is to update the tank information and resubmit no later than 07/26/2019.

Violation Description:

Failure to submit or maintain a current facility plot plan.

Violations

Violation Date: 06/26/2019 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Hayward City Fire Department
Citation: 23 CCR 16 2632(c)(2)(A)&(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(c)(2)(A)&(B)
Violation Notes:

Returned to compliance on 06/26/2019. Sensor L11 located in the annular space of tank storing 91 gas , was not working. Technician replaced and tested new sensor.

Violation Description:

Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.

Violations

Violation Date: 06/26/2019 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Hayward City Fire Department
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Notes:

The capacity of the spill buckets for tanks 1,2 (Diesel) and tank 4 (87) is less 5 gallons. These Spill buckets need to be replaced. A Hayward Fire Department permit is required to be obtained prior to perform this job. Spill buckets shall be replaced within 30 days, no later than 06/27/25019.

Violation Description:

"Failure to meet one or more of the following requirements:

Install or maintain a liquid-tight spill container.

Have a minimum capacity of five gallons.

Have a functional drain valve or other method for the removal of liquid from the spill container.

Be resistant to galvanic corrosion.

Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container.

Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer.

Tested by a certified UST service technician.

Maintain records of spill containment testing for 36 months.

"

Violations

Violation Date: 06/20/2018 ***Violation Source:*** CERS
Violation Program: UST ***Violation Division:*** Hayward City Fire Department
Citation: HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286
Violation Notes:

Returned to compliance on 06/20/2018. Tank 1 and 2 are wrongly listed as stand-alone tanks; in reality the are manifold tanks. Please correct and resubmit.

Violation Description:

Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.

Violations

Violation Date: 06/26/2019
Violation Source: CERS
Violation Program: UST
Violation Division: Hayward City Fire Department
Citation: 23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)
Violation Notes:

The tank information/ monitoring Plan submitted o the California Environmental Reporting System (CERS) is incorrect: 1)Tanks 1 &2 indicate audiovisual alarms and/or fill tube Shut-off valve for overfill protection equipment. It shall be fill drop tubes only. 2) The Monitoring plan submitted to CERS indicates that 0.2 GPH monthly test is performed for all tanks. The 0.2 GPH test is not required for the system and this function is disabled in the veeder root panel. 3)The tank contents indicated for tank 450-003 , midgrage unleaded, is incorrect. Content of this tank is 91(Premium). Facility is to update CERS and resubmit no later than 7/26/2019.

Violation Description:

Failure to have an approved UST Monitoring Plan.

Disadvantaged Community:			
Site History:			

Site is an industrial facility, with office space, fabricating rigging machinery, material handling equipment, piping, and structural framing and electrical contractor. The facility operates one 6,000-gallon diesel underground storage tank (UST) and one 10,000-gallon unleaded gasoline UST in addition to using an assortment of hazardous materials. The site is reported to have previously operated a 12,000-gallon and a 10,000-gallon gasoline USTs. A site investigation conducted in 2015 advanced four soil bores for the collection of soil and GG samples and four bores fore the collection of soil vapor samples. Soil concentrations of as gasoline (TPHg), TPH as diesel (TPHd), and TPH as motor oil (TPHmo) and TPH as kerosene (TPHk) were reported

in one sample at concentrations of 54, 230, 150 and 44 mg/kg, respectively. The chlorinated solvent 1,2-cis dichloroethene (cis-1.2-DCE) was reported in one sample at a concentration of 0.088 mg/kg. GGW concentrations of TPHg, TPHd, and TPHmo were reported in one sample at concentrations of 260, 2,600 and 2,800 ug/L, respectively. Several chlorinated solvents (VOCs) were also reported in multiple bores, including cis-1.2-DCE, TCE and vinyl chloride at concentrations up to 65, 24 and 1.6 ug/L, respectively. Soil vapor sample were collected from beneath the main building foundation at depths ranging from 0.9 to 1.3 feet below the base of slab. Numerous petroleum hydrocarbon and chlorinated solvent compounds were reported in the soil vapor samples. A follow up investigation was conducted in 2018 consisting of sampling four each temporary sub-slab and soil vapor probes set at depths of 1.5 to 2.8 feet below top-of-slab and six bores for the collection of soil and GGW samples. Several VOCs were reported at concentrations exceeding the commercial/industrial ESLs, including PCE, TCE, 1,2--DCE and vinyl chloride. TPHg was also report in soil vapor samples. Soil concentrations of TPHd, and TPHmo were reported in all soil samples at concentrations up to 200 and 710 mg/kg, respectively. Petroleum hydrocarbons were reported in one GGW sample - 410 ug/L TPHd. The chlorinated solvents TCE, 1,2--DCE and vinyl chloride were reported in one GGW sample at concentrations of 18, 2.6 and 0.62 ug/L, respectively.

Waste Code Description: Laboratory waste chemicals

Hazardous Waste Code: 741
Waste Code Description: Liquids with halogenated organic compounds > 1000 mg/l

Hazardous Waste Code: 791
Waste Code Description: Liquids with pH < 2

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D003
Waste Code Description: REACTIVE WASTE

Hazardous Waste Code: D022
Waste Code Description: CHLOROFORM

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: F002
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: U044
Waste Code Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Hazardous Waste Code: U154
Waste Code Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Site History:

A referral from the City of Hayward to review the Phase I Environmental Site Assessment Report was received on December 13, 2019. Based on a review of submitted documents/reports, recognized environmental conditions (RECs) were identified at the site, which include, but not limited to, historical land use as farming/agriculture with no evaluation of organochlorine pesticides and metals, hazardous materials storage with no evaluation of hazardous wastes, hazardous materials storage identified at adjacent properties with no evaluation of soil, soil vapor, and groundwater, and transformer identified onsite with no evaluation of shallow soil. On December 18, 2019, ACDEH determined that Environmental Regulatory Oversight is required and issued the Screening Determination.

SAN FRANCISCO BAY RWQCB (REGION 2)

Site History:

A referral from the City of Hayward to review the Phase I Environmental Site Assessment Report was received on December 13, 2019. Based on a review of submitted documents/reports, recognized environmental conditions (RECs) were identified at the site, which include, but not limited to, historical land use as farming/agriculture with no evaluation of organochlorine pesticides and metals, hazardous materials storage with no evaluation of hazardous wastes, hazardous materials storage identified at adjacent properties with no evaluation of soil, soil vapor, and groundwater, and transformer identified onsite with no evaluation of shallow soil. On December 18, 2019, ACDEH determined that Environmental Regulatory Oversight is required and issued the Screening Determination.

Hazardous Waste Code: D039
Waste Code Description: TETRACHLOROETHYLENE

Hazardous Waste Code: D040
Waste Code Description: TRICHLORETHYLENE

Hazardous Waste Code: F001
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F002
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F004
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F006
Waste Code Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Violations

Violation Date: 02/25/2019 **Violation Source:** CERS
Violation Program: APSA **Violation Division:** Hayward City Fire Department
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 03/28/2019. AST2 define overfill prevention and indentify SOPs

Violation Description:

Failure to adequately describe in the SPCC Plan, overfill prevention methods, including a description of the systems or procedures used to prevent overfills for each container.

Violations

Violation Date: 02/25/2019 **Violation Source:** CERS
Violation Program: APSA **Violation Division:** Hayward City Fire Department
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Notes:

Returned to compliance on 03/28/2019. identify that the clarifier is a true oil water separator

Violation Description:

Failure to organize the SPCC Plan so that portions describing procedures to be used when a discharge occurs will be readily usable in an emergency, unless facility submitted a Facility Response Plan.

Violations

Violation Date: 02/25/2019 **Violation Source:** CERS
Violation Program: APSA **Violation Division:** Hayward City Fire Department
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)
Violation Notes:

Returned to compliance on 03/28/2019. amend the contact list

Violation Description:

Failure to include in the SPCC plan an adequate description of employee training. Training shall address, at a minimum: operation and maintenance of equipment to prevent discharges; discharge procedure protocols; applicable pollution control laws, rules, and regulations; general facility operations; content of the facility SPCC plan; and annual discharge prevention briefings for oil-handling personnel to assure adequate understanding of the SPCC plan.

Violations

Violation Date: 02/25/2019 **Violation Source:** CERS
Violation Program: APSA **Violation Division:** Hayward City Fire Department
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)

Violation Notes:

Returned to compliance on 03/28/2019. agreement to amend a number of small elements of the SPCC

Violation Description:

Failure to amend the SPCC Plan within 6 months:
1. When the facility has had a change in design, construction, operation, or maintenance which affects the facility's discharge potential. AND/OR
2. To include more effective proven technology at the time of the 5-year SPCC Plan review and evaluation.

LUST Sites from GeoTracker Search - Regulatory Profile (as of Feb 24, 2020)

Site Facility Name: UNOCAL / TOSCO - FACILITY #6074
Site Facility Type: LUST CLEANUP SITE
Cleanup Status: COMPLETED - CASE CLOSED
Project Status:
WDR Place Type:
WDR File:
WDR Order:
CUF Priority Assig: D
CUF Amount Paid:
Potential COC: GASOLINE
Facility Type:
Composting Method:
Address: 3500 BREAKWATER AVE
City: HAYWARD
Zip: 94545
County: ALAMEDA
CUF Claim: 13661
File Location: LOCAL AGENCY
Designated Beneficial Use: MUN, AGR, IND, PROC
Project Oversight Agencies:
Report Link: https://geotracker.waterboards.ca.gov/profile_report?global_id=T0600101466
Cleanup Status Detail: COMPLETED - CASE CLOSED AS OF 9/27/2010
Cleanup History Link: https://geotracker.waterboards.ca.gov/profile_report_include?global_id=T0600101466&tabname=regulatoryhistory
Potential Media of Concern: OTHER GROUNDWATER (USES OTHER THAN DRINKING WATER)
User Defined Beneficial Use:
DWR GW Sub Basin: Santa Clara Valley - East Bay Plain (2-009.04)
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
Post Closure Site Management:
Future Land Use:
Cleanup Oversight Agencies: HAYWARD, CITY OF (LEAD) - CASE #: 01-1591
CASEWORKER: DANILO M. GALANG
SAN FRANCISCO BAY RWQCB (REGION 2) - CASE #: 01-1591
Gndwater Monitoring Freque:
Designated Beneficial Use Desc: Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply
Site History:

No site history available

Site History:

Electro Forming Co. Hayward (Site) is located at 3435 Enterprise Avenue, Hayward, California. The Site parcel size is approximately 18,600 square feet (sq. ft.) A concrete tilt-up type building (approximately 8,900 sq. ft.) occupies the east side of the parcel. The former exterior storage and parking areas occupy the west side of the parcel. The surrounding area consists of industrial and commercial facilities occupying a light industrial-zoned area that lies approximately 2 miles west of Interstate 880 and 1 mile east of San Francisco Bay.

Metal plating operations were conducted at the Site from approximately 1978 to 2001. The metal plating building contained a plating area, chemical storage area, wastewater treatment units, a polishing room, and shipping and office areas. The former exterior parking and storage yard were used to store surplus equipment and materials.

Soils beneath the Site are characterized by low-permeability clays to a depth of approximately 8 ft. below ground surface (bgs), below which ground water occurs within a thin (1 to 4 ft.) sand lens. This sand lens appears to be continuous across the Site and is underlain by a second clay that extends to the total depth of the investigated soil profile (15 ft. bgs).

Soil impacts are limited to localized detections of cadmium with concentrations above DTSC recommended screening level for commercial/industrial soil. Cadmium exceedances occurred beneath the building concrete foundation. Potential exposure to cadmium in soil is likely limited to future construction workers.

Groundwater impacts are limited to trichloroethene (TCE), which occurred at a relatively uniform concentration (7 to 9 micrograms per liter [µg/L]) across the Site, slightly exceeding the California maximum contaminant level of 5 µg /L.

San Francisco Bay Regional Water Quality Control Board has designated the shallow groundwater at immediately vicinity of the Site as non-potable due to poor ambient water quality and low yield. DTSC considers that the groundwater beneath the Site presents an unacceptable threat to present and future human health or safety or the environment

Sol vapor impacts are limited to TCE and tetrachloroethene (PCE). The highest measured TCE concentration in soil vapor was 6,600 µg /m3 while the highest measured PCE concentration was 1,300 µg /m3. If an attenuation factor of 0.001 is considered, these concentrations lay within the risk management range of 1x 10-4 to 1 x 10-6. When site-specific conditions are considered, including soil properties and onsite building dimensions, estimates of commercial/industrial exposure health risk lay beyond the departure point of 1 x 10-6.

A land use covenant (LUC) is required as part of the site remediation because hazardous wastes or constituents including cadmium, remain in soil above unrestricted cleanup goals at depths of one foot or more below the surface of the Site; and TCE remains in groundwater in and under portions of the Site. LUC recommended remediation includes maintaining a cover ("Cap") over most of the Property. Over time, the Cap as described in the Covenant (concrete, asphalt, and compacted base material) deteriorated losing its effectiveness to prevent dermal contact of impacted soils or restricting surface water percolation.. The Cap was restored in April 2019 to meet Covenant requirements. The Cap was reconditioned with placement of 6-inch thick steel-reinforced concrete. Additionally, all uncovered soil in the external area of the Property was also covered with the placement of 6-inch thick steel-reinforced concrete.

No activities that will disturb the soil at or below the Cap (e.g., excavation, grading, removal, trenching, filling, earth movement, mining, or drilling) shall be allowed on the Site without a Soil Management Plan approved by the DTSC in advance.

Title: FY 19/20 Land Use Restriction Site Inspection
Title Link: http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=71003321&enforcement_id=60474131
Area Name:
Area Link:

Sub Area:
Sub Area Link:
Document Type: Land Use Restriction - Site Inspection/Visit
Date Completed: 1/16/2020
Comments: On February 14, 2018, DTSC issued a comment letter on the 2017 Land Use Covenant (LUC) Annual Inspection Report (Report). The comment letter noted that photographs included in the Report showed apparent deterioration of pavement (Cap) on the eastern side of the Property.

The Cap was restored in circa April 2019 to meet LUC requirements. The Cap was reconditioned with placement of 6-inch thick steel-reinforced concrete. Additionally, all uncovered soil in the external area of the Property was covered with the placement of 6-inch thick steel-reinforced concrete.

Based on the 2020 LUC inspection, the Cap meets the provisions of the LUC and is currently effective by protecting public health and the environment. If minor cracking worse over time, DTSC recommends that sealants such as epoxy resins, asphaltic material, thermoplastics, silicone, etc. may be placed over cracking as corrective measure to retain Cap and swales effectiveness and level of protection.

Sub Area:
Sub Area Link:
Document Type: Land Use Restriction Monitoring Report
Date Completed: 2/19/2020
Comments: The Report provides observations of an annual inspection conducted at the Site on February 12, 2020.

The purpose of the LUC annual inspection is to verify compliance with the Covenant to Restrict Use of the Property, executed on April 09, 2014 and recorded with Alameda County.

Based on the information provided in the Report, the Site complies with the restrictions and requirements of the LUC.

UNDER INVESTIGATION

Site History:

Electro Forming Co. Hayward (Site) is located at 3435 Enterprise Avenue, Hayward, California. The Site parcel size is approximately 18,600 square feet (sq. ft.) A concrete tilt-up type building (approximately 8,900 sq. ft.) occupies the east side of the parcel. The former exterior storage and parking areas occupy the west side of the parcel. The surrounding area consists of industrial and commercial facilities occupying a light industrial-zoned area that lies approximately 2 miles west of Interstate 880 and 1 mile east of San Francisco Bay.

Metal plating operations were conducted at the Site from approximately 1978 to 2001. The metal plating building contained a plating area, chemical storage area, wastewater treatment units, a polishing room, and shipping and office areas. The former exterior parking and storage yard were used to store surplus equipment and materials.

Soils beneath the Site are characterized by low-permeability clays to a depth of approximately 8 ft. below ground surface (bgs), below which ground water occurs within a thin (1 to 4 ft.) sand lens. This sand lens appears to be continuous across the Site and is underlain by a second clay that extends to the total depth of the investigated soil profile (15 ft. bgs).

Soil impacts are limited to localized detections of cadmium with concentrations above DTSC recommended screening level for commercial/industrial soil. Cadmium exceedances occurred beneath the building concrete foundation. Potential exposure to cadmium in soil is likely limited to future construction workers.

Groundwater impacts are limited to trichloroethene (TCE), which occurred at a relatively uniform concentration (7 to 9 micrograms per liter [µg/L]) across the Site, slightly exceeding the California maximum contaminant level of 5 µg /L.

San Francisco Bay Regional Water Quality Control Board has designated the shallow groundwater at immediately vicinity of the Site as non-potable due to poor ambient water quality and low yield. DTSC considers that the groundwater beneath the Site presents an unacceptable threat to present and future human health or safety or the environment

Sol vapor impacts are limited to TCE and tetrachloroethene (PCE). The highest measured TCE concentration in soil vapor was 6,600 µg /m3 while the highest measured PCE concentration was 1,300 µg /m3. If an attenuation factor of 0.001 is considered, these concentrations lay within the risk management range of 1x 10-4 to 1 x 10-6. When site-specific conditions are considered, including soil properties and onsite building dimensions, estimates of commercial/industrial exposure health risk lay beyond the departure point of 1 x 10-6.

A land use covenant (LUC) is required as part of the site remediation because hazardous wastes or constituents including cadmium, remain in soil above unrestricted cleanup goals at depths of one foot or more below the surface of the Site; and TCE remains in groundwater in and under portions of the Site. LUC recommended remediation includes maintaining a cover ("Cap") over most of the Property. Over time, the Cap as described in the Covenant (concrete, asphalt, and compacted base material) deteriorated losing its effectiveness to prevent dermal contact of impacted soils or restricting surface water percolation.. The Cap was restored in April 2019 to meet Covenant requirements. The Cap was reconditioned with placement of 6-inch thick steel-reinforced concrete. Additionally, all uncovered soil in the external area of the Property was also covered with the placement of 6-inch thick steel-reinforced concrete.

No activities that will disturb the soil at or below the Cap (e.g., excavation, grading, removal, trenching, filling, earth movement, mining, or drilling) shall be allowed on the Site without a Soil Management Plan approved by the DTSC in advance.

Sub Area Link:
Document Type: Land Use Restriction - Site Inspection/Visit
Date Completed: 1/16/2020
Comments: On February 14, 2018, DTSC issued a comment letter on the 2017 Land Use Covenant (LUC) Annual Inspection Report (Report). The comment letter noted that photographs included in the Report showed apparent deterioration of pavement (Cap) on the eastern side of the Property.

The Cap was restored in circa April 2019 to meet LUC requirements. The Cap was reconditioned with placement of 6-inch thick steel-reinforced concrete. Additionally, all uncovered soil in the external area of the Property was covered with the placement of 6-inch thick steel-reinforced concrete.

Based on the 2020 LUC inspection, the Cap meets the provisions of the LUC and is currently effective by protecting public health and the environment. If minor cracking worse over time, DTSC recommends that sealants such as epoxy resins, asphaltic material, thermoplastics, silicone, etc. may be placed over cracking as corrective measure to retain Cap and swales effectiveness and level of protection.

HALOGENATED SOLVENTS

Site History:

The site is the former location of Xerox Company's electronics manufacturing operations. Xerox stopped operating at this facility in 1989 but still owns the property. Volatile organic compounds (VOCs) were detected in site soils and groundwater underneath the facility during an environmental audit in February 1988. Contamination was suspected to have resulted from surface spills during routine facility operations.

Status: NO FURTHER ACTION

Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

RB Case No: 01S0585
Local Case No:
Begin Date: 11/22/2002
Stop Method: Close and Fill Tank in Place
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Local Agency:
Potential COC: * Metals/Heavy Metals - Chromium 6
Potential Media of Concern: Other Groundwater (uses other than drinking water), Soil
How Discovered: Other Means
How Discovered Description:
Stop Description:
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
DWR GW Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:
CUF Case: NO
Case Worker: NF
File Location: Regional Board
Site History:

The Site is located approximately 1+ miles east of the San Francisco Bay shoreline and + mile east of marshlands and salt evaporation ponds. The Site and surrounding land use is commercial/industrial, and is anticipated to remain so in the future. A large building located near the center of the Site is used by a construction company for storage, maintenance, and office space. Two abandoned sumps (dip tanks) used by a former Site tenant for chrome plating operations are located within the northwestern portion of the building. The dip tanks were filled with soil and paved over with cement by the current Site owner. The remainder of the Site was paved by the current Site owner and is used as an outdoor storage yard for construction equipment. The western portion of the property and a narrow easement along the northern border of the Site is leased by a third party for storage of mobile containers and trailers.

RB Case No:
CUF Case: NO
Local Case No: RO0003246
Case Worker: DY
Begin Date: 6/1/2017
File Location: All Files are on GeoTracker or in the Local Agency Database
Stop Method: Other Means
Lead Agency: ALAMEDA COUNTY LOP
Local Agency: ALAMEDA COUNTY LOP
Potential COC: Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride, Total Petroleum Hydrocarbons (TPH)
Potential Media of Concern: Other Groundwater (uses other than drinking water), Soil, Soil Vapor
How Discovered: Site Assessment/Site Investigation
How Discovered Description:
Stop Description:
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
DWR GW Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:
Site History:

The site is located in a commercial/light industrial area of Hayward and consists of two parcels currently developed as an office/warehouse which produces organic hummus and other similar types of dips and spreads. A railroad spur is located on APN 439-100-5-1 in the southern portion of the property. The warehouse is located on APN 439-100-5-2 with asphalt and concrete parking areas with modest landscaping located to the north and east, respectively. Historical records indicate the property remained structurally undeveloped until the late 1970s. Subsequent to site development, operations at the site included a trade school, printing company, and golf club manufacturing. Building improvements including the installation of new piping and utilities was completed by the current property owner after the site was purchased from the golf manufacturing company in 2008. Two Phase I environmental site assessments (ESAs) were prepared for the site during May 2008 and September 2016, respectively. Based on discussions with ACDEH, the 2008 Phase I was performed prior to the property transaction between Orlimar Golf Company (Orlimar), a gold club manufacturing company and the current owner. Results of the first 2008 ESA indicated Orlimar was documented under the resource conservation and recovery act (RCRA) hazardous waste generator database. However, conclusions presented in the ESA indicated that recognized environmental concerns (REC) were not identified for soil and groundwater and additional subsurface investigations were not warranted. Results of the second 2016 ESA indicated Orlimar occupied the site from the early 1980s through the late 1990s and conducted operations which included the use and storage of hazardous materials (.i.e. petroleum, lacquer thinner, and halogenated solvents), the operation of a degreaser, and the generation of hazardous waste. Additionally, inspection records from between the 1980s and 1990s indicated hazardous materials were stored inside and outside of the site without secondary containment. Two subsurface investigations have been conducted at the site without regulatory oversight during Q4 2016 and Q1 2017, respectively. The first 2016 investigation included the collection of soil, grab groundwater, and soil vapor samples. Soil results indicated low concentrations of Total Petroleum Hydrocarbons as diesel (TPH-d) and TPH as motor oil (TPH-mo), up to 1.7 milligrams per kilogram [mg/kg] TPH-d and 30 mg/kg TPH-mo. Grab groundwater samples indicated TPH-d was reported up to 150 micrograms per liter (ug/l) and TPH-mo up to 3,100 ug/l. Silica Gel Cleanup (SGC) does not appear to have been conducted on the extractable hydrocarbon analysis. A concentration of 64 ug/l of Trichloroethene (TCE) was also detected in grab groundwater sample located in proximity to the former hazardous materials storage compound location. TCE was also detected in one soil vapor sample at a very low concentration of 3.1 micrograms per cubic meter (ug/m3) near the southern edge of the parcel, a substantial distance from TCE reported in groundwater. The second subsurface investigation included the collection of soil, groundwater, and soil vapor samples. One groundwater monitoring well was installed at the reported location of the former hazardous material compound. Results indicated indoor air samples were all below applicable Environmental Screening Levels (ESLs) for commercial indoor air ôDirect Exposure Human Health Risk Levelsö as promulgated by the San Francisco Bay Regional Water Quality Control Board (RWQCB), but were above the residential ôDirect Exposure Human Health Risk Levelsö ESLs. Soil samples collected during the installation of the monitoring well detected up to 1,336 mg/kg TPH-mo at a depth of two feet below grade surface (bgs). Groundwater concentrations up to 44.9 ug/l TCE and 11.4 ug/l of cis-1,2-Dichloroethene (cis 1,2 DCE) were detected. Both concentrations are below applicable commercial ôGroundwater Vapor Intrusion Human Health Risk Levelsö ESLs; however, only one monitoring event has occurred. Subsequent investigation activities have been requested by ACDEH to evaluate subsurface soil gas conditions under the building footprint and evaluate human health risk from vapor intrusion to indoor air.

Site History:

The site is located in a commercial/light industrial area of Hayward and consists of two parcels currently developed as an office/warehouse which produces organic hummus and other similar types of dips and spreads. A railroad spur is located on APN 439-100-5-1 in the southern portion of the property. The warehouse is located on APN 439-100-5-2 with asphalt and concrete parking areas with modest landscaping located to the north and east, respectively. Historical records indicate the property remained structurally undeveloped until the late 1970s. Subsequent to site development, operations at the site included a trade school, printing company, and golf club manufacturing. Building improvements including the installation of new piping and utilities was completed by the current property owner after the site was purchased from the golf manufacturing company in 2008.

Two Phase I environmental site assessments (ESAs) were prepared for the site during May 2008 and September 2016, respectively. Based on discussions with ACDEH, the 2008 Phase I was performed prior to the property transaction between Orlimar Golf Company (Orlimar), a gold club manufacturing company and the current owner. Results of the first 2008 ESA indicated Orlimar was documented under the resource conservation and recovery act (RCRA) hazardous waste generator database. However, conclusions presented in the ESA indicated that recognized environmental concerns (REC) were not identified for soil and groundwater and additional subsurface investigations were not warranted. Results of the second 2016 ESA indicated Orlimar occupied the site from the early 1980s through the late 1990s and conducted operations which included the use and storage of hazardous materials (.i.e. petroleum, lacquer thinner, and halogenated solvents), the operation of a degreaser, and the generation of hazardous waste. Additionally, inspection records from between the 1980s and 1990s indicated hazardous materials were stored inside and outside of the site without secondary containment.

Two subsurface investigations have been conducted at the site without regulatory oversight during Q4 2016 and Q1 2017, respectively. The first 2016 investigation included the collection of soil, grab groundwater, and soil vapor samples. Soil results indicated low concentrations of Total Petroleum Hydrocarbons as diesel (TPH-d) and TPH as motor oil (TPH-mo), up to 1.7 milligrams per kilogram [mg/kg] TPH-d and 30 mg/kg TPH-mo. Grab groundwater samples indicated TPH-d was reported up to 150 micrograms per liter (ug/l) and TPH-mo up to 3,100 ug/l. Silica Gel Cleanup (SGC) does not appear to have been conducted on the extractable hydrocarbon analysis. A concentration of 64 ug/l of Trichloroethene (TCE) was also detected in grab groundwater sample located in proximity to the former hazardous materials storage compound location. TCE was also detected in one soil vapor sample at a very low concentration of 3.1 micrograms per cubic meter (ug/m3) near the southern edge of the parcel, a substantial distance from TCE reported in groundwater.

The second subsurface investigation included the collection of soil, groundwater, and soil vapor samples. One groundwater monitoring well was installed at the reported location of the former hazardous material compound. Results indicated indoor air samples were all below applicable Environmental Screening Levels (ESLs) for commercial indoor air "Direct Exposure Human Health Risk Levels" as promulgated by the San Francisco Bay Regional Water Quality Control Board (RWQCB), but were above the residential "Direct Exposure Human Health Risk Levels" ESLs. Soil samples collected during the installation of the monitoring well detected up to 1,336 mg/kg TPH-mo at a depth of two feet below grade surface (bgs). Groundwater concentrations up to 44.9 ug/l TCE and 11.4 ug/l of cis-1,2-Dichloroethene (cis 1,2 DCE) were detected. Both concentrations are below applicable commercial "Groundwater Vapor Intrusion Human Health Risk Levels" ESLs; however, only one monitoring event has occurred.

Subsequent investigation activities have been requested by ACDEH to evaluate subsurface soil gas conditions under the building footprint and evaluate human health risk from vapor intrusion to indoor air.

RB Case No: 01S0440 ***CUF Case:*** NO
Local Case No: ***Case Worker:***

Begin Date: 2/1/1996 **File Location:** Regional Board
Stop Method: Other Means
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Local Agency:
Potential COC:
Potential Media of Concern:
How Discovered: Other Means, Site Assessment/Site Investigation
How Discovered Description:
Stop Description:
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
DWR GW Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:
Site History:

Sample data indicate that shallow groundwater beneath the property is impacted with the solvent 1,1 dichloroethylene (DCE). The maximum concentraiton of DCE was 120 ug/L whcih exceeds the drinking water standard of 6.0 ug/L. Low levels of DCE were also detected in shallow soil samples collected from the site (maximum 120 ug/kg).

File Location: Regional Board

Site History:

From 1963 to 1997, White Cap (formerly Continental White Cap) manufactured container closures at 24493 Clawiter Road. The manufactured products consisted of metal caps, typically for glass food and beverage containers. Hazardous materials were managed and released during this period, including paint thinners. The site is currently operated by Con-X-Tech to fabricate structural steel. Areas of soil impact were primarily associated with releases of paint thinners from six underground tanks and a dry sump. Shallow groundwater was impacted in the areas of soil contamination, extending a short distance in the direction of groundwater flow (southwest). Chemicals of concern include xylenes and ethylbenzene. In 1990 and 1991, White Cap removed all six underground tanks and the dry sump from the site and overexcavated contaminated soil. Since 1991, White Cap has operated soil vapor and groundwater extraction and treatment systems. Since 2000, the White Cap has conducted insitu (in-place) bioremediation treatment at various portions of the site. White Cap continues to operate soil vapor and groundwater extraction and treatment systems, along with insitu bioremediation systems, at the release areas on the northern portion of the site. White Cap continues to conduct periodic monitoring at the site. It is expected that these activities will continue until drinking water standards are reestablished in onsite groundwater and Water Board concurrence is provided to terminate treatment and monitoring. Treatment activities are anticipated to be completed in 2011.

Site History:

From 1963 to 1997, White Cap (formerly Continental White Cap) manufactured container closures at 24493 Clawiter Road. The manufactured products consisted of metal caps, typically for glass food and beverage containers. Hazardous materials were managed and released during this period, including paint thinners. The site is currently operated by Con-X-Tech to fabricate structural steel. Areas of soil impact were primarily associated with releases of

paint thinners from six underground tanks and a dry sump. Shallow groundwater was impacted in the areas of soil contamination, extending a short distance in the direction of groundwater flow (southwest). Chemicals of concern include xylenes and ethylbenzene. In 1990 and 1991, White Cap removed all six underground tanks and the dry sump from the site and overexcavated contaminated soil. Since 1991, White Cap has operated soil vapor and groundwater extraction and treatment systems. Since 2000, the White Cap has conducted insitu (in-place) bioremediation treatment at various portions of the site. White Cap continues to operate soil vapor and groundwater extraction and treatment systems, along with insitu bioremediation systems, at the release areas on the northern portion of the site. White Cap continues to conduct periodic monitoring at the site. It is expected that these activities will continue until drinking water standards are reestablished in onsite groundwater and Water Board concurrence is provided to terminate treatment and monitoring. Treatment activities are anticipated to be completed in 2011.

Sites from GeoTracker Search - Cleanup Action Report (as of Feb 24, 2020)

Action Type: SOIL VAPOR EXTRACTION (SVE) ***Begin Date:*** 1/1/1991
Phase: Water ***End Date:***
Description: Since 1991, White Cap has operated soil vapor and groundwater extraction and treatment systems, removing approximately 3,000 pounds of contaminants. The contaminants have been removed from the former dry sump area and former waste thinner tanks area on the northern portion of the site. White Cap continues to operate soil vapor and groundwater extraction and treatment systems, along with insitu bioremediation systems, at the release areas on the northern portion of the site.
Contaminant Mass Removed: 3,000 Pounds

Action Type: IN SITU BIOLOGICAL TREATMENT ***Begin Date:*** 1/1/2000
Phase: Water ***End Date:***
Description: Since 2000, the White Cap has conducted insitu (in-place) bioremediation treatment at various portions of the site, including the former dry sump and underground tank areas on the northern portion of the site, along with selected areas on the southern portion of the site. To date, bioremediation has mineralized (destroyed) approximately 1,000 pounds of contaminants. White Cap continues to operate soil vapor and groundwater extraction and treatment systems, along with insitu bioremediation systems, at the release areas on the northern portion of the site.
Contaminant Mass Removed: 1,000 Pounds

Action Type: EXCAVATION ***Begin Date:*** 12/31/1990
Phase: Soil ***End Date:*** 12/31/1990
Description: In 1990 and 1991, White Cap removed all six underground tanks and the dry sump from the site and overexcavated contaminated soil. The tanks were disposed at the Erickson Environmental facility in Richmond CA. Approximately 700 cubic yards of soil were treated onsite using landfarm techniques, subsequently tested, and upon Water Board approval, reused onsite.
Contaminant Mass Removed:

SLIC Program for Recovery of Oversight

Action Type: Cleanup Action
Action Date: 1/1/2000
Received Issue Date:
Action: In Situ Biological Treatment
Doc Link:
Title Description Comments:

Since 2000, the White Cap has conducted insitu (in-place) bioremediation treatment at various portions of the site, including the former dry sump and underground tank areas on the northern portion of the site, along with selected areas on the southern portion of the site. To date, bioremediation has mineralized (destroyed) approximately 1,000 pounds of contaminants. White Cap continues to operate soil vapor and groundwater extraction and treatment systems, along with insitu bioremediation systems, at the release areas on the northern portion of the site.

Action: Soil Vapor Extraction (SVE)
Doc Link:
Title Description Comments:

Since 1991, White Cap has operated soil vapor and groundwater extraction and treatment systems, removing approximately 3,000 pounds of contaminants. The contaminants have been removed from the former dry sump area and former waste thinner tanks area on the northern portion of the site. White Cap continues to operate soil vapor and groundwater extraction and treatment systems, along with insitu bioremediation systems, at the release areas on the northern portion of the site.

Action Type: Cleanup Action
Action Date: 12/31/1990
Received Issue Date:
Action: Excavation
Doc Link:
Title Description Comments:

In 1990 and 1991, White Cap removed all six underground tanks and the dry sump from the site and overexcavated contaminated soil. The tanks were disposed at the Erickson Environmental facility in Richmond CA. Approximately 700 cubic yards of soil were treated onsite using landfarm techniques, subsequently tested, and upon Water Board approval, reused onsite.

RB Case No: 01-1877
Local Case No:
Begin Date: 11/30/1988
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Local Agency:
CUF Case: NO
Potential Media of Concern: Other Groundwater (uses other than drinking water), Under Investigation
How Discovered Description:
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
DWR GW Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:
Site History:
Potential COC: Waste Oil / Motor / Hydraulic / Lubricating
How Discovered: Tank Closure
Stop Method:
Stop Description:
Case Worker:
File Location:

See SCP case No. 01S0534 - same property This case is closed administratively on 4/21/2010. The LUST is addressed as part of the SCP case #01S0534.

File Name:	Year-2009
Notes:	SECTION 10.A.1.D. THE SITE IS A SHORT-TERM GENERATOR. THE WASTE ACTIVITY THAT TRIGGERED LQG STATUE IN 2009 WAS NOT FROM ON-GOING PROCESSES, BUT WAS DUE TO A ONE-TIME EVENT (DISCONTINUATION OF A RAW MATERIAL - FORMALDEHYDE - WHICH REQUIRED FLUSHING OF CONTAMINATED PROCESS EQUIPMENT AND RESULTED IN THE GENERATION OF U122 WASTE). ***Note: many records provided by the department have a truncated [NOTES] field.

Cleanup Sites from GeoTracker Cleanup Sites Data Download - Facilities Detail

RB Case No: 01S0390
Local Case No:
Begin Date: 2/1/1996
Stop Method: Other Means
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Local Agency:
Potential COC: Other Solvent or Non-Petroleum Hydrocarbon
Potential Media of Concern: Other Groundwater (uses other than drinking water)
How Discovered: Other Means, Site Assessment/Site Investigation
How Discovered Description:
Stop Description:
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
DWR GW Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:
Site History:
CUF Case: NO
Case Worker:
File Location: Regional Board

Volatile organic compounds (VOCs) detected in groundwater underlying the site appear to originate from upgradient sources. Because of this , and because the VOC concentrations in the on-site wells show a decreasing trend, no further action for the site was recommended by the Water Board in its letter dated August 9, 1996. On December 30, 1996, monitoring wells MW-1, MW-2, and MW-4 were destroyed, leaving in-place on-site well MW-3 and off-site well MW-5 for the upgradient property owner of 3201 Investment Boulevard, Hayward to include in their monitoring program.

Potential COC: Tetrachloroethylene (PCE), Diesel, Waste Oil / Motor / Hydraulic / Lubricating
Potential Media of Concern: Other Groundwater (uses other than drinking water), Soil Vapor
How Discovered:
How Discovered Description:
Stop Description:
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
DWR GW Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:
Site History:

The site was used for precast concrete panel manufacturer for 40+ years. The current use of the Site is commercial, light industrial with two slab on grade tilt up buildings and open, non-paved areas for strorage and handling of materials. Phase 1 reports historical above ground fuel tank enclosed on site as well as minor drum storage of unknown compounds on a concrete contained and covered storage pad. PCE and TPH (diesel and motor oil) has been detected in soil and groundwater.

RB Case No: 01S0160
Local Case No:
Begin Date: 3/8/2001
CUF Case: NO
Case Worker: UUU
File Location: All Files are on GeoTracker or in the Local Agency Database

Stop Method:
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Local Agency:
Potential COC: Tetrachloroethylene (PCE), Trichloroethylene (TCE), Freon
Potential Media of Concern: Other Groundwater (uses other than drinking water)
How Discovered:
How Discovered Description:
Stop Description:
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
DWR GW Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:
Site History:

The site, located in a light industrial area, is bordered by light industries to the north, Depot Road a block,to the south, Southern Pacific Railroad and industrial facilities to the east, and automotive repair facilities to the west. PCE and TCE contamination in groundwater was discovered at the site due to investigations carried out due to a property transaction. The PCE and TCE contamination was determined to be due to migration of contaminated groundwater onto the site from two upgradient sources. Other contaminants discovered on the site were at levels low enough that no further action was required.

Potential Contamin of Concern:

CONTAMINATED SOIL, HYDROCARBON SOLVENTS, WASTE POTENTIALLY CONTAINING DIOXINS

Site History:

The Les McDonald Construction Company (LMCC) was located at 3500 Enterprise Avenue in Hayward, California during the 1980's. LMC later moved its operations to 150 Sloan Court in Tracy, California in January 1994. The property is currently owned by Joe and Dennis Vandera and is occupied by MAG Trucking (MAG), which uses the facility for truck maintenance. In 1988, a site screening completed for LMCC revealed that site soils were contaminated with diesel which probably resulted from an isolated incident involving a broken fuel hose on a piece of heavy equipment. Sampling indicated the presence of diesel in consentrations from 540 ppm to 1500 ppm and subsequent remediaton took place under HFD oversight. The Hayward Fire Department's (HFD) file also indicates that LMCC had two underground storage tanks (USTs) in 1986. One of the tanks containing waste oil, was abandoned in place in 1988, under HFD oversight. Soil sampling during the UST abandonment indicated the absence of leakage, based on non-detectable sample results. According to LMCC's Hazardous Management Business Plan, hazardous materials used or stored on-site included hydrocarbon solvents, oxygen, acetylene and enamel thinner. MAG, the site's current occupant, has a hazardous materials storage permit on file with HFD.

RB Case No: 01S0685
Local Case No:
Begin Date: 1/1/1984
Stop Method: Change Operating Procedures, Close and Remove Tank, Remove Contents
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)
Local Agency:
Potential COC: * Solvents, Other Solvent or Non-Petroleum Hydrocarbon, Xylene, * Metals, Diesel, Gasoline
Potential Media of Concern: Other Groundwater (uses other than drinking water)
How Discovered: * Other Means
How Discovered Description: ON 9/6/02, AN IRON OXIDE PIGMENT RESIDUE, WHICH WAS BEING CLEANED, WAS ACCIDENTALLY RELEASED AT QSI FACILITY AND ENTERED STORM DRAIN. THE SPILL AREA WAS ISOLATED AND THE IMPACTED MATERIAL WAS CLENAUP UP. THE STORM SEWER WAS FLUSED TO REMOVE THE IRON OXID
Stop Description: Qualawash facility closed and equipment transported to Quala's Richmond California facility.
Calwater Watershed Name: South Bay - East Bay Cities (204.20)
DWR GW Subbasin Name: Santa Clara Valley - East Bay Plain (2-009.04)
Disadvantaged Community:
Site History:

The prior property owner, Clearance J. Perry, owner and operator of Clearance J. Perry Truck Yard (aka C.J. Perry Trucking) stored trucks and repaired vehicles in the garage/shop at the Site from 1973 to 1979. The business had two single-walled steel underground storage tanks (USTs) a 1,000 gallon and 8,000 gallon for diesel fuel, located at north east side of the garage/shop and in alignment with the driveway entrance. Sometime after 1984, in order to avoid tank monitoring requirements, the USTs were removed without notification or regulatory oversight. The USTs were reportedly transported to an undisclosed location in Pittsburg, California. In 1987, Odyssey Transportation occupied the Site and reportedly installed the wash rack building to the north of the garage/shop building. From 1987 to 2003, the Site was occupied by Quala Systems Inc. (QSI) and its predecessors Nubulk, Inc. and Odessy Transportation operated a commercial cargo tank cleaning company decontaminated and cleaned empty chemical tank trailers and bulk storage containers. These operations generated hazardous wastes (i.e., spent aromatic hydrocarbon based solvents, and residual solids) from the tank cleaning processes. These wastes were drummed for offsite disposal. Products commonly cleaned from tanks included organic chemicals, such as flammable resins, solvents, alcohols, cresols, aniline, naphthalene, and phenols. The residual products emptied from the tanks were ignitable, corrosive, or toxic. Aromatic hydrocarbon-based solvents were used to facilitate the removal of residual materials from tanks. Steam cleaning, overspills onto unpaved ground surfaces, lack of containment and poor housekeeping practices impacted the soil, groundwater, storm drains and a nearby creek. Operational areas have the highest concentrations of volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), total petroleum hydrocarbons (TPH), and metals.

HAYWARD, CITY OF

Site History:

The prior property owner, Clearance J. Perry, owner and operator of Clearance J. Perry Truck Yard (aka C.J. Perry Trucking) stored trucks and repaired vehicles in the garage/shop at the Site from 1973 to 1979. The business had two single-walled steel underground storage tanks (USTs) a 1,000 gallon and 8,000 gallon for diesel fuel, located at north east side of the garage/shop and in alignment with the driveway entrance. Sometime after 1984, in order to avoid tank monitoring requirements, the USTs were removed without notification or regulatory oversight. The USTs were reportedly transported to an undisclosed location in Pittsburg, California.
In 1987, Odyssey Transportation occupied the Site and reportedly installed the wash rack building to the north of the garage/shop building. From 1987 to 2003, the Site was occupied by Quala Systems Inc. (QSI) and its predecessors Nubulk, Inc. and Odessy Transportation operated a commercial cargo tank cleaning company decontaminated and cleaned empty chemical tank trailers and bulk storage containers. These operations generated hazardous wastes (i.e., spent aromatic hydrocarbon based solvents, and residual solids) from the tank cleaning processes. These wastes were drummed for offsite disposal. Products commonly cleaned from tanks included organic chemicals, such as flammable resins, solvents, alcohols, cresols, aniline, naphthalene, and phenols. The residual products emptied from the tanks were ignitable, corrosive, or toxic. Aromatic hydrocarbon-based solvents were used to facilitate the removal of residual materials from tanks. Steam cleaning, overspills onto unpaved ground surfaces, lack of containment and poor housekeeping practices impacted the soil, groundwater, storm drains and a nearby creek. Operational areas have the highest concentrations of volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), total petroleum hydrocarbons (TPH), and metals.

Sites from GeoTracker Search - Cleanup Action Report (as of Feb 24, 2020)

Action Type: OTHER (USE DESCRIPTION FIELD) ***Begin Date:*** 1/1/1984
Phase: ***End Date:***
Description: REPORTEDLY IN 1984, 2 UNDERGROUND STORAGE TANKS WERE REMOVED.
Contaminant Mass Removed:

Action Type: EXCAVATION ***Begin Date:*** 9/11/2002
Phase: Soil ***End Date:***
Description: STAINED SOIL RELATED TO OVERFILLING OF WASTEWATER STORAGE TRAILERS ON NORTH SIDE OF WASH RAKE. TPH AS OIL AND GREASE, NAPTHALENE, AND COBALT IMPACTED SOIL TRASPORTED TO ALTAMONT LANDFILL, LIVERMORE
Contaminant Mass Removed:

Action Type: EXCAVATION ***Begin Date:*** 9/2/2002
Phase: Soil, Other (See Description) ***End Date:*** 10/26/2002
Description: Soil cleanup to address soil impacted from overfilling at the wastewater storage trailers located on the north side of the tank wash rack area. Rinse water from cleanup of the September 2002 iron oxide pigment release southwest of the wash rack and maintenance buildings which flowed into the storm sewer and contaminated the Alameda County Floor Control and a nearby creek.
Contaminant Mass Removed: 60 Tons

Past Use that Caused Contam: PHOTOGRAPHIC PROCESSING
Potential Media Affected: OTHER GROUNDWATER AFFECTED (USES OTHER THAN DRINKING WATER)
Potential Contamin of Concern:

NICKEL, TETRACHLOROETHYLENE (PCE), TRICHLOROETHYLENE (TCE)

Site History:

The Site has historically been used for photoprocessing operations starting in 1965 and was non-occupied ranch land prior. The Site was constructed in 1965 by Bennet Photo Service, Inc., and sold to Drewry Photocolor, then Trucolor Foto Co., with Fujifilm USA purchasing the Site in 1994. Soil samples and grab groundwater samples were collected. Chemical found at the site include: volatile organic compounds (VOCs), total petroleum hydrocarbon as gasoline, cyanide, pH, California Title 22 Metals, hexavalent chromium and total dissolved solids. When detected soil and groundwater concentrations were compared against the environmental screening levels (ESLs) established by the San Francisco Bay RWQCB, this assessment did not indicate an environmental concern for the Site's soil; however, the grab groundwater samples collected contained concentrations of a few constituents exceeding State MCLs, but below non-drinking water standards, with nickel identified as the primary constituent of concern.

Status: CERTIFIED O&M - LAND USE RESTRICTIONS ONLY - LAND USE RESTRICTIONS
Program Type: VOLUNTARY CLEANUP

Site History:

The Site is approximately nine acres and is developed for office and light industrial use. As part of a sales transaction in 1987 volatile organic compounds were detected in soil and groundwater on this and an adjacent parcel. This site was fully paved with landscaped areas. Historical research showed no known hazardous materials related activities or underground storage tanks on the site. Recently the San Francisco Regional Water Quality Control Board determined the contamination originated from an upgradient source. No action is required.

CONTAMINATED SOIL, HYDROCARBON SOLVENTS

Site History:

Big Al's Waste Hauling, a chemical waste storage and transfer facility, occupied the 3-acre site in the early 1980s, storing wastes included inks, glues, solvents, oil, and ink wastewater. Following an inspection, the Regional Water Quality Control Board requested a cleanup and in December 1980 issued a cleanup and abatement order. DTSC (then DHS) found contaminated soil on site in August 1981. In January 1981, Alameda County District Attorney filed suit against the facility to have the contaminated soil removed. On March 8, 1984, DTSC prepared a letter stating that the cleanup was adequate except for two areas with elevated lead levels that would be acceptable for industrial activities only.

Site History:

The Flint Ink Site (Flint/Site) was an ink manufacturing facility which operated at this location from the 1970s until 1991. Flint manufactured oil based and water based ink. There was no available information indicationg the property's use prior to Flint's occupancy in the 1970s. In June 1980, site soil contamination was discovered by the Department of Health Services (DHS, predecessor to the Department of Toxic Substances or DTSC). DHS conducted site inspections in August and September 1980 and conducted soil sampling of the area behind the existing building where sand containing ink waste was known to have been disposed of by spreading on the ground. Soil sampling results showed lead levels as high as 25,000 ppm. Flint was cited by DHS for soil contamination and required to correct their hazardous waste handling and to clean up their soil. In July 1982, approximately 2,400 to 2,500 cubic yards of lead contaminated soil were excavated up to a depth of 2 feet and disposed under manifest offsite. A post cleanup facility inspection was conducted on July 13, 1982 but no post removal sampling was done. DHS acknowledged satifactory completion of cleanup in a letter dated September 28, 1982. Flint vacated and sold the property in 1991; additional soil investigation and soil removal/disposal was required as a condition for the sale of the property. Approximately 23 cubic yards of excavated soil were excavated/removed and disposed offsite. Post removal soil sampling was conducted and shoed lead concentrations from non detect (ND) to a maximum of 36 ppm; other contaminants were tested but were all ND (volatile organic compounds -VOCs and total petroleum hydrocarbons - TPH). While in Hayward, Flint was under the direct oversight of the Hayward Fire Department's Hazardous Materials Program (HFD). HFD conducted a facility walk-through on August 19, 1991 as part of plant closure; facility closure was approved after the walk through inspection. The site is currently occupied by the Abco Wire and Metal Product Company (Abco). Abco uses the facility for sales and manufacturing activities. Manufacturing mainly consists of welding using acetylene and oxygen welding gases; they do not use any other hazardous substances.

Site History:

The Site was the former location of the Trident Truck Line. Trident had two underground storage tanks which held gasoline and diesel. In 1990, the tanks were closed under the oversight of the Alameda County Department of Environmental Health. The closure report for the site was also reviewed and approved by San Francisco Regional Water Quality Control Board on July 31, 1992 indicating no further action was necessary.

Document Type: Application
Date Completed: 11/23/2015
Comments: The application was accepted and DTSC agreed to provide regulatory oversight.

Title: 23653 Eden Avenue Phases 1 & 2 Environmental Site Assessment
Title Link: http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=60002274&doc_id=60403496
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Site Characterization Report
Date Completed: 11/10/2014
Comments: The report documented the results of soil sampling at 9 soil samples with testing for metals and pesticides. Testing showed contaminants including lead and, chlordane, dieldrin, and low levels of DDT-related compounds. Additional information was provided in a Phase 1 Environmental Site Assessment section. This report was prepared prior to DTSC's involvement with the site.

Title: Voluntary Cleanup Agreement
Title Link: http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=60002274&enforcement_id=60403403
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Voluntary Cleanup Agreement
Date Completed: 12/23/2015
Comments: The Voluntary Cleanup Agreement scope covers review of a Preliminary Endangerment Assessment report by DTSC.

Title: 23645 Eden Ave. Limited Phase II Environmental Site Assessment
Title Link: http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=60002274&doc_id=60403581
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Site Characterization Report
Date Completed: 11/10/2006
Comments: The report documented investigation of shallow soils for metals and pesticides. Contaminants of concern were identified including arsenic, lead, and chlordane. The report was prepared prior to DTSC's involvement with the site.

HALOGENATED SOLVENTS, OXYGENATED SOLVENTS, UNSPECIFIED SOLVENT MIXTURES

Site History:

The Arden Road Property is located at the corner of Arden Road and Danti Court in Hayward and is also known as the Hayward Gateway Center. The property is a business park and is used by various tenants for warehousing and light manufacturing. The property was formerly owned by the Leslie Salt Company from 1939 to 1957, and was used for salt loading and washing. Site Investigations in November 1985 revealed the presence of VOCs in soil and shallow groundwater. Soil samples indicated the presence of trichloroethylene (TEC), toluene and methylene chloride in concenrations that were all below the current EPA PRGs (Preliminary Remediation Goals) but TCE was encountered in shallow groundwater beneath the site in concentrations as high as 8,442 ppb. An adjacent property located at 26569-75 Corporate Avenue (Corporate) is located upgradient from the Arden site and had similar groundwater contamination. Groundwater investigations conducted at the Corporate site indicated groundwater flowed from the northwest to southeast direction, towards the site. Contamination at the Corporate site resulted from leaking underground storage tanks used by the property's tenants and was subsequently remediated in 1995, under the oversight of the Regional Water Quality Control Board (RWQCB), Alameda County Department of Environmental Health and the City of Hayward Fire Department. It was determined that the site operations at the Arden Road Property did not involve TCE use; consequently, no further investigation or remediation was conducted at this location.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Facility Response Plan: FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Mar 26, 2020

National Priority List: NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Apr 27, 2020

National Priority List - Proposed: PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Apr 27, 2020

Deleted NPL: DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Apr 27, 2020

SEMS List 8R Active Site Inventory: SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: May 22, 2020

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: May 22, 2020

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: May 4, 2020

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: May 4, 2020

RCRA Generator List: RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: May 4, 2020

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: May 4, 2020

RCRA Conditionally Exempt and Very Small Quantity Generators List: RCRA CESQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt and Very Small Quantity Generators (VSQG and CESQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG and CESQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: May 4, 2020

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: May 4, 2020

Federal Engineering Controls-ECs: FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 26, 2020

Federal Institutional Controls- ICs: FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 26, 2020

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 25, 2019

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Sep 3, 2019

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Oct 8, 2019

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jan 13, 2020

LIEN on Property: SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: May 22, 2020

Superfund Decision Documents: SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Apr 27, 2020

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Apr 13, 2020

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Apr 13, 2020

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Apr 13, 2020

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.
Government Publication Date: May 1, 2020

EnviroStor Hazardous Waste Facilities: HWP
A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.
Government Publication Date: Apr 13, 2020

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT
In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.
Government Publication Date: Dec 31, 1995

Land Disposal Sites: LDS
Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.
Government Publication Date: Mar 17, 2020

Leaking Underground Fuel Tank Reports: LUST
List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.
Government Publication Date: Mar 17, 2020

Delisted Leaking Storage Tanks: DELISTED LST
List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.
Government Publication Date: Jul 7, 2020

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF
This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.
Government Publication Date: Sep 20, 2006

Permitted Underground Storage Tank (UST) in GeoTracker: UST
List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).
Government Publication Date: Mar 17, 2020

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE
List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.
Government Publication Date: Jul 7, 2020

Historical Hazardous Substance Storage Information Database: HHSS
The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.
Government Publication Date: Aug 27, 2015

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Apr 30, 2020

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Jun 19, 2020

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: May 12, 2020

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Apr 13, 2020

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Apr 8, 2020

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Mar 17, 2020

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Apr 13, 2020

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Mar 17, 2020

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Jul 6, 2020

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: May 12, 2020

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2020

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Apr 8, 2020

Delisted Tribal Leaking Storage Tanks: DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Apr 8, 2020

Delisted Tribal Underground Storage Tanks: DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Apr 8, 2020

County

Alameda County - LOP Sites List: ALAMEDA LOP

List of sites in the Alameda County Department of Environmental Health's (ACDEH) Local Oversight Program (LOP). The ACDEH LOP program oversees the investigation and cleanup of hazardous materials releases to the environment under two programs. The Leaking Underground Fuel Tank (LUFT) program is specific to unauthorized releases associated with petroleum underground storage tank systems. The Site Cleanup Program (SCP) oversees the investigation and cleanup of releases from hazardous materials, including but not limited to releases of pesticides, heavy metals, dry cleaner solvents, etc., including redevelopment of sites with residual contamination from historic uses.

Government Publication Date: Jan 16, 2019

Alameda County - UST List: UST ALAMEDA

A list of registered Underground Storage Tanks (USTs) in the County of Alameda. The list is made available by Alameda County Department of Environmental Health.

Government Publication Date: Jul 9, 2019

Alameda County - City of Berkeley CUPA Facilities: BERKELEY CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs at the City of Berkeley in Alameda County. This list is maintained by the Toxics Management Division at the City of Berkeley.

Government Publication Date: May 12, 2020

Alameda County - Hayward City CUPA List: HAYWARD CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Hayward City. This list is maintained by the Hayward City Fire Department.

Government Publication Date: Jul 16, 2019

Alameda County - San Leandro City CUPA Facilities List: SANLEANDRO CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Leandro City, Alameda County. This list is made available by San Leandro City Environmental Services Section.

Government Publication Date: Apr 11, 2019

Alameda County - Union City USTs: UNION UST

A list of Underground Storage Tanks (USTs) in the city of Union in Alameda County. This data is made available by the Environmental Programs Division of Economic & Community Development, Union City.

Government Publication Date: Jan 21, 2020

Alameda County - Union City CERS CUPA List: UNION CUPA

A list of CERS registered facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. This list is made available by the City of Union Economic and Community Development Department.

Government Publication Date: Jan 21, 2020

Alameda County - Union City CUPA Facilities: UNION CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Union. Includes facilities with active and inactive statuses. This list is made available by the City of Union Economic and Community Development Department.

Government Publication Date: Jan 21, 2020

Alameda County - City of Livermore and Pleasanton UST List: LIVERMORE UST

A list of registered Underground Storage Tank (UST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: May 1, 2019

Alameda County - City of Livermore and Pleasanton AST List: LIVERMORE AST

A list of registered Aboveground Storage Tank (AST) in City of Livermore and City of Pleasanton, Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: May 1, 2019

Alameda County - City of Livermore and Pleasanton CUPA Facilities: LIVERMORE CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in City of Livermore and City of Pleasanton in Alameda County. This list is maintained by the Livermore-Pleasanton Fire Department.

Government Publication Date: May 1, 2019

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites: PFAS NPL

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Mar 2, 2020

Drug Establishment Annual Registration: FDA REGISTRANT

A list of drug firms which manufacture, prepare, propagate, compound, or process drugs that are commercially distributed in the U.S. or offered for import to the U.S. Listing made available by the U.S. Food and Drug Administration (FDA). Includes historical records dating back to 2000. Includes only facilities which are located in the U.S.A.

Government Publication Date: Apr 9, 2019

Civil Enforcement Action Cases without Associated Facilities: CEA2

This database tracks civil, judicial, and administrative federal EPA enforcement cases, and is from the Integrated Compliance Information System. ICIS tracks enforcement actions taken against companies or individuals. Therefore, the ICIS case name may not exactly correspond to the facility name for ICIS records linked via FRS to facility records from other program office data systems.This dataset is provided by the EPA. This is a listing of cases where there are no facilities associated with a case.

Government Publication Date: Mar 9, 2020

Risk Management Plan (RMP) Rule: RMP

A list of facilities that are required to have a Risk Management Plan (RMP) in order to: identify the potential effects of chemical accidents, identify steps to prevent accidents and provide emergency response procedures should an accident occur. This list is provided by the EPA which is required by the Clean Air Act Amendments to publish regulations and guidance on chemical accident prevention.

Government Publication Date: Jan 31, 2020

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Mar 25, 2020

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U. S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Releases: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Dec 20, 2019

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Jan 8, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Mar 19, 2020

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.
Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN
An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP
An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP
Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.
Government Publication Date: May 22, 2020

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER
The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.
Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS
The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.
Government Publication Date: Nov 18, 2016

Drycleaner Facilities: FED DRYCLEANERS
A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.
Government Publication Date: Jan 20, 2020

Delisted Drycleaner Facilities: DELISTED FED DRY
List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).
Government Publication Date: Jan 20, 2020

Formerly Used Defense Sites: FUDS
Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.
Government Publication Date: Jan 28, 2020

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT
A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Oct 31, 2019

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Oct 31, 2019

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 6, 2019

Alternative Fueling Stations: ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jun 22, 2020

Integrated Compliance Information System for Air: ICIA

ICIS-Air contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners (automobiles and other mobile air pollution sources are tracked by a different EPA system). ICIS-Air records included in the download files are those where the operating status is planned (has applied for a construction permit), under construction, operating, temporarily closed, seasonal, or permanently closed. This is provided by the EPA.

Government Publication Date: Mar 25, 2020

Occupational Safety and Health Administration Enforcement Data: OSHA

This dataset includes information regarding the impetus for conducting the inspection, and details on citations and penalty assessments resulting from violations of OSHA standards. Additionally, accident investigation information is provided, including textual descriptions of the accident, and details regarding the injuries and fatalities which occurred. Provided by the US Department of Labor.

Government Publication Date: Jan 12, 2020

Civil Enforcement Actions: CEA

This database tracks civil, judicial, and administrative federal EPA enforcement cases, and is from the Integrated Compliance Information System. ICIS tracks enforcement actions taken against companies or individuals. Therefore, the ICIS case name may not exactly correspond to the facility name for ICIS records linked via FRS to facility records from other program office data systems.This dataset is provided by the EPA.

Government Publication Date: Mar 9, 2020

Criminal Enforcement Actions: CRIM

Criminal Enforcement Actions database that is maintained by the US environmental protection agency (EPA) which reports criminal enforcement cases for all environmental statutes

Government Publication Date: Dec 24, 2019

Permit Compliance System (PCS): PCS

Permit Compliance System (PCS) database that is maintained by US Environmental Protection Agency (EPA) provides historic water discharge permit information by state. The Permit Compliance System (PCS) is gradually being replaced by the modernized system called Integrated Compliance Information System (ICIS).

Government Publication Date: Nov 12, 2012

Federal National Pollutant Discharge Elimination System (NPDES): NPDES

ICIS-NPDES is an information management system maintained by the Office of Compliance at the US Environmental Protection Agency (EPA) to track permit compliance and enforcement status of facilities regulated by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act (CWA). ICIS-NPDES is designed to support the NPDES program at the state, regional, and national levels.

Government Publication Date: Nov 21, 2019

Financial Assurance Summary: FINA

RCRA regulated Treatment, Storage, & Disposal (TSD) sites with Financial Assurance coverage, listed on the Financial Assurance Summary made available by the US Environmental Protection Agency (EPA).

Government Publication Date: Jun 18, 2020

Biennial Reporting System (BRS): BRS

The Biennial Reporting System (BRS) database manitained by the Environmental Protection Agency (EPA) that contains biennial reports submitted by generators of hazardous wastes and facilities that treat, store or dispose of hazardous wastes.

Government Publication Date: Dec 16, 2016

Enforcement and Compliance Data (ECHO): ECHO

ECHO data focuses on compliance and enforcement-related information for regulated facilities, including permit data, inspection/compliance evaluation dates and findings, violations of environmental regulations, enforcement actions, and penalties assessed. The data encompasses facilities related to air emissions, surface water discharges, hazardous waste, and drinking water systems. The information contained in ECHO is made available to the public by the U.S. Environmental Protection Agency (EPA) for information purposes only.

Government Publication Date: May 29, 2018

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 31, 2020

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Oct 9, 2019

Civil Cases and Settlements: CIVIL CASES

A listing of significant civil and cleanup cases and settlements from 1998 and onwards. This data is made available by the United States Environmental Protection Agency (US EPA).

Government Publication Date: May 7, 2020

State

NPDES Permits Listing: NPDES

List of National Pollutant Discharge Elimination System (NPDES) permits maintained by the California State Water Resources Control Board. The list includes active, historical and terminated NPDES Permits for the state of California.

Government Publication Date: Apr 30, 2020

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: May 5, 2020

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: May 5, 2020

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS): PFAS

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Mar 17, 2020

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.Y

Government Publication Date: Apr 16, 2020

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Feb 25, 2020

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Apr 14, 2020

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Apr 13, 2020

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Apr 20, 2020

Hazardous Waste Manifest Data: HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: May 12, 2020

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Mar 17, 2020

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Mar 17, 2020

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2017

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jun 30, 2018

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

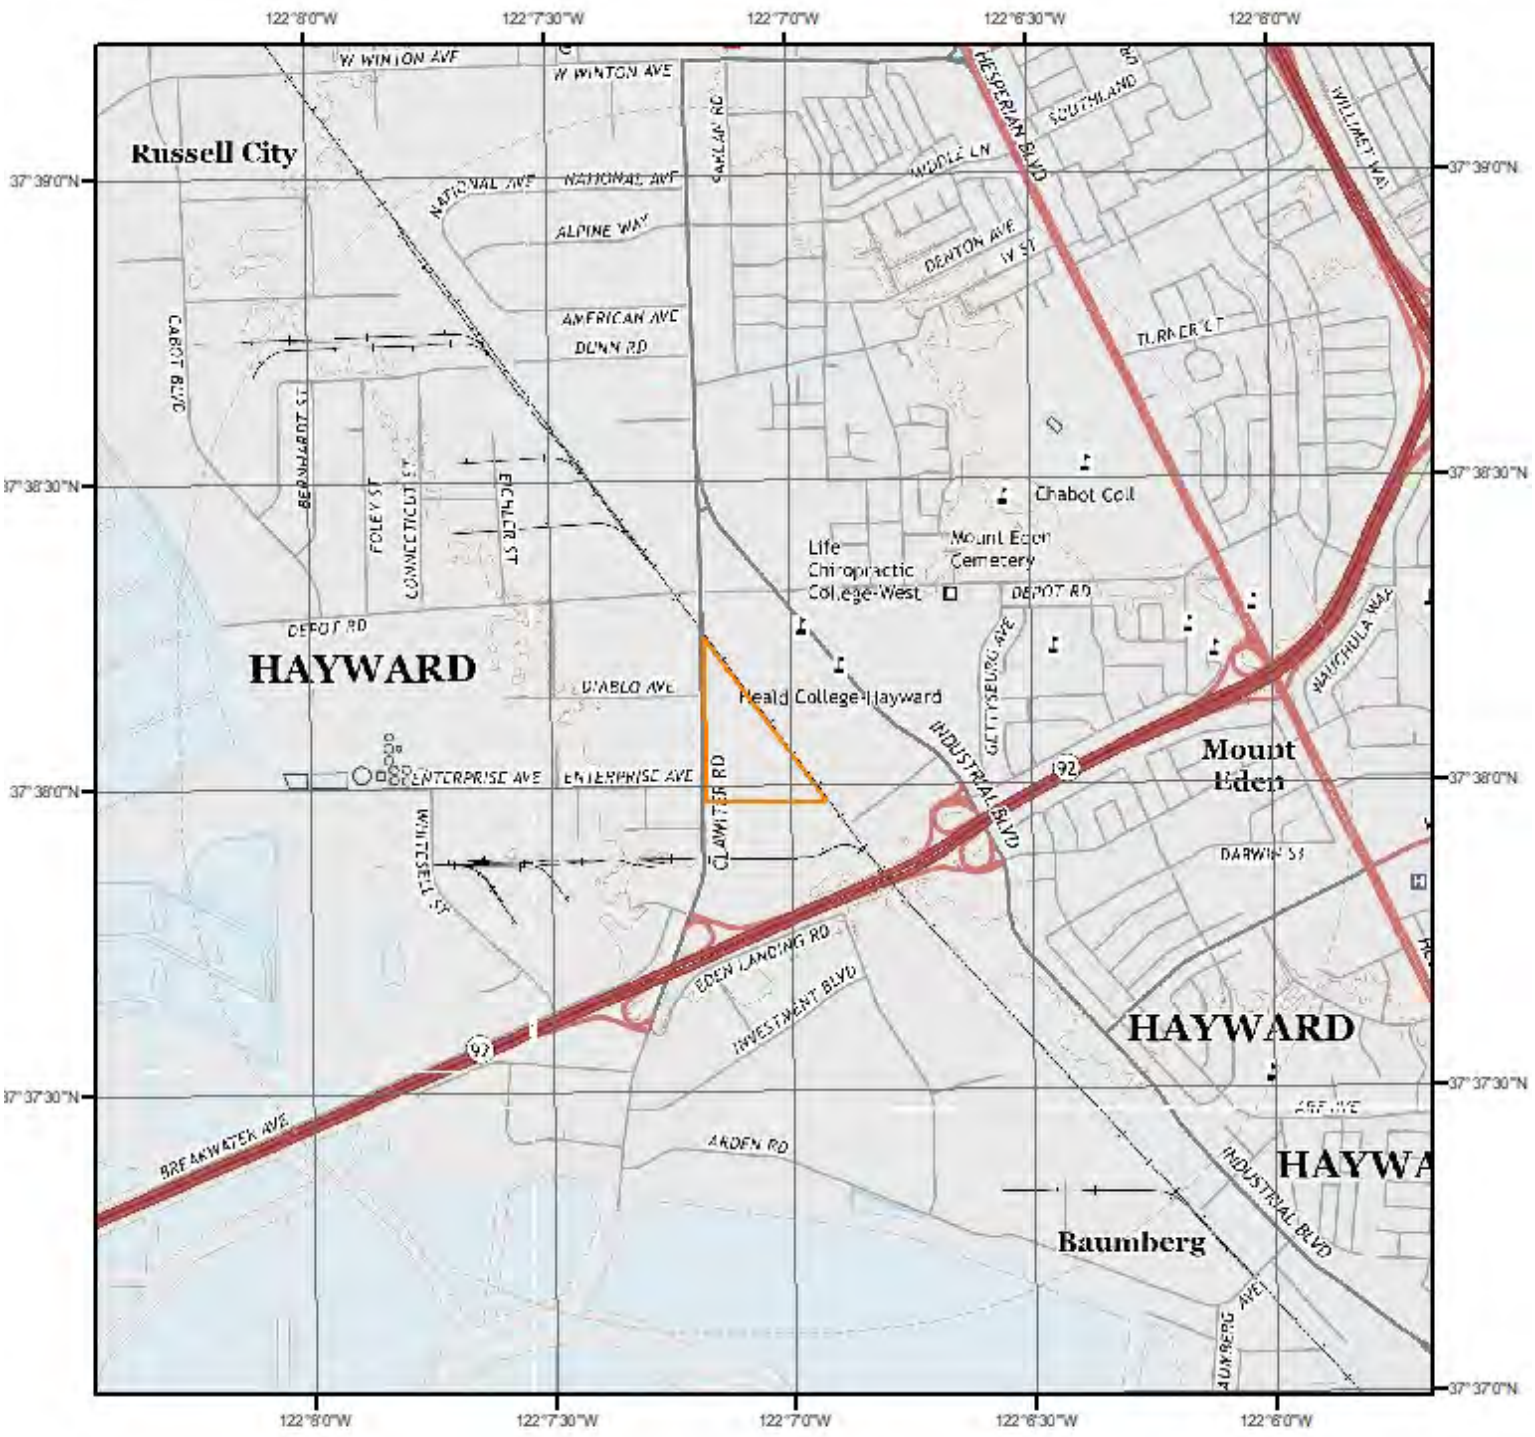
  Summary....13
  Detail Report....25
Radon Information....474
Appendix....475
Liability Notice....477



The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

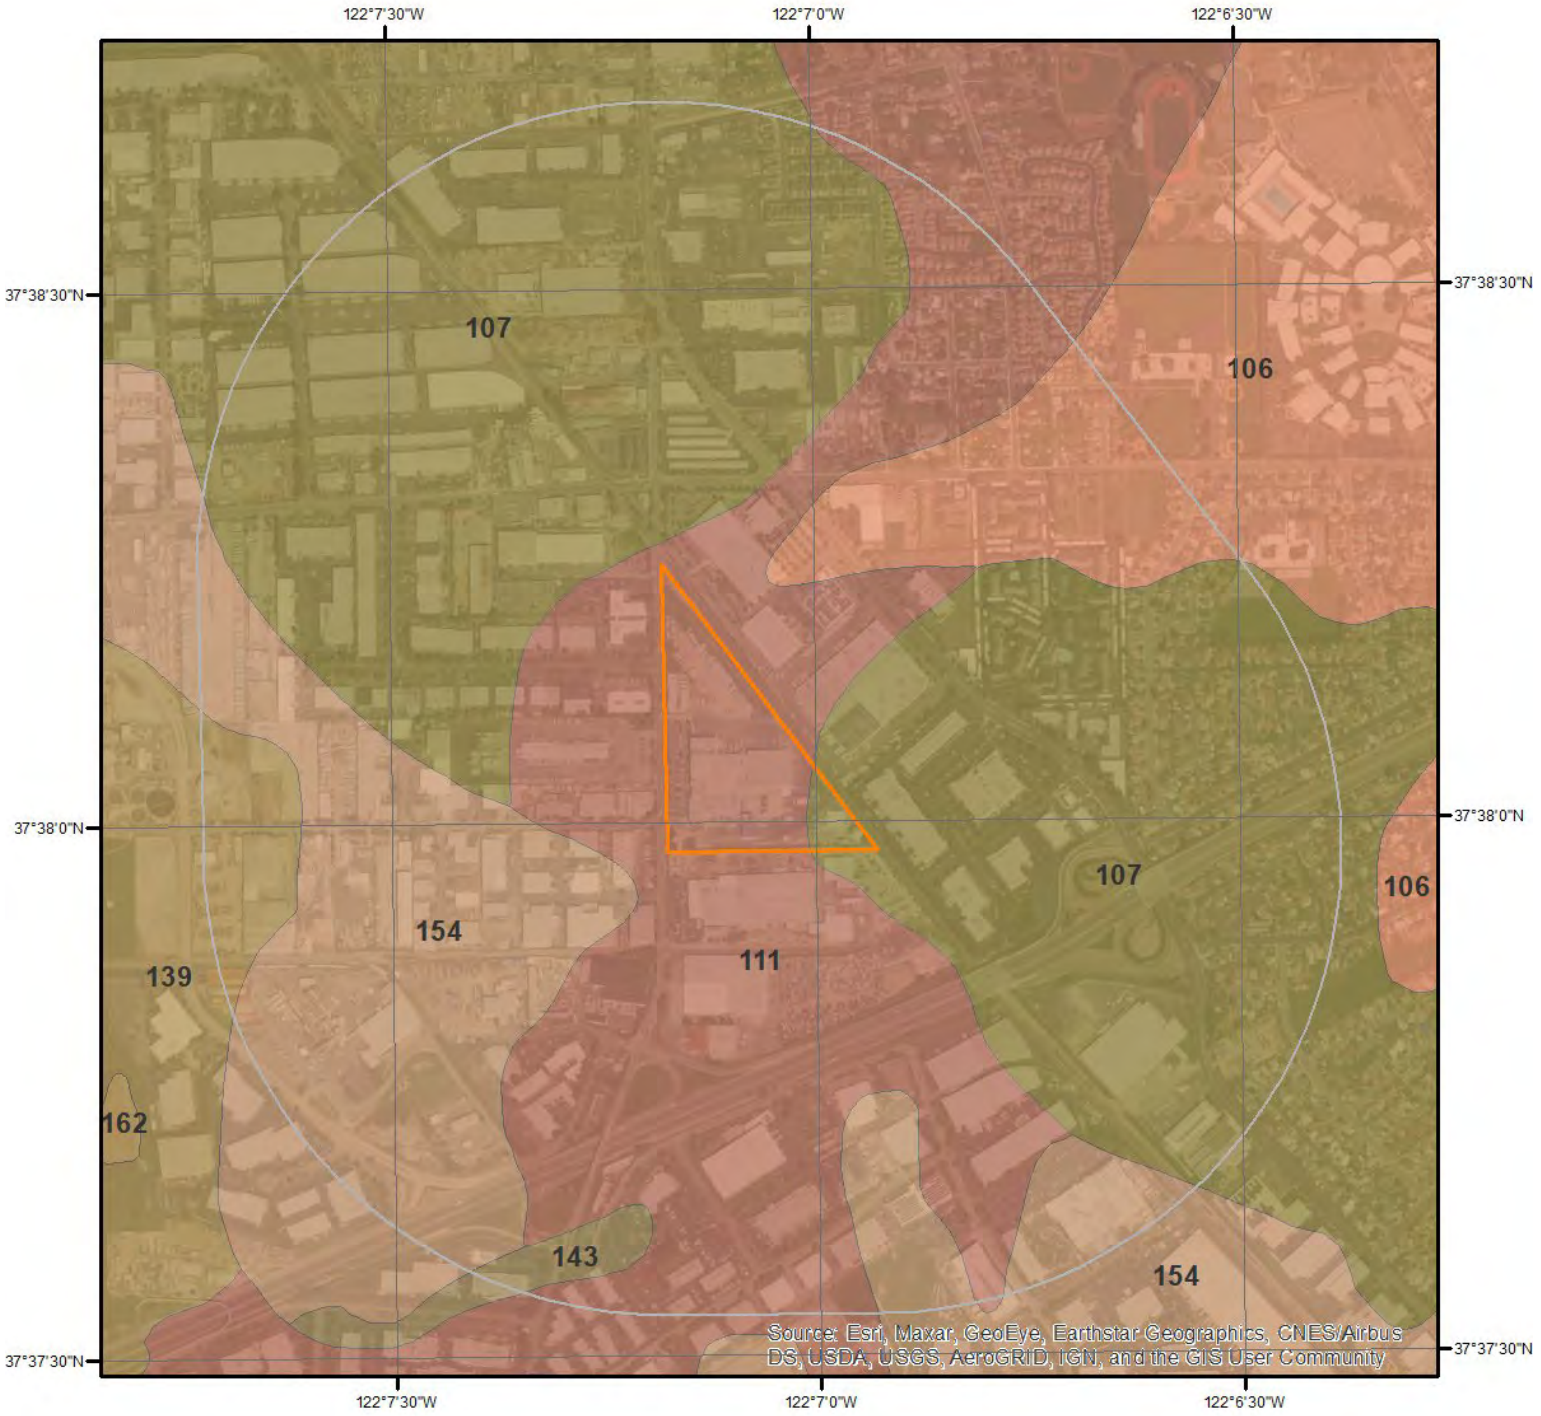
Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

ERIS
ENVIRONMENTAL RISK INFORMATION SERVICES



Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information

SSURGO Soils

0 0.2 0.4 Miles

N

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 106 (19.99%)

Map Unit Name:	Botella loam, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.
Major components are printed below	
Botella(85%)	
horizon H1(0cm to 23cm)	Loam
horizon H2(23cm to 84cm)	Clay loam
horizon H3(84cm to 152cm)	Silt loam

Map Unit 107 (32.58%)

Map Unit Name:	Clear Lake clay, drained, 0 to 2 percent slopes, MLRA 14
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	91cm
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.
Major components are printed below	
Clear Lake(90%)	
horizon Ap(0cm to 15cm)	Clay
horizon Bss1(15cm to 66cm)	Clay
horizon Bss2(66cm to 91cm)	Clay
horizon C(91cm to 152cm)	Clay

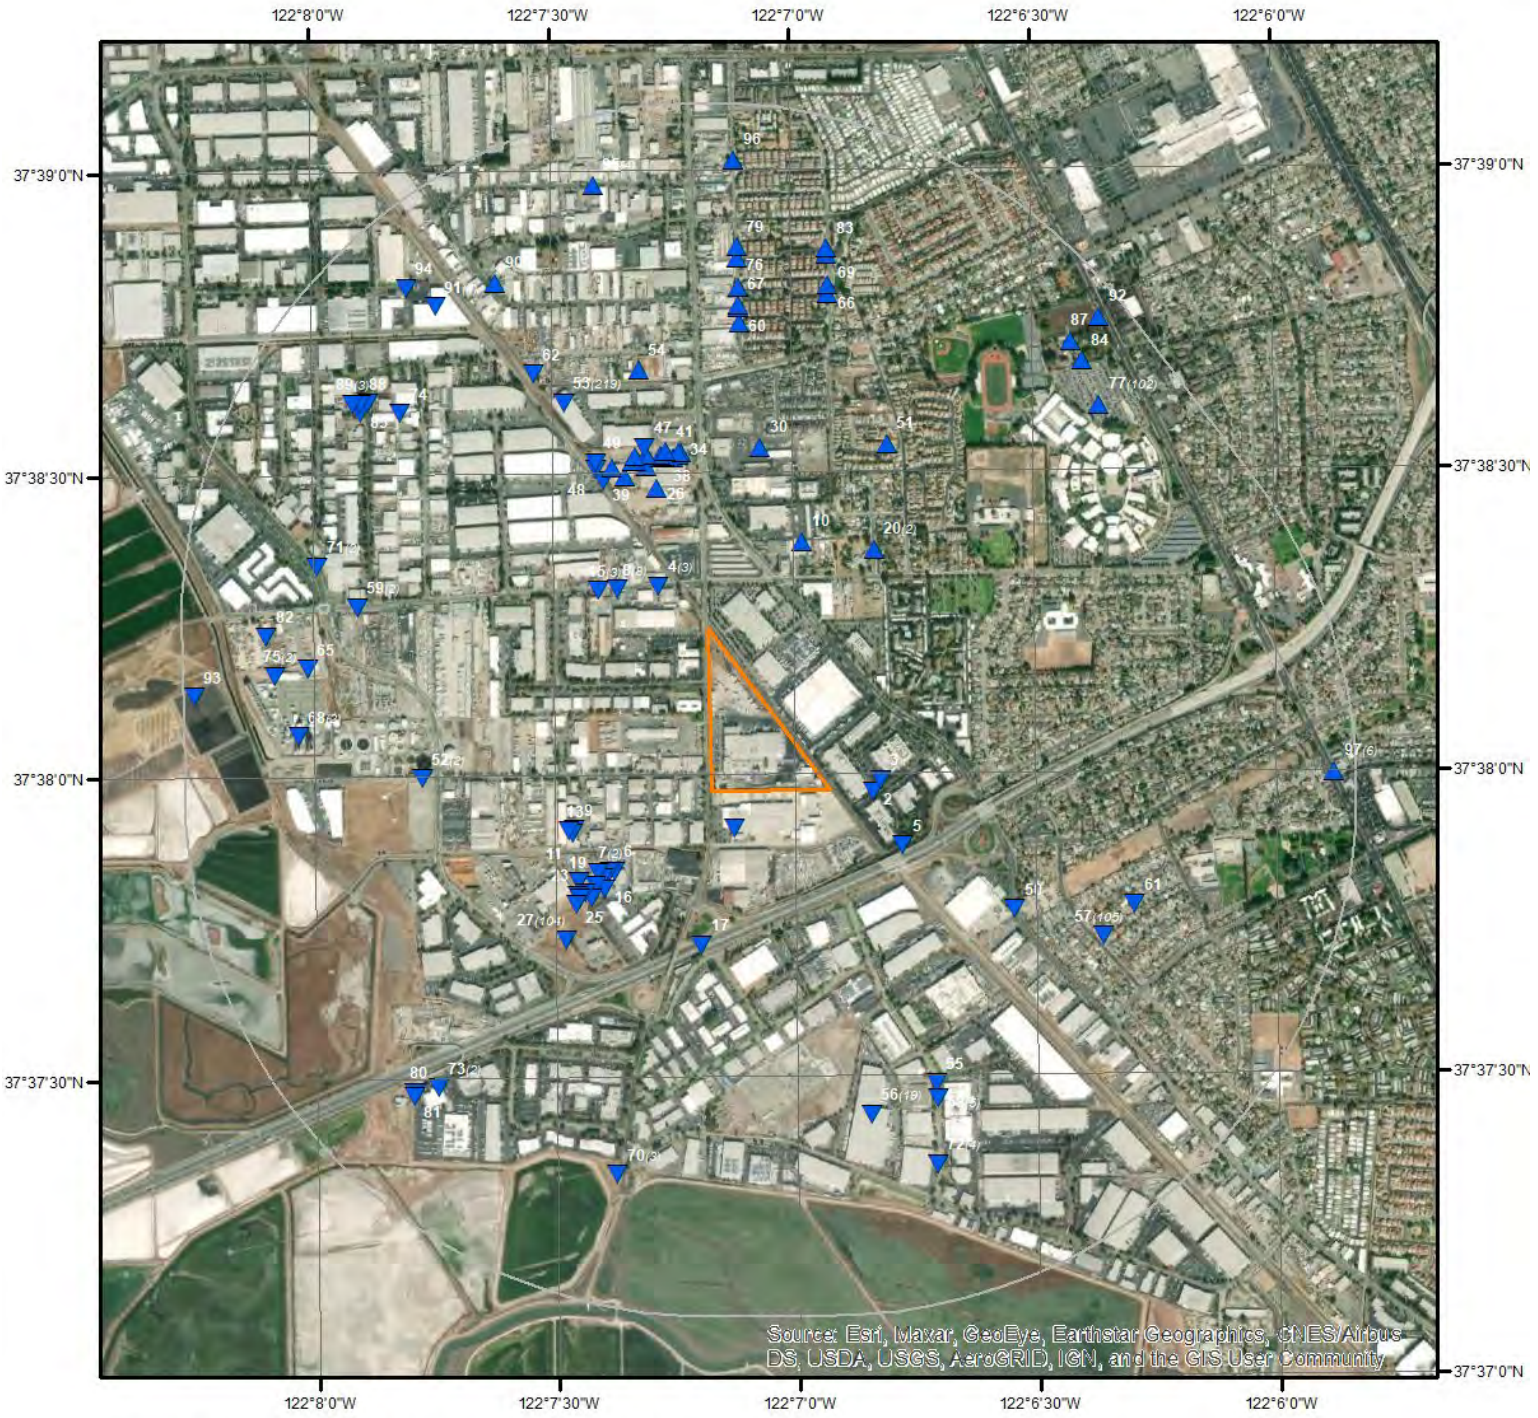
Map Unit 111 (8.22%)

Map Unit Name:	Danville silty clay loam, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Well drained
Hydrologic Group - Dominant:	C - Soils in this group have moderately high runoff potential when thoroughly wet. Water transmission through the soil is somewhat restricted.
Major components are printed below	
Danville(85%)	
horizon H1(0cm to 53cm)	Silty clay loam
horizon H2(53cm to 135cm)	Silty clay
horizon H3(135cm to 203cm)	Silty clay loam

Soil Information

Map Unit 139 (22.63%)

Map Unit Name:	Reyes clay, drained
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	92cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.
Major components are printed below	
Reyes(85%)	
horizon H1(0cm to 15cm)	Clay
horizon H2(15cm to 183cm)	Clay



Map Unit 143 (0.15%)

Map Unit Name:	Sycamore silt loam, drained
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	B - Soils in this group have moderately low runoff potential when thoroughly wet. Water transmission through the soil is unimpeded.
Major components are printed below	
Sycamore(85%)	
horizon H1(0cm to 46cm)	Silt loam
horizon H2(46cm to 152cm)	Silt loam

Map Unit 154 (16.42%)

Map Unit Name:	Willows clay, drained
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	168cm
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	D - Soils in this group have high runoff potential when thoroughly wet. Water movement through the soil is restricted or very restricted.
Major components are printed below	
Willows(85%)	
horizon H1(0cm to 48cm)	Clay
horizon H2(48cm to 183cm)	Clay

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *ALAMEDA* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *ALAMEDA* County

No Measures/Homes:	60
Geometric Mean:	0.5
Arithmetic Mean:	0.8
Median:	0.7
Standard Deviation:	1
Maximum:	4
% >4 pCi/L:	0
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells — **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Resumes

Noli Valera

noli.valera@rpsgroup.com

Senior Consultant

Transaction Advisory Services

Location: Oakland, California

Overview

Mr. Valera is a Senior Consultant with the Transaction Advisory Services group out of the Northern California offices. Mr. Valera has over 12 years of experience in various environmental consulting sectors, including environmental due diligence, industrial hygiene/health and safety assessments, and environmental compliance. In this role, Mr. Valera is responsible for transaction services management for national and international projects, coordinating due diligence assessments associated with portfolio deals, technical review and support for clients, quantifying potential environmental liabilities, and identifying and developing new business.

Areas of Expertise

- Environmental due diligence investigations
- Regulatory compliance consulting
- Industrial hygiene assessments

Education

- Master of Science in Civil Engineering, Loyola Marymount University
- Bachelor of Arts, Environmental Sciences, University of California, Berkeley

Experience

Due Diligence Assessments

- Managed, conducted, prepared, and reviewed over 1,000 Phase I Environmental Site Assessments, Transaction Screen Assessments, Compliance Audits, and other due diligence assessments for residential, commercial, and industrial properties
- Conducted soil, soil vapor, and groundwater investigations for Phase II and remediation assessments
- Provided technical support for lenders, private equity firms, attorneys, and environmental risk managers
- Managed multi-site portfolios for gasoline service stations, multi-family residential communities, petroleum production facilities, commercial office parks, automotive repair facilities

Environmental, Health, and Safety Compliance

- Provided analysis and recommendations for environmental liabilities associated with current and historical operations
- Conducted compliance audits of commercial and industrial facilities, including dry cleaners and gasoline stations
- Developed and managed WDR, SPCC, SWPPP, EPCRA, HMBP, and other compliance submittals

Alonzo Granados, PE

Alonzo.Granados@RPSGroup.com

Vice President, Engineering and Transactional Compliance

Department: Environmental Risk
Location: Oakland, California
Project Roles Strategic National Account Manager

Overview

Alonzo Granados brings over 20 years of experience in program management of national and international accounts. Programs managed by Mr. Granados have provided property transactional compliance, environmental assessment, remediation, regulatory compliance, and infrastructure design/build consulting services to the real estate, transportation, manufacturing, and food and beverage industries.

Areas of Expertise

- Transactional Compliance
- Environmental Assessment
- Soil and Groundwater Remediation
- Environmental health and safety compliance
- Construction Oversight

Sectors

- Real Estate
- Transportation
- Manufacturing
- Food and Beverage

Prior to joining RPS Group, Alonzo served as Industrial Sector Lead for Greater Northern California, where he managed cross-functional teams for multi-million dollar projects on behalf of Fortune 500 companies in the real estate, transportation, manufacturing, and food and beverage industries. Mr. Granados guided clients through challenging multi-year projects involving environmental assessment, remediation, and regulatory compliance. He has managed the assessment and remediation of multi-million-dollar, multi-shareholder, property development projects throughout the continental United States.

Experience

Vice President, Engineering and Transactional Compliance

- Responsible for development of national real estate, transportation, and food and beverage sector market across remediation and environmental compliance business lines.
- National Account Manager

Associate

- Responsible for the successful development and implementation of business plan and sales strategy for real estate sector across assessment, remediation, and environmental compliance business lines.
- Manager of National Strategic Accounts (PepsiCo, Dean Foods, Jiffy Lube and Levi Strauss & Company)

Industrial Sector Lead – Greater Northern California

- Manage cross-functional teams of engineers and scientists providing engineering and consulting services to government and private clients
- Responsible for successful development and implementation of department business plan and sales strategy
- Responsible for resource planning and scheduling, including strategic hires
- Oversee employee career path guidance and performance evaluations

National Account Manager

- Manage PepsiCo account across all PepsiCo brands (Pepsi Beverages Company, Frito – Lay, Tropicana, Gatorade, and Quaker Oaks)
- Manage PepsiCo account throughout the Americas
- National Account Manager for PepsiCo across all business lines: Environmental, Infrastructure, Wastewater, and EH&S Compliance
- Responsible for successful development and implementation of account business plan and sales strategy
- Served as company liaison to PepsiCo Corporate Management and all PepsiCo brands
- Identified and secured strategic hires to augment AECOM team strength

Program Manager

- Program Manager for 5 year $50 Million Army Corps of Engineers redevelopment project
- Project Manager for 2.3 million dollar decommissioning of heavy equipment wash rack facility and associated wastewater treatment facility at Fort Sill Army Garrison.
- Project Manager for 3.4 million dollar decommissioning of the Onizuka Air Force Station.
