HCM 6th LOS	D

Notes

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Intersection Summary

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

m Volume for 95th percentile queue is metered by upstream signal.

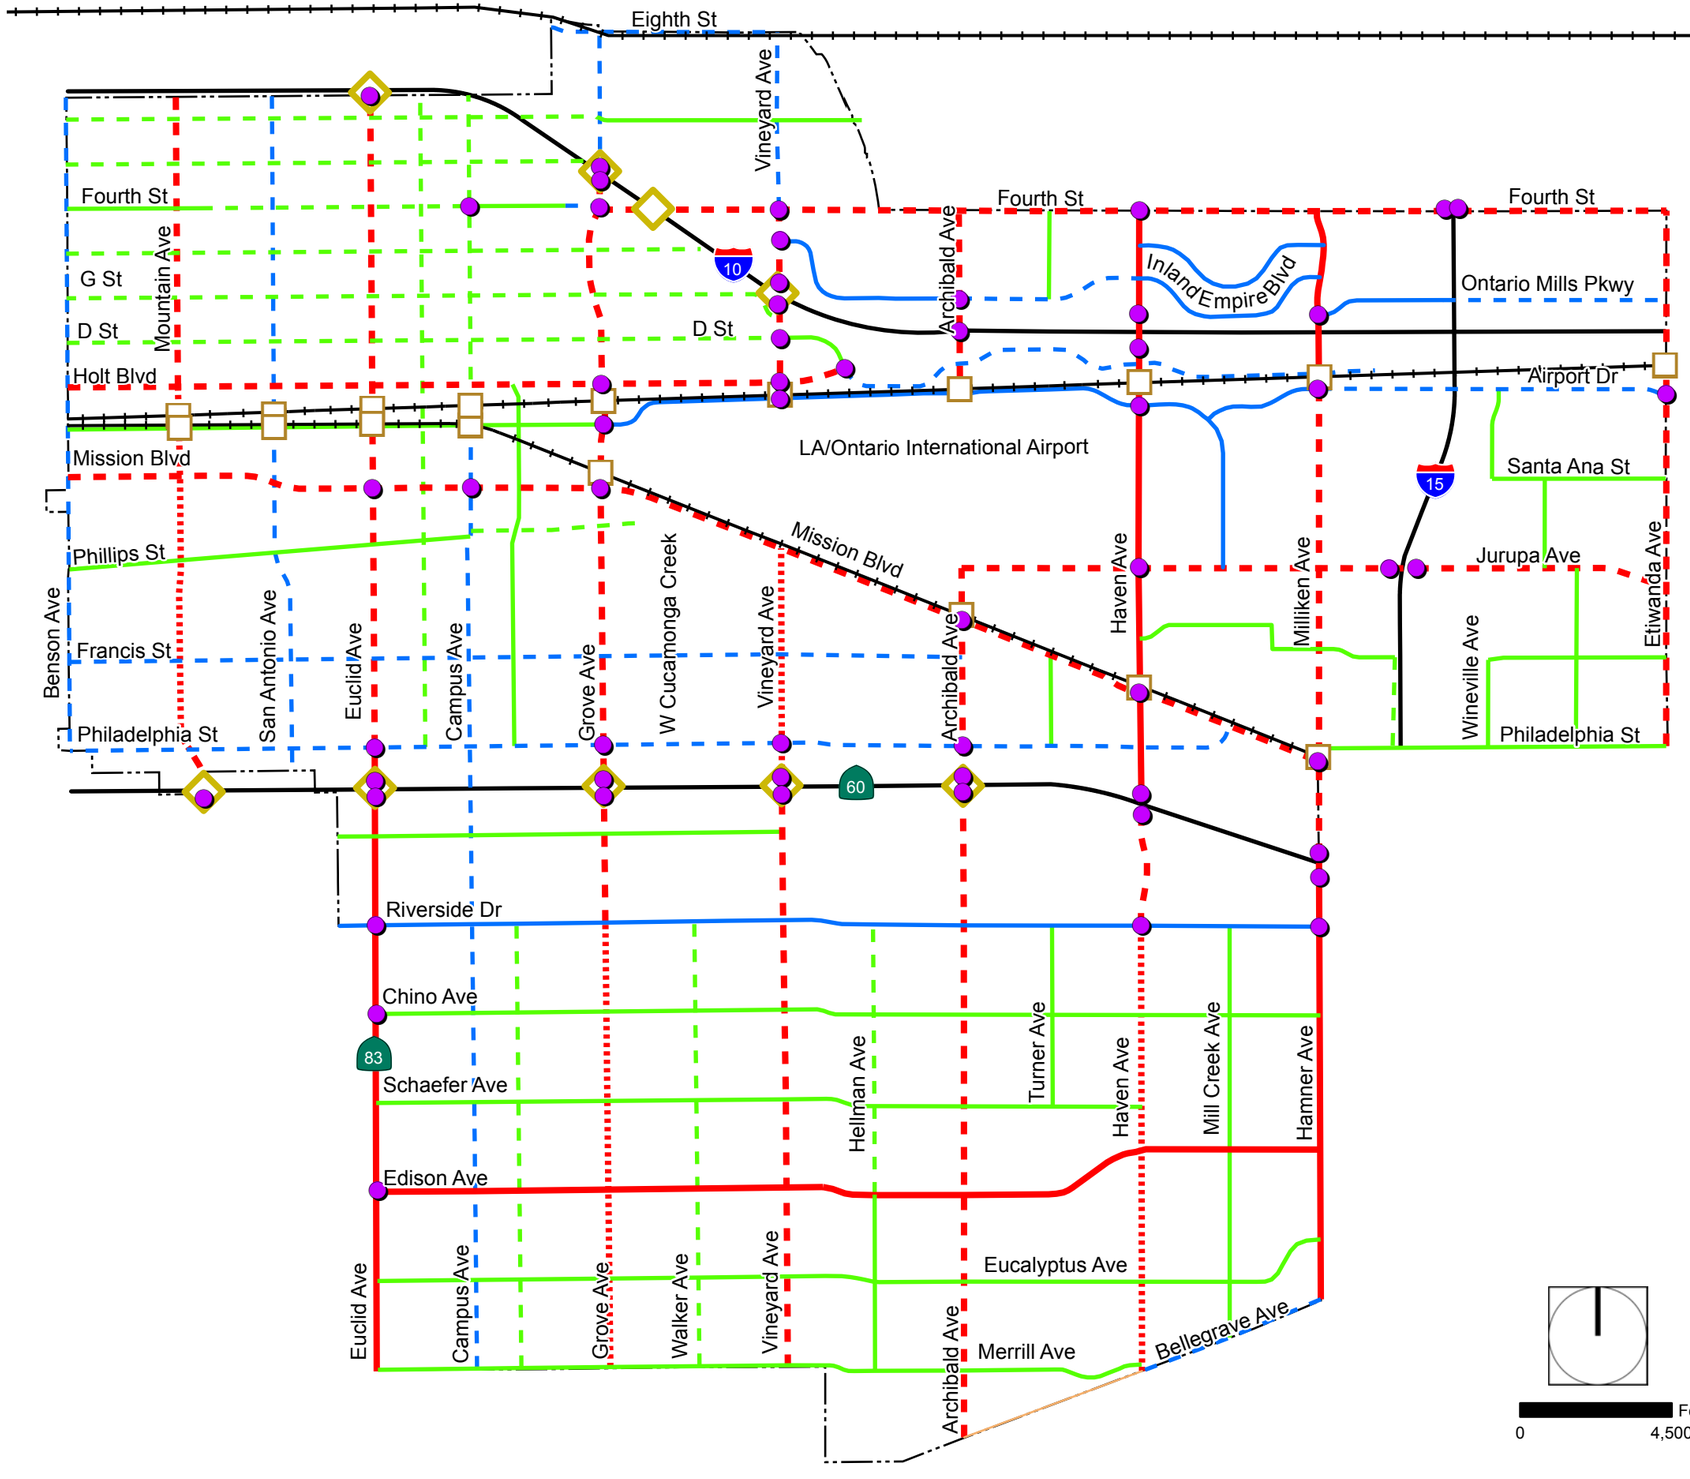
General Plan Circulation Elements

City of Ontario General Plan

Functional Roadway Classification Plan



- Freeways
- Railroads

Other Principal Arterial
- 8 Lanes
- 6 Lanes
- 4 Lanes

Minor Arterial
- 6 Lanes
- 4 Lanes

Collector Street
- 4 Lanes
- 2 Lanes

- Freeway Interchange
- Grade-Separated Rail Crossings
- Enhanced Intersections

1) All streets not shown on the map and legend are classified as local streets.
2) Enhanced Intersections allow flexibility from the standard intersection configuration to increase capacity, improve operation, and respond to local conditions. Enhancements may include additional lanes, reduced median width, increased right-of-way width, removal of on-street bike lanes, or reduction of parkway width. Detailed engineering studies are necessary to identify the most effective types of improvements.
3) The Functional Roadway Classification Plan depicts the maximum number of lanes and does not preclude the use of fewer lanes. The goal is to use the minimum number of lanes necessary to achieve the LOS standard while minimizing pavement and right-of-way width. Detailed traffic studies are necessary to identify the necessary number of lanes.
4) The Functional Roadway Classification Plan is a generalized representation of the roadway system. See the Master Plan of Streets and Highways to determine the exact right-of-way, number of lanes, and roadway configuration.
5) State Street and Holt Boulevard, which are parallel roadways, are related and improvements to one roadway enhance conditions on the other. Due to this fact and physical constraints, the actual classification of each roadway may vary depending upon the results of further, more detailed analysis.

Subject: Request for Information on Tribal Cultural Resources for Proposed Ontario International Airport South Cargo Center Project

The Ontario International Airport Authority (OIAA; Lead Agency) is notifying the Agua Caliente Band of Cahuilla Indians about the proposed South Airport Cargo Center Project (Project). The OIAA is preparing an Environmental Impact Report (EIR) for the proposed Project in compliance with the California Environmental Quality Act (CEQA). As provided in Public Resources Code §21080.3.1, California Native American tribes traditionally and culturally affiliated with a geographic area may have expertise concerning their tribal cultural resources. The Native American Heritage Commission has identified your tribe as potentially having knowledge of tribal cultural resources in the project area. Accordingly, OIAA is submitting this letter to determine whether your tribe has knowledge of potential resources in the project area and/or if your tribe would like to further discuss through consultation. Please respond within 30 days or no later than December 30, 2021.

Project Description

OIAA proposes redevelopment of 76 acres of land in the southwest portion of the Ontario International Airport. Existing improvements would be demolished, and existing uses and operations, including the OIAA Administrative Offices and South Secured Area Access Point (SAAP), would be terminated and/or relocated. The proposed development includes a cargo building, aircraft apron, parking structure, and related site improvements such as landscaping, and for utility connections and vehicle access. The proposed Project is further described in the attached Notice of Preparation.

Project Location

The Project site includes portions of Assessor's Parcel Numbers (APN) 11326106, 11326107, 11326108, 11327101, and 11327102 in the City of Ontario, southwest San Bernardino County. The Project site is bound by the Cucamonga Canyon Channel on the east and the airport airfield on the north. The majority of the Project site is located north of East Avion Street with the remainder of the site located south of East Avion Street and east of South Hellman Avenue. The segment of East Avion Street east of South Hellman Avenue will be realigned to meet East Jurupa Avenue; this realignment is a not part of this Project and is part of a previously planned project undergoing separate environmental review. Regional access is provided by State Route 60 (SR-60), approximately 1.25 mile to the south; Interstate 10 (I-10), 1.0 mile to the north, and I-15 approximately 2.75 miles to the east. Please see the attached Notice of Preparation for maps of the Project site and surrounding areas.

Lead Agency Contact Information

The Native American Heritage Commission has identified your tribe as potentially having knowledge of tribal cultural resources in the project area. Accordingly, OIAA is submitting this letter to determine whether your tribe has knowledge of potential resources in the project area and/or if your tribe would like to further discuss through consultation. Please respond within 30 days or no later than December 30, 2021.

Project Description

OIAA proposes redevelopment of 76 acres of land in the southwest portion of the Ontario International Airport. Existing improvements would be demolished, and existing uses and operations, including the OIAA Administrative Offices and South Secured Area Access Point (SAAP), would be terminated and/or relocated. The proposed development includes a cargo building, aircraft apron, parking structure, and related site improvements such as landscaping, and for utility connections and vehicle access. The proposed Project is further described in the attached Notice of Preparation.

Project Location

The Project site includes portions of Assessor's Parcel Numbers (APN) 11326106, 11326107, 11326108, 11327101, and 11327102 in the City of Ontario, southwest San Bernardino County. The Project site is bound by the Cucamonga Canyon Channel on the east and the airport airfield on the north. The majority of the Project site is located north of East Avion Street with the remainder of the site located south of East Avion Street and east of South Hellman Avenue. The segment of East Avion Street east of South Hellman Avenue will be realigned to meet East Jurupa Avenue; this realignment is a not part of this Project and is part of a previously planned project undergoing separate environmental review. Regional access is provided by State Route 60 (SR-60), approximately 1.25 mile to the south; Interstate 10 (I-10), 1.0 mile to the north, and I-15 approximately 2.75 miles to the east. Please see the attached Notice of Preparation for maps of the Project site and surrounding areas.

The Project site is bound by the Cucamonga Canyon Channel on the east and the airport airfield on the north. The majority of the Project site is located north of East Avion Street with the remainder of the site located south of East Avion Street and east of South Hellman Avenue. The segment of East Avion Street east of South Hellman Avenue will be realigned to meet East Jurupa Avenue; this realignment is a not part of this Project and is part of a previously planned project undergoing separate environmental review. Regional access is provided by State Route 60 (SR-60), approximately 1.25 mile to the south; Interstate 10 (I-10), 1.0 mile to the north, and I-15 approximately 2.75 miles to the east. Please see the attached Notice of Preparation for maps of the Project site and surrounding areas.

Subject: Request for Information on Tribal Cultural Resources for Proposed Ontario International Airport South Cargo Center Project

The Ontario International Airport Authority (OIAA; Lead Agency) is notifying the Serrano Nation of Mission Indians about the proposed South Airport Cargo Center Project (Project). The OIAA is preparing an Environmental Impact Report (EIR) for the proposed Project in compliance with the California Environmental Quality Act (CEQA). As provided in Public Resources Code §21080.3.1, California Native American tribes traditionally and culturally affiliated with a geographic area may have expertise concerning their tribal cultural resources. The Native American Heritage Commission has identified your tribe as potentially having knowledge of tribal cultural resources in the project area. Accordingly, OIAA is submitting this letter to determine whether your tribe has knowledge of potential resources in the project area and/or if your tribe would like to further discuss through consultation. Please respond within 30 days or no later than December 30, 2021.

Project Description

OIAA proposes redevelopment of 76 acres of land in the southwest portion of the Ontario International Airport. Existing improvements would be demolished, and existing uses and operations, including the OIAA Administrative Offices and South Secured Area Access Point (SAAP), would be terminated and/or relocated. The proposed development includes a cargo building, aircraft apron, parking structure, and related site improvements such as landscaping, and for utility connections and vehicle access. The proposed Project is further described in the attached Notice of Preparation.

Project Location

The Project site includes portions of Assessor's Parcel Numbers (APN) 11326106, 11326107, 11326108, 11327101, and 11327102 in the City of Ontario, southwest San Bernardino County. The Project site is bound by the Cucamonga Canyon Channel on the east and the airport airfield on the north. The majority of the Project site is located north of East Avion Street with the remainder of the site located south of East Avion Street and east of South Hellman Avenue. The segment of East Avion Street east of South Hellman Avenue will be realigned to meet East Jurupa Avenue; this realignment is a not part of this Project and is part of a previously planned project undergoing separate environmental review. Regional access is provided by State Route 60 (SR-60), approximately 1.25 mile to the south; Interstate 10 (I-10), 1.0 mile to the north, and I-15 approximately 2.75 miles to the east. Please see the attached Notice of Preparation for maps of the Project site and surrounding areas.

Greetings,

A records check of the Tribal Historic preservation office's cultural registry revealed that this project is not located within the Tribe's Traditional Use Area. Therefore, we defer to the other tribes in the area. This letter shall conclude our consultation efforts.

Thank you,

Subject: Request for Information on Tribal Cultural Resources for Proposed Ontario International Airport South Cargo Center Project- San Manuel Band of Mission Indians

Dear Nicole,

Thank you for contacting the San Manuel Band of Mission Indians (SMBMI) regarding the above-referenced project. SMBMI appreciates the opportunity to review the project documentation, which was received by the Cultural Resources Management Department on December 4th. The proposed project is located outside of Serrano ancestral territory and, as such, SMBMI will not be requesting to receive consulting party status with the lead agency or to participate in the scoping, development, or review of documents created pursuant to legal and regulatory mandates.

Kind regards,
Ryan Nordness
