Since 1990

Date: October 7, 2020
Project No. 20-431

Michael De La Torre
Director of Acquisitions
LINC Housing Corporation
350 Elm Avenue,
Long Beach, CA 90807

Subject: Phase I Site Assessment for three commercial buildings located at 12611 S. Willowbrook Avenue, and two vacant lots located at 12617 and 12625 S. Willowbrook Avenue, City of Compton, CA 90222.

Dear Mr. De La Torre:

Per your request, we are pleased to submit our report for a Phase I Environmental Site Assessment for the subject property. This report includes the results of our findings from visual surveys, historical land use review, interviews, records and regulatory review, and related sources.

We appreciate the opportunity to be of service and look forward to working with you.

Very truly yours,
Nicholas
Nicholas Aboufadel PE, MSCE, MSE
Project Manager

PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

Three Commercial Buildings located at 12611 S. Willowbrook Avenue,
and two Vacant Lots located at 12617 and 12625 S. Willowbrook Avenue,
City of Compton, CA 90222.

1.0 INTRODUCTION

This report presents a summary of the activities and the results of the Phase I Environmental Assessment performed by USA Environmental, Inc. ("USAE") for the subject property legally described in Section 4.0 of this report. This assessment generally follows industry guidelines for a Phase I Environmental Risk Report. The goal of this process is to identify any (1) recognized environmental conditions (RECs), (2) historic recognized environmental conditions (HRECs), (3) controlled recognized environmental conditions (CRECs), and/or (4) de minimis conditions associated with the subject property.

2.0 PURPOSE AND SCOPE

The purpose of this investigation was to determine if there exists any significant surface or subsurface property contamination by hazardous and toxic substances that could constitute a potential liability for the property owner or lessee.

The Environmental Site Assessment, (according to was conducted according to the American Society for Testing & Materials Standard Practice doe ESA's number E-1527-13, latest edition. and consisted of the following procedures as applicable:

1. A review of the chain of title for the subject property for a period of the last 50 years.
2. A determination of past site uses based upon interviews with prior or current owners, owners of adjacent property or other familiar with subject property, and a review of historical documents, aerial photographs and other relevant data, f available.
3. A review of the records of local, state, and federal environmental agencies to ascertain documented information regarding the site and surrounding areas.
4. A visit to the site to visually ascertain the existence of potential areas of currently recognized contamination, including unusual land or soil discoloration, stressed vegetation, physical irregularities, dumping, aboveground (AST's) or underground tanks (UST's), transformer of landfills.

5. Visual identification of other issues, deemed appropriate in order to determine evidence of potential contamination by currently recognized hazardous substances at the site.
6. Any other pertinent information deemed necessary for a Phase I meting the minimum standards and requirements.
7. Preparation of a site sketches showing existing property boundaries and improvements, and locations for storage and/or use of hazardous materials and/or waste, if any.
8. Color photos of the subject site.
9. Preparation of a summary report indicating investigation done, sources of information, data obtained, and interpretation of data regarding possible or identified site contamination.

3.0 ACTIVITIES CARRIED OUT

USAE personnel performed a review of public records, for the purpose of identifying readily available evidence; that would provide a record of past and present activities, on or in the immediate vicinity of the subject property, which may have resulted in the deposit of hazardous materials, or contamination of the site by hazardous materials. Such activities conducted by USAE personnel during this portion of the environmental evaluation included review of the following:

3.1 REVIEW OF COUNTY RECORDS;

1. City, Building and Planning Department concerning historic and future development in the general vicinity;
2. City, Engineering Records;
3. City, Business License Section;
4. City, Bureau of Fire Prevention;
5. County, Hydraulic/Water Conservation Department;
6. State Regional Water Control Board;
7. County Environmental Health Services, Site Assessment and Mitigation
8. County, Assessor Office;
9. County, Appraisal Office;
10. County, Clerk and Recording Office.

3.2 REVIEW OF FEDERAL AND STATE RECORDS;

Review of Federal records to gain insight into any on site or surrounding environmental hazards, which included:

NPL, TSD, CERCLIS, CORRACTS,, RCRIS-SG, RCRIS-LG, NFRAP, ERNS, FINDS, TRIS, NPL.

Review of State and County records to identify any hazardous substance release locations, and emergency response records concerning use, storage, spills, or accidents involving hazardous materials at or surrounding the site, including:

CAL-SITES, CORTESE, LUST, UST, HWIS, AST.

A detailed explanation of each database, its contents, codes used, and dates of last update are included in Appendix F.

3.3 SITE INVESTIGATION

USAE personnel conducted a site investigation on September 30, 2020 by Nicholas F. Aboufadel P.E. (see Appendix A) to identify any indications of environmental contamination. Some of the signs, which were investigated during on site investigations, include:

1. Surface spills or disposal areas of liquid or solids;
2. Surface storage of drums or transformers;
3. Areas of unusual and stressed vegetation;
4. The presence of buried material, (e.g., fills or vents pipes);
5. Fill areas;
6. Site drainage features;
7. General housekeeping and maintenance;
8. Staining on soil or pavement;
9. Abrupt or abnormal changes in land contours; and
10. Other areas of possible contamination sources.

Adjacent properties and land uses were also surveyed, regarding possible use or storage of hazardous materials that might impact the subject site.

4.0 ASSET INFORMATION

Asset name and address (Please see Figures 1, 2, 3, 4 and Appendix B);
The site consists of three commercial buildings located at 12611 S. Willowbrook Avenue, and two vacant lots located at 12617 and 12625 S. Willowbrook Avenue, City of Compton, CA 90222.

5.0 SITE BACKGROUND

5.1 Site Location and Description (see Appendices C, D and E):
Site Improvements: The subject site consists of three parcels
The property site consists of three one-story commercial buildings located at 12611 S. Willowbrook Avenue, Parcel Number 6152-002-021 and the total parcel area is 24,965 square feet. The Property class (7100, Industrial / Church), the buildings were built in 1963 and the buildings total area is 4,182 square feet,
Vacant lot located at 12617 S. Willowbrook Avenue, Parcel Numbers 6152-002-900 and the total area is 10,606 square feet. The Property class (010V, Residential/ Single family/ Vacant land) and
Vacant lot located at 12625 S. Willowbrook Avenue 6152-002-901, and the total area is 17,239 square feet. The Property class (100V, Commercial / Vacant land), in the City of Compton, State of California, 90222.

Driveway and Parking Area: The site can be accessed from S. Willowbrook Avenue and 126th Street.

Landscaped Areas: The site is not landscaped with trees / grass.

Current use: Drew Child Development Corporation (School for ages 3-5 years) and two vacant lots.

Current Occupants/Tenants (Please See Appendix C): At the time of the survey was conducted, the site was occupied at 12611 S. Willowbrook Avenue by Drew Child Development Corporation (School for ages 3-5 years) and two vacant lots at 12617 and 12625 S. Willowbrook Avenue.

Vegetation: Visual observations were made of the vegetation noted on the property in an effort to evaluate if it had sustained damage that could be related to the presence of localized soil or water contamination. None of the vegetation observed appeared to be damaged or stressed in a manner, which could be attributable to the presence of contamination.

Stained Soil: Visual observations were made of the soil to identify any discolorations or surface staining which could be indicative of contaminant discharge.

Surface Anomalies/Depression: Visual observations were also made to evaluate the presence of environmentally unusual and /or suspicious conditions such as land depressions and other surface anomalies indicative of possible oil wells, drywells, sumps, waste dump sites, leach fields or other subsurface activities. No surface anomalies or depressions were observed during our site visit.

Utilities: Electric Power-Southern California Edison
Gas-Southern California Gas
Drinking Water- County
Sewage- County
Trash Collection- County Disposal Contractor.

Water Retention Areas: There were no water retention facilities observed on the subject property.

General Condition of the Site: The site and buildings were observed to be in good condition.

Site Improvements

Site Condition:	Fair.
Landscaping:	Trees through out the site.
Security:	Chain-link Fence.
Rail Service:	No.
Ingress & Egress:	Adequate.

Site Improvements

The site consists of three commercial buildings located at 12611 S. Willowbrook Avenue, and two vacant lots located at 12617 and 12625 S. Willowbrook Avenue, City of Compton, CA 90222.

The subject site at 12611 S. Willowbrook Avenue, consists of three-story commercial office buildings of stucco exterior walls with and the buildings total area is 4,182 square feet, two steel conatainrs and a paved asphalt parking.

Paving:	Asphalt.
Landscaping:	Trees, grass on site.
Security:	Chain link steel fence.

Basic Construction

Quality:	Low to average.
Foundation:	Concrete slab.
Exterior Walls:	Stucco frame.
Roof:	Flat / Slope.
Windows:	Reinforced glasses in metal frames.
Electrical:	400 amp, 110-208 volt, 3 phases.

Interior Finish

Interior Walls:	Drywalls.
Clear Height:	About 20 feet.
Lighting:	Bulb light panels lighting.

5.2 Properties Surrounding the Site (illustrated in Figure 4);

West: Residential area..

South: The Phoenix Project A Community Family Service Center.

North: E 126th Street and residential area..

East: S. Willowbrook Avenue, Railroad Tracks and residential area..

There are no properties adjacent to the subject sites that are managed by a governmental agency.

The adjacent land uses do not present any environmental threat to the property for the following reasons:

The immediate adjacent land uses is Residential

6.0 SITE HISTORY

The subject property has been developed as follows, please see Figures 1 and 2:

Currently, the subject site consists of three one-story commercial buildings located at 12611 S. Willowbrook Avenue, the buildings were built in 1963.

12611 S. Willowbrook Avenue, was used as a school from 1990's through 2020's and 1970's was used as a church.

Two vacant parcels located at 12617 and 12625 S. Willowbrook Avenue.

12613 S. Willowbrook Avenue, was residential from 1930's through 1970's.

12625 S. Willowbrook Avenue, was used as a supermarket from 1960's through 1980's.

6.1 Aerial Photography;

A review of the aerial photography collection, from the County records, displayed the following:

In 2018, 2016, 2014, 2012, 2010, 2009, 2005, 2004, 2003 Photos: showed the existing buildings / two vacant parcels at the site (see Figure 3).

In 1994 Photos, showed the existing buildings / two vacant parcels at the site (see Figure 4).

In 1980, 1972 Photos, the subject property consisted of:

The existing buildings located at 12611 S. Willowbrook Avenue,

A parking lot is located at 12617 S. Willowbrook Avenue,

A building is located at 12625 S. Willowbrook Avenue.

In 1963 Photos, the subject property is occupied by a building.

Three buildings located at 12611 S. Willowbrook Avenue,

A building is located at 12617 S. Willowbrook Avenue,

Existing building as in 1980 and 1972 is located at 12625 S. Willowbrook Avenue.

In 1952 Photos, the subject property is occupied by a building.

Three buildings as in 1963 are located at 12611 S. Willowbrook Avenue,

A building as in 1963 is located at 12617 S. Willowbrook Avenue,

A vacant land is located at 12625 S. Willowbrook Avenue.

The review of the aerial photography did reveal no evidence of an environmental concern for the subject property.

6.2 Prior Ownership and Usage;

A title review was conducted for the subject property. All of the title transfers have either been between private owners and development companies or investment companies.
A review of the grant deeds for the property showed:

No environmental lien was found. Ownership records don't suggest activities of an environmental concern.

6.3 Maps;

A review of the USGS map collection housed at the County Planning Department displayed the following information:

A review of the topography collection from historic aerials displayed the following: 2018, 2015, 2012, 1988, 1982, 1975, 1966, 1963, 1960, 1957 and 1942. Showed no structures at the subject property. In general, the surrounding area residential / commercial / Church.

1937 Showed two structures at the subject property. In general, the surrounding area was vacant.

1934, 1930, 1929, 1926, 1924 and 1923 Showed no structures at the subject property. In general, the surrounding area was vacant land.

1916, 1911, 1906, 1902, 1899 and 1896 Showed no structures at the subject property. In general, the surrounding area was vacant land.
.
In general, the surrounding area is residential / commercial.

Oil and Gas Agency Records or Maps;

USAE submitted a request to the local Oil and Gas Agency for copies of readily available oil and gas related records pertaining to environmental issues to subject site. However, USAE was informed that no records for the subject site are on file with this agency.

A review of the City Directory supplied from HIG (Please see Appendix G), Displayed the following information:

12611 S. Willowbrook Avenue

2018 RAINBOW CHILD DEVELOPMENT CNTR
2001 XXXX
1996 COMNTY HOUSING SVS
1996 RAINBOW CHILD DEVLP 1991 XXXX

1976 WILLOWBROOK SPR MKT 1
1971 WILLOWBROOK SPR MKT
1967 WILLOWBROOK SPR MKT
1965 WILLOWBROOK SPR MKT

In Summary:

12611 S. Willowbrook Avenue, was used as a school from 1990's through 2020's and 1970's was used as a church.

12613 S. Willowbrook Avenue, was residential from 1930's through 1970's.

For 12625 S. Willowbrook Avenue, was used as a supermarket from 1960's

through 1980's.

A review of the Sanborn Maps supplied from HIG please see Appendix H, displayed no information:

7.0 REGULATORY REVIEW

7.1 Local Records Review;

USAE submitted on September 30, 2020 a request to the City of Compton, Public Works for the purpose of reviewing readily available building records that may be on file with this agency for the subject site.

A review of the County Assessor's revealed the following information for the subject property (see Appendices C, D and E).

The property site consists of three one-story commercial buildings located at 12611 S. Willowbrook Avenue, Parcel Number 6152-002-021 and the total parcel area is 24,965 square feet. The Property class (7100, Industrial / Church), the buildings were built in 1963 and the buildings total area is 4,182 square feet, Vacant lot located at 12617 S. Willowbrook Avenue, Parcel Numbers 6152-002-900 and the total area is 10,606 square feet. The Property class (010V, Residential/ Single family/ Vacant land), and
Vacant lot located at 12625 S. Willowbrook Avenue 6152-002-901, and the total area is 17,239 square feet. The Property class (100V, Commercial / Vacant land), in the City of Compton, State of California, 90222.

USAE submitted a request to the local Health Department and/or Environmental agency for the purpose of reviewing readily available environmental records that may be on file with this agency for the subject site. However, USAE was informed that no records for the subject site were on file with this agency.

Water Quality Agency Records
USAE submitted a request to the Water Quality Agency for the purpose of determining if past and present businesses at the subject site are listed on regulatory lists (such as leaking underground tank lists, site cleanup lists, etc.). USAE was informed that no records for the subject site are on file with this agency.

According to the County, Fire Department, Hazardous Materials Division, no underground storage tanks and no violations were found in the file for the site.

According to the County, Research Bureau, no underground storage tanks and no violations were found in the file for the site.

According to the County Buildings and Safety Department, there are no environmental violations for the site.

According to the County Community Safety, there is no file is related to hazardous materials.

No Previous Phase I Environmental Site Assessment Report was available for review.

According to Enviro Check search of databases and files from federal, state, and local environmental regulatory agencies. The complete records search report is included in Appendix F, and the results of USAE's review are presented below.

7.2 Federal and State;

The Federal records search compiles information from the records of the Environmental Protection Agency (USEPA) that identifies environmental problem sites and activities close in proximity (one-mile radius) to the subject site.

7.2.1 National Priorities List (NPL):

The NPL is the USEPA's database of uncontrolled or abandoned hazardous waste sites, identified for priority remedial actions, under the Superfund program. A site included on the NPL must either meet, or surpass, a predetermined hazard ranking system score, or be chosen as a state's top-priority site, or meet all the following criteria:

1. The U.S. Department of Health and Human Services issues a health advisory, recommending that people be removed from the site to avoid exposure;
2. The USEPA determines that the site represents a significant threat;
3. The USEPA determines that remedial action is more cost effective than removal action.

Appendix F contains the NPL database that lists the facility locations within a one-mile radius of the subject site. No NPL site case is present at the site and around the subject site.

7.2.2 Facilities under RCRA Corrective actions (CORRACTS):

Appendix F contains the CORRACTS database, which lists the facility locations

within one- mile radius around the subject site. Seven CORRACTS sites were present around the subject site. These sites do not have an environmental concern for the subject site.

7.2.3 Facilities that treatment, storage and dispose of hazardous waste (RCRA/TSD):
Appendix F contains the RCRA/TSD database, which lists the facility locations within one-mile radius around the subject site. Thirty RCRA/TSD sites were present around the subject site. These sites do not have an environmental concern for the subject site.

7.2.4 Unused and formerly Used Defense Sites (DEFENSE):
Appendix F contains the DEFENSE database, which lists the facility locations within one-mile radius around the subject site. One DEFENSE site was present around the subject site. This site do not have an environmental concern for the subject site.

7.2.5 Brownfields Cleanup and Reuse Sites (Brown):
Appendix F contains the Brown database, which lists the facility locations within one-mile radius around the subject site. One Brown site was present around the subject site. This site do not have an environmental concern for the subject site.

7.2.6 Contaminated Sites List (CSL):
Appendix F contains the CSL database, which lists the facility locations within one-mile radius around the subject site. Forty-six sites were present around the subject site. These sites do not have an environmental concern for the subject site.

7.2.7 Contaminated Sites List (DEED):
Appendix F contains the DEED database, which lists the facility locations within one-mile radius around the subject site. No sites were present around the subject site. This site do not have an environmental concern for the subject site.

7.2.8 Superfund Database (SUPERFUND):
Appendix F contains the SUPERFUND database, which lists the facility locations within half- mile radius around the subject site. Three SUPERFUND sites were present around the subject site. These sites do not have an environmental concern for the subject site.

7.2.9 Sites with Leaking Underground Storage Tank (LUST):

Appendix F contains the LUST database that lists facility locations within a half-mile radius of the subject site. Four records concerning LUST sites were found around the subject site. These sites do not have an environmental concern for the subject site.

7.3.10 Solid Waste Landfills (SWLF):

Appendix F contains the SWLF database, which lists the facility locations within a half-mile radius around the subject site. No SWLF site was present at the site or around the subject site.

7.3.11 Air Emissions Sites (EMISSIONS):

Appendix F contains the EMISSIONS database, which lists the facility locations within a half-mile radius around the subject site. Nine EMISSIONS sites were present at the site or around the subject site. These sites do not have an environmental concern for the subject site.

7.3.12 Hazardous Waste Information System (HAZNET):

Appendix F contains the HAZNET database, which lists the facility locations within a half-mile radius around the subject site. One hundred and eighty sites were present at the site or around the subject site. These sites do not have an environmental concern for the subject site.

7.3.13 Emergency Response Notification System of Spills (ERNS):

Appendix F contains the ERNS database, which lists the facility locations within a 1/4 of a mile radius around the subject site. Four ERNS site was present around the subject site. These sites do not have an environmental concern for the subject site.

7.3.14 Facilities that generate hazardous waste (RCRA/GEN):

Appendix F contains the RCRA/GEN database, which lists the facility locations within a 1/4 of a mile radius around the subject site. Five RCRA/GEN sites were present around the subject site. These sites do not have an environmental concern for the subject site.

7.3.15 Underground/Aboveground Storage Tank Reports (UST/AST):
Appendix F contains the UST/AST database that lists facility locations within a 1/4 of a mile radius of the subject site. No records concerning UST /AST sites were found around the subject site.

7.3.16 Water Wells (WELLS):
Appendix F contains the WELLS database that lists facility locations within a 1/4 of a mile radius of the subject site. No records concerning WELLS sites were found around the subject site.

7.3.17 Hazardous Materials Storage and Incident Records (HAZMAT):
Appendix F contains the HAZMAT database that lists facility locations within a 1/4 of a mile radius of the subject site. Seven records concerning HAZMAT sites were found around the subject site. These sites do not have an environmental concern for the subject site.

8.0 SITE INVESTIGATION AND REVIEW OF HAZARDS

8.1 Topography;

The property is characterized as a flat area, gently sloping to the southeast side. Elevation on the site is approximately 80 feet above Mean Sea Level (MSL).

8.2 Soils;

The soil at the subject site consists of Silty Sandy Clay to approximately 25 feet below existing grade.

8.3 Geology;

The area is located within the Peninsular Ranges Geomorphic Province. Low topographic relief and shallow slopes characterize the plain. Pleistocene terrace deposits, along with Pleistocene and Holocene age alluvial and eolian fans, underlie it. The area is immediately underlain by poorly consolidated non-marine alluvial fans of Holocene age several hundred feet thick, and by stratified sedimentary rocks of marine origin.

The site vicinity is located in the southern part of the Peninsular Ranges geomorphic province of California. Cretaceous granite rocks of the southern California batholith comprise the major rock type in the area. The Green Valley Tonalite, a light gray intrusive igneous rock, also occurs throughout the site vicinity. Relatively unweathered tonalite may be found from 4 to 11 feet below the ground surface.

Large earthquakes from the San Andreas or San Jacinto fault zones could also produce significant ground shaking at the site. The maximum probable ground acceleration to be expected at the site would be in the range of 0.7g.

8.4 Hydrology;

8.4.1 Surface-Water Hydrology;

Site Surface Drainage: Hydraulic flow is generally in a down-gradient direction, usually toward the nearest surface water body. Based upon site surface and improvement characteristics observed during the on-site reconnaissance of the property, surface drainage at the subject site would flow on-site southeast direction.

The surface runoff is handled by a street runoff system. According to the County, Planning Department. There are no surface water bodies such as streams, lakes, etc. around the subject site. There are no rivers located near the site.

Flood Zone: The subject site is located in Zone X (area determined to be outside the 500-year flood plain) of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM), dated 09/26/2008.

8.4.2 Ground-Water Hydrology;
According to the County Public Works, Hydrology Department, the ground water depth is approximately 40 feet below the ground surface and the flow direction is to the southeast.

No Wetlands was found for the subject site.

8.5 Chemicals and raw materials;
No chemicals were found at the subject site.

8.6 Polychlorinated Biphenyls (PCBs):
No transformer is located at the subject site.

8.7 Asbestos-containing Materials (ACM) and Mold;
The presence of materials such as sprayed-on insulation, ceiling texture, which may potentially contain friable asbestos, could be found Asbestos Inspections are not required in the ASTM1527-13 Assessment Standard.

During the Site Reconnaissance, Environmental Concerns looked for material and rea dily apparent evidence of the presence of suspect mold growth, mold was not sampled or absolutely identified.

8.8 Radon;
In the County area, only 0.5% of the homes are predicted to have radon levels above the EPA standard of 4 Pico Curies/Liter (CDHS, 1990). According to the Radiological Health Section of the County Public Health Department there is "no significant health

hazard from radon" in County since most homes, building and schools have radon levels below 0.5 Pico Curies/Liter.

According to the California Department of Health, Radon Section, there are no radon problems within the area of the subject site. The EPA has set an action level for radon in air of 4 picocurries per liter (pCi/L). Due to the practical time constraints of this assessment, air sampling for radon gas was not requested nor conducted. Radon concentration determinations generally are not accurately measured by short period sampling. If long-term exposure to radon gas is a concern, a minimum of a three-month alpha-track test is recommended.

8.9 Lead-based Paint;

The lead-based paints do not appear to represent an environmental threat to the subject property. Lead based paint identification, sampling testing is not a requirement in the ASTM 1527-13 Standard Practice.

8.10 Lead in Drinking Water;

According to the County Water Department, no lead is found in the drinking water at the subject site. It is unlikely to find lead in the building that would affect the water supply, because the water department periodically tests it.

8.11 Hazardous Substances;

No hazardous substances found at the subject site.

8.12 Landfills;

No landfills were observed at the site or within a one-half mile (0.5 mile) radius of the site. Also, the database search did not identify any landfills near the site (see Appendix F: SWLF).

8.13 Pits, Sumps, Drywells and Catchbasins;

No pits, sumps, drywells, or catchbasins were found at the subject site.

8.14 On-site Aboveground and Underground Storage Tanks;

A review of State and Local records, and a site inspection were conducted, to identify any on-site UST's or AST's, concerning use, storage, spills, or accidents involving storage tanks at the site. The results are discussed below.

8.14.1 Underground Storage Tanks (USTs);

There was no evidence that any UST's had been recently removed from the property.

8.14.2 Aboveground Storage Tanks (ASTs);

There was no evidence that any ASTs had been recently removed from the property. No evidence of existing AST was observed on the property. Additionally, neither stained soils, nor evidence of past liquid or solid discharges of hazardous materials were found.

8.15 Storm Water Drainage;

The storm water drainage is a street runoff system. There are no storm water permits for the site.

9.0 DISCLAIMER

USA Environmental, Inc. has performed the activities cited herein, solicited and received information and documentation from public agencies and private parties and conducted appropriate visitations and observations in accord with generally accepted requirements for a preliminary site assessment of this nature. Interviews were held with representatives and tenants. Information, data, documentation and observations, from all sources, were compared and analyzed in order to reach the results and conclusions delineated above.

This work has been conducted in an objective and unbiased manner and is in accord with generally accepted professional practice for this type of work. USA Environmental, Inc. believes the results and conclusions to be accurate and relevant but cannot accept responsibility for the accuracy or completeness of public documentation, or possible withholding of information by those interviewed, or other private parties.

The report is considered current only for a period of 180 days from the date of the Site inspection. The conclusions presented in this report represent USAE's best professional judgment based upon the information available and conditions existing as of the date of this report In any case USAE liability shall be limited to the amount of our professional services fee. In performing its assignment, USAE must rely upon publicly available information, information provided by the client, and information provided by third parties. Accordingly, the conclusions in this report are valid only to

the extent that the information provided to USAE was accurate and complete. This review is not intended as legal advice, nor is it an exhaustive review of Site conditions or facility compliance. USAE makes no representations or warranties, expressed or implied, about the conditions of the Site.

The Federal AAI rule and ASTM E1527-13 require that the Phase I ESA report include the following declarations by the Environmental Professional who completed the assessment

1. I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR §312.10.

2. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR §312.

10.0 SUMMARY AND RECOMMENDATIONS

USA Environmental, Inc. ("USAE") has conducted a Phase I Environmental Site Assessment for three commercial buildings located at 12611 S. Willowbrook Avenue, and two vacant lots located at 12617 and 12625 S. Willowbrook Avenue, City of Compton, Los Angeles County, State of California, 90222, referred to as the "subject site". This included visual observations of the subject property and limited observations of surrounding properties, review of historical land use, review of regulatory database, interviews, and related sources. This Environmental Site Assessment report was conducted according to the American Society for Testing & Materials Standard Practice, ESA's number E-1527-13, latest edition.

Site Improvements: The subject site consists of three parcels
The property site consists of three one-story commercial buildings located at 12611 S. Willowbrook Avenue, Parcel Number 6152-002-021 and the total parcel area is 24,965 square feet. The Property class (7100, Industrial / Church), the buildings were built in 1963 and the buildings total area is 4,182 square feet,
Vacant lot located at 12617 S. Willowbrook Avenue, Parcel Numbers 6152-002-900 and the total area is 10,606 square feet. The Property class (010V, Residential/ Single family/ Vacant land) and Vacant lot located at 12625 S. Willowbrook Avenue 6152-002-901, and the total area is 17,239 square feet. The Property class (100V, Commercial / Vacant land), in the City of Compton, State of California, 90222.

Driveway and Parking Area: The site can be accessed from S. Willowbrook Avenue and 126th Street.

Landscaped Areas: The site is not landscaped with trees / grass.

Current use: Drew Child Development Corporation (School for ages 3-5 years) and two vacant lots.

Current Occupants/Tenants (Please See Appendix C): At the time of the survey was conducted, the site was occupied at 12611 S. Willowbrook Avenue by Drew Child Development Corporation (School for ages 3-5 years) and two vacant lots at 12617 and 12625 S. Willowbrook Avenue.

Vegetation: Visual observations were made of the vegetation noted on the property in an effort to evaluate if it had sustained damage that could be related to the presence of localized soil or water contamination. None of the vegetation observed appeared to be damaged or stressed in a manner, which could be attributable to the presence of contamination.

Stained Soil: Visual observations were made of the soil to identify any discolorations or surface staining which could be indicative of contaminant discharge.

Surface Anomalies/Depression: Visual observations were also made to evaluate the presence of environmentally unusual and /or suspicious conditions such as land depressions and other surface anomalies indicative of possible oil wells, drywells,
sumps, waste dump sites, leach fields or other subsurface activities. No surface
anomalies or depressions were observed during our site visit.

The subject property has been developed as follows, please see Figures 1 and 2:

Currently, the subject site consists of three one-story commercial buildings located at
12611 S. Willowbrook Avenue, the buildings were built in 1963.
12611 S. Willowbrook Avenue, was used as a school from 1990's through 2020's
and 1970's was used as a church.

Two vacant parcels located at 12617 and 12625 S. Willowbrook Avenue.
12613 S. Willowbrook Avenue, was residential from 1930's through 1970's.
12625 S. Willowbrook Avenue, was used as a supermarket from 1960's through 1980's.

Recommendations

Based on the site investigation and the research of records, USA Environmental, Inc. revealed no areas of environmental concern for the subject property. No Vapor Encroachment Condition was found at the subject site or around the subject site.

USA Environmental, Inc. research did not identify any (1) recognized environmental conditions (RECs), (2) historic recognized environmental conditions (HRECs), (3) controlled recognized environmental conditions (CRECs), or (4) de minimis conditions associated with the subject property.

USA Environmental, Inc. did not perform any previous environmental inspection for the seller or purchaser of the subject property. Also, USA Environmental, Inc. never had any affiliation with the seller or the purchaser of the subject property.

If you have any questions, please feel free to call me any time.

Very truly yours,
Nicholas

Nicholas F. Aboufadel PE, MSCE, MSE

NICHOLAS F. ABOUFADEL PE, MSCE, MSE

EDUCATION

M.S., Engineering Mgt, California State University, Long Beach, 1989
M.S., Civil Engineering, California State University, Long Beach, 1985
B.S., Civil Engineering, California State University, Long Beach, 1984

REGISTRATION

State of California and Arizona, Registered Professional Civil Engineer, PE.
State of California, Registered Environmental Assessor No. 03846.
Asbestos building inspector, under EPA and AHERA Guidlines.

EXPERIENCE

1990 - Present: Project Manager, USA Environmental, Inc. - Responsibilities include:

- Preparation of construction details and specifications for the construction of underground tanks, internal roads, and surface drainage structures at PWI Lokern facility.
- Fungai (Mold amd Milldow) Microbiology Testing and Environmental Assessment Reports and evaluating site remediation technology and preparing Phase I, II and III for apartments, schools, churches, gas stations, hotels, land, commercial, and industrial facilities in the states of AR, AZ, CA, CO, CT, FL, GA, HI, IN, KA, LA, MA, MD, MI, MT, NA, NC, NM, NY, OK, OR, PA, PR, RI, TN, TX, WVA, VA, WI, Puerto Rico. Over four-hundered jobs.

1988 - 1990: Project Engineer, ESI - Responsibilities included:

- Civil design and Earthwork of three proposed sites for a new Titan/Centaur launch complex at Vandenberg Air Force Base, California. Work included grading and excavation of up to 10 million cubic yards in cut. Cost estimates for the proposed sites. Designed a mobile launch platform road to withstand 12 million lbs. load, 150 ft. wide according to military manual. Cost estimate and schedule for facilities needed to be demolished and constructed to modify from Space Shuttle launcher to Titan/Centaur launcher.
- Drainage and Erosion control system for access road for a radar station in Saipan.
- Design, slope stability analysis and related cost estimate, for several major gold mining for GFOC (Chimney, Mesquite, Mule Canyon), landfills projects (OII & Chem.Waste) and Liquid Waste storage system for Biomas Power plant.
- QA /QC for construction of realignment of State Highway (9 miles).
- Design and QC for methane gas protection system (600,000 square feet of building area, American Honda). Design of underground steel storage retention structure 150 tons for CSI.
- Site Assessment and remediation for various Santa Fee Rail Yard Facilities.

1986 - 1988: Project Engineer, ARLE Engineering Ltd., Riyadh, Saudi Arabia -
Responsibilities included:

- Preparing reports for planning and execution of subsurface explorations, data evaluation, and construction in all phases of geotechnical exploration, materials testing.Construction inspection of multi-story residential buildings, roads and an airport. Three million dollar soil improvement, using dynamic compaction and CPM analysis for a 600,000 square meter project.

1985: Geotechnical and Civil Engineer, ENJ & Associates, Inc. - Responsibilities included:

- Wrote preliminary soil investigation reports for residential and commercial buildings throughout Los Angeles, San Bernardino and Orange counties. Work included foundation and slope stability analysis, pavement structure design, sewage design, utility lines, grading

and drainage plans, site investigation and surveying, and inspection of concrete and masonry construction.

1982 - 1984: Engineer Assistant, Los Angeles County Road Depart - Responsibilities included:

- Monthly updating of the status of the construction of street improvements throughout Los Angeles County in regard to cost estimates and project completion. Involved in improvements of many streets, design, street signals, cost estimates and preparation of bid documents.

12612 South Wilmington Street, COMPTON, CA
Type: Leaking Underground Storage Tanks (LUST)
Source: California State Water Resources Control Board's Geotracker Leaking Underground Storage Tank list

Record ID:
CALUSTCA-SL204DG2390

Record Details

Case Type	LUST Cleanup Site	**Status**	Open - Remediation
Status Date	3/13/2013 12:00:00 AM	**Cuf Case**	YES
Lead Agency	LOS ANGELES RWQCB (REGION 4)	**Rb Case Number**	I-14779A
Site History	The site was historically used as a gas station. Four underground storage tanks were removed and soil was excavated and soil vapor extraction implemented. Soil only closure was issued in a Regional Board letter dated October 24, 2005. The site was issued a 13267 Order in February 2008 for additional groundwater investigation. The site submitted a work plan for additional off-site groundwater investigation in August 2008, which was subsequently approved by the Regional Board in a letter dated November 19, 2008. As of Jan 2010, the site is obtaining/negotiating access agreements with neighboring properties to commence with the offsite groundwater investigation. Gasoline-related contaminants are present in groundwater beneath the site at elevated concentrations. The lateral and vertical extent of the groundwater contamination has not been determined.	**Begin Date**	9/1/2000 12:00:00 AM
Estimated Status	Case is Open

Area Name	PROJECT WIDE	**Document Type**	Site Screening
Completed Date	6/15/1993 12:00:00 AM	**Comments**	Goldenhill Wood Products occupies a portion of a building owned by Shapco Partnership. The facility has operated as a manufacturer of wood products since 1978. Familian Corporation, a fiber glass manufacturing facility, occupied the site prior to 1978. goldenhill used a solvent based adhesive which contains 1,1,1-trichloroethane (TCA), in the vinyl lamination process untill December 31, 1992. Solvent based adhesive waste in the form of waste water and sludge was derived from the process. Treated waste water is discharged into the sewer line. The non-hazardous residue from the clarifier is sent off-site for reclamation. U.S. EPA conducted a Preliminary Assessment. It seems unlikely that past of present use of hazardous materials at the site could cause a serious problem. Therefore, U.S. EPA recommended NFA, under CERCLA. The Department concurs with the above recommendation that \"No Further Action\" is needed at the site.

Comments Goldenhill Wood Products occupies a portion of a building owned by Shapco Partnership. The facility has operated as a manufacturer of wood products since 1978. Familian Corporation, a fiber glass manufacturing facility, occupied the site prior to 1978. goldenhill used a solvent based adhesive which contains 1,1,1-trichloroethane (TCA), in the vinyl lamination process untill December 31, 1992. Solvent based adhesive waste in the form of waste water and sludge was derived from the process. Treated waste water is discharged into the sewer line. The non-hazardous residue from the clarifier is sent off-site for reclamation. U.S. EPA conducted a Preliminary Assessment. It seems unlikely that past of present use of hazardous materials at the site could cause a serious problem. Therefore, U.S. EPA recommended NFA, under CERCLA. The Department concurs with the above recommendation that \"No Further Action\" is needed at the site.

Violation Date	4/21/2016 12:00:00 AM	**Citation**	22 CCR 15 66265.196 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.196

EnviroCheck Solutions, Inc.
v. 866-517-5513 - f.858-259-0757
www.envirochecksolutions.com

Violation Description	Failure to properly respond to a spill/leak with the following requirements: a) General emergency procedures as required in section 66265.56.b) Cessation of use; prevention of flow or addition of wastes into the tank system or secondary containment system and inspect the system to determine the cause of the release.c) Removal of waste from tank system or secondary containment system:1) If the release was from the tank system, the owner or operator shall, within 24 hours after detection of the leak or, if the owner or operator demonstrates that that is not possible, at the earliest practicable time remove as much of the waste as is necessary to prevent further release of hazardous waste to the environment and to allow inspection and repair of the tank system to be performed.2) If the release was to a secondary containment system, all released materials shall be removed within 24 hours or in as timely a manner as is possible to prevent harm to human health and the environment.d) The owner or operator shall immediately conduct a visual inspection of the release and, based upon that inspection:1) Prevent further migration of the leak or spill to soils or surface water; and2) Remove, and properly dispose of, any visible contamination of the soil or surface water.e) Notifications, reports;1) Any release to the environment, except as provided in subsection e)2) of this section, shall be reported within 24 hours of detection.2) A leak or spill of hazardous waste is exempted from the requirements of subsection (e) of this section, but is not exempted from the requirements of section 66265.56, if it is:A) Less than or equal to a quantity of one (1) pound, andB) Immediately contained and cleaned-up.3) Within 30 days of detection of a release to the environment, a report containing the following information shall be submitted:A) Likely route of migration of the release;B) Characteristics of the surrounding soil (soil composition, geology, hydrogeology, climate);C) Results of any monitoring or sampling conducted in connection with the release, (if available). If sampling or monitoring data relating to the release are not available within 30 days, these data shall be submitted as soon as they become available;D) Proximity to downgradient drinking water, surface water, and population areas; andE) Description of response actions taken or planned.f) Provision of secondary containment, repair, or closure.1) Unless the owner or operator satisfies the requirements of subsections f)2) through 4) of this section, the tank system shall be closed in accordance with section 66265.197.2) If the cause of the release was a spill that has not damaged the integrity of the system, the owner/operator may return the system to service as soon as the released waste is removed and repairs, if necessary, are made.3) If the cause of the release was a leak from the primary tank system into the secondary containment system, the system shall be repaired prior to returning the tank system to service.4) If the source of the	**Violation Division**	Los Angeles County Fire Department

release was a leak to the environment from a component of a tank system without secondary containment, the owner/operator shall provide the component of the system from which the leak occurred with secondary containment that satisfies the requirements of section 66265.193 before it can be returned to service, unless the source of the leak is an aboveground portion of a tank system. If the source is an aboveground component that can be inspected visually, the component shall be repaired and may be returned to service without secondary containment as long as the requirements of subsection g) of this section are satisfied. If a component is replaced to comply with the requirements of this subsection, that component shall satisfy the requirements for new tank systems or components in sections 66265.192 and 66265.193. Additionally, if a leak has occurred in any portion of a tank system component that is not

Area Name	PROJECT WIDE	**Document Type**	Site Screening
Completed Date	7/1/1991 12:00:00 AM	**Comments**	Chemical Technology Laboratories (CTL) and Marlume Inc. are subsidiaries of Martin Metal Finishing (MMF) and currently share and operate at the same site with MMF. Marlume manufactures window frames, CTL manufactures paint, and MMF applies the paint coating manufactured by CTL to window frames. There were two 10,000-gallon tanks on the property; one was used to store gasoline and the other was used to store MEK. Both were removed in 1986 and transported to Mexico. The removal was overseen by RWQCB and the fire department. The contaminated soil due to the tank leak was excavated and stored in drums. The hazardous waste storage area is also contaminated with gasoline and MEK. Numerous violations were noted by the Department. Groundwater is contaminated with MEK, acetone, cyclohexanone, trichloroethylene and perchloroethylene. Pending status recommended for DHS because EPA RCRA lead for PA.

Potential Contaminants Of Concern	Tetrachloroethylene (PCE), Trichloroethylene (TCE)	**Potential Media Affected**	Indoor Air, Aquifer used for drinking water supply, Soil, Soil Vapor
Site History	The Kenneth Hahn Plaza (Site) is a commercial shopping/retail center. Sky High Cleaners is a dry cleaning operation located at the Site, that had releases of tetrachloroethene (PCE) into the subsurface, resulting in impacts to soil, soil gas, and groundwater. Additional investigation is needed at the Site to determine the lateral and vertical extent of contamination.	**Begin Date**	4/2/2001 12:00:00 AM
Estimated Status	Case is Open

Operating Units

There were a total of 459 records in the Operating Units table. We are only displaying 50 of those in this report in order to keep the size of this report manageable. If you would like the full site record, please contact the responsible regulatory agency noted above.

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-0/5-/1995
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from off-site generators	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-0/4-/2011
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-0/4-/2011
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA	**Effective Date**	-1/2-/2016

	UN		
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-1/2-/2016
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-1/2-/2016
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-0/3-/2010
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-0/6-/2016
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-0/2-/2013
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Operating Units

There were a total of 459 records in the Operating Units table. We are only displaying 50 of those in this report in order to keep the size of this report manageable. If you would like the full site record, please contact the responsible regulatory agency noted above.

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-0/5-/1995
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from off-site generators	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-0/4-/2011
Capacity	10 short tons per hour	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	SOLID WASTE REDUCTION UNIT (GPRA UN	**Effective Date**	-0/4-/2011
Capacity	10 short tons per hour	**Number Of Units**	1

Unit Name	OILY WATER POLISHING UNIT (GPRA UNI	**Effective Date**	-0/2-/2013
Capacity	242400 metric tons per day	**Number Of Units**	1

Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	OILY WATER POLISHING UNIT (GPRA UNI	**Effective Date**	-0/6-/2016
Capacity	242400 metric tons per day	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	CONTAIN STORAGE UNIT (GPRA UNIT)	**Effective Date**	-0/9-/2000
Capacity	27500 gallons per day	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from off-site generators	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	CONTAIN STORAGE UNIT (GPRA UNIT)	**Effective Date**	-0/5-/1995
Capacity	27500 gallons per day	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from off-site generators	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	CONTAIN STORAGE UNIT (GPRA UNIT)	**Effective Date**	-0/5-/1985
Capacity	27500 gallons per day	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from off-site generators	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	CONTAIN STORAGE UNIT (GPRA UNIT)	**Effective Date**	-0/9-/2000
Capacity	27500 gallons per day	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from off-site generators	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	VACUUM DISTILLATIO (GPRA UNIT)	**Effective Date**	-0/6-/2016
Capacity	374400 gallons per day	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from off-site generators	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Unit Name	OILY WATER POLISHING UNIT (GPRA UNI	**Effective Date**	-0/4-/2011
Capacity	242400 metric tons per day	**Number Of Units**	1
Capacity Type	Permitted	**Process Code**	TREATMENT, TANK TREATMENT
Commercial Status	Accepts waste from limited off-site generators by special arrangement / agreement	**Legal Status**	PERMITTED - OPERATING, ACTIVELY MANAGING RCRA-REGULATED WASTE

Violation Date	12/23/2014 12:00:00 AM	**Citation**	22 CCR 15 66265.192(h) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.192(h)
Violation Description	Failure to obtain and maintain a written assessment reviewed and certified by an independent, qualified, professional engineer stating the new hazardous waste tank system has sufficient structural integrity, is acceptable for the transferring, storing and treating of hazardous waste, and that the tanks and containment system including the foundation, structural support, seams, connections, and pressure controls (if applicable) are suitably designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be transferred, stored or treated, and corrosion protection so that it will not collapse, rupture, or fail. This assessment shall be obtained prior to placing the tank system in service, and shall be kept on file at the facility. The tank assessment shall be good for five years. This assessment shall also include, at a minimum, the following information: (1) Design standard(s) according to which the tank(s) and ancillary equipment are or will be constructed; (2) Hazardous characteristics of the waste(s) to be handled; (3) For new tank systems or	**Violation Notes**	Returned to compliance on 02/16/2015. OBSERVATION: All FTU tanks and auxiliaries have not been assessed &/or certified by a professional engineer. Operator claiming FTU tanks are existing tanks &/or component that have been installed prior to 07/14/1986.

components in which the external shell of a metal tank or any external metal component of the tank system is or will be in contact with the soil or with water, a determination by a corrosion expert of: (A) Factors affecting the potential for corrosion, including but not limited to: 1. Soil moisture content; 2. Soil pH; 3. Soil sulfides level; 4. Soil resistivity; 5. Structure to soil potential; 6. Influence of nearby underground metal structures (e.g., piping); 7. Stray electric current; and, 8. Existing corrosion-protection measures (e.g., coating, cathodic protection), and (B) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following: 1. Corrosion-resistant materials of construction such as special alloys or fiberglass-reinforced plastic; 2. Corrosion-resistant coating (such as epoxy or fiberglass) with cathodic protection (e.g., impressed current or sacrificial anodes); and 3. Electrical isolation devices such as insulating joints and flanges; (4) For underground tank system components that are likely to be affected by vehicular traffic, a determination of design or operational measures that will protect the tank system against potential damage; and (5) Design considerations to ensure that: (A) Tank foundations will maintain the load of a full tank; (B) Tank systems will be anchored to prevent flotation or dislodgement where the tank system is placed in a saturated zone, or is located within a seismic fault zone; (C) Tank systems will withstand the effects of frost heave; and (D) The installation of a corrosion protection system that is field fabricated shall be supervised by an independent corrosion expert to ensure proper installation.

Completed Date 10/28/2010 12:00:00 AM
Comments Issued letter stating that results from investigations do not demonstrate that VOCs detected onsite have significantly contributed to the regional groundwater contamination. Groundwater data indicate that TCE in groundwater beneath site appears to be the result of off-site historical releases. Requested property owner to sign access agreement to allow further groundwater investigation and monitoring by DTSC or consultants working under DTSC oversight.

Case Type	Cleanup Program Site	**Status**	Open - Assessment & Interim Remedial Action
Status Date	10/27/2015 12:00:00 AM	**Cuf Case**	NO
Lead Agency	DEPARTMENT OF TOXIC SUBSTANCES CONTROL	**Rb Case Number**	0754
Loc Case Number	60000486	**File Location**	Regional Board
Potential Contaminants Of Concern	Other Solvent or Non-Petroleum Hydrocarbon	**Potential Media Affected**	Aquifer used for drinking water supply
Site History	The Witco site is a vacant 3.5-acre parcel transected by the Realigned East Imperial Highway. Approximately 1.1 acres of property are located beneath, 1.3 are on the the south side, and 1.1 acres are onthe north side of the highway. The operations at the Witco site were related to manufacturing of ink, paints, and lacquers from 1947 to 1971. Nineteen underground storage tanks (USTs) were present onsite. The USTs were removed in 1987. The primary constituents identified in the vadose zone are total petroleum hydrocarbons (TPH) and volatile organic compounds (VOCs) centered on the former UST locations. Seventeen soil vapor extraction (SVE) wells (SW-1 through SW-16, and Horz-1) were originally connected to the SVE system. Free product (dark brown to black) has been detected within the perched groundwater zone (found from 30 to 31 feet below ground surface [bgs]) in the areas surrounding the former UST locations. The perched groundwater flow varies from southeast to west at gradients ranging from 0.009 to 0.275. In addition, dissolved TPH, VOCs, and semivolatile organic compounds (SVOCs) are present in the perched groundwater zone. Eighteen wells (SW-1 through SW-18) have been installed onsite. In March 1997, free product (yellow straw color) has been detected within the deep groundwater zone (found from 40 to 42 feet bgs). The deep groundwater flow also varies from southeast to west at gradients ranging from 0.00052 to 0.04. In addition, dissolved VOCs (primarily trichloroethene [TCE]) and dissolved TPH are present within the deep groundwater. Twenty groundwater monitoring wells (MW-1, MW-4, MW-7 through MW-24) have been installed onsite. Three sparge point wells (SP-1 through SP-3) have also been installed at this zone. A SVE system and air sparging system operated at the site from February 1996 through February 1997. The system was shutdown in 1997 due to the detection of yellow free product in the deep zone wells. The existing SVE system was re-	**Begin Date**	10/25/1989 12:00:00 AM

www.envirochecksolutions.com

started in April 2004 through June 2004 as part of of pilot study related to the free product removal. The SVE system operated, again, from September 2004 to December 2004 until PCE was detected on the influent vapor stream. In 2004, the SVE system operated nine SVE wells including one horizontal welll beneath the Imperial Highway Realignment and three nested, shalllow, deep aquifer sparge wells, and deep-zones wells MW-16 through MW-20. The system was designed to treat vapor and adsorbed, dissolved petroleum product found in the vadose and perched groundwater zones. The systems was also designed to treat dissolved-phase VOCs in the deep groundwater zone. Free product was recovered from February 2003 through April 2005 using absorbents, bailing, and product recovery pumps.

EnviroCheck Radius Search Report

About This Report

The databases searched to compile the enclosed report are gathered from numerous federal, state and local governing environmental entities. All of the databases required to be searched by ASTM Standard E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process - Section 8.2, Standard Environmental Records Sources, have been included in this report, and searched to the required distances from the subject property. Additionally, EnviroCheck Solutions, Inc (ECS) has acquired other valuable databases and integrated them into this report in order to provide more valuable information to our clients regarding hazardous materials storage and release sites within a onemile radius from the subject property.

ECS has created a sophisticated data update system, keeping our report databases as current as possible (surpassing ASTM E1527 requirements). ECS consistently requests and updates data from each of the government agencies used to create this report. Depending on the type of database, records are updated at the agencies at varying intervals (daily, monthly, quarterly, semi-annually, or annually). An overall data update (including all available updates) is loaded into our specialized software on a quarterly basis.

It should be clearly understood that this database/map report lists only reported and accurately entered sites. Numerous sites have yet to be discovered and therefore are not yet listed by any governmental agency. The most effective way to determine if a site may be listed by a government agency in the future is by performing a Transaction Screen or Phase I Environmental Site Assessment, which include a professional site inspection and review of historical records. This radius report satisfies only one subsection requirement found within the ASTM Phase I Environmental Site Assessment reporting requirements. This report should not be considered a Phase I Environmental Site Assessment. If no sites are found for a database searched, the database and its description are excluded from the report details so as to report recorded sites only. Sites that include erroneous or incomplete address information may not show up on the report. Every attempt is made to include a listing of these unlocated sites in the report where there is a possibility of their impacting the subject property, but no guarantee can be made.

ECS has used a technology called Geocoding to locate the sites on the map. While this technology is the standard of care in the industry and is generally reliable for well formatted, complete and correct addresses, due to the limitations of this technology no guarantee of the accuracy of site placement can be made.

For specific data inquiries, interpretations or environmental consultation contact us via email at service@envirochecksolutions.com, or via telephone at 866-517-5513. A full summary of our firm, including services offered and pricing can be viewed at www.envirochecksolutions.com.

DISCLAIMER

ECS has researched and obtained certain State and Federal environmental databases (Data) to assist its client's in meeting the requirements of ASTM E 1527-13. ECS has obtained Data that is readily available and of adequate quality to be included in this report. As of the date of this report, there are certain Data that are either not yet available or are not of adequate quality and therefore are not included in this Report.

This report contains data obtained from multiple governmental agencies. EnviroCheck Solutions, Inc. cannot insure the accuracy of the enclosed information. ECS is in no way responsible for errors and/or omissions occurring in data, data conversion, or for the client's use of the information (report). ECS and its affiliates cannot be held liable for accuracy, storage, loss or expense suffered by customers resulting directly or indirectly from any data provided by ECS. No warranty expressed or implied is made in any way in connection with this report.

EnviroCheck Radius Search Report

Searched Databases

NPL: National Priority List Sites

Sites which are found on the NPL database or the Proposed NPL database. NPL sites are a special category among National Superfund (CERCLA) Sites listed in the Environmental Protection Agency's (EPA) CERCLIS database. NPL sites are of serious, high concern and priority based on a national comparison to sites needing investigations and contamination cleanup activities (remediation). These sites, some of the worst in the nation, normally contain high levels of various contaminants that have spread over relatively long distances and usually require long term, highly expensive remediation technologies. Proposed NPL sites are of serious concern and are in the process of being evaluated for categorization as National Priority List sites.Delisted NPL sites have been removed (delisted) from the NPL if no further response or action is appropriate at the site, per EPA guidelines.

- **US EPA's Superfund Enterprise Management System Database**

CORRACTS: Corrective Action Sites

CORRACTS (Corrective Action Sites) is a subset of data found within the Federal RCRA database (RCRIS) or other state database. RCRA Corrective Action is the process by which areas at a hazardous waste facility are evaluated and, if necessary, are cleaned up. Transportation, Storage and Disposal facilities are often also listed as CORRACTS facilities.

- **California EPA Site Portal**
- **US EPA's Resource Conservation and Recovery Act Database**

TSD: Treatment, Storage and Disposal Sites

TSDs are subsets of data found within the Federal RCRA database (RCRIS) or other state database. TSD sites treat, store and/or dispose of hazardous materials and are federally permitted. TSD facilities are often also listed as CORRACTS facilities.

Searched Databases

BROWN: Brownfields Cleanup and Reuse Database

The U.S. Environmental Protection Agency (EPA) defines a Brownfield site as "real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant." Common examples of Brownfield sites are abandoned gas stations and dry cleaners, railroad properties, factories, and closed military bases. Brownfield sites are located throughout the country, and the U.S. EPA as well as state governments have compiled a listing of these sites. Voluntary Cleanup Program Sites are sometimes also included in this category.

- **EPA's Assessment, Cleanup And Redevelopment Exchange System (ACRES) database**

CSL: Contaminated Sites List

State or Local Contaminated Sites databases. These databases include local and state-designated hazardous waste sites, spill sites, superfund sites, voluntary cleanup program sites and land disposal sites. In general, these sites are currently undergoing remediation for on site contamination, remedation has been completed and/or remediation is proposed. In states where a specific Contaminated Sites database is not maintained, the CERCLIS database will contain applicable information on contaminated sites.

- **Fresno County CUPA Facilities List**

DEED: List of Deed Restrictions

The implementation of recorded land use restrictions within property deeds is one of the methods agencies use to protect the public from unsafe exposures to hazardous substances and wastes. Sites with deed restrictions are often contaminated, however levels of contaminants and methods used to control migration of contaminants are controlled and approved by the agency. These are also called Environmental Covenants or Use Restrictions

- **California Department of Toxic Substances Control's Deed Restrictions list**
- **California DTSC's HWMP Land Use Restrictions List**

SEMS: Superfund Database

Sites which are found on the Superfund Enterprise Management System (SEMS) database. The SEMS database contains information on hazardous waste sites, site inspections, preliminary assessments, and remediation of hazardous waste sites under CERCLA (Superfund). The database contains general information on sites including location and status. This database includes those SEMS sites not included on the NPL or Proposed NPL databases. This includes archived sites determined to be "No Further Remedial Action Planned (NFRAP) sites are contained within this database. Archived sites may be properties where, following an initial investigation, no contamination was found, contamination was removed quickly, or the contamination was not serious enough to require Federal Superfund action. The SEMS database is a newer version of the CERCLIS database and the current SEMS version does not export as much information as the CERCLIS database once did.

CONTROLS: Institutional and Engineering Controls

U.S. EPA's and State Engineering Control Sites List and/or Institutional Control Sites List. The Engineering Control Sites list are facilities that have engineered controls in place, such as capping, containment, slurry walls, extraction wells and/or treatment methods that are intended to manage environmental and health risks by reducing contamination levels at a site, or limiting exposure pathways. The Institutional Control Sites list are administrative or legal devices, such as deed restrictions, to ensure that engineering controls stay in place and/or to ensure that land use restrictions stay in place.

- **U.S. Environmental Protection Agency's Engineering Controls list**

LUST: Leaking Underground Storage Tanks

Leaking Underground Storage Tank records contain an inventory of reported leaking underground fuel storage tank incidents. Thousands of underground storage tanks have leaked within the United States, and both open and closed cases are reported on this list. These leaks can affect subsurface soils and groundwater. Both state and local agencies oversee and track these sites.

AST: Aboveground Storage Tank Facilities

Permitted active, inactive and closed AST facilities recorded with the state or local agencies are included. A listing on the AST database does not directly indicate a release has occurred, only that the site currently or historically contained an aboveground storage tank.

Appendix G - HIG City Directory Willowbrook Ave, S-abstract

Research Summary for City Directory Abstract

Site Location
12611-12625 S Willowbrook Ave
12611-12625 S Willowbrook Ave
Compton, CA

Conducted For
USA Environmental, Inc
4000-303 Park newport
newport beach, CA

HIG Project #
2041764
Client Project #

Date Created
10/01/2020

Historical Information Gatherers

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

Publication year, publisher and title

2018 Haines Los Angeles South Coast

2011 Haines Los Angeles South Coast

2006 Haines Los Angeles South Coast

2001 Haines Los Angeles South Coast

1996 Haines Los Angeles South Coast

1991 Haines Los Angeles South Coast

1986 Haines Los Angeles South Suburban

1981 Haines Los Angeles South Suburban

1976 Haines Los Angeles South Suburban

1971 Haines Los Angeles South Suburban

Abstract Section 1- This section includes the city directory data sorted by address.

Historical Information Gatherers

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIM), real estate atlases and similar maps for the site location and adjoining properties. No FIMs or similar maps were identified for the site location and/or adjacent properties.

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. No FIMs or similar maps were identified for the site location and/or adjoining properties.

Appendix I - City of Compton Request form to review the file

OFFICE OF THE CITY CLERK

205 S. Willowbrook Avenue
Compton, CA 90220
310-605-5530 Fax 310-639-4685

REQUEST FOR PUBLIC RECORDS

Thank you for your request. Your request will be processed Pursuant to California Government Code Section 6250-6268 (The Public Records Acts) which allows the City up to 10 days to process your request. Except with respect to public records exempt from disclosure the City shall make records promptly available for inspection during regular business hours. If a request to inspect records includes numerous files and/or documents, or requires the coordination by more than one city department, the City reserves the right to set a date and time when the records will be made available for inspection.
