Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: HALF HOUR PERMA CLEAN
Address: 12403 WOODSIDE AV
City,State,Zip: LAKESIDE, CA 920403017
Region: STATE
**Facility Status:** **Completed - Case Closed**
Status Date: 03/06/1998
Global Id: T0608111517
Lead Agency: SAN DIEGO COUNTY LOP
Lead Agency Case Number: H11016-001
Latitude: 32.85594
Longitude: -116.924913
Case Type: Cleanup Program Site
Case Worker: Not reported
Local Agency: Not reported
RB Case Number: Not reported
File Location: Local Agency
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: * Chlorinated Hydrocarbons
Site History: Not reported

Historical Generators:
Date form received by agency: 2014-06-09 00:00:00.0
Site name: WALGREENS #11990
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 311
. Waste name: Pharmaceutical waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D024
. Waste name: M-CRESOL

. Waste code: P001
. Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

. Waste code: P075
. Waste name: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

. Waste code: U034
. Waste name: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

**WALGREENS #11990 (Continued)** **1016954588**

. Waste code: U165
. Waste name: NAPHTHALENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 111

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 31

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 21

Waste code: D010
Waste name: SELENIUM
Amount (Lbs): 21

Waste code: P001
Waste name: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Amount (Lbs): 6

Waste code: P075
Waste name: NICOTINE, & SALTS
Amount (Lbs): 2

Violation Status: No violations found

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**PUPIL TRANS FACILITY (Continued)** **S103974196**

Violation Notes: Returned to compliance on 04/23/2018.
Violation Division: San Diego County Department of Env Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 71872
Site Name: STUDENT TRANS. FACILITY - LUSD
Violation Date: 11-20-2017
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 03/29/2018.
Violation Division: San Diego County Department of Env Health
Violation Program: HW
Violation Source: CERS

| Potential Media Affected: | Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil |
| Potential Contaminants of Concern: | Benzene, Diesel, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating |
| Site History: | The Site is located at 9668 Winter Gardens Blvd in Lakeside, CA and consists of a single-story 4,400-square foot structure formerly operated as a tire and auto service center. The property is bounded on the north by a commercial shopping center and on the east by Winter Gardens Blvd, on the south by a residential development and on the west by residential properties. The Property was operated as a tire and automotive center from 1980 until 2009. The building was vacant from 2009 to September 2011. The Site was re-occupied by another firm in September 2011 and has reopened as a tire and automotive service center. Several site investigations were completed by three separate consultants between July 2009 and November 2011. These investigations identified that there was a release of petroleum hydrocarbons and various metal associated with one hydraulic lift (HL-4) and an oil water separator (OWS). During the course of the site assessment phase a total of three investigations were completed with a total of 29 exploratory borings drilled around the four hydraulic lifts and the oil water separator on-site. A total of 23 |

**TIRE TECH INC (Continued)** **S100946677**

soil samples were collected and analyzed identifying releases hydrocarbon at HL-4 and the OWS. AECOM initiated the site mitigation activities by excavation on and around January 13, 2011. During this activity they collected a total of 20 soils and two grab groundwater samples from the excavation around HL-4 and a total of 29 soils and one grab groundwater sample in the excavation around the OWS. An Excavation Work Plan dated April 8, 2011 (revised in May 2011) was submitted on May 23, 2011 covering the work that was completed in January 2011. Following a meeting on May 27, 2011 due to the irregularly of completion the work prior to submittal of the work plan, the work plan was approved acknowledging that a good portion of the work had been completed prior to submittal of the work plan. It was noted that there were procedures and details in the work plan that were not followed during the January excavation activities and these variations would have to be addressed in the final Excavation Report. The Excavation Summary Report dated June 3, 2011 and letter report Soil and Fluid Removal Quantities dated August 18, 2011 documented 172 cubic-yards of impacted soil exported to the South Yuma Landfill in Arizona. It is estimated that a total of 100 cubic-yards was removed from the excavation at HL-4 and 72 cubic-yards was removed from the excavation at the OWS. Due to questions in regards to the residual groundwater impacts related to various volatile organic compound (VOCs) detected in the grab groundwater samples in January 2011 a total of four groundwater monitoring wells were installed and monitored in August and September 2011. These two events MW-1, MW-2 and MW-3 the VOCs and Oxygenates were below laboratory detection whereas MW-4 had MTBE at 37 ug/l on August 19, 2011 and 27 ug/l on September 2, 2011. A review of the location of MW-4 (up-gradient of HL-4 and OWS) and the presents of an operating gasoline station 239 feet immediately up-gradient of MW-4. This station had a historical release and was closed in April 5, 2005 (H26488-001). It was concluded that the MTBE is originating from an off-site source. Based on the information provided regarding the investigation and mitigation activities, no further action is required at this time.

Hazardous Waste Summary:

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: D001
. Waste name: IGNITABLE WASTE

Violation Status: No violations found

FINDS:
Registry ID: 110002904830
Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002904830

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

| Treat To Water: | Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality. |
| Complexity: | Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds. |

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: Yes
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: Yes

Hazardous Waste Summary:

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

EPA Region: 09
Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:
Owner/operator name: HAMANN MARTIN G P
Owner/operator address: 475 W BRADLEY AVE
EL CAJON, CA 92020
Owner/operator country: Not reported
Owner/operator telephone: 619-440-7424
Owner/operator email: Not reported
Owner/operator fax: Not reported
Owner/operator extension: Not reported
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Site ID: 43247
Site Name: LAKESIDE ARCO
Violation Date: 03-05-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 04/02/2019. Inspection Sequence ID:6104974;Tank ID:27920,27921,27922;Violation Description:(TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prev

| Inspection Date: | 2019-03-05T00:00:00.000 |
| Violation Code: | 2030036 (TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. 6. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. 7. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. 8. Inspected within 30 days after a repair to the overfill prevention equipment. 9. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. 10. Inspected by a certified UST service technician. 11. Maintain records of overfill prevention equipment inspection for 36 months. 23 CCR 2635(c)(1), 2635(d), 2637.2(a-c), 2665, 2712(b)(1)(G) |

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 08/15/2019. Inspection Sequence ID:6216289;Tank ID:20421,20422,20427,20428;Violation Description:(TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Site ID: 5799
Site Name: ANDERSON DRILLING
Violation Date: 08-12-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 08/15/2019. Inspection Sequence ID:6216289;Tank ID:20421,20422,20427,20428;Violation Description:(TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. # GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

***Federal NPL site list***

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/30/2020

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020
Date Data Arrived at EDR: 02/05/2020

Next Scheduled EDR Contact: 07/13/2020
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Data Release Frequency: No Update Planned

***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/30/2020

***Federal CERCLIS list***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019
Date Data Arrived at EDR: 04/05/2019
Date Made Active in Reports: 05/14/2019
Number of Days to Update: 39

Next Scheduled EDR Contact: 07/13/2020
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/30/2020

Data Release Frequency: Quarterly

***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/16/2019

***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019
Date Data Arrived at EDR: 12/16/2019

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019
Date Data Arrived at EDR: 12/16/2019

***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

**ADDITIONAL ENVIRONMENTAL RECORDS**

***Local Brownfield lists***

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007
Date Made Active in Reports: 04/10/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

**EDR HIGH RISK HISTORICAL RECORDS**

***EDR Exclusive Records***

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

**OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

| North Map: | 5622916 SAN VICENTE RESERVOIR, CA |
| Version Date: | 2012 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

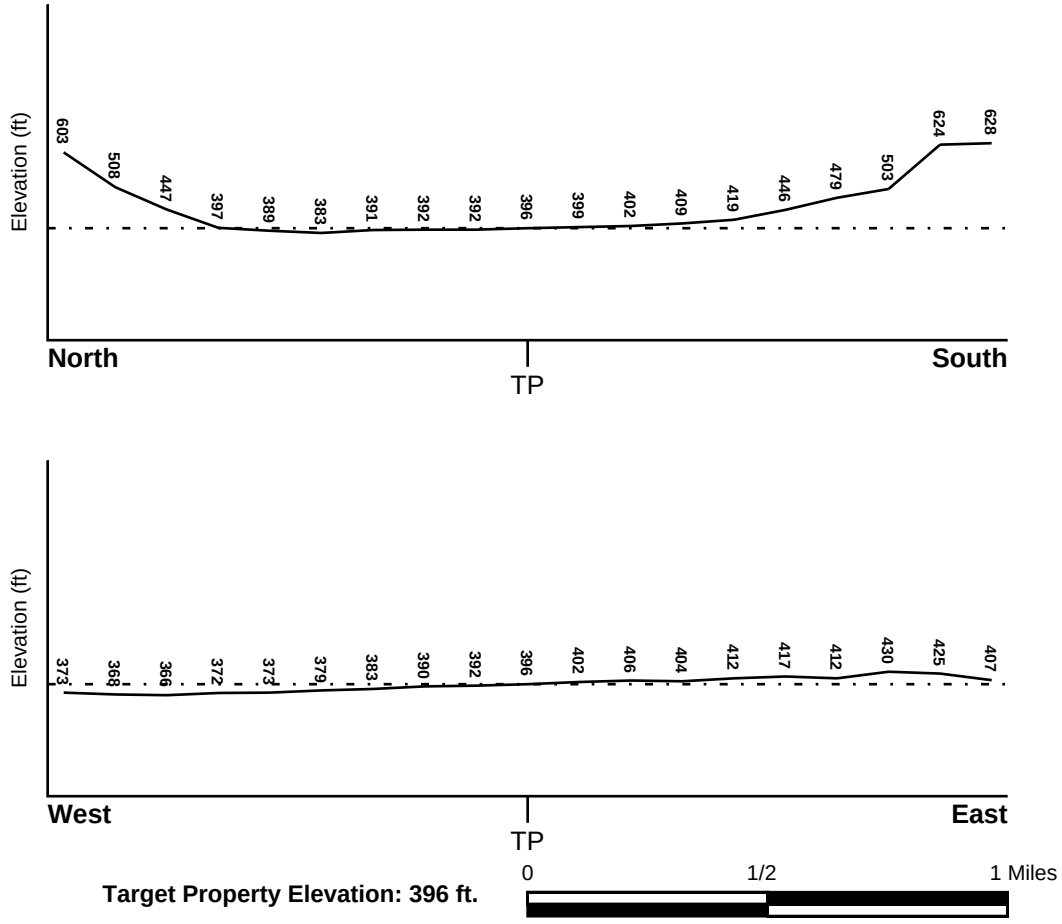
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



**TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

**TARGET PROPERTY TOPOGRAPHY**

General Topographic Gradient: General WNW

**SURROUNDING TOPOGRAPHY: ELEVATION PROFILES**

**Target Property Elevation: 396 ft.**

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

**FEMA FLOOD ZONE**

| Flood Plain Panel at Target Property | FEMA Source Type |
|---|---|
| 06073C1656G | FEMA FIRM Flood data |

| Additional Panels in search area: | FEMA Source Type |
|---|---|
| 06073C1652G | FEMA FIRM Flood data |
| 06073C1660G | FEMA FIRM Flood data |
| 06073C1654G | FEMA FIRM Flood data |

**NATIONAL WETLAND INVENTORY**

| NWI Quad at Target Property | NWI Electronic Data Coverage |
|---|---|
| EL CAJON | YES - refer to the Overview Map and Detail Map |

**HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

***Site-Specific Hydrogeological Data*:***

| | |
|---|---|
| Search Radius: | 1.25 miles |
| Status: | Not found |

**AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| MAP ID | LOCATION FROM TP | GENERAL DIRECTION GROUNDWATER FLOW |
|---|---|---|
| 2 | 1/4 - 1/2 Mile East | NE |
| 5 | 1/2 - 1 Mile East | NW |
| 1G | 1/2 - 1 Mile East | NW |
| 2G | 1/4 - 1/2 Mile East | NE |

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

**GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

**ROCK STRATIGRAPHIC UNIT**

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY**

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

---

**Soil Map ID: 1**

Soil Component Name: PLACENTIA

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

AQUIFLOW$^{R}$ Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

John Bidwell, Senior Engineer
Department of Public Works
Engineering Services
5555 Overland Avenue MS 0340
San Diego, CA 92123

Dear Mr. Bidwell:

**RE: RESULTS OF SOIL SAMPLING IN THE AREA OF THE PROPOSED WOODSIDE AVENUE ROAD IMPROVEMENTS (BETWEEN CACTUS STREET AND MAINE AVENUE), LAKESIDE, CA**

We have reviewed the report regarding drilling and soil sampling at the above-referenced location. The undated, unsigned report was prepared by your Department and submitted to Environmental Health Services (EHS) via fax on March 28, 1994. The report indicates that laboratory analyses confirmed the presence of total recoverable petroleum hydrocarbons (TRPH) in soils collected from the bore hole completed at the site. The report concludes that "the source of the contaminants is most probably gasoline or diesel fuel." The report also indicates that fuel tanks may have been located on the property until the 1960's. The report includes a proposal for further sampling and analyses to evaluate the nature and extent of the contamination.

Since having received the report, we have had several telephone conversations with Mr. Larry Horsman of your staff. We suggested to Mr. Horsman that, without further information, we could not concur with the conclusion presented in the report regarding the source of the contamination. Because the County of San Diego does not own the property, we suggested to Mr. Horsman that the need for further investigation regarding the nature and extent of the contamination should be based on the specifics of the road improvement project. If the road improvements require excavating, handling, and disposing of contaminated soil, then further

investigation of the site may be warranted. In the absence of further site investigation, your Department might develop contingency plans to handle and dispose of any contaminated soil that might be excavated during the improvement activities. We also advised Mr. Horsman that your Department should notify the San Diego Regional Water Quality Control Board (RWQCB) of the findings presented in the report.

Additionally, we advise you to notify the current property owner of the findings presented in the report as they may be responsible for mitigation of contamination. Any soil and/or water, generated during the field investigation should be disposed of properly. Please contact this office if you require further assistance in determining disposal options.

Finally, our comments are based solely on the information contained in the undated, unsigned report prepared by your Department and submitted to EHS via fax on March 28, 1994. If future activities at the site generate any significant information that was not anticipated, please contact this office for further evaluation.

If you have any questions, please call Richard Gilb of my staff at (S48) 338-2414.

Sincerely,

CHUCK PRYATEL, Division Manager
Site Assessment and Mitigation Division

Subject: Proposed investigation for Hazardous Materials Site Assessment at the southwest corner of Woodside Ave. and Los Coches Rd. in Lakeside, CA.

Please find attached a copy of the proposed soil sampling plan for the subject site. If you have any concerns or specifics that you feel need to be addressed, please identify and I will respond as promptly as possible. I would also like to thank you for your cooperation and assistance to me and the Engineering Services section of DPW.

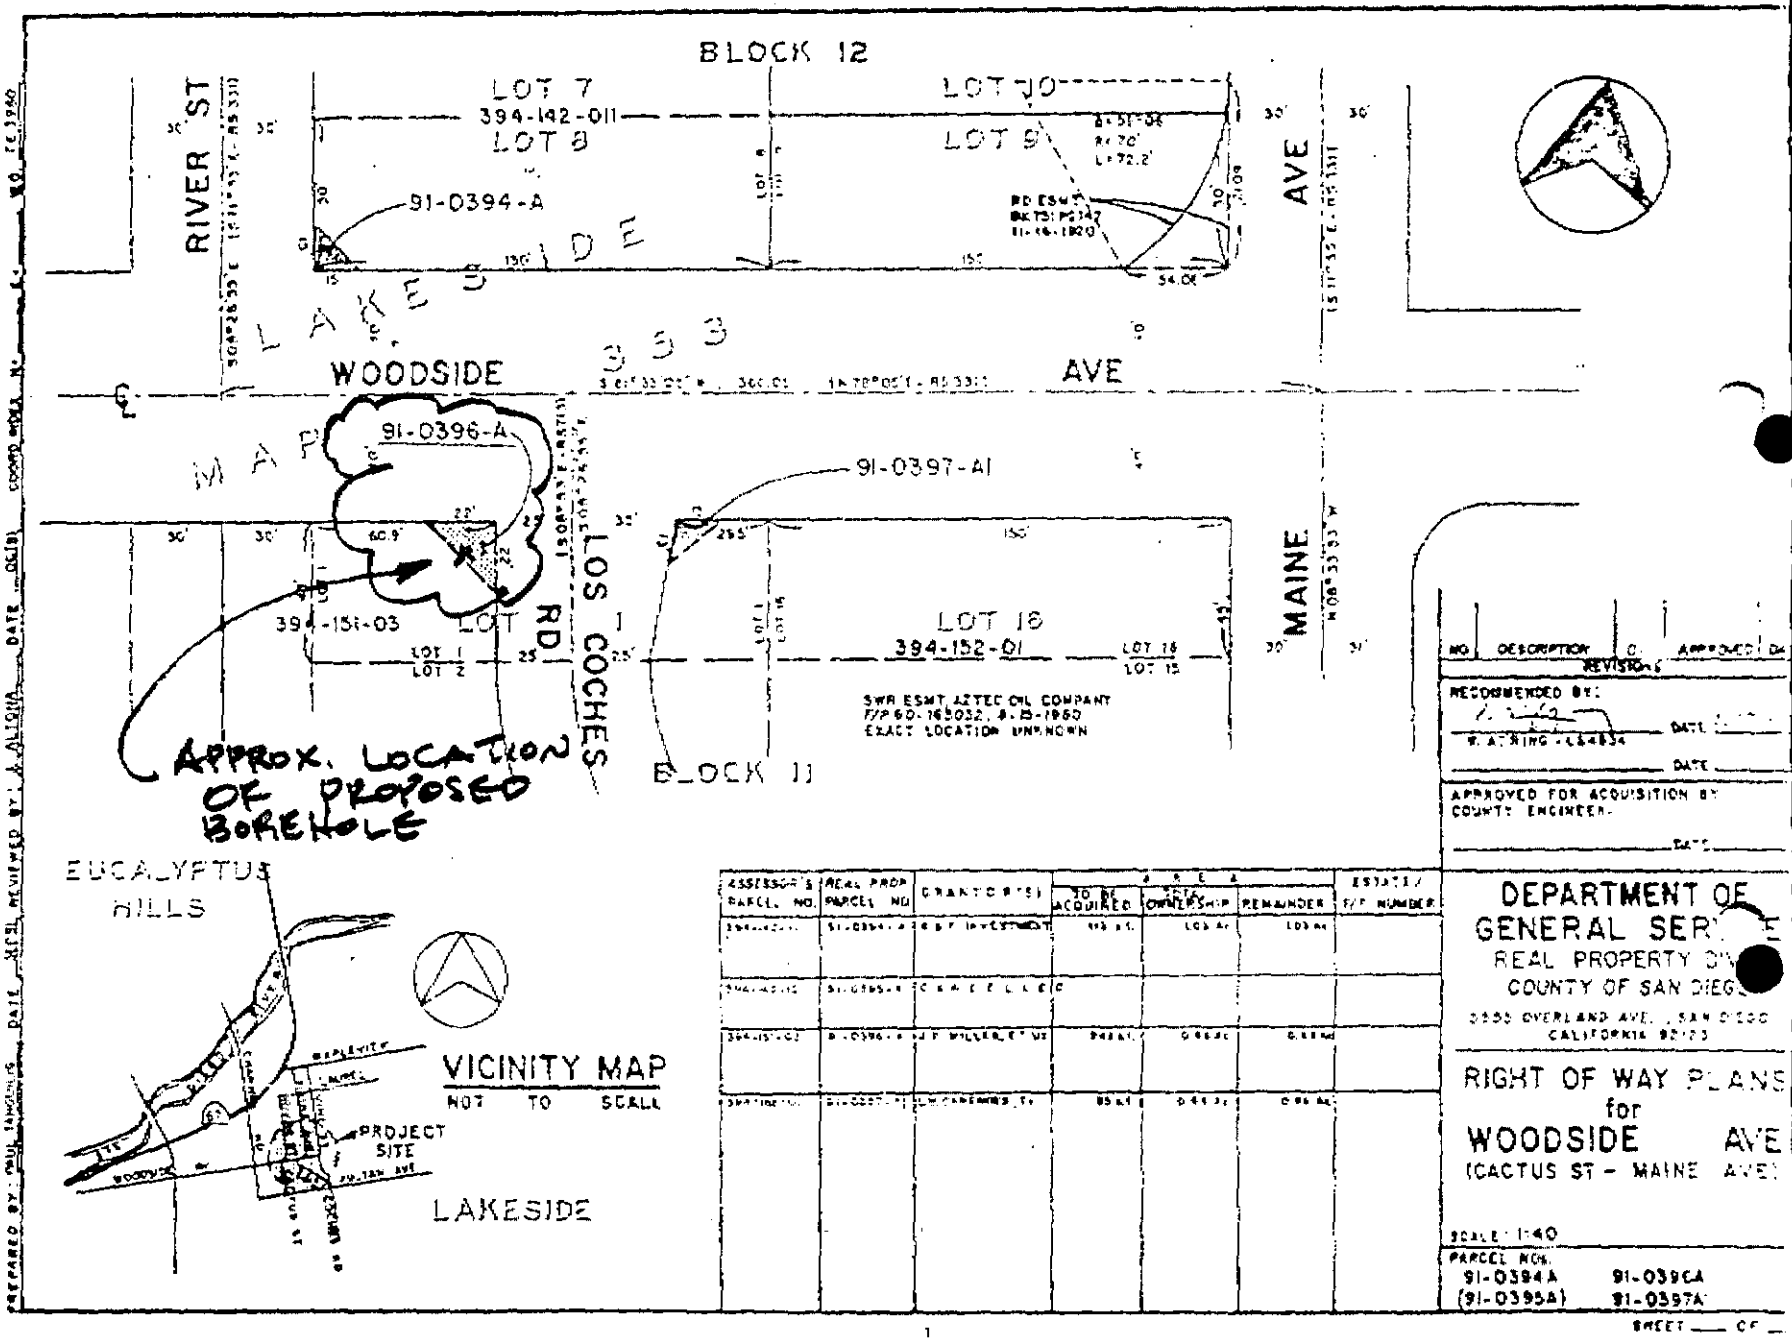
Larry A.

12/29/93

PROPOSED SOIL SAMPLING PLAN FOR HAZARDOUS MATERIALS ASSESSMENT AT THE SOUTHWEST CORNER OF WOODSIDE AND LOS COCHES ROAD IN LAKESIDE, CALIFORNIA (PORTION OF A.P.N. 394-151-03 TO BE ACQUIRED FOR RIGHT-OF-WAY PURPOSES).

The subject property is a small triangular shaped piece less than 300 square feet in area. The length of frontage on Woodside Avenue and Los Coches Road is 22' per the attached Right-Of-Way Plan. The only structures on this property extending above grade are a SDG&E power pole and a free-standing light pole. The SDG&E power pole is supporting 3 transformers, power lines, and a street light.

The subject property is part of a larger lot that supports a tire store and a muffler/welding shop.



Due to the small size of the property in question it is proposed that the current soil sampling plan will be limited to a single 30' deep hole. Soil samples will be taken at depths of 1',3',5',10', 15',20',25, and 30'. Soil samples will also be taken from the capillary fringe and any lithologic contact areas where discernable.

Soil sampling will be performed in a manner similar to that done on the recently completed Birch Street project with the exception that backfill into the bore-hole will be made with a pure bentonite fill. Fred Bast of the DPW Materials Lab will be supervising the field work and preparing the boring logs as he did on the previously mentioned Birch Street project.

Laboratory analysis of the soil samples will be performed per the Birch Street project by a State Certified Testing Laboratory.

There are no known environmental concerns at the site. Due to topographic considerations and the underlying soil types there is the possibility that petroleum hydrocarbons could have migrated to this site from a site located at the southwest corner of Woodside Avenue and Maine Avenue(one block to the east). There is also the possibility of contamination from an old transformer leak from the existing SDG&E power pole although their are no obvious indications that this has happened.

ADVISED

MR. TOM MILLS
LEIGHTON AND ASSOCIATES
3934 MURPHY CANYON RD
SAN DIEGO , CA 92123

DEAR MR. MILLS :

RE: EXPIRED WELL PERMIT -- APN: 394-122-07
12401 WOODSIDE AV , LAKESIDE

The well drilling permit issued on 10/22/90 for the above referenced site has expired pursuant to Section 67.444 of the San Diego County Code. Our records indicate that the complete well logs and accompanying information have not been submitted to this office.

Within fifteen (15) days of the date of this notice, you must provide the following information:

1. Complete well and boring logs which must include:
   a. Well construction details,
   b. Quantity of materials used,
   c. Lithologic logs,
   d. A description of how all borings have been destroyed,
   e. Measured static water level including date of measurement, and
   f. If available, the surveyed casing elevation.
2. An as-built plot plan giving accurate locations of all borings and/or wells. The plot plan must be drawn to scale.
3. Location of the property by:
   a. Address,
   b. Assessors Parcel Number (APN), and
   c. USGS Coordinates.
4. All laboratory data.

If no work has been done in regards to this permit you must notify this office in writing.

Failure to provide the information specified above is a violation of Section 67.447 of the San Diego County Code. Violation of this section is a misdemeanor (Section 67.448).

If you have any questions contact me at (619) 338-2221

Sincerely,

KEVIN M. HEATON, Hydrogeologist
Hazardous Materials Management Division

# PERMIT APPLICATION SUPPLEMENT
## VADOSE AND GROUND WATER MONITORING WELLS

1. Well design, logging and construction must be supervised by a Geologist, Engineering Geologist or Civil Engineer who is registered or certified by the State of California.

2. Provide verification of a Well Drilling C-57 license.

3. Provide a plot plan giving location of existing improvements such as structures, underground tanks, underground utilities, underground piping and the proposed monitoring and/or observation wells.

4. What is the proposed purpose of the well? GROUND WATER MONITORING and collection of soil and ground water samples.

5. What procedures will be used to prevent the well from providing an avenue to contamination during construction?
Hollow stem augers will be used and steam cleaned between boreholes.

6. What field procedures will be utilized to determine if contamination exists?
Conditions (soil samples and cuttings) will be ~~collected~~ monitored with a ~~OVA~~, and selected samples will be tested for TPH.

7. What procedures will be used to determine whether samples will be sent for laboratory testing or archiving?
An on site mobile laboratory will be used to determine levels of contamination.

8. What constituents will be monitored and tested? TPH (8015) BTEX (8020) and Organic Lead.

9. How will samples be transported and preserved? In an ice cooled chest (if transported)

10. What sampling method will be used?
California Split-barrel sampler

11. Are you proposing a variation from the methods and/or procedures presented in the Requirements for construction of Vadose and Ground Water Monitoring Wells (dated May 1986)? If yes, specify these variations.
NO

12. What procedures will be used to insure no contamination will be introduced by the drilling equipment?
All augers and down hole tooling will be steam cleaned prior to each drilling event.

13. What methods will be used to clean the sampling equipment? Triple washing with TSP + $H_2O$, $H_2O$, and final rinsing with deionized $H_2O$.

14. What cleaning method will be used to clean casing and screen prior to installation?
Steam cleaning

Attention: Mr. Kevin Heaton

Subject: Excavation of Six Exploratory Soil Borings at Unocal Station No. 6415, 12401 Woodside Avenue, Lakeside, California, APN No. 394-122-07, USGS Coordinates: Section 13, T-15S, R-1W

In accordance with your requirements, we are providing the following information regarding the excavation of six exploratory soil borings (LB-1 through LB-6) at Unocal Station No. 6415 in Lakeside, California. An attempt to excavate a seventh boring (L-1) was abandoned due to the presence of product transmission lines, one of which was ruptured. A more detailed description of boring L-1 is included below. The borings were excavated at 0, 30 and 40 degrees from the vertical. Ground water was encountered at approximately 18 feet below grade at the site. Attached with this letter are a Site Plan, laboratory data, boring logs and copies of well permits.

While attempting to excavate boring LB-5, an inoperative, 2.5 inch fiberglass fuel line was ruptured approximately 3 feet below the surface of the ground. It is estimated that approximately 3 gallons of gasoline was discharged into the borehole. The gasoline was apparently residual, as the station was no longer in operation at the time. Upon determining that the line had been ruptured, the augers were removed, and approximately 1.5 gallons of product was removed from the borehole with a disposable bailer. The hole was then filled with cat-box litter, then overexcavated until stained or odorous soil was no longer observed. The fuel removed from the borehole was returned to an on site underground fuel tank and the soil excavated was containerized in a DOT approved, 55-gallon drum. The ends of the ruptured fuel line were plugged with hydrated bentonite. To evaluate the effectiveness of contamination removal, one soil sample ( L-1-4') was collected and analyzed for TFH and BTEX. The results of these analyses did not indicate TFH or BTEX above laboratory detection limits.

The site was re-visited on February 21, 1991 during the repairing of the fuel line. After removing the cat-box litter, the borehole was overexcavated to 5.5 feet below grade and re-sampled (ST-1-5.5'). This sample was analyzed for TFH and BTEX. The results of these analyses indicated levels of TFH and BTEX below laboratory detection limits (with the exception of 0.16 mg/kg Total Xylenes). Repair of the line has subsequently been completed.

On October 30, 1990, Analytical Technologies, Inc. received five soil samples for analysis. The samples were analyzed with EPA methodology or equivalent methods as specified in the attached analytical schedule. The symbol for "less than" indicates a value below the reportable detection limit. Please see the attached sheet for the sample cross reference.

The results of this analysis and the quality control data are enclosed.

On October 24 and 25, 1990 Analytical Technologies, Inc. Mobile Laboratory analyzed thirteen soil samples for the above-mentioned project. The samples were analyzed with EPA methodology or equivalent methods as specified in the attached analytical schedule. The samples were analyzed in the mobile laboratory, on the day, and at the site of collection.

The results of these analyses and the quality control data are enclosed.

ATI I.D. 010337

November 6, 1990

Leighton & Associates, Inc.
3934 Murphy Canyon Road, Suite #205B
San Diego, California 92123

Project Name: U-6415

Project No.: 4901433-01

Attention: Jean Hebert-Martin

On October 25, 1990, Analytical Technologies, Inc. received three soil samples for analyses. The samples were analyzed with EPA methodology or equivalent methods as specified in the attached analytical schedule. The symbol for "less than" indicates a value below the reportable detection limit. Please see the attached sheet for the sample cross reference.

The results of these analyses and the quality control data are enclosed.

Attention: Jean Hebert-Martin

On October 24 and 25, 1990 Analytical Technologies, Inc. Mobile Laboratory analyzed thirteen soil samples for the above-mentioned project. The samples were analyzed with EPA methodology or equivalent methods as specified in the attached analytical schedule. The samples were analyzed in the mobile laboratory, on the day, and at the site of collection.

The results of these analyses and the quality control data are enclosed.

BORING PERMIT #W94020

Rec'd 3/9/94 KMN

**Department of Public Works**

February 11, 1994

TO: Larry Horsman
Engineering Service (0340)

FROM: Fred Bast FEB
Materials Lab (090)

WOODSIDE AVENUE EXPLORATORY BORING; W.A. #UJ1104

The Woodside Avenue exploratory boring and lab testing has been completed. The purpose of the work was to determine if contaminated (petroleum hydrocarbons) soils are present at the site. The project site is located at the southwest corner of Woodside Avenue and Los Coches Road in Lakeside. Figure 1 shows the location of the boring.

One (1) boring was drilled on January 18, 1994 in accordance with the drilling permit (#W94020) issued by the County's Health Department. The boring cuttings were recovered and placed in barrels. The barrels are stored at the County's Operation Center at 5555 Overland Avenue, San Diego. The boring was backfilled with bentonite chips after the drilling and surface was sealed with asphalt concrete. The sampler and auger flights were cleaned after each use and the wash water was collected and stored.

Attachment "A" is the log of boring and shows the type of soils encountered, the depth of boring, sample location, groundwater, etc. The boring was drilled to 30 feet and samples taken at intervals of 1, 3, 5, 10, 15, 20, 25 and 30 feet.

The general soil profile of the boring was: 1 foot of pavement base material over, 2 feet of dark brown silty sand topsoil over, 1 foot of reddish brown clayey fine sand over, 17 feet of reddish brown silty fine sand with traces of small gravel (less than one-half inch) over 11 feet and greater of brown coarse to medium sand with some layers of silts. Saturated soils were encountered at depths below 21 feet and the water table rose to a depth of 15 feet after the drilling was completed.

There were indications of contamination in the soil sample recovered between the depths of 3 to 4.5 feet. The lower 3 inches of the sample was visually darkened with a strong odor similar to paint thinner.

Printed on recycled paper

The soil samples were put in glass jars, stored in an iced cooler and transported to Quality Assurance Laboratory (QAL) under the chain of custody procedures. All the samples (total of 8) were tested for Total Recoverable Petroleum Hydrocarbon (TRPH), by EPA 418.1. The top three soil samples have detectable levels of petroleum hydrocarbons 997 to 17,200 mg/kg. The five lower samples have no detectable levels.

Additional testing was done on the top three samples. The testing consisted of: Total Petroleum Hydrocarbon (TPH), EPA 8015 modified by CA 3550/DHS. The sample at 3 to 4.5 feet was tested for volatile organics and PCB, EPA 8240 and 8080, respectively. There are some volatile organics, but no PCB's.

QAL test results and the chain-of-custody forms are shown in Attachments "B" & "C".

Please forward this information with your comments to the Health Department.

If you have any questions, contact me at 694 (S50)-2842.

SITE ASSESSMENT AND MITIGATION DIVISION

April 30, 1996

Mr. Norman Lumpkin
Lakeside Union School District
P.O. Box 578
Lakeside, CA 92040

Dear Mr. Lumpkin:

UNAUTHORIZED RELEASE NO. H03112-001
12335 WOODSIDE AVENUE, LAKESIDE, CA

This letter confirms the completion of site investigation and remedial action for the underground storage tank formerly located at the above described location. Enclosed for your records is the Case Closure Summary for the referenced site.

Based upon the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721(e). If a change in land use is proposed, the owner must promptly notify this agency.

Please telephone Jim Schuck at (619) 338-2908 if you have any questions regarding this matter.

Sincerely,

CHUCK PRYATEL, Division Manager
Site Assessment and Mitigation Division

## Leaking Underground Fuel Storage Tank Program

### III. RELEASE AND SITE CHARACTERIZATION INFORMATION (Continued)

**MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS -- BEFORE AND AFTER CLEANUP**

| Contaminant | Soil(mg/kg) | | Water (mg/l) | | Contaminant | Soil (mg/kg) | | Water (mg/l) | |
|---|---|---|---|---|---|---|---|---|---|
| | Before | After | Before | After | | Before | After | Before | After |
| TPH (gasoline) | 2132 | 1723 | NA | <0.5 | Xylene | 280.48 | NA | NA | <0.0005 |
| | | | | | Ethylbenzene | 25.76 | NA | NA | <0.0005 |
| Benzene | 0.362 | NA | NA | <0.0005 | Total Lead | NA | NA | NA | 0.007 |
| Toluene | 19.015 | NA | NA | <0.0005 | | | | | |

Comments: Upon the removal (3-9-95) of one 1000 gallon gasoline tank, efforts commenced to remove a total of 66 tons of gasoline impacted soil (from the tank excavation and the fuel dispenser area) for offsite disposal management. According to Kleinfelder (environmental consultant), the extent of gasoline impacted soil and groundwater has been assessed in all directions. A small amount (approximately 35 cubic yards) of gasoline impacted soil (>50 mg/kg TPH) was left in-place due to its proximity to the retaining wall on the south side of the excavation. Kleinfelder has stated that this remaining soil probably is not a threat to either the local water quality or public health.

### IV. CLOSURE

| | | |
|---|---|---|
| Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes | | |
| Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes | | |
| Does corrective action protect public health for current land use? Yes | | |
| Site Management Requirements: none | | |
| Should corrective action be reviewed if land use changes? Yes | | |

## Heaton, Kevin

**From:** Heaton, Kevin
**Sent:** Thursday, October 08, 2015 10:53 AM
**To:** 'Amanda Santifer'
**Subject:** RE: Lakeside Texaco - H03147-002

Amanda,

I do not see a problem with the VES system being removed. With its removal make sure the piping from the VE wells to the system are properly capped off. As for the Air Sparge system and the off-site cut-off system we are not there yet.

Kevin

Kevin,
The VES system has been shutdown since 2010 and the client is inquiring about having the system removed from the site. Please advise if this is approved.

Thanks,

Amanda Santifer, C.A.C., CDPH

NA -- not analyzed NQ -- not quantified LPH -- liquid phase hydrocarbons

Comments: Upon the removal of five USTs (37 years old) in March 1989 the unauthorized release of petroleum hydrocarbons (gasoline and diesel) was identified at three onsite locations. Soil and groundwater investigations, both onsite and offsite, have delineated the extent of petroleum hydrocarbons. Liquid phase hydrocarbons (free product) were detected inside groundwater monitoring wells (MW-1 and MW-3) positioned near the former UST system. In June 1996, 1,634 cubic yards (2,287.4 tons) of petroleum hydrocarbon contaminated soil was excavated onsite at the source of the unauthorized release and transported offsite for management at a permitted soil treatment facility. An estimated 2,158 cubic yards of contaminated soil remain in the onsite and offsite (under street) subsurface soil with total petroleum hydrocarbon concentrations ranging up to 7,529 mg/kg. Groundwater contaminated by the subject unauthorized release extends an estimated 90 feet northwest of the site beneath Woodside Avenue. SECOR International Inc., the environmer consultant, has stated that the plume of dissolved benzene in groundwater is stable and will decrease with ti Furthermore, SECOR has stated that the remaining hydrocarbon-impacted soil and groundwater does not present a threat to public health and does not present a threat of degrading an existing or future viable water resource.

## IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes *
Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes *

* The Lakeside Water District has no plans to utilize the shallow groundwater in the vicinity of the subject site. The Water District's municipal well field is located an estimated 3500 feet north of the subject site. Note that DEH reviews applications and issues permits for individual domestic water wells.

Does corrective action protect public health for current land use? Yes

Site Management Requirements: Any contaminated soil, excavated as part of subsurface construction work, must be managed in accordance with all local, state and federal requirements.

Should corrective action be reviewed if land use changes? Yes

**VII. ADDITIONAL COMMENTS, DATA, ETC.**

1. The SWRCB, in a letter dated July 8, 1998, indicated DEH had the option of closure for this unauthorized release case.
2. The risk assessment performed by SECOR indicates 3.8 X 10-7 risk level to occupants of the existing onsite building in a refurbished condition. An expansion to the existing building or a new building(s) onsite may require a new human health risk assessment. Notify DEH of any plans to develop a new or expanded building(s) onsite.

This document and the related CASE CLOSURE LETTER, shall be retained by the lead agency as part of the official site file.

Lucy May Carender Trust Property
9774 Maine Street
Lakeside, California 92040
SAM Case No.: H03806
Well Permit No.: W97946

Dear Ms. Crystal:

On January 8, 1999, a SECOR International Incorporated (*SECOR*) geologist supervised the abandonment of five groundwater monitoring wells (MW-5, MW-9, MW-11, MW-12, and MW-13) located at the subject site (Figure 1). The wells were abandoned by over drilling the existing polyvinyl chloride (PVC) well casing and screen interval using a mobile drilling rig equipped with 10-inch diameter hollow stem augers, operated by West Hazmat Drilling Corporation. The well casing and screen interval from each well were removed, and the borehole was backfilled with bentonite grout using the tremmie method, and capped with concrete. Approximately six bags of bentonite grout and 1.2 bags of concrete were used to backfill each abandoned well. Two of the wells (MW-11 and MW-13) were located on Woodside Avenue and therefore required a hot asphaltic surface completion. Well construction details for the five abandoned wells are attached with this letter report, as is a copy of the approved well destruction permit.

Respectfully,

SECOR International Incorporated

Edward A. Kwasnica

MONITORING WELL AND BORING CONSTRUCTION AND DESTRUCTION PERMIT

SITE NAME: LUCY MAY CARENDER TRUST PROPERTY

SITE ADDRESS: 9774 MAINE AVENUE, LAKESIDE, CA 92040

PERMIT FOR: 5 MONITORING WELL DESTRUCTIONS

PERMIT APPROVAL DATE: December 22, 1998

PERMIT EXPIRES ON: APRIL 21, 1999

RECEIVED
JAN 04 1999
By

**PERMIT CONDITIONS:**

1. All borings must be destroyed in accordance with Department of Water Resources Bulletin 74-81 and 74-90.

2. All wash water must be contained and disposed of properly.

3. Submit complete laboratory data for both soil and groundwater with the well logs.

4. Submit all the information specified in the SAM Manual in:

   Section 6, Page B-8, C., 2.

5. All water and soil that is placed in drums must be labeled and stored as specified in the SAM Manual in:

   Section 1, Page 12, (5).

6. This office must be given 48 hour notice of any drilling activity on this site. Please contact Marisue Crystal at (619) 338-2339.

7. This office must be given advanced notification of drilling cancellation. Please contact Marisue Crystal at (619) 338-2339.

**NOTE:** **This permit does not constitute approval of a workplan as defined in Section 2722 of Article 11 of C.C.R., Title 23. Workplans are required for all unauthorized release investigations in San Diego County.**

## H. APPLICATION SUBMITTAL, PLAN APPROVAL, PERMIT ISSUANCE, AND REQUIRED INSPECTIONS

Submit one (1) original and two (2) copies of this application package, including plan drawings with the required fee to the Department of Environmental Health, Site Assessment and Mitigation Division (SAM). 1255 Imperial Avenue, San Diego, CA 92101. Or mail to P. O. Box 85261, San Diego, CA 92186-5261. **Checks should be made payable to the County of San Diego.**

A permit will be issued by SAM upon review and approval of the application and plans. The required fees must be submitted with the application package. Information in addition to that presented in the application package may be needed in order to obtain final approval. No work is to begin on the proposed project until a permit has been issued. The required inspections cannot be scheduled until a permit is issued.

Once the permit has been issued, it is the responsibility of the permittee to notify SAM at least two (2) working days in advance to schedule each required inspection.

**USE ONE APPLICATION PACKAGE FOR A SINGLE SITE PROJECT. A SINGLE PERMIT WILL BE ISSUED FOR A SINGLE SITE PROJECT, EVEN IF WELLS/BORINGS ARE COMPLETED ON MORE THAN ONE PROPERTY. FOR MULTIPLE SITE PROJECT'S, USE SEPARATE APPLICATIONS.**

PERMIT APPLICATION FOR
GROUND WATER AND VADOSE MONITORING WELLS
EXPLORATORY OR TEST BORINGS

- For well destruction, complete only #1 below.
- Well design, logging and construction must be supervised by a Geologist, Engineering Geologist or Civil Engineer who is registered or certified by the State of California.
- Provide verification of a Well Drilling C-57 License.
- Provide a plot plan giving location of property lines, existing improvements such as structures, underground tanks, underground utilities, underground piping, and the proposed monitoring and/or observation wells.
- Provide a signed copy of the Property Owner Responsibility form for each property listed in Section "F".

1. If wells are to be destroyed, provide a description of method of destruction. Wells will be destroyed by over-drilling the well casing with 10"-diam. hollow stem auger, removing the casing, and grouting the borehole using tremie-method.
2. What is the proposed purpose of the well/boring? _____

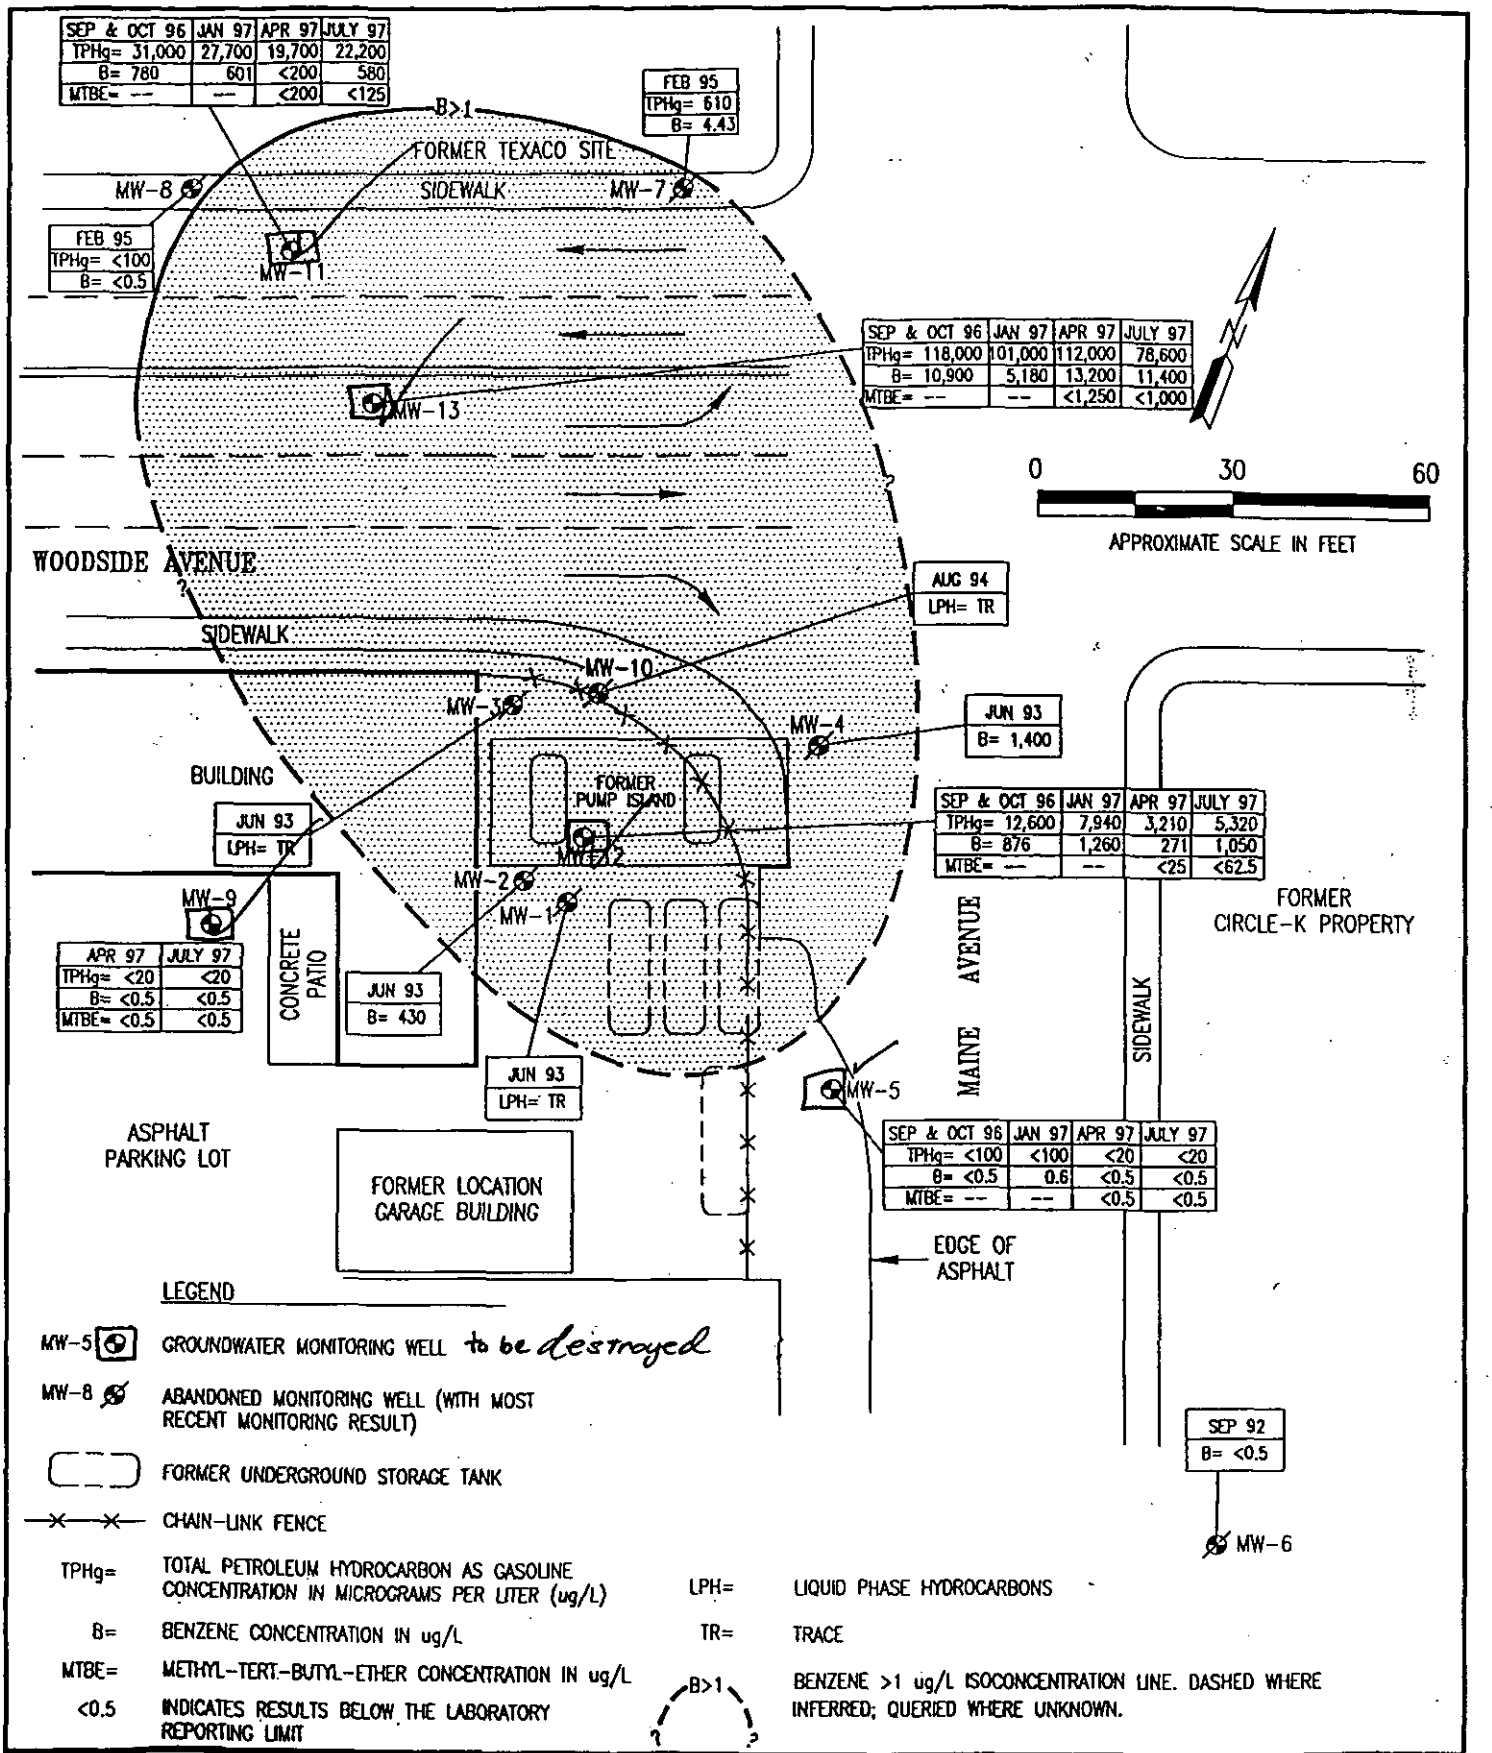
3. What procedures will be used to prevent the well/boring from providing an avenue to contamination during construction?

4. What field procedures will be utilized to determine if contamination exists? _____

5. What procedures will be used to determine whether samples will be sent for laboratory testing or archiving?

6. What constituents will be monitored and tested (Include EPA Laboratory Test Methods to be used)

7. How will samples be transported and preserved? _____



8. What sampling methods will be used? _____

9. Are you proposing a variation from the methods and/or procedures presented in the requirements for the construction of Vadose and Ground Water Monitoring Wells (Current SAM Manual Requirements). If yes, specify these variations.

10. What procedures will be used to ensure no contamination will be introduced by the drilling equipment?

11. What methods will be used to clean sampling equipment? _____

12. What cleaning method will be used to clean casing and screen prior to installation? _____

April 23, 2010

Mr. Chris Panaitescu
Thrifty Oil Company
13116 Imperial Highway
Santa Fe Springs, CA 90670-0138

Dear Mr. Panaitescu:

UNDERGROUND STORAGE TANK (UST) CASE # H05359-002
THRIFTY OIL COMPANY STATION #423
12109 WOODSIDE AVENUE, LAKESIDE, CALIFORNIA

This letter confirms the completion of a site investigation and corrective action for the underground storage tanks currently located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the current underground storage tanks is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code. Please contact Keith Kezer, at (619) 338-2908, if you have questions regarding this matter.

Sincerely,

JACK MILLER, Director

# Case Closure Summary
## Leaking Underground Fuel Storage Tank Program

**Comments:**

On May 30, 1995, following the removal of four gasoline single wall steel underground storage tanks (USTs) and associated piping, 16 soil samples were collected under the direction of the County of San Diego. Hydrocarbon-impacted soil was observed up to 16,662 milligrams per kilogram. As a result, DEH case H05359-002 was opened and corrective actions were implemented at the site, including the excavation and disposal of approximately 600 tons (400 cubic yards) of hydrocarbon-impacted soil.

Following UST removal activities and in accordance with County of San Diego direction, assessment and mitigation activities were implemented at the site, including the installation of multiple soil borings and groundwater monitoring wells. Assessment activities identified the existence of liquid-phase hydrocarbons (LPH) at the site with a maximum thickness of 2.97 feet. Hydrocarbon-impacted soil and groundwater, including LPH, primarily existed beneath the former USTs and dispensers and to a lesser degree extended offsite to the north and west.

Prior to implementation of full scale remediation activities, LPH mitigation was conducted via hand bailing, and periodic (approximately weekly) vacuum tanker extraction events from October 1996 through June 2001. In July 2001, a dual-phase extraction system began operation at the site and operated continuously until May 2003 when a pulsing schedule was implemented for the vapor portion of the system due to low influent vapor concentrations. The groundwater portion of the remediation system operated continuously until January 2007.

In May 2005, seven confirmation borings where installed and sampled at the site to evaluate the effectiveness of the remediation system. Three confirmation borings, located in the former UST excavation, identified total petroleum hydrocarbons as gasoline (TPHg) up to 520 milligrams per kilogram. The majority of the impacts were observed at five feet below grade, approximately 20 feet above typical groundwater depths. In order to address the aforementioned TPHg detections, two of the confirmation borings in the former UST excavation were converted to extraction wells and connected to the existing system in an effort to mitigate the remaining low level soil contamination. The vapor portion of the remediation system was restarted in July 2006 and operated until December 2006. Based on available data, it appears that the majority of the soil contamination has been removed from the site due to the aforementioned remediation activities and therefore no estimate of remaining hydrocarbon-impacted soil was provided or deemed necessary.

The consultant proposed utilizing natural attenuation to address the remaining low level dissolved-phase hydrocarbons. The last groundwater monitoring and sampling event at the site, conducted in November 2009, indicated that the primary constituents of concern (COC), benzene and methyl tertiary butyl ether (MTBE), existed at maximum concentrations of 3.8 and 643 micrograms per liter, respectively, which exceeded their respective primary maximum contaminant levels (MCLs) of 1 and 13 micrograms per liter. However, trend analysis conducted by the consultant estimates that benzene and MTBE will reach their MCLs by approximately May 2011 and June 2016, respectively. The consultant concluded that contaminants from this site are not commingled with H03147-002, located immediately adjacent to the north across Woodside Avenue, and that the data supports the existence of two distinctly separate dissolved-phase contaminant plumes. Based on available data, DEH concurs with this conclusion.

There is a municipal well field consisting of four wells located approximately 2,000 feet to the west-northwest of the site. The wells are not currently in use but upgrades to the wells and associated treatment systems are possible in future years should the need arise. MTBE impacts to this well field, which were discovered in August 1999, have been attributed to the unauthorized release at the site located to the north (H03147-002) of Thrifty Station #423. Based on all available data from both sites, the release at Thrifty Station #423 has not and will not result in impacts to the well field.

The consultant concluded that dissolved-phase COCs appear to be limited to the site boundaries and are stable and that existing environmental conditions are protective of human health and the environment. Based on available data, DEH concurs with the consultants conclusions.

## IV. CLOSURE

| | | |
|---|---|---|
| Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? NO – Contaminant concentrations are estimated by the consultant to reach primary MCL's by June 2016, approximately 6.5 years. | | |
| Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? NO – Contaminant concentrations are estimated by the consultant to reach primary MCL's by June 2016, approximately 6.5 years. | | |
| Does corrective action protect public health for current land use? Yes<br>Case oversight completed based upon the following site use: COMMERCIAL -- The site is currently a vehicle fueling station. | | |
| Site Management Requirements: None | | |
| Should corrective action be reviewed if land use changes? Yes | | |
| Monitoring Wells Decommissioned: No | Number Decommissioned: 2 | Number Retained: 15 |

Mr. Jerry Bogaczyk
SAR Project Manager
Chevron Products Company
P.O. Box 2292
Brea, CA 92822-2292

Dear Mr. Bogaczyk:

UNDERGROUND STORAGE TANK (UST) CASE #H05711-002
CHEVRON STATION #9-4273
12402 WOODSIDE AVENUE, SANTEE, CA

This letter confirms the completion of a site investigation and corrective action for the former and currently existing underground storage tanks at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning both the former and currently existing underground storage tanks is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at this underground storage tanks site is in compliance with the requirements of subdivisions (a) and (b) of Section 25299.37 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.77 of the Health and Safety Code. No further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (h) of Section 25299.37 of the Health and Safety Code. Please contact Scott Weldon at (619) 338-2539 if you have questions regarding this matter.

Sincerely,

CHRIS GONAVER, Chief
Land and Water Quality Division

### III. RELEASE AND SITE CHARACTERIZATION INFORMATION (CONTINUED) H05711-002

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS - BEFORE AND AFTER CLEANUP -- N/A MEANS NOT ANALYZED

| Contaminant | Soil (ppm) | | Water (ppm) | | Contaminant | Soil (ppm) | | Water (ppm) | |
|---|---|---|---|---|---|---|---|---|---|
| | Before | After | Before | After | | Before | After | Before | After |
| TPH (Gas) | 3570 | 3570 | 1.1 | < 0.5 | MTBE | 1.5 | 1.5 | 0.270 | < 0.001 |
| TPH (Diesel) | < 1.0 | < 1.0 | < 0.5 | < 0.5 | Ethylbenzene | .074 | .074 | .0017 | < 0.0005 |
| Benzene | 10.3 | 10.3 | 0.0009 | < 0.0005 | TRPH | 1600 | < 1.0 | N/A | N/A |
| Toluene | 15.6 | 15.6 | .0032 | < 0.0005 | Organic Lead | < 6.0 | < 6.0 | N/A | N/A |
| Xylene | 572 | 572 | .0064 | < 0.0005 | | | | | |

Comments: On January 7th, 1994, evidence of leaking petroleum fuel was found under product piping in one of the dispenser islands when the existing fuel tanks and associated piping were removed under permit. Gasoline concentrations in soil up to 3570 ppm were documented under the product piping at the south dispenser. Approximately 50 cubic yards of impacted soil from the former UST excavations were disposed of as hazardous waste.

On February 11th, 1994, four groundwater-monitoring wells were installed and sampled. All four wells were non-detect for TPHg and benzene. Five consecutive quarterly sampling events yielded non-detect results for TPHg and benzene in the four monitoring wells. On May 19th, 1995, a hydropunch boring was advanced to 18 feet by the south dispenser, at the location of highest contaminated soil levels. The groundwater sample from the hydropunch boring contained TPHg and benzene levels of 1,100 and 0.9 ug/l, respectively. The consultant, Delta Environmental, has calculated that approximately 100 cubic yards of contaminated soil remain at the site.

Five groundwater monitoring events were completed from April 1999 through May 2000. MTBE was found to be present in low concentrations in one of the four monitoring wells during the first three monitoring events. However, all petroleum hydrocarbon contaminants, including MTBE, were found to be below detection limits during the last two monitoring events.

### IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes

Does corrective action protect public health for current land use? Yes
Case oversight completed based upon the current/future site use as a gasoline station.

Site Management Requirements
Any contaminated soil excavated as part of subsurface construction work must be managed in accordance with the legal requirements at that time.

Should corrective action be reviewed if land use changes? Yes; If the site use changes, a risk assessment should be conducted, based upon the Site's proposed use.

| Monitoring Wells Decommissioned: No | Number Decommissioned: 0 | Number Retained: 4 |
|---|---|---|

List Enforcement Actions Taken: Notice of Corrective Action and Reimbursement Responsibility

List Enforcement Actions Rescinded: N/A

## IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes +

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes +

Does corrective action protect public health for current land use? Yes - Current land use a s shopping center will continue.

Are their other issues DEH needs to follow up on: No

Site Management Requirements: Suitable for commercial land use. Any contaminated soil, excavated as part of subsurface construction work, must be managed in accordance with the legal requirements at that time. Any subsurface dewatering or placement of production wells on site will require a separate evaluation

Should corrective action be reviewed if land use changes? Yes

## V. LOCAL AGENCY REPRESENTATIVE DATA

| | |
|---|---|
| Name: Chuck Pryatel | Title: Chief Site Assessment and Mitigation |
| Signature: | Date: 3-5-98 |
| Hydrogeologist Concurrence: RMH | Date: 3/2/98 |

## VI. RWQCB NOTIFICATION

| | |
|---|---|
| Date submitted to the RWQCB: Notified on 3-2-98 | |
| | |

## VII. ADDITIONAL COMMENTS, DATA, ETC.

A human health risk study showed that environmental contamination would generate an excess cancer risk to workers in the dry cleaner building of 5.09x10E-7. This is below the 10E-6 risk management level utilized by DEH.

A portion of the groundwater contamination may be attributed to "background" conditions; low levels of PCE and TCE are present in a well upgradient of the suspected release location.

+ Groundwater contamination in 2 wells slightly exceeds MCL's. RWQCB has been notified. The area of groundwater in excess of MCL's covers approximately 170 by 70 feet; it is centered below the dry cleaner building and contained on the property unit (shopping center). Two years of groundwater monitoring show stable to decreasing trend in contamination values and a stable plume position. Monitoring well #1 is north (downgradient) of the groundwater plume; contamination in this well has always been below MCL's.

The nearest municipal supply well (Lakeside Water District Vine Street #5) is approximately 0.5 miles northeast of site. Groundwater flow on the Permaclean site is to the north-northwest. Lakeside Water District has been notified in writing of the contamination at Permaclean. Lakeside Water District has provided a map of the groundwater basin from which they withdraw water; they are not concerned about groundwater contamination outside of that area. The Permaclean site lies 500 feet outside the Lakeside Water District supply basin.

Monitoring wells will be maintained.

This document and the related CASE CLOSURE LETTER, shall be retained by the lead agency as part of the official site file.

Dear Mr. Krighton:

VOLUNTARY ASSISTANCE PROGRAM CASE H13406-001
LAKESIDE VILLAGE CENTER
12328 - 12346 WOODSIDE AVENUE
SAN DIEGO, CA 92168

The site remediation information submitted to this agency by SECOR International Incorporated, summarizing the site characterization and mitigation activities at the above-referenced location, has been reviewed closure report entitled, "Limited Soil and Groundwater Assessment Activities." With the provision that the information provided to this agency was accurate and representative of existing conditions, it is the position of this office that **no further action is required at this time**.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or the Porter Cologne Water Quality Control Act. If previously unidentified contamination is discovered which may affect public health, safety and/or water quality, additional site assessment and cleanup may be necessary.

Changes in the proposed use of the above site may require reevaluation to determine if the change will pose a risk to public health.

Thank you for your efforts in resolving this matter. Please contact Darryl Fowler of the Site Assessment and Mitigation Program (SAM), at (619) 338-2371, if you require additional assistance.

Sincerely,

MICHAEL VERNETTI Program Manager
Supervising Environmental Health Specialist
Site Assessment and Mitigation Program

| | | | | | 2-Chlorotoluene | 11 | 11 | NT | NT |

Comments:
EBS Environmental Consultants performed a Phase I Assessment of the property in May 2001. Several areas of concerned were identified for further investigation. EBS performed a soils investigation by a soil vapor assessment. A total of six soil vapor samples were collected over the entire site. Five samples were collected in the area of the auto servicing and former dry cleaners and one sample was collected at Accurate Alignment and Brakes facility. All samples were collected at a depth of seven feet bgs with the exception of sample in the former dry cleaning area. That sample was collected at five feet bgs. All samples with the exception of two resulted in no detectable concentrations. The two vapor samples with detected values of PCE and 2- Chlorotoluene were found in the area of the Accurate Alignment and Brake facility. Even though the values were low, soil samples were collected from three test borings at 1, 3, and 5 feet bgs in this area.

Secor installed a soil boring, SP-1 to 25 feet bgs by Direct-Push rig. Soil samples were collected at 5 foot intervals. A temporary one-inch screened PVC casing was inserted into the borehole to collect a water sample. A non-purge groundwater sample was collected and analyzed. The sample analyses revealed insignificant concentrations of petroleum and VOC contaminants in the soil and groundwater.

## IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes

Dear Mr. and Mrs. Alpert:

UNDERGROUND STORAGE TANK (UST) CASE #H19134-001
DAVID & YAEL ALPERT'S SHOP
9806 MAINE AVENUE, LAKESIDE, CA 92040

This letter confirms the completion of a site investigation and corrective action for the underground storage tanks formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tanks is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tanks site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code, and that no further action related to the petroleum releases at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code. Please contact Nasser Sionit, at (858) 505-6795, if you have questions regarding this matter.

Sincerely,

JACK MILLER, Director

| Xylene | 270 " | 270 " |
| MTBE | 2 " | 2 " |
| TBA | 43 " | 43 " |

Comments: The site is an auto repair facility and sales lot. Nine (9) USTs containing gasoline, diesel and waste oil were removed from the site in 1993 and 1994. Soil samples collected from beneath the USTs showed minor concentrations of gasoline and diesel in three locations within the tank pit areas. Nine soil borings were drilled to a depth of 35 feet below grade and later were converted to monitoring wells. No soil impacts were detected, except low concentrations in MW-6 at 35 feet below grade. The results of the assessment showed that the extent of TPH in soil and in the groundwater was limited to MW-6 which is located up-gradient of former UST field area near the driveway from Woodside Avenue. The consultants conclude that the site contains 30.5 to 54.5 cubic yards of residual TPH-contaminated soil and are not contributing to impacts to groundwater and are not a threat to public health and the environment. Furthermore, based on the consultant's review of records of two up-gradient release sites, they conclude that the minor TPH concentrations in MW-6 are due to offsite and up-gradient sources (e.g. Lucy May property, release # H03806-001, located at 9774 Maine Avenue) that have been granted closure. SAM has learned that the Lakeside Water District has no plans to utilize the shallow groundwater in the vicinity of the subject site. Based on these findings the consultants recommend closure of the site, and DEH concurs with this recommendation.

## IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? Yes

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? Yes

Does corrective action protect public health for current land use? Yes

Case oversight completed based upon the following site use: Auto repair and sales lot

Site Management Requirements:
Any Contaminated Soil Excavated As Part Of Subsurface Construction Work Must Be Managed In Accordance With The Legal Requirements At That Time.

Should corrective action be reviewed if land use changes? Yes

| Monitoring Wells Decommissioned: None* | Number Decommissioned: 0* | Number Retained: 9* |
|---|---|---|

List Actions Taken: Notice Of Reimbursement/Local

List Enforcement Actions Rescinded: NONE

- Application to remove all monitoring wells has been submitted and permit #T107915 has been issued .

Mr. Marvin Katz
Shell Oil Products US
20945 S. Wilmington Avenue
Carson, CA 90810

Dear Mr. Katz:

UNAUTHORIZED RELEASE #H19562-001
SHELL SERVICE STATION
12087 WOODSIDE AVENUE, LAKESIDE, CALIFORNIA

This letter confirms the completion of a site investigation and corrective action for the underground storage tank system formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank system is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your former underground storage tank site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code. Please contact Jon Senaha, at (619) 338-2195, if you have questions regarding this matter.

Sincerely,

GARY W. ERBECK, Director

| **WATER** | | |
| ETHANOL | < 200 ug/l | < 150 ug/l |
| Gasoline | = 470 ug/l | < 50 ug/l |
| Diesel | < 1000 ug/l | < 470 ug/l |
| Benzene | = 29 ug/l | < 0.5 ug/l |
| Toluene | = 63 ug/l | = 1.9 ug/l |
| Ethyl benzene | = 15 ug/l | = 0.51 ug/l |
| Xylene (individual isomers or total) | = 100 ug/l | = 3.4 ug/l |
| Methyl-tert-butyl ether (MTBE) | = 420 ug/l | = 130 ug/l |
| tert-Butyl Alcohol (TBA) | = 61 ug/l | = 39 ug/l |
| tert-Amyl-methyl ether (TAME) | < 4 ug/l | < 1 ug/l |
| Ethyl-tert-butyl ether (ETBE) | < 4 ug/l | < 1 ug/l |
| di-isopropyl ether (DIPE) | = 25 ug/l | = 1.7 ug/l |

In March 2000, three monitoring wells were installed at the site by Shell at the request of DEH. The purpose of the wells was to investigate MTBE impacts to the Riverview public supply wells.

In May 2003, Shell submitted a groundwater report illustrating elevated concentrations of MTBE for five consecutive quarters; hence, a case was opened. Since then, the groundwater has been monitored and sampled 20 additional quarters for a total of 25 sampling events. Wells MW-2 and MW-3 have reported all analytes to be below MCLs for the past nine sampling events. Elevated concentrations of MTBE have only been reported in well MW-1. MW-1 is located cross-gradient of the UST system. Based on the nearby ARCO Station (Formerly Thrifty) being located upgradient of the Shell Station and a review of historic groundwater data from the ARCO station (Formerly Thrifty), the elevated dissolved-phase MTBE in Shell's MW-1 is a result of the ARCO Station (Formerly Thrifty) release.

In April 2006, as part of Shell divestment activities, five USTs, product piping, and dispensers were removed from the site. A total of 13 soil samples were collected under the direction of the DEH inspector. Elevated concentrations of TPH were reported in one soil sample collected beneath a dispenser. All other soil samples were reported either non-detect or slightly above laboratory detection limits. Overexcavation was conducted in the dispenser area where TPH was detected. The laboratory reported that all four confirmation samples were either non-detect or slightly above laboratory detection limits for all analytes analyzed. During the UST removal activities and overexcavation activities, approximately 168 cubic yards of impacted-soil was removed and transported to TPS Technologies.

Dear Chief Strange:

UNDERGROUND STORAGE TANK (UST) CASE: H20224-001
LAKESIDE FIRE DEPARTMENT
14008 HIGHWAY 8, BUSINESS ROUTE, LAKESIDE, CA 92040

This letter confirms the completion of site investigation and remedial action for the underground storage tank formerly located at the above described location. Enclosed is the Case Closure Summary for the referenced site for your records.

Based upon the available information, including the current land use, and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Title 23, California Code of Regulations, Division 3, Chapter 16, Section 2721(e). If a change in land use is proposed, the owner must promptly notify this agency.

Please telephone Mark Fitzmaurice at (619)338-2456 if you have any questions regarding this matter.

Sincerely,

CHUCK PRYATEL, Division Manager
Site Assessment and Mitigation Division

Comments: After the removal of the underground storage tanks, petroleum contaminated soil was removed from the tank pit to a depth of 12 feet below grade. A soil sample collected from the bottom of the excavation contained 61 ppm TPH (diesel). The excavated soil was later back filled into the pit.

A groundwater monitoring well was then installed through the center of the former tank excavation, and two rounds of water sampling were conducted.

Santa Ana, CA 92799-5376

Dear Mr. Fischman:

UNDERGROUND STORAGE TANK (UST) CASE
FORMER CIRCLE K STORE NO. 2983
9775 MAINE AVENUE, LAKESIDE, CA 92040, DEH FILE# H20535-001

This letter confirms the completion of a site investigation and remedial action for the underground storage tank system formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank system is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, no further action related to the underground storage tank release is required.

This notice is issued pursuant to a regulation contained in Section 2721(e) of Title 23 of the California Code of Regulations.

Please contact Mo. Lahsaie at (619) 338-2256 if you have questions regarding this matter.

Sincerely,

CHRIS GONAVER, Chief
Land and Water Quality Division

| Free Product | | | |
| Soil | 420 cubic yards | Disposal at Candelaria Facility, Anza, CA | 2/7/1996 |
| Groundwater | | | |
| Barrels | | | |

# Case Closure Summary
## Leaking Underground Fuel Storage Tank Program

### III. RELEASE AND SITE CHARACTERIZATION INFORMATION (Continued) H20535-001

MAXIMUM DOCUMENTED CONTAMINANT CONCENTRATIONS - - BEFORE AND AFTER CLEANUP

| Contaminant | Soil (ppm) | | Water (ppm) | | Contaminant | Soil (ppm) | | Water (ppm) | |
|---|---|---|---|---|---|---|---|---|---|
| | Before | After | Before | After | | Before | After | Before | After |
| TPH (Gas) | 11,130 | <10.0 | 34 | 6.5 | MTBE | ------- | ------- | 0.770 | 0.068 |
| TPH (Diesel) | ------- | ------- | ------- | ------- | Ethylbenzene | 119 | <0.050 | 1.2 | 0.480 |
| Benzene | 6.20 | <0.050 | 1.5 | 0.072 | Oil & Grease | ----- | ----- | ------ | ------ |
| Toluene | 178 | <0.050 | 1.1 | 0.011 | Heavy Metals | ----- | ------ | ------ | ----- |
| Xylene | 1074 | <0.050 | 4.7 | 0.630 | Organic Lead | <1.0 | <1.0 | ------ | ----- |

Comments: Approximately 420 cubic yards of impacted soil was excavated and disposed at a permitted facility. Groundwater was monitored from September 1994 to February 1999. Based on available information, no groundwater uses or production wells are utilized in the vicinity of the site. SECOR, the consultants, have reported that all the utilities are 2 to 4 feet below the ground surface on the site. Groundwater is approximately 23 feet below the ground surface. SECOR has concluded that this residual groundwater contamination will not cause a vapor migration problem. Based on available data, maximum groundwater benzene concentration remaining in place is above the Maximum Contaminant Level (MCL). However, groundwater benzene plume is stable and remains on site. Based on the reported information there is no apparent threat to public health or the environment at this site.

### IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? No *

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? No *

Does corrective action protect public health for current land use? Yes
Case oversight completed based upon the current/future site use as retail commercial buildings

Site Management Requirements:

Any contaminated soil excavated as part of subsurface construction work must be managed in accordance with the legal requirements at that time.

Should corrective action be reviewed if land use changes? Yes

| Monitoring Wells Decommissioned: No | Number Decommissioned: N/A | Number Retained: 7 |
|---|---|---|

List Enforcement Actions Taken: Notice of Corrective Action and Reimbursement Responsibility

List Enforcement Actions Rescinded: N/A

### V. LOCAL AGENCY REPRESENTATIVE DATA

| | |
|---|---|
| Name: Kevin Heaton | Title: Senior Hydrogeologist<br>Land and Water Quality Division |
| Signature: K M. H | Date: 9/27/99 |

### VI. RWQCB NOTIFICATION

| | | |
|---|---|---|
| Date Submitted to RB: 9/7/99 | RB Response: No further Action was concurred | |
| RWQCB Staff Name: Susan Pease | Title: Environmental specialist III | Date: 9/23/99 |

### VII. ADDITIONAL COMMENTS, DATA, ETC.

* Even though the benzene concentration is in excess of the RWQCB Basin Plan Standards, available data has demonstrated that it is limited in extent and is stable. The TOSCO Marketing Company is planning to destroy the seven existing groundwater monitoring wells within one quarter of the date of a no further action letter for this case.

Dear Mr. Hunter

UNDERGROUND STORAGE TANK (UST) CASE H35322-002
FORMER WOODSIDE MOTORS
11719 WOODSIDE AVE., LAKESIDE, CA 92040

This letter confirms the completion of a site investigation and corrective action for the underground storage tank formerly located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the former underground storage tank is greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground storage tank site is in compliance with the requirements of subdivisions (a) and (b) of Section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to Section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release at the site is required.

This notice is issued pursuant to subdivision (g) of Section 25296.10 of the Health and Safety Code. Please contact Ewan Moffat at (619) 338-2212 if you have questions regarding this matter.

Sincerely,

for GARY W. ERBECK, Director

| Methyl-tert-butyl ether (MTBE) | < 1 ug/l | < 1 ug/l |
| tert-Butyl Alcohol (TBA) | < 10 ug/l | < 10 ug/l |

Comments:

During the removal of the 750 gal. tank samples revealed elevated levels of TPH. A post tank removal workplan was submitted for the removal of up to 75 cubic yards of soil; however, a total of 268 cubic yards of soil was removed. Four monitoring wells were installed and two groundwater sampling events revealed that there was no evidence of groundwater contamination from this tank.

The consultant estimates that one cubic yard of contaminated soil over 100 ppm TPH remains on site and thus there are no impacts to human health or groundwater.

Other than excavation, no other form of cleanup has occurred on site.

### IV. CLOSURE

Does completed corrective action protect existing beneficial uses per the Regional Board Basin Plan? YES

Does completed corrective action protect potential beneficial uses per the Regional Board Basin Plan? YES

Does corrective action protect public health for current land use? YES

Case oversight completed based upon the following site use: RESIDENTIAL

Alpine, CA 91901

Dear Mr. Hunter:

VOLUNTARY ASSISTANCE PROGRAM, FILE H35322-003
FORMER WOODSIDE MOTORS
11719 WOODSIDE AVE., LAKESIDE, CA 92040

The Department of Environmental Health (DEH), Site Assessment and Mitigation Program (SAM), reviewed the environmental investigation reports related to the above-referenced property, prepared by ERM. The reports summarize the site investigation and mitigation activities performed at the above-referenced location. Provided that the information presented to DEH/SAM was complete, accurate, and representative of existing site conditions, **this agency concurs that the cleanup goals established for the subject site have been met.**

Please be advised that this letter does not relieve the responsible party of any liability under the California Health and Safety Code or the Porter Cologne Water Quality Control Act.

Changes in the present use of the above site as residential use may require reevaluation to determine if the change will pose a risk to public health.

Thank you for selecting the Department of Environmental Health as your lead agency to assist you with the progress of your environmental project. Please contact Ewan Moffat of the Site Assessment and Mitigation Program, at (619) 338-2212, if you require additional assistance.

Sincerely,

GEORGE McCANDLESS, Program Manager

Comments:

This case was opened to evaluate the adequate disposal of stained soil, paint containers and oil filters that were found buried on a small portion of this site.

Composite samples indicated impact to portions of the excavated material by gasoline and arsenic. Confirmation samples indicated adequate removal of the hydrocarbons; however no confirmation samples were initially taken for arsenic. A final confirmation boring indicated levels of arsenic below that of background levels.

All impacted soils were excavated and disposed offsite. Other than excavation, no other means of cleanup occurred.

VOLUNTARY ASSISTANCE PROGRAM CASE H38416-001
WINTER GARDENS REDEVELOPMENT (PROPOSED RITE AID STORE)
9808-9810 WINTER GARDENS BLVD., LAKESIDE, CA

The site remediation information submitted to this agency by your consultants, Gradient Engineers, summarizing the site characterization and mitigation activities at the above-referenced location, has been reviewed following guidance from the Regional Water Quality Control Board. With the provision that the information provided to this agency was accurate and representative of existing conditions, it is the position of this office that **no further action is required at this time.**

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or the Porter Cologne Water Quality Control Act. If previously unidentified contamination is discovered which may affect public health, safety and/or water quality, additional site assessment and cleanup may be necessary.

Changes in the proposed use of the above site may require reevaluation to determine if the change will pose a risk to public health.

Thank you for your efforts in resolving this matter. Please contact Donn Li Pera of the Site Assessment and Mitigation Program (SAM), at (619) 338-2244, if you require additional assistance.

Sincerely,

CHRIS GONAVER, Chief
Land and Water Quality Division

Comments:
The property for which the Rite Aid Store is proposed was evaluated for the potential of benzene vapors entering the proposed structure from groundwater. The evaluation performed by Gradient Engineers included: historical review of site uses on and adjacent to the property, a soil gas survey and a vapor risk assessment. The work done by Gradient did not include soil or groundwater sampling.

Gradient Engineers conclude that the most likely source of benzene contamination in groundwater beneath the proposed Rite Aid Store is from the Texaco station located directly east across Winter Gardens Blvd. The Texaco station is case #H03147-002 and is located at 12106 Woodside Ave. in Lakeside. There is soil and groundwater contamination associated with the Texaco release and free product along the western part of the site. The Texaco site appears to be the most significant source of fuel vapors that would affect the proposed Rite Aid Store. A Corrective Action Plan(CAP) is currently under public review. All necessary assessment and cleanup of their release will be conducted prior to site closure.

A soil gas survey was conducted on the proposed Rite Aid site using vapor probes placed at depths of 3 and 10 feet below grade. The results were used to calculate potential benzene vapor concentrations that could enter the proposed building. Based on this evaluation the increased risk of cancer to the building occupants is 1.18 x 10-7 which is less than the acceptable 1 x 10-6 (one in one million) risk. There does not appear to be risk to public health of the proposed building from the current Texaco release.

**IV. CLOSURE**

**FINDINGS AND DETERMINATION OF ELIGIBILITY**

LAKESIDE UNION SCHOOL DISTRICT
LAKESIDE, CALIFORNIA
**SITE NO. J09CA738900**

## FINDINGS OF FACT

1. The stucco building located on the northeast corner of Woodside and Channel Road in Lakeside is owned by the Lakeside Union School District (District). The building was occupied by an Army station of a unit from San Luis Obispo during World War II and used as a warehouse in the 1950's until recently by the District to store school supplies. The warehouse was built in 1912 to house the Lakeside Second School. The District has owned the property at least since that time. There is no information regarding site acquisition by the Navy during World War II.
2. The warehouse was a World War II Army site. Although no definitive information regarding the site's use was found, a reference to the site in a book called San Diego's Military Sites by James W. Hinds indicates that the warehouse was occupied by the Army during the war and that they had tents outside the warehouse. According to Marcella Williams, daughter of Mrs. E.H. Carender, who provided housing for some officers during the war, the warehouse, as it currently stands, represents the original building. She also confirmed the presence of tents behind the building but could not remember if the Army used the warehouse for anything other than perhaps office spaces.
3. The site was used by the Army during the World War II period. The Army is credited with service in Lakeside until May 1942, but there is no specific documentation regarding the year that the site was returned to the District. According to the property maintenance manager, the District started using the building as a warehouse in the 1950's.

## DETERMINATION

Based on the foregoing Findings of Fact, this site has been determined to be formerly used by the Department of Defense. It is therefore eligible for the Defense Environmental Restoration Program - Formerly Used Defense Sites, established under 10 USC 2701 et seq.

DATE

PETER T. MADSEN
Colonel (P), U.S. Army
Commanding

**SITE SURVEY SUMMARY SHEET**
**FOR**
**DERP-FUDS SITE NO. J09CA738900**
**LAKESIDE UNION SCHOOL DISTRICT, LAKESIDE CALIFORNIA**
**July 8, 1999**

**SITE NAME:** LAKESIDE UNION SCHOOL DISTRICT, LAKESIDE

**LOCATION:** The warehouse owned by the Lakeside Union School District and used by the Army during the World War II is located in Lakeside, California, near the San Vicente Freeway on the north and Lindo Lake County Park on the east. Specifically, it is located in a moderate urbanized area with no Section number, in T.15 S., R.1 E., San Bernardino Baseline and Meridian. The site occupies the northeast corner of the intersection of Woodside Avenue and Channel Road. Use the Woodside Ave exit from the 67 Freeway north or south and proceed east until the intersection of Woodside and Channel Road. The Lakeside Union School District building is at 12335 Woodside Avenue. The warehouse is the stucco building located just southeast of the District building on Channel Road.

**SITE HISTORY:** The Army used the stucco building during the World War II. The unit which stationed there was previously from San Luis Obispo. No information was found regarding specific activities performed by the Army at the site other than that they had tents outside the building structure. According to one source, the building was perhaps used as office spaces for the officers. The building, which was used also as a warehouse by the Lakeside Union School District (District) until recently to store school supplies, was built in 1912 to house the Lakeside Second School. In 1995 the District was planning to replace the warehouse with a new building but they were asked by the local Historical Society to keep the warehouse. The interest in maintaining the original building is associated with the former Lakeside Second School and not with the Army’s presence on site.

The area adjacent to the warehouse (parking area) was formerly used as the District Transportation Facility. Operations associated with engine stem cleaning and refueling were performed there until 1995 when all related activities were discontinued and moved to a new location at Marilla Drive. The San Diego Regional Water Quality Control Board (RWQCB) maintains a small file associated with permits to discharge storm water which include a Notice of Termination granted in 1996 when the facility was officially relocated to Marilla Drive.

The area where the transportation facility operated was investigated under the County of San Diego Department of Environmental Health (DEH) lead in association with one of

several inspection violations and the removal of one 1,000-gallon gasoline UST. One violation involved containment loss from (oil/water) a hydraulic hoist sump located at the transportation facility. During an inspection in 1988, the total volume expected to be in the sump could not be accounted for and a release was reported to DEH. A preliminary investigation was performed in the same year to assess the missing liquid. Based on the site characterization and mitigation activities associated with the release, case closure was granted by DEH in a No Further Action (NFA) letter dated January 15, 1990. With respect to the UST and according to an environmental investigation report maintained in the file at DEH, the District has no documentation of the UST installation but believes that the tank was installed in the 1960's. The tank was used until 1988 and was temporarily closed from 1988 to 1995 when it was removed. In accordance with the file materials reviewed, the site has been fully assessed and mitigated. Case closure was granted by DEH under the Leaking Underground Storage Tank (LUST) Program, which is documented in a case closure summary letter dated April 30, 1996.

**SITE VISIT:** The site was visited on May 20, 1999 by Adrianne Saboya and Eric French of Forsgren Associates/Brown and Caldwell JV. The primary site contacts were Norman Lumpkin, Property Maintenance Manager for the District; Marcella Williams of the Lakeside Historical Society; Chris De La Cruz of the San Diego County Department of Health; and Wendy Maas of the San Diego Regional Water Quality Control Board.

**CATEGORY OF HAZARD:** HTRW(NOFA), CON/HTRW(NOFA), PRP/HTRW (NOFA).

**PROJECT DESCRIPTION:**

a. HTRW(NOFA). The District Transportation Facility, which was formerly in operation in the area adjacent to the site (stucco building), has been associated with several inspection violations. Reportedly, a preliminary site assessment was conducted in 1988 and site closure was granted in 1990. Since a site investigation has been initiated and completed by the District, no further action is recommended at this time.

b. CON/HTRW (NOFA). The District owned and operated a 1,000-gallon gasoline UST at the former Transportation Facility located in the area adjacent to the site (stucco building). The UST provided gasoline storage for vehicles used as part of operations at the facility. After the tank removal in 1995, the site was assessed and mitigated and site closure was granted in 1996. Since a site investigation has been initiated and completed by

the District, no further action is recommended at this time.

c. PRP/HTRW (NOFA). Several other businesses within 0.5 mile radial distance of the site have been identified to have hazardous waste material related investigations. Because investigations at site J09CA738900 have been initiated and completed by the District, no further action is recommended at this time.

**AVAILABLE STUDIES AND REPORTS:** Records directly associated with the warehouse owned by the Lakeside Union School District are maintained by the San Diego Historical Society and are limited to a single paragraph extracted from a book called San Diego's Military Sites by James W. Hinds. The County of San Diego Department of Environmental Health maintains a file for the site which include Work Plans and Site Assessment Reports containing site drawings and investigation results. The San Diego Regional Water Quality Control Board maintains a relatively small file containing storm water permits related information including drawings and Notice of Termination. The County of San Diego Assessor's Office maintains parcel maps of the site area. Several other sources were reviewed regarding information for the site including the National Archives Records Administration in Laguna Niguel and San Bruno, the Cadastral Section of Southwest Division, Naval Facilities Engineering Command, and Port Hueneme (NAVFAC). No records related to the site were found through these sources.

**DISTRICT POC:** Jeffrey Armentrout, Los Angeles District, (213) 452-3720

DATE: January 30, 2020

FORMER LAKESIDE TEXACO
GROUNDWATER MONITORING AND PROGRESS REPORT

| | |
|---|---|
| Project Name: | Former Lakeside Texaco (Site; Figure 1) |
| Address: | 12106 Woodside Avenue, Lakeside, CA |
| Consulting Co. /Contact Person/Phone: | EnviroApplications Inc. /Mr. Peter Rubens / (619) 291-3636 |
| *EAI* Project No.: | 3601.LKTEX03.18 |
| Primary Agency: | San Diego Regional Water Quality Control Board (RWQCB), Formerly San Diego County Land & Water Quality Division (LWQD) |
| Agency Contact: | Ms. Lalitha Thotakura |
| Regulatory ID No.: | Unauthorized Release #H03147-002<br>SDRWQCB Case #9UT3893 |

WORK PERFORMED THIS REPORTING PERIOD:

- Conducted groundwater monitoring and sampling activities for well MW-9 on March 27, 2018, including depth to water measurements on wells MW-2, MW-4, MW-5, MW-6, MW-9, MW-12 and MW-13;
- Conducted shallow soil sampling on February 5, 2019 (to address potential direct contact and outdoor air exposure; *EAI*, 2019);
- Conducted groundwater monitoring and sampling activities for well MW-9 on March 21, 2019, including depth to water measurements on wells MW-2, MW-4, MW-5, MW-6, MW-9, MW-12 and MW-13;
- On July 15, 2019, *EAI* submitted to the RWQCB a request to cancel the Industrial Wastewater Discharge Permit, followed by a request to the City of San Diego, Public Utilities Department (August 8, 2019), to terminate the permit;
- Conducted groundwater monitoring and sampling activities for wells MW-2, MW-4, MW-5, MW-6, MW-9, MW-12, MW-13, EX-5, EX-6 and EX-7 on July 22 and 23, 2019 (Figure 2);
- Contacted the Lakeside Water District (September 11, 2019) to obtain updates on re-operation of the nearby production wells; and,
- Initiated decommissioning of the two remedial systems onsite and offsite (across Winter Garden Boulevard to the west).

WORK PROPOSED FOR NEXT REPORTING PERIOD:

- As per the email received from the RWQCB on September 17, 2019, groundwater monitoring of all the wells will be conducted on an annual basis; and,
- Provide available updates to the RWQCB regarding Lakeside Water District use of production wells.

**Discussion:** Monitoring wells MW-1, MW-3, MW-7, MW-15 and MW-16 and groundwater extraction wells EX-1 through EX-4 (Figure 2) were destroyed as approved by the RWQCB in January 2018 (*EAI*, March 2018).

This report covers three groundwater monitoring events; March 2018, March 2019 and July 2019. The events in March 2018 and March 2019, include purging and sampling of well MW-9. The July 2019 event, in addition to MW-9, includes purging and sampling of wells MW-2, MW-4, MW-6, MW-12, MW-13, EX-5 and EX-6. With the exception of well MW-9, the last time the above wells were purged and sampled was in December 2017 (*EAI*, April 2018).

**Groundwater Monitoring Event – March 2018:** On March 27th, *EAI* personnel conducted groundwater gauging of seven monitoring wells (MW-2, MW-4 through MW-6, MW-9, MW-12 and MW-13). Static depth-to-water (DTW) in the monitoring wells ranged from 26.32 feet below ground surface (bgs) in MW-12 to 31.21 feet bgs in MW-4. Based on the groundwater depths measured, the approximate groundwater flow direction was calculated to the north-northwest with a hydraulic gradient of 0.023 ft. /ft. (Figure 3a). The water sample from MW-9 (collected on March 28th) was analyzed for total petroleum hydrocarbons as gasoline (TPHg), by EPA Method 8015; benzene, toluene, ethylbenzene, total xylenes (BTEX), and for fuel oxygenates, including methyl tert-butyl ether (MTBE), di-isopropyl ether (DIPE), ethyl tert-butyl ether (ETBE), tert-amyl methyl ether (TAME), and tert-butyl alcohol (TBA) by EPA Method 8260B. The groundwater samples were collected in accordance with the attached sampling procedures.

MTBE was detected in MW-9 at a reported concentration of 340 micrograms per liter (µg/l). No TPHg or other volatile organic compound (VOC) was reported above their respective laboratory reporting limits (LRLs).

**Groundwater Monitoring Event – March 2019:** On March 21st, *EAI* personnel conducted groundwater gauging of seven monitoring wells (MW-2, MW-4 through MW-6, MW-9, MW-12 and MW-13). On March 26th, well MW-9 (same as March 2018 event) was the only well scheduled for purging and sampling.

DTW in the monitoring wells ranged from 24.90 feet bgs in MW-12 to 28.56 feet bgs in MW-4. Based on the groundwater depths measured, the approximate groundwater flow direction was calculated to the north-northwest with a hydraulic gradient of 0.014 ft. /ft. (Figure 3b). The water sample collected from MW-9 (as per the attached sampling procedures) was analyzed for TPHg, by EPA Method 8015; BTEX, and for fuel oxygenates, MTBE, DIPE, ETBE, TAME, and TBA by EPA Method 8260B.

MTBE was detected in MW-9 at a reported concentration of 4.8 µg/l. As with the March 2018 event, no TPHg or other VOC was reported above their respective LRLs.

**Groundwater Monitoring Event – July 2019:** On July 22nd and 23rd, *EAI* personnel conducted groundwater monitoring activities at the site. Seven monitoring wells were gauged (MW-2, MW-4 through MW-6, MW-9, MW-12, and MW-13), and six wells were purged and sampled (MW-2, MW-4, MW-6, MW-9, MW-12, and MW-13). Groundwater samples were also collected from extraction wells EX-5 and EX-6. The groundwater samples were collected in accordance with the attached sampling procedures except EX-5 and EX-7, which are connected to the extraction system. The samples from these wells were collected (via a sampling port) after purging water from the wells through the groundwater extraction system. Wells MW-5 and EX-7 were not sampled due to an insufficient water column.

DTW measurements in the monitoring wells ranged from 25.55 feet bgs in well MW-12 to 29.54 feet bgs in well MW-4. Table 1 provides a summary of DTW and groundwater elevation data. Based on the groundwater depths measured, the approximate groundwater flow direction appears to be to the north-northwest with a hydraulic gradient of 0.016 ft. /ft. (Figure 3c).

Groundwater samples were collected in accordance with the attached sampling procedures, except EX-5 and EX-6 which are extraction wells connected to the treatment system. Samples from EX-5 and EX-6 were collected after purging approximately 50 gallons of groundwater from each well through the extraction system.

The laboratory analysis assigned for the July 2019 event were the same as the events in March 2018 and 2019. Water samples collected from MW-2, MW-4, MW-6, MW-9, MW-12, MW-13 and EX-6 were laboratory analyzed after the recommended holding time (14 days after collection; except for TPHg). The scheduling boxes on the chain-of-custody for the corresponding compounds were inadvertently not marked and therefore the analysis were not performed within the usual holding time.

TPHg was only detected above the LRL in well MW-4 with a concentration of 8,000 µg/L. MTBE was detected above the LRL in wells MW-6, MW-9, MW-13 and EX-6 at concentrations of 1.6 µg/L, 1.9 µg/L, 3.8 µg/L and 5.9 µg/L respectively. TBA was reported in MW-4 with a concentration of 180 µg/L. The remaining wells were reported with TBA concentrations below the LRLs.

Analytical results for TPHg, benzene, MTBE, and TBA for all three events are presented on Figures 4a, 4b and 4c, respectively. Isoconcentration Maps for TPHg, MTBE and TBA are presented on Figures 5, 6 and 7, respectively. All analytical results are presented in Tables 2 and 3.

**Riverview Well Field**: On September 5th, *EAI* received an email from the RWQCB inquiring about the operational status of nearby production wells (Riverview Well Field) known to historically been impacted with MTBE. The Lakeside Water District has an agreement with the City of San Diego which allows the City to operate and manage the well field. The City, at one time, operated a groundwater remedial system (activated carbon vessels) to treat the presence of MTBE in the wells. *EAI* understands the only impediment to close the subject site unauthorized release case is the presence of MTBE in the production wells.

On September 11th, *EAI* contacted staff at the Lakeside Water District. The field operations contact person (Mr. Brett Sanders) confirmed MTBE was still present in the wells and indicated the Riverview Well Field was not in operation. Mr. Sanders provided a tabulated copy (via email) of the most recent groundwater laboratory results (before and after treatment), dated February 24, 2015, for the production wells (table is attached). He added he does not know when the well field will be re-started or if the agreement between the City and the Lakeside Water District will be renewed.

*EAI* believes the production wells are not in operation because the Lakeside Water District has reliable water from other sources. However, if the Lakeside Water District desires to utilize these wells to supply water to the public it can do so safely. The existing groundwater remedial system can be re-started to treat and reduce the MTBE concentrations in groundwater to levels that are safe for public use.

**Conclusions and Recommendations**: The groundwater flow direction for all three monitoring events was consistently calculated to the north-northwest. These flow directions are comparable to previous events.

The dissolved TPHg and MTBE plumes remain stable. The TPHg plume is adequately delineated both up and downgradient by wells MW-6 and MW-13, respectively. Although an insignificant rebound in MTBE concentrations was reported in MW-6 (from <1.0 µg/L to 1.6 µg/L) and in EX-6 (from <1.0 µg/L to 5.9 µg/L), as compared to the December 2017 event, these wells respectively represent the up and downgradient estimated limits of the MTBE plume. The MTBE concentrations presented in this monitoring event continue to be below the maximum contaminant levels (MCLs; 13 µg/L). Well MW-4 is the only well with detectable TBA concentrations. As compared to the December 2017 event, concentrations increased from <1.0 µg/L to 180 µg/L. The TBA plume is presented on Figure 7.

As mentioned above, the regulatory impediment to close the site is the presence of MTBE in the production wells. The most recent laboratory results for these wells (February 2015) reported MTBE concentrations prior to treatment ranging from 1.7 µg/L to 59.5 µg/L and after treatment at 2.43 µg/L (table attached).

Based on the laboratory results obtained from this groundwater monitoring event, *EAI* concludes the MTBE is localized and does not extend further down gradient from well EX-6 (across Wintergardens Boulevard to the southwest). Persistent MTBE concentrations in the production wells may be remnants of the detached groundwater MTBE plume.

The laboratory results for well MW-12 (up gradient and closest to the production wells) have consistently been reported with MTBE concentrations below the LRLs or below MCLs (less than 13 µg/L) since the well was installed in 1999.

For the reasons mentioned above, including present conditions of the production wells (Riverview Well Field), *EAI'* recommendation is site closure of the leaking underground storage tank release case associated with the subject site.

The required monitoring frequency, as of September 2019, has changed to an annual basis. *EAI* will continue groundwater monitoring on an annual basis until the RWQCB determines to close the site. *EAI* will contact the Lakeside Water District and provide periodic updates to the RWQCB regarding the operational status of the Riverview Well Field.

**Standard Limitations:** The findings and conclusions in this report have been prepared for the specific application to this project and have been developed in a manner consistent with that level of care and skill normally exercised by members of the environmental scientific profession currently practicing under similar conditions in the area at the time this investigation was performed. No warranty, express or implied, is made. This report is for the exclusive use of Mr. Gary Kevorkyan and his representatives.

A potential always remains for the presence of unknown, unidentified, or unforeseen subsurface contamination. Further evidence against such potential site contamination would require additional subsurface exploration and testing. If new information is discovered during future site work (which may include excavations, boreholes, or other studies), *EAI* should be requested to re-evaluate the conclusions of this report, and to provide amendments as required.
Should you have any questions concerning this information, please feel free to contact the undersigned at (619) 291-3636.

Respectfully submitted,
