Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Two Rivers Park Project	
Lead Agency: Fall River Valley Community Services District	
Contact Name: Amber Beck	
Email: amber@frvcsd.org	Phone Number: 530.336.5263
Project Location: Fall River Mills (unincorporated Shasta County)	Shasta
City	County

Project Description (Proposed actions, location, and/or consequences).

The Fall River Valley Community Services District (FRVCSD) acquired fee title of ±35 acres of land from Pacific Gas and Electric Company for the development of a community park. The project site is located within the unincorporated community of Fall River Mills in Shasta County at the confluence of the Pit and Fall Rivers. The proposed project includes construction of additional park facilities and community trails. Improvements on the west side of the Fall River include installation of ±4,000 linear feet of community trails, a paved access road and unpaved parking lot, and installation of a gate, signage, and a recycle waste station. On the east side of the Fall River, a segment of the existing trail would be paved, and a drinking fountain and a picnic area with a pavilion would be installed. Solar panels would be mounted on top of the pavilion. Benches, picnic tables, signage, recycle waste stations, an information kiosk, and a gate with a decorative archway would be installed. A public restroom would be constructed adjacent to the existing parking lot, and landscaping improvements including trees, shrubs, and mulch would be installed throughout the park.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

As documented in the Initial Study and proposed Mitigated Negative Declaration, project implementation could result in in temporarily increased air emissions, possible effects to special-status wildlife species and their habitats (if present), impacts to wetlands and other waters of the U.S./State (if present), disturbance of nesting birds (if present), potential introduction and spread of invasive weeds, impacts to cultural and tribal cultural resources (if present), exposure to hazardous materials (if present), temporary increase in wildfire risk, and temporarily increased noise and vibration levels.

Design features incorporated into the project would avoid or reduce certain potential environmental impacts, as would compliance with existing regulations and permit conditions. Remaining impacts can be reduced to levels that are less than significant through implementation of the mitigation measures presented in Section 1.10 of the Initial Study. Because Fall River Valley Community Services District will adopt mitigation measures as conditions of project approval and will be responsible for ensuring their implementation, it has been determined that the project will not have a significant adverse impact on the environment.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
The Lead Agency is not aware of any issues that would be considered controversial, either to the public or to any regulatory agency.
Provide a list of the responsible or trustee agencies for the project. Air Resource Board, California Highway Patrol, Caltrans District 2, Office of Histroic Preservation, Department of Parks & Recreation, Region 5 Regional WQCB, Region 1 Fish & Wildlife, Housing & Community Development, Native American Heritage Commission, SWRCB: Water Quality
