Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-15-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP) inspection. Observed the following hazardous materials at or above HMBP-reporting thresholds: -Waste petroleum hydrocarbons: Up to 2 x 55 gallons drums in warehouse -Prisco SES 2750PX (Anti-static): 1 x 55 gallon drum on shop floor with additional drums observed outdoors on northern end of property This material is not DOT-regulated and may classify as an irritant/sensitizer and therefore eligible for relaxed reporting requirements, however since no safety data sheet could be located, standard reporting thresholds will apply.

Eval Notes: Conducted a Hazardous Waste Generator Routine Inspection with Mickey Pierce from Hazardous Materials Compliance Division. Waste ID CAL000396263 is currently active. This facility is large scale

BR PRINTERS INC (Continued) **S118236087**

printing facility and was observed generating or has the potential to generate the following hazardous waste streams: -Waste oil (note: waste oil from HP Indigo printer) Inspected interior and exterior of facility, trash cans and dumpsters. Inspection included review of all available hazardous waste disposal receipts from last 3 years. The facility operator indicated that employees receive training or demonstrate that they are thoroughly familiar with proper hazardous waste management, which includes daily inspections of the hazardous waste container storage areas. Emergency equipment was available for use and fire extinguishers are annually serviced. Based on the observed waste generation amount, the facility is a small quantity hazardous waste generator. The [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-15-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility consists of a printing operation and office/warehouse space. Performed a walk-through with Mr. Barrios and observed the following hazardous waste: -Waste petroleum hydrocarbons: 1 x 55 gallon drums in warehouse This wastestream is generated from 1 x printing machine located on the shop floor. Two additional drums are stored on-site should waste output increase. Hazardous waste shipments occur on average every 1.5-3 months. The following violations were corrected on-site at time of inspection: -G020, hazardous waste markings for incomplete accumulation start date -G023, open hazardous waste container for funnel left in petroleum hydrocarbon drum top -G211, for lack of a complete emergency posting NOTES: -CAL000396263 is INACTIVE -Fire extinguishers were observed as maintained -Spill control (pads) were available -Training is provided as needed by management -Inspections are conducted at least weekly [Truncated]

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CLEAN HARBORS SAN JOSE RAIL SPUR TRANSFER FACILITY (Continued) **1010313167**

1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F004
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

CLEAN HARBORS SAN JOSE RAIL SPUR TRANSFER FACILITY (Continued) **1010313167**

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

. Waste code: F024
. Waste name: PROCESS WASTES INCLUDING, BUT NOT LIMITED TO, DISTILLATION RESIDUES, HEAVY ENDS, TARS, AND REACTOR CLEAN-OUT WASTES FROM THE PRODUCTION OF CERTAIN CHLORINATED ALIPHATIC HYDROCARBONS BY FREE RADICAL CATALYZED PROCESSES. THESE CHLORINATED ALIPHATIC HYDROCARBONS ARE THOSE HAVING CARBON CHAIN LENGTHS RANGING FROM ONE TO, AND INCLUDING FIVE, WITH VARYING AMOUNTS AND POSITIONS OF CHLORINE SUBSTITUTION. (THIS LISTING DOES NOT INCLUDE WASTEWATERS, WASTEWATER TREATMENT SLUDGE, SPENT CATALYSTS, AND WASTES LISTED IN SECTIONS 261.31. OR 261.32)

. Waste code: F032
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT CURRENTLY USE, OR HAVE PREVIOUSLY USED, CHLOROPHENOLIC FORMULATIONS [EXCEPT POTENTIALLY CROSS-CONTAMINATED WASTES THAT HAVE HAD THE F032 WASTE CODE DELETED IN ACCORDANCE WITH SECTION 261.35 (I.E., THE NEWLY PROMULGATED EQUIPMENT CLEANING OR REPLACEMENT STANDARDS), AND WHERE THE GENERATOR DOES NOT RESUME OR INITIATE USE OF CHLOROPHENOLIC FORMULATIONS]. (THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.)

. Waste code: F034
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE CREOSOTE FORMULATIONS. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F035
. Waste name: WASTEWATERS, PROCESS RESIDUALS, PRESERVATIVE DRIPPAGE, AND SPENT FORMULATIONS FROM WOOD PRESERVING PROCESSES GENERATED AT PLANTS THAT USE INORGANIC PRESERVATIVES CONTAINING ARSENIC OR CHROMIUM. THIS LISTING DOES NOT INCLUDE K001 BOTTOM SEDIMENT SLUDGE FROM THE TREATMENT OF WASTEWATER FROM WOOD PRESERVING PROCESSES THAT USE CREOSOTE AND/OR PENTACHLOROPHENOL.

. Waste code: F037
. Waste name: PETROLEUM REFINERY PRIMARY OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE GENERATED FROM THE GRAVITATIONAL SEPARATION OF OIL/WATER/SOLIDS DURING THE STORAGE OR TREATMENT OF PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH SLUDGES INCLUDE, BUT ARE NOT LIMITED TO, THOSE GENERATED IN OIL/WATER/SOLIDS SEPARATORS; TANKS AND IMPOUNDMENTS; DITCHES AND OTHER CONVEYANCES; SUMPS; AND STORM WATER UNITS RECEIVING DRY WEATHER FLOW. SLUDGES GENERATED IN STORM WATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

CLEAN HARBORS SAN JOSE RAIL SPUR TRANSFER FACILITY (Continued) **1010313167**

. Waste code: F038
. Waste name: PETROLEUM REFINERY SECONDARY (EMULSIFIED) OIL/WATER/SOLIDS SEPARATION SLUDGE - ANY SLUDGE AND/OR FLOAT GENERATED FROM THE PHYSICAL AND/OR CHEMICAL SEPARATION OF OIL/WATER/SOLIDS IN PROCESS WASTEWATERS AND OILY COOLING WASTEWATERS FROM PETROLEUM REFINERIES. SUCH WASTES INCLUDE, BUT ARE NOT LIMITED TO, ALL SLUDGES AND FLOATS GENERATED IN INDUCED AIR FLOTATION (IAF) UNITS, TANKS AND IMPOUNDMENTS, AND ALL SLUDGES GENERATED IN DAF UNITS. SLUDGES GENERATED IN STORMWATER UNITS THAT DO NOT RECEIVE DRY WEATHER FLOW, SLUDGES GENERATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS AS DEFINED IN SECTION 261.31(B)(2) (INCLUDING SLUDGES GENERATED IN ONE OR MORE ADDITIONAL UNITS AFTER WASTEWATERS HAVE BEEN TREATED IN AGGRESSIVE BIOLOGICAL TREATMENT UNITS), AND F037, K048, AND K051 WASTES ARE EXEMPTED FROM THIS LISTING.

. Waste code: F039
. Waste name: LEACHATE RESULTING FROM THE TREATMENT, STORAGE, OR DISPOSAL OF WASTES CLASSIFIED BY MORE THAN ONE WASTE CODE UNDER SUBPART D, OR FROM A MIXTURE OF WASTES CLASSIFIED UNDER SUBPARTS C AND D OF THIS PART. (LEACHATE RESULTING FROM THE MANAGEMENT OF ONE OR MORE OF THE FOLLOWING EPA HAZARDOUS WASTES AND NO OTHER HAZARDOUS WASTES RETAINS ITS HAZARDOUS WASTE CODE(S): F020, F021, F022, F023, F026, F027, AND/OR F028.)

. Waste code: K038
. Waste name: WASTEWATER FROM THE WASHING AND STRIPPING OF PHORATE PRODUCTION.

. Waste code: K040
. Waste name: WASTEWATER TREATMENT SLUDGE FROM THE PRODUCTION OF PHORATE.

. Waste code: K048
. Waste name: DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K049
. Waste name: SLOP OIL EMULSION SOLIDS FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K050
. Waste name: HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K051
. Waste name: API SEPARATOR SLUDGE FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K052
. Waste name: TANK BOTTOMS (LEADED) FROM THE PETROLEUM REFINING INDUSTRY.

. Waste code: K086
. Waste name: SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.

. Waste code: K087
. Waste name: DECANTER TANK TAR SLUDGE FROM COKING OPERATIONS.

. Waste code: P022

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-21-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP) inspection. Facility is a machine shop that works primarily with aluminum. Plastic parts are manufactured occasionally, and stainless steel parts manufactured approximately 3-4 times per year. Performed a walk-through with Mr. Le and observed 6 x medium-sized CNC machines, 3 x small CNC machines, and 2 x lathes. Per Mr. Le, no hazardous waste is generated. Coolant is added to machines as needed, and no skimming of oil takes places. At time of inspection, no hazardous waste was observed on-site. The type of hazardous materials used (as evident by containers on shop floor) are Rustlick ultracut pro and Total spirit 9955. The following hazardous materials were observed at or above HMBP reporting thresholds: -Coolant: Approximately 300 gallons in 9 x CNC machines NOTES: -Facility began operations in 2011. -Scrap metal is recycled. -Main entrance to facility is located in rear of building (adjacent to [Truncated]

prepares, packages, and distributes nicotine-containing vaping liquids. Per a walk-through of rear warehouse and laboratory on 7/11/18, and a discussion with Mr. Doan today, the following hazardous waste management process was identified: -Five gallon containers of propylene-glycol and vegetable glycerin-based flavorings are used until "California" empty (no remaining liquids within containers) and are then disposed of into the dumpster. -Equipment and glassware that is contaminated with nicotine through the preparation/packaging process are washed in a commercial dishwasher/glasswasher. Approximately five gallons of nicotine-contaminated water is generated from this unit every 3-4 days. The nicotine-contaminated water is managed as a hazardous waste, and is containerized in either 1 x 55 gallon poly drum, or in empty Nicotine-contaminated 1 gallon containers. -Nicotine-contaminated containers are not [Truncated]

Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 07-11-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to conduct a hazardous materials business plan (HMBP) permit investigation. Facility packages and distributes nicotine-containing liquid vapor products. Performed a walk-through of rear warehouse and laboratory, and observed the following hazardous materials above HMBP-reporting thresholds: Nicotine (liquid): Approximately 20 x 1 gallon containers (as an "extremely hazardous substance" the federal reportable quantity [RQ] for nicotine is 100 pounds) Facility also handles approximately 4 x 55 gallon poly drums of food grade propylene glycol, however this material qualifies as a simple irritant, and therefore is below the reporting threshold of 500 gallons. As a result of this site visit, the facility will be issued a HMBP permit. NOTES: -Additional guidance will be provided to the facility regarding management of empty nicotine containers as well as potentially contaminated solids generated through packaging and clean-up activities.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

Completed Document Type: Technical Report
Completed Date: 02/07/2014
Comments: A series of subsurface investigations and limited remedial work was performed at the site from 2005 to 2008. Because the site development was put on hold due to real estate economic conditions, data evaluation and reporting was not performed. The Site Status Update was submitted prior to preparing the Preliminary Endangerment Assessment Report in order to obtain a determination from DTSC on whether additional sampling was needed. The Site Status Update summarized sampling activities performed as part of the Preliminary Endangerment Assessment investigation and presented a synopsis of the sample analytical data. DTSC identified additional areas where sampling was needed in the letter it sent in response.

TOUCHE MANUFACTURING INC (Continued) **S102820182**

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Technical Report
Completed Date:	12/15/2015
Comments:	The soil vapor report presents the results of soil gas sampling at three locations along the northeastern site boundary that was performed to assess the lateral extent of tetrachloroethylene (PCE) in soil gas. The sampling showed that the PCE in soil gas does not extend to the northeastern site boundary. PCE and other volatile organic compounds were not detected, except at one location where PCE was detected at a concentration of 4.2 micrograms per cubic meter, which was below the residential screening level of 480 micrograms per cubic meter

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Public Notice
Completed Date:	07/20/2016
Comments:	A public notice was published in the Metro newspaper that announced DTSC's intent to enter into a Land Use Covenant with the Site owner based on the findings of the Preliminary Endangerment Assessment.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Soils Management Plan
Completed Date:	12/16/2016
Comments:	The Soil Management Plan this SMP provides the environmental protections for the planned multifamily residential development of the Site, including excavation to remove soils with elevated hexavalent chromium in the vicinity of soil sample location SB-36, collection of additional samples to further characterize nickel concentrations in soil in the vicinity of soil sample locationsSB-36 and SB-37, and management of potential construction worker exposure to volatile organic compounds (VOCs) in areas with potentially-affected soil.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Supplemental Site Investigation Workplan
Completed Date:	04/14/2017
Comments:	The Work Plan describes additional sampling to be performed to characterize the residual volatile organic compounds (VOCs) in soil gas within an affected area that was identified during previous Site investigations. The soil gas sampling results will be used to assess whether there remains an unacceptable risk to human health via the vapor intrusion pathway and whether the residential buildings that are to be constructed in the VOC-affected area require a vapor intrusion mitigation system as recommended by the Preliminary Endangerment Assessment Report.

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Design/Implementation Workplan
Completed Date:	11/22/2017
Comments:	The Vapor Mitigation Plan includes the design and operation and maintenance procedures for the vapor intrusion mitigation systems to be installed at Buildings A and B at the Site. Buildings A and B are

TOUCHE MANUFACTURING INC (Continued) **S102820182**

to be constructed within the Volatile Organic Compound-Affected Area that is defined by and subject to restrictions and requirements included in Section 4.4 of the Land Use Covenant for the Site between DTSC and Pulte Home Company, LLC, which was recorded with Santa Clara County on September 21, 2017. DTSC approved revisions to the sub-slab vapor barrier and venting system design drawings with a February 2, 2018 letter.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 12/23/2019
Comments: The reports summarize the results of the soil vapor monitoring event that was conducted at the Former Serra Silicon Valley Company Site on December 13, 2018 (Baseline monitoring event) to meet the requirements of the Revised Vapor Mitigation Plan for the Site. Soil vapor samples were collected from vapor monitoring points below the vapor intrusion mitigation systems (VIMS) constructed beneath Buildings A and B at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 12/23/2019
Comments: The reports summarize the results of the soil vapor monitoring event that was conducted at the Former Serra Silicon Valley Company Site on June 11, 2019 (6-month monitoring event) to meet the requirements of the Revised Vapor Mitigation Plan for the Site. Soil vapor samples were collected from vapor monitoring points below the vapor intrusion mitigation systems (VIMS) constructed beneath Buildings A and B at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 09/21/2017
Comments: The Land Use Covenant was recorded with Santa Clara County and includes restrictions on the type of residential land use on the Site. A portion of the Site has soil vapor impacted with volatile organic compounds, primarily tetrachloroethene. This portion of the Site is identified in the Covenant as the VOC-Affected Area and there is a restriction in the Covenant that no structures may be built on this area without a vapor intrusion mitigation system approved by DTSC.

Evaluation:

Eval General Type:	Other/Unknown
Eval Date:	05-15-2018
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On-site with Loren Lim to conduct a Hazardous Materials Business Plan (HMBP) permit investigation. Nippon Trends Food Service manufactures fresh ramen noodles. They also buy other products such as soup base and gyoza skin which they sell to restaurants. They have been in operation at this location since 2000. A walk-through of the facility was conducted with Kristi Yamashita. The following hazardous materials were observed at or above HMBP State-reporting thresholds. Outside Storage Area: - 2 x 55 gal drums ethyl alcohol Warehouse: - 6 x 55 gal drums of propylene glycol Per Ms. Yamashita, the chemicals are mixed with the products and no hazardous wastes are generated. Based on this information, this facility will be issued a Hazardous Materials Business Plan permit for storing/ handling between 1-3 reportable hazardous materials. Notes: - >30 x 55 gal empty drums were observed in the Outside Storage Area. Ms. Yamashita stated that they are in the process of [Truncated]

Eval General Type:	Other/Unknown
Eval Date:	09-16-2016
Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	On-site to determine status of violations observed on a routine hazardous waste inspection conducted on 5/19/16. All violations with the exception of the inactive EPA ID number were observed as corrected. Per Mrs. Lucas' documentation, it was faxed and mailed on 6/1/16. State of California hazardous waste tracking system was down at time of inspection and this issue and so status could not be ascertained. No further action is required at this time.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-16-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: State ID CAL000290788 is active. Facility performs machining and machines with materials primarily consisting of 6000 series aluminums. No high pressure or fine misting machines used. Mobile 1 is used as machine lubricant Trim Microsol 585XT (oil based water soluble) is used as the coolant. Deburring is mostly performed manually with sandpaper and pads. On occasion a media blaster is used containing silicon carbide. 1 small tumbler is also occasionally used. Both blaster and tumbler are predominantly used on aluminum 6000 series metal. No downdraft table used. Floor sweepings are collected and placed in scrap metal. Did not observe any metal waste in the internal trash receptacles or in the outside trash dumpster. Reviewed documentation including: Consolidated manifests (oil/coolant waste) (Disposal occurs approximately every 2-3 months) Facility is eligible to participate in the County's hazardous waste disposal program for small businesses. Eval Date: 12-04-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to conduct a hazardous waste inspection. Facility performs precision machining on aluminum primarily. Stainless steel and plastics are handled as well but infrequently. Performed a facility walk-through with Mr. Le and observed the following hazardous waste: -Waste oily water: 1 x 55 gallon drum Hazardous waste shipments occur app. 1-2 per year with the most recent taking place on 11/2/15. Additionally, a bead blasting unit was observed in the south room. Mr. Le stated the unit is used infrequently, but when used, aluminum is the material blasted. Mr. Le was that if using a blaster on stainless steel the ensuing blast media, if changed-out, may meet hazardous waste criteria. The following violations were corrected on-site at the time of this inspection: -G023 (container open) for open port holes on 1 x 55 gallon drum of waste oily water -G110 (maintenance and operation of facility) for free-flowing oily water accumulating on lid of 1 x 55 gallon drum of [Truncated]

Violations:
Site ID: 404010
Site Name: THERMA
Violation Date: 08-16-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: BASED ON FIELD OBSERVATIONS IT WAS VERIFIED TANK 3(REGULAR), TANK 2(MIDGRADE) DO NOT HAVE OVERFILL EQUIPMENT. TANK 1(DIESEL) HAS A MECHANICAL FILL TUBE SHUT-OFF VALVE. PER THE OVERFILL INSPECTION REPORT CERTIFIED BY THE TECHNICIAN ON JANUARY 16, 2019, TANK 1 MECHANICAL FILL TUBE SHUT-OFF VALVE WAS SET HIGHER THAN ALLOWED. *****SUBMIT A PERMIT FOR THE ADDITION AND AMENDMENTS TO THE OVERFILL EQUIPMENT.

Violation Date: 08-25-2016
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description: Hazardous Waste Generator Program - Operations/Maintenance - General
Violation Notes: Returned to compliance on 09/15/2016. Observed 1x1 gal container of Methyl Ethyl Ketone Peroxide < or equal to 45% (9% active oxygen maximum) stored outside and unshielded from the sunlight and outdoor conditions. This is a type D organic peroxide meaning: (i) Detonates only partially, but does not deflagrate rapidly and is not affected by heat when confined; (ii) Does not detonate, deflagrates slowly, and shows no violent effect if heated when confined; or (iii) Does not detonate or deflagrate, and shows a medium effect when heated under confinement. This organic peroxide must be kept in a cool location as high heat will degrade chemical, leading to gassing and pressure build up that may potentially rupture the container resulting in a possible fire and/or explosion.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 03/20/1990
Comments: Completed Site Screening. In August of 1989, three underground storage fuel storage tanks were removed under the supervision of the San Jose Fire Department. Soil discoloration was observed. Eight soil samples detected elevated levels of total petroleum hydrocarbons as gasoline (TPHg); total petroleum hydrocarbons as diesel (TPHd); and benzene, toluene, ethylbenzene, and total xylenes (BTEX). The contaminated soil was excavated and disposed offsite. Residual levels are below residential screening levels.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 03/15/2002
Comments: The site was referred to the Santa Clara Valley Water District.

Future Area Name: Not reported

Longitude:	-121.85945
Status:	Completed - Case Closed
Status Date:	07/25/2017
Case Worker:	GOR
RB Case Number:	06-010
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	06S1E33H01f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, Diesel, Gasoline
Site History:	Site history based on conclusions and recommendations in the March 30, 2102, Site Conceptual Model Report: The chemicals of concern (COCs) for the case appear to be limited to TPHd, TPHg, BTEX, and MTBE. Of these compounds, the release appears to be predominantly TPHd with low concentrations of TPHg and trace levels of MTBE and benzene within source area soils and groundwater. Overall, the site investigations to date have characterized the subsurface lithology and COC impacts associated with the release, except for the areas down-gradient of boring EB-6, cross-gradient boring EB-4, and in the area near the former USTs adjacent to the existing site building. Therefore, data gaps remain in the understanding of the subsurface lithology and COCs in these areas associated with the release resulting in an unknown hazard risk for occupants of the site building and off-site residences from breathing MTBE-vapor associated from vapor intrusion from impacted groundwater and soil. These data gaps should be addressed by the installation of up to three direct-push borings, and the collection of soil, groundwater, and/or soil gas samples from the borings. One step-out boring is proposed to be drilled to a depth of 25 feet bgs approximately 35 feet west of boring EB-4. Grab water samples collected from this boring should be tested for TPHd. A second 25 feet deep step-out boring is proposed 40 feet northwest of EB-6. Groundwater samples collected from this boring should be tested for MTBE. Soil gas samples should also be collected from approximately five feet bgs from the step-out boring northwest of EB-6, and from a boring adjacent to the site building near the former USTs. The soil-gas samples should be tested for MTBE. The soil-gas concentration data can be compared to soil-gas concentration criteria (criteria with and without a document bio-attenuation zone beneath the site) to determine if the fuel-release case may pose an unacceptable risk to occupants of the site building and off-site residences (breathing hazard from vapor intrusion). A discussion with the CCDEH representative should be made before future work is performed, and a work plan should be prepared and approved by the SCCDEH to document the proposed work scope.

Case Worker: GOR
RB Case Number: 14-063
Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E04C05f
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern: Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: December 15, 2011, soil and groundwater investigation report Indicates that shallow soil and groundwater beneath the site is impacted with TPH-gasoline and benzene. Additional site characterization will be needed to define the extent of contamination. Based on the results, a feasibility study should be conducted to select the remedial alternatives and to prepare a corrective action plan.

Site History:	On May 29, 1990 a (vadose) monitoring well was installed in the

PACIFIC AUTO REPAIR (Continued) **S101309215**

former waste oil tank backfill to comply with the City of San Jose's local hazardous materials ordinance. A soil sample collected at the bottom of the borehole at eight feet (ft) below ground surface (bgs) contained 190 milligrams per kilogram (mg/kg) of total petroleum hydrocarbons in the gasoline range (TPHg); 49 mg/kg of total petroleum hydrocarvon compounds in the diesel fuel range (TPHd); and 64 mg/kg total petroleum hydrocarbon compounds in the motor oil range (TPHmo). These results were transmitted to the City of San Jose Fire Department on August 14, 1990 by D&D Management Consultants Inc.

CERS ID: 10346998
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 54571
Site Name: PACIFIC AUTO REPAIR
Violation Date: 01-12-2018
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Waste coolant has been accumulated on-site for longer than is allowed. Within 30 days make arrangements to have it picked-up. Retain a disposal receipt for a minimum of 3 years.

Violation Date: 01-10-2014
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description: Failure of the pressurized piping to meet one or more of the following requirements: monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour, and will restrict the flow of product through the piping or trigger an alarm when a release occurs.
Violation Notes: Returned to compliance on 01/10/2014. The 87 MLLD did not detect the leak when initally tested. After adjustment, the MLLD functioned as required. No further corrective actions needed. NOTE: The 87 MLLD needed adjustment at the last montioring certification as well. If the MLLD fails inital testing

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 05-08-2015
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site for Underground Storage Tank (UST) secondary containment (SB989) testing performed by Mr. Tony Fontana (certifications current) of UST Compliance. Sumps and under dispenser containment tested with INCON accelerated testing equipment. Piping sumps were tested prior to my arrival. Reviewed passing results on printout. Noted that the diesel sump was mislabeled as 91 and the printout corrected by hand. Annular spaces were also tested with passing results per tester. Product lines were tested at 5 psi. Observed the diesel line still pressurized and holding 5 psi for 30 minutes after my arrival. Pressure gauge fell to 0 when released. Witnessed 3/4 UDC tests pass. UDC for dispenser 1/2 failed at an undetermined location. Electrical penetration boots were tightened and the UDC still failed the test. Have repairs done as soon as possible and re-test UDC 1/2. Submit the Secondary Containment Report to our office within 30 days and keep a copy available for [Truncated]

Eval Notes: On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Tony Fontana (ICC# 1064273-UT, exp. 6/23/2014; VR L4 #A23686; exp. 8/9/2015; VMI Test 2333, Install 2332, exp. 6/24/2015) of UST Confidence. Site consists of three tanks (87 and 91 split tank, and diesel), and 4 dispenser pairs. The STP and annular spaces are monitored by Veeder-Root sensors at a Veeder-Root TLS 350 panel. The panel was observed to be in "All functions normal" on arrival. The sumps were clean and dry upon arrival except for the diesel sump that had a small amount of water. The UDCs are monitored by Bravo float and chain assemblies. The STP sump (VR 208) and annular (VR 407) sensors were tested with water and provided audible and visible alarms. The STP sump sensors also provided positive shutdown of their respective turbines. Sensor out and power out (fail safe) provided positive shutdown of all the turbines. The VMI LD200 MLLDs were tested at [Truncated]

MABURY YARD CITY OF SAN JOSE (Continued) **1000595791**

Violation Date:	03-28-2018
Citation:	22 CCR 23 66273.34 - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.34
Violation Description:	Failure to label or mark each individual or container or the designated area of universal waste as required. 1) Waste batteries shall be marked with "Universal Waste-Battery(ies)G . 2) Mercury containing equipment shall be marked with "Universal Waste -Mercury-Containing EquipmentG . 3) Lamps shall be marked with G Universal Waste-Lamp(s)G . 4)Each electronic devices or the container or the designated area shall be marked with G Universal Waste-Electronic Device(s)G . 5) Each CRTs or the container or the designated area shall be marked with "Universal Waste-CRT(s)G . 6) CRT glass or the designated area shall be marked with G Universal Waste-CRT glassG .
Violation Notes:	Electrical Warehouse; -Observed several boxes of used 6ft fluorescent lamps that were not labeled with a universal waste label. Hazardous Waste Storage area; - Observed 1 x 55 gal., storing waste aerosol cans with an accumulation start date of; 2/30/18 which is an invalid date as the month February 2018 ended on the 28th. Electronic waste dumpsters and electronic waste storage area; - Observed 2 dumpsters storing electronic waste without a universal waste label - The electronic waste storage area for TV screens, computer monitors, etc., wasn't labeled with the required information. All universal waste must be labeled as required and with valid accumulation dates. For areas where waste electronic components are stored, the area should be clearly labeled.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	106377
Site Name:	CITY OF SAN JOSE - MABURY SERVICE YARD
Violation Date:	06-22-2018
Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes:	The following under dispenser containment (UDC's) float and chain mechanism failed when they were tested; 1) UDC 3/4- The float was stuck and would not trip the shear valve. Technician retested it and passed. 2) UDC 5/6- Upon arrival at this dispenser the UDC was filled with about 3-4 inches of diesel fuel. The diesel was leaking from the filter inside the dispenser from hose #5. The float was filled with fuel and did not trip the shear valve. The fuel was pumped out and put back in the UST. Technician re-tested the UDC with water and it passed. No further action is required at this time.

Citation:	22 CCR 23 66273.31(a) - California Code of Regulations, Title 22, Chapter 23, Section(s) 66273.31(a)
Violation Description:	Failure of the universal waste handler to transfer universal waste to

MABURY YARD CITY OF SAN JOSE (Continued) **1000595791**

	the appropriate destination facility.
Violation Notes:	Electrical warehouse; - Observed broken glass from high pressure low sodium lamps and commercial type batteries inside one the trash cans at the warehouse. At the time of the walk-through part of the broken bulb was removed and placed inside a 55 gallon metal drum which contained broken glass. The commercial type batteries were placed in its appropriate container. However, due to how much garbage was inside the trash can, I was unable to determined if there was anymore broken glass or other type of universal waste. At this time, remove all of the trash from the 3 metal trash cans inside the warehouse and remove any broken bulbs or any other universal waste from the trash cans and manage it accordingly. In the future all universal waste must be recycled and not thrown in the trash can. Notify our office in writing how you will prevent this from happening in the future.

Violation Date:	06-22-2018
Citation:	23 CCR 16 2637 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637
Violation Description:	Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test within six months of installation and every 36 months thereafter.Use a procedure that demonstrates the system works as well as at installation.Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval.Performed by a certified service technician or a licensed tank tester.
Violation Notes:	Based on an inspection report issued on 10/25/17 by Albert Wolff, Hazardous Materials Specialist from our office. The SB9890 Secondary Containment testing took place on that date. However, the only components that passed/or were tested on that day were the 3- UDC's. All STP sumps and all product lines for all three tanks still remain to be tested. Within 30 days complete the secondary containment testing for the components mentioned above. Additionally, contact Ana Bui (408)918-1952 or ana.bui@cep.sccgov.org to witness testing of these components.

Citation:	23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description:	Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes:	Upon arriving at the fleet shop, observed the veeder root panel power light not working. Additionally, the following alarms were observed to be in alarm; "L2 and L5". Replace the power light with a functional one, additionally make sure that both alarms at the veeder root panel are being addressed accordingly. Notify our office in writing how this issue was resolved.

Violation Notes: Returned to compliance on 07/19/2018. OBSERVED 3- VR#208 SENSORS INSIDE THREE OF THE STP SUMPS FOR TANKS FOR 2 DIESEL, AND 1 UNLEADED FUEL. THE SENSORS WERE NOT PLACED IN AN UPRIGHT POSITION BUT RATHER AT AN ANGLE (PHOTOGRAPHS WERE TAKEN). ALL SENSORS ARE HELD BY A METAL BRACKET AND THE BRACKET FAILS TO KEEP THE SENSORS IN THE UPRIGHT POSITION. ENSURE THAT SENSORS ARE PLACED IN THE UPRIGHT POSITION. PROVIDE TO OUR OFFICE IN WRITING HOW THIS ISSUE WAS RESOLVED.

Violation Description:	Haz Waste Generator Program - Administration/Documentation - General
Violation Notes:	Returned to compliance on 10/21/2015. IN ORDER TO AVOID HAZARDOUS WASTE FROM ENDING AT THE "DUMP SITE LOCATION" ADDITIONAL SIGNAGE NEEDS TO BE AVAILABLE POINTING EMPLOYEES TO THE EXACT LOCATION OF WHERE THE HAZARDOUS WASTE CAN BE DROP-OFF INSTEAD. THE SIGNAGE THAT IT IS CURRENTLY AVAILABLE AT THE "DUMP SITE" TELLS EMPLOYEES TO DUMP ALL HAZARDOUS WASTE IN THE ASSIGNED DESIGNATED LOCATIONS BUT IT FAILS TO DIRECT THEM TO WHERE ARE THE "DESIGNATED LOCATIONS" ARE. THIS IS PARTICULAR IMPORTANT FOR THOSE EMPLOYEES THAT ARE NOT D.O.T. EMPLOYEES AND ARE DUMPING DEBRIS IN THE "DUMP SITE AREA". ADDITIONALLY, DAILY INSPECTIONS OF THE "DUMP SITE" AREA ARE NOT BEING CONDUCTED DAILY AS IT IS DESCRIBED ON YOUR S.O.P'S. THIS WAS ALSO REQUIRED OF YOU TO CONDUCT ON THE LAST INSPECTION REPORT ISSUED ON 9/18/14 DURING A COMPLIANT INVESTIGATION. ENSURE THAT DAILY INSPECTIONS ARE BEING LOGGED OF THE DUMP SITE AREA.

Citation:	23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description:	Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.

MABURY YARD CITY OF SAN JOSE (Continued) **1000595791**

Violation Notes:	Returned to compliance on 07/03/2014. OBSERVED ABOUT 2-4 INCHES OF FUEL INSIDE TWO SPILL BUCKETS, FOR TANK 1 AND TANK 3. BOTH OF THESE UST'S STORE B20 FUEL. WHEN I ASKED SR. MECHANIC, MR. PALLADINO TO OPEN THE TWO SPILL BUCKETS HE WAS SURPRISED TO FIND FUEL INSIDE. FURTHERMORE, THERE WAS A METAL ROD INSIDE EACH OF THE SPILL BUCKETS (PHOTOGRAPHS WERE TAKEN). MR. PALLADINO DID NOT WHO HAD PLACED THE METAL ROD INSIDE THE BUCKETS. BASED ON MY OBSERVATIONS, IT APPEARS THAT THE DRAINING MECHANISM OF THE SPILL BUCKETS IS NOT FUNCTIONING PROPERLY AND IS NOT ALLOWING THE FUEL TO DRAIN BACK INTO THE TANK. THEREFORE, IT APPEARS THAT THE METAL RODS WERE PLACED INSIDE THE BUCKETS TO KEEP THE DRAIN VALVE IN AN OPEN POSITION. CLEAN UP THE FUEL INSIDE THE SPILL BUCKETS IMMEDIATELY. ADDITIONALLY, REPAIR/OR REPLACE SPILL BUCKET IMMEDIATELY. IF REPLACEMENT OF THE SPILL BUCKETS ARE NECESSARY YOU WILL NEED TO APPLY FOR A PERMIT WITH OUR DEPARTMENT. FURTHERMORE, BOTH SPILL BUCKETS NEED TO BE HYDROSTATICALLY TESTED WITHIN 30 DAYS TO [Truncated]

Eval Notes: Inspection began yesterday with site visit and concluded today with issuance of this report. On site yesterday to accompany State Water Resources Control Board (SWRCB) inspectors Tom Henderson and Rebecca Green as they performed an underground storage tank (UST) inspection as part of the SWRCB's Government-Owned Tanks initiative. UST Service Technician Anthony McIntyre of TEC Accutite was on-site to provide access to the tank top sumps and under dispenser containment (UDC) systems. This inspection also follows up on HMCD's last annual UST compliance inspection, which occurred on 6/27/2014. Notes: 1. Violation U036 cited in 6/27/2014 Official Notice of Inspection was corrected on 8/1/2014 when Designated UST Operator trained facility employees. No further action is required. However, ensure that you address all violations cited in all Official Notices of Inspection from now onward and submit written notice of corrective actions taken as required. 2. Monitoring system [Truncated]

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: *Site Inspection (SI) Report
Completed Date: 10/21/1988
Comments: Completed SI. In August 1986, while transferring solvent from one subsurface underground tank to another, about 260 gallons solvent (Hi Sol #10) spill occurred in the underground storage tank (UST) farm. The subsequent investigation found levels of total hydrocarbons in the soil (7600 ppm) at the site and in the groundwater (56 ppb) below the site. SF Regional Water Quality Control Board (RWQCB) issued Cleanup and Abatement Order (CAO) No. 87-004 to Dap. Starting in August 1988, seven USTs and contaminated soil were removed. The soil analyses results showed ethyl benzene (5 to 14 ppb), 1,4-dichlorobenzene (15 ppb), toluene (0.8 to 20 ppb) and xylene (15 to 150 ppb).

FINDS:
Registry ID: 110002660987

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS ID: 10725175
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 419773
Site Name: ONE STOP SHOP TRUCK & TRAILER INC
Violation Date: 10-19-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 11/15/2018. The quantity of Acetylene and Oxygen compressed gas reported on CERS is lower than that observed on-site. Within 30 days, revise your inventory on CERS to reflect accurate quantities of both gases handled on-site.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 419773
Site Name: ONE STOP SHOP TRUCK & TRAILER INC
Violation Date: 10-19-2018
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 11/15/2018. Observed a partially paved area outside of the repair bay that is used to repair steel trailers. Part of the repair process involves welding and metal grinding. Metal grindings were observed to likely impact soil. Cease all metal work in unpaved areas. Limit this work to paved areas or indoors, and ensure all metal grindings are collected and managed as scrap metal. Recommendation: Do not park any leaking vehicles on dirt lot. Isolate these vehicles to paved areas and utilize drip pans to collect any potential leaks of automotive fluids.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-19-2018

LEASING SYSTEMS INC (Continued) **1000382352**

Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Observed the following hazardous materials on-site at or above HMBP-reporting thresholds: -Used oil: 2 x 55 gallon drums -Acetylene: Approximately 4 x 150 cu ft. cylinders -Oxygen: Approximately 4 x 200 cu ft. cylinders OTES: -CERS ID: 10725175 -A HMBP was submitted on 3/29/18 and was reviewed as administratively complete.
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HMRRP
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	10-19-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a routine hazardous waste inspection. Facility repairs trucks. Performed a walk-through with Mr. Dominguez, and observed the following hazardous waste in the repair bay: -Used oil: 2 x 55 gallon drums -Used oil & fuel filters (metal filters only): 1 x 55 gallon drum The following violations were corrected on-site at time of inspection: -G412, used oil filter markings, accumulation start date was added to label -G211, emergency posting, a posting was filled-out and affixed to wall in the office NOTES: -CAL000353229 is active. -Fire extinguishers and spill absorbent were observed. -Weekly inspections are conducted. -Hazardous waste training is provided via monthly safety meetings. -Consolidated manifests were reviewed. Used oil is picked-up approximately every 1-2 months, and used oil filters picked-up approximately every 2-3 months. -Facility stated that no waste coolant is generated. Any coolant removed from trucks is put back into it [Truncated]

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-14-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On-site to perform a routine Hazardous Waste Generator inspection. T & P Auto Services does auto repair. A walk-through of the facility was conducted with owner, Tony Thai. The following hazardous waste streams were observed: - 3 x 15 gal drums of used oil - 1 x 55 gal drum of used oil filters - approx. 3 x 5 gal containers of mixed used paper and metal oil filters State ID: CAL000371583 is active. Observed fire extinguishers as annually maintained, last service date: 2/14/2018. Absorbent is available on-site. Per Mr. Thai, he inspects the hazardous waste storage shed about every 2 days. Employees are trained in hazardous waste management. Shop towels are commercially laundered by Mission Uniform. Battery core exchange is done with Interstate. When brake lathe is used, metal shavings are collected and recycled. 2018 disposal receipts for the used oil were reviewed. Pick-ups do not exceed allowable time limits for a Small Quantity Hazardous Waste Generator. [Truncated]

Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E04G02f
Potential Media Affect: Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: 1988: Petroleum hydrocarbons were discovered in subsurface soils during repair of fuel piping below a dispenser island (Amen, Kieth and Berg, 1989). Three 5,000-gallon gasoline underground storage tanks (UST) were located on the northeastern portion of the Site; a 12,000 gallon gasoline UST and 550-gallon waste oil UST were located in the southwestern portion of the Site, and four fuel dispenser islands were located in the northwestern portion of the original property (Tank Protect Engineering, Inc., 1993). These facilities were demolished during soil remediation at the site which was initiated in 1990. The site was redeveloped to its current configuration in 2000.

Violation Description:	Failure to use a registered hazardous waste hauler to transport hazardous waste.
Violation Notes:	Returned to compliance on 03/19/2016. The piping discovered on site at 2701 Story Road was from the piping replacement project SR0846206.

GAS AND SHOP (Continued) **S101303976**

This piping was discovered today on site at 2701 Story Road. The piping was piled below a low chain-link fence on site, exposed to the elements and easily removed by hand. This debris was cut to fit in open top drum on hand, and placed inside. This is to be managed properly as hazardous waste. This was confirmed by John "Jack" Winner. Jack Winner, Self Service Petroleum, DUSTO, ICC # 5238529, Designated Operator expires 8/19/2016. ICC # 5238529, Serv Tech expires 7/21/2017

WATSON PARK (Continued) **S107737590**

Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Investigation Report
Completed Date:	12/11/2006
Comments:	Investigations at the site have determined that contamination above screening levels (primarily lead) exists in soil in the southern portion of Watson Park, under Empire Gardens Elementary School and on some adjacent residential properties along Terrace Drive. Contamination was not found in the Dog Park, the Soccer Bowl, in Coyote Creek or along 21st Street or Jackson Avenue. Contamination above screening levels was also not found in ground water or surface water at the Site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Remedial Action Plan
Completed Date:	02/19/2009
Comments:	The RAP approves capping and instuitional controls for the remedy for the park. The soil from the Tereace Drive Properties Expedited Removal Action and two hot spots in the northeast corner of the park will be capped with the clean soil from the northern section of the park resulting in a change to the floodplain. Some additional sampling will be done in the area behind the Terrace Drive Properties that had not been sampled previously.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	CEQA - Responsible Agency Review
Completed Date:	02/09/2009
Comments:	The Notice of Determination(NOD) found the project was covered under the City of San Jose's initial study/mitigated negative declaration and would not have a significant negative effect on human health and the environment due to the short duration and controlled manner in which the contaminated soils will be moved and capped.

Completed Sub Area Name:	Not reported
Completed Document Type:	Other Report
Completed Date:	09/22/2009
Comments:	After edits were made, the memo was approved by email.
Completed Area Name:	Terrace Drive Properties
Completed Sub Area Name:	Not reported
Completed Document Type:	Removal Action Completion Report
Completed Date:	11/25/2009
Comments:	The removal action consisted of additional excavation of lead-contaminated soil around the fences and other selected locations in the backyards of the Terrace Drive properties. A slurry seal was placed in the crawl spaces of the foundations over the exposed lead-contaminated soil for 450 and 456 Terrace Drive to prevent contact with the soil. A total of 160 cubic yards of lead-contaminated soil was removed and placed on Watson Park in the area designated for the soil cap and land use covenant.
Completed Area Name:	Park
Completed Sub Area Name:	Not reported
Completed Document Type:	Soils Management Plan
Completed Date:	12/04/2018
Comments:	The Site Management Plan: 1) presents general health and safety guidelines for Site construction or maintenance workers who may be exposed to soil that may contain residual constituents of concern; 2) presents soil management guidelines for the excavation, characterization, reuse of Site soil, and import of clean fill material; 3) summarizes portions of the Land Use Covenants for the homeowners at 414, 420, 426, 432, 438, 444, 450, 456, and 460 Terrace Drive that are relevant to management of soil generated in the course of future activities at the Site; and 4) provides ongoing requirements for inspections and/or repairs to the soil or paved cap areas.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Workplan
Completed Date: 02/06/2006
Comments: Workplan approved for soil, groundwater and surface water sampling.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Fieldwork
Completed Date: 04/21/2006
Comments: Soil/water sampling completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 12/11/2006
Comments: Investigations at the site have determined that contamination above screening levels (primarily lead) exists in soil in the southern portion of Watson Park, under Empire Gardens Elementary School and on some adjacent residential properties along Terrace Drive. Contamination was not found in the Dog Park, the Soccer Bowl, in Coyote Creek or along 21st Street or Jackson Avenue. Contamination above screening levels was also not found in ground water or surface water at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Plan
Completed Date: 02/19/2009
Comments: The RAP approves capping and instuitional controls for the remedy for the park. The soil from the Tereace Drive Properties Expedited Removal Action and two hot spots in the northeast corner of the park will be capped with the clean soil from the northern section of the park resulting in a change to the floodplain. Some additional sampling will be done in the area behind the Terrace Drive Properties that had not been sampled previously.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: CEQA - Responsible Agency Review

Completed Document Type: Removal Action Completion Report
Completed Date: 03/28/2007
Comments: The report documents the removal of 5000 yards of lead contaminated soil and 200 cubic yards of debris from 8 residential properties.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 07/02/2009
Comments: The design and implementation plan for Watson Park includes grading plans and air monitoring plans for consolidation and capping of contaminated soils at the site. This work is expected to take between 8 and 12 weeks. Once the material is capped, additional park improvement work will be conducted without DTSC oversight.

Completed Area Name: Terrace Drive Properties
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 03/14/2008
Comments: Responsiveness summary approved 3-14-08.Final RAW approves the final remedy as the expedited removal from 2006 which removed 3-5 feet of contaminated soil and capped with clean fill and land use covenants (LUCs)(no digging below 3 feet, soil management plans, annual inspections) for the eight residential properities.

Completed Area Name: Terrace Drive Properties
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 09/22/2009
Comments: After edits were made, the memo was approved by email.

Completed Area Name: Terrace Drive Properties
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 11/25/2009
Comments: The removal action consisted of additional excavation of lead-contaminated soil around the fences and other selected locations in the backyards of the Terrace Drive properties. A slurry seal was placed in the crawl spaces of the foundations over the exposed lead-contaminated soil for 450 and 456 Terrace Drive to prevent contact with the soil. A total of 160 cubic yards of lead-contaminated soil was removed and placed on Watson Park in the area designated for the soil cap and land use covenant.

Completed Area Name: Park
Completed Sub Area Name: Not reported

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 551
. Waste name: Laboratory waste chemicals

ELCON PRECISION LLC (Continued) **1000338166**

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D011
. Waste name: SILVER

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING

ELCON PRECISION LLC (Continued) **1000338166**

OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: P064
. Waste name: METHANE, ISOCYANATO- (OR) METHYL ISOCYANATE

. Waste code: U165
. Waste name: NAPHTHALENE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 6556

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 94380

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 23276

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 64592

Waste code: D008
Waste name: LEAD
Amount (Lbs): 22638

Waste code: D011
Waste name: SILVER
Amount (Lbs): 23166

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

ELCON PRECISION LLC (Continued) **1000338166**

NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 396

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Completed Document Type: Amendment - Order/Agreement
Completed Date: 11/05/2015
Comments: The First Amendment to Agreement for Facility-Initiated Corrective Action adds a Land Use Covenant and associated public notice to the scope of work of the original agreement.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Acknowledgement of Satisfaction
Completed Date: 05/20/2016
Comments: The Land Use Covenant recommended by the Final Preliminary Endangerment Assessment report, approved by DTSC on September 21, 2015, was executed and recorded with Santa Clara County. DTSC determined and conveyed in a May 13, 2016 letter to the property owner/proponent that no further action is necessary with respect to the investigation and remediation of hazardous substances or wastes at the Elcon Precision facility, with the exception of the compliance with the requirements and restrictions of the Land Use Covenant. An Acknowledgment of Termination and Satisfaction was fully-executed on May 20, 2016.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 12/18/2015
Comments: A public notice was published in the Milpitas Post on 12/18/2015 that announced DTSC's intent to enter into a Land Use Covenant with the Site owner based on the findings of the Preliminary Endangerment Assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

ELCON PRECISION LLC (Continued) **1000338166**

Completed Document Type: Land Use Restriction Monitoring Report
Completed Date: 02/22/2017
Comments: As required by Section 4.5 of the Land Use Covenant, CB&I performed an annual site inspection on behalf of RE Diversified Holding LLC, the site owner, to verify compliance with the restrictions and requirements of the Land Use Covenant. CB&I concluded in the site inspection report that that no prohibited use of the site was observed and the site is in compliance with the Land Use Covenant.

Description:	Due to a fire in the plant the above chemicals were spilled/burned. Analysis on water used to extinguish the fire showed less than 1/10 of a part per million of the cyanide. The fire department checked the water being discharged and found the pH to be neutral.

ELCON PRECISION LLC (Continued) **1000338166**

AIR EMISSIONS CLASSIFICATION UNKNOWN
TSCA SUBMITTER
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
HAZARDOUS WASTE BIENNIAL REPORTER
US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:
Site ID: 27945
Site Name: ELCON INC
Violation Date: 09-11-2014
Citation: 22 CCR 12 66262.34(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(a)
Violation Description: Failure to obtain a permit or grant of interim status to accumulate hazardous waste longer than 90 days.
Violation Notes: Returned to compliance on 10/09/2014. 1 x 55 gallon container of spent metex 1726 caustic hazardous waste in the waste treatment storage area has been onsite for 91 days and exceeded the large quantity generator accumulation time limits.
Violation Division: Santa Clara County Environmental Health
Violation Program: HWLQG
Violation Source: CERS

Site ID: 27945
Site Name: ELCON INC
Violation Date: 01-25-2017
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or remanufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or remanufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier

ELCON PRECISION LLC (Continued) **1000338166**

	or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of this section; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of this section shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 02/24/2017. Noted a number of empty containers in the sheds behind building which were not marked with the date they were emptied.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HWLQG
Violation Source:	CERS

Site ID: 27945
Site Name: ELCON INC
Violation Date: 01-25-2017
Citation: 22 CCR 45 67450.3(c)(9)(F) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(9)(F)
Violation Description: Failure of generator to obtain assessment or reassessment every five (5) years or the remaining service life of the tank system, as stated in the engineer's assessment, whichever is less. This assessment applies to onground or aboveground tank systems containing only non-RCRA hazardous wastes generated onsite, and tank systems authorized under Permit-by-Rule, Conditional Authorization, and Conditional Exemption or for a small quantity generator onground or aboveground tank systems containing RCRA hazardous wastes generated onsite.
Violation Notes: Returned to compliance on 02/24/2017. Tank assessment last conducted in November 2010. Re assessment of tanks/systems must occur at least every 5 years.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-25-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection took place 1/24/17 and report was delivered 1/25/17. Stie EPA ID number CAD981399959 Facility specializes in coating for metal and ceramic substrates. Affiliated activities include cleaning, etching, masking/patterning and plating. Site utilizes mixture of satellite accumulation and onsite treatment for most management of most routinely generated wastes. Rinsing is minimized by spray rinsing. Waste filters and gold-CN strip solutions in plating/cleaning room not eligible for Satellite Accumulation because SAA limited to 55 gallons of any wastestream in an area. Cyanide etch area utilizes measurement of ORP to guide redirection of etch solutions to a regeneration system prior to reuse. Noted two containers of waste solutions (1x15 sulfuric, 1x10 acetone) on which the year of the accumulation start date had been changed. The month and day were unchanged on each, but the years on both had been altered from 2014 to 2017. Noted various tools, benches and [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-25-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Unit #2 (Batch Treatment) Unit is a batch treatment system that consists of one 640 gallon conical bottom tank (shared usage with CA unit 1) and a sludge press with an affiliated analysis "hold" tank. Unit is used to precipitate metals via pH adjustment and addition of flocculate/precipitant. Unit receives waste from the ferrochloride resist etch lines which feed to a single vaulted tank as well from plating room rinse waters as well as plating room wastes from acid and caustic rinses. --Plate room acid and caustic commingle in sump in plate room sump and are subsequently sent through a series of ion exchange bottles prior to being sent to the system. Tank is not equipped with overfill device and is within a containment area that is determined to be undersized for the tank (640 gal tank, 450 gal containment). Company has instituted a size restriction on batch size of 250 gallons and has marked the tank with a high liquid mark. These procedures are documented in SOP [Truncated]

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-25-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Unit #3 (Cyanide Evaporator) Unit is a batch treatment system which accepts and evaporates liquid, low level metal bearing wastes from etch processing on the molybdenum and Tungsten lines which utilized potassium ferricyanide. Cyanide in receiving tank was tested in 2014 for toxicity via Fish bioassay (fathead minnow) and total cyanide. No fish mortality in fish bioassay and ND for total cyanide. WASTE IS NOT HAZARDOUS DUE TO CYANIDE ALTHOUGH ROUTINE ONSITE TESTING SHOWS THAT <1PPM CYANIDE MAY BE FOUND IN SOLUTION. Evaporated water is routed to hold tank, tested prior to discharge to ensure meets sewer requirements. Sludge is removed as needed (every 2 years or so) and managed as hazardous waste (including D003 waste code). Reviewed the following documents: Operating instructions and operating logs Closure plan/cost estimate Policies and Procedures EP0908 and EP0910 which serve as waste analysis plan Treatment system inspection logs

Citation:	22 CCR 45 67450.3(c)(8) - California Code of Regulations, Title 22, Chapter 45, Section(s) 67450.3(c)(8)
Violation Description:	Failure to maintain, reproduce, and provide the following documents at the facility where the FTU is operating: 1) The waste analysis plan for the treatment operation; 2) The written inspection schedule; 3) All training documents; 4) The contingency plan; 5) A copy of the most recent treatment notification and a copy of the most recent acknowledgement received from the Department, CUPA or authorized agency; 6) A copy of any local Air District permit and other permits required for the operation of the FTU; 7) A copy of the closure plan; 8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the

ADVANCED CHEMICAL TRANSPORT, INC. - SAN JOSE (Continued) **S100947175**

operation of the facility within the last three years, as the documents would be available under the California Public Records Act.

Violation Notes: Returned to compliance on 04/03/2015. Facility has not prepared a waste analysis plan for the operation of the treatment unit. The Vyleater binder does include detailed information regarding the type of waste to be treated but lacks any information regarding sampling. THIS IS REPEAT CLASS II VIOLATION FROM THE 2012 INSPECTION.
Violation Division: Santa Clara County Environmental Health
Violation Program: PBR
Violation Source: CERS

Site ID: 440194
Site Name: Advanced Chemical Transport, Inc. DBA ACTenviro
Violation Date: 01-12-2015
Citation: 22 CCR 15 66265.14 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.14
Violation Description: Failure to provide either a posted sign stating "Danger Hazardous Waste Area - Keep Out" or to provide one of the following means of security to the active hazardous waste portion of the facility: 1) A 24-hour surveillance system (e.g., television monitoring or surveillance by guards or facility personnel) which continuously monitors and controls entry; or 2) A) An artificial or natural barrier (e.g., a fence in good repair or a fence combined with a cliff), which completely surrounds area; and B) A means to control entry, at all times, through the gates or other entrances (e.g., an attendant, television monitors, locked entrance, or controlled roadway access to the facility).
Violation Notes: Returned to compliance on 04/03/2015. Required signage is not posted on the fence surrounding the treatment unit area.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-12-2015
Violations Found: Yes

ADVANCED CHEMICAL TRANSPORT, INC. - SAN JOSE (Continued) **S100947175**

Eval Type:	Routine done by local agency
Eval Notes:	Facility generates waste from outfall of analytical machines, staining sink, permitted treatment unit and from excess material (expired) disposal. Surface cleaning is done using Virox, wipes potentially contaminated and managed as biohazardous waste. Kit reagents were noted as being co-mingled in a single 5 gallon container in Microbiology. No incompatible wastes noted on day of inspection, but strongly recommend inventorying kits to ensure that potential incompatible kit reagents are not placed in the same bucket. Waste storage area located in shed outside main building. Waste accumulation area shed has spill and emergency response materials available, including eyewash bottles, absorbent, extinguisher, and acid neutralization kit. --Emergency information posted in this area notes Dan Larson as second emergency coordinator. Mr. Larson is no longer in the employ of Quest Diagnostics, Inc. Facility has a waste minimization plan, combined with activities of [Truncated]

Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-12-2015
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Treatment limited to Vyleater container shredder. Vials treated by system contain RCRA Regulated waste (methanol/water mixture) but are not RCRA empty. Treatment conducted for waste minimization while maintaining worker safety from reduced exposure. Unit is located within secondary containment unit. Outfall container used to capture liquid released from shredded vials is within a secondary containment unit within the unit's containment. Shredded plastic vials resulting from the treatment are not F003 listed wastes because the vials contain a mixture of methanol and water (loaded as a mixture for preservation of samples). Per EPA Guidance RCRA Online documents 11249 and 13041, F003 solvents in mixtures containing other constituents prior to use do not carry the F003 listing but are subject to determination using hazardous waste characteristic criteria. The liquid waste from the machine should carry the D001 waste code (see above)

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

Date of Government Version: 04/30/2012

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

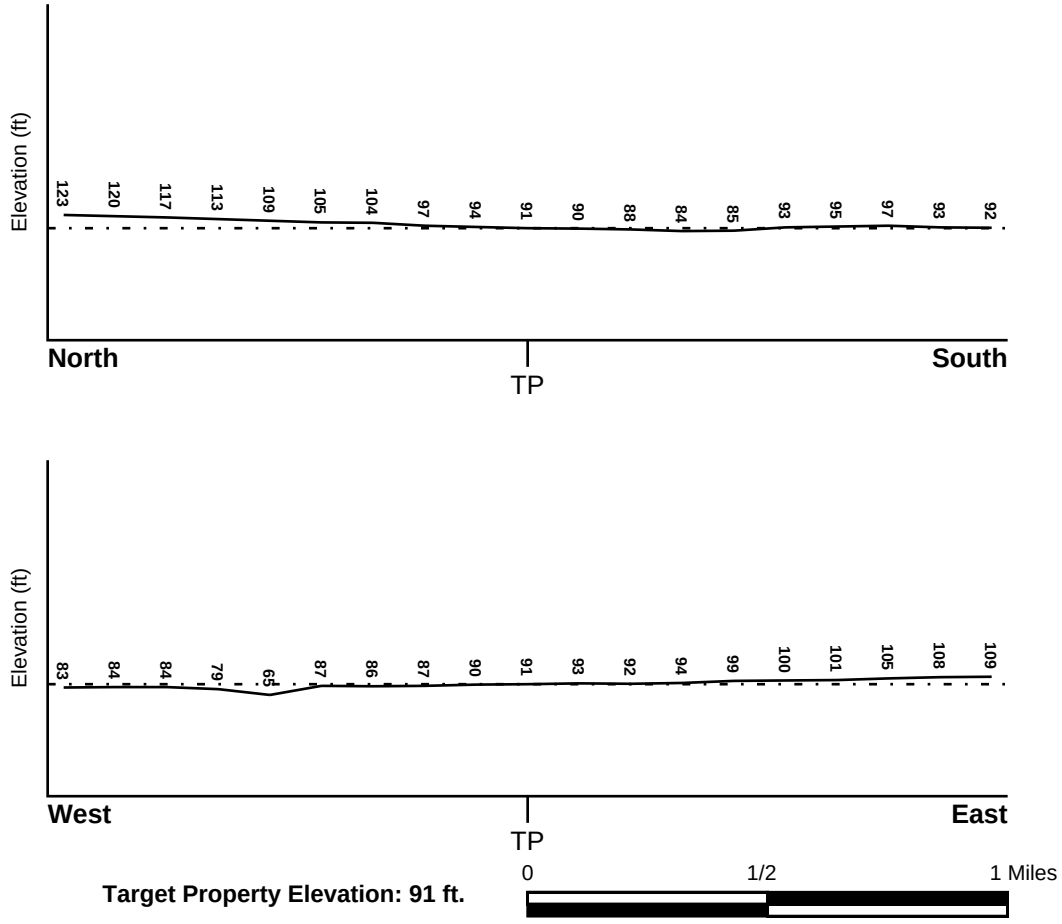
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 91 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0251J	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0069H	FEMA FIRM Flood data

06085C0232H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SAN JOSE EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PATH FORWARD
Environmental Engineering & Geology

RESUME

Mr. Grunat is a Partner and Principal Geologist at Path Forward Partners. He has over ten years of experience as a technical consultant in the fields of geology, hydrogeology, and contaminated site investigation and remediation. His work includes: project management; remediation of soil, groundwater, and soil vapor through traditional and innovative technologies; contaminant fate and transport; hydrogeology; regulatory negotiations; and litigation support.

PROFESSIONAL LICENSES

Professional Geologist in California, Washington, and Texas

Certified Hydrogeologist in California

EDUCATION

Master of Science in Environmental Geology, Rutgers – 2013

Bachelor of Science, Environmental Science, Indiana University – 2007

WORK HISTORY

2018-Present – Path Forward Partners (CA)

2016-2018 - RPS (CA)

2014-2016 – Roux Associates (CA)

2013-2014 – URS (CA)

2011-2012 – Fleming Lee Shue (NY)

2008-2011 – Conestoga Rovers and Associates (CA)

2007 – Indiana Geological Survey (IN)

DAVID A. GRUNAT, P.G., C.H.G.

Partner/Principal Geologist

RELEVANT EXPERIENCE

Brownfield Redevelopment

Managed a large mixed-use redevelopment project including investigating the liabilities associated with the property including significant chlorinated solvent impacts from surrounding superfund sites.

Managed a large commercial redevelopment project under a California Land Reuse and Revitalization Act (CLRRA) agreement utilizing innovative techniques to pre-characterize the extent of pesticides, metals, and petroleum hydrocarbons to allow for accurate excavation estimation saving both time and money during the planning and implementation of the response action.

After development of a high-rise residential multi-family building, conducted indoor air monitoring and water sampling to show through a variation in geochemical parameters that infiltrating water was a result of a leaking supply line and not contaminated groundwater infiltrating through an in-place vapor/moisture barrier.

Managed due diligence Phase I and Phase II environmental site assessments (ESAs) at numerous properties including evaluating properties for potential liability due to hazardous waste contamination; collection of soil, groundwater, and soil vapor samples; and preparing remedial cost estimates.

Petroleum

Project Manager of a portfolio of over 40 active and former service station cleanup sites for a Fortune 500 Oil Company.

Successfully negotiated the reduction of sampling and demonstrated further remediation of NAPL at a petroleum bulk terminal was not warranted although persistent NAPL was present in various monitoring wells.

Acted as the lead technical expert to respond to inquiries from the Ministry of Environment of British Columbia during a hydrogeological study to assess the conditions on a tidal foreshore due to petroleum seeps from the upstream refinery activities.

Industrial

Completed a site re-evaluation after exceedances of elemental mercury above action levels were detected in monitoring wells including evaluating current and historical data to determine the pre-remediation and post-remediation mass in soil and groundwater. Successfully negotiated that site groundwater is not suitable for beneficial use regardless of site contamination.

BTC III San Jose Logistics Center LP, its successors and assigns

Re: Site Investigation Report
650 King Road
San Jose, California

Apex Companies, LLC (Apex), on behalf of BTC III San Jose Logistics Center, LP, its successors and assigns (BTC), has prepared this Site Investigation Report (Report) for 650 King Road in San Jose, California (Site; Figures 1 and 2). This Report documents the results of the soil and groundwater investigation completed at the Site by Apex in October 2020. The activities discussed herein were completed in general accordance with Apex's *Revised Proposal for Soil and Groundwater Sampling* dated October 16, 2020. The Report is generally limited to the findings from the October 2020 investigation and is not intended to provide a comprehensive assessment of Site conditions using historical data obtained by Path Forward and others.

BACKGROUND

The Site is comprised of two parcels and encompasses an area of approximately 10.71 acres. Assessor's parcel number (APN) 254-54-023 is an 8.95-acre lot currently occupied by three buildings, including an office building on the southern corner of the Site (646 King Road), a two-story industrial/office building at the center of the property (650 King Road), and a building at the western corner of the Site (658 King Road). The Site also consists of a 1.76-acre former railroad right-of-way (RROW) parcel located along the northern portion of the Site. The buildings are currently occupied by commercial businesses and their locations are shown on Figure 2. It is Apex's understanding that BTC plans to demolish the onsite structures and redevelop the Site with a warehouse building for commercial purposes.

Several on-Site recognized environmental concerns (RECs) were identified during a Phase I Environmental Site Assessment (Phase I) conducted by Path Forward Partners, Inc. (Path Forward) in 2020 (Path Forward, 2020a) including historical agricultural land use, the presence of former underground storage tanks (USTs), and the use of hazardous and petroleum products on-Site from the former tenants, which have include Frito-Lay, Inc.

Following this Phase I, Path Forward conducted a subsurface Site investigation in August and September 2020 (Path Forward, 2020b) which indicated the presence of organochlorine pesticides (OCPs), metals, and volatile organic compounds (VOCs) at elevated concentrations in shallow soil and the presence of VOCs, including tetrachloroethene (PCE) and trichloroethene (TCE), in shallow soil vapor. Based on the findings of this subsurface Site investigation, Path Forward recommended a subsequent groundwater and soil investigation to evaluate the vertical extent of VOCs at the Site.

This investigation was completed to evaluate soil and groundwater conditions as recommended by Path Forward. The sampling locations were generally consistent with the locations recommended by Path Forward.

HYDROGEOLOGY

The Site overlies the northwestern portion of the Santa Clara subbasin, which is part of the Santa Clara Valley Groundwater Basin. The Santa Clara subbasin extends from the northern border of Santa Clara County southward to the groundwater divide that is located near the town of Morgan Hill (south of San Jose) and is bounded on the east and west by the Diablo Range and the Santa Cruz Mountains, respectively. Water-bearing formations of the subbasin include the Santa Clara Formation and the overlying alluvium (California Department of Water Resources, 2020). The closest surface water to Site is Miguelita Creek, which at its closest point, is approximately 0.28 miles southeast of the Site.

The investigation activities performed by Apex in October 2020 show that groundwater was encountered at a depth of approximately 6.60 feet to 9.37 feet below ground surface (bgs) and flows towards the southwest as shown on Figure 3. In addition, historical depth-to-groundwater data from December 1994, collected from the five previous Site monitoring wells, show groundwater was present at the Site from 8.66 feet to 10.53 feet bgs (Environ Corporation, 1994). .

SCOPE OF WORK

The objective of this investigation was to evaluate the extent of potential impacts to soil and groundwater across the Site, including from petroleum products, VOCs, OCPs, and metals as recommended by Path Forward and estimate the groundwater flow direction at the Site.

To meet the objectives above, Apex completed the following scope of work:

1. Completed pre-field activities including the preparation of a health and safety plan (HASP), a Site visit to mark sample locations, and a utility clearance;
2. Advanced ten borings (B-11 through B-20) to evaluate petroleum hydrocarbons, VOCs, OCPs, and metals in shallow soil; and
3. Converted eight soil borings into temporary groundwater monitoring wells to estimate groundwater depth, flow direction and evaluate petroleum hydrocarbons and VOCs in groundwater.

A detailed discussion of each activity is presented below.

PRE-FIELD ACTIVITIES

Apex prepared a Site-specific HASP describing safe work practices that complied with Federal (29 Code of Federal Regulations, Section 1910.120) and State (8 California Code of Regulations, Section 5192) requirements. On October 12, 2020, Apex conducted a Site visit to mark drilling locations and to mark the Site for Underground Service Alert (USA). Prior to drilling operations, each drilling location was additionally cleared for utilities by Subdynamic Locating Services, Inc. of San Jose, California, a private utility contractor. No drilling permits were required for this scope of work.

FIELD ACTIVITIES

Investigation activities were initiated on October 16, 2020 and completed on October 20, 2020. Investigation activities consisted of the installation of 10 borings (B-11 through B-20) to a maximum depth of 20 feet bgs

to allow for the collection of soil and/or groundwater samples. Details of these investigation activities are provided below.

Soil Borings

A total of 10 soil borings (B-11 through B-20) were advanced on-Site to allow for the collection of soil and groundwater samples. Soil borings were advanced by Cascade Drilling, a C-57 licensed drilling contractor under the oversight of Apex personnel. Eight borings (B-11 through B-18) were installed to 20 feet bgs using a combination of hand auger and direct push technology (DPT) drilling techniques. To prevent damage to subsurface utilities, all boring locations were hand cleared with a 3.25-inch-diameter hand auger to a depth of 5 feet bgs. Upon completion of hand augering, the borehole was stabilized using a 3-inch acetate sleeve to minimize potential sluffing of overlying shallow soil and prevent potential cross-contamination. The DPT rods were advanced through the acetate sleeve. Dual-wall DPT drilling technology was utilized to minimize the potential for cross-contamination. Borings B-19 and B-20 were installed with a hand auger and were planned to be advanced to a target depth of 3 feet bgs within the RROW; however, the borings were terminated at approximately 1 foot bgs (B-19) and 2.5 feet bgs (B-20) due to sluffing of overlying fill into the borehole.

Soil samples were collected continuously and logged in accordance with Unified Soil Classification System (USCS) and field-screened for VOCs using a hand-held photo-ionization detector (PID) that was capable of measuring VOCs concentrations in the part per billion (ppb) range. Soil boring locations are shown on Figure 2. Copies of the soil boring logs are provided in Attachment A.

Soil Sampling

Soil samples for chemical analysis were collected at 0.5 feet bgs, 3 feet bgs, and 8 feet bgs. Soil samples for non-volatile compounds were transferred into pre-cleaned, laboratory-supplied sample containers, placed on ice, and sent to a State-certified analytical laboratory under standard chain-of-custody protocols. Samples collected for VOC and TPHg analysis were collected using EPA 5035 field-preservation methods. All 0.5-foot and 3-foot samples were analyzed at each boring location. Deeper soil samples were placed on hold and were not analyzed for this investigation following review of the 0.5-foot and 3-foot soil sample analytical results. Soil samples were analyzed for the following:

- Total petroleum hydrocarbons as diesel (TPHd) and motor oil (TPHmo) by Environmental Protection Agency (EPA) Method 8015M;
- TPHg and VOCs by EPA Method 5035/8260B;
- OCPs by EPA Method 8081A; and
- Metals by EPA Method 6010B/7470.

Soil borings logs are included in Attachment A. Laboratory analytical reports and chain-of-custody documentation are included in Attachment B.

Installation and Sampling of Temporary Groundwater Monitoring Wells

On October 16, 2020, eight soil borings (B-11 through B-18) were advanced to the target depth of 20 feet bgs. Upon reaching the target depth, temporary groundwater monitoring wells were installed within soil

borings B-11 through B-18 to measure groundwater elevations, estimate groundwater flow direction, and collect grab-groundwater samples. Temporary groundwater monitoring wells were installed using the following methodology:

- Once the target depth was reached, drilling rods were retracted and a temporary pre-packed well kit was lowered through the annular space of the boring to the bottom of the borehole. The temporary pre-packed well kit consisted of 0.75-inch diameter schedule 40 polyvinyl chloride (PVC) pipe. The slotted portion of the pipe consisted of stainless-steel mesh wrapped around #3 sand. Temporary groundwater monitoring wells B-11, B-12, and B-14 through B-17 were installed with 10 feet of screen. Temporary groundwater monitoring wells B-13 and B-18 were installed with 5 feet of screen; and
- As a precautionary measure, the top six inches of the casing was sealed with bentonite chips to prevent intrusion of surface water into the borehole (no rain occurred during this investigation event).

All borings were advanced to the target depth of 20 feet bgs. Temporary monitoring wells B-11, B-12, and B-14 through B-17 were installed to a depth of 20 feet bgs and screened from 10 feet bgs to 20 feet bgs. Temporary monitoring wells B-13 and B-18 were installed to 16 feet bgs due to a partial collapse of the borehole during the retraction of the drilling rods. These wells were instead installed to a depth of 16 feet bgs and screened from 11 feet bgs to 16 feet bgs.

Following the installation of the temporary groundwater monitoring wells on October 16, 2020, groundwater was allowed to stabilize for two days. On October 19, 2020, subsequent to the temporary groundwater monitoring well survey, discussed below, seven wells were successfully gauged for groundwater depth using a meter graduated to 0.01-foot increments. Temporary groundwater monitoring well B-14 was not measured due to a car parked over the boring during the gauging event.

On October 19, 2020, all eight temporary groundwater monitoring wells were purged using a peristaltic pump and turbidity was lowered to the extent feasible. Up to three casing volumes of groundwater were purged prior to sampling. Samples for non-volatile analysis were collected using the peristaltic pump equipped with dedicated tubing and groundwater samples. Samples for volatile analysis were collected using a bailer carefully lowered into the temporary well to minimize groundwater disturbance. Groundwater samples were decanted into pre-cleaned, laboratory-supplied sample containers, placed on ice, and sent to a State-certified analytical laboratory under standard chain-of-custody protocols and analyzed for the following:

- TPHg and VOCs by EPA Method 8260B; and
- TPHd and TPHmo using EPA Method 8015B (from borings B-12, B-14, and B-17 only).

Laboratory analytical reports and chain-of-custody documentation are included in Attachment B.

Upon completion of each boring, the pre-pack well kit was removed, and the boreholes were grouted to one-foot bgs using neat cement grout and patched at the surface to match surrounding grade.

Temporary Groundwater Monitoring Well Survey

Temporary monitoring wells B-11 through B-13 and B-15 through B-18 were surveyed by Virgil Chavez Land Surveying, Inc. of Vallejo, California (Virgil) on October 19, 2020. Temporary monitoring well B-14 was not

surveyed due to a car parked on top of the boring at the time of the survey. The purpose of the well survey was to allow for use of the groundwater monitoring points to measure depth to groundwater and estimate groundwater flow direction. A copy of the survey report is included in Attachment C.

Decontamination Activities

To support the quality of data and to minimize the potential for cross-contamination between sampling events, all reusable downhole equipment used during drilling and sampling was thoroughly decontaminated prior to, and in between each use. Decontamination procedures for the drilling equipment included: physical removal of excess soil and debris; thorough washing of all equipment with non-phosphate detergent/potable water solution; and triple rinsing with deionized or distilled water.

Investigative Derived Waste

Investigation-derived waste (IDW) generated during this project included soil cuttings and decontamination rinse water. IDW was stored in properly labeled 55-gallon drums on-Site. The IDW will be disposed as non-hazardous waste under bill of lading or waste manifest in accordance with local, state, and federal regulations.

INVESTIGATION RESULTS

Site investigation activities consisted of the collection and analysis of eight groundwater samples and 18 soil samples. Groundwater and soil data are summarized in Tables 1 through 5 and Figures 3 through 5.

The San Francisco Bay Regional Water Quality Control Board (SFRWQCB) Environmental Screening Levels (ESLs) and were used as appropriate human health risk-based screening criteria (SFRWQCB, 2019). For the purpose of this evaluation, the following receptors were considered:

- **Groundwater – Vapor Intrusion: Commercial Exposure Scenario.** Shallow groundwater beneath the Site is not currently used for drinking water purposes and is not expected to be encountered during Site redevelopment activities; therefore, the primary pathway for groundwater will be potential vapor intrusion of volatile from groundwater into indoor air into the commercial building and subsequent direct exposure to indoor air via the inhalation exposure pathway.
- **Soil – Direct Exposure Human Health: Construction Worker and Commercial Exposure Scenario.** The primary exposure pathway for soil will be direct contact of soil to the construction worker during redevelopment activities. However, as a conservative measure, results were also compared to direct exposure for the commercial receptor. Metals results were also compared with regional background concentrations obtained from the document titled, *Background Concentrations of Trace and Major Elements in California Soils (*Bradford, G.R. et al.) consistent with the background values used by Path Forward in their December 10, 2020 *Subsurface Site Investigation Report*.

Groundwater Conditions

As discussed above, an objective of the investigation was to install temporary groundwater monitoring wells for the purpose of estimating groundwater flow direction. On October 19, 2020 groundwater elevations from seven temporary groundwater monitoring wells B-11 through B-13 and B-15 through B-18 were used for this

evaluation. Groundwater elevations ranged from approximately 80.92 feet above mean sea level (MSL) in temporary groundwater monitoring well B-11 to 82.95 feet above MSL in temporary groundwater monitoring well B-18. A review of groundwater elevation data and the potentiometric surface map indicates groundwater flows southwest at the Site. Depth to water and groundwater elevation data are summarized on Table 1. A potentiometric surface map is presented on Figure 3.

Groundwater Analytical Results

Groundwater analytical results are summarized on Table 2 and Figure 4. Groundwater samples collected during the October 2020 investigation were analyzed for TPHg, TPHd, TPHmo, and VOCs. Analytical results were screened against the SFRWQCB human health vapor intrusion ESLs under the commercial receptor exposure scenario. Results are discussed below.

Total Petroleum Hydrocarbons

TPHg was not detected in any of the eight samples analyzed at a concentration above laboratory reporting limits (RLs). TPHd was detected in one of three samples analyzed at a concentration of 170 micrograms per liter (µg/L) (B-12). TPHmo was detected in one of three samples analyzed at a concentration of 320 µg/L (B-12). No commercial ESL for vapor intrusion exists for TPHd or TPHmo.

VOCs

Several VOCs were detected at concentrations above laboratory RLs in the eight samples analyzed, including PCE, TCE, 1,1-dichloroethene, cis-1,2-dichloroethene, vinyl chloride, chloroform, naphthalene, 2-butanone, and bromodichloromethane. Of the VOCs detected, naphthalene and vinyl chloride were detected at concentrations above their respective commercial ESLs for vapor intrusion. Naphthalene and vinyl chloride results are summarized below.

- Naphthalene was detected at concentrations above laboratory RLs in samples B-14 and B-15 at concentrations of 1.4 µg/L and 46 µg/L, respectively. One sample (B-15) exceeded the commercial ESL for vapor intrusion of 20 µg/L; and
- Vinyl chloride was detected at concentration above laboratory RLs in samples B-12 and B-13 at concentrations of 0.090 µg/L and 0.24 µg/L, respectively. One sample (B-13) exceeded the commercial ESL for vapor intrusion of 0.14 µg/L.

Soil Sample Results

Soil analytical results are summarized on Tables 3 through 5 and Figure 5. Select soil samples collected during the October 2020 investigation were analyzed for TPHg, TPHd, TPHmo, VOCs, OCPs, and metals. Analytical results were screened against the SFRWQCB human health direct exposure ESLs under the soil construction worker and commercial receptor exposure scenarios. Results are discussed below.

Total Petroleum Hydrocarbons

TPHd and TPHmo were detected in one or more samples at concentration above laboratory RLs. TPHg was not detected in any sample analyzed at a concentration above laboratory RLs. TPHd was detected in 11 of 18 samples at concentrations ranging from of 1.1 milligram per kilogram (mg/kg) (B-11 at 0.5 feet bgs) to 93 mg/kg (B-15 at 3 feet bgs). TPHmo was detected in 12 of 18 samples at concentrations ranging from

5.8 mg/kg (B-12 at 0.5 feet bgs) to 1,000 mg/kg (B-15 at 0.5 feet bgs). Generally, concentrations of all petroleum hydrocarbon carbon ranges were low and attenuate with depth. All TPHd and TPHmo concentrations were below their respective construction worker and commercial ESLs for direct contact.

VOCs

Of the VOCs analyzed, only PCE was detected at concentrations above laboratory RLs. PCE was detected in samples B-12 at 3 feet bgs and B-15 at 3 feet bgs at concentrations of 0.0040 mg/kg and 0.0046 mg/kg, respectively. These concentrations are below the construction worker and commercial ESLs for direct contact of 2.7 mg/kg and 33 mg/kg, respectively.

OCPs

One or more OCPs were detected in 14 of 18 samples analyzed at concentrations above laboratory RLs. OCPs detected at concentrations above laboratory RLs or MDLs include chlordane, alpha-chlordane, gamma-chlordane, 4,4'-dichlorodiphenyldichloroethane (4,4'-DDD), 4,4'-dichloro-diphenyldichloroethene, (4,4'-DDE), 4,4'-dichlorodiphenyltrichloroethane (4,4'-DDT), dieldrin, endosulfan I, endosulfan sulfate, endrin ketone, heptachlor epoxide, methoxychlor, and toxaphene. All detected concentrations are below their respective construction worker and commercial ESLs for direct contact.

Metals

One or more metals were detected in all ten soil samples analyzed for metals at concentrations above laboratory RLs. All metals samples were collected at 0.5 feet bgs. Of the metals detected, antimony, arsenic, cobalt, and lead were detected at concentrations exceeding construction worker or commercial ESLs for direct contact and at concentrations above their respective regional background concentrations. Detected metals concentrations that exceeded construction worker or commercial ESLs for direct contact but were below their respective regional background concentrations are interpreted to be representative of background conditions and are not discussed below. Exceedances for construction worker and commercial ESLs for direct contract above regional background concentrations are summarized below:

- Antimony was detected at concentrations above the construction worker ESL for direct contact of 50 mg/kg and the commercial ESL of 160 mg/kg in sample B-19 only at a concentration of 180 mg/kg;
- Arsenic was detected at concentrations above its regional background concentration of 11 mg/kg, construction worker ESL of 0.98 mg/kg and commercial ESL of 0.31 mg/kg in five of ten samples (B-11, B-12, B-17, B-19, and B-20) at concentrations ranging from 17 mg/kg (B-12) to 430 mg/kg (B-19).
- Cobalt was detected at concentrations above its regional background concentration of 46.9 mg/kg and the construction worker ESL for direct contact of 28 mg/kg in sample B-19 only at concentration of 94 mg/kg. Cobalt was not detected at concentrations above the commercial ESL for direct contact of 350 mg/kg; and
- Lead was detected at concentrations above its regional background concentration of 97.1 mg/kg, the construction worker ESL for direct contact of 160 mg/kg and the commercial ESL for direct

contact of 320 mg/kg in samples B-19 and B-20 at concentrations of 1,300 mg/kg and 440 mg/kg, respectively.

CONCLUSIONS

Site investigation activities were completed in October 2020. The objectives of this investigation were to evaluate the extent of potential impacts to soil and groundwater, including from petroleum products, VOCs, OCPs, and metals as recommended by Path Forward, across the Site and estimate groundwater depth and flow direction at the Site. The conclusions presented below are based on the investigation completed by Apex in October 2020.

Results from the investigation indicated the following:

- Groundwater flows to the southwest beneath the Site.
- The only compounds detected at concentrations above their vapor intrusion ESLs for a commercial exposure setting in groundwater were naphthalene in boring B-15 and vinyl chloride in boring B-13. These compounds were not detected above laboratory RLs in shallow soil samples collected from their respective borings. Furthermore, naphthalene and vinyl chloride and were not detected in any of the soil vapor samples collected by Path Forward at concentrations above laboratory RLs, and therefore, these detections do not constitute a threat to human health.
- Soil data indicate that detections of TPH, VOCs, and OCPs are below their respective construction worker and commercial ESLs for direct contact.
- PCE was the only VOC detected above laboratory RLs in shallow soil in borings B-12 and B-15. These isolated occurrence of PCE and the low concentrations of PCE in groundwater at the Site indicate there is not a significant release of PCE at the Site.
- Of the metals detected, antimony, arsenic, cobalt, and lead were the only metals detected at concentrations exceeding both the construction worker or commercial ESLs for direct contact and above their respective regional background concentrations. With the exception of arsenic in the samples collected from B-11 and B-12, the elevated detection of these metals were located in borings B-17, B-19, and B-20 located adjacent to or within the former RROW and are likely related to the parcel's historical use as a railroad corridor. The concentrations of arsenic in borings B-11 and B-12, although higher than the average background level of 11 mg/kg, are generally within the range of the expected maximum background arsenic concentration (21 mg/kg; [Duverge]).

LIMITATIONS

This Report has been prepared for the exclusive use of BTC and their authorized representatives, as it pertains to the identified project Site in San Jose, California. This Report does not reflect subsurface variations that may exist between sampling locations and such variations cannot be anticipated nor can they be entirely accounted for even with exhaustive additional testing. The information contained in this Report represents our professional opinions and is based in part on information supplied by others. Our work therefore relied upon the validity of the supplied information, and as such, no warranty is implied or intended. The opinions expressed are based on the conditions of the Site existing at the time of the field investigation, current regulatory requirements, and any specified assumptions. The presented findings and

recommendations in this report are intended to be taken in their entirety to assist BTC personnel in applying their own professional judgment in making decisions related to the property. Apex cannot provide conclusions on environmental conditions outside the completed scope of work. Apex cannot guarantee that future conditions will not change and affect the validity of the presented conclusions and recommended work.

Sample locations were determined in part by Site access constraints, including the presence of buildings and the demonstrated limitations of limited access drilling technology with respect to Site lithology. In addition, the precise locations of historical features of interest such as USTs were not available during implementation of field activities. Therefore, samples may not have been collected at the exact locations of historical features of interest.

Sincerely,

Apex Companies, LLC

Sampling Point / Analyte Sampled

B-12	(µg/L)
BEN	<0.20
PCE	2.4
TCE	1.7
VC	0.090
NAP	<0.30

All Results in micrograms per cubic liter (µg/L)

VOC	Volatile Organic Compound
BEN	Benzene
PCE	Tetrachloroethene
TCE	Trichloroethene
VC	Vinyl chloride
NAP	Naphthalene
<0.20	Not detected at concentrations above the reporting limit

Highlight = Results exceeds one or more screening levels (ESLs).
Sampling Results are Compared to San Francisco Bay Regional Water Quality Control Board Environmental Screening Levels, 2019 for vapor intrusion under a commercial exposure setting.

TABLES

Table 1
Temporary Monitoring Well Groundwater Elevation Measurements
650 King Road
San Jose, California

Boring ID	Date Measured	DTW (feet btoc)	Casing Elevation (feet msl)	GWE (feet msl)
B-11	10/19/2020	9.00	89.92	80.92
B-12	10/19/2020	8.40	90.17	81.77
B-13	10/19/2020	8.40	90.72	82.32
B-14	10/19/2020	NM	Not Surveyed	
B-15	10/19/2020	6.70	89.10	82.40
B-16	10/19/2020	6.60	88.47	81.87
B-17	10/19/2020	8.90	91.22	82.32
B-18	10/19/2020	9.37	92.32	82.95

Notes:
btoc = below top of casing
msl = mean sea level
DTW = Depth to groundwater
GWE = Groundwater elevation
NM = Not measured. Car parked over well.
Casing elevations surveyed by Virgil Chavez Land Surveying, Inc. on October 19,2020

Notes:
TPHg = Total Petroleum Hydrocarbons as Gasoline
TPHd = Total Petroleum Hydrocarbons as Diesel
TPHmo = Total Petroleum Hydrocarbons as Motor Oil
NA = Not Analyzed
Less-than sign (<) indicates analyte was not detected above indicated laboratory reporting limit.
ft bgs = feet below ground surface
µg/L = micrograms per liter
Sampling Results are Compared to San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Environmental Screening Levels, 2019.
– detected concentration exceeds the SFBRWQCB Environmental Screening Level for vapor intrusion under a commercial/industrial scenario.

Notes:
Less-than sign (<) indicates analyte was not detected above indicated laboratory reporting limit.
ft bgs = feet below ground surface
mg/kg = milligrams per kilogram
Sampling results are compared to San Francisco Bay Regional Water Quality Control Board (SFBRWQCB)-recommended human health risk-based screening levels for commercial/industrial soil and intrusive construction workers (SFBRWQCB 2019, DTSC 2020, USEPA 2020).
– detected concentration exceeds SFBRWQCB Environmental Screening Levels for a commericial/industrial and/or construction worker scenarios

Notes:
Less-than sign (<) indicates analyte was not detected above indicated laboratory reporting limit
ft bgs = feet below ground surface
mg/kg = milligrams per kilogram
P = Agreement between quantitative confirmation results exceed method recommended limits
BHC = hexachlorocyclohexane
DDD = Dichlorodiphenyldichloroethane
DDE = Dichlorodiphenyldichloroethene
DDT = Dichlorodiphenyltrichloroethane
Sampling results are compared to San Francisco Bay Regional Water Quality Control Board (SFBRWQCB)-recommended human health risk-based screening levels for commercial/industrial soil and intrusive construction workers (SFBRWQCB 2019, DTSC 2020, USEPA (2020)
– detected concentration exceeds SFBRWQCB Environmental Screening Levels for a commericial/industrial and/or construction worker scenarios

Notes:

Less-than sign (<) indicates analyte was not detected above indicated laboratory reporting limit.

ft bgs = feet below ground surface

mg/kg = milligrams per kilogram

Sampling results are compared to San Francisco Bay Regional Water Quality Control Board (SFBRWQCB)-recommended human health risk-based screening levels for commercial/industrial soil and intrusive construction workers (SFBRWQCB 2019, DTSC 2020, USEPA (2020)

– detected concentration exceeds SFBRWQCB Environmental Screening Levels for a commericial/industrial and/or construction worker scenarios

– detected concentration exceeds SFBRWQCB Environmental Screening Levels for a commericial/industrial and/or construction worker scenarios, but is consistent with background/ambient conditions (Background concentrations obtained from Table 1 provided by Path Forward)

LABORATORY ANALYTICAL DATA

McCampbell Analytical, Inc.

"When Quality Counts"

Analytical Report

WorkOrder: 2010964

Report Created for: Apex Companies, LLC

3478 Buskirk Avenue, Ste. 100
Pleasant Hill, CA 94523

Project Contact: Nathan Colton
Project P.O.:
Project: King Rd; San Jose, CA

Project Received: 10/19/2020

Analytical Report reviewed & approved for release on 10/27/2020 by:

Angela Rydelius
Laboratory Manager

The report shall not be reproduced except in full, without the written approval of the laboratory. The analytical results relate only to the items tested. Results reported conform to the most current NELAP standards, where applicable, unless otherwise stated in the case narrative.

Glossary of Terms & Qualifier Definitions

Client: Apex Companies, LLC
Project: King Rd; San Jose, CA
WorkOrder: 2010964

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TZA	TimeZone Net Adjustment for sample collected outside of MAI's UTC.
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Glossary of Terms & Qualifier Definitions

Client: Apex Companies, LLC
Project: King Rd; San Jose, CA
WorkOrder: 2010964

Analytical Qualifiers

J	Result is less than the RL/ML but greater than the MDL. The reported concentration is an estimated value.
e2	Diesel range compounds are significant; no recognizable pattern
e7	Oil range compounds are significant

Quality Control Qualifiers

F3	The surrogate standard recovery and/or RPD is outside of acceptance limits.

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

				1	250mL HDPE w/ HNO3	☐			Present	☑	
				1	VOA w/ HCl	☐			Present	☑	

NOTES: - STLC and TCLP extractions require 2 days to complete; therefore, all TATs begin after the extraction is completed (i.e., One-day TAT yields results in 3 days from sample submission).

- MAI assumes that all material present in the provided sampling container is considered part of the sample - MAI does not exclude any material from the sample prior to sample preparation unless requested in writing by the client.

Glossary of Terms & Qualifier Definitions

Client: Apex Companies, LLC
Project: 650 N King Rd
WorkOrder: 2010883

Glossary Abbreviation

%D	Serial Dilution Percent Difference
95% Interval	95% Confident Interval
CPT	Consumer Product Testing not NELAP Accredited
DF	Dilution Factor
DI WET	(DISTLC) Waste Extraction Test using DI water
DISS	Dissolved (direct analysis of 0.45 µm filtered and acidified water sample)
DLT	Dilution Test (Serial Dilution)
DUP	Duplicate
EDL	Estimated Detection Limit
ERS	External reference sample. Second source calibration verification.
ITEF	International Toxicity Equivalence Factor
LCS	Laboratory Control Sample
LQL	Lowest Quantitation Level
MB	Method Blank
MB % Rec	% Recovery of Surrogate in Method Blank, if applicable
MDL	Method Detection Limit
ML	Minimum Level of Quantitation
MS	Matrix Spike
MSD	Matrix Spike Duplicate
N/A	Not Applicable
ND	Not detected at or above the indicated MDL or RL
NR	Data Not Reported due to matrix interference or insufficient sample amount.
PDS	Post Digestion Spike
PDSD	Post Digestion Spike Duplicate
PF	Prep Factor
RD	Relative Difference
RL	Reporting Limit (The RL is the lowest calibration standard in a multipoint calibration.)
RPD	Relative Percent Deviation
RRT	Relative Retention Time
SPK Val	Spike Value
SPKRef Val	Spike Reference Value
SPLP	Synthetic Precipitation Leachate Procedure
ST	Sorbent Tube
TCLP	Toxicity Characteristic Leachate Procedure
TEQ	Toxicity Equivalents
TZA	TimeZone Net Adjustment for sample collected outside of MAI's UTC.
WET (STLC)	Waste Extraction Test (Soluble Threshold Limit Concentration)

Glossary of Terms & Qualifier Definitions

Client: Apex Companies, LLC
Project: 650 N King Rd
WorkOrder: 2010883

Analytical Qualifiers

J	Result is less than the RL/ML but greater than the MDL. The reported concentration is an estimated value.
P	Agreement between quantitative confirmation results exceed method recommended limits
S	Surrogate recovery outside accepted recovery limits.
a2	Sample diluted due to cluttered chromatogram.
a3	Sample diluted due to high organic content interfering with quantitative/or qualitative analysis.
a9	Reporting limit near, but not identical to, our standard reporting limit due to variable Encore or Solid sample weight.
c2	Surrogate recovery outside of the control limits due to matrix interference.
c4	Surrogate recovery outside of the control limits due to coelution with another peak(s) / cluttered chromatogram.
e2	Diesel range compounds are significant; no recognizable pattern
e7	Oil range compounds are significant
h7	Copper (EPA 3660B) cleanup

Quality Control Qualifiers

F1	MS/MSD recovery and/or RPD is out of acceptance criteria; LCS validates the prep batch.
F2	LCS/LCSD recovery and/or RPD/RSD is out of acceptance criteria.
F10	MS/MSD outside control limits. Physical or chemical interferences exist due to sample matrix.

MAI clients MUST disclose any dangerous chemicals known to be present in their submitted samples in concentrations that may cause immediate harm or serious future health endangerment as a result of brief, gloved, open air, sample handling by MAI staff. Non-disclosure incurs an immediate $250 surcharge and the client is subject to full legal liability for harm suffered. Thank you for your understanding and for allowing us to work safely.

* If metals are requested for water samples and the water type (Matrix) is not specified on the chain of custody, MAI will default to metals by E200.8.

Please provide an adequate volume of sample. If the volume is not sufficient for a MS/MSD a LCS/LCSD will be prepared in its place and noted in the report.

Subject: Monitoring Well Survey
646-658 N. King Road
San Jose, Ca

Dear Nate:

This is to confirm that we have proceeded at your request to survey the temporary wells at the above referenced location. The survey was completed on October 19, 2020. The elevations are based on NAVD 88. The coordinates are for top of casings and are based on the CSCS, Zone III (NAD83). Epoch 2017.50

Northing	Easting	Elev.	Desc.
1957776.880	6164700.907	89.92	B11

MEMORANDUM

Date: May 14, 2021

To: Robert Hines – Farella Braun + Martel

From: Matthew Nelson, PE & Mauricio H. Escobar, PG – Roux Associates, Inc.

Subject: **Vapor Intrusion Investigation Summary Memorandum**
Former Frito Lay Facility
650 North King Road, San Jose, California ("Site")

Roux Associates, Inc. (Roux) has prepared this Vapor Intrusion (VI) Investigation Summary Memorandum (Memorandum) on behalf of BTC III San Jose Logistics Center LP (Client) to present the findings of the VI investigation conducted at the Former Frito Lay Facility, located at 650 North King Road, San Jose, California (Site, Figure 1). Roux understands that the Client acquired the Site in January 2021 for industrial redevelopment. Specifically, the Client proposes to build a 208,000 square foot light industrial building.

Due diligence activities conducted before acquisition included a Phase I Environmental Site Assessment (ESA) and two rounds of supplemental site investigations (SSIs) from July through October 2020. The Phase I ESA and initial SSIs identified residual volatile organic compounds (VOCs) beneath the on-Site building, namely the chlorinated solvent tetrachloroethene (PCE) near and beneath Building 2 (650 North King Road). The objective of Roux's VI investigation was to evaluate subsurface and indoor air conditions and to identify potential indoor air risks to occupants of Buildings 2 and 4 (658 North King Road), if any, from potential VI (Figure 2).

The sections below summarize the VI investigation, including (1) pre-field activities, (2) sampling locations and procedures, (3) field observations, (4) laboratory results, (5) and a comparison to applicable regulatory screening levels; conclusions and recommendations are provided at the end of this Memorandum.

SUMMARY OF VI INVESTIGATION

From February 2 through 16, 2021, Roux conducted a building survey and indoor air and sub-slab sampling at the Site. Protocols and procedures utilized by Roux were in accordance with the following:

- July 2015 California Environmental Protection Agency (Cal/EPA), California Department of Toxic Substances Control (DTSC), Los Angeles Regional Water Quality Control Board (LA RWQCB), and San Francisco Regional Water Quality Control Board (SFRWQCB), Advisory, Active Soil Gas Investigations (Soil Gas Advisory; Cal/EPA, 2015);
- October 2011 DTSC and Cal/EPA Guidance for the Evaluation and Mitigation of Subsurface Vapor Intrusion to Indoor Air (Vapor Intrusion Guidance; DTSC, 2011); and
- February 2020 DTSC Supplemental Guidance: Screening and Evaluating Vapor Intrusion (Draft Supplemental Guidance; DTSC, 2020a).

The sections that follow provide details of field activities and laboratory results. Site photographs, field logs, and laboratory reports are provided as Attachments 1 through 3.

Pre-Field Activities

Roux pre-marked the Site boundaries with white paint and notified Underground Service Alert (USA) of Northern California at least 72 hours in advance of intrusive subsurface work (USA Ticket # X102700344).

A private geophysical services and utility locating firm, Ground Penetrating Radar Systems, LLC (GPRS) of San Jose, California, was contracted to evaluate the proposed sub-slab sampling locations and to mitigate the risk of potentially encountering buried utility lines or other subsurface features before sub-slab probes were installed. On February 2 and 3, 2021, GRPS utilized a variety of tools, including mini ground penetrating radar (GPR), to clear sampling locations under the direction of Roux field staff. No subsurface utilities or structures identified during the geophysical survey interfered with the proposed sampling locations. Several locations were slightly adjusted based on Site features and operations and at the request of tenants.

Building Survey – Buildings 2 and 4

In preparation of the VI sampling event and consistent with regulatory guidance, a building inspection was conducted on February 2, 2021 including a chemical inventory, inspection of potential subsurface VI conduits (e.g., cracks in the slab, expansion joints, or utility perforations), and identification of conditions that could potentially affect VOC concentrations in the indoor air samples. Products that potentially could contain VOCs were photographed, measured with a photoionization detector (PID), and noted in the field logs. Photos are included in a photographic log (Attachment 1) and PID readings are included in field logs (Attachment 2). Additionally, a Site representative from Cushman & Wakefield, the Client's property manager, was interviewed to provide information regarding tenant operations. A limited evaluation of the heating, ventilation, and air conditioning (HVAC) system was performed for both buildings by Pacific Cooling, the Client's HVAC contractor. Pacific Cooling's limited evaluation identified that four of the nine HVAC units located in the office space for Building 2 are operational and providing approximately 25 percent outside air. The HVAC system for Building 4 was not evaluated as the building is vacant.

Roux identified two locations in Building 2 where the concrete slab has noticeable cracks or gaps (one location at a floor drain and one location at a utility penetration coming from the roof through the concrete slab; Attachment 1). Following discussion with the Client, Roux suggested repairing the broken concrete at the utility penetration and leaving the floor drain as-is. After closer observation, the utility pipe coming from the roof was not connected to the pipe under the slab. By patching the concrete around the utility penetration, there was potential to cause a blockage within the pipe. Therefore, no repairs were made to the slab or the utility pipe at this time. Given that there were no PID readings at the two locations, these features would be unlikely to affect the indoor air samples.

Building 2 operates as a commercial and industrial warehouse with several tenants who occupy the space as an office, storage, and printing facility. Chemical products were identified in all tenant spaces during the chemical inventory, including typical cleaning products, such as disinfectants and general cleaners. The printing facility stores imaging oil, recycling agent, heat transfer fluid, and other chemicals for their printing operations. Building 4 is vacant and contained no chemical products. A full list of chemicals identified at the Site is included in Attachment 2.

Sub-Slab Probe Installation

On February 11, 2021, Confluence Technical Services of Rio Linda, California, under the direction of Roux, installed a total of eight temporary sub-slab Vapor-Pins® (SS-1 through SS-8) at locations within the interior of Buildings 2 and 4, as shown in Figure 2. Each sub-slab probe was installed by advancing a 5/8-inch diameter hole through the slab with a hand-held rotary hammer drill and installing a sub-slab Vapor-Pin®. The concrete slab thickness was approximately 5 to 8 inches with a wire mesh below the

slab. The VaporPin® sampling ports were capped and protected in place with safety cones over the VaporPin® for future use (Attachment 1).

Indoor and Outdoor Air Sampling Procedures

On February 15, 2021, Roux conducted an 8-hour indoor and outdoor air sampling event. Enthalpy Analytical, LLC (Enthalpy) of Berkeley, California, a California state-certified analytical laboratory, provided pre-cleaned, 6-Liter SUMMA® canisters and 8-hour flow regulators to collect the samples over an 8-hour period. Eight (8) 6-Liter SUMMA® canisters (seven in Building 2 and one in Building 4; IA-1 through IA-8) were deployed approximately 3.5 feet above the ground surface for an 8-hour sampling period. All indoor air samples were co-located with a sub-slab sampling location (SS 1 through SS-8). Indoor air sampling locations were selected to adequately characterize ambient working conditions and were subject to approval by the tenants/owners. In general, samples were collected in offices, common spaces, and warehouse areas where occupants spend most of their time.

Additionally, three (3) 6-Liter SUMMA® canisters (OA-1 through OA-3) were deployed approximately 6 feet above the ground surface to concurrently gather outdoor air data (Figure 2). These locations were selected based on the prevailing wind direction and adjusted based on Site conditions to secure sampling equipment. Photographs showing the sampling locations are included in Attachment 1.

Once the canisters were opened and the sampling began, Roux field personnel checked the remaining vacuum of the SUMMA® canisters multiple times throughout the 8-hour sampling period to identify any potential issues with the sample collection. Weather conditions, including temperature and precipitation, during the sampling period were noted and are included in Attachment 2.

Sub-Slab Sampling Procedures

On February 16, 2021, the day following the collection of indoor air samples, a total of eight sub-slab samples were collected. Sub-slab samples were collected from locations that coincided with corresponding indoor air samples. A shut-in test was performed to confirm that the aboveground lines and valves were properly sealed at each location before sampling. As a secondary test, a leak check was conducted utilizing a helium shroud during sampling to check for leaks during sampling. Helium was included among the laboratory analyte list for soil vapor. Upon successful completion of the shut-in test, three “sample train volumes” were purged from the sampling system. All sub-slab samples were collected in 1-Liter SUMMA® canisters at rate less than 200 milliliters per minute (mL/min). Sampling logs for sub-slab samples are included in Attachment 2.

Sample Handling and Analysis

Upon completion of the indoor and outdoor air and sub-slab sampling, the canisters were closed, held under chain of custody, and delivered to Enthalpy where they were analyzed for select VOCs (PCE and daughter products). Indoor and outdoor air samples were analyzed for VOCs by United States Environmental Protection Agency (USEPA) Method TO-15 Selected Ion Monitoring (SIM), and sub-slab samples were analyzed for VOCs by USEPA Method TO-15.

Indoor Air, Outdoor Air, and Sub-Slab Results

Analytical results for VOCs in indoor air, outdoor air, and sub-slab samples are summarized in Table 1. Indoor and outdoor air samples were compared to the following:

- USEPA Regional Screening Levels (RSLs) for Composite Worker Air (USEPA RSLs), dated November 2020 (USEPA, 2020); and

- DTSC Human and Ecological Risk Office (HERO) Human Health Risk Assessment (HHRA) Note Number 3 Screening Levels for Commercial/Industrial Air (DTSC SLs), dated February 2020 (DTSC, 2020b).

Per the Draft Supplemental Guidance, an attenuation factor of 0.03 was applied to the USEPA RSLs and DTSC SLs to calculate soil vapor screening levels (SVSLs) to which sub-slab samples were compared. Analytical laboratory report is included in Attachment 3.

The leak check compound, helium, was detected in two out of the eight sub-slab samples (SS-1 and SS-2). According to the Soil Gas Advisory, "an ambient air leak up to 5 percent is acceptable if quantitative tracer testing is performed by shrouding" (Cal/EPA, 2015). The helium detection in SS-2 (0.32 percent) was below 5 percent of the average helium field readings (0.93 percent) while the sample was being collected. The helium detection at SS-1 (0.86 percent) was slightly above 5 percent of the average helium field readings (0.83 percent) while the sample was being collected. This indicates that indoor air could potentially have leaked into the sub-slab sample at location SS-1.

Summary of Indoor Air, Outdoor Air, and Sub-Slab Select VOC Data

Compound	Sub-Slab Range ($\mu g/m^3$)	Number of Detections Above SLs	Indoor Air Range ($\mu g/m^3$)[(a)]	Number of Detections Above SLs	Outdoor Air Maximum ($\mu g/m^3$)
1,1,1-Trichloroethane	3.2 – 19	0	ND[(b)]	0	ND
1,1-Dichloroethane	ND	0	ND	0	ND
1,1-Dichloroethene	ND	0	ND	0	ND
Acetone	6.6 – 110	0	NA[(c)]	0	NA
Benzene	ND	0	**0.49 – 1.0**[(d)]	8	**0.44**
Chloroform	6.7 – **1,600**	2	0.10 – 0.29	0	0.13
Cis-1,2-Dichloroethene	ND	0	ND	0	ND
Ethylbenzene	ND	0	0.15 – 1.9	0	0.14
Isopropanol (IPA)	4.7 – 26	0	NA	0	NA
Methylene Chloride	8.8 – **430**	1	1.0 - **14**	1	5.2
Tetrachloroethene	24 – **520**	2	0.072 – 0.89	0	ND
Toluene	1.5 – 3.9	0	0.71 - 12	0	0.65
Trans-1,2-Dichloroethene	ND	0	ND	0	ND
Trichloroethene	15	0	0.074 – 0.28	0	ND
Vinyl Chloride	ND	0	ND	0	ND
Xylene (total)	5.4	0	0.64 – 8.0	0	0.61

(a) $\mu g/m^3$ = micrograms per cubic meter.
(b) ND = not detected above laboratory reporting limit.
(c) NA = not analyzed.
(d) Bold value indicates exceedance of at least one SL.

PCE and trichloroethene (TCE) were not detected above their DTSC SLs in any of the indoor air samples collected during the VI investigation. Benzene and methylene chloride were the only compounds detected above their DTSC SLs in indoor air in Building 2. The indoor air and sub-slab samples collected from Building 4 did not have any detections above DTSC SLs except for benzene. The VI investigation results are summarized as follows:

- PCE was detected in four out of the seven indoor air samples in the northwestern portion of Building 2 **below** the DTSC SL (Figure 2). PCE was also detected in five out of the seven sub-slab samples in Building 2. Two of the detections exceeded the DTSC SVSL of 67 $\mu g/m^3$.

The average attenuation factor between sub-slab and indoor air PCE concentrations is an order of magnitude lower than the conservative USEPA attenuation factor of 0.03 (DTSC, 2020a).

- TCE was detected in two indoor air samples and in one sub-slab sample in Building 2, all **below** the DTSC SL and the DTSC SVSL, respectively (Figure 2).

- Benzene was detected above the DTSC SL of 0.42 $\mu g/m^3$ in all eight indoor air samples and in two outdoor air samples (Figure 2). The third outdoor air sample was slightly below the DTSC SL. However, benzene was not detected above the laboratory reporting limit in any of the sub-slab samples. Benzene concentrations in indoor air are similar to outdoor air concentrations and do not suggest they are a result of VI.

- Methylene chloride was detected in all indoor and outdoor air samples with one indoor air exceedance above the DTSC SL of 12 $\mu g/m^3$ (IA-5 – 14 $\mu g/m^3$). Methylene chloride was also detected in two sub-slab samples (SS-1 and SS-5), one of which was the co-located sub-slab sample for IA-5. Methylene chloride is commonly found in paint strippers, adhesives, lubrication products, and general cleaners, which may have contributed to concentrations detected in indoor air. The methylene chloride detection in sub-slab sample SS-5 is lower than the detection in indoor air suggesting that an indoor source may be contributing to concentrations in indoor air. Also, significant attenuation was observed between methylene chloride concentrations in sub-slab soil vapor and indoor air at IA-1/SS-1.

Conclusions & Recommendations

Based on the analytical results of the VI investigation, Roux concludes the following:

- The observed PCE and TCE attenuation from sub-slab to indoor air is roughly an order of magnitude lower than the conservative USEPA attenuation factor of 0.03. All of the detected concentrations of PCE and TCE in indoor air were below conservative DTSC SLs.

- Benzene was detected in all indoor and outdoor air samples, but not detected in any sub-slab samples. Detections of benzene in outdoor air are similar to indoor air, indicating that outdoor air is most likely impacting indoor air.

- Methylene chloride was detected in all indoor and outdoor air samples and two sub-slab samples. Methylene chloride is commonly found in paint strippers, adhesives, lubrication products, and general cleaners, and was detected in only two sub-slab samples. Indoor air detections are most likely due to indoor and outdoor air sources.

Based on the results of Roux's VI investigation, no additional mitigative actions are recommended for Buildings 2 or 4 at this time. Consistent with regulatory guidance, but only as warranted as to current tenancy and demolition/development plans, Client should consider repeating the sampling event every 6 months to confirm vapor intrusion conditions have not changed.

DAILY FIELD REPORT

5150 EAST PACIFIC COAST HIGHWAY, SUITE 450
LONG BEACH, CALIFORNIA 90804 TEL 310-879-4900 FAX 562-719-9431

PROJECT NAME: BLG San Jose	DATE: 2/2/2021	PAGE 1 OF 2
PROJECT NO.: 3662	ARRIVE SITE: 650 DEPART SITE: 1430	

ROUX PERSONNEL ON-SITE: A. TRUONG	CONTRACTOR(S) ON-SITE: GPRS (Bryan Ellis)
	Pacific Cutting (Dave & Rick)
GENERAL WORK DESCRIPTION: Utility clearance (RR ROW), Bldg Survey, HVAC Evaluation & Bldg	

TIME	ACTIVITY - WORK PROGRESS
650	AT arrive onsite @ 650 N King RD. Park @ main lot.
705	GPRS (Bryan Ellis) arrive on site. Park @ main lot @ 650 N King RD. H&S tailgate: cold stress, transients, overgrown vegetation, exit points. GPRS says looks like nothing along RR ROW (electrical lighting / water lines look to be coming from bldgs, not under RR ROW). GPRS will use GPR & passive mode (wand). There are fences/gates along the RR ROW. One gate we can't pass from King RD. AT drive to Educational Park Drive to check access, no access b/c gate w/ 2 master locks, will ask Susan (prop. manager) for keys (Bryan has been to this site before.)
745	several cars parked in RR ROW spur (~10) but should be able to clear around them. GPRS identified subsurface object/ structure, potentially a switch for RR (approx. 2' deep), unable to trace towards RR b/c of puddle. GPRS report lot of random debris in soil under asphalt (metal?). AT calibrate PID PPB RAE (38256) zero: 0ppb, 10 ppm iso: 10.1 ppb
755	GPRS mark out RR ROW while AT meet w/ Susan & Pacific Cutting (Dave & Rick). GPRS reports GPR can only read 3 ft deep. there is debris under asphalt. ^ preliminary walk thru w/ Susan.
810	AT meet w/ Susan & Pacific Cutting. Start @ Guaranteed Express (meet w/ Carl Heiney (415-235-5767). He has ~10 core employees & drivers. The HVAC system doesn't heat or ventilate, only the fan works. Guaranteed Express doesn't store haz mat. (only lithium ion batteries) There's 1 floor & a mezzanine.
900	~~Bld~~ AT Building survey at US Food (used just as storage), met w/ ~~FHA~~ Mark Progressive (painting company). met w/ David. Safra (dry food), met w/ Khalid & Mr Ron (415-513-6312, 408-396-7699)
1100	GPRS finish clearing what we can. There is a blue mechanical gate (@ ~SB-31) that can't be moved. Bryan allows RR from Educational Park Drive. There is a chain link fence (@ ~SB-35) that he can't push w/ GPR. There's a lot of debris (wood pallets, asphalt, tree growth, brush). RR ROW core: 2004. GPRS begin cleaning sub/slab locations. AT conduct thorough bldg survey (see attached field notes). Susan will file.
1130	GPRS report the bldgs (2 & 4) will have ~5-8" concrete slab then wire mesh then soil. Bryan uses tape to mark out the interior locations. Some locations were omitted: @ SS-5: we moved the location to main office area (by lobby) based on tenant request (Guaranteed Express)

Signed:

DAILY FIELD REPORT

5150 EAST PACIFIC COAST HIGHWAY, SUITE 450
LONG BEACH, CALIFORNIA 90804 TEL 310-879-4900 FAX 562-719-9431

PROJECT NAME: BCH San Jose	DATE: 2/2/2021	PAGE 2 OF 2
PROJECT NO.: 3667	ARRIVE SITE: 650 DEPART SITE: 1430	

ROUX PERSONNEL ON-SITE: A. Trunk	CONTRACTOR(S) ON-SITE: GPRS, Pacific Cooling
GENERAL WORK DESCRIPTION: Utility clearance (ER Row), Bldg survey, HVAC evaluation & Bldg	

TIME	ACTIVITY - WORK PROGRESS
	@ SS-4 (Valiant): We moved the location to the main warehouse space.
	@ SS-3 (US Tsubaki): We moved the location to the office space in the back - more enclosed, office area (roll up door remains open in warehouse space).
	@ SS-2 (Air 1): We moved the location to the side/front of the office b/c there was equipment/obstructions.
	@SS-7 (printing - office): We moved the location to the front reception space based on tenant's request.
	@ SS-8 (printing - warehouse): We moved the location to a less active space (still close to previous investigation location based on map).
1145	GPRS used a mini GPR for all subsurface locations, which reads in inches (as opposed to standard GPR which reads in feet). We were unable to access Satra suite, where SS-1 is, so GPRS will come back tmrw @ 700. AT (all Satra tenant. They were unwilling to come back (they left @ 1100). He (Khalid) will be back tmrw. GPRS off site @ 1400
1200	~~GPRS (Bryan) off-site.~~ AT continue bldg survey. Crack/seam inspection: in the air filter bldg. There is a ~4" pipe penetration w/ broken concrete. In the Valiant suite, there is an open drain (no PID readings in either). During bldg inspection, there were no PID readings other than what is depicted in the attached figure. Pacific Cooling was not able to access the roof from w/in the bldg, but PCC used a ladder to get to the roof. Dave will provide HVAC information via email @ the end of the day. Pacific Cooling off site @ ~1130.
1330	AT walk RR Row to check what portion of RR was unable to be cleared w/ GPR. The mechanical blue gate could be moved (@ SB-31). AT access from Commercial Park drive, the chain link fence begins @ SB55, so GPRS couldn't clear from SB31 + SB55 w/ GPR. There is a mound of asphalt on the northern interval, as well as overgrown vegetation, burned (1 set), wood pallets, random debris. AT walked adjacent resident dumping a bucket of soil over the RR Row.
1430	Check out w/ MN. AT off site.

INDOOR AIR QUALITY QUESTIONNAIRE AND BUILDING INVENTORY

This form must be completed for each residence involved in indoor air testing.

Preparer's Name ANGELA TRUONG Date/Time Prepared 2/2/2021 @ 810

Preparer's Affiliation CONSULTANT (ROVX) Phone No. 562-446-8620

Purpose of Investigation Identify crack/seam/utility perforation, chemical inventory, HVAC system

1. OCCUPANT:

Interviewed: (Y) / N

Last Name: Heiney First Name: Carl

Address: 652 N KING RD, SAN JOSE, CA

County: SANTA CLARA

Home Phone: N/A ~~Office~~ Cell Phone: 415-235-5707

Number of Occupants/persons at this location ~10 ppl Age of Occupants N/A

2. OWNER OR LANDLORD: (Check if same as occupant ___)

Interviewed: (Y) / N

Last Name: Sagisi First Name: Susan

Address: 300 Santana Row, 5th Floor

County: SANTA CLARA

Home Phone: 408-936-3696 Office Phone: 408-318-4095

3. BUILDING CHARACTERISTICS

Type of Building: (Circle appropriate response)

Residential	School	(Commercial/Multi-use)
Industrial	Church	Other: _____

If the property is residential, type? (Circle appropriate response) N/A

Ranch	2-Family	3-Family
Raised Ranch	Split Level	Colonial
Cape Cod	Contemporary	Mobile Home
Duplex	Apartment House	Townhouses/Condos
Modular	Log Home	Other:_____

If multiple units, how many? 7 tenants (Guaranteed express, Progressive, US Foods, Air filter, Air 1, Sutro, Valmont)

If the property is commercial, type?

Business Type(s) storage, dry food, printing, office space

Does it include residences (i.e., multi-use)? Y / (N) If yes, how many? _____

Other characteristics:

Number of floors 1 + mezzanine Building age N/A

Is the building insulated? Y / (N) How air tight? Tight / Average / Not Tight

4. AIRFLOW

Use air current tubes or tracer smoke to evaluate airflow patterns and qualitatively describe:

Airflow between floors

Airflow near source

Outdoor air infiltration

Infiltration into air ducts

5. **BASEMENT AND CONSTRUCTION CHARACTERISTICS** (Circle all that apply) NO Basement

a. Above grade construction:	wood frame	concrete	stone	brick
b. Basement type:	full	crawlspace	slab	other _____
c. Basement floor:	concrete	dirt	stone	other _____
d. Basement floor:	uncovered	covered	covered with _____	
e. Concrete floor:	unsealed	sealed	sealed with _____	
f. Foundation walls:	poured	block	stone	other _____
g. Foundation walls:	unsealed	sealed	sealed with _____	
h. The basement is:	wet	damp	dry	moldy
i. The basement is:	finished	unfinished	partially finished	
j. Sump present?	Y / N			
k. Water in sump?	Y / N / not applicable			

Basement/Lowest level depth below grade: ~~_____~~ (feet)

Identify potential soil vapor entry points and approximate size (e.g., cracks, utility ports, drains)

In the air filter bldg, there is a ~4" pipe penetration w/ broken concrete (no PID readings). In the vacant suite, there is an open sewer/drain pipe (no PID readings). See attached figure.

6. **HEATING, VENTING and AIR CONDITIONING** (Circle all that apply)

Type of heating system(s) used in this building: (circle all that apply – note primary)

Hot air circulation	Heat pump	Hot water baseboard
Space Heaters	Stream radiation	Radiant floor
Electric baseboard	Wood stove	Outdoor wood boiler Other _____

The primary type of fuel used is:

Natural Gas	Fuel Oil	Kerosene
Electric	Propane	Solar
Wood	Coal	

Domestic hot water tank fueled by: _____

Boiler/furnace located in:	Basement	Outdoors	Main Floor	Other_____
Air conditioning:	Central Air	Window units	Open Windows	None

Are there air distribution ducts present? Y / N

Describe the supply and cold air return ductwork, and its condition where visible, including whether there is a cold air return and the tightness of duct joints. Indicate the locations on the floor plan diagram.

7. OCCUPANCY

Is ~~basement/~~lowest level occupied? (Full-time) Occasionally Seldom Almost Never

Level	**General Use of Each Floor (e.g., familyroom, bedroom, laundry, workshop, storage)**
Basement	N/A
1st Floor	storage, office area, printing
2nd Floor	~~N/A~~ (AT) about 1/3 (eastern portion) of bldg is vacant/unused office space w/ restrooms
3rd Floor	N/A
4th Floor	NA

8. FACTORS THAT MAY INFLUENCE INDOOR AIR QUALITY

a. Is there an attached garage? Y / (N)

b. Does the garage have a separate heating unit? Y / N / (NA)

c. Are petroleum-powered machines or vehicles stored in the garage (e.g., lawnmower, atv, car) Y / N / (NA) Please specify no garage

d. Has the building ever had a fire? Y / (N) When? not within last 8 yrs

e. Is a kerosene or unvented gas space heater present? Y (N) Where? _____

f. Is there a workshop or hobby/craft area? Y / (N) Where & Type? _____

g. Is there smoking in the building? Y / (N) How frequently? _____

h. Have cleaning products been used recently? (Y) N When & Type? routine maintenance

i. Have cosmetic products been used recently? Y / (N) When & Type? _____

j. Has painting/staining been done in the last 6 months? Y (N) Where & When? _____

k. Is there new carpet, drapes or other textiles? Y (N) Where & When? _____

l. Have air fresheners been used recently? (Y) / N When & Type? restrooms

m. Is there a kitchen exhaust fan? Y (N) If yes, where vented? _____

n. Is there a bathroom exhaust fan? Y / N If yes, where vented? _____

o. Is there a clothes dryer? Y (N) If yes, is it vented outside? Y / N

p. Has there been a pesticide application? (Y) N When & Type? in attic spaces "several months ago" (~6 mon)

Are there odors in the building? (Y) / N
If yes, please describe: chemical odor in progressive suite, smoking odor in Air 1 suite.

Do any of the building occupants use solvents at work? (Y) N
(e.g., chemical manufacturing or laboratory, auto mechanic or auto body shop, painting, fuel oil delivery, boiler mechanic, pesticide application, cosmetologist

If yes, what types of solvents are used? progressive: imaging agent, recycling agent, cleaning chemicals

If yes, are their clothes washed at work? Y (N)

Do any of the building occupants regularly use or work at a dry-cleaning service? (Circle appropriate response)

Yes, use dry-cleaning regularly (weekly)
Yes, use dry-cleaning infrequently (monthly or less)
Yes, work at a dry-cleaning service
No
(Unknown)

Is there a radon mitigation system for the building/structure? Y / N Date of Installation: _____
Is the system active or passive? Active/(Passive) on fan is on, no heating / active ventilation

9. WATER AND SEWAGE

Water Supply: Public Water Drilled Well Driven Well Dug Well Other: _____

Sewage Disposal: Public Sewer Septic Tank Leach Field Dry Well Other: _____

10. RELOCATION INFORMATION (for oil spill residential emergency)

a. Provide reasons why relocation is recommended: _____

b. Residents choose to: remain in home relocate to friends/family relocate to hotel/motel

c. Responsibility for costs associated with reimbursement explained? Y / N

d. Relocation package provided and explained to residents? Y / N

No PID reading unless otherwise noted.

units: ppb unless otherwise noted.

PROJECT NAME: BIG SUR JUST	DATE: 2 | 11 | 21	PAGE 1 OF	
PROJECT NO.: 3662	ARRIVE SITE: 745	DEPART SITE: 1145	

ROUX PERSONNEL ON-SITE: A. TRUONG	CONTRACTOR(S) ON-SITE: Conference Crew
	& Richard)
GENERAL WORK DESCRIPTION: ~~soil sampling~~ (AT) slab vapor pin installation	

TIME	ACTIVITY - WORK PROGRESS
745	AT arrive on site.
750	Conference arrive on site. H&S tailgate: use hearing & eye protection, use water to keep dust generation low, Covid-19 distancing w/ tenants.
800	Walk the site. Conference doesn't have water, but will use the vacuum to suck dust while using the HAM drill. AT will offer ear plugs to tenants.
830	Conference (Trevor & Richard) off site to Home Depot to buy extension cords b/c they only have ~75' of cord. generator will stay outside.
910	Conference back on site. enter US FOODS (Mark). set up @ SS-3.
930	use rotary hammer w/ 5/8 drill bit to core hole thru carpet & slab. use vacuum for dust. need to add dust filter / water to vacuum. cut around carpet to snug fit. install pin @ SS-3, black rubber tip capped, small cone sitting over pin. (pin sits ~0.5" above ground). Mark give cone to door for Mon + Tue (9117)
940	Conference add dust filter to vacuum & wet the filter.
945	Enter Air 1. set up @ SS-1. install SS-1, rubber cap & cone over pin. SS-1 is isolated by the side door. set up @ SS-2 (by office). install SS-2, rubber cap & cone over pin. AT remind Isaac that we will be back on Mon (~8, 12, 4 pm) & Tues.
1000	Enter Progressive from loading dock. set up @ SS-8. Use water bottle to spray water @ drill hole for dust. set up @ SS-7. AT talk w/ Mark (progressive) & let him know Mon & Tues schedule. we will be here. install SS-7 & SS-8, rubber cap & cone over pin.
1045	Enter Guaranteed Express. set up @ SS-5. Apply wet rag over vacuum dust filter. cut carpet before drilling. install SS-5, rubber cap & cone over pin. Remind Carl of Mon & Tues schedule.
1100	~~Enter~~ (AT) Enter bldg 1058. set up @ SS-6. install SS-6, rubber cap & cone over pin. AT lock the key back in key pad.
1110	Enter vacant suite, open roll up door for easy access. set up @ SS-4 install SS-4, rubber cap & cone over pin. close rollup door, put latch back & ~~close~~ (AT) lock key back in key pad. All vapor pins installed
1115	Enter AT filter for concrete patch around the pipe - remove broken pieces out. the vapor pipe is not connected to anything under the slab (gap btwn the concrete & pipe, potential drain from roof to subsurface). will not patch b/c potentially block pipe. Conference remove broken concrete. AT lock roll up door.
1130	AT show MN the 1005 bldg, not actually attached to 650 bldg.

Signed:

1145 Conference off site. AT off site.

DAILY SITE SAFETY CHECKLIST

Job Name: BLG SJ

Location: 650 N KING RD, SAN JOSE, CA

Date(s) 2/11/21, 2/15/21

Client Site # 3662

Weather: M- 61°F, cloudy T- 61°F, cloudy W- TR- 45°F, cloudy F-

•"On the Job" interactive meeting held before work starts	•Provide details of work planned for the day
•Conducted at least once per day	•Review the Job Safety Analysis (JSA) and work hazards
•Involves everyone working at the Site	•Required PPE for the planned work
•Should familiarize everyone with work area & vicinity	•SPSAs are discussed
•Work permit procedures	•HASP is reviewed
•Emergency access/exits & "rally" point	•Ensure safety equipment is on Site
•Emergency contacts/phone #s, hospital route	•Test required safety equipment (such as emergency stop controls)
•Should be interactive	•Can also include inspection of tools and equipment to be used

Instructions: Please only use form for Monday through Friday of one calander week. All attending must initial in boxes below.

#	CHECKLIST ITEM	DATE				
		M-	T-	W-	TR-	F-
1	The HASP (including emergency phone #s) has been reviewed & signed by Roux staff & subcontractors	AT	AT		AT	
2	Personnel are LPS and OSHA-40 (as applicable) trained and SSE are identified and have an on-site mentor	AT	AT		AT	
3	Emergency meeting point known, First Care facility and ER identified	AT	AT		AT	
4	Applicable JSAs have been identified and approved by Roux management. (JSAs Reviewed?)	AT	AT		AT	
5	Roux personnel & subcontractors have discussed hazards associated with Site-specific work	AT	AT		AT	
6	Any potential slips, trips or fall hazards have been identified	AT	AT		AT	
7	All workers have appropriate PPE, including long sleeves and have signed in for the day (2nd Page)	AT	AT		AT	
8	No person on-Site has the appearance of being under the influence of motor skill altering substances and are familiar with D&A policy	AT	AT		AT	
9	Critical equipment on-Site is noted and is in safe working order	N/A	N/A		N/A	
10	Site control has been established and exclusion zone is identified (using safety cones or barricades to mark out work area)	AT	AT		AT	
11	Appropriate permits has been obtained and potential ignition sources were identified if applicable for Hot Permits	N/A	N/A		N/A	
12	If applicable, all third party permits to construct are on hand and access is permissible.	N/A	N/A		N/A	
13	Lock Out / Tag Out procedures have been followed where applicable, for electric and water.	N/A	N/A		N/A	
14	Electrical power operated tools shall be properly grounded and used with a GFCI.	N/A	N/A		N/A	
15	Traffic Safety Control measures have been put in place where applicable	AT	AT		AT	
16	All vessels containing flammable/corrosive material are labeled and MSDSs are available for all chemicals	N/A	N/A		N/A	
17	Subsurface work : Drilling, trenching, etc. conducted according to required Protocol, including pre-field preparations, utility mark-out and "hand" clearing	AT	AT		AT	
18	Excavated soils are properly stored; excavations are properly shored/sloped and barricaded.	N/A	N/A		N/A	
19	Good housekeeping procedures are meet; food and beverages are consumed outside of the work area.	AT	AT		AT	
20	A first aid kit, eye wash bottle/station, and fire extinguishers are available for use	AT	AT		AT	
21	No smoking signs are visibly posted in areas of potential flammable vapors	AT	AT		AT	
Initial on right to verify that these actions have taken place

Case Narrative

Roux Associates, Inc.
5150 E. Pacific Coast Hwy.
Suite 450
Long Beach, CA 90804
Matthew Nelson

Lab Job Number: 440957
Project No: 3662.0001L000
Location: BCG San Jose
Date Received: 02/16/21

This data package contains sample and QC results for twenty air samples, requested for the above referenced project on 02/16/21. The samples were received intact. This report was revised and reissued on 03/09/21 to include helium results for the soil vapor samples.

Volatile Organics in Air by MS (EPA TO-15 and EPA TO-15 SIM):
No analytical problems were encountered.

Volatile Organics in Air GC (ASTM D1946):
No analytical problems were encountered.

SAMPLE ACCEPTANCE CHECKLIST

Section 1

Client: ROUX ASSOCIATES Project: BCG SAN JOSE

Date Received: 2/17/21 Sampler's Name Present: ☑ Yes ☐ No

Section 2

Sample(s) received in a cooler? ☐ Yes, How many? _____ ☑ No (skip section 2) Sample Temp (°C) (No Cooler): AMBIENT

Sample Temp (°C), One from each cooler: #1: _____ #2: _____ #3: _____ #4: _____

(Acceptance range is < 6°C but not frozen (for Microbiology samples, acceptance range is < 10°C but not frozen). It is acceptable for samples collected the same day as sample receipt to have a higher temperature as long as there is evidence that cooling has begun.)

Shipping Information: GLS 552281C35, C36, C37, C38

Section 3

Was the cooler packed with: ☐ Ice ☐ Ice Packs ☐ Bubble Wrap ☐ Styrofoam ☐ Paper ☐ None ☐ Other _____

Cooler Temp (°C): #1: _____ #2: _____ #3: _____ #4: _____

Section 4	YES	NO	N/A
Was a COC received?	✓		
Are sample IDs present?	✓		
Are sampling dates & times present?	✓		
Is a relinquished signature present?	✓		
Are the tests required clearly indicated on the COC?	✓		
Are custody seals present?		✓	
If custody seals are present, were they intact?			✓
Are all samples sealed in plastic bags? (Recommended for Microbiology samples)			✓
Did all samples arrive intact? If no, indicate in Section 4 below.	✓		
Did all bottle labels agree with COC? (ID, dates and times)	✓		
Were the samples collected in the correct containers for the required tests?	✓		
Are the containers labeled with the correct preservatives?			✓
Is there headspace in the VOA vials greater than 5-6 mm in diameter?			✓
Was a sufficient amount of sample submitted for the requested tests?	✓		

Section 5 Explanations/Comments

Section 6

For discrepancies, how was the Project Manager notified? ☐ Verbal PM Initials: _____ Date/Time _____

☐ Email (email sent to/on): _____ / _____

Project Manager's response:

Completed By: _____ Date: 2/17/21
