PROPOSAL TERMS: All work shall be performed in accordance with State and Federal regulations pertaining to abatement of hazardous materials including transport and disposal of waste. PARC carries liability, workers compensation and auto insurance. Unless otherwise stated, the customer agrees to supply sufficient water and electricity at no cost to PARC; the customer acknowledges that abatement requires the application of tape and agrees that PARC will not be held responsible for tape damage or for repainting; unless otherwise stated this bid is based on performing the work during regular work hours; PARC shall not be responsible for weather protection or for damages resulting from weather or vandalism; this proposal is subject to change and may be withdrawn if not accepted within 30 days of the above date.

PAYMENT TERMS: Cash forthwith for any portion of work commenced and completed in any one calendar month. Balance of contract price due and payable within 10 calendar days upon completion of PARC's work. Unpaid monies shall be subject to a finance charge of 2% per month. The customer agrees to compensate PARC for any collection-related costs, including reasonable attorney fees, if full payment is not made to PARC. The customer agrees that the court of jurisdiction, for any claim, shall be located in Alameda County.

Project Data Sheet

PROJECT DATA SHEET

CLIENT:	Macerich Management Company Santa Monica, California
MACERICH REPRESENTATIVES:	Mr. Aladdin Ghafari
PROJECT LOCATION:	The Mall at Northgate – Various Spaces
DESCRIPTION OF WORK:	

Package, transport & dispose of regulated waste from the site to include:

- The provision of accredited Hazardous Waste Operations and Emergency Response (HazWOpER) Technicians at the site to perform all tasks.
- Appropriate packaging, transport and disposal of the waste identified in the inventory provided.
- Preparation of all Uniform Hazardous Waste Manifest for this component of the project.
- All costs associated with transportation and disposal of the waste at an appropriately permitted facility.

ADDED ITEMS BELOW-

1. Line Item #1 – Waste Aerosol Cans (2x5-gallon drums)
2. Line Item #4 – Toxic Liquids (1x5-gallon drum)
3. Line Item #5 – Hydrochloric Acid (1x5-gallon drum) /
4. Line Item #8 – Waste Latex Paint & Related Material (2x55-gallon drums) / While there were items on the inventory sheet that met this waste criteria, the material that was at the site exceeded what was on the inventory sheet. Planned quantities included 15x1 gallon cans and 1x5-gallon can. This original quantity would have fit into 1x55-gallon drum as a loose pack. However because of the additional material identified for disposal, it became necessary to generate an additional 2x55-gallon drums.
5. Line Item #9 – Waste Oil (1x5-gallon drum)

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED – OWNERS, LESSEES OR CONTRACTORS – SCHEDULED PERSON OR ORGANIZATION

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Name Of Additional Insured Person(s) Or Organization(s)	Location(s) Of Covered Operations
Where Required By Written Contract	
Information required to complete this Schedule, if not shown above, will be shown in the Declarations.	

A. Section II – Who Is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by:

1. Your acts or omissions; or
2. The acts or omissions of those acting on your behalf;

in the performance of your ongoing operations for the additional insured(s) at the location(s) designated above.

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and
2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

B. With respect to the insurance afforded to these additional insureds, the following additional exclusions apply:

This insurance does not apply to "bodily injury" or "property damage" occurring after:

1. All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or
2. That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

© Insurance Services Office, Inc., 2012

C. With respect to the insurance afforded to these additional insureds, the following is added to **Section III – Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

1. Required by the contract or agreement; or

2. Available under the applicable Limits of Insurance shown in the Declarations;

whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declarations.

© Insurance Services Office, Inc., 2012

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED – OWNERS, LESSEES OR CONTRACTORS – COMPLETED OPERATIONS

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART
PRODUCTS/COMPLETED OPERATIONS LIABILITY COVERAGE PART

SCHEDULE

Name Of Additional Insured Person(s) Or Organization(s)	Location And Description Of Completed Operations
Where Required By Written Contract	
Information required to complete this Schedule, if not shown above, will be shown in the Declarations.	

A. Section II – Who Is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury" or "property damage" caused, in whole or in part, by "your work" at the location designated and described in the Schedule of this endorsement performed for that additional insured and included in the "products-completed operations hazard".

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and
2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

B. With respect to the insurance afforded to these additional insureds, the following is added to **Section III – Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

1. Required by the contract or agreement; or
2. Available under the applicable Limits of Insurance shown in the Declarations;

whichever is less.

This endorsement shall not increase the applicable Limits of Insurance shown in the Declarations.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

DESIGNATED INSURED

This endorsement modifies insurance provided under the following:

BUSINESS AUTO COVERAGE FORM
GARAGE COVERAGE FORM
MOTOR CARRIER COVERAGE FORM
TRUCKERS COVERAGE FORM

With respect to coverage provided by this endorsement, the provisions of the Coverage Form apply unless modified by this endorsement.

This endorsement identifies person(s) or organization(s) who are "insureds" under the Who Is An Insured Provision of the Coverage Form. This endorsement does not alter coverage provided in the Coverage Form.

This endorsement changes the policy effective on the inception date of the policy unless another date is indicated below.

Endorsement Effective: 01/01/2014	Countersigned By:
Named Insured: Professional Asbestos Removal Corporation	(Authorized Representative)

SCHEDULE

Name of Person(s) or Organization(s):

(If no entry appears above, information required to complete this endorsement will be shown in the Declarations as applicable to the endorsement.)

Each person or organization shown in the Schedule is an "insured" for Liability Coverage, but only to the extent that person or organization qualifies as an "insured" under the Who Is An Insured Provision contained in **Section II** of the Coverage Form.

Copyright, Insurance Services Office, Inc., 1998

Starr Indemnity & Liability Company

Dallas, TX 1-866-519-2522

Primary and Non-contributory, Additional Insured and Waiver of Subrogation

Policy Number: SISIEIL70145414 **Effective Date:** 1/1/2014 at 12:01 A.M.
Named Insured: PROFESSIONAL ASBESTOS REMOVAL CORPORATION

This endorsement modifies the insurance coverage form(s) listed below that have been purchased by you and evidenced as such on the Declarations page. Please read the endorsement and respective policy(ies) carefully.

Commercial General Liability Coverage Form
Owners and Contractors Protective Liability Coverage form
Products/Completed Operations Liability Coverage Form
Contractors Pollution Liability Coverage Form
Professional Liability Coverage Form
Site Pollution Liability Coverage Form

SCHEDULE
All as required by written, signed or executed contract.

A. **SECTION II - WHO IS AN INSURED** is amended to include as an insured the person or organization shown in the schedule of this endorsement, but only with respect to liability arising out of "your work" for that insured by or for you.

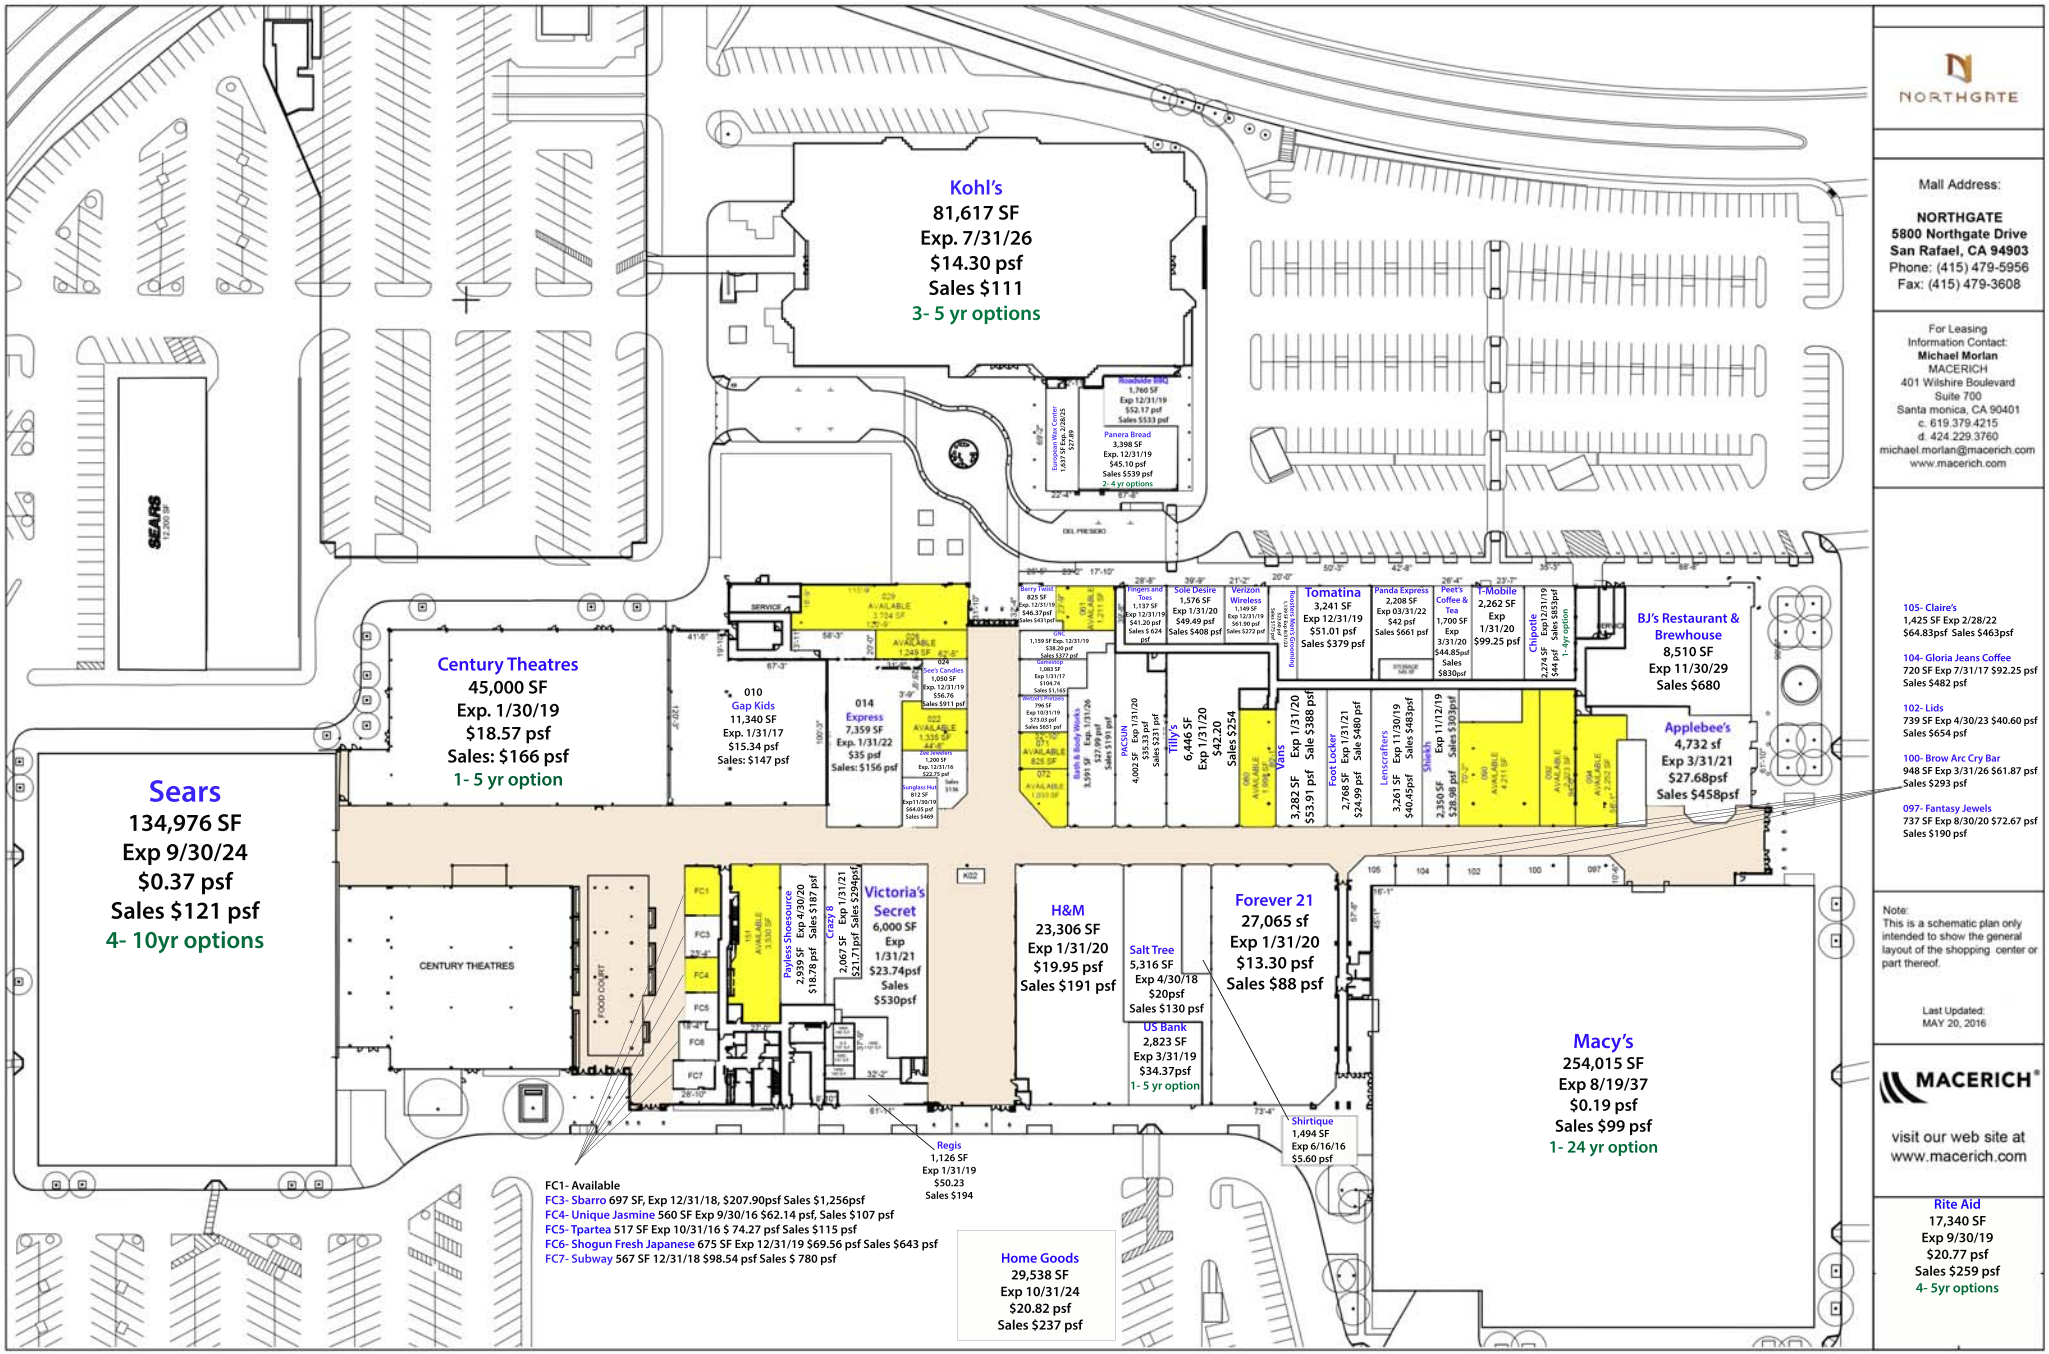
B. As respects additional insureds as defined above, this insurance also applies to "bodily injury" or "property damage" arising out of your negligence when the following written contract requirements are applicable:

1. Coverage available under this coverage part shall apply as primary insurance. Any other insurance available to these additional insured's shall apply as excess and not contribute as primary to the insurance afforded by this endorsement.

2. We waive any right of recovery we may have against these additional insured's because of payments we make for injury or damage arising out of "your work" done under a written contract with the additional insured.

3. The term insured is used separately and not collectively, but the inclusion of more than one insured shall not increase the limits or coverage provided by this insurance.

Insureds and Agents are advised that certificates of insurance should be used only to provide evidence of insurance in lieu of an actual copy of the applicable insurance policy. Certificates should not be used to amend, expand or otherwise alter the terms of the actual policy.



ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.

COMMITMENT FOR TITLE INSURANCE

Issued by

Commonwealth Land Title Insurance Company

Commonwealth Land Title Insurance Company, a Nebraska corporation ("Company"), for a valuable consideration, commits to issue its policy or policies of title insurance, as identified in Schedule A, in favor of the Proposed Insured named in Schedule A, as owner or mortgagee of the estate or interest in the land described or referred to in Schedule A, upon payment of the premiums and charges and compliance with the Requirements; all subject to the provisions of Schedules A and B and to the Conditions of this Commitment.

This Commitment shall be effective only when the identity of the Proposed Insured and the amount of the policy or policies committed for have been inserted in Schedule A by the Company.

All liability and obligation under this Commitment shall cease and terminate 6 months after the Effective Date or when the policy or policies committed for shall issue, whichever first occurs, provided that the failure to issue the policy or policies is not the fault of the Company.

The Company will provide a sample of the policy form upon request.

IN WITNESS WHEREOF, Commonwealth Land Title Insurance Company has caused its corporate name and seal to be affixed by its duly authorized officers on the date shown in Schedule A.

56. Water rights, claims or title to water, whether or not disclosed by the public records.

57. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

58. The Company will require an ALTA/NSPS LAND TITLE SURVEY. If the owner of the Land the subject of this transaction is in possession of a current ALTA/NSPS LAND TITLE SURVEY, the Company will require that said survey be submitted for review and approval; otherwise, a new survey, satisfactory to the Company, must be prepared by a licensed land surveyor and supplied to the Company prior to the close of escrow.

The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

59. Any lien or right to a lien for services, labor or material heretofore or hereafter furnished, imposed by law and not shown by the Public Records.

File No: 09170504

INFORMATIONAL NOTES SECTION

1. The information on the attached plat is provided for your convenience as a guide to the general location of the subject property. The accuracy of this plat is not guaranteed, nor is it a part of any policy, report or guarantee to which it may be attached.

2. For wiring Instructions please contact your Title Officer or Title Company Escrow officer.

3. Note: The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land a Commercial property, known as **5800 Northgate Mall**, **San Rafael, CA**, to an Extended Coverage Loan Policy.

4. Note: The name(s) of the proposed insured(s) furnished with this application for title insurance is/are:

   No names were furnished with the application. Please provide the name(s) of the buyers as soon as possible.

5. Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.

6. Note: The charge for a policy of title insurance, when issued through this application for title insurance, will be based on the Short Term Rate.

7. Note: The City of San Rafael imposes a transfer tax of $2.00 per thousand, based on the full value of the property at the time a deed or other transfer is recorded. This is in addition to the $1.10 per thousand County transfer tax.

8. Your application for title insurance was placed by reference to only a street address or tax identification number. Based on our records, we believe that the legal description in this report covers the parcel(s) of Land that you requested. If the legal description is incorrect, the seller/borrower must notify the Company and/or the settlement company in order to prevent errors and to be certain that the correct parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

9. Note: If a county recorder, title insurance company, escrow company, real estate broker, real estate agent or association provides a copy of a declaration, governing document or deed to any person, California law requires that the document provided shall include a statement regarding any unlawful restrictions. Said statement is to be in at least 14-point bold face type and may be stamped on the first page of any document provided or included as a cover page attached to the requested document. Should a party to this transaction request a copy of any document reported herein that fits this category, the statement is to be included in the manner described.

10. Note: Any documents being executed in conjunction with this transaction must be signed in the presence of an authorized Company employee, an authorized employee of an agent, an authorized employee of the insured lender, or by using Bancserv or other approved third-party service. If the above requirement cannot be met, please call the Company at the number provided in this report.

CONDITIONS

1. The term mortgage, when used herein, shall include deed of trust, trust deed, or other security instrument.

2. If the proposed Insured has or acquired actual knowledge of any defect, lien, encumbrance, adverse claim or other matter affecting the estate or interest or mortgage thereon covered by this Commitment other than those shown in Schedule B hereof, and shall fail to disclose such knowledge to the Company in writing, the Company shall be relieved from liability for any loss or damage resulting from any act of reliance hereon to the extent the Company is prejudiced by failure to so disclose such knowledge. If the proposed Insured shall disclose such knowledge to the Company, or if the Company otherwise acquires actual knowledge of any such defect, lien, encumbrance, adverse claim or other matter, the Company at its option may amend Schedule B of this Commitment accordingly, but such amendment shall not relieve the Company from liability previously incurred pursuant to paragraph 3 of these Conditions.

3. Liability of the Company under this Commitment shall be only to the named proposed Insured and such parties included under the definition of Insured in the form of policy or policies committed for and only for actual loss incurred in reliance hereon in undertaking in good faith (a) to comply with the requirements hereof, or (b) to eliminate exceptions shown in Schedule B, or (c) to acquire or create the estate or interest or mortgage thereon covered by this Commitment. In no event shall such liability exceed the amount stated in Schedule A for the policy or policies committed for and such liability is subject to the insuring provisions and Conditions and the Exclusions from Coverage of the form of policy or policies committed for in favor of the proposed Insured which are hereby incorporated by reference and are made a part of this Commitment except as expressly modified herein.

4. This Commitment is a contract to issue one or more title insurance policies and is not an abstract of title or a report of the condition of title. Any action or actions or rights of action that the proposed Insured may have or may bring against the Company arising out of the status of the title to the estate or interest or the status of the mortgage thereon covered by this Commitment must be based on and are subject to the provisions of this Commitment.

5. The policy to be issued contains an arbitration clause. All arbitrable matters when the Amount of Insurance is $2,000,000 or less shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. You may review a copy of the arbitration rules at <http://www.alta.org/>.

Commonwealth Land Title Company

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

FNF Underwritten Title Company
LTC – Lawyers Title Company

FNF Underwriter
CLTIC – Commonwealth Land Title Insurance Co.

Available Discounts

DISASTER LOANS (CLTIC)
The charge for a Lender's Policy (Standard or Extended coverage) covering the financing or refinancing by an owner of record, within 24 months of the date of a declaration of a disaster area by the government of the United States or the State of California on any land located in said area, which was partially or totally destroyed in the disaster, will be 50% of the appropriate title insurance rate.

EMPLOYEE RATE (LTC and CLTIC)
No charge shall be made to employees (including employees on approved retirement) of the Company or its underwritten, subsidiary or affiliated title companies for policies or escrow services in connection with financing, refinancing, sale or purchase of the employees' bona fide home property. Waiver of such charges is authorized only in connection with those costs which the employee would be obligated to pay, by established custom, as a party to the transaction.

FIDELITY NATIONAL FINANCIAL
PRIVACY NOTICE

At Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF", "our" or "we"), we value the privacy of our customers. This Privacy Notice explains how we collect, use, and protect your information and explains the choices you have regarding that information. A summary of our privacy practices is below. We also encourage you to read the complete Privacy Notice following the summary.

Types of Information Collected. You may provide us with certain personal information, like your contact information, social security number (SSN), driver's license, other government ID numbers, and/or financial information. We may also receive information from your Internet browser, computer and/or mobile device.	**How Information is Collected.** We may collect personal information directly from you from applications, forms, or communications we receive from you, or from other sources on your behalf, in connection with our provision of products or services to you. We may also collect browsing information from your Internet browser, computer, mobile device or similar equipment. This browsing information is generic and reveals nothing personal about the user.
Use of Your Information. We may use your information to provide products and services to you (or someone on your behalf), to improve our products and services, and to communicate with you about our products and services. We do not give or sell your personal information to parties outside of FNF for their use to market their products or services to you.	**Security Of Your Information**. We utilize a combination of security technologies, procedures and safeguards to help protect your information from unauthorized access, use and/or disclosure. We communicate to our employees about the need to protect personal information.
Choices With Your Information. Your decision to submit personal information is entirely up to you. You can opt-out of certain disclosures or use of your information or choose to not provide any personal information to us.	**When We Share Information.** We may disclose your information to third parties providing you products and services on our behalf, law enforcement agencies or governmental authorities, as required by law, and to parties with whom you authorize us to share your information.
Information From Children. We do not knowingly collect information from children under the age of 13, and our websites are not intended to attract children.	**Privacy Outside the Website.** We are not responsible for the privacy practices of third parties, even if our website links to those parties' websites.
Access and Correction. If you desire to see the information collected about you and/or correct any inaccuracies, please contact us in the manner specified in this Privacy Notice.	**Do Not Track Disclosures.** We do not recognize "do not track" requests from Internet browsers and similar devices.
The California Online Privacy Protection Act. Certain FNF websites collect information on behalf of mortgage loan servicers. The mortgage loan servicer is responsible for taking action or making changes to any consumer information submitted through those websites.	**International Use.** By providing us with your information, you consent to the transfer, processing and storage of such information outside your country of residence, as well as the fact that we will handle such information consistent with this Privacy Notice.
Your Consent To This Privacy Notice. By submitting information to us and using our websites, you are accepting and agreeing to the terms of this Privacy Notice.	**Contact FNF.** If you have questions or wish to contact us regarding this Privacy Notice, please use the contact information provided at the end of this Privacy Notice.

FIDELITY NATIONAL FINANCIAL, INC.
PRIVACY NOTICE

FNF respects and is committed to protecting your privacy. We pledge to take reasonable steps to protect your Personal Information (as defined herein) and to ensure your information is used in compliance with this Privacy Notice.

This Privacy Notice is only in effect for information collected and/or owned by or on behalf of FNF, including collection through any FNF website or online services offered by FNF (collectively, the "Website"), as well as any information collected offline (e.g., paper documents). The provision of this Privacy Notice to you does not create any express or implied relationship, nor create any express or implied duty or other obligation, between FNF and you.

Types of Information Collected

We may collect two types of information: Personal Information and Browsing Information.

Personal Information. The types of personal information FNF collects may include, but are not limited to:

- contact information (*e.g.*, name, address, phone number, email address);
- social security number (SSN), driver's license, and other government ID numbers; and
- financial account or loan information.

Browsing Information. The types of browsing information FNF collects may include, but are not limited to:

- Internet Protocol (or IP) address or device ID/UDID, protocol and sequence information;
- browser language;
- browser type;
- domain name system requests;
- browsing history;
- number of clicks;
- hypertext transfer protocol headers; and
- application client and server banners.

How Information is Collected

In the course of our business, we may collect *Personal Information* about you from the following sources:

- applications or other forms we receive from you or your authorized representative, whether electronic or paper;
- communications to us from you or others;
- information about your transactions with, or services performed by, us, our affiliates or others; and
- information from consumer or other reporting agencies and public records that we either obtain directly from those entities, or from our affiliates or others.

We may collect *Browsing Information* from you as follows:

- Browser Log Files. Our servers automatically log, collect and record certain Browsing Information about each visitor to the Website. The Browsing Information includes only generic information and reveals nothing personal about the user.
- Cookies. From time to time, FNF may send a "cookie" to your computer when you visit the Website. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. When you visit the Website again, the cookie allows the Website to recognize your computer, with the goal of providing an optimized user experience. Cookies may store user preferences and other information. You can choose not to accept cookies by changing the settings of your Internet browser. If you choose not to accept cookies, then some functions of the Website may not work as intended.

Use of Collected Information

Information collected by FNF is used for three main purposes:

- To provide products and services to you, or to one or more third party service providers who are performing services on your behalf or in connection with a transaction involving you;
- To improve our products and services; and
- To communicate with you and to inform you about FNF's products and services.

When We Share Information

We may share your Personal Information (excluding information we receive from consumer or other credit reporting agencies) and Browsing Information with certain individuals and companies, as permitted by law, without first obtaining your authorization. Such disclosures may include, without limitation, the following:

- to agents, representatives, or others to provide you with services or products you have requested, and to enable us to detect or prevent criminal activity, fraud, or material misrepresentation or nondisclosure;
- to third-party contractors or service providers who provide services or perform other functions on our behalf;
- to law enforcement or other governmental authority in connection with an investigation, or civil or criminal subpoenas or court orders; and/or
- to other parties authorized to receive the information in connection with services provided to you or a transaction involving you.

We may disclose Personal Information and/or Browsing Information when required by law or in the good-faith belief that such disclosure is necessary to:

- comply with a legal process or applicable laws;
- enforce this Privacy Notice;
- investigate or respond to claims that any information provided by you violates the rights of a third party; or
- protect the rights, property or personal safety of FNF, its users or the public.

We make efforts to ensure third party contractors and service providers who provide services or perform functions on our behalf protect your information. We limit use of your information to the purposes for which the information was provided. We do not give or sell your information to third parties for their own direct marketing use.

We reserve the right to transfer your Personal Information, Browsing Information, as well as any other information, in connection with the sale or other disposition of all or part of the

FNF business and/or assets, or in the event of our bankruptcy, reorganization, insolvency, receivership or an assignment for the benefit of creditors. You expressly agree and consent to the use and/or transfer of this information in connection with any of the above-described proceedings. We cannot and will not be responsible for any breach of security by any third party or for any actions of any third party that receives any of the information that is disclosed to us.

Choices With Your Information

Whether you submit your information to FNF is entirely up to you. If you decide not to submit your information, FNF may not be able to provide certain products or services to you. You may choose to prevent FNF from using your information under certain circumstances ("opt out"). You may opt out of receiving communications from us about our products and/or services.

Security And Retention Of Information

FNF is committed to protecting the information you share with us and utilizes a combination of security technologies, procedures and safeguards to help protect it from unauthorized access, use and/or disclosure. FNF trains its employees on privacy practices and on FNF's privacy and information security policies. FNF works hard to retain information related to you only as long as reasonably necessary for business and/or legal purposes.

Information From Children

The Website is meant for adults. The Website is not intended or designed to attract children under the age of thirteen (13). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

Privacy Outside the Website

The Website may contain links to other websites, including links to websites of third party service providers. FNF is not and cannot be responsible for the privacy practices or the content of any of those other websites.

International Users

Because FNF's headquarters is located in the United States, we may transfer your Personal Information and/or Browsing Information to the United States. By using our website and providing us with your Personal Information and/or Browsing Information, you understand and consent to the transfer, processing and storage of such information outside your country of residence, as well as the fact that we will handle such information consistent with this Privacy Notice.

Do Not Track Disclosures

Currently, our policy is that we do not recognize "do not track" requests from Internet browsers and similar devices.

The California Online Privacy Protection Act

For some websites which FNF or one of its companies owns, such as the Customer CareNet ("CCN"), FNF is acting as a third party service provider to a mortgage loan servicer. In those instances, we may collect certain information on behalf of that mortgage loan servicer, including:

- first and last name;
- property address;
- user name and password;
- loan number;
- social security number - masked upon entry;
- email address;
- security questions and answers; and
- IP address.

The information you submit is then transferred to your mortgage loan servicer by way of CCN. **The mortgage loan servicer is responsible for taking action or making changes to any consumer information submitted through this website. For example, if you believe that your payment or user information is incorrect, you must contact your mortgage loan servicer.**

CCN does not share consumer information with third parties, other than those with which the mortgage loan servicer has contracted to interface with the CCN application. All sections of this Privacy Notice apply to your interaction with CCN, except for the sections titled Choices with Your Information, and Access and Correction. If you have questions regarding the choices you have with regard to your personal information or how to access or correct your personal information, contact your mortgage loan servicer.

Access and Correction

To access your Personal Information in the possession of FNF and correct any inaccuracies, please contact us by email at privacy@fnf.com or by mail at:

Fidelity National Financial, Inc.
601 Riverside Avenue
Jacksonville, Florida 32204
Attn: Chief Privacy Officer

Your Consent To This Privacy Notice

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of information by FNF in compliance with this Privacy Notice. We reserve the right to make changes to this Privacy Notice. If we change this Privacy Notice, we will post the revised version on the Website.

Contact FNF

Please send questions and/or comments related to this Privacy Notice by email at privacy@fnf.com or by mail at:

CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.

7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% % of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 10,000.00
Covered Risk 18:	1.00% % of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or $5,000.00 (whichever is less)	$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or $2,500.00 (whichever is less)	$ 5,000.00

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13 or 14); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

(Except as provided in Schedule B - Part II,(t(or T)his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

(PART I

(The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:)

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
   (a) a fraudulent conveyance or fraudulent transfer; or
   (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

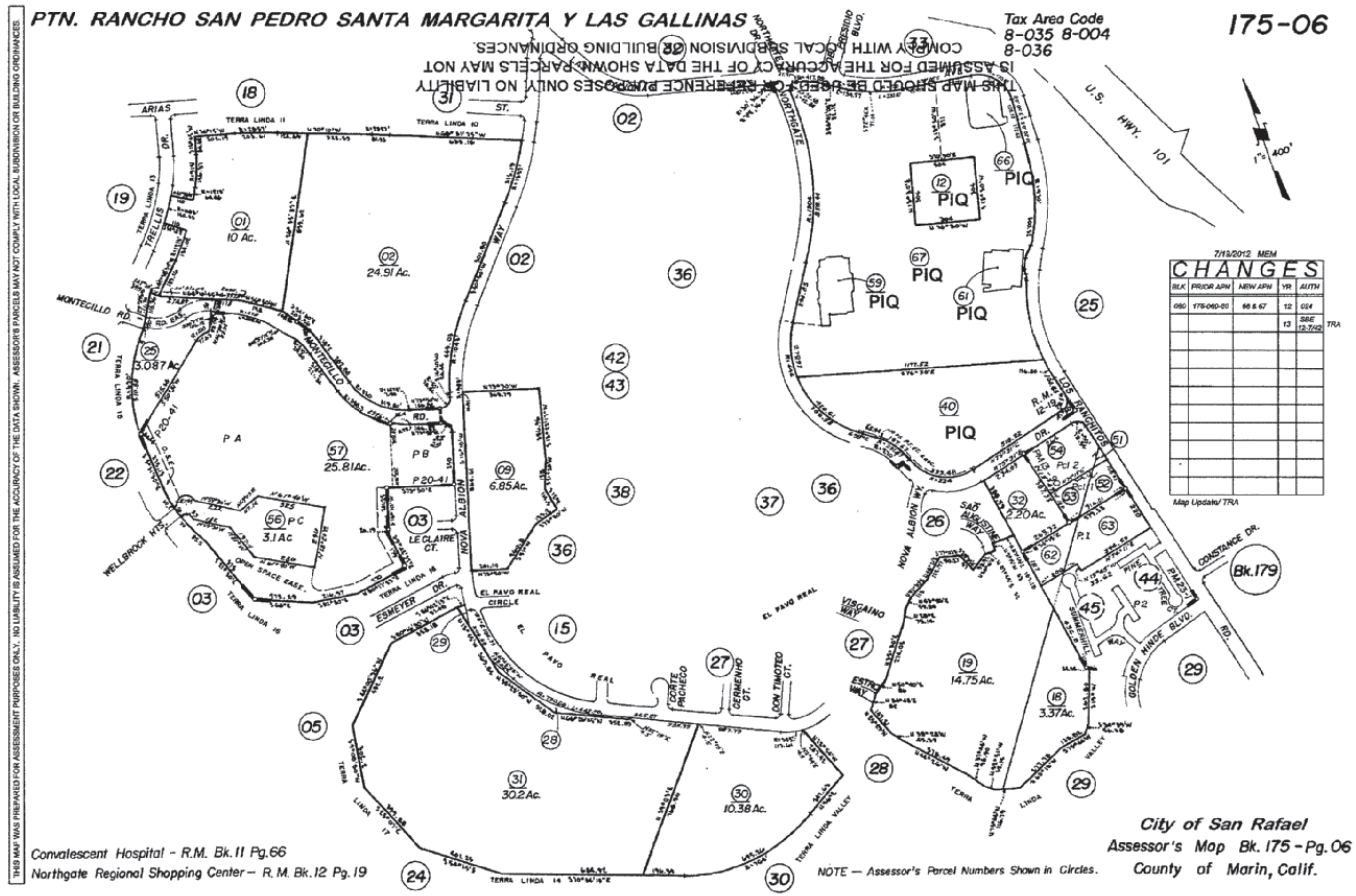
EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

(The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown in the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and that are not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.
7. (Variable exceptions such as taxes, easements, CC&R's, etc. shown here.)

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (12-02-13)



EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;
   (iii) the subdivision of land; or
   (iv) environmental protection;
   or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
   (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;

(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.

4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

"Important: This plat is not a survey. It is furnished as a Convenience to locate the land in relation to adjoining streets and other lands and NOT to guarantee any dimensions, distances, bearings, or acreage."

ALTA/NSPS LAND TITLE SURVEY

5800 NORTHGATE MALL
SAN RAFAEL, CALIFORNIA

LEGAL DESCRIPTION:

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE CITY OF SAN RAFAEL, COUNTY OF MARIN, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

PARCEL A

BEGINNING AT A POINT ON THE EASTERLY BOUNDARY OF NORTHGATE DRIVE, AS SHOWN ON THAT CERTAIN MAP ENTITLED, "MAP OF NORTHGATE REGIONAL SHOPPING CENTER", RECORDED SEPTEMBER 10, 1963 IN VOLUME 12 OF MAPS AT PAGE 19, MARIN COUNTY RECORDS, WHICH POINT IS THE SOUTHERLY TERMINUS OF THE COURSE "N 32° 00' 00" E. 294.85", AS SHOWN ON SAID MAP; THENCE ALONG THE BOUNDARIES OF NORTHGATE DRIVE, OF LAS GALLINAS AVENUE AND OF LOS RANCHITOS ROAD, AS SHOWN ON SAID MAP, THE FOLLOWING COURSES AND DISTANCES: NORTH 32° 00' 00" EAST, 294.85 FEET; THENCE ALONG A CURVE TO THE LEFT, WHOSE CENTER BEARS NORTH 58° 00' 00" WEST, HAVING A RADIUS OF 1304.00 FEET THROUGH A CENTRAL ANGLE OF 37° 43' 06", A DISTANCE OF 858.44 FEET; THENCE ALONG A CURVE TO THE RIGHT, WHOSE CENTER BEARS NORTH 84° 16' 54" EAST, HAVING A RADIUS OF 30.00 FEET THROUGH A CENTRAL ANGLE OF 109° 13' 06", A DISTANCE OF 57.19 FEET; THENCE SOUTH 76° 30' 00" EAST 10.81 FEET; THENCE ALONG A CURVE TO THE RIGHT, WHOSE CENTER BEARS SOUTH 13° 30' 00" WEST, HAVING A RADIUS OF 427.89 FEET THROUGH A CENTRAL ANGLE OF 19° 47' 56", A DISTANCE OF 147.86 FEET; THENCE SOUTH 56° 42' 04" EAST 32.12 FEET; THENCE ALONG A CURVE TO THE LEFT, WHOSE CENTER BEARS NORTH 33° 17' 56" EAST, HAVING A RADIUS OF 730.04 FEET, THROUGH A CENTRAL ANGLE OF 26° 24' 46", A DISTANCE OF 336.54 FEET; THENCE SOUTH 83° 06' 50" EAST, 330.92 FEET; THENCE ALONG A CURVE TO THE RIGHT, WHOSE CENTER BEARS SOUTH 6° 53' 10" WEST, HAVING A RADIUS OF 170.01 FEET THROUGH A CENTRAL ANGLE OF 83° 00' 21", A DISTANCE OF 246.30 FEET; THENCE SOUTH 0° 06' 29" EAST, 102.13 FEET; THENCE SOUTH 0° 04' 50" WEST 112.63 FEET; THENCE ALONG A NON-TANGENT CURVE TO THE RIGHT WHOSE CENTER BEARS SOUTH 89° 50' 48" WEST, HAVING A RADIUS OF 970.00 FEET, THROUGH A CENTRAL ANGLE OF 29° 33' 10", A DISTANCE OF 500.32 FEET; THENCE SOUTH 29° 23' 52" WEST, 100.00 FEET; THENCE ALONG A NON-TANGENT CURVE TO THE LEFT, WHOSE CENTER BEARS SOUTH 60° 35' 50" EAST, HAVING A RADIUS OF 780.00 FEET THROUGH A CENTRAL ANGLE OF 43° 51' 22", A DISTANCE OF 597.04 FEET; THENCE SOUTH 14° 28' 26" EAST, 100.65 FEET; THENCE ALONG A CURVE TO THE RIGHT, WHOSE CENTER BEARS SOUTH 75° 31' 34" WEST, HAVING A RADIUS OF 50.00 FEET THROUGH A CENTRAL ANGLE OF 89° 59' 48", A DISTANCE OF 78.54 FEET; THENCE SOUTH 75° 31' 22" WEST 518.22 FEET; THENCE ALONG A CURVE TO THE RIGHT, WHOSE CENTER BEARS NORTH 14° 28' 38" WEST, HAVING A RADIUS OF 224.00 FEET THROUGH A CENTRAL ANGLE OF 85° 18' 00" A DISTANCE OF 333.48 FEET; THENCE ALONG A CURVE TO THE LEFT, WHOSE CENTER BEARS SOUTH 70° 49' 22" WEST, HAVING A RADIUS OF 291.67 FEET THROUGH A CENTRAL ANGLE OF 38° 49' 22" A DISTANCE OF 197.63 FEET; THENCE NORTH 58° 00' 00" WEST, 65.94 FEET AND THENCE ALONG A CURVE TO THE RIGHT, WHOSE CENTER BEARS NORTH 32° 00' 00" EAST, HAVING A RADIUS OF 446.00 FEET THROUGH A CENTRAL ANGLE OF 90° 00' 00" A DISTANCE OF 700.58 FEET TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THAT PORTION OF SAID LAND AS DESCRIBED IN THE DEED TO THE CITY OF SAN RAFAEL, DATED NOVEMBER 15, 1984 AND RECORDED JANUARY 11, 1985 AS INSTRUMENT NO. 85001287, MARIN COUNTY RECORDS, AND MORE PARTICULARLY DESCRIBED AS FOLLOWS:

Re: Modification of Building Exiting Arrangement, 9000 Northgate Mall (San Rafael Building Permit B0108-057)

Mr. Puccetti:

Thank you for your submittal regarding plans to delete the bank of glass panel doors from the north-east corner of the building (between column lines J & K, along column line 1). These doors have historically served as a customer entrance and exit. Your proposal also includes the immobilization of two door leafs at the west entrance (opposite the garden/service center).

I have completed an analysis of the exiting requirements based on the second floor occupant loading and current code requirements. Your current plans to delete the bank of doors and leave in place the single leaf metal door at that location complies with current code requirements. Assuming the remaining door has a 32" clear width when open, the allowable occupant load for the second story would be 640 persons. This occupant load figure assumes that three other similar doors are provided around the floor plan for exiting from the second floor. For reference purposes, an occupant load of 640 would allow the following configuration: 33,000 sq. ft. of retail sales floor area, 14,800 sq. ft. of stock room, 3000 sq. ft. of office area and 2400 sq. ft. of mechanical service area.

As we discussed on 9/4, the portion the proposal calling for time delay egress door hardware would only be acceptable if a smoke detection system were installed throughout the building. Based on our conversation its my understanding that this portion of the original proposal has been dropped so this is not an issue requiring resolution. You may at your option employ alarmed exit hardware without any restrictions.

One item not specifically addressed in the proposal is exit designation. As we discussed during our first meeting on this issue, an illuminated exit sign mounted to be visible from the sales floor should be added to direct persons to the sole remaining exit door at the effected corner. Also, steps must be taken at the west entrance to avoid confusing the immobilized door leafs with the active leafs. Appropriate steps include the removal of any door pull or similar hardware from the doors and the addition of markings or other architectural features (such as visibility dots, wainscoting, decorative planters, etc.) to clearly communicate to the public that the door leafs have become side lights.

While I realize that the San Rafael Building Department has already issued you a permit to proceed with this project I would like to thank you for taking the extra step of soliciting our input on this issue. I hope you will find that approaching this type of project in such a proactive manner will result in a smoother project timeline with less chance for unexpected delays or revisions. If you have any questions regarding any of the requirements outlined above please contact this office at (415) 485-3308.

Sincerely,

STEVEN RIGGS
Fire Inspector

GENERAL REQUIREMENTS AND SPECIAL HAZARDS

		Notice #1	#2	#3	NA	OK	
▲*	1. Install approved address identification.					✓	1 *
▲*	2. Individual work station trash cans within smoking areas shall be metal or approved equal with lid.					✓	2 *
▲*	3. Trash cans used for collection shall be metal or approved equal with a lid.					✓	3 *
▲	5. Remove accumulation of waste material on exterior of building.					✓	5
▲	6. Maintain 30" clearance of combustibles to heat producing appliances.					✓	6
▲	11. Maintain all area or occupancy separation walls and draft stops.	✓				✓	11
▲	12. Maintain in operable condition and remove all obstructions to fire/smoke doors and fire dampers.					✓	12
▲*	14. Keys needed for access to all portions of building are current and in Knox-Box.					✓	14 *

EXITING REQUIREMENTS, BASED ON AN OCCUPANT LOAD FACTOR OF ONE PERSON FOR EVERY:

____ 100 square feet—offices
____ 30 square feet—retail
____ 50 square feet—library, locker rooms, etc.
____ 20 square feet—college classrooms
____ 15 square feet—conference rooms

●	17. Two exits required if occupant load exceeds 50 (except offices).					✓	17
●	18. Two exits required if occupant load exceeds 30 (offices).					✓	18
●	21. Two exits required from second floor if occupant load exceeds 10					✓	21
●	22. Two exits required from all basements and above the second floor.					✓	22
●	23. Two exits required from Mezzanines larger than 2000 square feet or 60 feet in any direction.				✓		23
●	24. When two exits are required they must be separated by ½ of the diagonal distance of the room.					✓	24
●	25. Three exits required if occupant load exceeds 500, four if over 1000.					✓	25
●	27. Maximum distance to an exit is 150' (unsprinklered buildings) or 200' (sprinklered buildings).					✓	27
●	28. Dead end corridors may not exceed 20'.					✓	28
●	30. If occupant load is over 50, doors must swing out; if over 100 they must *only* swing out.					✓	30
▲	31. Exit doors shall not have dead bolts or other similar devices.					✓	31
▲	34. Exit doors and exit paths shall not be obstructed.					✓	34
▲	35. No storage beneath enclosed stairs unless protected by 1 hr. construction.					✓	35
●	36. Corridors serving 30 or more shall be 1 hr. rated with 20 minute self closing doors.					✓	36
▲	38. When 2 exits are required, all exits shall have exit signs. The main exit is exempted if it is obvious.					✓	38
▲	40. Exit signs shall be internally or externally illuminated AT ALL TIMES.	✓					40
▲	41. All exit paths shall be lighted at all time that the building is occupied. If separate circuits are required for the exit signs the exit lighting must also be on separate circuits.					✓	41
▲	95. Maximum occupant load sign is required if less than 50 people. (Restaurants; Lounges)				✓		95
●	44. Interior stairways to be rated 1 hr. for 3 or 4 stories, 2 hr. for higher buildings.					✓	44

FIRE PROTECTION EQUIPMENT

▲	45. One 2A10BC fire extinguisher shall be provided for every 6,000 sq. ft. with 75' maximum travel distance.					✓	45
▲	49. One additional 40BC extinguisher shall be provided in all kitchens.				✓		49
▲	50. Extinguishers shall be easily accessible, wall mounted at a height not less than 4" or more than 5' from floor.					✓	50
▲	51. Extinguishers shall be serviced annually, after use, and when gauge indicates recharge.	✓				✓	51
●	55. Fire protection or detection systems shall be extended, altered or repaired as necessary to maintain protection.					✓	55
▲	56. All sprinkler valves shall be locked in open position, accessible and unobstructed.					✓	56
▲	57. Fire Department connection caps in place and work freely.					✓	57
▲	58. Exterior exposed portions of systems that are not brass or galvanized shall be painted with rust preventative paint.					✓	58
▲	59. Storage shall be maintained at least 18" below sprinkler heads.	✓				✓	59
▲	60. Storage shall be maintained at least 24" below ceiling in unsprinklered buildings.				✓		60
▲*	61. Maintain systems as follows:						

System Type	Inspected/Serviced	Tested
A. Standpipes	Semi-Annually	Every 5 years
B. Sprinkler	Quarterly	Every 5 years
C. Pre-engineered/Fixed	Semi-annually & after activation	Semi-annually

					✓	✓	61 *
						✓	
						✓	
●	62. All commercial cooking shall have a dry/wet chemical system protecting all cooking surfaces.				✓		62
▲	63. Hood and duct ventilation systems shall be maintained free of grease.						63

ELECTRICAL REQUIREMENTS

▲	66. Discontinue use of extension cords and cube adapters in lieu of permanent wiring.					✓	66
▲	67. Cords shall not be affixed to or extended through walls, ceilings, floors or under doors, nor subject to physical damage.					✓	67
▲	68. Maintain 30" clearance fronting and around electrical control panels.					✓	68
▲	69. Electrical main and sub-panels shall be labeled as to area served and not taped "on" position.	✓				✓	69

FLAMMABLE LIQUIDS

▲	74. Discontinue use of liquids with flash point below 110° F for cleaning purposes.				✓	✓	74
▲	75. No storage of class 1A liquids in basements.						75

PERMITS ARE REQUIRED OR COMPLIANCE WITH POSTED PERMIT.

●*	87. To store in excess of 5 gallons of flammable liquds inside or 10 gallons outside.				✓		87 *

From: Sears San Rafael unit #1528
C/O Dennis Puccetti
9000 Northgate Mall
San Rafael, CA. 94903

Re: Building Remodel Proposal

To Whom It May Concern:
In the effort for us here at Sears in San Rafael, to control the ongoing problem of inventory loss and merchandise selection availability, we are planning to do some minor building remodeling.
This letter is our stores proposal for the following planned building remodel for Sears at Northgate Mall.
Please find enclosed with this letter a map that shows the areas of the building that we plan to remodel.

Refering to the map:

Green Area "A"

This area we plan to lock the existing customer entrance doors and construct a wall that will completely cover and block the fore mentioned entrance. From the map if you look directly to the left you will see a door that will act as an emergency exit door. On this door we will install a time delayed crash bar that will, in an emergency, allow customers and associates access to the exterior of the building.

SEARS
9000 Northgate Mall
San Rafael, CA 94903
415-507-2300
FAX: 415-479-1306

Green Area "B"

This area of the store our plan is to completely lock and secure two (2) of the existing customer entrance doors. Then with the other two (2) remaining doors we plan to install time delayed crash bars. Our intent with this plan is to completely restrict access through these doors from both customers and associates.

The forgoing is our proposed building remodel plan, and we at Sears are seeking your review and approval so that we may expedite these plans as soon as possible.

We would like to thank you in advance for your careful consideration in this very important matter.

Sincerely,

Dennis Puccetti
Director of Operations
Sears San Rafael

SAN RAFAEL FIRE DEPARTMENT
PERMIT APPLICATION
THIS IS NOT YOUR PERMIT

Address of Project 9000 NORTH GATE DRIVE

Project/Business Name SEARS ROEBUCK

Contractor/Owner's Name WILLIAM R. MEIXNER & SONS

Address 120 SOLANO ST,

City, State, Zip VENTURA CA Phone No. (805) 647-7008

Mailing Address for Invoices (if different than above) _____

State Contractor's License # 479175 Expiration 9-30-97

San Rafael Business License # 029268 Expiration DEC, 1997

A deposit of $200 will be required when submitting this permit application. A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent to the nearest ¼ hour, with a minimum two-hour charge. The department will also charge direct and indirect costs for actual expenses incurred for consultant and/or contractual services plus overhead which may be necessary to review your project. The fee will be collected at the completion of your project, and an invoice will be mailed to you. The fees are due and payable upon the receipt of the invoice. Your project permit will not receive final Fire Department approval until all fees are paid. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours (or $300) in services, you will be invoiced during each month that the balance exceeds 3 hours (or $300).

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

SAN RAFAEL FIRE DEPARTMENT
PERMIT APPLICATION
ACKNOWLEDGMENT

Date: 06/17/96

Dear Applicant:

Your permit application has been received. The current status and conditions pertaining to this application are noted below.

PERMIT NUMBER:	FPB 96-2062
CATEGORY:	Commercial
ADDRESS OF PROJECT:	9000 Northgate Mall
PROJECT/BUSINESS:	Jiffy Lube
OWNER/CONTRACTOR:	SNC Plumbing & Fire Protection
MAILING ADDRESS:	1730 44th Avenue
CITY/STATE/ZIP:	San Francisco, CA 94122
PHONE:	(415)-550-1129

06/17/96

The Inspections listed below are required to be conducted/witnessed by San Rafael Fire Prevention Bureau personnel prior to issuance of the permit.

INSPECTIONS REQUIRED:
- Final System
- Plan Review
- Overhead Inspection
- Alarm Test/UL Certification
- Final

At least one business day prior notice is required to schedule an inspection appointment. Contact the San Rafael Fire Prevention Bureau at 485-3308.

Project/Business Name JIFFY LUBE

Contractor's Name SNC PLUMBING & FIRE PROTECTION, INC. (

Address 1730, 44TH AVE

City, State, Zip SAN FRANCISCO, CA 94122 Phone No. 415-550-1129 (~~VERIFIED~~) CEL 415-699-6083

Mailing Address for Invoices (if different than above) _____

State Contractors License # 595176 C16-36 Expiration 5-31-98

San Rafael Business License # 240675 Expiration 6-31-96

A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent on your project to the nearest ½ hour, with a minimum one hour charge. The Department will also charge direct and indirect costs for actual expenses incurred for consultant and/or contractual services plus overhead which may be necessary to review your project. The fee will be collected at the completion of your project, and an invoice will be mailed to you. Your project Permit will not receive final Fire Department approval until all fees are paid. The fees are due and payable upon receipt of the invoice and become overdue 30 days later, at which time a 1/2 hour late fee and 1 1/2% per month interest will be charged. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours (or $150) in services, you will be invoiced during each month that the balance exceeds 3 hours (or $150).

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

Mr. Jim Chisholm
Sears Roebuck & Co.
9000 Northgate Mall
San Rafael, CA 94903

Dear Mr. Chisholm:

Based upon your request for an annual permit for the erection of a sales tent several times a year, your request has been granted if the following conditions are met for each installation:

1. Notify the Fire Department prior to the dates of the tent erection, with the days of the event and take down.

2. The Permit is for the exclusive use of Sears Roebuck, with the State Fire Marshal labeled tent you now own.

3. All other conditions apply as stated in the standards previously provided.

4. The Permit is to be renewed annually (prior to September 30).

If you have any further questions regarding this Permit, please do not hesitate to phone.

Sincerely,

ROBERT E. MARCUCCI
Fire Chief

GOOD UNTIL Sept 30, 1993

A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent on your project to the nearest ½ hour, with a minimum one hour charge. The Department will also charge direct and indirect costs for actual expenses incurred for consultant and/or contractual services plus overhead which may be necessary to review your project. The fee will be collected at the completion of your project, and an invoice will be mailed to you. Your project Permit will not receive final Fire Department approval until all fees are paid. The fees are due and payable upon receipt of the invoice and become overdue 30 days later, at which time a 1/2 hour late fee and 1 1/2% per month interest will be charged. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours (or $150) in services, you will be invoiced during each month that the balance exceeds 3 hours (or $150).

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent on your project to the nearest ½ hour, with a minimum one hour charge. The Department will also charge direct and indirect costs for actual expenses incurred for consultant and/or contractual services plus overhead which may be necessary to review your project. The fee will be collected at the completion of your project, and an invoice will be mailed to you. Your project Permit will not receive final Fire Department approval until all fees are paid. The fees are due and payable upon receipt of the invoice and become overdue 30 days later, at which time a 1/2 hour late fee and 1 1/2% per month interest will be charged. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours (or $150) in services, you will be invoiced during each month that the balance exceeds 3 hours (or $150).

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

Mr. Jim Chisholm
Sears
9000 Northgate Mall
San Rafael, CA 94903

Dear Mr. Chisholm:

In looking through the file, I see there is no permit to utilize flammable or combustible liquids. Also the permit to operate a garage is not on file.

On the application form, I have check these two areas. If there are others related to the shop, please mark those areas, i.e., compressed gasses, flammables. There is only one fee for the application of more than one permit.

Please return the application to the San Rafael Fire Department, 1039 C Street, San Rafael, CA 94901 within the next two weeks. Thank you.

Sincerely,

ROBERT E. MARCUCCI
Fire Chief

BRADLEY R. MARK

A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent on your project to the nearest ¼ hour, with a minimum one hour charge. The Department will also charge direct and indirect costs for actual expenses incurred for consultant and/or contractual services plus overhead which may be necessary to review your project. The fee will be collected at the completion of your project, and an invoice will be mailed to you. Your project Permit will not receive final Fire Department approval until all fees are paid. The fees are due and payable upon receipt of the invoice and become overdue 30 days later, at which time a 1/2 hour late fee and 1 1/2% per month interest will be charged. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours (or $150) in services, you will be invoiced during each month that the balance exceeds 3 hours (or $150).

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

B Inspection Report

San Rafael Fire Department 485-3308

1st Floor

Address 9000, NORTHGATE MALL Business Name SEARS Roebuck & Co. FP-13 _____

Issued By/Date 1st Insp. 1-25-91 2nd Insp. 1-29-91 3rd Insp. _____ FMA _____ Refer to FPB _____

At the time of the inspection those items marked in columns 1, 2 or 3 were found to be in violation and shall be corrected immediately. Re-inspections occur in approximate two week intervals. Items marked under NA or OK were either not applicable or were in compliance at the time of the inspection.

B-2: General Businesses—office, wholesale and retail stores; factories; workshops using materials not highly flammable or combustible, drinking/dining establishments, school rooms for those beyond the 12th grade, for less than 50 people, woodworking and cabinet shops which are owner operated or where not more than one employee is operating one piece of equipment or appliance.

GENERAL REQUIREMENTS AND SPECIAL HAZARDS

		Notice #1	#2	#3	NA	OK	
*	1. Install approved address identification.						1
*	2. Individual work-station trash cans shall be metal or approved equal.						2
*	3. Trash cans used for collection shall be metal or approved equal with a lid.						3
	5. Remove accumulation of waste material on exterior of building.						5
	6. Maintain 30" clearance of combustibles to heat producing appliances						6
	11. Maintain all area or occupancy separation walls and draft stops.						11
	12. Maintain in operable condition and remove all obstructions to fire/smoke doors and fire dampers.						12
*	14. Keys needed for access to all portions of building are current and in Knox-Box.						14

EXITING REQUIREMENTS, BASED ON AN OCCUPANT LOAD FACTOR OF ONE PERSON FOR EVERY:

- ____ 100 square feet—offices
- ____ 30 square feet—retail shops (ground floor)
- ____ 50 square feet—retail shops (upper floors), library, locker areas, etc.
- ____ 20 square feet—college classrooms
- ____ 15 square feet—conference rooms

	17. Two exits required if occupant load exceeds 50 (except offices).						17
	18. Two exits required if occupant load exceeds 30 (offices).						18
	21. Two exits required from second floor if occupant load exceeds 10						21
	22. Two exits required from all basements and above the second floor.						22
	23. Two exits required from Mezzanines larger than 2000 square feet or 60 feet in any direction.						23
	24. When two exits are required they must be separated by ½ of the diagonal distance of the room.						24
	25. Three exits required if occupant load exceeds 500, four if over 1000.						25
	27. Maximum distance to an exit is 150' (unsprinklered buildings) or 200' (sprinklered buildings).						27
	28. Dead end corridors may not exceed 20'.						28
	30. If occupant load is over 50, doors must swing out; if over 100 they must *only* swing out.						30
	31. Exit doors shall not have dead bolts or other similar devices.						31
	34. Exit doors and exit paths shall not be obstructed.						34
	35. No storage beneath enclosed stairs unless protected by 1 hr. construction.						35
	36. Corridors serving 30 or more shall be 1 hr. rated with 20 minute self closing doors.						36
	38. If occupant load exceeds 100, all exits except the main entrance shall have exit signs.						38
	40. If occupant load exceeds 300 the exit signs shall be illuminated on a separate circuit.						40
	41. All exit paths shall be lighted at all time that the building is occupied. If separate circuits are required for the exit signs the exit lighting must also be on separate circuits.						41
	95. Maximum occupant load sign is required if less than 50 people. (Restaurants; Lounges)						95
	44. Interior stairways to be rated 1 hr. for 3 or 4 stories; 2 hr. for higher buildings.						44

FIRE PROTECTION EQUIPMENT

	45. One 2A10BC fire extinguisher shall be provided for every 6,000 sq. ft. with 75' maximum travel distance.						45
	49. One additional 40BC extinguisher shall be provided in all kitchens.						49
	50. Extinguishers shall be easily accessible; wall-mounted at a height not less than 4" or more than 5' from floor.						50
	51. Extinguishers shall be serviced annually, after use, and when gauge indicates recharge.						51
	55. Fire protection or detection systems shall be extended, altered or repaired as necessary to maintain protection.						55
	56. All sprinkler valves shall be locked in open position, accessible and unobstructed.						56
	57. Fire Department connection caps in place and work freely.						57
	58. Exterior exposed portions of systems that are not brass or galvanized shall be painted with rust preventative paint.						58
	59. Storage shall be maintained at least 18" below sprinkler heads.						59
	60. Storage shall be maintained at least 24" below ceiling in unsprinklered buildings.						60
*	61. Maintain systems as follows:						

System Type	Inspected/Serviced	Tested
A. Standpipes	Semi-Annually	Every 5 years
B. Sprinkler	Quarterly	Every 5 years
C. Pre-engineered/Fixed	Semi-annually & after activation	Semi-annually

							61
	62. All commercial cooking shall have a dry chemical system protecting all cooking surfaces.						62
	63. Hood and duct ventilation systems shall be maintained free of grease.						63

ELECTRICAL REQUIREMENTS

	66. Discontinue use of extension cords and cube adapters in lieu of permanent wiring.						66
	67. Cords shall not be affixed to or extended through walls, ceilings, floors or under doors, nor subject to physical damage.						67
	68. Maintain 30" clearance fronting and around electrical control panels.						68
	69. Electrical main and sub-panels shall be labeled as to area served and not taped "on" position.						69

FLAMMABLE LIQUIDS

	74. Discontinue use of liquids with flash point below 110°F for cleaning purposes.						74
	75. No storage of class 1A liquids in basements.						75

PERMITS ARE REQUIRED OR COMPLIANCE WITH POSTED PERMIT.

*	87. To store in excess of 5 gallons of flammable liquds inside or 10 gallons outside.						87
*	88. To store in excess of 25 gallons of combustible liquids inside or 60 gallons outside.						88
*	89. For welding or cutting torch operations.						89
*	90. For above ground flammable liquids storage tanks.						90
*	91. Lumber yards in excess of 100,000 board feet of lumber.						91
*	92. To operate refrigeration equipment.						92
*	93. To have an LPG tank in excess of 120 water gallons.						93
*	94. To store hazardous materials in excess of 100 lbs. solid, 55 gallons liquid or 200 cu. ft. gas.						94

B-H Inspection Report

San Rafael Fire Department 485-3308

Address 1010 Business Name SEARS AUTOMOTIVE FP-13 ✓

Issued By: A. Tuohy 1st Insp. 11-27-90 2nd Insp. 12-2-90 3rd Insp. 1-24-91 Refer to FPB

At the time of the inspection those items marked in columns 1, 2 or 3 were found to be in violation and shall be corrected immediately. Re-inspections occur in approximate two week intervals. Items marked under NA or OK were either not applicable or were in compliance at the time of the inspection.

B-1: Gasoline service stations or garages with no repair work using open flame, welding, or flammable liquids, repair garages which are owner operated or where not more than one employee is repairing one vehicle at any one time.
H-2: Locations involving the storage, handling, use or sale of flammable or combustible liquids exceeding the amounts in Table 9-A of the Uniform Building Code.
H-4: Garages with automotive repair using open flame, welding, or flammable liquids not classified as B-1.

	Notice #1	#2	#3	NA	OK
GENERAL REQUIREMENTS AND SPECIAL HAZARDS					
1. Install approved address identification.					✓
2. Individual work station trash cans shall be metal or approved equal.	✓				
3. Trash cans used for collection shall be metal or approved equal with a lid.					✓
4. Trash cans used for oily rags shall be metal with a self closing lid.					✓
5. Remove accumulation of waste material on exterior of building.					✓
6. Maintain 30" clearance of combustibles to heat producing appliances.					✓
8. A 1 hr. occupancy separation wall is required between a B-1, H-2, H-4 and any other group.				✓	
11. Maintain all area or occupancy separation walls and draft stops.					✓
12. Maintain in operable condition and remove all obstructions to fire/smoke doors and fire dampers.				✓	
14. Keys needed for access to all portions of building are current and in Knox-Box.					✓
15. No smoking is permitted in work area and "No Smoking" signs are required.					✓
EXITING REQUIREMENTS, BASED ON AN OCCUPANT LOAD FACTOR OF ONE PERSON FOR EVERY: ____ 100 square feet.					
17. Two exits required if occupant load exceeds 50 (except offices).					✓
19. Two exits required if over 200 square feet (H occupancies).					✓
21. Two exits required from second floor if occupant load exceeds 10.					✓
22. Two exits required from all basements and above the second floor.					✓
23. Two exits required from Mezzanines larger than 2000 square feet or 60 feet in any direction.					✓
24. When two exits are required they must be separated by ½ of the diagonal distance of the room.					✓
26. Maximum distanct to an exit is 75' (H-2 only).					✓
27. Maximum distance to an exit is 150' (unsprinklered buildings) or 200' (sprinklered buildings).					✓
28. Dead end corridors may not exceed 20'.					✓
29. Exit doors shall swing in the direction of exit travel in all H occupancies.					✓
30. If occupant load is over 50, doors must swing out; if over 100 they must *only* swing out.					✓
31. Exit doors shall not have dead bolts or other similar devices.	✓				
34. Exit doors and exit paths shall not be obstructed.					✓
35. No storage beneath enclosed stairs unless protected by 1 hr. construction.					✓
38. If occupant load exceeds 100, all exits except the main entrance shall have exit signs.					✓
39. If occupant load exceeds 100, all exits signs shall be illiminated on a separate circuit (not B-1).					✓
41. All exit paths shall be lighted at all times that the building is occupied. If separate circuits are required for the exit signs the exit lighting must also be on separate circuits.	✓				
FIRE PROTECTION EQUIPMENT					
46. B-1's shall have minimum 2A 20BC within 75 ft. from all portions of the building including pumps.					✓
47. H-2's and H-4's shall have minimum 40BC within 30 ft. or 80BC within 50 ft. *and* must have at least a 2A rating.					✓
50. Extinguishers shall be easily accessible, wall mounted at a height not less than 4" or more than 5' from floor.					✓
51. Extinguishers shall be serviced annually, after use, and when gauge indicates recharge.	✓				
52. All spraying operations shall be in an approved spray booth with an approved extinguishing system.				✓	
53. H-2 occupancies larger than 1500 sq. ft. shall have sprinkler system installed.				✓	
55. Fire protection or detection systems shall be extended, altered or repaired as necessary to maintain protection.					✓
56. All sprinkler valves shall be locked in open position, accessible and unobstructed.					✓
57. Fire Department connection caps in place and work freely.					✓
58. Exterior exposed portions of systems that are not brass or galvanized shall be painted with rust preventative paint.					✓
59. Storage shall be maintained at least 18" below sprinkler heads.					✓
60. Storage shall be maintained at least 24" below ceiling in unsprinklered buildings.					✓
61. Maintain systems as follows:					
A. Standpipes — Inspected/Serviced: Semi-Annually — Tested: Every 5 years					✓
B. Sprinkler — Inspected/Serviced: Quarterly — Tested: Every 5 years					✓
C. Pre-engineered/Fixed — Inspected/Serviced: Semi-annually & after activation — Tested: Semi-annually					✓
ELECTRICAL REQUIREMENTS					
66. Discontinue use of extension cords and cube adapters in lieu of permanent wiring.	✓				✓
67. Cords shall not be affixed to or extended through walls, ceilings, floors or under doors, nor subject to physical damage.	✓				✓
68. Maintain 30" clearance fronting and around electrical control panels.	✓				
69. Electrical main and sub-panels shall be labeled as to area served and not taped "on" position.					✓
70. Electrical appliances, fixtures and equipment shall be listed and approved for the type of use.					✓
71. Electrical motors shall be maintained free from accumulated oil, dirt and other debris.					✓
FLAMMABLE LIQUIDS					
74. Discontinue use of liquids with flash point below 110°F for cleaning purposes.	✓				✓
75. No storage of class 1A liquids in basements.				✓	
76. Dispensing class I and II liquids by suction pump only and properly grounded.				✓	
77. Dispenser nozzles shall not extend within 5' of any building opening.				✓	
78. Pumps shall be located not less than 10' from any building and on islands or protected by posts.				✓	
79. Emergency shut-off switch required on exterior of building within 75' but not closer than 15' from pumps. Switches shall be designated "Emergency Pump Shut-Off".				✓	
80. Devices capable of igniting flammable vapors, such as electric motors or heating appliances, shall be installed 18" from floor.					✓
81. Where flammable vapors are present, devices such as welders, torches or grinders are not permitted.					✓

A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent on your project to the nearest 1/4 hours, with a minimum one hour charge. The fee will be collected at the completion of your project, and an invoice will be mailed to you. Your project Permit will not receive final Fire Department approval until all fees are paid. The fees are due and payable upon receipt of the invoice and become overdue 30 days later, at which time a 1/2 hour late fee and 1 1/2% per month interest will be charged. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours in services, you will be invoiced during each month that the balance exceeds 3 hours.

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

B Inspection Report

San Rafael Fire Department 485-3308

permit still required for #93-LPG tank → 012121

012129 K Misc. Services

Address 9000 NORTHGATE MALL Business Name SEARS — Department Store FP-13

Issued By: T. Mayfield 1st Insp. 3/16/89 2nd Insp. _____ 3rd Insp. _____ Refer to FPB _____

(2 SHIFT 2 Wk)

At the time of the inspection those items marked in columns 1, 2 or 3 were found to be in violation and shall be corrected immediately. Re-inspections occur in approximate two week intervals. Items marked under NA or OK were either not applicable or were in compliance at the time of the inspection.

B-2: General Businesses—office, wholesale and retail stores, factories, workshops using materials not highly flammable or combustible, drinking/dining establishments, school rooms for those beyond the 12th grade, for less than 50 people, woodworking and cabinet shops which are owner operated or where not more than one employee is operating one piece of equipment or appliance.

ANNOUNCE OF PREVENTION

GENERAL REQUIREMENTS AND SPECIAL HAZARDS

	Notice #1	#2	#3	NA	OK	
1. Install approved address identification.	ok					1
2. Individual work station trash cans shall be metal or approved equal.						2
3. Trash cans used for collection shall be metal or approved equal with a lid.	✓					3
5. Remove accumulation of waste material on exterior of building.	ok					5
6. Maintain 30" clearance of combustibles to heat producing appliances						6
11. Maintain all area or occupancy separation walls and draft stops.						11
12. Maintain in operable condition and remove all obstructions to fire/smoke doors and fire dampers.						12
14. Keys needed for access to all portions of building are current and in Knox-Box.						14

EXITING REQUIREMENTS, BASED ON AN OCCUPANT LOAD FACTOR OF ONE PERSON FOR EVERY:

____ 100 square feet—offices
____ 30 square feet—retail shops (ground floor)
____ 50 square feet—retail shops (upper floors), library, locker areas, etc.
____ 20 square feet—college classrooms
____ 15 square feet—conference rooms

17. Two exits required if occupant load exceeds 50 (except offices).	ok					17
18. Two exits required if occupant load exceeds 30 (offices).						18
21. Two exits required from second floor if occupant load exceeds 10						21
22. Two exits required from all basements and above the second floor.						22
23. Two exits required from Mezzanines larger than 2000 square feet or 60 feet in any direction.						23
24. When two exits are required they must be separated by ½ of the diagonal distance of the room.						24
25. Three exits required if occupant load exceeds 500, four if over 1000.						25
27. Maximum distance to an exit is 150' (unsprinklered buildings) or 200' (sprinklered buildings).						27
28. Dead end corridors may not exceed 20'.						28
30. If occupant load is over 50, doors must swing out; if over 100 they must *only* swing out.						30
31. Exit doors shall not have dead bolts or other similar devices.						31
34. Exit doors and exit paths shall not be obstructed.	✓					34
35. No storage beneath enclosed stairs unless protected by 1 hr. construction.	ok					35
36. Corridors serving 30 or more shall be 1 hr. rated with 20 minute self closing doors.						36
38. If occupant load exceeds 100, all exits except the main entrance shall have exit signs.						38
40. If occupant load exceeds 300 the exit signs shall be illuminated on a separate circuit.						40
41. All exit paths shall be lighted at all time that the building is occupied. If separate circuits are required for the exit signs the exit lighting must also be on separate circuits.						41
95. Maximum occupant load sign is required if less than 50 people. (Restaurants, Lounges)						95
44. Interior stairways to be rated 1 hr. for 3 or 4 stories, 2 hr. for higher buildings.						44

FIRE PROTECTION EQUIPMENT

45. One 2A10BC fire extinguisher shall be provided for every 6,000 sq. ft. with 75' maximum travel distance.	ok					45
49. One additional 40BC extinguisher shall be provided in all kitchens.	ok					49
50. Extinguishers shall be easily accessible, wall mounted at a height not less than 4" or more than 5' from floor.	✓					50
51. Extinguishers shall be serviced annually, after use, and when gauge indicates recharge.	ok					51
55. Fire protection or detection systems shall be extended, altered or repaired as necessary to maintain protection. EXIT SIGNS	✓					55
56. All sprinkler valves shall be locked in open position, accessible and unobstructed.	ok					56
57. Fire Department connection caps in place and work freely.	ok					57
58. Exterior exposed portions of systems that are not brass or galvanized shall be painted with rust preventative paint.	ok					58
59. Storage shall be maintained at least 18" below sprinkler heads.	✓					59
60. Storage shall be maintained at least 24" below ceiling in unsprinklered buildings.	ok					60
61. Maintain systems as follows:						
System Type / *Inspected/Serviced* / *Tested*						
A. Standpipes — Semi-Annually — Every 5 years	ok					61
B. Sprinkler — Quarterly — Every 5 years						
C. Pre-engineered/Fixed — Semi-annually & after activation — Semi-annually						
62. All commercial cooking shall have a dry chemical system protecting all cooking surfaces.						62
63. Hood and duct ventilation systems shall be maintained free of grease.						63

ELECTRICAL REQUIREMENTS

66. Discontinue use of extension cords and cube adapters in lieu of permanent wiring.	✓					66
67. Cords shall not be affixed to or extended through walls, ceilings, floors or under doors, nor subject to physical damage.	ok					67
68. Maintain 30" clearance fronting and around electrical control panels.						68
69. Electrical main and sub-panels shall be labeled as to area served and not taped "on" position.						69

FLAMMABLE LIQUIDS

74. Discontinue use of liquids with flash point below 110°F for cleaning purposes.	ok					74
75. No storage of class 1A liquids in basements.						75

PERMITS ARE REQUIRED OR COMPLIANCE WITH POSTED PERMIT.

87. To store in excess of 5 gallons of flammable liquds inside or 10 gallons outside.						87
88. To store in excess of 25 gallons of combustible liquids inside or 60 gallons outside.						88
89. For welding or cutting torch operations.						89
90. For above ground flammable liquids storage tanks.	ok					90
91. Lumber yards in excess of 100,000 board feet of lumber.						91
92. To operate refrigeration equipment.						92
93. To have an LPG tank in excess of 120 water gallons.						93
94. To store hazardous materials in excess of 100 lbs. solid, 55 gallons liquid or 200 cu. ft. gas.						94

VIKING

Inspection Contract No. _____

13. EXPLANATION OF "NO" ANSWERS.

Water motor gong in automotive needs repair. Six heads under rull-up doors need to be relocated in automotive. In Portraits Department, one (1) head may be needed under new ceiling. In storage area next to toys where towels are stored, storage should be lowered 18" below sprinklers.

14. ADJUSTMENTS OR CORRECTIONS MADE.

All repairs were made of the above "no" answers.

15. DESIRABLE IMPROVEMENTS.

Vic couplings on 4" FDC are leaking and should be replaced in main store.

Kents Christmas Trees
9000 Northgate Mall
San Rafael, CA 94903

Subject: Fire Department Conditions and Requirements
a) Christmas Tree Lots
b) Flame Treating Trees
c) Tents and Awnings

This notice is to inform you that pursuant to Title 19, California Administrative Code and Uniform Fire Code, the following conditions and requirements apply:

1) All Christmas lots shall comply with Fire Department Standard No.'s 114 and 114A (copies attached).

2) A Special Use Permit is required by the Fire Department to install or use any tent or awning in connection with Christmas Tree Lots. Permit applications may be obtained by contacting the Fire Prevention Bureau at (415)485-3308, Monday through Friday 8:30 to 5:00 PM.

3) An onsite inspection of the lot is required by this Department. A 24 hour advance notification call is required to schedule an inspection appointment (normal business hours).

Should you have any questions regarding this notice or the conditions outlined herein, please contact the Fire Prevention Bureau.

Sincerely,

ROBERT E. MARCUCCI

INTER-DEPARTMENTAL MEMORANDUM

DATE:

TO: PLANNING DEPARTMENT
BUILDING DEPARTMENT

FROM: KEITH J. SCHOENTHAL, Fire Marshal

SUBJECT: Above Ground Flammable Liquid Tanks
Existing Non-Conforming Tanks
Plan Review

Attached is a plan submittal for:

SEARS

9000 NORTHGATE MALL

This plan and project should be reviewed as an existing, non-conforming, above ground tank, not as a new or complete plan review.

I have included a copy of the Fire Prevention Standard No. 306, Sections II and III, which outlines Planning and Building Department plan submittal requirements as they were previously established.

Plan review fees will be dispursed accordingly upon receipt of your Department's respective account numbers. Please return your comments/requirements, if any, by SEPT. 4, 1986.

Should you have any questions regarding this project, please contact me at Ext. 3308.

SAN RAFAEL FIRE DEPARTMENT

PRE-CITATION LETTER

all items corrected at this time 12-17-85 FC

November 21, 1985 DATE

XXXX CERTIFIED MAIL-RETURN RECEIPT REQUESTED

_____ DELIVERED IN PERSON

Dear Mr. Fred Munser;

The San Rafael Fire Department conducted a fire safety inspection at the following:

Name Sears Automotive Repair

Address 9000 Northgate Shopping Center

On Date October 27, 1985

At that time a notice was issued indicating the corrections required to provide compliance with the applicable codes, regulations and ordinances. Compliance is required by the Uniform Fire Code, Section 3.102.

Reinspections were made on October 28, 1985 and again on November 18, 1985, in an attempt to gain compliance with the above mentioned fire code regulations. We were unsuccessful in obtaining compliance.

This letter is to inform you that a Fire Inspector for the San Rafael Fire Department will make a reinspection at the above mentioned establishment on December 6, 1985, to determine if the necessary corrections have been made. If the necessary corrections have not been completed by this date a citation will be issued, which will require an appearance by you in court.

This letter is written as a courtesy to you in order to avoid future litigation. 2 weeks extension on

FIRE DEPARTMENT

November 5, 1985

Mr. Fred Munser, Manager
Sears Automotive Repair
9000 Northgate Shopping Center
San Rafael, California 94903

Subject: Required Exits

Dear Mr. Munser,

(1) On October 27, 1985, an inspection was conducted pursuant to a complaint received by this Department regarding locked exit doors.

At that time, the Captain of Engine Company 53 verbally requested the manager to unlock the required second exit.

(2) On October 28, 1985, a follow-up inspection was conducted by me and a walk-through of the shop area was completed. The following violations were found to exist:

(3) NO 11-18 FC.

1. Repair the indicator on the south pair doors so that it states "opened" or "locked" with respect to the position of the deadbolt. OK 12-17-85 FC

NO 11-18

2. Remove the metal slide bolts from the two required exit doors in the shop area and post a sign over the doors stating "This door to remain unlocked during business hours." The sign shall have letters at least one inch high and in contrasting color to background.

OK 12-17-85 FC In lieu of removing the slide bolts from the doors they may be padlocked in the "open" position.

OK 12-17-85 FC NO 11-18 3. Remove the obstructions from the required second exit from the shop at the stairwell. The same requirements shall apply as in #2 above.

OK 12-17-85 FC NO 11-18 4. Post an approved EXIT sign above the entry to the landing serving the exit door in #3 above.

You are hereby notified at the violations which currently exist. Corrective action should be taken immediately.

A re-inspection will be conducted in approximately two weeks by this Department to determine if the necessary corrections have been made.

Failure to comply may result in denial of fire clearance which, in turn, may revoke your license to operate.

Should you have any questions regarding this notice, please contact me immediately at 485-3309.

Sincerely,

ROBERT E. MARCUCCI
Fire Chief

July 1, 1985

Mr. Al Schetter
Department 700-8

RE: BULK OIL TANKS

The fear of the N.F.P.A. was that large containers of combustable material such as this could add fuel to a fire. For this reason they had a law on the books that limited the container size.

It was determined that this type of ruling should be established by local codes. Therefore, the N.F.P.A. has deleted its specifications and requested that local Fire Martials establish the quantities that can be stored as well as the venting required.

Regards,

J. W. Alzner
Department 731

JWA/el81

INTER - DEPARTMENTAL MEMO

DATE: September 11, 1972

TO: ALL PERSONNEL

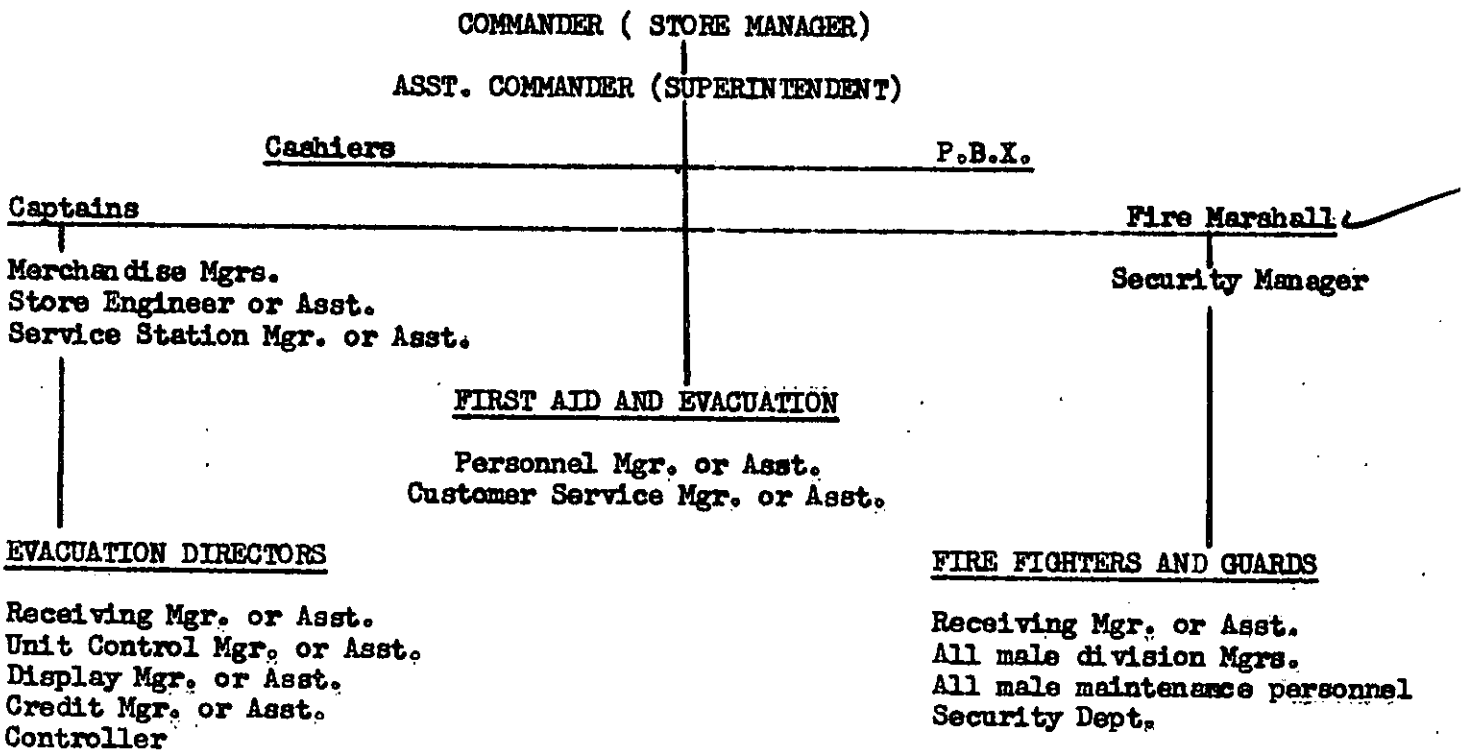
SUBJECT: Sears Buildings
9000, 9100, 9200 Northgate Fashion Mall

As of this date the sprinkler systems to the above captioned buildings are in service.

The risers and OS & Y valves for the Main Building and the Garden Shop are located in the basement of the Main Building about mid-point on the south wall.

The F.D.C. for the above systems is outside the south wall.

The riser and F.D.C. for the Automotive Center are located on the north wall towards the west end. This is an independent system.



An A. D. T. locator panel is located at the east entrance on the north wall of the main building, but it is not in service at this time.

FIRE AND DISASTER MANUAL

SEARS SAN RAFAEL 1528

This manual is set up as a basic guide in the event of fire, building evacuation or other disasters. The above chart delegates the lines of authority and responsibilities. Teamwork is the key to combating any type of disaster at any time. Remember to work as quickly and as safely as possible. In this way you will help to minimize our losses and possibly eliminate injuries to employes and customers.

W. C. Dunlap
Security Manager

DUTIES:

COMMANDER:

The commander will maintain complete authority over the operation and determine if and when the store should be evacuated.

ASSISTANT COMMANDER:

The Assistant Commander shall have the same duties in the event that the Commander is absent. He shall determine what store staff will remain in the store in case of evacuation to guard the store against looters. The Asst. Commander shall appoint one or two male members of the fire brigade to stand by the cashiers office until a member of the Police department arrives or a member of the store staff can take the post.

CAPTAINS:

The captains shall respond to every fire or disaster call. Their first duties should be to seal off the area from customers as well as employes. They should allow only members of the fire brigade to enter the danger area. The captains shall see that all blowers are turned off and be ready to shut off the risers in the area. They should know the locations of disaster equipment in the store and be ready to supply necessary equipment to the fire fighters.

In the event that the fire cannot be contained and it becomes a hazard to personnel fighting the fire the captains shall determine the safest exit.

The captains shall also see that the registers in the area are guarded abainst foul play, and, if necessary, remove the cash and detail to be placed in the main safe. Upon notice to evacuate the captains shall see that the registers are cleared and be ready to lock and secure the store.

FIRE MARSHALL:

The Fire Marshall or his assistant shall respond to every fire or disaster call. Upon his arrival he shall determine what type of equipment should be used in combating the problem. He will direct the fire fighters and guards and help contain the fire wherever possible. The Fire Marshall shall also help in the evacuation of the store. In the event that the store is evacuated, he will see that the store is locked and secured.

The Fire Marshall or his assistant shall make daily inspections of the store eliminating fire hazards wherever possible. He shall make sure all disaster and fire fighting equipment are in proper working order. The Fire Marshall shall see that enough flashlights are placed around the store in case they are needed in an emergency.

FIRST AID DIRECTORS:

The Personnel Manager or assistant will stand by in the FIRST AID ROOM in the event minor first aid is needed by employes or customers. If it becomes necessary the first aid director may seek help from the customer service department to assist in first aid treatment.

In the event the main store is evacuated the first aid director shall set up in the service station first level manager's office.

EVACUATION DIRECTORS:

The primary function of the evacuation directors is to see that employes and customers leave the store quickly and safely. They will open wide all outer doors and see that all stairways are kept clear and the people moving. They will aid elderly people, calm hysterical people, and help handicapped people leave the store.

The secondary function is the protection of the building, its merchandise, and the store records. In the event the store records must be removed, and if they can be removed with no danger to the personnel removing them, they will be evacuated to safety. The files to be removed shall be marked "Files First" in red labeling on the outside of the file cabinets. The locations of important files are the personnel dept., unit control, customer service, and the credit department. The audit dept. will be responsible for their own files. The receiving dept. and the service station have safes for their important files.

In the event the store is evacuated no one is permitted to enter the store except the police department, fire department, or emergency first aid teams.

FIRE FIGHTERS AND GUARDS:

The fire fighters and guards will respond to every fire and disaster call. They will stand by and be ready to use whatever equipment is assigned to them. They shall follow the instructions given to them by the Fire Marshall or the store staff.

Whenever possible, burning materials should be carried out of the store and put out. This will help cut down the losses from both smoke and water damage. The fire fighters and guards shall also aid in the evacuation of the store and be ready to guard exposed registers. This will help minimize the chances of looters taking advantage of the circumstances. Also, they should remove any valuable merchandise out of the danger area, such as diamonds, furs, etc. This also applies to store records and documents, as well as merchandise.

In the event of a power failure the fire fighters and guards shall assign themselves to the nearest registers.

Fire fighters and guards see zone duties.

P.B.X.

The P.B.X. operator shall make the following announcement immediately upon report of a disaster or fire.

Mrs. O'Riley, please go to division (where needed) immediately
Mrs. O'Riley, division (where needed) immediately
Mrs. O'Riley, division (where needed) immediately

This announcement will be repeated three times.
The operator will then call the local fire department and report the nature of the disaster and its location.

STORE EVACUATION NOTICE

"Good Morning" (afternoon, evening). The office of the civilian defense department has asked Sears to participate in a test alert for the evacuation of our store. We request that all customers please leave the building by the nearest exit immediately. The store will re-open as soon as possible. (Repeat) This is only a test. Thank you for your cooperation."

This announcement shall be repeated twice and once every 15 minutes thereafter until requested to stop by a member of the store staff. Also, in the case of a CIVIL DEFENSE alert the above announcement will be used only by substituting evacuation to the lower level by the closest stairway at once. The sales personnel shall direct the customers within their own departments to the nearest stairway.

Regardless of whether the fire is on the premises or in a building nearby, the fire department must be called immediately.

CASHIERS:

The cashiers will remain in their office unless notified by a member of the store staff to evacuate. Upon that request to evacuate they shall see that the safe is locked and secured.

DUTIES: ZONE CAPTAINS AND ALTERNATES

Zone captains shall have added responsibilities as follows:

1. Sound alarm to all personnel in your zone and direct them to exits away from the fire.

2. After the area has been cleared of personnel, all doors should be closed and all electrical panels in the danger area should be turned off.

3. Be aware of the locations of all fire fighting equipment in your zone.

4. Know the locations of all the riser valves in your zone. If it become necessary for the valves to be turned off, the fire captains should show the fire department where and how to operate them.

5. If there is a sprinkler head running in your zone, the Fire Marshall should know the location at once.

6. Return all unused fire fighting equipment to its proper place.

7. If the fire fighting equipment is used, notify the Fire Marshall so that it may be replaced.

8. Be aware of fire hazards in your zone and help head off a disaster before it happens.

Bureau of Fire Prevention & Investigation

Date 4/2/71

Type of Inspection Plan Check (Sprinkler) Hour 11:00

BUSINESS BUILDING

Name Sears Owner

Address 9000 Northgate Address

Owner/Manager

Occupied as F-2

Remarks:

Steve Lucker, Office Manager for Williams - Burroughs the General Contractor on this job brought in four sets of underground plans for the undersigned to check. These plans got the approval of this office as well as the requirements of N.F.P.A. #13. Three sets of plans were signed and dated and returned to Mr. Lucker.

It was noted on the plans that the proposed location of the F.D. connection on the Auto Center would not meet with this department's approval. Parkin Associates Architects have been so advised. (Mr. Pate was advised by us.)

To	From	Project No.
Roy J. Antano, Supt. Williams & Burrows, Inc.	Mauri Metz Res. Architect - Parkin	7008-32
Project Sears, San Rafael - Automotive Center		Date 11/2/71

By telephone authority of Chas. H. Day of Sears, at the request of Ken Mazza, San Rafael City Fire Marshal, you are being asked to relocate the 2½" x 2½" x 4" Flush F.D. connection shown on the south side of the Auto Center at Col. Line "F", to the north side of the building, approximately 3'-0" east of Col. Line "B." Please quote a deductive price for the 156'-0" of 4" pipe, that will be saved by this change, for my forwarding to my Los Angeles office for approval and future change order. Please locate the hose connection 3'-0" above the planting area fin. grade.

April 22, 1971

Mr. Kenneth Marzza, Fire Marshal
San Rafael Fire Department
San Rafael, California

Dear Mr. Marzza:

This letter will confirm our telephone conversation of April 21, during which we discussed the proposed fire alarm system for the Sears, Roebuck and Co. Retail Store and Auto Center to be constructed in San Rafael. The purpose of the conversation was to review several questions you had voiced as a result of reviewing the plans for the alarm system we designed for the subject job.

In response to your two specific questions, the following conclusions were reached:

1. I verified that the waterflow alarm for the seasonal sales building was connected to a separate zone on the fire alarm system control unit. We agreed that it would be satisfactory to leave the manual fire alarm station on the same zone as the retail store manual stations, as is currently shown on the drawings.

2. Regarding your request for a remote fire alarm annunciator, we agreed that it would be desirable to provide such an annunciator. However, as I explained, the cost factor of this additional device is something that must be approved by the owner.

I will convey your request to the owner and if his approval is granted for the remote annunciator, it will be provided. From an aesthetic point of view, the architect would prefer that the annunciator not be installed on the outside wall in the area you suggested. Therefore, if the annunciator is provided, we will assure you that it will be located where it will be visible without the need of forcing entry into the store. At this point, I cannot tell you exactly where this would be, but it would

MGG2

appear that it could be located on the first floor immediately beneath the location presently shown for the main fire alarm control unit.

I trust that the above agrees with the notes you made regarding our conversation. I'll follow up on your request with the owner and see what can be provided.

Very truly yours,

SCHIRMER ENGINEERING CORPORATION

At the time of the inspection those items marked in columns 1, 2 or 3 were found to be in violation and shall be corrected immediately. Re-inspections occur in approximate two week intervals. Items marked under NA or OK were either not applicable or were in compliance at the time of the inspection.

B-2: General Businesses—office, wholesale and retail stores, factories, workshops using materials not highly flammable or combustible, drinking/dining establishments, school rooms for those beyond the 12th grade, for less than 50 people, woodworking and cabinet shops which are owner operated or where not more than one employee is operating one piece of equipment or appliance.

AN OUNCE OF PREVENTION

	Notice #1	#2	#3	NA	OK	
GENERAL REQUIREMENTS AND SPECIAL HAZARDS						
* 1. Install approved address identification.					✓	1
* 2. Individual work station trash cans shall be metal or approved equal.					✓	2
* 3. Trash cans used for collection shall be metal or approved equal with a lid.					✓	3
5. Remove accumulation of waste material on exterior of building.						5
6. Maintain 30" clearance of combustibles to heat producing appliances						6
11. Maintain all area or occupancy separation walls and draft stops.						11
12. Maintain in operable condition and remove all obstructions to fire/smoke doors and fire dampers.						12
* 14. Keys needed for access to all portions of building are current and in Knox-Box.						14
EXITING REQUIREMENTS, BASED ON AN OCCUPANT LOAD FACTOR OF ONE PERSON FOR EVERY:						
____ 100 square feet—offices						
____ 30 square feet—retail shops (ground floor)						
____ 50 square feet—retail shops (upper floors), library, locker areas, etc.						
____ 20 square feet—college classrooms						
____ 15 square feet—conference rooms						
17. Two exits required if occupant load exceeds 50 (except offices).						17
18. Two exits required if occupant load exceeds 30 (offices).						18
21. Two exits required from second floor if occupant load exceeds 10						21
22. Two exits required from all basements and above the second floor.						22
23. Two exits required from Mezzanines larger than 2000 square feet or 60 feet in any direction.						23
24. When two exits are required they must be separated by ½ of the diagonal distance of the room.						24
25. Three exits required if occupant load exceeds 500, four if over 1000.						25
27. Maximum distance to an exit is 150' (unsprinklered buildings) or 200' (sprinklered buildings).						27
28. Dead end corridors may not exceed 20'.						28
30. If occupant load is over 50, doors must swing out; if over 100 they must *only* swing out.						30
31. Exit doors shall not have dead bolts or other similar devices.					✓	31
34. Exit doors and exit paths shall not be obstructed.					✓	34
35. No storage beneath enclosed stairs unless protected by 1 hr. construction.						35
36. Corridors serving 30 or more shall be 1 hr. rated with 20 minute self closing doors.						36
38. If occupant load exceeds 100, all exits except the main entrance shall have exit signs.						38
40. If occupant load exceeds 300 the exit signs shall be illuminated on a separate circuit.						40
41. All exit paths shall be lighted at all time that the building is occupied. If separate circuits are required for the exit signs the exit lighting must also be on separate circuits.					✓	41
95. Maximum occupant load sign is required if less than 50 people. (Restaurants, Lounges)						95
44. Interior stairways to be rated 1 hr. for 3 or 4 stories, 2 hr. for higher buildings.						44
FIRE PROTECTION EQUIPMENT						
45. One 2A10BC fire extinguisher shall be provided for every 6,000 sq. ft. with 75' maximum travel distance.					✓	45
49. One additional 40BC extinguisher shall be provided in all kitchens.				✓		49
50. Extinguishers shall be easily accessible; wall mounted at a height not less than 4" or more than 5' from floor.					✓	50
51. Extinguishers shall be serviced annually, after use, and when gauge indicates recharge.					✓	51
55. Fire protection or detection systems shall be extended, altered or repaired as necessary to maintain protection.						55
56. All sprinkler valves shall be locked in open position, accessible and unobstructed.						56
57. Fire Department connection caps in place and work freely.						57
58. Exterior exposed portions of systems that are not brass or galvanized shall be painted with rust preventative paint.						58
59. Storage shall be maintained at least 18" below sprinkler heads.					✓	59
60. Storage shall be maintained at least 24" below ceiling in unsprinklered buildings.				✓		60
* 61. Maintain systems as follows:						
System Type / *Inspected/Serviced* / *Tested*						
A. Standpipes — Semi-Annually — Every 5 years						61
B. Sprinkler — Quarterly — Every 5 years						
C. Pre-engineered/Fixed — Semi-annually & after-activation — Semi-annually						
62. All commercial cooking shall have a dry chemical system protecting all cooking surfaces.						62
63. Hood and duct ventilation systems shall be maintained free of grease.						63
ELECTRICAL REQUIREMENTS						
66. Discontinue use of extension cords and cube adapters in lieu of permanent wiring.					✓	66
67. Cords shall not be affixed to or extended through walls, ceilings, floors or under doors, nor subject to physical damage.					✓	67
68. Maintain 30" clearance fronting and around electrical control panels.					✓	68
69. Electrical main and sub-panels shall be labeled as to area served and not taped "on" position.					✓	69
FLAMMABLE LIQUIDS						
74. Discontinue use of liquids with flash point below 110°F for cleaning purposes.						74
75. No storage of class 1A liquids in basements.						75
PERMITS ARE REQUIRED OR COMPLIANCE WITH POSTED PERMIT.						
* 87. To store in excess of 5 gallons of flammable liquids inside or 10 gallons outside.						87
* 88. To store in excess of 25 gallons of combustible liquids inside or 60 gallons outside.						88
* 89. For welding or cutting torch operations.						89
* 90. For above ground flammable liquids storage tanks.						90
* 91. Lumber yards in excess of 100,000 board feet of lumber.						91
* 92. To operate refrigeration equipment.						92
* 93. To have an LPG tank in excess of 120 water gallons.						93
* 94. To store hazardous materials in excess of 100 lbs. solid, 55 gallons liquid or 200 cu. ft. gas.						94

9000 Northgate Mall
San Rafael, CA. 94903

Re: Building Remodel Proposal

To Whom It May Concern:
In the effort for us here at Sears in San Rafael, to control the ongoing problem of inventory loss and merchandise selection availability, we are planning to do some minor building remodeling.
This letter is our stores proposal for the following planned building remodel for Sears at Northgate Mall.
Please find enclosed with this letter a map that shows the areas of the building that we plan to remodel.

Refering to the map:

Green Area "A"

This area we plan to lock the existing customer entrance doors and construct a wall that will completely cover and block the fore mentioned entrance. From the map if you look directly to the left you will see a door that will act as an emergency exit door. On this door we will install a time delayed crash bar that will, in an emergency, allow customers and associates access to the exterior of the building.

Printed on Recycled Paper

SEARS
9000 Northgate Mall
San Rafael, CA 94903
415-507-2300
FAX: 415-479-1306

Green Area "B"

This area of the store our plan is to completely lock and secure two (2) of the existing customer entrance doors. Then with the other two (2) remaining doors we plan to install time delayed crash bars. Our intent with this plan is to completely restrict access through these doors from both customers and associates.

The forgoing is our proposed building remodel plan, and we at Sears are seeking your review and approval so that we may expedite these plans as soon as possible.

We would like to thank you in advance for your careful consideration in this very important matter.

Sincerely,

Dennis Puccetti
Director of Operations
Sears San Rafael

Re: Modification of Building Exiting Arrangement, 9000 Northgate Mall (San Rafael Building Permit B0108-057)

Mr. Puccetti:

Thank you for your submittal regarding plans to delete the bank of glass panel doors from the north-east corner of the building (between column lines J & K, along column line 1). These doors have historically served as a customer entrance and exit. Your proposal also includes the immobilization of two door leafs at the west entrance (opposite the garden/service center).

I have completed an analysis of the exiting requirements based on the second floor occupant loading and current code requirements. Your current plans to delete the bank of doors and leave in place the single leaf metal door at that location complies with current code requirements. Assuming the remaining door has a 32" clear width when open, the allowable occupant load for the second story would be 640 persons. This occupant load figure assumes that three other similar doors are provided around the floor plan for exiting from the second floor. For reference purposes, an occupant load of 640 would allow the following configuration: 33,000 sq. ft. of retail sales floor area, 14,800 sq. ft. of stock room, 3000 sq. ft. of office area and 2400 sq. ft. of mechanical service area.

As we discussed on 9/4, the portion the proposal calling for time delay egress door hardware would only be acceptable if a smoke detection system were installed throughout the building. Based on our conversation its my understanding that this portion of the original proposal has been dropped so this is not an issue requiring resolution. You may at your option employ alarmed exit hardware without any restrictions.

One item not specifically addressed in the proposal is exit designation. As we discussed during our first meeting on this issue, an illuminated exit sign mounted to be visible from the sales floor should be added to direct persons to the sole remaining exit door at the effected corner. Also, steps must be taken at the west entrance to avoid confusing the immobilized door leafs with the active leafs. Appropriate steps include the removal of any door pull or similar hardware from the doors and the addition of markings or other architectural features (such as visibility dots, wainscoting, decorative planters, etc.) to clearly communicate to the public that the door leafs have become side lights.

While I realize that the San Rafael Building Department has already issued you a permit to proceed with this project I would like to thank you for taking the extra step of soliciting our input on this issue. I hope you will find that approaching this type of project in such a proactive manner will result in a smoother project timeline with less chance for unexpected delays or revisions. If you have any questions regarding any of the requirements outlined above please contact this office at (415) 485-3308.

Sincerely,

STEVEN RIGGS
Fire Inspector

Re: Building Remodel Proposal

To Whom It May Concern:
In the effort for us here at Sears in San Rafael, to control the ongoing problem of inventory loss and merchandise selection availability, we are planning to do some minor building remodeling.
This letter is our stores proposal for the following planned building remodel for Sears at Northgate Mall.
Please find enclosed with this letter a map that shows the areas of the building that we plan to remodel.

Refering to the map:

Green Area "A"

This area we plan to lock the existing customer entrance doors and construct a wall that will completely cover and block the fore mentioned entrance. From the map if you look directly to the left you will see a door that will act as an emergency exit door. On this door we will install a time delayed crash bar that will, in an emergency, allow customers and associates access to the exterior of the building.

SEARS
9000 Northgate Mall
San Rafael, CA 94903
415-507-2300
FAX: 415-479-1306

Green Area "B"

This area of the store our plan is to completely lock and secure two (2) of the existing customer entrance doors. Then with the other two (2) remaining doors we plan to install time delayed crash bars. Our intent with this plan is to completely restrict access through these doors from both customers and associates.

The forgoing is our proposed building remodel plan, and we at Sears are seeking your review and approval so that we may expedite these plans as soon as possible.

We would like to thank you in advance for your careful consideration in this very important matter.

Sincerely,

Dennis Puccetti
Director of Operations
Sears San Rafael

Address 120 SOLANO ST,

City, State, Zip VENTURA CA Phone No. (805) 647-7008

Mailing Address for Invoices (if different than above) _____

State Contractor's License # 479175 Expiration 9-30-97

San Rafael Business License # 029268 Expiration DEC, 1997

A deposit of $200 will be required when submitting this permit application. A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent to the nearest ¼ hour, with a minimum two-hour charge. The department will also charge direct and indirect costs for actual expenses incurred for consultant and/or contractual services plus overhead which may be necessary to review your project. The fee will be collected at the completion of your project, and an invoice will be mailed to you. The fees are due and payable upon the receipt of the invoice. Your project permit will not receive final Fire Department approval until all fees are paid. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours (or $300) in services, you will be invoiced during each month that the balance exceeds 3 hours (or $300).

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

Mr. Jim Chisholm
Sears Roebuck & Co.
9000 Northgate Mall
San Rafael, CA 94903

Dear Mr. Chisholm:

Based upon your request for an annual permit for the erection of a sales tent several times a year, your request has been granted if the following conditions are met for each installation:

1. Notify the Fire Department prior to the dates of the tent erection, with the days of the event and take down.

2. The Permit is for the exclusive use of Sears Roebuck, with the State Fire Marshal labeled tent you now own.

3. All other conditions apply as stated in the standards previously provided.

4. The Permit is to be renewed annually (prior to September 30).

If you have any further questions regarding this Permit, please do not hesitate to phone.

Sincerely,

ROBERT E. MARCUCCI
Fire Chief

BRADLEY R. MARK
Fire Inspector

GOOD UNTIL Sept 30, 1993

A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent on your project to the nearest ½ hour, with a minimum one hour charge. The Department will also charge direct and indirect costs for actual expenses incurred for consultant and/or contractual services plus overhead which may be necessary to review your project. The fee will be collected at the completion of your project, and an invoice will be mailed to you. Your project Permit will not receive final Fire Department approval until all fees are paid. The fees are due and payable upon receipt of the invoice and become overdue 30 days later, at which time a 1/2 hour late fee and 1 1/2% per month interest will be charged. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours (or $150) in services, you will be invoiced during each month that the balance exceeds 3 hours (or $150).

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

Mr. Jim Chisholm
Sears
9000 Northgate Mall
San Rafael, CA 94903

Dear Mr. Chisholm:

In looking through the file, I see there is no permit to utilize flammable or combustible liquids. Also the permit to operate a garage is not on file.

On the application form, I have check these two areas. If there are others related to the shop, please mark those areas, i.e., compressed gasses, flammables. There is only one fee for the application of more than one permit.

Please return the application to the San Rafael Fire Department, 1039 C Street, San Rafael, CA 94901 within the next two weeks. Thank you.

Sincerely,

ROBERT E. MARCUCCI
Fire Chief

On projects that accumulate more than 3 hours (or $150) in services, you will be invoiced during each month that the balance exceeds 3 hours (or $150).

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent on your project to the nearest ¼ hour, with a minimum one hour charge. The Department will also charge direct and indirect costs for actual expenses incurred for consultant and/or contractual services plus overhead which may be necessary to review your project. The fee will be collected at the completion of your project, and an invoice will be mailed to you. Your project Permit will not receive final Fire Department approval until all fees are paid. The fees are due and payable upon receipt of the invoice and become overdue 30 days later, at which time a 1/2 hour late fee and 1 1/2% per month interest will be charged. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours (or $150) in services, you will be invoiced during each month that the balance exceeds 3 hours (or $150).

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

*	1. Install approved address identification.						1
*	2. Individual work-station trash cans shall be metal or approved equal.						2
*	3. Trash cans used for collection shall be metal or approved equal with a lid.						3
	5. Remove accumulation of waste material on exterior of building.						5
	6. Maintain 30" clearance of combustibles to heat producing appliances						6
	11. Maintain all area or occupancy separation walls and draft stops.						11
	12. Maintain in operable condition and remove all obstructions to fire/smoke doors and fire dampers.						12
*	14. Keys needed for access to all portions of building are current and in Knox-Box.						14

EXITING REQUIREMENTS, BASED ON AN OCCUPANT LOAD FACTOR OF ONE PERSON FOR EVERY:

- ____ 100 square feet—offices
- ____ 30 square feet—retail shops (ground floor)
- ____ 50 square feet—retail shops (upper floors), library, locker areas, etc.
- ____ 20 square feet—college classrooms
- ____ 15 square feet—conference rooms

	17. Two exits required if occupant load exceeds 50 (except offices).						17
	18. Two exits required if occupant load exceeds 30 (offices).						18
	21. Two exits required from second floor if occupant load exceeds 10						21
	22. Two exits required from all basements and above the second floor.						22
	23. Two exits required from Mezzanines larger than 2000 square feet or 60 feet in any direction.						23
	24. When two exits are required they must be separated by ½ of the diagonal distance of the room.						24
	25. Three exits required if occupant load exceeds 500, four if over 1000.						25
	27. Maximum distance to an exit is 150' (unsprinklered buildings) or 200' (sprinklered buildings).						27
	28. Dead end corridors may not exceed 20'.						28
	30. If occupant load is over 50, doors must swing out; if over 100 they must *only* swing out.						30
	31. Exit doors shall not have dead bolts or other similar devices.						31
	34. Exit doors and exit paths shall not be obstructed.						34
	35. No storage beneath enclosed stairs unless protected by 1 hr. construction.						35
	36. Corridors serving 30 or more shall be 1 hr. rated with 20 minute self closing doors.						36
	38. If occupant load exceeds 100, all exits except the main entrance shall have exit signs.						38
	40. If occupant load exceeds 300 the exit signs shall be illuminated on a separate circuit.						40
	41. All exit paths shall be lighted at all time that the building is occupied. If separate circuits are required for the exit signs the exit lighting must also be on separate circuits.						41
	95. Maximum occupant load sign is required if less than 50 people. (Restaurants; Lounges)						95
	44. Interior stairways to be rated 1 hr. for 3 or 4 stories; 2 hr. for higher buildings.						44

FIRE PROTECTION EQUIPMENT

	45. One 2A10BC fire extinguisher shall be provided for every 6,000 sq. ft. with 75' maximum travel distance.						45
	49. One additional 40BC extinguisher shall be provided in all kitchens.						49
	50. Extinguishers shall be easily accessible; wall-mounted at a height not less than 4" or more than 5' from floor.						50
	51. Extinguishers shall be serviced annually, after use, and when gauge indicates recharge.						51
	55. Fire protection or detection systems shall be extended, altered or repaired as necessary to maintain protection.						55
	56. All sprinkler valves shall be locked in open position, accessible and unobstructed.						56
	57. Fire Department connection caps in place and work freely.						57
	58. Exterior exposed portions of systems that are not brass or galvanized shall be painted with rust preventative paint.						58
	59. Storage shall be maintained at least 18" below sprinkler heads.						59
	60. Storage shall be maintained at least 24" below ceiling in unsprinklered buildings.						60
*	61. Maintain systems as follows:						

System Type	Inspected/Serviced	Tested
A. Standpipes	Semi-Annually	Every 5 years
B. Sprinkler	Quarterly	Every 5 years
C. Pre-engineered/Fixed	Semi-annually & after activation	Semi-annually

							61
	62. All commercial cooking shall have a dry chemical system protecting all cooking surfaces.						62
	63. Hood and duct ventilation systems shall be maintained free of grease.						63

ELECTRICAL REQUIREMENTS

	66. Discontinue use of extension cords and cube adapters in lieu of permanent wiring.						66
	67. Cords shall not be affixed to or extended through walls, ceilings, floors or under doors, nor subject to physical damage.						67
	68. Maintain 30" clearance fronting and around electrical control panels.						68
	69. Electrical main and sub-panels shall be labeled as to area served and not taped "on" position.						69

FLAMMABLE LIQUIDS

	74. Discontinue use of liquids with flash point below 110°F for cleaning purposes.						74
	75. No storage of class 1A liquids in basements.						75

PERMITS ARE REQUIRED OR COMPLIANCE WITH POSTED PERMIT.

*	87. To store in excess of 5 gallons of flammable liquds inside or 10 gallons outside.						87
*	88. To store in excess of 25 gallons of combustible liquids inside or 60 gallons outside.						88
*	89. For welding or cutting torch operations.						89
*	90. For above ground flammable liquids storage tanks.						90
*	91. Lumber yards in excess of 100,000 board feet of lumber.						91
*	92. To operate refrigeration equipment.						92
*	93. To have an LPG tank in excess of 120 water gallons.						93
*	94. To store hazardous materials in excess of 100 lbs. solid, 55 gallons liquid or 200 cu. ft. gas.						94

B-H Inspection Report

San Rafael Fire Department 485-3308

Address 1010 Business Name SEARS AUTOMOTIVE FP-13 ✓

Issued By: A. Tuohy 1st Insp. 11-27-90 2nd Insp. 12-2-90 3rd Insp. 1-24-91 Refer to FPB

At the time of the inspection those items marked in columns 1, 2 or 3 were found to be in violation and shall be corrected immediately. Re-inspections occur in approximate two week intervals. Items marked under NA or OK were either not applicable or were in compliance at the time of the inspection.

B-1: Gasoline service stations or garages with no repair work using open flame, welding, or flammable liquids, repair garages which are owner operated or where not more than one employee is repairing one vehicle at any one time.
H-2: Locations involving the storage, handling, use or sale of flammable or combustible liquids exceeding the amounts in Table 9-A of the Uniform Building Code.
H-4: Garages with automotive repair using open flame, welding, or flammable liquids not classified as B-1.

	Notice #1	#2	#3	NA	OK
GENERAL REQUIREMENTS AND SPECIAL HAZARDS					
1. Install approved address identification.					✓
2. Individual work station trash cans shall be metal or approved equal.	✓				
3. Trash cans used for collection shall be metal or approved equal with a lid.					✓
4. Trash cans used for oily rags shall be metal with a self closing lid.					✓
5. Remove accumulation of waste material on exterior of building.					✓
6. Maintain 30" clearance of combustibles to heat producing appliances.					✓
8. A 1 hr. occupancy separation wall is required between a B-1, H-2, H-4 and any other group.				✓	
11. Maintain all area or occupancy separation walls and draft stops.					✓
12. Maintain in operable condition and remove all obstructions to fire/smoke doors and fire dampers.				✓	
14. Keys needed for access to all portions of building are current and in Knox-Box.					✓
15. No smoking is permitted in work area and "No Smoking" signs are required.					✓
EXITING REQUIREMENTS, BASED ON AN OCCUPANT LOAD FACTOR OF ONE PERSON FOR EVERY: ____ 100 square feet.					
17. Two exits required if occupant load exceeds 50 (except offices).					✓
19. Two exits required if over 200 square feet (H occupancies).					✓
21. Two exits required from second floor if occupant load exceeds 10.					✓
22. Two exits required from all basements and above the second floor.					✓
23. Two exits required from Mezzanines larger than 2000 square feet or 60 feet in any direction.					✓
24. When two exits are required they must be separated by ½ of the diagonal distance of the room.					✓
26. Maximum distanct to an exit is 75' (H-2 only).					✓
27. Maximum distance to an exit is 150' (unsprinklered buildings) or 200' (sprinklered buildings).					✓
28. Dead end corridors may not exceed 20'.					✓
29. Exit doors shall swing in the direction of exit travel in all H occupancies.					✓
30. If occupant load is over 50, doors must swing out; if over 100 they must *only* swing out.					✓
31. Exit doors shall not have dead bolts or other similar devices.	✓				
34. Exit doors and exit paths shall not be obstructed.					✓
35. No storage beneath enclosed stairs unless protected by 1 hr. construction.					✓
38. If occupant load exceeds 100, all exits except the main entrance shall have exit signs.					✓
39. If occupant load exceeds 100, all exits signs shall be illiminated on a separate circuit (not B-1).					✓
41. All exit paths shall be lighted at all times that the building is occupied. If separate circuits are required for the exit signs the exit lighting must also be on separate circuits.	✓				
FIRE PROTECTION EQUIPMENT					
46. B-1's shall have minimum 2A 20BC within 75 ft. from all portions of the building including pumps.					✓
47. H-2's and H-4's shall have minimum 40BC within 30 ft. or 80BC within 50 ft. *and* must have at least a 2A rating.					✓
50. Extinguishers shall be easily accessible, wall mounted at a height not less than 4" or more than 5' from floor.					✓
51. Extinguishers shall be serviced annually, after use, and when gauge indicates recharge.	✓				
52. All spraying operations shall be in an approved spray booth with an approved extinguishing system.				✓	
53. H-2 occupancies larger than 1500 sq. ft. shall have sprinkler system installed.				✓	
55. Fire protection or detection systems shall be extended, altered or repaired as necessary to maintain protection.					✓
56. All sprinkler valves shall be locked in open position, accessible and unobstructed.					✓
57. Fire Department connection caps in place and work freely.					✓
58. Exterior exposed portions of systems that are not brass or galvanized shall be painted with rust preventative paint.					✓
59. Storage shall be maintained at least 18" below sprinkler heads.					✓
60. Storage shall be maintained at least 24" below ceiling in unsprinklered buildings.					✓
61. Maintain systems as follows:					
A. Standpipes — Inspected/Serviced: Semi-Annually — Tested: Every 5 years					✓
B. Sprinkler — Inspected/Serviced: Quarterly — Tested: Every 5 years					✓
C. Pre-engineered/Fixed — Inspected/Serviced: Semi-annually & after activation — Tested: Semi-annually					✓
ELECTRICAL REQUIREMENTS					
66. Discontinue use of extension cords and cube adapters in lieu of permanent wiring.	✓				✓
67. Cords shall not be affixed to or extended through walls, ceilings, floors or under doors, nor subject to physical damage.	✓				✓
68. Maintain 30" clearance fronting and around electrical control panels.	✓				
69. Electrical main and sub-panels shall be labeled as to area served and not taped "on" position.					✓
70. Electrical appliances, fixtures and equipment shall be listed and approved for the type of use.					✓
71. Electrical motors shall be maintained free from accumulated oil, dirt and other debris.					✓
FLAMMABLE LIQUIDS					
74. Discontinue use of liquids with flash point below 110°F for cleaning purposes.	✓				✓
75. No storage of class 1A liquids in basements.				✓	
76. Dispensing class I and II liquids by suction pump only and properly grounded.				✓	
77. Dispenser nozzles shall not extend within 5' of any building opening.				✓	
78. Pumps shall be located not less than 10' from any building and on islands or protected by posts.				✓	
79. Emergency shut-off switch required on exterior of building within 75' but not closer than 15' from pumps. Switches shall be designated "Emergency Pump Shut-Off".				✓	
80. Devices capable of igniting flammable vapors, such as electric motors or heating appliances, shall be installed 18" from floor.					✓
81. Where flammable vapors are present, devices such as welders, torches or grinders are not permitted.					✓
82. Parts basins shall not use liquids with flash points below 110°F and shall have an automatic closing lid when exposed to fire.					✓
PERMITS ARE REQUIRED OR COMPLIANCE WITH POSTED PERMIT					
85. To operate a repair garage.	✓				
86. To do spray finishing using flammable liquids.					✓
87. To store in excess of 5 gallons of flammable liquids inside or 10 gallons outside.					✓
88. To store in excess of 25 gallons of combustible liquids inside or 60 gallons outside.					✓
89. For welding or cutting torch operations.					✓
90. For above ground flammable liquids storage tanks.					✓
93. To have an LPG tank in excess of 120 water gallons.					✓
94. To store hazardous materials in excess of 100 lbs. solid, 55 gallons liquid or 1500 cu. ft. gas.					✓

A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent on your project to the nearest 1/4 hours, with a minimum one hour charge. The fee will be collected at the completion of your project, and an invoice will be mailed to you. Your project Permit will not receive final Fire Department approval until all fees are paid. The fees are due and payable upon receipt of the invoice and become overdue 30 days later, at which time a 1/2 hour late fee and 1 1/2% per month interest will be charged. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts. On projects that accumulate more than 3 hours in services, you will be invoiced during each month that the balance exceeds 3 hours.

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

Address 9000 NORTHGATE MALL Business Name SEARS — Department Store FP-13

Issued By: T. Mayfield 1st Insp. 3/16/89 2nd Insp. _____ 3rd Insp. _____ Refer to FPB _____

(2 SHIFT 2 Wk)

At the time of the inspection those items marked in columns 1, 2 or 3 were found to be in violation and shall be corrected immediately. Re-inspections occur in approximate two week intervals. Items marked under NA or OK were either not applicable or were in compliance at the time of the inspection.

B-2: General Businesses—office, wholesale and retail stores, factories, workshops using materials not highly flammable or combustible, drinking/dining establishments, school rooms for those beyond the 12th grade, for less than 50 people, woodworking and cabinet shops which are owner operated or where not more than one employee is operating one piece of equipment or appliance.

ANNOUNCE OF PREVENTION

GENERAL REQUIREMENTS AND SPECIAL HAZARDS

	Notice #1	#2	#3	NA	OK	
1. Install approved address identification.	ok					1
2. Individual work station trash cans shall be metal or approved equal.						2
3. Trash cans used for collection shall be metal or approved equal with a lid.	✓					3
5. Remove accumulation of waste material on exterior of building.	ok					5
6. Maintain 30" clearance of combustibles to heat producing appliances						6
11. Maintain all area or occupancy separation walls and draft stops.						11
12. Maintain in operable condition and remove all obstructions to fire/smoke doors and fire dampers.						12
14. Keys needed for access to all portions of building are current and in Knox-Box.						14

EXITING REQUIREMENTS, BASED ON AN OCCUPANT LOAD FACTOR OF ONE PERSON FOR EVERY:

____ 100 square feet—offices
____ 30 square feet—retail shops (ground floor)
____ 50 square feet—retail shops (upper floors), library, locker areas, etc.
____ 20 square feet—college classrooms
____ 15 square feet—conference rooms

17. Two exits required if occupant load exceeds 50 (except offices).	ok					17
18. Two exits required if occupant load exceeds 30 (offices).						18
21. Two exits required from second floor if occupant load exceeds 10						21
22. Two exits required from all basements and above the second floor.						22
23. Two exits required from Mezzanines larger than 2000 square feet or 60 feet in any direction.						23
24. When two exits are required they must be separated by ½ of the diagonal distance of the room.						24
25. Three exits required if occupant load exceeds 500, four if over 1000.						25
27. Maximum distance to an exit is 150' (unsprinklered buildings) or 200' (sprinklered buildings).						27
28. Dead end corridors may not exceed 20'.						28
30. If occupant load is over 50, doors must swing out; if over 100 they must *only* swing out.						30
31. Exit doors shall not have dead bolts or other similar devices.						31
34. Exit doors and exit paths shall not be obstructed.	✓					34
35. No storage beneath enclosed stairs unless protected by 1 hr. construction.	ok					35
36. Corridors serving 30 or more shall be 1 hr. rated with 20 minute self closing doors.						36
38. If occupant load exceeds 100, all exits except the main entrance shall have exit signs.						38
40. If occupant load exceeds 300 the exit signs shall be illuminated on a separate circuit.						40
41. All exit paths shall be lighted at all time that the building is occupied. If separate circuits are required for the exit signs the exit lighting must also be on separate circuits.						41
95. Maximum occupant load sign is required if less than 50 people. (Restaurants, Lounges)						95
44. Interior stairways to be rated 1 hr. for 3 or 4 stories, 2 hr. for higher buildings.						44

FIRE PROTECTION EQUIPMENT

45. One 2A10BC fire extinguisher shall be provided for every 6,000 sq. ft. with 75' maximum travel distance.	ok					45
49. One additional 40BC extinguisher shall be provided in all kitchens.	ok					49
50. Extinguishers shall be easily accessible, wall mounted at a height not less than 4" or more than 5' from floor.	✓					50
51. Extinguishers shall be serviced annually, after use, and when gauge indicates recharge.	ok					51
55. Fire protection or detection systems shall be extended, altered or repaired as necessary to maintain protection. EXIT SIGNS	✓					55
56. All sprinkler valves shall be locked in open position, accessible and unobstructed.	ok					56
57. Fire Department connection caps in place and work freely.	ok					57
58. Exterior exposed portions of systems that are not brass or galvanized shall be painted with rust preventative paint.	ok					58
59. Storage shall be maintained at least 18" below sprinkler heads.	✓					59
60. Storage shall be maintained at least 24" below ceiling in unsprinklered buildings.	ok					60
61. Maintain systems as follows:						
System Type / *Inspected/Serviced* / *Tested*						
A. Standpipes — Semi-Annually — Every 5 years	ok					61
B. Sprinkler — Quarterly — Every 5 years						
C. Pre-engineered/Fixed — Semi-annually & after activation — Semi-annually						
62. All commercial cooking shall have a dry chemical system protecting all cooking surfaces.						62
63. Hood and duct ventilation systems shall be maintained free of grease.						63

ELECTRICAL REQUIREMENTS

66. Discontinue use of extension cords and cube adapters in lieu of permanent wiring.	✓					66
67. Cords shall not be affixed to or extended through walls, ceilings, floors or under doors, nor subject to physical damage.	ok					67
68. Maintain 30" clearance fronting and around electrical control panels.						68
69. Electrical main and sub-panels shall be labeled as to area served and not taped "on" position.						69

FLAMMABLE LIQUIDS

San Rafael Business License #: _____ Expiration: _____

A time keeping form will be kept to track time spent on your project. You will be charged for the actual time spent on your project to the nearest ¼ hour, with a minimum one hour charge. The fee will be collected at the completion of your project, and an invoice will be mailed to you. Your project Permit will not receive final Fire Department approval until all fees are paid. The fees are due and payable upon receipt of the invoice and become overdue 30 days later. In addition to not issuing final approval, the Fire Department will pursue all other legal remedies for unpaid accounts.

I have read the above statement regarding fees for this project, and I understand how the fees will be calculated, agree to pay such fees and understand that they are due prior to final acceptance of my project. Further, under penalty of perjury, I declare that I am duly authorized to encumber expenses on behalf of the firm listed above.

AUTOMATIC FIRE SPRINKLER SYSTEM INSPECTION REPORT

REPORT TO: Sears Dept. Store
ADDRESS: 9000 Northgate Mall
CITY & STATE: San Rafael, CA 94903

DATE: June 19, 1987
BUILDING: Main Store
Automotive and Garden

		YES	N/A	NO
1.	**GENERAL**			
a.	Is the building occupied	X		
b.	Are all systems in service	X		
c.	Does building appear to be completely sprinklered	X		
d.	Is all stock or storage a minimum of 18" below sprinklers			X
e.	Are all sprinkler system main control valves open	X		
f.	Are all other valves in proper operating position	X		
g.	Do all valves have proper identification signs	X		
h.	Are all valves in satisfactory condition	X		
i.	Are control valves supervised	X		
j.	Are control valves sealed, If Yes, Seal No. _____	X		
k.	Are fire department connections and fire hose threads in satisfactory condition, couplings free, caps in place, check valves and gaskets tight	X		
l.	Was fire department connection flushed	X		
m.	Was flush free of debris	X		
n.	Are fire department connections visible and accessible	X		
2.	**WET SYSTEMS**			
a.	Have antifreeze systems been tested and left in satisfactory condition		X	
b.	Does alarm valve and retard chamber appear to be in satisfactory condition from visual exterior inspection	X		
c.	Does waterflow indicator appear to be in satisfactory condition from visual exterior inspection	X		
3.	**DRY SYSTEMS**			
a.	Is dry pipe valve in service		X	
b.	Air Pressure _____ P.S.I.		X	
c.	Is air compressor operational. Manual _____ Automatic _____		X	
d.	Were low points drained during this inspection		X	
e.	Are quick opening devices operational		X	
f.	Have dry pipe valves been trip tested _____ Seconds to operate		X	
g.	Do dry pipe valves appear to be adequately protected from freezing		X	
4.	**SPECIAL SYSTEMS** (Describe) _____			
a.	Were valves trip tested and results satisfactory		X	
b.	Were all heat responsive systems tested and results satisfactory		X	
c.	Were supervisory features tested and results satisfactory		X	

Explain "No" answers in item 13. N/A Not Applicable

SAN RAFAEL FIRE DEPARTMENT

PRE-CITATION LETTER

all items corrected at this time 12-17-85 FC

November 21, 1985 DATE

XXXX CERTIFIED MAIL-RETURN RECEIPT REQUESTED

_____ DELIVERED IN PERSON

Dear Mr. Fred Munser;

The San Rafael Fire Department conducted a fire safety inspection at the following:

Name Sears Automotive Repair

Address 9000 Northgate Shopping Center

On Date October 27, 1985

At that time a notice was issued indicating the corrections required to provide compliance with the applicable codes, regulations and ordinances. Compliance is required by the Uniform Fire Code, Section 3.102.

Reinspections were made on October 28, 1985 and again on November 18, 1985, in an attempt to gain compliance with the above mentioned fire code regulations. We were unsuccessful in obtaining compliance.

This letter is to inform you that a Fire Inspector for the San Rafael Fire Department will make a reinspection at the above mentioned establishment on December 6, 1985, to determine if the necessary corrections have been made. If the necessary corrections have not been completed by this date a citation will be issued, which will require an appearance by you in court.

This letter is written as a courtesy to you in order to avoid future litigation. 2 weeks extension on

FIRE DEPARTMENT

November 5, 1985

Mr. Fred Munser, Manager
Sears Automotive Repair
9000 Northgate Shopping Center
San Rafael, California 94903

Subject: Required Exits

Dear Mr. Munser,

(1) On October 27, 1985, an inspection was conducted pursuant to a complaint received by this Department regarding locked exit doors.

At that time, the Captain of Engine Company 53 verbally requested the manager to unlock the required second exit.

(2) On October 28, 1985, a follow-up inspection was conducted by me and a walk-through of the shop area was completed. The following violations were found to exist:

(3) NO 11-18 FC.

1. Repair the indicator on the south pair doors so that it states "opened" or "locked" with respect to the position of the deadbolt. OK 12-17-85 FC

NO 11-18

2. Remove the metal slide bolts from the two required exit doors in the shop area and post a sign over the doors stating "This door to remain unlocked during business hours." The sign shall have letters at least one inch high and in contrasting color to background.

OK 12-17-85 FC In lieu of removing the slide bolts from the doors they may be padlocked in the "open" position.

OK 12-17-85 FC NO 11-18 3. Remove the obstructions from the required second exit from the shop at the stairwell. The same requirements shall apply as in #2 above.

OK 12-17-85 FC NO 11-18 4. Post an approved EXIT sign above the entry to the landing serving the exit door in #3 above.

You are hereby notified at the violations which currently exist. Corrective action should be taken immediately.

A re-inspection will be conducted in approximately two weeks by this Department to determine if the necessary corrections have been made.

Failure to comply may result in denial of fire clearance which, in turn, may revoke your license to operate.

Should you have any questions regarding this notice, please contact me immediately at 485-3309.

Sincerely,

ROBERT E. MARCUCCI
Fire Chief

July 1, 1985

Mr. Al Schetter
Department 700-8

RE: BULK OIL TANKS

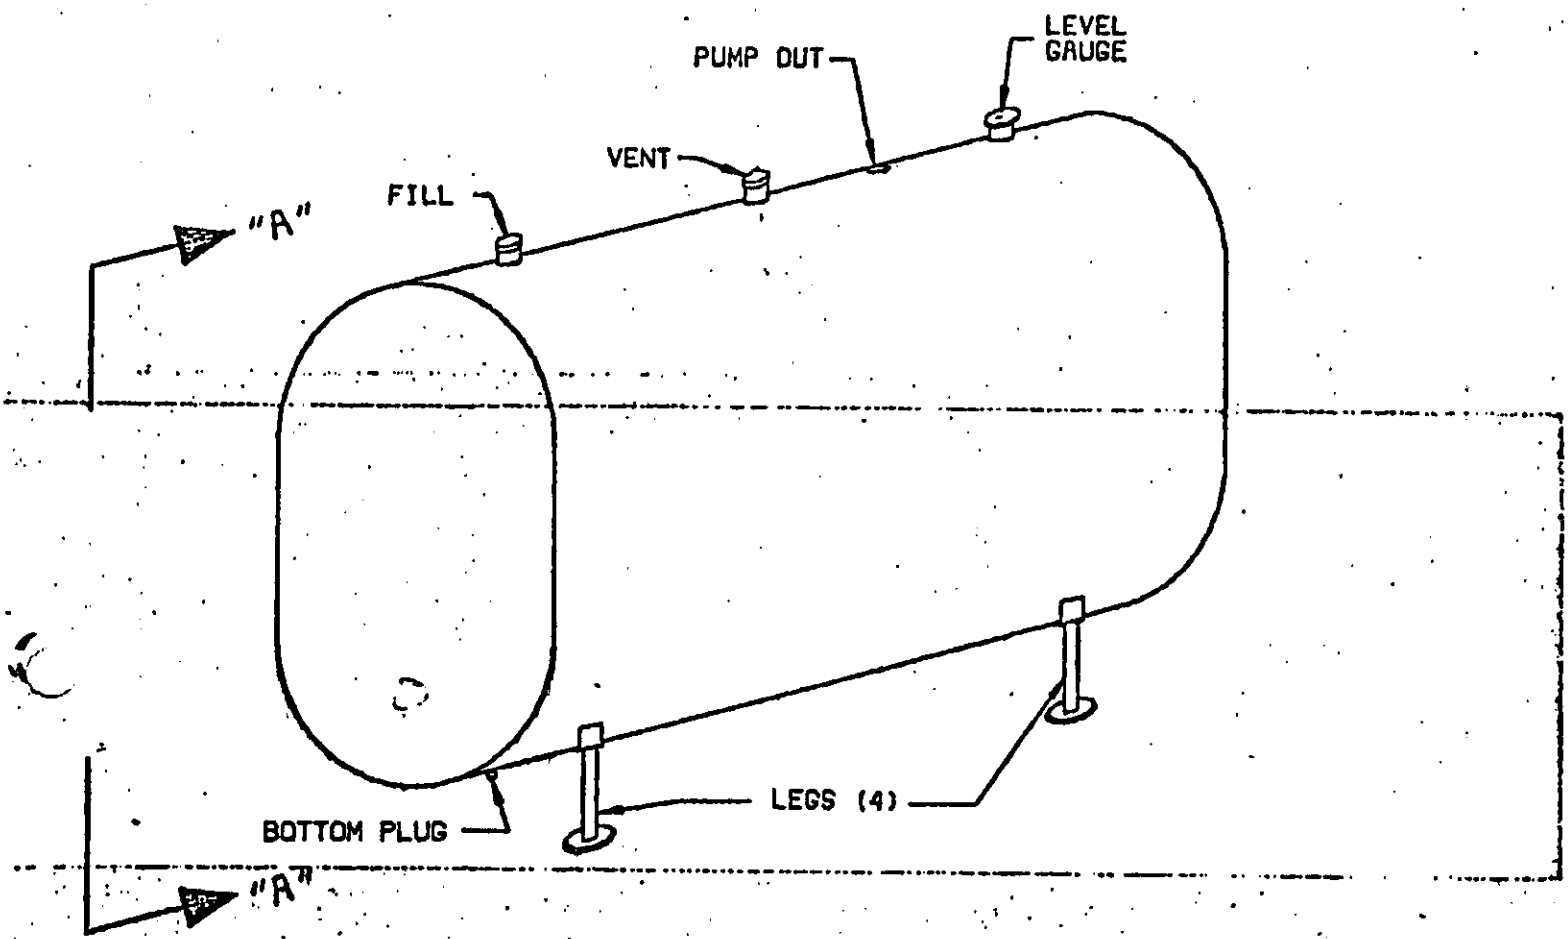
The fear of the N.F.P.A. was that large containers of combustable material such as this could add fuel to a fire. For this reason they had a law on the books that limited the container size.

It was determined that this type of ruling should be established by local codes. Therefore, the N.F.P.A. has deleted its specifications and requested that local Fire Martials establish the quantities that can be stored as well as the venting required.

Regards,

J. W. Alzner
Department 731

JWA/el81



Above ground TANKS must conform to UFC Article 79 and Fire Prev. Std. #306.

INTER - DEPARTMENTAL MEMO

DATE: September 11, 1972

TO: ALL PERSONNEL

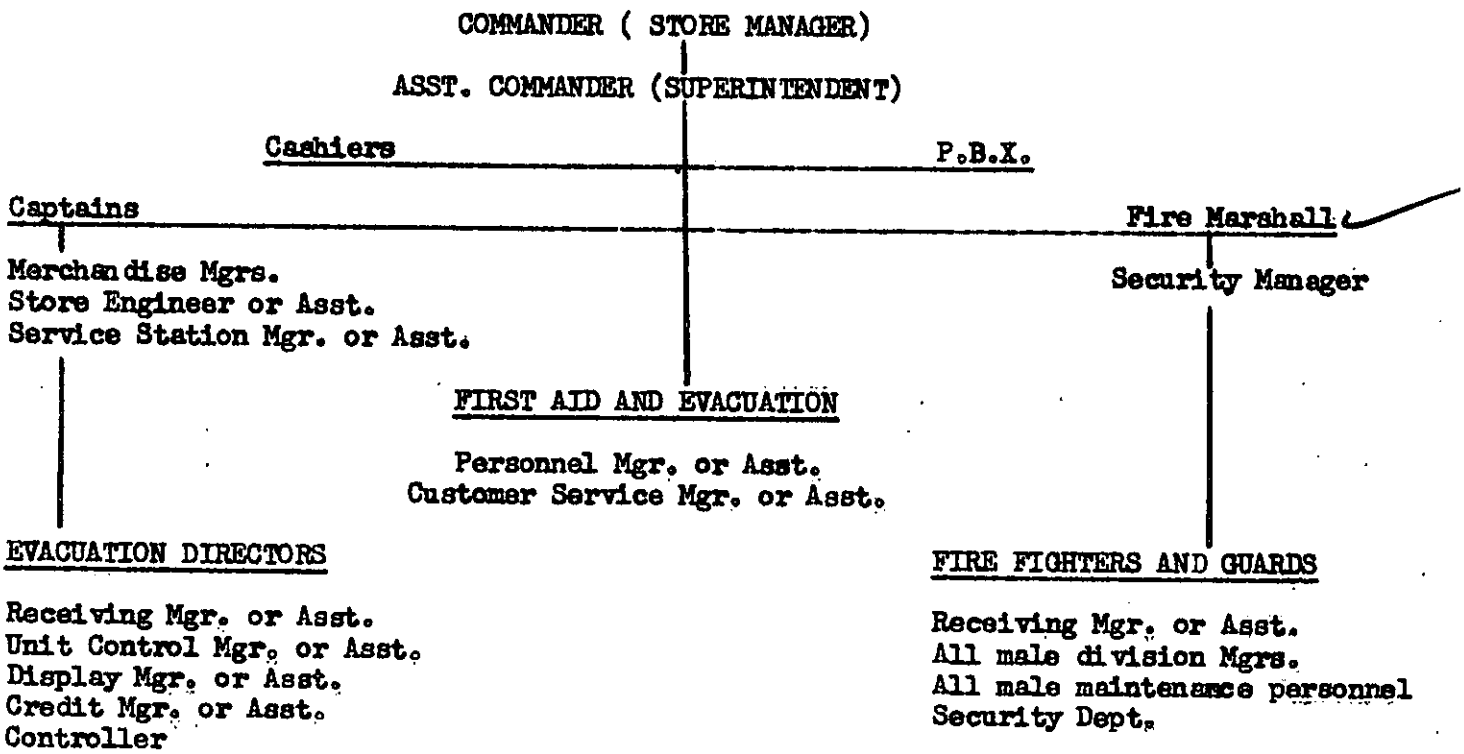
SUBJECT: Sears Buildings
9000, 9100, 9200 Northgate Fashion Mall

As of this date the sprinkler systems to the above captioned buildings are in service.

The risers and OS & Y valves for the Main Building and the Garden Shop are located in the basement of the Main Building about mid-point on the south wall.

The F.D.C. for the above systems is outside the south wall.

The riser and F.D.C. for the Automotive Center are located on the north wall towards the west end. This is an independent system.



An A. D. T. locator panel is located at the east entrance on the north wall of the main building, but it is not in service at this time.

KENNETH MAZZA
Fire Marshal

FIRE AND DISASTER MANUAL

SEARS SAN RAFAEL 1528

This manual is set up as a basic guide in the event of fire, building evacuation or other disasters. The above chart delegates the lines of authority and responsibilities. Teamwork is the key to combating any type of disaster at any time. Remember to work as quickly and as safely as possible. In this way you will help to minimize our losses and possibly eliminate injuries to employes and customers.

W. C. Dunlap
Security Manager

DUTIES:

COMMANDER:

The commander will maintain complete authority over the operation and determine if and when the store should be evacuated.

ASSISTANT COMMANDER:

The Assistant Commander shall have the same duties in the event that the Commander is absent. He shall determine what store staff will remain in the store in case of evacuation to guard the store against looters. The Asst. Commander shall appoint one or two male members of the fire brigade to stand by the cashiers office until a member of the Police department arrives or a member of the store staff can take the post.

CAPTAINS:

The captains shall respond to every fire or disaster call. Their first duties should be to seal off the area from customers as well as employes. They should allow only members of the fire brigade to enter the danger area. The captains shall see that all blowers are turned off and be ready to shut off the risers in the area. They should know the locations of disaster equipment in the store and be ready to supply necessary equipment to the fire fighters.

In the event that the fire cannot be contained and it becomes a hazard to personnel fighting the fire the captains shall determine the safest exit.

The captains shall also see that the registers in the area are guarded abainst foul play, and, if necessary, remove the cash and detail to be placed in the main safe. Upon notice to evacuate the captains shall see that the registers are cleared and be ready to lock and secure the store.

FIRE MARSHALL:

The Fire Marshall or his assistant shall respond to every fire or disaster call. Upon his arrival he shall determine what type of equipment should be used in combating the problem. He will direct the fire fighters and guards and help contain the fire wherever possible. The Fire Marshall shall also help in the evacuation of the store. In the event that the store is evacuated, he will see that the store is locked and secured.

The Fire Marshall or his assistant shall make daily inspections of the store eliminating fire hazards wherever possible. He shall make sure all disaster and fire fighting equipment are in proper working order. The Fire Marshall shall see that enough flashlights are placed around the store in case they are needed in an emergency.

FIRST AID DIRECTORS:

The Personnel Manager or assistant will stand by in the FIRST AID ROOM in the event minor first aid is needed by employes or customers. If it becomes necessary the first aid director may seek help from the customer service department to assist in first aid treatment.

In the event the main store is evacuated the first aid director shall set up in the service station first level manager's office.

EVACUATION DIRECTORS:

The primary function of the evacuation directors is to see that employes and customers leave the store quickly and safely. They will open wide all outer doors and see that all stairways are kept clear and the people moving. They will aid elderly people, calm hysterical people, and help handicapped people leave the store.

The secondary function is the protection of the building, its merchandise, and the store records. In the event the store records must be removed, and if they can be removed with no danger to the personnel removing them, they will be evacuated to safety. The files to be removed shall be marked "Files First" in red labeling on the outside of the file cabinets. The locations of important files are the personnel dept., unit control, customer service, and the credit department. The audit dept. will be responsible for their own files. The receiving dept. and the service station have safes for their important files.

In the event the store is evacuated no one is permitted to enter the store except the police department, fire department, or emergency first aid teams.

FIRE FIGHTERS AND GUARDS:

The fire fighters and guards will respond to every fire and disaster call. They will stand by and be ready to use whatever equipment is assigned to them. They shall follow the instructions given to them by the Fire Marshall or the store staff.

Whenever possible, burning materials should be carried out of the store and put out. This will help cut down the losses from both smoke and water damage. The fire fighters and guards shall also aid in the evacuation of the store and be ready to guard exposed registers. This will help minimize the chances of looters taking advantage of the circumstances. Also, they should remove any valuable merchandise out of the danger area, such as diamonds, furs, etc. This also applies to store records and documents, as well as merchandise.

In the event of a power failure the fire fighters and guards shall assign themselves to the nearest registers.

Fire fighters and guards see zone duties.

P.B.X.

The P.B.X. operator shall make the following announcement immediately upon report of a disaster or fire.

Mrs. O'Riley, please go to division (where needed) immediately
Mrs. O'Riley, division (where needed) immediately
Mrs. O'Riley, division (where needed) immediately

This announcement will be repeated three times.
The operator will then call the local fire department and report the nature of the disaster and its location.

STORE EVACUATION NOTICE

"Good Morning" (afternoon, evening). The office of the civilian defense department has asked Sears to participate in a test alert for the evacuation of our store. We request that all customers please leave the building by the nearest exit immediately. The store will re-open as soon as possible. (Repeat) This is only a test. Thank you for your cooperation."

This announcement shall be repeated twice and once every 15 minutes thereafter until requested to stop by a member of the store staff. Also, in the case of a CIVIL DEFENSE alert the above announcement will be used only by substituting evacuation to the lower level by the closest stairway at once. The sales personnel shall direct the customers within their own departments to the nearest stairway.

Regardless of whether the fire is on the premises or in a building nearby, the fire department must be called immediately.

CASHIERS:

The cashiers will remain in their office unless notified by a member of the store staff to evacuate. Upon that request to evacuate they shall see that the safe is locked and secured.

DUTIES: ZONE CAPTAINS AND ALTERNATES

Zone captains shall have added responsibilities as follows:

1. Sound alarm to all personnel in your zone and direct them to exits away from the fire.

2. After the area has been cleared of personnel, all doors should be closed and all electrical panels in the danger area should be turned off.

3. Be aware of the locations of all fire fighting equipment in your zone.

4. Know the locations of all the riser valves in your zone. If it become necessary for the valves to be turned off, the fire captains should show the fire department where and how to operate them.

5. If there is a sprinkler head running in your zone, the Fire Marshall should know the location at once.

6. Return all unused fire fighting equipment to its proper place.

7. If the fire fighting equipment is used, notify the Fire Marshall so that it may be replaced.

8. Be aware of fire hazards in your zone and help head off a disaster before it happens.

Remarks:

Steve Lucker, Office Manager for Williams - Burroughs the General Contractor on this job brought in four sets of underground plans for the undersigned to check. These plans got the approval of this office as well as the requirements of N.F.P.A. #13. Three sets of plans were signed and dated and returned to Mr. Lucker.

It was noted on the plans that the proposed location of the F.D. connection on the Auto Center would not meet with this department's approval. Parkin Associates Architects have been so advised. (Mr. Pate was advised by us.)

April 22, 1971

Mr. Kenneth Marzza, Fire Marshal
San Rafael Fire Department
San Rafael, California

Dear Mr. Marzza:

This letter will confirm our telephone conversation of April 21, during which we discussed the proposed fire alarm system for the Sears, Roebuck and Co. Retail Store and Auto Center to be constructed in San Rafael. The purpose of the conversation was to review several questions you had voiced as a result of reviewing the plans for the alarm system we designed for the subject job.

In response to your two specific questions, the following conclusions were reached:

1. I verified that the waterflow alarm for the seasonal sales building was connected to a separate zone on the fire alarm system control unit. We agreed that it would be satisfactory to leave the manual fire alarm station on the same zone as the retail store manual stations, as is currently shown on the drawings.

2. Regarding your request for a remote fire alarm annunciator, we agreed that it would be desirable to provide such an annunciator. However, as I explained, the cost factor of this additional device is something that must be approved by the owner.

I will convey your request to the owner and if his approval is granted for the remote annunciator, it will be provided. From an aesthetic point of view, the architect would prefer that the annunciator not be installed on the outside wall in the area you suggested. Therefore, if the annunciator is provided, we will assure you that it will be located where it will be visible without the need of forcing entry into the store. At this point, I cannot tell you exactly where this would be, but it would

MGG2

appear that it could be located on the first floor immediately beneath the location presently shown for the main fire alarm control unit.

I trust that the above agrees with the notes you made regarding our conversation. I'll follow up on your request with the owner and see what can be provided.

Very truly yours,

SCHIRMER ENGINEERING CORPORATION

Items marked under NA or OK were either not applicable or were in compliance at the time of the inspection.

B-2: General Businesses—office, wholesale and retail stores, factories, workshops using materials not highly flammable or combustible, drinking/dining establishments, school rooms for those beyond the 12th grade, for less than 50 people, woodworking and cabinet shops which are owner operated or where not more than one employee is operating one piece of equipment or appliance.

AN OUNCE OF PREVENTION

	Notice #1	#2	#3	NA	OK	
GENERAL REQUIREMENTS AND SPECIAL HAZARDS						
* 1. Install approved address identification.					✓	1
* 2. Individual work station trash cans shall be metal or approved equal.					✓	2
* 3. Trash cans used for collection shall be metal or approved equal with a lid.					✓	3
5. Remove accumulation of waste material on exterior of building.						5
6. Maintain 30" clearance of combustibles to heat producing appliances						6
11. Maintain all area or occupancy separation walls and draft stops.						11
12. Maintain in operable condition and remove all obstructions to fire/smoke doors and fire dampers.						12
* 14. Keys needed for access to all portions of building are current and in Knox-Box.						14
EXITING REQUIREMENTS, BASED ON AN OCCUPANT LOAD FACTOR OF ONE PERSON FOR EVERY:						
____ 100 square feet—offices						
____ 30 square feet—retail shops (ground floor)						
____ 50 square feet—retail shops (upper floors), library, locker areas, etc.						
____ 20 square feet—college classrooms						
____ 15 square feet—conference rooms						
17. Two exits required if occupant load exceeds 50 (except offices).						17
18. Two exits required if occupant load exceeds 30 (offices).						18
21. Two exits required from second floor if occupant load exceeds 10						21
22. Two exits required from all basements and above the second floor.						22
23. Two exits required from Mezzanines larger than 2000 square feet or 60 feet in any direction.						23
24. When two exits are required they must be separated by ½ of the diagonal distance of the room.						24
25. Three exits required if occupant load exceeds 500, four if over 1000.						25
27. Maximum distance to an exit is 150' (unsprinklered buildings) or 200' (sprinklered buildings).						27
28. Dead end corridors may not exceed 20'.						28
30. If occupant load is over 50, doors must swing out; if over 100 they must *only* swing out.						30
31. Exit doors shall not have dead bolts or other similar devices.					✓	31
34. Exit doors and exit paths shall not be obstructed.					✓	34
35. No storage beneath enclosed stairs unless protected by 1 hr. construction.						35
36. Corridors serving 30 or more shall be 1 hr. rated with 20 minute self closing doors.						36
38. If occupant load exceeds 100, all exits except the main entrance shall have exit signs.						38
40. If occupant load exceeds 300 the exit signs shall be illuminated on a separate circuit.						40
41. All exit paths shall be lighted at all time that the building is occupied. If separate circuits are required for the exit signs the exit lighting must also be on separate circuits.					✓	41
95. Maximum occupant load sign is required if less than 50 people. (Restaurants, Lounges)						95
44. Interior stairways to be rated 1 hr. for 3 or 4 stories, 2 hr. for higher buildings.						44
FIRE PROTECTION EQUIPMENT						
45. One 2A10BC fire extinguisher shall be provided for every 6,000 sq. ft. with 75' maximum travel distance.					✓	45
49. One additional 40BC extinguisher shall be provided in all kitchens.				✓		49
50. Extinguishers shall be easily accessible; wall mounted at a height not less than 4" or more than 5' from floor.					✓	50
51. Extinguishers shall be serviced annually, after use, and when gauge indicates recharge.					✓	51
55. Fire protection or detection systems shall be extended, altered or repaired as necessary to maintain protection.						55
56. All sprinkler valves shall be locked in open position, accessible and unobstructed.						56
57. Fire Department connection caps in place and work freely.						57
58. Exterior exposed portions of systems that are not brass or galvanized shall be painted with rust preventative paint.						58
59. Storage shall be maintained at least 18" below sprinkler heads.					✓	59
60. Storage shall be maintained at least 24" below ceiling in unsprinklered buildings.				✓		60
* 61. Maintain systems as follows:						
System Type / *Inspected/Serviced* / *Tested*						
A. Standpipes — Semi-Annually — Every 5 years						61
B. Sprinkler — Quarterly — Every 5 years						
C. Pre-engineered/Fixed — Semi-annually & after-activation — Semi-annually						
62. All commercial cooking shall have a dry chemical system protecting all cooking surfaces.						62
63. Hood and duct ventilation systems shall be maintained free of grease.						63
ELECTRICAL REQUIREMENTS						
66. Discontinue use of extension cords and cube adapters in lieu of permanent wiring.					✓	66
67. Cords shall not be affixed to or extended through walls, ceilings, floors or under doors, nor subject to physical damage.					✓	67
68. Maintain 30" clearance fronting and around electrical control panels.					✓	68
69. Electrical main and sub-panels shall be labeled as to area served and not taped "on" position.					✓	69
FLAMMABLE LIQUIDS						
74. Discontinue use of liquids with flash point below 110°F for cleaning purposes.						74
75. No storage of class 1A liquids in basements.						75
PERMITS ARE REQUIRED OR COMPLIANCE WITH POSTED PERMIT.						
* 87. To store in excess of 5 gallons of flammable liquids inside or 10 gallons outside.						87
* 88. To store in excess of 25 gallons of combustible liquids inside or 60 gallons outside.						88
* 89. For welding or cutting torch operations.						89
* 90. For above ground flammable liquids storage tanks.						90
* 91. Lumber yards in excess of 100,000 board feet of lumber.						91
* 92. To operate refrigeration equipment.						92
* 93. To have an LPG tank in excess of 120 water gallons.						93
* 94. To store hazardous materials in excess of 100 lbs. solid, 55 gallons liquid or 200 cu. ft. gas.						94

San Rafael, CA. 94903

Re: Building Remodel Proposal

To Whom It May Concern:
In the effort for us here at Sears in San Rafael, to control the ongoing problem of inventory loss and merchandise selection availability, we are planning to do some minor building remodeling.
This letter is our stores proposal for the following planned building remodel for Sears at Northgate Mall.
Please find enclosed with this letter a map that shows the areas of the building that we plan to remodel.

Refering to the map:

Green Area "A"

This area we plan to lock the existing customer entrance doors and construct a wall that will completely cover and block the fore mentioned entrance. From the map if you look directly to the left you will see a door that will act as an emergency exit door. On this door we will install a time delayed crash bar that will, in an emergency, allow customers and associates access to the exterior of the building.

Printed on Recycled Paper

SEARS
9000 Northgate Mall
San Rafael, CA 94903
415-507-2300
FAX: 415-479-1306

Green Area "B"

This area of the store our plan is to completely lock and secure two (2) of the existing customer entrance doors. Then with the other two (2) remaining doors we plan to install time delayed crash bars. Our intent with this plan is to completely restrict access through these doors from both customers and associates.

The forgoing is our proposed building remodel plan, and we at Sears are seeking your review and approval so that we may expedite these plans as soon as possible.

We would like to thank you in advance for your careful consideration in this very important matter.

Sincerely,

Dennis Puccetti
Director of Operations
Sears San Rafael

RE: Passenger Elevator Jack Removal Assessment Summary
Sears Retail Store #1528
Northgate Mall, San Rafael, California

Dear Ms. Feeley:

Amec Foster Wheeler Environment & Infrastructure, Inc. (Amec Foster Wheeler), is pleased to submit this summary letter detailing activities associated with the removal of a passenger elevator jack in the Sears Holdings Management Corporation (Sears) retail store Unit #1528 located at 9000 Northgate Mall in San Rafael, Marin County, California. The site location is depicted in **Figure 1**. The general site layout is depicted in **Figure 2.**

INTRODUCTION

Amec Foster Wheeler was retained by Sears to observe activities associated with the removal of a passenger elevator jack at the subject site. Schindler Elevator Corporation (Schindler) was contracted by Sears to remove and replace the elevator jack. Sears requested that Amec Foster Wheeler personnel be onsite to perform the following activities; (1) evaluate whether a reportable release to the environment may have occurred based on field observations, (2) conduct soil sampling, and (3) document the observations during associated field activities. A photographic log documenting the field activities is provided as **Appendix A**.

FIELD ACTIVIES

Schindler had informed Amec Foster Wheeler that the initiation of the piston removal would commence during the week of January 2, 2017 with subsequent removal of the sediment within the casing. Amec Foster Wheeler visited the site on January 6, 2017 and met with a Schindler representative who indicated that the piston removal was taking more time than expected due to the removal of extra concrete around the top of the piston via jackhammer and/or drilling.

Amec Foster Wheeler returned to the Site on January 13, 2017, based upon updates from Schindler. Schindler stated that the piston was removed on January 12, 2017 and appeared to be in good condition with no evidence of leakage. Schindler subcontracted KM McRae, Inc. of Hayward, California to set up a drill rig mounted inside the elevator shaft and drill out the sediments. Amec Foster Wheeler observed the sediments within the casing as they were brought to the surface as drill cuttings. The sediment appeared to consist of sand with no visual indication of impact. Groundwater was encountered at approximately 15 feet below ground surface (bgs) and Amec Foster Wheeler collected a sediment sample from the drill cuttings, just

above the groundwater at approximately 13 to 14 feet bgs. Amec Foster Wheeler detected a slight petroleum odor emanating from the sample sediment during collection. Once groundwater was encountered, the auger being used could no longer bring the sediments to the surface and KM McRae, Inc. arranged to have a "bucket" auger delivered the following Monday to remove the remaining saturated sediments.

Amec Foster Wheeler returned to the Site on January 16, 2017 to observe the removal of the remaining sediments in the casing. Groundwater had risen to approximately 13.5 feet bgs over the weekend and a slight product sheen was noted on top of the groundwater. KM McRae, Inc. utilized a spill pad to remove the product sheen before proceeding with the sediment removal.

KM McRae, Inc. continued with the drilling and sediment removal using the "bucket" auger to a total depth of 20.2 feet bgs. Sediments consisted mostly of coarse grained sands with minor gravel and some concrete removed from the bottom of the casing. KM McRae, Inc. indicated that the bottom of the casing was capped with concrete, as they had refusal at depth and were bring up small concrete chunks along with the normal sediments removed. A total of five 55-gallon drums of sediment were removed from the casing including the sediment interval sampled by Amec Foster Wheeler. No samples were collected from the saturated sediment. The drums were staged onsite pending disposal by Schindler.

Schindler informed Amec Foster Wheeler that they would be replacing the piston. Amec Foster Wheeler did not observe the replacement.

The sediment sample collected between 13 and 14 feet bgs was delivered to Curtis & Tompkins, Ltd. Laboratory in Berkeley, California for analyses. The soil sample was analyzed for total petroleum hydrocarbons (TPH) diesel range organics (DRO) and motor oil range organics (ORO) by USEPA method 8015M, polycyclic aromatic hydrocarbons (PAHs) using USEPA Method 8270-SIM, and polychlorinated biphenyls (PCBs) by USEPA Method 8082.

ANALYTICAL RESULTS

The analytical results were compared to the current California Environmental Screening Levels (ESLs) (Screening for Environmental Concerns at Sites with Contaminated Soil and Groundwater, Table F-1b - Water Board February 2016).

- TPH DRO was detected at a concentration of 550 milligrams per kilogram (mg/kg), which exceeds the ESL for soil of 230 mg/kg.

- TPH ORO and PAHs were either not detected above the laboratory method detection limits (MDLs) or at concentrations below their applicable ESLs.

- PCBs were not detected above the laboratory MDLs.

The laboratory report is provided in **Appendix B**.

Passenger Elevator Jack Removal Assessment Summary
Sears Retail Store #1528
San Rafael, California

CONCLUSIONS

Based on the observations, information provided by Schindler, and laboratory analytical results, the following conclusions were made:

- The elevator jack was removed by Schindler on January 12, 2016.
- The contents of the casing were removed on January 13 and 16, 2016 to a total depth of 20.2 feet. Approximately five 55-gallon drums of liquid and sediment were removed from the cylinder and staged onsite pending disposal.
- Amec Foster Wheeler collected one sediment sample just above first encountered water between 13 and 14 feet bgs and submitted it for laboratory analysis of TPH-DRO, TPH-MRO, PAHs and PCBs. TPH-DRO was detected at a concentration of 550 mg/kg, which exceeded the ESL of 230 mg/kg. The TPH-ORO and PAHs were either below the laboratory MDLs or at concentrations below their applicable ESLs. PCBs were not detected above the laboratory MDLs.
- If the integrity of the casing was not compromised, it is likely that any hydraulic fluid release would be contained within the casing. The casing contents and sampled material were removed and drummed pending proper disposal off-site.
- Based on the apparent containment of the sediment and subsequent removal and disposal of the contents, It is Amec Foster Wheeler's opinion that the elevator does not appear to meet the criteria for a reportable release.

Please contact Craig Cabrera of Amec Foster Wheeler with any questions or comments.

Sincerely,
Amec Foster Wheeler Environment & Infrastructure, Inc.

This data package has been reviewed for technical correctness and completeness. Release of this data has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signature. The results contained in this report meet all requirements of NELAC and pertain only to those samples which were submitted for analysis. This report may be reproduced only in its entirety.

CASE NARRATIVE

Laboratory number:	**285132**
Client:	**AMEC Environment & Infrastructure**
Project:	**3205171572**
Location:	**Sears # 1528, Northgate**
Request Date:	**01/17/17**
Samples Received:	**01/17/17**

This data package contains sample and QC results for one soil sample, requested for the above referenced project on 01/17/17. The sample was received intact.

TPH-Extractables by GC (EPA 8015B):
Matrix spikes QC868991,QC868992 (batch 243506) were not reported because the parent sample required a dilution that would have diluted out the spikes. CS-14 (lab # 285132-002) was diluted due to the dark and viscous nature of the sample extract. No other analytical problems were encountered.

Semivolatile Organics by GC/MS SIM (EPA 8270C-SIM):
CS-14 (lab # 285132-002) was diluted due to high non-target analytes. No other analytical problems were encountered.

PCBs (EPA 8082):
All samples underwent sulfuric acid cleanup using EPA Method 3665A. All samples underwent sulfur cleanup using the copper option in EPA Method 3660B. High responses were observed for Aroclor-1016 and Aroclor-1260 in the CCV analyzed 01/20/17 00:16; affected data was qualified with "b". No other analytical problems were encountered.

285132

Seq. No. 2736

1. Did cooler come with a shipping slip (airbill, etc) YES NO
Shipping info

2A. Were custody seals present? .... ☐ YES (circle) on cooler on samples ☒ NO
How many Name Date
2B. Were custody seals intact upon arrival? YES NO N/A
3. Were custody papers dry and intact when received? YES NO
4. Were custody papers filled out properly (ink, signed, etc)? YES NO
5. Is the project identifiable from custody papers? (If so fill out top of form) YES NO
6. Indicate the packing in cooler: (if other, describe)

☐ Bubble Wrap ☐ Foam blocks ☐ Bags ☒ None
☐ Cloth material ☐ Cardboard ☐ Styrofoam ☐ Paper towels

7. Temperature documentation: * Notify PM if temperature exceeds 6°C

Type of ice used: ☐ Wet ☐ Blue/Gel ☒ None Temp(°C)

☐ Temperature blank(s) included? ☐ Thermometer# ☐ IR Gun#

☐ Samples received on ice directly from the field. Cooling process had begun

8. Were Method 5035 sampling containers present? YES NO
If YES, what time were they transferred to freezer?
9. Did all bottles arrive unbroken/unopened? YES NO
10. Are there any missing / extra samples? YES NO
11. Are samples in the appropriate containers for indicated tests? YES NO
12. Are sample labels present, in good condition and complete? YES NO
13. Do the sample labels agree with custody papers? YES NO
14. Was sufficient amount of sample sent for tests requested? YES NO
15. Are the samples appropriately preserved? YES NO N/A
16. Did you check preservatives for all bottles for each sample? YES NO N/A
17. Did you document your preservative check? (pH strip lot#) YES NO N/A
18. Did you change the hold time in LIMS for unpreserved VOAs? YES NO N/A
19. Did you change the hold time in LIMS for preserved terracores? YES NO N/A
20. Are bubbles > 6mm absent in VOA samples? YES NO N/A
21. Was the client contacted concerning this sample delivery? YES NO
If YES, Who was called? By Date:

Section 1: Introduction

TŌR Environmental, Inc. (TOR) prepared this Limited Phase II Soil, Soil Gas, and Groundwater Assessment Report of the Sears Department Store, Sears Automotive Center, and Sears Appliance Service Center located at 9000 Northgate Mall, San Rafael, California 94903 (Subject Property). This assessment included two subsurface sampling events. The first was undertaken on 16 December 2016 and the second on 27 to 30 June 2017. The work was completed on behalf of Glaser, Weil, Fink, Howard, Avchen Shapiro LLP (Glaser Weil) and Merlone Geier Management (MGM) as a part of a property transaction. This Phase II assessment was completed to evaluate potential impacts to soil, soil gas, and groundwater associated with *Recognized Environmental Conditions (RECs)* identified by the Phase I Environmental Site Assessment (Phase I ESA) of the Northgate Mall by TOR in December 2016 (TOR, 2016). The Phase II assessment was conducted in accordance with TOR's proposals dated 12 December 2016 and 20 June 2017 with minor deviations as described herein.

1.1 Background

1.1.1 Site Description

The Subject Property is located east and north of Northgate Drive and west of Las Gallinas Avenue in San Rafael, California (*Illustration 1*). The Sears Department Store is connected to the southern end of the Northgate Mall. The Sears Appliance Service Center and Sears Automotive Centers are stand-alone buildings located west and southeast of the Sears Department Store, respectively. The three Sears buildings and associated parking areas comprise approximately 10.3 acres. The Subject Property is identified by the Marin County Assessor parcel number (APN) 175-060-40.

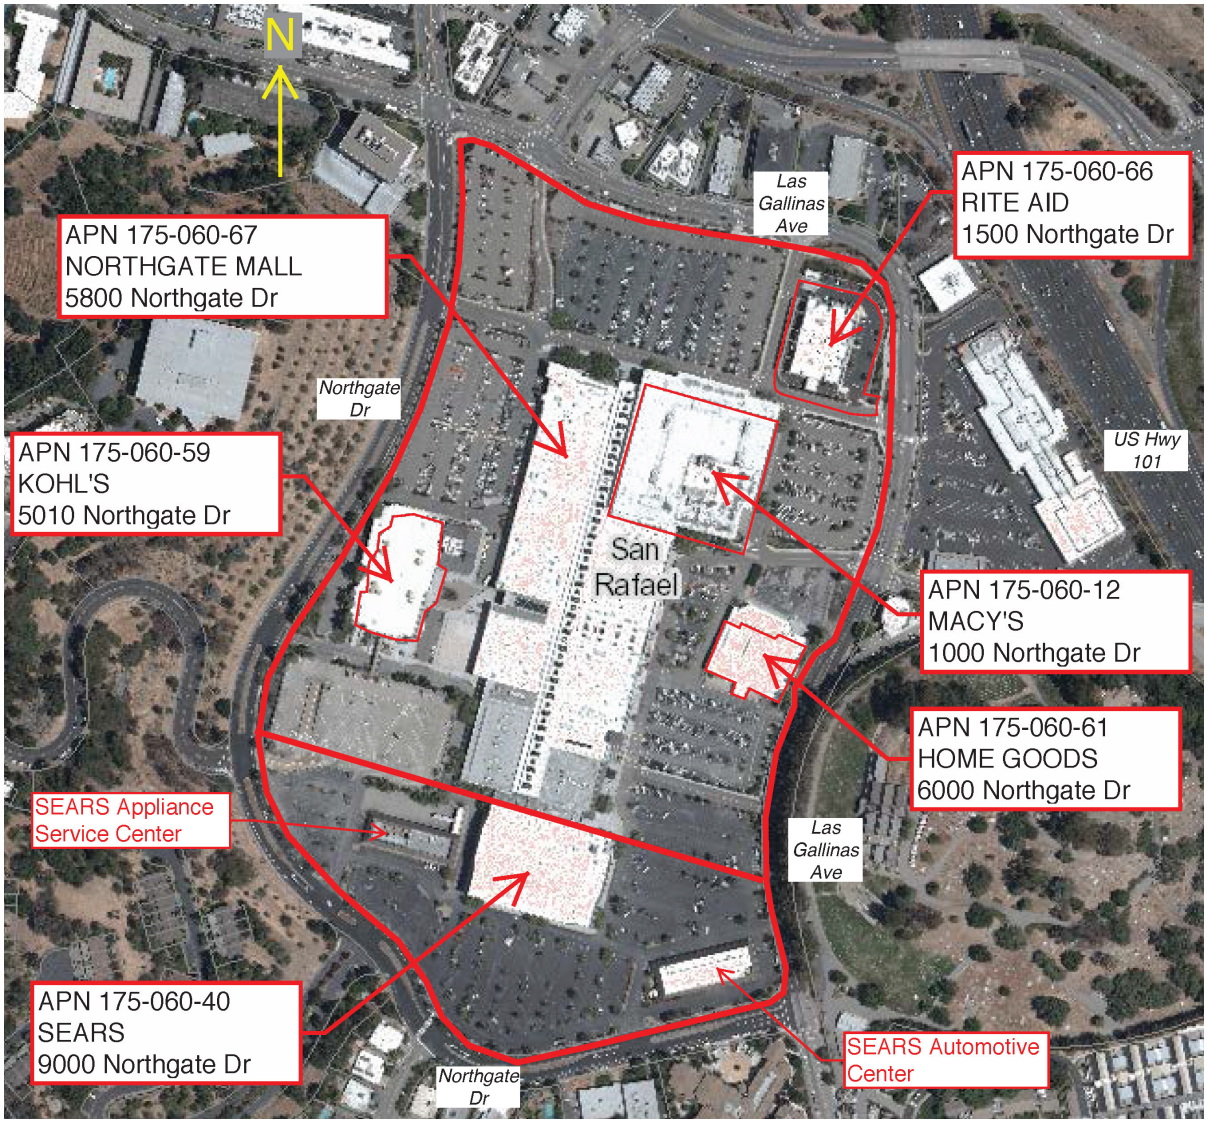

Illustration 1. Northgate Mall Building Layout with Subject Property at the South End.

1.1.2 Current Recognized Environmental Conditions (*RECs*)

Based on the findings of TOR's Phase I ESA, the following facilities were identified for further assessment of potential impacts to soil, soil gas, and groundwater:

Sears Automotive Center:

- Underground hydraulic lifts on auto maintenance shop floor
- Freight elevator to second floor tire storage room
- Battery storage area
- Suspect underground storage tank (UST) location
- Three-stage In-ground clarifier from shop floor drains
- AST and used oil storage area

Sears Appliance Service Center:

- Hazardous waste storage area

Sears Department Store:

- Two freight elevators and one passenger elevator

1.2 Regional Geology

According to EDR GeoCheck (TOR, 2016), the Subject Property is located at 38.003884 North latitude, 122.544308 West longitude and is at a topographic elevation of 42 feet above mean seal level (msl). The Subject Property and most of the surrounding area generally slopes downward to the northeast and east.

The Subject Property is located in the Coast Ranges on the west side of San Pablo Bay. The Subject Property is reported to be underlain by Tertiary-age strata (TOR, 2016). Subsurface soils within the upper approximately 23 feet beneath the Subject Property are reported to consist of alluvium that includes silt, sand, clay, with gravel (Sigma, 2009). The United States Department of Agriculture (USDA), Soil Conservation Service (SCS) describes soils in the vicinity of the Subject Property as urban land (TOR, 2016).

1.3 Hydrogeologic Information

Limited groundwater information for the Subject Property and surrounding area was provided in Environmental Data Resources (EDR) GeoCheck - Aquiflow Information System. Various directions of groundwater flow reported at select sites from ¼ to ½ mile from the Subject Property were found in reports submitted to regulatory agencies, including towards the southwest, toward the northwest, and varied, (TOR, 2016). Due to the varying

hydrogeology of the area, groundwater flow is likely varied in different areas of the Subject Property. The topographic gradient in much of the Subject Property vicinity is varied but appears generally to slope towards the north-northeast and is assumed, for the purposes of this report, to be the direction of groundwater flow.

Based on a review of the California State Water Resources Control Board (SWRCB) GeoTracker web site, the depth to ground water across Las Gallinas Boulevard to the north of the Subject Property has varied from about 0.60 feet below ground surface (bgs) to almost 28 feet bgs (data from former Exxon site at 930 Del Presidio Boulevard).

In January 2017, the piston for the passenger elevator in the Sears Department Store was removed and replaced. Groundwater was first encountered at approximately 15 feet bgs and stabilized at 13.5 feet bgs the next day as reported by Amec Foster Wheeler Environment & Infrastructure, Inc. (Amec, 2017).

1.4 Site-Specific Subsurface Conditions

The boring logs from this investigation suggest subsurface soils around the Sears Automotive Center consist primarily of layered beds of silty clay, clayey silt, and sand to depths of five to 6.5 feet bgs, underlain by weathered shale and clay to the maximum depth explored of 15 feet bgs. Native soil was not encountered during drilling under the concrete slab in the Sears Department Store basement. The slab is underlain by poorly graded very coarse to coarse rounded gravel quarry spec drainrock.

Groundwater was not encountered during drilling in borings around the Sears Automotive Center up to the maximum depth explored of 15 feet bgs. Groundwater was encountered in the basement of the Sears Department Store approximately two feet below the surface of the concrete slab. Field boring logs for the December 2016 and June 2017 samples are included in *Appendix A*.

During TOR's assessment of the Subject Property, two permanent groundwater monitoring wells (MW-3 and MW-4) were observed north of the Sears Automotive Center, associated with the former gas station at that location. Groundwater was encountered at 9.82 and 6.48 feet below top of casing (btoc), respectively.

Section 2: Scope of Assessment

2.1 Health & Safety

TOR prepared a site-specific Health & Safety Plan (HASP) for the project. The HASP identified the potential hazards that could be encountered during performance of the proposed subsurface investigation. The HASP was consistent with current Federal Occupational Safety and Health Administration (OSHA) requirements for hazardous waste operations [29 Code of Federal Regulations (CFR) 1910.120 (e)]. All activities were conducted in Level D personal protective equipment (PPE).

2.2 Permitting

A Permit for Test Holes/Soil Borings was obtained from the Marin County Environmental Health Services (EHS) for the June 2017 borings due to extending deeper than 10 feet and encountering and sampling of groundwater (*Appendix B*).

2.3 Utility Clearance for Subsurface Drilling

To initiate assessment of underground utilities that might be encountered during subsurface drilling and sampling activities, TOR contacted USA North 811, consulted with property management personnel, obtained as-built utility schematics for the Subject Property, and engaged Geophysical Survey Systems, Inc. and Encompass Inspections LLC, private utility locators. Underground improvements were marked on the parking lot pavement and boring locations were selected to avoid their encounter during drilling activities. Boring locations were screened during the geophysical survey.

Geophysical surveillance was used around the west, east, and south sides of the Sears Automotive Center to evaluate for the potential presence of unknown but reported underground storage tanks. Encompass identified the probable location of one or more USTs near the southeastern corner of the Sears Automotive Center.

2.4 Subsurface Sampling Assessment

The objective of this assessment was to collect data to evaluate potential residual impacts to soil, soil gas, or groundwater from the identified facilities in the Sears Department Store, Sears Appliance Service Center, and Sears Automotive Center in preparation for site redevelopment.

The scope of the assessment included the following:

- Advanced 13 temporary borings in the area of the Sears Automotive Center: in the auto shop floor adjacent to existing in-ground hydraulic lifts and in the sunken work

bay, in the oil storage area southwest of the building, adjacent to suspect location for existing USTs southeast of the building, adjacent to existing clarifier northwest of the building, and adjacent to the elevator.

- Advanced three temporary borings in the Sears Department Store basement adjacent to three elevators.
- Advanced one temporary boring in the former Sears Appliance Service Center in the vicinity of a waste oil and trash storage area.
- Collected groundwater samples from two existing groundwater monitoring wells northeast of the Sears Automotive Center.
- Collected a concrete sample from the floor in the battery storage area of the Sears Automotive Center.
- The concrete or asphalt was cored at each sample location.
- Chain-of-custody (COC) documentation was maintained throughout the sampling process.
- Following collection of the samples, borings were properly abandoned and the surface was patched in each location.
- Soil cuttings were generated with the drilling methods used and residuals were placed in a DOT-approved 55-gallon drum, labeled, and stored onsite pending analytical results. Disposal of IDW has been scheduled and documentation will be provided following receipt from the disposal contractor.

Soil Samples

- A truck-mounted or limited access direct push GeoProbe sampler or hand-held auger or hammer drill was utilized to drill the temporary borings up to 15 feet bgs. The direct push rigs were equipped with 2.25-inch diameter Macro Core™ drill rods and fitted with acetate liners for continuous sampling. Due to limited access, some borings were hand-drilled.
- Soil samples were collected at five-foot intervals in borings where the direct push rigs are used. Soil samples were not collected from hand-drilled borings because the hand drill was not equipped for soil sample retrieval.
- Soil samples were analyzed in a fixed-based laboratory, Pace Analytical Services LLC (Pace) or McCampbell Analytical, Inc. (McCampbell). Analytical methods included EPA Method 8260B for volatile organic compounds (VOCs), EPA Method 8015B for total petroleum hydrocarbons (TPH) in the diesel-range (TPHd) and motor oil-ranged (TPHo), and EPA Method 8021B/8015Bm for gas-range TPH (TPHg). Samples collected adjacent to the clarifier were also analyzed for CAM/CCR 17 Metals by EPA Method 6020.

Groundwater Samples

- Grab groundwater samples were collected from temporary groundwater wells installed at the three Sears Department Store locations near the elevators. The two existing groundwater monitoring wells were gauged and grab groundwater samples were collected using low-flow purging methods.
- Groundwater samples were analyzed by McCampbell's fixed-based laboratory. Analytical methods included: EPA Method 8260B for VOCs, EPA Method 8015B for TPHd and TPHo, and EPA Method 8021B/8015Bm for BTEX and MTBE.

Soil Gas Samples

- After soil samples were collected, temporary soil gas wells were set in the Sears Automotive Center. In two locations, temporary nested soil gas probes were installed with sampling depths at 5 feet and 10 feet bgs. The other four soil gas wells had their probes set at five feet bgs. The soil gas probes were set in 12 inches of sand, followed by six inches of dry bentonite, with hydrated bentonite to the soil surface, in accordance with current California Environmental Protection Agency (Cal EPA) Department of Toxic Substances (DTSC) guidelines.
- Temporary soil gas wells were allowed to set for a minimum of two hours before sampling, in accordance with DTSC guidelines.
- Soil gas samples were collected and analyzed onsite by a California state-certified mobile laboratory TEG Northern California, Inc.(TEG) and analyzed by EPA Method 8260B for VOCs.

Concrete Sample

- The concrete sample was collected by drilling the concrete slab and collecting the concrete dust and it was analyzed for Title 22 CAM 17 Trace Metals by EPA Methods 6010B and 7471A in a fixed-base laboratory (subcontracted by Pace to Eurofins Calscience laboratory).

2.5 Sample Locations

2.5.1 Soil Sample Locations

On 16 December 2016, six soil samples were collected from the Subject Property, as listed in *Table 1*. Five soil samples were collected from ten feet deep in the Sears Automotive Center adjacent to existing in-ground hydraulic lifts and labeled 1SAC10, 2SAC10, 3 SAC10, 4 SAC10, and 5SAC10 (*Illustration 2*). One soil sample was collected from one foot below the concrete slab of the former Sears Appliance Service Center in the vicinity of a waste oil and trash storage area and labeled 1Sears1 (*Illustration 3*). A soil sample was not collected from the boring in the sunken work bay of the Sears Automotive Center (6SAC1)

because it was hand drilled. Field boring logs for the December 2016 samples are provided in *Appendix A*.

Table 1. Soil Sample Boring Details, December 2016

Boring ID	Building	Date of Sample	Depth of Soil Sample ft bgs
1SAC10	Sears Automotive Ctr	12/16/16	10'
2SAC10	Sears Automotive Ctr	12/16/16	10'
3SAC10	Sears Automotive Ctr	12/16/16	10'
4SAC10	Sears Automotive Ctr	12/16/16	10'
5SAC10	Sears Automotive Ctr	12/16/16	10'
1SEARS1	Sears Appl Service Ctr	12/16/16	1'

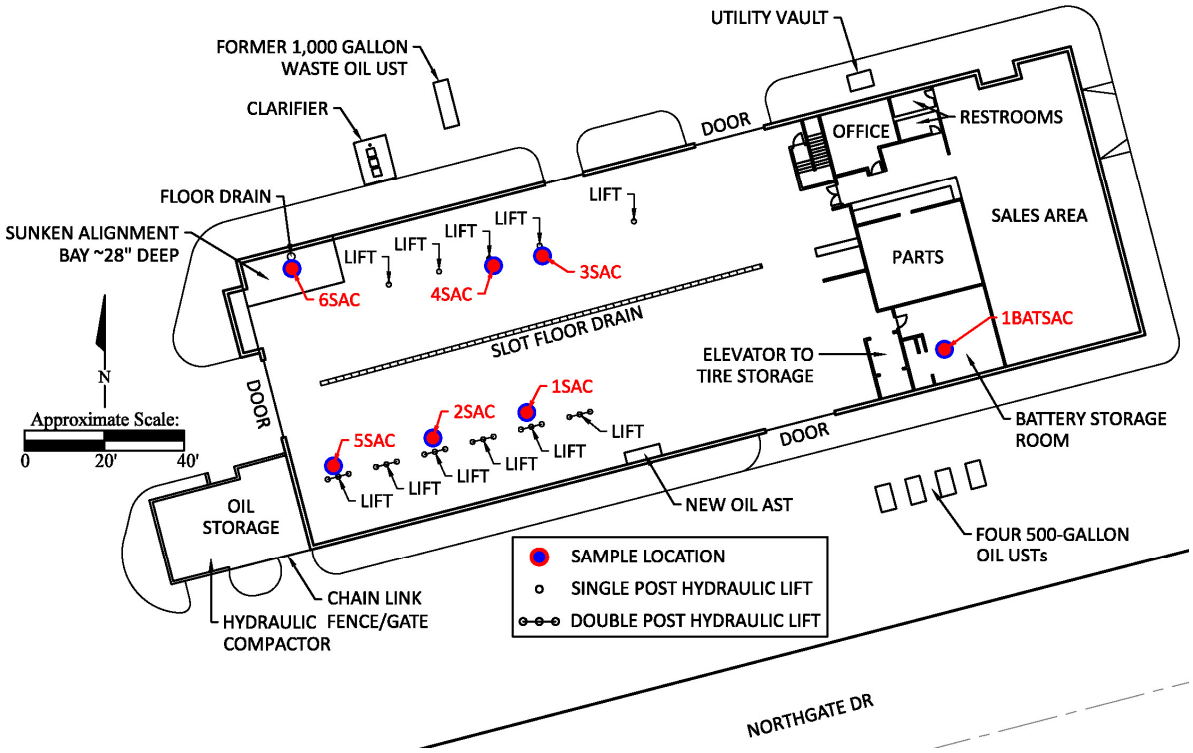

Illustration 2. Sample Locations in the Sears Automotive Center, December 2016.

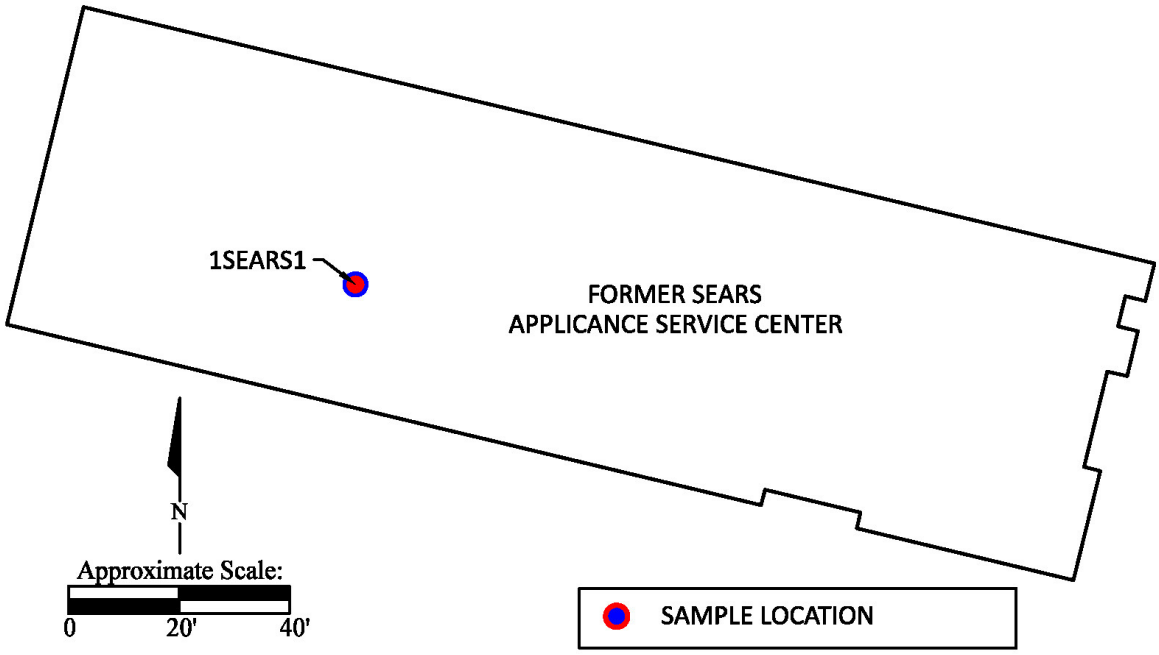

Illustration 3. Sample Location in the Sears Appliance Service Center, December 2016.

On 29 and 30 June 2017, 18 soil samples were collected from the Subject Property, as listed in *Table 2*. Two borings (SB-UST-E and SB-UST-W) were placed adjacent to the suspected four 500-gallon oil USTs located southeast of the Sears Automotive Center. Two borings (SB-CLFR-E and SB-CLFR-W) were placed adjacent to the three-stage clarifier located northwestern of the Sears Automotive Center. Two borings (SB-WasteOil-N SB-WasteOil-S) and were placed adjacent to the used oil above ground storage tanks (ASTs) on the southwest side of the Sears Automotive Center's oil storage area.

The soil borings for sampling adjacent to the elevator in the Sears Automotive Center and the three elevators in the Sears Department Store were placed as close to the elevator shaft as possible. One boring (SB-Elev-Auto) was placed on the western side of the Sears Automotive Center freight elevator wall. One boring (SB-Elev-P1) was placed in the basement motor room below the Sears Department Store passenger elevator. A soil sample was collected at one foot below the concrete slab, immediately above encountered groundwater, at this location. One boring (SB-Elev-F2) was placed on the western side of the Sears Department Store northern freight elevator in front of the basement elevator doors. One boring (SB-Elev-F3) was placed on the western side of the Sears Department Store southern freight elevator in front of the basement elevator doors. Soil samples were not collected from borings SB-Elev-F2 and SB-Elev-F3 due to the encounter of coarse gravel under the slab. Soil sample locations for June 2017 are shown on *Illustration 4.* Field boring logs for the June 2017 samples are provided in *Appendix A*.

Table 2. Soil Sample Boring Details, June 2017

Location ID	Depth of Sample	Date of Sample	Depth of Samples
SB-UST-W	Sears Automotive Ctr	6/29/17	5', 10', 13'
SB-UST-E	Sears Automotive Ctr	6/29/17	5', 10', 15'
SB-CLFR-W	Sears Automotive Ctr	6/29/17	5', 10', 15'
SB-CLFR-E	Sears Automotive Ctr	6/29/17	5', 10', 15'
SB-Waste Oil-N	Sears Automotive Ctr	6/30/17	5', 10', 12'
SB-Waste Oil-S	Sears Automotive Ctr	6/30/17	5'
SB-Elev-Auto	Sears Automotive Ctr	6/30/17	5.5'
SB-Elev-P1	Sears Dept Store	6/30/17	1'

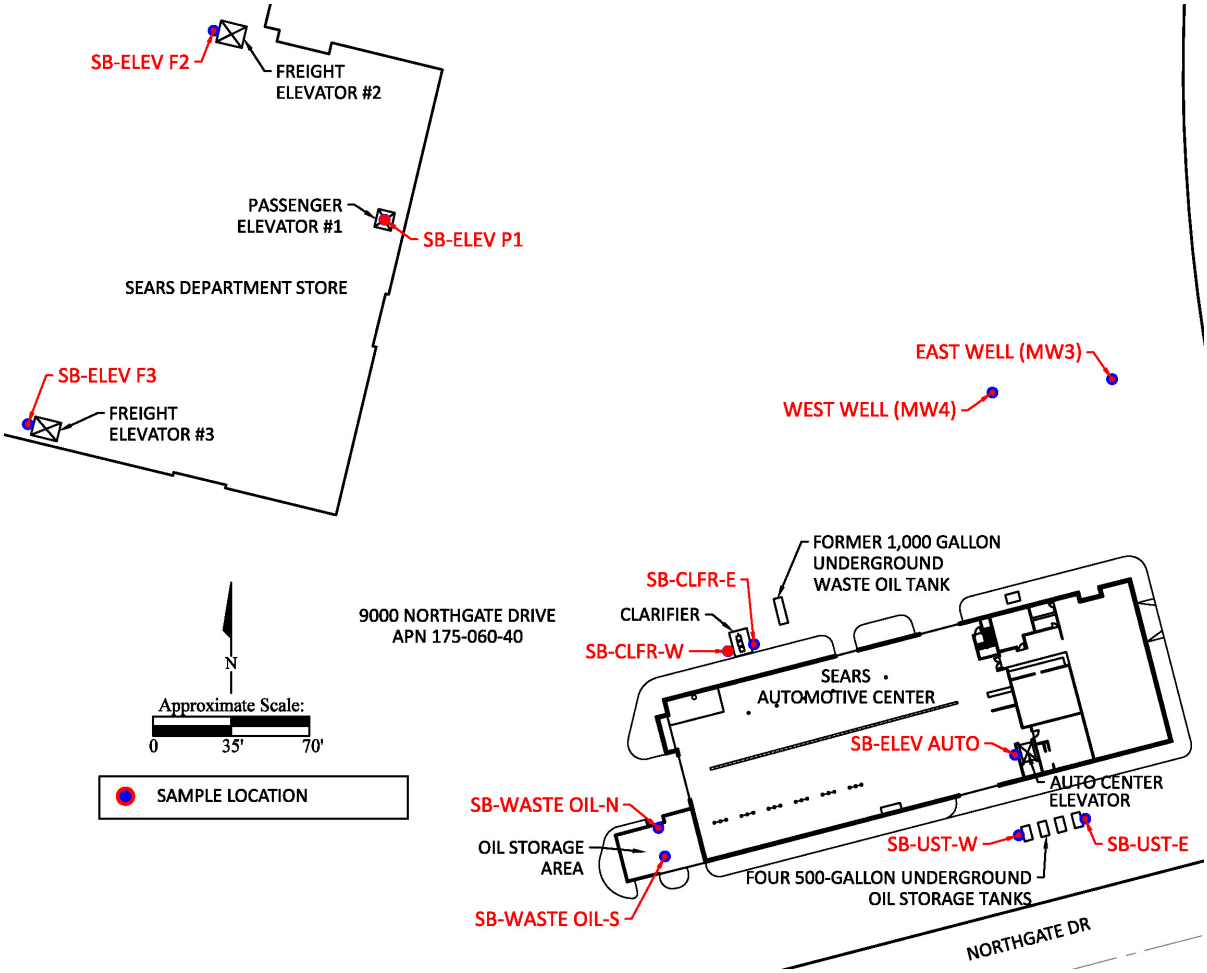

Illustration 4. Sample Locations in the Sears Department Store and Sears Automotive Center, June 2017.

2.5.2 Groundwater Sample Locations

On 30 June 2017, three temporary groundwater sampling wells were installed in borings SB-Elev-P1, SB-Elev-F2, and SB-Elev-F3, adjacent to the elevators in the Sears Department

Store basement. A full groundwater sample was collected from SB-Elev-P1 and a partial groundwater sample was collected from SB-Elev-F2. Sample SB-Elev-F2 was analyzed for TPHd and TPHo only, there was an insufficient amount of water collected to analyze for VOCs. There was insufficient water to collect a sample from SB-Elev-F3.

Two existing permanent groundwater monitoring wells were sampled, MW-3 (East Well) and MW-4 (West Well), located north of the Sears Automotive Center. The wells were gauged for depth to groundwater and well depth. Groundwater sample depths are summarized in *Table 3*. Well construction details were obtained from Sigma Engineering's Phase II Environmental Site Assessment Report (Sigma, 2009). Groundwater sample locations for June 2017 are shown on *Illustration 4.* Field boring logs for the June 2017 groundwater samples are provided in *Appendix A*.

Table 3. Groundwater Sample Construction Details, June 2017.

Sample ID ID	General Location	Date of Sample	Screen Depth ft bgs	Well Depth ft btoc/bgs	Depth to Groundwater ft btoc/bgs	Depth of Sample ft btoc/bgs
West Well (MW4)	Sears Auto Center	6/30/17	6-16	13.98	6.48	11.90
East Well (MW3)	Sears Auto Center	6/30/17	10-15	15.82	9.82	11.15
SB-Elev-P1	Sears Dept Store	6/30/17	0-2	3	1.5	2
SB-Elev-F2	Sears Dept Store	6/30/17	0-2	2	1.5	2

MW3 and MW4 are permanent groundwater monitoring wells
P1 and F2 are temporary groundwater sample wells
ft btoc = feet below top of casing
ft bgs = feet below surrounding ground surface
Measurements for well depth, depth to groundwater, and depth of sample for MW3 & MW4 are reference to below top of casing, whereas P1 and F2 reference surrounding ground surface (basement level).

2.5.3 Soil Gas Sample Locations

On 16 December 2016, eight soil gas samples were collected from the Subject Property, as listed in *Table 4*. Boring locations 1SAC and 5SAC were constructed as nested temporary soil gas wells with soil gas probes at five feet and 10 feet bgs in the same borehole (1SAC5, 1SAC10, 5SAC5, and 5SAC10). Boring locations 2SAC, 3SAC, and 4SAC were constructed as single temporary soil gas wells with a single soil gas probe at five feet bgs (2SAC5, 3SAC5, and 4SAC5). Boring location 6SAC was a soil boring in the sunken work bay (6SAC1). The 6SAC1 well was constructed as a sub-slab soil gas well approximately one foot under the concrete slab in the sunken bay. The locations of the soil gas probes are shown on *Illustration 2.* Field boring logs for the December 2016 soil gas samples are provided in *Appendix A*.

Table 4. Soil Gas Sample Construction Details, December 2016.

Boring ID	Building	Date of Sample	Depth of Soil Gas Sample ft bgs
1SAC5	Sears Automotive Ctr	12/16/16	5'
1SAC10	Sears Automotive Ctr	12/16/16	10'
2SAC5	Sears Automotive Ctr	12/16/16	5'
3SAC5	Sears Automotive Ctr	12/16/16	5'
4SAC5	Sears Automotive Ctr	12/16/16	5'
5SAC5	Sears Automotive Ctr	12/16/16	5'
5SAC10	Sears Automotive Ctr	12/16/16	10'
6SAC1	Sears Automotive Ctr	12/16/16	1'

2.5.4 Concrete Sample Location

On 16 December 2016, one concrete sample was collected from the Subject Property. The sample was collected from the concrete slab inside the battery storage room of the Sears Automotive Center (1BATSAC). The location of the concrete sample is shown on *Illustration 2*.

2.6 Sampling Methodologies

2.6.1 Soil Sampling Methodology

Drilling on 16 December 2016 was conducted by TEG of Rancho Cordova, California and on 29 to 30 June 2017 was conducted by Cascade Drilling Inc. (Cascade), of Richmond, California. A truck-mounted or limited access direct push GeoProbe sampler or hand-held auger or hammer drill was utilized to drill the temporary borings up to 15 feet bgs. The direct push rigs were equipped with 2.25-inch diameter Macro Core™ drill rods and fitted with acetate liners for continuous sampling. Acetate liners were opened using a specialized cutting tool. Soil samples were collected from the acetate liners at each sample depth and placed into one 4-ounce wide-mouth glass jar and sealed with a Teflon™ lined lid. The jars were labeled by sample location, depth, and date and time of collection. Soil samples were placed in an ice-filled cooler for transport using COC protocol to Pace or McCampbell fixed-based laboratories for analysis. COC documentation was maintained throughout the sampling process. Due to limited access, some borings were hand-augered or hand-drilled. Soil samples were not collected from hand-drilled borings because the hand drill was not equipped for soil sample retrieval.

Part of each soil sample was also placed in a zip-top plastic bag for headspace analysis using a photoionization device (PID). PID values were recorded on the boring logs. Soil cores were logged in the field for soil lithology according to the Unified Soil Classification System (USCS) and were continuously field-screened during sampling for the presence of

VOCs using a PID. Soil boring logs completed for each borehole are provided in *Appendix A*. Soil samples were collected by a California Professional Geologist. Following soil sample collection, the borehole was backfilled with bentonite grout and chips to the surface, and patched with concrete. For the three elevator borings in the Sears Department Store basement, a temporary groundwater sampling well was installed and the borehole was abandoned after groundwater sample collection was attempted.

2.6.2 Groundwater Sampling Methodology

Temporary groundwater sampling wells were installed on 30 June 2017 in three borings advanced using a hand auger operated by Cascade: SB-Elev-P1, SB-Elev-F2, and SB-Elev-F3, all in the Sears Department Store basement. Temporary groundwater sampling wells were constructed using one-inch diameter, Schedule 40 polyvinyl chloride (PVC) casing with five feet of 0.010-inch slotted screen.

Each temporary well was gauged following installation to verify sufficient groundwater volume for sampling. Wells were sampled with a peristaltic pump and tubing. A full sample was collected from SB-Elev-P1, but only a partial sample was collected from SB-Elev-F2 due to a lack of sufficient water. Groundwater never infiltrated into the temporary well casing in SB-Elev-F3 in sufficient quantities to collect a sample. Following groundwater sample collection, the PVC casings of the temporary wells were removed and the boreholes backfilled with hydrated bentonite to the surface and patched with concrete.

TOR also sampled two existing permanent groundwater monitoring wells, MW-3 (East Well) and MW-4 (West Well), located north of the Sears Automotive Center and associated with the former gas station at that location. The wells were sampled with a peristaltic pump. The screen interval depths for the wells were not known at time of sampling, so the pump tubing end was placed halfway between the water level and the bottom of the well casing. Water quality parameters were not collected and the wells were not purged prior to grab groundwater sampling.

The groundwater samples were collected into six 40-mL glass Volatile Organic Analyte (VOA) vials with laboratory prepared hydrochloric acid (HCl) preservative. The vials were labeled by sample location and date and time of collection. Groundwater samples were placed in an ice-filled cooler for transport using COC protocol to the fixed-based laboratory for analysis.

2.6.3 Soil Gas Sampling Methodology

Soil gas samples were collected from six temporary soil gas monitoring wells installed in the Sears Automotive Center by TEG on 16 December 2016. Samples were collected in accordance with guidance for active soil gas investigations by the July 2015 DTSC-RWQCB "*Advisory Active Soil Gas Investigations"* (Cal EPA DTSC, LARWQCB, SFRWQCB, 2015).

Prior to sampling, a leak detection test was conducted at each soil gas monitoring well to help ensure the integrity of the sampling system and credibility of the results. Each well was purged using a calibrated flow meter or a calibrated syringe and vacuum gauge. An open VOA container filled with a mixture of 1,1-difluoroethane was placed adjacent to the probe at the surface while purging and sampling to evaluate the probe for leaks between the ground surface and the sampling screen. No 1,1-difluoroethane was found in any of the samples reported. Also prior to sampling, a shut-in test was conducted at each soil gas monitoring well to check for leaks in the above ground fittings. If there was any observable loss of vacuum, the fittings were adjusted as needed until the vacuum reading on the gauge did not change. The probes were purged of three calculated well volumes prior to sampling as recommended by DTSC/RWQCB guidance documents.

Samples were collected using a laboratory-supplied glass syringe fitted with a disposable needle and valve that shuts off flow and secures the sample within the syringe. Samples were analyzed for VOCs by EPA Method 8260B using an onsite state-certified mobile laboratory from TEG. Detection limits were set at or below the California Environmental Protection Agency (Cal EPA) Office of Environmental Health Hazard Assessment (OEHHA) Residential California Human Health Screening Levels (CHHSL-R) (Cal EPA OEHHA, 2010).

The syringes used for soil gas sampling were filled with ambient air and the ambient air analyzed before beginning probe sampling for the day. The process helped to identify any contaminants associated with the syringe and to verify the effectiveness of the syringe decontamination procedures. The syringes and their appurtenant pieces were decontaminated by placing them in the gas chromatograph oven and heating it to 120 degrees centigrade for 30 minutes. The syringes were allowed to cool to the ambient temperature before using again.

One duplicate soil gas sample was collected (labeled 3SAC5 DUP). The duplicate soil gas sample was collected in the same manner as the initial sample immediately following the collection of the initial sample.

2.6.4 Concrete Sampling Methodology

A hole in the concrete slab in the Sears Automotive Center battery room was hand-drilled. A sample of the concrete spoils created by the drilling was collected in a glass jar and sealed with a Teflon™ lined lid. The jar was labeled by sample location, depth, and date and time of collection. The concrete sample was placed in an ice-filled cooler for transport using COC protocol to the Pace fixed-based laboratory for analysis. Pace subsequently subcontracted the Title 22 CAM 17 Trace Metals analysis to Eurofins Calscience laboratory. COC documentation was maintained throughout the sampling process.

2.7 Sample Laboratory Analysis

Soil samples were analyzed in the Pace or McCampbell fixed-based laboratories. Analytical methods included EPA Method 8260B for VOCs, EPA Method 8015B for TPHd and TPHo, and EPA Method 8021B/8015Bm for TPHg. Samples collected adjacent to the clarifier were also analyzed for CAM/CCR 17 Metals by EPA Method 6020. Detection limits were appropriate to evaluate residual levels of compounds.

Groundwater samples were analyzed in the McCampbell fixed-based laboratory. Analytical methods included: EPA Method 8260B for VOCs, EPA Method 8015B for TPHd and TPHo, and EPA Method 8021B/8015Bm for benzene, toluene, ethylbenzene, and xylenes (BTEX) and methyl-tert-butyl-ether (MTBE). Detection limits were appropriate to evaluate residual levels of compounds as well as compare them to regulatory screening levels.

Soil gas samples were collected and analyzed onsite by the TEG California state-certified mobile laboratory by EPA Method 8260B for VOCs. Detection limits were set at or below the CHHSL-R screening levels.

The concrete sample was analyzed for Title 22 CAM 17 Trace Metals by EPA Methods 6010B and 7471A in a fixed-base laboratory (subcontracted by Pace to Eurofins Calscience laboratory).

All laboratories are State-Certified laboratories. COC documentation was maintained throughout the sampling process for soil, soil gas, groundwater, and concrete samples. Analytical reports for soil and concrete samples are included in *Appendix C*. The analytical report for groundwater samples is included in *Appendix D*. The analytical report for soil gas samples is included in *Appendix E*.

2.8 Investigation Derived Waste (IDW)

During the process of this assessment, various IDWs were generated, including used PPE and disposable sampling equipment. Used PPE and disposable equipment was doubled bagged and placed in a municipal refuse dumpster. Soil cuttings were generated with the drilling methods used and residuals were placed in a DOT-approved 55-gallon drum, labeled, and stored onsite pending analytical results. Disposal of IDW has been scheduled and documentation will be provided following receipt from the disposal contractor.

Section 3: Assessment Findings

3.1 Analytical Results for Soil Samples

The analytical testing results for soil sampling on 12 December 2016 are summarized in *Table 5*. Soil boring sample locations with analytical results for the Sears Automotive Center are shown on *Illustration 5* and the former Sears Appliance Service Center on *Illustration 6.* The laboratory analytical reports for soil samples are provided in *Appendix C.*

VOCs were not detected in the December 2016 soil samples collected from beneath the auto shop floor at the Sears Automotive Center. One sample exceeded the San Francisco Bay Regional Water Quality Control Board Environmental Screening Levels (ESLs) for soil for TPHd (2SAC10). The other detections of TPHd and TPHo were below the ESLs.

TPH detections indicate leaks/spills associated with the hydraulic lifts or the auto servicing activities. This initial assessment was planned to reveal the presence of impacts rather than definition of the lateral and vertical extent of impacts found. Lack of VOC impacts suggests limited extent of TPH impacts that may be limited around the hydraulic lifts which appear to be the primary source of the releases revealed. A soil management plan should be developed for the identification and handling of impacted soil encountered during removal of the underground lifts and an subsequent redevelopment of the property.

Table 5. Soil Sample Results, December 2016

Sample ID	Depth of Sample	Date of Sample	VOCs ug/kg	TPHd mg/kg	TPHo mg/kg
1SAC10	10	12/16/16	ND	**8.1**	ND
2SAC10	10	12/16/16	ND	**273**	**476**

VOCs = Volatile organic compounds
TPHd = Diesel-range total petroleum hydrocarbons
TPHo = Motor oil-range total petroleum hydrocarbons
ug/kg = micrograms per kilogram (ppb)
mg/kg = milligrams per kilogram (ppm)
Auto Ctr = Sears Automotive Center
Appl Ctr = former Sears Appliance Service Center
ND indicates not detected at or above reporting limit.
SFRWQB ESL screening level is from the San Francisco Bay Regional Water Quality Control Board, Environmental Screening Levels (ESLs), Tier 1 ESLs Table dated February 2016 (Rev. 3).

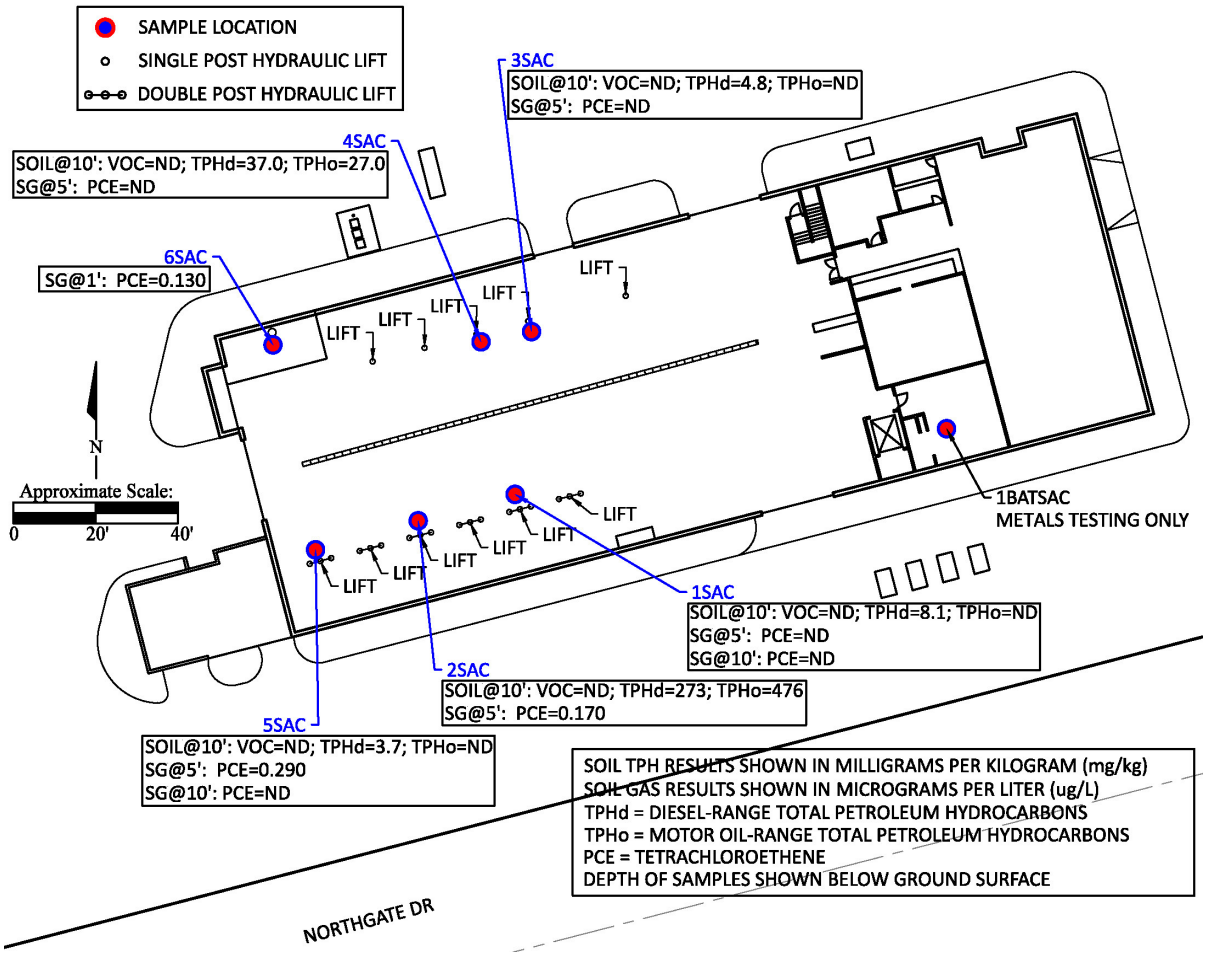

Illustration 5: Soil Boring Sample Locations with Soil and Soil Gas Analytical Results for VOCs and TPH in the Sears Automotive Center, December 2016.

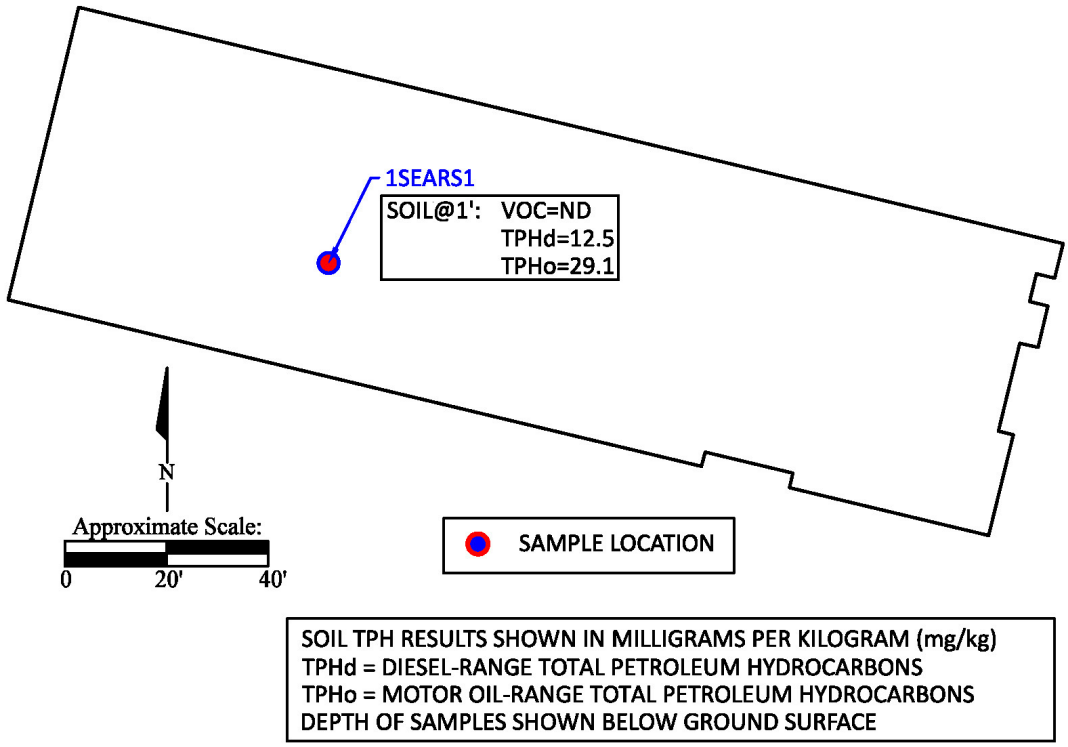

Illustration 6: Soil Boring Sample Location with Soil Analytical Results in the Sears Appliance Service Center, December 2016.

Analytical testing results for soil sampling on 30 to 31 June 2017 are summarized in *Tables 6, 7, and 8*. Soil boring sample locations with soil analytical results for VOCs and TPH are shown on *Illustration 7*. Laboratory analytical reports for soil samples are provided in *Appendix C.*

For June 2017 soil samples, VOCs were detected in sample SB-USTE-15. Naphthalene and xylenes were detected below the ESL soil screening level. Since there is no ESL to compare 1,2,4-trimethylbenzene, the detection was compared to and result was below DTSC Human and Ecological Risk Office (HERO) Human Health Risk Assessment (HHRA) Note 3 screening level for residential soil (Cal EPA DTSC HERO, 2016). There is no ESL or HERO Note 3 value for 1,3,5-trimethylbenzene, so it was compared to and result was below U.S. EPA Regional Screening Level (RSL) for residential soil and risk-based soil screening level protective of groundwater. Naphthalene (0.0057 mg/kg) slightly exceeds the risk-based soil screening level protective of groundwater (0.0054 mg/kg).

TPHg, TPHd, and TPHo were detected in four of the 18 soil samples (*Table 7*). One soil sample (SB-Elev P1-1) exceeded the ESL for TPHd. TPHd detections in soil near the passenger elevator equipment in the basement of the Sears Department Store exceeded ESLs. The detection indicates a release of oil from the hydraulic equipment that has impacted soil and groundwater. The lateral and vertical extent of the release in soil and

groundwater will be required to better evaluate the optimal remedial application for clean up the impacted media.

TPHg = gasoline range volatile hydrocarbons as gasoline
TPH w/ SG = total extractable petroleum hydrocarbons with silica gel cleanup
mg/kg = milligrams per kilogram
ND = not detected at or above reporting limit

SFRWQB ESL screening level is from the San Francisco Bay Regional Water Quality Control Board, Environmental Screening Levels (ESLs), Tier 1 ESLs Table dated February 2016 (Rev. 3).

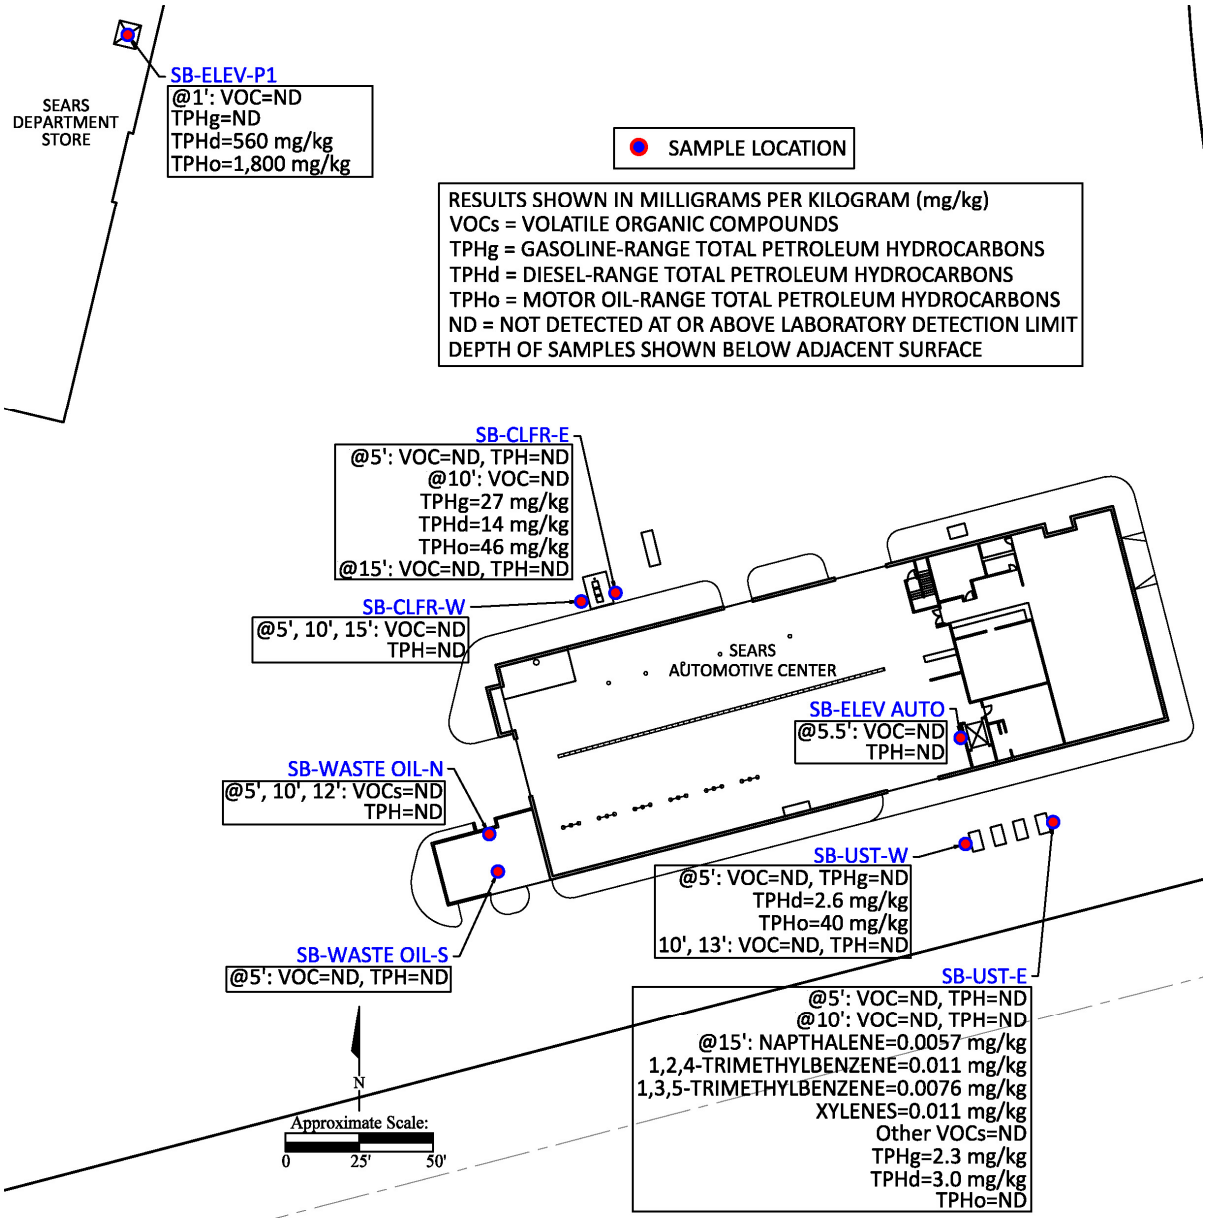

Illustration 7: Soil Boring Sample Locations with Soil Analytical Results for VOC and TPH, June 2017.

TPH and VOC detections in association with the UST locations on the southeast side of the Sears Automotive Center (*Illustration 7)* suggest a minor release of petroleum hydrocarbons to soil. TOR recommends these tanks be removed and surrounding soil tested in accordance with regulatory requirements.

Waste oil from businesses like automotive service centers can contain heavy metals. Oil-water-separators or clarifiers have potential to collect these metals and if leakage occurs, spill out elevated concentrations of metals into adjacent soils surrounding clarifiers. The four soil samples collected adjacent to the clarifier were analyzed for CAM/CCR 17 Metals and compared to ESLs as shown in *Table 8*. All samples contained concentrations of

arsenic (4.3 to 7.9 milligrams per kilogram [mg/kg]) above the ESL (0.067 mg/kg). Background levels of arsenic in California have been documented as 12.7 mg/kg in the 95th percentile, which exceeds the ESL (Hunter, et. al., 2005). The CAM/CCR 17 Metals test presented results for total chromium (42 to 64 mg/kg), however the ESL table only provides screening levels for Chromium III (120,000 mg/kg) and Chromium VI (0.30 mg/kg), but not for total chromium. Based on the history of the site, Chromium VI impacts are not expected to be present. One sample (SB-CLFRW-10) contained cobalt (25 mg/kg) above the ESL of 23 mg/kg. This concentration is in the range of the background concentrations reported for cobalt (22 mg/kg) and 2 mg/kg above the ESL.

Table 8. Soil Sample Results for Metals, June 2017

Sample ID	SB-CLFRW-5	SB-CLFRW-10	SB-CLFRE-5	SB-CLFRE-10	SFRWQCB ESL

Vanadium	**41**	**60**	**46**	**42**	390
Zinc	**22**	**32**	**58**	**22**	23,000

mg/kg = milligrams per kilogram (ppm)
ND = not detected at or above reporting limit
* ESL for Cr III = 120,000 mg/kg; ESL for Cr VI = 0.30 mg/kg
SFRWQB ESL screening level is from the San Francisco Bay Regional Water Quality Control Board, Environmental Screening Levels (ESLs), Tier 1 ESLs Table, dated February 2016 (Rev. 3).

The detection of heavy metals in soil was an expected result of the sampling and analysis completed. Concentrations revealed do not appear to capture a release to the environment, but rather, naturally occurring background concentrations. Regulatory screening levels were not exceeded with the exception of one sample containing cobalt with a concentration minimally exceeding the ESL but still within the range of background conditions. Confirmation sampling should be conducted when the clarifier is removed to support the results presented herein and regulatory closure of the facility.

3.2 Analytical Results for Groundwater

The analytical testing results for groundwater sampling on 30 to 31 June 2017 are summarized in *Tables 9 and 10*. Groundwater sample locations with analytical results for VOCs and TPH are shown on *Illustration 8*. Laboratory analytical reports for groundwater samples are provided in *Appendix D.*

VOCs, MTBE, and BTEX were not detected in groundwater samples. No VOCs, TPHd, or TPHo were detected in groundwater monitoring well MW3. In groundwater monitoring well MW4, TPHd was detected at the ESL of 100 micrograms per Liter (µg/L).

Both groundwater samples in the Sears Department Store in the vicinity of the passenger elevator (SB-Elev P1) and the northern freight elevator (SB-Elev F2) contained TPHd and TPHo above ESLs. A groundwater sample could not be collected from the southern freight elevator #3 in the Sears Department Store because the drilled hole repeatedly collapsed due to cohesionless gravels encountered. Detections of TPH impacts in groundwater samples suggests leakage from the elevator's hydraulic mechanisms. Characterization of the extent of TPH impacts and remediation may be required. Elevator #3 is assumed to be of the same vintage as the other two elevators and may require characterization/remediation consistent with the other elevators.

Table 9. Groundwater Sample Results for VOCs, MTBE, and BTEX, June 2017.

Sample ID	Sample Date	Total VOCs µg/L	MTBE µg/L	Benzene µg/L	Toluene µg/L	Ethyl-benzene µg/L	Xylenes µg/L
West Well	6/30/17	ND	ND<5.0	ND<0.50	ND<0.50	ND<0.50	ND<1.5
East Well	6/30/17	ND	ND<5.0	ND<0.50	ND<0.50	ND<0.50	ND<1.5
SB-Elev P1	6/30/17	ND	ND<5.0	ND<0.50	ND<0.50	ND<0.50	ND<1.5

VOCs = volatile organic compounds
MTBE = methyl-tert-butyl-ether
ND = analyte was not detected at or above the laboratory method reporting limit
µg/L = micrograms per Liter

Table 10. Groundwater Sample Results for TPH, June 2017.

Sample ID	Sample Date	TPH w/o SG Diesel µg/L	TPH w/o SG Motor Oil µg/L
West Well	6/30/17	**100**	ND<250
East Well	6/30/17	ND<50	ND<250
SB-Elev P1	6/30/17	**38,000**	**120,000**
SB-Elev F2	6/30/17	**140**	**590**
SFRWQCB ESL (µg/L)		100	See below

TPH w/o SG = total extractable petroleum hydrocarbons without silica gel cleanup
ND = analyte was not detected at or above the laboratory method reporting limit
mg/L = milligrams per Liter
SFRWQB ESL screening level is from the San Francisco Bay Regional Water Quality Control Board, Environmental Screening Levels (ESLs), Tier 1 ESLs Table dated February 2016 (Rev. 3).
From ESL Table: "TPH motor oil is not soluble. TPH motor oil detections in water most likely are petroleum degradates or less likely NAPL. If the detections are degradates add TPH motor oil and TPH diesel results and compare to TPH diesel criterion."

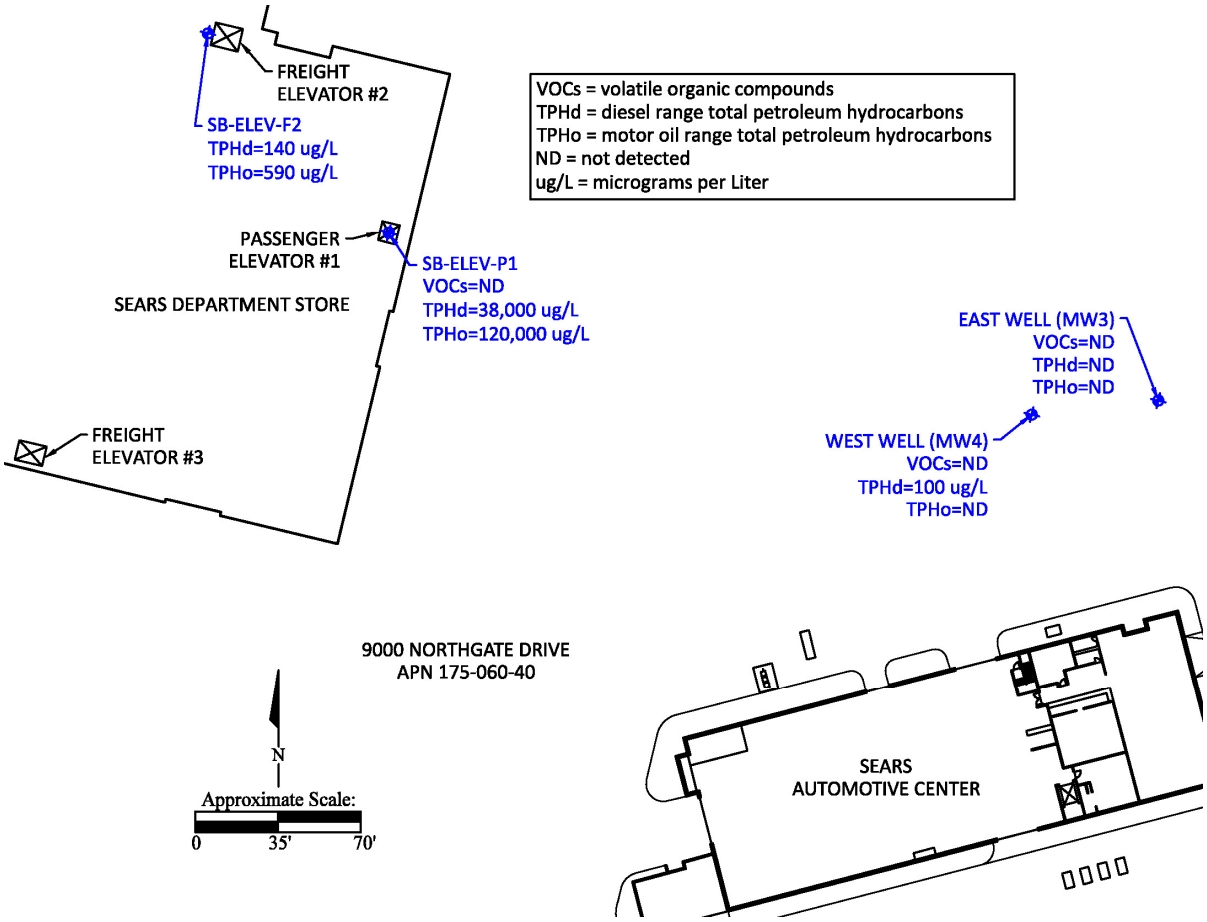

Illustration 8: Groundwater Sample Locations with Analytical Results June 2017.

3.3 Analytical Results for Soil Gas Samples

The analytical testing results for soil gas sampling on 16 December 2016 are summarized in *Table 11*. Soil gas sample locations with analytical results for VOCs and TPH are shown on *Illustration 5*. The laboratory analytical report for soil gas samples are provided in *Appendix E.*

PCE was detected in three of the eight soil gas samples analyzed. Two of the detections were from samples collected at five feet bgs and the third was from the sunken bay one foot below grade of the floor. Detections were found at concentrations below CHHSL-R and commercial/industrial CHHSL (CHHSL-C) screening levels. VOCs were not detected in soil gas at a depth of 10 feet bgs suggesting these impacts were at low levels and were limited to shallow soil.

Chlorinated solvents and even gasoline were often used for parts cleaning and they can impact soil and groundwater as well as the indoor air quality the building. The testing of soil gas beneath the Sears Automotive Center shop floor was limited in extent and analytical results of soil gas samples indicates the presence of PCE, a degreasing solvent. A soil management plan should be developed and used as a part of redevelopment of this area.

Table 11. Soil Gas Sample Results, December 2016.

Sample ID	Date of Sample	Sample Depth ft bgs	PCE µg/L	Other VOCs Analyzed µg/L
1SAC5	12/16/16	5	ND<0.100	ND
1SAC10	12/16/16	10	ND<0.100	ND
2SAC5	12/16/16	5	**0.170**	ND
3SAC5*	12/16/16	5	ND<0.100	ND
4SAC5	12/16/16	5	ND<0.100	ND
5SAC5	12/16/16	5	**0.290**	ND
5SAC10	12/16/16	10	ND<0.100	ND
6SAC1	12/16/16	1	**0.130**	ND
CHHSL-R (µg/L)			0.470	
CHHSL-C (µg/L)			1.60	

Other VOCs analyzed for these samples were not detected above laboratory reporting limits.
VOCs = volatile organic compounds
PCE = tetrachloroethene
µg/L = micrograms per Liter
ft bgs = feet below ground surface
* A duplicate sample was collected at 3SAC5, the results were also ND for compounds analyzed.

Detected concentration is above CHHSL-R, but below CHHSL-C levels.

CHHSL-R = CA Human Health Screening Level for Residential Scenarios
CHHSL-C = CA Human Health Screening Level for Commercial/Industrial Scenarios
CHHSL values are based on the CAL EPA, Office of Environmental Health Hazard Assessment (OEHHA), Soil Screening Levels, Updated Table dated 9/23/10, Table 2 - Soil-Gas-Screening Numbers for Volatile Chemicals Below Buildings Constructed with Engineered Fill Below Sub-Slab Gravel

3.4 Analytical Results for Concrete Sample

Concrete in the spent battery storage area of the Sears Automotive Center was drilled and sampled for analysis of residual heavy metal impact. The results reveal CAM 17 metals in accordance with background concentrations found in the area. Lead is often found in conjunction with battery storage; however it is not elevated in this case. Further characterization of residual metals at this location is not recommended based on these test results. The laboratory analytical report for the concrete sample is provided together with the soil laboratory analytical report for December 2016 in *Appendix C.*

Table 12. Concrete Sample Results, December 2016.

California Title 22 Metals	Units	Sample ID 1BATSAC
Antimony (Sb)	mg/kg	ND
Arsenic (As)	mg/kg	**3.68**
Barium (Ba)	mg/kg	**1,290**
Beryllium (Be)	mg/kg	**0.288**
Cadmium (Cd)	mg/kg	**0.529**
Chromium Total (Cr)	mg/kg	**40.7**
Cobalt (Co)	mg/kg	**9.28**
Copper (Cu)	mg/kg	**23.6**
Lead (Pb)	mg/kg	**23.2**
Mercury (Hg)	mg/kg	ND
Molybdenum (Mo)	mg/kg	**0.533**
Nickel (Ni)	mg/kg	**65.4**
Selenium (Se)	mg/kg	ND
Silver (Ag)	mg/kg	ND
Thallium (Tl)	mg/kg	ND
Vanadium (V)	mg/kg	**34.1**
Zinc (Zn)	mg/kg	**38.1**

mg/kg = milligrams per kilogram (ppm)
ND indicates not detected at or above reporting limit.

Section 4: Conclusions and Recommendations

TOR conducted a Limited Phase II Soil, Soil Gas, and Groundwater Assessment of the Sears Department Store, Sears Automotive Center, and Sears Appliance Service Center at the Northgate Mall in San Rafael, California. Aboveground and subsurface improvements identified during a Phase I Environmental Site Assessment of Northgate Mall were evaluated including two used oil above ground storage tanks (ASTs), one clarifier, a suspected underground storage tank (UST) area, four elevators, 14 underground hydraulic lifts, a battery storage area, and a waste storage area. TOR developed and completed the subsurface evaluation of potential impacts from hazardous substances to soil, soil gas, and groundwater.

The scope of work involved installation of 17 soil borings, six soil gas sampling wells, and three temporary groundwater wells. Two existing permanent groundwater monitoring wells were also sampled. A total of 24 soil samples, eight soil gas samples, and four groundwater samples were collected and analyzed by state certified mobile and fixed-based laboratories to complete the assessment.

Concentrations of volatile organic compounds (VOCs) were detected in one soil sample, SB-USTE-15': 0.0057 mg/kg naphthalene, 0.011 mg/kg 1,2,4-trimethylbenzene, 0.0076 mg/kg 1,3,5-trimethylbenzene, and 0.011 mg/kg total xylenes. The detections were associated with the location of a bank of suspected underground storage tanks located on the southeast side of the Sears Automotive Center. Naphthalene and xylenes were detected below the San Francisco Regional Water Quality Control Board (SFRWQCB) Environmental Screening Levels (ESL). Since there is no ESL to compare 1,2,4-trimethylbenzene, its detection was compared to and result was below DTSC Human and Ecological Risk Office (HERO) Human Health Risk Assessment (HHRA) Note 3 screening level for residential soil. There is no ESL or HERO Note 3 value for 1,3,5-trimethylbenzene, its detection was compared to and result was below U.S. EPA Regional Screening Level (RSL) for residential soil and risk-based soil screening level protective of groundwater. Other volatile organic compounds were not detected above laboratory reporting limits. Naphthalene (0.0057 mg/kg) minimally exceeds the risk-based soil screening level protective of groundwater (0.0054 mg/kg). These detections signal residual impacts caused by leaks and or spills and require further assessment/remediation to characterized their maximum concentration and lateral and vertical extent in soil.

Total petroleum hydrocarbon concentrations including TPHg, TPHd, and TPHo were detected in four soil samples: SB-USTE-15, SB-USTW-5, SB-CLFRE-10, and SB-Elev-P1. The highest concentration of TPHg in soil was detected in SB-CLFRE-10 at 27 mg/kg at the location of the in-ground clarifier servicing the Sears Automotive Center. The detection of TPHg adjacent to the clarifier indicates a release from the facility and further assessment/remediation of the condition is recommended.

The highest concentrations of TPHd and TPHo in soil were detected next to the passenger elevator in the Sears Department Store at 560 and 1,800 mg/kg, respectively. The concentration of TPHd was above the ESL for soil. The detections indicate a release of oil from the hydraulic equipment. The lateral and vertical extent of the release in soil and groundwater will be required to fully evaluate the optimal remedial measures to be implemented for clean up the impacted media.

Three temporary groundwater sampling wells were installed adjacent to the elevators inside the basement of the Sears Department Store. One of the three temporary wells collapsed following drilling (SB-Elev F1); another produced only a partial sample (SB-Elev F2); the third produced a full sample (SB-Elev P1). VOCs were not detected in SB-Elev P1 water samples, but TPHg, TPHd, and TPHo were detected in both SB-Elev P1 and SB-Elev F2, with the highest concentrations found under the Sears Department Store passenger elevator. Concentrations of TPHd and TPHo detected near the passenger elevator were 38,000 µg/L and 120,000 µg/L, respectively, and exceeding the ESL for groundwater of 100 µg/L for TPHd and TPHo established by the SFRWQCB.

Detections of TPH impacts in groundwater samples suggests leakage from the elevators' hydraulic mechanisms. Characterization of the extent of TPH impacts and remediation is recommended. Although Elevator F3 was not sampled and detections were not revealed as a result of testing soil next to the elevator in the automotive center, it is assumed these facilities are of the same vintage as the other elevators where releases have been documented and may require further assessment/remediation in kind.

Two existing permanent groundwater monitoring wells, associated with a former fueling facility on the northeast side of the Sears Automotive Center, were sampled. VOCs were not detected in the grab well water samples, but one detection of TPHg was found in the west well that matched the ESL in groundwater of 100 µg/L for TPHg. TOR understands the former fueling facility has site closure status with regulatory agencies and further investigations are not recommended.

Soil gas samples were collected from within the Sears Automotive Center in the vicinity of five of the 14 existing hydraulic lifts and one within a sunken work bay. Although PCE, a chlorinated solvent found in association with parts cleaning activities, was detected in three shallow soil gas samples (up to 0.290 µg/L), the concentrations were below California Human Health Screening Levels. Nevertheless, these detections signal residual impacts that require further assessment/remediation to characterized their lateral and vertical extent and concentration beneath the floor of the auto maintenance shop floor.

Evaluation of residual metal impacts associated with the in-ground clarifier and battery storage area did not indicate a release to the environment. Further characterization of metals impacts to soil or groundwater is not recommended as a result of this assessment.

Section 5: Limitations

The results contained in this report are based upon the information acquired during the investigation. It is possible that variations at the property could exist beyond or between points explored during the course of the investigation. Also, changes in conditions found could occur at some time in the future due to possible contaminant migration, variations in rainfall, temperature, and/or other factors not apparent at the time of field activities. Undocumented, unauthorized releases of hazardous materials, the remains of which are not readily identifiable by visual inspection and are of different chemical constituents, are difficult and often impossible to detect within the scope of a chemical specific investigation. TOR does not assume responsibility for the discovery and elimination of hazards that could possibly cause accidents, injuries, or damage unless those hazards were apparent, and should have been discovered, as a result of the services TOR performed for the Client. This document is based in part on information collected, compiled, or otherwise provided by entities other than TOR. TOR therefore makes no representation as to the adequacy or professionalism of those analysts, or to the thoroughness or validity of agency-generated information. Changes in regulatory policy and/or requirements and technological advances that post-date this report obviously are beyond the scope of this investigation and report.

Work for this project was performed and this report prepared in accordance with generally accepted professional practices for the nature and conditions of work completed in the same or similar localities, at the time the work was performed. It is intended for the exclusive use of the Client and/or regulatory agencies for specific application to the reference property. This report does not represent a legal opinion. No other warranty is made, expressed or implied.

Permit to Drill Test Holes/Soil Borings – Marin County Environmental Health Services

COUNTY OF MARIN

COMMUNITY DEVELOPMENT AGENCY
ENVIRONMENTAL HEALTH SERVICES
MARIN COUNTY CIVIC CENTER
3501 CIVIC CENTER DRIVE, ROOM 236, SAN RAFAEL, CA 94903
(415) 473-6907 FAX: (415) 473-4120
www.marincounty.org/ehs

PERMIT FOR TEST HOLES / SOIL BORINGS

Date of Issuance: June 28, 2017
Date of Expiration: June 27, 2018

To: Merlone Geier Partners
425 California St., Tenth Floor
San Francisco, CA 94104

Permit No.: TH B12679 (10)

Street Address: 9000 Northgate Mall Dr.

City: San Rafael

Assessor's Parcel Number: 175-060-40

Driller: Cascade Drilling, 1961 Meeker Avenue, Richmond, CA 94804

Your application and plans have been reviewed for compliance with relevant California State and Marin County regulations. Permission is hereby granted to perform the stated work at the above, designated site.

In order to provide the necessary inspections and/or to prevent rescheduling the well driller, the consultant or the well driller shall notify this office at least **two business days** in advance of drilling the well. Also, **contact the office on the day of the drilling.** The grout shall not be placed until approval from Environmental Health Services is granted. If arrangements other than an inspection are made and approved before drilling, then documentation on the methods and materials used to destroy the hole shall be submitted within 30 days of drilling.

CONDITIONS:

1. Construction and destruction criteria shall meet all applicable sections of the current State of California Water Well Standards Bulletin 74 (as revised).
2. Unless approved by EHS beforehand, the well driller shall seal with a cement grout and have a pump and tremie system available in the event that groundwater is discovered.
3. The holes shall be sealed ASAP, especially in the event of rain, to prevent contamination of the groundwater by surface water.
4. If the boring is drilled on property owned by a party other than the applicant, this permit is not valid until applicable local encroachment permits or permissions are first obtained. Please contact the appropriate landowner, city, county, park or special district agencies to obtain permissions.
5. The Marin County CUPA (Office of Waste Management, Department of Public Works) or the local L.P.A. shall be notified whenever test results from sampling demonstrate chemical contamination or leakage of underground storage tanks.
6. It is the responsibility of the driller and project consultant to locate all underground utilities which may be impacted by drilling activities.

This permit is valid for twelve months from the date of issuance. If work has not commenced prior to the expiration date, an additional application and the associated fee shall be required.

Issued by,

Scott Callow, Senior R.E.H.S.

RE: Project: Northgate Sears
Pace Project No.: 1280627

Dear Jeff Borum:
Enclosed are the analytical results for sample(s) received by the laboratory on December 16, 2016. The results relate only to the samples included in this report. Results reported herein conform to the most current, applicable TNI/NELAC standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

Some analyses have been subcontracted outside of the Pace Network. The subcontracted laboratory report has been attached.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Scott Forbes

QUALIFIERS

Project: Northgate Sears
Pace Project No.: 1280627

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-DAV	Pace Analytical Services - Davis

ANALYTE QUALIFIERS

E	Analyte concentration exceeded the calibration range. The reported result is estimated.
L0	Analyte recovery in the laboratory control sample (LCS) was outside QC limits.
L2	Analyte recovery in the laboratory control sample (LCS) was below QC limits. Results may be biased low.
S0	Surrogate recovery outside laboratory control limits.

Pace Analytical	Document Name: Soil Checklist	Document Revised: 28Jun2016 Page 1 of 1
	Document No.: F-DAV-C-028-Rev.01	Issuing Authority: Pace Davis Quality Office

SOIL CHECKLIST

To Be Completed by SR Staff:

Client: TOR Env Date: 12/9/16 Initials: DSD 12/9/16

Are any samples from a depth of ≤ 6 ft?	☐ Yes ☐ No ☒ Not indicated	
Is sub any analysis requested?	☒ Yes ☐ No (If No to both questions, proceed with receipt, samples are not regulated.)	
Sample Origin (circle one):	FOREIGN	DOMESTIC
(Note: soil samples from Hawaii and Puerto Rico are considered to be of a Foreign Source)		
If Foreign, list County of Origin:		
If Domestic, circle State of Origin:	AL AR AZ (CA) FL GA ID LA MS NC NM NY OK OR SC TN TX VA ☐ NONE OF THE ABOVE (If None of the Above, proceed with receipt, samples are not regulated.)	
If from a circled state above, County of Origin	*If unknown, contact PM. Project cannot be received until this is determined.* Marin	
Is sample from a Regulated or Quarantined Zone?	☒ Yes ☐ No (If No, proceed with receipt, samples are not regulated.)	

REQUIREMENT	ACTION	COMPLETED
Samples from a depth of > 6 feet are not regulated under APHIS / USDA guidelines	Were samples segregated by depth ≤ or > 6 feet? (If samples from > 6 feet were in direct contact with soil from ≤ 6 ft, all soils must be treated as regulated.)	YES NO (N/A)
	Samples from a depth of >6 feet are exempt from classification as regulated soil per California APHIS /USDA guidelines. For sub analyses, the receiving lab must confirm that the >6 feet exemption is allowable. Otherwise, treat the sub samples as regulated soil regardless of sample depth.	
Samples must be double contained to prevent accidental release.	Were there any signs of breakage or leakage (check for broken glass and/or loose soil in the cooler)?	YES (NO)
	If NO, ice and melt water can be disposed of by normal process (down the drain).	
	If **YES**, were ice and melt water separated from the cooler and disposed of properly?	YES NO (N/A)
	Any broken glass and/or loose soil are to be bagged and placed in a USDA Regulated satellite container or active drum (see Waste Coordinator). Ice and melt water must be containerized and sterilized by adding enough bleach to achieve a 10% concentration and allowed to sit for ≥ 30 minutes before disposing.	
Samples must be segregated and stored in designated bins, shelves and coolers.	Were samples placed in a designated cooler, containers and shelves?	(YES) NO
Yellow stickers are to be placed on all regulated samples.	Did yellow stickers get placed on all sample containers?	(YES) NO
Equipment and supplies that have come into contact samples must be decontaminated.	Was the cooler(s) and/or countertop(s) decontaminated using a fresh 10% bleach solution? *(Gloves and other lab supplies will be bagged and placed in the SR USDA Regulated satellite container).*	(YES) NO

To Be Completed by PM/PC for Regulated Soils:

Sample Analysis to be conducted at (circle all that apply): Davis Subcontract Lab

Name of Subcontract Lab(s):

REQUIREMENT	ACTION	COMPLETED
USDA / APHIS rep must be informed by email prior to shipping untreated soil to any subcontract lab, including IR Pace Labs.	Anthony Jackson, USDA APHIS PPQ Tel.: (916) 930-5536 Email: Anthony.S.Jackson@aphis.usda.gov	(YES) NO N/A
Shipment must include a valid copy of the receiving lab's permit along with all required forms.	Is a copy of all needed paperwork included with the COC? Do NOT ship samples until all necessary paperwork is compiled.	YES NO (N/A)

Comments: Sub is on concrete dust not on soil

Eurofins Calscience, Inc. (Calscience) certifies that the test results provided in this report meet all NELAC requirements for parameters for which accreditation is required or available. Any exceptions to NELAC requirements are noted in the case narrative. The original report of subcontracted analyses, if any, is attached to this report. The results in this report are limited to the sample(s) tested and any reproduction thereof must be made in its entirety. The client or recipient of this report is specifically prohibited from making material changes to said report and, to the extent that such changes are made, Calscience is not responsible, legally or otherwise. The client or recipient agrees to indemnify Calscience for any defense to any litigation which may arise.

Work Order Narrative

Work Order: 16-12-1924 Page 1 of 1

Condition Upon Receipt:

Samples were received under Chain-of-Custody (COC) on 12/20/16. They were assigned to Work Order 16-12-1924.

Unless otherwise noted on the Sample Receiving forms all samples were received in good condition and within the recommended EPA temperature criteria for the methods noted on the COC. The COC and Sample Receiving Documents are integral elements of the analytical report and are presented at the back of the report.

Holding Times:

All samples were analyzed within prescribed holding times (HT) and/or in accordance with the Calscience Sample Acceptance Policy unless otherwise noted in the analytical report and/or comprehensive case narrative, if required.

Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.

Quality Control:

All quality control parameters (QC) were within established control limits except where noted in the QC summary forms or described further within this report.

Subcontractor Information:

Unless otherwise noted below (or on the subcontract form), no samples were subcontracted.

Additional Comments:

Air - Sorbent-extracted air methods (EPA TO-4A, EPA TO-10, EPA TO-13A, EPA TO-17): Analytical results are converted from mass/sample basis to mass/volume basis using client-supplied air volumes.

Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are always reported on a wet weight basis.

Glossary of Terms and Qualifiers

Work Order: 16-12-1924 Page 1 of 1

Qualifiers	Definition
*	See applicable analysis comment.
<	Less than the indicated value.
>	Greater than the indicated value.
1	Surrogate compound recovery was out of control due to a required sample dilution. Therefore, the sample data was reported without further clarification.
2	Surrogate compound recovery was out of control due to matrix interference. The associated method blank surrogate spike compound was in control and, therefore, the sample data was reported without further clarification.
3	Recovery of the Matrix Spike (MS) or Matrix Spike Duplicate (MSD) compound was out of control due to suspected matrix interference. The associated LCS recovery was in control.
4	The MS/MSD RPD was out of control due to suspected matrix interference.
5	The PDS/PDSD or PES/PESD associated with this batch of samples was out of control due to suspected matrix interference.
6	Surrogate recovery below the acceptance limit.
7	Surrogate recovery above the acceptance limit.
B	Analyte was present in the associated method blank.
BU	Sample analyzed after holding time expired.
BV	Sample received after holding time expired.
CI	See case narrative.
E	Concentration exceeds the calibration range.
ET	Sample was extracted past end of recommended max. holding time.
HD	The chromatographic pattern was inconsistent with the profile of the reference fuel standard.
HDH	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but heavier hydrocarbons were also present (or detected).
HDL	The sample chromatographic pattern for TPH matches the chromatographic pattern of the specified standard but lighter hydrocarbons were also present (or detected).
J	Analyte was detected at a concentration below the reporting limit and above the laboratory method detection limit. Reported value is estimated.
JA	Analyte positively identified but quantitation is an estimate.
ME	LCS Recovery Percentage is within Marginal Exceedance (ME) Control Limit range (+/- 4 SD from the mean).
ND	Parameter not detected at the indicated reporting limit.
Q	Spike recovery and RPD control limits do not apply resulting from the parameter concentration in the sample exceeding the spike concentration by a factor of four or greater.
SG	The sample extract was subjected to Silica Gel treatment prior to analysis.
X	% Recovery and/or RPD out-of-range.
Z	Analyte presence was not confirmed by second column or GC/MS analysis.
	Solid - Unless otherwise indicated, solid sample data is reported on a wet weight basis, not corrected for % moisture. All QC results are reported on a wet weight basis.
	Any parameter identified in 40CFR Part 136.3 Table II that is designated as "analyze immediately" with a holding time of <= 15 minutes (40CFR-136.3 Table II, footnote 4), is considered a "field" test and the reported results will be qualified as being received outside of the stated holding time unless received at the laboratory within 15 minutes of the collection time.
	A calculated total result (Example: Total Pesticides) is the summation of each component concentration and/or, if "J" flags are reported, estimated concentration. Component concentrations showing not detected (ND) are summed into the calculated total result as zero concentrations.

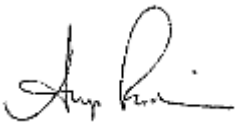
Analytical Report

WorkOrder: 1706E27 **Amended:** 07/06/2017



Report Created for: TOR Environmental, Inc.

PO BOX 73626
San Clemente, CA 92673

Project Contact: Jeffrey Borum
Project P.O.:
Project Name: GW254; Northgate Mall Sears Auto

Project Received: 06/29/2017

Analytical Report reviewed & approved for release on 07/06/2017 by:

Angela Rydelius,
Laboratory Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: TOR Environmental, Inc.
Project: GW254; Northgate Mall Sears Auto
WorkOrder: 1706E27

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Glossary of Terms & Qualifier Definitions

Client: TOR Environmental, Inc.
Project: GW254; Northgate Mall Sears Auto
WorkOrder: 1706E27

Analytical Qualifiers

d7	Strongly aged gasoline or diesel range compounds are significant in the TPH(g) chromatogram
d9	No recognizable pattern
e2	Diesel range compounds are significant; no recognizable pattern
e7	Oil range compounds are significant
e11/e4	Pattern resembles stoddard solvent/mineral spirit; and/or Gasoline range compounds are significant.

Quality Control Qualifiers

F2	LCS/LCSD recovery and/or RPD is out of acceptance criteria.
F10	MS/MSD outside control limits. Physical or chemical interferences exist due to sample matrix.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

Comments / Instructions
* Run PCBs if TPH detection

Glossary of Terms & Qualifier Definitions

Client: TOR Environmental, Inc.
Project: GW253; Northgate Mall Sears Auto
WorkOrder: 1706E89

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Glossary of Terms & Qualifier Definitions

Client: TOR Environmental, Inc.
Project: GW253; Northgate Mall Sears Auto
WorkOrder: 1706E89

Analytical Qualifiers

e2	Diesel range compounds are significant; no recognizable pattern
e7	Oil range compounds are significant

Quality Control Qualifiers

F2	LCS/LCSD recovery and/or RPD is out of acceptance criteria.

The following SampIDs: 001A, 002A, 003A, 004A, 005A, 006A contain testgroup Multi RangeWSG_S.

Comments:

NOTE: Soil samples are discarded 60 days after results are reported unless other arrangements are made (Water samples are 30 days).
Hazardous samples will be returned to client or disposed of at client expense.

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

Analytical Report

WorkOrder: 1706E92

Report Created for: TOR Environmental, Inc.

PO BOX 73626
San Clemente, CA 92673

Project Contact: Jeffrey Borum
Project P.O.:
Project Name: GW253; Northgate Mall Sears Auto

Project Received: 06/30/2017

Analytical Report reviewed & approved for release on 07/03/2017 by:

Angela Rydelius,
Laboratory Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: TOR Environmental, Inc.
Project: GW253; Northgate Mall Sears Auto
WorkOrder: 1706E92

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Glossary of Terms & Qualifier Definitions

Client: TOR Environmental, Inc.
Project: GW253; Northgate Mall Sears Auto
WorkOrder: 1706E92

Analytical Qualifiers

S	Surrogate spike recovery outside accepted recovery limits
b1	Aqueous sample that contains greater than ~1 vol. % sediment
c2	Surrogate recovery outside of the control limits due to matrix interference.
d6	One to a few isolated non-target peaks present in the TPH(g) chromatogram
e2	Diesel range compounds are significant; no recognizable pattern
e7	Oil range compounds are significant

Quality Control Qualifiers

F2	LCS/LCSD recovery and/or RPD is out of acceptance criteria.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

SUBJECT: DATA REPORT - TOR Environmental, Inc. Project #GW240
9000 Northgate Drive, San Rafael, California

TEG Project # 61215F

Mr. Borum:

Please find enclosed a data report for the samples analyzed from the above referenced project for TOR Environmental, Inc. The samples were analyzed on site in TEG's mobile laboratory. TEG conducted a total of 9 analyses on 9 soil vapor samples.

-- 9 analyses on soil vapors for volatile organic hydrocarbons by EPA method 8260B.

The results of the analyses are summarized in the enclosed tables. Applicable detection limits and calibration data are included in the tables.

TEG appreciates the opportunity to have provided analytical services to TOR Environmental, Inc. on this project. If you have any further questions relating to these data or report, please do not hesitate to contact us.

Sincerely,

Mark Jerpbak
Director, TEG-Northern California

RE: Subsurface Assessment Report
Sears Retail Store #1528
9000 Northgate Mall
San Rafael, California 94903

Dear Ms. Feeley:

Wood Environment & Infrastructure Solutions, Inc. (Wood), is pleased to present this Subsurface Assessment Report to Sears Holdings Management Corporation (Sears) for Sears Store #1528, located at 9000 Northgate Mall, San Rafael, California, hereafter referred to as the Site.

Please contact us if you have any questions.

Sincerely,
Wood Environment & Infrastructure Solutions, Inc.

1. INTRODUCTION

Wood Environment & Infrastructure Solutions, Inc. (Wood) is pleased to submit this subsurface assessment report for the Sears #1528 at 9000 Northgate Drive, San Rafael, California, hereafter referred to as the Site. The scope of work for this assessment addresses the retail store passenger elevator and suspect underground storage tanks (USTs) located outside of the auto center building as previously identified in the *Limited Phase II Soil, Soil Gas, and Groundwater Assessment* report dated August 22, 2017 by TOR Environmental, Inc (TOR).

1.1 Background

At the direction of Sears, Wood completed a site reconnaissance on April 18, 2018 to determine if there was visible oil in the passenger and freight elevator's mechanical rooms located in the basement of the former retail store; to confirm the previous consultant boring locations; and to view the paved drive areas near the auto center to asses for evidence of possible USTs. Upon completion of the reconnaissance, Wood provided Sears an update of the findings which included apparent hydraulic fluid from the elevator mechanics in the passenger elevator mechanical room; evidence of previous soil borings; and no indication of USTs outside of the auto center. The hydraulic fluid was from an oil drip pan beneath the mechanical equipment and the oil has been cleaned up by Sears. Sears requested Wood to assess the subsurface area near the elevators; complete a records review for information regarding the suspect USTs; complete a geophysical assessment in the area of the suspect USTs; and to complete hand augers into the area of the suspect USTs to confirm or deny their presence. A site location map is included as **Figure 1**. Photographic documentation of the field work is provided in **Appendix B**.

Wood also contacted Marin County on April 30, 2018, as directed by Sears, to report a potential release based on the previous 2017 report by TOR, regarding the boring sample results collected near the passenger elevator in the retail store mechanical room.

2. INVESTIGATION TASKS

The investigation consisted of a records review for information regarding the suspect USTs, a geophysical survey near the former auto center, a utility survey in the passenger elevator mechanical room, and a subsurface soil and groundwater investigation in the vicinity of the passenger elevator hydraulic piston and mechanicals in the basement. The following sections detail the completion of each of these tasks.

2.1 Records Review

On April 24, 2018, Wood reviewed files at the County of Marin Department of Public Works (DPW). Results of the file review identified the following two reports:

- Phase II Environmental Site Assessment, Sears Automotive Center Northgate Mall, 9000 Northgate Mall, San Rafael, California 94903 prepared by Sigma Engineering, Inc. (SEI) and dated October 20, 1999.
- Review for Closure, Sears, Roebuck & Co. Automotive Center No. 1528, 9000 Northgate Mall, San Rafael, California prepared by the San Rafael Department and dated November 16, 1999.

In addition, there were DPW files relative to hazardous materials storage including an e-mail dated March 8, 2017 that references three outside ASTs.

SEI Phase II dated October 20, 1999

According to the SEI report, investigation was conducted on two suspect areas of the existing Sears Automotive Center to respond to past fire department requests for additional site assessment in an attempt to achieve site closure. The two areas were the former fueling area (former tanks and pump islands) on the north side of the building and the existing auto repair shop, including hydraulic lifts, trench drain and three-stage clarifier. Neither of these areas correspond with the location of the four oil USTs. With the exception of a historical reference in the report indicating “According to a November 1999 San Rafael Fire Department (SRFD) letter to Sears, Roebuck and Co, up to eight gasoline, waste oil and/or new oil underground storage tanks (USTs) were associated with the onsite Sears Automotive Center and were reportedly removed from the subject property in 1985 and 1987” there was no reference made to the oil USTs made in the report.

Based on field observations and laboratory analytical results for the former UST investigation, SEI concluded that soil in this area had not been significantly impacted and that no concentrations of hydrocarbons above regulatory screening revels were detected. They further concluded that the presence of tight clayey soil conditions at the site would mitigate any significant contaminant migration.

Based on field observations and laboratory analytical results for the active automotive service area SEI concluded that no concentrations of hydrocarbons above regulatory screening levels were detected and that the tight clayey soil conditions at the Site were not conducive to significant contaminant migration.

San Rafael Fire Department (SRFD) letter dated November 16, 1999

According to the SRFD letter, there was adequate documentation that site investigation and remediation activities conducted between November 1994 and May 1995 associated with the removal of the dispenser islands and product lines had been completed to the satisfaction of the SRFD. However, the SRFD indicated there was insufficient documentation for the site investigation and remediation activities associated with the removal of eight USTs conducted in 1985 and 1987 and requested documentation of the 1987 removal of one 1,000-gallon waste oil UST and two 530-gallon bulk oil USTs. There were no maps depicting the location of the USTs and is therefore unknown if the 530- gallon bulk oil USTs are the same USTs as the four oil USTs suspected to be on the south side of the building where investigation was performed by TOR Environmental in August 2017.

DPW files e-mail dated March 8, 2017

This document is an e-mail from Sears to the DPW providing a summary of the facilities waste storage inventory and references three outside 500-gallon ASTs which were “split storage” tanks that were used to store new motor oil. There are no maps associated with the DPW files that indicate the location of these ASTs and the inventory records make no mention of any oil storage USTs at the site.

Based on Wood’s review of available files and report, it appears there were up to eight gasoline, waste oil and/or new oil USTs associated with Sears Automotive Center. Records document the removal of the gasoline USTs, the waste oil UST, and the clarifier associated with the facility; however, there are no records to indicate removal of four 500-gallon oil USTs from the site. It should be noted there were no maps or site plans available in DPW records indicating the location of these oil USTs. The records review was not conclusive regarding the presence or absence of USTs south of the auto center.

2.2 Utility Clearance and Geophysical Survey

A geophysical survey was conducted south of the auto center on May 30, 2018 to investigate the area identified as the location of the former suspect USTs and to identify underground utilities in the investigation areas. The survey was conducted by Advanced Geological Services (AGS) of Moraga, California. AGS used an electromagnetic (EM) metal detector, ground-penetrating radar (GPR), and a radio-frequency (RF) pipe detector for the survey. Subsurface utilities located during the survey were field marked.

Using the suspected former UST location as the center-point of the survey area, AGS marked out a 5 foot by 5 foot grid to provide horizontal control for the GPR survey. AGS then surveyed the area with the GPR along north-south and east-west lines paced 5 feet apart. AGS first conducted the GPR survey using a 400-MHz antenna, then used a 270-MHz antenna. The 400-MHz antenna provides higher resolution imaging than the 270-MHz antenna and was used to look for small-scale changes in subsurface conditions that might indicate the former UST location (e.g., excavation sidewalls, pea-gravel fill vs. more fine-grained fill or native soil). The 270-MHz antenna was used to achieve a greater investigation depth.

AGS then performed an EM survey by wheeling a cart-mounted EM detector along north-south and east-west survey lines spaced approximately five feet apart. The EM61 was programmed to automatically obtain four readings per second, which corresponds to approximately one reading per foot along each survey line.

AGS also mapped the locations of large surface metal objects; e.g., parked vehicles and traffic bollards, so the associated geophysical responses would not be mistaken for indications of a UST or other large buried metal objects.

AGS noted areas of disturbed soil that appeared to be a backfilled excavation area in the vicinity of the suspect USTs, but no large metal anomalies or buried objects that could indicate a UST were noted.

In addition, AGS performed a utility survey in the passenger elevator mechanical room, located in the basement of the former Sears store, to identify potential subsurface utilities in the vicinity of the proposed soil borings locations. Utility corridors and areas of disturbed soil located during the survey were field marked. Underground Service Alert (USA North) was also contacted to locate publicly maintained underground utilities.

2.2.1 Test Borings in Suspect UST Location

On June 4, 2018, Wood supervised the advancement of two hand auger borings to approximately six feet below ground surface (bgs) in the areas of disturbed soil identified by AGS during the geophysical survey activities near the former auto shop. A figure showing the test boring locations is included as **Figure 2**. The hand augers were advanced by Cascade Drilling LP (Cascade) of Concord, California.

Test boring, TB-1, was placed in the center of the zone of disturbed soil and TB-2 was placed in the center of the area showing a strong buried surface change. No USTs or foreign objects were encountered in either test boring. Subsurface fill consisted of gravelly and clayey sands to a depth of 4 feet bgs and sands from 4 to 6 feet bgs at the two boring locations.

After advancing the test borings, the boreholes were backfilled with the soil cuttings removed from each respective borehole and capped with concrete, dyed to match the surrounding asphalt surface.

2.3 Subsurface Investigation in Passenger Elevator Mechanical Room

Wood supervised the advancement and sampling of three environmental soil borings (designated EB-1, EB-2, and EB-4) at the Site on June 4, 2018. A fourth boring (EB-3) was attempted, but abandoned due to an abundance of underground utilities and the close confines of the work area. A figure depicting the soil boring locations is included as **Figure 3**. The drilling was conducted by Cascade Drilling LP (Cascade) from Concord, California.

The soil boring locations were selected based on the June 2017 soil boring location and results described in the August 22, 2017 *Limited Phase II Soil, Soil Gas, and Groundwater Assessment* (Phase II) by TOR Environmental, Inc. (TOR, 2017) and the results of utility survey conducted on May 30, 2018. The soil borings were placed surrounding and close to the passenger elevator hydraulic piston and the associated hydraulic machinery.

2.3.1 Soil Investigation

Soil borings were advanced by Cascade by coring the concrete pad and advancing a 4-inch diameter hand auger to final depth or refusal. Soil cuttings were collected and logged by a qualified geologist in accordance with the Unified Soil Classification System (USCS), and screened at approximately 1-foot intervals for the presence of volatile organic compounds (VOCs) using a properly calibrated photo-ionization detector (PID). PID screening results are included on the field soil boring logs included in **Appendix A**. Soil Boring EB-1 was advanced to approximately 4.5 feet bgs, where subsurface groundwater was located beneath the basement floor. Soil boring EB-2 was advanced to approximately 4 feet bgs and EB-4 was advanced to approximately 3 feet bgs, before meeting refusal. The basement floor was placed at approximately 15 feet below ground surface. Soil boring EB-3 encountered two utilities during hand auguring and was abandoned due to the abundance of utilities in the area and the close confines of the elevator mechanical room (**Figure 3**).

Soils encountered during hand auguring activities for this investigation consisted of sandy lean clays and sandy silts beneath the gravel baserock in the basement of the main retail building. Water was encountered at approximately 4.5 feet below the floor level of the basement or at approximately 19.5 feet bgs.

Soil samples were collected from native soils directly beneath the fill materials at depths ranging from 1.5 to 2.5 feet below the basement floor. There were no elevated PID readings recorded, and no visual or olfactory indications of impact detected.

The soil samples were submitted to ESC Lab Sciences (ESC) of Mount Juliet, Tennessee for chemical analyses. The soil samples were analyzed for diesel and oil range organics (DRO and ORO) by USEPA SW-846 Method 8015B.

2.3.2 Groundwater Investigation

Upon completion of the soil borings, a temporary slotted polyvinyl chloride (PVC) casing was installed in EB-1 for the purpose of collecting a groundwater sample. A water sample was collected using new tubing and a check valve to draw water to the surface and fill the appropriate certified clean sample containers provided by the laboratory. The samples were then immediately placed on ice pending being shipped to the laboratory. The water sample was analyzed for diesel and oil range organics (DRO and ORO) by USEPA SW-846 Method 8015B.

The boring EB-1 was chosen for groundwater sampling based on its location between the hydraulic cylinder and hydraulic equipment used for the passenger elevator, which was in the area showing the most surface staining on the concrete.

Following completion of sampling activities, each soil boring location was backfilled with bentonite and capped with concrete to match the surrounding surface. The soil cuttings were placed in a steel 55-gallon drum with lid and staged onsite pending profiling, transportation and disposal.

3. ANALYTICAL RESULTS

The following sections summarize the soil and groundwater analytical results for the soil borings placed in the vicinity of the passenger elevator hydraulic cylinder and mechanicals completed in June 2018.

3.1 Selection of a Standard

The concentration of detected constituents were compared to the current California Environmental Screening Levels (ESLs); Screening for Environmental Concerns at Sites with Contaminated Soil and Groundwater, Tables S-1 and GW-1, Water Board February 2016. The ESLs are guidance issued by the Water Board to assess whether investigation or remediation is warranted for a site or whether a potential risk to human health or the environment is present for a site. For soil and groundwater, Direct Exposure Human Health Risk Levels and Gross Contamination Levels were compared to the results provided by the laboratory.

3.2 Soil Analytical Results

No elevated PID readings were detected in the soil samples from the surface through boring termination. A total of three soil samples were submitted for analysis of DRO and ORO by EPA Method 8015B. A copy of the laboratory analytical report is provided in **Appendix C**.

A summary of constituents detected in soil are compiled in **Table 1**. DRO and ORO were detected at concentrations between 6.92 and 64.2 milligrams per kilogram (mg/kg). None of the constituents analyzed for were detected at or above the direct exposure human health risk levels.

3.3 Groundwater Analytical Results

One grab groundwater sample was submitted for analysis of DRO and ORO by EPA Method 8015B. A copy of the laboratory analytical report is provided in **Appendix C**.

A summary of constituents detected in groundwater are compiled in **Table 2**. The results indicated that the concentrations of DRO (703 µg/L) and ORO (645 µg/L) were above the direct exposure ESL of 150 µg/L. However, these concentrations are well below the gross contamination ESL of 2,500 µg/L and 50,000 µg/L, respectively.

4. CONCLUSIONS

Wood completed the assessment field activities on May 30 and June 4, 2018. The field activities consisted of a geophysical (GPR/EM) survey and completion of two test borings to determine the presence or absence of suspect USTs near the automotive shop, the completion of three environmental soil borings in the vicinity of the passenger elevator hydraulic equipment, and the collection of three soil and one groundwater samples. All samples were analyzed for DRO and ORO by EPA Method 8015B.

Results of the GPR/EM survey identified an area of disturbed soil with no indications of any anomalies characteristic of a UST. The GPR/EM survey and hand auger sampling did not find indications of USTs present. If USTs were previously present in this area, it appears that the USTs have been removed. Soils encountered in the vicinity of the suspected USTs at the former auto shop, consisted of sands and gravels, possibly indicating backfill of a former UST excavation. Soils encountered in the passenger elevator mechanical room consisted of a 5 to 6-inch thick concrete pad, underlain by 2 to 18-inches of gravel fill, and then lean clay and sandy silts to the total depth explored. No elevated soil PID readings were detected from the surface through boring termination at either location. Groundwater was encountered at approximately 4.5 feet below the basement floor surface, which was approximately 15 feet bgs (giving a total groundwater level of approximately 19.5 feet bgs).

The laboratory sample results from the three soil samples and one groundwater sample collected in the vicinity of the passenger elevator hydraulic equipment were compared to the current California ESLs. No analytes were detected in soil samples above the ESLs, suggesting no indications of a release to the soils in the tested locations. In the one groundwater sample at EB-1, the DRO and ORO results of 703 µg/L and 645 µg/L, respectively, were reported above the direct exposure level of 150 µg/L for groundwater. It should be noted that this ESL is based on a direct exposure scenario, but is well below the DRO and ORO ESLs for gross contamination of 5,500 µg/L and 50,000 µg/L, respectively, which would drive additional investigation or remediation at a site. It should also be noted the there are no cleanup goals (Maximum Contaminant Levels [MCLs) for DRO or ORO in California. The groundwater sample concentrations do not suggest remedial action is warranted. The concentrations are also significantly lower than the previous TPH sample results (38,000 to 120,000 µg/L) collected by TOR.

Wood recommends that this report be shared with Marin County with a request for closure of the incident. On behalf of Sears, an incident was called in by Wood on April 30th, 2018, based on the landlord request to Sears and the previous investigation report completed by TOR.

Laboratory Analytical Reports

ANALYTICAL REPORT

June 14, 2018

Wood E&I Solutions Inc. - Petaluma, CA

Sample Delivery Group:	L999480
Samples Received:	06/06/2018
Project Number:	3205181652.01
Description:	Sears Northgate
Site:	SEARS #1528
Report To:	Gary Lieberman 1670 Corporate Circle Suite 101 Petaluma, CA 94954

Entire Report Reviewed By:

Brian Ford

Technical Service Representative

Results relate only to the items tested or calibrated and are reported as rounded values. This test report shall not be reproduced, except in full, without written approval of the laboratory. Where applicable, sampling conducted by ESC is performed per guidance provided in laboratory standard operating procedures: 060302, 060303, and 060304.

All sample aliquots were received at the correct temperature, in the proper containers, with the appropriate preservatives, and within method specified holding times, unless qualified or notated within the report. Where applicable, all MDL (LOD) and RDL (LOQ) values reported for environmental samples have been corrected for the dilution factor used in the analysis. All radiochemical sample results for solids are reported on a dry weight basis with the exception of tritium, carbon-14 and radon, unless wet weight was requested by the client. All Method and Batch Quality Control are within established criteria except where addressed in this case narrative, a non-conformance form or properly qualified within the sample results. By my digital signature below, I affirm to the best of my knowledge, all problems/anomalies observed by the laboratory as having the potential to affect the quality of the data have been identified by the laboratory, and no information or data have been knowingly withheld that would affect the quality of the data.

Guide to Reading and Understanding Your Laboratory Report

The information below is designed to better explain the various terms used in your report of analytical results from the Laboratory. This is not intended as a comprehensive explanation, and if you have additional questions please contact your project representative.

Abbreviations and Definitions

(dry)	Results are reported based on the dry weight of the sample. [this will only be present on a dry report basis for soils].
MDL	Method Detection Limit.
MDL (dry)	Method Detection Limit.
RDL	Reported Detection Limit.
RDL (dry)	Reported Detection Limit.
Rec.	Recovery.
RPD	Relative Percent Difference.
SDG	Sample Delivery Group.
(S)	Surrogate (Surrogate Standard) - Analytes added to every blank, sample, Laboratory Control Sample/Duplicate and Matrix Spike/Duplicate; used to evaluate analytical efficiency by measuring recovery. Surrogates are not expected to be detected in all environmental media.
U	Not detected at the Reporting Limit (or MDL where applicable).
Analyte	The name of the particular compound or analysis performed. Some Analyses and Methods will have multiple analytes reported.
Dilution	If the sample matrix contains an interfering material, the sample preparation volume or weight values differ from the standard, or if concentrations of analytes in the sample are higher than the highest limit of concentration that the laboratory can accurately report, the sample may be diluted for analysis. If a value different than 1 is used in this field, the result reported has already been corrected for this factor.
Limits	These are the target % recovery ranges or % difference value that the laboratory has historically determined as normal for the method and analyte being reported. Successful QC Sample analysis will target all analytes recovered or duplicated within these ranges.
Original Sample	The non-spiked sample in the prep batch used to determine the Relative Percent Difference (RPD) from a quality control sample. The Original Sample may not be included within the reported SDG.
Qualifier	This column provides a letter and/or number designation that corresponds to additional information concerning the result reported. If a Qualifier is present, a definition per Qualifier is provided within the Glossary and Definitions page and potentially a discussion of possible implications of the Qualifier in the Case Narrative if applicable.
Result	The actual analytical final result (corrected for any sample specific characteristics) reported for your sample. If there was no measurable result returned for a specific analyte, the result in this column may state “ND” (Not Detected) or “BDL” (Below Detectable Levels). The information in the results column should always be accompanied by either an MDL (Method Detection Limit) or RDL (Reporting Detection Limit) that defines the lowest value that the laboratory could detect or report for this analyte.
Case Narrative (Cn)	A brief discussion about the included sample results, including a discussion of any non-conformances to protocol observed either at sample receipt by the laboratory from the field or during the analytical process. If present, there will be a section in the Case Narrative to discuss the meaning of any data qualifiers used in the report.
Quality Control Summary (Qc)	This section of the report includes the results of the laboratory quality control analyses required by procedure or analytical methods to assist in evaluating the validity of the results reported for your samples. These analyses are not being performed on your samples typically, but on laboratory generated material.
Sample Chain of Custody (Sc)	This is the document created in the field when your samples were initially collected. This is used to verify the time and date of collection, the person collecting the samples, and the analyses that the laboratory is requested to perform. This chain of custody also documents all persons (excluding commercial shippers) that have had control or possession of the samples from the time of collection until delivery to the laboratory for analysis.
Sample Results (Sr)	This section of your report will provide the results of all testing performed on your samples. These results are provided by sample ID and are separated by the analyses performed on each sample. The header line of each analysis section for each sample will provide the name and method number for the analysis reported.
Sample Summary (Ss)	This section of the Analytical Report defines the specific analyses performed for each sample ID, including the dates and times of preparation and/or analysis.

Qualifier	Description
J	The identification of the analyte is acceptable; the reported value is an estimate.
J6	The sample matrix interfered with the ability to make any accurate determination; spike value is low.

ESC Lab Sciences is the only environmental laboratory accredited/certified to support your work nationwide from one location. One phone call, one point of contact, one laboratory. No other lab is as accessible or prepared to handle your needs throughout the country. Our capacity and capability from our single location laboratory is comparable to the collective totals of the network laboratories in our industry. The most significant benefit to our one location design is the design of our laboratory campus. The model is conducive to accelerated productivity, decreasing turn-around time, and preventing cross contamination, thus protecting sample integrity. Our focus on premium quality and prompt service allows us to be YOUR LAB OF CHOICE.
* Not all certifications held by the laboratory are applicable to the results reported in the attached report.
* Accreditation is only applicable to the test methods specified on each scope of accreditation held by ESC Lab Sciences.

Subject: Submittal of Subsurface Assessment Report, Sears Retail Store #1528 9000 Northgate Drive San Rafael, CA
Attachments: 1528 San Rafael CA - Subsurface Assessment Report_6-29-18 - FINAL.pdf

Julia – on behalf of Sears Holdings Management Corporation (Sears), attached please find S*ubsurface Assessment Report, Sears Retail Store #1528 9000 Northgate Drive San Rafael, CA*. This report details the results of the investigation to determine the lateral and vertical extent of the release in soil and groundwater in the basement area surrounding the elevator shaft. Based on the results of the additional investigation, Sears is requesting no further investigation associated with the release and closure for the site.

Please let us know if you have any questions or require a hard copy of the report. Gary

Subject: Sears #1528 San Rafael CA - Potential Release

Julia – as a follow up to our discussion last Friday April 26, 2018, on behalf of Sears Holdings Management Corporation (Sears), this e-mail will serve as the official notification for a potential release at the above referenced site.

Wood is the consultant for Sears who is vacating the facility. On June 30, 2017, a consulting firm working on behalf of the property owner installed one boring (SB-Elev-P1) in the basement motor room below the passenger elevator (see below depiction) and a soil sample was collected at one foot below the concrete slab, immediately above encountered groundwater at this location. In addition a groundwater sample was also collected from this borehole location.

Results of the soil sampling detected total petroleum hydrocarbons (TPH) as diesel (TPHd) and TPH oil (TPHo) at concentrations of
560 and 1,800 milligrams per kilogram (mg/kg), respectively. Results of the groundwater sampling detected TPHd and TPHo at concentrations of 38,000 and 120,000 micrograms per liter (µg/L), respectively (see attached laboratory report). Based on the concentrations of TPH in soil and groundwater, there appears to be a potential release of oil from the hydraulic equipment.

At this time, Wood has been engaged by Sears to perform an investigation to determine the lateral and vertical extent of the release in soil and groundwater that includes installation of borings in the basement area

surrounding the elevator shaft. Upon completion of this investigation, the results of the investigation will formerly transmitted to the County of Marin Department of Public Works (DPW).

If you have any questions or require additional information, please feel free to contact Patricia Feeley with Sears via e-mail or at 847-286-2884**.**

Executive Summary

Roux Associates, Inc. (Roux) has performed a Phase I Environmental Site Assessment (ESA) for the Northgate Mall, located at 5800 Northgate Drive in San Rafael, California. This Phase I ESA was performed on behalf of MGP XI Northgate, LLC (User). Roux understands that the User plans to conduct a phased redevelopment of the Property, which will include the demolition of most of the existing retail space, construction of new retail space, and residential units.

The Project occupies approximately 44.76 acres and is currently occupied by the main mall building, five separate retail buildings and associated parking lots. The associated Assessor's Parcel Numbers (APNs) are 175-060-12, 175-060-66, 175-060-59, 175-060-67, 175-060-61, and 175-060-40. The Property contains the addresses 1000, 1500, 5000, 5010, 5800, 6000, 7000, and 9000 Northgate Drive. The Property was undeveloped until the late 1960s when the first retail buildings were built. The mall continued to expand to match its current configuration by 2012.

This Phase I ESA was performed to identify recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), and/or historical recognized environmental conditions (HRECs) at the Property, indicating past, current, or material threats of the release of hazardous materials or petroleum hydrocarbons to the Property's soil, groundwater, or surface water. The ESA was conducted by investigating past Property uses, reviewing the results of a search of environmental databases, reviewing records at relevant government agencies, and performing a reconnaissance of the Property.

One REC was identified at the Property:

- **The former Sears Auto Center at 9000 Northgate Drive**: In 2018, a total of 14 hydraulic lifts were decommissioned; however, investigations have found soil vapor concentrations exceeding the San Francisco Bay Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESLs) for total petroleum hydrocarbons (TPHs) and chlorinated volatile organic compounds (CVOCs). In addition, PCB concentrations above the RWQCB ESL were detected in the soil before the lift removal. Based on the soil and soil vapor sampling results, the impacts are limited in shallow soil in the former hydraulic lift and sunken work bay areas. Figure 3 shows the former hydraulic lift and sunken work bay areas.

There were no HRECs or CRECs identified at the Property.

The following environmental concerns were identified at the Property that do not rise to the level of a REC but are considered as business environmental risks (BERs). BERs are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate agencies; however, these conditions may have an environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate. Roux identified the following BERs:

- TPH detections in the basement elevator rooms of the RH Outlet/former Sears department store. Figure 3 shows the location of the elevator rooms and the former Sears Auto Center; and
- Lack of documentation regarding the removal of USTs at the former Sears Auto Center.

Based on the findings, Roux recommends the REC and BERs be further investigated during redevelopment after existing buildings are demolished.

1. Introduction

At the request of MGP XI Northgate, LLC (User), Roux Associates, Inc. (Roux) performed a Phase I Environmental Site Assessment (ESA) for the Northgate Mall, located at 5800 Northgate Drive in San Rafael, California. The Property location is shown in Figure 1. Roux understands that the User plans to conduct a phased redevelopment of the Property, which will include the demolition of most of the existing retail space, followed by construction of new retail space and residential units.

The Project occupies approximately 44.76 acres, consisting of the main mall building, five separate retail buildings, a two-story parking structure, and surface parking lots. The associated Assessor's Parcel Numbers (APNs) and addresses are as follows:

APN	Address(es)
175-060-12	1000 Northgate Drive
175-060-66	1500 Northgate Drive
175-060-59	5010 Northgate Drive
175-060-67	5000 Northgate Drive 5800 Northgate Drive 7000 Northgate Drive
175-060-61	6000 Northgate Drive
175-060-40	9000 Northgate Drive

This Phase I ESA was conducted in accordance with the scope of work presented in the proposal submitted by Roux on August 10, 2021 and in general accordance with the American Society of Testing and Materials' (ASTM) International Standard Practice E1527-13 (*Standard Practice for Environmental Site Assessments*), consistent with the United States Environmental Protection Agency (USEPA) Standards and Practices for All Appropriate Inquiries (AAI) Rule (40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule[1]). The preamble for the AAI Rule states:

> *In today's final rule, EPA is referencing the standards and practices developed by ASTM International and known as Standard E1527-05 (entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process") and recognizing the E1527-05 standard as consistent with today's final rule. The Agency determined that this voluntary consensus standard is consistent with today's final rule and is compliant with the statutory criteria for all appropriate inquiries. Persons conducting all appropriate inquiries may use the procedures included in the ASTM E1527-05 standard to comply with today's final rule.*[2]

This AAI Rule was subsequently amended in 2013, as indicated in the following "Background":

> *With today's action, EPA is establishing that parties seeking liability relief under CERCLA's landowner liability protections, as well as recipients of brownfields grants for conducting site assessments, will be considered to have met the standards and practices for all appropriate inquiries, as set forth in the Brownfields Amendments to CERCLA and 40 CFR Part 312, if such parties follow the procedures provided in the ASTM E1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." EPA*

[1] Final Rule and information available at www.epa.gov/swerosps/bf/regneg.htm#final_rule, and https://federalregister.gov/a/2013-31112.
[2] Federal Register: November 1, 2005 (Volume 70, Number 210), page 66081.

made this determination based upon the Agency's finding that the ASTM E1527-13 standard is compliant with the All-Appropriate Inquiries Rule. Therefore, parties conducting all appropriate inquiries may use the procedures in the newly issued ASTM E1527-13 standard when conducting all appropriate inquiries.[3]

The purpose of the Phase I ESA was to identify, to the extent feasible, Recognized Environmental Conditions (RECs) in connection with the Property. ASTM Standard Practice E1527-13 defines RECs as:

> *…the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*

ASTM Standard Practice E1527-13 provides that identified RECs can be evaluated and classified into Controlled Recognized Environmental Conditions (CRECs) or Historical Recognized Environmental Conditions (HRECs) based on the following definitions. ASTM Standard Practice E1527-13 defines a CREC as:

> *…a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).*

ASTM Standard Practice E1527-13 defines a HREC as:

> *…a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).*

To assess the potential for RECs associated with the Property, Roux utilized a variety of information sources to perform the Phase I ESA, including a radial information search from federal, state, and local regulatory agency databases and readily available information from the following sources: Property owner, historical aerial photographs, historical topographic maps, and city directories. Also, Freedom of Information Act (FOIA)/public records request responses from federal, state, and local regulatory agencies were conducted. The historical research was conducted to develop an understanding of the following:

- Current and past uses of the Property;
- Current and past uses of hazardous substances and/or petroleum at the Property, if any;
- Waste management and disposal practices that might have potentially caused releases or threatened releases of hazardous substances and/or petroleum products at the Property;
- Current and past corrective actions and response activities undertaken to address past and ongoing releases of hazardous substances and/or petroleum products at the Property, if any;

[3] Federal Register: December 30, 2013 (Volume 78, Number 250).

- The existence of any engineering and/or institutional controls recorded for the Property; and,
- Current and past uses of adjoining properties that could have resulted in releases or threatened releases of hazardous substances and/or petroleum products to the Property.

Roux's Principal Engineer Angela Liang Cutting, Ph.D., P.E., Principal Geologist Richard Maxwell, and Staff Engineer Emma Totsubo served as the Environmental Professionals who conducted the Phase I ESA. Dr. Cutting, Mr. Maxwell, and Ms. Totsubo possess sufficient specific education, training, and experience to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases, as defined in 40 CFR §312.1(c), on, at, in, or to the Property, sufficient to meet the objectives and performance factors in 40 CFR §312.20(e) and (f).

2. Methods of Investigation

The methods of investigation used to conduct this Phase I ESA are outlined in the following sections.

2.1 General

The activities performed in conjunction with the Phase I ESA of the Property include:

- Review of federal, state, and local environmental regulatory agency databases provided by Environmental Data Resources, Inc. of Milford, Connecticut (EDR), indicating locations of environmental concern within specified radii from the Property;
- Submission of FOIA requests/public requests and inquiries to federal, state, and local regulatory agencies;
- Review of historical information for the Property and surrounding area;
- Review of User provided documents; and
- Reconnaissance of the Property.

2.2 Review of Readily Available Information

The resources compiled and reviewed by Roux to date include the following:

- EDR Radius Map with GeoCheck, dated August 20, 2021 (Appendix A);
- EDR United States Geological Survey (USGS) Historical Topographic Maps, Novato 7.5-minute, San Rafael 7.5-minute, Tamalpais 15-minute, and Petaluma 15-minute, dated 1897, 1914, 1940, 1941/1942, 01947, 1950/1954, 1968, 1980, 1995, 1996, and 2012 (Appendix B);
- EDR aerial photographs dated 1946, 1952, 1957, 1963, 1968, 1974, 1982, 1987, 1993, 2006, 2009 2012, and 2016 (Appendix C);
- EDR City Directory Abstract, dated August 27, 2021 (Appendix D);
- EDR Sanborn Map Report, dated August 20, 2021 (Appendix E); and
- Public records from the agencies listed in Table 1 below (Appendix F).

Table 1. Public Record Requests Summary

Agency	Status
Department of Toxic Substances Control (DTSC), including Envirostor and Hazardous Waste Tracking System (HWTS)	Request submitted on August 20, 2021, via email. Response received on August 26, 2021, providing documents for the Property. These are discussed in Section 5.2. Response received on August 27, 2021, providing no other documents for the Property. Online databases queried on August 20, 2021. No Envirostor listings were identified in the vicinity of the Property. HWTS listings were identified for the Property.
San Francisco Regional Water Quality Control Board (RWQCB), including GeoTracker, and Storm Water Multiple Application and Report Tracking System (SMARTS)	Request submitted on August 20, 2021, via email. Response received on August 30, 2021, providing links to GeoTracker and SMARTS. Online databases queried on August 20, 2021. Six GeoTracker listings were identified for the Property. One SMARTS listing was identified for the Property, discussed in Section 5.2.
Bay Area Air Quality Management District (BAAQMD)	Request submitted on August 20, 2021. Responses received on August 26, 2021, providing documents for the Property.

Table 1. Public Record Requests Summary	
Agency	**Status**
California Department of Conservation Geologic Energy Management Division (CalGEM) Well Finder	Online database queried on August 20, 2021. No oil and gas wells were identified in the vicinity of the Property.
City of San Rafael, including City Attorney's Office and Fire Department	Online records searched on August 20, 2021. Request submitted to City Clerk's Office and Fire Department on August 20, 2021, via email and fire department website, respectively. Documents were received from the Office of the City Attorney on August 30, September 3, and September 7, 2021. These are discussed in Section 5.2.
Marin County, including Certified Unified Program Agency (CUPA)	Request submitted on August 20, 2021, via online portal and form emailed to CUPA. Response was received on August 30, 2021, from the County Counsel's office, stating no documents were found for the Property.

2.3 Property and Surrounding Area Reconnaissance

Pursuant to ASTM Standard Practice E1527-13, Roux conducted a reconnaissance of the Property on September 8 and September 13, 2021, to identify, investigate, and assess potential RECs and other potential environmental concerns. The reconnaissance included observation of the Property, including all structures and buildings, to determine the current use and condition of the Property, and indications of past uses of the Property. During the Property reconnaissance, Roux placed emphasis on identifying the following features, if present, in accordance with ASTM E1527-13:

- Hazardous substances and petroleum products in connection with identified uses;
- Storage tanks;
- Odors;
- Pools of liquid;
- Drums;
- Hazardous substances and petroleum products containers;
- Unidentified substance containers;
- Polychlorinated biphenyls (PCBs);
- Heating and cooling systems;
- Stains or corrosion;
- Drains and sumps;
- Pits, ponds, or lagoons;
- Stained soil or pavement;
- Stressed vegetation;
- Solid waste;
- Wastewater;
- Wells; and,

- Septic systems.

In addition, observation of the general topographic setting of the Property was made. Photographs from the Property reconnaissance are presented in Appendix G.

2.4 Interview with Property Representative

Ms. May Mar, General Manager (key site representative), provided access to the Property for the reconnaissance. Ms. Mar stated that she has been working at the Property since January 2017. During the reconnaissance, Ms. Mar answered questions regarding the Property's history and use. Information obtained from the interview with Ms. Mar corroborated information obtained elsewhere and is provided in appropriate sections of this report.

3. Property Description

Descriptions of the Property and surrounding properties are included in the following sections.

3.1 Property Location and Description

The Property is located in San Rafael, Marin County, California. Figure 1 presents the location of the Property in the general context of City of San Rafael. The Property is currently occupied by mall containing retail and commercial businesses, restaurants, and associated parking space. The 44.76-acre subject Property for this Phase I ESA consists of Assessor's Parcel Numbers (APNs) and associated addresses:

- 175-060-12: 1000 Northgate Drive,
- 175-060-40: 9000 Northgate Drive,
- 175-060-59: 5010 Northgate Drive,
- 175-060-61: 6000 Northgate Drive,
- 175-060-66: 1500 Northgate Drive, and
- 175-060-67: 5000, 5800, and 7000 Northgate Drive.

Figure 2 shows the Property layout.

3.2 Current Surrounding Property Usage

The Property is located in a mixed commercial-residential area. Table 2 below lists the surrounding area uses.

Table 2. Surrounding Area Uses

North	Directly north of the Property is Las Gallinas Avenue, across which are commercial properties, including several gas stations, and a residential area.
East	Directly east of the Property is Las Gallinas Ave, across which is a shopping center and cemetery. Beyond that is the US 101 freeway, and mixed commercial-residential-governmental properties.
West	Directly west of the Property is Northgate Drive, across which is Villa Marin retirement home and residences located on a hill with heavy vegetation.
South	Directly south of the Property is Northgate Drive, beyond which is a residential neighborhood, Hartzell Park, and a public services property.

3.3 Topographic and Hydrogeologic Setting

According to the EDR Radius Map Report (Appendix A), the elevation of the Property is approximately 38 feet above mean sea level (amsl). The Property is relatively flat but generally slopes to the northeast. Terrain surrounding the Property is mountainous to the north, south, and west. The nearest surface water bodies[4] include a small fork of Gallinas Creek, about 750 feet north of the Property, which feeds into the San Pablo Bay, about 2.5 miles east.

[4] US Fish and Wildlife Wetlands Mapper (https://www.fws.gov/wetlands/data/mapper.html).

Groundwater at the Property has been encountered[5] at around 7 to 10 feet below ground surface (bgs). Groundwater flow direction has been documented as variable, ranging from east, toward the San Pablo/San Francisco Bay, to west according to groundwater flow data compiled by the EDR Radius Map Report. Groundwater investigations[6] at gas stations north of the Property show a groundwater gradient to the northwest.

The Property is partially located within the Novato Valley Groundwater Basin[7]. The Property is within the San Francisco Bay Gallinas Creek watershed[8] and characterized by of mix of Franciscan complex mélange and Holocene/Pleistocene alluvial deposits.

4. Property History

The land use history of the Property was prepared by reviewing historical aerial photographs, historical topographical maps, and city directories. Historical research documentation is provided in Appendices B, C, and D. Based on the available sources, the chronology of the Property was developed and included in Table 3.

Table 3. Property History

Source	Year	Status
Topographic Map	1897	The Property is unmapped in the 1897 topographic map. The area just south is mapped. There are few roads in the vicinity and a railroad which runs north-south about 1/8th mile southeast of the Property.
Topographic Map	1914	The Property is situated in the Santa Margarita Valley. There are no buildings shown on the Property. A road in a similar configuration to the current US 101 freeway is shown about 200 feet northeast of the Property. The Gallinas Creeks, in the area northeast of the Property are shown as land subject to inundation. The area south of the Property is unmapped.
Topographic Map	1940	The Property is unmapped in the 1940 topographic map. The area just south is mapped and appears consistent with the 1897 topographic map.
Topographic Map	1942	The Property is now bordered on the north and east by roads in the same configuration as the current Las Gallinas Blvd. Mt. Olivet Cemetery is shown east adjacent to the Property.
Aerial Photograph	1946	The Property is undeveloped with what appears to be a small fork of the Gallinas Creek running through the southeast portion. The only clear surface features in the vicinity are the cemetery and the roads previously mentioned.
Topographic Map	1947	The Property is unmapped in the 1947 topographic map. The area just south is mapped and appears consistent with the 1942 topographic map.
Topographic Map	1951/ 1954	There is significant new development is areas about 1 mile northeast, 1 mile southwest and along the US 101 freeway
Aerial Photograph	1952	There is a new residential development 1/4 mile southeast of the Property.
Topographic Map	1954	There are no significant changes in the 1954 topographic map.
Aerial Photograph	1957	There appears to be the beginnings of development on the Property. Land in the northeast corner looks like it is being cleared. Residential neighborhoods about 500 feet to the northwest and southeast have been built up.
Aerial Photograph	1963	There is ongoing development on the Property for the building that is now occupied by Macy's. New streets of residential houses are shown to the south and northwest.
City Directory	1963	No listings are provided for the Property. City directory listings for the surrounding area include: • 929 Del Presidio Blvd: Union Oil Service Gas Station • 949 Del Presidio Blvd: Harry Sabaca's Chevron Service Gas Station
Aerial Photograph	1968	There are four unconnected buildings on the Property in a similar footprint as the current main mall building, surrounded by parking lots. The former Sears building appears to be under development. There are now buildings adjacent to the north.

Table 3. Property History		
Source	**Year**	**Status**
Topographic Map	1968	New residential and main streets are shown throughout the area, including roads in the same configurations as the current Northgate Drive and Manuel T Frietas Parkway.
City Directory	1968	City Directory listings for the Property include: • 5000 Northgate Drive: City of Paris Clothing • 5800 Northgate Drive: Northgate Shopping Mall (management office) City directory listings for the surrounding area include individual tenants and facilities, including: • 929 Del Presidio Blvd: Union Oil Service Gas Station • 930 Del Presidio Blvd: Ed Brendel's Enco Service Gas • 949 Del Presidio Blvd: Harry Sabaca's Chevron Service Gas Station • 950 Del Presidio Blvd: Al Perron's Northgate Shell Gas Station
City Directory	1973	City Directory listings for the Property include: • 5600 Northgate Drive: American Express • 5800 Northgate Drive: M&T Inc., Northgate Mall Management • 6000 Northgate Drive: Baldwin Contracting City directory listings for the surrounding area include individual tenants and facilities, including: • 496 Las Gallinas Ave: Goodyear Tire & Rubber • 929 Del Presidio Blvd: Terra Linda Union Oil Service Gas Station • 930 Del Presidio Blvd: Ed Brendel's Enco Service Gas • 949 Del Presidio Blvd: Harry Sabaca's Chevron Service Gas Station • 950 Del Presidio Blvd: Al Perron's Northgate Shell Gas Station
Aerial Photograph	1974	The former Sears department store, Auto Center, Appliance Service Center, and parking lots have been built on the Property. The former dispenser islands can be seen just north of the Auto Center. A road and several buildings have been constructed on the hill to the west of the Property.
City Directory	1977	City Directory listings for the Property include: • 5000 Northgate Drive: Pay Less Drug Store • 5600 Northgate Drive: American Express • 5800 Northgate Drive: M&T Inc, Northgate Mall Management • 7120 Northgate Drive: Parklane Hosiery • 9000 Northgate Drive: Allstate Insurance, Polster Phillip, Sears Roebuck Retail. City directory listings for the surrounding area include individual tenants and facilities, including: • 496 Las Gallinas Ave: Goodyear Tire & Rubber • 929 Del Presidio Blvd: Terra Linda Union Oil Service Gas Station • 930 Del Presidio Blvd: Brendel's Exxon Service Gas • 949 Del Presidio Blvd: Harry Sabaca's Chevron Service Gas Station 950 Del Presidio Blvd: Northgate Shell Gas Station
Topographic Map	1980	General development has continued to occur throughout San Rafael.
City Directory	1981	City Directory listings for the Property include: • 5000 Northgate Drive: Pay Less Drug Store • 5600 Northgate Drive: American Express Travel • 5800 Northgate Drive: M&T Inc., Northgate Mall Management

5. Records Review

5.1 EDR Database Listings

Roux used a computerized environmental database and radius map report prepared by EDR to conduct a government records database search for sites of potential environmental concern within 1-mile of the Property. Appendix A contains a complete copy of the EDR Radius Map Report with GeoCheck. Based on the Map Findings Summary, in the EDR Radius Report, Table 4 shows the results for all the database listings that resulted in potential environmental concerns for the Property and surrounding area.

Table 4. Facilities of Potential Environmental Concern

Database	Target Property	<1/8 mile	1/8 - 1/4 mile	1/4 - 1/2 mile	1/2 - 1 mile	Total

The remainder of the discussion concerning review of the environmental databases listed on the EDR Radius Report has been restricted to those properties within 1/4 mile or potentially upgradient of the Property. Due to variable groundwater flow directions reported for this site and short depth to groundwater, downgradient sites less than 1/4-mile from the Property with database listings indicative of environmental impact were investigated. These sites of potential environmental concern can be found on Table 5.

The listings in Table 5 are further discussed below.

5.1.1 Findings at the Property

Northgate Mall at 5800 Northgate Drive

In November 1997, a PGE transformer leaked 125 gallons of oil into a subsurface vault [ERNS]. All oil was reportedly contained within the vault and the leak was fixed [CHMIRS].

This facility is listed as a chemical storage facility, US EPA Air Emission Inventory System (EIS) facility, and active RCRA hazardous waste small quantity generator (SQG) [CERS, ECHO]. Between 2011 and 2018, this facility reported gas emissions, including organic hydrocarbon gases, reactive organic gases, carbon monoxide, nitrous oxides, sulfur oxides, and particulate matter. This facility had five active hazardous waste tracking system (HWTS) listings between 1988 and 2017. Between 1990 and 2015, this facility disposed of laboratory waste chemicals, various solutions, organics, paint sludge, PCB-containing materials, inorganic solid waste, asbestos containing materials (ACM), and halogenated solvents [HAZNET].

Express Clothing Store at 5800 Northgate Drive

This facility is listed as an active hazardous waste generator since 2017 [CERS HAZ WASTE, HWTS, ECHO]. In 2016, this facility disposed of organics [HAZNET].

Victoria's Secret Store at 5800 Northgate Drive, Suite 145

This facility had an active HWTS listing from 2017 to 2020. This facility disposed of various organics in 2017, 2018, and 2019 [HAZNET].

Walden Book Co. at 5800 Northgate Drive, Suite 83

This facility had an active HWTS listing from 1997 to 2000. This facility disposed of oil-containing waste in 1997 [HAZNET].

Chipotle Mexican Grill at 5800 Northgate Drive, Suite 154

This restaurant was cited as a chemical storage facility for a violation related to training documentation in 2018 [CERS]. Facility returned to compliance.

Service Management Systems at 5800 Northgate Drive, Suite 200

This facility had an active HWTS listing from 2012 to 2014.

LensCrafters at 5800 Northgate Drive, Suite 36

This retail store had an active HWTS listing from 2017 to 2020 and is an active RCRA generator [ECHO]. It is listed as a hazardous waste generator with onsite treatment as well as a chemical storage facility with no reported violations [CERS, CERS HAZ WASTE].

Bath & Body Works at 5800 Northgate Drive, Suite 74

This retail store had an active HWTS listing from 2017 to 2020 and is an active RCRA generator [ECHO]. This facility disposed of organics in 2017, 2018, and 2019 [HAZNET].

Macy's West Stores, Inc. at 1000 Northgate Drive

This department store is registered under the EPA EIS for fossil fuel electric power generation [ECHO, CERS]. This facility is listed as a small quantity hazardous waste generator and chemical storage facility [CERS, CERS HAZ WASTE]. In 2017, the store received citations for failing to conduct weekly inspections of hazardous waste storage areas and maintain required documentation.

Home Goods at 1500 Northgate Drive

This retail store has an active HWTS listing from 2014 and is an active RCRA generator [ECHO]. This facility disposed of inorganic solid waste and organics from 2015 to 2018 [HAZNET].

Rite Aid / Payless Drug and Photo Shop at 1500 Northgate Drive

This drug store/pharmacy has an active HWTS listing from 1992 to 1998 as Payless Drug and from 1995 to the present as Rite Aid. The facility has been an active RCRA generator since 1995 with no reported violations [RCRA LQG, FINDS, ECHO, CERS HAZWASTE]. Between 1995 and 2019, Rite Aid disposed of solvents, pharmaceutical waste, detergent waste chemicals, photo-processing chemicals, pesticides, and various other chemical solutions [HAZNET]. Between 1992 and 1995, Payless Drug disposed of photo-processing chemicals and metal sludge.

In 1997, an employee of the photo shop reportedly poured photo chemicals down the drain [CHMIRS]. When the drain clogged, the employee used Drano which caused a chemical reaction.

LensCrafters at 3840 Northgate Drive

This retail store has an active HWTS listing since 1997 and is an active RCRA generator [ECHO]. Between 2004 and 2008, this facility disposed of various organics [HAZNET].

Kohl's Store / Mervyn's Store at 5010 Northgate Drive

This department store is registered under the EPA EIS and had an active HWTS listing from 2006 to 2007 as Mervyn's Store and from 2009 to 2010 as Kohl's Store [CERS]. In 2006, Mervyn's disposed of oil-containing waste [HAZNET]. Mervyn's reported emissions of organic hydrocarbon gases, reactive organic

gases, carbon monoxide, nitrogen oxides, sulfur oxides, and particulate matter between 2009 and 2018 [EMI].

Kohl's is an active RCRA generator and is classified as a chemical storage facility/hazardous waste generator [ECHO, CERS HAZWASTE, CERS]. Kohl's reported emissions of organic hydrocarbon gases, reactive organic gases, carbon monoxide, sulfur oxides, and particulate matter in 2007 and 2008 [EMI]. In 2009, Kohl's disposed of oil-containing waste. Between 2014 and 2019, Kohl's store disposed of organics, latex waste, and adhesives [HAZNET]. In 2017, the store received citations for failing to maintain required documentation [CERS].

KB Toys at 5025 Northgate Drive

This retail store had an HWTS listing from 1999 to 2000 and disposed of ACM in 1999 [HAZNET].

The Picture People / Expressly Portraits at 5600 Northgate Drive

This photo shop had an active HWTS listing from 1993 to 2003 as The Picture People and from 1992 to 1999 as Expressly Portraits. Expressly Portraits is an active RCRA small quantity hazardous waste generator [ECHO]. This facility disposed of photo-processing chemicals and metal sludge from 1993 to 2002 [HAZNET].

Home Goods at 6000 Northgate Drive

This retail store was an active RCRA hazardous waste generator with a HWTS listing from 2019 to 2020 [CERS HAZWASTE]. In 2019, this facility disposed of organic liquids and oil-containing waste [HAZNET].

Ritz Camera Centers at 7120 Northgate Drive

This photo shop had an active HWTS listing from 1992 to 1994. This facility disposed of metal sludge in 1992 and 1993 [HAZNET].

Sears Roebuck & Co. at 8108 Northgate Drive

This department store, also associated with the address 9000 Northgate Dr, had an active HWTS listing from 2003 to 2013. This facility disposed of various solvents in 2004 and 2008, including lead, benzene, TCE, and PCE [HAZNET, RCRA-SQG]. These chemicals may indicate dry-cleaning activities may have taken place within this facility. No violations were reported.

Fairfax French Cleaners 1986 at 8985 Northgate Drive

This facility was listed as a drycleaner from 2001 to 2007 [EDR HIST CLEANER].

Sears Roebuck & Co. and Sears Auto Center at 9000 Northgate Drive

This department store is registered under the EPA EIS [CERS] and is an active RCRA SQG [ECHO]. This facility reported emissions of primarily organic hydrocarbon gases, reactive organic gases, carbon monoxide, and nitrogen oxides from 2006 to 2018 [EMI]. Sears had active HWTS listings from 1989 to 1996 and 1991 to 2018. This facility had an active HWTS listing from 2010 to 2011 as Coda Automotive CA Inc. In 1994 and 1995, this facility disposed of PCB-containing material [HAZNET]. In 1998, this facility disposed of ACM. In 2017, this facility disposed of 2.4 tons of contaminated soil from site cleanup. Between 1989 and 2018, this facility disposed of sludge waste, oil-containing waste, solvents, organic/inorganic solid waste, and various types of chemical solutions.

The auto center reportedly had six underground storage tanks (USTs) for product and waste oil as well as a concrete sump for waste oil and grease, installed in 1972 [HIST UST]. This Sears is under environmental review [NON-CASE INFO].

Jiffy Lube / Flamingo Properties at 9000 Northgate Drive

This gasoline service station/auto repair shop had an active HWTS listing from 1996 to 2009 [EDR HIST AUTO]. Between 1996 and 2005, this facility disposed of oil-containing waste and various organic solutions [HAZNET]. This facility had a 2,100-gallon aboveground storage tank (AST).

Property Listings Summary

There are 22 facilities with database listings on the Property. There were 30 HWTS listings, four Emissions Inventory database (EMI) listings, two RCRA LQGs, and four RCRA SQGs. Hazardous materials generated on the Property included waste related to photo processing, automobile repair, PCBs, ACM, solvents, and other substances. Facilities of environmental concern on the Property are summarized below:

- The Sears Auto Center / Jiffy Lube at 9000 Northgate Dr has had one AST, six USTs, and one sump. The Sears facility disposed of waste related to a site cleanup in 2017. More details are provided in Sections 5.2 and 5.3.
- Northgate Mall had an incident in November 1997 in which a PGE transformer leaked 125 gallons of oil into a subsurface vault, location not reported. It is unknown if the oil contained PCBs but the spill was reportedly cleaned up and no oil was believed to have left the vault.
- Fairfax French Cleaners at 8685 Northgate Dr was in operation from at least 2001 to 2007. No other information on this facility was given; however, according to a previous Phase I ESA site reconnaissance (ATC, 1993), this location was used for pickup/drop-off only – no dry cleaning was performed onsite.

5.1.2 Findings at Nearby Facilities

Terra Linda Goodyear Tire & Rubber Co. at 496 Las Gallinas Avenue

This auto repair shop had a waste oil UST, installed in 1973 [HIST UST].

Ace Cleaners, Kerns & Walkers Cleaners at 412 Las Gallinas Avenue

This facility was listed as a drycleaner as early as 1979 up to June 2020 [DRYCLEANERS, EDR HIST CLEANER]. This former drycleaner facility is listed under EPA EIS [CERS] and had an active HWTS listing from 2017 to 2020. In 2017 and 2018, Ace Cleaners disposed of liquids with halogenated organic compounds [HAZNET]. Investigations and remedial excavation were conducted to remove VOC-impacted soil. The RWQCB concurred with the Closure Request Report in a letter dated October 20, 2020.

CVS Pharmacy #9529 at 442 Las Gallinas Avenue

This pharmacy/drug store is listed as an active RCRA large quantity hazardous waste generator (LQG) with no reported violations [CERS HAZWASTE, ECHO, RCRA-LQG]

Tiny's Richfield Service at 390 Los Ranchitos Road

This facility was listed as a gasoline service station from 1969 to 1973 [EDR HIST AUTO].

76 Terra Linda at 921 Del Presidio Boulevard

The 76 Terra Linda facility was listed as a gasoline service station from 2006 to 2014 [EDR HIST AUTO]. This station and car wash facility is listed as a hazardous waste generator and chemical storage facility with at least two motor vehicle fuel USTs [CERS, CERS TANKS, CERS HAZWASTE, UST]

ConocoPhillips at 921 Del Presidio Blvd

This gas station was the site of a leaking underground storage tank (LUST) case involving diesel/gasoline in groundwater, documented on GeoTracker and discussed in Section 5.2. The case was opened in 1991 and was closed on March 22, 2010 [LUST, Cortese, CERS].

Valero Refining Co. / Exxon #7-7067 / Fuel 24: 7 at 930 Del Presidio Blvd

This facility was a gasoline service station from 1969 to 1996 as Brendels, Ed Inc., 2000 to 2001 as Exxon, and 2002 to 2014 as Valero [EDR HIST AUTO]. It is currently active as a Fuel 24:7 gas station.

The Exxon facility had five fiberglass USTs, installed 1983-1984, including: one 12,000-gallon product tank, one 10,000-gallon product tank, one 10,000-gallon diesel tank, one 10,000-gallon product tank, and one 1,000-gallon waste oil tank [SWEEPS UST, HIST UST]. Exxon station was listed as a RCRA LQG, and Valero station was listed as a RCRA SQG. Fuel 24:7 gas station is an active hazardous waste generator and chemical storage facility with USTs [HWTS, CERS TANKS, CERS, CERS HAZWASTE].

On April 25, 2003, about 100-200 gallons of diesel fuel was released by a delivery tanker and entered the storm drain to the San Francisco Bay [CHMIRS]. Spill was reported as contained and is not expected to affect the Property.

This active gas station was the site of a LUST case involving gasoline in groundwater, documented on GeoTracker and discussed in Section 5.2. The case, associated with the former Exxon Service Station #7-7067, was opened in 1987 and closed on April 14, 2009 [LUST, Cortese, CERS].

Terra Linda Union 76 / Unocal / Union Oil at 930 Del Presidio Blvd

This facility was an active gasoline service station as early as 1983 as Terra Linda Union 76 [EDR HIST AUTO]. Unocal service station was listed as a RCRA LQG.

The Union Oil station had a concrete sump for waste oil/water mix, a 280-gallon carbon steel waste oil tank, and three carbon steel product oil USTs, installed in 1961, including a 4,000-gallon tank, 5,000-gallon product tank, and 6,000-gallon product tank [SWEEPS UST, HIST UST].

This gas station was the site of a LUST case involving waste oil in groundwater, documented on GeoTracker and discussed in Section 5.2. The case, associated with the former Unocal Station, was opened in 1991 and closed on April 11, 1996 [LUST, Cortese, HIST Cortese, CERS].

Chevron Station #93553 at 949 Del Presidio Blvd

This facility was listed as a RCRA LQG and an active gasoline service station from 1982 to 2009 [EDR HIST AUTO] with four 10,000-gallon product oil tanks [HIST UST, SWEEPS UST]. The former gas station was the site of a LUST case involving gasoline in groundwater, documented on GeoTracker and discussed in Section 5.2. The case was opened in 1987 and closed on February 20, 2014 [LUST, HIST Cortese, CERS].

Northgate Shell / AU Energy at 950 Del Presidio Blvd

This facility was listed as an active gasoline service station as early as 1969 up to the present day [EDR HIST AUTO]. There are four USTs on this property, including a 550-gallon waste oil tank, installed in 1966, and three 10,000-gallon product tanks, installed in 1983 [HIST UST, SWEEPS UST]. The Shell station was a RCRA SQG and had active HWTS listings from 1988 to 2015. In 1987, this facility disposed of about 59 tons of contaminated soil from a site cleanup [HAZNET]. In 2017 and 2018, this facility reported emissions of organic hydrocarbon gases and reactive organic gases

As a chemical storage facility, the Shell station was cited in January 2021 for liquid observed in secondary containment, requiring further action [CERS].

This active gas station was the site of a LUST case involving gasoline and other oil products in groundwater, documented on GeoTracker and discussed in Section 5.2. The case was opened in 1987 and closed on May 29, 2014 [LUST, Cortese, HIST Cortese, CERS].

Michaels Store at 400 Las Gallinas Ave

This facility is listed as a hazardous waste generator with no documented violations [CERS HAZWASTE].

Redwood Cleaners at 460 Nova Albion

This facility was listed as an active drycleaner from 2001 to 2008 [EDR HIST CLEANER].

Villa Marin Homeowners Association at 100 Thorndale Dr

This facility had a motor vehicle fuel UST which was removed [UST].

One Medical at 1004 Northgate Dr

This emergency medical center was a hazardous waste generator with a HWTS listing, active from 2018 to April 8, 2021.

Northgate Chevron Service at 1004 Northgate Dr

This facility was listed as an active gasoline service station from 1969 to 1976 [EDR HIST AUTO].

Guide Dogs for The Blind at 350 Los Ranchitos Rd

This facility, also known as Blind Puppy Center, is listed under EPA EIS and the RCRA [ECHO, NPDES]. It had one 1,000-gallon gasoline UST, installed in 1968 and removed in 2007 [UST, HIST UST]. From 2004 to 2008 and 2013 to 2018, this facility reported emissions of organic hydrocarbon gases, reactive organic gases, carbon monoxide, nitrogen oxides, sulfur oxides, and particulate matter [EMI].

Gateway Gas / Texaco / Art's Auto Care at 1005 Northgate Dr

Gateway Gas was listed as a hazardous waste generator and chemical storage facility with five documented carbon steel USTs, installed in 1965, including four 6,000-gallon product tanks and one 550-gallon waste oil tank [CERS, CERS TANKS, CERS HAZWASTE, SWEEPS UST, HIST UST]. This facility has a HWTS listing, active since 2011. In 2017 and 2018, this facility disposed of hydrocarbon solvents and reported emissions of organic hydrocarbon gases and reactive organic gases [HAZNET, EMI]. Art’s Auto Care was the site of a LUST case involving gasoline in groundwater, documented on GeoTracker and discussed in Section 5.2. The case was opened in 1989 and closed on July 1, 2010 [LUST, Cortese].

Northgate Cleaners at 270 Northgate Dr

This drycleaner facility is listed under EPA EIS and the RCRA as an active SQG [CERS, RCRA-SQG, ECHO]. Northgate Cleaners had a HWTS listing active from 1987 to 2003. From 1987 to 2000, this facility disposed of halogenated solvents, and between 1990 and 2010, they reported emissions of organic hydrocarbon gases and reactive organic gases [HAZNET, EMI].

Offsite Property Listings Summary

There are 21 facilities of concern with database listings in the vicinity of the Property. There were nine HWTS listings, five Emissions Inventory database (EMI) listings, five RCRA LQGs, and five RCRA SQGs. Hazardous materials generated on the Property included waste related to automobile service, drycleaning, soil cleanup, and other substances. Facilities with documented environmental releases in the vicinity of the Property are summarized below:

- 412 Las Gallinas Ave was the location of Ace Cleaners and Kerns & Walkers Cleaners which was the site of a remedial investigation to remove VOC-impacted soil in 2019;
- 921 Del Presidio Blvd is an active 76 gas station which had a LUST case associated with ConocoPhillips, closed on March 22, 2010, discussed more in Section 5.2;
- 930 Del Presidio Blvd is an active Fuel 24: 7 gas station and was the location of two LUST cases: Unocal Station, case closed on April 11, 1996, and Exxon station, closed on April 14, 2009, discussed more in Section 5.2;
- 949 Del Presidio Blvd was the location of a Chevron gas station which had a LUST case, closed on February 20, 2014, discussed more in Section 5.2;
- 950 Del Presidio Blvd is an active Shell gas station, which had a LUST case, closed on May 29, 2014, discussed more in Section 5.2; and
- 1005 Northgate Dr, formerly a gas station, had a LUST case associated with Art's Auto Care, closed on July 1, 2010, discussed more in Section 5.2.

5.2 FOIA/Public Records Request Responses

FOIA/public records requests for the Property were submitted to federal, state, and local regulatory agencies (Section 2.2). Information obtained from all agency correspondence as well as their associated online databases is included in Appendix F and is summarized below.

Department of Toxic Substances Control (DTSC)

On August 26, 2021, the DTSC provided documents for the Property, including the following:

- Facility Profile for C&T Recycling, handler/collection vendor for Northgate Mall, last revised in 2012;
- Facility Profile for Attan Recycling Corporation, handler/collection vendor for Kohl's, last revised in 2014;
- Facility Profile for Attan Recycling Corporation, handler/collection vendor for Northgate Mall, last revised in 2014;
- Facility Profile for C&T Recycling, handler/collection vendor for 5800 Northgate Dr, last revised in 2010; and
- Facility Profile for Goodwill of San Francisco, handler/collection vendor for 5800 Northgate Dr, last revised in 2017.

Envirostor (DTSC's online database) was queried on August 20, 2021, and no listings were identified in the vicinity of the Property.

Online records available through the DTSC Hazardous Waste Tracking System (HWTS) were searched for the Property on August 20, 2021. These findings are consistent with the HWTS listings discussed in Section 5.1.1.

San Francisco Regional Water Quality Control Board (RWQCB)

On August 30, 2021, the RWQCB provided links to a GeoTracker case and SMARTS database listing discussed further below.

The SMARTS database contains a listing for the Macerich Company and Renovation of the Mall at Northgate. This is a terminated commercial reconstruction permit.

On August 20, 2021, Roux searched the California GeoTracker Database and found the following cases in the vicinity of the Property:

- Sears Retail Store[9] at 9000 Northgate Dr: This GeoTracker profile is associated with the investigations being conducted at the former Sears facilities on the Property. According to email correspondence from February 4, 2019, Wood Environment and Infrastructure Solutions, Inc. (WEIS), on behalf of Sears, had requested no further investigation designation from Marin County. The County forwarded the request to the RWQCB. The RWQCB suggested the site might be suitable for the Site Cleanup Program, which handles voluntary cleanup sites, but did not believe a case needed to be opened. The most recent correspondence was an email from the property owner, MGP, in June 2020. At the time of this ESA, this informal case is still under review by the RWQCB.
- Chevron[10] at 949 Del Presidio Blvd: This gas station, constructed in 1965, had three 10,000-gallon product USTs and one 500-gallon waste oil UST. According to the Closure Request, dated February 28, 2013, by Conestoga-Rovers and Associates (CRA), environmental monitoring began in 1998, involving several equipment upgrades, regular subsurface investigations, and the installation of ten monitoring wells and 20 soil borings. In conjunction with the removal of two used-oil USTs in 2010, magnesium sulfate injections with a remedial excavation of 132 cubic yards of soil were performed to remediate TPH impacts. Contaminants of concern included TPH as gasoline (TPH-g), TPH as diesel (TPH-d), benzene, methyl tertiary-butyl ether (MTBE), and tertiary-butyl alcohol (TBA). The highest residual 2012 detections in soil were 210 mg/kg TPH-d, 480 mg/kg TPH-g, and 0.87 mg/kg benzene. The highest residual 2012 detections in groundwater were 3,800 ug/L TPH-d, 10,000 ug/L TPH-g, 490 ug/L benzene, 800 ug/L MTBE, and 3,000 ug/L TBA. According to the projection modelling done by CRA, the plume edges are naturally attenuating and are not expected to continue migrating.

  The contaminant plume in groundwater was clearly delineated and has shown to migrate northwest away from the Property. This case was found to satisfy the Low-Threat Policy criteria and was closed by the RWQCB on February 20, 2014. When the case was closed, the station still had five dispenser islands and four 10,000-gallon product USTs. At the time of this report, the station is inactive and under construction, as observed during the site reconnaissance. This case is not expected to pose a threat to the Property.
- 76 Service Station (ConocoPhillips)[11] at 921 Del Presidio Blvd: This gas station was the site of a groundwater investigation and cleanup action. TPH and benzene/toluene/ethylbenzene/xylenes (BTEX) impacts were discovered during soil and groundwater sampling associated with the removal of three product USTs and one waste-oil UST in 1991. Groundwater that infiltrated the excavation was sampled and found to have 70,000 ug/L TPH-g, 2,100 ug/L benzene, 1,400 ug/L toluene,

[9] Sears Retail Store #1528 (https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T10000014929)
[10] Chevron GeoTracker Profile (https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0604100157)
[11] ConocoPhillips GeoTracker Case (https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0604141609)

2,500 ug/L ethylbenzene, and 9,699 ug/L xylenes. Soil around the tanks and product piping were over excavated in 1992, approximately 420 cubic yards. The composite sample taken showed a TPH-g concentration of 14 mg/kg. No further action for the 1991 tank removal was issued by the RWQCB in 1996.

Five new borings were advanced in 2007 by ATC. TPH and BTEX analytes were detected in soil at low concentrations. Analytes were detected in groundwater up to 4,600 ug/L for TPH-g, 12,000 ug/L TPH-d, 20 ug/L benzene, and 250 ug/L MTBE. Three monitoring wells were installed in 2008, beginning quarterly monitoring. Five soil borings were advanced in 2009. Groundwater sampling showed residual concentrations of up to 8,100 ug/L TPH-g, 4,700 ug/L TPH-d, 470 ug/L benzene, 610 ug/L MTBE, and 530 ug/L TBA. A Sensitive Receptor Survey was conducted by Delta Consultants in 2009. Constituents of concern include dissolved contaminants in groundwater, TPH-g, TPH-d, MTBE, and TBA at relatively low concentrations. The highest concentrations were concentrated in the northeast portion of the site and the plume did not appear to be migrating. No Further Action (NFA) status was granted by the RWQCB in a case closure letter dated March 22, 2010. Given its orientation to the Property and stability of the plume, this site does not pose a threat to the Property.

- Former Exxon station[12] at 930 Del Presidio Blvd: This facility was the site of an investigation associated with Valero and ExxonMobil gas station operations. Three product tanks were removed in 1985 and one used-oil tank was removed in 1999. A total of 17 monitoring wells were installed as part of the investigations. From 1993 to 1999, about 830,120 gallons of groundwater was pumped and treated. A total of 66 cubic yards of soil was sent to landfill from 1998 to 1999. From 2000 to 2006, about 1,009,390 more gallons of groundwater was pumped and treated.

  After cleanup, analytes were detected in soil up to 1,100 mg/kg TPH-g, 440 mg/kg TPH-d, 0.31 mg/kg benzene, 4.5 mg/kg toluene, 8.9 mg/kg ethylbenzene, 12 mg/kg xylenes, and 9.8 mg/kg lead. After cleanup, analytes were detected in groundwater up to 2,100 ug/L TPH-g, 320 ug/L TPH-d, 200 ug/L benzene, 16 ug/L toluene, 21 ug/L ethylbenzene, 24 ug/L xylenes, 140 ug/L MTBE, and 1,500 ug/L TBA. Free product had not been observed since 1989 and the investigation indicated that the plume is stable, not migrating offsite, and shrinking from natural attenuation. NFA status was granted by the RWQCB in a case closure letter dated April 14, 2009. This site does not appear to pose a threat to the Property.

- Shell station[13] at 950 Del Presidio Blvd: This facility was the site of an investigation related to the removal of one waste oil tank in 1987. The tank was discovered to be leaking due to a faulty pipe joint and overfilling. Maximum concentrations detected in soil were 2,500 mg/kg TPH-g, 0.36 mg/kg benzene, 28 mg/kg toluene, 2 mg/kg ethylbenzene, 180 mg/kg xylenes, 0.73 mg/kg MTBE, and 0.15 TBA. Maximum concentrations detected in groundwater were 32,000 ug/L TPH-g, 2,100 ug/L TPH-d, 1,600 ug/L benzene, 3,800 ug/L toluene, 960 ug/L ethylbenzene, 5,100 ug/L xylenes, 3,700 ug/L MTBE, and 3,380 ug/L TBA.

  The cleanup action involved installing six monitoring wells and removing 49 tons of soil in 1998. In 2006, approximately 14,730 gallons of groundwater and 40 gallons of free product was pumped and sent to a refinery. After cleanup, no residual analytes were detected in soil. Some analytes were detected in groundwater up to 6,400 ug/L TPH-g, 960 ug/L TPH-d, 12 ug/L benzene, 5 ug/L toluene, 9.8 ug/L ethylbenzene, 19 ug/L xylenes, 5.8 ug/L MTBE, and 83 ug/L TBA. This site satisfied the criteria for Low Threat UST Closure Policy and the RWQCB issued NFA status in a letter, dated May 29, 2014. This site does not appear to pose a threat to the Property.

- Unocal[14] at 929 Del Presidio Blvd: This gas station was the site of an investigation related to the removal of three product USTs and one waste oil tank in 1991. Maximum concentrations detected in soil were 1,000 mg/kg TPH-g, 230 mg/kg TPH-d, 3.0 mg/kg benzene, 3.7 mg/kg toluene, 14 mg/kg ethylbenzene, 43 mg/kg xylenes, and 9,100 mg/kg oil/grease. Maximum concentrations detected in

[12] Former Exxon 7-7067 GeoTracker Case (https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0604100047)
[13] Shell GeoTracker Case (https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0604100126)
[14] Unocal GeoTracker Case (https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0604100148)

groundwater were 70 ug/L TPH-g, 2.1 ug/L benzene, 1.4 ug/L toluene, 2.5 ug/L ethylbenzene, and 9.6 ug/L xylenes.

The cleanup action involved removing/aerating 420 cubic yards of soil and purging 1,000 gallons of groundwater. After cleanup, analytes detected in soil included 7.1 mg/kg TPH-g, 2.2 mg/kg TPH-d, 4.7 mg/kg TPH as hydraulic oil (TPH-h), 0.041 mg/kg benzene, 0.020 mg/kg toluene, 0.250 mg/kg ethylbenzene, and 0.077 mg/kg xylenes. The only analytes detected in groundwater were 1.0 ug/L TPH-g and 0.073 ug/L TPH-d. The RWQCB issued case closure in a letter dated March 29, 1996. This site does not appear to pose a threat to the Property.

- Art's Auto Care (former Texaco/Chevron) at 1005 Northgate Dr: This facility was the site of a LUST investigation associated with the removal of three product USTs in 1994 and one used-oil UST in 1996. Maximum concentrations detected is soil were 2,820 mg/kg TPH-g, 9.65 mg/kg TPH-d, 7.4 mg/kg benzene, 21 mg/kg toluene, 22 mg/kg ethylbenzene, and 92 mg/kg xylenes. Maximum concentrations detected in groundwater were 25,000 ug/L TPH-g, 2,900 ug/L TPH-d, 1,400 ug/L benzene, 420 ug/L toluene, 2,800 ug/L ethylbenzene, 1,450 ug/L xylenes, and 760 ug/L MTBE.

  The cleanup action, which took place between 1994 and 1996, involved installing eight monitoring wells, excavating 380 tons of soil, and pumping 15,000 gallons of groundwater. After cleanup, no residual concentrations were detected in soil. Analytes detected in groundwater included 8,700 ug/L TPH-g, 1,800 ug/L TPH-d, 4 ug/L benzene, 2 ug/L toluene, 75 ug/L ethylbenzene, 2 ug/L xylenes, and 8 ug/L MTBE. The most recent sampling conducted in 2009 indicated that the plume is stable due to no migration and biodegradation. The RWQCB issued NFA in a letter dated July 1, 2010. This site does not appear to pose a threat to the Property.

Bay Area Air Quality Management District (BAAQMD)

On August 30, 2021, the BAAQMD provided the following document for the Property: Plant Status Report for Macy's West Stores, Inc., permitted on November 1, 2013. Facility had a November 2004 permit for an emergency generator and reported annual emissions of 0.01 pounds per day of diesel engine exhaust particulate matter.

California Department of Conservation Geologic Energy Management Division (CalGEM) Well Finder

On August 20, 2021, Roux searched the CalGEM database as part of its record review. No oil and gas wells were identified in the vicinity of the Property.

City of San Rafael

On August 30, September 3, and September 7, 2021, the Office of the City Attorney provided 1,437 records for the Property, including the following:

- 1000 Northgate Drive (25 records)
  - Building permits, mechanical permits, fire permits, inspection report, signage drawings, solar panel permits, invoices, and related email correspondence for Macy's department store.
  - Permitting, fire department records, and bankruptcy court documentation for Emporium department store.

- 1500 Northgate Drive (42 records)
  - Certificate of occupancy, building permits, mechanical permits, fire system permits/ inspections, and construction plan check documentation/correspondence for Rite Aid Pharmacy.

- 5000 Northgate Drive (91 records)

- Building permit, geotechnical report, mechanical permits, fire permits, inspections, and sprinkler system documentation for 5000 Northgate Drive.
- Test and Balance Report, building permits, mechanical permits, fire permits, construction plans, and certificate of occupancy for Panera Bread.
- Construction plans, fire permits, building permits, mechanical permits, fire system equipment specifications, and certificate of occupancy for Roadside BBQ.
- Signage permits, building permits, mechanical permits, fire system equipment specifications, email correspondence, and certificate of occupancy for European Wax Center.
- Grease interceptor email correspondence for the Mall at Northgate, dated July 31, 2009, documenting a 1,500-gallon interceptor for BJ's restaurant, a 2,000-gallon interceptor for the food court, and a 2,000-gallon interceptor for 5000 Northgate Dr.
- Transformer Support Platform Structural Calculations, dated September 3, 2009, for Panera Bread.
- Transformer support platform drawings for Roadside BBQ, dated November 18, 2009.

- 5010 Northgate Drive (44 records)
  - Structural calculations, building permits, mechanical permits, fire plan check comments, fire alarm system plan submittal, fire inspection documentation, fire permits, and email correspondence for Kohl's department store.
  - Building and mechanical permits for Mervyn's department store.

- 5800 Northgate Drive (1,142 records)
  - Building permits, mechanical permits, and Final Structural Observation Report for the Mall at Northgate.
  - Building inspection records, certificate of acceptance, and requirements for the Renovation of the Mall at Northgate.
  - Fire permit and site plans for four temporary generators used for a PG&E service interruption in 2011.
  - Certificates of Occupancy, building permits, mechanical permits, fire permits, and other building plan documentation for individual tenant suites.
  - Roux was able to go through 219 records, the remaining records were not reviewed and are considered a data gap.
- 6000 Northgate Drive (67 records)
  - Building permits, conceptual design package, roof demolition and repair plans, structural plans, as-builts, building plan comments, building energy analysis report, and Las Gallinas Valley Sanitary District correspondence for Home Goods department store.
  - Email correspondence references a generator that was once present at this facility but removed during a renovation.

- 9000 Northgate Drive (26 records)
  - Building permits, mechanical permits, and electric plans for Sears/Sears Auto Center.
  - Signage plans, building permits, and mechanical permit for a 3-phase backup generator for Restoration Hardware (RH) Outlet.

Marin County

On August 30, 2021, the Marin County Counsel's responded to Roux' records request, stating that no documents were found for the Property.

5.3 Documents Provided by the User

The following is a list of the relevant documents provided by the User (Appendix I):

- Sears UST Closure Documentation, requested by The Macerich Company on November 25, 1992. Attached documents confirm at least four USTs had been removed from the Property: one 8,000-gallon gasoline tank in May 1986; one 1,000-gallon waste oil tank and two 500-gallon bulk motor oil tanks in August 1986. A somewhat illegible invoice mentions removal of oil tanks. According to a letter by the Marin County Department of Environmental Health (DEH), dated March 2, 1987, soil and groundwater sample results indicated residual impacts of product were "safe".
- Phase I Environmental Site Assessment (ESA) for the Macerich Company, the Mall at Northgate, dated August 12, 1993, prepared by ATC/Diagnostic Environmental Inc. (ATC). This ESA did not include the Sears facilities as part of the Property as they were separately owned by Sears at the time. During reconnaissance, hazardous materials were observed in Ritz Camera for photofinishing. Fairfax French Cleaners did not perform dry-cleaning activities on the Property. ATC observed ten PG&E pad-mounted transformers which have all been tested for PCBs and replaced if found to contain PCBs, according to PG&E. Fluorescent lights were observed on the Property and determined to be unlikely to contain PCBs. Fourteen subsurface hydraulic lifts and one elevator were observed in the Sears Automotive building. Minor oil stains were observed beneath Mervyn's back-up generator and two compressors at Sears Auto. At the time of this report, investigations and remediation operations were underway at three gas stations near the site: Exxon at 930 Del Presidio Blvd, Shell at 950 Del Presidio Blvd, and Unocal at 929 Del Presidio Blvd. No additional information was found regarding the USTs and subsurface investigation at the Sears.
- Dispenser Island and Product Line Removal Report for Sears at 9000 Northgate Dr, dated July 1, 1996, prepared by Fluor Daniel GTI for the City of San Rafael Fire Department. In November and December 1994, two dispenser islands and associated product lines, located next to the Sears Auto Center building, were demolished and removed by Norm Wilson and Sons, Inc. A total of 22 soil samples were collected from beneath the dispenser islands and associated piping. Samples from beneath the two islands and main product lines contained no detectable concentrations of TPH or BTEX; lead concentrations ranged from 6 mg/kg to 11 mg/kg. Samples from beneath all other lines contained concentrations of TPH ranging from 7 to 19 mg/kg. Chromium was detected in one sample at 210 mg/kg which is greater than a typical Bay Area background concentration[15] (120 mg/kg). Due to the low levels of TPH and low risk of public exposure to this soil, Fluor Daniel GTI found no further investigation necessary for this site.
- Hydraulic Lift Removal, Assessment, and Site Remediation Activities for Sears at 9000 Northgate Dr, dated February 7, 1997, prepared by Dames and Moore. During removal, soil samples were collected as part of an initial soils assessment. TPH as hydraulic oil (TPH-h) was detected near all three lifts being removed at concentrations up to 320 mg/kg at Lift 1, 5,500 mg/kg at Lift 2, and 11,000 mg/kg at Lift 3. PCBs were also detected up to 0.48 mg/kg. The presence of PCBs may indicate that the lifts were installed prior to the 1977 ban on PCBs; therefore, the remaining 14 lifts may potentially have similar subsurface impacts. The three lifts were removed and areas of soil with concentrations above the 1,000 mg/kg cleanup guidance were over-excavated to 3 feet bgs. Since the samples collected at 3 feet bgs had TPH-h concentrations below the cleanup guidance, no confirmation samples were collected and no further remedial excavation was deemed necessary. The excavations were backfilled with clean material and finished with concrete.
- Phase I ESA for Rite Aid Store at the intersection of Northgate Dr and Las Gallinas Ave, dated August 4, 1998, prepared by Faultline Associates, Inc. for Tait & Associates. The subject parcel is located

[15] Lawrence Berkeley National Laboratory Environmental Restoration Program, April 2009.

on the northwesternmost corner of the Property and was a developed parking lot with no structures. Due to its proximity to the three gas station remediation sites on Del Presidio Blvd, groundwater sampling was recommended to determine if any petroleum impacts have migrated to the site.

- Request for Closure of the Sears Automotive Center investigation, dated March 23, 1999, prepared by IT Corporation (formerly Fluor Daniel GTI). Based on the results of the 1996 dispenser island removal by Fluor Daniel GTI, closure of this site was requested of the San Rafael Fire Department. In response, the City of San Rafael requested specific records from Sears in a letter dated November 2, 1999. Requested records included lab reports from the March 7, 1985, UST excavation by Blaine Tech Services, documentation of the 1987 UST removals and associated lab reports.
- Letter from the City of San Rafael, dated November 2, 1999, providing the New Landowner Notification and Participation Requirements for Sears, Roebuck & Co. at 9000 Northgate Dr.
- Review for Closure of the Sears Automotive Center investigation, dated November 16, 1999, prepared by the City of San Rafael, including the Fire Department [SRFD]. This letter echoes the City's previous request for documentation and states that soil and water samples will be required to test for MTBE before closure.
- Response to City comments regarding the request for additional documents by the City of San Rafael, dated October 15, 2002, prepared by URS Corporation on behalf of Sears. URS reported that a total of five USTs were present at the Sears facility. URS provided the following documentation:
    - UST Removal application for two 500-gallon bulk oil tanks and one 1,000-gallon waste oil tank, received by the Marin County DEH on August 5, 1986;
    - Marin County DEH March 1987 Clearance document, previously described;
    - Waste manifest for non-hazardous soil, dated August 25, 1995; and
    - EDR Offsite Receptor Report, dated November 12, 1999.
- Phase I ESA for Mervyn's Department Store at 5010 Northgate Dr, dated January 5, 2009, prepared by Bureau Veritas for Macerich Management Company. The Mervyn's store was located on the center west portion of the Property (now Kohl's). Minor diesel staining was observed on the concrete pad beneath their backup generator. The generator was located adjacent to the west side of the building next to a transformer. Facilities of concern included the four gas stations on Del Presidio Blvd (76, Valero, Chevron, and Shell) which all had active groundwater remediation programs at the time.
- Phase I ESA for Northgate Mall, dated August 6, 2009, prepared by AEI Consultants (AEI) for US Bank. AEI identified a DRYCLEANERS listing for this site, not provided in the EDR Radius Report, which documented the Sears facility at 8108 Northgate Drive as a laundry and garment service in March 2003. AEI reported that dry-cleaning operations were denied by Sears and Macerich, and the solvents were likely related to Sears Auto Center operations. During reconnaissance of the Sears Auto Center, AEI observed new/waste oil ASTs and many drums which were all stored on a concrete pad with minor staining. According to the Property manager at the time, Joey Elliot of Macerich, there were no remaining USTs on the Property and no evidence of unregistered USTs was observed. A survey of asbestos and lead-based paint was recommended prior to future redevelopment. AEI recommended a Phase II Investigation based on the following concerns identified:
    - Potential TPH and PCB subsurface impacts from the remaining hydraulic lifts at the Sears Auto Center;
    - Potential subsurface contamination from the Sears Auto Center oil/water separator and connected trench drain. These structures were assumed to have been installed when the automotive center was first constructed in 1971 and have the potential to leak contaminants if the separator or drain structure was compromised. PCE and TCE were cited as particular contaminants of concern due to their documented presence/use onsite;
    - Lack of information regarding the former Sears gas station and its past/present USTs on the Property was identified as a REC. AEI believed there to be insufficient evidence that all USTs

were removed and that a geophysical survey was needed to determine if any USTs remain on the Property. Information obtained by AEI was consistent with the findings of this Phase I ESA.

- Phase II ESA Report and Recommendations for the Sears Automotive Center at 9000 Northgate Drive, dated October 20, 2009, prepared by Sigma Engineering, Inc. (Sigma) for the Macerich Company. This subsurface investigation focused on the former fueling area and active auto repair shop to address the RECs identified by AEI in their 2009 Phase I ESA as well as complete MTBE testing required by the SRFD. Eight borings were advanced in the auto center building to target the existing hydraulic lifts, trench drain and oil/water separator area, and location of two former lifts as confirmation sampling for the 1997 removal by Dames & Moore. No evidence of remaining USTs was found during the geophysical survey north of the auto center and site inspection. Four borings were advanced around the former USTs and two were developed into monitoring wells. Boring depths ranged from 10 to 23 feet bgs and were sampled approximately every 5 feet, totaling 24 soil samples. Groundwater was encountered in one boring at 22 feet bgs. No groundwater samples were taken.

  Laboratory analysis results showed detections of TPH as diesel ranging from 1.5 mg/kg to 35 mg/kg, well below the San Francisco Bay Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESL) of 260 mg/kg. Methylene chloride, acetone, and 2-butanone were also detected at concentrations not exceeding their respective ESLs. MTBE, BTEX, and TPH-h were not detected in any samples. Sigma concluded that there is no evidence of any significant impacts to soil at this site. Their recommendations include the following:

  - Oil/sheen and surface staining was observed around the trench drain. Screening with a PID was recommended for any future soil disturbance in this area.
  - The monitoring wells should be sampled about 4 or 5 months after the submittal of this Phase II. If still dry at the time of sampling, submitting a request for case closure was recommended before the wells may be properly abandoned.
  - If the SRFD requires further sampling to reach below the layer of hard soil which caused refusal, Sigma recommended a survey of all wellheads to determine a gradient.

- Phase I ESA for Northgate Mall at 1000, 1500, 5010, 5800, 6000, and 9000 Northgate Dr, dated December 15, 2016, Prepared by TOR Environmental, Inc. (TOR) for Glaser Weil Fink Howard Avchen & Shapiro LLP (Glaser Weil) on behalf of Merlone Geier Partners (MGP). This report identified several RECs associated with the Sears department store, auto repair shop, and former appliance service facilities. TOR contacted SRFD to inquire about the Sears site status. The SRFD stated that they had no record of No Further Action designation and were no longer responsible for oversight of this investigation as an agency. TOR found that groundwater sump pumps were used to protect the Sears facility basement from flooding. A suspect UST found by GPR survey was located in the area south of the Sears Auto building and discussed further in the Limited Phase II Assessment conducted by TOR in 2017.

  TOR's final recommendations regarding the Sears facility included the following:

  - Conduct water sampling for the sump pumps in the Sears basement;
  - Investigate the subsurface at the former appliance service center hazardous waste storage area;
  - Investigate the subsurface at the department store elevator motor rooms, groundwater pumping rooms, and hazardous waste storage area;
  - Remove remaining 14 hydraulic lifts and conduct soil investigation;
  - Conduct a geophysical survey to locate possible USTs in the areas to the east, west, and south sides of the auto center;
  - Conduct sampling of the stained concrete slab in the battery storage room for metal impacts;
  - Conduct soil vapor sampling for the auto shop; and

- Investigate the subsurface below the new/waste oil storage area on the southwest side of the auto center.

- Passenger Elevator Jack Removal Assessment Summary for Sears, dated February 17, 2017, prepared by Amec Foster Wheeler Environment and Infrastructure (AFW) for Sears Holdings Management Corporation. AFW provided oversight for the removal of the Sears department store passenger elevator jack by Schindler Elevator Corporation and for soil sample drilling by KM McRae, Inc. The piston was removed on January 12, 2017 and reported to be in good condition. Groundwater was encountered at 15 feet bgs, later rising to 13.5 feet bgs in the open casing. The soil sample collected just above groundwater (13-14 feet bgs) had a slight petroleum odor. A sheen was observed on top of groundwater. Sediment was removed up to 20.2 feet bgs where a suspected concrete cap at the bottom of the casing was met. TPH-d was detected at 550 mg/kg which exceeds the 2019 Residential Soil ESL of 260 mg/kg. Phenanthrene was detected at 51 mg/kg and Chrysene at 27 mg/kg which exceed the respective 2019 Soil Leaching to Groundwater ESLs of 11 mg/kg and 2.2 mg/kg. AFW's conclusion was that TPH impacts were unlikely to have affected the subsurface outside of the casing, assuming the casing integrity was not compromised.

- Limited Phase II Soil, Soil Gas, and Groundwater Assessment for Sears at Northgate Mall, dated August 22, 2017, prepared by TOR for Glaser Weil. This investigation was conducted to address the RECs identified in the 2016 Phase I ESA by TOR. Encompass Inspections LLC, a private utility locator was able to identify a possible location of one or more USTs in the parking lot southeast of the Sears Auto Center building. The scope of work included advancing 13 borings in and around the Sears Auto Center near the hydraulic lifts, sunken work bay, oil storage area, suspected USTs, clarifier, and elevator. Three more borings were advanced near the Sears Department Store elevators, and one boring was advanced in the waste storage area of the former Sears Appliance Service Center. Groundwater samples were taken at two elevator borings. Two groundwater samples were collected from the existing monitoring wells installed by Sigma Engineering during their 2009 Phase II investigation. A concrete sample was taken from the Sears Auto Center battery storage area. Results of sampling are summarized below:
    - Soil:
        - TPH-d (273 mg/kg) was detected in soil at 10 feet bgs near a hydraulic lift, exceeding the Residential ESL of 260 mg/kg;
        - TPH-g, TPH-d, TPH as motor oil (TPH-o), and VOCs, including naphthalene, 1,2,4-trimethylbenzene, 1,3,5- trimethylbenzene, and total xylenes, were detected in soil near the suspected USTs but not exceeding ESLs;
        - TPH-d (560 mg/kg) and TPH-o (1,800 mg/kg) were detected in soil at the Sears department store passenger elevator (SB-Elev P1), with TPH-d exceeding its ESL;
        - Small concentrations of TPH were detected in soil near the clarifier but not exceeding ESLs;
        - No other VOCs were detected in the soil samples; and
        - Metals were detected in most soil samples and the concrete sample not exceeding ESLs and/or typical background concentrations.
    - Soil Vapor: PCE was detected in three soil vapor samples: near two hydraulic lifts and in the sunken work bay. PCE concentrations ranged from 130 ug/m^3 to 290 ug/m^3 in shallow soil vapor at three locations, exceeding the 2019 RWQCB Residential ESL for Vapor Intrusion Human Health Risk of 15 ug/m^3. However, no VOCs were detected in soil vapor samples collected at deeper depth and soil samples did not detect PCE or other chlorinated hydrocarbons.
    - Groundwater:
        - TPH-d was detected in groundwater at 100 ug/L near the former fueling area (West Well / MW 4);

- TPH-d (38,000 ug/L) and TPH-o (120,000 ug/L) were detected in groundwater at the Sears department store passenger elevator, on the east side of the building, with TPH-d exceeding its 2019 Gross Contamination ESL of 2,500 ug/L;
- TPH-d (140 ug/L) and TPH-o (590 ug/L) were detected in groundwater at the Sears department store north freight elevator; and
- No other VOCs were detected in the groundwater samples.

Further assessment and remediation were recommended by TOR for the Sear Auto Center in-ground clarifier, hydraulic lifts, sunken work bay, UST area, and Sears department store elevators.

- Subsurface Assessment Report for Sears Retail Store #1528, dated June 29, 2018, prepared by WEIS for Sears. This investigation was conducted to address environmental concerns identified in the 2017 Limited Phase II Assessment by TOR and is summarized below:

    - The records review conducted by WEIS did not produce any additional information on the history or presence of USTs at the site. The geophysical survey completed by WEIS did not identify anomalies characteristic of a UST. Two test borings were advanced to 6 feet bgs in the suspected tank area. No USTs were found through either boring;

    - Three borings were advanced in the Sears passenger elevator room, ranging from 3 feet to 4.5 feet below the basement floor level which is at approximately 15 feet bgs. Groundwater was encountered at a depth of 4.5 feet, or 19.5 feet bgs. Diesel range organics (DRO) and oil range organics (ORO) were detected in groundwater at 703 ug/L and 645 ug/L, respectively; and

    - WEIS concluded that the results of this investigation do not warrant further action because the DRO and ORO concentrations were well below the Gross Contamination ESLs of 2,500 ug/L and 50,000 ug/L, respectively and no USTs were identified in the geophysical survey or test borings.

- In an email exchange dated September 23, 2021, the User provided documentation of hydraulic lift decommissioning from Transform SR Holding Management LLC (Transform), which manages the former Sears' current business affairs. According to Transform, no report was generated for the decommissioning of the 14 former hydraulic lifts. The typical procedures for Sears Auto Group include pulling the pistons from the ground, pumping out as much hydraulic fluid as possible, filling the remaining cylinder with sand, and capping with concrete. Transform provided the invoice for the lift decommissioning, performed by Rotary Lift Vehicle Service Group, LLC, dated March 27, 2018.

6. Property Reconnaissance

Roux conducted Property reconnaissance on September 8, 2021, and September 13, 2021. The objective of the reconnaissance was to check for visual evidence of past or present use or storage of hazardous materials that could potentially affect the soil, groundwater quality, and soil vapor at the Property. Photographs taken during the Property reconnaissance are attached (Appendix G). Ms. May Mar, General Manager (key site representative), provided access to the Property for the reconnaissance. Ms. Mar stated that she has been working at the Property since January 2017. During the reconnaissance, Ms. Mar answered questions regarding the Property's history and use in person and via email. Information obtained from the interview with Ms. Mar corroborated information obtained elsewhere and is provided below.

None of the occupants were available for interviews. In addition, past owners/operators could not be contacted for interviews. This is considered as a data gap.

Photographs taken during the Property Reconnaissance are included in Appendix G.

The Property reconnaissance included the physical inspection of the following parcels:

175-060-40

- *9000 Northgate Drive*

  This parcel takes up the southern portion of the Property and is occupied by RH Outlet furniture store, two vacant buildings, and adjacent parking area. The vacant building on the southeastern corner of the Property is the former Sears Automotive Center. The RH Outlet building in the center of the parcel is connected to the main mall building and previously housed the Sears department store. Just west of the furniture store is the former Sears Appliance Service Center building.

  The former Sears Auto Center (Photograph 1, Appendix G) has several garage entrances and is surrounded by parking area. Manholes remain where the underground clarifier is believed to be (Photograph 2, App. G) and one monitoring well cap was observed in the parking lot to the north of the building. Outside the west wall of the building is an open room which was used as storage, potentially for oil products (Wood, 2018). Adjacent to that room is another small enclosure with tracks that may have been for a trash compactor. Entering from the east entrance, the building was composed of a front room (Photograph 3, App. G), several office-like rooms and bathrooms in the middle, and a large main room which once housed the auto repair operations (Photograph 4, App. G). Hosing and piping remain on the walls throughout the facility. Several items were left in the auto repair room, including a tire, washing machine, traffic signage, and a utility trailer carrying a tote and various other items. Minor staining can be seen under the trailer. The hydraulic lifts, documented in previous investigations appear to have been removed or abandoned in place. A circle of cement is visible where each lift used to be located. It is unknown if all components of the lifts were removed or not. An approximately 1-foot-wide trench drain runs the length of the auto repair room (Photograph 5, App. G), and a small drain is located under a sink at the northern wall. An open chute, angled toward the northern garage doors and leading up to a second floor was observed (App. G, Photo 8). A sunken workstation is located in the northwest corner of the shop building with some tools laying around it and a hose hanging from the ceiling (Photograph 6, App. G). There is a drain within the sunken area and unknown dried residue on the floor.

An out of order freight elevator is located in the southeastern corner of the auto shop area. The second floor, accessed by stairs, contained a locker room, bathroom, and large main storage room (App. G, Photo 7). Tracks for a possible trash compacter were located in the southwest corner. Openings to a crawl space were observed around the border of the main room but were not entered. A small room adjacent to the elevator contained related mechanical equipment, an empty plastic container, and stack of spill pads. Some staining was observed on the ground near the elevator machinery (App. G, Photo 9). A small outdoor space on the second floor contained air conditioning equipment.

The former Sears Appliance Service Center building had a roll-off container for solid waste staged outside the entrance in the parking lot. This interior of the building was in poor condition (App. G, Photo 10). A tunnel with a conveyor belt was observed, leading down to the basement of the former Sears/RH Outlet (App. G, Photo 12). A transformer and some water equipment were observed in another room (App. G, Photo 13). A courtyard takes up the west portion of the facility and is used for storing wood, furniture, paint, and various other items (App. G, Photo 11). Adjacent to the northside of the building is a ramp to a truck loading dock which connects to the basement of the former Sears building (App. G, Photo 14). A trash compactor was situated in the southeast corner. Some staining was observed in the loading zone and the two storm drains at the bottom of the ramp were overflowing with water.

RH Outlet occupies the first floor and some of the basement of the former Sears building. It consists of a home furniture show room and enclosed stock room taking up the southwestern portion of the first floor (App. G, Photo 15). The escalators in the center of the building are not used and blocked off. The basement consists of a main storage warehouse space with various smaller rooms around the perimeter (App. G, Photo 16). RH Outlet utilizes the area near the loading dock garage doors for storage of delivered goods. A break room and bathrooms are located near the north staircase. The northern freight elevator is barricaded, and evidence of a previous investigation boring was seen near the elevator door (App. G, Photo 17). Observed in the many mechanical rooms around the main warehouse space, were trash collectors/compactors/balers, transformers, blower, water chilling system, and other electrical equipment (App. G, Photo 22). The passenger elevator equipment room on the eastern wall had unknown liquid spilled on the floor and three buckets of unknown substance (App. G, Photo 18). An empty drum was observed in an adjacent room surrounded by several hoses (App. G, Photo 19). A room in the southeastern corner stored various cabinets, mattresses, and buckets of paint. An adjacent maintenance room was locked and not able to be inspected. Some staining was observed on the floor of a room along the southern wall and the adjacent elevator room had spill pads on the floor visibly soaked (App. G, Photo 20). Two empty drums and what appeared to be an open hole to the sewer were observed in a room in the northwestern corner (App. G, Photo 21).

The second floor of the former Sears was completely empty. It consisted of what used to be a main retail floor space with various dressing rooms and bathrooms (App. G, Photo 23). On the north side is a set of rooms which, according to signage, were used for a portrait studio, tax service, and watch/jewelry service. All the rooms were empty, and the portrait studio had no indications that photo development was performed onsite.

175-060-12

- *1000 Northgate Drive*

This parcel, located at the northeastern corner of the main mall building, is occupied by Macy's department store. This store contains three levels of retail shopping, including apparel, cosmetics, houseware, etc. (App. G, Photo 24). There is an escalator in the center and elevator on the southern side of the store. A back room, referred to as the "engineer's room" was located on the third floor and contained various machinery including a generator (App. G, Photo 25). Two cabinets were labeled as containing hazardous waste, reported to contain typical commercial products such as solvents and glues. Several hazardous material storage containers were observed in this room, including three small drums of Forane 11 refrigerant, four drums of red dyed diesel fuel, three small containers of unknown fuel, one large compressed-air container, and one drum of unknown material. A room on the fourth floor was accessed via a staircase and contained machinery related to the elevator. A loading dock is located on the southeast side adjacent to a parking lot entrance. Hazardous waste is stored in labeled containers inside the loading dock room (App. G, Photo 26). The hazardous waste includes everyday items like cosmetics and cleaning supplies. Just south of the loading dock is a wooden enclosure housing a non-PCB transformer (App. G, Photo 27).

175-060-61

- *6000 Northgate Drive*

This parcel is occupied by Home Goods department store which sells a variety of home décor, kitchenware, and other goods (App. G, Photo 28). In the back of the store is a stock room in which hazardous wastes are stored in labeled bins (App. G, Photo 29).

175-060-66

- *1500 Northgate Drive*

This parcel is occupied by Rite Aid pharmacy and drug store. The building contains a shopping area, pharmacy counter, employee break room, and back storage/stock room (App. G, Photo 30). Hazardous waste is stored in the back room (App. G, Photo 31). A pharmacy drive-thru runs on the south side of the building. Trash bins, shopping carts, a refrigerator, and display racks were observed in a trash enclosure north of the main building

175-060-59

- *5010 Northgate Drive*

This parcel is occupied by Kohl's department store. Kohl's stored hazardous materials, mostly consisting of typical commercial cleaning chemicals, in a back room on the second floor (App. G, Photo 32). A pad-mounted transformer and backup gas-powered generator in an enclosure were located within a landscaped area to the west of the building (App. G, Photo 33). A trash compactor is kept in the loading dock next to the south entrance (App. G, Photo 34).

175-060-67

- *5000 Northgate Drive*

This portion of the Property contains the three individual units adjacent to the Kohl's building. It is currently occupied by Panera Bread, Roadside BBQ, and former European Wax Center (vacant) (App. G, Photo 35). In the parking lot just north of Panera Bread is a covered trash enclosure containing several bins. The grass lawn between the Kohl's and main mall building was under construction and fenced off.

- *5800 Northgate Drive:* This portion of the mall includes many stores, restaurants, and vacant units. Units observed include the following:
    - Fingers and Toes, nail salon;
    - Verizon Wireless, mobile phone store;
    - Mi Pueblo, Mexican restaurant;
    - Panda Express, Chinese restaurant;
    - Peet's Coffee and Tea;
    - Chipotle, Mexican restaurant;
    - BJ's Restaurant and Brewhouse (App. G, Photo 37);
    - Northgate Beauty Salon and Nails;
    - Fantasy Jewels, jewelry shop and repair;
    - The Coliseum NV Soccer, athletic apparel store;
    - Blow Arc Dry Bar, salon;
    - Lid's, hat shop, small pad-mounted transformer in back room;
    - Gloria Jean's Coffees;
    - LensCrafters, eye care center with examination rooms and laboratory for eyewear repair (App. G, Photo 38);
    - Claire's, fashion accessories store;
    - Foot Locker, shoe store;
    - Vans, apparel and shoe store;
    - Spirit Halloween, seasonal pop-up Halloween supply store;
    - Shirtique, apparel store;
    - Salt Tree, apparel store;
    - Pacsun, apparel store;
    - GameStop, videogame store;
    - Wetzel's Pretzels, pretzel shop;
    - CellAccsy.com, phone accessory shop;
    - Sbarro, Italian restaurant;
    - MarinLink, non-profit organization office;
    - Electrical equipment rooms with transformers and adjacent trash/recycling storage areas north of the food court;
    - Vacant former food court restaurants, Suites FC4 and FC5, expected to be representative of other vacant food court restaurant units.

- Units not observed are considered data gaps and include the following:
    - San Rafael Public Library, closed during site reconnaissance;
    - Second floor office space, door locked during site reconnaissance;
    - Vacant former retail spaces, assumed to be consistent with example vacant unit at 5000 Northgate Drive.

These data gaps are not expected to change the conclusions of this Phase I ESA.

- *7000 Northgate Drive*

  The Century Theatres occupy the southern portion of the main mall bordering RH Outlet. There are two separate halves of the facility on either side of the main walkway through the mall. Each side consisted of concessions stand, bathrooms, and several movie theater screening rooms. A projection room is situated on the second floor above all the screening rooms and contains various types of electrical equipment. An employee breakroom is also located on the second floor. Cleaning products are stored on site (App. G, Photo 39).

- *Parking*

  Surface parking lots surround the buildings on the Property with a bike path running along Las Gallinas Avenue. There is minimal landscaping, mostly confined to the parking islands and medians.

  A two-level parking structure sits on the west side of the Property next to Century Theatres and Kohl's, which is connected on the second floor with a bridge walkway. On the ground level are several storage locations for hazardous waste. On the east side is an area for storing restaurant grease/oil waste. On the southwestern corner are sectioned enclosures: kitchen grease storage area containing three or 4 drums, a trashcan, and debris behind a locked wooden fence (App. G, Photo 43); trash enclosure with garbage littered on the floor; maintenance storage room with many small containers of paints and other everyday materials (App. G, Photo 44); and three locked gray doors for space reportedly allocated to the landscaping staff. These locked rooms are considered a data gap. A pile of garbage was observed on the ground between two of these enclosures. Near the ramp to the second floor was a large space for maintenance staff equipment, such as paint, cleaning supplies, tools, holiday décor, chairs, fencing, and a couple unmarked drums.

6.1 Utilities

Electrical is provided by PG&E. Water and sewer services are provided by Marin Municipal Water District.

6.2 Hazardous Substances

Roux observed hazardous materials stored on the Property. Kohl's, Macy's, and Northgate Mall's back-up generators were all gas powered with adjacent diesel fuel storage. Small containers of typical household cleaning products and other hazardous chemicals were observed in various units throughout the Property.

6.3 Polychlorinated Biphenyls

Electrical transformers were observed during the Property reconnaissance. Only one transformer, located at Macy's, had a visible "Non-PCB" label. However, the 1993 Phase I ESA by ATC reported that all transformers had been tested for PCBs and replaced as necessary by PG&E.

6.4 Staining and Stressed Vegetation

Typical minor staining was observed throughout the parking areas and truck loading zones. Staining was observed in the grease trap storage area, trash enclosure within the parking structure, RH Outlet basement elevator rooms, and Sears Auto Center. No stressed vegetation was observed.

6.5 Drains and Sumps

Storm drain catch basins were located throughout the parking and landscaping areas. Floor drains were observed in several bathrooms and kitchen spaces. One long trench drain was observed in the former Sears Auto Center. A hydrodynamic separator manhole was observed in the parking lot south of Home Goods. According to Ms. Mar, it is pumped out regularly by Storm Water Inspection and Maintenance Services (SWIMS) (App. G, Photo 41). An inspection report by SWIMS, dated June 29, 2021, was provided to Roux. An in-ground clarifier appears to remain in the parking lot outside the former Sears Auto Center.

6.6 Solid Waste

Trash and recycling services are provided to the Property by RWS Facility Services. Medical waste produced by LensCrafters is collected by their own vendor. A grease storage area was designated in an enclosure under the parking structure. Underground grease interceptors were observed in the sidewalk outside Mi Pueblo restaurant, Panda Express, and Chipotle. Roadside BBQ, Panera Bread, and food court restaurants use grease interceptors which require regular pumping by SRC Companies (App. G, Photo 36). Larger restaurants, such as BJ's Brewhouse and Chipotle, use their own vendors to collect and handle grease.

6.7 Wastewater

Sanitary sewer manholes were observed in parking areas.

6.8 Wells

No wells were identified on the Property.

6.9 Out-of-Scope Services

No out-of-scope services were provided.

7. Phase I ESA Conclusions and Recommendations

Roux Associates, Inc. (Roux) has performed a Phase I Environmental Site Assessment (ESA) for the Northgate Mall, located at 5800 Northgate Drive in San Rafael, California. This Phase I ESA was performed on behalf of MGP XI Northgate, LLC (User). Roux understands that the User plans to conduct a phased redevelopment of the Property, which will include the demolition of most of the existing retail space, construction of new retail space, and residential units. The Property is approximately 44.76 acres and currently occupied by a large mall building, five separate retail buildings, and associated parking lots.

The Property was undeveloped until the late 1960s when the first retail buildings were built. The mall continued to expand to match its current configuration by 2012. The following hazardous waste generating facilities are listed at the Property:

- Northgate Mall / Macerich Company at 5800 Northgate Drive,
- Express Store at 5800 Northgate Drive,
- Victoria's Secret at 5800 Northgate Drive,
- Walden Book Company at 5800 Northgate Drive,
- Service Management Systems at 5800 Northgate Drive,
- LensCrafters at 5800 Northgate Drive,
- Bath and Body Works at 5800 Northgate Drive,
- Macy's Northgate at 1000 Northgate Drive,
- Home Goods at 1500 Northgate Drive,
- Rite Aid / Payless Drug at 1500 Northgate Drive,
- LensCrafters at 3840 Northgate Drive,
- Kohl's / Mervyn's at 5010 Northgate Drive,
- KB Toys at 5025 Northgate Drive,
- The Picture People / Expressly Portraits Northgate Drive,
- Home Goods at 6000 Northgate Drive,
- Ritz Camera Centers at 7120 Northgate Drive,
- Sears Roebuck and Co. at 8108 Northgate Drive,
- Sears Roebuck and Co. at 9000 Northgate Drive, and
- Jiffy Lube at 9000 Northgate Drive.

This Phase I ESA was performed to identify RECs, CRECs, and/or HRECs at the Property, indicating past, current, or material threats of the release of hazardous materials or petroleum hydrocarbons to the Property's soil, groundwater, soil vapor, or surface water. This Phase I ESA was conducted by investigating past Property uses, reviewing the results of a search of environmental databases, reviewing records at relevant government agencies, and performing a reconnaissance of the Property and surrounding area.

One REC was identified at the Property:

- **The former Sears Auto Center at 9000 Northgate Drive**: In 2018, a total of 14 hydraulic lifts were decommissioned; however, investigations have found soil vapor concentrations exceeding the San Francisco Bay Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESLs) for total petroleum hydrocarbons (TPHs) and chlorinated volatile organic compounds (CVOCs). In addition, PCB concentrations above the RWQCB ESL were detected in the soil before the lift removal. Based on the soil and soil vapor sampling results, the impacts are limited in shallow soil in the former hydraulic lift and sunken work bay areas. Figure 3 shows the former hydraulic lift and sunken work bay areas.

There were no HRECs or CRECs identified at the Property.

The following environmental concerns were identified at the Property that do not rise to the level of a REC but are considered as business environmental risks (BERs). BERs are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate agencies; however, these conditions may have an environmentally driven impact on the business associated with the current or planned use of a parcel of commercial real estate. Roux identified the following BERs:

- TPH detections in the basement elevator rooms of the RH Outlet/former Sears department store. Figure 3 shows the location of the elevator rooms and the former Sears Auto Center;
- Lack of documentation regarding the removal of USTs at the former Sears Auto Center.

Based on the findings, Roux recommends the REC and BERs be further investigated during redevelopment after existing buildings are demolished.

A data gap is a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. The following data gaps were identified during the Phase I ESA.

- The city of San Rafael provided 1,437 public record files for the Property. Due to time constraints, Roux reviewed 219 out of 1,140 files for the address 5800 Northgate Drive;
- During site reconnaissance, only one vacant unit, a former European Wax Center was observed and is expected to be representative of all vacant units;
- None of the occupants were available for interviews;
- Past owners/operators could not be contacted for interviews;
- San Rafael Public Library was closed during reconnaissance;
- An office space on the second floor was locked during reconnaissance; and
- Three doors in the southwest corner of the parking structure were locked and couldn't be accessed during reconnaissance. They reportedly belong to landscaping staff.

These data gaps are not considered significant and are not expected to alter the conclusion of this Phase I ESA.

8. Report Assumptions and Limitations

The Phase I ESA described herein was conducted by Roux in accordance with ASTM Standard Practice E1527-13, which is consistent with the regulatory requirements for conducting all appropriate inquiries (40 CFR Part 312, Standards and Practices for All Appropriate Inquiries; Final Rule[16]). The preamble for the AAI Rule states:

> *In today's final rule, EPA is referencing the standards and practices developed by ASTM International and known as Standard E1527-05 (entitled "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process") and recognizing the E1527-05 standard as consistent with today's final rule. The Agency determined that this voluntary consensus standard is consistent with today's final rule and is compliant with the statutory criteria for all appropriate inquiries. Persons conducting all appropriate inquiries may use the procedures included in the ASTM E1527-05 standard to comply with today's final rule.*[17]

This AAI Rule was subsequently amended in 2013, as indicated in the following "Background":

> *With today's action, EPA is establishing that parties seeking liability relief under CERCLA's landowner liability protections, as well as recipients of brownfields grants for conducting site assessments, will be considered to have met the standards and practices for all appropriate inquiries, as set forth in the Brownfields Amendments to CERCLA and 40 CFR Part 312, if such parties follow the procedures provided in the ASTM E1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process." EPA made this determination based upon the Agency's finding that the ASTM E1527-13 standard is compliant with the All-Appropriate Inquiries Rule. Therefore, parties conducting all appropriate inquiries may use the procedures in the newly issued ASTM E1527-13 standard when conducting all appropriate inquiries.*[18]

It is Roux understanding that this Phase I ESA was requested by the User so that the User may qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). One of the requirements that a person acquiring real property must meet in order to qualify for one of these limitations on liability under CERCLA is to perform all appropriate inquiries in conformance with the AAI Rule (or the ASTM Standard Practice E1527-13) prior to acquisition of the property. The User has acknowledged that, under the AAI Rule, Roux performance of the Phase I ESA described herein will not alone result in the User satisfying all of the requirements of the AAI Rule and provide a defense to CERCLA liability. Further, the User has acknowledged that the AAI Rule requires that certain additional inquiries be undertaken to satisfy the CERCLA AAI requirements. **ACCORDINGLY, ROUX MAKES NO GUARANTEES OR WARRANTIES, EXPRESSED OR IMPLIED, REGARDING THIS PHASE I ESA, INCLUDING WITHOUT LIMITATION, ANY WARRANTY THAT THIS PHASE I ESA WILL IN FACT QUALIFY USER FOR A DEFENSE TO CERCLA LIABILITY.**

Roux has performed this Phase I ESA in a professional manner using that degree of skill and care exercised for similar projects under similar conditions by reputable and competent environmental consultants. Professional judgments expressed herein are based on the facts currently available to Roux.

[16] Final Rule and information available at www.epa.gov/swerosps/bf/regneg.htm#final_rule, and https://federalregister.gov/a/2013-31112.
[17] Federal Register: November 1, 2005 (Volume 70, Number 210), page 66081.
[18] Federal Register: December 30, 2013 (Volume 78, Number 250).

The AAI Rule requires, and the conclusions stated herein represent the application of a variety of engineering and technical disciplines to material facts and conditions associated with the Property. As such, these conclusions are based on subjective interpretations and the exercise of discretion. Many of these facts and conditions are subject to change over time. Accordingly, the conclusions must be considered within this context.

The User has agreed that Roux shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time the Phase I ESA was performed. To the extent practicable, Roux has identified data gaps, and has evaluated the potential significance of such data gaps.

It should be noted that Roux has not collected any samples on the Property and is relying on information presented by others, often in preliminary, draft, or verbal form. By referencing this information, Roux does not accept responsibility for the accuracy of the underlying data or documentation.

This Phase I ESA Report should not be considered a legal interpretation of existing environmental laws and regulations. The Phase I ESA was conducted with a reasonable degree of inquiry to identify RECs, but uncertainty is not eliminated. No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. The Phase I ESA process is intended to reduce, but not eliminate, the uncertainty involved with identifying RECs.

This Phase I ESA Report is not an appraisal or value judgment of the Property. The User has agreed that Roux shall not be liable for any use of the Phase I ESA Report as an appraisal or value judgment of the Property.

The Phase I ESA Report has been prepared for the exclusive use of the User for specific application to the Property. The User has agreed that any third-party use of this Phase I ESA Report is the User's sole responsibility and at the User's sole liability.

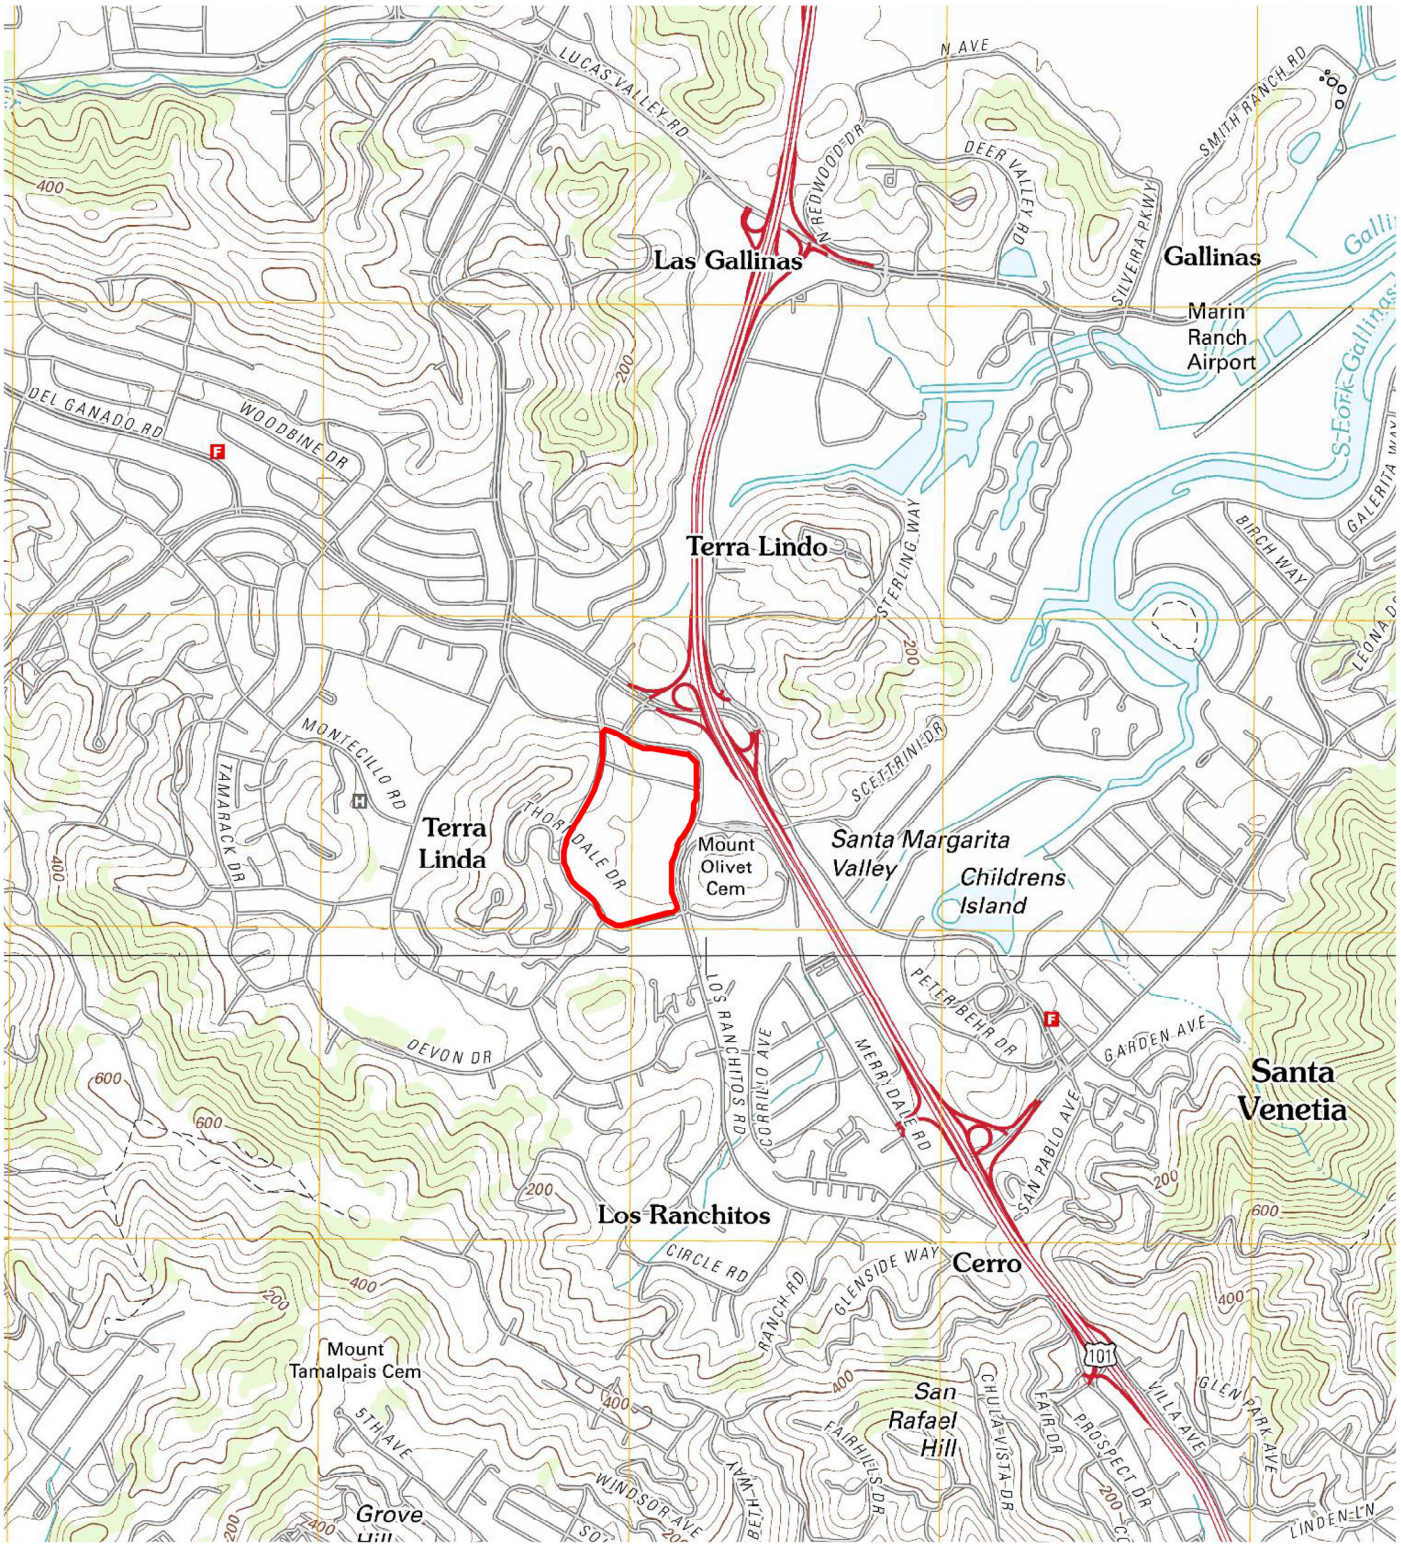
We declare that, to the best of my professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312; and,

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Respectfully submitted,

Emma Totsubo
Staff Engineer

Angela Liang Cutting, Ph.D., P.E.
Principal Engineer



Richard Maxwell
Principal Geologist/Office Manager

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 7 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State

Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 7 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 6 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 42 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 05/05/2021 has revealed that there are 12 FINDS sites within approximately 0.001 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 21 HAZNET sites within approximately 0.001 miles of the target property.

CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CERS list, as provided by EDR, and dated 04/19/2021 has revealed that there are 5 CERS sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Violation Date:	05-21-2018
Citation:	HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Description:	Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.
Violation Notes:	Returned to compliance on 06/22/2018. The business failed to document and maintain training records for a minimum of three years. Provide proof of documentation that employees have been trained on the hazardous materials business plan. Keep records onsite for three years, and annual refresher training is required and to be documented. Complete within 30 days.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

VICTORIAS SECRET STORE #1534 (Continued) **1024640314**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

TSD EPA ID: IDD073114654
CA Waste Code: 311 - Pharmaceutical waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.00150

Year: 2019
Gepaid: CA0001007533
TSD EPA ID: OKD000402396
CA Waste Code: 122 - Alkaline solution without metals pH >= 12.5
Disposal Method: H110 -
Tons: 0.00400

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

SEARS (Continued) **1000473150**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
