EXECUTIVE SUMMARY

Apex Companies, LLC (Apex) performed a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 731 West Cutting Blvd., Richmond, California, (Subject Property) on behalf of Duke Realty (Duke). The Subject Property is comprised of one parcel identified as Los Angeles County Assessor's Parcel Number (APN) 550-030-007-3 and encompasses approximately 7.92 acres.

The main Site buildings were developed as an air separation plant in the late 1950s, and the CO_2 plant was added in the late 1970s. The CO_2 plant ceased operation in February 2019. Truck washing operations ceased in 2016, and the garage and service department shop ceased operations at the end of June 2020.

Based on review of historical aerial photographs, the Site was first developed by 1946 with multiple rectangular structures. The Site was again vacant by 1958. The Site was redeveloped by 1963 for industrial/commercial purposes and contained multiple buildings in the same general configuration as present day. Use of the Site between 1946 and 1958 is unknown. Based on review of the city directories, the Site has been occupied by various industrial gas companies since 1960.

Apex performed this ESA in accordance with the proposal dated September 2, 2020 and the American Society and Testing Materials (ASTM) E1527-13 and the U.S. Environmental Protection Agency's Standards and Practices for All Appropriate Inquiries, 40 Code of Federal Regulations (CFR) 312. The findings, opinions and conclusions of this ESA are for the confidential and exclusive use of Duke, its affiliates, employees, agents, successors, and assigns. Reliance on this report for any use by parties other than specifically stated is prohibited without the express written consent of Apex and Duke, and such use is at the sole risk of the User. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report.

Upon review of the environmental records available on the Subject Property and the areas surrounding it, Apex identified the following:

Recognized Environmental Concern (REC): In 1960 two 10,000-gallon USTs were installed on the Subject Property. In 1988, one 10,000-gallon diesel UST was removed, and one 10,000-gallon diesel UST was replaced directly south of the main, helium building on the Subject Property. A leak was reported in 1988 during the UST removal and the replaced UST was eventually removed in 1993. A *Preliminary Subsurface Soil & Groundwater Assessment,* dated March 19, 1999, was conducted by EnviroSurvey to determine the extent of groundwater impacts (EnviroSurvey 1999). All groundwater samples had detections of TPHd that ranged from 130 µg/L to 1,300 µg/L. These detections are above the following current San Francisco Regional Water Quality Control Board environmental screening levels (SFRWQCB ESLs; SFRWQCB 2019): MCL priority (200 µg/L), Odor Nuisance Level (100 µg/L), and the Aquatic Habitat Goal for Saltwater Ecotox (640 µg/L). Due to the change in regulatory criteria since the initial investigation was conducted, Apex considers the results of this investigation as a REC in association with the Subject Property since the historic

analytical results are above the current ESLs, which have changed since the Subject Property received a No Further Action Letter in 1995.

Recognized Environmental Concern (REC): The building permits review showed the replacement and installation of a 10,000-gallon diesel AST as well as a new concrete foundation and anchoring system. Historical Aerials on Google Earth Pro showed the installation location to be in the northeast corner of the Subject Property. A previous Phase I ESA interview revealed that during the foundation replacement, petroleum-contaminated soil was discovered (HPC Antea Group 2017). The regulatory agency instructed them to excavate the soil and fill with clean material (HPC Antea Group 2017). No documentation was found on the severity, area of impact, and depth of the petroleum-contaminated soil. Due to the lack of documentation on the severity, area of impact, and depth of the petroleum-contaminated soil, Apex considers this a REC in association with the Subject Property.

Based on these Phase I ESA findings, if Duke Realty plans to redevelop this site, Apex has the following recommendations:

- A Phase II environmental site investigation that includes the collection of soil and soil vapor samples to determine whether impacted soils constitute a risk to future construction or trench workers handling soil in the upper 10 feet of soil, and to evaluate future vapor intrusion risks.

On September 21-24, 2020, eight soil borings (B-1 through B-8) were advanced across the Site property (**Figure 3**). Eight additional soil borings (B-9 through B-16) were also advanced across the Site on November 6th and 9th, 2020. A total of 33 soil samples were collected at various depths from the 16 borings and placed into laboratory supplied sample containers Groundwater samples were collected from nine of the 16 borings around the former UST area (**Figure 5**). Thirty-three soil samples were analyzed for VOCs and TPH-gasoline (TPHg) by EPA Method 8260B, TPH-diesel (TPHd) and TPH-motor oil (TPHmo) by EPA Method 8015, and/or metals by EPA Method 6010B/7471A. Additionally, 14 temporary soil vapor probes were installed at various depths and analyzed for VOCs using EPA Method TO-15.

Based upon a review of previous information available for the Site, and the data collected during the investigation, and given the proposed industrial/commercial use of the Site, Apex would not expect a regulatory agency to open a cleanup case.

While VOC concentrations in soil vapor are slightly elevated at many sampling locations across the Site, VOCs in soil vapor at concentrations greater than the recommended screening levels using a conservative attenuation factor of 0.005 were only detected at sample locations SV-4, SV-8 and SV9. Subsequent sampling at locations SV-4A and SV-4B did not confirm the elevated vinyl chloride concentrations detected at SV-4.

Sample locations SV-8 and SV-9 are located adjacent to numerous public utility easements. As the VOCs detected in soil vapor at sample locations SV-8 and SV-9 were not detected at elevated concentrations in soil in paired borings, it is presumed that the impacted vapors are migrating on Site within the utility backfill.

Based on the results presented herein, Apex has the following recommendations for this Site.

- Due to the low-level impacts found in soil and groundwater Apex recommends a Site Management Plan (SMP) be prepared prior to future earthwork. The SMP would outline precautionary steps to be taken to mitigate risks to future construction workers from identified chemicals during redevelopment and/or intrusive activities at the Site. Intrusive activities include soil grading, excavation, trenching and backfilling activities, and utility repair. An SMP would also cover groundwater management should redevelopment activities require dewatering or excavations below the water table.
- Due to the presence of VOCs in soil vapor beneath the Site, Apex recommends the installation of a vapor intrusion mitigation system beneath any future building constructed on the Subject Property.

TERMINOLOGY

This section contains definitions for technical terms used in the report. Italicized terms are defined in the American Society and Testing Materials (ASTM) Standard Practice E 1527-13 and provided below for easy reference.

Recognized Environmental Condition (REC): "The presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

Historical Recognized Environmental Condition (HREC): "A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a HREC, the environmental professional (EP) must determine whether the past release is a REC at the time the Phase I Environmental Site Assessment (ESA) is conducted (for example, if there has been a change in regulatory criteria). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC."

Controlled Recognized Environmental Condition (CREC): "A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by the regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the EP to be a CREC shall be listed in the findings section of the Phase I ESA report, and as a REC in the conclusions section of the Phase I ESA report."

De minimis condition: "A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs nor controlled recognized environmental conditions."

Business Environmental Risk: "A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations."

Data Gap: "A lack of or inability to obtain information required by this practice despite good faith efforts by the EP to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.)".

LIST OF ACRONYMS

AAI	All Appropriate Inquiries
AMSL	Above Mean Sea Level

UST	Underground Storage Tank
VOC	Volatile Organic Compound

1.0 INTRODUCTION

1.1 Purpose

Apex Companies, LLC has prepared this Phase I Environmental Site Assessment (ESA) at the request of the Duke Realty (Duke) to identify *recognized environmental conditions (RECs)* that may pose potential environmental risks associated with the Subject Property, located at 731 West Cutting Boulevard, Richmond, California.

1.2 Scope of Services

This ESA was conducted in good commercial and customary practice by utilizing the American Society and Testing Materials (ASTM) E1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the U.S. Environmental Protection Agency's (EPA) Standards and Practices for All Appropriate Inquiries (AAI), 40 Code of Federal Regulations (CFR), Part 312. The scope of services performed were in accordance with the proposal dated September 2, 2020 and included evaluation of the following:

- Environmental databases to determine the likelihood of current and historical releases of hazardous substances and petroleum through storage, treatment, and/or disposal on or near the Subject Property where migration could occur;
- Subject Property's history through prior reports on the GeoTracker database, interviews, historical aerial photographs, topographic maps, fire insurance maps, city directories, building permits, and the preliminary title report provided by the User;
- The Subject Property's current conditions by conducting an on-site survey of the Subject Property and visual evaluation of surrounding properties, and conducting interviews with representatives of regulatory agency(s), current property owner/operator, and/or consultants for owner/operator, and;
- Physical characteristics of the Subject Property including hydrologic and soil data through available environmental files from local agencies including the California Regional Water Quality Control Board, California Department of Toxic Substances Control, City of Richmond, Contra Costa County, and other appropriate agencies.

Any recognized environmental conditions (RECs), *historical RECs* (HREC) or *controlled RECs* (CREC), as defined by ASTM E1527-13, that were identified during the assessment are discussed in the findings and conclusions sections of this report.

1.3 Significant Assumptions

Apex has performed the historical and environmental record searches in accordance with current ASTM and industry practice. The data, findings, and conclusions presented in this ESA are based upon a detailed search, review, and analysis of the documents and interviews as well as observations made during the site reconnaissance. Conclusions reached regarding the conditions

of the Subject Property do not represent a warranty that all areas within the Subject Property are of a similar quality as may be inferred from observable conditions and available history of the Subject Property. As stated in the ASTM Standard, no ESA can wholly eliminate uncertainty regarding the potential for environmental liability in connection with the Subject Property. Apex's evaluation and analysis are intended to reduce, not eliminate, the potential for conditions that result in liability for the User of this ESA.

1.4 Limitations and Exceptions

This report was prepared as a result of a contractual agreement that defined the approach and scope of services to be employed during the course of the investigation. The opinions and conclusions expressed in this study have been based strictly on the results of these contracted services. The scope of this ESA is intended to aid in the evaluation of RECs. The services provided by Apex should not be construed as a warranty or guarantee that no RECs exist at the Subject Property or that all RECs have been uncovered. No conclusions are stated or implied concerning the suitability of the Subject Property for its eventual use. This document is not intended for purposes other than those expressly set forth herein or for use by parties other than for whom it has been prepared.

As outlined in the ASTM Standard for ESAs and Apex's scope of work, this project was non-intrusive in nature and did not include any sampling or testing of soils, groundwater, surface water, or other materials. Additionally, unless specifically described in this report, Apex's scope of work explicitly excluded issues that are outside the scope of ASTM E1527-13 which would constitute a business environmental risk as defined by ASTM. The ASTM Standard Practice E1527-13 recognizes, but not limited to, the following inherent limitations for this ESA:

- Uncertainty is Not Eliminated - No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs, and this practice recognizes reasonable limits of time and cost.
- Not Exhaustive - All Appropriate Inquiry does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained, or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions.
- Level of Inquiry Is Variable - Not every property will warrant the same level of assessment. Consistent with good commercial or customary practice, the appropriate level of environmental site assessment will be guided by the type of property, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.

In general, the EPA does not regulate indoor air quality except to the extent that indoor air impacts are caused by releases of hazardous substances into subsurface soil or groundwater (vapor intrusion). ASTM E1527-13 defines "migrate" and "migration" as referring to the movement of hazardous substances or petroleum products in any form, including solid and liquid at the surface or

subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in Guide E2600 – Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions; however, nothing in ASTM E1527-13 requires application of the Guide E2600 to achieve compliance with all appropriate inquiries.

An ESA completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction, is presumed to be valid. An ESA meeting or exceeding this practice and for which the information was collected or updated within one year prior to the date of the intended transaction, may be used provided that the following components of the ESA were conducted or updated within 180 days of the date of purchase or the date of the intended transaction:

- Interviews with owners, operators, and occupants;
- Searches for recorded environmental cleanup liens;
- Reviews of federal, tribal, state, and local government records;
- Visual inspections of the property and of adjoining properties, and;
- The declaration by the environmental professional responsible for the assessment or update.

1.5 Special Terms and Conditions

This project was performed in accordance with the scope of work, terms and conditions and limitations stated in the proposal dated September 2, 2020, and as stated in this report. There are no other special terms or conditions concerning this project.

1.6 User Reliance

This report documents the ESA of the Subject Property performed by Apex in accordance with the proposal and in accordance with ASTM E1527-13 and the U.S. EPA Standards and Practices for All Appropriate Inquiries, 40 CFR 312. The findings, opinions and conclusions of this Phase I ESA are for the confidential and exclusive use of Duke, its affiliates, employees, agents, successors, and assigns. Reliance on this report for any use by parties other than specifically stated is prohibited without the express written consent of Apex and Duke, and such use is at the sole risk of the user.

1.7 Data Gaps

Available historical information enabled Apex to identify the first developed use of the property and at approximately five-year intervals to the present, such that significant data gaps were not encountered.

2.0 SITE DESCRIPTION

2.1 Site Location and Ownership

The Subject Property is located south of Interstate 580 and east of Canal Blvd. in the City of Richmond, Contra Costa County, California (**Figure 1**). The Subject Property is approximately 7.9 acres and comprises one parcel identified as Contra Costa County Assessor's Parcel Number (APN) 550-030-007 (**Figure 2**). The Subject Property is addressed as 731 West Cutting Boulevard, Richmond, California. The Subject Property is currently owned by Messer, LLC.

2.2 Current Uses and Improvements of Subject Property

The Subject Property was recently used as a carbon dioxide (CO_2) manufacturing and helium transfilling operations facility. It is currently non-operational/vacant and the current improvements on the property include:

- A helium building with a machine shop, a non-operating nitrogen compressor (out of service for approximately 40 years), a partial second story used for storage, with attached shipping and receiving room, operations room, and storeroom;
- A covered CO_2 compressor area;
- A service department shop, garage, and wash slab;
- A distribution office with attached vacant building previously leased to Airgas for dry ice manufacturing;
- An engineering shed;
- Two storage sheds; and
- A railway spur and railway loading car area.

Based on interviews and Apex's review of information, the Subject Property was developed in the 1950's as an air separation plant for helium until the late 1970's when the CO_2 plant was added. The truck washing station ceased operations in 2016, the CO_2 plant ceased operations in February 2019, and the truck service garage and shop ceased operations in June 2020. The Site is paved with asphalt and concrete. Photographs taken during the Site Reconnaissance are included in **Appendix A** which show current uses and improvements of the Subject Property.

Based on review of historical aerial photographs, the Site was first developed by 1946 with multiple rectangular buildings, presumably used for the war effort in the 1940's. The Site was vacant by 1958. The Site was redeveloped by 1963 for industrial/commercial purposes and contained multiple buildings in the same general configuration as present day. Use of the Site between 1946 and 1958 is unknown. Based on review of the city directories, the Site has been occupied by various industrial gas companies since as early as 1976.

2.3 Current Land Uses of Adjoining and Surrounding Properties

The Site is located in a predominantly commercial and light industrial area in the southwestern portion of Richmond, Contra Costa County, California. The Subject Property is bounded by Interstate 580 to the north, National Distribution Center to the east, Cutting Boulevard followed by Point San Pablo Yacht Club to the south, and Canal Boulevard followed by a Chevron Gas Station, Marina Bay Inn and Suites, and SureStay Plus Hotel to the west (**Figure 3** and **Table 2-1**). Apex's visual and record review of adjoining and surrounding properties did not identify any current uses that are considered to be a REC with respect to the Subject Property.

TABLE 2-1: Adjacent and Surrounding Properties

Direction	Description
North	Interstate 580
East	National Distribution Center, 213 W. Cutting Blvd.
South	Fred Andersen Boat and Woodworks, 616 W. Cutting Blvd. Boat Ramp Street, Point San Pablo Yacht Club, 700 W. Cutting Blvd.
West	SureStay Plus Hotel by Best Western Point Richmond, 915 W. Cutting Blvd., Chevron Station, 901 W. Cutting Blvd.,

3.0 USER PROVIDED INFORMATION

This section summarizes the information provided by the User, Duke, for this Phase I ESA. A User Questionnaire was Duke to help retrieve the needed information and assist in gathering appropriate information that may help identify potential RECs on the property. A copy of the completed questionnaire is provided in **Appendix B**. Information provided is summarized in **Table 3-1** and elsewhere in this report.

TABLE 3-1: User Provided Information

Data Type	Information Provided
Environmental Liens, AUL, Title Records	The Subject Property does not have any Environmental Liens. The Subject Property does not have any Activity and Use Limitations (AULs). A Title Records search revealed FSFS LLC is the current owner.
Specialized User Knowledge	Duke Realty indicated they have no specialized knowledge pertaining to the Subject Property.
Commonly Known or Reasonably Ascertainable Information	Numerous reports related to the Subject Property were found San Francisco Bay Regional Water Quality Control Board and provided by Duke. The reports and documents related to historical release of chemicals in the subsurface. Several environmental investigations have occurred on the Subject Property, which are discussed in greater detail in Section 4.2.2.
Valuation Reduction for Environmental Issues	The User is responsible to perform the additional inquiries regarding purchase price to the fair market value of the Site.
Reason for Performing Phase I ESA	This Phase I ESA was performed at the request of Duke in anticipation of an acquisition involving the Subject Property, for the User to qualify for defenses to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability, and as part of Duke's Due Diligence for the acquisition loan requirements.
Other User Provided Information	Several environmental reports were provided to Apex by Duke Realty. No additional user information was provided regarding the Subject Property.

4.0 RECORDS REVIEW

This section summarizes all records obtained by Environmental Data Resources, Inc. (EDR) and reviewed by Apex to help identify RECs in connection with the Subject Property. The first section (Section 4.1) discusses the physical setting sources that will provide an understanding of the physical characteristics of the Subject Property and surrounding area. This important information will help determine likelihood of potential of contaminants migrating onto the Subject Property from surrounding properties with environmental contaminants. The next section (Section 4.2) reviews current and historical environmental records associated with the Subject Property and surrounding properties. Relevant listings will be discussed and reviewed for potential RECs. The section for historical use record review (Section 4.3) follows to develop a history of the previous uses of the Subject Property and surrounding area to help identify RECs from past uses followed by a findings section where identified RECs and information is summarized. The EDR Radius Map Report can be found in **Appendix C**.

4.1 Physical Setting Sources

Although the ASTM E1527-13 Standards only require a current U.S. Geological Survey (USGS) 7.5-Minute Topographic Map for analysis, that is not enough information to fully characterize the physical setting of the Subject Property. Apex utilized several sources to understand the physical properties of the Subject Property and surrounding area, as shown in **Table 4-1**. This information will determine the likelihood of hazardous substances and/or petroleum contaminants migrating from surrounding areas through the soil and groundwater onto the Subject Property. More importantly, it will also identify significant environmental record listings in the following sections that are upgradient of groundwater flow where the contaminants could migrate onto the Subject Property.

TABLE 4-1: Physical Setting Sources

Data Type	Data Source
Topography	2012 United States Geological Survey (USGS) 7.5-minute topographic map
Floodplain	Federal Emergency Management Agency (FEMA), Flood Insurance Rate Map
Wetlands	Fish and Wildlife Service (FWS) National Wetlands Inventory (http://www.fws.gov/wetlands/data/mapper.html)
Soils	United States Department of Agriculture (USDA) – Natural Resources Conservation Service (NRCS) Web Soil Survey (WSS) (http://websoilsurvey.nrcs.usda.gov/app/)
Geology	P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

4.1.1 Topography

The site is located near the northeast side of the San Francisco Bay in the City of Richmond. The Subject Property is approximately 100 feet above mean sea level.

4.1.2 Geology and Soils

The Subject Property is located on the east side and boarder of the San Francisco Bay. Bay Mud deposits and imported fill materials underlie the project site. The Site is overlain by unconsolidated sediments consisting of clays, silts, and sands, with a thickness ranging up to 1,000 feet or more. These sediments are semi-continuous throughout the Bay and are usually referred to as "Old Bay Mud." Younger, fine-grained alluvial and estuarine deposits (Young Bay Mud) overlay the Old Bay Mud. The younger, fine grained alluvium is typically a mixture of interbedded stiff clays, silts, gravel, and sands derived from the hills or deposited during the formation of the Bay. Differential settlement (settlement that occurs to a greater extent in one area than settling that would be observed in another area) results from variations in thickness of the unconsolidated materials. Relatively speaking, the Bay Muds and fill materials are geologically young and relatively noncompacted, which may lead to consolidation and differential settlement. The shoreline areas at the project site are susceptible to this differential settlement because of variations in thickness of Bay Mud and historical tidal flat deposits.

According to the United States Department of Agriculture Natural Resources Conservation Service's Web Soil Survey, the soil type on the Subject Property is classified as urban land (Ub) and a clay loam called CONEJO. This classification consists of areas that are filled with crushed rock or other material resistant to weathering. Such areas are usually adjacent to the Bay and are used for railroad yards and docks. Also included in the Urban classification are areas covered by blacktop material to reduce the hazard of fire after grading and shaping for industrial structures. Thickness of this fill material varies from 18 to 57 feet. The fill materials are highly variable, consisting of poorly sorted gravel, silt, sandy silt, sandy clay, and bedrock fragments. These fill materials have been placed over Bay Mud and marsh deposits in areas adjacent to the shoreline, which is the case for the Subject Property. The clay loam hydrologic group is Class C with slow infiltration rates, and more than 35 percent of the soil passes number 200 sieve for a clayey soil.

4.1.3 Hydrology and Hydrogeology

The Subject Property does not have surface bodies of water immediately within the property limits. The closest surface water is the San Francisco Bay located approximately 300 feet south of the Subject Property. The radius map included with the EDR Report (**Appendix C**) contains layers from the Federal Emergency Management Agency's (FEMA) Flood Insurance Rate Map (FIRM) and the Fish and Wildlife Service (FWS) National Wetlands Inventory Map. This figure demonstrates that the Subject Property is not located on a national or state wetland, but it is listed as being in a Special Flood Hazard Area (1%). Upon further investigation, FEMA labeled the Subject Property as a Special Flood Hazard Area where the elevation of surface water from a flood has a 1% chance of equaling or exceeding that level in any given year.

Groundwater is generally 4 to 6 feet-bgs and flows beneath the Subject Property is towards the south which was determined using several sources on the California Water Resources Control Board's GeoTracker Database.

4.2 Environmental Record Review

The purpose of the environmental record review is to identify any records that are currently or historically associated with the Subject Property or adjacent/surrounding properties. This information will help identify any RECs in connection with the Subject Property and whether the listed sites with environmental records have current or former releases of hazardous substances and/or petroleum products that may have the potential to migrate onto the Subject Property.

4.2.1 Standard and Additional Environmental Record Sources

Consistent with ASTM E1527-13, a search of federal, state, and tribal environmental record sources within the established minimum search distances was conducted for the Subject Property by EDR and provided to Apex for review. The records search is used to identify adjoining or surrounding properties within the minimum search distance that may have a REC, HREC, CREC, or a de minimis condition that may exist at the Subject Property in connection with the searched listing. Apex reviewed the listings provided in the EDR report and summarized significant listings below. A full list of databases searched for this review can be found in the EDR Radius Map report in **Appendix C**.

Environmental record sources required by the ASTM standard are listed below in **Table 4-2** along with the additional database sources that were searched and produced a record result. Pertinent findings from the record review are discussed at the end of this section while significant findings as they pertain to RECs are discussed in Section 4.4 and referenced in Section 8.0, Conclusions and Recommendations.

4.2.2 Subject Property Environmental Records Results

In the EDR report, the Subject Property is listed in 63 environmental databases shown above in **Table 4-2**. Important listings of the Subject Property in databases are summarized below from the EDR report as wells as from record reviews at relevant regulatory agencies. Documents pertaining to this historical release are available on GeoTracker, a database maintained and updated by the California State Water Resources Control Board. **Table 4-3** below provides a summary of the environmental actions that occurred on the Subject Property. Copies of relevant environmental documents pertaining to the Subject Property are presented in **Appendix D**.

4.2.2.1 Summary of EDR Database Listings

The Subject Property was listed in the following databases in the EDR Report for the presence of former USTs:

- Contra Costa County Site Database:
    - Messer LLC was listed in the UST site program.
- HIST UST
    - BOC Group-AirCo Industrial was listed with two 10,000-gallon diesel USTs installed in 1960 and one 10,000-gallon UST installed in 1984.
- SWEEPS UST
    - BOC Group-AirCo Industrial was listed with three 10,000-gallon diesel USTs and one 250-gallon waste oil UST. The 300-gallon used oil tank located in the vehicle maintenance pit is an AST and is further discussed in the UST section below where it was incorrectly labeled as a UST.
- LUST
    - Airgas is listed with the facility status as 'completed – case closed'.
- CORTESE
    - Lists the Site as a LUST cleanup site, with the cleanup status listed as 'completed – case closed'.
- RGA LUST
    - AirCo Carbon Dioxide listed from 1993 to 2012.

The Subject Property was listed in the following databases in the EDR Report for the presence of ASTs:

- CERS TANKS
    - Messer, LLC: Above ground petroleum storage.
- AST
    - AirGas Dry Ice Building. Unknown size and contents.
- CERS
    - Violation on 1/28/2020 for the hazardous waste oil tank, which is located in a below grade area in the maintenance garage. The tank can only be viewed from two sides. The tank is below grade and does not meet the requirements of an underground storage tank.

The Subject Property was flagged in the following databases indicating spills occurred on Site:

- CHMIRS (California Hazardous Materials Incident Report System)
    - Waste oil was spilled on 6/17/2006 at the dry ice plant. The release was ~50 gallons.
    - Anhydrous Ammonia was spilled on 9/16/2011. The release was caused by a leaking valve cover on a compressor.
- ERNS (Federal Emergency Response Notification System)
    - Anhydrous Ammonia was released to the atmosphere on 11/11/1999 (estimated 1,300 pounds) for greater than 5 days. The release came from a leaking valve discovered during routine inspection.
    - Anhydrous Ammonia was spilled on 10/13/2007. The release was caused by a blown head gasket on a compressor. Caller estimates 5 to 15 gallons of released material.
    - Anhydrous Ammonia (~5 gallons) was spilled on 11/29/2007. The release was caused by a pressure relief valve that went off during a normal operation plant shutdown.
    - Anhydrous Ammonia was spilled on 9/16/2011. The release was caused by a leaking valve cover on a compressor. Estimate unknown.
    - Ammonia was released to the atmosphere (estimated less than 100 pounds) due to leaking valve covers that shut the plant down on 10/28/2011.
    - Anhydrous Ammonia was spilled on 6/23/2013 (estimated less than 100 pounds). The caller stated a valve was opened too quickly, allowing too much pressure to rush into the tank, which resulted in a release. The sprinklers kicked on which would dissipate the material.
    - Ammonia was released to the atmosphere (estimated 116 pounds) due to a compressor packing leak that the monitor detected and shutdown the plant on 3/13/2015.
- CERS
    - Violation on 4/1/2019 for failure to maintain a complete copy of the Spill Prevention, Control, and Countermeasure (SPCC) Plan at the facility if the facility is normally attended at least four hours per day, or at the nearest field office if the facility is not so attended.
    - Violation on 1/28/2020 for multiple 55-gallon drums of used oil that were not labeled and not closed.

The Subject Property was flagged in the following databases indicating hazardous waste was generated on the Subject Property:

- RCRA-SQG (Small quantity generator)
    - Listed for waste oil, corrosive waste, solvents, arsenic, and lead. No violations noted.
- RCRA-LQG (Large quantity generator)
    - Listed for aqueous solutions <10% total organic residues, other inorganic solid waste, waste oil and mixed oil, unspecified oil-containing waste, liquids with arsenic >500 milligrams per liter (mg/L), corrosive waste, arsenic, and lead. Violations were noted on August 9, 1984 and January 5, 1993 for generators.
- TSCA
    - BOC-Richmond generates carbon dioxide with a production volume greater than 1 billion gallons of liquid and gas in 2006.
    - Linde LLC listed as generating 205,110,871 gallons of liquid carbon dioxide. No date.
- SSTS
    - BOC Gases listed for production of carbon dioxide between 1990 and 1992.
    - Linde, Inc. listed for production of carbon dioxide between 2007 and 2009.
- HAZNET
    - BOC Gases, listed from 2008 to 2009, with aqueous solution with total organic residues less than 10%, other inorganic solid waste, unspecified organic liquid mixture, other organic solids, and liquids with arsenic greater than or equal to (>/=) 500 mg/L.
    - Linde LLC, listed from 2010 to 2017, was listed with waste oil and mixed oil, aqueous solution with total organic residues less than 10%, unspecified oil-containing waste, other organic solids, off-specification, aged or surplus inorganics, alkaline solution without metals pH >/= 12.5, laboratory waste chemicals, waste oil and mixed oil and organic liquids with metals pH >/= 12.5, and unspecified aqueous solution.

The Subject Property was flagged in the following databases indicating surface water/stormwater is discharged from the Subject Property:

- WDS – Waste Discharge System
    - BOC Gases: Stated the facility is a Category C Complexity for facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or

dischargers having waste storage systems with land disposal such as dairy waste ponds.

- An oil/water separator was identified during the Site Reconnaissance, which drains into the municipal sanitary sewer & ceased operations in 2016 (Section 6.0)

- CIWQS
  - The Subject Property maintains a permit with the State of California Water Board which undergoes regular inspections and reporting, likely for the Stormwater Industrial Permit.
- NPDES
  - The Site maintains a Stormwater Pollution Prevention Plan and associated monitoring plan for compliance with the National Pollutant Discharge Elimination System (NDPES) General Permit for Storm Water Discharges Associated with Industrial Activities Order No. 2014-0057-DWQ with three discharge monitoring locations. The Site's primary Standard Industrial Classification (SIC) code is 2813 (facilities primarily engaged in manufacturing industrial gases).
    - The Site is currently in Level 2 status due to Numeric Action Levels (NAL) exceedances for aluminum, iron, and nitrite + nitrate (N+N) nitrogen, and total suspended solids (TSS).

4.2.2.2 nvironmental Documents Review

Apex used several databases to obtain information on the Subject Property in addition to the EDR Report. The California State Water Board's GeoTracker database was used to obtain information pertaining to the leaking UST flags listed above. **Table 4-3** below provides a summary of the environmental actions that occurred on the Subject Property. Copies of relevant environmental documents pertaining to the Subject Property are presented in **Appendix D**.

TABLE 4-3: Environmental Record Review of Subject Property at 731 West Cutting Blvd

Date	Issues Noted?	Environmental Record Information	Source
1960	No	Two 10,000-gallon USTs were installed on the Subject Property	HIST UST Database
1988	No	One 10,000-gallon UST was removed, and the other 10,000-gallon UST was replaced with a new UST	SFRWQCB 1995
1988	No	An Unauthorized Release of petroleum was filed with the State for LUSTs	UST Unauthorized Release (LEAK) / Contamination Site Report

TABLE 4-3: Environmental Record Review of Subject Property at 731 West Cutting Blvd			
Date	**Issues Noted?**	**Environmental Record Information**	**Source**
1993	No	Replaced 10,000-gallon UST was removed: All soil samples had no detections for total petroleum hydrocarbons as diesel (TPHd) (less than 10 milligrams per kilogram [mg/kg]) and xylenes (less than 0.009 mg/kg). The stockpiled soil was used to backfill the pit and the UST was properly disposed.	Underground Storage Tank Closure – AIRCO Gases Facility – Richmond, California (IT Corporation 1994)
1999	Yes	Additional Site Investigation Report to investigate groundwater by advancing five borings around the former UST: <u>Soil samples (no preservation for volatile organic compounds [VOCs]):</u> TPHd: 5.4 mg/kg to 13 mg/kg Benzene, toluene, ethylbenzene, and xylenes (collectively BTEX) and methyl tert butyl ether (MTBE): Non detect <u>Groundwater Samples</u>: TPHd: 130 micrograms per liter (µg/L) to 1,300 µg/L BTEX and MTBE: ND Groundwater TPHd Levels above current SFRWQCB ESLs for Aquatic Habitat Goal for Saltwater Ecotox (640 µg/L). Apex considers this a REC	Preliminary Subsurface Soil & Groundwater Assessment (EnviroSurvey 1999).
1995	No	Case Closure Letter states contamination is still present but does not pose a threat to groundwater, human health, or the environment.	2005 Closure Letter (SFRWQCB 2005)
2015	Yes	A building permit revealed a 10,000-gallon AST and the concrete foundation and anchoring were being replaced in the northeast corner of the Subject Property. An interview documented in a previous Phase I ESA revealed that during the foundation replacement, petroleum-contaminated soil was revealed. The regulator requested the excavation and disposal of the soil. No documentation was found on the severity, area of impact, and depth of the petroleum-contaminated soil. Apex considers this a REC.	Building Permits; Phase I ESA (HPC Antea Group 2017)
2017	Yes	On January 25 and January 26, 2017, sampling results reported levels of zinc at 1,800 ug/L and 2,800 ug/L in effluent stormwater. The subject property received a Notice of Violation (NOV) on February 21, 2017 for elevated levels of zinc concentrations in the wastewater; the City of Richmond's local limit for zinc is not to exceed 1,000 ug/L.	Phase I ESA (HPC Antea Group 2017)

4.2.2.2.1. Former Underground Storage Tanks (USTs)

Apex reviewed further information on GeoTracker and found in notes that on February 1987 the SFRWQCB stated the 250-gallon UST (listed in the SWEEPS UST database) is actually an above ground storage tank (AST), which falls under a different permit and the facility will receive a refund for only having two USTs on the property (SFRWQCB 1995). On May 2, 1988 the SFRWQCB was notified that one 10,000-gallon UST will be removed and the other 10,000-gallon UST will be replaced with a new one (SFRWQCB 1995). On May 11, 1988 the two, 10,000-gallon diesel and gas USTs were removed from the Subject Property and pipes were loose, but the tanks were in good condition (SFRWQCB 1995).

On July 19, 1988, an unauthorized UST leak report was filed which stated that 700 ppb of misc. hydrocarbons and 710 ppb of total petroleum hydrocarbons as gasoline (TPHg) was detected in groundwater after a monitoring well was installed at the request of the county in the middle of the excavation pit (SFRWQCB 1988b). According to the report, the 10,000-gallon gas UST was in operation for 29 years before being replaced with a new 10,000-gallon UST (SFRWQCB 1988b). The new/replaced 10,000-gallon diesel UST was then removed on November 3, 1993 and documented in a report by IT Corporation titled *Underground Storage Tank Closure – AIRCO Gases Facility – Richmond, California.* Two confirmation soil samples were collected from the bottom of the tank excavation at each end using a slide hammer and four excavated soil stockpile samples were collected and analyzed for TPHd by EPA Method 8015 and BTEX by EPA Method 8020 (IT Corporation 1994). All soil samples had no detections for TPHd (less than 10 mg/kg) and BTEX (less than 0.003 mg/kg and 0.009 mg/kg for total xylenes). The stockpiled soil was used to backfill the pit and the UST was properly disposed (IT Corporation 1994).

The SFRWQCB requested an additional investigation to ensure groundwater was not impacted. In February 1999, EnviroSurvey, Inc. conducted a site investigation which was documented in a report titled, *Preliminary Subsurface Soil & Groundwater Assessment,* dated March 19, 1999 (EnviroSurvey 1999). Five borings (B1 to B5) were advanced around the former UST area, as shown in **Figure 4**, for the collection of soil and groundwater samples. Soil samples were collected at 4 ft-bgs for borings B1, B2, and B4. Boring B3 was collected at 8 ft-bgs and B5 had no soil recovery. Samples were analyzed for TPHd by EPA Method 8015/5030 as well as MTBE and BTEX by EPA Method 8020. The tables below were included in the EnviroSurvey 1999 report, and show the results for soil and groundwater samples:

Table 1

Soil Samples Analytical Results – 2/25/99
Former UST Excavation Area
BOC Gases Facility-Richmond, California

DATE	SAMPLE No.	Sample Depth (ft)	TPH-diesel (ppm)	BENZENE (ppm)	TOLUENE (ppm)	ETHYL-BENZENE (ppm)	XYLENE (ppm)	MTBE (ppm)
2/25/99	B1-3.5'	4.0	6.1	ND	ND	ND	ND	ND
2/25/99	B2-3.5'	4.0	5.5	ND	ND	ND	ND	ND
2/25/99	B3-7.5'	8.0	13	ND	ND	ND	ND	ND
2/25/99	B4-4.0'	4.0	5.4	ND	ND	ND	ND	ND
2/25/99	B5	N/A	N/A	N/A	N/A	N/A	N/A	N/A

N/A Not Available (No soil recovery)
N/D Not detected above the laboratory detection limit (0.005 mg/kg)

Table 2

Groundwater Samples Analytical Results – 2/25/99
Former UST Excavation Area
BOC Gases Facility-Richmond, California

DATE	SAMPLE No.	DTW (ft)	TPH-diesel (ppb)	BENZENE (ppb)	TOLUENE (ppb)	ETHYL-BENZENE (ppb)	XYLENE (ppb)	MTBE (ppb)
2/25/99	B1-GW	1.65	450	ND	ND	ND	ND	ND
2/25/99	B2-GW	1.20	190	ND	ND	ND	ND	ND
2/25/99	B3-GW	4.0	1300	ND	ND	ND	ND	ND
2/25/99	B4-GW	1.55	130	ND	ND	ND	ND	ND
2/25/99	B5-GW	1.41	230	ND	ND	ND	ND	ND

ppm = parts per million
ppb = parts per billion
ND= Not detected above laboratory detection limit (5 ug/l)
TPH= Total petroleum hydrocarbons
MTBE= Methyl Tertiary Butyl Ether (MTBE)
DTW = Depth to water below the ground surface

TPHd was detected in all soil samples ranging from 5.4 mg/kg in B4 to 13 mg/kg in B3 and in all groundwater samples ranging from 130 µg/L to 1,300 µg/L in B3. All other analytes, BTEX and MTBE, were not detected and below 0.005 mg/kg for soil and 5 µg/L for groundwater. It is important to note that the soil samples were not preserved onsite since liners were cut, capped, and immediately stored in a cooler. BTEX and MTBE concentrations are considered biased low, as vapors may have escaped prior to analysis. All groundwater detections of TPHd are above the following current SFRWQCB ESLs (SFRWQCB 2019): MCL priority (200 µg/L), Odor Nuisance Level (100 µg/L), and the Aquatic Habitat Goal for Saltwater Ecotox (640 µg/L). On November 29, 2005, the SFRWQCB approved the Subject Property for case closure with a No Further Action Letter (SFRWQCB 2005). Due to the change in regulatory criteria since the above investigation was conducted, Apex considers the results of this investigation as a REC in association with the Subject Property since these results are above the current ESLs.

4.2.2.2.2. Wastewater Clarifiers

The Subject Property historically had two oil/water separators (OWS) on site. One was located in the former truck wash and the other was located south of the Airgas Dry Ice building near the compressor, as discovered in the former Phase I ESA interviews and confirmed in Building Permits Section. These clarifiers are discussed below and in further depth in the Building Permits Section (Section 4.3.5).

During the Site Reconnaissance (Section 6.0), Apex personnel found one oil/water separator (OWS) in the Truck Wash Bay on the western border of the Site. The influent to the 4-compartment OWS is connected to a drain in the truck wash bay. A private utility clearance was conducted by Apex on September 21, 2020 which showed a drain from the below-grade maintenance bay enters the third compartment of the OWS. The OWS drains towards the west border of the Site behind the building wall and flows south before it enters the municipal sanitary sewer.

Review of previous Phase I ESAs confirmed that the truck wash OWS received petroleum products and potentially hazardous materials during truck and floor washing activities (GHD 2020). It was believed this connection was capped according to this Phase I ESA (GHD 2020), however upon Apex's inspection of the outlet this does not appear to be true.

An interview included in a prior Phase I ESA revealed that a previous compressor and aboveground OWS were removed from an outside area south of the dry ice building (GHD 2020). The compressor and aboveground OWS were associated with Airgas operations. Significant staining was observed on concrete and asphalt, and Site personnel were aware of oil having pooled on concrete in the area when the compressor was removed, and Site personnel indicated that Safety Kleen cleaned the area after identification of pooled oil (GHD 2020). No documents related to the cleanup or removal of the compressor and aboveground OWS were found for Apex's review. The concrete and asphalt in the area appeared to be in fair condition, and there was no evidence of a release to the environment during Apex's Site Reconnaissance.

An interview in the 2017 Phase I ESA revealed the OWS was shut down and inactive since February 2017, as they had to shut down wastewater discharge to the city due to elevated zinc levels (HPC Antea Group 2017). On January 25 and January 26, 2017, sampling results reported levels of zinc at 1,800 micrograms per liter (ug/L) and 2,800 ug/L (HPC Antea Group 2017). Furthermore, the subject property received a Notice of Violation (NOV) on February 21, 2017 for elevated levels of zinc concentrations in the wastewater; the City of Richmond's local limit for zinc is not to exceed 1,000 ug/L. It is unknown if the aboveground OWS or the truck wash OWS had the high zinc levels.

At the time of the NOV, Linde stopped all discharge to the sanitary sewers and held wastewater in frac tanks on-site. Additionally, they stored process water from the cooling tower in frac tanks and disposed of the water via Safety Kleen. On July 7, 2017, the City of Richmond sent an email correspondence stating that Linde can commence discharging wastewater into the sewer (HPC Antea Group 2017). Pictures of these tanks are shown in Building Permit Section (Section 4.3.5).

A previous interview revealed the Subject Property used chlorinated solvents for cleaning parts which were stored in drums on site; however, they no longer use solvents for cleaning, and instead use soapy water to clean parts (HPC Antea Group 2017). No location of solvent storage was found.

Since the oil/water separators have been shut down, and considering that the proposed redevelopment plans would remove the separators, Apex does not consider the NOV a REC.

4.2.2.2.3. Excavation of Petroleum-Contaminated Soil in Northeast Corner of the Property

A Phase I ESA conducted by HPC Antea Group, dated November 21, 2017, revealed in an interview that Linde, LLC discovered soil that appeared to be contaminated with petroleum products (based on the soil color and odor) during a concrete foundation replacement in the back of the property (HPC Antea Group 2017). Linde was instructed by the regulatory agency to dig out the contaminated soil and replace with clean fill material (HPC Antea Group 2017). This is likely associated with the concrete foundation permits and new tank installation permits outlined in the Building Permits Section below (Section 4.3.5). Aerial photos from Google Earth Pro shows the 10,000-gallon AST tank present in April 2015, removed by May 2015, and replaced in October 2015.

April 2015

May 2015

October 2015

Due to the lack of documentation on the severity, area of impact, and depth of the petroleum-contaminated soil, Apex considers this a REC in association with the Subject Property.

4.2.2.2.4. The California Sportfishing Protection Association Intent to Sue

In a letter dated May 21, 2020, the California Sporting Protection Association (CSPA) notified Messer LLC that they intend to sue based on the unlawful discharge of pollutants from the Facility into the Bay waters (ATA 2020). Messer, LLC had a general stormwater permit from 1997 to 2015 and from

2015 to 2019. During the 2015 permit, Messer had several violations for exceedances in aluminum, iron, zinc, total suspended solids, and nitrogen. Furthermore the letter stated Messer failed to implement minimum BMPs to reduce runoff, develop and implement an adequate stormwater plan, develop, implement, and/or revise an adequate monitoring and reporting program, and comply with storm water permit's reporting requirements (ATA 2020). Since this lawsuit is between Messer LLC and CSPA, Apex does not consider the suit a REC.

4.2.3 Adjacent and Surrounding Properties Environmental Record Result

There are several listings in the EDR report for off-site facilities within the applicable ASTM search radii. Several of these listings (i.e., small quantity hazardous waste generators, registered and historical USTs, solid waste disposal sites, permitted hazardous waste facilities), by themselves, are not necessarily indicative of a contamination concern and, therefore, are not discussed herein and were not further evaluated for purposes of this assessment. A number of facilities appear on databases indicating potential contamination concerns (e.g., ENVIROSTOR, LUST; Spills, Leaks, Investigation, and Cleanup [SLIC]). Of the sites representing a potential environmental concern, Apex has discussed below only 1) facilities that are located adjoining to the site; and 2) facilities that are located potentially upgradient of the site and have not been issued regulatory closure for all listings of concern.

Chevron Station #90103: Located cross-gradient of the Subject Property, the Chevron Station at 901 West Cutting Boulevard is across Canal Boulevard to the east. Chevron Station #90103 was identified in the EDR HIST AUTO, CERS TANKS, RCRA-SQG, SWEEPS UST, HIST UST, UST, and RCRA-LQG. The EDR HIST AUTO databased listed the property as operating as a gasoline service station from 1972 to 2014. The CERS TANKS database listed the CERS description as underground storage tank. The RCRA-SQG database listed wastes aqueous solution with 10% total organic residues, ignitable waste, lead, benzene, and tetrachloroethylene in 2000, 2002 and 2004. The RCRA-LQG database listed wastes for aqueous solution with <10% total organic residues, other organic solids, ignitable waste, and benzene in 2004 and 2016. The facility generated 2640 pounds of ignitable waste and 3,321 pounds of benzene.

The Site was listed in the CERS database for the following violations:

- 2/2014: Haz Waste Generator Program – AST storage
- 3/2017: UST Program – Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
- 2/2018: UST Program – Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.

The SWEEPS UST database listed four 10,000-gallon USTs, each containing unleaded gasoline and one diesel with active dates listed as December 13, 1993. The HIST UST database lists four 10,000-gallon USTs installed in 1984. The UST database did not list any pertinent details. This address was listed in the California GeoTracker website as Leaking UST (LUST) Cleanup Site.

According to the California GeoTracker website, a gasoline leak was reported in 1990 and the cleanup status was listed as completed as of February 26, 1997. This property is located west of the Site, west of Canal Boulevard and is considered cross-gradient of the Site relative to the assumed groundwater flow direction. Since there is no evidence of a current release, the historic release has been closed, and this property is located cross-gradient of the Site with respect to groundwater flow direction, impact to the Subject Property from petroleum products and hazardous substances is unlikely.

Former Ford Motor Company (currently Bay Area Beverage Company)*:* Located at 700 National Boulevard, was listed the RCRA-SQG database. The RCRASQG database did not list any waste types and no violations were noted. The listing in the RCRA-SQG database is not indicative of a release. The site address was not listed on the California GeoTracker website. This property is located north of the Site, north of Interstate-580 and is considered upgradient of the Site relative to the assumed groundwater flow direction. Based on available information, adverse impact to the Subject Property from this adjoining property is not expected.

4.2.4 Environmental Liens Search

Environmental liens and Activity/Use Limitations (AULs) can commonly be found within recorded land title records (e.g., County Recorder/Registry of Deeds). The types of title reports that may disclose environmental liens and AULs include Preliminary Title Reports, Title Commitments, Condition of Title, and Title Abstracts. Chain-of-title reports will not normally disclose environmental liens or AULs. Environmental liens and AULs that are imposed by judicial authorities may be recorded or filed in judicial records only. An environmental lien report was obtained from EDR for review. No environmental liens or AULs are associated with the Subject Property. A copy of the Environmental Lien and AUL Search Report is included in **Appendix E**.

4.3 Historical Use Records

Apex reviewed reasonably ascertainable records documenting the history of the use and/or ownership of the Subject Property and adjoining/surrounding properties. **Table 4-4** below summaries this historical use information. Further significant details of displayed uses in **Table 4-4** are summarized in this section by the source of which the information was obtained.

The Subject Property was developed in 1960. Since its initial construction, the Subject Property was used as a gas manufacturing plant for helium and carbon dioxide from 1960 to 2020. Dry ice was also manufactured from 1982 to 2020. Historical businesses that occupied the buildings on the Subject Property include Air Reduction Pacific Co., AirCo Industrial Gases, NorCal Dry Ice, BOC Gases, Airgas Dry Ice, Linde LLC, and Messer, LLC. Currently the Subject Property is unoccupied, having received facility closure status in Summer/Fall of 2020.

TABLE 4-4: Historical Use Summary			
Period	**Historical Uses**		**Source**
	Subject Property	**Surrounding Properties**	
1895 – 1939	Vacant Land	Vacant Land	Aerial Photographs Topographic Maps

4.3.1 Aerial Photographs

Digital aerial photographs dated 1939, 1946, 1958, 1963, 1968, 1974, 1982, 1993, 1998, 2005, 2009, 2012, and 2016 provided by EDR were reviewed by Apex. Aerial photographs are used as visual tools to better understand the timeline and spatial extent of the development of the Subject Property as well as that of the surrounding area. Copies of the aerial photographs can be found in **Appendix F**.

The Subject Property was vacant in the 1939 aerial photograph. Several rectangular structures are observed on the property and surrounding properties in 1946 along with a railroad spur to the northeast indicating commercial development. These structures were not present on the Subject Property and surrounding property in the 1958 photograph; however, the quality of the photo makes it difficult to identify any new structures.

The 1963 photograph shows five structures developed on the property. Similar to present day, the maintenance garages on the southwest corner of the property are present as well as the dry ice building in the south center of the property. Ancillary structures, including one large, round, vertical AST, one large horizontal AST, and three smaller vertical cylindrical tanks were observed along the north border of the Subject Property. Transport trailers were observed south of the large round AST. A small shed is located on the northeast corner of the property near the smaller ASTs. The same building configuration is present in the 1968 photograph with the main large building present in the north center of the property, similar to present day, and an additional structure east of the dry ice building. The surrounding properties are undeveloped with one commercial/industrial building to the east and a new road to the north.

In the 1974 photograph a large rectangular concrete surface is observed south of the main building, similar to the former UST area. The large storage shed is present on the north side of the property. The surrounding properties have industrial/commercial development to the east and commercial development to the west, while the north boarder remains vacant land. In 1982 photograph reveals the compressor building is present in the north center of the property and the presence of eight large ASTs on the east border, similar to present day.

The 1993 photograph shows property similar to the 1982 photograph except the large, horizontal cylindrical AST observed north of the main on-site building was no longer present. Additional outdoor storage is present west of the six large ASTs along with two railcars north of the large ASTs, suggesting the railroad on the northeast corner of the property was used. The 1998 photograph is similar to 1993.

The 2005 photograph is similar to 1998 except the two small vertical cylindrical tanks north of the large on-Site building were no longer present. Photographs from 2005 to 2016 are similar with no obvious changes.

4.3.2 Topographic Maps

EDR provided historic topographic maps with coverage of the Subject Property dated 1895, 1899, 1915, 1947, 1948/1949, 1959, 1968, 1973, 1980, 1995, 1996, and 2012 which were reviewed by Apex. Since historical topographic maps depict land features that are not always apparent in photographs, topographic maps are useful in documenting the history of developments and land use features, particularly those in rural and unincorporated areas. The topographic maps show the Subject Property as vacant by not showing structures on the Subject Property until 1973. Copies of these maps are included in **Appendix G**.

4.3.3 City Directories

EDR provided historic city directories for the years 1960, 1992, 1995, 2000, 2005, 2010, 2014, and 2017. **Table 4-3** summarizes EDR's findings by street number. Historical city directories, listed by street address, are useful in documenting the historical occupancy of properties in urban or otherwise incorporated areas that have a significant history of developed commercial use. The EDR Results did not list the Subject Property except in 1960. This is likely because the street name changed to West Cutting Boulevard. Apex reviewed and included the cities directories from a previous Phase I ESA and included them in the table below (GHD 2020). A copy of the City Directories Results is included as **Appendix H**.

Table 4-5: Historical City Directory Listings of the Subject Property

Date	Address	Use	Listing in EDR Report (all listings from GHD 2020)
1960	731 Cutting Boulevard	Industrial	Air Reduction Pacific Co.
1976			AirCo Industrial Gases

Table 4-5: Historical City Directory Listings of the Subject Property			
Date	**Address**	**Use**	**Listing in EDR Report (all listings from GHD 2020)**
1980			AirCo C&E Division
1987			NorCal Dry Ice
1992		Industrial	NorCal Dry Ice
1995		Industrial	AirCo Industrial Gases
2000		Industrial	AirCo Industrial Gases BOC Gases NorCal Dry Ice
2005		Industrial	Airgas Dry Ice BOC Gases BOC Group Inc. A Delaware Corp.
2010		Industrial	AirCo Industrial Gases Airgas Dry Ice Linde LLC
2014		Industrial	AirCo Industrial Gases Airgas Dry Ice BOC Gases
2017		Industrial	BOC Gases
2020		Industrial	Messer, LLC

4.3.4 Fire Insurance Maps

EDR provided fire insurance maps associated with the Subject Property for the years 1930, 1950, and 1970, however the property was not mapped. The certified Sanborn search results are included in **Appendix I**.

4.3.5 Building Permit Records

Building permit records can be used to identify structures and/or features of previous or current properties on the Subject Property and adjacent/surrounding properties. This information can be used to determine potential environmental concerns through the presence of USTs, sump pumps, septic tanks and connection dates to sewer, electrical, water, and natural gas. The EDR report found permits for the years 2001, 2006, 2008, 2014, 2015, 2017, and 2019. A copy of the building permits report is included as **Appendix J**.

TABLE 4-6: Summary of Significant Building Permits			
Date	**Permit Type**	**Permit Description**	**Location**
9/4/2014	BLD Industrial: New Equipment	Installation of a 13,000-gallon Diffusions tank on new concrete	Between Compressor Building and northwest side of large ASTs on east side of property

TABLE 4-6: Summary of Significant Building Permits			
Date	**Permit Type**	**Permit Description**	**Location**
10/29/2014	BLD Industrial: New Equipment	Install new 10,000-gallon AST w/Leak	Between Compressor Building and northwest side of large ASTs on east side of property
11/26/2014	BLD Industrial: Remodel/ Repair	Foundation and anchorage for future 10,000-gallon Diesel Tank	Between Compressor Building and northwest side of large ASTs on east side of property
8/13/2015	BLD Industrial: Remodel/ Repair	Foundation and anchorage for 10,000-gallon Diesel Tank	Between Compressor Building and northwest side of large ASTs on east side of property
8/13/2015	BLD Industrial: New Equipment	Installation of a 13,000-gallon diffusion tank on concrete	Unknown
1/3/2017	Linde Inc	Pretreatment Program: Class III – Miscellaneous MFG	Truck Wash Bay Area
1/3/2017	AirGas	Pretreatment Program: Class III – Drugs Manufacturing	South side of Airgas Dry Ice Building near compressor

A Phase I ESA conducted by HPC Antea Group, dated November 21, 2017, revealed in an interview that Linde, LLC discovered soil that appeared to be contaminated with petroleum products (based on the soil color and odor) during a concrete foundation replacement in the back of the property (HPC Antea Group 2017) Linde was instructed by the regulatory agency to dig out the contaminated soil and replace with clean fill material (HPC Antea Group 2017). This is likely associated with the concrete foundation permits and new tank installation.

Two Class III permits associated with the Pretreatment Program were found in 2017 for the Subject Property. One permit is likely associated with the oil/water separator (OWS) located in the Truck Wash Bay near the maintenance garage while the other is likely associated with the aboveground OWS located in the outside area south of the Airgas Dry Ice operations building (GHD 2020). As described in Section 4.2.2.2.2, a former interview revealed the OWS was inactive since February 2017, as they had to shut down wastewater discharge to the city due to elevated zinc levels (HPC 2017). It is unknown if the high zinc levels originated from the aboveground OWS or the truck wash OWS.

On January 25 and January 26, 2017, sampling results reported levels of zinc at 1,800 micrograms per liter (ug/L) and 2,800 ug/L (HPC Antea Group 2017). Furthermore, the subject property received a Notice of Violation (NOV) on February 21, 2017 for elevated levels of zinc concentrations in the

wastewater; the City of Richmond's local limit for zinc is not to exceed 1,000 ug/L. It is unknown if the aboveground OWS or the truck wash OWS had the high zinc levels. At the time of the NOV, Linde stopped all discharge to the sanitary sewers and held wastewater in frac tanks on-site. Additionally, they stored process water from the cooling tower in frac tanks and disposed of the water via Safety Kleen. On July 7, 2017, the City of Richmond sent an email correspondence stating that Linde can commence discharging wastewater into the sewer (HPC Antea Group 2017).

Aerial photographs from Google Earth Pro showed the frac tanks were placed on the Subject Property between March 2017 and May 2017. The tank was removed between July 2019 and April 2020.

\In conclusion, Apex finds the permits associated with the 10,000-gallon AST, associated aerial photographs of the replacement, and the undocumented excavation of petroleum-contaminated soil as a REC, as stated in Section 4.2.2.3.

4.4 Record Review Findings

Apex reviewed the available environmental and historical records for the Subject Property according to ASTM E1527-13 Standards. The Subject Property was developed in 1960. Since its initial construction, the Subject Property was industrial for gas manufacturing for carbon dioxide, helium, and dry ice.

After Apex's environmental and historic record review, the following findings were identified:

Recognized Environmental Concern (REC): In 1960 two 10,000-gallon USTs were installed on the Subject Property. In 1988, one 10,000-gallon diesel UST was removed, and one 10,000-gallon diesel UST was replaced directly south of the main, helium building on the Subject Property. A leak was reported in 1988 during the UST removal and the replaced UST was eventually removed in 1993. A *Preliminary Subsurface Soil & Groundwater Assessment,* dated March 19, 1999, was conducted by EnviroSurvey to determine the extent of groundwater impacts (EnviroSurvey 1999). All groundwater samples had detections of TPHd that ranged from 130 µg/L to 1,300 µg/L. These detections are above the following current SFRWQCB ESLs (SFRWQCB 2019): MCL priority (200 µg/L), Odor Nuisance Level (100 µg/L), and the Aquatic Habitat Goal for Saltwater Ecotox (640 µg/L). Due to the change in regulatory criteria since the initial investigation was conducted, Apex considers the results of this investigation as a REC in association with the Subject Property since these results are above the current ESL, which have changed since the Subject Property received a No Further Action Letter in 1995.

Recognized Environmental Concern (REC): The building permits review showed the replacement and installation of a 10,000-gallon diesel AST as well as a new concrete foundation and anchoring system. Historical Aerials on Google Earth Pro showed the installation location to be in the northeast corner of the Subject Property. A previous Phase I ESA interview revealed that during the foundation replacement, petroleum-contaminated soil was discovered (HPC Antea Group 2017). The regulator agency instructed them to excavate the soil and fill with clean material (HPC Antea Group 2017). No documentation was found on the severity, area of impact, and depth of the petroleum-contaminated

soil. Due to the lack of documentation on the severity, area of impact, and depth of the petroleum-contaminated soil, Apex considers this a REC in association with the Subject Property.

5.0 SITE RECONNAISSANCE

The Subject Property was inspected on September 21, 2020 by Apex representative Katelyn Lazar, a qualified environmental professional. Weather conditions at the time of the inspection were clear and temperatures of approximately 78 degrees Fahrenheit. Site reconnaissance consisted of a walk-through of the Subject Property which was entirely accessible except for the air separation unit in the main building, which had steel plates with oil and grease stains. Detailed information on the Site Reconnaissance can be found in **Appendix A,** which contains photographs taken during the site walk and the field form used with detailed information on what was observed on the Subject Property. This section summarizes significant findings of the site inspection of the Subject Property.

At the time of the site reconnaissance, the Subject Property was not in use. The facility stopped operations in summer of 2020 and Messer LLC was removing equipment out the facility. Since construction in 1960, the facility was a gas manufacturing facility until 2020 creating carbon dioxide, helium, and dry ice.

Utilities on the Subject Property included potable water provided by the City of Richmond, electricity provided by PG&E, and wastewater discharge is connected to the City of Richmond municipal sanitary sewer system. No septic systems are or were historically present on the Subject Property. No water supply, oil/gas, irrigation, monitoring, or dry wells are currently or were historically present on the Subject Property.

5.1 Waste Generation, Storage, and Disposal

The Subject Property is not active and decommissioning at the time the Site Reconnaissance was performed. Republic services removed recyclables and general waste from dumpsters on site and Safety Kleen removed scrap metal from the property. No hazardous waste was observed on the Site at the time of the Site Reconnaissance.

5.2 Underground Storage Tanks & Aboveground Storage Tanks

A pad was observed south of the main building once stored two 10,000-gallon diesel USTs that were installed in 1960. Detailed in Section 4.2.2.2.1, these USTs were removed in 1988 and a leak was discovered. A new 10,000-gallon UST was installed in their place which was removed in 1993.

Apex identified several ASTs across the Subject Property that were still present as Messer, LLC was decommissioning the facility. The following ASTs were documented during the Site Reconnaissance:

- One diesel tank with 10,000-gallon capacity on concrete pad east of the compressor and northeast border of the property.
- Eight liquid CO2 tanks with 500-ton capacity along the eastern property boundary

- One bulk motor oil tank with 275-gallon capacity inside the maintenance garage in a secondary containment
- One empty, round tank with 267,000-gallon capacity on the northwest corner of the property
- Five helium tanks with estimated 1,000-gallons inside the main helium building

5.3 Hazardous Substances and Petroleum Products

During the Site Reconnaissance, Apex did not observe hazardous substances. Petroleum oil was observed in the engineering shed in 55-gallon drums.

5.4 Polychlorinated Biphenyls (PCBs) and Oil-Containing Equipment

Polychlorinated biphenyls (PCBs) are known to be a component in fluids used in electrical and hydraulic equipment, lubricating oils, paints and coatings manufactured prior to 1979. In the event of a leak or release of fluid or oil-containing equipment, the owner is responsible for remediation.

Apex observed four transformers north of the compressor building with labels stating, “contains oil with less than 1PPM of PCB’s when manufactured.” No staining or evidence of any leakage of dielectric fluid was observed in the vicinity of the transformers at the time of the Site Reconnaissance. Hydraulic load levelers associated with the loading docks were also observed.

5.5 Other Observations

The facility had one clarifier in the truck wash bay. Manholes were removed and no evidence of oil-containing water was observed. An additional above ground clarifier was previously near the compressor south of the Airgas Dry Ice building; however, this was removed prior to the Site Reconnaissance. Staining was observed on steel plates surrounding the air separation unit in the helium building. Apex was unable to lift the steel plates around the unit as it was blocked off.

5.6 Findings from the Site Reconnaissance

Apex identified the following issues as de minimis conditions associated with the Subject Property:

- Staining on the steel plates around the air separation unit in the helium building.
- Clarifier was observed in the truck wash bay

6.0 INTERVIEWS

On September 16, 2020, Apex interviewed the Mr. Daniel Obazee, the Site supervisor for Messer, LLC, regarding the history and current operations of the Site. Mr. Obazee stated that all the information regarding environmental conditions at the Subject Property are presented in the site reconnaissance visit as presented in Section 5.0.

7.0 CONDITIONS OUTSIDE THE SCOPE OF ASTM E1527-13

According to the ASTM E1527-13 Standards, Duke Realty may conduct additional investigations to assess the other environmental conditions in connection with the commercial real estate. At the request of Duke, Apex conducted an additional investigation at the Subject Property which is discussed in Section 8.0.

8.0 PHASE II ENVIRONMENTAL SITE INVESTIGATION SUMMARY

Apex completed a Phase II environmental site investigation at the Subject Property, concurrent with the completion of this Phase I ESA. The Phase II environmental site investigation was completed because, as discussed in Section 4.0, Apex identified two recognized environmental concerns (RECs) at the Subject Property. This section provides a summary of the key findings of the Phase II environmental site investigation. A copy of the Phase II Investigation Report is provided as **Appendix K**.

Apex completed the Phase II investigation to identify the presence of any impacted soils, groundwater, and/or soil vapor beneath the Subject Property to determine if potential impacts would pose a risk to future workers during and after redevelopment and whether engineered controls would be necessary.

On September 21-24, 2020, eight soil borings (B-1 through B-8) were advanced across the Site property (**Figure 3**). Eight additional soil borings (B-9 through B-16) were also advanced across the Site on November 6th and 9th, 2020. A total of 33 soil samples were collected at various depths from the 16 borings and placed into laboratory supplied sample containers. Groundwater samples were collected from nine of the 16 borings (**Figure 5**). Thirty-three soil samples were analyzed for VOCs and TPH-gasoline (TPHg) by EPA Method 8260B, TPH-diesel (TPHd) and TPH-motor oil (TPHmo) by EPA Method 8015, and/or metals by EPA Method 6010B/7471A. Additionally, 14 temporary soil vapor probes were installed at various depths and analyzed for VOCs using EPA Method TO-15.

Sample results were compared to SFRWQCB ESLs for commercial/industrial settings.

The following is a summary of the key findings from the soil analyses:

- TPHg, TPHd, and TPHmo were not detected above the SFRWQCB ESLs.
- VOCs were detected in 27 of the 33 soil samples at concentrations below the SFRWQCB ESLs. Analytical results for VOCs detected in soil are presented in **Table 2**.
- Arsenic was detected in all samples at concentrations ranging from 1.07 mg/kg to 15.9 mg/kg. Six samples detected arsenic above the established average regional background concentration of 11 mg/kg; however, concentrations were within the range of background concentrations for arsenic.
- Cobalt was detected in all samples at concentrations ranging from 2.78 mg/kg to 44.6 mg/kg. Cobalt was detected at a concentration of 44.6 mg/kg in B-15-4, above the SFRWQCB ESL of 28 mg/kg.
- Lead was detected in all samples at concentrations ranging from 6.51 mg/kg to 244 mg/kg. Lead was detected at a concentration of 244 mg/kg in B-12-5-12, above the SFRWQCB ESL of 160 mg/kg. This sample was a composite sample between 5 and 12 feet-bgs.

- Nickel was detected was detected in all samples at concentrations ranging from 11.5 mg/kg to 99.5 mg/kg. Nickel was detected above the SFRWQCB ESL of 86 mg/kg in samples B-4-7 and B-8-10 at concentrations of 99.5 mg/kg and 86.7 mg/kg, respectively

The following is a summary of the key findings from the groundwater analyses:

- TPH: No samples detected TPH above the SFRWQCB ESL for saltwater ecotox, however, three samples were above the California Maximum Contaminant Level (MCL) for TPHd at 200 µg/L. Samples B1, B-3, and B-4 detected TPHd at 320 µg/L, 439 µg/L, and 271 µg/L, respectively.
- Three VOCs were detected in two samples. All were below the SFRWQCB ESLs.

The following is a summary of the key findings from the soil vapor analyses (**Figure 6**):

- Tetrachloroethane (PCE) was detected in nine of 14 samples at concentrations ranging from 3.29 micrograms per cubic meter (µg/m^3) to 17.4 µg/m^3. All were below the ESL of 67 µg/m^3.
- Trichloroethane (TCE) was detected in five samples at concentrations ranging from 1.69 µg/m^3 to 922 µg/m^3. TCE was detected in sample SV-8 at a concentration of 922 µg/m^3, which is above the ESL of 100 µg/m^3 and the short-term action level of 270 µg/m^3, but below the recommended screening level of 1,600 µg/m^3.
- Cis-1,2-dichloroethene (DCE) was detected in nine samples at concentrations ranging from 1.97 µg/m^3 to 4,200 µg/m^3. Cis-1,2-DCE was detected in sample SV-8 at a concentration of 4,200 µg/m^3, which is above the ESL of 1,200 µg/m^3, but below the recommended screening level of 7,000 µg/m^3.
- 1,2-Dichloroethane (DCA) was detected in four samples at concentrations ranging from 0.838 µg/m^3 to 267 µg/m^3. 1,2-DCA was detected in sample SV-8 at a concentration of 267 µg/m^3, which is above the ESL of 16 µg/m^3 and the recommended screening level of 94 µg/m^3.
- 1,1-DCA was detected in 10 samples at concentrations ranging from 3.03 µg/m^3 to 8,100 µg/m^3. 1,1-DCA was detected in sample SV-8 at a concentration of 8,100 µg/m^3, which is above the ESL of 260 µg/m^3 and the recommended screening level of 1,540 µg/m^3.
- Vinyl chloride was detected in six samples at concentrations ranging from 0.567 µg/m^3 to 849 µg/m^3. Vinyl chloride was detected in four samples (SV-3, SV-4, SV-8, and SV-9) at concentrations above the ESL of 5.2 µg/m^3. In addition, vinyl chloride was detected in three samples (SV-4, SV-8, and SV-9) at concentrations above the recommended screening level of 32 µg/m^3.
- Benzene was detected in all samples at concentrations ranging from 2.24 µg/m^3 to 63.2 µg/m^3. Benzene was detected in seven samples at concentrations above the ESL of 14 µg/m^3, but below the recommended screening level of 84 µg/m^3.

- 1,4-Dioxane was detected in seven samples at concentrations ranging from 1.97 µg/m^3 to 257 µg/m^3. 1,4-Dioxane was detected in samples SV-1 and SV-8 at concentrations of 257 µg/m^3 and 173 µg/m^3, respectively, which are above the ESL of 53 µg/m^3, but below the recommended screening level of 320 µg/m^3.

9.0 CONCLUSIONS AND RECOMMENDATIONS

Apex performed this Phase I ESA in accordance with the USEPA 40 CFR, Part 312 Standards and Practices for AAI and ATSM E1527-13: "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the proposal from Apex to Duke Realty. Any exceptions to, or deletions from, this practice are described in Section 1.0 of this report.

9.1 Phase I ESA Conclusions

Upon review of these environmental records on the Subject Property in this Phase I ESA, Apex identifies the following:

Recognized Environmental Concern (REC): In 1960 two 10,000-gallon USTs were installed on the Subject Property. In 1988, one 10,000-gallon diesel UST was removed, and one 10,000-gallon diesel UST was replaced directly south of the main, helium building on the Subject Property. A leak was reported in 1988 during the UST removal and the replaced UST was eventually removed in 1993. A *Preliminary Subsurface Soil & Groundwater Assessment,* dated March 19, 1999, was conducted by EnviroSurvey to determine the extent of groundwater impacts (EnviroSurvey 1999). All groundwater samples had detections of TPHd that ranged from 130 µg/L to 1,300 µg/L. These detections are above the following current SFRWQCB ESLs (SFRWQCB 2019): MCL priority (200 µg/L), Odor Nuisance Level (100 µg/L), and the Aquatic Habitat Goal for Saltwater Ecotox (640 µg/L). Due to the change in regulatory criteria since the initial investigation was conducted, Apex considers the results of this investigation as a REC in association with the Subject Property since these results are above the current ESL, which have changed since the Subject Property received a No Further Action Letter in 1995.

Recognized Environmental Concern (REC): The building permits review showed the replacement and installation of a 10,000-gallon diesel AST as well as a new concrete foundation and anchoring system. Historical Aerials on Google Earth Pro showed the installation location to be in the northeast corner of the Subject Property. A previous Phase I ESA interview revealed that during the foundation replacement, petroleum-contaminated soil was discovered (HPC Antea Group 2017). The regulatory agency instructed them to excavate the soil and fill with clean material (HPC Antea Group 2017). No documentation was found on the severity, area of impact, and depth of the petroleum-contaminated soil. Due to the lack of documentation on the severity, area of impact, and depth of the petroleum-contaminated soil, Apex considers this a REC in association with the Subject Property.

9.2 Phase I ESA Recommendations

Based on these Phase I ESA findings, if Duke Realty plans to redevelop this site, Apex has the following recommendations:

- A Phase II environmental site investigation that includes the collection of soil and soil vapor samples to determine whether impacted soils constitute a risk to future construction or trench workers handling soil in the upper 10 feet of soil, and to evaluate future vapor intrusion risks.

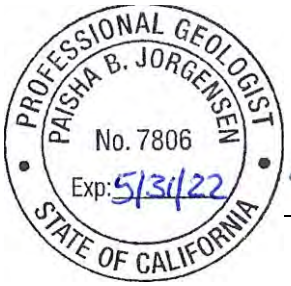
9.3 Phase II Environmental Site Investigation Conclusions

Based upon a review of previous information available for the Site, and the data collected during the investigation, and given the proposed industrial/commercial use of the Site, Apex would not expect a regulatory agency to open a cleanup case.

While VOC concentrations in soil vapor are slightly elevated at many sampling locations across the Site, VOCs in soil vapor at concentrations greater than the recommended screening levels using a conservative attenuation factor of 0.005 were only detected at sample locations SV-4, SV-8 and SV-9. Subsequent sampling at locations SV-4A and SV-4B did not confirm the elevated vinyl chloride concentrations detected at SV-4.

Sample locations SV-8 and SV-9 are located adjacent to numerous public utility easements. As the VOCs detected in soil vapor at sample locations SV-8 and SV-9 were not detected at elevated concentrations in soil in paired borings, it is presumed that the impacted vapors are migrating on Site within the utility backfill.

9.4 Phase II Environmental Site Investigation Recommendations



During this investigation Apex documented impacts on the Subject Property that exceed regulatory guidelines for soil and soil vapor. As a result, Apex recommends the following:

- Due to the low-level impacts found in soil and groundwater Apex recommends a Site Management Plan (SMP) be prepared prior to future earthwork. The SMP would outline precautionary steps to be taken to mitigate risks to future construction workers from identified chemicals during redevelopment and/or intrusive activities at the Site. Intrusive activities include soil grading, excavation, trenching and backfilling activities, and utility repair. An SMP would also cover groundwater management should redevelopment activities require dewatering or excavations below the water table.
- Due to the presence of VOCs in soil vapor beneath the Site, Apex recommends the installation of a vapor intrusion mitigation system beneath any future building constructed on the Subject Property.

10.0 ENVIRONMENTAL PROFESSIONALS

10.1 Signatures of Responsible Environmental Professionals

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Paisha Jorgensen, P.G.
Principal Geologist

Katelyn Lazar
Scientist II

10.2 Qualifications of Responsible Environmental Professionals

Mr. Jorgensen has 20 years of professional experience in the environmental consulting field. His responsibilities include managing and coordinating environmental assessments and remedial programs, including preparing cost proposals and work plans, permitting, scheduling, and performing related regulatory negotiation. He has extensive experience in field investigation activities, including initial site investigation, soil and groundwater sampling, soil logging, bedrock drilling, well installation and abandonment, dye tracer studies, and UST removal. His background includes having worked as a San Francisco Bay Regional Water Quality Control Board (SFRWQCB) regulator for nearly two years, during which time he provided regulatory oversight for cleanup actions at former military bases. Mr. Jorgensen is an environmental professional as defined in § 312.10 of 40 CFR Part 312.

Ms. Lazar has a Bachelor of Science in Biology and a Master of Science in Water Management and Hydrological Sciences. She is a member of the field support team providing comprehensive environmental site assessment and investigation, regulatory negotiation and management, remedial approach evaluation, selection and implementation. Ms. Lazar has been performing environmental site assessment services for five years and is an environmental professional as defined in § 312.10 of 40 CFR Part 312.

APPENDIX A

SITE RECONNAISSANCE PHOTOGRAPHS AND FIELD FORM

APPENDIX A
PHOTOGRAPH LOG

Project Name: West Cutting
Project Number: 093-DUKE-044

Client: Duke Realty
Location: Richmond, California

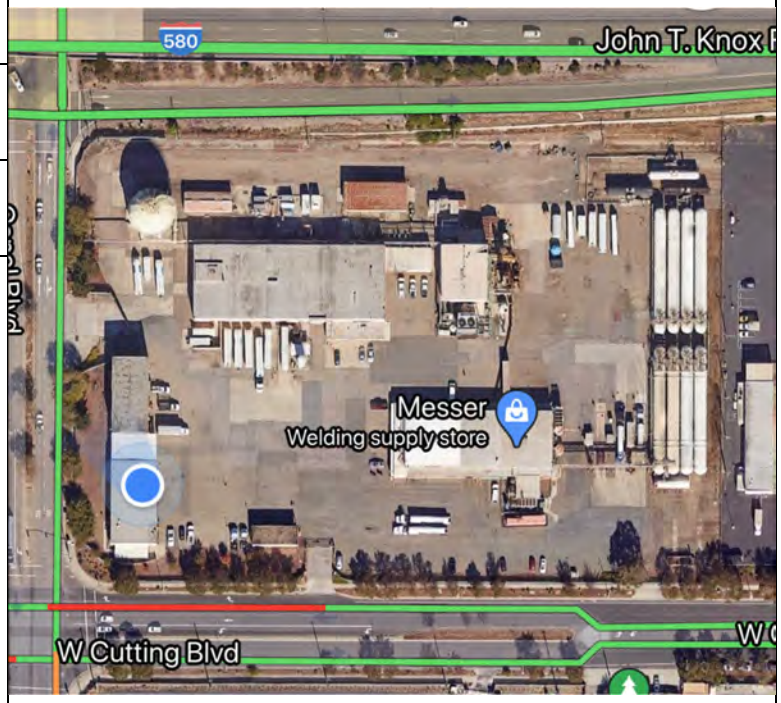

Photo No: 1	
Photo Date: 09/17/2020	
Orientation: N/A	
Description: The long building on the SW corner is divided into three buildings: The GPS point is the location a former vehicle maintenance garage and is the location for Photos 2 through 6. The white roof just north of the GPS Point is the location of the former truck wash bay in Photos 7 through 11. The building with the gray roof north of the truck wash is the technician storage and offices.	

Photo No: 2	
Photo Date: 09/17/2020	
Orientation: Northeast	
Description: There are two former vehicle maintenance bays. One bay contains a grease pit (left). No evidence of inground hydraulic lifts was observed.	

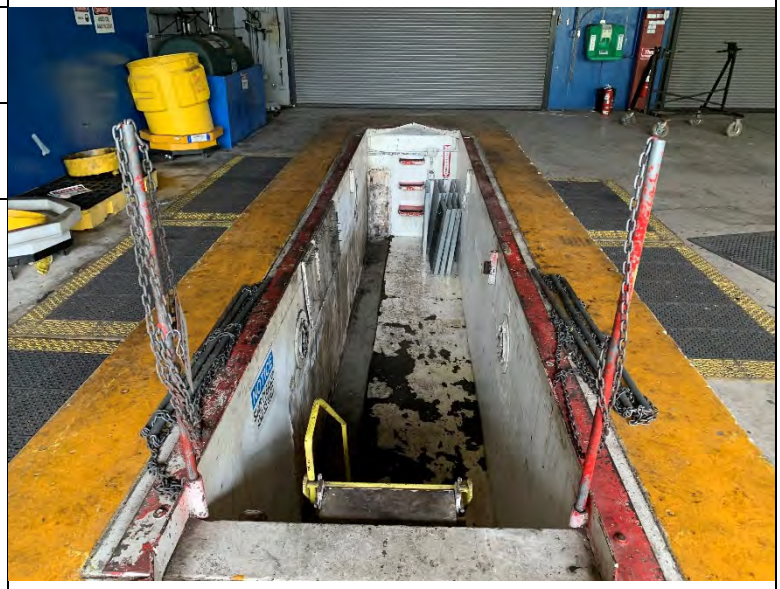

Photo No: 3	
Photo Date: 09/17/2020	
Orientation: East	
Description: Grease pit in the truck maintenance bay. There is a drain under the stairs (foreground) that likely drains into the clarifier in the truck wash bay.	

Photo No: 4	
Photo Date: 09/17/2020	
Orientation: North	
Description: Hazardous waste storage area in the vehicle maintenance garage. Where used oil was stored in an AST along with chemicals to the left.	

Photo No: 5	
Photo Date: 09/17/2020	
Orientation: North	
Description: Hazardous waste storage area to the left of the AST.	

Photo No: 6	
Photo Date: 09/17/2020	
Orientation: East	
Description: The final bay just south of the carwash (shares wall to the left/north) and north of the vehicle maintenance area (shares wall to the right/south), this was used for storage of car parts, etc.	

Photo No: 7	
Photo Date: 09/17/2020	
Orientation: West	
Description: Former truck wash bay with a drain and clarifier.	

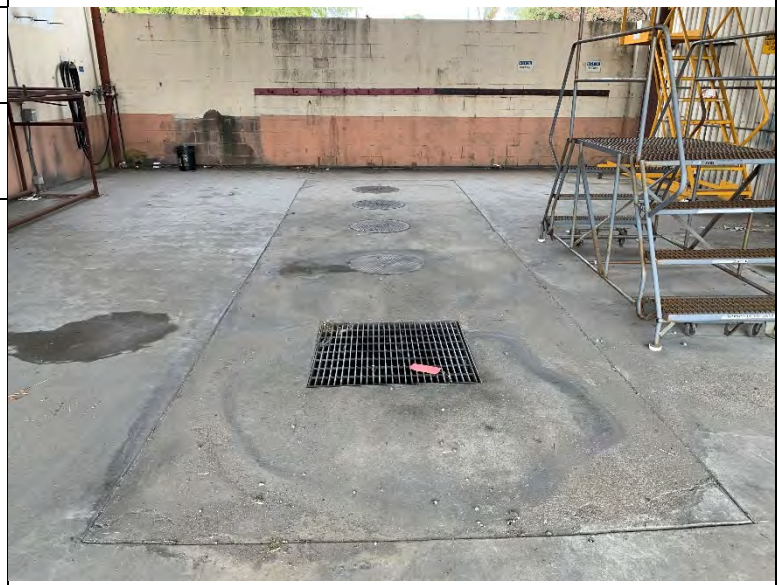

Photo No: 8	
Photo Date: 09/17/2020	
Orientation: West	
Description: Drain (center foreground) in the of the truck wash which drains into the clarifier (4 manholes, center background).	

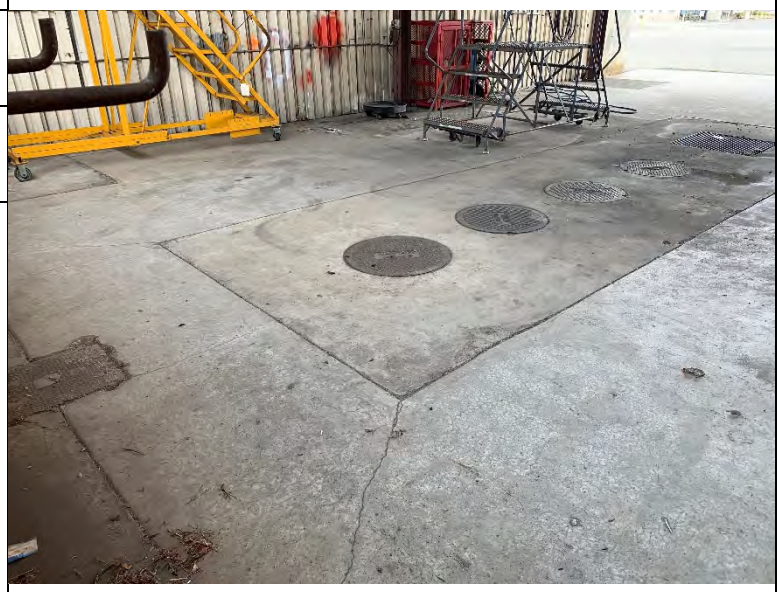

Photo No: 9	
Photo Date: 09/17/2020	
Orientation: Northeast	
Description: Four clarifier manholes and clarifier outlet drain (left).	

Photo No: 10	
Photo Date: 09/17/2020	
Orientation: N/A	
Description: Clarifier section with drain cover removed (left-most cover of previous photo). This revealed an inlet (upper right), an open drain (bottom left), a plugged drain (bottom right), and another possible drain (pipe, bottom center) above the waterline.	

Photo No: 11	
Photo Date: 09/17/2020	
Orientation: N/A	
Description: Same clarifier as above photo. Drain coming from the clarifier above the water line on the left of the photo.	

Photo No: 12	
Photo Date: 09/17/2020	
Orientation: N/A	
Description: The GPS point for Photos 13 to 16. This building was the former “Helium Building” and is the location of an Air Separation Unit.	

Photo No: 13	
Photo Date: 09/17/2020	
Orientation: Southwest	
Description: Former air separation unit from above.	

Photo No: 14	
Photo Date: 09/17/2020	
Orientation: West	
Description: Former air separation unit with tanks and steel plates on the floor. The staining appeared to be grease and/or lubricating oil.	

Photo No: 15	
Photo Date: 09/17/2020	
Orientation: South	
Description: Air separation unit.	

Photo No: 16	
Photo Date: 09/17/2020	
Orientation: North	
Description: Adjacent to the air separation unit are concrete pads which show a former footprint of tanks.	

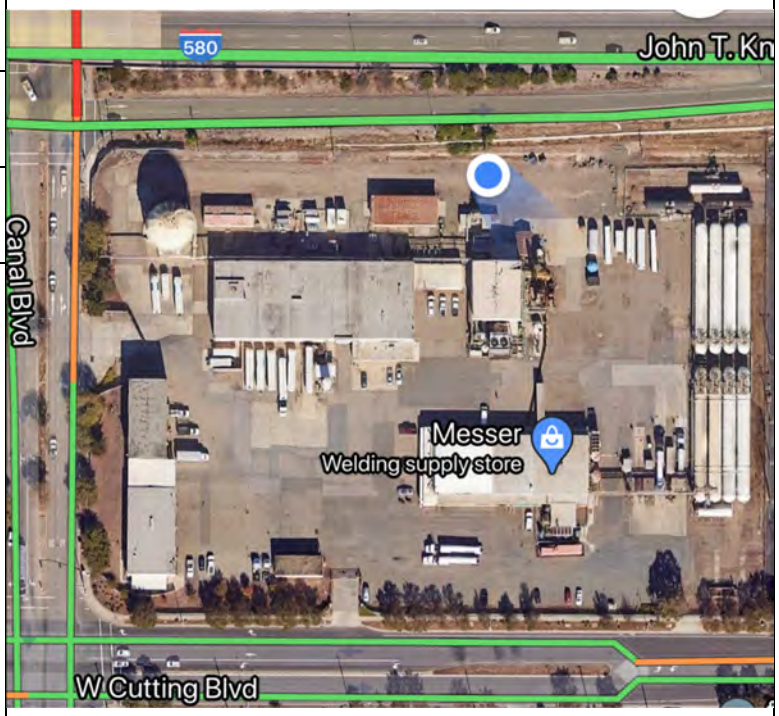

Photo No: 17	
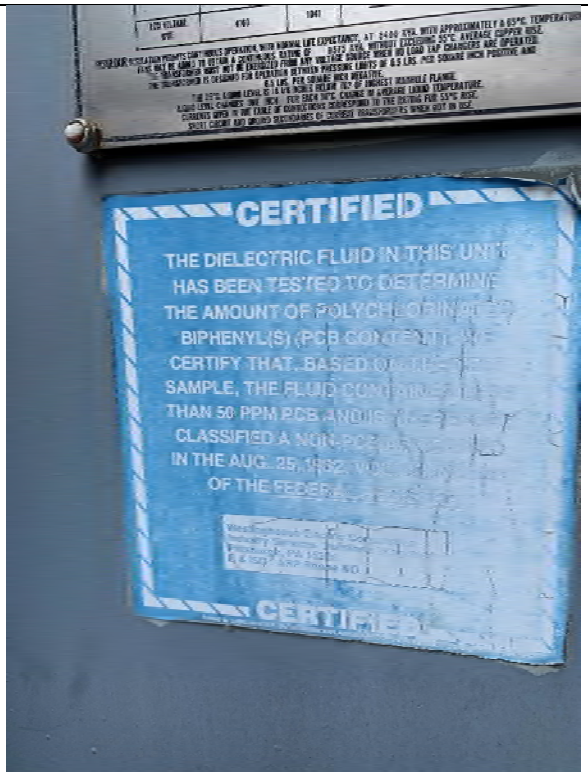
Photo Date: 09/17/2020	
Orientation: N/A	
Description: GPS point of the main electrical transformers at the Site and in Photos 18 to 21.	

Photo No: 18	
Photo Date: 09/17/2020	
Orientation: South	
Description: Electrical transformers.	

Photo No: 19	
Photo Date: 09/17/2020	
Orientation: East	
Description: Transformers and switch-gear. Backside view facing east.	

Photo No: 20	
Photo Date: 09/17/2020	
Orientation: West	
Description: Backside view of transformers and switch-gear facing west.	



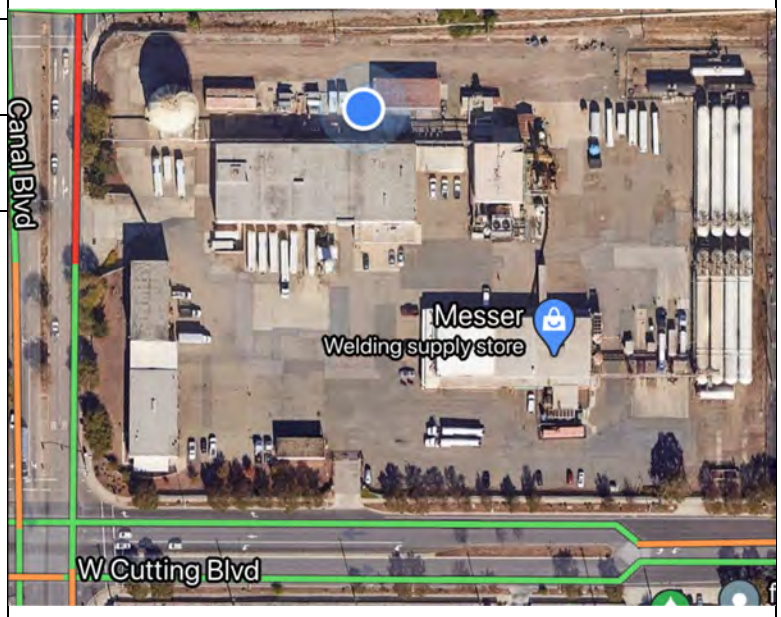


Photo No: 21 **Photo Date:** 09/17/2020 **Orientation:** N/A **Description:** A placard stating the transformer contains less than 50ppm of PCB-containing material.	
Photo No: 22 **Photo Date:** 09/17/2020 **Orientation:** N/A **Description:** GPS point of the Engineering Shed in Photos 23 to 26 where it appears chemicals and oil were stored.	

Photo No: 23	
Photo Date: 09/17/2020	
Orientation: East	
Description: Inside engineering shed.	

Photo No: 24	
Photo Date: 09/17/2020	
Orientation: North	
Description: Chemicals on a pallet stored in the engineering shed.	

Photo No: 25	
Photo Date: 09/17/2020	
Orientation: South	
Description: Gas storage and containment.	

Photo No: 26	
Photo Date: 09/17/2020	
Orientation: Northeast	
Description: Process oil drums stored in the engineering shed.	

Photo No: 27	
Photo Date: 09/17/2020	
Orientation: N/A	
Description: GPS point of the location of the Storage Shed where an old transformer is located.	

Photo No: 28	
Photo Date: 09/17/2020	
Orientation: South	
Description: Electrical panel and small dry-type transformer located in the storage shed.	

Photo No: 29	
Photo Date: 09/17/2020	
Orientation: South	
Description: A closer view of the dry-type transformer.	

Photo No: 30	
Photo Date: 09/17/2020	
Orientation: N/A	
Description: GPS point of Shed #2 located behind the gas refining equipment.	

Photo No: 31	
Photo Date: 09/17/2020	
Orientation: Southwest	
Description: Interior of Shed #2. Staining on the floor, electrical panel and former chemical storage area to the right.	

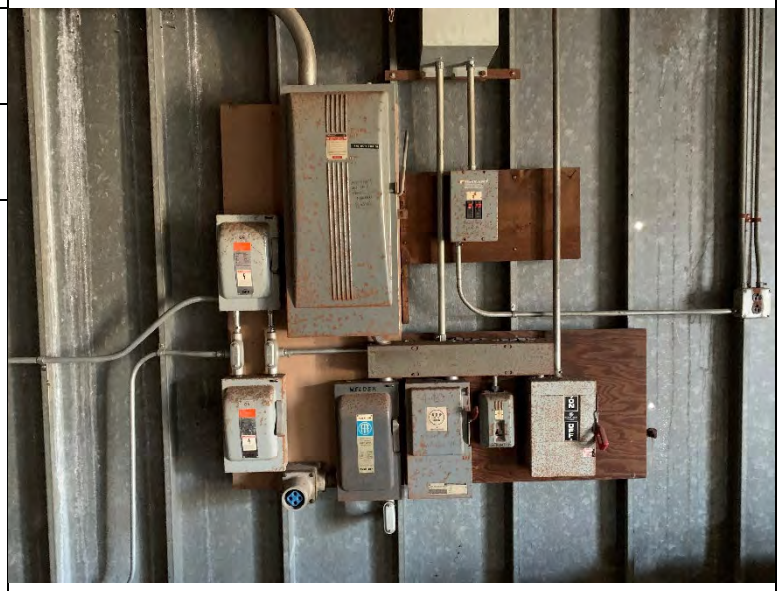

Photo No: 32	
Photo Date: 09/17/2020	
Orientation: West	
Description: Inside Shed #2, a closer view of the electrical panel.	

Photo No: 33	
Photo Date: 09/17/2020	
Orientation: West	
Description: A sign indicating hazardous chemicals were once stored here.	

Photo No: 34	
Photo Date: 09/17/2020	
Orientation: N/A	
Description: GPS Point of where the railroad tracks are located on the Site.	

Photo No: 35	
Photo Date: 09/17/2020	
Orientation: West	
Description: Railroad tracks on the property that end where the X's are located (center rear).	

Photo No: 36	
Photo Date: 09/17/2020	
Orientation: East	
Description: The railroad track entrance at the property boundary.	

APPENDIX B

USER QUESTIONNAIRE

ASTM E1527-13 USER QUESTIONNAIRE

Site Name: Cutting Ave

Site Address: 731 W Cutting Ave, Richmond, CA

Respondent Name: Verbal Responses from Randy Dilag

Respondent Title/Company: Development Services Manager, Duke Realty

Date: 11/20/20

For Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments", 40 CFR Part 312), the user **must** provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete, and the environmental professional may identify a “data gap” which could impact the Phase I ESA report findings.

Question:	Yes	No
1. Environmental Liens Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? Check the box below as appropriate. [X] The scope of work for this Phase I Environmental Site Assessment (ESA) includes a search of recorded environmental liens as an added-scope item (in accordance with ASTM E1527-13 Section 6.2).		X
2. Activity and Land Use Limitations (AULs) Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? Check the box below as appropriate. [X] The scope of work for this Phase I ESA includes a search of recorded AULs as an added-scope item (in accordance with ASTM E1527-13 Section 6.2).		X
3. Specialized Knowledge or Experience Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		X
4. Purchase Price vs. Fair Market Value Does the purchase price being paid for this property reflect any adjustments from the fair market value of the property? (If you conclude that the value is lower than the fair market price, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?)		X

5. Commonly Known or Reasonably Ascertainable Information Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?		X
5a. Do you know the past uses of the property?		X
5b. Do you know of specific chemicals that are present or were once were present at the property?		X
5c. Do you know of spills or other chemical releases that have taken place at the property?		X
5d. Do you know of any environmental cleanups that have taken place at the property?		X
6. Obviousness of the Presence or Likely Presence of Contamination Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?		X

PLEASE PROVIDE EXPLANATION FOR ALL "YES" ANSWERS, OR ATTACH SUPPORTING DOCUMENTS.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 NPL

site within approximately 1 mile of the target property.

EPA Id: CAD981436363				

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

EPA Id: CAD981436363				

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/29/2020 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/23/2020 has revealed that there are 2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 02/13/2020 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where

environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 30 ENVIROSTOR sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 23 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

731 W CUTTING BLVD
RICHMOND, CA 94804

HAZNET S118231157
HWTS N/A

Site 1 of 37 in cluster A

Actual: 10 ft.

HAZNET:

Name:	AIR GAS CARBONIC INC
Address:	731 W CUTTING BLVD
Address 2:	Not reported
City,State,Zip:	RICHMOND, CA 948040000
Contact:	STEPHEN M. PETZ
Telephone:	6789857320
Mailing Name:	Not reported
Mailing Address:	731 W CUTTING BLVD
Year:	2019
Gepaid:	CAL000256381
TSD EPA ID:	UTD991301748
CA Waste Code:	352 - Other organic solids
Disposal Method:	H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons:	1.25000
Year:	2019
Gepaid:	CAL000256381
TSD EPA ID:	CAL000282598
CA Waste Code:	352 - Other organic solids
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.57500
Year:	2019
Gepaid:	CAL000256381
TSD EPA ID:	CAD059494310
CA Waste Code:	343 - Unspecified organic liquid mixture
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	2.43000
Year:	2019
Gepaid:	CAL000256381
TSD EPA ID:	CAD059494310
CA Waste Code:	212 - Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.10000
Year:	2018
Gepaid:	CAL000256381
TSD EPA ID:	CAL000190816
CA Waste Code:	221 - Waste oil and mixed oil
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.00000
Year:	2018
Gepaid:	CAL000256381
TSD EPA ID:	NVT330010000

AIR GAS CARBONIC INC (Continued) **S118231157**

CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.54450

Year: 2018
Gepaid: CAL000256381
TSD EPA ID: CAL000190816
CA Waste Code: 223 - Unspecified oil-containing waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 196.19850

Year: 2018
Gepaid: CAL000256381
TSD EPA ID: CAL000282598
CA Waste Code: 352 - Other organic solids
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.62500

Year: 2017
Gepaid: CAL000256381
TSD EPA ID: AZR000515924
CA Waste Code: 352 - Other organic solids
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.125

Year: 2017
Gepaid: CAL000256381
TSD EPA ID: CAL000190816
CA Waste Code: 223 - Unspecified oil-containing waste
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 516.14175

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
AIR EMISSIONS CLASSIFICATION UNKNOWN
TSCA SUBMITTER
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

MESSER LLC (Continued) **1012176415**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
HAZARDOUS WASTE BIENNIAL REPORTER
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. The amount of hydrogen stored on site (approximately 50 300 ft3 cylinders) exceeds the quantity reported to CERS. CORRECTIVE ACTION: Update the chemical inventory for hydrogen to reflect what is stored on site and resubmit to CERS.

Violation Date:	01-28-2020
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Observation: Observed multiple 55 gallon drums of used oil that are not labeled and are not closed. CORRECTIVE ACTION: Close all hazardous waste drum except when adding or removing product. Label all hazardous waste containers.

Violation Date:	12-13-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes:	Returned to compliance on 12/24/2019. OBSERVATION: Emergency contact information submitted to CERS is inaccurate. The CUPA could not contact any emergency personnel listed on the plan. CORRECTIVE ACTION: Immediately update the owner operator identification form in CERS. Update all emergency contacts. Provide a 24 hour number where emergency contacts can be reached.

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. The amount of hydrogen stored on site (approximately 50 300 ft3 cylinders) exceeds the quantity reported to CERS. CORRECTIVE ACTION: Update the chemical inventory for hydrogen to reflect what is stored on site and resubmit to CERS.
Violation Division:	Contra Costa County Health Services Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	130824
Site Name:	MESSER LLC
Violation Date:	01-28-2020
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Observation: Observed multiple 55 gallon drums of used oil that are not labeled and are not closed. CORRECTIVE ACTION: Close all hazardous waste drum except when adding or removing product. Label all hazardous waste containers.
Violation Division:	Contra Costa County Health Services Department
Violation Program:	HW

Violation Description:	Failure to complete and electronically submit a site map with all

BOC GROUP-AIRCO INDUSTRIAL (Continued) **U001599770**

	required content.
Violation Notes:	OBSERVATION: The business failed to complete and electronically submit a site map with all required content. The facility has removed a number of chemicals and should update the map to indicate which materials are no longer stored on site/which tanks and containers are empty. Additionally, please update gas cylinder storage locations (hydrogen) on site map. CORRECTIVE ACTION: Complete and electronically submit an updated site map with all required content.
Violation Division:	Contra Costa County Health Services Department
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	130824
Site Name:	MESSER LLC
Violation Date:	01-28-2020
Citation:	22 CCR 15 66265.197 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.197
Violation Description:	Failure of owner or operator to properly close a hazardous waste tank system ensuring the minimization of further maintenance and that the required requirements have been met.
Violation Notes:	OBSERVATION: The hazardous waste oil tank is located in a below grade area in the maintenance garage. The tank can only be viewed from two sides. The tank is below grade and does not meet the requirements of an underground storage tank. CORRECTIVE ACTION: Immediately cease use of the used oil tank. Have tank cleaned and closed. Submit a hazardous waste closure report to CCHSHMP. Contact CCHSHMP to obtain a UST removal permit.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Description:	Per NRC Fax: Caller states that the plant was shut down as part of normal operations. During the shut down a pressure relief valve went off causing materials to vent into the air. The caller states that this is not a result of equipment failure as thhe valve reacted properly. REMEDIAL ACTIONS: Employees who returned to site to allowed the valve to bleed back more, Shut down was complete after the bleed down.

Reclamation:	Not reported
POTW:	Not reported
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

NPL:
EPA ID: CAD981436363
Summary: Conditions at proposal October 26, 1989): The United Heckathorn Co. Site is adjacent to the Laurit en Canal at 402 Wright Avenue in Richmond, Contra Costa County, California. The canal is on the

UNITED HECKATHORN CO. (Continued) **1000399482**

Richmond Inner Harbor, which is on San Francis

EPA ID: CAD981436363
Summary: hellfish harvesting, as well as recreational activities. A coastal wetland is less than 0.5 mile from the site. The harbor is part of San Francisco Bay, which the Water Quality Act of 1987 declared to be an estuary of national significance.

EPA ID: CAD981436363
Summary: In July-August 1988, EPA detected DDT in the atmosphere at numerous locations on and off the site. An estimated 10,900 people live within 1 mile of the site. Status March 14, 1990): EPA is considering various alternatives for the site.

EPA ID: CAD981436363
Summary: co Bay in an area that is primarily light industrial with some residential development. The site includes the property where United Heckathorn Co. once operated and all other areas where releases from that property have come to be located.

EPA ID: CAD981436363
Summary: From 1948 through 1965, several companies leased a 13.5-acre property to process chemicals. The owners have been: from 1947 through 1961, Parr Industrial Corp.; from 1961 through 1981, Parr Richmond Terminal Corp.; and from 1981 through the pr

EPA ID: CAD981436363
Summary: esent, Levin-Richmond Terminal Corp. LRTC). In the late 1940s and early 1950s, Universal Pigment and Chemical Co. produced napalm on-site. From 1958 to 1965, Montrose Chemical Corp. contracted with United Heckathorn, United Chemetrics, and C

EPA ID: CAD981436363
Summary: hemWest for DDT-grinding services. These companies were tenants on the site during this period. United Heckathorn Co. was the last company to formulate pesticides at this site 1957-1965). The current operation on the site involves metal recy

EPA ID: CAD981436363
Summary: cling. The California Department of Fish and Game has recorded several instances of chemicals being discharged into the Laurit en Canal, including naphthenic acid in 1951 and DDT in 1960; the 1960 incident resulted in the death of 48 stri

EPA ID: CAD981436363
Summary: ped bass. In August 1980, the California Department of Health Services CDHS), under its Abandoned Site Project, inspected the site and found elevated levels of DDT, lindane, BHC, aldrin, and other pesticides in nine soil samples.

EPA ID: CAD981436363
Summary: In early 1983, LRTC hired a consultant to study on-site DDT contamination. Soils were found to contain DDT and xylene, and sediments from the canal contained DDT. During the study, parts of the site were covered with 6 to 8 inches of crushed r

EPA ID: CAD981436363

UNITED HECKATHORN CO. (Continued) **1000399482**

Summary: ock.LRTC s Site Characteri ation Plan was not approved by CDHS, however, so CDHS is conducting its own investigation of soil and ground water contamination. The Richmond Inner Harbor is used for recreational and commercial fishing and s

Background Info:	This site was a former shipyard, an agricultural chemical warehouse and formulating facility; and is currently a bulk loading and unloading facility for large ships. The site covers 12 acres. Metals and pesticides, especially DDT, are present at this site. Chlorinated solvents, such as chlorobenzene have been found in an isolated spot onsite. DDT has also been found in sediments and shellfish in the adjacent Lauritzen Canal. In March 1990, the site was listed on the Federal Superfund List and U.S. EPA assumed a lead role on this site effective August 1990.
Comments Date:	04171991
Comments:	Completed RA. DDT contaminated soil was removed and backfilled
Comments Date:	04171991
Comments:	with clean imported fill material under the foundation pad of
Comments Date:	04171991
Comments:	former United Heckathorn Building. Volume of excavation was
Comments Date:	04171991
Comments:	approximately 1800 cubic yards.
Comments Date:	05071993
Comments:	Completed RA. The RA consisted of the removal and disposal of
Comments Date:	05071993
Comments:	the remaining soil stockpiled on site, the excavation and
Comments Date:	05071993
Comments:	disposal of soil from the train scale area, and the backfilling
Comments Date:	05071993
Comments:	of the excavated areas. A total of 2080 tons of contaminated
Comments Date:	05071993
Comments:	soil were removed from the site and disposed of at the facility
Comments Date:	05071993
Comments:	near Beatty, Nevada.
Comments Date:	05081998
Comments:	Approved Design for the 4.9 acre upland portion of the site.
Comments Date:	05081998
Comments:	The cap will consist of reinforced concrete and a related
Comments Date:	05081998
Comments:	drainage system.
Comments Date:	07191996
Comments:	Entered into a Consent Decree with the Responsible Parties for
Comments Date:	07191996
Comments:	all claims related to the former United Heckathorn Site. US EPA
Comments Date:	07191996
Comments:	had already entered into a similar agreement.
Comments Date:	07261996
Comments:	Approved Remedial Design for the dredging of contaminated marine
Comments Date:	07261996
Comments:	sediments in the Lauritzen Channel and Parr Canal, and recovery
Comments Date:	07261996
Comments:	of submerged vessels, their decontamination and recycling.
Comments Date:	07301987
Comments:	Issued Remedial Action Order to current site owners and
Comments Date:	07301987
Comments:	Endangerment Order to former site owners and operators. Final
Comments Date:	07301987
Comments:	determination of noncompliance with these orders were made in
Comments Date:	07301987
Comments:	September 1987.

UNITED HECKATHORN CO. (Continued) **1000399482**

Comments Date:	08011994
Comments:	Approved RIFS. The RI addressed the areal extent and depth of
Comments Date:	08011994
Comments:	contamination, volume of impacted sediments, characterization of
Comments Date:	08011994
Comments:	subsurface geology and biological effects of the sediments. The
Comments Date:	08011994
Comments:	FS finalized analyzing the removal, containment and treatment of
Comments Date:	08011994
Comments:	sediments to levels which would be protective of aquatic
Comments Date:	08011994
Comments:	organisms and wildlife.
Comments Date:	08021996
Comments:	Recorded Deed Restriction to limit use of the upland portion of
Comments Date:	08021996
Comments:	the former United Heckathorn site to commercial/industrial.
Comments Date:	09081997
Comments:	Completed RA. Approximately 108,000 cubic yards of sediment
Comments Date:	09081997
Comments:	contaminated with pesticides were dredged and disposed offsite.
Comments Date:	09081997
Comments:	Approximately 190 tons of metals were removed, decontaminated
Comments Date:	09081997
Comments:	and recycled.
Comments Date:	09301999
Comments:	Completed RA. The 4.5 acre cap is a combination of concrete
Comments Date:	09301999
Comments:	(for high traffic areas) and geotextile/gravel (for low traffic
Comments Date:	09301999
Comments:	areas).
Comments Date:	10071980
Comments:	Sample Results show copper, zinc, DDT and lead.
Comments Date:	10261994
Comments:	Approved RAP/ROD, selecting a remedy which consists of dredging
Comments Date:	10261994
Comments:	all soft bay mud from Lauritzen Channel and Parr Canal Beds,
Comments Date:	10261994
Comments:	offsite disposal of dredge materials, lining of dredged areas
Comments Date:	10261994
Comments:	with clean sand, construction of an impervious cap at the upland
Comments Date:	10261994
Comments:	area of the former United Heckathorn Site, recording a deed
Comments Date:	10261994
Comments:	restriction on the capped area to prevent residential use, and
Comments Date:	10261994
Comments:	verification monitoring of resettlement of marine life.
Comments Date:	11071990
Comments:	Completed RA. Phase I excavation of approximately 900 cubic
Comments Date:	11071990
Comments:	yards of contaminated soil along the embankment and disposal at
Comments Date:	11071990
Comments:	US Ecology Class I disposal site. Four of the 54 trucks could
Comments Date:	11071990
Comments:	not reach the disposal site by November 8 (effective date of
Comments Date:	11071990
Comments:	RCRA land disposal restrictions) so in the interim they were

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 352
. Waste name: Other organic solids

CHEVRON STATION #90103 (Continued) **1005441214**

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D018
. Waste name: BENZENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 2639.6

Waste code: D018
Waste name: BENZENE
Amount (Lbs): 3320.6

Violation Status: No violations found

Violation Date:	03-01-2017
Citation:	23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description:	Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes:	Returned to compliance on 03/01/2017.
Violation Division:	Contra Costa County Health Services Department
Violation Program:	UST
Violation Source:	CERS
Site ID:	18398
Site Name:	CHEVRON STATION #90103
Violation Date:	05-09-2017
Citation:	HSC 6.7 Multiple - California Health and Safety Code, Chapter 6.7, Section(s) Multiple
Violation Description:	UST Program - Administration/Documentation - General - Must include violation description, proper statute and regulation citation in the "comment" section.
Violation Notes:	Returned to compliance on 05/09/2017. hsc 25290.2(c)(2)
Violation Division:	Contra Costa County Health Services Department
Violation Program:	UST
Violation Source:	CERS
Site ID:	18398
Site Name:	CHEVRON STATION #90103
Violation Date:	02-23-2018
Citation:	23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description:	Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes:	Returned to compliance on 02/23/2018. OBSERVATION: Owner/Operator did not properly intall, calibrate, operate and/or maintain leak detection equipment. The 420 sensor for "L12" of the piping transition sump (adjacent to dispenser 7/8) failed on testing. CORRECTIVE ACTION: Service technician fixed wiring to sensor and was able to get "fuel alarm" on retest. Corrected on site; no further action needed.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

WEST MARINE #546 (Continued) **S121749759**

Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 08/31/2019. OBSERVATION: Containers of paint located in the processing area and hazardous waste storage area were observed without hazardous waste labels. Observed paint cans in a container labeled universal waste. Flammable waste label did not have the physical state designated. CORRECTIVE ACTION: Facility should process returns/damages in a timely manner and place hazardous waste in appropriately labeled and closed containers. Submit photos to the CUPA demonstrating that the containers listed above have been properly labeled.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 59069
Site Name: Protector Boats Service Center Inc.
Violation Date: 02-19-2019
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 03/29/2019. OBSERVATION: Uniform Hazardous Waste Manifests were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests and submit copies to the CUPA.

Violation Date: 06-04-2019
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 07/03/2019. OBSERVATION: The Cleaning Station area had materials on the containers, rags in buckets, and it was unclear what was usable material and not hazardous waste. CORRECTIVE ACTION: By July 4, 2019, provide documentation to CCHSHMP, such as photos, that the Cleaning Station area has been cleaned up (drums are closed and labeled, rags are in the proper area for laundering, and secondary containment areas are clear of debris).

Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Returned to compliance on 07/03/2019. OBSERVATION: The site map does not include adjacent streets or north orientation. The site map needs to show the portion of the shared warehouse that belongs to the facility. CORRECTIVE ACTION: By July 4, 2019, upload a complete site map to CERS that shows north orientation, adjacent streets, and the area of the shared warehouse that stores the facility's hazardous materials/waste.

Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	13547
Site Name:	Brilliant Group, Inc.
Violation Date:	06-04-2019
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 07/03/2019. OBSERVATION: The hazardous materials inventory submitted in CERS appears to under report some of the hazardous materials. The hazardous materials inventory does not provide the federal hazard categories or provides the outdated federal hazard category. The hazardous materials inventory does not include the temperature and pressure information. CORRECTIVE ACTION: By July 4, 2019, update the hazardous materials inventory in CERS to update for the correct amount of hazardous materials stored, provide updated federal hazard category information, and provide pressure and temperature information and submit.
Violation Division:	Contra Costa County Health Services Department

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Facility name:	JAN BASHINSKI DNA LABORATORY MPDP
Facility address:	1003 W CUTTING BLVD RICHMOND, CA 94804
EPA ID:	CAL000326674
Mailing address:	11181 SUN CENTER DRIVE RANCHO CORDOVA, CA 95670-0000
Contact:	JOHN JANG
Contact address:	11181 SUN CENTER DRIVE RANCHO CORDOVA, CA 95670
Contact country:	Not reported
Contact telephone:	916-464-5594
Contact email:	JOHN.JANG@DOJ.CA.GOV
EPA Region:	09
Classification:	Non-Generator
Description:	Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:

Owner/operator name:	STATE OF CALIFORNIADEPT OF JUSTICE
Owner/operator address:	11181 SUN CENTER DRIVE RANCHO CORDOVA, CA 95670
Owner/operator country:	Not reported
Owner/operator telephone:	916-464-5594
Owner/operator email:	Not reported
Owner/operator fax:	Not reported
Owner/operator extension:	Not reported
Legal status:	Other
Owner/Operator Type:	Owner
Owner/Op start date:	Not reported
Owner/Op end date:	Not reported

JAN BASHINSKI DNA LABORATORY MPDP (Continued) **1024818700**

Owner/operator name: JOHN JANG
Owner/operator address: 11181 SUN CENTER DRIVE
RANCHO CORDOVA, CA 95670
Owner/operator country: Not reported
Owner/operator telephone: 916-464-5594
Owner/operator email: Not reported
Owner/operator fax: Not reported
Owner/operator extension: Not reported
Legal status: Other
Owner/Operator Type: Operator
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Violation Status: No violations found

Hazardous Waste Summary:

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 512
. Waste name: Other empty containers 30 gallons or more

. Waste code: 751
. Waste name: Solids or sludge with halogenated organic comp. > 1000 mg/kg

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON

PARKER HANNIFIN CORP VERIFLO DIV RICHMOND (Continued) **1000252151**

STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Click Here:

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
AIR EMISSIONS CLASSIFICATION UNKNOWN
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits

PARKER HANNIFIN CORP VERIFLO DIV RICHMOND (Continued) **1000252151**

issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS Description: Industrial Facility Storm Water

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-11-2018
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Outdoor industrial area had good housekeeping. The site has multiple metal storage containers. Metals a currently are not monitored in stormwater because it is not required by the facility's SIC Code per the Permit. The containers are closed and labeled. The site is a Level 1 exceedance reason action site for oil and grease. Dripping fuel from vehicles, such as trucks and forklifts may contribute to elevated oil and grease concentrations in stormwater. Improve preventive maintenance and leak, spill and drip best management practices and controls to reduce the oiled grease concentrations stormwater. Nothing but stormwater may go down the stormwater drain. A Level 1 report is due January 1, 2019.

Violation Date: 08-20-2019
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: OBSERVATION: Documented training of personnel was not available at the time of inspection. Facility does not have training plan with job titles/positions, description of job title, type and frequency of training. CORRECTIVE ACTION: Locate training documentation or conduct training with applicable personnel and document it. Submit a copy of the training documentation to the CUPA. Prepare a training plan and submit to the CUPA.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Citation:	HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description:	Failure to manage a recyclable material pursuant to HSC 6.5 25143.2(b), (c), or (d).
Violation Notes:	OBSERVATION: Owner/Operator failed to manage a recyclable material pursuant to HSC 6.5 25143.2(d)(6). Facility has provided analytical results showing the spent blast grit is a non-RCRA hazardous waste. In accordance with 66266.21(b)(5), where the recyclable material is used as an ingredient in the manufacture of a product that is placed on the land (ie Portland Cement), facility shall demonstrate that the hazardous constituents shall not leach out of the product in concentrations that would exceed the applicable STLC. CORRECTIVE ACTION: Submit documentation demonstrating compliance with HSC 6.5 25143.2(d) for any material you claim qualifies as an excluded recyclable material, or indicate that this material is to be managed as a hazardous waste. Specifically, submit analytical documentation showing that Portland Cement made with Bay Marine Boat Works' spent blast grit does not exceed applicable STLCs. Include information (weight of final product and weight of recyclable [Truncated]

Name:	RICHMOND PLUNGE SITE
Address:	1 EAST RICHMOND AVENUE
City,State,Zip:	RICHMOND, CA 94801
Recipient Name:	R9 TBA - California (STAG Funded)
Grant Type:	TBA
Property Number:	556-170-002
Parcel size:	0.3
Latitude:	37.924026
Longitude:	-122.38435
HCM Label:	Address Matching-House Number
Map Scale:	-
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	The Site is an undeveloped portion of the Richmond Municipal Natatorium property, located immediately west and southwest of the two-story indoor swimming pool facility. The Site is generally flat throughout, mostly unpaved and covered in wood chips, with a small cememt walkway bisecting the central portion. The Property is bordered to the northwest by a railroad line and residential and commercial properties.

Alternate Address:	801 WHARF STREET
Alternate City,St,Zip:	RICHMOND, CA 94804
Background Info:	This site is on the Richmond Channel leading to the San Francisco Bay. It is a petroleum lubricant storage and transfer facility. Volatile organic compounds were found in the shallow groundwater and seeping into the Richmond Channel. During World War II the Site was part of the Kaiser Shipyard. Bray Oil Company occupied the site after Kaiser. Between 1971 and 1981, Kodak rented some facilities on the site for storage and distribution of petrochemicals. Burmah-Castrol, Inc. acquired the Site in 1981 and has since constructed and operated a bulk oil storage/blending and terminal facility.
Comments Date:	01011986
Comments:	See also Kaiser Aluminum & Chem Corp file #07370029.
Comments Date:	01201987
Comments:	Completed Site Screening.
Comments Date:	02031982
Comments:	Inspection (RWQCB): Routine inspection noted presence of
Comments Date:	02031982
Comments:	oil offshore from underground source at the bottom of the
Comments Date:	02031982
Comments:	Channel. Recommend collection of any oil residues.
Comments Date:	02051988

Environmental Interest/Information System:

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART)

SAFETY-KLEEN SYSTEMS INC (Continued) **1000440568**

provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Longitude:	-122.373461
Case Type:	Cleanup Program Site
Case Worker:	AJK
Local Agency:	Not reported
RB Case Number:	SL373201177
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Surface water
Potential Contaminants of Concern:	Other Solvent or Non-Petroleum Hydrocarbon, Vinyl chloride, Benzene, Diesel, Heating Oil / Fuel Oil
Site History:	In the World War II era the site was a shipyard. The docks were backfilled with fill. Between 1971 and 1981, the property was used for the storage and distribution of petrochemicals by Kodak. In 1981, BCI purchased the facility to use as a bulk oil storage, blending and packaging facility. BCI changed its name to Castrol, and is now BP Lubricants. The site is currently in the monitoring phase for historic hydrocarbon and solvent releases. There is a deed restriction on the site. Check ECM for additional documents.

Violation Date:	10-23-2018
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility,

MOTOR OIL BULK TERMINAL (Continued) **S103438340**

or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 01/17/2019. OBSERVATION: CCHSHMP reviewed the employee training and observed that the Manager Oil Facility, Facility Operation Coordinator, and Foreman were provided DOT Hazardous Material Handling & Security Awareness and (Resource Conservation and Recovery Act (RCRA) training. CCHSHMP observed that Laboratory Technician and Laboratory Manager were not provided annual hazardous waste training. CORRECTIVE ACTION: The business must provide hazardous waste training to the employees. The business must submit a copy of the training records to CCHSHMP when it is completed.
Violation Division: Contra Costa County Health Services Department

MOTOR OIL BULK TERMINAL (Continued) **S103438340**

Violation Date:	10-23-2018
Citation:	22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 01/17/2019. OBSERVATION: CCHSHMP observed that 1x200 gallons and 2x55 gallons secondary containments had used oil inside. The secondary containments were stored under canopy and warehouse. CORRECTIVE ACTION: The business must remove the used oil out of the secondary containments. The business must submit a proof of compliance.

Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	99764
Site Name:	SAFETY-KLEEN SYSTEMS INC
Violation Date:	10-23-2018
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Returned to compliance on 01/17/2019. OBSERVATION: CCHSHMP reviewed the employee training and observed that the Manager Oil Facility,

MOTOR OIL BULK TERMINAL (Continued) **S103438340**

Facility Operation Coordinator, and Foreman were provided DOT Hazardous Material Handling & Security Awareness and (Resource Conservation and Recovery Act (RCRA) training. CCHSHMP observed that Laboratory Technician and Laboratory Manager were not provided annual hazardous waste training. CORRECTIVE ACTION: The business must provide hazardous waste training to the employees. The business must submit a copy of the training records to CCHSHMP when it is completed.

CA BOND EXP. PLAN:

Reponsible Party:	COST RECOVERY/OPERATION AND MAINTENANCE SITE
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The responsible parties funded the characterization and remedial action at the site. State Bond funds were used for oversight of the RP's activities. DHS will seek cost recovery for its direct oversight costs including staff costs and overhead related to the project. DHS has budgeted $30,000 for oversight of the long term operation and maintenance.
Site Description:	This site is on the Richmond Channel leading to the San Francisco Bay. It is a petroleum lubricant storage and transfer facility.
Hazardous Waste Desc:	There are volatile organic compounds (VOCs) in the shallow ground water. Oil and VOCs were found seeping into the Richmond Channel.
Threat To Public Health & Env:	The oil seepage into the Richmond Channel was very small. The seepage is mitigated through ground water pumping. The VOCs appear to be isolated from the Richmond Channel and contained in the shallow ground water.
Site Activity Status:	The responsible party completed investigation at the site to determine the extent of contamination in February, 1986. The RAP was approved by the DHS in August, 1986. As a part of the RAP, contaminated soil was removed in November, 1986. Ground water has been pumped since 1985. The ground water monitoring is under the oversight of the San Francisco RWQCB. The site was certified in January, 1988. The site is now in long term operation and maintenance.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Observation: Hazardous waste training for workers in the production area is inadequate. Observed waste on the ground in this area. CORRECTIVE ACTION: Provide adequate hazardous waste training for production area workers. Submit proof of training to CCHSHMP at Sara.dwight@cchealth.org

Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Observation: Hazardous waste training for workers in the production area is inadequate. Observed waste on the ground in this area. CORRECTIVE ACTION: Provide adequate hazardous waste training for production area workers. Submit proof of training to CCHSHMP at Sara.dwight@cchealth.org

Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Observation: Hazardous waste training for workers in the production area is inadequate. Observed waste on the ground in this area. CORRECTIVE ACTION: Provide adequate hazardous waste training for production area workers. Submit proof of training to CCHSHMP at Sara.dwight@cchealth.org

Violation Date:	11-22-2019
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes:	Observation: Hazardous waste training for workers in the production area is inadequate. Observed waste on the ground in this area. CORRECTIVE ACTION: Provide adequate hazardous waste training for production area workers. Submit proof of training to CCHSHMP at Sara.dwight@cchealth.org

Citation:	22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes:	OBSERVATION: Observed liquid with a pH betwen 11-13 on the ground in the production area. Observed unconnected hoses dripping caustic liquids onto the ground. A blocked off sump in the area was full of this caustic solution. Observed spilled sodium bisulfite on the ground in the tank farm. CORRECTIVE ACTION: Immediately clean up all spills. Provide a written document explaining the various processes that occur in the production area (how tanks are cleaned, how the tank contents are transfered to totes, what material is mixed in the tanks, what wastes are generated. etc...)

Description: Handler is engaged in the treatment, storage or disposal of hazardous waste
Classification: Large Quantity Generator
Description: Handler: generates 1,000 kg or more of hazardous waste during any calendar month; or generates more than 1 kg of acutely hazardous waste during any calendar month; or generates more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generates 1 kg or less of acutely hazardous waste during any calendar month, and accumulates more than 1 kg of acutely hazardous waste at any time; or generates 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulates more than 100 kg of that material at any time

Owner/Operator Summary:
Owner/operator name: MPI RICHMOND LLC
Owner/operator address: NW FRONT AVENUE
PORTLAND, OR 97210
Owner/operator country: US
Owner/operator telephone: 503-221-5880
Owner/operator email: Not reported
Owner/operator fax: Not reported
Owner/operator extension: Not reported
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 1960-01-01 00:00:00.
Owner/Op end date: Not reported

Owner/operator name: BRENNTAG PACIFIC, INC.

Owner/operator telephone: 562-903-9626
Owner/operator email: SMILLER@BRENNTAG.COM
Owner/operator fax: Not reported
Owner/operator extension: Not reported
Legal status: Private
Owner/Operator Type: Operator
Owner/Op start date: 2006-07-01 00:00:00.
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 214

BRENNTAG PACIFIC INC (Continued) **1000158759**

. Waste name: Unspecified solvent mixture

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: D018
. Waste name: BENZENE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F003

BRENNTAG PACIFIC INC (Continued) **1000158759**

. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

. Waste code: U080
. Waste name: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

. Waste code: U210
. Waste name: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

. Waste code: U228
. Waste name: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 2566

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 12080.1
