Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ Business and Professions Code for this reason:

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:
Carrier Cumberlands Expiration Date 7/99
Policy Number _____

☐ (This section need not be completed if the permit is for one hundred dollars ($100) or less)
I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions. AMERI GAS

Date: 4-1-99 Applicant: _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).
Lender's Name _____
Lender's Address _____

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.

☐ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person ha a permit form that division.

Division of Industrial Safety Permit Number _____ C

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under the provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

Fred Dauptain 8/21/87

CONTRACTOR DATE

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B.&P.C. for the reason _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

This section need not be completed if the permit is for one hundred dollars ($100) valuation or less.

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

WARNING: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars ($100,000), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest thereon, and attorney's fees.

I hereby affirm that I have complied with the requirements of the Workers' Compensation declaration and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

OWNER - BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____ B & P.C. for this reason _____

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

SIGNATURE Eric R. Hart DATE 12-30-86

OWNER BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____, B.& P.C. for this reason: _____

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure, or a certificate of Workers' Compensation Insurance, or a certified copy thereof (Sec. 3800, Labor Code).

VALIDATION

Which property valuation is now stale. This fee constitutes a permit to do the work described herein. This permit will expire if work is not started within 180 days or if work is abandoned for more than 180 days.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of chapter 9 (commencing with section 7000) of division 3 of the Business and Professions Code and my license is in full force and effect.

License Class C-39 License No. 394337

Contractor's State License Board

X [signature] Date 2-3-93

OWNER BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: I, as owner of the property or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds improvements thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. B & P. for this reason

Date Owner

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Workers' Compensation Insurance or a certified copy thereof (Sec. 3800, Labor Code).

Policy No. 3072 Company Self Insured 2/10/93

I have filed with the city

CERTIFICATE OF EXEMPTION (Owner)

WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) or less).

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

WARNING: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars ($100,000), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney's fees.

I am aware of the provisions of Section 3700 of the Labor Code which require every employer to be insured against liability for Workers' Compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the work of this permit.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

OWNER - BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.), I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 commencing with Section 7000 of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class _____ License No _____

Expiration Date _____ Contractor Signature _____

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason: (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code), or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.)

☐ I am exempt under Sec. _____ Business and Professions Code for this reason

WORKERS COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier _____ Expiration Date _____

Policy Number _____

☐ This section need not be completed if the permit is for one hundred dollars ($100) or less.

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date _____ Applicant _____

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lender's Address _____

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, shoring, scaffolding, falsework, or demolition or dismantling thereof will be more than 36 feet high.

☐ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as listed above, unless such person has a permit from that division.

Division of Industrial Safety Permit Number _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect.

Ed Ehlhoff — JULY 27-88

Contractor — DATE

OWNER - BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

☐ I am exempt under Sec. _____ B. & P.C. for this reason _____

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Workers' Compensation Insurance, or a certificate of exemption, as provided for by Section 3800, Labor Code.

Policy No. 045 26 21 Company STATE FUND

☒ Copy is filed with the City. ☐ Certified copy is hereby furnished.

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) valuation or less.)

☐ I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code).

OWNER - BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: (Sec 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law, Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, any such building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class C36 License No. 595777
Expiration Date _____ Contractor Signature Richard Cochran

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ Business and Professions Code for this reason:

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☑ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier TUTICA INS. Expiration Date 4/24/96
Policy Number 0344174407

☐ (This section need not be completed if the permit is for one hundred dollars [$100] or less)
I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 8-24-95 Applicant: Richard Cochran

WARNING: FAILURE TO SECURE WORKERS; COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____
Lender's Address _____

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.

☐ As owner-builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person has a permit form that division:

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

Deanna L Skinner 12-28-87
(Signature) (Date)

OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code): Any city or county which requires a permit to construct alter improve demolish or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom, and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec _____ B & P.C. for this reason _____

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE 4/1/93 SF

This section need not be completed if the permit is for one hundred dollars ($100) valuation or less.

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

I AM AWARE OF THE PROVISIONS OF SECTION 3700 OF THE LABOR CODE WHICH REQUIRE EVERY EMPLOYER TO BE INSURED AGAINST LIABILITY FOR WORKERS' COMPENSATION OR TO UNDERTAKE SELF-INSURANCE IN ACCORDANCE WITH THE PROVISIONS OF THAT CODE, AND I WILL COMPLY WITH SUCH PROVISIONS BEFORE COMMENCING THE PERFORMANCE OF THE WORK OF THIS PERMIT.

IMPORTANT: If after making this Certificate of Exemption you should become subject to the Workers' Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

CONSTRUCTION LENDING AGENCY

OWNER – BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Codes: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

I am exempt under Sec. _____ B & P.C. for this reason _____

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

X [signature] Owner 5/31/88
SIGNATURE DATE

OWNER BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code): Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. B.& P.C. for this reason

OWNER BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does the work himself or through his own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

I am exempt under Sec. _____ B.&P.C. for this reason

DATE OWNER

WORKER'S COMPENSATION DECLARATION

I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are RP9580 FAIRMONT 2-10-89

Certificate of Exemption filed with the Director of Industrial Relations.

Where there is no employees, the performance of the work for which this permit is issued shall not subject any person or any employer to the workers' compensation laws of California.

I agree that in the event that I should employ any person in any manner so as to become subject to the workers' compensation laws of California, I will forthwith comply with the provisions of said laws and file a certificate of compliance with the City.

I HEREBY AFFIRM THAT I AM LICENSED UNDER PROVISIONS OF CHAPTER 9 (COMMENCING WITH SECTION 7000) OF DIVISION 3 OF THE BUSINESS AND PROFESSIONS CODE AND MY LICENSE IS IN FULL FORCE AND EFFECT, OR THAT I AM EXEMPT THEREFROM, AND THAT MY WORKERS' COMPENSATION INSURANCE CARRIER AND POLICY NUMBER ARE AS DECLARED ABOVE. I AGREE THAT IF I EMPLOY ANY PERSON OR PERSONS IN ANY MANNER SO AS TO BECOME SUBJECT TO THE WORKERS' COMPENSATION LAWS OF CALIFORNIA, I SHALL FORTHWITH COMPLY WITH THE PROVISIONS OF SAID LAWS AND FURNISH A CERTIFICATE OF COMPLIANCE TO THE CITY BEFORE THE COMMENCEMENT OF THE WORK. I UNDERSTAND THAT FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE AS REQUIRED BY LAW IS UNLAWFUL AND SHALL SUBJECT ME TO STOP WORK ORDER OF THE ENTIRE BUILDING OR STRUCTURE UNTIL COMPLIANCE IS OBTAINED. I UNDERSTAND THAT MY FAILURE TO COMPLY WITH ONE OF THE FOREGOING REQUIREMENTS MAY SUBJECT ME TO A FINE UP TO ONE HUNDRED DOLLARS ($100) OR IMPRISONMENT IN THE COUNTY JAIL NOT EXCEEDING 90 DAYS, OR BOTH. I UNDERSTAND THAT THIS PERMIT SHALL BE VOID AND SUBJECT TO REVOCATION IF I FAIL TO COMPLY WITH THE ABOVE PROVISIONS.

CONSTRUCTION LENDING AGENCY

The undersigned Owner hereby appoints the following lender to advise the City of Ontario that the above mentioned property is security for a construction loan.

Lender

Address

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above mentioned property for inspection purposes.

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code and my license is in full force and effect

SIGNATURE [signature] DATE

OWNER BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance also requires the applicant for such permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

( ) as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

( ) as owner of the property, and I am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

( ) I am exempt under Sec. _____, B & P C. for the reason _____

Date _____ Owner _____

WORKER'S COMPENSATION DECLARATION

I hereby affirm that I have a certificate of consent to self-insure or a certificate of Workers' Compensation Insurance or a certified copy thereof (Sec. 3700, Labor Code)

Policy No. BWC 44 6881 Company O.A.C. Expiration Date 6-30-87

X Copy is filed with the City

( ) Certified copy is hereby furnished

CERTIFICATE OF EXEMPTION FROM WORKERS' COMPENSATION INSURANCE

(This section need not be completed if the permit is for one hundred dollars ($100) valuation or less)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the Workers' Compensation Laws of California.

NOTICE TO APPLICANT: If after making this Certificate of Exemption you become subject to the Workers' Compensation provisions of the Labor Code you must forthwith comply with such provisions or this permit shall be revoked immediately.

CONSTRUCTION LENDING AGENCY

I hereby affirm that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civil Code)

OWNER BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he is licensed pursuant to the provisions of the Contractor's License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

I, as owner of the property or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does the work himself or through his own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.).

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the projects with a contractor(s) licensed pursuant to the Contractor's License Law.).

I am exempt under Sec. _____ B.&P.C. for this reason

DATE OWNER

WORKER'S COMPENSATION DECLARATION

I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are RP9580 FAIRMONT 2-10-89

Certificate of Exemption filed with the Director of Industrial Relations.

Where there is no employees, the performance of the work for which this permit is issued shall not subject any person or any employer to the workers' compensation laws of California.

I agree that in the event that I should employ any person in any manner so as to become subject to the workers' compensation laws of California, I will forthwith comply with the provisions of said laws and file a certificate of compliance with the City.

I HEREBY AFFIRM THAT I AM LICENSED UNDER PROVISIONS OF CHAPTER 9 (COMMENCING WITH SECTION 7000) OF DIVISION 3 OF THE BUSINESS AND PROFESSIONS CODE AND MY LICENSE IS IN FULL FORCE AND EFFECT, OR THAT I AM EXEMPT THEREFROM, AND THAT MY WORKERS' COMPENSATION INSURANCE CARRIER AND POLICY NUMBER ARE AS DECLARED ABOVE. I AGREE THAT IF I EMPLOY ANY PERSON OR PERSONS IN ANY MANNER SO AS TO BECOME SUBJECT TO THE WORKERS' COMPENSATION LAWS OF CALIFORNIA, I SHALL FORTHWITH COMPLY WITH THE PROVISIONS OF SAID LAWS AND FURNISH A CERTIFICATE OF COMPLIANCE TO THE CITY BEFORE THE COMMENCEMENT OF THE WORK. I UNDERSTAND THAT FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE AS REQUIRED BY LAW IS UNLAWFUL AND SHALL SUBJECT ME TO STOP WORK ORDER OF THE ENTIRE BUILDING OR STRUCTURE UNTIL COMPLIANCE IS OBTAINED. I UNDERSTAND THAT MY FAILURE TO COMPLY WITH ONE OF THE FOREGOING REQUIREMENTS MAY SUBJECT ME TO A FINE UP TO ONE HUNDRED DOLLARS ($100) OR IMPRISONMENT IN THE COUNTY JAIL NOT EXCEEDING 90 DAYS, OR BOTH. I UNDERSTAND THAT THIS PERMIT SHALL BE VOID AND SUBJECT TO REVOCATION IF I FAIL TO COMPLY WITH THE ABOVE PROVISIONS.

CONSTRUCTION LENDING AGENCY

The undersigned Owner hereby appoints the following lender to advise the City of Ontario that the above mentioned property is security for a construction loan.

Lender

Address

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above mentioned property for inspection purposes.

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Proffessions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ Business and Professions Code for this reason:

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.

☐ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person ha a permit form that division.

Division of Industrial Safety Permit Number _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class C10 License No. 331064
Expiration Date 8-31-2000 Contractor Signature John Reagan

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Proffessions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ Business and Professions Code for this reason:

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☑ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier AMERICAN AUTO INS. Expiration Date 10-1-99
Policy Number WP 8078717D

☐ (This section need not be completed if the permit is for one hundred dollars [$100] or less)
I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 3-3-99 Applicant: John Reagan

WARNING: FAILURE TO SECURE WORKERS; COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class _____ License No. _____

Expiration Date _____ Contractor Signature _____

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ exempt under Sec. _____ Business and Professions Code for this reason: _____

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier _____ Expiration Date _____

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class B License No. 531509

Expiration Date 5/31/00 Contractor Signature

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Proffessions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ Business and Professions Code for this reason:

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier _____ Expiration Date _____

Policy Number _____

X ☐ (This section need not be completed if the permit is for one hundred dollars [$100] or less)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 11/18/98 Applicant:

WARNING: FAILURE TO SECURE WORKERS; COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lender's Address _____

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.

☐ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person ha a permit form that division.

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Proffessions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

I exempt under Sec. _____ Business and Professions Code for this reason:

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☐ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier _____ Expiration Date _____

Policy Number _____

☑ (This section need not be completed if the permit is for one hundred dollars [$100] or less)
I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 08/27/98 Applicant: Robert Porter

WARNING: FAILURE TO SECURE WORKERS; COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lender's Address _____

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.

☐ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person ha a permit form that division.

Division of Industrial Safety Permit Number _____

I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.

☐ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person ha a permit form that division.

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class _____ License No. _____

Expiration Date _____ Contractor Signature _____

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Proffessions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

LICENSED CONTRACTORS DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class ~~B~~ C12 License No. 288402

Expiration Date 6/30/97 Contractor Signature _____

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Proffessions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law Chapter 9 (commencing with Sectin 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500).:

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale.).

☐ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.).

☐ I am exempt under Sec. _____ Business and Professions Code for this reason:

Date _____ Owner _____

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

☒ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier SAFECO Expiration Date 1-1-98

Policy Number WC 227310 D

☐ (This section need not be completed if the permit is for one hundred dollars [$100] or less)
I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date 3-3-97 Applicant: _____

WARNING: FAILURE TO SECURE WORKERS; COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS ($100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.).

Lender's Name _____

Lender's Address _____

DIVISION OF INDUSTRIAL SAFETY PERMIT CERTIFICATION

The California Health and Safety Code requires a Division of Industrial Safety Permit as a prerequisite to permit issuance unless the applicant signs one of the certificates below.

☐ I certify that no excavation 5 feet or more feet in depth, into which a person is required to descend, will be made in connection with work authorized by this permit, and that no building, structure, scaffolding, falsework, or demolition or dismantling thereof, will be more than 36 feet high.

☐ As owner/builder I will not employ anyone to do work which would require a permit from the Division of Industrial Safety, as noted above unless such person ha a permit form that division.

WORKER'S COMPENSATION DECLARATION

I hereby affirm under Penalty of Perjury one of the following:

( ) I have and will maintain a Certificate of Consent of self-insure for worker's compensation.

(X) I have and will maintain Worker's Compensation Insurance.

Policy No.: 1814648-05 Carrier: State Fund

( ) I certify that, in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provision of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

I certify that I have read this application and state that the above information is correct. I agree to comply with all City and State laws relating to the building construction, and hereby authorize representatives of this City to enter upon the above-mentioned property for inspection purposes.

Notifications can not be acceptec without the required fee (Rule 301). Asbestos removals of less than 100 square feet are exempt from notification and fees. Please make checks payable to "SCAQMD". Fees are per notification, not refundable, and vary according to the project size. Fees are as follows:

PROJECT SIZE in square feet	DEMOLITION OR REMOVAL
1,000 or less	$ 43.02
1,001 to 5,000	$ 131.53
5,001 to 10,000	$ 307.86
10,001 to 50,000	$ 482.74
50,001 to 100,000	$ 699.60
100,001 or more	$ 1,166.00

ADDITIONAL SERVICE CHARGES	
Special Handling Fee	$ 43.02
Revision to Notification	$ 43.02
Returned Check Fee	$ 31.97
Planned Renovation	$ 482.74
Procedure 4 or 5 Plan	$ 482.74

ATTENTION: Keep a copy of your notification. State law requires that you provide a copy of the demolition notification to Building and Safety before issuance of a demolition permit. For questions call 909-396-2336. Please mail the form and fee to AQMD. Mailing saves time, money and reduces traffic and air pollution

BUILDING PERMIT NO: 68502
PERMIT ISSUED ON: 4-27-88

Gentlemen:

The improvements at subject address on real property in the City of Ontario, have been constructed with periodic inspections by Building Department inspection personnel for compliance with approved plans and applicable City building codes, zoning ordinances and special conditions as required by various City commissions and boards.

Final inspection on these improvements was performed on December 1, 1989. All City agencies with concerns regarding these improvements have given their respective clearances.

You are, therefore, hereby notified that this property and its permitted improvements are released for occupancy.

Sincerely,

Tony M. Lopez

CERTIFICATE OF COMPLIANCE AND FIELD INSPECTION ENERGY CHECKLIST	ENV-1C (Page 1 of 1)

NONRESIDENTIAL, HIGH-RISE RESIDENTIAL, HOTEL/MOTEL BUILDINGS ALTERATIONS FOR REROOFING

Site Address: ~~2132 Avion St~~ 1230 S. TOWER	**Climate Zone: 10**	# of Stories:
Building Type: ☑ Non Residential ☐ High-Rise Residential ☐ Hotel/Motel	**Enforcement Agency: City of Ontario**	
Existing roofing type: B.U.R.	New roofing type: GAF	Date: 5-27-2010
Total roof Area: 15,200 ft²	Total reroof Area: 15,200 ft²	% reroof Area: 100 %

COOL ROOF REQUIREMENTS FOR CLIMATE ZONE 10

Note if the roofing product is not CRRC certified, this prescriptive compliance approach cannot be used. Use the Overall Envelope Approach or Performance Approach.

Where more than 50% of the roof or more than 2,000 sqft of roof, whichever is less, is being replaced, recovered or recoated, this altered roof area shall meet the cool roof requirements.

A. NONRESIDENTIAL BUILDINGS:

1. For **low-sloped** roofs (2:12 and below):
   - Minimum 3-year aged solar reflectance = 0.55 AND minimum thermal emittance = 0.75, or
   - Minimum solar reflectance index (SRI) = 64
2. For **steep-sloped** roofs (greater than 2:12) with roofing products density less than 5 lb/ft²:
   - Minimum 3-year aged solar reflectance = 0.20 AND minimum thermal emittance = 0.75, or
   - Minimum solar reflectance index (SRI) = 16
3. For **steep-sloped** roofs (greater than 2:12) with roofing products density of 5 lbs/ft² or more:
   - Minimum 3-year aged solar reflectance = 0.15 AND minimum thermal emittance = 0.75, or
   - Minimum solar reflectance index (SRI) = 10

B. HIGH-RISE RESIDENTIAL AND HOTEL/MOTEL BUILDINGS:

1. For **low-sloped** roofs (2:12 and below):
   - Minimum 3-year aged solar reflectance = 0.55 AND minimum thermal emittance = 0.75, or
   - Minimum solar reflectance index (SRI) = 64

CHECK THE APPLICABLE BOX BELOW FOR THE EXEMPTION OF "COOL ROOF" REQUIREMENTS:

The roof area covered by building integrated photovoltaic panels / solar thermal panels.

Roof constructions that have thermal mass over the roof membrane with a weight of at least 25 lb/ft².

CRRC Product ID Number[1]	Roof Slope ≤2:12	Roof Slope >2:12	Product Weight <5lb/ft²	Product Weight ≥5lb/ ft²	Product Type[2]	Aged Solar Reflectance[3]		Thermal Emittance	SRI[5]	Special Feature[6]
	☑	☐	☑	☐		☐[4]				☐
	☐	☐	☐	☐		☐[4]				☐

1. The CRRC Product ID Number can be obtained from the Cool Roof Rating Council's Rated Product Directory at www.coolroofs.org/products/search.php

2. Indicate the type of product is being used for the roof top, i.e. single-ply roof, asphalt roof, metal roof, etc.

3. If the Aged Reflectance is not available in the Cool Roof Rating Council's Rated Product Directory then use the Initial Reflectance value from the same directory and use the equation (0.2+0.7(ρ initial - 0.2) to obtain a calculated aged value. Where ρ is the Initial Solar Reflectance.

4. Check box if the Aged Reflectance is a calculated value using the equation above.

5. The SRI value needs to be calculated from a spreadsheet calculator at http://www.energy.ca.gov/title24/

6. Indicate Special Feature on this page of the Inspection Checklist Form below.

To apply **Liquid Field Applied Coatings,** the coating must be applied across the entire roof surface and meet the dry mil thickness or coverage recommended by the coatings manufacturer and meet minimum performance requirements listed in Energy Standards § 118(i)4. Select the applicable coating:

☐ Aluminum-Pigmented Asphalt Roof Coating ☐ Cement-Based Roof Coating ☐ Other _____

SPECIAL FEATURES INSPECTION CHECKLIST

Exempt. No Air Conditioning space. Exempt from a Cool roof

Description/Comments: REMOVAL OF UNDERGROUND STORAGE TANKS INCLUDING ELECTRICAL CABLING REMOVAL AND COMPACTION PER PLAN

OWNER BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason: I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professional Code).

I, as owner of the property, am exclusively contracting with licensed contractors to

Date _____ Signature of Owner _____

LICENSED CONTRACTOR DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 commencing with Section 7000 of Division 3 of the Business and Professions Code, and my license is in

License # 586870 Lic. Clas A B HAZ Exp. Dat 1-31-14
City Lic.# 5-8834 Expires: 12-31-13

1/17/13 Date _____ Signature of Contractor

WORKER'S COMPENSATION DECLARATION

I hereby affirm under Penalty of Perjury one of the following:
( ) I have and will maintain a Certificate of Consent of self-insurance for Worker's Compensation

WC Policy No WC003304410 Carrier Companion Insurance

( ) I certify that, in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to Worker's Compensation Laws of California.

NOTICE TO APPLICANT: If, after making this Certificate of Exemption, you should become subject to the Worker's Compensation provisions of the Labor Code, you must forthwith comply with such provisions or this permit shall be deemed revoked.

I certify that I have read this application and state that the above information is correct. I agree to comply with all City and State Laws related to the building construction, and hereby authorize representatives of this City to enter upon the above mentioned property

NOTES: _____

GENERAL NOTES

1. INFORMATION GIVEN ON THE DRAWINGS REGARDING EXISTING INSTALLATION HAS BEEN OBTAINED FROM THE BEST SOURCES AVAILABLE. HOWEVER IT CANNOT BE GUARANTEED IN ALL RESPECTS. VERIFY ALL SUCH INFORMATION BEFORE PROCEEDING WITH THE NEW WORK THAT MAY BE AFFECTED UPON. INCLUDE AS A PART OF THE CONTRACT ALL WORK THAT ARE REQUIRED TO PRODUCE INDICATED RESULT BEFORE SUBMITTING THE BID PROPOSAL.

2. THE SCOPE OF WORK SHALL INCLUDE THE FURNISHING OF ALL MATERIALS, EQUIPMENT, SUPPLIES AND LABOR AND THE PERFORMANCE OF ALL OPERATIONS NECESSARY FOR THE INSTALLATION OF ALL ELECTRICAL WORK, COMPLETE AND IN OPERATING CONDITION, ALL TO THE SATISFACTION OF ARCHITECT. THE ENTIRE INSTALLATION SHALL BE READY IN EVERY RESPECT FOR SATISFACTORY AND EFFICIENT OPERATION WHEN COMPLETED.

3. PROVIDE ALL MATERIALS AND EQUIPMENT TO MAKE FINAL CONNECTIONS TO ALL EQUIPMENT AND APPLIANCES.

4. NOTHING DESCRIBED HEREIN OR INDICATED ON THE DRAWINGS SHALL BE CONSTRUED TO PERMIT WORK NOT CONFORMING TO THE MOST STRINGENT OF THE APPLICABLE CODES AND REGULATIONS.

5. ALL WORK SHALL BE DONE IN FULL COMPLIANCE WITH THE NATIONAL ELECTRICAL CODE, 2011 EDITION AND IN ACCORDANCE WITH THE REQUIREMENTS OF THE LOCAL AUTHORITIES HAVING JURISDICTION.

6. ALL EQUIPMENT AND MATERIALS SHALL BE NEW AND SHALL BE LISTED BY THE UNDERWRITER'S LABORATORIES, MANUFACTURED IN FULL COMPLIANCE WITH ASME, ANSI, IEEE AND NEMA.

7. ELECTRICAL DRAWINGS ARE DIAGRAMMATIC. SIZES, LOCATION OF EQUIPMENT, AND WIRING ARE SHOWN TO SCALE WHERE POSSIBLE, BUT MAY BE DISTORTED FOR CLARITY. FINAL LOCATIONS OF OUTLETS AND EQUIPMENT SHALL BE ADJUSTED AS DICTATED BY EXISTING CONDITIONS. IT IS NOT WITHIN THE SCOPE OF DRAWINGS TO SHOW ALL NECESSARY BENDS, OFFSETS, AND PULLBOXES. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO INSTALL HIS WORK TO CONFORM TO THE STRUCTURE. CONDUIT RUNS ARE INDICATED DIAGRAMMATICALLY, DETERMINE EXACT LOCATION IN THE FIELD.

8. DURING THE PROGRESS OF THE WORK, MAKE A CAREFUL RECORD OF ALL CHANGES BY WHICH THE ACTUAL INSTALLATION DIFFERS FROM THAT INDICATED ON THE CONTRACT DRAWINGS AND DOCUMENTS.

9. ELECTRICAL CONTRACTOR SHALL CONTACT THE SERVING UTILITY COMPANY REGARDING SERVICE REQUIREMENTS PRIOR TO HIS BID AND INCLUDE ALL RELATED WORK IN HIS BID PRICE.

10. ANY ERROR, OMISSION OR DESIGN DISCREPANCY ON THE CONSTRUCTION DOCUMENTS SHALL BE BROUGHT TO THE ATTENTION OF ARCHITECT FOR CLARIFICATION OR CORRECTION PRIOR TO INSTALLATION.

11. REFER TO MECHANICAL CONSTRUCTION DOCUMENTS AND PROVIDE CONTROL WIRING AND DEVICES INDICATED THERETO TO BE PROVIDED BY THE ELECTRICAL CONTRACTOR.

12. THE WORD "VERIFY LOCATION" ABBREVIATED AS "V.L." SHALL MEAN TO COORDINATE THE EXACT LOCATION OF THE DEVICE AND/OR EQUIPMENT BEING REFERRED TO WITH TENANT OR OWNER AND TO PROVIDE NECESSARY ADJUSTMENT WITHOUT ANY EXTRA COST TO THE OWNER.

13. CONTRACTOR SHALL GUARANTEE ALL WORKMANSHIP, EQUIPMENT AND MATERIALS FOR A PERIOD OF NOT LESS THAN ONE(1) YEAR FOR THE OWNER, SHOULD ANY DEFECTS OCCUR DURING THIS PERIOD, THE CONTRACTOR SHALL PROMPTLY REPAIR OR REPLACE THE DEFECTIVE ITEMS AT NO ADDITIONAL COSTSS TO THE OWNER, INCLUDING COST OF LABOR AND MATERIALS.

14. ARCHITECTURAL SPECIFICATIONS, GENERAL, SPECIAL AND SUPPLEMENTAL CONDITIONS SHALL FORM A PART OF THIS CONSTRUCTION DOCUMENT.

15. UPON COMPLETION OF THE WORK, CONDUCT AN OPERATING TEST AND DEMONSTRATE TO ARCHITECT THAT ALL EQUIPMENT ARE OPERATING IN A SATISFACTORY MANNER AND IN ACCORDANCE TO THE REQUIREMENTS OF DRAWINGS.

16. USE ELECTRICAL METALLIC TUBING FOR TRADE SIZES OF 3/4 TO 4 INCHES INCLUSIVE IN DRY LOCATIONS, USE RIGID METALLIC CONDUIT IN EXTERIOR INSTALLATION.

17. USE FLEXIBLE STEEL CONDUITS FOR SHORT CONNECTIONS TO MOTORS AND IN DRY LOCATIONS I.E. ABOVE ACCESSIBLE CEILING FOR LIGHTING AND CONVENIENT OUTLETS BRANCH CIRCUITING, AND IN STUD WALLS WHERE ALLOWED BY THE LOCAL CODE. USE LIQUID TIGHT FLEXIBLE CONDUITS IN AREAS EXPOSED TO WEATHER. PROVIDE INTEGRAL GROUNDING CONDUCTOR FOR LENGTHS EXCEEDING 6 FEET. FLEXIBLE CONDUITS FOR CONNECTION TO THE ROOF TOP AIR CONDITIONERS SHALL BE PROVIDED WITH INTEGRAL GROUND WIRE REGARDLESS OF THE LENGTH.

18. OUTLET AND JUNCTION BOXES SHALL BE GALVANIZED PRESSED STEEL WITH PLUGGED HOLES. ALL BOXES SHALL BE OF NEC CODE SIZE FOR THE NUMBER OF WIRES OR CONDUITS PASSING THROUGH OR TERMINATING THEREIN BUT IN NO CASE SHALL ANY BOX BE LESS THAN 4 INCHES SQUARE BY 2-1/8 INCHES DEEP. NO PLASTIC BOXES SHALL BE ALLOWED.

19. SINGLE CONDUCTOR COPPER WIRE WITH 600 VOLTS INSULATION SHALL BE USED FOR GENERAL WIRING IN CONDUIT UNLESS OTHERWISE SHOWN. WIRES SHALL BE ALLOWED ALL CONTACTS, GROUNDING AND NEUTRAL BUS BARS SHALL BE COPPER.

20. CONDUCTORS 8-AWG AND LARGER SHALL BE STRANDED TYPE. CONDUCTORS 10-AWG AND SMALLER SHALL BE SOLID WITH COLOR CCODED INSULATION.

21. PROVIDE CONDUCTORS TYPE THW OR THWN FOR DRY AND WET LOCATIONS AND THHN OR XHHW FOR DRY LOCATIONS ONLY.

22. NOT USED.

23. MINIMUM SIZE CONDUCTOR FOR USE IN LIGHTING AND POWER BRANCH CIRCUITS SHALL BE 12-AWG.

24. NO WIRE AMPACITY REDUCTION SHALL BE ALLOWED ON THE FEEDERS AND BRANCH CIRCUIT WIRING INCLUDING NEUTRALS UNLESS APPROVED BY ARCHITECT.

25. IDENTIFY CONDUCTORS AS TO PHASE OR LEG IN EACH PANEL BOARD WITH IDENTIFYING TAPE COLOR CODED PER FOLLOWING LIST:

VOLTAGE	208/120	480/277
A PHASE	BLACK	BROWN
B PHASE	RED	ORANGE
C PHASE	BLUE	YELLOW
NEUTRAL	WHITE	GRAY
GROUND	GREEN	GREEN

26. LABEL ALL CONDUIT, JUNCTION BOXES, PANELS AND TRANSFORMERS WITH THE VOLTAGE AND CIRCUIT NUMBER(S).

27. WIRES AND CONDUITS SIZES INDICATED THROUGHOUT THE DRAWINGS ARE BASED ON COPPER CONDUCTORS.

28. MINIMUM SIZE OF CONDUIT FOR POWER, LIGHTING, AND MECHANICAL EQUIPMENT SHALL BE 1/4" (1/2IN).

29. PROVIDE SPECIFICATION GRADE, HEAVY DUTY, AC RATED, QUIET LIGHT SWITCHES, 20A, AT 120V (AND 277V WHERE APPLICABLE), SINGLE POLE AND 3-WAY AS SHOWN ON THE DRAWINGS, COLOR SHALL BE WHITE.

30. PROVIDE MANUAL MOTOR STARTER WITH OVERLOAD ELEMENT FOR SMALL MOTORS WHERE INDICATED.

31. WIRING DEVICES SHALL BE SPECIFICATION GRADE MANUFACTURED BY LEVITON, A&H, HUBELL OR SQUARE D WITH A MINIMUM RATING OF 20 AMPS. USE BROWN, WHITE OR IVORY FOR NORMAL POWER AND RED FOR EMERGENCY POWER. USE ORANGE FOR INSULATED, GROUNDED CIRCUIT OR RECEPTACLE.

32. WHEN OUTLETS OF THE SAME OR DIFFERENT SYSTEMS ARE LOCATED IN THE SAME AREA, ARRANGE ALL OUTLETS AND DEVICES HORIZONTALLY OR VERTICALLY (AS REQUIRED) FOR A UNIFORM AND NEAT APPEARANCE. ALL WIRING DEVICES WITH THE SAME MOUNTING HEIGHT, WHERE INDICATED ON THE SAME WALL/PARTITION, SHALL BE INSTALLED WITH A COMMON MULTI-GANG WALL PLATE. VERIFY ALL MISSING MOUNTING HEIGHT WITH ARCHITECT.

33. SHOP DRAWING SUBMITTALS ARE REQUIRED FOR THE FOLLOWING MATERIAL/EQUIPMENT:

A - LIGHTING FIXTURES.
B - SPECIAL OR BUILT-TO-ORDER EQUIOMENT.
C - LARGE PULL BOXES.
D - NEW PANEL BOARDS AND CIRCUIT BREAKERS.

34. LIGHTING FIXTURES SHALL BE COMPLETE WITH ALL GLASSWARE, FITTERS, CANOPIES, SOCKETS, MOUNTING BRACKETS, REFLECTORS, LAMPS AND ALL ACCESSORIES AS REQUIRED.

35. FIXTURE SCHEDULE INDICATES GENERAL DESCRIPTION OF LIGHTING FIXTURES AND MANUFACTURER'S CATALOG NUMBERS. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO STUDY THE SCHEDULE AND CAREFULLY REVIEW ELECTRICAL AND ARCHITECTURAL PLANS AND SPECIFICATIONS TO DETERMINE THE CORRECT CEILING CONFIGURATION AND FIXTURES TO BE FURNISHED SO THAT BOTH CEILING SYSTEM AND LIGHT FIXTURE CONSTRUCTION MATCHES.

36. COORDINATE EXACT LOCATION OF THE LIGHTING FIXTURES WITH THE ARCHITECTURAL DRAWINGS. IF ANY DISCREPANCIES EXIST, THEY SHALL BE BROUGHT TO THE ATTENTION OF ARCHITECT FOR CLARIFICATION PRIOR TO INSTALLATION.

37. LIGHTING FIXTURES FINISHES WHETHER OR NOT SHOWN ON THE DRAWINGS SHALL BE APPROVED BY BUILDING OWNER.

38. ALL FLUORESCENT LAMP BALLASTS SHALL BE HIGH POWER FACTOR, "A" SOUND RATING AND SHALL BE ELECTRONIC TYPE WITH THD OF 10% MAXIMUM.

39. POWER DISTRIBUTION EQUIPMENT SHALL BE PRODUCTS OF THE SAME MANUFACTURER. ACCEPTABLE MANUFACTURERS SHALL BE SQUARE D CO. AND GENERAL ELECTRIC CO.

40. MANUALLY OPERATED ELECTRICAL EQUIPMENT SHALL REQUIRE 36" CLEAR AND UNOBSTRUCTED SPACE IN FRONT OF THE EQUIPMENT.

41. PROVIDE HEAVY DUTY AND HORSEPOWER RATED SAFETY DISCONNECT SWITCHES WITH THE TYPE OF FUSES AS SHOWN ON PLANS.

42. ALL EXTERIOR ELECTRICAL DEVICES AND EQUIPMENT SHALL BE WEATHERPROOF TYPE.

43. PROVIDE GROUNDING SYSTEM PER NEC-250 AND AS INDICATED.

44. ALL METAL AND NON-CURRENT CARRYING PART OF THE ELECTRICAL EQUIPMENT SHALL BE BONDED TO GROUND PER NEC CODE ARTICLE 250.

45. PROVIDE A TYPE-WRITTEN INDEX CARD FOR EACH PANEL BOARD INDICATING NAME OR NUMBER OF THE ROOM, AREA, OR EQUIPMENT USED BY EACH BRANCH CIRCUIT. USE ROOM NUMBERS AND NAMES VERIFIED IN THE FIELD AND NOT NECESSARILY THOSE SHOWN ON THE DRAWINGS.

46. PROVIDE FIREPROOFING FOR RECESS MOUNTED FIXTURES. RECEPTACLES, AND CONDUIT IN FIRE RATED AREAS. SEE ARCHITECTURAL PLANS FOR DETAIL AND LOCATION.

47. NO SHUTDOWN WILL BE AUTHORIZED WITHOUT 24-HOUR NOTIFICATION.

48. TEMPORARY MATERIALS MUST BE REMOVED WITHOUT SHUTDOWN AS CONSTRUCTION PROGRESSES.

49. RESTORE PERMANENT FACILITIES TO THEIR FORMER OR NEWLY SPECIFIED CONDITION.

50. NO WORK/MAINTENACE CAN BE PERFORMED ON ELECTRICAL EQUIPMENT WHILE IT IS ENERGIZED.

51.AT OWNER REQUEST ARC FLASH AND COORDINATION SHALL BE PROVIDED BY A THIRD PARTY.

52. ALL FEEDERS CONDUCTORS, SWITCHBOARD AND PANELS ARE DESIGNED USING COPPER CONDUCTORS AND BUS. E.C. SHALL PROVIDE AN ALTERNATE BID WITH ALUMINUM MATERIAL IF REQUESTED BY OWNER.

53.MINIMUM TESTING IS REQUIRED BY E.C TO WHIC SURE:

- THE CONTINUITY OF THE CIRCUITS
- RESISTINT TEST FOR GROUNDING AT NEW SWITCHBOARDS,PANELBOARDS AND CONTROL PANEL
- TEST FOR PROPER VOLTAGE AT TRANSFORMER, SWITCHBOARD & CONTROL PANEL
- PROVIDE THE MEGGER TESTING ON ALL THE FEEDER TO VERIFY THE CONDITION OF ELECTRICAL INSULATION.

INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.

2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.

3. A search for facility records can only be conducted by one or all of the following:

-- a) Facility Name, Address, or Identification Number

-- b) Facility Application Number, or Permit to Operate Number; or

-- c) Facility Notice of Violation/Notice to Comply Number.

4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.

5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.

6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.

7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.

8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.

9. The charge for the direct cost of duplication is as follows: Paper Copies, $0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, $5.00 each. After a preliminary estimate, advance payment may be required.

10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs $10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.

8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.

9. The charge for the direct cost of duplication is as follows: Paper Copies, $0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, $5.00 each. After a preliminary estimate, advance payment may be required.

10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs $10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.

2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.

3. A search for facility records can only be conducted by one or all of the following:

-- a) Facility Name, Address, or Identification Number

-- b) Facility Application Number, or Permit to Operate Number; or

-- c) Facility Notice of Violation/Notice to Comply Number.

4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.

5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.

6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.

7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.

8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.

9. The charge for the direct cost of duplication is as follows: Paper Copies, $0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, $5.00 each. After a preliminary estimate, advance payment may be required.

10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs $10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

REPORT: On Thursday, 3/24/2011, at 0735 hrs., I arrived at this facility to conduct an E/L inspection and met with Willie Bennett, Manager, 909 605-0047. He explained that Kevin Strong, Technician, would be escorting me to the various sites that the FAA has around Ontario Airport. Mr. Bennett also explained the person that handled the paperwork had retired a couple years ago and a new person was starting to do the job-Bill Bottin - and he is out of the San Diego Office. I have spoken with him and he is going out to the site Wednesday (3/30/2011) to compare the permits to the equipment and we will meet to complete the inspection. There are other ID #s involved.

Mr. Strong and I looked at a total of 7 engines and none of them had the permits available. The name plate info was scetchy and will be filled in on the followup. Rule 1470 will also be visited. .The information is as follows:

1. SSC-SX - office, Detroit Diesel M/N , S/N , HP 528 , HRS 1673.4, KW 175
2. ONTDSX - office, John Deere M/N 6081AF001, S/N RG6081A159750, HP , HRS 128, KW 175
3. Control Tower, Cummins, M/N NT855C3, S/N 11321399, HP 230, HRS 465, KW 125
4. Rnwy west 8L-26R, ???? M/N D3000X190, S/N NCNC3418477, HP ??? , HRS 813.9, KVA 25
5. Rnwy east TWOB-SX, John Deere M/N 6081AF001, S/N RG6081A150572, HP ???, HRS 181, KW 175
6. Rnwy east, John Deere, M/N 4024TF281, S/N PE4024R031071, HP ???, HRS 13.7, KW 20
7. Ornwy east ONT PAPI26 EAST, White/Herculeser, M/N D30000X190, S/N NF3418820, HP ???, HRS 1479, KW 25

Reviewed by MV on 4/6 2011 who wrote: Permits say expired. Also, look at Rule 1472 too.

10/14/2011 - All permits have been reactived and 1472 does not apply in this case.

APPLICATION INSTRUCTIONS FOR
GASOLINE STORAGE & DISPENSING FACILITIES—RULE 461

WHO MUST APPLY FOR A PERMIT:

Any person installing or using one or more gasoline storage tanks with capacities of more than 251 gallons which are filled from tank-truck or trailer. Gasoline is defined as any petroleum distillate with a Reid vapor pressure of 3.9 pounds or more.

WHEN TO APPLY:

Prior to installation or alteration and prior to use if ownership or location is changes.

HOW TO APPLY:

A. Use Form 450 for each facility to be constructed, altered or change of ownership.

B. Except as noted every applicant filing for a permit shall pay a filing fee of $75 at the time the application is filed.
   1. When an application for change of ownership is filed within 12 months from the date of transfer and a permit had previously been granted for such equipment, in lieu of filing fee and initial permit fee, the applicant shall pay only a transfer fee of $75.00 for each permit unit being transferred from on person to another, payable at the time the application is filed.
   2. A fee is not required of a state or local governmental agency or public district.

C. Make checks payable to South Coast AQMD.

D. Fill in blanks and give all information requested on Form 450. Submit the completed form, properly signed by a responsible member of the organization.

E. Any vapor-recovery system being installed must be of a type certified by the California Air Resources Board. Submit drawings that show how the vapor piping is to be installed and give details of dispensing nozzles, vapor-return connectors and vapor-processing systems (if any).

FILL TYPE 17	**INSTRUCTION CODES**										
	1 Phase I Submerged fill	* Vapor recovery during filling of storage containers. * Fill-pipe discharge opening is submerged at a liquid level of 6 inches, or for tank fedded from side, entirely submerged at a liquid level of 18 inches. * Truck discharge connection is located away from the underground tank and the fill-line to the tank has an abrupt mechanical bend.									
	2 Offset fill										
TANK TYPE 16	1 Underground						2 Above Ground				
TYPE VAPOR CONTROL SYSTEM 19	Phase II	Balance Standard	90	Red Jacket Standard	81	Hirt Standard	83	Hasetech	86
		Balance Retractor	91	Red Jacket Retractor	82	Hirt Retractor	84	Healy	87
		Balance Hi Hose	92	Red Jacket Hi Hose	87	Hirt Hi Hose	85	Healy Hi Hose	88
		Exempt	70						

F. If an application for a permit is canceled or is denied and such denial becomes final, the filing fee shall not be refunded nor applied to any subsequent application.

G. Permit fees will be determined by the District in accordance with Rule 301. These fees shall be paid by the applicant within 30 days of notification or the permit will be canceled.

REQUIREMENTS OF RULE 461

Rule 461(a) regulates the transfer of gasoline from delivery trucks to storage tanks and requires installation of submerged fill-pipes and vapor-return connectors. These connectors allow gasoline vapors to be returned from the storage tank to the delivery truck and to be sent to the bulk terminal for processing (Phase I only).

Rule 461(b) regulates the transfer of gasoline into motor vehicle tanks larger than five gallons. A special fill nozzle and vapor piping allow gasoline vapors to be returned from the vehicle fuel tank to the storage tank or to vapor processing equipment (Phase II).

INCOMPLETE APPLICATIONS NOT ACCEPTABLE

CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) APPLICABILITY FORM 400 - CEQA

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts This form is a screening tool to assist the SCAQMD in clarifying whether or not the project[1] has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines §15060(a)] [2] Refer to the attached instructions for guidance in completing this form [3] For each Form 400-A application, also complete and submit one Form 400-CEQA If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project If you need assistance completing this form, contact Lori Inga at (909) 396-3109

FACILITY INFORMATION

Facility Name FAA - ONT ASR-9 **Facility ID** (6-Digit) _____

Project Description Replace existing diesel-fueled emergency standby engine generator with a Kohler 180ROZJ (John Deere 6081AF001 engine)

REVIEW FOR EXEMPTION FROM FURTHER CEQA ACTION

Check Yes or No ' as applicable

	Yes	No	Is this application for:
A	☐	☒	**A request for a change of permittee only (without equipment modifications)?**
B	☒	☐	**Equipment certification or equipment registration?**
C	☐	☒	**A CEQA and/or NEPA document previously or currently prepared that specifically evaluates this project?** If yes, a permit cannot be issued until a Final CEQA document and Notice of Determination is submitted
D	☐	☒	**Equipment damaged as a result of a disaster during state of emergency?**
E	☐	☒	**A Title V permit renewal (without equipment modifications)?**
F	☐	☒	**A Title V administrative permit revision?**
G	☐	☒	**The conversion of an existing permit into an initial Title V permit?**
H	☐	☒	**A functionally identical permit unit replacement with no increase in rating or emissions?**
I	☐	☒	**A change of daily VOC permit limit to a monthly VOC permit limit?**

If **Yes'** is checked for any question above, your application does not require additional evaluation for CEQA applicability Skip to page 2, SIGNATURES ' and sign and date this form

REVIEW OF IMPACTS WHICH MAY TRIGGER CEQA

Complete Sections I-VI by checking "Yes" or "No" as applicable To avoid delays in processing your application(s), explain all "Yes responses on a separate sheet and attach it to this form

	Yes	No	Section I – General
1	☐	☐	**Has this project generated any known public controversy regarding potential adverse impacts that may be generated by the project?** Controversy may be construed as concerns raised by local groups at public meetings, adverse media attention such as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc
2	☐	☐	**Is this project part of a larger project?**
			Section II – Air Quality
3	☐	☐	**Will there be any demolition, excavating, and/or grading construction activities that encompass an area exceeding 20,000 square feet?**
4	☐	☐	**Does this project include the open outdoor storage of dry bulk solid materials that could generate dust?** If Yes, include a plot plan with the application package

[1] A "project" means the whole of an action which has a potential for resulting in physical change to the environment including construction activities cleaning or grading of land improvements to existing structures and activities or equipment involving the issuance of a permit For example a project might include installation of a new or modification of an existing internal combustion engine dry-cleaning facility, boiler, gas turbine spray coating booth, solvent cleaning tank etc

	Yes	No	
5	☐	☐	**Would this project result in noticeable off-site odors from activities that may not be subject to SCAQMD permit requirements?** For example, compost materials or other types of greenwaste (i e , lawn clippings, tree trimmings, etc) have the potential to generate odor complaints subject to Rule 402 – Nuisance
6	☐	☐	**Does this project cause an increase of emissions from marine vessels, trains and/or airplanes?**
7	☐	☐	**Will the proposed project increase the QUANTITY of hazardous materials stored aboveground onsite or transported by mobile vehicle to or from the site by greater than or equal to the amounts associated with each compound on the attached Table 1?[4]**

Section III – Water Resources

8	☐	☐	**Will the project increase demand for water at the facility by more than 5,000,000 gallons per day?** The following examples identify some, but not all, types of projects that may result in a "yes" answer to this question 1) projects that generate steam, 2) projects that use water as part of the air pollution control equipment, 3) projects that require water as part of the production process, 4) projects that require new or expansion of existing sewage treatment facilities, 5) projects where water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project, and 6) projects that require new or expansion of existing water supply facilities
9	☐	☐	**Will the project require construction of new water conveyance infrastructure?** Examples of such projects are when water demands exceed the capacity of the local water purveyor to supply sufficient water for the project, or require new or modified sewage treatment facilities such that the project requires new water lines, sewage lines, sewage hook-ups, etc

Section IV – Transportation/Circulation

10			**Will the project result in** (Check all that apply)
	☐	☐	**a the need for more than 350 new employees?**
	☐	☐	**b an increase in heavy-duty transport truck traffic to and/or from the facility by more than 350 truck round-trips per day?**
	☐	☐	**c increase customer traffic by more than 700 visits per day?**

Section V – Noise

11	☐	☐	**Will the project include equipment with a noise specification GREATER THAN 90 decibels (dB)?**

Section VI – Public Services

12			**Will the project create a permanent need for new or additional public services in any of the following areas** (Check all that apply)
	☐	☐	**a Solid waste disposal?** Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day
	☐	☐	**b Hazardous waste disposal?** Check No ' if the projected potential amount of hazardous wastes generated by the project is less than 42 cubic yards per day (or equivalent in pounds)

**REMINDER *For each Yes" checked in the sections above, attach all pertinent information including but not limited to estimated quantities, volumes, weights, etc* **

ONTARIO, CA 91761

EQUIPMENT DESCRIPTION:
FUEL STORAGE AND DISPENSING FACILITY CONSISTING OF:

1. ONE — UNDERGROUND GASOLINE STORAGE TANK(S), (EACH) 0 GALLON CAPACITY, METHANOL COMPATIBLE
2. ONE — GASOLINE DISPENSING NOZZLES VENTED TO VAPOR RECOVERY SYSTEM, BALANCE RETRACTOR
3. ONE — UNDERGROUND DIESEL STORAGE TANK(S), (EACH) 0 GALLON CAPACITY, NOT METHANOL COMPATIBLE
4. ONE — DIESEL DISPENSING NOZZLES.

FILE COPY

PERMIT CONDITIONS:

1. OPERATION OF THIS EQUIPMENT MUST BE CONDUCTED IN COMPLIANCE WITH ALL DATA AND SPECIFICATIONS SUBMITTED WITH THE APPLICATION UNDER WHICH THIS PERMIT IS ISSUED UNLESS OTHERWISE NOTED BELOW.
2. THIS EQUIPMENT MUST BE PROPERLY MAINTAINED AND KEPT IN GOOD OPERATING CONDITION AT ALL TIMES.
3. AT LEAST ONE FUEL STORAGE TANK AT THIS FACILITY MUST BE METHANOL COMPATIBLE AND MUST BE U.L. APPROVED FOR METHANOL USE.
4. ANY SEALS, FITTINGS, AND PIPING WHICH WILL CONTACT, CONTAIN OR TRANSFER METHANOL IN UNDERGROUND PIPING TO AND FROM THE METHANOL COMPATIBLE STORAGE TANK MUST BE METHANOL COMPATIBLE.
5. ANY SEALS AND FITTINGS WHICH ARE INSTALLED IN ABOVE-GROUND PIPING IN DISPENSERS OR IN OTHER EQUIPMENT WHICH CAN BE EASILY CHANGED NEED NOT BE METHANOL COMPATIBLE BUT MUST BE CHANGED TO METHANOL COMPATIBLE MATERIALS BEFORE METHANOL IS STORED AND DISPENSED.
6. RECORDS MUST BE MAINTAINED AT THIS FACILITY WHICH CLEARLY MARK AND LOCATE THE POSITION OF THE METHANOL COMPATIBLE STORAGE TANK AND ITS PIPING, AND WHICH ALSO STATE THE TANK MANUFACTURER AND THE DATE OF INSTALLATION.
7. (EXCEPT FOR DIESEL TRANSFERS) PHASE I AND PHASE II VAPOR RECOVERY SYSTEMS MUST BE IN FULL OPERATION WHENEVER THIS FACILITY IS IN USE. SUCH SYSTEMS MUST BE INSTALLED, OPERATED AND MAINTAINED TO MEET ALL CARB CERTIFICATION REQUIREMENTS.

THIS PERMIT CONCLUDES ON THE NEXT PAGE.

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

PERMIT to CONSTRUCT/OPERATE

9150 FLAIR DRIVE, EL MONTE, CALIFORNIA 91731

PERMIT NO. M96781
A/N 214395
PAGE 2

CONTINUATION OF PERMIT TO CONSTRUCT/OPERATE

NOTICE

IN ACCORDANCE WITH RULE 206, THIS PERMIT TO CONSTRUCT/OPERATE OR COPY MUST BE POSTED ON OR WITHIN 8 METERS OF THE EQUIPMENT.

THIS PERMIT DOES NOT AUTHORIZE THE EMISSION OF AIR CONTAMINANTS IN EXCESS OF THOSE ALLOWED BY DIVISION 26 OF THE HEALTH AND SAFETY CODE OF THE STATE OF CALIFORNIA OR THE RULES OF THE AIR QUALITY MANAGEMENT DISTRICT. THIS PERMIT CANNOT BE CONSIDERED AS PERMISSION TO VIOLATE EXISTING LAWS, ORDINANCES, REGULATIONS OR STATUTES OF OTHER GOVERNMENT AGENCIES.

APPROVAL OF THE DEPARTMENT OF PUBLIC WORKS, THE DEPARTMENT OF BUILDING AND SAFETY, THE LOCAL FIRE DEPARTMENT AND/OR THE LOCAL TANK LAW IMPLEMENTING AGENCY IS REQUIRED BEFORE CONSTRUCTION IS STARTED.

THIS PERMIT TO CONSTRUCT/OPERATE IS BASED ON THE PLANS, SPECIFICATIONS, AND DATA SUBMITTED AS IT PERTAINS TO THE RELEASE OF AIR CONTAMINANTS AND CONTROL MEASURES TO REDUCE AIR CONTAMINANTS. NO APPROVAL OR OPINION CONCERNING SAFETY AND OTHER FACTORS IN DESIGN, CONSTRUCTION OR OPERATION OF THE EQUIPMENT IS EXPRESSED OR IMPLIED.

EXTERNAL:

Good morning, I would like to try to get clarification on the below email. If I am reading it correctly you have files on Geo tracker, stormwater files available online and paper files for 2264 East Avion Place, Ontario, CA. If that is correct could you let me know how large the files are that you have. My client is debating on whether they would like to review them or send a copy service in to scan them.

Thank you and have a great day 😊

Subject: RE: New Public Records Request

Good morning,

After careful review of our records, we show we have no files for the following site(s):

1049 South Vineyard Avenue
1280 South Tower Drive
1801 East Avion Drive
1922 East Avion Street
2132 Avion (Also East Avion Street)
2161 East Avion Street
2475 East Avion Street
1230 Tower Drive
1250 Tower Drive

All responsive records for **1923 East Avion Street** can be found on GeoTracker using the following link:
GeoTracker (ca.gov)GeoTracker (ca.gov)

2264 East Avion Place Ontario can be found on GeoTracker using the following link:
https://geotracker.waterboards.ca.gov/profile_report?global_id=T0607100233
GeoTracker (ca.gov)

We have Storm Water information that can be accessed online by:
• Clicking this link
https://smarts.waterboards.ca.gov/smarts/PublicDataAccess/PublicNoiSearch.xhtml
• Enter street number into" Facility/Site Street:" Field
• Enter the site city (e.g. "Irvine") into "Facility/ Site City:" Field
• Click on black underlined links to view attachments

We have hardcopy files available for review.

Please contact us through this inbox if you would like to schedule an appointment to review files **Wednesday, September 15, 2021.**

After careful review of our records, we show we have Storm Water information for the following site:
2500 Jurupa Street, Ontario

The requested record can be accessed online by:
• Clicking this link

Safety Data Sheet

Section 1 – Chemical Products and Company Identification

Product Names: BioSolve® Pinkwater®

Product Uses: Remediation of hydrocarbon (oil, fuel, petrochemical) contamination, including: impacted soils, suppression of VOCs, decontamination of equipment and protective clothing, and surface washing

Manufacturer:
The BioSolve Company
24 Victory Lane
Dracut, MA 01826 USA

Contact Information:

+1 (800) 225-3909	US, Canada, Mexico and Puerto Rico
+1 (781) 482-7900	All other locations

Section 2 – Hazards Identification

Health Hazards:

Eye Contact:	Causes transient eye irritation
Skin Contact:	May cause mild, transient irritation
Ingestion:	May be harmful if swallowed; can cause gastrointestinal irritation, nausea, vomiting and/or diarrhea

Hazard Mitigation: Wear protective gloves and eye/face protection
Avoid prolonged breathing of spray

Environmental Hazards: Moderately toxic to aquatic life. Avoid discharge to storm drains and waterways

GHS Classification: Toxic to aquatic life, Acute Category 2

Section 3 – Composition/Information on Ingredients

Proprietary formulation with nonionic surfactants (32% active ingredients in water)

BioSolve products contain no caustic, d-limonene or hydrocarbon solvents.

BioSolve products do not contain any hazardous ingredients as defined by CERCLA, Massachusetts Right to Know Law and California Prop 65. All ingredients are TSCA compliant.

Section 4 – First Aid Measures

Eyes: Immediately flush eyes with water for at least 15 minutes. Hold eyelids apart while flushing to rinse entire surface of eye and lids with water. Seek medical attention for lasting irritation.

Skin: Rinse exposed area and wash with mild soap and water for several minutes. Seek medical attention if irritation develops.

Ingestion: Seek medical attention in the event of serious or persistent abdominal discomfort, nausea or diarrhea.

Inhalation: Inhalation of concentrated vapors resulting from spraying or heating in confined or poorly ventilated areas may cause irritation of nose and throat. Remove person to fresh air and seek medical attention if irritation persists.

Section 5 – Fire Fighting Measures

Suitable Extinguishing Media: None required; BioSolve products are non-flammable

Special Protective Equipment for Firefighters: None necessary

Unusual Fire or Explosive Hazards: None

Section 6 – Accidental Release Measures

In case of accidental release, breakage or leakage: Eliminate or contain source with inert material, such as sand, earth, absorbent pads, etc. Transfer liquid to suitable containers for recovery, re-use or disposal. Wipe up or mop up using water. Hard surfaces (e.g., floors, driveways) may be slippery; use care to avoid falling.

Rinse area with water. Avoid flow of run-off to surface waters. Always check with local regulations before discharging effluent to storm drains or sewers.

Section 7 – Handling and Storage

Handling: Minimize periods of exposure to extreme temperatures. Keep from freezing. If frozen, separation may occur; thaw and stir thoroughly prior to use. Freezing will not affect product performance.

Precautions: Chemical resistant gloves and eye protection are recommended while mixing and using.

Incompatibilities: Avoid contact with strong acids or strong oxidants.

Storage: Recommended storage temperature: 35º – 120º F (1º – 48º C).

Shelf Life: If unopened, more than 10 years.

Section 8 – Exposure Controls / Personal Protection

Eyes Protection: Safety glasses; chemical goggles or face shield recommended when spraying to protect against backsplash and drift.

Skin Protection: Rubber or latex gloves recommended.

Respiratory Protection: None required, except if application results in significant misting of product. If so, use of an approved air purifying respirator is recommended.

Engineering Controls: For indoor use or for use in a confined space, normal ventilation is generally satisfactory.

Section 9 – Physical and Chemical Properties

Appearance: Deep red

Odor: Mild, pleasant sassafras fragrance

Concentration: ~32% active ingredients as sold

Boiling Point	265ºF/129ºC	**Vapor Pressure mm/Hg**	Not available
Melting/Freezing Point	28ºF/-2ºC	**Vapor Density (Air=1)**	Not available
Flash Point	Non-flammable	**Surface Tension***	29 Dyne/cm @25ºC
Flammability Limits	Not applicable	**Viscosity (concentrate)**	490 centipoise
Reactivity with Water	None	**Viscosity (6% solution)**	1.5 centipoise
Evaporation Rate	Not determined	**Solubility in Water**	100%
Specific Gravity	1.01 gms/cc	**VOC Content**	Not determined
	8.43 lbs/U.S. gal	**pH**	9

*6% solution

Section 10 – Stability and Reactivity

Chemical Stability: Stable; will not decompose if used according to manufacturer's directions.

Conditions to Avoid: Prolonged exposure to heat may cause product degradation. Freezing should also be avoided as discussed in Section 7.

Incompatible Materials: Normally unreactive. Avoid strong alkalis, strong acids, strong oxidizing agents and materials with reactive hydroxyl compounds. These materials could damage the product and reduce its effectiveness during application.

Hazardous Decomposition Products: None are known.

Hazardous Polymerization: Will not occur.

Section 11 – Toxicological Information

Overview: No adverse acute or chronic health effects expected if product used in accordance with manufacturer's directions.

Carcinogenicity: No ingredient has been shown to cause cancer in laboratory animals.

Specific Organ Toxicity: None are known.

Section 12 – Ecological Considerations

Persistence and Degradability: The total of the organic components contained in this product is not classified as readily biodegradable (OECD-301 A-F). However, this product is inherently biodegradable with 60% degradation in 28 days (OECD-301B) and estimated >95% degradation in 120 days.

Bioaccumulation Potential: The bioaccumulation factor in fish has been estimated to be low, ranging from 87 to 344.

Mobility: No data available

Aquatic Toxicity:

LC_{50} of Concentrate (As shipped)		
Mysidopsis bahia	48-hours	3.6 mg/L
Menidia beryllina	96-hours	6.4 mg/L
LC50 of 3% Dilute Solution (As Used)		
Mysidopsis bahia	48-hours	185 mg/L
Menidia beryllina	96-hours	247 mg/L
LC50 of 6% Dilute Solution (As Used)		
Daphnia magna	48-hours	287 mg/L
Pimephales promelas	96-hours	124 mg/L
Onchorhynchus mykiss	96-hours	177 mg/L

Section 13 - Disposal

DO NOT DUMP INTO STORM DRAINS OR INTO ANY BODY OF WATER. All disposal practices must be in compliance with all Federal, State/Provincial and local laws and regulations. As manufactured, BioSolve products do not meet the definition of a hazardous waste. Small quantities of unused and uncontaminated product may be discharged to a qualified wastewater treatment facility. Always obtain approval from local and Federal regulatory agencies prior to discarding this product into public sewers.

As your supplier, we have no control over your handling and use of this product. However, the intended use of this product as a remediation and/or surface washing agent may produce wastewater containing emulsified or dispersed hydrocarbons that may be classified as a hazardous waste and should be treated and disposed of accordingly.

Section 14 – Transportation Information

USDOT Freight Class 55 (Liquid Cleaning Compound, Non-Hazardous)
This product is not regulated by USDOT or Canadian TDG when shipped domestically by land.

North American Industry Classification System (NAICS) # 325613

U.S. ITC, Harmonized Tariff Schedule B Classification: 3402.90.30.00

Section 15 – Regulatory Information

This product is considered non-hazardous as defined by CERCLA, according to OSHA, Massachusetts Right to Know Law and California Prop 65.

Toxic Substances Control Act: All components of this product are on the TSCA inventory or are exempt from TSCA Inventory requirements under 40 CFR 720.30.

CEPA – Domestic Substances List: All substances contained in this product are listed on the Canadian Domestic Substances List (DSL) or not required to be listed.

Canadian CPR Compliance: This product has been classified in accordance with the hazard criteria of the Canadian Controlled Products Regulations (CPR) and the SDS contains all the information required by the CPR

WHMIS Classification: D2B Eye or skin irritant

Regulatory requirements are subject to change and may differ from one location to another; it is the buyer's responsibility to ensure that its activities comply with Federal, state or provincial and local laws.

Section 16 – Other Information

HMIS Rating	Health Hazard:	1 (Eye/Skin Irritant)
	Fire Hazard:	0
	Reactivity:	0
	Personal Protective Equipment:	Rubber gloves, safety glasses or face shield
NFPA Rating	Health:	1 (Eye/Skin Irritant)
	Flammability:	0
	Reactivity:	0
	Other Hazard:	None

BioSolve Pinkwater is on the US Environmental Protection Agency's NCP Product Schedule. This listing does NOT mean that EPA approves, recommends, licenses, certifies or authorizes the use of BioSolve Pinkwater on an oil discharge. This listing means only that data have been submitted to EPA as required by Subpart J of the National Contingency Plan, 40 CFR Section 300.915.

SDS Effective Date: January 1, 2018

The information contained herein is accurate to the best of our knowledge. The BioSolve Company makes no warranty of any kind, express or implied, concerning the safe use of this material in your process or application or in combination with other substances.

Subject: [Records Center] Public Records Request :: R001948-090121

--- Please respond above this line ---

RE: PUBLIC RECORDS REQUEST of September 01, 2021, Reference # R001948-090121.

Dear Ms. Castagno,

CAL FIRE received a public information request from you on September 01, 2021. Your request mentioned:

“Site: : “Ontario Airport Property”, Ontario, CA (See Attached Address List & Site Map). ESS requests the following information concerning the subject site which your agency may have on file: 1. utilization, manufacture, storage, or discharge of hazardous materials/waste. 2. previous or on-going site investigations/remediations pertaining to hazardous materials/waste. 3. hazardous materials disclosures concerning the site. 4. pipelines. 5. information regarding underground storage tank present or previously found at the site. 6. Reportable Spills, Releases, Notices of Violations (NOVs) and any Environmental Reportable Issues.”

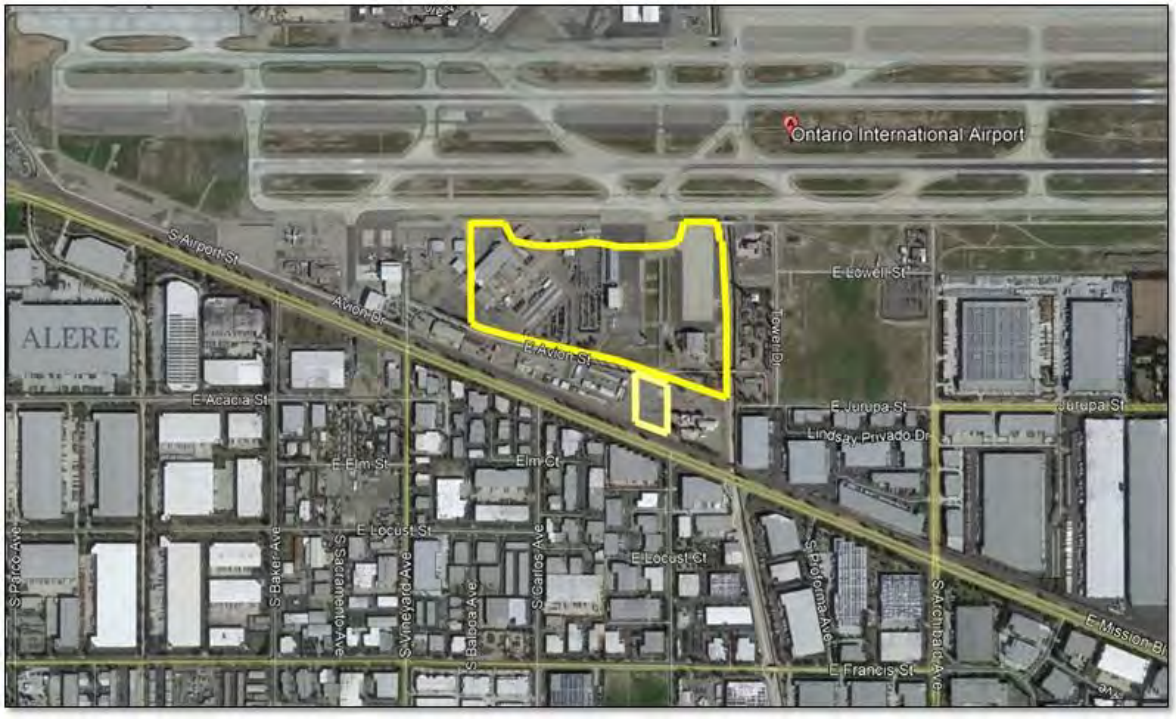
CAL FIRE has reviewed its files and has located responsive records to your request. Please log in to the CALFIRE PRA Records Center at the following link to retrieve the appropriate responsive documents.

Public Records Request - R001948-090121

If you have any questions, or wish to discuss this further, please contact me anne.henigan@fire.ca.gov.

Sincerely,
Anne Henigan

PRA Coordinator
Sacramento - HQ - Legal Office



To monitor the progress or update this request please log into the CALFIRE PRA Records Center

Please let us know if you have any questions.

NFIRS Remarks

Remarks

TITLE:Nelsen's Narrative [CRLF]This was a response for a smell of gas at the location. Arrived on scene and met with the security guard and he indicated that during his rounds he found a small leak at the fuel/water seperator and it smelled like fuel. On investigation found a very small leak that appeared to have been there for some time and was not an immediate problem. There was an odor of the fuel but was not a potential fire problem. The amount of fuild was about 1/3 of a cup in size. I advised the guard to make a report of it to the company and to have the maintenance personnel address the situation.

NFIRS Remarks

Remarks

ME 133 and HM 133 responded to 1230 S. Tower Dr., Ontario Fire Station 10, for COVID decontamination. I had spoke with Captain Harkins prior to the call for service and discussed pre treatment actions to be taken by station 10 personnel. Upon arrival food and personal items had been cleared of all counters and tables, bedding was cycling through the extractor washing machine, the HVAC system had been turned off, and station personnel were taking final measures to secure personal property. HM 133 personnel and station 10 HM personnel (Harkins, Perdue) donned appropriate PPE (tyvek, N95, and eye protection) and performed a full station wipe down with D7 solution. We wiped all horizontal surfaces and all common touch areas through the entire station. When this was completed HM 133 personnel donned SCBA and utilized an HVLP spray gun to fog the entire station, apparatus bay, shop, and other adjacent rooms with D7 solution, We also wiped and fogged the cab of the apparatus the exposed personnel worked on (K140B). At the conclusion of the fog application I accessed the HAVC air handlers up on the roof, removed all the filters and we turned the system back on. We waited 20 minuets to allow the D7 to neutralize any virus present in the building. HM 133 personnel cleaned and serviced our equipment and went back into service. I advised the station 10 crew to wear gloves and eye protection when wiping up and cleaning the dried D7. P. Calzada Fire Captain ME 133 A, HM 133 A

APN#S: 0113-261-06-0000, 0113-261-07-0000, 0113-261-08-0000, 0113-271-01-0000, 0113-271-02-0000

This is to confirm that the San Bernardino County Hazardous Materials Division has identified records that may pertain to the subject site, as described in your request for records search. **NOTE: Additional addresses have been added in this letter because facilities and their files were combined or expansion of Ontario International Airport has changed addresses.**

The file(s) shown below have been retrieved for review. If you wish to view the original documents, please e-mail this office at hazmatrecords@sbcfire.org to arrange an appointment.

ACTIVE PERMIT FACILITIES: (Regulatory files for facilities with annual operating permits to maintain underground storage tanks, handle hazardous materials, and/or generate hazardous waste. Files include permits, inspections, reports, test results, correspondence, and related materials. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities still in operation).

Airport Terminal Services 1049A S. Vineyard Ontario	FA0018510 ~ CERS ID. 10835917 Hazardous Materials 1-3 Chemicals Handler Permit Small Quantity Generator Permit (Last CERS Submission: 07/08/2021)
Ameriflight, LLC 2161 E. Avion St. Ontario	FA0011874 ~ CERS ID. 10053682 Hazardous Materials1-3 Chemicals Special Handler Permit (Last CERS Submission: 01/30/2020)

Ontario International Airport
1923 E. Avion St.
Ontario

FA0002014 ~ Est. # 86009989 ~ CERS ID. 10037323
Large Quantity Generator Permit
Hazardous Materials 31-50 Chemicals Handler Permit
UW Handler with another CUPA Permit
APSA 10,001 – 100,000 Gal. Fac. Capacity Permit
Underground storage tank permits (3)
(Last CERS Submission: 05/07/2021)

Menzie's Aviation Fuel Farm & Repair Shop
495 S. Hellman Gate – Gate 106 *
Ontario

FA0005079 ~ CERS ID. 10042645
Hazmat 11-30 Chemicals Handler Permit
Large Quantity Generator Permit
APSA 100,001 – 1,000,000 Gal Fac Capacity
(Last CERS Submission: 03/01/2021)

This facility has a new owner, a new facility number, and a new address. The previous address was 1049 S. Vineyard Ave. The facility hasn't moved but the Ontario International Airport has expanded, and the facility is now closer to the gate and the new address of 495 S. Hellman Gate – Gate 106, Ontario is a better address. The former facility's name is ASIG. The former facility number is FA0007669.
ASIG is a closed facility. Menzie's Aviation Fuel is an active facility.

INACTIVE PERMIT AND/OR NON-PERMIT FACILITIES: (Inactive regulatory files for formerly permitted facilities that maintained underground storage tanks, stored hazardous materials, and/or generated hazardous waste and/or facilities with underground storage tanks removed and/or materials and waste removed. Files will also include any underground tank removal/construction activity records and site remediation/contamination records for facilities no longer operating underground tanks).

Records searched include permit database systems for facilities with permits as hazardous waste generators, hazardous materials handlers, and/or underground storage tanks, including inactive and/or out of business records; logs of permits issued for the removal and/or installation of underground storage tanks; records and databases pertaining to illicit dumping and releases; records of non-permitted facilities; sites undergoing remediation for contaminated soil and/or groundwater; and incidents responded to by the hazardous materials emergency response team. Records searched date back to mid- 1980's. Please note if a facility has completed a submission in CERS, the most recent submission can be made available for review upon request.

Records consist of 30 files, 50 volumes, approximately 96" thick, combined (8 feet). To request a file review appointment or further clarification, please contact this office by email to hazmatrecords@sbcfire.org.

D&M Job No. 01674-837-128
For General Electric Company

Dear Mr. Lu and Mr. Gibson:

Please find three copies of Dames & Moore's Report for the Underground Storage Tank Removal Project. Three additional copies are attached for submittal to San Bernardino County Department of Environmental Health Services. It has been our pleasure working with GE on this project. If you have any questions or comments regarding this report, please contact us at (714) 381-2004.

Sincerely,

DAMES & MOORE

REPORT
UNDERGROUND STORAGE TANK REMOVAL PROJECT
ENGINE MAINTENANCE CENTER
1923 EAST AVION STREET
ONTARIO, CALIFORNIA
D&M JOB NO. 01674-837-128
FOR GENERAL ELECTRIC COMPANY

1.0 INTRODUCTION

Presented in this report are the results of the Underground Storage Tank (UST) Removal Project for the General Electric Company (GE) site located at 1923 East Avion Street in Ontario, California (Figure 1). The subject site is occupied by GE's Engine Maintenance Center. Two USTs were scheduled to be removed during the UST Removal Project: Tank 9, a 7,000-gallon Calibration Fluid UST, was located along the north side of the GE facility (Figure 3 and Photo 1); and Tank 11, a 1,000-gallon Jet A Fuel UST (Figure 4 and Photo 2), was located along the east side of the facility. Both USTs stored new product for utilization in test stands and equipment.

Tank 11 was originally reported to have a 2,000-gallon capacity. During removal activities, a 1,000-gallon capacity was indicated by the tank label. Therefore, Tank 11 will be referred to as a 1,000-gallon tank in this report.

2.0 PURPOSE AND SCOPE OF SERVICES

Dames & Moore's purpose in this project was to implement GE's UST Removal Project. The scope of services, as defined by Dames & Moore's proposal dated July 10, 1991, included two main elements: 1.) UST removal and 2.) Soil segregation. Actual UST removal and associated construction activities were conducted by Disposal Control Service, Inc. (DCS) of Upland, California. Soil segregation was conducted by Dames & Moore and included the following tasks: 1.) Monitoring the excavation; 2.) Soil sampling; 3.) Analytical testing; 4.) Backfill monitoring; and, 5.) Reporting. This report presents the results of the UST Removal Project.

3.0 METHODS

3.1 PROJECT PREPARATION

3.1.1 PERMITS

Dames & Moore obtained a permit for the UST removal activities from City of Los Angeles Department of Airports. Permitting included developing a summary work plan, submitting necessary documentation, and providing a payment bond. DCS obtained permits for the UST removal activities from the following agencies: Ontario City Fire Department (OFD), County of San Bernardino Department of Environmental Services (SBDEHS), and South Coast Air Quality Management District (SCAQMD) Copies of these permits and related documentation are attached in Appendix A.

3.1.2 HEALTH AND SAFETY

A Health and Safety Plan was developed for the project by Dames & Moore to minimize health hazards to all onsite Dames & Moore workers and reduce the possibility of spreading contamination. The Health and Safety Plan included methods for protection from anticipated chemicals and provided information on finding medical assistance. Subcontractors provided their own health and safety plans to address construction activities which they performed.

3.2 TANK EXCAVATION AND REMOVAL ACTIVITIES

3.2.1 AIR QUALITY MONITORING

Throughout tank excavation and removal activities, a Century Organic Vapor analyzer (OVA) was utilized to measure organic vapor emissions. Monitoring occurred for three primary purposes.

1. **Health and Safety Monitoring** - The area around the excavation, the stockpile, and in the vicinity of the excavation equipment was monitored with the OVA to measure potential exposure of personnel to vapor emissions in Operator's Breathing Zone (OBZ).

2. **Contaminant Levels** - Soil samples, placed in a plastic bag and agitated, were screened with the OVA to measure vapor emissions in a closed head space to approximate levels of contaminants in that soil; and,

3. **SCAQMD Rule 1166 Permit** - Excavated soil was monitored with the OVA calibrated to hexane for organic vapor emissions at a distance not greater than 3 inches.

3.2.2 SHORING

DCS subcontracted K-West of Sun Valley, California to provide services related to installing a permanent shoring system northwest of Tank 9. The purpose of the shoring was to help support the Flow Room Building and test machinery housed within. The shoring consisted of three piles drilled on February 14, 1992 with a bucket-auger drill rig (Photo 3) equipped with 20- and 24-inch buckets (Photo 4) to maximum depth of 30 feet below ground surface (bgs). Steel beams, designated A through C, were lowered into the bore holes. The bore holes were backfilled with 2,000 pounds per square foot (psf) concrete up to 14 feet bgs and 2-sack slurry up to grade. The beams were cut off approximately six inches bgs. During excavation, treated 3- by 12-inch lengths of wooden lagging were positioned between the beams to provide soil retention down to the tank top, approximately 4 feet bgs (Photo 5). The space behind the lagging was backfilled with clean native soils.

3.2.3 CONCRETE AND HARDWARE REMOVAL

The surface paving covering the ground surface over the USTs was broken and removed by DCS. Paving generally consisted of asphaltic concrete up to 4 inches thick. At Tank 9, paving was removed on February 18, 1992 from a rectangular area approximately 12 feet by 20 feet. At Tank 11, paving was removed on February 19, 1992 from a rectangular area approximately 10 feet by 15 feet. Several layers of asphaltic concrete were encountered between the Tank 11 manways. A concrete pad was also observed along the south side of the excavation beneath the T-58 Test Cell building. Asphaltic concrete rubble was stockpiled near the areas to be excavated.

At Tank 9, steel piping was removed and stockpiled separately from removed paving. Underground piping was removed from the excavation, including vent and product delivery pipes. Approximately one gallon of Calibration Fluid was drained from the product pipe and collected in a bucket. The drained fluid was placed in Tank 10, the Waste Calibration Fluid Tank, which was not addressed by this removal project.

At Tank 11, steel piping and a positive displacement pump assembly were removed from the excavation (Photo 6). Fill, product, and vent pipes were removed from Tank 11 and stockpiled separately from removed paving. Less than one gallon of Jet A Fuel was drained from the pump and product line, collected in a bucket, and poured into Tank 11.

3.2.4 EXCAVATION

The soil overlying the USTs was excavated by DCS to expose the tops of the USTs (Photos 7 and 8). Excavation continued below the depth of the spring lines (widest points) of the USTs, approximately 9 feet below ground surface (bgs) for Tank 9, and 8 feet bgs for Tank 11.

During excavation at Tank 9, loose gravel was encountered along the southeast end of the UST. The gravel was backfill associated with adjacent Tank 10, a double-walled Waste Calibration Fluid tank. Because it contained waste product, Tank 10 is currently governed by Resource Conservation and Recovery Act (RCRA) requirements and was not permitted by California Department of Toxic Substances Control (DTSC) to be removed at that time. As excavation of Tank 9 proceeded, it became apparent that continued digging was undermining support of the concrete slab above Tank 10 (Photo 7). A small pothole dug in between Tanks 9 and 10 showed that the tanks were separated by only six inches. Removal of Tank 9 could have allowed Tank 10 to collapse into the excavation created by the removal of Tank 9. For this reason, continued excavation of Tank 9 ceased and a vent pipe was attached (Photo 9). After preliminary engineering evaluation of the undermined area was performed, the excavation was backfilled (Photo 10).

The regulatory agencies involved in this project were notified of this unanticipated change in plans. It is GE's intention to remove Tank 9 in conjunction with the removal of Tank 10. This activity is scheduled to occur after DTSC approves GE's work plan for removal of Tank 10. The remainder of this report will mainly focus on Tank 11.

Organic vapor emissions were monitored using the OVA, which was calibrated daily to known standards of hexane and methane. The excavated soil was monitored with the OVA by analyzing vapors not more than three inches over freshly excavated soil in the backhoe bucket. Soil with levels of organic vapor emissions that were above ambient conditions were segregated into a potentially "affected" stockpile, whereas soil which showed very low or no detectable vapor emissions were placed in a "clean" stockpile. Records of monitoring were included in Dames & Moore's daily field notes and were submitted to SCAQMD on February 28, 1992, as required by SCAQMD Rule 1166. During excavation, vapor monitoring wells MW-9, MW-11, and MW-18 were removed from around Tanks 9 and 11. MW-10, south of Tank 9, was left in place for continued monitoring of Tank 10 (Figures 3 and 4).

3.2.5 TANK REMOVAL

Monitoring of the interior of Tank 11 was conducted by lowering a combustible gas indicator (CGI) into the manhole. Personnel did not enter the tank to record instrument readings. The CGI indicated zero percent of Lower Explosive Level (LEL) within the tank. Tank 11 was approved for removal by OFD Inspector Mary King. Degassing of Tank 11 was not required by SCAQMD Rule 1149 because the tank contained Jet A Fuel, which contains low levels of volatile organic compounds (VOCs). To physically remove Tank 11, the steel tank was hoisted from the excavation with a backhoe and placed upon plastic sheeting along the north side of the excavation (Photo 11).

Rinsing of the interior of the tank with water followed. Water from a hose was sprayed inside the tank to clean the interior and loosen any accumulated deposits within the tank. The rinsate liquid was evacuated from the tank by DCS using a hand pump. Approximately 100 gallons of rinsate was generated by the rinsing process on February 21, 1992. The rinsate, a non-Resource Conservation and Recovery Act (RCRA) hazardous waste, was transferred into two 55-gallon barrels for transport to Petroleum Recycling Corporation in Signal Hill, California, a licensed treatment, storage, and disposal facility (TSDF). A Uniform Hazardous Waste Manifest for this liquid, as provided by DCS, is attached in Appendix B.

After rinsing, Tank 11 was loaded onto a stake-bed truck for transport to American Metal Recycling, Inc. of Ontario, California, a licensed tank disposal facility. Tank fate documentation is attached as Appendix C.

3.2.6 AFFECTED SOIL REMOVAL

Inspector Marie Svoboda of SBDEHS observed removal of Tank 11 and directed sampling beneath the tank. Samples T-1A and T-2A were taken at 10 feet bgs at each end of the excavation (Figure 4 and Photo 12), and given to the onsite mobile laboratory for analysis. Excavation continued to remove obviously affected soils. Inspector Svoboda requested a second set of samples once soil conditions improved visibly. These were taken from locations T-1B at 13 feet bgs and T-2B at 12 feet bgs. Based on analytical results, a third sample was obtained from T-1C at 14 feet bgs, the maximum depth of the excavation. Soils that were affected based on visual observation and laboratory analysis were removed by excavating with the backhoe to a depth of approximately 14 feet bgs (Photo 13). A cross-section of the excavation showing sampling locations is presented in Figure 5.

Most soil encountered above 5 feet bgs, the top of Tank 11, did not appear Jet A Fuel affected, based on OVA readings, odor and discoloration. These soils were stockpiled separately for subsequent use as backfill. Most soils encountered between approximately 5 and 14 feet bgs, with the exception of soils from the sidewalls, exhibited indications of being Jet A Fuel affected. Characteristics of affected soils included closed headspace OVA readings ranging from 50 to 300 parts per million (ppm), strong odor and discoloration. Affected soils were segregated from previously excavated clean soils and loaded into containers. The containers were covered to reduce vapor emissions and protect the contents from rain.

Excavation of Tank 11 indicated that a localized area had been affected by Jet A Fuel. A zone less than one foot thick was observed to surround the tank top and sides and appeared to emanate from two manways. The manways consisted of sheet metal columns extending from about 6-inches above ground, down to the tank top. Metal lids, pictured in Photo 2, covered the manways. One manway contained the pump assembly and fill pipe, as well as connections for the suction and vent pipes. The other manway contained a tank manhole. Based on these observations, it appeared that the source of the localized Jet A Fuel affected soil was from the manways and possibly caused by minor spillage, overfilling,

or piping leaks. The condition of the removed tank indicated that significant tank leakage had not occurred. The sidewalls of the excavation appeared unaffected beyond the one foot thick zone observed to be Jet A Fuel affected, based on OVA readings, odor, and color.

Since the Tank 11 excavation was unshored, caving of the nearly vertical sidewalls was a significant concern. Continued deeper excavation could not occur because utility conduits surrounding the excavation prevented sloping back the excavation: A high-voltage electrical line surrounded the north and northeast, a water line surrounded the east, a telephone duct surrounded the south, and a sewer line surrounded the west. Additionally, deeper excavation adjacent to a utility power pole on the north side of the excavation was not recommended by Southern California Edison.

Most soils encountered in the Tank 9 excavation were clean. Some soils near the Tank 9 fill pipe appeared to be Calibration Fluid affected, based on OVA readings, odor, and color. The affected soils were excavated and placed in a stockpile separate from the clean stockpile. Soil in the affected stockpile was placed on and covered with plastic sheeting until transferred to containers. The containers were covered to reduce vapor emissions and protect the contents from rain.

3.2.7 BACKFILL AND COMPACTION

Before the Tank 11 excavation could be backfilled, loose and caved soils remaining in the excavation bottom were removed to a depth of approximately 14 feet bgs. Backfilling of the excavation was performed after a Dames & Moore geotechnical technician reviewed the excavation bottom. Backfilling and compaction were performed by DCS and observed by a Dames & Moore technician on February 21 and 24, 1992. Clean excavated soil and imported Class II Base Material were utilized by DCS to fill the excavation. Monitoring of the excavation indicated that the backfill was compacted to a minimum 90 percent of maximum dry density. Compaction field reports are attached as Appendix D. Repaving of the excavation with asphaltic concrete occurred on February 26, 1992 (Photo 14).

The Tank 9 excavation was backfilled with clean soil from the excavation and from drilling the beams for shoring. A ramp was created with the clean soil sloping toward Tank 10's undermined concrete slab (Photo 10). Control density backfill (CDB) was poured to fill the void beneath the concrete slab (Photo 10). CDB was also poured to fill the void

beneath a caved portion of piping backfill and to make up for affected soils removed during the excavation. Finally, CDB was utilized to cap the excavation. A slight dome was created to improve surface runoff.

3.3 SOIL SAMPLING

A total of 13 soil samples were collected during excavation activities. Dames & Moore obtained 5 soil samples from the Tank 11 excavation and 4 soil samples from the Jet A Fuel affected Tank 11 stockpile. Two water samples of the Tank 11 rinsate were obtained. Four soil samples were also obtained from the Calibration Fluid affected Tank 9 stockpile.

3.3.1 EXCAVATION SOIL SAMPLING

To further define the affected soil zones in the Tank 11 excavation, Dames & Moore conducted soil sampling into the bottom of the excavation under the supervision of SBDEHS Inspector Svoboda. Soil sampling was accomplished by directing the backhoe to dig relatively undisturbed zones beneath the removed tank. Sidewall sampling was not requested by SBDEHS Inspector Svoboda because field characteristics such as OVA readings, odor, and color did not indicate the sidewalls of the excavation were Jet A Fuel affected. Soil samples were obtained by hand-driving a 2-1/2-inch diameter by three-inch long stainless-steel sleeves into soil contained in the backhoe bucket.

Teflon sheeting and plastic end caps were placed on each end of the sample container. The soil sample was labelled with the following information: Dames & Moore job number, depth, sample number, date and time, collector, location, and soil type. In addition to the described soil sample, another sample sleeve was extruded into a plastic bag, agitated, and evaluated with the OVA for organic vapor emissions using a closed-headspace test. This soil was then visually classified using the Unified Soil Classification System, and described in the onsite geologist's field reports.

To minimize chances of cross-contaminating samples, cleaning of sampling gear was conducted between samples. The cleaning process included washing in a dilute trisodium-phosphate solution, rinsing in fresh and distilled water and then air drying.

3.3.2 STOCKPILED SOIL

Soil was segregated into clean and affected stockpiles, based on field characteristics such as odor, discoloration and OVA readings. Soil that was considered affected was placed on plastic sheeting and covered with plastic sheeting to reduce vapor emissions. In order to minimize volatilization and dust, soil was kept moist by spraying water mist during soil moving activities. Dames & Moore collected four soil samples, S-1 through S-4 from the Tank 11 Jet A Fuel affected stockpile to aid in characterization. Four soil samples, C-1 through C-4, were also obtained from the Tank 9 Calibration Fluid affected stockpile.

3.3.3 RINSATE WATER SAMPLING

Two water samples, R-1A and R-1B, obtained from Tank 11 rinsate were collected by holding a 40-milliliter VOA bottle at the discharge end of the hand pump hose. These samples were obtained at GE's request as duplicates to monitor concentrations of Jet A Fuel contained in the Tank 11 rinsate.

3.3.4 CHEMICAL TESTING

Collected soil and water samples obtained at the site were delivered directly to the onsite, mobile, California EPA-certified, analytical laboratory for chemical testing. The mobile laboratory was provided by Enseco of Garden Grove, California. Chain-of-custody was concluded by the analytical laboratory and provided to the originator. Copies of the completed chain-of-custodies are attached in Appendix D.

Analytical methods utilized to analyze the soil and water samples were as follows: EPA Method 8015 Modified for Jet A Fuel and Calibration Fluid; EPA Method 8020/602 for Benzene, Toluene, Xylene, and Ethylbenzene (BTXE); and, EPA Method 6010 for Total Lead. Analysis for lead was conducted on the two worst-case samples, T-1A and T-2A, obtained from two feet beneath removed Tank 11, as requested by SBDEHS Inspector Svoboda.

4.0 RESULTS

4.1 OBSERVATIONS

Removed steel Tank 11 appeared in good condition with no obvious evidence of punctures, perforations or holes observed. Excavation, removal and backfill were accomplished between February 19 and 26, 1992. The resulting excavation extended to a maximum depth of 14 feet bgs with maximum dimensions of approximately 10 feet by 15 feet. Approximately 45 cubic yards of Jet A Fuel affected soil were generated during excavation of Tank 11, based on field observations and analytical results. The affected soil appeared to emanate from the two manways removed from the tank top, as shown in Figure 5. The affected soils were excavated from depths greater than 5 feet bgs. About 30 cubic yards of clean soil excavated down to approximately 5 feet bgs were utilized as backfill.

The excavation resulting from activities at Tank 9 extended to a maximum depth of 9 feet bgs with maximum dimensions of approximately 12 feet by 20 feet. A permanent shoring system consisting of three drilled steel beams and wooden lagging was installed. Shoring, excavation, and backfill were conducted between February 14 and 20, 1992. Approximately 40 cubic yards of clean soil were removed during excavation of Tank 9 and utilized as backfill. A localized zone of Calibration Fluid affected soils was encountered around the Tank 9 fill pipe.

Backfill material excavated from around Tanks 9 and 11 was predominantly sand and silty sand. Clean soils were typically brown; however, affected soils were typically stained greenish gray or bluish gray. The soils encountered were usually moist. Groundwater was not encountered during excavation activities at Tanks 9 and 11. Previous investigations in the site vicinity have reported deep groundwater, measured at approximately 270 feet bgs.

4.2 AIR QUALITY MONITORING RESULTS

The Health and Safety Plan required upgrading personal protective equipment if OVA readings in the OBZ were measured greater than 15 parts per million (ppm) for more than one minute. During periods of excavation when affected soils were being handled, upgrading to Level C was not required.

OVA readings recorded while soil was agitated in a plastic bag (closed head space) reached a maximum of 300 ppm from the most affected zones encountered during the excavations of Tank 11. Average readings for affected soil ranged from 50 to 100 ppm. Clean soil typically gave readings not detected above ambient conditions.

SCAQMD Rule 1166 Permit #262144 was obtained by DCS before site activities began. Rule 1166 governs site activities during all phases of excavation of contaminated soil, from digging through stockpiling, loading, and hauling. The conditions of the permit, as specified by SCAQMD, were monitored by Dames & Moore. A copy of the permit is attached in Appendix A.

OVA readings of 50 parts per million (ppm), measured within three inches of the exposed surface, were recorded once during removal of Calibration Fluid affected soil associated with Tank 9. OVA readings greater than 50 ppm were not recorded while monitoring the soils associated with Tank 11. As required by Rule 1166, SCAQMD was notified by DCS and issued Reference No. 92-0259. Except for one instance of a 50 ppm reading, vapor emissions remained well below 50 ppm. Monitoring records were submitted to SCAQMD in a letter dated February 28, 1992.

4.3 CHEMICAL TEST RESULTS

Chemical test results are summarized in Table 1. Laboratory reports are included in Appendix E. Results indicated that levels of Jet A Fuel affected soil decreased with depth beneath Tank 11 from 15,000 ppm at 10 feet bgs (T-1A) to 120 ppm at 13 feet bgs (T-1B) and from 3,600 ppm at 10 feet bgs (T-2A) to 1,200 ppm at 14 feet bgs (T-2C). Stockpile results from Tank 11 excavation ranged from 310 to 3,000 ppm Jet A Fuel. BTXE compounds and Total Lead were not detected in the samples analyzed. Stockpile results from Tank 9 ranged from not detected to 120 ppm Calibration Fluid with BTXE not detected.

5.0 SOIL DISPOSITION

Clean soils excavated from Tanks 9 and 11 were utilized to backfill the excavations. The affected soils removed from Tank 9 and 11 excavations were stockpiled on plastic sheeting and covered with plastic sheeting. The soils were subsequently placed in 15 and 25 cubic yard containers and covered. On March 30, 1992, the containers were reportedly transported by DCS from the site to Waste Management, Inc.'s Kettleman Hills, California facility. Completed Uniform Hazardous Waste Manifests were not available at this time.

6.0 SUMMARY

Based on visual observations, Jet A Fuel affected soil extended to a maximum depth of approximately 14 feet bgs, or 6 feet below tank invert, directly beneath removed Tank 11. Based on analytical results, a significant decrease in Jet A Fuel concentration was observed between T-1A (10 feet) and T-1B (13 feet) from 15,000 to 120 ppm. The concentrations of Jet A Fuel affected soil decreased between T-2A (10 feet) and T-2C (14 feet) from 3,600 ppm to 1,200 ppm. Therefore at both sampling locations, concentrations of Jet A Fuel affected soil were observed to significantly attenuate. BTXE and lead were not detected above laboratory detection limits. Deeper excavation was not possible due to physical constraints of excavating adjacent to a utility power pole and the surrounding utility conduits.

Based on our field observations and on analytical laboratory reports, it is Dames & Moore's opinion that affected soil observed during excavation of Tanks 9 and 11 and removal of Tank 11 are localized in extent, possibly resulting from minor spillage, overfilling, or piping leakage. The actual extent of Calibration Fluid affected soil associated with Tank 9 will be able to be better defined after removal of Tank 9 and adjacent Tank 10 occurs.

The extent of Jet A Fuel affected soil associated with Tank 11 appears to have been well defined by excavation activities. The lateral extent was observed to be minimal and the vertical extent appeared to attenuate significantly by 14 feet bgs. Levels of BTXE and lead were not detected.

Levels of Jet A Fuel remaining in the excavation were reported as 120 ppm on the south and 1,200 ppm on the north. With groundwater at the site measured approximately 270 feet bgs, it is Dames & Moore's opinion that the levels of Jet A Fuel remaining in place do not pose a significant threat to groundwater. The source of the Jet A Fuel, Tank 11, has been removed and the area has been resurfaced with asphaltic concrete to minimize infiltration of surface runoff. Based on our field observations and laboratory data, Dames & Moore recommends closure of Tank 11 with no further action status granted by SBDEHS.

7.0 LIMITATIONS

Dames & Moore's work is performed in a professional manner with the best interests of its clients in mind. Dames & Moore's object is to perform its work with care, exercising the customary thoroughness and competence of consulting professional services at the time and location those services are rendered. It is important to recognize that even the most comprehensive scope of services may fail to detect environmental liability on a particular site. Therefore, Dames & Moore cannot act as insurers and cannot certify that a site is free of environmental contamination, and no express or implied representation or warranty is included or intended in its reports except that its work was performed within the limits prescribed by its clients, and with the customary thoroughness and competence of its profession.

ATTENTION: MR. DAVID LU AND MR. ROBERT GIBSON

SUBJECT: TANK REMOVAL AT THE ENGINE MAINTENANCE CENTER, LOCATED AT 1923 E. AVION STREET, ONTARIO, CA

This letter confirms the completion of site investigation and remedial action for the underground storage tank (#11 - containing Jet A Fuel) at the above site. With the provision that the information provided to this agency was accurate and representative of existing conditions, it is the position of this office that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional or previously unidentified conditions at the site, which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this agency of any changes in report content, future contamination findings, or site usage.

If you have any questions regarding this matter, please contact me at (714)387-4631.

Subject: **Underground Storage Tank Removal Project Report**

Enclosed, please find the subject document regarding underground storage tank (UST) removal activities at the GE Aircraft Engines - Engine Maintenance Center/Ontario (GEAE-EMC/O) located at 1923 East Avion Street, Ontario, California, in the County of San Bernardino. Based on the information indicated in the report, we believe that the extent of contamination observed in both the Jet-A UST (Tank 11) and Calibration Fluid UST (Tank 9) excavations is quite limited and does not warrant further investigation.

Visually, it appears that the soil contaminated with Jet-A extends to a maximum depth of approximately 14 feet below ground surface (bgs). In the excavated area directly below the storage tank fill-pipe manway, the concentration of the Jet-A in the soil attenuates significantly between 10 feet bgs (15,000 parts per million (ppm)) and 13 feet bgs (120 ppm). Similarly, in the excavated area directly below the opposite manway, the concentration of Jet-A in the soil decreases from 3,600 ppm, at 10 feet bgs, to 1,200 ppm, at 14 feet bgs. In both sampling locations, BTXE (benzene, toluene, xylene, and ethylbenzene) and lead were not detected above laboratory detection levels.

The extent of soil contamination in the excavated area associated with the removal of Tank 11 excavation appears to be well-defined. Both the lateral and vertical extents of soil contamination is quite limited and decreases significantly by 14 feet bgs. The local groundwater has been established at 270 feet bgs and the excavation has been filled and the area resurfaced with asphaltic concrete to eliminate the possibility of infiltrated water driving the contaminates to groundwater level. Also, the source of the soil contamination---the UST---has been removed, effectively eliminating the possibility of additional contamination occurring. As a result, it is extremely unlikely that the existing contamination poses a threat to the local environment.

The contaminated soil observed during the excavation of the Calibration Fluid also appears to be localized. The extent of contaminated soil associated with Tank 9 has not been evaluated

since the excavation activity has been temporarily terminated. The actual extent of affected soil associated with the Calibration Fluid tank will be more thoroughly defined after removal activities recommence for Tank 9 and the adjacent Tank 10 (also containing Calibration Fluid).

Copies of the Uniform Hazardous Waste Manifests corresponding to the shipment and disposal of the contaminated soil removed from the excavations are also enclosed.

If you should have any questions or require additional information regarding this matter, please call either me or David Lu at (714) 391-5274 or (714) 391-5424, respectively.

Sincerely,

Robert T. Gibson

SUBJECT: Tank Integrity Test Results
General Electric Co., Ontario, CA

Dear Cynthia,

The following report summarizes the results of the tank integrity testing program conducted to date at your facility. These tests were conducted by McKesson Environmental Services (MES) between January 29, 1986 and June 2, 1986. Testing was performed using both the Horner EZY-CHEK and Heath Petro-tite methods of tank integrity testing. The results of the testing program are shown in Table 1. Copies of the data sheets generated during testing are attached.

Of the nine tanks tested to date, tanks 3, 4, 5, 9, 10, and 11 were found to be product tight with measured net volume changes ("leak rates") of -.033, -.036, -.041, -.002, -.047 and -.006 gallons/hour respectively. These tests were conducted in such as fashion as to simultaneously test both the tanks and their associated piping. Certificates of compliance will be issued for each of these tanks at the conclusion of the complinace program.

Tanks 6 and 7 - the two 5000g Diesel tanks - are manifolded together and consequently were tested as a single system. The measured net volume change for these two tanks was -.097 gallons/hr. This exceeds the maximum acceptable result ($\pm$.05 gallons/hour as established by the National Fire Protection Association) and indicates a leaking system. A low level retest of both of these tanks was performed to test the integrity of the tank shells only. The net volume changes measured during these tests, -.003 and +.004 gallons/hour for tanks 6 and 7 respectively, indicate that each tank shell is product tight and that the leak identified during the initial test is located at or above to top of the tanks - a "piping leak."

Initial testing of tank 8 indicated a system leak which was too large to measure. (The product level was visually observed to drop in the fillpipe.) Low level retesting of the tank shell yielded a net volume change of +.024 gallons/hour indicating

that the tank shell is product tight and that the leak is located at or above the top of the tank.

MES is currently preparing a bid for review by General Electric to conduct the necessary piping repairs on the tanks discussed above. If you have any questions concering this report or any other phase of the program please contact me.

Very truly yours,

Gerard L. Slattery

Gerard L. Slattery

HAZARDOUS WASTE GENERATOR AND HAZARDOUS MATERIAL HANDLER INSPECTION REPORT

Facility Name: General Electric — Date: 17 Feb. 1995

Street Address: 1923 E. Avion St. — Establishment No.: B6008643

City: Ontario CA — Zip Code: 91761 — EPA No.: CAD 009542721

Business Contact: Tuan Ngo / David Lu — Business Phone No.: 909-391-5300 — Number of Employees: _____

Refer to Title 19/22 of the California Code of Regulations (CCR), Chapters 6.5 and 6.95 of the Health and Safety Code (HSC). The following Code sections are either in Violation (V) of or in Compliance (C) with the Hazardous Waste or Hazardous Materials laws and regulations, or compliance is Not Applicable, Not Addressed or Unknown (N).

GENERAL REQUIREMENTS		V	C	N
1. No Haz Waste Generator Permit	CHSC 25154		✓	
2. Authority to inspect/sample/photograph	CHSC 25185		✓	
3. Haz Waste Determination not made (T5)	CCR 66262.11			✓
4. No Haz Waste EPA Number (T6)	CCR66262.12(a)		✓	
5. Haz Waste treated w/o DTSC Permit (T1)	CCR 66270.1		✓	
LABELING AND STORAGE				
6. Haz Waste stored more than 90 days (T1)	CCR 66262.34(a)		✓	
7. Start Date not on labels (T25)	CCR 66262.34(f) (2)			✓
8. Haz Waste containers mislabeled (T28)	CCR 66262.34(f) (3)			✓
9. No labels on Haz Waste containers (T27)	CCR 66262.34(f) (3)		✓	
MANAGEMENT OF CONTAINERS				
10. Haz Waste containers not sound (T65)	CCR 66265.171		✓	
11. Haz Waste in incompatible container (T66)	CCR 66265.172		✓	
12. Haz Waste containers not closed (T67)	CCR 66265.173(a)		✓	
13. Haz Waste containers leaking (T68)	CCR 66265.173(b)		✓	
14. Storage Area not inspected weekly (T69)	CCR 66265.174		✓	
15. Incompatible Haz Waste storage (T73)	CCR 66265.177(c)		✓	
16. Mismanagement of Hazardous Waste	CHSC 25154		✓	
17. Mismanagement of Waste Batteries (T92)	CCR 66266.81			✓
MANAGEMENT OF WASTE OIL				
18. Unlawful management of Waste Oil	CHSC 25250.4			✓
19. Waste Oil contaminated w/ Haz Waste (T2)	CHSC 25250.7			✓
20. Receipt for Waste Oil incomplete	CHSC 25250.8(b) (4)			✓
21. Waste Oil Filters improperly managed	CCR 66266.130			✓
HAZARDOUS WASTE MANIFESTS				
22. Haz Waste transported w/o Manifest (T9)	CCR 66262.20(a)		✓	
23. Haz Waste Manifest incomplete (T13)	CCR 66262.23(a)		✓	
24. No Manifest sent to DTSC (T16)	CCR 66262.23(a) (4)		✓	
RECORDS				
25. No Receipts for Waste Oil	CHSC 25250.8(b)			✓
26. Failure to retain Manifest 3 yrs (T29)	CCR 66262.40(a)		✓	
27. Biennial Report not kept 3 yrs (T30)	CCR 66262.40(b)		✓	
28. Failure to retain Analysis 3 yrs (T31)	CCR 66262.40(c)		✓	
29. No Biennial Report filed w/ DTSC (T32)	CCR 66262.41(a)		✓	✓
30. Training Records unavailable (T78)	CCR 66265.16		✓	
DISPOSAL AND TRANSPORTATION				
31. Illegal disposal/abandonment of Haz Waste	CHSC 25189.5(a)			✓
32. Illegal disposal Waste Oil to Ground	CHSC 25250.5(a)			✓
33. Illegal transportation of Haz Waste	CHSC 25163			✓
34. Haz Waste transporter Unregistered	CCR 66263.17			✓
BUSINESS PLANS AND CONTINGENCY DOCUMENTS				
40. Failure to obtain Haz Mat Handlers Permit	CHSC 25513		✓	
41. Failure to establish a Business Plan (T79)	CHSC 25503.5		✓	
42. Failure to submit/update a Bus. Plan (T61)	CHSC 25505		✓	✓
43. Failure to report a release of Haz Mats	CHSC 25507			✓
44. Authority to inspect facility for Haz Mats	CHSC 25508			✓
45. Acutely Haz Mats Registration not filed	CHSC 25533(a)			✓

CORRECTIONS/NARRATIVES

Today's inspection was conducted to determine compliance with applicable laws and regulations (Haz. Materials / Haz. Wastes / and Tiered Permitting). The inspection was conducted with Mr. David Lu and Mr. Tuan Ngo.

A pre-inspection meeting was held with Mr. Lu and Mr. Ngo to review haz. material and haz. waste records (Business Plan, manifests, Training records, etc.), as well as complete the Tiered Permitting (T.P.) "checklist and Initial Verification Inspection Report."

GE. notified for:

*. 1 - CESW -
- unit ID - FTI-2
- " name - Drum rinsing operation
- 1 TANK and ~~no~~ 0 CONTAINERS

*. 1 - PBR
- unit ID - FTU-1
- " name - Spent Conc. Neut. Sys.
- 1 TANKS and 0 CONTAINERS

SUPPLEMENTAL INSPECTION REPORT

DATE: 17 Feb. 1995

INSPECTOR: W.W

FACILITY NAME: GE

FACILITY LOCATION: 1923 E. Avion, ONT.

NOTE: A thorough Handler/Generator Facility Inspection was conducted in November 1993.

A.) RECORDS REVIEW:

- BUSINESS/CONTINGENCY PLAN is on file and updated with DEHS. Facility copy is on site and available for review.
- HAZ. WASTE manifests are on site and available for review. for prior three years.
- Employee training conducted and logs maintained on site for review.
- HAZ. waste storage areas inspected weekly. (logs maintained on site).
- DEHS HAZ. Material and HAZ. WASTE Permits are current.

* • TIERED PERMITTING CHECKLIST REVIEW:

NOTE: ON 28 FEB. 1995 GE submitted an ~~AMEND~~ amended NOTIFICATION to DTSC AS follows:

① CESW – ① with 1 – WATER HOSE
0 – TANKS & 0 – CONTAINERS.

② PBR – ① with 17 TANKS (instead of 16)
1 CONTAINER

* A copy of amended NOTIFICATION was submitted to this Department.

SUPPLEMENTAL INSPECTION REPORT

DATE: 17 Feb, 1995

INSPECTOR: WEW.

FACILITY NAME: GE

FACILITY LOCATION: 1923 E. AVION, ONT.

* GE HAS completed all items on the checklist:
  - TANKS are PE CERTIFIED
  - Monthly and quarterly sewer agency pre-treatment standards are maintained for Chino Basin.
  - Source Reduction documents and Reduction Plan are complete and on site for review.
  - Written operating instructions and records for treatment in the unit (daily/weekly) are maintained on site.
  - Written inspection schedule is complete and on site for review.
  - Written inspection log is complete and on site for review.
  - Secondary containment is provided for treatment in containers.

*. FOR PBR:
  - Waste Minimization certification is complete
  - WASTE ANALYSIS PLAN has been completed and is on site.
  - Waste analysis records are on site for review.
  - Closure Plan is available for units... It includes Financial Assurance.

SUPPLEMENTAL INSPECTION REPORT

DATE: 17 Feb. 1995
INSPECTOR: W.W.

FACILITY NAME: G.E.
FACILITY LOCATION: 1923 E. AVION, ONT.

NOTES ON PROCESS OVERVIEW:

- ALL tanks are Lined and have secondary CONTAINMENT
- Rinse/water Lines have Fiberglass/epoxy COATING.
- Waste acid and alkaline is pumped from cleaning line to WWTP. Piping has secondary CONTAINMENT.

(1) CESW UNIT:

- unit Name - Drum rinsing Operation
- unit ID number - FTI-2
- 1 water Hose / Ø TANKS / Ø CONTAINERS

- Process involves the use of a hose to rinse out the residuals from 55 gallon drums, and assorted CONTAINERS (RAW Material Drums). The rinsate flows ~~[illegible] sump weirs~~ through grate to sump with secondary CONTAINMENT. The rinsate is pumped to the treatment unit. The drums/CONTAINERS are re-used or returned to the manufacturer.

(2) PBR UNIT: (WASTE WATER TREATMENT PLANT)

- unit Name - Spent Concentrate Neutralization System.
- unit ID Number - FTU-1
- 17 TANKS / 1 CONTAINER.

SUPPLEMENTAL INSPECTION REPORT

DATE: 17 Feb. 1995

INSPECTOR: WW

FACILITY NAME: G.E.

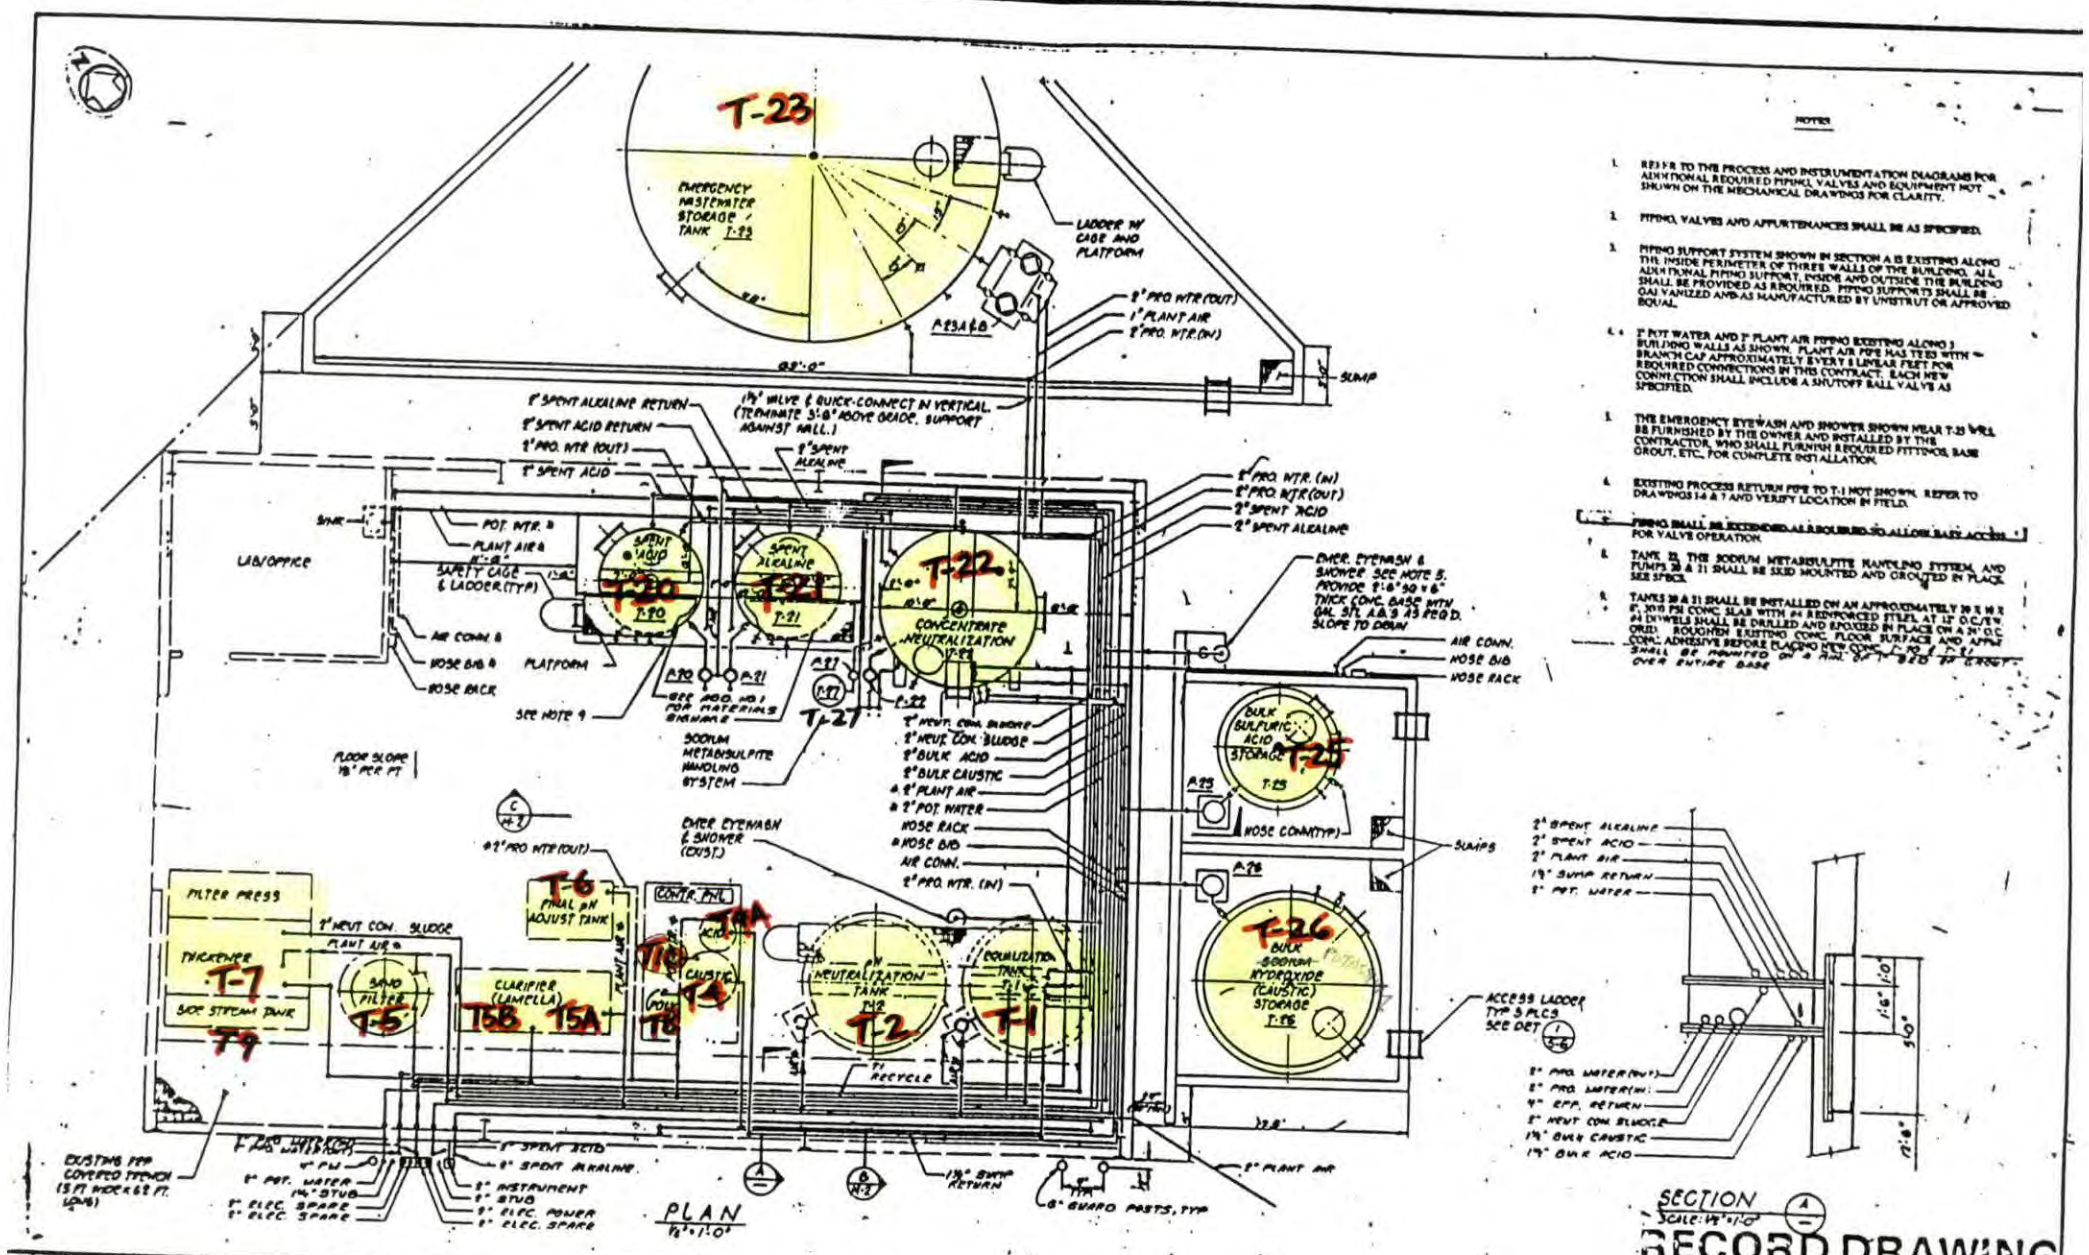
FACILITY LOCATION: 1923 E. Avion, Ontario

- This waste water treatment plant (WWTP) is operated by Engineering-Science, Inc. and is called ETU-1. It is estimated that approx. 3,400 gallons of waste is treated in the unit.

* Specific waste types treated include:

1) 5 spent concentrate baths from cleaning line.
   - 2 acidic (J-19 & HNO_3)
   - 3 alkaline (J-88, J-84, C-46)
2) Waste water from oil-water separator at Test Cell facility.
3) Waste water from tanks at cleaning line and 2 steam cleaning units (located at EHS Dept. and at Hangar 1).

* Treatment processes used:



1) pH adjustment
2) Precipitation
3) Sludge handling/press

NOTE: At time of notification amendment – pipes in W.W.T.P. were modified to allow supernate from T-22 and Return line from sludge Thickener Tank (T-3) to go in to either Tank T-1 or T-2.

NOTES

1. REFER TO THE PROCESS AND INSTRUMENTATION DIAGRAMS FOR ADDITIONAL REQUIRED PIPING, VALVES AND EQUIPMENT NOT SHOWN ON THE MECHANICAL DRAWINGS FOR CLARITY.
2. PIPING, VALVES AND APPURTENANCES SHALL BE AS SPECIFIED.
3. PIPING SUPPORT SYSTEM SHOWN IN SECTION A IS EXISTING ALONG THE INSIDE PERIMETER OF THREE WALLS OF THE BUILDING. ALL ADDITIONAL PIPING SUPPORT, INSIDE AND OUTSIDE THE BUILDING SHALL BE PROVIDED AS REQUIRED. PIPING SUPPORTS SHALL BE GALVANIZED AND AS MANUFACTURED BY UNISTRUT OR APPROVED EQUAL.
4. 2" POT. WATER AND 2" PLANT AIR PIPING EXISTING ALONG 3 BUILDING WALLS AS SHOWN. PLANT AIR PIPE HAS TEES WITH ¾" BRANCH CAP APPROXIMATELY EVERY 8 LINEAR FEET FOR REQUIRED CONNECTIONS IN THIS CONTRACT. EACH NEW CONNECTION SHALL INCLUDE A SHUTOFF BALL VALVE AS SPECIFIED.
5. THE EMERGENCY EYEWASH AND SHOWER SHOWN NEAR T-23 WILL BE FURNISHED BY THE OWNER AND INSTALLED BY THE CONTRACTOR, WHO SHALL FURNISH REQUIRED FITTINGS, BASE GROUT, ETC., FOR COMPLETE INSTALLATION.
6. EXISTING PROCESS RETURN PIPE TO T-1 NOT SHOWN. REFER TO DRAWINGS 1-A & 7 AND VERIFY LOCATION IN FIELD.
7. PIPING SHALL BE EXTENDED AS A BOURDED TO ALLOW EASY ACCESS FOR VALVE OPERATION.
8. TANK 22, THE SODIUM METABISULFITE HANDLING SYSTEM, AND PUMPS 20 & 21 SHALL BE SKID MOUNTED AND GROUTED IN PLACE. SEE SPECS.
9. TANKS 20 & 21 SHALL BE INSTALLED ON AN APPROXIMATELY 20'-5" x 8'-5", 2000 PSI CONC. SLAB WITH #4 REINFORCED STEEL AT 12" O.C./E/W. #4 DOWELS SHALL BE DRILLED AND EPOXIED IN PLACE ON A 24" O.C. GRID. ROUGHEN EXISTING CONC. FLOOR SURFACE AND APPLY CONC. ADHESIVE BEFORE PLACING NEW CONC. SLAB & T-21 SHALL BE MOUNTED ON A MIN. 3/4" GRD. OVER ENTIRE BASE

Gentlemen:

Due to the nature of our business, we do not generate waste on a regular basis. Our processes do include eleven tanks (capacity ranging from 1,500 to 2,000 gallons) of which four tanks are acidic, five tanks are caustic sodas, and one is a chlorinated solvent. Of the four acid tanks, one is a combination of nitric and hydrofluoric, one is nitric acid, and the other two are only slightly acidic using phosphoric and sodium bisulfate respectively. Of the five caustic soda tanks, one tank contains potassium pernanganate, and the remaining four tanks contain sodium hydroxide. The chlorinated solvent is 1.1.1.-trichloroethane.

Depending on the work load on the line, we will, at a maximum, pump the sludge off the bottom of the caustic tanks once every 6 months, with ultimate disposal of the material in 18 months. Using your record keeping material will be disposed of using methods 7 and 12, excluding 1.1.1-trichloroethane, which is recycled except when the material is extremely contaminated with oils and a recycler will not accept.

We do have an "extremely hazardous" permit from the DOHS for the disposal of the nitric/hydrofluoric acid. However, the tank is seldomly utilized in the work process.

Other wastes generated include the following:

Waste Generated	Disposal Method
Metal-spray sludge	7, 12
Oil and water	6 or 7, 12
Paint sludge/waste	7, 12
Penetrating oil	7, 12
Baghouse wastes	2
Laboratory chemicals	6 or 7, 12
Hydrochloric acid	6 or 7, 12

Sincerely,

Robert Seguy

SUBJECT Hazardous Waste Fee.

Dear Sir,

I am sending this application without the fee enclosed. Unfortunately, due to some confusion the check (fee) preceeded the application.

If there is any problems please contact me at the letterhead phone number.

Sincerely

Ms. Susan Williams
San Bernardino Fire
385 N. Arrow Head
San Bernardino, CA 92415-0153

Dear Ms. Williams:

We were the former leaseholder of the site and removed a 500 gallon waste oil tank when the new operation (Mercury) did not need it in their operation.

Enclosed is the subsurface soil investigation report that was completed on the site. At this point, we believe that all the necessary steps have been taken for you to grant closure to the site. If more action is needed please let me know. I can be contacted as follows:

John W. Osborne
Raytheon Aircraft Services
PO Box 2966
Wichita, KS 67201
(316)676-7657
(316)676-7659 Fax

You attention to this matter is appreciated.

Sincerely,

John W. Osborne

Attn.: B. Charlie Roth

INTRODUCTION

Pursuant to CTL Environmental Services (CTL) agreement with Laidlaw Environmental Services of California (Laidlaw), a subsurface soil investigation was performed at Mercury Air Group/Raytheon, 2161 East Avion Street, Ontario, California (site). A site vicinity map is presented as Figure 1.

BACKGROUND

In October 1996, Laidlaw removed one 500-gallon waste oil underground storage tank (UST) located in a planter area at the subject property. Following the removal of the UST, one soil sample was collected at a depth of approximately two feet below the excavation bottom (approximately six feet below the planter grade). As noted in the laboratory report presented in Appendix A, the soil sample exhibited a total recoverable petroleum hydrocarbon (TRPH) concentration of 1,270 milligrams per kilogram (mg/kg). In addition, the sample exhibited no purgeable halocarbons or metals exceeding the Total Threshold Limit Concentrations (TTLC) or ten times the Soluble Threshold Limit Concentrations (STLC) established by the State of California.

Based on the TRPH concentration (1,270 mg/kg) detected below the former UST, further assessment of the area was recommended.

OBJECTIVE

The objective of the investigation is to assess the vertical extent of the petroleum hydrocarbon-impacted soil in the former UST area.

24404 S. Vermont Avenue, #307 • Harbor City, CA 90710 • TEL: (310) 530-5006 • FAX: (310) 530-0792

INVESTIGATION

The following field activities were conducted on October 1, 1997, in accordance with CTL's *Exploratory Borings and Soil Sampling Protocol* presented in Appendix B.

CTL drilled one soil boring (B-1) in the center of the former UST excavation using a Geoprobe System equipped with push rods (see Figure 2). Undisturbed soil samples were collected at depths of 10, 15, and 20 feet below ground surface (bgs) using a core sampler lined with brass rings. Note: The Geoprobe System encountered refusal at a depth of approximately 21 feet bgs, at which point the field investigation was terminated. The sampling rings were sealed with plastic caps, labeled, and stored in a chilled ice chest for transport to CTL's Laboratory Division located in Carson, California. An organic vapor analyzer (OVA) was utilized on-site to screen selected soil cuttings/samples for the presence of organic vapors. Additionally, the soils encountered during the investigation were logged at five foot intervals using the Unified Soil Classification System (USCS). The OVA readings and soil classifications are included in the boring log presented in Appendix C. Upon completion, the boring was back-filled with bentonite chips, hydrated, and covered with planter soil.

The soil samples collected from the boring were analyzed for TRPH by EPA Method 418.1. In addition, sample B-1-20' was analyzed for volatile organic compounds (VOCs) by EPA Method 8260. The laboratory report and chain-of-custody documentation are presented in Appendix D.

GEOLOGY AND HYDROLOGY

The sediments encountered in the boring consisted of excavation fill (fine to medium grained sands), fine silty sands, and fine to medium grained sands with gravel to a refusal depth of approximately 21 feet bgs. Groundwater was not encountered during the investigation. According to the City of Ontario Engineering Department, regional groundwater occurs at an average depth of 300 feet bgs.

RESULTS

The following analytical results are expressed in mg/kg:

SAMPLE DESCRIPTION	TRPH EPA METHOD 418.1	VOCs EPA METHOD 8260
*WOT #1 - sample collected below former UST, depth = 6 feet bgs	1,270	ND (by EPA 8010)
B-1-10'	ND	NA
B-1-15'	ND	NA
B-1-20'	35	ND
DETECTION LIMITS	10.0	.005 - .05

* = sample collected by Laidlaw on 10/15/96
ND = Not Detected above laboratory reporting limits
NA = Not analyzed

DISCUSSION

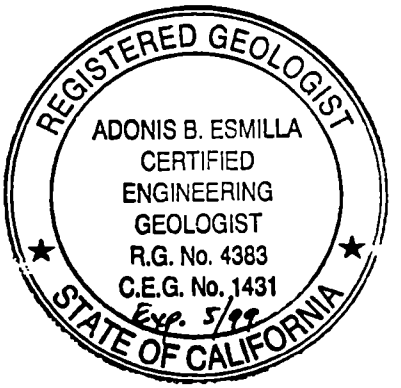
As indicated in the results table, the soil samples collected from boring B-1 exhibited TRPH concentrations ranging from ND to 35 mg/kg. In addition, soil sample B-1-20' exhibited no detectable concentrations of VOCs.

CONCLUSIONS AND RECOMMENDATIONS

Based on the analytical results, it appears that the elevated petroleum hydrocarbon concentrations are limited to the shallow soil directly below the former UST excavation (depth of approximately 6 to 9 feet bgs). Therefore, CTL recommends that closure of the former UST area be requested from the lead regulatory agency.

ASSUMPTIONS AND LIMITATIONS

The soil sampling and laboratory analytical services were performed for the exclusive use of Laidlaw. In performing our professional services, we have applied present engineering and scientific judgment and used a level of effort consistent with the current standard of practice for similar type studies. CTL has relied in good faith upon representations and information furnished by individuals with respect to operations and existing property conditions, to the extent they have not been contradicted by data obtained from other sources. Accordingly, CTL accepts no responsibility for any deficiencies, omissions, misrepresentations, or fraudulent acts of persons interviewed. In addition, CTL will not accept any liability for loss, injury claim, or damage arising directly or indirectly from any use or reliance on this report. CTL makes no warranty, expressed or implied.



Should you have any questions regarding this report, please contact the undersigned at (310) 530-5006.

Respectfully submitted,
CTL Environmental Services

APPENDIX B

EXPLORATORY BORINGS
AND
SOIL SAMPLING PROTOCOL

The following procedures are followed when performing exploratory borings utilizing a Geoprobe System or Ramset with push type samplers:

1. 1 to 1.5 inch core samplers are used.

2. All push rods are steam cleaned prior to use and between borings, if necessary.

3. A registered geologist, civil engineer with soils experience, or other appropriately trained personnel under the direct supervision of the aforementioned, observes the drilling and obtains soil samples at 5-foot intervals (unless otherwise specified) and at the terminus of each boring.

4. The Unified Soil Classification System (USCS) may be utilized to classify the soils.

5. The soil samples are obtained using a core sampler, which accommodates two to three sample tubes. Various tubes are utilized to be compatible with the different analyses required:

   Brass Tubes: for all organics and general analyses, excluding copper and zinc.

   Stainless Steel Tubes: for all organics and metals analyses excluding chrome and nickel.

6. The tubes are scrubbed with a brush and Alconox or equivalent cleaning agent, then rinsed with tap water. Tubes are given a final rinse with distilled water and delivered to the drilling site in closed buckets or equivalent to preclude recontamination.

7. After the sample tubes are removed from the sampler, the latter is scrubbed in Alconox or equivalent and tap water. The sampler is rinsed with tap water, and distilled water (if required) and reassembled with the required number of clean tubes.

8. Unclean tubes are washed with Alconox or equivalent solutions, rinsed with tap water, etc. as described in number 6.

9. In loose soils, a sand trap is used to prevent soil from falling out of the sampler.

10. The sampler is driven 12 to 18 inches at each sampling. Generally, the lowest tube is retained for analysis. The other tube or tubes are retained as a back-up.

11. The sample is logged in and capped with Teflon liners and tight-fitting plastic caps. The samples are labeled and preserved in a clean ice chest containing Blue Ice or equivalent, to keep the samples at or about 4 degrees Celsius.

12. The soil sample tube label is marked with at least the following minimum information:

    Job Number

    Boring Number and Depth

    Sampling Date and Time

    Sampler's Initials

    Test to be Performed (if known at the time of sampling).

13. The samples are kept in the ice chest until delivered to a State of California certified testing laboratory, the same day if physically possible. The undelivered samples are stored or archived in secured sample storage at or about 4 degrees Celsius.

14. All samples are accompanied by an EPA approved chain-of-custody form, documenting the time, date, and person-in-charge from sample retrieval to laboratory delivery.

15. The samples that are to be analyzed may be selected through field observations and/or OVA screening.

16. Upon termination, all borings shall be sealed from the bottom of the boring to grade with bentonite grout or bentonite chips. Grout shall be emplaced by the tremie method. Chips shall be hydrated prior to the surface being repaired.

Was sensor removed for testing?	yes	yes	yes
Was sensor properly replaced after testing?	yes	yes	yes

Comments – *(include information on repairs made prior to testing)*

NW & NE SUMPS NEED FIBERGLASS AT COLLAR.

[1] If the testing method does not test the entire depth of the sump, specify how much of the sump was tested. Methods not testing the entire sump should only be used if the monitoring system provides fail safe turbine shutdown.

[2] With the submersible pump running, place the sensor in product (discriminating sensors should also be placed in water). The time between placing the sensor in product and the turbine shutting down is the response time. This should be done if the secondary containment testing method used does not test the entire volume of the sump.

Other (specify): SWRCB

Ms. Leslie Heaviside
San Bernadino County Fire Department
Hazardous Materials Division
620 South E Street
San Bernardino, CA 92415-0153
(909) 386-8460

Dear Ms. Heaviside:

Enclosed please find GE Aviation's response to the hazardous waste inspection reports issued by the County to its facility on 2264 East Avion Drive in Ontario on November 3, 2005 as well as an executed Certificate of Compliance. Also enclosed is GE Aviation's response to the hazardous waste inspection reports issued to its facility on 1923 Avion Drive in Ontario on November 4, 2005 with its accompanying Certificate of Compliance. Thank you for agreeing to a fourteen-day extension in the submission deadline to accommodate a family emergency this week.

Also enclosed are numerous documents and photographs addressing the County's findings as detailed in the inspection reports. Please contact me if you have any questions.

Sincerely

Bradley Grubbs
EHS Focal Point
GE Aviation

Brett C Boston
EHS Generalist (non GE)

HAZARDOUS WASTE GENERATOR AND HAZARDOUS MATERIALS HANDLER INSPECTION REPORT

Facility Name: G.E. Engine Service, Inc. Date: November 4, 2005

Street Address: 1923 Avion Dr. Fac Id. No: FA0003388

City: Ontario Zip Code: 91761 EPA ID No: CAD009542721

Facility Contact: Bradley Grubbs Phone No. (909) 937-6731 Number of Employees: 150

Refer to Title 19 and Title 22 of the California Code of Regulations (CCR), Chapter 6.5 of the Health and Safety Code (CHSC) and Division 3 of Title 2 of the San Bernardino County Code (CC). The following code sections are either in Violation (V) of, or in Compliance (C) with, the applicable laws and regulations, or compliance is not applicable, not addressed or unknown (N).

GENERAL REQUIREMENTS FOR GENERATORS		V	C	N	
101. Hazardous Waste Generator Permit current	CC 23.0602(b)(1)		X		*
102. Facility access for inspection granted - HW only	CHSC 25185		X		*
103. Hazardous Waste determination made	CCR 66262.11		X		*
104. EPA ID Number obtained	CCR 66262.12(a)		X		*
105. Hazardous Waste storage/treatment authorization	CHSC 25189.5(d)		X		*
106. Facility operated/maintained to prevent release/fire	CCR 66265.31	X			*
107. Contingency Plan established	CCR 66265.51(a)		X		*
108. Recyclable materials managed lawfully	CHSC 25143.2			X	*
STORAGE AND LABELING REQUIREMENTS					
110. Hazardous Waste containers labeled	CCR 66262.34(f)(3)	C			
111. Hazardous Waste container label complete	CCR 66262.34(f)(3)		X		
112. Accumulation start date on labels	CCR 66262.34(f)(2)		X		
113. Hazardous Waste accumulation time not exceeded	CCR 66262.34		X		
114. Hazardous Waste containers sound	CCR 66265.171		X		*
115. Hazardous Waste containers not leaking	CCR 66265.173(b)		X		*
116. Hazardous Waste containers closed	CCR 66265.173(a)		X		
117. Contaminated containers managed properly	CCR 66261.7	X			*
118. Container storage area inspected weekly	CCR 66265.174		X		
119. Hazardous Waste managed lawfully	CHSC 25154		X		*
120. Aboveground Tank storage area inspected daily	CCR 66265.195		X		
HAZARDOUS WASTE RECORDS AND MANIFESTS					
125. Hazardous Waste transported with a manifest	CCR 66262.20(a)		X		*
126. Hazardous Waste manifest complete	CCR 66262.23		X		*
127. Hazardous Waste manifests sent to DTSC	CCR 66262.23(a)(4)		X		
128. Manifests retained for at least 3 years	CCR 66262.40(a)		X		
129. Biennial Report prepared	CCR 66262.41		X		
130. Hazardous Waste analyses retained for 3 years	CCR 66262.40(c)		X		
131. Training documentation complete & available	CCR 66265.16		X		*
132. SB 14 completed and available	CCR 67100.3			X	
MANAGEMENT OF USED OIL AND BATTERIES					
135. Used oil managed properly	CHSC 25250.4		X		
136. Used oil not contaminated with Hazardous Waste	CHSC 25250.7		X		
137. Used oil receipts complete & available	CHSC 25160.2(b)(3)			X	
138. Used oil filters managed lawfully	CCR 66266.130		X		
139. Used batteries managed lawfully	CCR 66266.81		X		
DISPOSAL AND TRANSPORTATION					
145. Illegal disposal/abandonment of Hazardous Waste	CHSC 25189.5(a)			X	*
146. Illegal disposal of used oil	CHSC 25250.5(a)			X	*
147. Transportation of Hazardous Waste w/o registration	CHSC 25163			X	*
148. Hazardous Waste hauled by registered transporter	CHSC 25163		X		*
149. Haz. Waste transported to an unauthorized facility	CHSC 25189.5(c)			X	*

RELEASE AND RESPONSE/BUSINESS PLANS		V	C	N	
201. Hazardous Material Handler permit current	CC 23.0602(b)(3)		X		
202. Business Plan established	CHSC 25503.5		X		
203. Business Plan submitted/updated	CHSC 25505		X		
204. Hazardous Materials release reported	CHSC 25507			X	
205. Facility access for inspection granted - HM Only	CHSC 25508		X		
206. Regulated Substances registration filed	CHSC 25533(a)			X	
207. SPCC Plan completed	CHSC 25270.5(c)		X		

INSPECTION NARRATIVE

A routine inspection was performed on October 5 and October 6, 2005 to determine compliance with applicable hazardous material/ hazardous waste laws and regulations. The inspection was conducted by myself (Kristian Alfelor-SBCoFD), Leslie Heaviside (SBCoFD), and Mark Pear (DTSC). Consent to perform the inspection was granted by Bradley Grubbs (EHS Manager) and Brett Boston (EHS Consultant). Digital photographs were taken with permission. Personal protective equipment used during the inspection included steel-toed shoes (optional) and safety glasses.

This facility performs repairs, overhauls, and cleaning of jet engine and parts.

Hazardous Material Inventory:

Hanger 5-
Disassembly Line:
(1) 55-gallon drum of oily rags/solvent (05-06-05).
(1) 55-gallon drum of oily rags/solvent (06-02-05).
(1) Flammables cabinet-various items.

☒ NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

SUPPLEMENTAL INSPECTION REPORT

FACILITY NAME:	FACILITY LOCATION:
G.E. Engine Service, Inc.	1923 Avion Dr. Ontario, CA 91761

SAA #2:
(1) 55-gallon drum of waste fuel (04-11-05)
(1) 55-gallon drum of waste oil (06-12-05)
(1) 55-gallon drum of aerosol cans (09-02-05)
(1) 55-gallon drum of used oil filters (09-02-05)
(1) 55-gallon drum of waste oil/fuel/solvent/rags (09-02-05)
(1) 55-gallon drum of oil soaked absorbent (09-02-05)

Electrochemical Grinder Area:
(2) 55-gallon drum of Calcium/salt waste- not labeled, but corrected during the inspection.
(1) Flammables cabinet-various items

Campbell Grind Room:
(1) 55-gallon drum of grind waste (04-28-05)
(1) 304ft3 cylinder of Nitrogen

Cylinder Storage Area:
~(10) cylinders of acetylene (>200ft3 total)
~(10) cylinders of argon (>200ft3 total)

SAA #1:
(1) 55-gallon drum of oily rags (09-02-05)
(1) 55-gallon drum of oil-soaked absorbent (09-02-05)
(1) 55-gallon drum of aerosol cans (09-02-05)

SAA #3:
(1) 55-gallon drum of oily rags (09-02-05)
(1) 55-gallon drum of aerosol cans (09-02-05)
(1) 55-gallon drum of oil-soaked absorbent (09-02-05)

SAA #5:
(1) 55-gallon drum of oily rags (08-08-05)
(1) 55-gallon drum of waste fuel (04-12-05)
(1) 55-gallon drum of waste oil (09-17-05)
(1) 55-gallon drum of absorbent (04-13-05)

SUPPLEMENTAL INSPECTION REPORT

FACILITY NAME:	FACILITY LOCATION:
G.E. Engine Service, Inc.	1923 Avion Dr. Ontario, CA 91761

The following violations must be corrected within 30 days:

117. Contaminated containers not managed properly- CCR 66261.7:
None of the 55-gallon containers on site were observed to have any dates marked on them to show when they were emptied. Contaminated containers larger than 5 gallons must be marked with the date that the container became empty and must be removed from the site within one (1) year of that date. Each container must be hauled off-site to reclaim its scrap value and the following information must be maintained and available for review for up to three (3) years: The name, street address, mailing address and telephone number of the facility where the empty containers have been shipped. The containers may also be reconditioned or remanufactured and may also be returned to the supplier to be refilled. Immediately display the date when each contaminated container became empty.

Compliance Requirement for 117:

1. **Documentation verifying compliance with contaminated container management requirements.**
2. **Submit a copy of the receipt(s) documenting the removal of empty containers.**

110- Hazardous Waste containers not labeled- CCR 66262.34(f)(3):
(2) 55-gallon drums of waste copper solution did not have a hazardous waste labels. Ensure that a hazardous waste label is applied to each hazardous waste container. Verify that all lines and fields of each hazardous waste label are completed correctly, including the accumulation start date. Completed hazardous waste labels were placed on both 55-gallon drums of waste copper solution during the inspection.

Item #110 was corrected during the inspection.

106- Facility not operated/maintained to prevent release/fire- CCR 66265.31:
Several oil spills were observed on the floor adjacent to various types of equipment in the machine room. To minimize this occurrence, the operator must conduct routine housekeeping as needed and operate to prevent spills. Place absorbent on all observed spills. Upon saturation, collect and manage oil-soaked absorbent as a hazardous waste.

Compliance Requirement for 106:

1. **Submit photographs or a signed statement verifying that all spill-affected areas have been addressed.**
2. **Submit a work plan for the prevention and management of hazardous material spills.**

NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

SUPPLEMENTAL INSPECTION REPORT

FACILITY NAME:	FACILITY LOCATION:
G.E. Engine Service, Inc.	1923 Avion Dr. Ontario, CA 91761

912. Accumulation start date not on label/ container- CCR 66273.15:
A box of waste fluorescent light tubes located in the hazardous waste storage area did not have an accumulation start date on the box or universal waste label. All universal waste containers/items must have one of the following:

1. **Marking or labeling on the container with the earliest date that any universal waste in the container became a waste;**
2. **Marking or labeling on each individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste.**

Compliance Requirement for 912:
Submit photographs or documentation verifying one of the methods listed above has been implemented.

X NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN 30 DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

Inspector: K. Alfelor & L. Heaviside Received by: Certified Mail Inspection Date: October 5 & 6, 2005

Fire Chief
County Fire Warden

CERTIFICATE OF COMPLIANCE

Return Certification within 30 days to Inspector Kris Alfelor

In the matter of: Respondent: **Bradley Grubbs**
Violation(s) cited on: **October 5 & 6, 2005**
Establishment Name: **G.E. Engine Service, Inc.**
Establishment Address: **1923 Avion Dr. Ontario, CA 91761**
Establishment Number: **FA0003388**

I certify under penalty of law that:

- *Respondent has corrected the violations specified in the above-entitled action.*
- *I have personally examined any documentation attached to this certification to establish that the violations have been corrected.*
- *Based on my examination of the attached documentation and inquiry of the individuals, who prepared or obtained them, I believe the information to be true, accurate and complete.*
- *I am authorized to file this certification on behalf of the Respondent.*
- *I am aware there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.*

_____	_____
Signature	*Date*
_____	_____
Printed or Typed Name	*Title*
_____	_____
Social Security/Federal ID Number	*Drivers License/ID Number*

** Attached documentation includes:*

1. **Photographs or a signed statement verifying that all spill-affected areas have been addressed**
2. **Work plan for the prevention and management of hazardous material spills**
3. **Documentation verifying compliance with contaminated container management requirements**
4. **Documentation verifying compliance with universal waste labeling requirements**

CUPA
San Bernardino County Fire Department • Hazardous Materials Division
620 South "E" Street, San Bernardino, CA 92415-0153 • (909) 386-8401 Fax (909) 386-8460

PRELIMINARY FIELD INSPECTION REPORT

FACILITY NAME:	FACILITY LOCATION:
B.E. Engine Services	1923 E. Avion St. Ontario, CA 91761

A routine inspection was performed on 10-5-05 and 10-6-05 to determine compliance with applicable hazardous material / hazardous waste laws and regulations (including Tiered permitting - PBR and CESQG). The inspection was conducted by myself (Kris Alfelor) of SBCoFD Haz-Mat, Leslie Heaviside (SBCoFD - Hazmat), and Mark Pear (CDTSC). Consent to perform the inspection was granted by Bradley Grubbs (EHS Manager) and Brett Boston (EHS consultant). Digital photographs were taken with permission. Personal protective equipment used were steel toed shoes (optional) and safety glasses.

* This is a preliminary inspection report summarizing the events and violations noted on 10-5-05 and 10-6-06. A full inspection report will be submitted to your facility upon completion. Upon receiving the full inspection report, correct all noted violations and submit a signed certificate of compliance with all required documentation to this Division within 30 days. *

(1) Revise and submit the onsite hazardous waste treatment notification (unit) pgs - 22 CCR (67450.2(b) & 22 CCR (67450.3(c) - The amount of waste treated monthly was 6,530 gallons. Actually monthly treatment volume is approximately 10,000 gallons.

(2) Submit a written inspection schedule for containers, tanks, equipment related to the treatment system (22 CCR 67450.3(c)(8)(B) & 22 CCR 67450.3(c)(9)(A) & (D) An inspection schedule was not available during the inspection. Prepare and submit a written inspection schedule.

PRELIMINARY FIELD INSPECTION REPORT

FACILITY NAME:	FACILITY LOCATION:
C.E. Engine Services	1923 E. Avion St. Ontario, CA 91761

(3) P.E. certification(s) for secondary containment and tank system were not available - 22CCR 67450.3 (c)(9). Submit P.E. certification(s) for all relevant tank systems and secondary containment areas. Retain a copy onsite at all times.

(4) Phase I assessment checklist was not available during the inspection - 22CCR 67450.7(a)(3) & CHSC 25200.14(b)(1) - The full phase I assessment was issued on 11-4-02. Submit a copy of the Phase I assessment checklist to verify compliance with this requirement. Retain a copy onsite at all times.

(5) A written waste analysis plan was not available during the inspection - 22CCR 66265.13(b) & 67450.3(c)(9)(A) - Prepare a written waste analysis plan including specific parameters, testing methods, frequency, and sampling methods. Retain a copy onsite at all times.

(6) A written closure was available, but needs to be revised with current information (closure costs, year of closure, etc.) - 22CCR 67450.3(c)(11). Revise and submit the closure plan and retain a copy onsite at all times.

Note - Disregard item #5 → waste analysis plan was complete and available.

* Begin to correct the above noted violations. If there are any questions or concerns, please contact this Division at (909) 386-8401.

INSPECTION NARRATIVE

This inspection was performed by Kathleen Brundage and Greg Zeigler, San Bernardino County Fire Dept., with the assistance of Theresa DuBois, EHS Specialist, GE West Coast Operations and Wes Bauer, Health and Safety Program Manager.

The facility was inspected for compliance with hazardous materials and hazardous waste regulations. An onsite drum rinsing operation and wastewater treatment plant operate at this facility under Tiered Permitting for Hazardous Waste Treatment.

This facility overhauls, cleans, and repairs aircraft jet engines per FAA guidelines. The turnaround time for receiving, repairing, and shipping is 45 days.

Documentation/ Permitting Evaluation:

All permits, records, and documentation were kept in an orderly, well managed fashion.

- Handler/ Generator Permits: on-site and up to date
- Business Contingency Plan: on-site and up to date
- SPCC Plan: Complete and maintained at the facility, PE certified.
- Manifests: EPA ID# CAD009542721 consistent on all manifests; manifests filled out properly; copies sent to DTSC; copies received from TSDF in less than 30 days in all cases; copies kept for at least 3 years; land disposal restriction paperwork completed.

☐ NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN ____ DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

SUPPLEMENTAL INSPECTION REPORT

FACILITY NAME:	FACILITY LOCATION:
G.E. Engine Services	1923 E. Avion St. Ontario, Ca. 91761

Documentation/ Permitting Analysis (continued):

- **Inspection Records: Inspection records for Hazardous Waste Storage Area, Satellite Accumulation Areas, and Above Ground Storage tanks are kept on site and up to date**
- **Training Documentation: Training records are kept on all applicable employees, as well as a training matrix to summarize training received and needed. 3 employees on-site have 40 hour "HAZWOPER" training.**

Hazardous Waste Storage Area:

Hazardous Waste Storage Area is maintained in a very orderly manner. The area is bermed, locked, and kept clean. Drums are kept closed and accounted for with a Number Tracking System. Drums are segregated by general type and chemical hazard. Empty drums are properly labeled. Labeling is correct and complete. Accumulation start dates are listed on all drums.

Satellite Accumulation Areas (S.A.A.):

During time of inspection, there were a total of 4 S.A.A. in Hangars 2 and 5. All were well managed, with good housekeeping, and labeling. Drums are kept closed, and are kept in secondary containment. All S.A.A.'s had site-specific spill kits. Accumulated at these areas were oil soaked clay absorbent, oil rags and paper towels, oil/fuel filters, aerosol cans, waste oil, and waste fuel. S.A.A. in Hangar 2 also had accumulation for Molydag and Microballon waste. Accumulation dates were written on all drum labels.

7 Tank Rinse Line (Hangar 1):

See Reports completed by Wayne Williams of this Department in 1993 & 1995; Shows flow chart, chemicals, temperatures, tank materials, etc. of this process. The process has not changed.

Waste Water Treatment Plant (FTU-1):

See Reports completed by Wayne Williams of this Department in 1993 & 1995; Those reports show flow chart, chemicals processed from wastewater, and chemicals and quantities in bulk tanks used in this process. The process has changed in quantity of wastewater flow per day estimated in 1995 Wayne Williams report (3400 gal.); Average flow of wastewater is 6000 gal. with an average of 10,000 gal. treated water flow per day. See also attached handout provided by GE showing brief explanation and flow chart. Treated water flows to Inland Empire Utilities Treatment Plant. Wastewater sludge is recovered at 5-55 gal. drums per year and shipped offsite for disposal. Sludge typically includes Barium, Nickel, and Chromium.

Hazardous Materials Storage Area

Drums are stored on pallets and segregated by chemical type and hazard category. Area is bermed, locked, covered, and kept clean. Drums are kept closed. Area includes 10-55 gal. drums of J-88L permanganate scale conditioner and 24-55 gal. drums of J-84AL sodium hydroxide solution.

☐ NOTICE OF VIOLATION: THE VIOLATIONS NOTED ABOVE MUST BE CORRECTED WITHIN ____ DAYS. FAILURE TO COMPLY MAY RESULT IN LEGAL ACTION. THE CERTIFICATE OF COMPLIANCE SHALL BE SUBMITTED WITHIN THE TIME PERIOD NOTED ABOVE.

FACILITY NAME: GE Engine Services EPA ID NUMBER: CAD009527271
PHYSICAL ADDRESS: 1923 E. Avión
FACILITY CONTACT NAME: Teresa DuBois PHONE: 937-5380
SIC CODE(S): _____ _____ _____ INSPECTION DATE: 10/26/02 LOCAL #: 86008643

*GENERATOR: CESQG _____ SQG _____ LQG _____
NOTIFIED UNIT COUNT: PBR 1 CA ___ CESW 1 CESQG ___ CEL ___ CECL ___ TOTAL 2
CORRECT UNIT COUNT: PBR 1 CA ___ CESW 1 CESQG ___ CEL ___ CECL ___ TOTAL 2

This checklist and inspection report identify violations of state law regarding onsite treaters of hazardous waste, operating under an onsite permitting tier. This inspection verifies compliance with information provided on form 1772 or the CUPA Notification Form. It also covers generator requirements, although a separate checklist may be used for those requirements. A checkmark indicates a violation of law, which is explained in more detail on the attached note sheets. The governing laws are the Health and Safety Code (HSC) and Title 22 of the California Code of Regulations (22 CCR).

Generator Standards:

Each inspection agency may use their own generator inspection checklist or protocols, which are summarized below. A full evaluation of each item or document shall be conducted during the inspection. A full evaluation of each item or document is not conducted during the Verification Inspection unless serious deficiencies are suspected.

NO

___ 1. **Contingency plan** has been prepared (adequately minimizes releases, has alarm/communication systems, lists emergency equipment, name and phone numbers of emergency coordinators). ✓
___ 2. **Written training documents** and records prepared for employees handling hazardous waste. ✓
___ 3. Meet **container management standards** (storage time limits, closed, labeled, compatibility, inspected weekly, in good condition, with ignitable/reactives 50 feet from property line). ✓
___ 4. Meet **tank management standards** (either secondary containment or integrity assessments, plus storage time limits, labeled, compatibility, inspected daily, in good condition, with ignitables/reactives 50 feet from property line). ✓
___ 5. **Hazardous waste determination** (hazardous by testing the waste or applying knowledge of characteristics). ✓
___ 6. **EPA identification number** (generator has an EPA identification number). ** ✓
___ 7. **Aisle space** is maintained to allow for the unobstructed movement of personnel, fire protection equipment, spill control equipment and the decontamination equipment in an emergency). ✓
___ 8. **Accumulation of hazardous waste** is appropriate for the time allowed. (LQG <90 days; SQG 180 or 270 days or less if the waste for transportation > 200 miles and waste onsite is <6000 kg at any time; CESQG - 90 day clock starts when 100 kg of hazardous waste or 1 kg of acutely hazardous waste is accumulated). ✓
___ 9. **Manifest standards** (copies of manifest onsite for at least 3 years, within 30 days of each shipment submit to the Department of Toxic Substances Control (Department) a legible copy of each manifest used, generator and waste sections completed, transported hazardous waste without/incomplete manifest). ✓
___ 10. **Inspection standards** for hazardous waste accumulation area (container - weekly and tanks - daily). ✓

NO

___ 11. **Milkrun standards** (generator has retained copies of shipping paper/receipt for 3 years, retained copies of used oil/oil filter/photo processing waste/antifreeze/automotive parts cleaning solvents receipts for 3 years).

___ 12. **Land disposal restrictions standards** (LDR), (generator has determined whether waste is restricted for land disposal, notified for LDR notification/certification).

___ 13. **Biennial Report / exception report** submitted to the Department and retained for 3 years. (Biennial report for LQG generators of RCRA hazardous waste only).

Treatment Items - Facility Wide: (*Facility must submit a revised Form to correct errors or omissions.)*

___ 14. All **units** under PBR, CA and CE are properly indicated on the Notification Form. (Add any new units with unit sheets or correct tier on the unit sheet.)

___ 15. All generator **identification** information on the Notification is correct.

___ 16. The submitted **plot plan/map** adequately shows the location of all regulated units.

___ 17. There are records documenting compliance with sewer agency **pretreatment standards** and industrial waste discharge requirements, where applicable.

For CA or PBR notifiers:

___ 18. The generator has an annual **waste minimization** certification. (PBR submit with renewals.)

* CESQG: Generating <100 kg of hazardous waste or 1 kg of acutely hazardous waste in a calendar month.
SQG: Generating <1000 kg of hazardous waste in a calendar month.
LQG: Generating >1000 kg of hazardous waste in a calendar month.

**No EPA ID Number required for generators who generate <100 kg/month of hazardous waste and are engaged solely in used oil & solvent milk run activities in California

INSPECTION REPORT FOR GENERATORS
Permit by Rule, Conditionally Authorized and Conditionally Exempt Notifiers
NOTE SHEET

This sheet includes inspector observations and expands on this violations identified on the checklist (by number). In some cases it indicates how the facility should correct the violations.

General facility standards - no violations noted - see hazardous waste generator / handler report for specific details

WWTP - opened 1990 - operates 2 "trains"
Steps for treatment:
pH adjustment - equalization stage
Neutralization - metal precipitation -
flocculation -
filtration
sludge dewatering - filter press
(flowchart - provided)
Waste streams treated include
engine/parts cleaner
FPI waste
ECG waste
Test cell waste water from oil/water clarifier

- ☐ Legal reasons
- ☐ Other: _____

The initial fee of $71.00 per each site record search must be submitted with this form. Record searches are performed in the order received. You may fax this form to (909) 387-4323 to be logged in the same day. Indicate that you have sent the original form with the fee by separate mail. A rate of $71.00 per hour will be charged for any extended research. If research reveals no records exist for the site, a letter to that effect will be issued and sent by mail. If records are identified, usually after ten working days, you will be notified in writing describing records that exist for the site and what files are available for review. At that time, you can schedule an appointment to review available files. If no records exist, you will be notified in writing. You can select a maximum of 20 pages to be copied at the time records are examined at a rate of 10 cents per page, or you can bring a personal copier or arrange a private copy service if preferred.

I have read the above procedures for records research.

Advanced
GeoEnvironmental, Inc.

10 June 2013
AGE Project No. 13-2542

RECEIVED
JUN 26 2013
S.B. CO. FIRE DEPT.

Mr. Michael Kissick
MJK Construction, Inc.
2766 Pomona Boulevard
Pomona, California 91768

Subject: **UST Removal and Closure Report -**
ATLANTIC AVIATION - ONT
2161 East Avion Street, Ontario, California

Dear Mr. Kissick:

Advanced GeoEnvironmental, Inc. (AGE) has prepared the enclosed report summarizing the removal of seven underground storage tanks (USTs) and subsequent soil sampling and excavation activities performed on 07 and 22 May 2013 at the ATLANTIC AVIATION - ONT site at 2161 East Avion Street, Ontario, California (site).

1.0. SITE LOCATION AND DESCRIPTION

The site is located in an industrial area on the south side of the Ontario International Airport at 2161 Avion Street, Ontario, California (Figure 1 - *Location Map*). The site is a former fueling facility that contained seven USTs. The following table is a summary of the various USTs:

UST No.	UST Volume (gallons)	UST Contents	UST Construction
T1	25,000	Jet Fuel	Double-walled Fiberglass
T2	25,000	Jet Fuel	Double-walled Fiberglass
T3	15,000	Jet Fuel	Double-walled Fiberglass
T4	10,000	Av-Gas	Double-walled Fiberglass
T5	6,000	Gasoline	Double-walled Fiberglass
T6	2,000	Slop - various fuels	Double-walled Fiberglass
T7	500	Waste water	Steel

A fuel dispenser, related to the UST T5 (gasoline) was located north of the UST. The UST facility is depicted on Figure 2 - Site Plan.

2.0. DEPTH TO GROUND WATER

AGE reviewed the State of California Geotracker database to determine if groundwater has been encountered at any locations under environmental investigation in the vicinity of the site. The property at 2264 East Avion Street, located 0.22 mile southeast of the site, has numerous groundwater monitoring wells. The depth to groundwater on this property has ranged from 232 to 277 feet and flows to the southwest. AGE believes the depth to groundwater and flow direction are similar under the site.

3.0. UST REMOVAL

The USTs were removed by MJK on 07 May 2013. Prior to removal, the USTs had been exposed and were triple-rinsed by Adams Services Inc. On 29 April, 06 May and 07 May 2013 and the rinseate was subsequently transported to a Demenno/Kerdoon for disposal under manifest Nos. 01396378, 010396379 and 004291309 (manifests attached). Prior to removal, dry ice was added to each UST to assist in purging oxygen levels. Following the removals, USTs T1 through T6 were transported under non-hazardous waste manifests to Azusa Land Reclamation while UST T7 was transported to American Metals Recycling (non-hazardous waste manifests and destruction certificates attached).

The UST removals were witnessed by Inspector Heenan of the Ontario Fire Department and Ms. Brenda MacGregor of the San Bernardino County Fire Department - Hazardous Materials Division (SBCFD-HMD).

4.0. SOIL SAMPLE COLLECTION AND ANALYSIS

The sampling program was conducted by Mr. Robert Loeffler, California Professional Geologist No. 6709. Ms. MacGregor of the SBCFD-HMD directed the sampling program.

Within the UST excavation, samples were collected approximately 2 feet below both ends of USTs T1 through T4. One soil sample was collected 2 feet beneath the centers of USTs T5, T6 and T7. The initial sample under T7 was collected at 9 feet, however, based on hydrocarbon odors in the sample, a deeper sample was also collected at 14 feet. iOne soil sample was collected from a depth of 4 feet beneath the former dispenser. Two samples were also collected from the spoils piles. The sample locations are depicted on Figure 2. The samples collected from the UST excavation and dispenser location were collected from the teeth of the backhoe bucket while the spoils pile samples were collected with a hand auger. Each sample was compacted into a 2" x 3" brass sleeve, each end covered

with teflon sheets and capped. The sample sleeves were labeled and then placed in a chilled container.

All samples were transported under chain-of-custody to CalTech Environmental Laboratory (CTEL), a California Department of Public Health-certified laboratory, for analysis. The samples were analyzed for the following. and analyzed for the following constituents:

Sample Location	Sample Ids	Sample Date	Analysis
UST T1 - 25,000 Gal Jet Fuel, North and South End - 16' Depth	T1N-16' T1S-16'	5/7/2013	1. Total Petroleum Hydrocarbons - diesel range (TPH-d) - EPA Method 8015-m 2. Benzene, Toluene, Ethylbenzene, Xylenes and MTBE (BTEX/MTBE) - EPA method 8260B
UST T2 - 25,000 Gal Jet Fuel, North and South End - 16' Depth	T2N-16' T2S-16'	5/7/2013	1. TPH-d - EPA Method 8015-m 2. BTEX/MTBE - EPA method 8260B
UST T3 - 15,000 Gal Jet Fuel, North and South End - 14' Depth	T3N-14' T3S-14'	5/7/2013	1. TPH-d - EPA Method 8015-m 2. BTEX/MTBE - EPA method 8260B
UST T4 - 10,000 Gal Av-Gas, North and South End - 14' Depth	T4N-14' T4S-14'	5/7/2013	1. Total Petroleum Hydrocarbons - gasoline range (TPH-g) - EPA Method 8015-m 2. BTEX/MTBE - EPA method 8260B
UST T5 - 6,000 Gal Gasoline, Center - 12' Depth	T5C-12'	5/7/2013	1. TPH-g - EPA Method 8015-m 2. BTEX/MTBE - EPA method 8260B
UST T6 - 2,000 Gal "Slop Tank", Center - 10' Depth	T6C-10'	5/7/2013	1. TPH-g - EPA Method 8015-m 2. TPH-d - EPA Method 8015-m 3. BTEX/MTBE - EPA method 8260B
UST T7 - 550 Gal Waste Water, Center - 9' and 14' Depth	**T7C-9'** **T7C-14'**	5/7/2013	1. TPH-g - EPA Method 8015-m 2. TPH-d - EPA Method 8015-m 3. BTEX/MTBE - EPA method 8260B
Former Dispenser - 4' Depth	D-4'	5/7/2013	1. TPH-g - EPA Method 8015-m 2. TPH-d - EPA Method 8015-m 3. BTEX/MTBE - EPA method 8260B
"Clean" Spoils Pile	SP1 SP2	5/7/2013	1. TPH-g - EPA Method 8015-m 2. TPH-d - EPA Method 8015-m 3. BTEX/MTBE - EPA method 8260B

5.0. FINDINGS

Hydrocarbon odors and stained soil were noted in the dispenser sample as well as the two soil samples collected beneath UST T7.

TPH-g was detected in samples T7C-9', T7C-14' and D-4' at 110 mg/kg, 70 mg/kg and 110 mg/kg, respectively. TPH-d was detected in these same samples at 4,400 mg/kg, 2,900 mg/kg and 4,800 mg/kg, respectively. Toluene, ethylbenzene and xylenes were detected in these same samples at concentrations ranging from 0.040 mg/kg to 1.56 mg/kg. Benzene and MTBE were not detected in these samples.

TPH-g and/or TPH-d and BTEX and MTBE were not detected in any of the samples collected from beneath USTs T1 through T6 or the spoils pile samples.

The analytical results are summarized on Table 1. The analytical report, QA/QC report (CTEL Project No. CT178-1305043) and chain-of-custody form are attached.

Based on the analytical results, the SBCFD-HMD was contacted to determine if the impacted soil in the former dispenser and UST T7 area could be further excavated prior to submitting a closure report. On 13 May 20013, the SBCFD-HMD agreed to supervise the excavation of the impacted soil.

6.0. FURTHER EXCAVATION OF IMPACTED SOIL

On 22 May 2013, MJK Construction Inc. excavated additional soil in the dispenser and UST T7 location under the direction of Mr. Curtis Brundage of the SBCFD-HMD and Mr. Loeffler with AGE. The area under the former dispenser was excavated to a depth of 10.5 feet with lateral dimensions of 11 feet x 7 feet. The area under UST T7 was excavated to a depth of 21 feet with approximate lateral dimensions of 10 feet by 7 feet. The excavations were dug out until stained soil was no longer visible in the sidewalls. All impacted soil was stockpiled on visqueen sheeting and subsequently covered.

Under the direction of Mr. Brundage, soil samples were collected from the bottom of the excavations by Mr. Loeffler (samples EX-D-10.5' and EX-T7-21'). The excavation and sample locations are depicted on Figure 2. Each sample was compacted into a 2" x 3" brass sleeve, each end covered with teflon sheets and capped. The sample sleeves were labeled and then placed in a chilled container and transported to CTEL for analysis. The samples were analyzed for TPH-g, TPH-d and BTEX/MTBE in accordance with EPA methods 8015-m and 8260B.

TPH-g, TPH-d, BTEX and MTBE were not detected in either of the samples.

The analytical results are summarized on Table 1. The analytical report, QA/QC report (CTEL Project No. CT178-1305137) and chain-of-custody form are attached.

On 28 May 2013, 77.11 tons of impacted soil was transported under non-hazardous waste manifests to Soil Safe of California, Inc. in Adelanto, California for recycling. The weighmaster certificates and non-hazardous waste manifests are attached.

7.0. RECOMMENDATIONS

Based on field observations and the analytical results, AGE recommends that the SBCFD-HMD grant closure for this former UST facility based on the following:

- The depth to groundwater beneath the site is anticipated to be between 232 and 277 feet below surface grade.
- Seven USTs, dispenser and piping were removed from the site in May 2013.
- Impacted soil was encountered beneath the former waste water UST and dispenser, however, the soil was subsequently removed successfully. The excavated impacted soil was transported to Soil Safe of California, Inc. for recycling.
- No hydrocarbon impacted soils were encountered beneath former USTs T1 through T6.

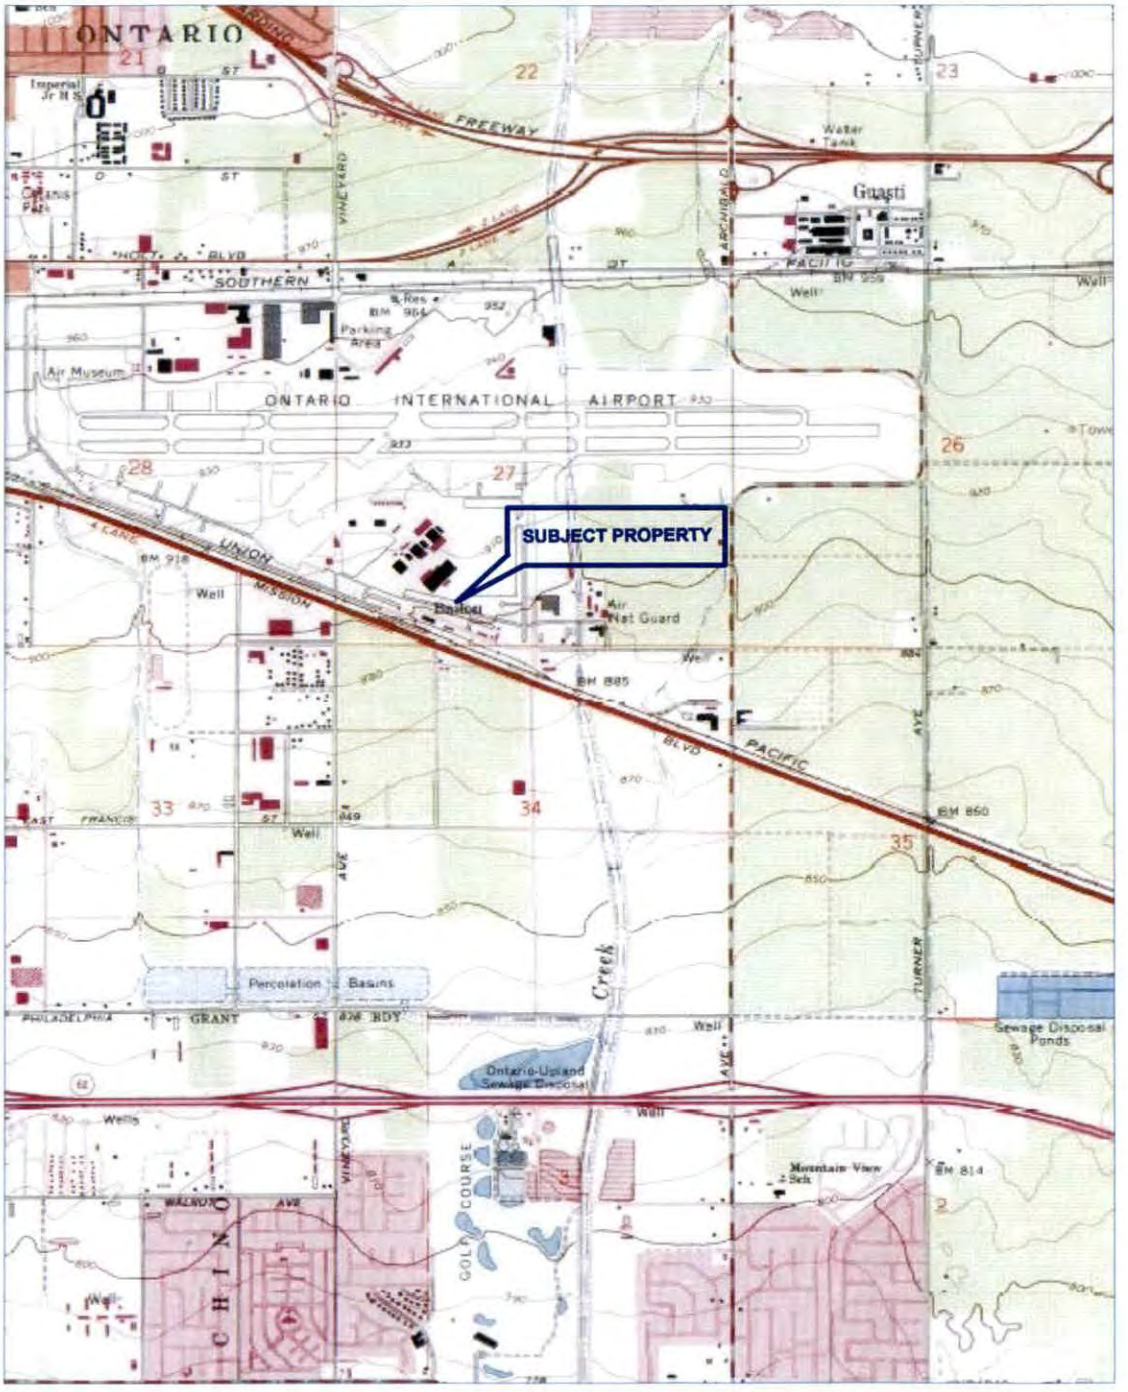
8.0. LIMITATIONS

Our professional services were performed using that degree of care and skill ordinarily exercised by environmental consultants practicing in this or similar localities. The findings were based solely upon analytical results provided by an independent laboratory. Evaluations of the hydrogeologic conditions at the site have been made from a limited number of available data points (i.e., soil samples) and subsurface conditions may vary away from these data points. No other warranty, expressed or implied, is made as to the professional interpretations, opinions, and recommendations contained in this report.

If you have any questions or require further information, please contact our office at (714) 529-0200.

Sincerely,

***Advanced* GeoEnvironmental, Inc.**



Robert D. Loeffler
Vice President
California Registered Geologist No. 6709

SUBJECT: REMOVAL OF (7) UNDERGROUND STORAGE TANK AT 2161 E AVION STREET, ONTARIO, CA 91761

This Department has received the closure report, including the sample results from ADVANCED GEO ENVIRONMENTAL, for the UST removal completed on May 7, 2013. After review of the reports prepared by you or your agent, it has been determined that the extent of contamination, or the lack thereof, would indicate that no further investigation is warranted at this time

It is important to note that this cannot be construed as a release of liability for the site or declaration that the site is free from contamination. Should further projects or environmental investigations reveal additional contaminants on site, you will be responsible and held liable for the investigation and remedial actions.

Please contact this office at (909) 386-8464 if you have any further questions or concerns.

APRIL 22, 1986

LEAK DETECTION PLAN FOR

BEECHCRAFT WEST, INCORPORATED

2161 EAST AVION STREET

ONTARIO, CA 91761

Prepared by:

Eric D. Floyd
Project Geophysicist
H. B. Covey, Inc.

LOCATION OF FACILITY:

2161 EAST AVION ST.
ONTARIO, CA 91761

NAME AND ADDRESS OF TANK OWNER:

BEECHCRAFT WEST, INC.
7240 HAYVENHURST AVE.
VAN NUYS, CA 91406

DESCRIPTION OF TANK FACILITY:

LEAK DETECTION

Present leak detection is by stock inventory and system check. Each morning the fueling system is activated, and product is recirculated through all aboveground piping. At this time, all exposed piping is checked for leakage. This process is recorded on a daily record sheet (APPENDIX I). There is an "in tank" mechanical gauging system installed on tanks 1-5, however it is inoperative at the present time. There is no secondary containment or cathodic protection equipment on the tanks located at this facility.

TANK DESCRIPTIONS

Tank #1 One 25,000 gallon Owens-Corning underground storage tank constructed of fiberglass, installed in 1983. This tank contains aviation jet fuel (high grade kerosene). The product line from this tank is of the above ground suction type. Size and material of construction are unknown. There has been no recorded product loss from this tank and associated piping, nor have any repairs been made to this system.

Tank #2 One 25,000 gallon Owens-Corning underground storage tank constructed of fiberglass, installed in 1983. This tank contains aviation jet fuel (high grade kerosene). The product line from this tank is of the above ground suction type. Size and material of construction are unknown. There has been no recorded product loss from this tank and associated piping, nor have any repairs been made to this system.

Tank #3 One 15,000 gallon Owens-Corning underground storage tank constructed of fiberglass, installed in 1983. This tank contains aviation gasoline (100 octane low lead). The product line from this tank is of the above ground suction type. Size and material

of construction are unknown. There has been no recorded product loss from this tank and associated piping, nor have any repairs been made to this system.

Tank #4 One 15,000 gallon Owens-Corning underground storage tank constructed of fiberglass, installed in 1983. This tank contains aviation gasoline (100 octane low lead). The product line from this tank is of the above ground suction type. Size and material of construction are unknown. There has been no recorded product loss from this tank and associated piping, nor have any repairs been made to this system.

Tank #5 One 6,000 gallon Owens-Corning underground storage tank constructed of fiberglass, installed in 1983. This tank contains premium unleaded gasoline. The product line from this tank is of the underground pressure type. Size and material of construction are unknown. There has been no recorded product loss from this tank and associated piping, nor have any repairs been made to this system.

Pressure

Tank #6 One 2,000 gallon Owens-Corning underground storage tank constructed of fiberglass, installed in 1983. This tank contains contaminated aviation jet fuel and aviation gasoline. Spilled product can enter this tank through a gravity drain type system from a containment apron constructed in the fuel transfer area. This waste product is removed by suction truck. There has been no recorded product loss from this tank and associated piping, nor have any repairs been made to this system.

Tank #7 One 500 gallon underground storage tank constructed of carbon steel. This tank was installed in 1983 and contains waste oil. Leak detection is by stock inventory. The drain line into this tank is of the gravity drain type. There has been no recorded product loss from this tank and associated piping, nor have any repairs been made to this system.

LOCAL HYDROLOGY:

Depth to groundwater in the vicinity of this location is in excess of 200 feet (City of Ontario Water Department). The ground water gradient is thought to be in a generally southern direction. This water is potable, and is used for drinking and agriculture.

Surface soil conditions grade form sand to sandy loam. These soils are poorly sorted and compacted.

Drainage around the tank area is mostly to the north.

PROPOSED LEAK DETECTION SYSTEM

Tanks 1 - 6.....Alternative #14
Daily inventory by gauge tape
Retrofit with line leak detectors where required
Annual precision tank test

Tank #7.....Alternative #11
Weekly gauging of tank
Annual precision tank test

TANK TESTING SCHEDULE

All tanks to be tested by December 15, 1986
Petro-tite precision test to be used on all tanks

PERSON RESPONSIBLE FOR LEAK DETECTION

Mr. William Speer

LEAK DETECTION PROCEDURE

The level of each tank is checked daily via the in-tank gauging system and/or gauge stick. Dispensing meters are also read daily for each product. These readings are recorded and maintained in a file. These figures are compared every 30 days. The California Underground Storage Tank Regulations (Table 4.1, pg. 4.3b) sets forth the following tolerance levels for tank measurments.

"Inventory reconciliation which exceeds an allowable measurement error plus 0.15 percent of throughput at any time during a 30 day period shall require further investigation." The allowable measurements errors are as follows;

TANK SIZE ALLOWABLE MEASUREMENT ERROR

Tanks of 4,000 gallons or less.....25 gallons;

4,000 to 8,000 gallons.....50 gallons;

8,000 to 12,000 gallons.....75 gallons;

Tanks greater then 12,000 gallons.....100 gallons.

REPORTING PROCEDURES

Should a leak be detected, the monitoring equipment will immediately be checked for proper operation and the pump meters for proper calibration. The San Bernardino County Environmental Health Department will be notified of the

possible problem concomitantly with the above procedures, and updated as to the status of the leak after the equipment check.

SCHEDULE OF COMPLIANCE

Tank test all tanks.....by Dec. 15, 1986
Inventory control.....by Dec. 15, 1986

Respectfully Submitted,
Eric D. Floyd

Eric D. Floyd
Project Geophysicist
H. B. Covey, Inc.

REPORT: On 2/13/19 at 1040 hrs, I arrived at Federal Express Corp (FID 5800) to conduct a compliance inspection. I met with Senior Technician Rick Soto (909-937-1712) who accompanied me during the inspection. I observed the following:

- All portable auxiliary engines that were >50 bhp were registered with PERP.

- The facility mainly uses aerosol paint for touch-ups and safety coatings. I observed Rustoleum Traffic Marking white paint (100 g/L VOC) and Sierra Performance Enamel in Safety Yellow (0 VOC) which are seldom used, compliant with R1113.

- The facility uses a small sink-type parts washer with ArmaKleen 4in1 solvent (21 g/L), compliant with R1171 and exempt per 219(o)

- On site is a small portable pressure washer (s/n 15117574) with a burner of unknown size that utilizes either kerosene or diesel. Mr. Soto believed the burner was diesel fired. I requested that Mr. Soto confirm the fuel and burner rating so that I could determine if a 222 registration would be required.

I departed the facility at 1115 hrs without taking any enforcement action.

Written by VTanik 2/13/19

Mr. Soto confirmed that the pressure washer had a diesel-fueled burner that was rated 169,000 BTU/hr. I called Mr. Soto to inform him that the washer would require a registration and mailed a copy of 222-PW along with NC E47393.

REPORT: 9/10/2013, I arrived at this facility to conduct an inspection and met with Rick Soto Sr. Technician 9099371712 who escorted me during my inspection. No 461 equipment on the premises.

I issued NC E23326 to apply for District Permit or CARB registration for diesel turbine air start portable engine asset # 29958 402 HP not operating during inspection which was new. I also issued this NC to maintain run time logs for other 9 PERP registered engines (10 total). This airstart was at 1.0 hrs and not operating.

Advised 4 PERP registered air starts were to expire on 10-31-2013. They are 140720, 62203, 62201 and 63489.

I sent e-mail to Manager jmshenouda@fedex.com re: NC and compliance.

1171

Blue safety kleen parts cleaners on the premises water based.

219 equipment

propane fired pressure washer

engines < 50 hp

Written by John Eckert 09-17-2013

10-17-2013 Performed followup inspection with Rick Soto and discovered air start turbine asset # 29958 is red tagged and n/o until permitted or registered. Facility keeping records of run times on air starts and GPUs. NC E23326 is in compliance. I also performed inspection on arranged inspection of PERP # 136812-2016 and discovered it is at John Wayne Airport in Santa Ana. It is not located at Ontario Airport. I updated PFIS and gave to Theresa for further followup in Santa Ana.

REPORT: Update - 1/3/2013.

Hello,

As per our conversation, Atlantic Aviation only uses one unloading hose as per their permit. The second hose has been removed and is not in use.

Tony Casillas

Atlantic Aviation-ONT

Operations Manager

(909)390-2370

F/U 10/26/2012 - I issued N/C E16306 to this facility for 203b for the mobil fueler to update their equipment operating logs to prove complaince with all the permit (N25540) limits.

On Wednesday, 10/03/2012, at 0845 hrs., I arrived at this facility to conduct an E/L inspection and met with Tony Casillas, Operations Manager at Atlantic Aviation Services, 909 390-2370, cell 951 892-5669, who now occupies the location. Mr. Casillas, who is a former employee of Mercury Air Group stated that Atlantic Aviation bought Mercury in 2007 and took over operation of the facility in 2008. This is a small aiport support company that is located at Ontario Airport. The rules that apply are 203 461.

G7893 - Bulk Loading, fuel and gasoline dispensing Jet A, Diesel Gasoline.

LIMITS - Jet A is 100K g/yr; Av Gas is 5K g/mo, 60K g/yr; gasoline is 5K g/mo, 60K g/yr.

N25540 - Mobil refueller - Gasoline. CARB certification sticker, reverification test done by franzhill on 7/18/2012.

LIMITS - 5K g/yr, records for vapor return line, gasoline pressure, cargo pressure, records to prove complaince with permit conditions o

The equipment matched the permit with the exceptions (N/C - E16294):

1. Tank farm permit G7893 has one Jet A dispenser listed and they have two.

REPORT: 11-08-2013 Performed insp. with Paul Panagiotidis LA World Airports Supervisor 9095445254. Nobody was available at Ameriflight on the tarmac on east end of Ontario Airport next to Haven. Ameriflight operates two 6 cylinder gas GPUs which are old and probably from the 1970's. These engines were not operating. I believe both of these engines are greater than 50 HP. I left business card at this facilitys Ontario mailing address.

Engine # 1

Was at 5525 hrs and not operating. It had plate 554950 on the motor block or plate TE6015BA. No other identifying information was on this engine which was cold.

Engine # 2

Was at 6103.8 hrs and not operating. It had plate s/n 0218 on the motor block or plate F2T6015BA. No other identifying information was on this engine which was cold.

The following is e-mail correspondence with Operations Manager Paul Halter.

Good morning-

I missed your e-mail last week as I was on vacation. Attached is the purchase order for a new, less than 50 hp GPU, to replace the units in question. We've pushed the manufacturer to move us up on the waiting list as we're an existing customer. We're anticipating receiving this unit by the end of the month. In addition, we've rebuilt a battery cart and will be delivering it to ONT later this week.

Please let me know if I can be of further assistance.

Thanks

-Paul

To: Halter, Paul

Subject: Just to advise

Hello, I was able to inspect your engines today, and document hour meter readings on your 2 GPU's. These engines are not in compliance, and the District can pursue Notice of Violation if they are found to be operating without permit or registration. If the hour meters advance, it can be considered proof of operation and a subsequent Notice of Violation can be issued.

Does Ameriflight have a plan to deal with this issue ?

Thanks.

This needs further followup, since nobody is on the premises to deal with this issue.

Written by John Eckert 11-15-2013

01-21-2014 Performed inspection and contacted Jessie Garcia Line Service Tech 8183919874 at the Ontario Airport Office location on Avion drive north of mission. He advised old GPU's have been replaced with 25hp new GPU, and tarmac inspection at this time confirmed that these 2 old ICEs are not operating and have been replaced with small 25hp diesel new GPU. He advised he was in process of removing batteries and disabling old GPU's "today", and would followup with e-mail and pics tommorow of disabled engines. I determined this new GPU to be < 25hp from KVA rating on Gen Set during inspection.

Attached is e-mail from Paul Halter with Ameriflight:

Good morning-

Sorry I forgot to get back to you. We did receive, and are using, our new JetGO GPU that I sent you details on previously. The old units are no longer in use. You can get specifics at www.aerospecialties.com. Below are a few of the highlights that I've cut/pasted for you.

Diesel Generators

AERO JetGo 550Mti-RJ 28V DC Diesel Hybrid Ground Power Unit

"550 continuous amps at 28.5 volts DC

"2300 peak amp start capability

"Kubota 4-cylinder turbo-diesel engine

"EPA Tier 4i and EU Stage IIIA emissions compliant

"Aircraft over and under voltage protection with optional added soft-start capabilities

"Efficient fuel consumption: 0.8-1.5 gallons (3-6 liters) per hour (depending on load and atmospheric conditions)

"Extremely quiet: Less than 63db at 20 feet (at full load)

"Includes 30-foot MS3506 military spec output cable with standard NATO aircraft plug

JetGo Tier 4i low-emission nonroad diesel ground power units are exempt from both California Local Air District permits and the California Airborne Toxic Control Measure for Diesel Particulate Matter. The Kubota engines used are rated at less than 50 Horsepower and are therefore not regulated by California statutes.

Please let me know if you have any additional questions.

-Paul

REPORT: On Tuesday, 5/3/2011, at 0950 hrs., I arrived at this facility to conduct a Title V and Equipment list inspection. Prior to my arrival I had confirmed the site was O/B and had made arrangements with LAWA and GE to meet and walk the site. I met with Tammy Norwood, G. E. Regional Manager, (W- 620 442-3600, C - 620 222-5953) and George Raphael, LAWA Engineer, 909 223-6193 and they escorted me during my inspection. All of the buildings had been cleared of all equipment to the bare walls.

I reviewed the close out reports prepared by CH2Hill environmental and confirmed the soil treatment was legally removed along with all the other equipment. I have inserted her report and confirmed the dates included. The short story is they were completely out by December 28, 2010.

Mr. Rank,

This e-mail is to serve as a follow up to the final air inspection for our GE Aviation site located at 2264 E. Avion St, Ontario, CA. As you are aware, the facility has closed and this inspection was to verify that all equipment and emission sources had been removed. It is our understanding that this was the final process to formally close out our Title V air permit with SCAQMD. This final inspection included the following attendees: Tami Norwood (GE Aviation), George Raphael (LAWA) and Jim Rae (LAWA). In addition to a walk thru of the facility, records were reviewed. These records included: visible emissions log, test cell emissions log, VOC usage logs, soil vapor extraction well closure documentation, and the site's decommissioning report dated March 11, 2011.

The site tested its last engine on 8/31/2010. After this date, the site began to prepare for closure of the facility. The last day for the employees at the facility was 10/28/2010. On 11/1/2010, formal closure and decommissioning began at the site. This effort was coordinated by CH2MHill, a contractor hired by GE to coordinate the closure efforts.

The decommissioning efforts were finalized on 12/28/2010 and GE maintained control of the facility until 3/20/2011 when the lease expired and the property was formally turned back over to the Lessor, LA World Airports.

It has been great working with you. Please don't hesitate to give me a call if you have any questions.

Tami

REPORT: Harold Rank

On 6/17/2010, I inspected this facility with Gary Feer, Foreman, 909 605-7603. GE Engine Services conducts aircraft engine overhauls and testing. The majority of the facility is for aircraft engine maintenance/testing. I reviewed their records and they showed their facility has only done 2 engines since the first of this year, which generated less than 25 % of the permitted/emission limits. They are in compliance with their permit condition limits. The Vapor Extraction equipment is still off and disconnected/capped. The submitted their SAM and ACCreports on time. Mr. Feer explained that the plant was closing their doors by the end of the year for good and all employees will be either transferred, retired, or laid off. O/C

Harold Rank

On 8/19/2008, at 0800 hrs., I inspected this facility with Gary Feer, Foreman, 909 605-7603. GE Engine Services conducts aircraft engine overhauls and testing. The majority of the facility is for aircraft engine maintenance/testing. I reviewed their records and they showed their facility does generally less than 1 engine a month. which is less than 25 % of the emission limits. They are in compliance with their permit condition limits. The Vapor Extraction equipment was off and disconnected/capped. They said DTSC was out last week checking and may let them remove the equipment in the future. I told them to make sure it does not affect their Title V permit with an AQMD Engineer. O/C

Harold Rank

On 8/9/2007, at 0800 hrs., I inspected this facility with Tami Norwood, Regional Manager, 620 442-3600, and Mark Lineham, Manager, 909 605-7616. GE Engine Services conducts aircraft engine overhauls and testing. The majority of the facility is for aircraft engine maintenance. I reviewed their records and they showed their facility does less than 1 engine a month. which is less than 25 % of the emission limits. They are in compliance with their permit condition limits and are going to mark the permit numbers on the soil treatment devices for better tracking. O/C

REPORT: 9/29/09

I arrived at GE Engine services for a Title V and annual compliance inspection.

GE Engine Services conducts aircraft engine overhauls and testing. The majority of the facility is for aircraft engine maintenance.

The two Jet Engine Test Facility/Test Cells, Permit F35578 and Permit F34664 are located at 2264 Avion Place. A test cell is a large engine mount with an exhaust stack. Neither Test Cells were in operation.

Records are maintained of fuel usage and this is used to calculate pollutant emissions based on engine-specific emission factors. Records show compliance with daily and 30-day average emissions. Soil units were not in operation at the time of my inspection and according to the facility have not been used in years.

Units were behind a locked gate and may be removed pending receival of appropriate permits (see previous inspectors IR.

All wipe cleaning of engines is done with acetone. No plating or painting is done on site.

All Title V annual and semi-annual compliance certifications have been submitted.

The facility is in compliance with District Rules and Regulations.

REPORT: On May 13, 2004, I arrived at 1923 Avion Street, and met with Rob Meyers, EHS Manager for GE Engine Services. I informed Mr. Meyers of the compliance inspection of the VOC vapor extraction equipment. The facility is aircraft engine repair shop. The facility was in operation during the inspection.

Permitted VOC extraction unit F36249 was in operation and in compliance with permit limit. The other three units are permanently in place in various locations around the test cell facility. Based upon the plume and migration pattern if necessary the other units be placed in operation. The average flow rate is 122 scfm which is in compliance with permit conditions. Operation and maintenance is done on a weekly basis as well as there is a field service check by the Geosyntec the consultant for this equipment. Records are readily available for inspection.

The facility is in compliance with all Soil Treat Vapor extraction equipment.

REPORT: On August 5, 2003, I arrived at GE Engine Services for an equipment check for Engineer Jim Fakhoury and a Title V compliance inspection.

GE Engine Services conducts aircraft engine overhauls and testing. The majority of the facility is for engine maintenance. I met with Mr. Rolando Espejo (909/937-5311), Environmental Health & Safety Generalist and Dr. Phil Wang (909/937-6731).

The two Jet Engine Test Facility/Test Cells, Permit F35578 and Permit F34664 are located at 2264 Avion Place. A test cell is a large engine mount wit an exhaust stack. Test Cell #1 was not operating and the stack height was measured at 45 feet 7 inches. Test Cell #2 was in operation during the inspection and the height was measured at 58 feet 2 inches. The test cell height was required by Engineer Jim Fakhoury for Title V evaluation. Records are maintained of fuel usage and this is used to calculate pollutant emissions based on engine-specific emission factors. Records show compliance with daily and 30-day average emissions. Soil units were not in operation at the time of my inspection and are only operated on an as needed basis. Records are maintained of ppm concentrations based on readings from a PID.

All wipe cleaning of engines is done with acetone. No plating or painting is done on site. Rule 219 equipment includes glove box abrasive blast cabinets and <50 HP emergency generators.

All Title V annual and semi-annual compliance certifications have been submitted.

The facility is in compliance with District Rules and Regulations.

Inspection Date: 05/24/2002
Instruction:
Disposition: Operating in Compliance at time of inspection

Application No.	Permit No.	Permit Issue Date	Permit Status	Equipment Category	BCAT/CCAT Description	Application Date	Application Status

REPORT: On May 24, 2002 with Supervising Inspector Rich Watson, I arrived for an annual Title V inspection. The facility's Title V permit became official in October 2001. We met with Theresa Du Bois, EHS Specialist, and a temporary EHS Specialist named Stacy, whose last name I didn't acquire. The facility conducts aircraft engine overhauls and testing. A majority of the property is for engine maintenance. The 2 test cells and the soil vapor units are at 2264 Avion Place. A test cell is just an engine mount with an exhaust stack. Test cell #1 has not been operated for many months and #2 had been operated the day before the inspection. Records are maintained of fuel usage and this is used to calculate pollutant emissions based on engine-specific emission factors. Records show compliance with daily and 30-day average emissions. Soil unit "A" was in operation with an air flow rate of 141 cfm, in compliance with permit limit. Records are maintained of ppm concentrations based on readings from a PID. The soil units are only operated as needed. They currently have a consultant on-site all day to monitor the soil equipment.

All wipe cleaning of engines is done with acetone. There is no painting or plating. Rule 219 equipment include glove box abrasive blast cabinets and <50 HP emergency generators.

The company submitted the Title V annual and semi-annual compliance certifications on the same form with both check boxes marked. I informed Mr. Du Bois that they need to submit separate forms with only one box checked for each report. No notices were issued.

Inspector Comment

On June 13, 2003 I received complaint #159939 alleging that workers were exposed to asbestos containing materials. I arrived at 2132 E. Avion Street, Ontario and met with the complainant.

The area in question is the Terminal One west end basement. The complainant stated that some of [redacted] workers on the 12th of June were told to enter an area that was known to have asbestos containing materials and put down plastic covering on the floor. When I arrived at the terminal area, I observed a locked door with a sign on it stating that asbestos was present. Upon entering the area I observed that the area itself is a boiler room with three additional rooms that held storage material. The door to the other room also had a sign on it stating that asbestos was present. The first room had floor tile that had been disturbed in a few places and the floor was covered in plastic. The second room has metal cabinet shelving and books. The floor covering for the most part was intact. The third room was the size of a small closet with broken floor covering material at the entrance of the room.

I met with Ralph Morones, Director of Maintenance Ontario International Airport. I explained to him that I was there because of a complaint filed alleging that workers were working in an environment that exposed them to asbestos. Mr. Morones stated a test was done on May 29, 2002, by the Headquarters Risk Management Group. He then showed me a copy of a Bulk sample Analysis Summary sheet from Hygeia laboratories Inc. The summary sheet was vague and did not contain enough information and there was no chain of custody nor were the samples taken by a CAC.

I issued a Notice to Comply#86692 to Ralph Morones. The notice to comply stated the prior to continuing the renovation conduct an asbestos survey by a CAC (include air sampling of the basement located at Ontario Terminal West One west end. Fax the survey results to D. Celestine 909 396-3342.

If the survey verified the presence of asbestos stabilize and secure the affected area . Submit a procedure 5 plan prior to any clean up. Then submit the following records: name of staff that placed hazard placard on the doors of the basement and a list of the staff who have entered the facility and training certificates since the hazard placards were placed on the doors.

SCAQMD Complaint Report

Complaint 159939

Run Date: 9/8/2021 09:50:08

On June 25, 2003 I reviewed the paperwork submitted by Francisco Esquivel, IH. A CAC was hired and conducted bulk sampling and air sampling as per the NTC. Based upon the reported submitted by the CAC the facilty is in compliance. No further compliance action is necessary.

APPLICATION INSTRUCTIONS
FOR
INTERNAL COMBUSTION ENGINE

FILL OUT REVERSE SIDE AND RETURN WITH YOUR APPLICATION

With each application for permit for the above equipment type, the following information must be submitted:

1. **EQUIPMENT LOCATION DRAWING FOR EQUIPMENT TO OPERATED ONLY AT A SINGLE LOCATION.** The drawing submitted must be to scale (suggested scale: 1" = 100 feet; accuracy of measurements to the nearest 5 feet will be satisfactory) and must show at least the following:

   a. The facility property boundaries, and heights of all buildings within the property.
   b. Identify the location of the above equipment on the property. Indicate the direction of the discharge from the above equipment.
   c. Indicate the location of adjacent property, indicating street names. Show location of all buildings and automobile parking lots outside the property that are within 600 feet of the above equipment. Identify all such buildings (such as residences, apartment homes, machine shop, warehouse, etc.), specifying height of each building (number of stories). Indicate direction (north) on the drawing.

2. **DRAWINGS AND SPECIFICATIONS** of the above equipment. Furnish the manufacturer's catalog for the model and serial number specified on the reverse side of this form.

NOTE: Structural design calculations and details are not required. When standard commercial equipment is to be installed, the manufacturer's catalog describing the equipment may be submitted by the applicant. **ADDITIONAL INFORMATION MAY BE REQUIRED.**

APPLICATION INSTRUCTIONS FOR GASOLINE STORAGE & DISPENSING FACILITIES—RULE 461

WHO MUST APPLY FOR A PERMIT:

Any person installing, or using one or more gasoline tanks with capacities of more than 251 gallons which are filled from tank-truck or trailer. Gasoline is defined as any petroleum distillate with a Reid vapor pressure of 3.9 pounds or more.

WHEN TO APPLY:

Prior to installation or alteration and prior to use if ownership or location is changes.

HOW TO APPLY:

A. Use Form 450 for each facility to be constructed, altered or change of ownership.

B. Except as noted every applicant filing for a permit shall pay a filing fee of $75 at the time the application is filed.
   1. When an application for change of ownership is filed within 12 months from the date of transfer, and a permit had previously been granted for such equipment, in lieu of filing fee and initial permit fee, the applicant shall pay only a transfer fee of $75.00 for each permit unit being transferred from on person to another, payable at the time the application is filed.
   2. A fee is not required of a state or local governmental agency or public district.

C. Make checks payable to South Coast AQMD.

D. Fill in blanks and give all information requested on Form 450. Submit the completed form, properly signed by a responsible member of the organization.

E. Any vapor-recovery system being installed must be of a type certified by the California Air Resources Board. Submit drawings that show how the vapor piping is to be installed and give details of dispensing nozzles, vapor-return connectors and vapor-processing systems (if any).

INSTRUCTION CODES

FILL TYPE 17	[✓] Phase I Submerged fill	= Vapor recovery during filling of storage containers. = Fill-pipe discharge opening is submerged at a liquid level of 6 inches; or for tank loaded from side, entirely submerged at a liquid level of 18 inches.
	[2] Offset fill	= Truck discharge connection is located away from the underground tank and the fill-line to the tank has an abrupt mechanical bend.
TANK TYPE 16	[✓] Underground	[2] Above Ground

TYPE VAPOR CONTROL SYSTEM 19 — Phase II

Balance Standard	90	Red Jacket Standard	81	Hirt Standard	83	Hasstech	85
Balance Retractor ✓	91	Red Jacket Retractor	82	Hirt Retractor	84	Healy	86
Balance Hi Hose	92	Red Jacket Hi Hose	87	Hirt Hi Hose	88	Healy Hi Hose	89
Exempt	70						

F. If an application for a permit is canceled or is denied and such denial becomes final, the filing fee shall not be refunded nor applied to any subsequent application.

G. Permit fees will be determined by the District in accordance with Rule 301. These fees shall be paid by the applicant within 30 days of notification or the permit will be canceled.

Sent to 6/6/87 — Completed App. to Eng. 8/7 — Sent to Cus. 6/6/87 — Returned 8/7/87

— REQUIREMENTS OF RULE 461 —

Rule 461(a) regulates the transfer of gasoline from delivery trucks to storage tanks and requires installation of submerged fill-pipes and vapor-return connectors. These connectors allow gasoline vapors to be returned from the storage tank to the delivery truck and to be sent to the bulk terminal for processing (Phase I only).

Rule 461(b) regulates the transfer of gasoline into motor vehicle tanks larger than five gallons. A special fill nozzle and vapor piping allow gasoline vapors to be returned from the vehicle fuel tank to the storage tank or to vapor processing equipment (Phase II).

APPLICATION INSTRUCTIONS
FOR
INTERNAL COMBUSTION ENGINE

FILL OUT REVERSE SIDE AND RETURN WITH YOUR APPLICATION

With each application for permit for the above equipment type, the following information must be submitted :

1. **EQUIPMENT LOCATION DRAWING FOR EQUIPMENT TO OPERATED ONLY AT A SINGLE LOCATION.** The drawing submitted must be to scale (suggested scale: 1" = 100 feet; accuracy of measurements to the nearest 5 feet will be satisfactory) and must show at least the following:

   a. The facility property bounderies, and heights of all buildings within the property.
   b. Identify the location of the above equipment on the property. Indicate the direction of the discharge from the above equipment.
   c. Indicate the location of adjacent property, indicating street names. Show location of all buildings and automobile parking lots outside the property that are within 600 feet of the above equipment. Identify all such buildings (such as residences, apartment homes, machine shop, warehouse, etc.), specifying height of each building (number of stories). Indicate direction (north) on the drawing.

2. **DRAWINGS AND SPECIFICATIONS** of the above equipment. Furnish the manufacturer's catalog for the model and serial number specified on the reverse side of this form.

NOTE: Structural design calculations and details are not required. When standard commercial equipment is to be installed, the manufacturer's catalog describing the equipment may be suomitted by the applicant. **ADDITIONAL INFORMATION MAY BE REQUIRED.**

a. Provide Phase I CARB Executive Order Number (see instructions):_____
b. Are any of these storage tanks dual or multi-compartment? ☐ No ☐ Yes
   Identify the compartments by tank number and letter (e.g. 1A, 1B, 1C, etc.).
c. Are any of these storage tanks methanol compatible? ☐ No ☐ Yes (Identify these tanks)
d. Will any of these storage tanks be located in a vault below grade? ☐ No ☐ Yes
e. Will a condensate/vapor trap be installed in the vapor return line? ☐ No ☐ Yes
f. Will the tank(s) at this site contain a remote fill? ☐ No ☐ Yes
g. Will a flex-type piping be used for the vapor return line? ☐ No ☐ Yes

All EXISTING gasoline storage tanks shall be equipped with the following CARB certified equipment:

- **Phase I Vapor Control;**
- **Submerged Fill Tubes; and,**
- **Spill Boxes.**

In addition to the above mentioned requirements, all NEW construction or tank replacement applications shall have a two point design Phase I vapor recovery system AND have all gasoline tanks manifolded underground. Furthermore, all underground storage tanks shall be methanol fuel compatible (include methanol compatible certificate).

2. ABOVEGROUND STORAGE TANK INFORMATION: COMPLETE AND CHECK THE APPROPRIATE COLUMNS

Tank No.	Fuel type (e.g.; Reg, Unleaded)	Tank Capacity (Gallons)	Tank Dimensions LxWxHxDia (Feet-Inches)	Tank Manufacturer Control Type* or CARB EO	Stack Height (Feet)	Hose Length (Feet)	New ☑	Existing ☑	Remove ☑
							☐	☐	☐
							☐	☐	☐
							☐	☐	☐

Are any of these storage tanks dual or multi-compartment? ☐ No ☐ Yes
Identify the compartments by tank number and letter (e.g. 1A, 1B, 1C, etc.).

3. For new construction or vent pipe relocations, submit a plot plan identifying island locations, all underground piping locations with pipe diameters, dispenser locations, vent pipe locations, and structures surrounding the property line. Have you included this plot plan with this application? ☐ Yes ☐ No

4. Identify which one of the layouts on Attachment I most accurately represents your facility's configuration (fuel pump islands and set-up). In addition, identify the direction of North by placing an arrow in the circle provided and identify dispenser location by placing a dot on the island configuration. If none of the figures in Attachment I apply to your facility, complete Figure 9 by sketching the layout of your fuel pump islands. Using the same format in Attachment I, number each island and indicate the distances between them.

Figure_____ Distance A: _____ FT Distance B: _____ FT Distance C: _____ FT

5. Indicate the distance, direction from Δ, and address of the nearest residential and commercial/industrial structure located outside the property line of the facility as measured from the approximate center of the islands (shown as Δ in the figures):

Residential _____ FT
Direction (Circle One): N NE E SE S SW W NW
Located at: _____

Commercial/Industrial _____ FT
Direction (Circle One): N NE E SE S SW W NW
Located at: _____

6. FUELING POSITION INFORMATION: COMPLETE FOR ALTERATIONS OR NEW CONSTRUCTION

Total Number of Fueling Positions After Alteration or New Construction	Total Number of Fueling Positions Prior to Alteration (For Alterations Only)
2	2

7. NOZZLE INFORMATION: COMPLETE ALL COLUMNS

Fuel Type (e.g. Unleaded, Diesel)	# New Nozzles	# Existing Nozzles	# Removed Nozzles	CARB Executive Order OR Control Type* (Phase II)	Maximum Monthly Throughput (Gal/Mo)	Maximum Annual Throughput (Gal/Yr)
UNLEADED	2	2	0	91		

*See lists on page 2 of Instruction sheets for form 400-E-11.

8. GASOLINE PRODUCT INFORMATION: COMPLETE TABLE

Number of nozzle(s) dispensing ONE product (grade) of gasoline: 2 X 1 = 2
Number of nozzle(s) dispensing TWO products (grades) of gasoline: ___ X 2 = ___
Number of nozzle(s) dispensing THREE products (grades) of gasoline: ___ X 3 = ___
TOTAL NOZZLE COUNT: ___ TOTAL PRODUCT COUNT ___

9. DISPENSER INFORMATION: COMPLETE AND CHECK THE APPROPRIATE COLUMNS

Dispenser Make	Dispenser Model No.	No. of Similar Dispensers	Dispenser New ☑	Dispenser Existing ☑	Dispenser Removed ☑	No. of Nozzles Per Dispenser Unleaded	Diesel	Methanol
			☐	☐	☐			
			☐	☐	☐			
			☐	☐	☐			
			☐	☐	☐			

10. THROUGHPUT INFORMATION: PROVIDE THROUGHPUT RECORDS FOR THE PAST 2 YEARS (EXISTING SITES)

Year of Operation	Fuel Type	Throughput (Gal/Yr)	Days of Operation
	Gasoline		
	Gasoline		

11. For existing gasoline storage and dispensing systems and based on the following, please provide a copy of your **MOST recent** vapor recovery test results.
   a. Balance System Tests:
      - Static Pressure (Leak-Decay);
      - Dynamic Pressure (Back-Pressure); and,
      - Liquid Removal (if applicable).
   b. Vacuum Assisted System Tests (Except Healy and Hirt Systems):
      - Static Pressure (Leak-Decay); and,
      - Air-to-Liquid Ratio (A/L).
   c.. Healy Vacuum Assisted System Tests:
      - Static Pressure (Leak-Decay);
      - Air-to-Liquid Ratio (A/L); and,
      - Vapor Return Line.
   d. Vacuum Assisted Hirt System Test:
      Air-to-Liquid Ratio (A/L).
   e. For systems not mentioned, provide required test results as per that system's executive order.

12. Include **All** drawings as mentioned in Form 400-E-11 Requirements.

CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) APPLICABILITY FORM 400 - CEQA

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAQMD in clarifying whether or not the project[1] has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines §15060(a)].[2] Refer to the attached instructions for guidance in completing this form.[3] For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project. If you need assistance completing this form, contact Permit Services at (909) 396-3385 (or 2668).

FACILITY INFORMATION

Facility Name: FEDERAL EXPRESS **Facility ID** (6-Digit): 58000

Project Description: EVR UPGRADE

REVIEW FOR EXEMPTION FROM FURTHER CEQA ACTION

Check "Yes" or "No" as applicable

	Yes	No	Is this application for:
A.	☐	☒	**A CEQA and/or NEPA document previously or currently prepared that specifically evaluates this project?** If yes, a permit cannot be issued until a Final CEQA document and Notice of Determination is submitted.
B.	☐	☒	**A request for a change of permittee only (without equipment modifications)?**
C.	☒	☐	**A functionally identical permit unit replacement with no increase in rating or emissions?**
D.	☐	☒	**A change of daily VOC permit limit to a monthly VOC permit limit?**
E.	☐	☒	**Equipment damaged as a result of a disaster during state of emergency?**
F.	☐	☒	**A Title V** (i.e., Regulation XXX) **permit renewal (without equipment modifications)?**
G.	☐	☒	**A Title V administrative permit revision?**
H.	☐	☒	**The conversion of an existing permit into an initial Title V permit?**

If **"Yes"** is checked for any question above, your application does not require additional evaluation for CEQA applicability. Skip to page 2, "SIGNATURES" and sign and date this form.

REVIEW OF IMPACTS WHICH MAY TRIGGER CEQA

Complete Sections I-VI by checking "Yes" or "No" as applicable. To avoid delays in processing your application(s), explain all "Yes" responses on a separate sheet and attach it to this form.

	Yes	No	Section I – General
1.	☐	☒	**Has this project generated any known public controversy regarding potential adverse impacts that may be generated by the project?** Controversy may be construed as concerns raised by local groups at public meetings; adverse media attention such as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc.
2.	☐	☒	**Is this project part of a larger project?**
			Section II – Air Quality
3.	☐	☒	**Will there be any demolition, excavating, and/or grading construction activities that encompass an area exceeding 20,000 square feet?**
4.	☐	☒	**Does this project include the open outdoor storage of dry bulk solid materials that could generate dust?** If Yes, include a plot plan with the application package.

[1] A "project" means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit. For example, a project might include installation of a new, or modification of an existing internal combustion engine, dry-cleaning facility, boiler, gas turbine, spray coating booth, solvent cleaning tank, etc.

	Yes	No	
5.	☐	☐	**Would this project result in noticeable off-site odors from activities that may not be subject to SCAQMD permit requirements?** For example, compost materials or other types of greenwaste (i.e., lawn clippings, tree trimmings, etc.) have the potential to generate odor complaints subject to Rule 402 – Nuisance.
6.	☐	☐	**Does this project cause an increase of emissions from marine vessels, trains and/or airplanes?**
7.	☐	☐	**Will the proposed project increase the QUANTITY of hazardous materials stored aboveground onsite or transported by mobile vehicle to or from the site by greater than or equal to the amounts associated with each compound on the attached Table 1?[4]**
			Section III – Water Resources
8.	☐	☐	**Will the project increase demand for water at the facility by more than 5,000,000 gallons per day?** The following examples identify some, but not all, types of projects that may result in a "yes" answer to this question: 1) projects that generate steam; 2) projects that use water as part of the air pollution control equipment; 3) projects that require water as part of the production process; 4) projects that require new or expansion of existing sewage treatment facilities; 5) projects where water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project; and 6) projects that require new or expansion of existing water supply facilities.
9.	☐	☐	**Will the project require construction of new water conveyance infrastructure?** Examples of such projects are when water demands exceed the capacity of the local water purveyor to supply sufficient water for the project, or require new or modified sewage treatment facilities such that the project requires new water lines, sewage lines, sewage hook-ups, etc.
			Section IV – Transportation/Circulation
10.			**Will the project result in** (Check all that apply)**:**
	☐	☐	**a. the need for more than 350 new employees?**
	☐	☐	**b. an increase in heavy-duty transport truck traffic to and/or from the facility by more than 350 truck round-trips per day?**
	☐	☐	**c. increase customer traffic by more than 700 visits per day?**
			Section V – Noise
11.	☐	☐	**Will the project include equipment that will generate noise GREATER THAN 90 decibels (dB) at the property line?**
			Section VI – Public Services
12.			**Will the project create a permanent need for new or additional public services in any of the following areas** (Check all that apply)**:**
	☐	☐	**a. Solid waste disposal?** Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day.
	☐	☐	**b. Hazardous waste disposal?** Check "No" if the projected potential amount of hazardous wastes generated by the project is less than 42 cubic yards per day (or equivalent in pounds).

REMINDER: *For each "Yes" checked in the sections above, attach all pertinent information including but not limited to estimated quantities, volumes, weights, etc.*

Title V Facilities	Complete Sections I, IV, & V	Complete Sections I, II, III, IV, & V
All Other Facilities	Complete Sections I & IV	Complete Sections I, II, III, & IV

Section I: Facility/Application Information

1. Business Name: Mercury Air Group Facility ID: _____
2. Property Zone:
   a. ☐ Commercial c. ☐ Industrial e. ☒ Other (specify): Airport
   b. ☐ Residential d. ☐ Parking
3. Business Type: a. ☐ Retail b. ☒ Non-Retail
   For Non-Retail, do you own any fleet vehicles?
   ☐ No ☒ Yes, Total number of fleet vehicles 17
   For Retail, has the owner/operator attended a SCAQMD approved Rule 461 training course?
   ☐ No ☐ Yes Date of Course Completion: ___/___/___
4. The requested application is for a(n): Date of Occurrence: ___/___/___
   a. ☐ New Construction b. ☐ Change of Location
   c. ☒ Modification of Equipment/Process d. ☐ Existing Equipment with Expired Permit
   e. ☐ Existing Equipment Operating without a Permit; Initial Operation Date: ___/___/___
   f. ☐ Change of Condition(s); Specify the change of condition(s) requested: _____
   g. ☐ Change of Operator; List previous name of operator and Facility ID #: _____
5. If equipment has previous written permit, list Permit Number or Device Number(s): 351996
   a. Write Rule 301 description of this equipment/process: _____
6. Are multiple applications being submitted for similar permit units (as defined in Rule 301) described below?
   ☐ No ☒ Yes
7. Have you been issued a Notice to Comply (NTC) or Notice of Violation (NOV) for this equipment?
   ☒ No ☐ Yes; NTC #: _____ NOV #: _____ Issue Date: ___/___/___
8. For New Construction, Modification, or Change of Location:
   Estimated Construction Start Date: 12/01/99 Estimated Completion Date: 04/01/00
9. For this project, has a California Environmental Quality Act (CEQA) document been required by another governmental agency? ☒ No ☐ Yes, for agency (Provide name): _____
   a. Are you required by another governmental agency to have a permit? ☒ No ☐ Yes, for agency (Provide name) _____
   b. Are any of these permits discretionary? ☒ No ☐ Yes; list: _____
10. Do you claim confidentiality of data? ☒ No ☐ Yes (attach explanation)
11. Is the equipment located within 1,000 feet from the outer boundary of a school? ☒ No ☐ Yes
    (If Yes, complete a. for all public or private school, grade K-12, within a 1/4 mile radius of facility property)
    a. School Name(s): _____ Telephone No(s): _____
    School Address(s): _____

Section II: Equipment Information

1. NOZZLE INFORMATION: Indicate Number of New, Existing, or Removed Nozzles for Each Fuel Type

Fuel Type	New	Existing	Removed	Vapor Recovery Type	Maximum Monthly Throughput (gallons)	Maximum Single Day Throughput (gallons)	Installation Date
Unleaded		2		None	25,000	300,000	(I) 1989

			☐	☐	☐				
			☐	☐	☐				

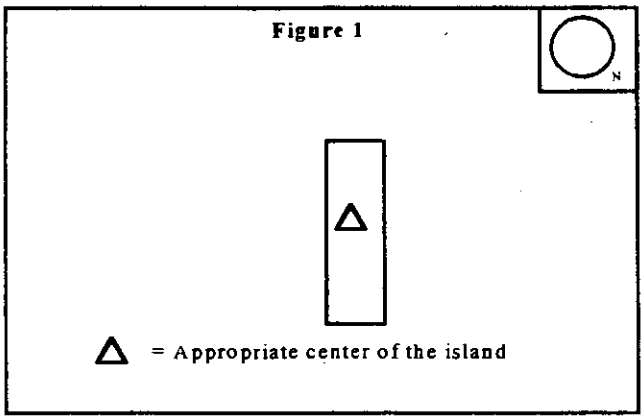
Section III - Operation Information

1. Vehicle Fueling: 24 hours/day Operating Hours: 365 days/year

2. **FOR ALTERATIONS OF EXISTING EQUIPMENT - THROUGHPUT RECORDS FOR THE PAST 2 YEARS**

3. **FUELING POSITION INFORMATION**



Total Number of Fueling Positions After Alteration or New Construction	Total Number of Fueling Positions Prior to Alteration (For Alterations Only)
2	

4. For new construction or vent pipe relocations, submit a plot plan identifying island locations, dispenser locations, vent pipe locations, and structures surrounding the property line. Have you included this plot plan with this application? a. ☐ Yes b. ☐ No

5. Identify which one of the following layouts on pages 3 and 4 most accurately represents your facility's configuration (fuel pump islands and set-up). In addition, identify the direction of North by placing an arrow in the circle provided and identify dispenser location by placing a dot on the island configuration. If none of the figures below apply to your facility, complete Figure 9 by sketching the layout of your fuel pump islands. Using the same format as below, number each island and indicate the distances between them.

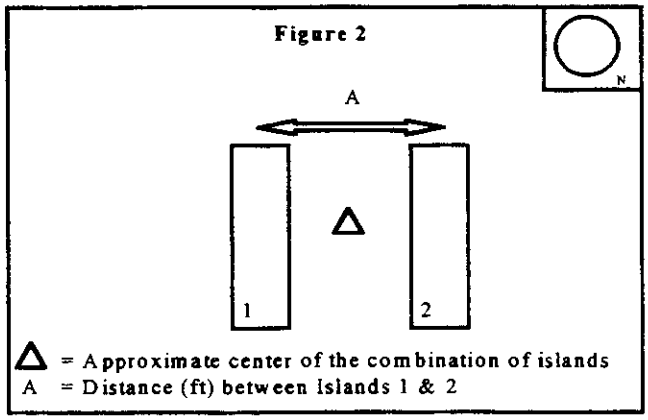


Figure_____ Distance A: _____ FT Distance B: _____ FT Distance C: _____ FT

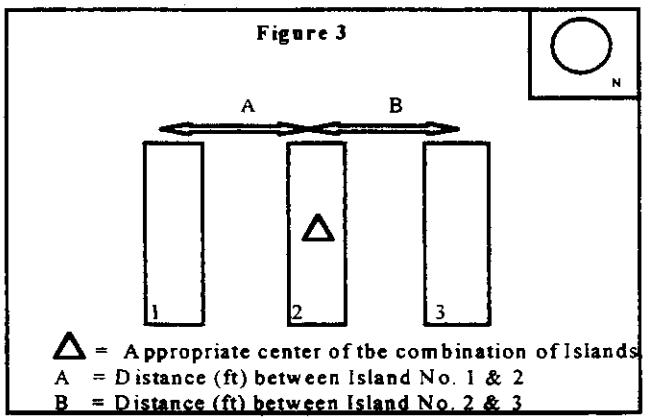
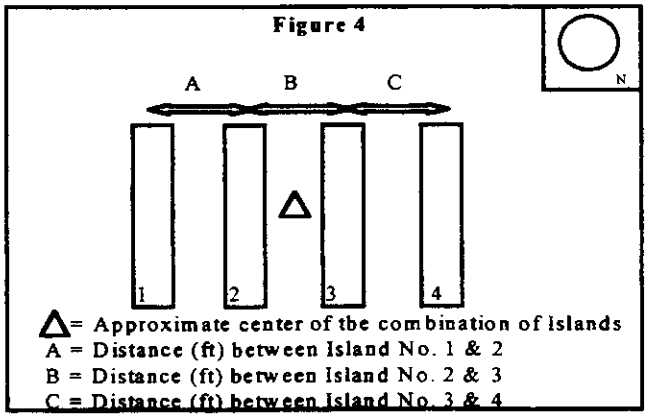
Figure 1



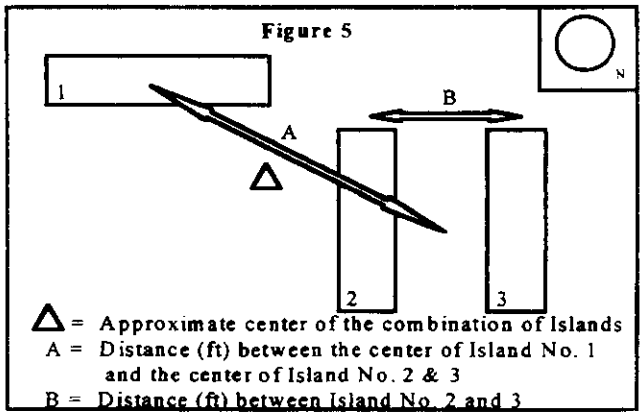
△ = Appropriate center of the island

Figure 2



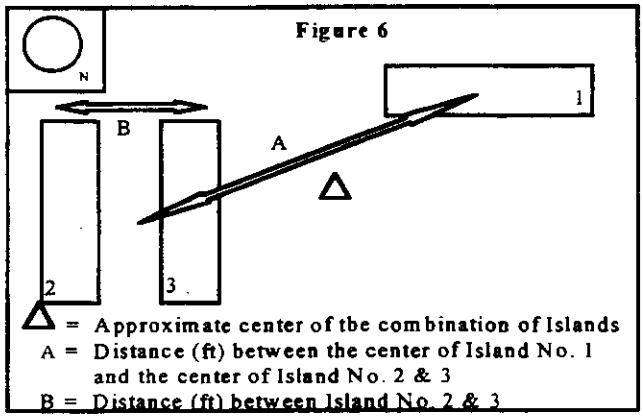
△ = Approximate center of the combination of islands
A = Distance (ft) between Islands 1 & 2

Figure 3



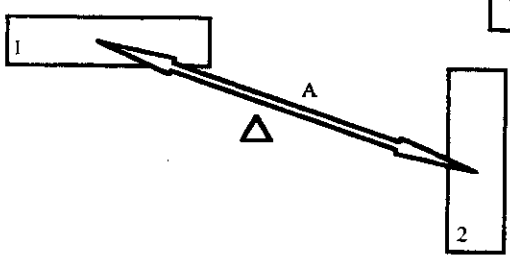
△ = Appropriate center of the combination of Islands
A = Distance (ft) between Island No. 1 & 2
B = Distance (ft) between Island No. 2 & 3

Figure 4



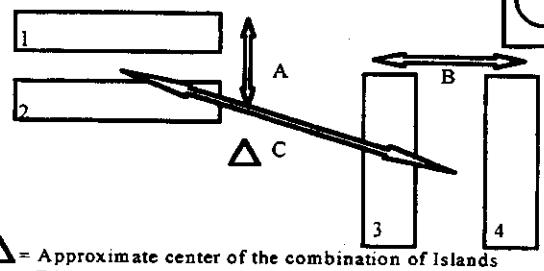
△ = Approximate center of the combination of Islands
A = Distance (ft) between Island No. 1 & 2
B = Distance (ft) between Island No. 2 & 3
C = Distance (ft) between Island No. 3 & 4

Figure 5



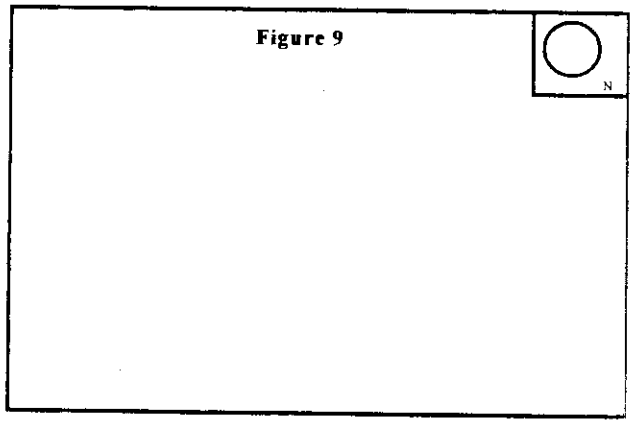
△ = Approximate center of the combination of Islands
A = Distance (ft) between the center of Island No. 1 and the center of Island No. 2 & 3
B = Distance (ft) between Island No. 2 and 3

Figure 6



△ = Approximate center of the combination of Islands
A = Distance (ft) between the center of Island No. 1 and the center of Island No. 2 & 3
B = Distance (ft) between Island No. 2 & 3

Figure 7



△ = Approximate center of the combination of Islands
A = Distance (ft) between the center of Island No. 1 and the center of Island No. 2

Figure 8

△ = Approximate center of the combination of Islands
A = Distance (ft) between Island No. 1 & 2
B = Distance (ft) between Island No. 3 & 4
C = Distance (ft) between the center of Island No. 1 and 2 and the center of Island No. 3 & 4

Figure 9

Legend

= Fuel Pump Island

△ = Approximate center of the combination of Islands

6. Indicate the distance, direction from △, and address of the nearest residential and commercial/industrial structure located outside the property line of the facility as measured from the approximate center of the islands (shown as △ in the figures):

Residential Over 1000 feet
Direction (Circle One): N NE E SE S SW W NW
Located at: _____

Commercial/Industrial Over 1000 feet
Direction (Circle One): N NE E SE S SW W NW
Located at: _____

Is an equipment location drawing enclosed with this form? (See REQUIREMENTS, HOW TO APPLY)
a. ☒ Yes b. ☐ No

TITLE V APPLICATION CERTIFICATION

- TO BE COMPLETED BY TITLE V FACILITIES ONLY -

Section IV - Title V Application

1. This is an application for a(n) (Check all applicable boxes and provide the requested information as appropriate):
   a. ☐ Initial Title V Permit
   b. ☐ Permit Renewal: Provide current permit expiration date: ____/____/____
   c. ☐ Administrative Permit Revision (Check all that apply)
      ☐ Change of Ownership. (Complete and attach equipment-specific Form 400-E-xx series forms)
      ☐ Change of Facility Information
      ☐ Other, Please specify: _____
   d. ☐ Other (Complete and attach equipment specific Form 400-E-XX series form(s) to this form if your application involves permit action for new construction, change of location, non-administrative permit revision, alternative operating scenario (AOS), permit shield, streamlined permit conditions, or temporary source permit.)
2. Is this facility required to prepare a Risk Management Plan (RMP) for another agency? ☐ Yes ☐ No

Section V - Title V Submittal Checklist

1. Enter the quantity of each type form submitted in the space provided:

_____	500-A2	_____	500-F1
_____	500-B	_____	500-F2
_____	500-C1	_____	500-F3
_____	500-C2	_____	500-F4
_____	500-D	_____	Other (specify): _____

2. Additional information referenced in this application submitted (Check **ALL** that apply):
   a. ☐ Existing Facility Permit
   b. ☐ Preliminary Facility Permit
   c. ☐ EFB Report for Year _____
   d ☐ None
   e. ☐ Other (Specify): _____
3. Supplemental information included with this application submittal (Check **ALL** that apply):
   a. ☐ Facility Plot Plan
   b. ☐ MSDS Sheet(s)
   c. ☐ None
   d. ☐ Other (Specify): _____

FUEL DISPENSING AND STORAGE EQUIPMENT
FORM 400 - E - 11

(See Form 400-E-11 supplement for requirements and instructions)

For:	Change of location, equipment w/expired permit, or change of operator:	ALL other application types: Submit all other information requested and:
Title V Facilities	Complete Sections I, IV, & V	Complete Sections I, II, III, IV, & V
All Other Facilities	Complete Sections I & IV	Complete Sections I, II, III, & IV

Section I - Facility/Application Information

1. Business Name: MERCURY AIR CENTER Facility ID: _ _ _ _ _ _ _
2. Property Zone:
   a. ☐ Commercial c. ☐ Industrial e. ☑ Other (specify): AIR PORT
   b. ☐ Residential d. ☐ Parking
3. Business Type: a. ☐ Retail b. ☐ Non-Retail
   For Non-Retail, do you own any fleet vehicles?
   ☐ No ☑ Yes, Total number of fleet vehicles 17
   For Retail, has the owner/operator attended a SCAQMD approved Rule 461 training course?
   ☐ No ☐ Yes Date of Course Completion: ___/___/___
4. The requested application is for a(n): Date of Occurrence: ___/___/___
   a. ☐ New Construction b. ☐ Change of Location
   c. ☐ Modification of Equipment/Process d. ☐ Existing Equipment with Expired Permit
   e. ☑ Existing Equipment Operating without a Permit; Initial Operation Date: ___/___/___
   f. ☐ Change of Condition(s); Specify the change of condition(s) requested: _____
   g. ☐ Change of Operator; List previous name of operator and Facility ID #: _____
5. If equipment has previous written permit, list Permit Number or Device Number(s): _____
   a. Write Rule 301 description of this equipment/process: _____
6. Are multiple applications being submitted for similar permit units (as defined in Rule 301) described below?
   ☐ No ☑ Yes
7. Have you been issued a Notice to Comply (NTC) or Notice of Violation (NOV) for this equipment?
   ☑ No ☐ Yes; NTC #: _____ NOV #: _____ Issue Date: ___/___/___
8. For New Construction, Modification, or Change of Location:
   Estimated Construction Start Date: / / Estimated Completion Date: / /
9. For this project, has a California Environmental Quality Act (CEQA) document been required by another governmental agency? ☑ No ☐ Yes, for agency (Provide name): _____
   a. Are you required by another governmental agency to have a permit? ☑ No ☐ Yes, for agency (Provide name) _____
   b. Are any of these permits discretionary? ☑ No ☐ Yes; list: _____
10. Do you claim confidentiality of data? ☑ No ☐ Yes (attach explanation)
11. Is the equipment located within 1,000 feet from the outer boundary of a school? ☑ No ☐ Yes
    (If Yes, complete a. for all public or private school, grade K-12, within a 1/4 mile radius of facility property)
    a. School Name(s): _____ Telephone No(s): _____
    School Address(es): _____

Section II - Equipment Information

1. NOZZLE INFORMATION: Indicate Number of New, Existing, or Removed Nozzles for Each Fuel Type

Fuel Type* (e.g. Unleaded, Diesel)	# New Nozzles	# Existing Nozzles	# Removed Nozzles	Control Type* (Phase II)	Maximum Monthly* Throughput (Gal/Mo)	Maximum Annual* Throughput (Gal/Yr)	Installation (I) or Removal (R) Date
PER TRUCK					AVE USED PER		YR PURCHASE
TRUCK #1					HIGHEST #		
UNLEADED		X 1		NONE	40,000	480,000	I 1989

TURN OVER AND COMPLETE

			☐	☐	☐				

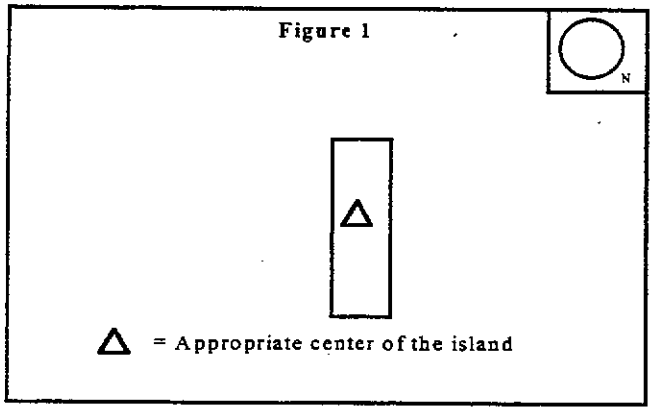
Section III - Operation Information

1. Vehicle Fueling: 24 hours/day Operating Hours: 365 days/year

2. **FOR ALTERATIONS OF EXISTING EQUIPMENT - THROUGHPUT RECORDS FOR THE PAST 2 YEARS**

Year of Operation	Fuel Type (e.g. Gasoline or Diesel)	Throughput (Gal/Yr)	Days of Operation
last 2 yrs			
if possible			

3. **FUELING POSITION INFORMATION**



Total Number of Fueling Positions After Alteration or New Construction	Total Number of Fueling Positions Prior to Alteration (For Alterations Only)
2	

4. For new construction or vent pipe relocations, submit a plot plan identifying island locations, dispenser locations, vent pipe locations, and structures surrounding the property line. Have you included this plot plan with this application? a. ☐ Yes b. ☑ No

5. Identify which one of the following layouts on pages 3 and 4 most accurately represents your facility's configuration (fuel pump islands and set-up). In addition, identify the direction of North by placing an arrow in the circle provided and identify dispenser location by placing a dot on the island configuration. If none of the figures below apply to your facility, complete Figure 9 by sketching the layout of your fuel pump islands. Using the same format as below, number each island and indicate the distances between them.

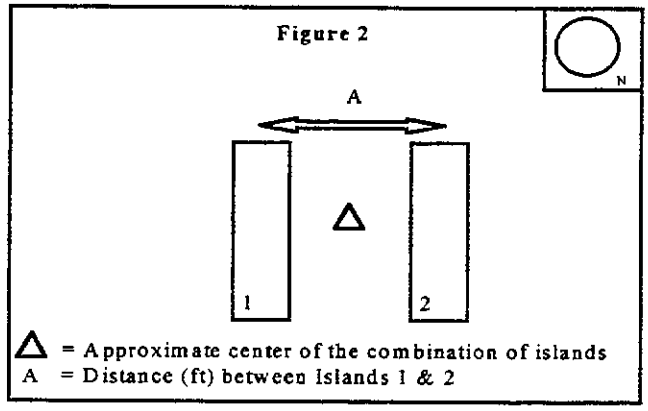


Figure N/A Distance A: _____ FT Distance B: _____ FT Distance C: _____ FT

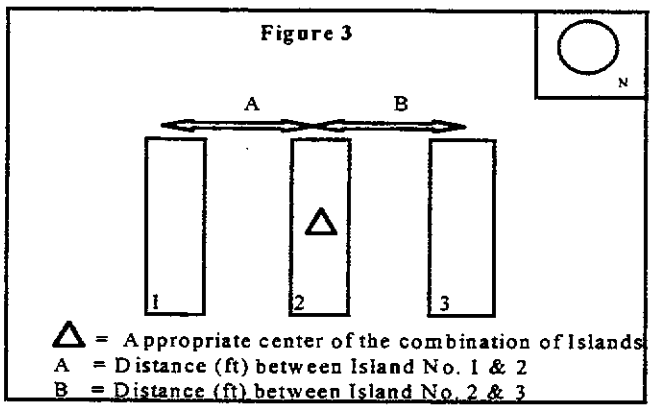
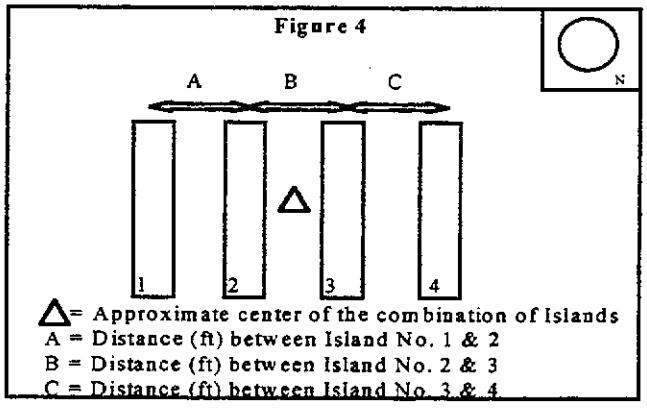
Figure 1



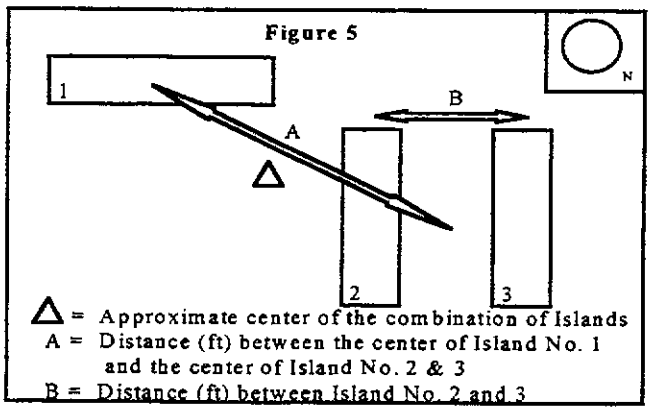
△ = Appropriate center of the island

Figure 2



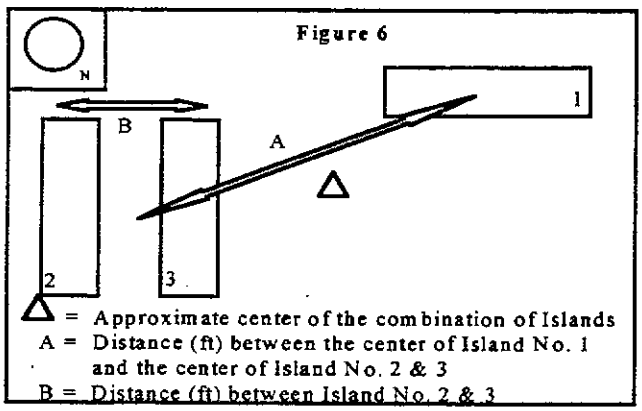
△ = Approximate center of the combination of islands
A = Distance (ft) between Islands 1 & 2

Figure 3



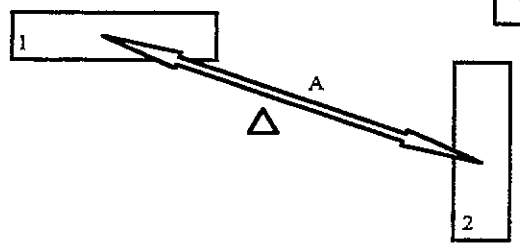
△ = Appropriate center of the combination of Islands
A = Distance (ft) between Island No. 1 & 2
B = Distance (ft) between Island No. 2 & 3

Figure 4



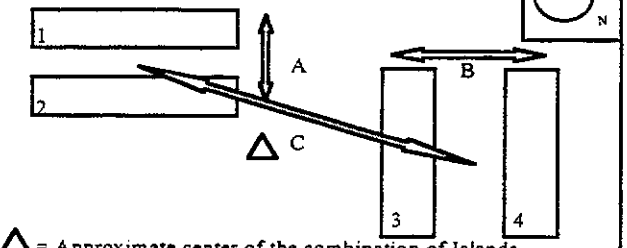
△ = Approximate center of the combination of Islands
A = Distance (ft) between Island No. 1 & 2
B = Distance (ft) between Island No. 2 & 3
C = Distance (ft) between Island No. 3 & 4

Figure 5



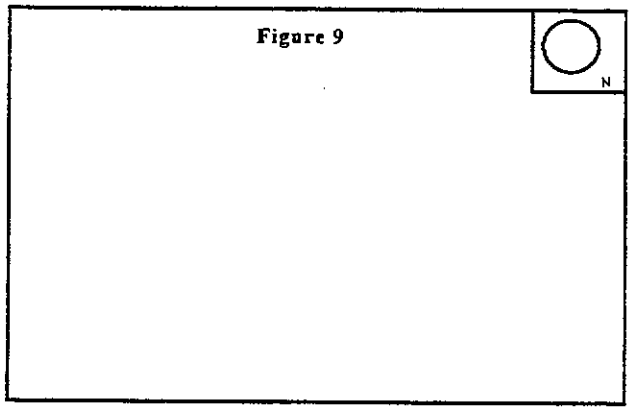
△ = Approximate center of the combination of Islands
A = Distance (ft) between the center of Island No. 1 and the center of Island No. 2 & 3
B = Distance (ft) between Island No. 2 and 3

Figure 6



△ = Approximate center of the combination of Islands
A = Distance (ft) between the center of Island No. 1 and the center of Island No. 2 & 3
B = Distance (ft) between Island No. 2 & 3

Figure 7



△ = Approximate center of the combination of Islands
A = Distance (ft) between the center of Island No. 1 and the center of Island No. 2

Figure 8

△ = Approximate center of the combination of Islands
A = Distance (ft) between Island No. 1 & 2
B = Distance (ft) between Island No. 3 & 4
C = Distance (ft) between the center of Island No. 1 and 2 and the center of Island No. 3 & 4

Figure 9

Legend

= Fuel Pump Island

△ = Approximate center of the combination of Islands

6. Indicate the distance, direction from △, and address of the nearest residential and commercial/industrial structure located outside the property line of the facility as measured from the approximate center of the islands (shown as △ in the figures):

Residential N/A feet
Direction (Circle One): N NE E SE S SW W NW
Located at: N/A

Commercial/Industrial 1,000 feet
Direction (Circle One): N NE E SE S SW W NW
Located at: AVION STREET

Is an equipment location drawing enclosed with this form? (See REQUIREMENTS, HOW TO APPLY)
a. ☑ Yes b. ☐ No

FUEL DISPENSING AND STORAGE EQUIPMENT
FORM 400 - E - 11

(See Form 400-E-11 supplement for requirements and instructions)

For:	Change of location, equipment w/expired permit, or change of operator:	ALL other application types: Submit all other information requested and:
Title V Facilities	Complete Sections I, IV, & V	Complete Sections I, II, III, IV, & V
All Other Facilities	Complete Sections I & IV	Complete Sections I, II, III, & IV

Section I - Facility/Application Information

1. Business Name: Mercury Air Group Facility ID: _____
2. Property Zone:
   a. ☐ Commercial c. ☐ Industrial e. ☒ Other (specify): Airport
   b. ☐ Residential d. ☐ Parking
3. Business Type: a. ☐ Retail b. ☒ Non-Retail
   For Non-Retail, do you own any fleet vehicles?
   ☐ No ☒ Yes, Total number of fleet vehicles 17
   For Retail, has the owner/operator attended a SCAQMD approved Rule 461 training course?
   ☐ No ☐ Yes Date of Course Completion: ___/___/___
4. The requested application is for a(n): Date of Occurrence: ___/___/___
   a. ☐ New Construction b. ☐ Change of Location
   c. ☒ Modification of Equipment/Process d. ☐ Existing Equipment with Expired Permit
   e. ☐ Existing Equipment Operating without a Permit; Initial Operation Date: ___/___/___
   f. ☐ Change of Condition(s); Specify the change of condition(s) requested: _____
   g. ☐ Change of Operator; List previous name of operator and Facility ID #: _____
5. If equipment has previous written permit, list Permit Number or Device Number(s): 351943
   a. Write Rule 301 description of this equipment/process: _____
6. Are multiple applications being submitted for similar permit units (as defined in Rule 301) described below?
   ☐ No ☒ Yes
7. Have you been issued a Notice to Comply (NTC) or Notice of Violation (NOV) for this equipment?
   ☒ No ☐ Yes; NTC #: _____ NOV #: _____ Issue Date: ___/___/___
8. For New Construction, Modification, or Change of Location:
   Estimated Construction Start Date: 12/01/99 Estimated Completion Date: 04/01/00
9. For this project, has a California Environmental Quality Act (CEQA) document been required by another governmental agency? ☒ No ☐ Yes, for agency (Provide name): _____
   a. Are you required by another governmental agency to have a permit? ☒ No ☐ Yes, for agency (Provide name) _____
   b. Are any of these permits discretionary? ☒ No ☐ Yes; list: _____
10. Do you claim confidentiality of data? ☒ No ☐ Yes (attach explanation)
11. Is the equipment located within 1,000 feet from the outer boundary of a school? ☒ No ☐ Yes
    (If Yes, complete a. for all public or private school, grade K-12, within a 1/4 mile radius of facility property)
    a. School Name(s): _____ Telephone No(s): _____
    School Address(s): _____

Section II - Equipment Information

1. NOZZLE INFORMATION: Indicate Number of New, Existing, or Removed Nozzles for Each Fuel Type

Fuel Type* (e.g. Unleaded, Diesel)	# New Nozzles	# Existing Nozzles	# Removed Nozzles	Control Type* (Phase II)	Maximum Monthly* Throughput (Ga./Mo)	Maximum Annual* Throughput (Ga./Yr)	Installation (I) or Removal (R) Date
Unleaded		2		None	25,000	300,000	(I) 1989

TURN OVER AND COMPLETE

Form 400-A

Application For Permit To Construct and Permit To Operate

Mail Application To:
P.O. Box 4944
Diamond Bar, CA 91765

Tel: (909) 396-3385
www.aqmd.gov

Section A: Operator Information

1. Business Name of Operator To Appear On The Permit:
Mercury Air Center dba Atlantic Aviation Ontario

2. Valid AQMD Facility ID (Available on Permit or Invoice issued by AQMD): ~~114330~~ (62691)

3. Owner's Business Name (only if different from Business Name of Operator):
Atlantic Aviation

Section B: Equipment Location

4. Equipment Location Address:
For equipment operated at various locations in AQMD's jurisdiction, provide address of initial site

2161 E. Avion St
Street Address

Ontario, CA, 91761
City State Zip Code

County: ○ Los Angeles ○ Orange ◉ San Bernardino ○ Riverside

Contact Name: Antonio Casillas

Contact Title: Operations Manager Phone: (909) 390-2370

Fax: (909) 390-4508 E-Mail:

Section C: Permit Mailing Address

5. Permit and Correspondence Information:
☒ Check here if same as equipment location address

Street Address

City State Zip Code

Contact Name:

Contact Title: Phone:

Fax: E-Mail:

Section D: Application Type

The facility is in ○ RECLAIM ○ Title V ○ RECLAIM & Title V Program (please check if applicable)

6. Reason for Submitting Application (Select only ONE):

- ○ New Construction (Permit to Construct)
- ◉ Equipment Operating Without A Permit or Expired Permit*
- ○ Administrative Change
- ○ Equipment On-Site But Not Constructed or Operational
- ○ Title V Application (Initial, Revisions, Modifications, etc.)
- ○ Compliance Plan
- ○ Facility Permit Amendment
- ○ Registration/Certification
- ○ Streamlined Standard Permit

- ○ Permitted Equipment Altered/ Modified Without Permit Approval*
- ○ Proposed Alteration/Modification to Permitted Equipment
- ○ Change of Condition For Permit To Operate
- ○ Change of Condition For Permit To Construct
- ○ Change of Location—Moving to New Site

Existing Or Previous Permit/Application Number:
(If you checked any of the items in this column, you MUST provide a existing Permit/ Application Number)

* A Higher Permit Processing Fee applies to those items with an asterisk (Rule 301 (c) (1) (D)

7. Estimated Start Date of Operation/Construction (MM/DD/YYYY): 01/01/2010

8. Description of Equipment:
Avgas, Gasoline and Jet A storage and dispensing system

9. Is this equipment portable AND will it be operated at different locations within AQMD's jurisdiction? ◉ No ○ Yes

10. For identical equipment, how many additional applications are being submitted with this application? (Form 400-A required for each)

11. Are you a Small Business as per AQMD's Rule 102 definition? (10 employees or less and total gross receipts are $500,000 or less, or a not-for-profit training center?) ◉ No ○ Yes

12. Has a Notice of Violation (NOV) or a Notice To Comply (NC) been issued for this equipment?
○ No ◉ Yes If yes, provide NOV/NC #: 57102

Section E: Facility Business Information

13. What type of business is being conducted at this equipment location?
Aircraft Fixed Base Operation- FBO

14. What is your businesses primary NAICS Code (North American Industrial Classification System)? 48819

15. Are there other facilities in the SCAQMD jurisdiction operated by the same operator? ◉ No ○ Yes

16. Are there any schools (K-12) within a 1000-ft. radius of the equipment physical location? ◉ No ○ Yes

Section F: Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application is true and correct.

17. Signature of Responsible Official:
Karin Davidson

18. Title:
General Manager

19. Print Name:
Karin Davidson

20. Date:
03/02/2010

Check List

TOTAL NOZZLE COUNT: (This should be the same as TOTAL NUMBER OF NOZZLES above)	0		TOTAL PRODUCT COUNT	=	0

9. DISPENSER INFORMATION: COMPLETE AND CHECK THE APPROPRIATE COLUMNS

Dispenser		No. of Similar Dispensers	Dispenser			No. of Nozzles Per Dispenser		
Make	Model No.		New	Existing	Removed	Unleaded	Diesel	Methanol
UNK				◉		1	0	0

10. THROUGHPUT INFORMATION: PROVIDE THROUGHPUT RECORDS FOR THE PAST 2 YEARS (EXISTING SITES)

Year of Operation	Fuel Type	Throughput (Gal/Yr)	Days of Operation
2009	Gasoline	24,000	365
2008	Gasoline		

11. For existing gasoline storage and dispensing systems and based on the following, please provide a copy of your MOST RECENT vapor recovery test results.

a. Balance System Tests:
- Static Pressure (Leak-Decay);
- Dynamic Pressure (Back-Pressure); and,
- Liquid Removal (if applicable).

b. Vacuum Assisted System Tests (Except Healy and Hirt Systems):
- Static Pressure (Leak-Decay); and,
- Air-to-Liquid Ratio (A/L).

c. Healy Vacuum Assisted System Tests:
- Static Pressure (Leak-Decay);
- Air-to-Liquid Ratio (A/L); and,
- Vapor Return Line.

d. Vacuum Assisted Hirt System Test:
- Air-to-Liquid Ratio (A/L).

e. For systems not mentioned, provide required test results as per that system's executive order.

12. Include All drawings as mentioned in Form 400-E-11 Requirements.

Form 400-CEQA

California Environmental Quality Act (CEQA) Applicability

Mail Application To:
P.O. Box 4944
Diamond Bar, CA 91765

Tel: (909) 396-3385

www.aqmd.gov

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAQMD in clarifying whether or not the project[1] has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document (CEQA Guidelines §15060(a)).[2] Refer to the attached instructions for guidance in completing this form.[3] For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project. If you need assistance completing this form, contact Lori Inga at (909) 396-3109.

FACILITY INFORMATION

Business Name of Operator to Appear on the Permit:	Facility ID (6-Digit):
Mercury Air Group, Mercury Air Center, DBA Atlantic	114338

Project Description:

Under new Ownership- New Owner is Atlantic Aviation

REVIEW FOR EXEMPTION FROM FURTHER CEQA ACTION

Check "Yes" or "No" as applicable

	Yes	No	Is this application for:
A.	○	◉	**A CEQA and/or NEPA document previously or currently prepared that specifically evaluates this project?** If yes, a permit cannot be issued until a Final CEQA document and Notice of Determination is submitted.
B.	X	●	**A request for a change of permittee only (without equipment modifications)?**
C.	○	◉	**Equipment certification or equipment registration** (qualifies for Rule 222)?
D.	○	◉	**A functionally identical permit unit replacement with no increase in rating or emissions?**
E.	○	◉	**A change of daily VOC permit limit to a monthly VOC permit limit?**
F.	○	◉	**Equipment damaged as a result of a disaster during state of emergency?**
G.	○	◉	**A Title V** (i.e., Regulation XXX) **permit renewal (without equipment modifications)?**
H.	○	◉	**A Title V administrative permit revision?**
I.	○	◉	**The conversion of an existing permit into an initial Title V permit?**

If "Yes" is checked for any question above, your application does not require additional evaluation for CEQA applicability. Skip to page 2, "SIGNATURES" and sign and date this form.

REVIEW OF IMPACTS WHICH MAY TRIGGER CEQA

Complete Sections I-VI by checking "Yes" or "No" as applicable. To avoid delays in processing your application(s), explain all "Yes" responses on a separate sheet and attach it to this form.

	Yes	No	Section I – General
1.	○	○	**Has this project generated any known public controversy regarding potential adverse impacts that may be generated by the project?** Controversy may be construed as concerns raised by local groups at public meetings; adverse media attention such as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc.
2.	○	○	**Is this project part of a larger project?**
			Section II – Air Quality
3.	○	○	**Will there be any demolition, excavating, and/or grading construction activities that encompass an area exceeding 20,000 square feet?**
4.	○	○	**Does this project include the open outdoor storage of dry bulk solid materials that could generate dust?** If Yes, include a plot plan with the application package.

[1] A "project" means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit. For example, a project might include installation of a new, or modification of an existing internal combustion engine, dry-cleaning facility, boiler, gas turbine, spray coating booth, solvent cleaning tank, etc.

[2] To download the CEQA guidelines, visit [illegible]

[3] To download this form and the instructions, visit http://www.aqmd.gov/ceqa or [illegible]

© South Coast Air Quality Management District, Form 400-CEQA (2006.02)

	Yes	No	
5.	☐	☐	**Would this project result in noticeable off-site odors from activities that may not be subject to SCAQMD permit requirements?** For example, compost materials or other types of greenwaste (i.e., lawn clippings, tree trimmings, etc.) have the potential to generate odor complaints subject to Rule 402 – Nuisance.
6.	☐	☐	**Does this project cause an increase of emissions from marine vessels, trains and/or airplanes?**
7.	☐	☐	**Will the proposed project increase the QUANTITY of hazardous materials stored aboveground onsite or transported by mobile vehicle to or from the site by greater than or equal to the amounts associated with each compound on the attached Table 1?[4]**
			Section III – Water Resources
8.	☐	☐	**Will the project increase demand for water at the facility by more than 5,000,000 gallons per day?** The following examples identify some, but not all, types of projects that may result in a "yes" answer to this question: 1) projects that generate steam; 2) projects that use water as part of the air pollution control equipment; 3) projects that require water as part of the production process; 4) projects that require new or expansion of existing sewage treatment facilities; 5) projects where water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project; and 6) projects that require new or expansion of existing water supply facilities.
9.	☐	☐	**Will the project require construction of new water conveyance infrastructure?** Examples of such projects are when water demands exceed the capacity of the local water purveyor to supply sufficient water for the project, or require new or modified sewage treatment facilities such that the project requires new water lines, sewage lines, sewage hook-ups, etc.
			Section IV – Transportation/Circulation
10.			**Will the project result in** (Check all that apply):
	☐	☐	**a. the need for more than 350 new employees?**
	☐	☐	**b. an increase in heavy-duty transport truck traffic to and/or from the facility by more than 350 truck round-trips per day?**
	☐	☐	**c. increase customer traffic by more than 700 visits per day?**
			Section V – Noise
11.	☐	☐	**Will the project include equipment that will generate noise GREATER THAN 90 decibels (dB) at the property line?**
			Section VI – Public Services
12.			**Will the project create a permanent need for new or additional public services in any of the following areas** (Check all that apply):
	☐	☐	**a. Solid waste disposal?** Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day.
	☐	☐	**b. Hazardous waste disposal?** Check "No" if the projected potential amount of hazardous wastes generated by the project is less than 42 cubic yards per day (or equivalent in pounds).

"REMINDER: For each "Yes" checked in the sections above, attach all pertinent information including but not limited to estimated quantities, volumes, weights, etc."

SIGNATURES

Application For Permit To Construct and Permit To Operate

Mail Application To:
P.O. Box 4944
Diamond Bar, CA 91765

Tel (909) 396-3385
www.aqmd.gov

Section A: Operator Information

1. **Business Name of Operator To Appear On The Permit:**
Mercury Air Center dba Atlantic Aviation Ontario

2. **Valid AQMD Facility ID (Available on Permit or Invoice issued by AQMD):** 114338

3. **Owner's Business Name (only if different from Business Name of Operator):** Atlantic Aviation

Section B: Equipment Location

4. **Equipment Location Address:**
For equipment operated at various locations in AQMD's jurisdiction, provide address of initial site

2161 E Avion St
Street Address

Ontario CA, 91761
City State Zip Code

County ○ Los Angeles ○ Orange ◉ San Bernardino ○ Riverside

Contact Name: Antonio Casillas

Contact Title: Operations Manager Phone: (909) 390-2370

Fax: (909) 390-4508 E-Mail

Section C: Permit Mailing Address

5. **Permit and Correspondence Information:**
☒ Check here if same as equipment location address

Street Address

City State Zip Code

Contact Name.

Contact Title: Phone

Fax: E-Mail

Section D: Application Type

The facility is in ○ RECLAIM ○ Title V ○ RECLAIM & Title V Program (please check if applicable)

6. **Reason for Submitting Application (Select only ONE):**

- ○ New Construction (Permit to Construct)
- ◉ Equipment Operating Without A Permit or Expired Permit*
- ○ Administrative Change
- ○ Equipment On-Site But Not Constructed or Operational
- ○ Title V Application (Initial, Revisions, Modifications, etc.)
- ○ Compliance Plan
- ○ Facility Permit Amendment
- ○ Registration/Certification
- ○ Streamlined Standard Permit
- ○ Permitted Equipment Altered/ Modified Without Permit Approval*
- ○ Proposed Alteration/Modification to Permitted Equipment
- ○ Change of Condition For Permit To Operate
- ○ Change of Condition For Permit To Construct
- ○ Change of Location—Moving to New Site

Existing Or Previous Permit/Application Number:
(If you checked any of the items in this column, you MUST provide a existing Permit/ Application Number)

* A Higher Permit Processing Fee applies to those items with an asterisk (Rule 301 (c) (1) (D)

7. **Estimated Start Date of Operation/Construction (MM/DD/YYYY):** 01/01/2010

8. **Description of Equipment:**
Cargo tank motor vehicle fueling system(mobile refueler)

9. **Is this equipment portable AND will it be operated at different locations within AQMD's jurisdiction?** ◉ No ○ Yes

10. **For Identical equipment, how many additional applications are being submitted with this application?** (Form 400-A required for each)

11. **Are you a Small Business as per AQMD's Rule 102 definition?** (10 employees or less and total gross receipts are $500,000 or less, or a not-for-profit training center?) ◉ No ○ Yes

12. **Has a Notice of Violation (NOV) or a Notice To Comply (NC) been issued for this equipment?**
○ No ◉ Yes If yes, provide NOV/NC #: 57102

Section E: Facility Business Information

13. **What type of business is being conducted at this equipment location?**
Aircraft Fixed Base Operation- FBO

14. **What is your businesses primary NAICS Code** (North American Industrial Classification System)? 48819

15. **Are there other facilities in the SCAQMD jurisdiction operated by the same operator?** ◉ No ○ Yes

16. **Are there any schools (K-12) within a 1000-ft. radius of the equipment physical location?** ◉ No ○ Yes

Section F: Authorization/Signature

I hereby certify that all information contained herein and information submitted with this application is true and correct.

17. **Signature of Responsible Official:** Karin Davidson

18. **Title:** General Manager

19. **Print Name:** Karin Davidson

20. **Date:** 03/02/2010

Check List

- ☒ Form(s) signed and dated by authorized official
- ☒ Supplemental Equipment Form (400-E-XX or 400-E-GEN)
- ☒ CEQA Form (400-CEQA) attached
- ☒ Payment for permit processing fee attached

Your application will be rejected if any of the above items are missing.

FUEL DISPENSING AND STORAGE EQUIPMENT

Mail Application To:
SCAQMD
P O. Box 4944
Diamond Bar, CA 91765
Tel (909) 396-3385
www.aqmd.gov

This form must be accompanied by a completed Application for a Permit to Construct/Operate -Form 400A, Form CEQA, Plot Plan and Stack Form

Permit to be issued to (Business name of operator to appear on permit):

Address where the equipment will be operated (for equipment which will be moved to various location in AQMD's jurisdiction, please list the initial location site):

○ Fixed Location ○ Various Locations

SECTION A: FACILITY INFORMATION

Property Zone	a. ○ Commercial b. ○ Residential c. ○ Industrial d. ○ Parking e. ◉ Other (specify): Ontario Int. Airport
Business Type	a. ◉ Retail b. ○ Non-Retail For Non-Retail facilities only, do you own any fleet vehicles? ○ No ○ Yes Total number of fleet vehicles: For Retail facilities only: a. Has the owner/operator attended a SCAQMD approved Rule 461 training course? ◉ No ○ Yes Date of Course Completion: b. Has the owner/operator developed an Operation and Maintenance manual as required by Rule 461? ◉ No ○ Yes
Operating Schedule	18 hours/day 7 days/week 365 days/year

SECTION B: EQUIPMENT INFORMATION

1. UNDERGROUND STORAGE TANK INFORMATION: COMPLETE AND CHECK THE APPROPRIATE COLUMNS (EXCLUDING DIESEL)

Tank No.	Fuel Type (e.g. Unleaded)	Tank Capacity (Gallons)	Phase I Design		Manifold Location		New	Existing	Remove
			Coaxial	Two-Point	Underground	At Vent			
~~T2~~	~~Unleaded~~	~~1,000.00~~					○	◉	○
							○	○	○
							○	○	○
							○	○	○
							○	○	○

a. Provide Phase I CARB Executive Order Number (see instructions):

b. Are any of these storage tanks dual or multi-compartment? ○ No ◉ Yes
Identify the compartments by tank number and letter (e.g. 1A, 1B, 1C, etc.).

c. Are any of these storage tanks methanol compatible? ◉ No ○ Yes (Identify these tanks)

d. Will any of these storage tanks be located in a vault below grade? ◉ No ○ Yes

e. Will a condensate/vapor trap be installed in the vapor return line? ○ No ◉ Yes

f. Will the tank(s) at this site contain a remote fill? ◉ No ○ Yes

g. Will a flex-type piping be used for the vapor return line? ◉ No ○ Yes

© South Coast Air Quality Management District, Form 400-E-11 (2006 02)

All EXISTING gasoline storage tanks shall be equipped with the following CARB certified equipment:

- Phase I Vapor Control;
- Submerged Fill Tubes; and,
- Spill Boxes.

In addition to the above mentioned requirements, all NEW construction or tank replacement applications shall have a two point design Phase I vapor recovery system AND have all gasoline tanks manifolded underground. Furthermore, all underground storage tanks shall be methanol fuel compatible (include methanol compatible certificate).

2. ABOVEGROUND STORAGE TANK INFORMATION: COMPLETE AND CHECK THE APPROPRIATE COLUMNS (EXCLUDING DIESEL)

Tank No.	Fuel type (e.g.; Reg, Unleaded)	Tank Capacity (Gallons)	Tank Dimensions L x W x H L x Dia (Feet-Inches)	Tank Manufacturer Control Type* or CARB EO	Stack Height (Feet)	Hose Length (Feet)	New	Existing	Remove
	Unleaded	1000					○	○	○
	Diesel	1000					○	○	○
							○	○	○

see permit

Are any of these storage tanks dual or multi-compartment?
Identify the compartments by tank number and letter (e.g. 1A, 1B, 1C, etc.). ○ No ○ Yes

3. For new construction or vent pipe relocations, submit a plot plan identifying island locations, all underground piping locations with pipe diameters, dispenser locations, vent pipe locations, and structures surrounding the property line. Have you included this plot plan with this application ○ No ○ Yes

4. Identify which one of the layouts on Attachment I most accurately represents your facility's configuration (fuel pump islands and set-up). In addition, identify the direction of North by placing an arrow in the circle provided and identify dispenser location by placing a dot on the island configuration. If none of the figures in Attachment I apply to your facility, complete Figure 9 by sketching the layout of your fuel pump islands. Using the same format in Attachment I, number each island and indicate the distances between them.

Figure Distance A: (ft) Distance B: (ft) Distance C: (ft)

5. Indicate the distance, direction from △, and address of the nearest residential and commercial/industrial structure located outside the property line of the facility as measured from the approximate center of the islands (shown as △ in the figures):

Residential (ft)
Direction (Select One): ○ N ○ NE ○ E ○ SE ○ S ○ SW ○ W ○ NW
Located at:

Commercial/Industrial (ft)
Direction (Select One): ○ N ○ NE ○ E ○ SE ○ S ○ SW
Located at:

6. FUELING POSITION INFORMATION: COMPLETE FOR ALTERATIONS OR NEW CONSTRUCTION

Total Number of Fueling Positions After Alteration or New Construction	Total Number of Fueling Positions Prior to Alteration (For Alterations Only)	

7. NOZZLE INFORMATION: COMPLETE ALL COLUMNS

Fuel Type (e.g. Unleaded)	# New Nozzles	# Existing Nozzles	# Removed Nozzles	CARB Executive Order OR Control Type* (Phase II)	Maximum Monthly Throughput (Gal/Mo)	Maximum Annual Throughput (Gal/Yr)
Unleaded		1		G-70-193	~~2,200~~ 5000	~~26,400~~ 60000

See lists on page 1.

8. GASOLINE PRODUCT INFORMATION: COMPLETE TABLE

			# Of Product (Excluding Diesel)		
TOTAL NUMBER OF NOZZLES:	1				
Number of nozzle(s) dispensing ONE product (grade) of gasoline:	1	X	1	=	1
Number of nozzle(s) dispensing TWO products (grades) of gasoline:	0	X	2	=	0
Number of nozzle(s) dispensing THREE products (grades) of gasoline:	0	X	3	=	0
TOTAL NOZZLE COUNT: (This should be the same as TOTAL NUMBER OF NOZZLES above)	1		TOTAL PRODUCT COUNT	=	1

9. DISPENSER INFORMATION: COMPLETE AND CHECK THE APPROPRIATE COLUMNS

Dispenser		No. of Similar Dispensers	Dispenser			No. of Nozzles Per Dispenser		
Make	Model No.		New	Existing	Removed	Unleaded	Diesel	Methanol
unk			○	◉	○	1		
			○	○	○			
			○	○	○			
			○	○	○			

10. THROUGHPUT INFORMATION: PROVIDE THROUGHPUT RECORDS FOR THE PAST 2 YEARS (EXISTING SITES)

Year of Operation	Fuel Type	Throughput (Gal/Yr)	Days of Operation
2009	Gasoline	24,000	365
	Gasoline		

11. For existing gasoline storage and dispensing systems and based on the following, please provide a copy of your MOST RECENT vapor recovery test results.

a. Balance System Tests:
- Static Pressure (Leak-Decay);
- Dynamic Pressure (Back-Pressure); and,
- Liquid Removal (if applicable).

b. Vacuum Assisted System Tests (Except Healy and Hirt Systems):
- Static Pressure (Leak-Decay); and,
- Air-to-Liquid Ratio (A/L).

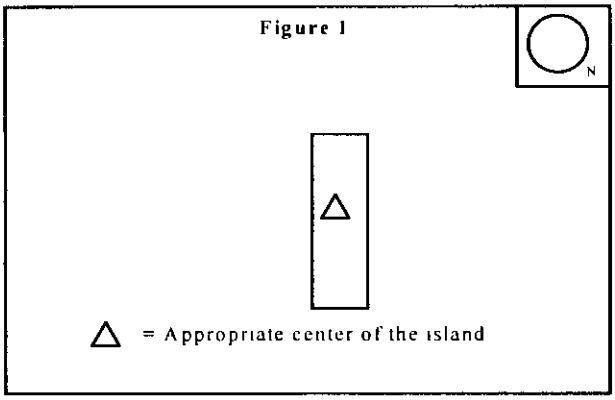
c. Healy Vacuum Assisted System Tests:
- Static Pressure (Leak-Decay);
- Air-to-Liquid Ratio (A/L); and,
- Vapor Return Line.

d. Vacuum Assisted Hirt System Test:
- Air-to-Liquid Ratio (A/L).

e. For systems not mentioned, provide required test results as per that system's executive order.

12. Include All drawings as mentioned in Form 400-E-11 Requirements.

SECTION C: APPLICANT CERTIFICATION STATEMENT



I hereby certify that all information contained herein and information submitted with this application is true and correct.

3.	○	○	**Will there be any demolition, excavating, and/or grading construction activities that encompass an area exceeding 20,000 square feet?**
4.	○	○	**Does this project include the open outdoor storage of dry bulk solid materials that could generate dust?** If Yes, include a plot plan with the application package

[1] A "project" means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit. For example, a project might include installation of a new, or modification of an existing internal combustion engine, dry-cleaning facility, boiler, gas turbine, spray coating booth, solvent cleaning tank, etc.

[2] To download the CEQA guidelines, visit http://ceres.ca.gov/env_law/state.html.

[3] To download this form and the instructions, visit http://www.aqmd.gov/ceqa or http://www.aqmd.gov/permit

© South Coast Air Quality Management District, Form 400-CEQA (2006.02)

	Yes	No	
5.	○	○	**Would this project result in noticeable off-site odors from activities that may not be subject to SCAQMD permit requirements?** For example, compost materials or other types of greenwaste (i.e., lawn clippings, tree trimmings, etc.) have the potential to generate odor complaints subject to Rule 402 – Nuisance
6.	○	○	**Does this project cause an increase of emissions from marine vessels, trains and/or airplanes?**
7.	○	○	**Will the proposed project increase the QUANTITY of hazardous materials stored aboveground onsite or transported by mobile vehicle to or from the site by greater than or equal to the amounts associated with each compound on the attached Table 1?[4]**
			Section III – Water Resources
8.	○	○	**Will the project increase demand for water at the facility by more than 5,000,000 gallons per day?** The following examples identify some, but not all, types of projects that may result in a "yes" answer to this question: 1) projects that generate steam, 2) projects that use water as part of the air pollution control equipment, 3) projects that require water as part of the production process, 4) projects that require new or expansion of existing sewage treatment facilities, 5) projects where water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project, and 6) projects that require new or expansion of existing water supply facilities.
9.	○	○	**Will the project require construction of new water conveyance infrastructure?** Examples of such projects are when water demands exceed the capacity of the local water purveyor to supply sufficient water for the project, or require new or modified sewage treatment facilities such that the project requires new water lines, sewage lines, sewage hook-ups, etc
			Section IV – Transportation/Circulation
10.			**Will the project result in** (Check all that apply):
	○	○	a. **the need for more than 350 new employees?**
	○	○	b. ***an increase in heavy-duty transport truck traffic to and/or from the facility by more than 350 truck round-trips per day?***
	○	○	c. **increase customer traffic by more than 700 visits per day?**
			Section V – Noise
11.	○	○	**Will the project include equipment that will generate noise GREATER THAN 90 decibels (dB) at the property line?**
			Section VI – Public Services
12.			***Will the project create a permanent need for new or additional public services in any of the following areas*** (Check all that apply):
	○	○	a. **Solid waste disposal?** Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day
	○	○	b. **Hazardous waste disposal?** Check "No" if the projected potential amount of hazardous wastes genereted by the project is less than 42 cubic yards per day (or equivalent in pounds).

***REMINDER:** For each "Yes" checked in the sections above, attach all pertinent information including but not limited to estimated quantities, volumes, weights, etc.**

APPLICATION INSTRUCTIONS
FOR
FUEL OIL STORAGE TANKS

FILL OUT REVERSE SIDE AND RETURN WITH YOUR APPLICATION (FORM 400-A)

NOTE IF THE FUEL OIL TANK IS USED FOR FUELING VEHICLES, DO NOT USE THIS FORM OR APPLICATON FORM 400-A USE APPLICATION FORM 450

With each application for permit to operate any type of fuel oil storage tank the following data specifications plans and drawings must be submitted in duplicate

1 EQUIPMENT LOCATION DRAWING The drawing submitted must be to scale (suggested scale 1 inch = 100 feet, accuracy of measurements to the nearest 5 feet will be satisfactory) and must show at least the location and identification of the fuel oil storage tank on the property

2 DRAWINGS AND SPECIFICATIONS OF FUEL OIL STORAGE TANK. (Item 3)

Structural design calculations and details are not required When standard commercial equipment is to be installed, the manufacturer's catalog describing the equipment may be submitted by the applicant **ADDITIONAL INFORMATION MAY BE REQUIRED**

Further information or clarification concerning permits can be obtained by writing or calling Permit Application Receiving at (818)572-6212

FILING FEES

NOTE This section supercedes the filing fees as described in form 400A for equipment which was exempt from written permit pursuant to Rule 219 prior to June 3, 1988

A If the equipment is installed prior to June 3, 1988 and the application is filed before June 3, 1989 the application filing fee is $75

B If the equipment is installed prior to June 3, 1988, and the application is filed on or after June 3, 1989, or if the equipment is installed on or after June 3, 1988, the application filing fee is $250, except as noted below

- i For small business the filing fee is $160
- ii Each application for change of ownership requires a $110 transfer fee
- iii All applicants, including state, local governmental and public districts, must pay a permit evaluation fee Such fees are in addition to filing fees and change of ownership fees

CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) APPLICABILITY FORM 400 - CEQA

The average time to complete the CEQA Applicability Form is no longer than 15 minutes if all necessary information is available If you need assistance filling out this form, you can call Lori Inga (909) 396-3109

Application/Tracking #
Facility Name: GE Engine Services / WCO
Facility ID #: 061160
-- RETAIN FORM IN PERMIT FILE --

All permit applications must be reviewed to determine California Environmental Quality Act (CEQA) applicability See the SCAQMD's "Permit Application Toolkit" for guidance in completing this form Submit only one 400-CEQA form for each 400-A application If submitting multiple applications for the same project, only one 400-CEQA form is necessary A "project" means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit For example, a project might include installation of a new, or modification of an existing internal combustion engine, dry-cleaning facility, boiler, gas turbine, spray coating booth, solvent cleaning tank, etc

Review of Impacts Which May Trigger CEQA

The SCAQMD is required by state law to review discretionary permit projects for potential non-air quality impacts, as well as air quality impacts Responses to the following questions must be provided to allow the SCAQMD to review the permit application project to identify whether or not the project has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines 15060(a)] To avoid delays in processing this form, please provide additional information explaining any "Yes" responses on a separate sheet and attach to this form Check "Yes" or "No" as applicable

	Yes	No	
1.	☐	X	**HAS THIS PROJECT GENERATED ANY KNOWN PUBLIC CONTROVERSY REGARDING POTENTIAL ADVERSE IMPACTS THAT MAY BE GENERATED BY THE PROJECT** (e g , concerns raised by local groups at public meetings, adverse media attention such as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc)**?**
2.	☐	X	**IS THIS PROJECT PART OF A LARGER PROJECT?**
Section I – Air Quality			
3.	☐	X	**WILL THERE BE ANY DEMOLITION, EXCAVATING, AND/OR GRADING CONSTRUCTION ACTIVITIES THAT ENCOMPASS AN AREA EXCEEDING 20,000 SQUARE FEET?**
4.	☐	X	**DOES THIS PROJECT INCLUDE THE OPEN OUTDOOR STORAGE OF DRY BULK SOLID MATERIALS THAT COULD GENERATE DUST?** (If "Yes," please submit a plot plan along with the application package)
5.	☐	X	**WOULD THE PROJECT RESULT IN NOTICEABLE OFF-SITE ODORS** (i e , has the potential to generate Rule 402 nuisance complaints) **FROM ACTIVITIES THAT ARE NOT SUBJECT TO SCAQMD PERMITS** (e g , compost materials or other types of greenwaste such as lawn clippings, tree trimmings, etc)**?**
6.	☐	X	**WILL THE PROPOSED PROJECT INCREASE THE QUANTITY OF HAZARDOUS MATERIALS** (see attached list) **STORED ABOVEGROUND ONSITE OR TRANSPORTED BY MOBILE VEHICLE TO OR FROM THE SITE BY GREATER THAN OR EQUAL TO THE AMOUNTS ASSOCIATED WITH EACH COMPOUND ON THE ATTACHED LIST?**
Section II – Water Resources			
7.	☐	X	**WILL THE PROJECT INCREASE DEMAND FOR WATER AT THE FACILITY BY MORE THAN 5,000,000 GALLONS PER DAY?** (The following examples identify some, but not all, projects that may result in a "yes" answer to this question projects that generate steam, projects that use water as part of the air pollution control equipment, projects that require water as part of the production process, projects that require new or expansion of existing sewage treatment facilities, projects where water demand exceeds the capacity of the local water purveyor to supply sufficient water for the project, projects that require new or expansion of existing water supply facilities, etc)
8.	☐	X	**WILL THE PROJECT REQUIRE CONSTRUCTION OF NEW WATER CONVEYANCE INFRASTRUCTURE?** (Examples of such projects are when water demands exceed the capacity of the local water purveyor to supply sufficient water for the project, or require new or modified sewage treatment facilities, and thus the project requires new water lines, sewage lines, sewage hook-ups, etc)

Section III – Transportation/Circulation

	Yes	No	
9.			**WILL THE PROJECT RESULT IN:**
	☐	X	**THE NEED FOR MORE 350 NEW EMPLOYEES?,** or
	☐	X	**INCREASE HEAVY-DUTY TRANSPORT TRUCK TRAFFIC TO AND/OR FROM THE FACILITY BY MORE THAN 350 TRUCK ROUND-TRIPS PER DAY?,** or
	☐	X	**INCREASE CUSTOMER TRAFFIC BY MORE THAN 700 VISITS PER DAY?**

Section IV – Noise

10.	☐	X	**WILL THE PROJECT INCLUDE EQUIPMENT WITH A NOISE SPECIFICATION GREATER THAN 90 DECIBELS?**

Section V – Public Services

11.			**WILL THE PROJECT CREATE A PERMANENT NEED FOR NEW OR ADDITIONAL PUBLIC SERVICES IN ANY OF THE FOLLOWING AREAS:**
	☐	X	**SOLID WASTE DISPOSAL?** Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day
	☐	X	**HAZARDOUS WASTE DISPOSAL?** Check "No" if the projected potential amount of hazardous wastes generated by the project is less than 42 cubic yards per day (or equivalent in pounds)

****AS A REMINDER, IF ANY ITEM IS MARKED "YES" IN ANY OF THE SECTIONS, PLEASE ATTACH PERTINENT INFORMATION REGARDING THAT ENVIRONMENTAL TOPIC INCLUDING ESTIMATED QUANTITIES, VOLUMES, WEIGHTS, ETC.****

I HEREBY CERTIFY THAT ALL INFORMATION CONTAINED HEREIN AND INFORMATION SUBMITTED WITH THIS APPLICATION IS TRUE AND CORRECT to the best of my knowledge. I understand that this form is a streamlined screening tool and that the SCAQMD reserves the right to consider other pertinent information in determining CEQA applicability.

CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) APPLICABILITY FORM 400 - CEQA

The SCAQMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAQMD in clarifying whether or not the project[1] has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document [CEQA Guidelines §15060(a)].[2] Refer to the attached instructions for guidance in completing this form.[3] For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project. If you need assistance completing this form, contact Permit Services at (909) 396-3385 (or 2668).

FACILITY INFORMATION

Facility Name: GE Engine Services, Inc. **Facility ID** (6-Digit): 61160

Project Description: Title V Permit Renewal

REVIEW FOR EXEMPTION FROM FURTHER CEQA ACTION

Check "Yes" or "No" as applicable

	Yes	No	Is this application for:
A.	☐	☒	**A CEQA and/or NEPA document previously or currently prepared that specifically evaluates this project?** If yes, a permit cannot be issued until a Final CEQA document and Notice of Determination is submitted.
B.	☐	☒	**A request for a change of permittee only (without equipment modifications)?**
C.	☐	☒	**A functionally identical permit unit replacement with no increase in rating or emissions?**
D.	☐	☒	**A change of daily VOC permit limit to a monthly VOC permit limit?**
E.	☐	☒	**Equipment damaged as a result of a disaster during state of emergency?**
F.	☒	☐	**A Title V** (i.e., Regulation XXX) **permit renewal (without equipment modifications)?**
G.	☐	☒	**A Title V administrative permit revision?**
H.	☐	☒	**The conversion of an existing permit into an initial Title V permit?**

If **"Yes"** is checked for any question above, your application does not require additional evaluation for CEQA applicability. Skip to page 2, "SIGNATURES" and sign and date this form.

REVIEW OF IMPACTS WHICH MAY TRIGGER CEQA

Complete Sections I-VI by checking "Yes" or "No" as applicable. To avoid delays in processing your application(s), explain all "Yes" responses on a separate sheet and attach it to this form.

	Yes	No	Section I – General
1.	☐	☐	**Has this project generated any known public controversy regarding potential adverse impacts that may be generated by the project?** Controversy may be construed as concerns raised by local groups at public meetings; adverse media attention such as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc.
2.	☐	☐	**Is this project part of a larger project?**
			Section II – Air Quality
