Mr. Michael Weber
Duke Realty
200 Spectrum Drive, Suite 1600
Irvine, California 92618

Re: Phase I Environmental Site Assessment Update
Cypress Avenue and Slover Avenue
Fontana, California
Apex Project No. 093-DUKE-020

Dear Mr. Weber,

Apex Companies, LLC ("Apex") is pleased to present this report summarizing the results of its Phase I Environmental Site Assessment (Phase I ESA) Update for the above-referenced property (Subject Property).

1.0 BACKGROUND AND PRIOR REPORTS

Apex previously completed a Phase I ESA Report dated February 11, 2019 for the Subject Property. The Subject Property is comprised of 5 lots identified as San Bernardino County Assessor's Parcel Number (APN) 025-116-410, 025-116-403, 025-116-404, 025-116-423 and 025-116-425 and encompasses approximately 9.7 acres. The Subject Property is located on the northwest corner of Cypress Avenue and Slover Avenue in Fontana, California, in a mixed light industrial/residential area. The Subject Property is zoned as Industrial General (IG) and consists of two residential lots, two vacant land lots, and one industrial lot. The Subject Property is bordered by Boyle Avenue to the north, Cypress Avenue to the east, Slover Avenue to the south, and residential properties to the west.

The Phase I ESA revealed no RECs in connection with the Subject Property and no further action was recommended.

2.0 CURRENT SITE ASSESSMENT

Apex's representative Paisha Jorgensen inspected the Subject Property on October 4, 2019, beginning at approximately 12:00 p.m. Weather conditions at the time of the inspection were sunny with a temperature of approximately 80 degrees Fahrenheit. No limiting conditions were encountered during the site reconnaissance. Mr. Jorgensen was unaccompanied during the site reconnaissance.

Hazardous Substances and Petroleum Products

Apex observed a drum repair area on the recycling center on the southern portion of the Subject Property. During the Site reconnaissance, Apex observed multiple empty 55-gallon drums and 200-gallon totes located in the drum repair area. Material Trade Solutions, the business on the property, cuts up the empty drums and sends them offsite for cleaning. No drum cleaning is reportedly conducted on Site.

Waste Generation, Storage, and Disposal

According to Mr. Carlo, a representative of Material Trade Solutions, hazardous or regulated waste is not generated, stored, or disposed of at the Subject Property.

Underground Storage Tanks & Aboveground Storage Tanks

Apex did not observe any evidence of existing USTs at the Subject Property.

Polychlorinated Biphenyls (PCBs) and Oil-Containing Equipment

Polychlorinated biphenyls (PCBs) are known to be a component in fluids used in electrical and hydraulic equipment, lubricating oils, paints and coatings manufactured prior to 1979. In the event of a leak or release of fluid or oil-containing equipment, the owner is responsible for remediation. No transformers were observed on the Subject Property.

Other Observations

Apex did not find evidence of unusual odors, wells, stressed vegetation, ponds, or lagoons on the Subject Property. A septic system was reported at the residential property on the southeastern portion of the Subject Property; however, Apex was not provided access to the residential property at the time of the Site reconnaissance.

Findings from the Site Reconnaissance

Apex did not identify RECs associated with the Subject Property during the Site reconnaissance. Photographs from the site reconnaissance are provided as **Attachment A** to this letter.

3.0 ADJOINING AND SURROUNDING PROPERTIES

The Subject Property is located in a light industrial and residential land use area as shown on the Site Plan, provided as Figure 2. Properties surrounding the Subject Property to the west, east, and south are primarily residential, while the properties to the north are light industrial. Adjoining properties observed during this Phase I ESA Update were consistent with those identified during the prior Phase I ESA and are described in the following table. Apex's visual and record review of adjoining and surrounding properties did not identify any current uses that are considered to be a REC with respect to the Subject Property.

Adjacent and Surrounding Properties	
Direction	**Description**
North (beyond Boyle Avenue)	Vacant light industrial property addressed as 16368 Boyle Avenue, OHNO Construction addressed as 16346 Boyle Avenue, and Jacob Transport addressed as 16434 Boyle Avenue.
East (beyond Cypress Avenue)	Two residential properties and vacant land.
South (beyond Slover Avenue)	Residences and vacant land
West	Vacant and residential.

4.0 REGULATORY RECORDS REVIEW

Apex reviewed information gathered from environmental databases through Environmental Data Resources, Inc. (EDR) to evaluate whether activities on or near the Subject Property would potentially threaten the environmental integrity of the Subject Property. Additionally, Apex reviewed records associated with the Site and adjacent properties listings on the California State Water Resources Control Board GeoTracker database at http://geotracker.waterboards.ca.gov/. No documents for the Site or adjacent properties were found on the GeoTracker database. Apex reviewed reasonably ascertainable records documenting the history of the use and/or ownership of the Subject Property and adjoining/surrounding properties. The EDR database search report is provided in **Attachment B**.

The Subject Property was listed in the following databases in the EDR report:

- CA National Pollutant Discharge Elimination System (NPDES);
- CA California Integrated Water Quality System Project (CIWQS); and
- San Bernardino County Permits

South Coast Recycling, addressed as 16470 Slover Avenue and located on the southern portion of the Subject Property, was identified on the CA NPDES database with NPDES number CAS000002. According to the database report, a NPDES permit was terminated at this property on January 20, 2016. Two San Bernardino County permits identified as PT0022353 and PT0022354 were identified as special handler and special generator permits, respectively. Both of these permits expired on October 31, 2010. Given that South Coast Recycling was not identified on other environmental databases, Apex does not consider the Subject Property listing on the CA NPDES, CA CIWQS, and San Bernardino County Permits a REC.

There are several listings in the EDR report for off-site facilities within applicable ASTM search radii. Several of these listings (i.e., small quantity hazardous waste generators, registered and historical underground storage tanks [USTs], solid waste disposal sites, permitted hazardous waste facilities),

by themselves, are not indicative of a contamination concern and, therefore, are not discussed herein and were not further evaluated for purposes of this assessment. A number of facilities appear on databases indicating potential contamination concerns (e.g., ENVIROSTOR, California Leaking Underground Storage Tank [CA LUST]; Spills, Leaks, Investigation, and Cleanup [SLIC], California DTSC Dry Cleaners (CA DRYCLEANERS)). Of the listings in the EDR report for off-site facilities within applicable ASTM search radii, no listings on databases indicating potential contamination concerns are located within 2,300 feet to the Subject Property. In addition, no open cases are located within a half-mile of the Subject Property. Given the locations of these listings and the closed case status, Apex does not consider adjacent and surrounding properties of the Subject Property a REC.

5.0 CONCLUSIONS AND RECOMMENDATIONS

Apex performed this Phase I ESA in accordance with the U.S. Environmental Protection Agency's 40 CFR, Part 312 Standards and Practices for All Appropriate Inquiries (AAI) and ATSM E1527-13: "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the Apex's proposal dated September 16, 2019. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report.

This assessment has revealed no RECs in connection with the Subject Property, and no further action is recommended.

6.0 LIMITATIONS AND RELIANCE

Apex's Phase I ESA, referenced in **Section 1.0**, was prepared for Duke Realty. Apex permits Duke Realty, its successors and/or assigns to use and rely on these reports, as well as this Phase I ESA Update report. The opinions and conclusions expressed in this study have been based strictly on the results of these contracted services. The scope of this Phase I ESA Update is intended to aid in the evaluation of RECs that may impact the Subject Property. The services provided by Apex should not be construed as a warranty or guarantee that no RECs exist at the Subject Property, or that all RECs have been uncovered. This document is not intended for purposes other than those expressly set forth herein, or for use by parties other than those identified above in this paragraph. This report is based only on information that became available over the period of study. Other parties' use of this document is at their own risk.

Sincerely,
Apex Companies, LLC

Paisha Jorgensen, P.G.
Principal Geologist

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Database: RESPONSE, Date of Government Version: 04/29/2019 Status: Certified O&M - Land Use Restrictions Only Facility Id: 36290065				

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/29/2019 has revealed that there are 13 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

WESTERN STATES REFIN	***10763 POPLAR AVE***	***WSW 1/2 - 1 (0.957 mi.)***	***H27***	***106***

CA BOND EXP. PLAN: Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

A review of the CA BOND EXP. PLAN list, as provided by EDR, and dated 01/01/1989 has revealed that there is 1 CA BOND EXP. PLAN site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WESTERN STATES REFIN	10763 POPLAR AVENUE	WSW 1/2 - 1 (0.957 mi.)	H28	139

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

CIWQS: The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

A review of the CIWQS list, as provided by EDR, and dated 06/04/2019 has revealed that there is 1 CIWQS site within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Document Type: Certification
Completed Date: 06/30/1993
Comments: Approximately 65k gal of cyanide solution treated. Removed approximately 14 110-barrel vacuum trucks of cyanide rinsate. Western States Refining (WSR) was a former precious metals recovery facility in Fontana, San Bernardino, CA. A two story warehouse exists in the northwest quadrant of the site. The warehouse included several tanks and vats which formerly contained cyanide, several storage sheds and a former drum staging area. Currently the site is abandoned. The Veta Grande Companies, filed for bankruptcy and have reorganized under the name "Forum Regroup. WSR began a silver and gold recovery operation primarily from x-ray film, with a small recovery percentage coming from electronic circuit boards. In the process, cyanide solution was used to strip gold and silver from x-ray film. Hazardous substances previously stored, handled and disposed at the site include cyanide, oxidizers, heavy metals, flammable liquids, ammonium hydroxide and organic solvents.

Completed Date: 06/30/1993
Comments: Approximately 65k gal of cyanide solution treated. Removed approximately 14 110-barrel vacuum trucks of cyanide rinsate. Western States Refining (WSR) was a former precious metals recovery facility in Fontana, San Bernardino, CA. A two story warehouse exists in the northwest quadrant of the site. The warehouse included several tanks and vats which formerly contained cyanide, several storage sheds and a former drum staging area. Currently the site is abandoned. The Veta Grande Companies, filed for bankruptcy and have reorganized under the name "Forum Regroup. WSR began a silver and gold recovery operation primarily from x-ray film, with a small recovery percentage coming from electronic circuit boards. In the process, cyanide solution was used to strip gold and silver from x-ray film. Hazardous substances previously stored, handled and disposed at the site include cyanide, oxidizers, heavy metals, flammable liquids, ammonium hydroxide and organic solvents.

Background Info:

Western States Refining (WSR) was a metal recovery facility that operated from 1979 to 1984. Historical information concerning previous operations at the site are incomplete. WSR recovered precious metals from x-ray film and electronic circuit boards. A cyanide solution, among other chemicals, was used to strip the metals.

In 1985, the Department and the San Bernardino County Department of Health conducted a joint inspection of the site and identified hundreds of drums and containers in deteriorated condition. These drums and containers contained cyanide, sulfides, heavy metals, caustics, and acids. Six large storage tanks containing cyanides and heavy metals were observed leaking onto the cracked berm area and into a nearby trench. Extensive soil contamination was also discovered.

In 1986, EPA and the U.S. Coast Guard completed an emergency removal of the containers and residual cyanide contamination. Approximately 600 drums and containers were removed. The six leaking storage tanks were removed and two other 35,000 gallon storage tanks were emptied but not removed.

In 1987, DHS issued a remedial action order to WSR directing

WESTERN STATES REFINING (Continued) **1000403001**

them to cleanup the facility. The company refused and filed for bankruptcy. DHS found WSR in noncompliance with the order and initiated legal action. A settlement agreement was reached in 1989. Under the settlement, the RPs will pay up to $750,000 towards cleanup costs. Any other costs incurred by the Department will be recovered from the proceeds of the sale of the property once the property is certified.
Phase I and Phase II RIs have been completed. Phase I confirmem cyanide, asbestos, and low level heavy metal contamination.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

CA BOND EXP. PLAN:

Reponsible Party:	DETAILED SITE EXPENDITURE PLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The RP's have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. DHS will undertake appropriate cost recovery actions. This site has not been identified as an NPL site, nor does it appear to be likely NPL candidate in the future. However, federal funds were made available for the interim measures completed in 1986.
Site Description:	This facility formerly recovered precious metals from photographic film using a cyanide and acid leaching process.
Hazardous Waste Desc:	Hazardous substances were stored in various decomposing containers and tanks that resulted in soil contamination. The contaminants include cyanide solids and liquids, acids, metallic materials and volatile organic compounds.
Threat To Public Health & Env:	There is threat of human exposure to toxic air emissions and contact with surface water runoff. There is a potential for contamination of the ground water which is used extensively as a domestic supply in the area. There is no known exposure at thistime.
Site Activity Status:	Extensive soil contamination at the facility was discovered in 1985. In 1986, DHS and EPA initiated interim remedial measures consisting of drum repacking and provision of guard service. DHS directed Western States Refining to mitigate the contamination in an October, 1987 order. The company refused and filed for bankruptcy. DHS found Western States Refining in noncompliance with the order in December, 1987. DHS initiated RI/FS activities in October, 1988.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	458931.6
UTM Y (Meters):	3769190.8
Elevation:	1090 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5619058 FONTANA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

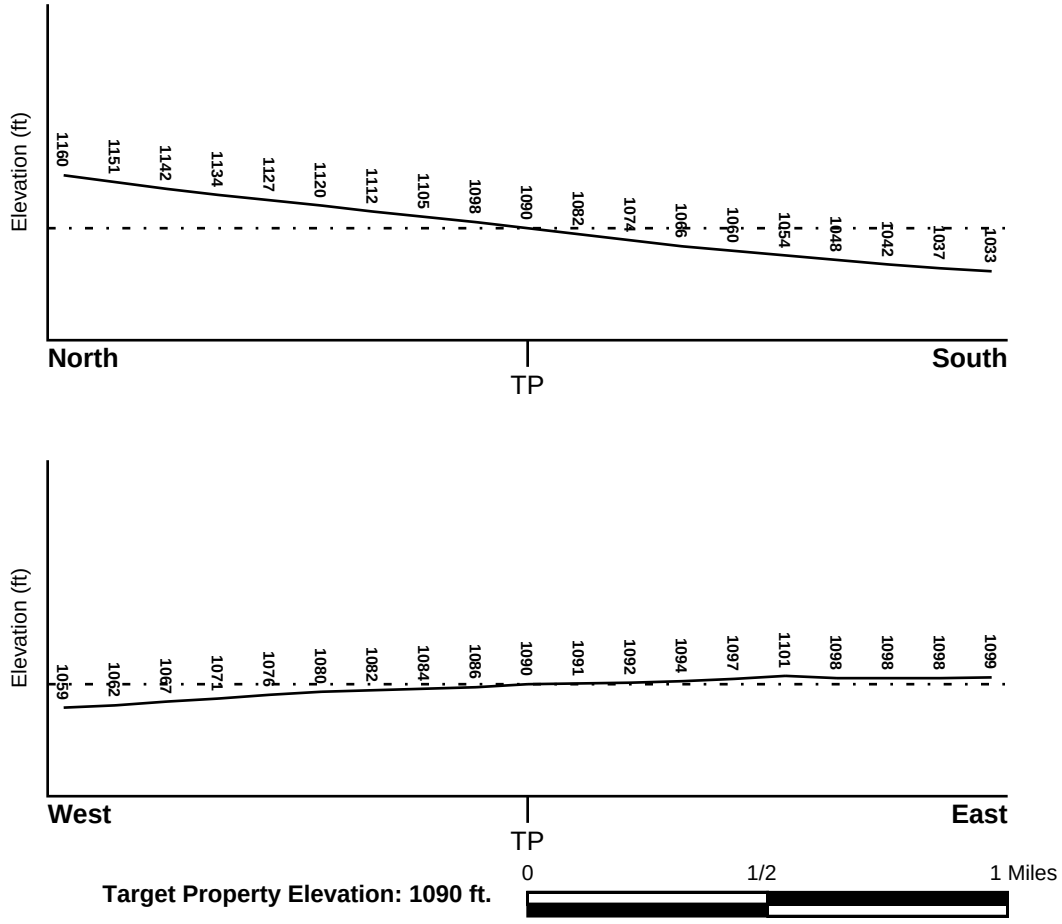

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06071C8654H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06071C8666H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
FONTANA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

Apex Companies, LLC (Apex) performed a Phase I Environmental Site Assessment (Phase I ESA) of the property located on the north and south sides of Boyle Avenue, west of Cypress Avenue, Fontana, California, (Subject Property) on behalf of Duke Realty (Duke). The Subject Property is comprised of seven lots identified as San Bernardino County Assessor's Parcel Number (APN) 025-116-308, 025-116-309, 025-116-310, 025-116-313, 025-116-411, 025-116-415 and 025-116-420 that together encompass approximately 12.57 acres.

The Subject Property is located in a mixed light industrial/residential area. The Subject Property is zoned as Industrial General (IG) and consists of six different (6) properties. There are multiple uses on the Subject Property including transportation (truck and trailer staging, maintenance and repair), various commercial uses including construction operations, and residential uses. A small parcel in the northwest corner of the Subject Property is undeveloped road frontage. The Subject Property is bordered by San Bernardino Freeway to the north, Cypress Avenue and residential/industrial properties to the east, Slover Avenue to the south, and residential properties to the west. The Subject Property is shown on a Site Location Map that is provided as **Figure 1** and a Site Vicinity Plan which is provided as **Figure 2**.

Apex performed this ESA in accordance with the proposal dated October 26, 2020 and the American Society and Testing Materials (ASTM) E1527-13 and the U.S. Environmental Protection Agency's Standards and Practices for All Appropriate Inquiries, 40 Code of Federal Regulations (CFR) 312. The findings, opinions and conclusions of this ESA are for the confidential and exclusive use of Duke, its affiliates, employees, agents, successors, and assigns. Reliance on this report for any use by parties other than specifically stated is prohibited without the express written consent of Apex and Duke, and such use is at the sole risk of the User. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report.

This assessment has revealed the following conditions in connection with the Subject Property as follows:

- Multiple five-gallon oil buckets, one 200-gallon tote and one 300-gallon AST were observed onsite, in addition to poor housekeeping and areas of staining near equipment or trucks. In addition, odors were noted coming from a storage shed where oil or fuel containers were stored. Apex considers these conditions a Business Environmental Risk.
- Most buildings on the Subject Property were inaccessible during the site reconnaissance, including residences and buildings occupied by light industrial businesses (construction- and transportation-oriented businesses). The inability to inspect interior portions of the Subject Property is considered a significant data gap.
- Interviews were not conducted with any owner of the Subject Property. The inability to interview previous or current owner(s) or occupants at the Subject Property is considered a data gap.

TERMINOLOGY

This section contains definitions for technical terms used in the report. Italicized terms are defined in the American Society and Testing Materials (ASTM) Standard Practice E 1527-13 and provided below for easy reference.

Recognized Environmental Condition (REC): "The presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

Historical Recognized Environmental Condition (HREC): "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional (EP) must determine whether the past release is a REC at the time the Phase I Environmental Site Assessment (ESA) is conducted (for example, if there has been a change in regulatory criteria). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC."

Controlled Recognized Environmental Condition (CREC): "A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the EP to be a CREC shall be listed in the findings section of the Phase I ESA report, and as a REC in the conclusions section of the Phase I ESA report."

De minimis condition: "A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs nor controlled recognized environmental conditions."

Business Environmental Risk: "A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations."

Data Gap: "A lack of or inability to obtain information required by this practice despite good faith efforts by the EP to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.)."

1.0 INTRODUCTION

1.1 Purpose

Apex Companies, LLC has prepared this Phase I Environmental Site Assessment (ESA) at the request of the Duke Realty (Duke) to identify *recognized environmental conditions (RECs)* that may pose potential environmental risks associated with the Subject Property located on the north and south sides of Boyle Avenue, west of Cypress Avenue in Fontana, California.

1.2 Scope of Services

This ESA was conducted in good commercial and customary practice by utilizing the American Society and Testing Materials (ASTM) E1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the U.S. Environmental Protection Agency's (EPA) Standards and Practices for All Appropriate Inquiries (AAI), 40 Code of Federal Regulations (CFR), Part 312. The scope of services performed were in accordance with the proposal dated October 26, 2020 and included evaluation of the following:

- Review of environmental databases to obtain information concerning the current and historical usage, storage, treatment, and disposal of hazardous substances on and in the vicinity of the Subject Property;
- Review available files, as appropriate, from the California Regional Water Quality Control Board, California Department of Toxic Substances Control, California Department of Conservation Division of Oil, Gas, & Geothermal Resources, San Bernardino County, and City of Fontana;
- Review of historical aerial photographs, topographic maps, fire insurance maps, and city directories;
- An on-site survey of the Subject Property and visual evaluation of surrounding properties;
- Conduct interviews with representatives of regulatory agency(s), current property owner/operator, and/or consultants for owner/operator; and
- Prepare draft Phase I ESA Report documenting findings for review by Duke prior to finalizing.

1.3 Significant Assumptions

Apex has performed the historical and environmental record searches in accordance with current ASTM and industry practice. The data, findings, and conclusions presented in this ESA are based upon a detailed search, review, and analysis of the documents and interviews as well as observations made during the site reconnaissance. Conclusions reached regarding the conditions of the Subject Property do not represent a warranty that all areas within the Subject Property are of a similar quality as may be inferred from observable conditions and available history of the Subject Property. As stated in the ASTM Standard, no ESA can wholly eliminate uncertainty regarding the potential for environmental liability in connection with the Subject Property. Apex's evaluation and

analysis are intended to reduce, not eliminate, the potential for conditions that result in liability for the User of this ESA.

1.4 Limitations and Exceptions

This report was prepared as a result of a contractual agreement that defined the approach and scope of services to be employed during the course of the investigation. The opinions and conclusions expressed in this study have been based strictly on the results of these contracted services. The scope of this ESA is intended to aid in the evaluation of RECs. The services provided by Apex should not be construed as a warranty or guarantee that no RECs exist at the Subject Property or that all RECs have been uncovered. No conclusions are stated or implied concerning the suitability of the Subject Property for its eventual use. This document is not intended for purposes other than those expressly set forth herein or for use by parties other than for whom it has been prepared.

As outlined in the ASTM Standard for ESAs and Apex's scope of work, this project was non-intrusive in nature and did not include any sampling or testing of soils, groundwater, surface water, or other materials. Additionally, unless specifically described in this report, Apex's scope of work explicitly excluded issues that are outside the scope of ASTM E1527-13 which would constitute a business environmental risk as defined by ASTM. The ASTM Standard Practice E1527-13 recognizes, but not limited to, the following inherent limitations for this ESA:

- Uncertainty is Not Eliminated - No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs, and this practice recognizes reasonable limits of time and cost.
- Not Exhaustive - All Appropriate Inquiry does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions.
- Level of Inquiry Is Variable - Not every property will warrant the same level of assessment. Consistent with good commercial or customary practice, the appropriate level of environmental site assessment will be guided by the type of property, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.

In general, the EPA does not regulate indoor air quality except to the extent that indoor air impacts are caused by releases of hazardous substances into subsurface soil or groundwater (vapor intrusion). ASTM E1527-13 defines "migrate" and "migration" as referring to the movement of hazardous substances or petroleum products in any form, including solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in Guide E2600 – Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions; however, nothing in ASTM E1527-13 requires application of the Guide E2600 to achieve compliance with all appropriate inquiries.

An ESA completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction, is presumed to be valid. An ESA meeting or exceeding this practice and for which the information was collected or updated within one year prior to the date of the intended transaction, may be used provided that the following components of the ESA were conducted or updated within 180 days of the date of purchase or the date of the intended transaction:

- interviews with owners, operators, and occupants;
- searches for recorded environmental cleanup liens;
- reviews of federal, tribal, state, and local government records;
- visual inspections of the property and of adjoining properties, and;
- the declaration by the environmental professional responsible for the assessment or update.

1.5 Special Terms and Conditions

This project was performed in accordance with the scope of work, terms and conditions and limitations stated in the proposal dated October 26, 2020, and as stated in this report. There are no other special terms or conditions concerning this project.

1.6 User Reliance

This report documents the ESA of the Subject Property performed by Apex in accordance with the proposal and in accordance with ASTM E1527-13 and the U.S. EPA Standards and Practices for All Appropriate Inquiries, 40 CFR 312. The findings, opinions and conclusions of this Phase I ESA are for the confidential and exclusive use of Duke, its affiliates, employees, agents, successors, and assigns. Reliance on this report for any use by parties other than specifically stated is prohibited without the express written consent of Apex and Duke, and such use is at the sole risk of the user.

1.7 Data Gaps

Most buildings on the Subject Property were inaccessible during the site reconnaissance, including residences and buildings occupied by light industrial businesses (construction- and transportation-oriented businesses). The inability to inspect interior portions of the Subject Property is considered a significant data gap.

2.0 SITE DESCRIPTION

2.1 Site Location and Ownership

The Subject Property is located on the north and south sides of Boyle Avenue, west of Cypress Avenue in Fontana, California and is identified as San Bernardino County Assessor's Parcel Numbers (APN) 025-116-308, 025-116-309, 025-116-310, 025-116-313, 025-116-411, 025-116-415 and 025-116-420 that together encompass approximately 12.57 acres. According to information provided on the San Bernardino County Assessor website, lot 025-116-308 is addressed as 16346 Boyle Avenue and owned by Ohno Construction Company; lots 025-116-309 and 025-116-310 are addressed as 16434 Boyle Avenue and owned by Shelby Pimentel; lot 025-116-313 is addressed as 16484 Boyle Avenue and owned by the City of Fontana; lot 025-116-411 is addressed as 16357 Boyle Avenue and owned by Hernandez Inter Vivos Trust; lot 025-116-415 is addressed as 16345 Boyle Avenue and owned by DLI properties, LLC; and lot 025-116-420 is addressed as 16376 Slover Avenue and owned by Rosstavi Truck and Trailer Repair, LLC.

The Subject Property is zoned as Industrial General (IG) and is located in a mixed light industrial and residential use area. The Subject Property is shown on a Site Location Map that is provided as **Figure 1** and a Site Vicinity Plan which is provided as **Figure 2**.

2.2 Current Uses and Improvements of Subject Property

The Subject Property includes seven (7) parcels that comprise six different (6) properties. There are multiple uses of the Subject Property including transportation (truck and trailer staging, maintenance and repair), various commercial uses including construction operations, and residential uses. A small parcel in the northwest corner of the Subject Property is undeveloped road frontage. The characteristics of the Subject Property are summarized in the table below:

Property	APN# Size	Key Features
Ohno Construction Company 16346 Boyle Avenue, Fontana, CA	025-116-308 2.2 acres	Office building for construction company Large shop building for construction company Four portable trailers Four Conex boxes RV trailer
Shelby Pimentel 16434 Boyle Avenue, Fontana, CA	025-116-309 025-116-310 3.65 acres	Residence
City of Fontana	025-116-313	Vacant land

Property	APN# Size	Key Features
16484 Boyle Avenue, Fontana, CA	1.95 acres	
Hernandez Inter Vivos 16357 Boyle Avenue, Fontana, CA	025-116-411 0.9 acres	Two residences Two truck trailers Camper RV trailer
DLI properties, LLC 16345 Boyle Avenue, Fontana, CA	025-116-415 0.87 acres	Large "L shaped" residence with large open area in the rear of the property Small storage shed
Rosstavi Truck and Trailer Repair LLC 16376 Slover Avenue, Fontana, CA	025-116-420 2.09 acres	Two residences Shop/garage building Two storage sheds

2.3 Current Land Uses of Adjoining and Surrounding Properties

The Subject Property is located in a light industrial and residential land use area as shown on the Site Plan, provided as **Figure 2**. Properties surrounding the Subject Property to the north, east, and south are primarily residential, while the properties to the west are light industrial and residential (**Table 2-1**).

TABLE 2-1: Adjacent and Surrounding Properties

Direction	Description
North (beyond San Bernardino Freeway)	Residences.
East	Residences and one industrial building occupied by Material Trade Solutions (a recycling facility); residences and vacant land beyond Cypress Avenue.
South (beyond Slover Avenue)	Residences and vacant land.
West	Residences and a commercial building occupied by On Point Truck Sales (A truck dealer) and Caliber Collision Bloomington, CA (an auto body shop).

3.0 USER PROVIDED INFORMATION

This section summarizes the information provided by the User, Duke Realty (Duke), for this Phase I ESA. A User Questionnaire was prepared and sent to Duke to help retrieve the needed information and assist in gathering appropriate information that may help identify potential RECs on the property. A copy of the completed questionnaire is provided in **Appendix A**. Information provided is summarized in **Table 3-1** and elsewhere in this report.

TABLE 3-1: User Provided Information

Data Type	Information Provided
Environmental Liens, AUL, Title Records	The Subject Property does not have any Environmental Liens. No AULs were included on the EDR search report.
Specialized User Knowledge	The User did not have specialized knowledge of the Subject Property.
Commonly Known or Reasonably Ascertainable Information	No commonly known documents impacting the Subject Property are available.
Valuation Reduction for Environmental Issues	The User is responsible to perform the additional inquiries regarding purchase price to the fair market value of the Subject Property.
Reason for Performing Phase I ESA	This Phase I ESA was performed at the request of Duke in anticipation of an acquisition involving the Subject Property, for the User to qualify for defenses to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability, and as part of Duke's Due Diligence for the acquisition loan requirements.
Other User Provided Information	No additional user information was provided regarding the Subject Property.

4.0 RECORDS REVIEW

This section summarizes all records obtained by Environmental Data Resources, Inc. (EDR) and reviewed by Apex to help identify RECs in connection with the Subject Property. The first section discusses the physical setting sources that will provide an understanding of the physical characteristics of the Subject Property and surrounding area. This important information will help determine the likelihood of potential contaminants migrating onto the Subject Property from surrounding properties with environmental contaminants. The next section reviews current and historical environmental records associated with the Subject Property and surrounding properties. Relevant listings will be discussed and reviewed for potential RECs. The section for historical use record review develops a history of the previous uses of the Subject Property and surrounding area to help identify RECs from past uses, and is followed by a findings section where identified RECs and information is summarized. The EDR Radius Map Report can be found in **Appendix B**.

4.1 Physical Setting Sources

Although the ASTM E1527-13 Standards only require a current U.S. Geological Survey (USGS) 7.5-Minute Topographic Map for analysis, that is not enough information to fully characterize the physical setting of the Subject Property. Apex utilized several sources to understand the physical properties of the Subject Property and surrounding area, as shown in **Table 4-1**. This information will determine the likelihood of hazardous substances and/or petroleum contaminants migrating from surrounding areas through the soil and groundwater onto the Subject Property. More importantly, it will also identify significant environmental record listings in the following sections that are upgradient of groundwater flow where the contaminants could migrate onto the Subject Property.

TABLE 4-1: Physical Setting Sources

Data Type	Data Source
Topography	USGS 7.5-minute topographic maps provided by EDR
Floodplain	Federal Emergency Management Agency (FEMA), Flood Insurance Rate Map
Wetlands	Fish and Wildlife Service (FWS) National Wetlands Inventory (http://www.fws.gov/wetlands/data/mapper.html)
Soils	United States Department of Agriculture (USDA) – Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS) (http://websoilsurvey.nrcs.usda.gov/app/)
Geology	Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994)

4.1.1 Topography

Based on site observations and the USGS 7.5-Minute Topographic Map Series, Fontana, California, Quadrangle Topographic Map, 2012, the property is located approximately 1,094 feet above mean sea level (MSL). The Subject Property is generally flat, and the topography of the site vicinity slopes towards the southwest.

4.1.2 Geology and Soils

The site is located in the northeastern portion of the Peninsular Ranges Geomorphic Province. Quaternary alluvial fan deposits derived from the neighboring mountains underlie the site. The nearest active faults include the Rialto-Colton fault, located approximately five miles to the northeast, and the San Jacinto fault zone, located approximately eight miles to the northeast.

Based on a review of the USDA Soil Conservation Service (SCS) maps, the Subject Property is primarily underlain by the Tujunga loam sand series. The Tujunga soil series consist of very deep, somewhat excessively drained soils that formed in alluvium from granitic sources.

4.1.3 Hydrology and Hydrogeology

The Subject Property, located within the Upper Santa Ana Valley groundwater sub-basin, does not have surface water bodies on the property or in the immediate vicinity. However, the nearest bodies of water are the Santa Ana River, located approximately six miles south of the Subject Property, and Lake Mathews, located approximately 14 miles south of the Subject Property. The radius map within the EDR Report (**Appendix B**) contains layers from the FEMA Flood Insurance Rate Map (FIRM) and the FWS National Wetlands Inventory Map. This map shows that the Subject Property is not located on a national or state wetland or within a 100-year or 500-year flood zone.

Groundwater flow beneath the Subject Property was estimated using several sources on the California Water Resources Control Board's GeoTracker Database. The closest site with groundwater data is the Circle K Store closed cleanup project located at 14527 Slover Avenue, Fontana, approximately one mile northwest of the Subject Property. According to a Quarterly Status Report dated January 17, 2006, the depth to groundwater was estimated at greater than 250 feet below ground surface (bgs) and the groundwater flowed in a south-southwest direction.

4.2 Environmental Record Review

The purpose of the environmental record review is to identify any records that are currently or historically associated with the Subject Property or adjacent/surrounding properties. This information will help identify any RECs in connection with the Subject Property and whether the listed sites with environmental records have current or former releases of hazardous substances and/or petroleum products that may have the potential to migrate onto the Subject Property.

4.2.1 Standard and Additional Environmental Record Sources

Consistent with ASTM E1527-13, a search of federal, state, and tribal environmental record sources within the established minimum search distances was conducted for the Subject Property by EDR and provided to Apex for review. The records search is used to identify adjoining or surrounding properties within the minimum search distance that may have a REC, HREC, CREC, or a de minimis condition that may exist at the Subject Property in connection with the searched listing. Apex reviewed the listings provided in the EDR report and summarized significant listings below. A full list of databases searched for this review can be found in the EDR Radius Map report in **Appendix B**.

Environmental record sources required by the ASTM standard are listed below in Table 4-2 along with the additional database sources that were searched and produced a record result. Pertinent findings from the record review are discussed at the end of this section while significant findings as they pertain to RECs are discussed in Section 4.4 and referenced in Section 8.0, Conclusions and Recommendations.

TABLE 4-2: Summary of Environmental Database Information

Environmental Record	Search Distance (Miles)	Listings within Search Distance	Subject Property Listed?
Standard Environmental Records Sources Required by ASTM E1527-13			
Federal National Priorities Sites List (NPL)	1.0	0	No
Federal Delisted NPL Sites	1.0	0	No
Federal Superfund Enterprise Management System (SEMS) Sites (Former CERCLIS)	0.5	0	No
Federal SEMS Archive Sites (Former CERCLIS NFRAP)	0.5	0	No

HWTS	Site	4	Yes
EDR Historical Auto Station	0.125	2	No

4.2.2 Subject Property Environmental Record Results

The Subject Property was listed in the following databases in the EDR report:

- Resource Conservation and Recovery Act Non Generators / No Longer Regulated (RCRA NONGEN / NLR);
- Facility Index System/Facility Registry System (FINDS);
- Enforcement and Compliance History Online (ECHO);
- San Bernardino County Permits;
- CA HAZNET; and
- Hazardous Waste Tracking System (HWTS)

Hill Line Inc., addressed as 16357 Boyle Avenue and located on the central portion of the Subject Property, was identified as an inactive conditionally exempt small quantity generator with a San Bernardino County permit (Permit number: PT0003606). The permit expired on 11/30/2002.

Cabreras Truck and Trailer Repair, addressed as 16434 Boyle Avenue and located on the northeastern portion of the Subject Property, was identified as an inactive special generator with a San Bernardino County permit (Permit number: PT0020080). The permit expired on 03/31/2011.

Chrisp Company / OHNO Construction Company/OCWEN Loan Servicing LLC / West Coast Concrete Inc. is addressed as 16398 Boyle Avenue and located on the northern portion of the Subject Property. Chrisp Company / OCWEN Loan Servicing LLC / West Coast Concrete Inc was identified on the HWTS and HAZNET databases for recycling and disposal of different wastes. OHNO Construction Company was identified on ECHO, FINDS, RCRA NONGEN / NLR, HWTS and HAZNET databases. According to the database report, the facility was identified under RCRA (CAL000402760) with an active status for waste management services; no violations have been identified for this facility. Given that the Subject Property was not identified on other environmental databases, Apex does not consider the Subject Property listing on the ECHO, FINDS, RCRA NONGEN / NLR, HWTS, HAZNET and San Bernardino County Permits an REC.

In summary:

- Several of the properties are listed in state databases that track waste generation, storage, and disposal/treatment/recycling. Violations were not identified in the database reports;
- Underground storage tank listings were not identified in the database reports; and
- Reported spills of hazardous substances were not identified in the database reports.

4.2.3 Adjacent and Surrounding Properties' Environmental Record Results

There are several listings in the EDR report for off-site facilities within applicable ASTM search radii. Several of these listings (i.e., small quantity hazardous waste generators, registered and historical underground storage tanks [USTs], solid waste disposal sites, permitted hazardous waste facilities), by themselves, are not indicative of a contamination concern and, therefore, are not discussed herein

and were not further evaluated for purposes of this assessment. A number of facilities appear on databases indicating potential contamination concerns (e.g., ENVIROSTOR, California Leaking Underground Storage Tank [CA LUST]; Spills, Leaks, Investigation, and Cleanup [SLIC], California DTSC Dry Cleaners [CA DRYCLEANERS]). Of the listings in the EDR report for off-site facilities within applicable ASTM search radii, no listings on databases indicating potential contamination concerns are located within 2,300 feet of the Subject Property. In addition, no open cases are located within a half-mile of the Subject Property. Given the locations of these listings and the closed case status, Apex does not consider adjacent and surrounding properties of the Subject Property to be RECs.

4.3 Environmental Liens Search

Environmental liens and Activity/Use Limitations (AULs) can commonly be found within recorded land title records (e.g., County Recorder/Registry of Deeds). The types of title reports that may disclose environmental liens and AULs include Preliminary Title Reports, Title Commitments, Condition of Title, and Title Abstracts. Chain-of-title reports will not normally disclose environmental liens or AULs. Environmental liens and AULs that are imposed by judicial authorities may be recorded or filed in judicial records only. An environmental lien report was obtained from EDR for review.

Environmental Liens or AULs were searched for the seven (7) parcels (APN 025-116-308, 025-116-309, 025-116-310, 025-116-313, 025-116-411, 025-116-415 and 025-116-420) on the Subject Property. No Environmental Liens or AULs were found for the Subject Property on the EDR search report. The Environmental Lien and AUL Search Report is included in **Appendix C**.

4.4 Historical Use Records

Apex reviewed reasonably ascertainable records documenting the history of the use and/or ownership of the Subject Property and adjoining/surrounding properties. **Table 4-3** below summaries this historical use information. Further significant details of displayed uses in **Table 4-3** are summarized in this section by the source from which the information was obtained.

TABLE 4-3: Historical Use Summary

Period	Source	Description
1890s	Topographic Map	The Subject Property is undeveloped. A railway transects the central portion of the Subject Property from west to east. The Subject Property is mis-plotted in this photo because the railroad is located north of the Subject Property.
1900s	Topographic Map	The Subject Property is undeveloped. A railway transects the central portion of the Subject Property from west to east. The Subject Property is mis-plotted in this photo because the railroad is located north of the Subject Property.

TABLE 4-3: Historical Use Summary		
Period	**Source**	**Description**
1920s	City Directory	No information is provided for the Subject Property and surrounding properties in the 1920s city directory.
1930s	Aerial Photograph City Directory	The Subject Property is depicted as residential properties and orchards. Residential properties and orchards are depicted in all directions from the Subject Property, except that an undeveloped land is depicted to the west.
1940s	Aerial Photograph Topographic Map City Directory	The Subject Property and surrounding properties in all directions are depicted essentially unchanged from the 1930s except for construction of apparent agricultural buildings in the southern portion of the Subject Property and residences on the northern portion of the Subject Property. Additional residential buildings were constructed on the adjacent properties to the east and to the south. Pacific Ailsa is depicted to the north, Cypress Avenue is depicted to the east, and Slover Avenue is depicted to the south.
1950s	Aerial Photograph Topographic Map City Directory	In the 1953 aerial photograph, the Subject Property is depicted developed with a barn (possible commercial chicken house) on the southern portion of the Subject Property. In the 1959 aerial photograph, an additional commercial building is located on the northeastern portion of the Subject Property. More buildings have been constructed on the adjacent properties to the east. Boyle Avenue is depicted transecting the central portion of the Subject Property from west to east. Highways 70 and 99 are depicted under construction north adjacent to the Subject Property. Surrounding properties in all directions are depicted as residential and farmland. According to city directories, occupants of the 16357 Boyle Avenue portion of the Subject Property include Lomelli Geo in 1955. Occupants of the 16345 Boyle Avenue portion of the Subject Property include Mother Goose Manor in 1955.
1960s	Aerial Photograph Topographic Map City Directory	In the 1966 aerial photograph, the Subject Property is depicted essentially unchanged from the 1959 aerial photograph. Surrounding properties in all directions are depicted essentially unchanged from the 1950s except for the addition of four commercial chicken houses on the adjacent property to the east. According to city directories, occupants of the 16398 Boyle Avenue portion of the Subject Property include Waddell MC in 1960 and 1965. Occupants of the 16357 Boyle Avenue portion of the Subject Property include NS Beidler and ED Fiore in 1960. Occupants of the 16345 Boyle Avenue portion of the Subject Property include Mother Goose Manor in 1960 and Mother Goose Manor and McCoy Lew in 1965.

TABLE 4-3: Historical Use Summary		
Period	**Source**	**Description**
1970s	Aerial Photograph Topographic Map City Directory	In the 1975 aerial photograph, the Subject Property and surrounding properties in all directions are depicted essentially unchanged from the 1966 aerial photograph. According to city directories, occupants of the 16398 Boyle Avenue portion of the Subject Property include Waddell MC in 1970 and Howard Joe in 1975. Occupants of the 16345 Boyle Avenue portion of the Subject Property include McCoy Lew in 1970 and Mother Goose Manor in 1975.
1980s	Aerial Photograph Topographic Map City Directory	The Subject Property and the surrounding areas appear relatively unchanged from the previous aerial photographs and topographic map.
1990s	Aerial Photograph City Directory	The Subject Property and the surrounding areas appear relatively unchanged from the previous aerial photographs, except that one residential building has been demolished on the northern portion of the Subject Property in the 1990 aerial photograph and was replaced by a new commercial building in the 1994 aerial photograph. According to city directories, Doty Brothers Equipment Company is identified as the occupant of the 16434 Boyle Avenue portion of the Subject Property in the 1996 and 1999 city directories. Occupants of the 16398 Boyle Avenue portion of the Subject Property include Miller Kenneth and Graves Edward & Associates in 1990. Occupants of the 16357 Boyle Avenue portion of the Subject Property include Hill Line Inc. in 1990, 1994, 1996 and 1999. Occupants of the 16345 Boyle Avenue portion of the Subject Property include Mother Goose Manor in 1990, 1994, 1996, and 1999.

TABLE 4-3: Historical Use Summary		
Period	**Source**	**Description**
2000s	Aerial Photograph City Directory	The Subject Property appears relatively unchanged from the previous aerial photographs, except that one more residential building has been added to the northwestern portion of the Subject Property in the 2009 aerial photograph. The west and east adjacent properties were developed to current configurations with residential properties, vacant land and light industrial properties. According to city directories, occupants of the 16434 Boyle Avenue portion of the Subject Property include Doty Brothers Equipment Company and Shelby Pimentel in 2003, Paul Munguia in 2004, and Pimentel Shelby and Cabreras Truck & Trailer Repair in 2008. Occupants of the 16398 Boyle Avenue portion of the Subject Property include Miller Dennis and Chrisp Company in 2003 and 2004, and Atilan in 2008 and 2009. Occupants of the 16357 Boyle Avenue portion of the Subject Property include Repucci Louis in 2003 and Hernandes Jose in 2008. Occupants of the 16345 Boyle Avenue portion of the Subject Property include Mother Goose Manor in 2003 and 2004, and Payne Jones Joanna and the Children's Place in 2008. Light industrial and residential properties are depicted to the east, and residential properties are depicted to the west, beyond Cypress Avenue to the east, and beyond Slover Avenue to the south.
2010s	Aerial Photograph Topographic Map City Directory	The Subject Property and surrounding areas appear relatively unchanged from the previous aerial photographs. According to city directories, occupants of the 16434 Boyle Avenue portion include West Coast Concrete Inc. and Arthur Macias in 2014 and Shelby Pimentel in 2017. Occupants of the 16398 Boyle Avenue portion of the Subject Property include Ohno Construction Company in 2017.

4.4.1 Aerial Photographs

Digital aerial photographs dated 1938, 1948, 1953, 1959, 1966, 1975, 1985, 1990, 1994, 2002, 2006, 2009, 2012, and 2016 provided by EDR were reviewed by Apex. Copies of aerial photographs can be found in **Appendix D**.

4.4.2 Topographic Maps

EDR provided historic topographic maps with coverage of the Subject Property dated 1896, 1898, 1901, 1942, 1943, 1953, 1954, 1967, 1973, 1975, 1980, and 2012. Because they show many man-made features not evident in photographs, historical topographic maps are useful in documenting the history of developments and land use features on many properties, particularly those in rural, unincorporated areas. The review of historical USGS Topographic Maps did not identify specific past uses indicating recognized environmental conditions in, on, or at the property or surrounding area. Copies of these maps are included in **Appendix E**.

4.4.3 City Directories

EDR provided historic city directories for the years 1922-1923, 1926, 1930-1931, 1934, 1936, 1938, 1940-1942, 1945 -1946, 1949 -1951, 1955 - 1956, 1960-1961, 1964-1965, 1970, 1975, 1980-1981, 1985, 1990-1991, 1994-1996, 1999, 2002-2004, 2008-2009, 2014, and 2017. Historical city directories, listed by street address, are frequently useful in documenting the historical occupancy of properties in urban or otherwise incorporated areas that have a significant history of developed commercial use. A copy of the City Directories Results is included as **Appendix F**.

4.4.4 Fire Insurance Maps

The Subject Property is an unmapped property on the EDR fire insurance maps. The certified Sanborn search results are included in **Appendix G**.

4.4.5 Building Permit Records

Building permit records can be used to identify structures and/or features of previous or current properties on the Subject Property and adjacent/surrounding properties. This information can be used to determine potential environmental concerns through the presence of USTs, sump pumps, septic tanks and connection dates to sewer, electrical, water, and natural gas.

Commercial tenant improvement and electrical permits were found for the portion of the Subject Property addressed as 16398 Boyle Avenue, as well as a business license for a tire retreading and repair shop (Elite Road Service & Tire, Inc.) in 2008. Residential house improvement and electrical permits were found for the central, northwest and south portion of the Subject Property addressed as 16357, 16386 and 16464 Boyle Avenue and 16374 Slover Avenue. A business license for a repair shop (Cabrera Truck & Trailer Repair) was found for the northeastern portion of the Subject Property address as 16434 Boyle Avenue. A city demolition permit for all structures and foundations was found for the northeastern portion of the Subject Property address as 16484 Boyle Avenue in 2008. A copy of the building permits report for the Subject Property and surrounding properties is included as **Appendix H**.

4.4.6 Property Tax Map Report

The EDR Property Tax Map Report indicated that the Subject Property is identified as APN 025-116-308, 025-116-309, 025-116-310, 025-116-313, 025-116-411, 025-116-415 and 025-116-420 that together encompass approximately 12.57 acres. A copy of the Property Tax Map Report is included as **Appendix I**.

4.5 Record Review Findings

Apex reviewed the available environmental and historical records for the Subject Property according to ASTM E1527-13 Standards.

Based upon a review of historic topographic maps, aerial photographs and other records, the Subject Property was historically rural residential with some orchard uses between the 1930s and 1940s.

Commercial and residential use was sporadic between the 1950s and 1990s. Most recently, the Subject Property is used for construction operations, transportation uses (truck and trailer storage, maintenance, and repair), and residential uses. Residences are located on the northwestern, northern, central and south portion of the Subject Property, while vacant land is located on the northeastern portion and light industrial is located on the northern and southern portion.

Apex submitted open public record requests to the City of Fontana, San Bernardino County, and California State Water Resources Control Board by electronic mail or online request form for information pertaining to records of spills, incidents, or hazardous material storage. Apex also searched the California State Water Resources Control Board GeoTracker website and the website does not contain any documents regarding the Subject Property. At the time that this report was released, Apex had not yet received a response from the City of Fontana, San Bernardino County, and California State Water Resources Control Board. Apex will provide any pertinent response from the agency, under a separate cover, when received. Based on site observations and information obtained from referenced regulatory database resources, the lack of a record from the City of Fontana, San Bernardino County, and California State Water Resources Control Board is not considered to represent a data gap.

5.0 SITE RECONNAISSANCE

The Subject Property was inspected on November 4 and November 13, 2020 by Apex representative Eric Randall, under the supervision of Paisha Jorgensen, a qualified environmental professional. Weather conditions at the time of the inspection were sunny and clear, with temperatures of approximately 64 degrees Fahrenheit. During site reconnaissance, the Apex representative was accompanied by Mr. JJ Hernandez (Hernandez Inter Vivos Trust property, one of the owners of the Subject Property) for the central portion of the Subject Property. The Apex representative was unaccompanied on the rest of the Subject Property. Site reconnaissance consisted of a walk-through of the Subject Property. Most buildings on the Subject Property were inaccessible during the site reconnaissance, including residences and buildings occupied by light industrial businesses (construction- and transportation-oriented businesses). Site photographs are included in **Appendix J**. This section summarizes significant findings observed during the site inspection of the Subject Property.

5.1 Hazardous Substances and Petroleum Products

Apex observed multiple five-gallon buckets of engine oil and one 200-gallon tote of soybean oil in a storage shed located on the southern portion (owned by Rosstavi Truck and Trailer Repair LLC) of the Subject Property. No leaks were observed in the vicinity of these buckets and de minimis stains were observed near the tote. Apex also observed multiple small quantities (less than five gallons) of petroleum-based lubricants and aerosol cans stored inside the building located on the northern portion (owned by Ohno Construction Company) of the Subject Property. De minimis staining was observed near where construction equipment or trucks are stored, most likely from leaks on the machines.

No other hazardous materials were observed during the reconnaissance.

5.2 Waste Generation, Storage, and Disposal

Apex observed general waste dumpster containers on the Subject Property. No significant staining was noted in the area of dumpsters. Apex did not find any other storage of regulated waste.

5.3 Underground Storage Tanks & Aboveground Storage Tanks

Apex did not observe any evidence of existing USTs at the Subject Property. Apex observed one steel 300-gallon aboveground storage tank (AST) on the central portion (owned by Hernandez Inter Vivos Trust) of the Subject Property. The AST was manufactured in 1928 and rusted with unknown stored material; however, no sign of staining was observed near the AST. Apex also observed a 300-gallon empty petroleum fuel storage tank on the southern portion (owned by Rosstavi Truck and Trailer Repair LLC) of the Subject Property.

5.4 Polychlorinated Biphenyls (PCBs) and Oil-Containing Equipment

Polychlorinated biphenyls (PCBs) are known to be a component in fluids used in electrical and hydraulic equipment, lubricating oils, paints and coatings manufactured prior to 1979. In the event of a leak or release of fluid or oil-containing equipment, the owner is responsible for remediation. No transformers were observed on the Subject Property.

5.5 Other Observations

Apex did not find evidence of wells, ponds, or lagoons on the Subject Property. Apex observed small amounts of stressed vegetation on the central portion (owned by Hernandez Inter Vivos Trust) and southern portion (owned by Rosstavi Truck and Trailer Repair LLC) of the Subject Property. Apex also noticed odors from a storage shed where oil or fuel containers were stored on the southern portion (owned by Rosstavi Truck and Trailer Repair LLC) of the Subject Property.

5.6 Findings from the Site Reconnaissance

Multiple five-gallon oil buckets, one 200-gallon tote and one 300-gallon AST were observed onsite, in addition to poor housekeeping and areas of staining near equipment or trucks. In addition, odors were noted coming from a storage shed where oil or fuel containers were stored. Apex considers these conditions a Business Environmental Risk.

Most buildings on the Subject Property were inaccessible during the site reconnaissance, including residences and buildings occupied by light industrial businesses (construction- and transportation-oriented businesses). The inability to inspect interior portions of the Subject Property is considered a significant data gap.

6.0 INTERVIEWS

Interviews were not conducted with any owner of the Subject Property. The inability to interview previous or current owner(s) or occupants at the Subject Property is considered a data gap.

7.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM E1527-13

According to the ASTM E1527-13 Standards, Duke Realty may conduct additional investigations to assess other environmental conditions in connection with the commercial real estate. No conditions outside the scope of ASTM E1527-13 were part of the scope of work for this project.

8.0 CONCLUSIONS AND RECOMMENDATIONS

Apex performed this Phase I ESA in accordance with the U.S. Environmental Protection Agency's 40 CFR, Part 312 Standards and Practices for All Appropriate Inquiries (AAI) and ATSM E1527-13: "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the work order from Duke Realty to Apex dated October 26, 2020. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report.

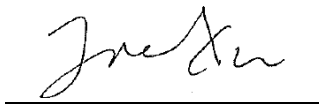

This assessment has revealed the following conditions in connection with the Subject Property as follows:

- Multiple five-gallon oil buckets, one 200-gallon tote and one 300-gallon AST were observed onsite, in addition to poor housekeeping and areas of staining near equipment or trucks. In addition, odors were noted coming from a storage shed where oil or fuel containers were stored. Apex considers these conditions a Business Environmental Risk.
- Most buildings on the Subject Property were inaccessible during the site reconnaissance, including residences and buildings occupied by light industrial businesses (construction- and transportation-oriented businesses). The inability to inspect interior portions of the Subject Property is considered a significant data gap.
- Interviews were not conducted with any owner of the Subject Property. The inability to interview previous or current owner(s) or occupants at the Subject Property is considered a data gap.

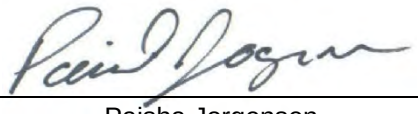

9.0 ENVIRONMENTAL PROFESSIONALS

9.1 Signatures of Responsible Environmental Professionals

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jie Xu
Project Manager

Paisha Jorgensen
Principal Geologist

9.2 Qualifications of Responsible Environmental Professionals

Ms. Xu was the environmental professional who performed this environmental site assessment. Ms. Xu has a master's degree in environmental science and over six years of professional experience in the environmental consulting field. She has designed, provided oversight and participated in numerous investigations in varied settings including industrial, commercial, mining, oil field and groundwater resources. During that time, Ms. Xu has regularly conducted Phase I and Phase II Environmental Site Assessments throughout the United States. Ms. Xu is an environmental professional as defined in § 312.10 of 40 CFR Part 312.

Mr. Jorgensen has a Bachelor of Science Degree in Geological Sciences and has over 18 years of professional experience in the environmental consulting field. Mr. Jorgensen is an environmental professional as defined in § 312.10 of 40 CFR Part 312.

APPENDIX A

USER QUESTIONNAIRE

ASTM E1527-13 USER QUESTIONNAIRE

Site Name: Cypress Extension

Site Address: Boyle Ave, Fontana, CA

Respondent Name: Verbal Responses from George Atalla

Respondent Title/Company: Asst. Development Services Manager, Duke Realty

Date: 11/20/20

For Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments", 40 CFR Part 312), the user **must** provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete, and the environmental professional may identify a “data gap” which could impact the Phase I ESA report findings.

Question:	Yes	No
1. Environmental Liens Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? Check the box below as appropriate. ☒ The scope of work for this Phase I Environmental Site Assessment (ESA) includes a search of recorded environmental liens as an added-scope item (in accordance with ASTM E1527-13 Section 6.2).		X
2. Activity and Land Use Limitations (AULs) Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? Check the box below as appropriate. ☒ The scope of work for this Phase I ESA includes a search of recorded AULs as an added-scope item (in accordance with ASTM E1527-13 Section 6.2).		X
3. Specialized Knowledge or Experience Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		X
4. Purchase Price vs. Fair Market Value Does the purchase price being paid for this property reflect any adjustments from the fair market value of the property? (If you conclude that the value is lower than the fair market price, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?)		X

5. Commonly Known or Reasonably Ascertainable Information Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?		X
5a. Do you know the past uses of the property?		X
5b. Do you know of specific chemicals that are present or were once were present at the property?		X
5c. Do you know of spills or other chemical releases that have taken place at the property?		X
5d. Do you know of any environmental cleanups that have taken place at the property?		X
6. Obviousness of the Presence or Likely Presence of Contamination Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?		X

PLEASE PROVIDE EXPLANATION FOR ALL "YES" ANSWERS, OR ATTACH SUPPORTING DOCUMENTS.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

METAL RESOURCES INC EPA ID:: CAR000256115	16477 SLOVER AVE	SSE 0 - 1/8 (0.093 mi.)	D18	42

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there are 13 ENVIROSTOR sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 11 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

LA TRUCKING (Continued) **1017785769**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date: 11/4/2016
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure of the overfill prevention system to meet one of the following requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes: Returned to compliance on 12/15/2016. COMPLIANCE ACTIVITY (12/06/2016)WITNESS RE-TEST-PASSED AND REC'D SIGNED C OF C. SB EXTERNAL OVERFILL ANNUNCIATOR AT THE OLD CUP WAS OBSERVED TO BE INOPERABLE AT THE TIME OF INSPECTION. REPAIR/REPLACE INOPERABLE OVERFILL EXTERNAL ANNUNCIATOR AND SCHEDULE A WITNESSED RETEST OF ALL OVERFILL ALARMS AT THE OLD CUP WITH THIS DEPARTMENT WITHIN 14 DAYS.
Violation Division: San Bernardino County Fire Department
Violation Program: UST
Violation Source: CERS

Site ID: 395683
Site Name: KAISER FOUNDATION HOSP
Violation Date: 9/11/2017
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)
Violation Description: Failure to test or inspect each aboveground container for integrity based on industry standards discussed in the SPCC Plan: 1. On a regular schedule. 2. After making material repairs. 3. Use non-destructive testing. 4. Inspect each containerG s supports, foundations, and outside for signs of deterioration, discharges, or accumulation of oil inside diked areas.

KAISER FOUNDATION HOSP (Continued) **U001574868**

Violation Notes:	Returned to compliance on 03/03/2020. Integrity testing based on industry standards as discussed in the SPCC plan is not conducted for each aboveground container.
Violation Division:	San Bernardino County Fire Department
Violation Program:	APSA
Violation Source:	CERS

Violation Date:	11/5/2018
Citation:	HSC 6.7 25290.1(d) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(d)
Violation Description:	Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment.
Violation Notes:	Returned to compliance on 05/27/2020. OBSERVATION: Please make the following repairs: 1) The hydrostatic sensor (TS-UHS) in Sump 8 was not working. Technician stated that the sensor needs to be ordered. 2) Alarms on monitoring panel: o Transition Sump- brine sensor o Tank 2

KAISER FOUNDATION HOSP (Continued) **U001574868**

Sump 8- brine sensor o Zone 1 Tank 1- vacuum sensor too high
CORRECTIVE ACTION: 1) Replace non-working hydrostatic sensor (TS-UHS) in Sump 8. 2) Repair to eliminate brine leak in the system.- Contact this Division with scope of work. Ensure that required permits are obtained prior to making repairs.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Document Type: Certification
Completed Date: 06/30/1993
Comments: Approximately 65k gal of cyanide solution treated. Removed approximately 14 110-barrel vacuum trucks of cyanide rinsate. Western States Refining (WSR) was a former precious metals recovery facility in Fontana, San Bernardino, CA. A two story warehouse exists in the northwest quadrant of the site. The warehouse included several tanks

WESTERN STATES REFINING (Continued) **1000403001**

and vats which formerly contained cyanide, several storage sheds and a former drum staging area. Currently the site is abandoned. The Veta Grande Companies, filed for bankruptcy and have reorganized under the name "Forum Regroup. WSR began a silver and gold recovery operation primarily from x-ray film, with a small recovery percentage coming from electronic circuit boards. In the process, cyanide solution was used to strip gold and silver from x-ray film. Hazardous substances previously stored, handled and disposed at the site include cyanide, oxidizers, heavy metals, flammable liquids, ammonium hydroxide and organic solvents.

Background Info:	Western States Refining (WSR) was a metal recovery facility that operated from 1979 to 1984. Historical information concerning previous operations at the site are incomplete. WSR recovered precious metals from x-ray film and electronic circuit boards. A cyanide solution, among other chemicals, was used to strip the metals. In 1985, the Department and the San Bernardino County Department of Health conducted a joint inspection of the site and identified hundreds of drums and containers in deteriorated condition. These drums and containers contained cyanide, sulfides, heavy metals, caustics, and acids. Six large storage tanks containing cyanides and heavy metals were observed leaking onto the cracked berm area and into a nearby trench. Extensive soil contamination was also discovered. In 1986, EPA and the U.S. Coast Guard completed an emergency removal of the containers and residual cyanide contamination. Approximately 600 drums and containers were removed. The six leaking storage tanks were removed and two other 35,000 gallon storage tanks were emptied but not removed. In 1987, DHS issued a remedial action order to WSR directing them to cleanup the facility. The company refused and filed for bankruptcy. DHS found WSR in noncompliance with the order and initiated legal action. A settlement agreement was reached in 1989. Under the settlement, the RPs will pay up to $750,000 towards cleanup costs. Any other costs incurred by the Department will be recovered from the proceeds of the sale of the property once the property is certified. Phase I and Phase II RIs have been completed. Phase I confirmem cyanide, asbestos, and low level heavy metal contamination.

Environmental Interest/Information System:
California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
ICIS (Integrated Compliance Information System) is the Integrated

WESTERN STATES REFINING (Continued) **1000403001**

Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Project Revenue Source Desc:	The RP's have been found to be in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. DHS will undertake appropriate cost recovery actions. This site has not been identified as an NPL site, nor does it appear to be likely NPL candidate in the future. However, federal funds were made available for the

WESTERN STATES REFINING (Continued) **S100833388**

interim measures completed in 1986.

Site Description: This facility formerly recovered precious metals from photographic film using a cyanide and acid leaching process.

Hazardous Waste Desc: Hazardous substances were stored in various decomposing containers and tanks that resulted in soil contamination. The contaminants include cyanide solids and liquids, acids, metallic materials and volatile organic compounds.

Threat To Public Health & Env: There is threat of human exposure to toxic air emissions and contact with surface water runoff. There is a potential for contamination of the ground water which is used extensively as a domestic supply in the area. There is no known exposure at thistime.

Site Activity Status: Extensive soil contamination at the facility was discovered in 1985. In 1986, DHS and EPA initiated interim remedial measures consisting of drum repacking and provision of guard service. DHS directed Western States Refining to mitigate the contamination in an October, 1987 order. The company refused and filed for bankruptcy. DHS found Western States Refining in noncompliance with the order in December, 1987. DHS initiated RI/FS activities in October, 1988.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 03/18/2020
Date Data Arrived at EDR: 03/19/2020
Date Made Active in Reports: 06/09/2020
Number of Days to Update: 82

Source: Drug Enforcement Administration
Telephone: 202-307-1000
Last EDR Contact: 08/19/2020
Next Scheduled EDR Contact: 12/07/2020
Data Release Frequency: No Update Planned

HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005
Date Data Arrived at EDR: 08/03/2006
Date Made Active in Reports: 08/24/2006
Number of Days to Update: 21

Source: Department of Toxic Substance Control
Telephone: 916-323-3400
Last EDR Contact: 02/23/2009
Next Scheduled EDR Contact: 05/25/2009
Data Release Frequency: No Update Planned

SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 07/27/2020
Date Data Arrived at EDR: 07/27/2020
Date Made Active in Reports: 10/08/2020
Number of Days to Update: 73

Source: Department of Toxic Substances Control
Telephone: 916-323-3400

Telephone: 916-255-6504
Last EDR Contact: 10/20/2020
Next Scheduled EDR Contact: 01/18/2021
Data Release Frequency: Varies

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995
Date Data Arrived at EDR: 08/30/1995
Date Made Active in Reports: 09/26/1995
Number of Days to Update: 27

Source: State Water Resources Control Board
Telephone: 916-227-4364
Last EDR Contact: 01/26/2009
Next Scheduled EDR Contact: 04/27/2009
Data Release Frequency: No Update Planned

CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 07/20/2020
Date Data Arrived at EDR: 07/21/2020
Date Made Active in Reports: 10/07/2020
Number of Days to Update: 78

Source: CalEPA

Last EDR Contact: 10/19/2020
Next Scheduled EDR Contact: 02/01/2021
Data Release Frequency: Quarterly

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/18/2020
Date Data Arrived at EDR: 03/19/2020
Date Made Active in Reports: 06/09/2020

Local Land Records

LIENS: Environmental Liens Listing
A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 05/28/2020
Date Data Arrived at EDR: 05/29/2020
Date Made Active in Reports: 08/12/2020
Number of Days to Update: 75

Source: Department of Toxic Substances Control
Telephone: 916-323-3400
Last EDR Contact: 08/25/2020
Next Scheduled EDR Contact: 12/14/2020
Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information
A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 07/29/2020
Date Data Arrived at EDR: 08/03/2020
Date Made Active in Reports: 08/25/2020

Next Scheduled EDR Contact: 01/11/2021
Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 06/01/2020

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

HWT: Registered Hazardous Waste Transporter Database

A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation:	1094 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5619058 FONTANA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

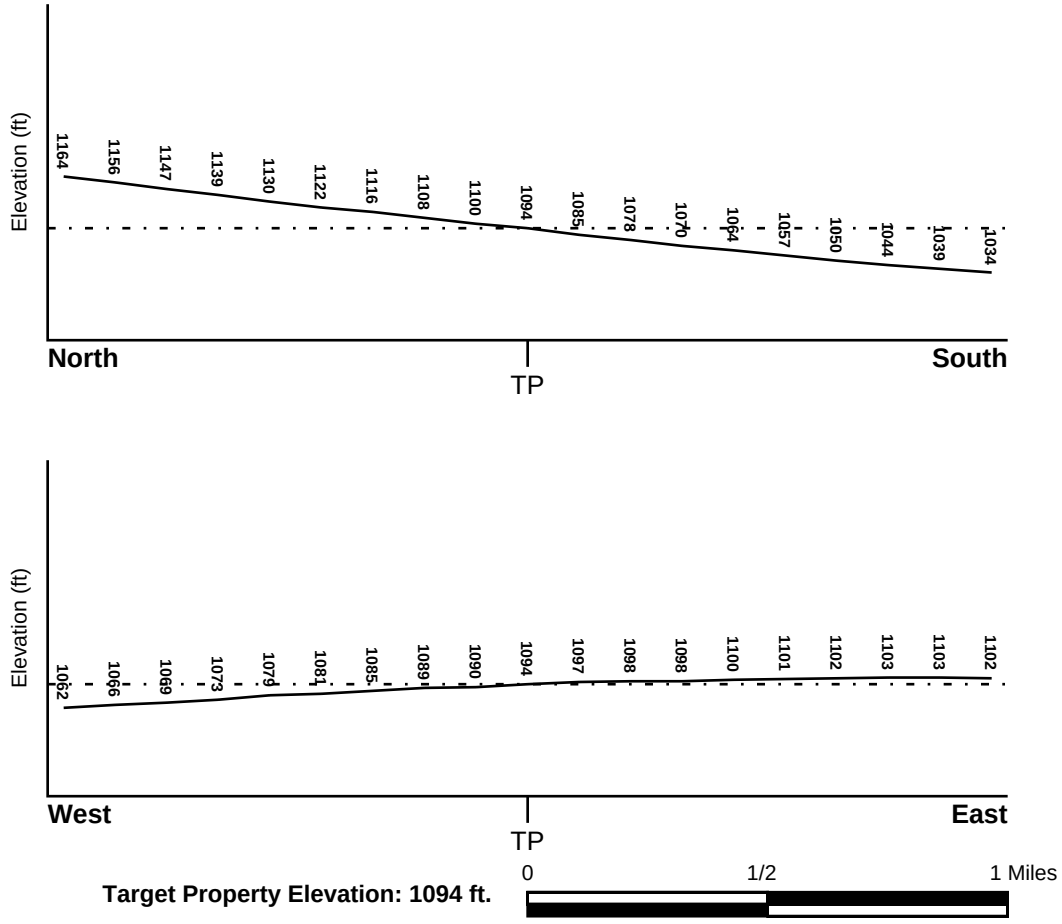

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 1094 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06071C8654H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

06071C8666H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
FONTANA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	18 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Trustee's Deed Upon Sale

A.P.N.: **0251-164-15-0-000**

THE UNDERSIGNED GRANTOR DECLARES:
The grantee herein **WASNT** the foreclosing beneficiary.
The amount of the unpaid debt together with costs was: **$433,670.38**
The amount paid by the grantee at the trustee sale was: **$370,000.00**
The documentary transfer tax is: $ 407.00
Said property is in the City of: **FONTANA**, County of **SAN BERNARDINO**

QUALITY LOAN SERVICE CORPORATION as Trustee, (whereas so designated in the Deed of Trust hereunder more particularly described or as duly appointed Trustee) does hereby **GRANT** and **CONVEY** to:

DLI Properties LLC

(herein called Grantee) but without covenant or warranty, expressed or implied, all right title and interest conveyed to and now held by it as Trustee under the Deed of Trust in and to the property situated in the county of **SAN BERNARDINO**, State of California, described as follows:

THE EAST 120 FEET OF THE NORTH ONE-HALF OF THE WEST ONE-HALF OF THE WEST ONE HALF OF FARM LOT NO. 742, ACCORDING TO MAP SHOWING SUBDIVISIONS OF LAND BELONGING TO THE SEMITHROPIC LAND AND WATER COMPANY, AS PER PLAT RECORDED IN BOOK 11 OF MAPS, PAGE 12, RECORDS OF SAID COUNTY.

EXCEPTING THEREFROM THE NORTHERLY 6 FEET
COMMONLY KNOWN AS: 16345 BOYLE AVENUE, FONTANA, CA 92337
This conveyance is made in compliance with the terms and provisions of the Deed of Trust executed by **JOANNA PAYNE-JONES, AN UNMARRIED WOMAN**, as trustor, dated **11/30/2006**, and recorded on **12/7/2006** as **Instrument No. 2006-0844874** of Official Records in the office of the Recorder of **SAN BERNARDINO**, California, under the authority and powers vested in the Trustee designated in the Deed of Trust or as the duly appointed trustee, default having occurred under the Deed of Trust pursuant to the Notice of Breach and Election to Sell under the Deed of Trust recorded on **4/4/2014**, instrument no **2014-118998**, of Official records. The Trustee of record at the relevant time having complied with all applicable statutory requirements of the State of California and performed all duties required by the Deed of Trust including sending a Notice of Default and Election to Sell within

mail taxes to same as above

ten/thirty days after its recording and a Notice of Sale at least twenty days prior to the Sale Date by certified mail, postage pre-paid to each person entitled to notice in compliance with California Civil Code 2924b.

Default occurred as set forth in a Notice of Default and Election to Sell which was recorded in the office of the Recorder of said County.

All requirements of law regarding the mailing of copies of notices or the publication of a copy of the Notice of Default or the personal delivery of the copy of the Notice of Default and the posting and publication of copies of the Notice of Sale have been complied with.

Said property was sold by said Trustee at public auction on **9/30/2016** at the place named in the Notice of Sale, in the County of **SAN BERNARDINO,** California, in which the property is situated. Grantee, being the highest bidder at such sale, became the purchaser of said property and paid therefore to said trustee the amount being **$370,000.00** in lawful money of the United States, or by the satisfaction, pro tanto, of the obligations then secured by said Deed of Trust.

QUALITY MAY BE CONSIDERED A DEBT COLLECTOR ATTEMPTING TO COLLECT A DEBT AND ANY INFORMATION OBTAINED WILL BE USED FOR THAT PURPOSE.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

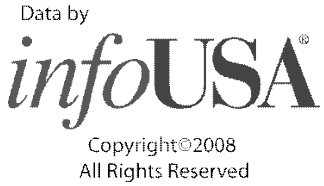

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

FONTANA, CA 92337
EDR Inquiry # 6251875.3

Client Name:

APEX Environmental
15850 Crabbs Branch Way
Rockville, MD 20855
Contact: Tania Cowden

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by APEX Environmental were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of APEX Environmental on Nov 03, 2020.

TARGET PROPERTY

16398 BOYLE AVE
FONTANA, CA 92337

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

APPENDIX J

SITE RECONNAISSANCE PHOTOGRAPHS AND FIELD FORM

Photograph 1 Description: Front of the site property (north side of the buildings [residences]; parking lot to the southeast). Picture faces south and taken from shoulder next/parallel to Boyle Avenue.	
Photograph 2 Description: Backyard of both residences Picture faces east and taken from dirt driveway.	
Photograph 3 Description: Storage area behind backyard of residences. Picture shows old AST (presumed empty), with empty 55-gallon drum (empty). Picture faces east, asphalt driveway in the background.	

Photograph 4 Description: Closeup of AST manufacturer tag. Unable to determine unit number of the AST.	
Photograph 5 Description: Closeup of 5-gallon buckets of Acrylatex Graffiti Remover. Only chemicals/fuels that were found on Site.	
Photograph 8 Description: Rear of the property, asphalt patch with two truck trailers and one RV trailer. Picture faces southeast.	

Photograph 9

Description: Rear of the property, concrete patch with RV parked on top. Potted trees/small plants scattered throughout photo. Misc. items stored along western edge of the property. Picture faces south.

Photograph 10

Description: Closeup of misc. items stored in southwest corner of the property. Caliber Collision seen in the rear of the photo. Picture faces southwest.

Photograph 12

Description: Asphalt driveway with residence on the left side of the picture and fence of eastern property line with palm trees. Photo faces north.

Photograph 1 Description: Southern facing photo showing the main entrance to the "L-Shaped+ residence property.	
Photograph 2 Description: Front of the site property (north side of the building [residence]; parking lot to the north). Picture faces east and taken from just inside the property sidewalk next/parallel to Boyle Avenue.	
Photograph 3 Description: Walkway to get behind the house, located on the west side of the residence. Photo faces south and taken just from inside the fence of the property.	

Photograph 4 Description: Photo faces south towards the back of the property. Large trees and a small storage shed can be seen. Storage shed had gardening old gardening equipment inside.	
Photographs 5 and 6 Description: Additional pictures of the rear of the property. Concrete sidewalk seen in one picture.	 
Photograph 7 Description: Open space in the very back of the property. Shares fence with Caliber Collision on Stover Road.	

Photograph 8

Description: Photo is facing north from the fence at the rear of the property. Residence can be seen in the background.

Photograph 9

Description: Small concrete pad located on the eastern side of the property behind the residence. Photo is facing south.

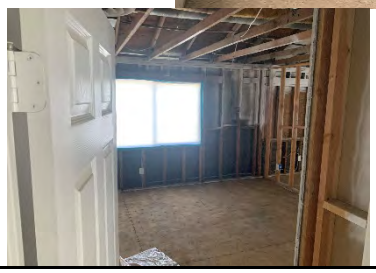

Photographs 10 and 11

Description: Photos taken from inside the residence.

Photographs 12 and 13 Description: Additional photos taken from inside of the house.	 
Photograph 14 Description: Photo of the heater located inside the house.	
Photographs 15 and 16 Description: More photos from interior of the residence.	 

Photograph 1 Description: Contact information for current property owners found on the front of the office building at the front of the property. Photo is facing north.	
Photograph 2 Description: Asphalt parking lot located on the eastern side of the property. Leads to a gravel storage area where equipment is stored.	
Photograph 3 Description: Three portable offices and one RV trailer seen stored behind the office building. Photo is facing west.	

Photograph 4 Description: Sewer manhole and other square lid found behind office building. Neither manholes were opened.	
Photograph 5 Description: Maintenance garage in the northeast corner of the property. Garage used to service equipment and vehicles store on the property. Was not able to gain access inside the garage to take pictures. Suspected office connected to the garage.	
Photographs 6 and 7 Description: Examples of types of equipment/vehicles being store in the rear of the property.	 

Photographs 8 and 9

Description: Storage garage located on the northeast end of the property. Used to store parts/tools and small amount of chemicals.

Photograph 10

Unlabeled tote located on the northern end of the mechanical garage. Staining witnessed on the concrete underneath the tote.

Photograph 11

Description: 55-gallon drum of a solvent. Drum was full and stored near the plastic tote.

Photograph 12

Description: Propane sign located on the mechanical garage. No sign of where the propane tank was located, perhaps inside. Compressed air hose also located in picture.

Photograph 13

Description: Fuel storage cabinet located on the outside of the garage. Looks to have gas/diesel cans inside the cabinet.

Photographs 14

Description: Photo looks north along the western edge of the property. Gravel road goes around equipment on the rear of the property.

Photograph 15

Description: Gravel loading/unloading ramp for trucks located at the rear of the property. Photo faces north.

Photographs 16 and 17

Description: Suspected fueling tank located in the northeast corner of the property. Due to the location of the tank, unable to determine capacity of the tank, what the tank held, and any other details.

Photographs 18 and 19

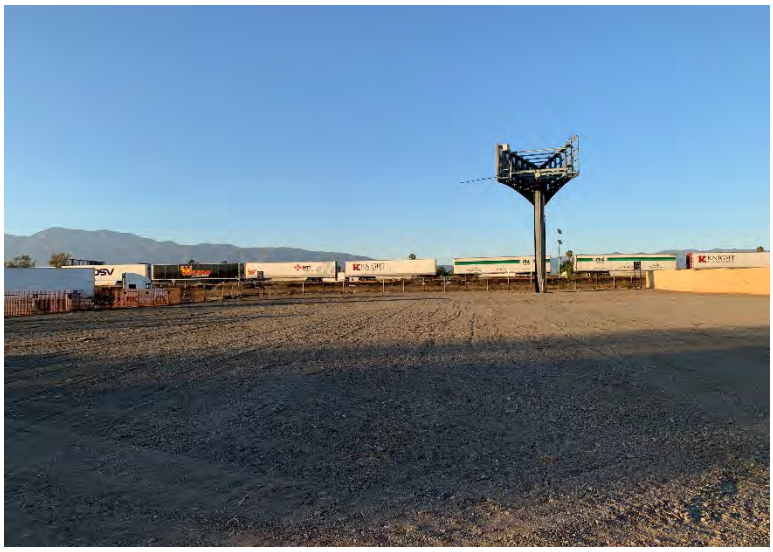

Description: Witnessed staining on the ground throughout the rear of the property (mainly around/under where the construction equipment/vehicles are stored).

Photographs 20 and 21 Description: Additional staining found throughout the yard where the construction equipment/vehicles are stored.	 

Photograph 1 Description: Front of the site property (northwest side of the building [residence]; parking lot to the northwest). Picture faces northwest and taken from sidewalk next/parallel to Boyle Avenue.	
Photograph 2 Description: Overview of gravel driveway to the east of the residence. Photo faces north with eastern property line seen on the right of the picture.	
Photograph 3 Description: Backyard of residence shown with a concrete pad shown towards the rear of the property. Photo faces northwest.	

Photograph 4 Description: Closeup of concrete pad towards the rear of the property, no sump or drainage grate witnessed on/near concrete pad. Photo faces northwest.	
Photograph 5 Description: Gravel open area in rear of the property. No staining witnessed in gravel area. Billboard and train seen in the background. Photo is facing north.	
Photograph 6 Description: Closeup of the steel pole supporting the billboard. Power box can be seen on the pole to provide electricity to billboard. Subsurface electrical line suspected.	

Photograph 7

Description: Debris and misc. items store along western property line. Trucks being stored on adjacent property can be seen in the background. Photo is facing southwest.

Photograph 8

Description: Overview of western side of the residence. Misc. items stored around the property. Electrical lines seen going into residence. Photo is facing southeast.

Photograph 9

Description: Entrance/Exit of property blocked with a chain and a truck. Photo is facing south with Boyle Ave in the background.

Photograph 1 Description: Gravel driveway at the front of the site property (northwest side of the buildings [residences/garages]). Picture faces north and taken from sidewalk next/parallel to Slover Avenue.	
Photograph 2 Description: Front of the Site property between the residence and northern property line. Picture faces east and the front of the residence can be seen in the photo.	
Photographs 3 and 4 Description: Storage area near garage on the property. Misc. items and trash found on the floor.	

Photographs 5 and 6 Description: Interior of storage garage located on western side of property. Old tires seen stored inside the garage.	
Photograph 7 Description: Rear of the Site property with gravel driveway and weeds can be seen. Photo was taken facing east.	
Photograph 8 Description: Water spicket seen in the weeds located in the rear of the property. Northern fence line seen in the background. Photo is facing northwest.	

Photographs 9 and 10

Description: Interior of second storage garage (different building from photographs 5 and 6) on the property. Photos show misc. chemicals (antifreeze) and misc. mechanical parts/equipment.

Photographs 11 and 12

Description: Interior of second storage garage (different building from photographs 5 and 6) on the property. Photos show oil filters and 5-gallon buckets diesel engine oil. Majority of the 5-gallon buckets were empty, but some still had oil in them.

Photograph 13

Description: Approximately 300-gallon plastic tote located in the second storage garage. Petroleum suction hose seen in the photo so the tank could have been used to suck out dirty oil from diesel trucks. No visible staining underneath the tote. Tank is now empty.

Photograph 14

Description: Approximately 300-gallon plastic tote which was filled with soybean oil. Tank is now empty. No visible staining underneath the tote.

Photographs 15 and 16

Description: Misc. chemicals/fuels found inside second storage garage.

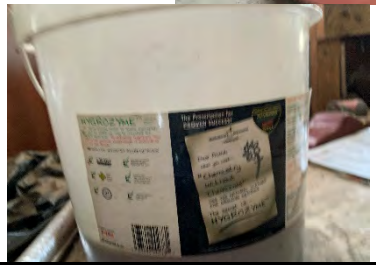

Photographs 17 and 18

Description: Additional misc. chemicals/fuels found inside second storage garage.

Photographs 19 and 20

Description: Misc items and trash found inside the second storage garage.

Photograph 21

Description: Photo of second residence located in the center of the property. This building is located behind the first residence. Concrete pad with a parked forklift can be seen in the foreground.

Photograph 22

Description: Interior of second residence in the center of the property. Small amount of building materials found inside the residence.

Photographs 23 and 24 Description: Interior of third storage garage located on the western end of the property. Large trailer and old tires can be found in the photo.	
Photograph 25 Description: Small burned area found on the ground in the southwest portion of the property. Looks like organic material was burned in this area.	
Photograph 26 Description: Small area in southwest portion of the Site where backfill material was located. After further conversations, it was found that a geotechnical drill rig was on Site recently to collect samples.	

Photograph 27 Description: Photo from the rear of the property looking at the second storage garage and second residence. Also seen, concrete pad with forklift parked on it. Photo is facing southeast.	
Photograph 28 Description: Power lines, located on the eastern side of the property, power lines going to both residences. Photo is facing west.	
Photograph 29 Description: Concrete pad located in the northwest corner of the Site. Fencing from western and norther property lines can also be seen.	

Photograph 30 Description: Water heater and unlabeled drum laying down outside near a storage garage.	
Photograph 31 Description: Unlabeled drum lying on the ground with oily residue coated on the inside of it.	
Photograph 32 Description: Empty 55-gallon drum of soybean oil standing next to old tires.
