Scoping Summary Report

date January 19, 2022

subject Silver Lake Reservoir Complex Master Plan EIR

Introduction

The City of Los Angeles Department of Public Works, Bureau of Engineering (City) is preparing the Silver Lake Reservoir Complex Master Plan Project (the Project) Environmental Impact Report (EIR). The proposed Project would redesign approximately 116 acres of the 127-acre Silver Lake Reservoir Complex (SLRC) with community park amenities, which includes the City constructing various community park facilities and allowing some new public park uses within portions of the SLRC. The proposed Project would be located within the Silver Lake neighborhood of the City of Los Angeles and would be bounded by Tesla Avenue on the north, Armstrong Avenue and Silver Lake Boulevard on the east, Van Pelt Place and Silver Lake Boulevard on the south, and West Silver Lake Drive on the west.

Notice of Preparation

The Notice of Preparation (NOP) was prepared pursuant to Section 15082 of the California Environmental Quality Act (CEQA) Guidelines, to notify agencies and interested parties that the City will be preparing a Draft Environmental Impact Report (DEIR) to evaluate potential environmental impacts of the proposed Project (see Attachment 1). The NOP was also posted by the County Clerk in Los Angeles and was mailed on January 6, 2022 to a total of approximately 6,500 properties within an approximately 0.5-mile radius of the Project area. In addition, the NOP was mailed to 23 interested parties, including local, state, and federal agencies, and tribes, and emailed to a total of approximately 1,100 agencies, interested parties, groups, or individuals who had previously expressed interest in the proposed Project (see Attachment 2 for all three distribution lists). A Notice of Completion (NOC) was prepared by the City and uploaded to the State Clearinghouse website (see Attachment 3). The proposed Project was given a State Clearinghouse number of SCH# 2022010055, and the proposed Project information was posted in the CEQAnet Database. The NOP was made available online at the City's website (https://eng.lacity.org/silver-lake-reservoir-complex-master-plan/eir), and at two public libraries: Silver Lake Branch Library at 2411 Glendale Boulevard in Los Angeles, and the Los Angeles County City Terrace Library at 4025 East City Terrace Drive in Los Angeles. The NOP was published in the Los Angeles Times on January 6, 2022 and La Opinión on January 9, 2022, and available on the EastSider, a neighborhood news blog and website, for the duration of the 30-day scoping period starting January 6, 2022 (see Attachment 4).

Scoping Period

The NOP was posted for a 31-day scoping period beginning on January 6, 2022 and ending on February 7, 2022. Due to the global pandemic, having an in-person scoping meeting was not possible. In its place, the City hosted a

virtual public meeting on January 19, 2022. The purpose of the virtual scoping meeting was to provide an overview of the proposed Project, an overview of the CEQA process, and the timeline for environmental review. A presentation was recorded and made available on the City website for the duration of the 31-day scoping period and was played during the virtual scoping meeting (Attachment 5).

Comments

During the scoping period, the City received a total of 206 comment letters on the proposed Project via mail, email, and through a web-based portal link on the City website (Comment Tracker). In addition, a total of 21 verbal comments were collected during the virtual scoping meeting. Attachment 6 includes all comment letters received and a transcript from the virtual scoping meeting comments. Table 1 below includes a summary of the letters and verbal comments received during the 31-day scoping period, as well as the agency, organization or individual commenter, and a reference to the Draft EIR document section where topics for each will be addressed.

TABLE 1
SUMMARY OF NOP COMMENTS

No.	Date Received	Commenter	Comment Format	Summary of Comment
Federal, State, or Local Agencies				
A-1	January 6, 2022	Native American Heritage Commission	CEQAnet	• Recommends Tribal consultation, AB 52 and SB 18 related
A-2	January 18, 2022	California State Transportation Agency	CEQAnet	• Recommendations for truck trip periods and Caltrans transportation permits
A-3	January 25, 2022	Department of Water Resources	CEQAnet	• Project Description contains insufficient information, the City needs to submit preliminary plans for impacts to dams
A-4	February 1, 2022	Southern California Association of Governments	Email	• SCAG Connect SoCal Goals, a list of goals that provide guidance for the Project • Links to technical reports which include land use and transportation strategies that will support the Connect SoCal Goals
A-5	February 4, 2022	California Department of Fish and Wildlife	CEQAnet	• Comments and recommendations for the prevention of negative impacts on fish and wildlife
Individuals & Organizations				
I-1	January 7, 2022	Linda Okamura	Comment Tracker	• Concerns about drought resistance and effects of climate change • What thoughts have been put into Silver Lakes recreational purposes versus the ecological function that it serves (“water storage beneath the wetland”) • Concerns about issues with insects and other disease carrying wildlife

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-2	January 7, 2022	Jason Leung	Comment Tracker	• Request for additional park features, including cafes/restaurants, a swimming area, kayak/boat rentals, an aroma garden • Prioritize native plants for landscaping, too many non-native plants being considered in the Master Plan • Up-zone the area around the park by providing more walking and biking paths
I-3	January 8, 2022	Daniella Southgate	Comment Tracker	• Proponent of the Project
I-4	January 11, 2022	Robert Ashton	Comment Tracker	• Proponent of the Project
I-5	January 11, 2022	Ben Coppersmith	Comment Tracker	• Proponent of the Project
I-6	January 12, 2022	Debbie Slater	Comment Tracker	• Concerns that the Project will create additional traffic and parking challenges • Opposes putting anything in the water
I-7	January 13, 2022	Michael Hayes	Comment Tracker	• Encourages the City to explore mobility options that would allow visitors to come without personal automobiles • Concerns that limited parking will lead to additional issues • Requests that the EIR also include a small retail space, such as café, for the park
I-8	January 14, 2022	Riah Buchan	Comment Tracker	• Opposed to the expansion of the dog park, specifically worried about the replacement of green space with bare ground • Questions if there is a way to incorporate more native plants in the dog park
I-9	January 14, 2022	Kevin Fung	Comment Tracker	• Suggests that the Project should not be implemented until all the homeless are relocated and “no homeless camping” laws are enacted
I-10	January 15, 2022	Erica Goebel	Comment Tracker	• Opposes kayak launch, ornamental gardens, picnic grove, habitat islands, restroom and education center because they may lead to traffic issues • Concerns about transportation safety issues, specifically with pedestrians walking/running into the road • Suggestions for park maintenance including plant trimming, watering, weeding, and management of waste/trash • Additional concerns include: Maintenance of plants, trash and other waste that needs to be collected, unleashed dogs in the meadow and trails
I-11	January 15, 2022	Adam Zuckert	Comment Tracker	• Proponent of the Project
I-12	January 15, 2022	Michelle Fauchex	Comment Tracker	• Raises concerns about impact Project will have on parking • Opposes the use of shade pavilions on Ivanhoe Reservoir and construction of community center, suggests that it will interrupt natural scenic beauty • Concerns about the impact of kayaking and safety
I-13	January 16, 2022	Marielle Marne	Comment Tracker	• Concerns that the Educational/Community meeting building would replace wildlife habitat in the Knoll

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-14	January 16, 2022	Christine Cardone	Comment Tracker	• Request to keep fencing in order to protect urban wildlife
I-15	January 16, 2022	Gina Acuña	Comment Tracker	• Inquiry about parking for recreational activities • Requests that issues such as enforcement of park hours, trash in the meadow, noise are addressed before proceeding with Project • Concerns about activities in the park after dark and trash
I-16	January 16, 2022	Pamela Burian	Comment Tracker	• Inquiry about parking in the area and if there will be a new lot
I-17	January 16, 2022	Petra Geiger	Comment Tracker	• Requests that EIR includes plans for non-vehicular access to the, such as bike paths and racks for visitors from the surrounding neighborhoods
I-18	January 16, 2022	King Cheung	Comment Tracker	• Requests that the EIR include fencing for the protection of wildlife • Requests that the Knoll remains undeveloped and that the available green space is left for wildlife • Requests minimal development and that destruction, noise, and pollution are minimized during the construction period
I-19	January 16, 2022	Lynda Obst	Comment Tracker	• Requests that the fencing remains for the protection of wildlife. Concern about traffic and population on wildlife.
I-20	January 16, 2022	Mara Kuge	Comment Tracker	• Requests for areas that are “dog-on-leash friendly” and green spaces where dogs are allowed
I-21	January 16, 2022	Fern Belmear	Comment tracker	• Request that reservoir is filled with water and left as is
I-22	January 16, 2022	Robert Belmear	Comment tracker	• Request that reservoir is filled with water and left as is
I-23	January 16, 2022	Dorrie Hall	Comment Tracker	• Opposed to removing or lowering the perimeter fence, due to possible disturbances to wildlife • Opposed to development of the Knoll so that green space can remain available to wildlife • Concerns that the Educational/Community Meeting building would replace some wildlife habitat • Concerns that the Project will have negative impacts on noise, traffic, and air quality
I-24	January 17, 2022	Mary Kula	Comment Tracker	• Concerned that development of the Knoll would take away wildlife habitat • Removal of fencing will interfere with wildlife • Human access to the park in the evening may put people and wildlife at safety risk • Concerns that materials left over from fishing would harm birds that reside in the reservoir, requests that fishing is prohibited in the area
I-25	January 17, 2022	Yadira Kuzmicz	Comment Tracker	• Proponent of the Project

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-26	January 17, 2022	Lisa Feder Castenskiold	Comment Tracker	• Concerns about homeless people and others residing within the area • Questions if EIR includes areas that will be secluded and if these areas will be locked at night
I-27	January 17, 2022	Desiree Ramos	Comment Tracker	• Opposes the Project entirely
I-28	January 17, 2022	Mandy Kaiser	Comment Tracker	• Concerns about the negative impacts the fence removal will have on wildlife
I-29	January 17, 2022	George Cook	Comment Tracker	• Concerns that the EIR does not sufficiently cover the maintenance, groundskeeping, and water level budget of the Project
I-30	January 17, 2022	Amy Wolfberg	Comment Tracker	• Suggests that perimeter fencing should be used to protect wildlife and that access to the park should be prohibited at night • Suggests Knoll should remain undeveloped • Concerns about prolonged exposure to noise and traffic
I-31	January 17, 2022	Florence Rosen	Comment Tracker	• Concerned that the EIR will have negative impacts on wildlife including loss of habitat, increased noise, and increased traffic congestion • Suggest that the fence should remain to protect wildlife
I-32	January 17, 2022	Paul Ibusuki	Comment Tracker	• Suggests that fishing should be included as part of the redevelopment project
I-33	January 17, 2022	Tessa Petrich	Comment Tracker	• Proponent of the Project
I-34	January 18, 2022	Sue Iri	Comment Tracker	• Suggests that the perimeter gates need to be installed to maintain the safety of wildlife and community members • Concerns that human traffic may disturb wildlife at night • Concerns that development of the Knoll would replace important wildlife habitat • Concerns that prolonged noise, traffic, and pollution will be detrimental to wildlife and residents, emphasizes that mitigation will need to be implemented
I-35	January 18, 2022	Joseph Fernandez	Comment Tracker	• Proponent of the Project
I-36	January 18, 2022	Lorrain Gatz	Comment Tracker	• Proponent of the Project
I-37	January 18, 2022	Ainsley Cohen	Comment Tracker	• Concerns that development would increase traffic congestions, parking issues, garbage, and waste • Suggests that water activities in the reservoir should be prohibited • Suggests that the only element of the Project that should proceed is the upgrades to the Rec center
I-38	January 18, 2022	Dogan Ozkan	Comment Tracker	• Submitter copied and pasted notification of NOP

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-39	January 18, 2022	Weston Westenborg	Comment Tracker	• Proponent of the Project
I-40	January 18, 2022	Diane Meyer	Comment Tracker	• Proponent of the Project
I-41	January 19, 2022	Isaac Rubinstein	Comment Tracker	• Concerned about increased traffic in the area • Inquiry about whether there will be fencing for the bathroom and reservoir
I-42	January 19, 2022	Anonymous Anonymous	Comment Tracker	• Empty submission
I-43	January 19, 2022	Sidney Higgins	Comment Tracker	• Concerns that a lack of fencing would allow homeless to set up tents in the area • Suggests that the park should be closed at night • Suggest the creation of a monarch butterfly habitat
I-44	January 19, 2022	Kevin Dosch	Comment Tracker	• Concerns that there is not enough green space to support wildlife • Suggests that the fence is essential for maintaining wildlife habitat and the community
I-45	January 20, 2022	Donald Parker	Comment Tracker	• Opposes the Project • Suggests that maintenance and upkeep of the existing property should be the main focus
I-46	January 20, 2022	Catherine Davila	Comment Tracker	• Concerns that the Knoll would replace some wildlife habitat • Concerns that watercraft related activity would disrupt migratory birds with human presence, noise, and pollution
I-47	January 20, 2022	Lisa Dosch	Comment Tracker	• Opposed to the use of motorized and non-motorized water activities due to the negative impacts it will have on migratory birds, noise, transportation & traffic, and air quality
I-48	January 20, 2022	Daniel Weidlein	Comment Tracker	• Suggests that Tongva/Gabrieleño tribe need to be included in the planning to ensure that redevelopment is done in a way that honors the first people
I-49	January 20, 2022	Cynthia Hubach	Comment Tracker	• Concerns about the negative impacts that the construction process will have on wildlife • Inquires about the mitigation measures that will be implemented to limit these effects
I-50	January 20, 2022	David Dosch	Comment Tracker	• Opposed to water activities within the reservoir
I-51	January 20, 2022	Daniel Weidlein (Silver Lake Neighborhood Council)	Comment Tracker	• Request for more shade in the dog park and additional amenities to the dog park
I-52	January 20, 2022	Anthony Burton	Comment Tracker	• Request for improved bike infrastructure

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-53	January 21, 2022	gtimcummings@gmail.com (Name not available)	Comment Tracker	• Concerns about the construction process, noise, road/pathway closures, parking, and impacts to wildlife
I-54	January 24, 2022	Leigh Jacoby	Comment Tracker	• Concerns about fence removal, modifications to the Knoll, reduction in green space, and construction impacts
I-55	January 24, 2022	David Schapiro	Comment Tracker	• Proponent of Project
I-56	January 24, 2022	Dianne Chadwick	Comment Tracker	• Concerns about habitat loss with development of the Knoll
I-57	January 25, 2022	Jeff Noles	Comment Tracker	• Proponent of the Project
I-58	January 26, 2022	Anne Thompson	Comment Tracker	• Concerns about negative impacts on parking, traffic, and wildlife
I-59	January 26, 2022	Marilynn Fong	Comment Tracker	• Concerns about traffic/transportation, pollution, noise, and safety • Concerns about loss of wildlife habitat • Inquiry about maintenance of the site and facilities
I-60	January 28, 2022	Justin Mayfield	Comment Tracker	• Concerns about parking and increased traffic congestion in the area • Suggestion that the dog park should be locked after park closes
I-61	January 30, 2022	Dartanyan Tzanetopoulos	Comment Tracker	• Expresses confusion about the group that is managing the Project • Explains that many residents of Silver Lake feel as though they were not listened to during workshops
I-62	January 31, 2022	Dorannae Jung	Comment Tracker	• Project needs to include a wildlife sanctuary • Suggests that the Project site should only be natural habitat and fencing should be included • Includes suggestions for the types of plants that should be used at the site types of recreational activities available to the youth • Building materials should meet LEED green certificate requirements • Do not allow fossil fuel powered machines on the site. Concerns that they will release oil and other pollutants at the site. • Prohibit kayaking • Concerns about the impacts of increased air pollution and noise on wildlife
I-63	January 31, 2022	Lisa Feder Castenskiold	Comment Tracker	• Concerns about security and illegal activities occurring in the park
I-64	February 1, 2022	Adelina Sorkin	Comment Tracker	• Concerns about the safety of people and wildlife • Opposes the removal of the fence • Suggests that the Project should include a more thorough traffic study

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-65	February 1, 2022	Daniel Dominguez	Comment Tracker	• Concerns about increased traffic • Concerns that an increase in visitors to the area will disturb wildlife
I-66	February 1, 2022	Nicholas Carmen	Comment Tracker	• Proponent of the Project
I-67	February 1, 2022	Patricia Tashma (none)	Comment Tracker	• Concerns about traffic induced safety hazards • Concerns about trash/waste from humans and dogs • Opposes the removal of the fence, in favor of keeping it in order to protect wildlife • Opposes the planned modifications to the Knoll and Meadows. Eliminate concrete islands due to safety concerns. • States that water in reservoir is used in local wildfires
I-68	February 1, 2022	Annaleigh Ekman	Comment Tracker	• This submission is the same as A-4
I-69	February 1, 2022	Jeffrey Kelly w/Jeeto	Comment Tracker	• Opposes the Project, but does not address specific environmental resources
I-70	February 1, 2022	McShane Murnane (Project M Plus)	Comment Tracker	• Proponent of the Project
I-71	February 2, 2022	Stephen Sorkin	Comment Tracker	• Concerns about the Project impacts on wildlife • Questions if the Transportation study was thorough enough. Concerns about traffic issues and safety. • Suggestion for upgrades to certain parts of the park and more restrictions in parts of the park • Request for tree pruning and request to keep the fence • Opposes habitat islands. Monitors on the west side of the reservoir.
I-72	February 2, 2022	Woody Thompson	Comment Tracker	• Concerns about parking availability and increased traffic
I-73	February 2, 2022	Dene Feldman	Comment Tracker	• Concerns about Project impacts on wildlife, noise, traffic, and air pollution • Suggests that the education center should not be built and the Knoll should be preserved • Opposed to the removal of the perimeter fence
I-74	February 2, 2022	Earl Hough	Comment Tracker	• Concerns about increased traffic in the area • Suggests that noise from park visitors will disturb wildlife and residents • Concerns that kayaking and other water activities will create challenges for helicopters during wildfire emergencies
I-75	February 3, 2022	Doris Slater	Comment Tracker	• Concerns about potential increased traffic and parking issues • Request to keep the perimeter fence

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-76	February 3, 2022	Patti Wilcox	Comment Tracker	• Concerns about increased traffic and safety of wildlife • Concerns about funding • Concerns about garbage and graffiti
I-77	February 3, 2022	Mike Jordan	Comment Tracker	• Concerns about potential negative impacts from Project including: increased traffic, less parking, water safety, and loss of wildlife habitat
I-78	February 3, 2022	Cynthia Hubach	Comment Tracker	• The Reservoir loses water to evaporation, how can this water be replaced without harming wildlife? • Can we confirm that the added water will be safe for wildlife?
I-79	February 3, 2022	Robbie Burton	Comment Tracker	• Proponent of Project
I-80	February 3, 2022	Marol Butcher	Comment Tracker	• Inquiry about the funding for the Project • Concerns about increased traffic, parking issues, and trash • Concerns about negative impacts on wildlife, noise, and light pollution • Inquiry about the group that would be responsible for maintaining park and facilities
I-81	February 4, 2022	Todd Lefelt	Comment Tracker	• Concerns about increased traffic and less parking • Inquiry about maintenance of park and facilities • Concern about impacts to wildlife that inhabit the park, specifically birds and coyotes
I-82	February 4, 2022	Kirby Smith	Comment Tracker	• Proponent of the Project
I-83	February 4, 2022	L Co	Comment Tracker	• Concerns about increased traffic, increased noise, increased light pollution, and decreased parking • Concerns about negative impacts on wildlife • Inquiry about the group that would be responsible for maintaining park and facilities
I-84	February 4, 2022	Nicholas Constant	Comment Tracker	• Opposes the bathroom and kayak launch • States that there are a variety of existing issues within the area and that adding long term infrastructure is “reckless”
I-85	February 4, 2022	Eileen Connors	Comment Tracker	• Recommends inclusion of bike lanes and pedestrian crossing in Project plan
I-86	February 4, 2022		Comment tracker	• Inquiry about the funding for the Project • Concerns about increased traffic, parking issues, and trash • Concerns about negative impacts on wildlife, noise, and light pollution • Inquiry about the group that would be responsible for maintaining park and facilities
I-87	February 4, 2022	Elayne Sawaya	Comment Tracker	• Request to limit construction and to instead create more green space • Opposes the removal of the perimeter fence • Opposes construction on the Knoll • Concerns about loss of wildlife, increased noise, increased traffic, and increased air pollution

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-88	February 4, 2022	Melanie McGraw	Comment Tracker	• Inquiry about the funding for the Project • Concerns about increased traffic, parking issues, and trash • Concerns about negative impacts on wildlife, noise, and light pollution • Inquiry about the group that would be responsible for maintaining park and facilities
I-89	February 4, 2022	Jennifer Stoller	Comment Tracker	• Community needs green space alternatives. Request to limit construction and to instead create more green space. • Concerns that the Project will cause a loss of wildlife, increase in noise, increase in traffic, and increase in air pollution • In favor of keeping the fence in order to protect wildlife and people • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-90	February 4, 2022	Hanna Barakat	Comment Tracker	• Community needs green space alternatives • Concerns that the Project will cause a loss of wildlife, increase in noise, increase in traffic, and increase in air pollution • In favor of keeping the fence in order to protect wildlife and people • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-91	February 4, 2022	Hanna Barakat	Comment Tracker	• Community needs green space alternatives • Concerns that the Project will cause a loss of wildlife, increase in noise, increase in traffic, and increase in air pollution • In favor of keeping the fence in order to protect wildlife and people • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-92	February 4, 2022	Linden Waddell	Comment Tracker	• Concerns about traffic and parking issues within the area • Opposes the proposed “options” for the site • Concerns about homeless encampments • Concerns that the Meadow will cause increased traffic • Concerns that the Project will disturb/interrupt wildlife • Concern about noise and air quality related construction issues • Concerns about water safety • Concern about helicopters that would need to access water during fire emergencies
I-93	February 4, 2022	Louise Steinman	Comment Tracker	• Request for spaces with passive viewing and recreation, while making sure the area is still accommodating to wildlife
I-94	February 4, 2022	Paul Tzanetopoulos	Comment Tracker	• In favor of leaving the park as is • Emphasized that traffic and parking issues are of great concern • Project should preserve and not displace wildlife

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-95	February 4, 2022	Joanne Hoffman	Comment Tracker	• Community needs green space alternatives. Request to limit construction and to instead create more green space. • Concerns that the Project will cause a loss of wildlife, increase in noise, increase in traffic, and increase in air pollution • In favor of keeping the fence in order to protect wildlife and people • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-96	February 4, 2022	Zoe Towne	Comment Tracker	• Concerns that water sports will have negative impacts on wildlife and lead to increased traffic in the area • Upkeep needed to keep facilities safe are exorbitant and unnecessary
I-97	February 4, 2022	Kathleen Johnson	Comment Tracker	• Request for the removal of some asphalt along the banks and replacing with native plants
I-98	February 4, 2022	Elsie Acevedo	Comment Tracker	• Concerns about the negative impacts on wildlife, noise, light pollution, traffic, and parking • Concerns that Project would lead to increased litter/trash, crime, and overnight encampments
I-99	February 4, 2022	Martin Grey Gottlieb	Comment Tracker	• Concerns about the homeless and inquiry about park fencing • Concerns about the impacts the redesign will have on the habitat and wildlife • Opposes all elements of the Project and only in favor of essential repairs
I-100	February 4, 2022	Anne Thompson	Comment Tracker	• Community needs green space alternatives. Request to limit construction and to instead create more green space. • Concerns that the Project will cause a loss of wildlife, increase in noise, increase in traffic, and increase in air pollution • In favor of keeping the fence in order to protect wildlife and people • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-101	February 5, 2022	Douglas Hill	Comment Tracker	• Proponent of the Project
I-102	February 5, 2022	Jeremy Rubenstien	Comment Tracker	• Proponent of the Project
I-103	February 5, 2022	Jessica Drake	Comment Tracker	• Opposes the construction of the education center and suggests that this area should be reserved for green space • In favor of keeping the fence • In favor of removing concrete sides of reservoir • Opposes water activities such as kayaking, concerns that it would negatively impact wildlife
I-104	February 5, 2022	Patty Jausoro	Comment Tracker	• Proponent of the Project • Inquiry about bathrooms for the public

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-105	February 5, 2022	Jackie Sloan	Comment Tracker	• Concerns about the length of the construction period • Community needs green space alternatives. Request to limit construction and to instead create more green space. • Concerns that the Project will cause a loss of wildlife, increase in noise, increase in traffic, and increase in air pollution • In favor of keeping the fence in order to protect wildlife and people • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-106	February 5, 2022	Judy Sloan	Comment Tracker	• Concerns about the length of the construction period • Community needs green space alternatives. Request to limit construction and to instead create more green space. • Concerns that the Project will cause a loss of wildlife, increase in noise, increase in traffic, and increase in air pollution • In favor of keeping the fence in order to protect wildlife and people • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-107	February 5, 2022	Roshan Reporter	Comment Tracker	• Concerns about the length of the construction period • Community needs green space alternatives. Request to limit construction and to instead create more green space. • Concerns that the Project will lead to a loss of wildlife, specifically the Blue Heron that nest on west side of the lake • Concerns that the Project will cause an increase in noise, increase in traffic, and increase in air pollution • In favor of keeping the fence in order to protect wildlife and people • Opposes water activities, concerns that they will negatively impact wildlife • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-108	February 5, 2022	Brian Wakil	Comment Tracker	• Emphasizes the some the benefits that the fence has provided, suggests that removal o the fence would negatively impact wildlife
I-109	February 5, 2022	Ben Decter	Comment Tracker	• Community needs green space alternatives. Request to limit construction and to instead create more green space. • Concerns that the Project will cause a loss of wildlife • In favor of keeping the fence in order to protect wildlife and people • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-110	February 5, 2022	Karen Cusolito	Comment Tracker	• Concerns about the safety of wildlife and loss of wildlife habitat
I-111	February 5, 2022	Mike Jordan	Comment Tracker	• Concerns that Project would lead to traffic and parking issues • Water safety concerns

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-112	February 5, 2022	Mohammed Barakat	Comment Tracker	• Concerns about the effects of long-term construction on wildlife, noise and air quality • Suggests that perimeter fencing will be essential to keeping wildlife safe
I-113	February 5, 2022	Adam Barakat	Comment Tracker	• Concerns that reducing the Knoll and increasing green space will drive out multiple species of wildlife from the reservoir • Suggests that construction will disturb herons that nest around the reservoir and will prevent them from returning
I-114	February 5, 2022	Rodney Crosby	Comment Tracker	• In favor of retaining the perimeter fencing for the protection of wildlife • Opposes kayaking in the reservoir
I-115	February 5, 2022	Deena Hassan	Comment Tracker	• Concerns about the length of the construction period • Concerns about potential negative impacts the Project will have on wildlife including: loss of habitat and increased wildlife aggression. • Concerns about increased traffic and parking issues • Suggests that the timeline for the Project would prevent people from experiencing the recreational benefits that the reservoir currently offers, “for up to 20 years”
I-116	February 5, 2022	Jane Sobo	Comment Tracker	• Proponent of the Project
I-117	February 5, 2022	Nancy Hoven	Comment Tracker	• Need to ensure that disturbances to wildlife will be minimized, concerns that construction will negatively impact nesting birds • Opposes large events being held in the park due to traffic and parking concerns • Need to take vandalism and graffiti into consideration when planning how park and facilities will be maintained
I-118	February 5, 2022	Anonymous Anonymous	Comment Tracker	• Empty submission
I-119	February 5, 2022	Susan Kepner	Comment Tracker	• The Project should prioritize the protection of wildlife • The Project has recreational value for residents of the city
I-120	February 6, 2022	Clifford Towne	Comment Tracker	• Concerns about destruction of habitat and loss of wildlife • Concerns about increased traffic and noise • Cut back on recreational facilities so that there is enough space for wildlife habitat • Opposes water recreation
I-121	February 6, 2022	A Graham	Comment Tracker	• Concerns about increased traffic and parking issues, especially during times of emergency • Concerns about increased noise, light pollution, and litter/trash • Concerns about loss of wildlife habitat, specifically for the birds that reside in the reservoir
I-122	February 6, 2022	Alan Lowe	Comment Tracker	• Proponent of the Project

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-123	February 6, 2022	Christopher Tumolo	Comment Tracker	• Concerns that the new structures will negatively impact wildlife
I-124	February 6, 2022	Peter Taylor	Comment Tracker	• Proponent of the Project
I-125	February 6, 2022	Sherry Walker	Comment Tracker	• Requests that spaces are saved for birds and animals.
I-126	February 6, 2022	Dogan Ozkan	Comment Tracker	• Requests that a Silver Lake Wildlife Sanctuary is established
I-127	February 6, 2022	Marlys Gilgen	Comment Tracker	• Asks Project team to consider the structural safety of the dam and public safety around the water • Concerns about wildlife safety while the public accesses the waterlines • Asks Project team to consider the limited street access to the reservoir area
I-128	February 6, 2022	Terrence Jackson	Comment Tracker	• Concerns about Project impacts on transportation • Concerns that Project will lead to loss of quiet natural habitat
I-129	February 6, 2022	Willaim Sloan	Comment Tracker	• Community needs green space alternatives. Request to limit construction and to instead create more green space. • Concerns about loss of wildlife, increased noise, increased traffic, and increased air pollution • In favor of keeping the fence in order to protect wildlife and people • Concerns about loss of open space for wildlife, specifically the redevelopment of the Knoll
I-130	February 6, 2022	Forence Rosen	Comment Tracker	• Quote stating that the fence is an important conservation management tool
I-131	February 6, 2022	Frank San Juan	Comment Tracker	• Empty submission
I-132	February 6, 2022	Frank San Juan	Comment Tracker	• Concerns that the Project will lead to increase in traffic, increase in accidents, less parking, and increase in carbon emissions • Suggests that the Project will have a negative impact on wildlife • Concerns that water activities will lead to pollution and negatively impact water quality for wildlife • Emphasizes that Silver Lake has been essential for firefighting in the area, need to make sure that water is available for firefighters • Concerns about negative impacts on vegetation • Concerns about noise pollution and waste
I-133	February 6, 2022	Cynthia Ashford	Comment Tracker	• Opposes the removal of fence • Request to restrict kayaking to specific parts of lake

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-134	February 7, 2022	Manohla Dargis	Comment Tracker	• Suggests that the planners should expand green space for wildlife and include more native plants in the Project plans • Opposes the construction of additional buildings, especially due to construction pollution • Opposes kayak launches
I-135	February 7, 2022	Janet Upjohn	Comment Tracker	• Request to limit construction and to instead create more green space. • Concerns that the Project will lead to loss of wildlife (for example the herons), increased noise, increased traffic, and increased air pollution.
I-136	February 7, 2022	Manohla Dargis	Comment Tracker	• Opposes the expansion of the dog park and use of artificial turf for dog park
I-137	February 7, 2022	Dale Gee	Comment Tracker	• Suggests that streets and available parking are not currently able to accommodate visitors and that this will become even more challenging with the Project • Concerns about increased trash and litter
I-138	February 7, 2022	Zev Schmitz	Comment Tracker	• Proponent of the Project
I-139	February 7, 2022	Michael Masterson	Comment Tracker	• Concerns about the Project's impacts on wildlife, especially migratory birds • Concerns about the noise, dust, pollution, and traffic that could be generated by the Project • Opposes the education center, kayak launch, and seating areas
I-140	February 7, 2022	Judith Serlin	Comment Tracker	• Concerns about the potentially negative impacts that the Project will have on traffic, parking, wildlife and noise • Concerns about increase in trash/litter and light pollution • Inquiry about group that will be responsible for maintaining the park and streets
I-141	February 7, 2022	Erica Silverman	Comment Tracker	• Asks the City to prioritize long-lasting effects on wildlife, biodiversity, climate change and the depleted aquifer during analysis of environmental impacts • Consider mitigation measures for noise, traffic, light pollution, air quality, and wildlife during construction and maintenance. • In favor of a perimeter fence for the protection of wildlife • Reducing area allotted for the Knoll would save more wildlife habitat • If additional concrete is used for the site, the City needs to consider impact on the local aquifer • The City needs to consider the impact of various park features (ex. kayak launch, stepped terraces, Ivanhoe Overlook, etc.) • Concern that the kayak launch pad will lead to pollution, noise, and wildlife disruptions

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-142	February 7, 2022	Lorena Soto	Comment Tracker	• Mentions the existing traffic and parking issues. Walking path is overcrowded. • Project should minimize construction and eliminate the Ivanhoe Overlook, habitat islands, education center, soccer field, and kayak launch • In favor of keeping the perimeter fence
I-143	February 7, 2022	Paul Franceschi	Comment Tracker	• Suggests that the limited parking and public transportation in the area are inadequate • States that wildlife is stressed by development, loss of trees, and traffic
I-144	February 7, 2022	Mary Ellen Shu	Comment Tracker	• Concerns that the development and addition of recreational facilities will increase traffic issues • Concerns that there will not be enough parking space for visitors • Concerns that the increase in traffic issues will have a negative impact on air quality
I-145	February 7, 2022	Anne Johnson	Comment Tracker	• Opposes SLRCMP • In favor of creating parks in underserved neighborhoods
I-146	February 7, 2022	Vicki Baral	Comment Tracker	• Concerns about issues with traffic and parking • Concern about homeless encampments • Concern that if the reservoir stays empty for too long, it will cause a lot of dirt, dust, and air pollution • Concern about noise generated by construction • Concern that the Project will require road closures • Request for permanent fence to provide safety. • Park should only be accessible during the day. • Concern that nighttime activities will lead to noise and light pollution. • The Knoll should be preserved, the Education center is a duplicate of the Rec Center • Eliminate kayak launch and any water activities
I-147	February 7, 2022	Gerry Hariton	Comment Tracker	• Concerns about increased parking issues, traffic, and deterioration of streets • Inquiries about security, project timeline, and the maintenance of the park/facilities • Plans must include mitigation measures for noise, dust, and streets
I-148	February 7, 2022	Doris Gee	Comment Tracker	• Concerns that traffic and parking will become worse if plans do not include more parking space
I-149	February 7, 2022	Joyce Peyton	Comment Tracker	• Concern that wetland will become breeding ground for mosquitos and will have negative impacts on wildlife and people
I-150	February 7, 2022	Louis Amdur	Comment Tracker	• Critiques of park elements including: plant species that will be used to replant the Grove, expansion of the dog park, use of artificial turf for the dog park, and architecture of the buildings

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-151	February 7, 2022	Julia Stewart Yilmaz	Comment Tracker	• Request to improve playground and add additional structures • Concern about parking issues • Inquiry about what will be done to prevent overnight encampments • Request for more public trash cans around the reservoir
I-152	February 7, 2022	Michael Masterson	Comment Tracker	• Concerns about Projects general impacts on wildlife • Concerns about costs for the Project • Concerns about the noise, dust, pollution, and traffic trips that the Project will generate • Concern about an increase in crime and encampments in the area • Concerns about increased traffic and parking issues • Opposes multiple park features including the education center, the kayak launch, and the seating area • Concern about increased commercial development in the area and that
I-153	February 7, 2022	Christi Moore	Comment Tracker	• Opposes seating along the reservoir, removal of the perimeter fence, and light posts • Requests that gates continue to be locked at night and that the meadow is left as is • Concerns about trash and crime
I-154	February 7, 2022	Anonymous Anonymous	Comment Tracker	• Empty submission
I-155	February 7, 2022	Amy Minteer w/Silver Lake Wildlife Sanctuary	Comment Tracker	• Identifies multiple potential adverse impacts associated with the development and increased intensity of use at the site • Request for an extension of the comment scoping period
I-156	February 7, 2022	Jane Cook	Comment Tracker	• Concerns that people walking around the Knoll will damage plant • Requests that the plan include shade trees instead of the shade/observation pavilion • Concerns that park facilities and people will displace wildlife habitat • Concern that the construction of the Knoll will obstruct traffic • Requests that the EIR detail the loss of natural habitat, trees, and wildlife
I-157	February 7, 2022	Alma Avalos	Comment Tracker	• Opposes construction in the park and reservoir • Request for improved dog park so that they are away from people • Opposes concrete islands and water recreation activities such as boating

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-158	February 7, 2022	Jane Cook	Comment Tracker	• Opposes construction of the education center • Concerns about the impact the Education will have on the Knoll because the Knoll is a cultural monument • Concerns about the impact the Education will have on the Knoll because the Knoll is a historic monument • Concerns that the Education center will eliminate some wildlife habitat • Concerns that the length of the construction process will drive away wildlife • Eliminate the Education center
I-159	February 7, 2022	Tiffany Nguyen	Comment Tracker	• Concerns about increased traffic and parking issues • Inquiry about funding for the Project and duration of the Project • Concerns about increase in noise and light pollution • Concerns about Project impacts on wildlife • Concerns about increase in litter and trash
I-160	February 7, 2022	Andras Kanegson	Comment Tracker	• Asks the City to consider events at Echo Park during the EIR process, specifically concerned about encampments • Opposes the removal of the perimeter fence, suggests that it will be necessary to preserve the park
I-161	February 7, 2022	Amelia Casanova	Comment Tracker	• Opposes modifications to the lake • Request to improve dog park and leave the Meadow as is • Request to fix sidewalk near the Park center
I-162	February 7, 2022	Dorrie Hall	Comment Tracker	• Opposes construction of recreational facilities • Concerns that the Project will harm wildlife and lead ecological damage • Suggestion to leave the park as is
I-163	February 7, 2022	Jane Cook	Comment Tracker	• EIR process needs to asses possible impacts from removing perimeter fence • Concern that the wildlife friendly barriers will fail to protect wildlife from dogs and people • Include a perimeter fence that will be permeable to wildlife, but as high and strong as the current one • Requests that the Tongva people are involved in the fence design • Suggests that fence should be open during the day and closed at night. Security should be present as well. • Concerns that removal of any perimeter fence would pose a safety risk to residents of the neighborhood
I-164	February 7, 2022	Maurice Gainen	Comment Tracker	• Supports the Project as long as there are “safeguards to prevent the denigration that happened to Echo Park Lake and MacArthur Park”
I-165	February 7, 2022	Allison Amon	Comment Tracker	• Concerns about the limited parking in the area, especially the west side of the reservoir. Suggest that public transportation in the area is inadequate. • Concerns that wildlife is stressed by development, loss of trees, and traffic. Reservoir should be a wildlife corridor not a public space.

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-166	February 8, 2022	Khoi Pham	Comment Tracker	• Opposes SLRCMP • Suggests that there are not enough long term studies on the impact of: traffic/parking issues, crime/homeless encampments, negative impacts on wildlife, noise, trash, light pollution, unnecessary costs, and the duration of the Project • Suggests that funds should be used to create other reservoirs in all council districts
I-167	February 8, 2022	Ben Downing	Comment Tracker	• Opposes SLRCMP • Suggests that there are not enough long term studies on the impact of: traffic/parking issues, crime/homeless encampments, negative impacts on wildlife, noise, trash, light pollution, unnecessary costs, and the duration of the Project • Suggests that funds should be used to create other reservoirs in all council districts
I-168	February 8, 2022	Jane Cook	Comment Tracker	• Concerns that the SLRCMP eliminates too much habitat for wildlife and too much open space • Concerns that construction would interfere with the view of the water • Concern that migratory birds would be driven out by construction and operations • Concerns about loss of open space • Concerns about noise, traffic, and air quality • The EIR should explore eliminating some of the recreational elements • The Silver Lake Natural Lands and Open Space Preserve Alternative will suffice. Mentions an alternative that involves cultivating native plants and natural habitat for the benefit of wildlife
I-169	February 8, 2022	Jozef Bilman	Comment Tracker	• Completely opposed to the Project
I-170	February 8, 2022	Eileen Marcussen	Comment Tracker	• Opposes the expansion of the recreation center due to existing traffic related issues • In favor in keeping the perimeter fence so that wildlife is protected • Concerns that the removal of the fence would lead to encampments and rise in safety related issues
I-171	February 8, 2022	David Omenn	Comment Tracker	• Concerns about the cost for the Project • Recommends a scaled back version of the plan that focuses improving the habitat and making the area more accessible for people
I-172	February 8, 2022	Caren Singer	Comment Tracker	• Emphasizes the existing traffic and congestion issues within the area • Concerns about increased litter, noise, and traffic • Opposes construction of the Recreation center and the basketball court with seating. Concerns that these would lead to increased traffic, crowds, trash, noise, and less parking.

No.	Date Received	Commenter	Comment Format	Summary of Comment
				• Inquiry about where construction crew will park, concern that they will take up needed parking space • Suggests that Van Pelt Place and West Silver Lake Drive cannot sustain any more crowds, traffic, or parking • Suggests that the expanded picnic area will cause more crowding, traffic, and increase parking issues • Concerns for safety of wildlife if perimeter fencing is removed • Concerns that removal of perimeter fence will lead to more crime and homeless encampments. There also general safety concerns, such as drowning. • Concerns that lighting would be visually disturbing to wildlife and people. Additional concerns attributed to lighting include noise from nighttime activities in the park and increased crime. • Opposes the terraced seating area. Suggests that its proximity to the lake increases chances of littering in the lake. • Concerns that terraced seating would provide a place for individuals to sleep and that its proximity to the lake increases the chances of someone falling in • Opposes kayaking in the lake • Concerns about the cost of the Project • Offers alternatives for some of the Project elements that were critiqued
I-173	February 8, 2022	Mike Krose	Comment Tracker	• States that the location of the Education is unclear when comparing the NOP and Master Plan • Suggests that construction in the Knoll will be harmful to wildlife. • The alternative is to eliminate all construction in the Knoll. • Concern that removing the perimeter fencing will jeopardize the safety of wildlife and people • Concerns that night access to the park will encourage loitering, litter, and noise • Alternative(a) is to leave the fence at its current height, install gates, and close at night • Alternative(b) is to use a wildlife friendly fence that is as high as the current one and add gates • Concern about construction impacts on wildlife • Concern about construction impacts on noise • Concern about construction impacts on traffic • Concern about construction impacts on air quality • The alternative is to minimize the size and scope of each site • Concern about the impacts that construction on the Knoll will have on wildlife • The alternative is to eliminate all construction on the Knoll • No water recreation due to safety concerns for people and wildlife • The alternative is to eliminate the kayak launch and Overlook. Create a buffer zone away from water. • Concerns about funding for construction, maintenance, and operations

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-174	February 8, 2022	Robert Wolin	Comment Tracker	• Emphasizes the existing traffic and congestion issues within the area • Concerns about increased litter, noise, and traffic • Opposes construction of the Recreation center and the basketball court with seating. Concerns that these would lead to increased traffic, crowds, trash, noise, and less parking. • Inquiry about where construction crew will park, concern that they will take up needed parking space • Suggests that Van Pelt Place and West Silver Lake Drive cannot sustain any more crowds, traffic, or parking • Suggests that the expanded picnic area will cause more crowding, traffic, and increase parking issues • Concerns for safety of wildlife if perimeter fencing is removed • Concerns that removal of perimeter fence will lead to more crime and homeless encampments. There also general safety concerns, such as drowning. • Concerns that lighting would be visually disturbing to wildlife and people. Additional concerns attributed to lighting include noise from nighttime activities in the park and increased crime. • Opposes the terraced seating area. Suggests that its proximity to the lake increases chances of littering in the lake. • Concerns that terraced seating would provide a place for individuals to sleep and that its proximity to the lake increases the chances of someone falling in • Opposes kayaking in the lake • Concerns about the cost of the Project • Offers alternatives for some of the Project elements that were critiqued
I-175	February 8, 2022	Donna Barstow w/SLNC	Comment Tracker	• States that the Project does not add any habitat • Space between trees in the Meadow limits shade for people, prevents insects from moving between trees, and does not leave enough room for birds to build nests. General concerns that wildlife will leave the park due to the Project. • Calls attention to the important source of water Silver Lake holds for fighting fires and responding to other emergencies • Critiques different aspects of the Meadow • Asks if the City has checked the federal protections for waterfowl • Concerns that Silver Lake will have more homeless issues • Concerns about parking in the area
I-176	February 8, 2022	Nina Sorkin	Comment Tracker	• Empty Submission

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-177	February 8, 2022	C McDonald	Comment Tracker	• Concerns about traffic, parking scarcity, and road safety • Concern about increase in crime and encampments • Concern about Project's negative impacts on wildlife • Concern that Project will bring more noise to the area • Inquiry about group responsible for managing trash
I-178	February 8, 2022	Amy Minteer w/ Silver Lake Wildlife Sanctuary	Comment Tracker	• States that the EIR needs to assess the environmental impacts of the habitat islands, including possible hawk predation
I-179	February 8, 2022	Adelina Sorkin	Comment Tracker	• Concerns about traffic, parking, and road safety • Opposes park facilities such as the kayak launch and the Education center • Request to improve the dog park • Emphasizes that wildlife needs to be protected • Includes recommendations for the Recreation center and space around it • Opposes water activities due to use of reservoir as a source of water for fire fighters • Suggests that area needs small improvements and that funds should go to areas that lack green space
I-180	February 8, 2022	Adelina Sorkin	Comment Tracker	• This submission is identical to I-179 above.
I-181	February 8, 2022	Joan Harrison	Comment Tracker	• Concern that Project elements will eliminate wildlife habitat • Concern about impacts from removing perimeter fence • Concerns about Project's impacts on traffic and parking
I-182	February 8, 2022	Lisa Cristiano	Comment Tracker	• Concern that Project will lead to increased crime • Concerns that the Project will have a negative impact on wildlife • Concern that increased human activity and traffic will have negative impacts on wildlife • Opposes kayak launch • Emphasizes the current traffic and parking issues in Silver Lake
I-183	February 8, 2022	Sandra Wisot	Comment Tracker	• Perimeter fence should remain at the height that it is now in order to protect wildlife • The calm atmosphere and the safety that the reservoir creates for wildlife would be disrupted by the overdevelopment of structures • Emphasizes the importance of creating a plan for maintenance and management of the park • Emphasizes that the lake is within a "bowl" like area that exaggerates and transmits sounds • Concerns about the limited parking in the area • Concerns that recreational facilities will attract more people, requiring more maintenance of the facilities and affecting wildlife • Concerns that park will be turned into a campground, park should not be open 24/7

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-184	February 8, 2022	Sidney Higgins	Comment Tracker	• Concerns that the plans cater to people and not wildlife. Especially concerned about coyotes. • Request for the Project to be done in stages • Request for fences or patrols in order to prevent camping • Request for owl boxes and a monarch garden
I-185	February 8, 2022	Rudy Perez	Comment Tracker	• Concerns that the Project will increase traffic/parking issues • Concerns that the Project will increase noise related issues • Concerns that the Project will increase littering and trash • Inquiry about what the City will do to mitigate these impacts
I-186	February 8, 2022	Taylor Goodrich	Comment Tracker	• Proponent of the Project
I-187	February 8, 2022	Theresa Chavez	Comment Tracker	• The Project should have a low impact on transportation • Suggests that funding for this Project should be used to create green space in another neighborhood • Suggests that Project should mainly focus on protecting the natural environment • Supports educational opportunities provided by the Project • Concerns that the Project will encourage people to spend more time at the park and will increase traffic issues, parking issues, and pollution
I-188	February 8, 2022	Anonymous Anonymous	Comment Tracker	• Scale back construction and eliminate the education center • Eliminate the fence
I-189	February 8, 2022	Theresa Corigliano	Comment Tracker	• Concerns about the impact that the Project's duration will have on the neighborhood • Concerns about cost of Project • Concerns about increased traffic • Concerns about pollution due to construction and increased traffic • Inquiry about security and maintenance for the park • Concerns about Projects impacts on wildlife • Concerns about noise pollution
I-190	February 8, 2022	Lisa Hart	Comment Tracker	• Mentions that they used to receive emails about the Project and that the emails have stopped
I-191	February 8, 2022	Cindy Abrams	Comment Tracker	• Opposes additional concrete construction within the fence. Concerned that this will increase the likelihood of water accidents. • In favor of keeping the fence, for safety and purposes • Opposes the kayak launch due to safety reasons • Eliminate the education center • Concerns that construction and traffic noise will have negative impacts on wildlife and people • Parking in the area is inadequate • Suggests that more trees and reeds should be planted

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-192	February 16, 2022	Amit Thakkar	Comment Tracker	• Opposes adding structures to the reservoir complex, specifically the shade structure around the Ivanhoe Overlook • Mentions large trees as an alternative for the shade structure
I-193	February 4, 2022	Susan Murphy	Comment Tracker	• Concerns about Project's duration • Concerns about the impact that construction will have on wildlife, specifically the Blue Heron • Mentions that there are already existing issues with traffic and parking
I-194	February 6, 2022	Robbi Hobbs	Comment Tracker	• Opposes the concrete islands and launches • Mentions existing traffic and parking issues • Opposes the removal of the perimeter fence • Concerned that all construction will negatively impact wildlife • Fire department uses water in reservoir during emergencies
I-195		Penny Kunitani	Comment Tracker	• In favor of the perimeter fence in order to protect wildlife • Construction and regrading of the Knoll would eliminate wildlife habitat • Concerns that construction will lead to increased noise, traffic, and air pollution • Concerns about parking and road safety • Concerns about increased in trash, trampled vegetation, and crime • Concern about the impacts of light pollution on people and wildlife • Suggests that native plants need to be used for the park • Prohibit water activities. Eliminate Recreation/Education center.
I-196	February 7, 2022	Barbara Hoff	Comment Tracker	• Request for the City to evaluate the impact that the Project elements will have on wildlife • Concern about the impacts of lighting on wildlife • Concern about noise impacts on wildlife • Request to compare % of existing hardscape to the % of proposed new hardscape • Inquiry about how trash will be managed at the site • Inquiry about why more space is being allocated to construction instead of wildlife habitat
I-197	February 8, 2022	Freda Shen	Comment Tracker	• Request to extend public comment period. Mentions that there was no signage, announcing the comment period, at Silver Lake • Concern about the impact that concrete platforms, terraces, and buildings would have on groundwater recharge • Concern that structures will obstruct the view of the water • Concern about the Projects impacts on wildlife

No.	Date Received	Commenter	Comment Format	Summary of Comment
I-198	February 1, 2022	Paul Feldman	Comment Tracker	• Concerns about issues from traffic, parking, truck trips, and length of construction. • Concern about the impacts from removing the fence to wildlife and public safety. • Concern about construction impacts and parking addition to traffic, hazardous materials, noise, air quality, greenhouse gas emissions, land use, water quality, aesthetics, and wildlife. • States that reservoir serves as a source of water for fire emergencies • Concern that lowering the walls would create flood hazards in neighborhoods • Suggests park should be left as is
I-199	February 7, 2022	John Sheppard	Comment Tracker	• No additional buildings or structures along the lake front. No water recreation. Avoid tree removal. Fence should be aesthetically compatible with “urban oasis environment” • Concern about the effect that traveling and idle vehicles will have on air quality and GHG • Site should provide parking • Maintain the wildlife corridor, plant native species, and carefully select fish • Prohibit water recreation • Suggest stormwater should be piped into the reservoir and gray water used • Consider impacts on Land Use and Planning • Concerns about increased traffic, road safety, parking, road deterioration, homeless encampments, and noise.
I-200		Elizabeth Isroelit w/ Silver Lake Together	Comment Tracker	• Assess the impacts of the Project on wildlife and habitat • Consider the impacts that people, dogs, and trash will have on wildlife • Concerns about the duration and impacts of noise, dust, pollution, and truck traffic generated by Project to the community and wildlife. • Address crime and homelessness, especially if the fence is removed • Concerns about parking • Opposes some of the recreation facilities, suggests that current facilities are adequate, funds to be allocated to other parks
I-201	February 2, 2022	Charlie Vinoly	Mail	• Opposes habitat islands and bleachers • Inquiry about the prevention of encampments
Scoping Meeting				
M-1	January 19, 2022	Jessica D	Scoping Meeting	• Requested a management plan for parking
M-2	January 19, 2022	Debbie Slater	Scoping Meeting	• Concerns about traffic and parking
M-3	January 19, 2022	Maryann Kuk	Scoping Meeting	• Suggests that housing should be built on available land

No.	Date Received	Commenter	Comment Format	Summary of Comment

NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT

DATE:	January 6, 2022
TO:	Responsible Agencies, Trustee Agencies, Interested Parties
FROM:	City of Los Angeles, Department of Public Works, Bureau of Engineering
SUBJECT:	Notice of Preparation of a Draft Environmental Impact Report
PROJECT:	Silver Lake Reservoir Complex Master Plan
REVIEW PERIOD:	January 6, 2022 through February 7, 2022

This Notice of Preparation (NOP) has been prepared to notify agencies and interested parties that the City of Los Angeles (City), as the Lead Agency, through the Department of Public Works, Bureau of Engineering will prepare an Environmental Impact Report (EIR) pursuant to the California Environmental Quality Act (CEQA) for the Silver Lake Reservoir Complex Master Plan Project (proposed Project). The proposed Project design was developed over a year-long community outreach process that included several Community Workshops and meetings with the Stakeholder Working Groups. A Master Plan was prepared for the proposed Project and is available for review here: https://eng.lacity.org/silver-lake-reservoir-complex-master-plan.

As permitted by State CEQA Guidelines Section 15060(d), the City has not prepared an Initial Study/Environmental Checklist, as it has determined that an EIR will be needed for the proposed Project. The EIR will address the proposed Project's potential effects for all environmental resource areas as outlined in the City of Los Angeles' L.A. CEQA Thresholds Guide (2006) and Appendix G of the State CEQA Guidelines, which are as follows:

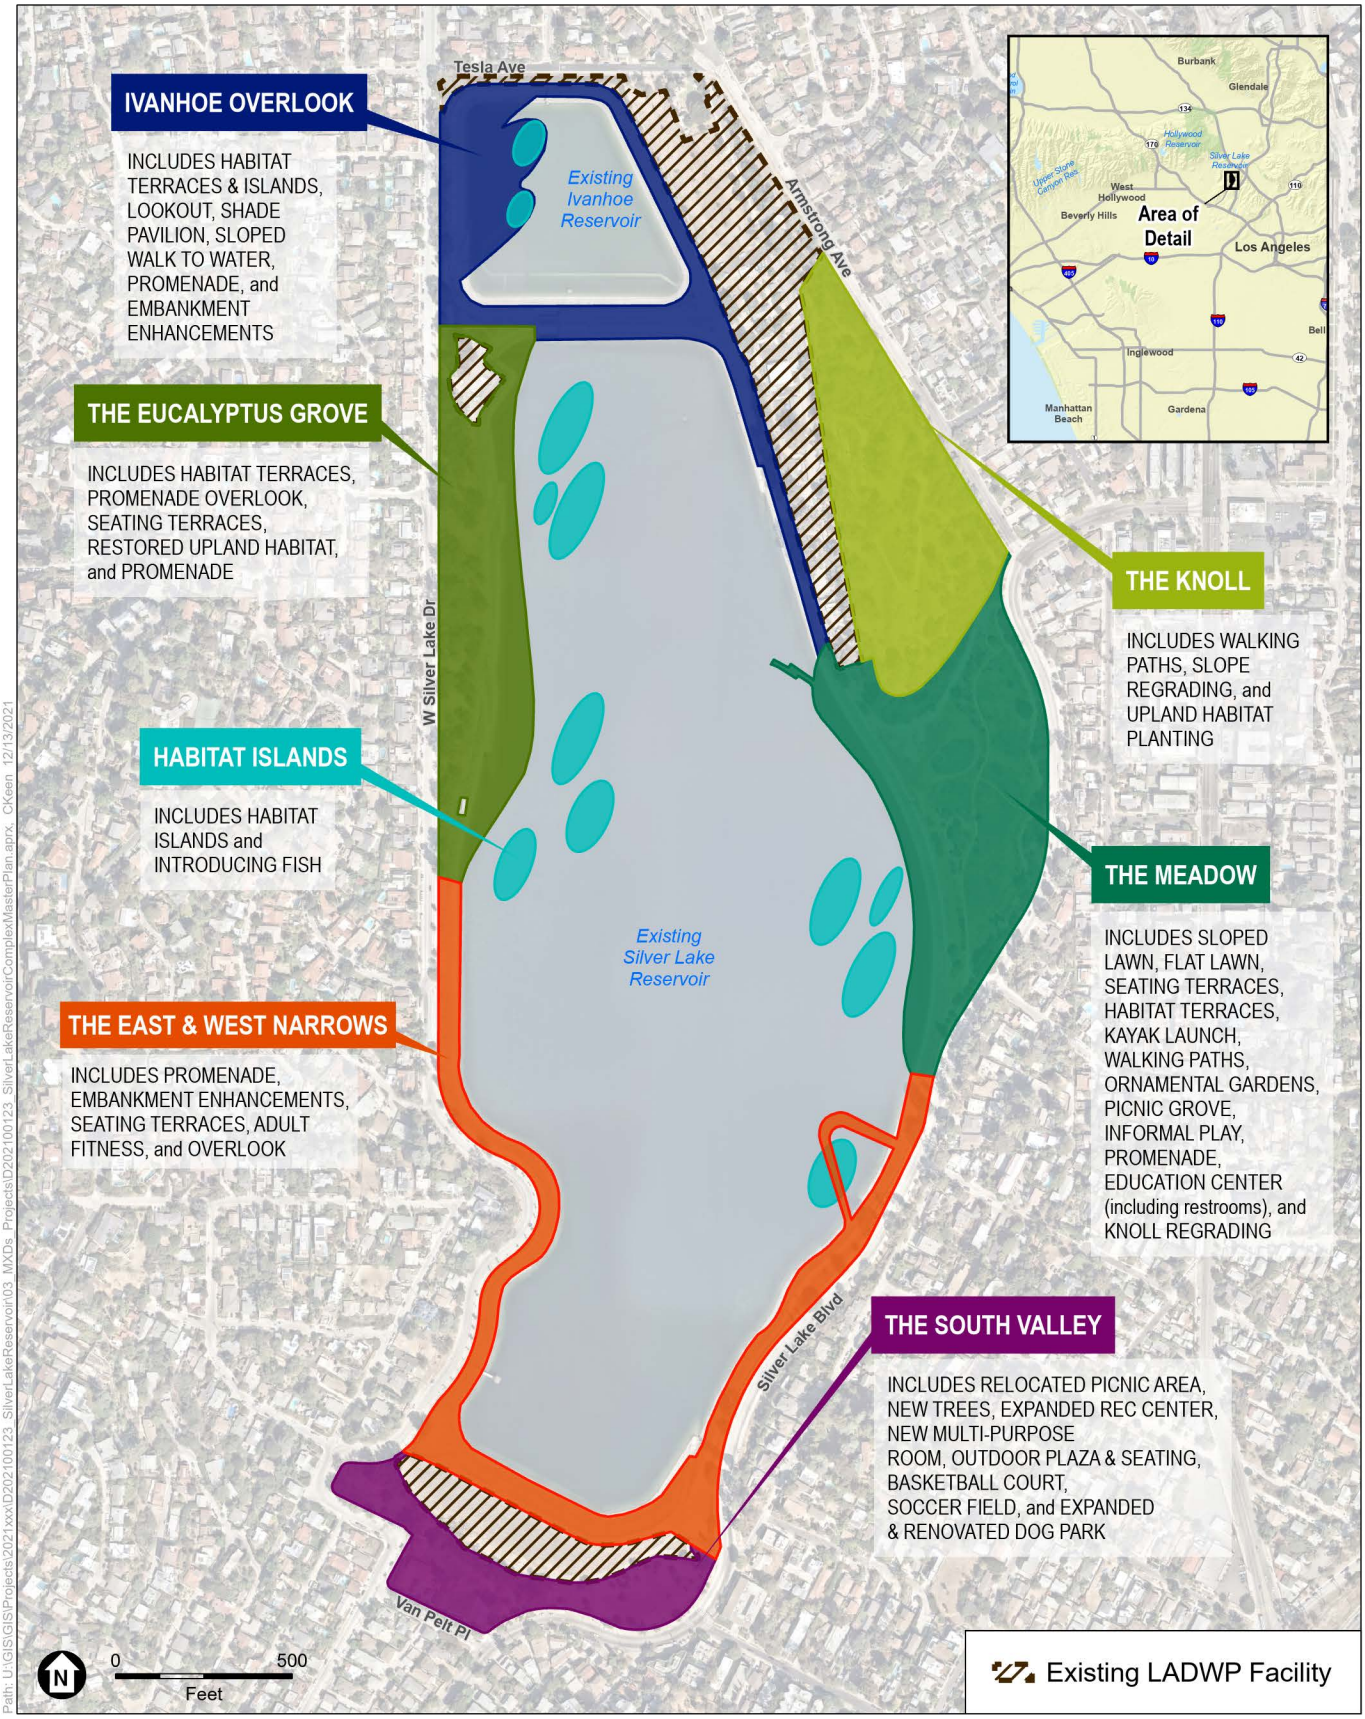
- Aesthetics
- Agricultural and Forestry Resources
- Air Quality
- Biological Resources
- Cultural Resources
- Energy
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Mineral Resources
- Noise
- Population and Housing
- Public Services
- Recreation
- Transportation and Traffic
- Tribal Cultural Resources
- Utilities and Service Systems
- Wildfire

PROJECT LOCATION: The proposed Project is located in the Silver Lake neighborhood within the City of Los Angeles. The Silver Lake neighborhood consists primarily of residential uses with some commercial areas, and some existing public access in and around the Silver Lake Reservoir Complex that allow park uses. The Project site is bounded by Tesla Avenue on the north, Armstrong Avenue and Silver Lake Boulevard on the east, Van Pelt Place and Silver Lake Boulevard on the south, and West Silver Lake Drive on the west.

PROJECT DESCRIPTION: The proposed Project would redesign 116 acres of the 127-acre Silver Lake Reservoir Complex with community park amenities. The proposed Project would consist of a series of spaces (park zones) stitched together by a 2.5-mile, tree-lined promenade. As shown in **Figure 1**, these zones include: Ivanhoe Overlook; Eucalyptus Grove; Knoll; Meadow; East and West Narrows; South Valley; and Habitat Islands. The proposed Project would feature two flexible lawns with shade trees, a picnic grove and ornamental gardens with an informal play area, and an environmental education center along the east edge of Silver Lake Reservoir at the base of the Knoll. At the intersection between the lawns and water, stepped seating terraces would navigate to wetland terraces interwoven with small footpaths. Two existing areas of woodland, the Knoll and Eucalyptus Grove would be restored to increase their upland habitat value. A new ecosystem that reintroduces coastal scrub and wetland habitat to the Silver Lake Reservoir Complex in the form of habitat islands and terraces would extend from the shoreline embankments and within the reservoir bodies.

PUBLIC REVIEW AND COMMENT PERIOD: The City is soliciting comments from responsible and trustee agencies as well as interested parties as to the scope and content of the environmental information to be included in the EIR. The EIR will be used by the City when considering approval of the proposed Project as well as any related discretionary approvals. In accordance with time limits mandated by CEQA, the NOP is being circulated for a 30-day public scoping period. All comments to the NOP are due no later than 5:00 p.m. on February 7, 2022. Please include the name, mailing address, and email address of the commenter. Written comments may be submitted via the following:

Mail to: City of Los Angeles Department of Public Works, Bureau of Engineering
c/o ESA- Nicolle Steiner
626 Wilshire Boulevard, Suite 1100
Los Angeles, CA 90017



Website: Comments can be submitted online through the proposed Project website at https://eng.lacity.org/silver-lake-reservoir-complex-master-plan/eir

DOCUMENT AVAILABILITY: The NOP is available online at the City website (https://eng.lacity.org/silver-lake-reservoir-complex-master-plan/eir) along with a pre-recorded presentation outlining the CEQA process and a short description of the Project. A hardcopy of the NOP is available for review at the Silver Lake Branch Library at 2411 Glendale Blvd, Los Angeles, CA 90039 and at the Los Angeles County City Terrace Library at 4025 E. City Terrace Dr, Los Angeles, CA 90063.

SCOPING MEETING: Due to the global pandemic, a virtual public meeting will be held on January 19, 2022, from 6:00 p.m. to 7:30 p.m. on Zoom. The public scoping meeting will include a brief presentation, providing an overview of the Project. Verbal comments may be made during the meeting. As covered under Title II of the Americans with Disabilities Act, the City does not discriminate based on disability and, upon request at least three days prior to the meeting date, will provide reasonable accommodation to ensure equal access to its programs, services, and activities. Spanish translation services can also be provided upon request at least three days prior to the meeting. Send inquiries to eng.slrcmp@lacity.org or call (310) 566-8018.

Open Space, [Q]OS-1XL

Project Description: *(please use a separate page if necessary)*

The proposed Silver Lake Reservoir Complex Master Plan Project (Project) would redesign 116 acres of the 127-acre Silver Lake Reservoir Complex with community park amenities. The proposed Project would consist of a series of spaces (park zones) stitched together by a 2.5-mile, tree-lined promenade. These zones include: Ivanhoe Overlook; Eucalyptus Grove; Knoll; Meadow; East and West Narrows; South Valley; and Habitat Islands. The proposed Project would feature two flexible lawns with shade trees, a picnic grove and ornamental gardens with an informal play area, and an environmental education center along the east edge of Silver Lake Reservoir at the base of the Knoll. At the intersection between the lawns and water, stepped seating terraces would navigate to wetland terraces interwoven with small footpaths. Two existing areas of woodland, the Knoll and Eucalyptus Grove would be restored to increase their upland habitat value. A new ecosystem that reintroduces coastal scrub and wetland habitat to the Silver Lake Reservoir Complex in the form of habitat islands and terraces would extend from the shoreline embankments and within the reservoir bodies.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "**X**".
If you have already sent your document to the agency please denote that with an "**S**".

Silver Lake Reservoir Complex Master Plan Project

Jan 9, 2022

Notice of Preparation (NOP) of the Draft Environmental Impact Report (EIR) for the proposed Silver Lake Reservoir Complex (SLRC) Master Plan Project (Project).

The City of Los Angeles (City) Bureau of Engineering is beginning the environmental review process for the proposed Project. The Project would redesign 116 acres of the 127-acre SLRC with community park amenities. The Project would consist of a series of spaces (park zones) stitched together by a 2.5-mile, tree-lined promenade.

The City has prepared an NOP and is requesting input from public agencies, stakeholders, and other interested parties on the scope and content of the EIR. The NOP is available online at: https://eng.lacity.org/silver-lake-reservoir-complex-master-plan/eir and at the Silver Lake Branch Library at 2411 Glendale Boulevard, Los Angeles, CA 90039 and Los Angeles County City Terrace Library at 4025 E. City Terrace Drive, Los Angeles, CA 90063.

All written comments are due by 5:00 p.m. on Monday, February 7, 2022. Written comments may be submitted through the Project website at https://eng.lacity.org/silver-lake-reservoir-complex-master-plan/eir or submitted by

mail to: City of Los Angeles Department of Public Works, Bureau of Engineering, c/o ESA-Nicolle Steiner, 626 Wilshire Boulevard, Suite 1100, Los Angeles, CA 90017.

Public Meeting: A public scoping meeting will be held to review the environmental process, the Project, and to provide an opportunity for stakeholder and community to provide verbal comments on the scope and content of the Draft EIR. The meeting will be held via Zoom on January 19, 2022, from 6:00 p.m. to 7:30 p.m. Interested parties can join online at https://esassoc.zoom.us/j/85363693488, or dial in to (833) 548-0276, and use the meeting I.D. 853 6369 3488.

As covered under Title II of the Americans with Disabilities Act, the City does not discriminate based on disability. All requests for reasonable accommodations to ensure equal access to this public meeting, including Spanish translation, should be made at least three days prior to the meeting date and sent to eng.slrcmp@lacity.org or call (310) 566-8018.

Aviso de Preparación de un Borrador de Informe de Impacto Ambiental para el Silver Lake Reservoir Complex Master Plan Project

Aviso de Preparación (NOP, por sus siglas en inglés) del Borrador de Informe Ambiental (EIR, por sus siglas en inglés) para el Silver Lake Reservoir Complex Master Plan Project (SLRC). La Oficina de Ingeniería de la Ciudad de Los Ángeles (Ciudad) está comenzando el proceso de revisión para el Proyecto propuesto. El Proyecto rediseñaría 116 acres del SLRC de 127 acres con infraestructura de parque comunitario. El Proyecto consistiría de una serie de espacios (zonas de parque) agrupados por un paseo arbolado de 2.5 millas. La Ciudad ha preparado un NOP y está solicitando aportes de las agencias públicas, interesados, y otras partes interesadas sobre el alcance y contenido del EIR. El NOP está disponible en línea en: https://eng.lacity.org/silver-lake-reservoir-complex-master-plan/eir y en la Sucursal de la Biblioteca Silver Lake en 2411 Glendale Boulevard, Los Ángeles, CA 90039 y en la Biblioteca City Terrace del Condado de Los Ángeles at 4025 E. City Terrace Drive, Los Ángeles, CA 90063. Todos los comentarios escritos deben enviarse antes de las 5:00 p.m. del **lunes 7 de febrero de 2022.** Los comentarios escritos pueden enviarse a través del sitio web del Proyecto en https://eng.lacity.org/silver-lake-reservoir-complex-master-plan/eir o enviados por correo a: Departamento de Obras Públicas de la Ciudad de Los Ángeles, Oficina de Ingeniería, c/o ESA-Nicolle Steiner, 626 Wilshire Boulevard, Suite 1100, Los Ángeles, CA 90017.
Reunión Pública: Una reunión de alcance público se llevará a cabo para revisar el proceso ambiental, y brindar una oportunidad para que los interesados y la comunidad proporcionen comentarios verbales sobre el alcance y contenido del Borrador EIR. La reunión se llevará a cabo a través de Zoom el **19 de enero de 2022, de 6:00 p.m. a 7:30 p.m.** Las partes interesadas pueden unirse en línea en https://esassoc.zoom.us/j/85363693488, o marque al (833) 548-0276, y utilice el ID de la reunión 853 6369 3488.
Como se establece en el Título II de la Ley de Estadounidenses con discapacidades, la Ciudad no discrimina por motivos de discapacidad. Todas las solicitudes de adaptaciones razonables para garantizar el acceso equitativo a esta reunión pública, incluyendo la traducción al español, deberán realizarse al menos tres días antes de la fecha de la reunión y enviarse a eng.slrcmp@lacity.org o llame al (310) 566-8018.

NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE SILVER LAKE RESERVOIR COMPLEX MASTER PLAN PROJECT NOTICE OF PREPARATION (NOP) OF THE DRAFT ENVIRONMENTAL IMPACT REPORT (EIR) FOR THE PROPOSED SILVER LAKE RESERVOIR COMPLEX (SLRC) MASTER PLAN PROJECT (PROJECT).

The City of Los Angeles (City) Bureau of Engineering is beginning the environmental review process for the proposed Project. The Project would of redesigning 116 acres with community park amenities within the 127-acre SLRC. The Project includes a series of spaces (park zones) stitched together by a 2.5-mile, tree-lined promenade. The City has prepared the NOP and is requesting input from public agencies, stakeholders, and other interested parties on the scope and content of the EIR. The NOP is available online at: https://eng.lacity.org/silver-lake-reservoir-complex-master-plan/eir and at the Silver Lake Branch Library at 2411 Glendale Boulevard, Los Angeles, CA 90039 and Los Angeles County City Terrace Library at 4025 E. City Terrace Drive, Los Angeles, CA 90063. All written comments are due by 5:00 p.m. on Monday, February 7, 2022. Comments may be submitted through the Project website at https://eng.lacity.org/silver-lake-reservoir-complex-master-plan/eir or by email to eng.slrcmp@lacity.org (please include "SLRC" in the subject line). Please include the name, mailing address, and email address of the commenter. Comments may also be submitted by mail to: City of Los Angeles Department of Public Works, Bureau of Engineering, c/o ESA-Nicolle Steiner, 626 Wilshire Boulevard, Suite 1100, Los Angeles, CA 90017. Public Meeting: A public scoping meeting will be held to review the environmental process, the Project, and to provide an opportunity for stakeholder and community input on the scope and content of the Draft EIR. The meeting will be held via Zoom on January 19, 2022, from 6:00 p.m. to 7:30 p.m. Interested parties can join online at https://esassoc.zoom.us/j/85363693488, or dial in to (833) 548-0276, and use the meeting I.D. 853 6369 3488. As covered under Title II of the Americans with Disabilities Act, the City does not discriminate based on disability. All requests for reasonable accommodations to ensure equal access to this public meeting, including Spanish translation, should be made at least three days prior to the meeting date and sent to eng.slrcmp@lacity.org or call (310) 566-8018.

TOPICS COVERED IN THIS PRESENTATION

- What is the Purpose of the Presentation?
- What is the Project?
- What is the CEQA Process?
- What is the CEQA Schedule?
- How Can I Provide a Comment?

1 WHAT IS THE PURPOSE OF THE PRESENTATION?

Presentation Purpose

- Introduce the proposed Silver Lake Reservoir Complex Master Plan Project (Project)
- Notify the public and agencies that the City of Los Angeles, Bureau of Engineering is preparing an Environmental Impact Report (EIR) pursuant to the California Environmental Quality Act (CEQA) for the Project
- Present ways in which the public and agencies can provide input on the environmental issues to be evaluated in the EIR

2 WHAT IS THE PROJECT?

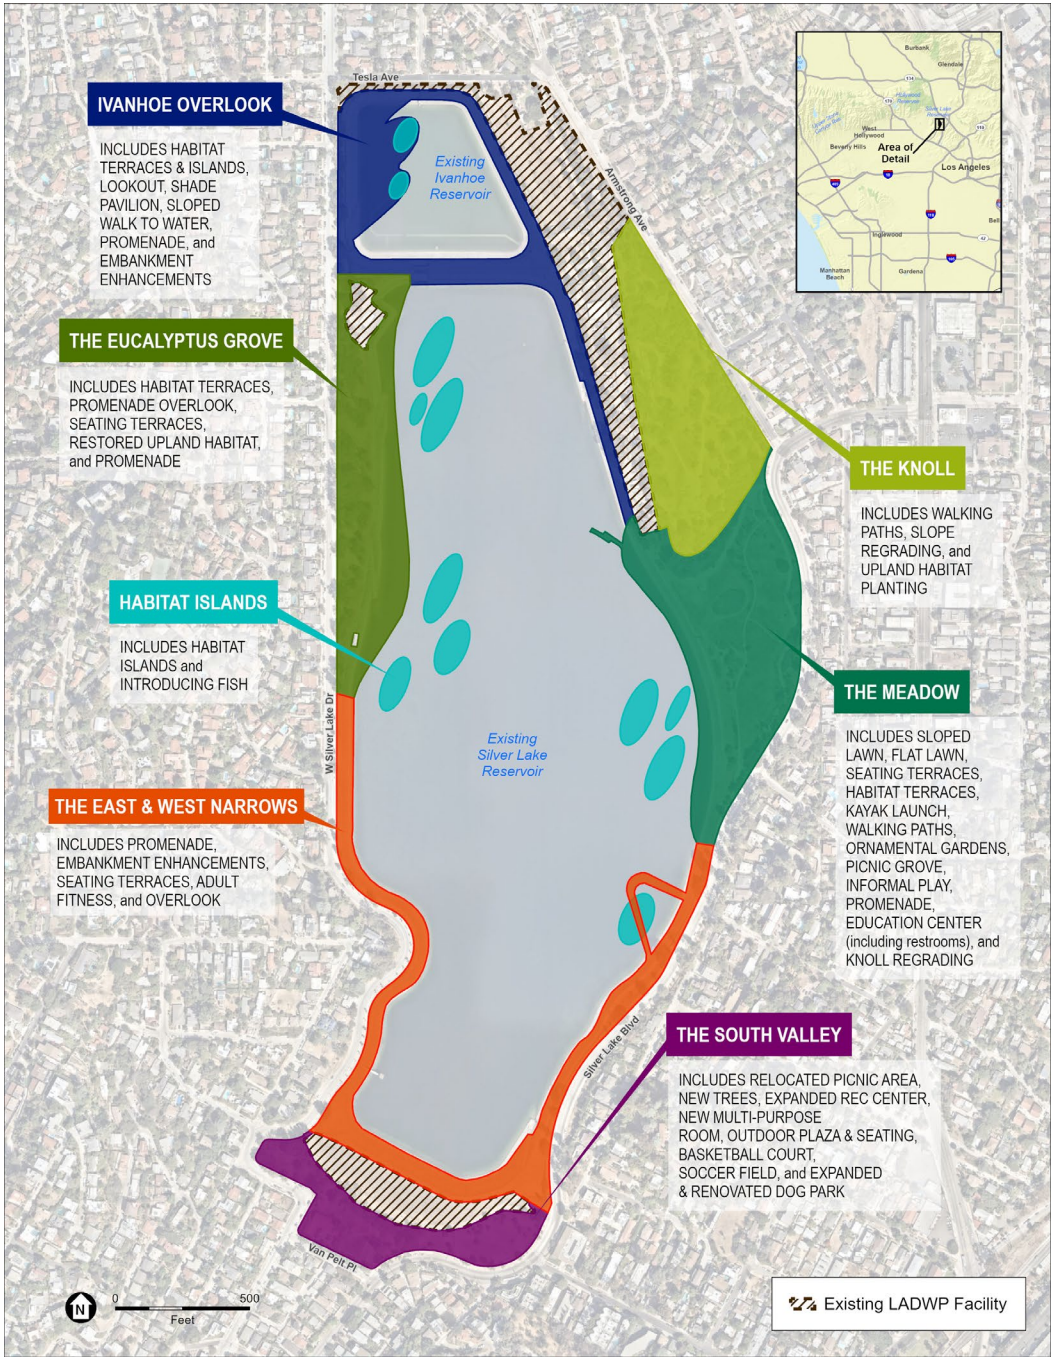
Project Location

Project Background

- Silver Lake Reservoir and Ivanhoe Reservoir together make up the Silver Lake Reservoir Complex owned by LADWP
- 2006: Federal Environmental Protection Agency released guidance related to water quality guidelines for open reservoir
- 2008: Silver Lake Reservoir taken out of service
- 2017: Ivanhoe Reservoir taken out of service
- 2018: BOE and LADWP began work on designing the proposed project

Project Background

- The proposed Project design was developed over a year-long community outreach process.



Master Plan Report

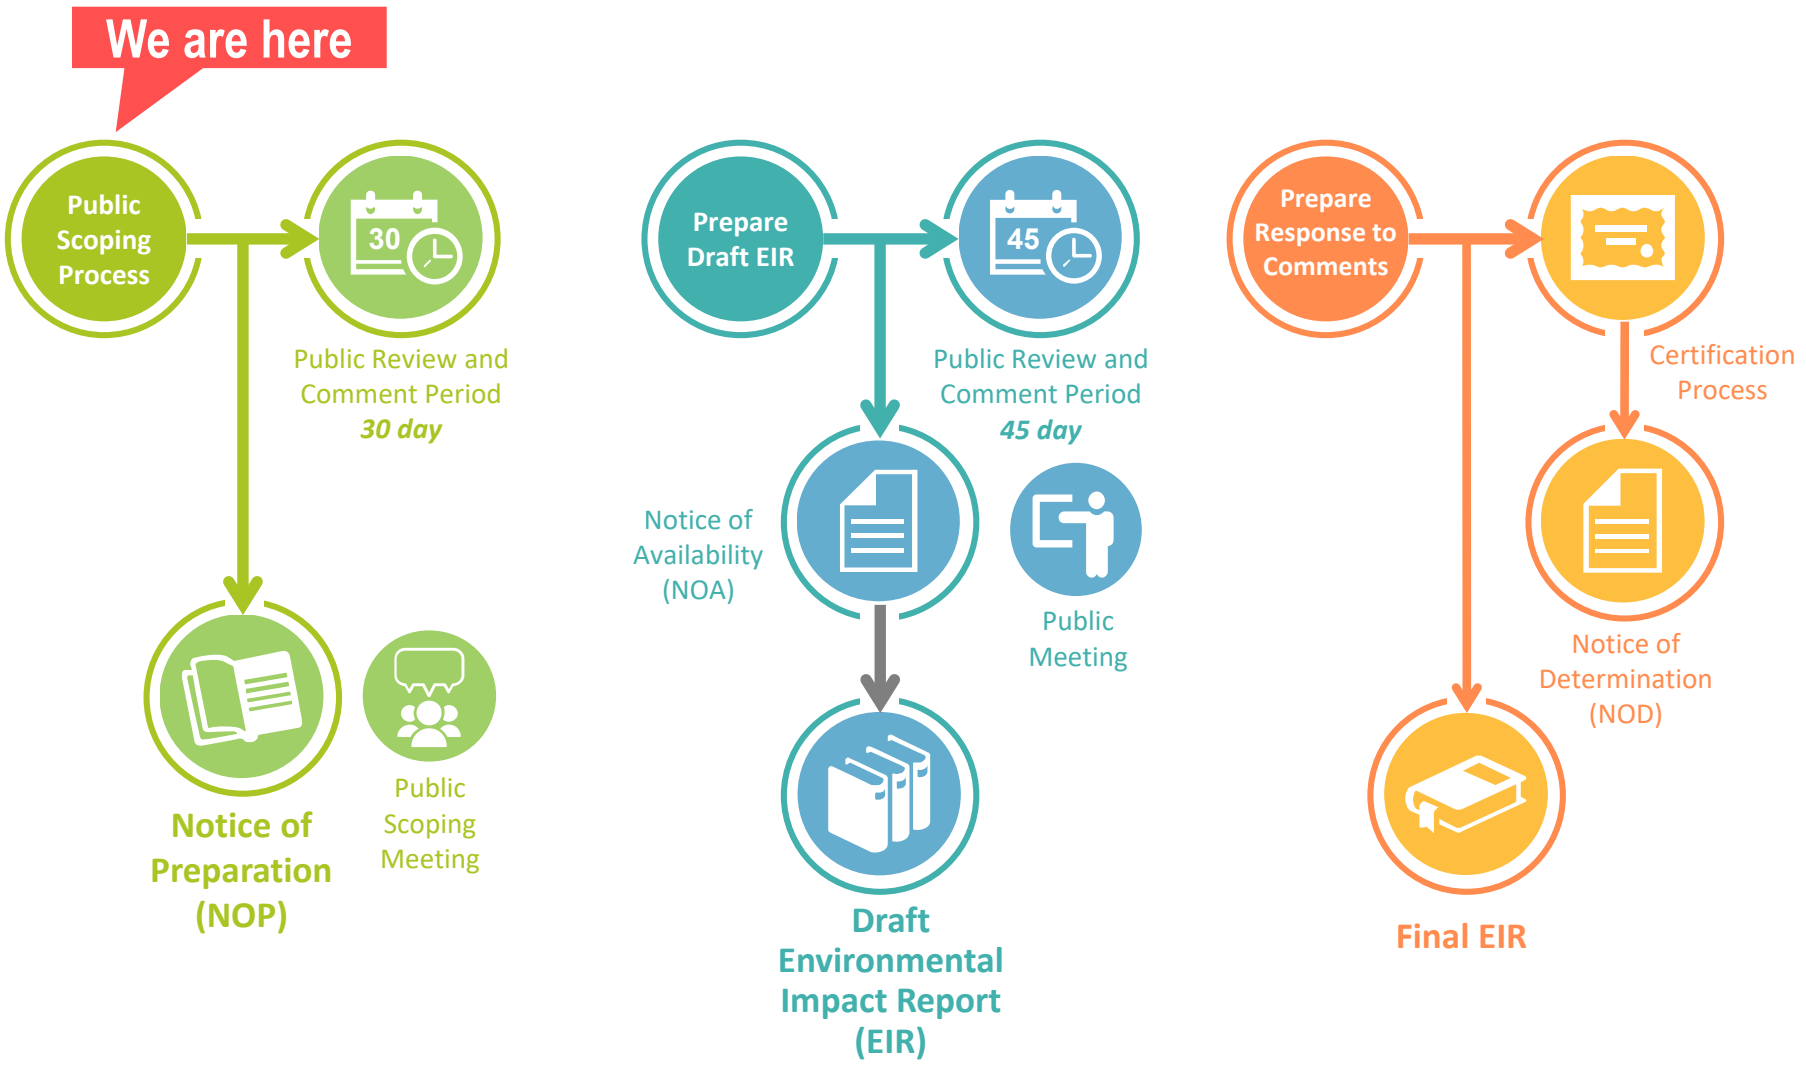
Completed December 2020

Available at:
https://eng.lacity.org/silver-lake-reservoir-complex-master-plan

Proposed Project

Proposed Project Overview

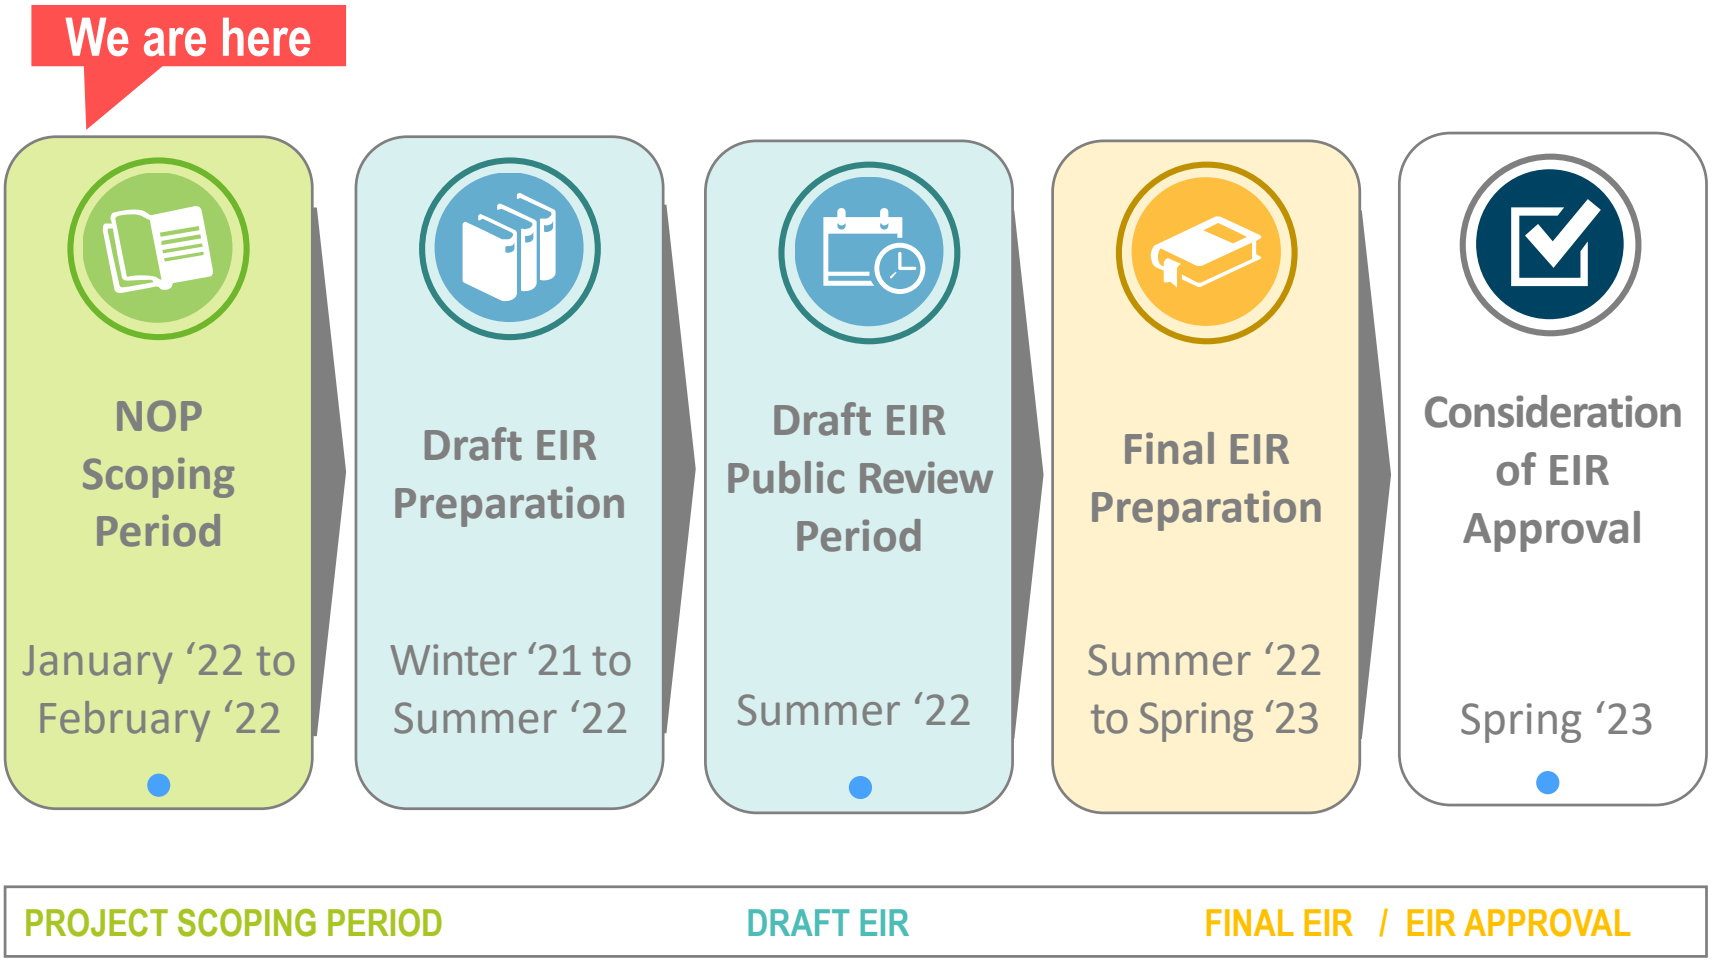
Proposed Project Overview



3 WHAT IS THE CEQA PROCESS?

California Environmental Quality Act (CEQA)

CEQA EIR Process



Issues Covered in the Draft EIR

- ☐ Aesthetics
- ☐ Agriculture and Forestry Resources
- ☐ Air Quality
- ☐ Biological Resources
- ☐ Cultural Resources
- ☐ Energy
- ☐ Geology /Soils
- ☐ Greenhouse Gas Emissions
- ☐ Hazards & Hazardous Materials
- ☐ Hydrology / Water Quality

NATIVE AMERICAN HERITAGE COMMISSION

GOVERNOR'S OFFICE OF PLANNING AND RESEARCH
Jan 07 2022
STATE OF CALIFORNIA

January 6, 2022

Shilpa Gupta
City of Los Angeles
1149 S. Broadway, Suite 600
Los Angeles, CA 90015

Re: 2022010055, Silver Lake Reservoir Complex Master Plan Project, Los Angeles County

Dear Ms. Gupta:

The Native American Heritage Commission (NAHC) has received the Notice of Preparation (NOP), Draft Environmental Impact Report (DEIR) or Early Consultation for the project referenced above. The California Environmental Quality Act (CEQA) (Pub. Resources Code §21000 et seq.), specifically Public Resources Code §21084.1, states that a project that may cause a substantial adverse change in the significance of a historical resource, is a project that may have a significant effect on the environment. (Pub. Resources Code § 21084.1; Cal. Code Regs., tit.14, §15064.5 (b) (CEQA Guidelines §15064.5 (b)). If there is substantial evidence, in light of the whole record before a lead agency, that a project may have a significant effect on the environment, an Environmental Impact Report (EIR) shall be prepared. (Pub. Resources Code §21080 (d); Cal. Code Regs., tit. 14, § 5064 subd.(a)(1) (CEQA Guidelines §15064 (a)(1)). In order to determine whether a project will cause a substantial adverse change in the significance of a historical resource, a lead agency will need to determine whether there are historical resources within the area of potential effect (APE).

CEQA was amended significantly in 2014. Assembly Bill 52 (Gatto, Chapter 532, Statutes of 2014) (AB 52) amended CEQA to create a separate category of cultural resources, "tribal cultural resources" (Pub. Resources Code §21074) and provides that a project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment. (Pub. Resources Code §21084.2). Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource. (Pub. Resources Code §21084.3 (a)). **AB 52 applies to any project for which a notice of preparation, a notice of negative declaration, or a mitigated negative declaration is filed on or after July 1, 2015.** If your project involves the adoption of or amendment to a general plan or a specific plan, or the designation or proposed designation of open space, on or after March 1, 2005, it may also be subject to Senate Bill 18 (Burton, Chapter 905, Statutes of 2004) (SB 18). **Both SB 18 and AB 52 have tribal consultation requirements**. If your project is also subject to the federal National Environmental Policy Act (42 U.S.C. § 4321 et seq.) (NEPA), the tribal consultation requirements of Section 106 of the National Historic Preservation Act of 1966 (154 U.S.C. 300101, 36 C.F.R. §800 et seq.) may also apply.

The NAHC recommends consultation with California Native American tribes that are traditionally and culturally affiliated with the geographic area of your proposed project as early as possible in order to avoid inadvertent discoveries of Native American human remains and best protect tribal cultural resources. Below is a brief summary of portions of AB 52 and SB 18 as well as the NAHC's recommendations for conducting cultural resources assessments.

Consult your legal counsel about compliance with AB 52 and SB 18 as well as compliance with any other applicable laws.

AB 52

AB 52 has added to CEQA the additional requirements listed below, along with many other requirements:

1. Fourteen Day Period to Provide Notice of Completion of an Application/Decision to Undertake a Project: Within fourteen (14) days of determining that an application for a project is complete or of a decision by a public agency to undertake a project, a lead agency shall provide formal notification to a designated contact of, or tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, to be accomplished by at least one written notice that includes:

- **a.** A brief description of the project.
- **b.** The lead agency contact information.
- **c.** Notification that the California Native American tribe has 30 days to request consultation. (Pub. Resources Code §21080.3.1 (d)).
- **d.** A "California Native American tribe" is defined as a Native American tribe located in California that is on the contact list maintained by the NAHC for the purposes of Chapter 905 of Statutes of 2004 (SB 18). (Pub. Resources Code §21073).

2. Begin Consultation Within 30 Days of Receiving a Tribe's Request for Consultation and Before Releasing a Negative Declaration, Mitigated Negative Declaration, or Environmental Impact Report: A lead agency shall begin the consultation process within 30 days of receiving a request for consultation from a California Native American tribe that is traditionally and culturally affiliated with the geographic area of the proposed project. (Pub. Resources Code §21080.3.1, subds. (d) and (e)) and prior to the release of a negative declaration, mitigated negative declaration or Environmental Impact Report. (Pub. Resources Code §21080.3.1(b)).

- **a.** For purposes of AB 52, "consultation shall have the same meaning as provided in Gov. Code §65352.4 (SB 18). (Pub. Resources Code §21080.3.1 (b)).

3. Mandatory Topics of Consultation If Requested by a Tribe: The following topics of consultation, if a tribe requests to discuss them, are mandatory topics of consultation:

- **a.** Alternatives to the project.
- **b.** Recommended mitigation measures.
- **c.** Significant effects. (Pub. Resources Code §21080.3.2 (a)).

4. Discretionary Topics of Consultation: The following topics are discretionary topics of consultation:

- **a.** Type of environmental review necessary.
- **b.** Significance of the tribal cultural resources.
- **c.** Significance of the project's impacts on tribal cultural resources.
- **d.** If necessary, project alternatives or appropriate measures for preservation or mitigation that the tribe may recommend to the lead agency. (Pub. Resources Code §21080.3.2 (a)).

5. Confidentiality of Information Submitted by a Tribe During the Environmental Review Process: With some exceptions, any information, including but not limited to, the location, description, and use of tribal cultural resources submitted by a California Native American tribe during the environmental review process shall not be included in the environmental document or otherwise disclosed by the lead agency or any other public agency to the public, consistent with Government Code §6254 (r) and §6254.10. Any information submitted by a California Native American tribe during the consultation or environmental review process shall be published in a confidential appendix to the environmental document unless the tribe that provided the information consents, in writing, to the disclosure of some or all of the information to the public. (Pub. Resources Code §21082.3 (c)(1)).

6. Discussion of Impacts to Tribal Cultural Resources in the Environmental Document: If a project may have a significant impact on a tribal cultural resource, the lead agency's environmental document shall discuss both of the following:

- **a.** Whether the proposed project has a significant impact on an identified tribal cultural resource.
- **b.** Whether feasible alternatives or mitigation measures, including those measures that may be agreed to pursuant to Public Resources Code §21082.3, subdivision (a), avoid or substantially lessen the impact on the identified tribal cultural resource. (Pub. Resources Code §21082.3 (b)).

7. Conclusion of Consultation: Consultation with a tribe shall be considered concluded when either of the following occurs:

a. The parties agree to measures to mitigate or avoid a significant effect, if a significant effect exists, on a tribal cultural resource; or

b. A party, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached. (Pub. Resources Code §21080.3.2 (b)).

8. Recommending Mitigation Measures Agreed Upon in Consultation in the Environmental Document: Any mitigation measures agreed upon in the consultation conducted pursuant to Public Resources Code §21080.3.2 shall be recommended for inclusion in the environmental document and in an adopted mitigation monitoring and reporting program, if determined to avoid or lessen the impact pursuant to Public Resources Code §21082.3, subdivision (b), paragraph 2, and shall be fully enforceable. (Pub. Resources Code §21082.3 (a)).

9. Required Consideration of Feasible Mitigation: If mitigation measures recommended by the staff of the lead agency as a result of the consultation process are not included in the environmental document or if there are no agreed upon mitigation measures at the conclusion of consultation, or if consultation does not occur, and if substantial evidence demonstrates that a project will cause a significant effect to a tribal cultural resource, the lead agency shall consider feasible mitigation pursuant to Public Resources Code §21084.3 (b). (Pub. Resources Code §21082.3 (e)).

10. Examples of Mitigation Measures That, If Feasible, May Be Considered to Avoid or Minimize Significant Adverse Impacts to Tribal Cultural Resources:

a. Avoidance and preservation of the resources in place, including, but not limited to:

i. Planning and construction to avoid the resources and protect the cultural and natural context.

ii. Planning greenspace, parks, or other open space, to incorporate the resources with culturally appropriate protection and management criteria.

b. Treating the resource with culturally appropriate dignity, taking into account the tribal cultural values and meaning of the resource, including, but not limited to, the following:

i. Protecting the cultural character and integrity of the resource.

ii. Protecting the traditional use of the resource.

iii. Protecting the confidentiality of the resource.

c. Permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purposes of preserving or utilizing the resources or places.

d. Protecting the resource. (Pub. Resource Code §21084.3 (b)).

e. Please note that a federally recognized California Native American tribe or a non-federally recognized California Native American tribe that is on the contact list maintained by the NAHC to protect a California prehistoric, archaeological, cultural, spiritual, or ceremonial place may acquire and hold conservation easements if the conservation easement is voluntarily conveyed. (Civ. Code §815.3 (c)).

f. Please note that it is the policy of the state that Native American remains and associated grave artifacts shall be repatriated. (Pub. Resources Code §5097.991).

11. Prerequisites for Certifying an Environmental Impact Report or Adopting a Mitigated Negative Declaration or Negative Declaration with a Significant Impact on an Identified Tribal Cultural Resource: An Environmental Impact Report may not be certified, nor may a mitigated negative declaration or a negative declaration be adopted unless one of the following occurs:

a. The consultation process between the tribes and the lead agency has occurred as provided in Public Resources Code §21080.3.1 and §21080.3.2 and concluded pursuant to Public Resources Code §21080.3.2.

b. The tribe that requested consultation failed to provide comments to the lead agency or otherwise failed to engage in the consultation process.

c. The lead agency provided notice of the project to the tribe in compliance with Public Resources Code §21080.3.1 (d) and the tribe failed to request consultation within 30 days. (Pub. Resources Code §21082.3 (d)).

The NAHC's PowerPoint presentation titled, "Tribal Consultation Under AB 52: Requirements and Best Practices" may be found online at: http://nahc.ca.gov/wp-content/uploads/2015/10/AB52TribalConsultation_CalEPAPDF.pdf

SB 18

SB 18 applies to local governments and requires local governments to contact, provide notice to, refer plans to, and consult with tribes prior to the adoption or amendment of a general plan or a specific plan, or the designation of open space. (Gov. Code §65352.3). Local governments should consult the Governor's Office of Planning and Research's "Tribal Consultation Guidelines," which can be found online at: https://www.opr.ca.gov/docs/09_14_05_Updated_Guidelines_922.pdf.

Some of SB 18's provisions include:

1. Tribal Consultation: If a local government considers a proposal to adopt or amend a general plan or a specific plan, or to designate open space it is required to contact the appropriate tribes identified by the NAHC by requesting a "Tribal Consultation List." If a tribe, once contacted, requests consultation the local government must consult with the tribe on the plan proposal. **A tribe has 90 days from the date of receipt of notification to request consultation unless a shorter timeframe has been agreed to by the tribe.** (Gov. Code §65352.3 (a)(2)).

2. No Statutory Time Limit on SB 18 Tribal Consultation. There is no statutory time limit on SB 18 tribal consultation.

3. Confidentiality: Consistent with the guidelines developed and adopted by the Office of Planning and Research pursuant to Gov. Code §65040.2, the city or county shall protect the confidentiality of the information concerning the specific identity, location, character, and use of places, features and objects described in Public Resources Code §5097.9 and §5097.993 that are within the city's or county's jurisdiction. (Gov. Code §65352.3 (b)).

4. Conclusion of SB 18 Tribal Consultation: Consultation should be concluded at the point in which:

- **a.** The parties to the consultation come to a mutual agreement concerning the appropriate measures for preservation or mitigation; or
- **b.** Either the local government or the tribe, acting in good faith and after reasonable effort, concludes that mutual agreement cannot be reached concerning the appropriate measures of preservation or mitigation. (Tribal Consultation Guidelines, Governor's Office of Planning and Research (2005) at p. 18).

Agencies should be aware that neither AB 52 nor SB 18 precludes agencies from initiating tribal consultation with tribes that are traditionally and culturally affiliated with their jurisdictions before the timeframes provided in AB 52 and SB 18. For that reason, we urge you to continue to request Native American Tribal Contact Lists and "Sacred Lands File" searches from the NAHC. The request forms can be found online at: http://nahc.ca.gov/resources/forms/.

NAHC Recommendations for Cultural Resources Assessments

To adequately assess the existence and significance of tribal cultural resources and plan for avoidance, preservation in place, or barring both, mitigation of project-related impacts to tribal cultural resources, the NAHC recommends the following actions:

1. Contact the appropriate regional California Historical Research Information System (CHRIS) Center (http://ohp.parks.ca.gov/?page_id=1068) for an archaeological records search. The records search will determine:

- **a.** If part or all of the APE has been previously surveyed for cultural resources.
- **b.** If any known cultural resources have already been recorded on or adjacent to the APE.
- **c.** If the probability is low, moderate, or high that cultural resources are located in the APE.
- **d.** If a survey is required to determine whether previously unrecorded cultural resources are present.

2. If an archaeological inventory survey is required, the final stage is the preparation of a professional report detailing the findings and recommendations of the records search and field survey.

- **a.** The final report containing site forms, site significance, and mitigation measures should be submitted immediately to the planning department. All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum and not be made available for public disclosure.
- **b.** The final written report should be submitted within 3 months after work has been completed to the appropriate regional CHRIS center.

3. Contact the NAHC for:

a. A Sacred Lands File search. Remember that tribes do not always record their sacred sites in the Sacred Lands File, nor are they required to do so. A Sacred Lands File search is not a substitute for consultation with tribes that are traditionally and culturally affiliated with the geographic area of the project's APE.

b. A Native American Tribal Consultation List of appropriate tribes for consultation concerning the project site and to assist in planning for avoidance, preservation in place, or, failing both, mitigation measures.

4. Remember that the lack of surface evidence of archaeological resources (including tribal cultural resources) does not preclude their subsurface existence.

a. Lead agencies should include in their mitigation and monitoring reporting program plan provisions for the identification and evaluation of inadvertently discovered archaeological resources per Cal. Code Regs., tit. 14, §15064.5(f) (CEQA Guidelines §15064.5(f)). In areas of identified archaeological sensitivity, a certified archaeologist and a culturally affiliated Native American with knowledge of cultural resources should monitor all ground-disturbing activities.

b. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the disposition of recovered cultural items that are not burial associated in consultation with culturally affiliated Native Americans.

c. Lead agencies should include in their mitigation and monitoring reporting program plans provisions for the treatment and disposition of inadvertently discovered Native American human remains. Health and Safety Code §7050.5, Public Resources Code §5097.98, and Cal. Code Regs., tit. 14, §15064.5, subdivisions (d) and (e) (CEQA Guidelines §15064.5, subds. (d) and (e)) address the processes to be followed in the event of an inadvertent discovery of any Native American human remains and associated grave goods in a location other than a dedicated cemetery.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green
Cultural Resources Analyst

RE: Silver Lake Reservoir Complex
Master Plan Project
SCH # 2022010055
GTS # 07-LA-2022-03816

Dear Shilpa Gupta:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the above referenced Notice of Preparation (NOP). The Project would redesign 116 acres of the 127-acre Silver Lake Reservoir Complex with community park amenities. New additions also include two flexible lawns with shade trees, a picnic grove and ornamental gardens with an informal play area, and an environmental education center along the east edge of Silver Lake Reservoir. The City of Los Angeles is the Lead Agency under the California Environmental Quality Act (CEQA).

The nearest State facilities to the proposed project are Interstate (I)-5 and State Route (SR)-2. From reviewing the NOP, Caltrans has the following comments:

Caltrans supports the addition of pedestrian pathways, dedicated bike lanes and transit availability that were noted in the Silver Lake Reservoir Complex Master Plan. This supports our mission to provide a safe and reliable transportation network that serves all people and respects the environment, and to help achieve our goal of enhancing and connecting the multimodal transportation network.

Caltrans also supports the addition of canopy trees and native plantings. These additions to regional green infrastructure help improve air quality, combat the heat island effect, and promote sustainable practices through water efficiency and wildlife habitat restoration.

As a reminder, it is recommended that large size truck trips be limited to off-peak commuter periods. Any transportation of heavy construction equipment and/or materials which requires use of oversized transport vehicles on State highways will need a Caltrans transportation permit. Information on the permit application can be found by contacting the Caltrans District 7 Office of Permits at (213) 897-3631.

We look forward to reviewing the forthcoming Draft Environmental Impact Report. If you have any questions about these comments, please contact Diana DeGroot, the project coordinator, at Diana.DeGroot@dot.ca.gov, and refer to GTS # 07-LA-2022-03816.

Sincerely,

Miya Edmonson

Notice of Preparation of a Draft Environmental Impact Report
Silver Lake Reservoir Complex Master Plan Project
SCH# 2022010055
Silver Lake Dam No. 6-51
Los Angeles County

Dear Ms. Gupta:

The Division of Safety of Dams (DSOD) has reviewed the Notice of Preparation of a Draft Environmental Impact Report for the Silver Lake Reservoir Complex Master Plan Project, which describes the proposed redesign of most of the Sliver Lake Reservoir Complex with community park amenities. The project includes new parking areas, a tree-lined promenade, sports facilities, a picnic grove, lawns with shade trees, an ornamental garden, play areas, wetland terraces, and an environmental education center, among other features, surrounding Silver Lake and Ivanhoe Reservoirs.

Insufficient information is provided in the project description to make an accurate jurisdictional determination with regard to the embankment enhancements, new trees, and facilities proposed on or near the Silver Lake Dam and appurtenances, and whether some or all of the work will be subject to State jurisdiction for dam safety. Therefore, the City of Los Angeles needs to submit preliminary plans of the proposed work so that DSOD can make a jurisdictional determination.

Silver Lake Dam, as defined in Sections 6002 and 6003, Division 3, of the California Water Code, is subject to State jurisdiction.

If some or all of the proposed work is subject to State jurisdiction, an alteration application, together with plans, specifications, and the appropriate filing fee must be filed with DSOD for this project. All dam safety related issues must be resolved prior to approval of the application, and the work must be performed under the direction of a Civil Engineer registered in California. Erik Malvick, our Design Engineering Branch Manager, is responsible for the application process and can be reached at (916) 565-7840.

RE: SCAG Comments on the Notice of Preparation of a Draft Environmental Impact Report for the Silver Lake Reservoir Complex Master Plan [SCAG NO. IGR10556]

Dear Ms. Steiner,

Thank you for submitting the Notice of Preparation of a Draft Environmental Impact Report for the Silver Lake Reservoir Complex Master Plan ("proposed project") to the Southern California Association of Governments (SCAG) for review and comment. SCAG is responsible for providing informational resources to regionally significant plans, projects, and programs per the California Environmental Quality Act (CEQA) to facilitate the consistency of these projects with SCAG's adopted regional plans, to be determined by the lead agencies.[1]

Pursuant to Senate Bill (SB) 375, SCAG is the designated Regional Transportation Planning Agency under state law and is responsible for preparation of the Regional Transportation Plan (RTP) including the Sustainable Communities Strategy (SCS). SCAG's feedback is intended to assist local jurisdictions and project proponents to implement projects that have the potential to contribute to attainment of Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) goals and align with RTP/SCS policies. Finally, SCAG is also the authorized regional agency for Inter-Governmental Review (IGR) of programs proposed for Federal financial assistance and direct Federal development activities, pursuant to Presidential Executive Order 12372.

SCAG staff has reviewed the Notice of Preparation of a Draft Environmental Impact Report for the Silver Lake Reservoir Complex Master Plan in Los Angeles County. The proposed project would redesign 116 acres of the 127-acre Silver Lake Reservoir Complex with community park amenities, including two flexible lawns with shade trees; a picnic grove and ornamental gardens with informal play area; environmental education center, stepped seating terraces; restoration of two existing woodland areas; and new habitat islands and terraces.

When available, please email environmental documentation to *IGR@scag.ca.gov* providing, at a minimum, the full public comment period for review.

If you have any questions regarding the attached comments, please contact the Intergovernmental Review (IGR) Program, attn.: Anita Au, Senior Regional Planner, at (213) 236-1874 or IGR@scag.ca.gov. Thank you.

Sincerely,

Frank Wen, Ph.D.
Manager, Planning Strategy Department

[1] Lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the 2020 RTP/SCS (Connect SoCal) for the purpose of determining consistency for CEQA.

COMMENTS ON THE NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE SILVER LAKE RESERVOIR COMPLEX MASTER PLAN [SCAG NO. IGR10556]

CONSISTENCY WITH CONNECT SOCAL

SCAG provides informational resources to facilitate the consistency of the proposed project with the adopted 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS or Connect SoCal). For the purpose of determining consistency with CEQA, lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with Connect SoCal.

CONNECT SOCAL GOALS

The SCAG Regional Council fully adopted Connect SoCal in September 2020. Connect SoCal, also known as the 2020 – 2045 RTP/SCS, builds upon and expands land use and transportation strategies established over several planning cycles to increase mobility options and achieve a more sustainable growth pattern. The long-range visioning plan balances future mobility and housing needs with goals for the environment, the regional economy, social equity and environmental justice, and public health. The goals included in Connect SoCal may be pertinent to the proposed project. These goals are meant to provide guidance for considering the proposed project. Among the relevant goals of Connect SoCal are the following:

SCAG CONNECT SOCAL GOALS	
Goal #1:	*Encourage regional economic prosperity and global competitiveness*
Goal #2:	*Improve mobility, accessibility, reliability and travel safety for people and goods*
Goal #3:	*Enhance the preservation, security, and resilience of the regional transportation system*
Goal #4:	*Increase person and goods movement and travel choices within the transportation system*
Goal #5:	*Reduce greenhouse gas emissions and improve air quality*
Goal #6:	*Support healthy and equitable communities*
Goal #7:	*Adapt to a changing climate and support an integrated regional development pattern and transportation network*
Goal #8:	*Leverage new transportation technologies and data-driven solutions that result in more efficient travel*
Goal #9:	*Encourage development of diverse housing types in areas that are supported by multiple transportation options*
Goal #10:	*Promote conservation of natural and agricultural lands and restoration of habitats*

For ease of review, we encourage the use of a side-by-side comparison of SCAG goals with discussions of the consistency, non-consistency or non-applicability of the goals and supportive analysis in a table format. Suggested format is as follows:

SCAG CONNECT SOCAL GOALS		
	Goal	Analysis
Goal #1:	*Encourage regional economic prosperity and global competitiveness*	*Consistent: Statement as to why;* *Not-Consistent: Statement as to why;* *Or* *Not Applicable: Statement as to why;* *DEIR page number reference*
Goal #2:	*Improve mobility, accessibility, reliability and travel safety for people and goods*	*Consistent: Statement as to why;* *Not-Consistent: Statement as to why;* *Or* *Not Applicable: Statement as to why;* *DEIR page number reference*
etc.		etc.

Connect SoCal Strategies

To achieve the goals of Connect SoCal, a wide range of land use and transportation strategies are included in the accompanying twenty (20) technical reports. Of particular note are multiple strategies included in Chapter 3 of Connect SoCal intended to support implementation of the regional Sustainable Communities Strategy (SCS) framed within the context of focusing growth near destinations and mobility options; promoting diverse housing choices; leveraging technology innovations; supporting implementation of sustainability policies; and promoting a Green Region. To view Connect SoCal and the accompanying technical reports, please visit the Connect SoCal webpage. Connect SoCal builds upon the progress from previous RTP/SCS cycles and continues to focus on integrated, coordinated, and balanced planning for land use and transportation that helps the SCAG region strive towards a more sustainable region, while meeting statutory requirements pertinent to RTP/SCSs. These strategies within the regional context are provided as guidance for lead agencies such as local jurisdictions when the proposed project is under consideration.

DEMOGRAPHICS AND GROWTH FORECASTS

A key, formative step in projecting future population, households, and employment through 2045 for Connect SoCal was the generation of a forecast of regional and county level growth in collaboration with expert demographers and economists on Southern California. From there, jurisdictional level forecasts were ground-truthed by subregions and local agencies, which helped SCAG identify opportunities and barriers to future development. This forecast helps the region understand, in a very general sense, where we are expected to grow, and allows SCAG to focus attention on areas that are experiencing change and may have increased transportation needs. After a year-long engagement effort with all 197 jurisdictions one-on-one, 82 percent of SCAG's 197 jurisdictions provided feedback on the forecast of future growth for Connect SoCal. SCAG also sought feedback on potential sustainable growth strategies from a broad range of stakeholder groups – including local jurisdictions, county transportation commissions, other partner agencies, industry groups, community-based organizations, and the general public. Connect SoCal utilizes a bottom-up approach in that total projected growth for each jurisdiction reflects feedback received from jurisdiction staff, including city managers, community development/planning directors, and local staff. Growth at the neighborhood level (i.e., transportation analysis zone (TAZ) reflects entitled projects and adheres to current general and specific plan maximum densities as conveyed by jurisdictions (except in cases where entitled projects and development agreements exceed these capacities as calculated by SCAG). Neighborhood level growth projections also feature strategies that help to reduce greenhouse gas emissions (GHG) from automobiles and light trucks to achieve Southern California's GHG reduction target, approved by the California Air Resources Board (CARB) in accordance with state planning law. Connect SoCal's Forecasted Development Pattern is utilized for long range modeling purposes and does not supersede actions taken by elected bodies on future development, including entitlements and development agreements. SCAG does not have the authority to implement the plan -- neither through decisions about what type of development is built where, nor what transportation projects are ultimately built, as Connect

SoCal is adopted at the jurisdictional level. Achieving a sustained regional outcome depends upon informed and intentional local action. To access jurisdictional level growth estimates and forecasts for years 2016 and 2045, please refer to the Connect SoCal Demographics and Growth Forecast Technical Report. The growth forecasts for the region and applicable jurisdictions are below.

	Adopted SCAG Region Wide Forecasts				Adopted County of Los Angeles Forecasts			
	Year 2020	**Year 2030**	**Year 2035**	**Year 2045**	**Year 2020**	**Year 2030**	**Year 2035**	**Year 2045**

MITIGATION MEASURES

SCAG staff recommends that you review the Final Program Environmental Impact Report (Final PEIR) for Connect SoCal for guidance, as appropriate. SCAG's Regional Council certified the PEIR and adopted the associated Findings of Fact and a Statement of Overriding Considerations (FOF/SOC) and Mitigation Monitoring and Reporting Program (MMRP) on May 7, 2020 and also adopted a PEIR Addendum and amended the MMRP on September 3, 2020 (please see the PEIR webpage and scroll to the bottom of the page for the PEIR Addendum). The PEIR includes a list of project-level performance standards-based mitigation measures that may be considered for adoption and implementation by lead, responsible, or trustee agencies in the region, as applicable and feasible. Project-level mitigation measures are within responsibility, authority, and/or jurisdiction of project-implementing agency or other public agency serving as lead agency under CEQA in subsequent project- and site- specific design, CEQA review, and decision-making processes, to meet the performance standards for each of the CEQA resource categories.

Subject: Notice of Preparation of a Draft Environmental Impact Report for the Silver Lake Reservoir Complex Master Plan Project, SCH #2022010055, City of Los Angeles, Los Angeles County

Dear Shilpa Gupta:

The California Department of Fish and Wildlife (CDFW) has reviewed a Notice of Preparation (NOP) of Draft Environmental Impact Report (DEIR) from the City of Los Angeles (City) for the Silver Lake Reservoir Complex Master Plan Project (Project). CDFW appreciates the opportunity to provide comments regarding aspects of the Project that could affect fish and wildlife resources and be subject to CDFW's regulatory authority under the Fish and Game Code.

CDFW's Role

CDFW is California's Trustee Agency for fish and wildlife resources and holds those resources in trust by statute for all the people of the State [Fish & G. Code, §§ 711.7, subdivision (a) & 1802; Pub. Resources Code, § 21070; California Environmental Quality Act (CEQA) Guidelines, § 15386, subdivision (a)]. CDFW, in its trustee capacity, has jurisdiction over the conservation, protection, and management of fish, wildlife, native plants, and habitat necessary for biologically sustainable populations of those species (Id., § 1802). Similarly, for purposes of CEQA, CDFW is charged by law to provide, as available, biological expertise during public agency environmental review efforts, focusing specifically on projects and related activities that have the potential to adversely affect State fish and wildlife resources.

CDFW is also submitting comments as a Responsible Agency under CEQA (Pub. Resources Code, § 21069; CEQA Guidelines, § 15381). CDFW expects that it may need to exercise regulatory authority as provided by the Fish and Game Code, including lake and streambed alteration regulatory authority (Fish & G. Code, § 1600 *et seq*.). Likewise, to the extent implementation of the Project as proposed may result in "take", as defined by State law, of any species protected under the California Endangered Species Act (CESA) (Fish & G. Code, § 2050 *et seq.*), or CESA-listed rare plant pursuant to the Native Plant Protection Act (NPPA; Fish & G. Code, § 1900 *et seq.*), CDFW recommends the Project proponent obtain appropriate authorization under the Fish and Game Code.

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

Project Description and Summary

Objective: The Project would redesign 116 acres of the 127-acre Silver Lake Reservoir Complex (Project area), which includes the existing out of service Silver Lake Reservoir and Ivanhoe Reservoir. The Project envisions a new park as a hybrid infrastructure that blends urban wilderness with human uses. The Project's themes are to provide a place for nature, wellness, community, children play, education, and water access. The Project would consist of seven park zones connected by a 2.5-mile tree-lined promenade. The seven park zones would consist of the following:

1) Ivanhoe Overlook: habitat terraces, wetland habitat islands in the Ivanhoe Reservoir, observation platforms, shade pavilion, sloped walk to water, and embankment enhancements;
2) Eucalyptus Grove: habitat terraces, overlook, seating terraces, and restored upland habitat;
3) Habitat Islands: wetland habitat islands in the Silver Lake Reservoir, fish introduction.
4) East and West Narrows: promenade, embankment enhancements, seating terraces, adult fitness circuit, and overlook;
5) South Valley: picnic area, expanded recreation center, new multi-purpose room, outdoor plaza and seating, basketball court, soccer field, and an expanded and renovated dog park;
6) Meadow: lawns, seating terraces, habitat terraces, kayak launch, walking paths, ornamental gardens, picnic grove, informal play, promenade, observation platforms, floating dock, and restrooms; and
7) Knoll: restored upland habitat, picnic grove, ornamental gardens, play area, environmental education center, and walking paths.

Location: The Project is located at the Silver Lake Reservoir Complex at 2300 Silver Lake Boulevard Los Angeles, CA 90039. The Project is in the Silver Lake neighborhood, which consists primarily of residential uses with some commercial areas, and some existing public access in and around the Silver Lake Reservoir Complex that allow park uses.

Comments and Recommendations

CDFW offers the comments and recommendations below to assist the City in adequately identifying, avoiding, and/or mitigating the Project's significant, or potentially significant, direct, and indirect impacts on fish and wildlife (biological) resources. The DEIR should provide adequate and complete disclosure of the Project's potential impacts on biological resources [Pub. Resources Code, § 21061; CEQA Guidelines, §§ 15003(i), 15151]. CDFW looks forward to commenting on the DEIR when it is available.

Specific Comments

1) Impacts of Recreation on Wildlife. The Project proposes to restore, create, and maximize habitat for wildlife (woodlands, scrublands, and wetlands), as well as provide public access and recreation opportunities throughout the Project area. The Project area currently provides nesting and breeding habitat for birds and raptors (see Comment #3). The Project area may support more wildlife after the Project is complete. CDFW supports the Project's goal to maximize habitat for wildlife, particularly wetland and aquatic habitat, which is

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

extremely rare within the City. However, CDFW is concerned that the Project's proposal to increase public access and create recreation opportunities that currently do not exist may result in disturbances to habitat and wildlife. The Project proposes new footpaths, trails, terraces, play areas, picnic areas, floating docks, and opportunities for fishing and kayaking. These opportunities could result in the following:

- Increased numbers of people and dogs;
- Increased area of influence;
- Increased noise levels;
- Increased lighting;
- Increased trash or pet waste;
- Increased wildlife injury and mortality through harassment and entanglement (e.g., fishing line, encroachment, approach);
- Introduction of unnatural food sources via trash and trash receptacles;
- Habitat encroachment and disturbance; and,
- Loss of habitat due to erosion from non-official footpaths.

Recreation and increased human activities can have the following effects on wildlife:

- Non-consumptive recreation can lead to detrimental changes in animal behavior, reproduction, growth, and immune system function (Lucas 2020).
- Blue tit (*Cyanistes caeruleus*) nestlings near recreation facilities develop slower and fledge with low body mass and poor body condition (Remacha et al. 2016).
- Belding's savannah sparrow (*Passerculus sandwichensis beldingi*) is sensitive to pedestrian and vehicle traffic. An approaching distance of 3 meters and 2.8 meters during the pre-nesting and nesting season, respectively, alert Belding's savannah sparrows to take flight (Fernandez-Juricic et al. 2009).
- Being approached by a person may trigger a change in the behavior or physiological processes in a bird (e.g., flight responses or increased heart rate). Although these responses tend to be short in duration, they can have longer term effects as is the case of breeding birds being flushed from nests leaving eggs or chicks vulnerable to predation (Steven et al. 2011).
- Relatively 'low' impact activities such as walking or hiking can still have negative effects on birds (Steven et al. 2011).
- Increased noise may alter or mask the auditory signals required for information exchange in birds (Hillman et al. 2015).

The Project could result in energetic costs to wildlife, nest abandonment, reduced reproductive success, and reduced fitness. For example, Figure 5-2 in the Chapter 5 of the Master Plan depicts the 2.5-mile promenade going through the eucalyptus grove where red-tailed hawks (*Buteo jamaicensis*) have been documented to nest.

As such, CDFW recommends the City thoroughly analyze how the Project through increases in human activity, lighting, noise, and other anthropogenic effects may impact habitat, wildlife use of the Project area, and wildlife behavior (e.g., foraging, nesting). The assessment should include a study measuring and comparing pre- and post-Project activity types (e.g., fishing, kayaking), visitor use frequency, assess points, area of influence, level of lighting, ambient noise levels, trail routes, and trail width. The DEIR should discuss how

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

the Project would avoid and/or mitigate for the effects/impacts of recreation on habitat and wildlife. The DEIR should explain how proposed Project designs (e.g., fences, trail alignment, operation hours, lighting, access restriction, restriction of certain activities) would effectively avoid and/or mitigate for those effects/impacts. If the Project would have significant impacts on wildlife as a result of increased recreation, CDFW recommends the City provide measures to mitigate for those impacts below a level of significance. Mitigation may include avoiding known breeding and nursery sites for sensitive and special status species by restricting or modifying trails (e.g., dimensions, number of trails, spatial arrangement), access points, activity types (e.g., dog walking), and structures. CDFW also recommends appropriate setbacks from known breeding and nursery sites. An appropriate setback should consider the species (e.g., alert and flight initiation distances) and type and intensity of recreational use proposed.

2) Potential Impacts on Monarch Butterfly. According to the NOP and the Biological Resources Report for the Silver Lake Reservoir Complex Master Plan (GPA Consulting 2019), approximately 14 acres of eucalyptus woodland is located in the Project area. Eucalyptus trees could provide habitat for overwintering monarch butterfly (*Danaus plexippus* population 1 – California overwintering population; monarch).

   a) Protection Status: The western migratory monarch population that overwinters along the California coast has declined by more than 99 percent from an estimated four million butterflies just twenty years ago (CDFW 2022a; Marcum and Darst 2021). Habitat loss and fragmentation, including grove senescence, are among the primary threats to the population (Thogmartin et al. 2017). Given the precipitous decline, the monarch is currently slated to be listed in 2024 under the Endangered Species Act (CDFW 2022a). The monarch is included on CDFW's Terrestrial and Vernal Pool Invertebrates of Conservation Priority list and identified as a Species of Greatest Conservation Need in California's State Wildlife Action Plan (CDFW 2017; CDFW 2015). The monarch meets the CEQA definition of rare, threatened, or endangered species (CEQA Guidelines, § 15380). Impacts on monarchs may require a mandatory finding of significance because the Project may threaten to eliminate an animal community and/or substantially reduce the number or restrict the range of an endangered, rare, or threatened species (CEQA Guidelines, § 15065).

   b) Surveys. CDFW recommends the City retain a qualified biologist to assess the Project area for monarchs and overwintering habitat. A qualified biologist should survey the eucalyptus groves and other trees within the Project area that are suitable for overwintering monarchs. A qualified biologist should conduct multiple surveys for overwintering monarchs where potential overwintering habitat has been identified. Monitoring should be done as frequently as possible during the overwintering season (typically September 15 through March 1[1]) to capture changing distributions through the season and in response to storm events.

   c) Analysis and Disclosure. The DEIR should evaluate the Project's potential impact and cumulative impact on monarchs. The DEIR should assess impacts on monarchs as a result of the following: loss and reduction of overwintering habitat; loss or reduction of

[1] The overwintering period is the estimated timeframe when monarchs are likely present. The overwintering period could vary by location and should be determined in coordination with a qualified biologist.

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

nectar plants; altering overwintering habitat climatic conditions such as such as temperature, humidity, and wind; and use of pesticides to maintain the Project's proposed lawns, landscaping, and ornamental gardens. The DEIR should assess potential impacts on monarchs during Project construction and activities. In addition, the DEIR should assess potential impacts on monarchs under proposed Project conditions. New trails and overlooks could result increased anthropogenic disturbances that may alter overwintering habitat climatic conditions for monarchs (see Comment #1).

d) Mitigation. If the Project would have impacts on monarchs, the DEIR should include measures to first avoid and minimize impacts on monarchs and overwintering habitat. If the Project would result in loss of overwintering habitat, CDFW recommends the City provide compensatory mitigation so that there is no net loss of overwintering habitat. CDFW also recommends the City explore Project design alternatives (e.g., alignment of trails/promenade) that would avoid, reduce, or restrict disturbances to overwintering habitat (see Comment #1 and General Comment #5).

Mitigation for monarchs should be developed in consultation with a qualified biologist. CDFW recommends the City also consult the following resources to develop appropriate measures to mitigate for the Project's potential impacts on monarchs.

- Western Monarch Butterfly Conservation Plan (WAFWA 2019);
- Overwintering Site Management and Protection (Western Monarch Count 2022);
- Protecting California's Butterfly Groves (Xerces Society 2017);
- Managing Monarch Habitat in the West (Xerces Society 2021a);
- Pollinator-Friendly Native Plant Lists (Xerces Society 2021b);
- Monarch Butterfly Nectar Plant Lists for Conservation Plantings (Xerces Society 2018);
- Tropical Milkweed (Wheeler 2018); and,
- CDFW's Monarch Butterfly webpage (CDFW 2022a).

3) Nesting Birds. According to the Biological Resources Report for the Silver Lake Reservoir Complex Master Plan (GPA Consulting 2019), the Project area provides an important year-round resource for wildlife, especially for birds. The Project area provides nesting and breeding habitat for birds including great blue heron (*Ardea Herodias*), great horned owl (*Bubo virginianus*), northern mockingbird (*Mimus polyglottos*), and red-tailed hawk (*Buteo jamaicensis*).

a) Protection Status. Migratory nongame native bird species are protected by international treaty under the Federal Migratory Bird Treaty Act (MBTA) of 1918 (Code of Federal Regulations, Title 50, § 10.13). Sections 3503, 3503.5, and 3513 of the California Fish and Game Code prohibit take of all birds and their active nests including raptors and other migratory nongame birds (as listed under the Federal MBTA). It is unlawful to take, possess, or needlessly destroy the nest or eggs of any raptor.

b) Analysis and Disclosure. The Biological Resources Report for the Silver Lake Reservoir Complex Master Plan relies on bird surveys conducted in 2004, 2015, and 2018. In preparation of the DEIR, CDFW recommends the City retain a qualified biologist to conduct a recent nesting bird survey within the Project area (see General Comment #3f).

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

The DEIR should disclose species of nesting birds and raptors on site and location of nests based on a more recent survey in addition to survey results from 2004, 2015, and 2018. The DEIR should discuss the Project's potential impact on nesting birds and raptors. A discussion of potential impacts should include impacts that may occur during Project construction, ground-disturbing activities (e.g., mobilizing, staging, drilling, and excavating), and vegetation removal. In addition, the DEIR should discuss impacts that may occur under proposed Project conditions (see Comment #1). The DEIR should disclose whether the Project would remove any trees that have been documented to support nesting birds and raptors.

c) Avoidance. CDFW recommends that the DEIR include measures to fully avoid impacts on nesting birds and raptors. To the extent feasible, no Project-related construction, ground-disturbing activities (e.g., mobilizing, staging, drilling, and excavating), and vegetation removal should occur during the avian breeding season which generally runs from February 15 through September 15 (as early as January 1 for some raptors) to avoid take of birds, raptors, or their eggs. CDFW recommends that the City protect trees where great blue herons, red-tailed hawks, and owls nest.

d) Minimizing Potential Impacts. If impacts on nesting birds and raptors cannot be avoided, CDFW recommends the DEIR include measures to minimize impacts on nesting birds and raptors. Prior to starting ground-disturbing activities and vegetation removal, CDFW recommends a qualified biologist conduct nesting bird and raptor surveys to identify nests. The qualified biologist should establish no-disturbance buffers to minimize impacts on those nests. CDFW recommends a minimum 300-foot no-disturbance buffer around active bird nests. For raptors, the no-disturbance buffer should be expanded to 500 feet and 0.5 mile for special status species, if feasible. Project personnel, including all contractors working on site, should be instructed on the presence of nesting birds, area sensitivity, and adherence to no-disturbance buffers. Reductions in the buffer distance may be appropriate depending on the avian species involved, ambient levels of human activity, screening vegetation, or possibly other factors determined by a qualified biologist.

4) Bats. According to Appendix D in the Biological Resources Report for the Silver Lake Reservoir Complex Master Plan, the following species of bats may occur in the Project area: pallid bat (*Antrozous pallidus*); western mastiff bat (*Eumops perotis californicus*); hoary bat (*Lasiurus cinereus*); and big free-tailed bat (*Nyctinomops macrotis*). These four species of bats are designated as California Species of Special Concern (SSC).

a) Protection Status. Bats are considered non-game mammals and are afforded protection by State law from take and/or harassment (Fish & G. Code, § 4150; Cal. Code of Regs., § 251.1). In addition, some bats are considered SSC. CEQA provides protection not only for CESA-listed species, but for any species including but not limited to SSC which can be shown to meet the criteria for State listing. These SSC meet the CEQA definition of endangered, rare, or threatened species (CEQA Guidelines, § 15380). Take of SSC could require a mandatory finding of significance (CEQA Guidelines, § 15065).

b) Survey. In preparation of the DEIR, CDFW recommends the City retain a qualified bat specialist identify potential daytime, nighttime, wintering, and hibernation roost sites and conduct bat surveys within these areas (plus a 100-foot buffer as access allows) to

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

identify roosting bats and any maternity roosts. CDFW recommends using acoustic recognition technology to maximize detection of bats.

c) Analysis and Disclosure. The DEIR should discuss the Project's potential impact on bats and habitat supporting roosting bats. A discussion of potential impacts should include impacts that may occur during Project construction, ground-disturbing activities (e.g., mobilizing, staging, drilling, and excavating), and vegetation removal. In addition, a discussion should include impacts that may occur under proposed Project conditions (see Comment #1).

d) Avoidance and Minimization. If the Project would impact bats, CDFW recommends the DEIR include measures to avoid/minimize impacts on bats, roosts, and maternity roosts. The DEIR should incorporate mitigation measures in accordance with California Bat Mitigation Measures (Johnston et al. 2004).

5) Stream Delineation and Impact Assessment. CDFW recommends the DEIR include a stream delineation and analysis of impacts on any river, stream, or lake[2]. The delineation should be conducted pursuant to the USFWS wetland definition adopted by CDFW (Cowardin et al. 1979). Be advised that some wetland and riparian habitats subject to CDFW's authority may extend beyond the jurisdictional limits of the U.S. Army Corps of Engineers' Section 404 permit and Regional Water Quality Control Board Section 401 Certification. The DEIR should disclose the linear feet and acres of streams and associated plant communities impacted by the Project. Impacts may include channelizing or diverting streams, impairing a watercourse, erosion, and removing and degrading vegetation through habitat modification (e.g., loss of water source, encroachment, and edge effects leading to introduction of non-native plants). In addition, the DEIR should discuss whether the Project would require water diversion or dewatering during Project construction and for the Project's lifetime.

a) Mitigation. If the Project would impact streams, the City should provide measures to mitigate the Project's potential impacts on streams and associated plant communities. Mitigation may include avoiding impacts by establishing effective unobstructed vegetated buffers and setbacks adjoining streams and associated plant communities. If the City proposes buffers and setbacks as mitigation, the DEIR should include justification for the effectiveness of chosen buffer and setback distances to avoid impacts on the stream and associated plant communities. If avoidance is not feasible, the City should provide compensatory mitigation for impacts on streams and associated plant communities at no less than 2:1. The City should provide higher mitigation for impacts on sensitive plant communities (see General Comment #3a) and presence of rare, sensitive, or special status flora and fauna.

b) Fish and Game Code section 1602. CDFW exercises its regulatory authority as provided by Fish and Game Code section 1600 et seq. to conserve fish and wildlife resources

[2] "Any river, stream, or lake" includes those that are dry for periods of time (ephemeral/episodic) as well as those that flow year-round (perennial). This includes ephemeral streams, desert washes, and watercourses with a subsurface flow. It may also apply to work undertaken within the flood plain of a water body.

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

which includes rivers, streams, or lakes and associated natural communities. As a Responsible Agency under CEQA, CDFW has authority over activities in streams and/or lakes that will divert or obstruct the natural flow, or change the bed, channel, or bank (including vegetation associated with the stream or lake) of a river or stream or use material from a streambed. For any such activities, the project applicant (or "entity") must notify CDFW[3]. Accordingly, if the Project would impact streams, the DEIR should include a measure whereby the City would notify CDFW pursuant to Fish and Game Code section 1602 prior to starting activities that may impact streams. Please visit CDFW's Lake and Streambed Alteration Program webpage for more information (CDFW 2022b).

6) Use of Rodenticides. The Project proposes a planting design that incorporates ornamental gardens and lawns. Ornamental gardens and lawns may need to be managed via chemical methods. Herbicides, pesticides, and rodenticides may impact wildlife. Second generation anticoagulant rodenticides are known to have harmful effects on the ecosystem and wildlife. Assembly Bill 1788 prohibits the use of any second-generation anticoagulant rodenticides because second generation anticoagulant rodenticides have a higher toxicity and are more dangerous to nontarget wildlife such as mountain lions, bobcats, foxes, and coyotes (California Legislative Information 2020). CDFW recommends the DEIR include a discussion as to the Project's use of herbicides, pesticides, and second-generation anticoagulant rodenticides to maintain the Project's grounds in perpetuity. The DEIR should discuss when and where these chemicals would be used and what impacts those chemicals may have on habitat and wildlife. CDFW recommends the City prohibit the use of any second-generation anticoagulant rodenticides during Project implementation and for maintenance of the Silver Lake Reservoir Complex in perpetuity.

7) Wildlife Friendly Fencing. CDFW supports the use of wildlife-friendly fences for the Project. Wildlife-friendly fences should replace chain-link fencing to the maximum extent feasible because chain-link fencing could result in wildlife injury or mortality due to impalement and entanglement. Wildlife-friendly fences should be used and strategically placed in areas of high biological resources value to protect biological resources and habitat. For information wildlife-friendly fences, CDFW recommends A Landowner's Guide to Wildlife Friendly Fences (MFWP 2012).

8) Use of Native Plants and Trees. CDFW supports the use of native plants for the Project. CDFW strongly recommends avoiding non-native, invasive plants for landscaping and restoration, particularly any species listed as 'Moderate' or 'High' by the California Invasive Plant Council (Cal-IPC 2022). CDFW supports the use of native species found in naturally occurring plant communities within or adjacent to the Project area. In addition, CDFW supports planting species of trees, such as oaks (*Quercus* genus), and understory vegetation (e.g., ground cover, subshrubs, and shrubs) that create habitat and provide a food source for birds. CDFW recommends retaining any standing, dead, or dying tree (snags) where possible because snags provide perching and nesting habitat for birds and

[3] CDFW's issuance of a LSA Agreement for a project that is subject to CEQA will require CEQA compliance actions by CDFW as a Responsible Agency. As a Responsible Agency, CDFW may consider the environmental document of the local jurisdiction (lead agency) for the project. To minimize additional requirements by CDFW pursuant to section 1600 et seq. and/or under CEQA, the environmental document should fully identify the potential impacts to the stream or riparian resources and provide adequate avoidance, mitigation, monitoring, and reporting commitments for issuance of the LSA Agreement.

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

raptors. Finally, CDFW supports planting species of vegetation with high insect and pollinator value.

9) Prohibit the Use of Drones. To protect wildlife and habitat when the Project is fully built-out, CDFW recommends the City prohibit the use of drones in the Silver Lake Reservoir Complex. Drones disrupt wildlife and could affect bird breeding and nesting behavior, potentially resulting in loss of fertile eggs and nestlings. CDFW recommends the City install educational materials and signage prohibiting the use of drones and educating the public about the impacts drones can have on wildlife and habitats.

General Comments

1) Disclosure. The DEIR should provide an adequate, complete, and detailed disclosure about the effect which a proposed project is likely to have on the environment (Pub. Resources Code, § 20161; CEQA Guidelines, § 15151). Adequate disclosure is necessary so CDFW may provide comments on the adequacy of proposed avoidance, minimization, or mitigation measures, as well as to assess the significance of the specific impact relative to plant and wildlife species impacted (e.g., current range, distribution, population trends, and connectivity).

2) Mitigation Measures. Public agencies have a duty under CEQA to prevent significant, avoidable damage to the environment by requiring changes in a project through the use of feasible alternatives or mitigation measures [CEQA Guidelines, §§ 15002(a)(3), 15021]. Pursuant to CEQA Guidelines section 15126.4, an environmental document "shall describe feasible measures which could mitigate for impacts below a significant level under CEQA."

   a) Level of Detail. Mitigation measures must be feasible, effective, implemented, and fully enforceable/imposed by the lead agency through permit conditions, agreements, or other legally binding instruments (Pub. Resources Code, § 21081.6(b); CEQA Guidelines, § 15126.4). A public agency "shall provide the measures that are fully enforceable through permit conditions, agreements, or other measures" (Pub. Resources Code, § 21081.6). CDFW recommends the City provide mitigation measures that are specific, detailed (i.e., responsible party, timing, specific actions, location), and clear in order for a measure to be fully enforceable and implemented successfully via a mitigation monitoring and/or reporting program (Pub. Resources Code, § 21081.6; CEQA Guidelines, § 15097).

   b) Disclosure of Impacts. If a proposed mitigation measure would cause one or more significant effects, in addition to impacts caused by the proposed Project, the DEIR should include a discussion of the effects of proposed mitigation measures [CEQA Guidelines, § 15126.4(a)(1)]. In that regard, the DEIR should provide an adequate, complete, and detailed disclosure about the Project's proposed mitigation measure(s). Adequate disclosure is necessary so CDFW may assess the potential impacts of proposed mitigation measures.

3) Biological Baseline Assessment. An adequate biological resources assessment should provide a complete assessment and impact analysis of the flora and fauna within and adjacent to the Project area and where the Project may result in ground disturbance. The assessment and analysis should place emphasis on identifying endangered, threatened,

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

rare, and sensitive species; regionally and locally unique species; and sensitive habitats. An impact analysis will aid in determining the Project's potential direct, indirect, and cumulative biological impacts, as well as specific mitigation or avoidance measures necessary to offset those impacts. CDFW also considers impacts to an SSC a significant direct and cumulative adverse effect without implementing appropriate avoidance and/or mitigation measures. The DEIR should include the following information:

a) Information on the regional setting that is critical to an assessment of environmental impacts, with special emphasis on resources that are rare or unique to the region [CEQA Guidelines, § 15125(c)]. The DEIR should include measures to fully avoid and otherwise protect Sensitive Natural Communities. CDFW considers Sensitive Natural Communities as threatened habitats having both regional and local significance. Natural communities, alliances, and associations with a State-wide rarity ranking of S1, S2, and S3 should be considered sensitive and declining at the local and regional level. These ranks can be obtained by visiting the Vegetation Classification and Mapping Program - Natural Communities webpage (CDFW 2022c);

b) A thorough, recent, floristic-based assessment of special status plants and natural communities following CDFW's Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities (CDFW 2018). Adjoining habitat areas should be included where the Project's construction and activities could lead to direct or indirect impacts off site;

c) Floristic alliance- and/or association-based mapping and vegetation impact assessments conducted in the Project area and within adjacent areas. The Manual of California Vegetation (MCV), second edition, should also be used to inform this mapping and assessment (Sawyer et al. 2009). Adjoining habitat areas should be included in this assessment where the Project's construction and activities could lead to direct or indirect impacts off site;

d) A complete and recent assessment of the biological resources associated with each habitat type in the Project area and within adjacent areas. CDFW's California Natural Diversity Database in Sacramento should be contacted to obtain current information on any previously reported sensitive species and habitat (CDFW 2022d). An assessment should include a minimum nine-quadrangle search of the CNDDB to determine a list of species potentially present in the Project area. A lack of records in the CNDDB does not mean that rare, threatened, or endangered plants and wildlife do not occur. Field verification for the presence or absence of sensitive species is necessary to provide a complete biological assessment for adequate CEQA review [CEQA Guidelines, § 15003(i)];

e) A complete, recent, assessment of endangered, rare, or threatened species and other sensitive species within the Project area and adjacent areas, including SSC and California Fully Protected Species (Fish & G. Code, §§ 3511, 4700, 5050, and 5515). Species to be addressed should include all those which meet the CEQA definition of endangered, rare, or threatened species (CEQA Guidelines, § 15380). Seasonal variations in use of the Project area should also be addressed such as wintering, roosting, nesting, and foraging habitat. Focused species-specific surveys, conducted at the appropriate time of year and time of day when the sensitive species are active or otherwise identifiable, may be required if suitable habitat is present. See CDFW's Survey

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

and Monitoring Protocols and Guidelines for established survey protocol for select species (CDFW 2022d). Acceptable species-specific survey procedures may be developed in consultation with CDFW and USFWS; and,

f) A recent wildlife and rare plant survey. CDFW generally considers biological field assessments for wildlife to be valid for a one-year period, and assessments for rare plants may be considered valid for a period of up to three years. Some aspects of the proposed Project may warrant periodic updated surveys for certain sensitive taxa, particularly if Project implementation build out could occur over a protracted time frame or in phases.

4) Biological Direct, Indirect, and Cumulative Impacts. The DEIR should provide a thorough discussion of direct, indirect, and cumulative impacts expected to adversely affect biological resources with specific measures to offset such impacts. The DEIR should address the following:

a) A discussion regarding Project-related indirect impacts on biological resources, including resources in nearby public lands, open space, adjacent natural habitats, riparian ecosystems, and any designated and/or proposed or existing reserve lands [e.g., preserve lands associated with a Natural Community Conservation Plan (Fish & G. Code, § 2800 et. seq.)]. Impacts on, and maintenance of, wildlife corridor/movement areas, including access to undisturbed habitats in areas adjacent to the Project, should be fully analyzed and discussed in the DEIR;

b) A discussion of both the short-term and long-term effects of the Project on species population distribution and concentration, as well as alterations of the ecosystem supporting those species impacted [CEQA Guidelines, § 15126.2(a)];

c) A discussion of potential adverse impacts from lighting, noise, temporary and permanent human activity, and exotic species, and identification of any mitigation measures;

d) A discussion of post-Project fate of drainage patterns, surface flows, and soil erosion and/or sedimentation in streams and water bodies. The discussion should also address the potential water extraction activities and the potential resulting impacts on habitat (if any) supported by the groundwater. Measures to mitigate such impacts should be included;

e) An analysis of impacts from proposed changes to land use designations and zoning, and existing land use designation and zoning located nearby or adjacent to natural areas that may inadvertently contribute to wildlife-human interactions. A discussion of possible conflicts and mitigation measures to reduce these conflicts should be included in the DEIR; and,

f) A cumulative effects analysis as described under CEQA Guidelines section 15130. General and specific plans, as well as past, present, and anticipated future projects, should be analyzed relative to their impacts on similar plant and wildlife species, habitat, and natural communities. If the City determines that the Project would not have a cumulative impact, the DEIR should indicate why the cumulative impact is not significant. The City's determination should be supported by facts and analyses [CEQA Guidelines,

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

§ 15130(a)(2)].

5) Project Description and Alternatives. To enable adequate review and comment on the proposed Project from the standpoint of the protection of fish, wildlife, and plants, CDFW recommends the following information be included in the DEIR:

   a) A complete discussion of the purpose and need for, and description of the proposed Project;

   b) Pursuant to CEQA Guidelines section 15126.6(a), an environmental document "shall describe a reasonable range of potentially feasible alternatives to the Project, or to the location of the Project, which would feasibly attain most of the basic objectives of the Project but would avoid or substantially lessen any of the significant effects of the Project." CEQA Guidelines section 15126.6(f)(2) states if the lead agency concludes that no feasible alternative locations exist, it must disclose the reasons for this conclusion; and,

   c) A range of feasible alternatives to the Project location to avoid or otherwise minimize direct and indirect impacts on sensitive biological resources and wildlife movement areas. CDFW recommends the City select Project designs and alternatives that would avoid or otherwise minimize direct and indirect impacts on biological resources. CDFW also recommends the City consider establishing appropriate setbacks from sensitive and special status biological resources. Setbacks should not be impacted by ground disturbance or hydrological changes from any future Project-related construction, activities, maintenance, and development. As a general rule, CDFW recommends reducing or clustering a development footprint to retain unobstructed spaces for vegetation and wildlife and provide connections for wildlife between properties and minimize obstacles to open space.

      Project alternatives should be thoroughly evaluated, even if an alternative would impede, to some degree, the attainment of the Project objectives or would be more costly (CEQA Guidelines, § 15126.6). The DEIR "shall" include sufficient information about each alternative to allow meaningful evaluation, public participation, analysis, and comparison with the proposed Project (CEQA Guidelines, § 15126.6).

   d) Where the Project may impact aquatic and riparian resources, CDFW recommends the City select Project designs and alternatives that would fully avoid impacts to such resources. CDFW also recommends an alternative that would not impede, alter, or otherwise modify existing surface flow, watercourse and meander, and water-dependent ecosystems and natural communities. Project designs should consider elevated crossings to avoid channelizing or narrowing of watercourses. Any modifications to a river, creek, or stream may cause or magnify upstream bank erosion, channel incision, and drop in water level and cause the watercourse to alter its course of flow.

6) Data. CEQA requires that information developed in environmental impact reports be incorporated into a database which may be used to make subsequent or supplemental environmental determinations [Pub. Resources Code, § 21003, subd. (e)]. Accordingly, please report any special status species and natural communities detected by completing and submitting CNDDB Field Survey Forms (CDFW 2022e). To submit information on special status native plant populations and sensitive natural communities, the Combined

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

Rapid Assessment and Releve Form should be completed and submitted to CDFW's Vegetation Classification and Mapping Program (CDFW 2022f). The City should ensure data collected for the preparation of the DEIR be properly submitted, with all data fields applicable filled out.

7) Translocation/Salvage of Plants and Animal Species. Translocation and transplantation is the process of removing plants and wildlife from one location and permanently moving it to a new location. CDFW generally does not support the use of translocation or transplantation as the primary mitigation strategy for unavoidable impacts to endangered, rare, or threatened plants and animals. Studies have shown that these efforts are experimental and the outcome unreliable. CDFW has found that permanent preservation and management of habitat capable of supporting these species is often a more effective long-term strategy for conserving plants and animals and their habitats.

8) Compensatory Mitigation. The DEIR should include compensatory mitigation measures for the Project's significant direct and indirect impacts to sensitive and special status plants, animals, and habitats. Mitigation measures should emphasize avoidance and minimization of Project-related impacts. For unavoidable impacts, on-site habitat restoration or enhancement should be discussed in detail. If on-site mitigation is not feasible or would not be biologically viable and therefore inadequate to mitigate the loss of biological functions and values, off-site mitigation through habitat creation and/or acquisition and preservation in perpetuity should be addressed. Areas proposed as mitigation lands should be protected in perpetuity with a conservation easement and financial assurance and dedicated to a qualified entity for long-term management and monitoring. Under Government Code, section 65967, the Lead Agency must exercise due diligence in reviewing the qualifications of a governmental entity, special district, or nonprofit organization to effectively manage and steward land, water, or natural resources on mitigation lands it approves.

9) Long-term Management of Mitigation Lands. For proposed preservation and/or restoration, the DEIR should include measures to protect the targeted habitat values from direct and indirect negative impacts in perpetuity. The objective should be to offset Project-induced qualitative and quantitative losses of wildlife habitat values. Issues that should be addressed include (but are not limited to) restrictions on access, proposed land dedications, monitoring and management programs, control of illegal dumping, water pollution, and increased human intrusion. An appropriate non-wasting endowment should be set aside to provide for long-term management of mitigation lands.

10) CESA. CDFW considers adverse impacts to a species protected by CESA to be significant without mitigation under CEQA. As to CESA, take of any endangered, threatened, candidate species, or CESA-listed plant species that results from a project is prohibited, except as authorized by State law (Fish & G. Code §§ 2080, 2085; Cal. Code Regs., tit. 14, §786.9). Consequently, if a project and any project-related activity during the life of a project will result in take of a species designated as endangered or threatened, or a candidate for listing under CESA, CDFW recommends that the project proponent seek appropriate take authorization under CESA prior to implementing the project. Appropriate authorization from CDFW may include an Incidental Take Permit (ITP) or a Consistency Determination in certain circumstances, among other options [Fish & Game Code, §§ 2080.1, 2081, subds. (b) and (c)]. Early consultation is encouraged, as significant modification to the project and mitigation measures may be required to obtain an ITP. Revisions to the Fish and Game

DocuSign Envelope ID: B17AF2C5-6E17-4FB4-9FE2-EE0B53AA7D27

Code, effective January 1998, may require that CDFW issue a separate CEQA document for the issuance of an ITP unless the project's CEQA document addresses all project impacts to CESA-listed species and specifies a mitigation monitoring and reporting program that will meet the requirements of an ITP. For these reasons, biological mitigation monitoring and reporting proposals should be of sufficient detail and resolution to satisfy the requirements for an ITP.

11) Wetland Resources. CDFW, as described in Fish and Game Code section 703(a), is guided by the Fish and Game Commission's (Commission) policies. The Wetlands Resources policy the Commission "…seek[s] to provide for the protection, preservation, restoration, enhancement and expansion of wetland habitat in California" (CFGC 2020). Further, it is the policy of the Fish and Game Commission to strongly discourage development in or conversion of wetlands. It opposes, consistent with its legal authority, any development or conversion that would result in a reduction of wetland acreage or wetland habitat values. To that end, the Commission opposes wetland development proposals unless, at a minimum, project mitigation assures there will be 'no net loss' of either wetland habitat values or acreage. The Commission strongly prefers mitigation which would achieve expansion of wetland acreage and enhancement of wetland habitat values."

    a) The Wetlands Resources policy provides a framework for maintaining wetland resources and establishes mitigation guidance. CDFW encourages avoidance of wetland resources as a primary mitigation measure and discourages the development or type conversion of wetlands to uplands. CDFW encourages activities that would avoid the reduction of wetland acreage, function, or habitat values. Once avoidance and minimization measures have been exhausted, a project should include mitigation measures to assure a "no net loss" of either wetland habitat values, or acreage, for unavoidable impacts to wetland resources. Conversions include, but are not limited to, conversion to subsurface drains, placement of fill or building of structures within the wetland, and channelization or removal of materials from the streambed. All wetlands and watercourses, whether ephemeral, intermittent, or perennial, should be retained and provided with substantial setbacks, which preserve the riparian and aquatic values and functions benefiting local and transient wildlife populations. CDFW recommends mitigation measures to compensate for unavoidable impacts be included in the DEIR and these measures should compensate for the loss of function and value.

    b) The Fish and Game Commission's Water policy guides CDFW on the quantity and quality of the waters of this State that should be apportioned and maintained respectively so as to produce and sustain maximum numbers of fish and wildlife; to provide maximum protection and enhancement of fish and wildlife and their habitat; encourage and support programs to maintain or restore a high quality of the waters of this State; prevent the degradation thereof caused by pollution and contamination; and, endeavor to keep as much water as possible open and accessible to the public for the use and enjoyment of fish and wildlife. CDFW recommends avoidance of water practices and structures that use excessive amounts of water, and minimization of impacts that negatively affect water quality, to the extent feasible (Fish & G. Code, § 5650).

	COMMENT	RESPONSE
I-1-1	What thoughts have been given to future droughts/climate crisis & allowing Silver Lake to become a reflecting pool 'lake' but also reserve water storage beneath 'Silver Lake'	
I-1-2	Wetlands - nice idea, what about insects and other disease carrying vermin.	

I-2

COMMENT RESPONSE

I'm very excited to see the plans to transform Silver Lake into a public park; there are some things I would love to see in the final project.

I-2-1 Please consider adding a boardwalk with cafes or restaurants to make the area even more of a destination.

Please consider a swimming area and a kayak or boat rental where the public can relax on the water.

I-2-2 Please consider maximizing the use of native plants in all landscaping. There are still too many non-native plants (particularly trees) being considered in the palettes for the master plan. An aroma garden featuring Southern California would be a great addition. This will help Silver Lake realize its full potential as habitat for surrounding wildlife.

I-2-3 Lastly this may be out of the scope, but please consider upzoning the area around the park so that more people can enjoy Silver Lake by walking or cycling to it.

I-3

COMMENT	RESPONSE
YAaaaaaaHooooo!!!!!! So. Excited. Thank you!	

I-4

COMMENT

RESPONSE

Very pleased to see this ambitious project moving forward. The reservoir is one of LA's jewels, but its potential as a recreational center, park, sports field and walk/running path has been overlooked for far too long.
The pandemic has shown there is a massive demand for attractive outside spaces in the city and I am happy to see so many people taking advantage of the current walking path around the reservoir and the meadow.
But, the reservoir is still massively under utilised and the masterplan demonstrates how this resource can be improved exponentially to make full use of the water and surrounding land.

I-5

COMMENT

RESPONSE

Just a quick comment that I'm strongly in favor of the proposed master plan, and am very excited about the increased recreation area. I take my kids to the rec center nearly every single day, and I think the proposed changes are exciting for us (and the community).

I-6

COMMENT RESPONSE

I-6-1 I am highly disturbed, that through the whole process so far, no one is willing to talk about additional traffic and parking these changes will bring to the area. This needs to be a MAJOR focus to the EIR!

I live near the south end of the lake and the changes planned for the Rec Center, et all, will create a nightmare for Van Pelt St. which is very narrow.

I-6-2 I am not in favor of the "floating islands". There should be NOTHING in the water!

Please take all the time needed for a thorough report and consider the views of LOCALS.

I-7

COMMENT RESPONSE

As a resident of the neighborhood and an advocate for a better Los Angeles, I am in very strong support of the city's efforts to increase the amount of green / park space in a city relatively deprived of such critical pieces of civic identity. I experience the reservoir as a pedestrian at least 4 times a week and I would love for the entire area to be more park-like and accessible to those in the neighborhood AND those who aren't hyperlocal to Silver Lake. Sadly, the discontinuation of metro bus 201 has eliminated any means of efficient, car-free access to what could be one of LA's
I-7-2 greatest environmental attractions, I would hope the city can explore mobility options for greater access to the park that don't involve personal automobiles. Personally, I'm not one that will complain about lack of parking (I can walk to the reservoir) but I understand the issue of parking to be very sensitive to the neighborhood, especially for those residents closest to the reservoir.

Additionally, I'd like to see even a small retail space within the park that could act like Echo Park Lake's cafe. Even a small spot in the park could be a huge attraction with the right tenant. Ideally, the cafe structure would be provided "rent-free" where
I-7-1 the proportionate amount of overhead dedicated to "rent" could otherwise be directed back to the city for improvements in the park and the surrounding neighborhood.

Regardless, the proposed master plan looks like a tremendous improvement to imprisoned space and I very much look forward to one day being beyond the chainlink fence.

I-8

	COMMENT	RESPONSE
I-8-1	Please do not expand the dog park. Nothing grows there- replacing green space with bare ground increases the temperature and encroaches on the habitat of native animals. Dogs can be walked around the parks and neighborhoods. Or maybe there is a way to have more native plants in the dog park?	

I-9

COMMENT RESPONSE

I-9-1	Until we have the homeless situation handled (to relocate all the homeless encampments out of silverlake and institute straight NO homeless camping laws), I would vote NO to this plan.

I-10

COMMENT RESPONSE

I-10-2 I oppose the proposed kayak launch, ornamental gardens, picnic grove, habitat islands, restroom and education center. They will bring more traffic, trash, and maintenance problems to the reservoir and adjacent neighborhood. The reservoir

I-10-1 currently suffers from: people running/walking in the street, oblivious to cars thereby endangering themselves; a flooded walking path after rain, causing people to walk in the street; plants that need trimming, watering, weeding and removal; trash and

I-10-5 person's possessions (?) hidden in bushes; dogs in the meadow and on the walking path off leash; a traffic increase as visitors search for parking, pull U-turns, and double park. Since these unaddressed problems exist currently, the recreational attractions of the Master Plan will increase these negative impacts to our reservoir

I-10-3 neighborhood. What provisions have been incorporated in the Plan to forestall these problems? The layout of the reservoir's streets, sidewalks, and small open spaces were not created to be a city park offering amenities to an extensive population. The master plan ignores the needs of the surrounding neighbors who need to enter

I-10-4 and exit these streets. Already to exit Silverlake one has to add significant time to one's schedule to safely flow through cars, bikes, and pedestrians. The money needed to execute the Plan should be spent on neighborhoods who have less access to parks, recreation, educational and healthful facilities.

I-11

COMMENT RESPONSE

Dear City of Los Angeles Department of Public Works, Bureau of Engineering c/o ESA-Nicolle Steiner,

I am a homeowner and resident in very close proximity to the Silver Lake complex. I am in favor of this well thought out, environmentally friendly and well-designed redevelopment plan of the complex.

I-11-1 I understand it is more frequent to see complaints or objections to city plans like this. However, I wanted to share positive, encouraging and appreciative note with you for this plan. I hope it can be realized and enjoyed by our residence and community sooner than later.

Thank you for your work on this much anticipated redevelopment of our beloved Silver Lake Complex.

Sincerely,
Adam Zuckert

I-12

COMMENT RESPONSE

Hi, as a resident directly adjacent to the reservoir for over 15 years I have grave

I-12-1 concerns about the parking impact this is going to have. Even just since the pandemic the trail use has increased so much we all struggle with finding parking for our own vehicles. I'm also very much opposed to the idea of putting shade pavilions

I-12-2 on the Ivanhoe reservoir. I feel like this is going to take away from the natural scenic beauty of the trees and nature. If we must live with this massive expansion is it really necessary to impact our natural views as well as the park like nature of the area? Feels like the whole thing is headed in a theme park direction instead of

I-12-3 improving the natural space. Same thoughts on the community center and I worry about the impact of kayaking, as well as who is going to be responsible for safety.

Thanks for your time.

I-13

COMMENT RESPONSE

The Knoll provides most of the protected wildlife land habitat that the Complex provides. However, the MP calls for the regrading and development of portions of the Knoll and the severe reduction of its open green space. The

I-13-1 Educational/Community Meeting building that necessitates this grading would

I-13-2 replace wide areas of wildlife habitat and duplicates existing space in the Recreation Center and in the public schools. It goes without saying, wildlife, its habitat and the community must be protected.

I-14

COMMENT RESPONSE

I-14-1 Please don't remove the protective fencing-it would create another homeless encampment such as the one that was recently taken down in Echo Park. We have an urban oasis for wild life which includes many migratory birds why destroy more instead of protecting what we have.

I-15

COMMENT RESPONSE

I-15-1 I live across the street from the Meadow. These plans do not reflect WHERE parking is going to be provided for all of this recreational activity planned at the Reservoir. I have brought this concern up before several times, and no adequate answer has been given. Also, will hours be enforced for these activities? Living across from the meadow right now, there are people that use it as a business for their bootcamp workout classes, it sucks to be awoken to groups of people shouting, and amplified music blaring at 6:30 am on weekends. It's inconsiderate to wake neighbors up like this, and there's been no signage let alone enforcement by the SL Recreation Center.

I-15-2

I-15-3

I-15-4 Live music occurs after dark in the Meadow. Is this permitted? There's trash everywhere in the Meadow the morning after. Issues like this need addressing. Now. Before you turn this reservoir into an amusement park!

I-16

	COMMENT	RESPONSE
I-16-1	I did not see parking addressed. Will there be a new lot?	

I-17

COMMENT RESPONSE

I-17-1 I think it looks great, especially the habitat restoration areas. I think making non vehicular access to the reservoir safe from surrounding neighborhoods should be considered- bike paths and bike racks. Parking is always an issue but safe bike lanes from Atwater, Echo Park etc... would be helpful!

I-18

COMMENT RESPONSE

I-18-1
I-18-4
I-18-2
I-18-3

1. Fencing with gates to protect the wildlife.
2. Do not develop the Knoll, and give wildlife the green space
3. Minimize development, minimize destruction, and minimize noise and pollution during any construction

I-19

COMMENT RESPONSE

I-19-1 Please protect our wildlife by not taking down the fence that protects them. I live right here and the traffic and population toll on the environment will be so destructive to all we hold dear.

I-20

COMMENT RESPONSE

I-20-1

LOVE the new plan for Silver Lake Reservoir and am excited to utilize the new areas you're building around the lake.

Can we please have a few areas that are friendly to dogs on leash? Right now the choice is no dogs allowed at all, or the dog park.

People like to picnic or sit down with their dogs. Can we please have a few green spaces set up like Barnsdall Park, where you can bring your dog alongside you but it's not a dog park situation?

Thanks,
Mara Kuge

I-21

	COMMENT	RESPONSE
I-21-1	Fill the lake with water and leave it the way it is!	

I-22

	COMMENT	RESPONSE
I-22-1	Please leave the lake with water and leave it as it is.	

I-23

COMMENT RESPONSE

Hello my name is Dorrie Hall and as a resident who has lived in Silverlake for over 20 years I would like to make known the following aspects of the Master Plans for the Silver Lake reservoir which I believe would negatively impact the health, safety and overall wellbeing of wildlife, as well as for human beings.

I am opposed to removing the perimeter fencing or lowering it and thereby allowing nighttime human activity. I believe such action would disturb the existence of wildlife particularly when they are most active. A permanent perimeter fencing with gates would provide safety, security and daylight access for people while allowing wildlife their natural existence in a round the clock undisturbed environment.

I-23-1 Additionally I am opposed to development on the Knoll. We need to keep more green space for the protection of wildlife. The Master Plan requires regrading and development of portions of the Knoll that would reduce its wide open green space. The Educational/Community Meeting building requires this same grading and would replace areas of wildlife habitat unnecessarily duplicating an already existing community space for educational purposes in the Recreation Center and in the public schools.

I-23-2

Construction in and around the reservoir has occurred in our community for years. The Reservoir at one point even lost the herons that had nested within it for that very reason. Finally as a neighborhood the Master Plan will cause disruptions on our community that could last years which and includes noise, traffic and air quality.

I-23-3

I hope you will consider these concerns for the future of our reservoir, it's inhabitants and the community that values it. Thank you.

Dorrie Hall
2455 Moreno Dr.
Silverlake

I-24

COMMENT

RESPONSE

I-24-1

I live close to the Silver Lake Reservoir. Im an avid bird watcher and love photographing wildlife. I am concerned that development of the knoll area will take away what little wild space there is left for wildlife. What I love most about living in Silver Lake is the opportunity to see wildlife and walk around the reservoir area. If we lessen the areas for wildlife they will roam elsewhere and become more of a nuisance to the community. I am frequently reading stories on Next Door of coyotes having a den under someone's porch or following them when they walk their dog. This will continue to happen as coyotes are a part of our ecosystem. However, let's not take away from what little "wild" space wildlife has in our community. Let's not push them to move elsewhere.

A secondary concern I have is that taking away fencing will also interfere with wildlife. Attached are some photos I've taken early in the morning of coyotes behind the fenced area. There is plenty of opportunity for viewing wildlife and appreciating the reservoir area with the fencing there. An alternative would be gates like they have at the nearby Rowena Reservoir which is currently waterless. We are loosing so many resources for wildlife in our community.

Thirdly, I am concerned about human access being allowed in the evening. Wildlife such as coyotes, raccoons, skunks, and possoms are most active at night. Let's let them do their thing. Furthermore, it feels unsafe having people inside Silver Lake Resevoir area at night.

Additionally, if fish are introduced, I hope fishing will not be allowed. It would be a shame to see fishing lines left as so often is the case at Echo Park Lake. This is very dangerous for birds that visit the reservoir. There is so much wonderful aquatic bird life to appreciate at the reservoir.

The Silver Lake Reservoir is such a beloved part of our community. Let's keep it safe and clean and respect our environment by keeping the needs of wildlife in mind.

As development is happening rapidly in the Silver Lake area we are surrounded by construction and the removal of trees. Let's not have more of this at the reservoir. I love Silver Lake because we are a conscientious community. Let's respect the wildlife nearby us by not developing the Knoll, keeping fencing up around the reservoir, not allowing fishing or evening access for humans.

RESPONSE

I-24

COMMENT

RESPONSE

I-24

COMMENT

RESPONSE

I-25

	COMMENT	RESPONSE
I-25-1	Love the plans for the silverlake reservoir renovations.	

I-26

	COMMENT	RESPONSE
I-26-2	How do we keep the criminals and homeless out?	
I-26-1	Are these areas secluded? Are they locked up at night?	

I-27

	COMMENT	RESPONSE
I-27-1	Leave it alone ! We don’t need a ridiculous park ! Go away	

I-28

COMMENT RESPONSE

I-28-1 I have a lot of concerns about the wildlife that currently thrives in the reservoir area. The fence is really important to helping keeping wildlife safe there, and major construction and alteration to this area will significantly negatively impact the animals that live there now. The fact that the reservoir area is going to be developed is depressing considering how little nature is left in this city.

COMMENT RESPONSE

I-29-2 For any development plan to move forward it should have a solid, multi-year maintenance, groundskeeping, and water level budget and execution.

I-29-1 The current dog park/meadow/rec center/tree landscaping/etc are insufficiently supported as is.

I-30

COMMENT RESPONSE

As a concerned citizen, it is most important to protect the wildlife in the area as nighttime is when our wildlife is most active. To that end, permanent permeter fencing, with gates, providing safety, security and daylight access. Nighttime access should not be allowed.

I-30-4 Also, the Knoll needs to be left alone and not developed, as the Knoll provides most of the protected wildlife land habitat that the Complex provides. Please leave the green space alone.

I-30-1

Lastly, construction will be disruptive to wildlife and neighborhoods for a very long time. The risks associated with prolonged exposure to noise and traffic congestion generated by construction far outweigh the benefits.

I-30-2

Thank you for your time.

I-31

COMMENT RESPONSE

My strong resistance to these plans :
concerns with respect to the ENVIRONMENTAL IMPACTS that may be caused by implementation of the Master Plan. These impacts would be on environmental resource areas listed in the NOP, such as "Biological Resources" which includes our wildlife.

I-31-1 harm to wildlife, loss of wildlife habitat, noise, congestion of people and traffic, etc.

-

.the fence is the single most important conservation management tool at the site after the presence of water."

I-32

COMMENT RESPONSE

I see that you are planning to add fish, are you going to allow for fishing? I certainly hope thats the case. Fishing provides safe fun entertainment for all age groups. It's very helpful for getting young boys and girls in a hobby that could last a lifetime. Plus it help keeps them busy and out of trouble.

If you are indeed going to introduce fish into the lake please consider these points. Largemouth Bass should be the focal point for many reasons. A few are they are

I-32-1 very hardy. Bass fishing has become popular in recent times, partly due to covid. 95% or more of Bass anglers practice catch and release. A healthy fishery would include Largemouth Bass, Bluegill, Sunfish, Minnows, and Shad. Channel Catfish would be a great addition and trout in the winter months. Most people will take home the Catfish and Trout. Any Trout left will die off in the summer months. Which is why making 2 or 3 Bass plants a year makes more sense, they can survive the summer heat.

Please consider fishing as a option for the redevelopment of Silverlake. Thank you.

I-33

	COMMENT	RESPONSE
I-33-1	Love it! Particularly grateful and eager for the expanded bathroom access. As a nearby resident and mom, the lack of bathrooms at the meadow has meant we don't get to go as often! We also hope that improves the accessibility to more folks to use the space! We do hope the water level will be filled in slightly more to cover the ugly concrete. :)	

I-34

COMMENT RESPONSE

To All Concerned:

1. I feel that permanent perimeter fencing with gates must be installed around this project- for the safety of the features to be created within the complex, for whatever wildlife is still there, and for the safety of community members. This area has the potential of becoming an attractive nuisance otherwise. Also, any wildlife within the boundaries would be negatively effected by nighttime human traffic. Nightime is normally a safe time for most wildlife, and I believe this would impact all of the birds and creatures negatively.

I-34-1

2. The Knoll has long been a haven for several species of animals, actually for decades. Green spaces must be preserved if we are to provide any habitat for wildlife, and the Knoll is the epicenter of that. Land habitat is extremely limited in this area, as human activity is so prevalent- the called-for regrading and development in this area is far too much for any habitat to be viable.

I-34-5

3. All construction brings with it noise, pollution and traffic. These effects along with the disruptions of the last few years in the Reservoir area will be very detrimental to the quality of life for residents and wildlife alike. All effort must be made to mitigate these effects in every way possible.

I-34-3

Sincerely,
Sue Iri - (43 year resident of Silver Lake).

I-35

	COMMENT	RESPONSE
I-35-1	I can't wait for this project to come to life and to finally have this amazing space open to the community. Please don't give up on this when the nimby's who want to optimize for driving in parking try to kill it.	

COMMENT RESPONSE

I-36-1 I live a block from the reservoir and I am in full support of the improvements to be made to the reservoir and surrounding area. Although I know these improvements are in the future, I am really looking forward to the day I can enjoy them. Thank you for not only beautifying the area but also making a space for the community to interact and enjoy being together.

I-37

COMMENT RESPONSE

Hello,

I have attended several of the meetings and believe that the local residents have been slightly mislead. There has never been an option on any of the questionnaires for “no change” local residents were forced to choose something new, some form of development. Our neighborhood residents that live in close proximity and/or above with reservoir views, do not want this project to move forward. We have traffic issues as it is, the congestion, parking concerns, garbage and waste, would be devastating to the local community. This neighborhood cannot handle the weight of a development project of this size. We should absolutely not have water activities in the reservoir. The reservoir is a beautiful place, as is, to walk, run or bike. It is quiet and protective of its wildlife etc.

I-37-1

I-37-2

I strongly vote no on any project except for upgrading the rec center.

This city needs to put funds in other areas such as our homeless crisis or perhaps funding beautiful projects of this nature in neighborhoods that don’t have a community space like what we already have. Let’s give other communities the opportunity to have something special. We do not need an upgrade of any kind in our neighborhood.

Pls do not proceed with this project.

I-38

Environmental Impact Report (EIR)
The City of Los Angeles (City), Bureau of Engineering (BOE) has started the environmental review process for the proposed Silver Lake Reservoir Complex Master Plan Project (proposed Project). The proposed Project would redesign 116 acres of the 127-acre Silver Lake Reservoir Complex with community park amenities. The proposed Project would consist of a series of spaces (park zones) stitched together by a 2.5-mile, tree-lined promenade.

The City has determined that an Environmental Impact Report (EIR) is required. The anticipated timeline for the EIR process is outlined below. Check back for updates as the EIR progresses.

Download the CEQA Basics Fact Sheet to learn more about the CEQA environmental review process.

Join our email list! Sign up for notifications of public meetings and public comment periods here.

SLRCMP EIR Timeline

Notice of Preparation and Public Scoping Period
A Notice of Preparation (NOP) has been prepared to notify agencies and interested parties that the City of Los Angeles (City), as the Lead Agency, through the Department of Public Works, Bureau of Engineering will prepare an Environmental Impact Report (EIR) pursuant to the California Environmental Quality Act (CEQA) for the proposed Silver Lake Reservoir Complex Master Plan Project.

Download NOP document: Silver Lake Reservoir Complex Master Plan Notice of Preparation

View NOP presentation: Silver Lake Reservoir Complex Master Plan NOP Presentation

A virtual Public Scoping Meeting will be held to review the environmental process, the Project, and to provide an opportunity for stakeholder and community input on the scope and content of the Draft EIR.

Date: January 19, 2022
Time: 6:00 p.m. to 7:30 p.m.
Zoom Link: https://esassoc.zoom.us/j/85363693488
Telephone Dial-In: +1 (833) 548-0276
Meeting ID: 853 6369 3488

As covered under Title II of the Americans with Disabilities Act, the City does not discriminate based on disability. All requests for reasonable accommodations to ensure equal access to this public meeting, including Spanish translation, should be made at least three days prior to the meeting date and sent to eng.slrcmp@lacity.org or call (310) 566-8018.

Public Review and Comment Period: The City is soliciting comments from responsible and trustee agencies as well as interested parties as to the scope and content of the environmental information to be included in the EIR. In accordance with time limits mandated by CEQA, the NOP is being circulated for a 30-day public scoping period. All comments to the NOP are due no later than 5:00 p.m. on February 7, 2022.

COMMENT RESPONSE

As a ten year resident of NELA (currently Los Feliz), and former member of the Atwater Village Neighborhood Council, I wholeheartedly endorse this plan.

I-39-1 A small aside, I believe that the reservoir is large enough for Olympic kayaking events, which if they could be staged there, would be incredible.

Thanks for the good work!

I-40

	COMMENT	RESPONSE
I-40-1	I approve of this design and hope that funding is able to be secured so that this development can happen in the not too distant future. I appreciate the amount of community outreach that was done and the multiple opportunities to to be able to submit my input. I am concerned that by the time the development actually starts the people who were involved will be long gone and there will be opposition to the plan that will grind everything to a halt. Godspeed!	

I-41

COMMENT RESPONSE

As a homeowner that lives one block from the reservoir, I am deeply concerned about this enterprise. We, like many others moved to Silverlake almost 15 years ago for the calm beauty of the neighborhood, and of course the reservoir, which is beautiful as it is, and doesn't need "more". It baffles me why in a time when so many are suffering across our city that we would elect to spend money in a neighborhood where we don't need attractions that's what we live here. What about

I-41-2 children in other parts of town who don't have parks to play in? We are honestly worried that we may need to move due to the inevitable traffic, that will easily triple. It is already congested here on all of the local side streets. What is this for?

I-41-1 Better quality of life? For who? Will we build another fence to keep people from the bathrooms and have police preventing people from camping on the reservoir? Why can't we be thankful for the natural beauty we've been gifted with, and work towards making another, less fortunate neighborhood better by adding resources that are actually wanted and needed?

I-43

COMMENT

RESPONSE

To fence or not?

Yes, fence.

Sadly, our situation with the unhoused means people would want to pitch their tents in a beautiful place like Silver Lake will be. Can't blame them. But blame them we will if it turns into Echo Park redux. Face the current reality. Open the lake to all people during daylight hours, and close it up at night.

I-43-2

Also, keep the peace. By that I mean maximally support wildlife and passive recreation for the Homo Sapiens. Natural beauty is good for everyone's well being and doesn't need to be artificially tricked out. Bathrooms would be good, though!

I-43-3

One thing that would be AMAZING: a permanent Monarch butterfly habitat, using native Milkweed only. A place where the entire life cycle can be observed by classrooms of kids, but was protected form trammeling.

I-44

COMMENT RESPONSE

I-44-1	Green space in the area is in short supply. Green Space for wildlife is nonexistent. Having a safe fenced area free from human contact is essential to maintain a livable habitat for both wildlife and the community. I strongly urge that the committee recognize that in order to have both the status que should be maintained.

I-45

COMMENT RESPONSE

I-45-1 It has been my opinion from the beginning that the reservoir should be off limits to any major development projects. Maintenance and upkeep of existing property should be the only priority.

The proposed development plan, if carried through, will cause a change to the surrounding community that will not be in its best interest.

I-46

COMMENT RESPONSE

I-46-2
I-46-1

I am very concerned about the current plan for the Silver Lake reservoir, primarily because of impacts on local wildlife. The opening of "the knoll" to walking paths eliminates current habitat, and the presence of the kayak launch near the meadow indicates a push for watercraft that have the potential to disrupt migratory birds with human presence, noise, and pollution (if motorized). I urge the city to stop further incursion into the little habitats that wild animals have managed to find within our city. May thanks.

I-47

COMMENT RESPONSE

I do not support motorized and non-motorized water activities due to the negative impact on Biological Resources (migrating birds), Noise (if motorized), Transportation and Traffic (transporting any kind of boats), Air Quality (if motorized) etc. I-47-3

"The Reservoirs and the Public Trust Mulholland understood the many benefits that reservoirs could provide beyond water storage — including spiritual solace, pleasure and beauty for all. He saw these assets as part of the public trust, to be preserved and enhanced for generations to come." I-47-1

THE RESERVOIR IS A LITTLE BIT OF PEACE IN THE MIDDLE OF A FAST-PACED, OVERCROWDED CITY. PLEASE PRESERVE IT AS IS!

I-48

COMMENT RESPONSE

I-48-1 While I understand that there is a Tribal Cultural Resources Assessment built into the EIR process, it's my hope that this won't be a box to be checked, but rather that an earnest conversation will be had with members of the Tongva/Gabrieleño tribe to discuss ways in which redevelopment of natural resources can be done in a way that honors first peoples, and potentially ways in which the redeveloped reservoir can offer special access to native peoples to cultivate and responsibly harvest native plants. By no means is it my place to speak on behalf of anybody from the tribe, but I have had conversations with various Tongva descendants who have requested exactly this, and I would love to see them brought into the conversation in a meaningful way. Water is a sacred resource to the Tongva peoples and as a green space centered around a body of water, it is our duty to honor native peoples and ask their preference on how the land is redeveloped. This should be standard practice for any redevelopment of natural, green spaces in Los Angeles going forward.

I-49

COMMENT RESPONSE

I-49-1 I am excited about the reservoir being a safer and more welcoming place for local wildlife, but am concerned about the impact on that wildlife during the construction process. What precautions will be taken to ensure that the negative impacts are as minimal as possible?
Also, how much of the EIR will be focused on the impact of the final project on wildlife, both positive and negative. Will biologists and arborists be part of the EIR team? This will be essential to ensuring the plan is optimized for resident and migratory critters. Overall, I'm very excited about what is envisioned. It's going to be great. Thank you!

I-50

	COMMENT	RESPONSE
I-50-1	I do not support permitting water activities in the Silverlake reservoir.	

I-51

COMMENT

RESPONSE

Speaking on behalf of my constituents as a representative on the Silver Lake Neighborhood Council, and more specifically as the co-chair of the SLNC Reservoir Committee which deals with all matters related to the reservoir and the dog park as well.

I-51-1 Many of our constituents are frequent users of the dog park and have repeatedly asked for more shade for both themselves and their dogs. In the Summer months, the dog park gets so brutally hot to the point of being unsafe for dogs. The more shade the better, thank you!

Also, in the interest of the greenest space possible, we would love to see a self-sustaining compost pit solution for dog waste in the park. This would encourage people to pick up after their dogs more if it's that easy, and more importantly would vastly reduce our plastic use around the reservoir complex! Thank you!

I-52

COMMENT RESPONSE

As a resident of the neighborhood, I strongly support the plan and urge the City to move as quickly as possible to make it a reality.

I also encourage the BOE to work with LADOT and Councilmember O'Farrell's office to implement better bike infrastructure, including bikeshare stations and protected bike lanes to make it more easily accessible and enjoyed by many without the adverse impacts. Better infrastructure that allows and encourages more people to walk and bike and use transit can be built and it has been built in countless other cities around the world that were formerly more car dependent to great success, we just need our political leaders and city agencies to build quality infrastructure that provides a true alternative to driving.

I-52-1

I heard a lot of comments during the public meeting from those who are resistant to change that benefits the wider community and who are suspicious of, or worse, have animosity towards their fellow citizens. I urge the BOE to move forward with the project and not allow those self-interested voices who may wish to keep the neighborhood only to themselves or can't imagine a better community to delay and obstruct the project which will ultimately provide many benefits to the surrounding community and the wider Los Angeles community and will make Silver Lake Reservoir a much more attractive and environmentally beneficial asset.

I am very excited about the potential for making Silver Lake a more enjoyable and attractive place to live and play for all.

I-53

COMMENT RESPONSE

As residents who live right off the reservoir, who have a vital stake in the future of this area, we have a plethora of concerns and questions.

1. When will this begin?

2. How long until completion?

I-53-1 3. What is the noise disruption going to be?

4. Will parts of the reservoir loop be closed off? For how long?

I-53-2 5. How unsightly and disruptive will the construction be? Trucks? Cranes? What is the scope of the work?

I-53-3 6. Where is everyone going to park? Will there be a parking lot or garage built? And how will THAT impact the neighborhood? You do realize the traffic along Silver Lake Boulevard is already a nightmare. Where will all of these flocking tourists park? Up on the side streets, presumably. Which means all the residents will be clambering for parking restrictions. It will be an endless slog of whiny madness and unhappiness.

I-53-4 7. How will this impact the local wildlife of the reservoir? The coyotes, for instance-- will they be further flocking into our yards if their current dens are disrupted? The moles? Roof rats? Birds-of-prey? Squirrels. Mosquitoes. There are already issue with West Nile-carrying mosquitoes-- certainly, this will have a further impact.

8. Will this project impact our property taxes?

9. The renderings make it look like these new areas will be populated by, oh, you know, just a few people here and there... when we all know there will be hundreds of people clambering for a space to chill. This means the entire area will be perpetually inundated with people.

10. The excess homelessness and crime in the area: what will happen with all of that?

11. Will the City allow for small businesses who want to profit off of this new public park space to just set down and start making business and building more buildings?

12. The thing about the Highline in NYC, which this most closely resembles, is that it's at the edge of the island and not densely populated by apartment buildings and citizens. That is not the case with the Silverlake Reservoir. Residents live in close proximity to the space. Is this being addressed?

13. What voice will we have, ultimately, in not wanting this to go forward?

COMMENT RESPONSE

The MP would allow unlimited nighttime human activity by drastically lowering or possibly removing our protective perimeter fencing, eliminating the guaranteed flexible access the fence would provide.
To protect wildlife we need permanent perimeter fencing, with gates, providing safety, security, and daylight access.

I-54-1 The MP calls for the regrading and development of portions of the Knoll, and the severe reduction of its open green space. The Educational/Community Meeting building that necessitates this grading would replace wide areas of wildlife habitat, and duplicates existing space in the Recreation Center and in the public schools. We need to protect the maximum amount of wildlife green space on the Knoll.

I-54-2 This MP will cause significant disruptions to our community lasting many years, which includes noise, traffic, vitiated air quality -- all that happens in a construction zone. These are just a few negative impacts. We must guarantee necessary mitigations to construction and maintain the quality of life for residents of the area and visitors alike. Construction activity has the potential to negatively impact the

I-54-5 birds and other wildlife within the reservoir complex.

I-55

COMMENT RESPONSE

I-55-1 I live nearby the Silver Lake Reservoir, and am glad to see the City undertaking this project. This will be a tremendous asset to the community, and will add much needed open space in Los Angeles.

I-56

COMMENT RESPONSE

I-56-1 I love many aspects of the plan, especially the introduction of the islands, fish, restrooms for the meadow, embankment enhancements and the kayak launch (would be great to bring in youth programs like RowLA).
I am hesitant to endorse any development of the knoll however. Coyote families have lived in that area for as long as I've been here (nearly 30 years). Some of my newer neighbors don't want to co-exist with them and I worry the coyotes will have no safe refuge if we carve out even more of their space. There are so many great improvements in the plan. Not everything has to be developed.

I-57

COMMENT RESPONSE

I-57-1 Me and my family are *very* excited about the Silver Lake redevelopment project and it's potential to build community around a vital and treasured resource in our neighborhood. We're supportive of all aspects of the plan, especially access to the water, trails in the ramble, and foot paths throughout. Please proceed with all due speed--it will certainly benefit not only the immediate neighborhood but all LA residents. And it'll be a terrific place to bring visitors to LA.

COMMENT RESPONSE

I-58-2 As a resident of the Silverlake reservoir community I am very concerned about the impact the development of the Silverlake reservoir will have on parking and the congestion of traffic on our already crowded streets. I am also very concerned on the impact it will have on the wildlife at the Silverlake reservoir.

I-59

COMMENT RESPONSE

As a resident of over 35 years. have enjoyed the environmental beauty and diversity of the neighborhood. My neighbors and I are very concern about the following on EIR Draft and would like them address before any further planning:

Transportation and Traffic-It is a one lane each direction on the streets around the site, it is extremely congested, now. What time of plans do you have for easing the traffic congestions, pollution, noise, car and pedestrian safety? Since the street parking is now so limited, causing difficulty to get out of driveways, what are the plans for parking. Must address this problem, if these plans are implemented. Not all our visitors to the site live within walking distance.

I-59-2 Biological Resources- With increased development and population in Silverlake, our co-existence with local wildlife balance is very fragile. More efforts are need to preserve what is here with the migratory birds and other animals in safe thriving contained areas. Having motorized/non-motorized water activities will bring more unwanted noise, pollution, congestion and disruptiveness to our space. How do manage the traffic, congestion, loading/unloading ?

I-59-3 Safety and Security-How do plan to keep the space safe, healthy, clean, well-lighted and secure for all who use it respectfully? How do you deal with unwanted encampments, overnight stays, crimes, vandalism, harassments and other disruptions. You need to address health concerns as this pandemic continues, as well.

I-59-4 Air quality and Noise- Since the last renovation of the reservoir, plans must be in place before construction to address the noise, construction debris, trash, air pollution , traffic patterns, timing of street closures and rerouting

Look forward to hearing your solutions to the concerns.

I-60

COMMENT RESPONSE

Plans to expand activity spaces around the reservoir need to include additional parking. Our tiny streets are already congested and all the parking is constantly being taken by people going to the reservoir. Adding additional traffic will making living and parking in the area a nightmare. My car gets hit every six months due to the constant flux of cars. Every home owner on my street will attest to our cars constantly getting hit, often without the culprit leaving a note. Leaving us to come out of pocket. People going to the dog park not only park illegally in red zones, but on the wrong side of the street. Making the actual residents cars getting hit impossible to avoid. Fanning st already gets so congested that people put their cars in park, get out and having screaming matches about who has "the right of way". Several of these fights have turned violent.

I-60-1 Violence is nearly a daily trouble at the dog park in general. We are constantly hearing dog fights, that then escalate into human screaming matches and in some cases physical violence towards both dogs and humans. Our neighbors and I are having to call the police to deescalate. At one point a dog owner beat another persons dog TO DEATH. I realize this isn't something that can be properly policed given the randomness of the activities. But adding additional space is going to draw in more nonresidents and will definitely increase this activity. Many non-residents use the dog park as a free day care. Dropping their dogs off and not returning for

I-60-2 hours. This also happens at night. The dog park needs to have its gates locked upon closing to prevent the after hours nonsense.

The homes around the reservoir are expensive, we should not have to deal with enraged screams of traffic congestion, the violent acts that can follow,. Having our cars smashed for the sake of a dog park is ridiculous.

All of this can be solved with additional parking. If that is not an option then the streets surrounding the reservoir need to be permit only.

I-61

COMMENT

RESPONSE

Hey there!

I'm a - nearly - lifelong resident of Silverlake (yes, I still title it as one word, haha), and my comments regard some information that has eluded my understanding, despite many community workshop appearances in the infancy of this Master Plan discourse.

The first is transparency. Something I felt throughout the stakeholder working group meetings I attended was confusion about the identity of the folks who are actually driving this plan forward. Unfortunately, their lack of presence and self-expression left those who were presenting during the meetings with the unforgiving job of bearing the community's response. Sure, I vaguely remember City District Council members attending, but as opposed to someone who represents the community, the 3rd-party engineering liaisons and company/agency representatives took the brunt of the offense from the many irate residents who were ideologically opposed to a plan they never asked for in the first place. Though the plan did attract a diverse group, with many who enjoyed the notion of at least some of the proposed amenities, the plan took many (me) by surprise. The myriad concerns of those surprised people were funneled toward individuals who could never answer on behalf of those in charge. Those liaisons and reps, were forced to absorb a barrage of unsavory attitudes, however warranted. Considering that there was nothing that could be said to address or assuage that un-savoriness, it was evident in the very design of these meetings that the people who should've intervened were not present. That was pretty unfair to the unequipped presenters who learned the verbal ferocity of the multi-decade legacy homeowner who knows the value of what perfect, precious little they already have.

So - who originated this plan? Who is accountable for continuing it on its path? How can regular citizens reach them?

The Bureau of Engineering website merely states that the project "is being led by the BOE, with the support of the Council Districts 4 and 13, in coordination with the LADWP." That doesn't explicate who had ability to begin the plan, nor who is responsible for creating its scope. Sure, there has been a lot of publicly available discussion and lively debate for or against the plan, but I never observed that the people responsible for putting this plan on its path were there to hear those discussions (or, at least, that was never made clear). The answer to my question may have been, or can easily be, a first of me, so a response to my query here would be greatly appreciated. The fact remains that I'm not the only person who has been confused by this topic, so this information would be helpful not only to me, but also to the many residents who feel similarly.

Perhaps my questions are more properly directed at how the administrative aspect of this plan functions. Well, if it is the BOE that is responsible for "leading" the plan, that seems a little odd in my admittedly naive understanding of how city government works.

Why would the engineering branch of LA City government be in charge of suggesting these ideas? Their involvement in the implementation makes complete sense, and should be necessitated (regardless of my personal take on the Master Plan, I do believe in the principle of an Engineering Review being a part of large-scale city projects), but at whose request? There lies my greatest source of concern.

Again - transparency would be appreciated, and I fear this may not be the right channel for asking for that. Still, it's a concern that must be logged, especially during a pandemic that makes coming into contact with someone remotely proximal to the right people and resources for sharing these concerns a difficult enough task.

My second concern in question - the representation of resident opinions in the Master Plan.

During the initial stakeholder workshops, there seemed to be a pretty consistent split of those in favor and those against the Master Plan. The problem that kept butting its head was that while the half in favor were attempting to vote on which features they preferred to be included in the plan, the other half were so against the plan itself that they didn't want inclusion in such a discussion. They didn't want to choose between paddle boats or a surfing embankment; they wanted to choose no plan at all. The macro issue surrounding that conflict was that each meeting comprised making decisions about what prospective features the community wanted. There was no reckoning with the fact that a large percentage (if not occasional majority) of the community audience wanted nothing to do with these features. This created a demographic of stakeholders who felt disproportionately voiceless, because instead of there being a frank discussion about whether or not there ever should be a plan in the first place, they were forced to pick between a series of amenities they never wanted to begin with.

Many political allusions abound, most resonantly the challenge posed to many people in a presidential election cycle: choosing between two undesirable candidates instead of having the option for an ideal one. Though I'm intentionally being abstract here (as, to me, it was obvious who not to pick in 2020), that's the sort of inner conflict present in the dissenting metaphorical voter - the stakeholder - that has been called forth by this plan's implementation.

I apologize for my tangential thinking, but I believe the ramifications and context of these subjects are important.

Back to the focus - the main point I wanted to raise about representation is that as a result of the nature of the workshops, many residents of Silverlake felt they were not being counted. Despite being present at a meeting, and literally speaking to their qualms, they felt unheard by an ambiguous entity that claimed to be working on their behalf. Their opinions would go on to be furthered diluted by online questionnaires that invited input from more and more loosely related participants in the community.

Has there been this kind of assessment by the larger bodies involved? Do those in charge know how many people don't want this plan to exist?

Now, I'll tie together my two larger concerns.

I feel there should be another meeting for the general audience of the topic (such as the initial stakeholder meetings) so that there can be a public acknowledgement by those who started the Master Plan - presence mandatory - of how large a percentage of residents are against the plan, itself. That may finally give the long-festering issues of transparency and representation a chance to breathe.

I have to thank whomever had the arduous task of reading and critically assessing my comments. I tend to write a lot, and I imagine many others did the same. My apologies for that. I hope the profuse amount of concern is a clear enough indication that there are nuanced feelings regarding this plan, as the lake and neighborhood are a precious gem with enough problems already (houselessness, skyrocketing housing cost, energy grid distribution, uninhibited gentrification, wild habitat loss, etc.). I'm still surprised there are more resources and attentions paid to this topic than the ones I suggested in the parenthetical.

Again - thank you. I'm grateful that I live in a place that allows this sort of commentary to exist.

I-62

COMMENT RESPONSE

A Wildlife Sanctuary should be created as a protected habitat for migratory birds and urban wildlife, to be enjoyed by all. In addition, the SL Complex should serve as an example of a 100% net zero all-natural plantings that are naturally sustainable to educate people of all ages how to respect the earth as those native people's did who lived on this land originally.

I-62-1 The goal is to allow the entire SL site to be a "100% natural habitat" as mother nature created it prior to the introduction of the "modern" homo sapiens. Let the cite be guarded by the fencing because"....the fence is the single most important conservation management tool at the site after the presence of water."- LA Audubon Society: Statement on the Future Management of Silver Lake Reservoir. The fence should be kept at the current height to assure the wildlife can live naturally. The current fencing could be placed by more attractive fencing that is made of materials that are 100% chemical free.
See attached MS Word docx with complete list of comments

COMMENT RESPONSE

A Wildlife Sanctuary should be created as a protected habitat for migratory birds and urban wildlife, to be enjoyed by all. In addition, the SL Complex should serve as an example of a 100% net zero all-natural plantings that are naturally sustainable to educate people of all ages how to respect the earth as those native people's did who lived on this land originally.

I-62-2 Plants are chosen from a list approved by NASA to efficiently filter air so that more energy is produced than consumed. All "waste" receptacles must be clearly marked so that their contents can be used for extensive composting that can be returned to the soil for sustainable planting and/or can be 100% recycled with the aim to be a zero-waste site. Plants and trees should support the "pollinators" such as bees, butterflies and humming birds; all species of plantings needs to be native to this area georgraphically. No pesticides should be used for any reason; all fertilizers and additional dirt/soil used must be pesticide free to protect all wildlife including the pollinator species. If 100% chemical free soil and plantings are brought in to add to the site (such as new wetlands for birds) and the creation of the floating island that is highly encouraged. I would like to see an expert wild bird ornithologist advise on this project during this first phase of the process.

Instead of a "building" built to educate youth/children, there should be outdoor areas designed for students and community members to engage in all-natural gardening and farming like the "native Americans" that originally lived in this area. The existing building and space in the Recreation Center can be used for indoor classes if necessary.

I-62-3 Children/youth who come to the SL complex should be prepared to spend their time outdoors observing (not touching) natural wildlife and get a hands-on experience working in an "all natural" garden and perhaps cultivating organic fruits and vegetables (this is not permaculture). What is "all natural"? Refer to the book "One Straw Revolution, An Introduction to Natural Farming" by Masanobu Fukuoka, edited by Larry Korn who was a Marshall High School graduate and student body president S'66 (Rodale Press,1978) with a preface by Wendall Berry. Larry Korn authored his own book, "One Straw Revolutionary" published in 2015 by Chelsea Green Publishing in which he explains and defines "natural farming" and differentiates it from organic and permaculture; natural is natural exactly as nature intended and not making any impact what-so-ever on the environment which should also be all-natural; isn't this the issue? How do we re-create the all-natural net zero planet? Start right here in Silver Lake as an example of how we can reverse the effects of the climate crisis.

Children who come from "food desert" communities would greatly benefit from learning how to grow their own food naturally and share that information when they return to where they live. Like the "Victory Gardens" in Boston members of the SL communities could apply to cultivate small plots of land naturally and engage in the education of these children, too.

I-62-4 Allow no "fossil fuel powered" machines or vehicles onto the property or in the water for any reason. This should be a 100% net zero site and that should be included in the education of those

I-62-5 that visit it. All building materials must meet the standards required for Leed green certification.

I-62-6 No kayaking should be allowed to keep all human beings as far away from the birds and wildlife. All fossil fueled and motorized water activities such as motor boats, water skis, etc. will affect

I-62

COMMENT RESPONSE

I-62-7 the natural biological resources of the migratory birds and any fossil fuel burn off into the water coating it with oil sheen and polluting the air will harm all wildlife and foul such as the ducks who swim and drink the water as well as wild animals that drink and bathe in the water. Likewise, unnecessary transportation (cars, buses, trucks, etc.) using the public roads surrounding the reservoir will reduce the quality of the air , increase noise that cause stress to the wildlife. Residents living around and near the reservoirs will also be negatively affected more so than they already are.

I-62-8

I-62-9

I-62-10 The goal is to allow the entire SL site to be a "100% natural habitat" as mother nature created it prior to the introduction of the "modern" homo sapiens. *Let the cite be guarded by the fencing because"....the fence is the single most important conservation management tool at the site after the presence of water."*- LA Audubon Society: Statement on the Future Management of Silver Lake Reservoir. The fence should be kept at the current height to assure the wildlife can live naturally. The current fencing could be placed by more attractive fencing that is made of materials that are 100% chemical free.

I-63-1	My biggest concern is security. How are you planning to keep out criminals, and people w tents?	

I-64

COMMENT RESPONSE

I have lived in Silver Lake since 1967; the reservoir is important to me. I am very

I-64-1 concerned about the safety of both people and wildlife. First there are too many cars and very little parking. I only noticed traffic study instruments down for about one week. Second, the construction and proposed structures pose a danger to

I-64-2 wildlife. Additionally, through the years often fire departments use the reservoir to supply water for fighting fires. It is important for the area to remain safe for people and wildlife for the fences to remain.

Please consider a true traffic study. Emphasis has been on Silver Lake Blvd.

I-64-3 however, West Silver Lake Drive is often omitted. Here we have a situation where cars will drive on Kenilworth to avoid traffic of both Silver Lake Blvd and West Silver

I-64-4 Lake Drive. Minimize development. for safety of the wildlife

I-65

COMMENT

RESPONSE

I-65-1 I feel that the plan to install concrete islands and to open the reservoir to the public will create an excessive amount of traffic in the already narrow streets surrounding the reservoir. This will create a hazard for the many residents with young children.

I-65-2 Furthermore, the encroachment of people into the reservoir may disturb the current ecosystem surrounding it. I think the focus should be on renovating the silver lake recreation center and dog park.

I-66

COMMENT RESPONSE

Hi,

I am a resident and home owner in Silver Lake (for almost a decade) and would love to see this plan come to fruition. It would be great to share this beautiful update to the lake with my children as well as establish more habitat for native wildlife.

Please consider this my enthusiastic support for the project. Thank you,

Nick Carmen

I-67

COMMENT RESPONSE

I-67-1 I am concerned about safety. Traffic is a huge concern. Already there is far too
I-67-5 much and there is limited parking available. Trash is a problem from humans as
well as dogs. Concerned about jeopardizing the existence of the hundreds of birds
I-67-2 that nest and live here that call the reservoir home. Removal of the fences would
I-67-3 be a disaster. Currently the water in the larger reservoir is used for local fires. The
serenity of the Meadows and grassy knolls should not be disturbed. Concrete islands
should be eliminated. They pose a safety risk. The improvements that have been
I-67-4 made thus far are sufficient for the community. Try and maintain what we have:
tree trimming and trash pick up just to name a few. Make sure the path is in good
repair so walkers do not go into the street.

RE: SCAG Comments on the Notice of Preparation of a Draft Environmental Impact Report for the Silver Lake Reservoir Complex Master Plan [SCAG NO. IGR10556]

Dear Ms. Steiner,

Thank you for submitting the Notice of Preparation of a Draft Environmental Impact Report for the Silver Lake Reservoir Complex Master Plan ("proposed project") to the Southern California Association of Governments (SCAG) for review and comment. SCAG is responsible for providing informational resources to regionally significant plans, projects, and programs per the California Environmental Quality Act (CEQA) to facilitate the consistency of these projects with SCAG's adopted regional plans, to be determined by the lead agencies.[1]

Pursuant to Senate Bill (SB) 375, SCAG is the designated Regional Transportation Planning Agency under state law and is responsible for preparation of the Regional Transportation Plan (RTP) including the Sustainable Communities Strategy (SCS). SCAG's feedback is intended to assist local jurisdictions and project proponents to implement projects that have the potential to contribute to attainment of Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) goals and align with RTP/SCS policies. Finally, SCAG is also the authorized regional agency for Inter-Governmental Review (IGR) of programs proposed for Federal financial assistance and direct Federal development activities, pursuant to Presidential Executive Order 12372.

SCAG staff has reviewed the Notice of Preparation of a Draft Environmental Impact Report for the Silver Lake Reservoir Complex Master Plan in Los Angeles County. The proposed project would redesign 116 acres of the 127-acre Silver Lake Reservoir Complex with community park amenities, including two flexible lawns with shade trees; a picnic grove and ornamental gardens with informal play area; environmental education center, stepped seating terraces; restoration of two existing woodland areas; and new habitat islands and terraces.

When available, please email environmental documentation to *IGR@scag.ca.gov* providing, at a minimum, the full public comment period for review.

If you have any questions regarding the attached comments, please contact the Intergovernmental Review (IGR) Program, attn.: Anita Au, Senior Regional Planner, at (213) 236-1874 or IGR@scag.ca.gov. Thank you.

Sincerely,

Frank Wen, Ph.D.
Manager, Planning Strategy Department

[1] Lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with the 2020 RTP/SCS (Connect SoCal) for the purpose of determining consistency for CEQA.

I-68

COMMENT RESPONSE

COMMENTS ON THE NOTICE OF PREPARATION OF A DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE SILVER LAKE RESERVOIR COMPLEX MASTER PLAN [SCAG NO. IGR10556]

CONSISTENCY WITH CONNECT SOCAL

SCAG provides informational resources to facilitate the consistency of the proposed project with the adopted 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS or Connect SoCal). For the purpose of determining consistency with CEQA, lead agencies such as local jurisdictions have the sole discretion in determining a local project's consistency with Connect SoCal.

CONNECT SOCAL GOALS

The SCAG Regional Council fully adopted Connect SoCal in September 2020. Connect SoCal, also known as the 2020 – 2045 RTP/SCS, builds upon and expands land use and transportation strategies established over several planning cycles to increase mobility options and achieve a more sustainable growth pattern. The long-range visioning plan balances future mobility and housing needs with goals for the environment, the regional economy, social equity and environmental justice, and public health. The goals included in Connect SoCal may be pertinent to the proposed project. These goals are meant to provide guidance for considering the proposed project. Among the relevant goals of Connect SoCal are the following:

I-68-2

SCAG CONNECT SOCAL GOALS	
Goal #1:	*Encourage regional economic prosperity and global competitiveness*
Goal #2:	*Improve mobility, accessibility, reliability and travel safety for people and goods*
Goal #3:	*Enhance the preservation, security, and resilience of the regional transportation system*
Goal #4:	*Increase person and goods movement and travel choices within the transportation system*
Goal #5:	*Reduce greenhouse gas emissions and improve air quality*
Goal #6:	*Support healthy and equitable communities*
Goal #7:	*Adapt to a changing climate and support an integrated regional development pattern and transportation network*
Goal #8:	*Leverage new transportation technologies and data-driven solutions that result in more efficient travel*
Goal #9:	*Encourage development of diverse housing types in areas that are supported by multiple transportation options*
Goal #10:	*Promote conservation of natural and agricultural lands and restoration of habitats*

For ease of review, we encourage the use of a side-by-side comparison of SCAG goals with discussions of the consistency, non-consistency or non-applicability of the goals and supportive analysis in a table format. Suggested format is as follows:

I-68

COMMENT RESPONSE

SCAG CONNECT SOCAL GOALS		
Goal		Analysis
Goal #1:	*Encourage regional economic prosperity and global competitiveness*	*Consistent: Statement as to why;* *Not-Consistent: Statement as to why;* *Or* *Not Applicable: Statement as to why;* *DEIR page number reference*
Goal #2:	*Improve mobility, accessibility, reliability and travel safety for people and goods*	*Consistent: Statement as to why;* *Not-Consistent: Statement as to why;* *Or* *Not Applicable: Statement as to why;* *DEIR page number reference*
etc.		etc.

Connect SoCal Strategies

To achieve the goals of Connect SoCal, a wide range of land use and transportation strategies are included in the accompanying twenty (20) technical reports. Of particular note are multiple strategies included in Chapter 3 of Connect SoCal intended to support implementation of the regional Sustainable Communities Strategy (SCS) framed within the context of focusing growth near destinations and mobility options; promoting diverse housing choices; leveraging technology innovations; supporting implementation of sustainability policies; and promoting a Green Region. To view Connect SoCal and the accompanying technical reports, please visit the Connect SoCal webpage. Connect SoCal builds upon the progress from previous RTP/SCS cycles and continues to focus on integrated, coordinated, and balanced planning for land use and transportation that helps the SCAG region strive towards a more sustainable region, while meeting statutory requirements pertinent to RTP/SCSs. These strategies within the regional context are provided as guidance for lead agencies such as local jurisdictions when the proposed project is under consideration.

I-68-7
I-68-3

DEMOGRAPHICS AND GROWTH FORECASTS

A key, formative step in projecting future population, households, and employment through 2045 for Connect SoCal was the generation of a forecast of regional and county level growth in collaboration with expert demographers and economists on Southern California. From there, jurisdictional level forecasts were ground-truthed by subregions and local agencies, which helped SCAG identify opportunities and barriers to future development. This forecast helps the region understand, in a very general sense, where we are expected to grow, and allows SCAG to focus attention on areas that are experiencing change and may have increased transportation needs. After a year-long engagement effort with all 197 jurisdictions one-on-one, 82 percent of SCAG's 197 jurisdictions provided feedback on the forecast of future growth for Connect SoCal. SCAG also sought feedback on potential sustainable growth strategies from a broad range of stakeholder groups – including local jurisdictions, county transportation commissions, other partner agencies, industry groups, community-based organizations, and the general public. Connect SoCal utilizes a bottom-up approach in that total projected growth for each jurisdiction reflects feedback received from jurisdiction staff, including city managers, community development/planning directors, and local staff. Growth at the neighborhood level (i.e., transportation analysis zone (TAZ) reflects entitled projects and adheres to current general and specific plan maximum densities as conveyed by jurisdictions (except in cases where entitled projects and development agreements exceed these capacities as calculated by SCAG). Neighborhood level growth projections also feature strategies that help to reduce greenhouse gas emissions (GHG) from automobiles and light trucks to achieve Southern California's GHG reduction target, approved by the California Air Resources Board (CARB) in accordance with state planning law. Connect SoCal's Forecasted Development Pattern is utilized for long range modeling purposes and does not supersede actions taken by elected bodies on future development, including entitlements and development agreements. SCAG does not have the authority to implement the plan -- neither through decisions about what type of development is built where, nor what transportation projects are ultimately built, as Connect

I-68

COMMENT RESPONSE

SoCal is adopted at the jurisdictional level. Achieving a sustained regional outcome depends upon informed and intentional local action. To access jurisdictional level growth estimates and forecasts for years 2016 and 2045, please refer to the Connect SoCal Demographics and Growth Forecast Technical Report. The growth forecasts for the region and applicable jurisdictions are below.

	Adopted SCAG Region Wide Forecasts				Adopted County of Los Angeles Forecasts			
	Year 2020	Year 2030	Year 2035	Year 2045	Year 2020	Year 2030	Year 2035	Year 2045
Population	19,517,731	20,821,171	21,443,006	22,503,899	10,407,326	10,899,849	11,173,987	11,673,937
Households	6,333,458	6,902,821	7,170,110	7,633,451	3,471,759	3,749,346	3,884,871	4,119,336
Employment	8,695,427	9,303,627	9,566,384	10,048,822	4,838,458	5,059,615	5,171,618	5,382,235

I-68-4
I-68-5

MITIGATION MEASURES

SCAG staff recommends that you review the Final Program Environmental Impact Report (Final PEIR) for Connect SoCal for guidance, as appropriate. SCAG's Regional Council certified the PEIR and adopted the associated Findings of Fact and a Statement of Overriding Considerations (FOF/SOC) and Mitigation Monitoring and Reporting Program (MMRP) on May 7, 2020 and also adopted a PEIR Addendum and amended the MMRP on September 3, 2020 (please see the PEIR webpage and scroll to the bottom of the page for the PEIR Addendum). The PEIR includes a list of project-level performance standards-based mitigation measures that may be considered for adoption and implementation by lead, responsible, or trustee agencies in the region, as applicable and feasible. Project-level mitigation measures are within responsibility, authority, and/or jurisdiction of project-implementing agency or other public agency serving as lead agency under CEQA in subsequent project- and site- specific design, CEQA review, and decision-making processes, to meet the performance standards for each of the CEQA resource categories.

I-69

COMMENT

RESPONSE

Hello, I'm a Silverlake resident. I as well as my family uses the reservoir for its paths and parks regularly. I am not ok with the environmental impacts that will result from the implementation of the Silverlake Reservoir Master Plan.

I-69-1

There really isn't a need to change the reservoir. Maybe the use of the water in some way shape or form, seasonally, but not a year-round build, disruption fo the current environment, as well as the impact of the community, will have with visitors.

RE: Silver Lake Reservoir Complex Redesign

Date: Jan 30, 2022

Dear Ms. Steiner,

I-70-1 We at Project M Plus, local Silver Lake architects, designers (as well as residents of Silver Lake) would like to offer up our overwhelming support for the proposed redesign of the Silver Lake Reservoir Complex. Providing a much needed recreational outlet for the residents of this city is paramount to the liveability and health of its inhabitants. We see the Silver Lake Reservoir as a "sleeping giant" in the renewal of our great city that far outweighs the cost and public issues that fog the concept.

I leave you with a quote from the architect Daniel Burnham who helped plan the city of Chicago:

"Make no little plans. They have no magic to stir men's blood and probably will not themselves be realized. Make big plans, aim high in hope and work, remembering that a noble, logical diagram once recorded will never die, but long after we are gone will be a living thing, asserting itself with ever growing insistency. Remember that our sons and grandsons are going to do things that would stagger us."

Thank you,

McShane Murnane AIA, NCARB

I-71

COMMENT RESPONSE

I-71-8 I am disappointed in the thought of placing concrete islands in the Ivanhoe
I-71-1 Reservoir. There is nothing natural about this. I question the extent of the traffic
I-71-9 study since it does not appear to have been expansive. I saw no monitors on the
west side of the reservoir. Of primary importance to me is to not disturb the wildlife
I-71-2 that lives within the reservoir complex. We have been mindful when the birds are
nesting. Please ensure that the wildlife is protected should you proceed with
I-71-3 minimal construction. I would also recommend the dog park be upgraded and that
I-71-4 the Meadows and Grassy Knoll be restricted as a people park. The walking path
should be upgraded to ensure walkers do not have to venture into the street on the
West Silver Lake side. In addition, trees should be pruned to ensure they are not a
I-71-5 hazard.
I would also recommend the fences protect the environment.
I-71-6 I question whether the educational center building should be constructed since there
is no area for parking large buses. The buses that ran on West Silver Lake Drive
I-71-7 were eliminated. Will this pose a problem for some communities.
Safety first. Limit cars.

I-72

COMMENT RESPONSE

I-72-1 My biggest concern is parking. How are our streets that are already full going to absorb the increase in traffic and parking especially around the places where groups can gather. The increase will be devastating to the neighborhood.

I-73

COMMENT RESPONSE

I am a Silverlake resident. I walk around the reservoir regularly, and my family and I use the existing reservoir complex for recreation. I am writing to voice my concerns about the environmental impacts that will result from the implementation of the Silverlake Reservoir Master Plan.

A. Years of construction will cause significant negative environmental impacts.
I-73-3 There will be loss of wildlife (for example the herons), increased noise, increased traffic, and increased air pollution. We must scale the construction to meet the community's needs, while preserving the needs of wildlife and the environment.

B. The Master Plan provides excessive reduction of The Knoll. The Knoll provides the most protected wildlife land habitat in the reservoir complex. Rather than
I-73-1 becoming the site for an unnecessary educational structure, The Knoll should be preserved for existing wildlife, and any learning spaces could remain outdoors in the
I-73-5 Meadow and the Recreation Center.

C. The Master Plan removes and/or reduces perimeter barriers, allowing unlimited nighttime human activity. I believe we need permanent perimeter barriers, with gates, to protect our wildlife. This will provide guaranteed, flexible access for wildlife, and still offer daylight access for humans.

We hope our voices are heard and accounted for in this master plan. We are worried that your vision has drowned out many community concerns.
Thank you.

I-74

COMMENT RESPONSE

I-74-1 This project would disrupt a quite community. The extra traffic around the lake will increase the backed up traffic we get now and the parking is already a problem. Why
I-74-2 are there no parking lots to accommodate the people visiting. The noise of people
I-74-3 playing, kayaking ect. will disturb the wild life and the people. The lake lies in a bowl with hills all around it. The noise is amplified. We can here small groups that gather in the meadow on weekends that play music or get boisterous. I can't imagine the
I-74-4 loud noises that will be created and it not scare the animals. What happens with the fire helicopters and super scoopers that use the water from the lake ? Griffith Park and Echo lake are close by, don't ruin our community.

I-75

	COMMENT	RESPONSE
I-75-1	My home is on Angus St. and I am concerned about an increase in traffic and parking issues with the planned changes in this Master Plan. I see no suggestions for parking but increase in visitors is expected. That is not smart.	
I-75-2	I also want the fence to remain in place. The space needs to remain protected.	

I-76

COMMENT

RESPONSE

Response to Virtual Scoping Meeting in regards to proposed project location and zones for the Silver Lake and Ivanhoe Reservoir.

I-76-2 My largest concerns are the traffic it will bring to our neighborhood and the impact on the wildlife that uses the reservoir area as home, or for nesting purposes. We live adjacent to the dog park on Fanning Street. As we are one house in from Silver Lake Blvd., we are already impacted by out of area traffic parking illegally in front of our home. This impacts us in many ways, as parking is never enforced, with park patrons parking illegally and making it difficult to pull in and out of our garage. Or, they will park directly in front of our house blocking the steps that lead up to our home, making us crawl over their car to reach our home. The traffic on an average day is heavy, very heavy on the weekends. As a resident, this is challenging entering and leaving our community and really pulls traffic onto the side streets looking for an easier way to get around. I didn't see any plan for a parking lot. Where will all these additional patrons park?

I-76-1 I'm not an expert on the wildlife that utilize the reservoir complex. I do know that every morning I can sit in my home and watch the gulls fly in for the day. Some days it looks as the reservoir is white, there are so many. Sometime in the late afternoon, the birds start to fly above the water, circling like a tornado. It is such a beautiful site. Many residents will go to the meadow in the afternoon just to take in this sight. Will these birds even come if there are kayaks in the water? Why on earth do we need kayak's in the water? What will happen on the days when the fire helicopters need to fill up at the reservoir? This happens multiple times a year. How will they be able to do this if there are people in kayaks? If someone wants to have a water experience, they can literally walk 2 miles from the Silver Lake reservoir to Echo Park Lake.

I-76-3 The plans we received did not include a budget. I would guess what has been proposed is quite a lot of money, time and headache to all who live here. I see so many more productive ways to spend this money. The city has so many homeless residents. The garbage and graffiti that litters our streets is an embarrassment. We moved from Chicago 8 years and have watched Los Angeles go from bad to worse. Isn't there a more productive way to utilize our money?

I-76-4 I am all for creating a less concrete type of reservoir, but if it means adding fitness facilities, kayak launch, restrooms, I say leave it alone. The residents take advantage of the walking/running path, the recreation center/grassy knoll, and the meadow. Those who come here to walk or run, appreciate it for that purpose, then leave.

With great concern,
Patti Wilcox
1862 Fanning Street

I-77

COMMENT RESPONSE

I have some concerns about this:

I-77-1 1) This retrofit is major and will result in a lot of construction traffic, which will have significant negative local impact.

2) After the retrofit is complete, it's likely that there will be an increase in use of the space. How will that be accommodated in terms of vehicle parking and traffic? Again, significant negative local impact.

I-77-4 3) Public safety. If people would actually be next to or even in the reservoir, which was originally designed to hold a large amount of water, there is a major water safety issue. This isn't Echo Park lake. Silver Lake reservoir is much deeper.

I-77-2 4) Wildlife habitat. Will existing wildlife habitat be uprooted and disturbed by the influx of patrons?

I-77-3 5) Cost vs benefit. This proposal looks costly. Do potential benefits justify the costs? Aren't there more pressing issues before the city (e.g. homelessness) that the funds allocated for this project should be addressing first? Isn't this just a luxurious transformation of what has been for so long a serene and beautiful space? Why is that no longer enough?

COMMENT RESPONSE

I-78-2 The reservoir loses about 50 million gallons of water a year to evaporation. How will this water be replaced without harming other sensitive ecological areas? Also, can we be sure that the added water will be safe (uncontaminated) for water birds and other wildlife?

Thank you!

I-79

	COMMENT	RESPONSE
I-79-1	Hi I just wanted to voice my support for the master plan project. I feel you've done a masterful (pun intended!) job of balancing the many stakeholders and opinions going into it. Hope the EIR goes well and looking forward to seeing it come to life!	

I-80

COMMENT RESPONSE

I have been a resident of Edgewater Terrace since 1999. I love my neighborhood and those who live here. As a homeowner and taxpayer I am extremely concerned with the development of the Silver Lake Reservoir into a LA destination. I have attended multiple meetings leading up to the "adoption" of the Master Plan but never were the concerns of local residents addressed.
These are issues that need to be assessed before any "Master Plan" can move forward:

I-80-5 • Cost and duration of the project - Where are the funds coming from? Never addressed was how the cost of such a large development would be covered. Will this raise local residents' property taxes ?

• Impact on traffic in an already congested area.

Edgewater Terrace is a very narrow street used as a short cut to get from Glendale Blvd to Silver Lake Blvd. We currently have multiple problems with traffic including vehicles traveling at high speeds and parked cars being sideswiped / damaged consistently.

• Parking impact on a deprived neighborhood. *** HEAVY EMPHASIS ON PARKING !!

I-80-1 Where is the plan for visitor parking other than putting the burden all on surrounding residential streets ? Edgewater Terrace is already heavily impacted by businesses on Glendale Blvd and The Meadow - especially on weekends. The street is narrower than most of the surrounding streets. The impact of congested parking actually makes our street more dangerous for residents who can't get out of their driveways and for visitors that can't navigate a busy car filled street.

(I have attached photos of the typical weekend parking situation on Edgewater Terrace.)

I-80-6 • Increase in crime, overnight encampments

• Negative impact on reservoir wild life and migratory animals

I-80-2 • Noise and light pollution

I-80-3 • Increase in litter and trash
I-80-7

I-80-4 Edgewater Terrace currently has no street sweeping. Who will be responsible to maintain the park as well as the surrounding streets impacted.

Please feel free to contact me with any questions. Edgewater Terrace is united in preventing such a massive plan to develop in a dense residential area.

I-80

COMMENT

RESPONSE

I-80

COMMENT

RESPONSE

I-81

COMMENT RESPONSE

Cost: How are we paying for this project? Will our taxes increase?

I-81-4 Encampments: What is the strategy to avoid encampments and a situation like Echo Park Lake?

I-81-1 Traffic & Parking: How can the area support an increase in vehicle traffic? What's the plan to support the uptick in parking needs so the surrounding residential areas aren't forced to absorb the impact? Paring is already difficult enough and this would make it near impossible to live near the reservoir without a dedicated spot.

I-81-2 Maintenance: Who will maintain the site (ie. cleaning bathrooms, pick up trash, close and lock gates, patrol for safety, etc)?

I-81-3 Wildlife: Will there be a negative impact on the birds and coyotes that currently live in reservoir?

COMMENT RESPONSE

I-82-1 As a homeowner on Silverlake Lake Blvd. across for the Meadow, I can attest to how much of a positive for the community the Meadow alone is, and wholeheartedly support additional redevelopment that provides even more amenities.

I-83

COMMENT RESPONSE

I have been a resident of Deane Street since 1994. I love my neighborhood and those who live here. As a taxpayer I am extremely concerned with the development of the Silver Lake Reservoir into a LA destination. I have attended multiple meetings leading up to the "adoption" of the Master Plan but never were the concerns of local residents addressed.

These are issues that need to be assessed before any "Master Plan" can move forward:

I-83-4 • Cost and duration of the project - Where are the funds coming from? Never addressed was how the cost of such a large development would be covered. Will this raise local residents' property taxes ?

• Impact on traffic in an already congested area.

Edgewater Terrace is a very narrow street used as a short cut to get from Glendale Blvd to Silver Lake Blvd. We currently have multiple problems with traffic including vehicles traveling at high speeds and parked cars being sideswiped / damaged consistently.

I-83-1 • Parking impact on a deprived neighborhood. *** HEAVY EMPHASIS ON PARKING !!

Where is the plan for visitor parking other than putting the burden all on surrounding residential streets ? Edgewater Terrace is already heavily impacted by businesses on Glendale Blvd and The Meadow - especially on weekends. The street is narrower than most of the surrounding streets. The impact of congested parking actually makes our street more dangerous for residents who can't get out of their driveways and for visitors that can't navigate a busy car filled street.

I-83-5 • Increase in crime, overnight encampments

• Negative impact on reservoir wild life and migratory animals

I-83-2 • Noise and light pollution

I-83-6 • Increase in litter and trash

I-83-7

Edgewater Terrace currently has no street sweeping. Who will be responsible to maintain the park as well as the surrounding streets impacted.

I-83-3

I am aware this is early on in the process, however, we have to begin somewhere to express our concerns. I do appreciate you taking the time to post your comments. Thank you.....

I-84

COMMENT RESPONSE

I-84-1 I live directly across from the proposed center with restrooms and kayak launch. I am opposed to both. This residential area was not designed to be either a marina or entertainment venue. It is a residential area that already has traffic, parking, and human resource problems. Adding long term infrastructure to the mix is reckless, no matter how well considered the planning.

I-84-2 In the past decade of the meadow opening, I have personally dealt with an increase of public stalking, trolling, trash, vandalism, car accidents, noise, illegal fireworks, and all manner of negligence, recklessness, and danger, all stemming from the attractive nuisance that the meadow has become, no matter how well intentioned the designers and politicians that pushed it through may have had at the time of planning.

While I considered a lawsuit at the time, I had not yet completed my education at Loyola Law School. That was a mistake. I will not make that mistake again, and look forward to the challenge presented.

Sincerely,
Nicholas Constant, Esq.

I-85

COMMENT RESPONSE

I-85-2 I am very in favor of this project. I'm submitting this to counter all of my incredibly NIMBY neighbors who are afraid that people will enjoy a tax payer funded park, might *gasp* park on free — city provided parking, and that this will somehow change their perfect neighborhood. I've lived on this street since 2013 and I think this can only bring good things. If anything I say eliminate all parking on Silver Lake boulevard, create protected bike lanes, and put in more pedestrian crossings please. Love the design and all your work. Best of luck!

I-85-1

I-86

COMMENT RESPONSE

I-87

COMMENT RESPONSE

I am a Silverlake resident. and I and my husband and dog stroll around the reservoir.
I am writing to voice my concerns about the environmental impacts that will result from the implementation of the Silverlake Reservoir Master Plan.

With adjustments we can find a way to meet the community's needs, and still preserve and protect wildlife habitat and the environment.

I-87-2 1. Please scale back Construction to meet the community's needs in ways that allow greenspace and mitigate environmental impacts: I'm concerned that the draft Master Plan will require significantly more construction than the neighborhood can endure. Years of construction will cause significant negative environmental impacts.
I-87-5 There will be loss of wildlife (for example the herons), increased noise, increased traffic, and increased air pollution. We understand that some construction is necessary. There are opportunities within the MP to scale back construction and instead create more green space gathering and learning areas,instead of adding more structures and more concrete to the Reservoir Complex. The Meadow is a wonderful example of scaled-back construction -- designed to address the needs of
I-87-7 the community in a way that also protects the environment and the serenity of the Reservoirs and its wildlife habitat. Creating more green gathering spaces will meet the community's needs, while still protecting the wildlife habitat and the environment.

2. Appropriate and flexible perimeter boundaries with gates should be retained and
I-87-8 enhanced: We must find a balance between safety and access, so that the Master Plan will offer protection for both wildlife and humans. Councilmember O'Farrell's work in Echo Park serves as an example of how we can honor and protect the community's daylight use of a space, including both housed and unhoused people, and the wildlife. I also remember how hard CD 13 worked to secure the funds to move the existing perimeter fencing around the reservoir when the jogging path was added, rather than taking it down, as some community members wanted at that time. CD 13 understood the importance of maintaining perimeter barriers, which provide guaranteed, flexible access for wildlife, and still offer daylight access for
I-87-9 humans. For these same reasons, the Master Plan should provide for retaining and possibly enhancing the permanent perimeter barriers, with gates.

3. The Knoll should be preserved, with greenspace alternatives like the Meadow and the Cedar Grove area of Griffith Park: I am particularly concerned with preserving the Knoll area which is the most significant open space for our land-based wildlife.
I-87-1 The current MP proposes building concrete structures in the Knoll, including an Education Center and a trail pavilion, and excessive re-grading of the land, all of which will result in significant negative environmental impacts. Instead, this area, where it joins the Meadow, is ideal for green space learning areas, rather than the type of heavy construction and re-grading that the MP calls for. We could also follow the example from the Cedar Grove area in Griffith Park, which prioritizes open space rather than built-up space, with natural areas for children to create their own imagination-led unstructured play.

I-88

COMMENT RESPONSE

I have been a Silver Lake resident since 2005, and a homeowner on Edgewater Terrace since 2012. This neighborhood and my neighbors are incredibly important to me.. As a homeowner and taxpayer I am extremely concerned with the development of the Silver Lake Reservoir into a LA destination because the very real concerns of local residents have yet to be addressed. Before any "Master Plan" can move forward, these issues are critical to address and discuss with Silver Lake residents who will be the most impacted:

I-88-5 • Cost and duration of the project - Where are the funds coming from? Never addressed was how the cost of such a large development would be covered. Will this raise local residents' property taxes ?

• Impact on traffic in an already congested area.

Edgewater Terrace is a very narrow street used as a short cut to get from Glendale Blvd to Silver Lake Blvd. We currently have multiple problems with traffic including vehicles traveling at high speeds and parked cars being sideswiped / damaged consistently.

I-88-1 • Parking impact on a deprived neighborhood. *** HEAVY EMPHASIS ON PARKING !!

Where is the plan for visitor parking other than putting the burden all on surrounding residential streets ? Edgewater Terrace is already heavily impacted by businesses on Glendale Blvd and The Meadow - especially on weekends. The street is narrower than most of the surrounding streets. The impact of congested parking actually makes our street more dangerous for residents who can't get out of their driveways and for visitors that can't navigate a busy car filled street. WE HAVE A LOT OF YOUNG KIDS living on this small street and their safety is critical.

I-88-6 • Increase in crime, overnight encampments

• Negative impact on reservoir wildlife and migratory animals

I-88-2 • Noise and light pollution

I-88-3 • Increase in litter and trash

Edgewater Terrace currently has no street sweeping. Who will be responsible to
I-88-4 maintain the park as well as the surrounding streets impacted?

All of these issues need to be adequately addressed as a condition of the Master Plan. Thank you.

I-92

COMMENT RESPONSE

Giving comments intimidates me. I'm not an engineer, I'm not a policy maker, my vocabulary isn't full of the perfect words. But I feel it's important to register my take on the proposed Silver Lake Reservoirs Master Plan (isn't this the 2nd or 3rd time there's been a proposed project like this?). As a community-active resident whose home overlooks the Silver Lake Reservoir (east side, off Cove Avenue) my family and I have valued our neighborhood during the 40-plus years we've lived here. I strongly object to these ambitious Project plans that are TOO infringing, TOO fraught with catastrophe, and ask TOO much of those who live here. The term 'NIMBY-ism' is tainted as a bad thing, but TRULY, this Project hijacks one of the LAST REMAINING SERENE PLACES in this busy city and turns it into an entertainment hub
I-92-1 -- with NO PLAN for PARKING/TRAFFIC/CONGESTION and, frankly, ensuring DISRUPTION to the entire neighborhood on a daily basis – during construction AND day-to-day long-term use after completion.

WHY are funds being used for zip code 90039? We have our fair share! We already enjoy Silver Lake walking paths, neighborhood recreation center, 2 dog parks, basketball court, playground and the meadow (its crowding and lack of parking notwithstanding); not to mention the VIEW and the PASSIVE ability to enjoy the space. Within a few miles we have access to Echo Park Lake if we want swan boats
I-92-10 and turtles; the LA River if we want bike paths and kayak rides; and, for goodness' sake, Griffith Park - that offers practically everything under the sun. Public parks and improvements should be sprouting up in less-fortunate areas of the city. This EXPENSIVE PROJECT is just NOT necessary!

I strongly OPPOSE the proposed Project, in its entirety. For all its feel-good elements, it's like plunking down a Disneyland in a neighborhood. 'Build It And They Will Come' seems an appropriate analogy. Ok, so it's built and they DO COME: WHERE will
I-92-2 they PARK? I've attended almost every community meeting regarding this issue, and when Traffic and Parking issues have been raised by constituents, we're told by the Project Leaders that THAT issue is a 'next step' – you mean, AFTER it's already completed? We're all left to deal with the AFTERMATH of hoards of people flocking to the neighborhood? THIS IS A NEIGHBORHOOD! Not a commercial zone!

Why can't the 'powers that be' recognize and VALUE of the Reservoir AS IS? A quiet place in a bustling city? Surely THAT is more precious and to be fully regarded as UNIQUE – ALREADY a destination. Adding these, frankly, STUPID options to the site
I-92-3 demeans its true value.

HISTORY. We are supposed to learn from HISTORY. What about the HISTORY of Echo
I-92-11 Park Lake and its shameful homeless encampments? What about the HISTORY of
I-92-4 adding the meadow and its resulting traffic and parking issues? What about the
I-92-5 HISTORY of wildlife interruption as the result of past changes? The HISTORY of
I-92-6 construction and noise and air quality disruptions when the reservoir was dry? The HISTORY of "another white affluent neighborhood getting more stuff" while less
I-92-8 fortunate neighbors are overlooked? A HISTORY of water safety (or lack of safety)? The HISTORY of fire-fighting helicopters needing access to the water? Tom LaBonge's
I-92-9 legacy?

Just, please: LEAVE IT BE!!!

I-93

COMMENT RESPONSE

I-93-1	Please consider making the project as friendly to wild creatuers as to human creatures. places for passive viewing. minimum of infra-structure. a place for quietude in the midst of the City as well as passive recreation. this is such a once in a lifetime treasure. thank you.

I-94

COMMENT RESPONSE

I-94-1 I would vastly prefer no change to the reservoir. As a 40-year resident lakeside, the neighborhood is currently overwhelmed with foot traffic, parking issues, and congestion. Traffic is currently unbearable; adding any element of an attraction to this location would be a disaster. The lake is currently, and always has been, enjoyed with a reasonable, limited access providing animal residences within the reservoir area. This wildlife already adds a tremendous amount of joy and opportunities for

I-94-2 hillside wildlife. Preserving and not displacing this wildlife should be a priority, as it has assimilated itself and is currently coexisting with the neighborhood. Please reconsider all or most of these amendments to the environment.

I-95

COMMENT RESPONSE

I am a Silverlake resident and my family and I have cherished our time at the reservoir for many years. . I am writing because I have grave concerns about the Silverlake Reservoir Master Plan.

I-95-7 1. Construction should be scaled back to minimize disturbances to the neighborhood and impact on the reservoir's natural beauty. The reservoir is probably the single
I-95-2 most factor that Silverlake such a special community. We will lose wildlife, endure greater pollution and suffer more traffic. There are opportunities within the Master Plan to scale back construction and instead create more greenspace gathering and
I-95-4 learning areas, rather than adding more structures and more concrete to the Reservoir Complex.

I-95-5 2. Perimeter boundaries with gates should be retained and enhanced: We must find a balance between safety and access, so that the Master Plan will offer protection for both wildlife and humans. Councilmember O'Farrell's work in Echo Park serves as an example of how we can honor and protect the community's daylight use of a space, including both housed and unhoused people, and the wildlife. I also remember how hard CD 13 worked to secure the funds to move the existing perimeter fencing around the reservoir when the jogging path was added, rather than taking it down, as some community members wanted at that time. CD 13 understood the importance of maintaining perimeter barriers, which provide guaranteed, flexible access for wildlife, and still offer daylight access for humans. For these same reasons, the Master Plan should provide for retaining and possibly enhancing the permanent perimeter barriers, with gates.

I-95-6 3. The Knoll should be preserved, with greenspace alternatives like the Meadow and the Cedar Grove area of Griffith Park: I am particularly concerned with preserving the Knoll area which is the most significant open space for our land-based wildlife. The current MP proposes building concrete structures in the Knoll, including an Education Center and a trail pavilion, and excessive re-grading of the land, all of which will result in significant negative environmental impacts. Instead, this area, where it joins the Meadow, is ideal for greenspace learning areas, rather than the type of heavy construction and re-grading that the MP calls for. We could also follow the example from the Cedar Grove area in Griffith Park, which prioritizes open space rather than built-up space, with natural areas for children to create their own imagination-led unstructured play.

I-96

COMMENT RESPONSE

I-96-1 I am most concerned with the proposal to include a kayak launch in the meadow, because I strongly believe that recreational water sports will disrupt the wildlife that depends on the green space provided by Sliver Lake. Water sports would also significantly change the traffic to our neighborhood, and worsen our already limited parking. The upkeep required to make such activities safe and clean (ie. preventing aquatic littering and enforcing life vests) seems exorbitant and unnecessary.

I-96-2

I-96-3

I-97

COMMENT RESPONSE

I-97-1 I would ask that you try, at all costs, to include at least some sections of asphalt removal along the banks, and replacement with terrraced, naturalized edges with native plantings. This is crucial for habitat and is what many of us in the neighborhood have long dreamed about!

As a working dam, we understand that this cannot be completed everywhere, but we must have sections on the banks that are natural.

COMMENT RESPONSE

Please consider our concerns as I have been a resident of silverlake since 2000.

I-98-5 • Increase in crime, overnight encampments

I-98-1 • Negative impact on reservoir wild life and migratory animals

I-98-2 • Noise and light pollution

I-98-3 • Increase in litter and trash

I-98-4 • Impact on traffic in an already congested area
• Parking impact on a deprived neighborhood.

I-99

COMMENT RESPONSE

I-99-1 I'm concerned about the cost and the disruption of this project. The area is already a
I-99-3 mess with regard to parking, traffic, congestion etc. And as more people come into
the area, what impact will that have crime? The homeless have parked all over as it
I-99-4 is. I really do not want Silver Lake to become what Echo Park was prior to the
O'Farrel cleanup. Can you guarantee the Lake will be fenced as Echo Park is now?
There's also a need to consider the natural habitat wildlife that currently exists. How
I-99-2 will this redesign impact that?
And how will the rise in visitors impact the peace and quiet in the neighborhood. It
just seems like the Silver Lake area has become such a destination at the expense
of those who are stakeholders in the community already. I don't see the need for this
I-99-5 work to happen and would vote against all but essential repairs to the existing area
with no new expensive, destructive to the community design needed.
We have Griffith Park minutes away. Do we really need more community space than
the already expansive Griffith Park? Please Silver Lake alone.

I-100

COMMENT RESPONSE

I am a Silverlake resident. My family and I regularly walk around the reservoir, and use the existing reservoir complex for recreation. I am writing to voice my concerns about the environmental impacts that will result from the implementation of the Silverlake Reservoir Master Plan. I strongly believe that with some compromise, we can find a way to meet the community's needs, and still preserve and protect wildlife habitat and the environment.

I-100-1 1. Construction should be scaled back to meet the community's needs in ways that offer greenspace alternatives and mitigate environmental impacts: I'm concerned that the draft Master Plan will require significantly more construction than the neighborhood can endure. Years of construction will cause significant negative
I-100-3 environmental impacts. There will be loss of wildlife (for example the herons), increased noise, increased traffic, and increased air pollution. We understand that some construction is necessary. There are opportunities within the MP to scale back construction and instead create more greenspace gathering and learning areas, rather than adding more structures and more concrete to the Reservoir Complex. The Meadow is a wonderful example of scaled-back construction -- designed to
I-100-7 address the needs of the community in a way that also protects the environment and the serenity of the Reservoirs and its wildlife habitat. Creating more green gathering spaces will meet the community's needs, while still protecting the wildlife habitat and the environment.

I-100-6 2. Appropriate and flexible perimeter boundaries with gates should be retained and enhanced: We must find a balance between safety and access, so that the Master Plan will offer protection for both wildlife and humans. Councilmember O'Farrell's work in Echo Park serves as an example of how we can honor and protect the community's daylight use of a space, including both housed and unhoused people, and the wildlife. I also remember how hard CD 13 worked to secure the funds to move the existing perimeter fencing around the reservoir when the jogging path was added, rather than taking it down, as some community members wanted at that time. For these same reasons, the Master Plan should provide for retaining and possibly enhancing the permanent perimeter barriers, with gates.

Thank you.

I-101

COMMENT RESPONSE

I'm wholeheartedly in favor of the plan's greatly expanded public use of the Silver Lake property.

I-102

COMMENT RESPONSE

I am writing to express my strong support for the Silver Lake Master Plan and the proposed revision and restoration of the reservoir complex. The benefits of the project are many: turn a concrete lined water pit into an attraction for waterfowl and other birds; provide folks in the city with a much more attractive park for them to enjoy, provide a long term use for the reservoir thus ensuring its continued viability, and greatly enhancing the aesthetics of the area. The plan provides additional cultural resources and will greatly improve the existing resources at the Recreation Center and Dog Park. Please support this project and see it forward!

I-103

	COMMENT	RESPONSE
I-103-2	In thinking bout this further it seems to me the education center is truly not a good idea. we don't need another building at all. green space should be prioritized. No concrete structures either. We definitely need to be able to lock this space up at night as we do now or we are asking for trouble. The fence should be as ornamental as possible though not just another ugly cyclone fence.	
I-103-4	Restoration to wetlands must include removal of the awful cement sides.	
I-103-3 I-103-1	No kayak access! That will lead to humans invading the wildlife island areas and possible accidents.	

I-104

COMMENT RESPONSE

I-104-1 I support this plan and have no major concerns. The wetlands restoration will be a welcome asset for the birds. can't wait! I don't however, see any descriptions for bathrooms for the public. Are they to be included later? thanks

I-105

COMMENT RESPONSE

I am a Silverlake resident. My family and I regularly walk around the reservoir, and use the existing reservoir complex for recreation. I am writing to voice my concerns about the environmental impacts that will result from the implementation of the Silverlake Reservoir Master Plan. I strongly believe that with some compromise, we can find a way to meet the community's needs, and still preserve and protect wildlife habitat and the environment.

The project description contained in the draft EIR is too short and vague, and gives no information on the anticipated length of construction or the anticipated intensity
I-105-7 of construction. For example, re-grading of The Knoll is not even mentioned in the description. This makes it difficult to comment on all of the potential environmental impacts from implementation of the Master Plan. But, below are some of my main concerns.

I-105-1 1. Construction should be scaled back to meet the community's needs in ways that offer greenspace alternatives and mitigate environmental impacts: I'm concerned that the draft Master Plan will require significantly more construction than the neighborhood can endure. Years of construction will cause significant negative
I-105-3 environmental impacts. There will be loss of wildlife (for example the herons), increased noise, increased traffic, and increased air pollution. We understand that some construction is necessary. There are opportunities within the MP to scale back construction and instead create more greenspace gathering and learning areas, rather than adding more structures and more concrete to the Reservoir Complex. The Meadow is a wonderful example of scaled-back construction -- designed to
I-105-8 address the needs of the community in a way that also protects the environment and the serenity of the Reservoirs and its wildlife habitat. Creating more green gathering spaces will meet the community's needs, while still protecting the wildlife habitat and the environment.

I-105-6 2. Appropriate and flexible perimeter boundaries with gates should be retained and enhanced: We must find a balance between safety and access, so that the Master Plan will offer protection for both wildlife and humans. Councilmember O'Farrell's work in Echo Park serves as an example of how we can honor and protect the community's daylight use of a space, including both housed and unhoused people, and the wildlife. I also remember how hard CD 13 worked to secure the funds to move the existing perimeter fencing around the reservoir when the jogging path was added, rather than taking it down, as some community members wanted at that time. CD 13 understood the importance of maintaining perimeter barriers, which provide guaranteed, flexible access for wildlife, and still offer daylight access for humans. For these same reasons, the Master Plan should provide for retaining and possibly enhancing the permanent perimeter barriers, with gates.

I-105-9 3. The Knoll should be preserved, with greenspace alternatives like the Meadow and the Cedar Grove area of Griffith Park: I am particularly concerned with preserving the Knoll area which is the most significant open space for our land-based wildlife. The current MP proposes building concrete structures in the Knoll, including an Education Center and a trail pavilion, and excessive re-grading of the land, all of which will result in significant negative environmental impacts. Instead, this area, where it joins the Meadow, is ideal for greenspace learning areas, rather than the type of heavy construction and re-grading that the MP calls for. We could also follow the example from the Cedar Grove area in Griffith Park, which prioritizes open space rather than built-up space, with natural areas for children to create their own imagination-led unstructured play.

I-106

COMMENT RESPONSE

I am a resident of the City of LA. My daughter and her family (including 2 adult children) live in Silverlake, and they regularly walk and jog around the reservoir, and my grandson used the existing reservoir complex for all of his sports as a child growing up. I attended many of his basketball games there, too. I am writing to voice my concerns about the environmental impacts that will result from the implementation of the Silverlake Reservoir Master Plan. I strongly believe that with some compromise, we can find a way to meet the community's needs, and still preserve and protect wildlife habitat and the environment.

I-106-1 1. Construction should be scaled back to meet the community's needs in ways that offer greenspace alternatives and mitigate environmental impacts: I'm concerned that the draft Master Plan will require significantly more construction than the neighborhood can endure. Years of construction will cause significant negative
I-106-8 environmental impacts. There will be loss of wildlife (for example the herons), increased noise, increased traffic, and increased air pollution. We understand that some construction is necessary. There are opportunities within the MP to scale back construction and instead create more greenspace gathering and learning areas, rather than adding more structures and more concrete to the Reservoir Complex. The Meadow is a wonderful example of scaled-back construction -- designed to
I-106-7 address the needs of the community in a way that also protects the environment and the serenity of the Reservoirs and its wildlife habitat. Creating more green gathering spaces will meet the community's needs, while still protecting the wildlife habitat and the environment.

I-106-2 2. Appropriate and flexible perimeter boundaries with gates should be retained and enhanced: We must find a balance between safety and access, so that the Master Plan will offer protection for both wildlife and humans. Councilmember O'Farrell's work in Echo Park serves as an example of how we can honor and protect the community's daylight use of a space, including both housed and unhoused people, and the wildlife. I also remember how hard CD 13 worked to secure the funds to move the existing perimeter fencing around the reservoir when the jogging path was added, rather than taking it down, as some community members wanted at that time. CD 13 understood the importance of maintaining perimeter barriers, which provide guaranteed, flexible access for wildlife, and still offer daylight access for humans. For these same reasons, the Master Plan should provide for retaining and possibly enhancing the permanent perimeter barriers, with gates.

I-106-8 3. The Knoll should be preserved, with greenspace alternatives like the Meadow and the Cedar Grove area of Griffith Park: I am particularly concerned with preserving the Knoll area which is the most significant open space for our land-based wildlife. The current MP proposes building concrete structures in the Knoll, including an Education Center and a trail pavilion, and excessive re-grading of the land, all of which will result in significant negative environmental impacts. Instead, this area, where it joins the Meadow, is ideal for greenspace learning areas, rather than the type of heavy construction and re-grading that the MP calls for. We could also follow the example from the Cedar Grove area in Griffith Park, which prioritizes open space rather than built-up space, with natural areas for children to create their own imagination-led unstructured play.

I-107

COMMENT RESPONSE

Hello,
I am a longtime Silverlake resident. My family and I regularly walk around the reservoir, and use the existing reservoir complex for recreation. I am writing to voice my concerns about the environmental impacts that will result from the implementation of the Silverlake Reservoir Master Plan. I strongly believe that with some compromise, we can find a way to meet the community's needs, and still preserve and protect wildlife habitat and the environment.

I-107-1 1. I have concern about the large amount of construction planned Construction should be scaled back to meet the community's needs in ways that offer greenspace alternatives and mitigate environmental impacts: I'm concerned that the draft Master Plan will require significantly more construction than the neighborhood can endure. Years of construction will cause significant negative environmental impacts.

I-107-3 There will be loss of wildlife (for example the Great Blue Herons that the lake has supported for many years), increased noise, increased traffic, and increased air pollution. We understand that some construction is necessary. There are opportunities within the MP to scale back construction and instead create more greenspace gathering and learning areas, rather than adding more structures and more concrete to the Reservoir Complex. The Meadow is a wonderful example of

I-107-7 scaled-back construction -- designed to address the needs of the community in a way that also protects the environment and the serenity of the Reservoirs and its wildlife habitat. Creating more green gathering spaces will meet the community's needs, while still protecting the wildlife habitat and the environment. I am particularly concerned about the loss of the Great Blue Herons nesting area on the west side of the lake. This is unique urban wildlife habitat that should be protected to allow our declining bird populations to continue to exist!

I-107-8

2. Appropriate and flexible perimeter boundaries with gates should be retained and enhanced: We must find a balance between safety and access, so that the Master Plan will offer protection for both wildlife and humans. Councilmember O'Farrell's work in Echo Park serves as an example of how we can honor and protect the community's daylight use of a space, including both housed and unhoused people, and the wildlife. I also remember how hard CD 13 worked to secure the funds to move the existing perimeter fencing around the reservoir when the jogging path was added, rather than taking it down, as some community members wanted at that time. CD 13 understood the importance of maintaining perimeter barriers, which provide guaranteed, flexible access for wildlife, and still offer daylight access for humans. For these same reasons, the Master Plan should provide for retaining and possibly enhancing the permanent perimeter barriers, with gates.

I-107-9 3. Eliminate the swimming and kayaking. The lake is small and human intrusion into the water will scare off many of the birds that use the lake as a stop during migration up and down the coast. Swimmers may also introduce disease to the water. Fishing is also intrusive. It would be better to keep the fence around the lake

I-107-6 and have no water activities, which are noisy, and would need extra staffing to monitor.

I-107-10 4. The Knoll should be preserved, with greenspace alternatives like the Meadow and the Cedar Grove area of Griffith Park: I am particularly concerned with preserving the Knoll area which is the most significant open space for our land-based wildlife. The current MP proposes building concrete structures in the Knoll, including an Education Center and a trail pavilion, and excessive re-grading of the land, all of which will result in significant negative environmental impacts. Instead, this area, where it joins the Meadow, is ideal for greenspace learning areas, rather than the type of heavy construction and re-grading that the MP calls for. We could also follow the example from the Cedar Grove area in Griffith Park, which prioritizes open space rather than built-up space, with natural areas for children to create their own imagination-led unstructured play.

Please act to preserve as much of the natural space as possible while offering peaceful open space for our community.

I-108

COMMENT RESPONSE

I-108-1 One of the marvels of living in Silverlake is our lake with it's sadly unloved fence surrounding it
That fence has been up up for over 100 years (I have a photo) and has done two jobs : protected the reservoir from human intrusion, and has inadvertently created an oasis for wildlife mostly free from the surrounding population.
Any development that threatens the wildlife within the currently protected acreage would be a travesty.
I hope that is taken into account during every phase of your EIS.
Thanks!

I-109

COMMENT RESPONSE

I have been a Silverlake resident since 1996. My wife and I walk around the reservoir daily. My daughter and I run around it. We all use the existing reservoir complex for recreation. I'd like to voice my concerns about the environmental impacts that will result from the implementation of the Silverlake Reservoir Master Plan. With some compromise, we can find a way to meet the community's needs, and still preserve and protect wildlife habitat and the environment.

1. There are opportunities within the MP to scale back construction and instead create more greenspace gathering and learning areas, rather than adding more structures and more concrete to the Reservoir Complex. The Meadow is a wonderful example of scaled-back construction -- designed to address the needs of the community in a way that also protects the environment and the serenity of the Reservoirs and its wildlife habitat. Creating more green gathering spaces will meet the community's needs, while still protecting the wildlife habitat and the environment.

I-109-1 2. Appropriate and flexible perimeter boundaries with gates should be retained and enhanced: We must find a balance between safety and access, so that the Master Plan will offer protection for both wildlife and humans. Councilmember O'Farrell's work in Echo Park serves as an example of how we can honor and protect the community's daylight use of a space, including both housed and unhoused people, and the wildlife. I also remember how hard CD 13 worked to secure the funds to move the existing perimeter fencing around the reservoir when the jogging path was added, rather than taking it down, as some community members wanted at that time. CD 13 understood the importance of maintaining perimeter barriers, which provide guaranteed, flexible access for wildlife, and still offer daylight access for humans. For these same reasons, the Master Plan should provide for retaining and possibly enhancing the permanent perimeter barriers, with gates.

I-109-2 3. The Knoll should be preserved, with greenspace alternatives like the Meadow and the Cedar Grove area of Griffith Park: I am particularly concerned with preserving the Knoll area which is the most significant open space for our land-based wildlife.

I-109-3 The current MP proposes building concrete structures in the Knoll, including an Education Center and a trail pavilion, and excessive re-grading of the land, all of which will result in significant negative environmental impacts. Instead, this area, where it joins the Meadow, is ideal for greenspace learning areas, rather than the type of heavy construction and re-grading that the MP calls for. We could also follow the example from the Cedar Grove area in Griffith Park, which prioritizes open space rather than built-up space, with natural areas for children to create their own imagination-led unstructured play.

I-110

	COMMENT	RESPONSE
I-110-1	I'm concerned about ensuring security for wildlife and losing wildlife habitat because of too many structures, too much concrete.	

I-111

COMMENT RESPONSE

Additional comment:

I've lived in Silver Lake for a long time and have seen many changes to the area around the reservoir. I really fail to see what problem this master plan is actually solving. I can see problems that it might be creating: traffic, parking and water safety. I can see a cost issue. And i really have to wonder about other neighborhoods in Los Angeles where all the funds for this Silver Lake Reservoir master plan might be better spent on local parks in neighborhoods where such essential infrastructure lacking or neglected.

I-111-1

I-111-2

The current reservoir area is just fine and enjoyed by many on a daily basis all these changes aren't really adding much; they come off as luxurious amenities catering to a class of people who simply expect too much. Silver Lake is just fine. Other parts of Los Angeles are more in need. Let these funds go to areas of greater need.

I-112

COMMENT RESPONSE

I-112-3 As a resident I'm extremely concerned about the effects of long-term construction on the existing wildlife in the area, as well as the impact both from a noise and air pollution standpoint for those of us that live around the reservoir.

I-112-1 Additionally the plan does not show perimeter fencing which, as a long-term solution, would have a major lasting impacts on maintaining wildlife safety and habitat.

I-113

COMMENT RESPONSE

I-113-2
I-113-1

The Coyotes that normally lived in the meadow and the knoll are increasingly coming into the neighborhood which impacts their safety. We see this now with a continual construction by DWP. By further reducing the knoll and increasing green space (which we don't seem to need as the meadow is just dying grass which is not used to capacity) will further reduce wildlife population in our area. Additionally the herons that nest ion front of our home will not return to this area once the construction begins again. We've seen this before with the continual draining and refilling of the reservoir. The heron population has decreased substantially in the last 10 years.

I-114

COMMENT RESPONSE

I-114-1 I support fencing off the reservoir with tastefully designed fencing (not simple cyclone fencing) so that hours of accessibility are limited to something like 7 am to 10 pm daily. And locked after hours. We need to keep out homeless encampments and give wildlife a chance to rest. I also oppose any kayaks on the reservoir.

I-114-2

Rod Crosby

I-115

COMMENT RESPONSE

As a resident of the Silver Lake reservoir I am adamantly opposed to the proposed Silver Lake Reservoir Complex Master Plan.
Primary concerns as follows:

I-115-4 -Timeline/timeframe is absolutely absurd. 8 phases at 18-24 months each?! With anticipation of continued halted funding (as it was stated funding would need to be raised during the project). We're looking at 15-20 years (and that's being "optimistic"). Thus, all concerns listed below are additionally in the context of a 15-20 year project.

I-115-1 -Wildlife will suffer. Access to a currently secured habitat in addition to access to water at the reservoir (as I'm sure it will be drained for who knows how many years over the currently proposed 15-20 year plan) will lead to plummeting populations of wildlife in addition to an increase in aggressive behavior of wildlife as they will be in desperate search of water. Increased aggressive behaviors of, for example, coyotes in search of water poses increased risk of danger to children, pets and our disabled individuals that frequent the park.

I-115-2 -Traffic/parking. At this time parking and traffic are both chronic problems in Silver Lake. The timeframe of closing down streets for the next 15-20years will be catastrophic in regards to exacerbating an already contentious issue in the Silver Lake community. Additionally, once the Complex is built, where is there allocated parking for park attendees? Residents of the reservoir will obtain "permit parking only" on all of the nearby streets of the reservoir if this plan moves forward as a solution to address exacerbation of the current parking problem and where will park visitors be able to park? Bank of America is not a solution, it is a temporary bandaid with poor adhesives.

I-115-3 -Public access to green space. The 15-20 proposed "8 phases at 18-24 months each" with the anticipated halts due to inevitable lack of funding means that everyone living in the Silver Lake community and nearby areas that utilize any part of the Silver Lake Reservoir will not have any access for up to 20 years? Please tell me i'm misinformed on this. Additionally, cities known for green spaces such as Austin have public swimming available. The current proposed plan should have incorporated public swimming (given so few options for public swimming in Los Angeles) in harmony with the wildlife reserve.

I-115-5 -COST!! The amount of money proposed (upwards to a quarter of a billion dollars) to do what? Silver Lake Reservoir does not need an educational center (waste of money and space). How is this money going to be raised? Starting a project without having the money in hand, it could be 50+ years until this project is completed with inflation, supply chain issues, increased building costs and the uncertainty that the COVID pandemic has placed on our economy. Not to mention, we have a homeless crisis in LA!! It is morally and ethically irresponsible to "raise" this obscene amount of money on a Park that is already beautiful and utilized to it's fullest when this money is needed to address the unhoused individuals currently living in Silver Lake. Not to mention, look at Echo Park Lake. After being renovated it cost millions upon millions of dollars to "clean up" the homeless encampments. Unhoused people are temporarily in hotels through Project Room Key and will unfortunately be back on the streets once funding is gone. Currently Echo Park Lake has a metal fence around it as a "solution" to keeping out unhoused individuals. Don't let Silver Lake be the next center of hypocrisy in the Los Angeles housing crisis. We are better than that as a community.

I-115-6 I will say, I am absolutely open to Silver Lake Reservoir/Park being renovated, however with a time-frame not to exceed 2-5 years and at a fraction of the budget in addition to consideration of concerns listed above.

I-115-7 The current plan is not ethically sustainable given the humanitarian landscape we are currently in. I also still have no clue how this money will actually be raised and have concerns regarding the ethics of that process as well.

I-116

COMMENT RESPONSE

Don't let the name fool you: Silverlake Wildlife Sanctuary is a cover for NIMBY's who don't want folks from outside the neighborhood to enjoy our Reservoir's potential. As another commenter remarked at a recent meeting, the reservoir campus's current state of massive amounts of concrete and asphalt offer little or no food or protection for the birds and other wildlife that inhabit the reservoir. Only herons sleep overnight there, and only seasonally. The others go elsewhere for protection and food. I vote for progress AND wildlife, and represent a growing contingent who believe that not only is it NOT unrealistic that both people and wildlife can EXIST together according to the plans offered, but that they'll indeed THRIVE in far better ways than they are now.

I-117

COMMENT RESPONSE

Maintaining the balance between wildlife habitat and human activity is essential. During construction, sensitivity to bird nesting (e.g. Great Blue Herons) should be considered, and construction activity limited in those areas.

I-117-1 Primary concerns are these:

1. Preservation and enhancement of wildlife nesting, feeding, and roosting areas, and minimizing human disruption of this.

I-117-2 2. There should be NO large events or festivals planned for the complex. This is primarily a residential area and there is absolutely no parking available. With the improvements, it is realistic to expect increased visitation, which in itself, will impact traffic and parking in the area. Also, loud noise with music, crowds, etc may disrupt wildlife.

2. This should not be a repeat of what occurred at Echo Park Lake after the lengthy and costly renovation. Rules regarding camping should be established and enforced. This area should be accessible by ALL, and we should ALL comply with rules and guidelines for a positive experience for everyone.

I-117-3 3. Safety and maintenance. This area is currently used during daylight and evening hours, and everyone should feel safe at all times. Also, being new, it will likely be a target for vandalism and graffiti. This should be considered in the maintenance of the area, and proactive efforts such as security patrols should be considered.

4. Education is an important aspect and I'm glad to see that there has been consideration made for students and others to visit the area and learn about the plants and animals.

I-119

COMMENT RESPONSE

I may not live close by but I can see the real value to saving this area. Day after day wildlife habitat is destroyed by development or segmented till there is no contiguous lands. America's wildlife is precious and ads to the nature that surrounds us. Habitat protects water resources, homes for birds that bring us joy with their songs, that help eat pests, and scatter seeds. We cannot just live in a concrete

I-119-1
I-119-2

jungle. Think of the recreational value in this place for those who live in the city, a chance to be in natural surroundings, and learn about them. Chances don't come like this very often and YOU MUST care for this fragile habitat and ensure that it remains protected.PLEASE do ALL YOU can to save and even expand it if possible. YOU will NOT be sorry!

I-120

COMMENT RESPONSE

We live in Sliver Lake. My wife and daughter and I walk around the lake and the Rec
I-120-1 Center and appreciate the value that the reservoir has as important bird habitat. We
I-120-2 are concerned about the destruction and reduction of habitat for wildlife. We are
concerned about the increased noise and traffic. The proposed construction is too
I-120-4 much and the plans should be scaled back to try to offer recreational benefit to the
community while still retaining the beauty of the Reservoirs' wildlife habitat. We
appreciate that the city needs to provide more park space for residents but Silver
Lake is between two very large urban parks - Griffith and Elysian. The City should
economize on the scale of this project and use scarce resources to improve and
develop parks closer to residents that lack our park access. Park facilities in the
area need attention - Elysian needs an overhaul of its ancient irrigation system, the
I-120-6 Griffith Pool needs work, and the Bellevue Recreation Center. Water sports are an
inappropriate use - Kayaking launch into the Lake is not a good idea. Removing
most all of the bird nesting habitat area and allowing people so much access is a
I-120-5 mistake. We involved ourselves in the lengthy review process in good faith and are
dismayed that the final plans do not have the balance between community
recreational needs and wildlife habitat that we consider so important.

I-121

COMMENT RESPONSE

As a neighbor and homeowner living right by The Reservoir - I have a day to day - 24 hour perspective of how life is now and what it could become if this Master Plan is implemented. I see nothing but NEGATIVE impacts from this Master Plan Proposal and have expressed as much all through the community meetings that were held back in 2019. It appears that NO ONE at The City is listening to the homeowners and neighbors concerns. Maybe we need to start speaking more loudly?
What is being proposed with have a MASSIVELY NEGATIVE impact on our lives here. Here's a list of some of them:

1) Increase traffic in an already congested and overly impacted area. This dangerous. There is no place for all of this traffic to go now. What happens once it increases?

2) Parking is a HUGE concern. Our street (EDGEWATER TERRACE) is already a nightmare from all the businesses on Glendale Blvd and people going to the Silver Lake Meadow. We have speeding cars using our streat as a cut through. We have drunk drivers and Uber drivers recklessly speeding down our street every night courtesy of all the bars on Glendale Blvd. Our street is incredibly narrow, which
I-121-1 makes all of this increased traffic VERY DANGEROUS.
On the note of our street being so narrow, when there are cars parking up and down it - residents literally can not back out of their driveways. Again, very dangerous. What happens when there is an emergency and we can't get out? Will the resident be forced to bring lawsuits against the City? Or, will the City come and re- engineer the street increasing the size of everyone home's driveway apron and paint the curbs red across from the driveway aprons so that people be able to back their cars out in order for the City to avoid liability when an emergency arises and people can't get out of their homes, or emergency personal can't get access to their homes.

3) This Master Plan will cause an increase in crime and overnight homeless
I-121-6 encampments. Where is the money to stop these things from happening?

I-121-3 4) What about all the increase in Noise and light pollution??? We already deal with CONSTANT NUISANCE issues from the bars on Glendale Blvd. We have drunk patrons
I-121-7 that disturb the peace, destroy property, engage in public urination and defecation. Are you asking the neighboring residents and the LAPD to take on more of these problems? We are already forced to call 911 so often at night due to all the drunks from the bars. Are you suggesting that with the Master Plan projects that we will be asked to endure more of this???

5) Increase in Litter and Trash. How will the City deal with this? As it is now, we have
I-121-4 quite a bit of trash left on our streets, sidewalks, and front yards from people that go to The Silver Lake Meadow and people that party at night from the bars.

6) HUGE NEGATIVE impact on all the birds and wildlife that currently call the
I-121-5 Reservoir home. What will become of them once their home is destroyed.

I-122

	COMMENT	RESPONSE
I-122-1	I think this is a fantastic idea. Less concrete and more plant life around the reservoir can only help the environment for both the residents and wildlife of the area. The design also appears thoughtful and inclusive. I believe it would be a huge improvement for the neighborhood as well as the city at large.	

I-123

	COMMENT	RESPONSE
I-123-1	I am worried about the impact the new structures are going to have on the wildlife. Protecting the wildlife has to be the top priority.	

I-124

	COMMENT	RESPONSE
I-124-1	Love the project as designed! After substantial public comment and engagement, we've got a great plan that deserves to move forward as submitted.	

I-125

COMMENT RESPONSE

I-126-1 | ESTABLISH A SILVER LAKE WILDLIFE SANCTUARY NOW

I-127

COMMENT RESPONSE

Environmental issues to be considered:

1. Structural safety of the dam by changing the embankment .

I-127-1

2. Public safety of accessing a body of Water that is 40 feet deep.
The existing fence serves this purpose now.

3. Impact of wildlife: Native and migratory and nesting birds as the public

I-127-2 is accessing the waterlines .

4. Limited street access to the reservoir area.

I-127-3

I-128

COMMENT RESPONSE

Areas of concern: 1. Safety—for people accessing the lake and the effect of

I-128-1 changes to the embankments on the integrity of the earth fill dam, 2. Impact on

infrastructure—access to the area is only by limited narrow streets. What will be

I-128-2 the impact of. Construction and delays 3. Issues that will arise from insufficient

I-128-3 funding, and what is left half done. 4 .Loss of quiet natural habitat.

I was region seven representative on the SLNC for three years. I well know how

difficult and contentious this process has been. We couldn't even get the dog park

I-128-5 users to help take care of the dog park. The process we are about to embark on will

be problems on steroids.. There will be social costs and conflicts that will impact the

community

I-129

COMMENT RESPONSE

I am a Los Angeles resident. My daughter and her family (with two young adult kids) live in Silverlake, just 3 miles from my home. We regularly walk around the reservoir together, and my grandchildren use the existing reservoir complex for recreation (my grandson played many of his youth sports games there). I am writing to voice my concerns about the environmental impacts that will result from the implementation of the Silverlake Reservoir Master Plan. I strongly believe that with some compromise, we can find a way to meet the community's needs, and still preserve and protect wildlife habitat and the environment.

I-129-1 1. Construction should be scaled back to meet the community's needs in ways that offer greenspace alternatives and mitigate environmental impacts: I'm concerned that the draft Master Plan will require significantly more construction than the neighborhood can endure. Years of construction will cause significant negative environmental impacts. There will be loss of wildlife (for example the herons), increased noise, increased traffic, and increased air pollution. We understand that some construction is necessary. There are opportunities within the MP to scale back construction and instead create more greenspace gathering and learning areas, rather than adding more structures and more concrete to the Reservoir Complex. The Meadow is a wonderful example of scaled-back construction -- designed to address the needs of the community in a way that also protects the environment and the serenity of the Reservoirs and its wildlife habitat. Creating more green gathering spaces will meet the community's needs, while still protecting the wildlife habitat and the environment.

I-129-2

I-129-6

I-129-7 2. Appropriate and flexible perimeter boundaries with gates should be retained and enhanced: We must find a balance between safety and access, so that the Master Plan will offer protection for both wildlife and humans. Councilmember O'Farrell's work in Echo Park serves as an example of how we can honor and protect the community's daylight use of a space, including both housed and unhoused people, and the wildlife. I also remember how hard CD 13 worked to secure the funds to move the existing perimeter fencing around the reservoir when the jogging path was added, rather than taking it down, as some community members wanted at that time. CD 13 understood the importance of maintaining perimeter barriers, which provide guaranteed, flexible access for wildlife, and still offer daylight access for humans. For these same reasons, the Master Plan should provide for retaining and possibly enhancing the permanent perimeter barriers, with gates.

I-129-8

3. The Knoll should be preserved, with greenspace alternatives like the Meadow and the Cedar Grove area of Griffith Park: I am particularly concerned with preserving the Knoll area which is the most significant open space for our land-based wildlife. The current MP proposes building concrete structures in the Knoll, including an Education Center and a trail pavilion, and excessive re-grading of the land, all of which will result in significant negative environmental impacts. Instead, this area, where it joins the Meadow, is ideal for greenspace learning areas, rather than the type of heavy construction and re-grading that the MP calls for. We could also follow the example from the Cedar Grove area in Griffith Park, which prioritizes open space rather than built-up space, with natural areas for children to create their own imagination-led unstructured play.

COMMENT RESPONSE

I-130-1	"....the fence is the single most important conservation management tool at the site after the presence of water." - LA Audubon Society: Statement on the Future Management of Silver Lake Reservoir

I-132

COMMENT RESPONSE

Environmental Impact Considerations for the Silver Lake Reservoir Complex Master Plan Project

I-132-2

I-132-1 Increased traffic on already congested Silver Lake Boulevard and West Silver Lake Drive is causing increased carbon emissions negatively impacting the environment. The lack of parking for everyone driving to the reservoir will also lead to congestion on the local streets and an increased safety risk for residents due to the increased number of cars on narrow streets and erratic driving behaviors increasing the likelihood of accidents, pedestrian and bicycle deaths. There is no parking structure for the increased number of vehicles that will be going to the reservoir.

I-132-3 The proposed project will have a negative impact on the wildlife that have returned to the reservoir during the pandemic when there was less driving. The herons have returned to build their nests and the ducks and geese and other migratory birds have reclaimed their natural habitats that they have enjoyed for decades. The proposed

I-132-5 kayaking in the reservoir will have a negative impact on wildlife because of the negative effects of humans polluting the water and negatively impacting the water quality for the wildlife. There should be no humans touching the water and let the wildlife use the water as part of their natural habitat. You will be destroying a decades old wildlife habitat and destroying the environment for the wildlife.

I-132-6 Silver Lake Reservoir has been used to help put out local fires because of the ability to quickly tap its water resource as evidenced by the Griffith Park, Glendale and Eagle Rock fires in recent years. We need to keep Silver Lake as a resource to help fight fires because of its accessibility and close proximity to many neighborhoods in the city.

I-132-7 Trees and the native shrubs and bushes would be destroyed. We need to protect the native plant and shrubs in this precious ecosystem.

I-132-8 Noise Pollution is definitely an issue due to the sheer volume of cars and other modes of transportation that will be used to access the reservoir. Let us be truthful about the facts. Most people are driving to the reservoir in cars that have increased the noise levels for the residents that live near the reservoir.

I-132-9 There is a lot of dog waste due to the increased number of people using the dog park and the walkway around the reservoir. This waste is going into our local waterways and sewar systems and pollutes our rivers and oceans. As a long-time resident of Silver Lake, I constantly see people disregard signs about “picking up after your dog” and are not deterred by any fines (I have not seen anybody get ticketed or fined by any authority) for letting their dogs go “poop” anywhere along the reservoir.

I-132-10 Silver Lake definitely could be updated, but not completely changed so that it loses it character and refuge as a natural habitat for wildlife that has been coexisting with the human population for many years. Local and city leaders do not have the

I-132-11 resources to monitor and keep Silver Lake safe and clean for all who will be coming to the reservoir. Silver Lake has been a refuge for wildlife and the people in the community. Let us preserve and protect this beautiful resource and not destroy this beautiful landmark!

I-133

	COMMENT	RESPONSE
I-133-1	Please keep fencing - either what is there or something more attractive.	
I-133-2	I'm not sure about kayaks - restrict to specific area perhaps	

I-134

COMMENT

RESPONSE

I-134-1 I strongly urge the planners to increase and enhance the green spaces for the wild animals that live in, and travel through, the Silver Lake reservoir complex. Most of the people who use this complex are happy to walk around it, enjoy the green

I-134-2 spaces and observe the wild animals at a respectful distance. We do not need more buildings and other built environments. In the era of devastating climate change –

I-134-3 and in a neighborhood already dealing with a great deal of insensitive new construction – we certainly don't need more construction pollution. And we certainly

I-134-4 don't need "kayak launches," a feature mentioned on several maps on this site. We need California native plants – including native trees – we need more green spaces,

I-134-5 protected areas for the birds and for the other the other wild animals that live here. We must enhance and protect our precious, already limited green spaces.

I-135

COMMENT RESPONSE

I walked the reservoir just today and not only were there 100's of people enjoying the space - walking and being in the meadow with family and friends. I'm concerned that the draft Master Plan will require significantly more construction than the neighborhood can endure. Years of construction will cause significant negative environmental impacts. There will be loss of wildlife (for example the herons), increased noise, increased traffic, and increased air pollution. We understand that some construction is necessary. There are opportunities within the MP to scale back construction and instead create more greenspace gathering and learning areas, rather than adding more structures and more concrete to the Reservoir Complex. The Meadow is a wonderful example of scaled-back construction -- designed to address the needs of the community in a way that also protects the environment and the serenity of the Reservoirs and its wildlife habitat. Creating more green gathering spaces will meet the community's needs, while still protecting the wildlife habitat and the environment.

I-136

COMMENT

RESPONSE

I object to the proposal to increase the size of the dog area and I especially and strongly object to the proposal to install environmentally unfriendly artificial turf.
The dog park is already big enough and it is used by a minority of park users. Why should they receive a disproportionate share of this precious public resource?
Far worse is the proposal to cover the dog area in artificial turf, which is bad for the environment and for the non-dog animals that use the park. Among other things, artificial turf provides no habitat or food for animals, including insencts: you're basically covering the area with plastic.
"The manufacture of artificial grass requires plastics and heavy metals, which after a short lifetime are disposed, presenting environmental hazards. Decrying the use of plastics in general given their environmental dangers yet replacing natural grass with artificial, plastic, grass is inconsistent policy. Only by educating the public of the environmental consequences of installing artificial grass can this worrisome trend be mitigated or indeed terminated.
("https://www.liebertpub.com/doi/full/10.1089/scc.2021.0038)

I-136-1 "Over the last few decades, it has become increasingly popular to replace natural grass on sports fields and playgrounds with artificial turf. Given the close contact of children with artificial turf, and the potential for substances present in the turf to be released into the environment over time, there is an increasing interest in characterizing the chemical content of artificial turf. One class of chemicals that was recently reported in artificial turf from the United States was the per- and polyfluoroalkyl substances (PFAS). PFAS are a diverse class of substances used throughout society and are of concern because of their extreme persistence and links to adverse health effects in humans and wildlife.("https://www.diva-portal.org/smash/record.jsf?pid=diva2%3A1544989&dswid=936

“I can’t think of any real benefit of artificial turf, other than maybe for sports stadiums,” said James Baird, a horticulturist and an extension specialist in turfgrass management at University of California Riverside.

I-137

COMMENT RESPONSE

The SilverLake Meadows section at the SilverLake Reservoir has brought many problems to the neighborhood. The biggest problem is the parking situation. The surrounding streets don't offer enough parking to accommodate the people who want to come to visit the Meadows. Especially on the weekends, the surrounding streets such as Silverlake Blvd, West SilverLake Drive, Armstrong Ave, and Van Pelt

I-137-1 Ave, are packed with cars, with even most of the red parking zones being occupied. Many of the nearby residents surrounding the SilverLake Reservoir, are unhappy with the increased traffic, and the continual circle of cars driving around hunting for a parking space. The infrastructure surrounding the SilverLake Reservoir isn't able

I-137-2 to handle the crowds of people starting to frequent the Meadows. We're seeing

I-137-3 more traffic, more trash and litter, more crime, and even homeless people who are

I-137-4 starting to camp around the reservoir. The surrounding streets just can't handle the amount of traffic, and there just isn't enough street parking available.

I-138

	COMMENT	RESPONSE
I-138-1	This plan is fantastic and a decades late development of poorly used public space. It needs to be enacted immediately and quickly. There is loud vocal opposition to it, however, the loudest voices in the room often do not represent the majority let alone the best interests of the city as a whole. I speak for many when I say please give us this overdue public amenity.	

I-139

COMMENT RESPONSE

I have multiple concerns about this project as projected in this proposal.

I-139-1 1. The potentially very negative impact on reservoir wild life and migratory birds who depend on the undisturbed open water and green areas around the existing reservoir complex.

I-139-2 2. The cost of "improving" an already wonderful facility and directing those funds instead to benefiting and upgrading existing parks in the area or creating more green space for areas deprived of them.

I-139-3 3. The duration of the project and its incumbent noise, dust, pollution, truck traffic and other disruptions that will continue for years and impact all of the community adjoining the reservoir complex in an extremely negative way.

I-139-7 4. The potential for increased crime and transients using a more open complex as an encampment when fences and boundaries are removed.

I-139-8 5. An increase in traffic and many more vehicles in an already congested neighborhood with limited parking further frustrating local residents.

6. An unnecessary "education center" which could be located in the existing recreation center area without intruding on the natural beauty of the reservoir.

7. The absurdity of proposing a "kayak launch" in a body of water that should be dedicated to water fowl and other wildlife, not recreational uses; there are plenty of places to kayak already.

I-139-9 8. Destroying the peaceful, open meadow area with numerous seating areas (we already have grass!) and other "amenities" that will contribute little to what's already there.

9. The worrying potential for commercial development (snack stand? coffee station?) in a peaceful and resoundingly residential neighborhood already blessed with plenty of options for hungry or thirsty visitors and locals.

10. A very real concern that none of these concerns or objections will be listened to since seemingly none of the previous meetings where the overwhelming number of participants opposed much of this proposal have apparently been mostly ignored and disregarded as the city and whomever is putting money into this continue to

I-139-10 bulldoze (figuratively for now and possibly literally later) their way into forcing this down the community's collective throat.

While the reservoir complex could use some improvements, it's already a wonderful passive recreation area and important wildlife preserve in the middle of an huge metropolis. Let's keep it that way. It ain't broke so don't try to fix it.

I-140

COMMENT RESPONSE

I have been a resident of Edgewater Terrace since 1991. As a homeowner and taxpayer, I am extremely concerned with the development of the Silver Lake Reservoir into a LA destination. I have attended multiple meetings leading up to the "adoption" of the Master Plan but never were the concerns of local residents addressed.
These are issues that need to be assessed before any "Master Plan" can move forward:

I-140-1 • Cost and duration of the project - Where are the funds coming from? Never addressed was how the cost of such a large development would be covered. Will this raise local residents' property taxes ?

Once the project has been completed, will Parks and Rec have their funds increased to cover costs.

Personnel costs money which would include Parks and Rec staff as well as maintenance workers. Maintenance workers are currently understaffed. Parks/Rec are usually hard hit by budget shortfalls bec its budget is staff heavy.

• Impact on traffic in an already congested area.
Our street, Edgewater Terrace, is a very narrow street used as a shortcut to get from Glendale Blvd to Silver Lake Blvd. We currently have multiple problems with traffic including vehicles traveling at high speeds and parked cars being sideswiped / damaged consistently.

I-140-2 • Parking impact on a deprived neighborhood. *** HEAVY EMPHASIS ON PARKING !!

Where is the plan for visitor parking other than putting the burden all on surrounding residential streets ? Edgewater Terrace is already heavily impacted by businesses on Glendale Blvd and The Meadow - especially on weekends. The street is narrower than most of the surrounding streets. The impact of congested parking actually makes our street more dangerous for residents who can't get out of their driveways and for visitors that can't navigate a busy car filled street.

I-140-3 • Increase in crime, overnight encampments

I-140-4 • Negative impact on reservoir wildlife and migratory animals

I-140-5 • Noise and light pollution

I-140-6 • Increase in litter and trash

Edgewater Terrace currently has no street sweeping. Who will be responsible to maintain the park as well as the surrounding streets impacted.

I-140-7 Thank you.

Judith Serlin

I-141

COMMENT RESPONSE

I-141-1 Please prioritize the environmental impact of the Silver Lake Master plan with
I-141-2 regard to its long-lasting effects on wildlife, biodiversity, climate change and the depleted aquifer.

Our cities have the opportunity to be on the forefront of mitigating species extinction and climate change. The Silver Lake Reservoir will best serve the neighborhood, the city, and the planet if it is part of a vision for preserving and restoring the ecosystem and supporting wildlife and biodiversity.

I would hope that the following areas of concern be carefully assessed::

Permanent perimeter fencing would ensure nighttime safety for wildlife while allowing gates for daylight access.

Reduction of the area allotted for the Knoll would allow the preservation of precious
I-141-6 wildlife habitat.

When planning for construction, maintenance and ongoing use of the Complex,
I-141-3 mitigations should be considered with regard to noise, traffic, light pollution, air quality and impact on resident wildlife.

Any addition of concrete must be considered with regard to the impact on the city's
I-141-7 severely diminished aquifer.

Potential loss of green space and water habitat that provide safe space for migrating
I-141-9 birds and nesting sites.

Consideration of potential pollution, noise and wildlife disruption caused by the
I-141-10 addition of a launch pad that allows for the possibility of future water activity.

With this in mind, please consider the impact of the kayaklaunch/floating dock, the
I-141-8 Education Center, the lack of perimeter fencing, the concrete stepped terraces, and the Ivanhoe Overlook. I'm asking that you analyze and evaluate all of these with regard to their impact on the ecosystem and with consideration to how the Reservoir can contribute to a healthy planet.

The Silver Lake Reservoir can and should be an asset both to the human community as well as refuge for Angelenos to enjoy nature while also ensuring that Los Angeles acts in concert with worldwide efforts to restore and preserve urban biodiversity, to support urban wildlife and to mitigate climate change.

I-142

COMMENT RESPONSE

I-142-4 The Reservoirs are a wonderful asset. What is being proposed is overkill. We already have too much traffic and no parking. Even the walking path is over crowded to the point walkers resort to using the street. Let's minimize construction

I-142-1 of the area and eliminate the Ivanhoe Overlook, habitat islands, educational center, and soccer field .

I say yes to the Eucalyptus Grove, enhanced dog park, and new multipurpose room.

Most important let's preserve the natural environment and especially protect our glorious wildlife,

I-142-2 A big No to kayak launching

I-142-3 A big Yes to keeping the fence intact!

I-143

COMMENT RESPONSE

There is no need for a park of this size in this dense residential neighborhood when Griffith Park is so close with better access to public transportation and better parking. The proposed LA river Park also provides a better location for a large public park and water recreation and education.

I-143-1 The out-of town designers that developed the master plan have not addressed the extremely limited parking in the neighborhood, and the public buildings are all located on the west side of the reservoir where there is no street parking. Those consultants rely on public transportation which is inadequate and under utilized in this area.

I-143-2 Our wildlife is stressed by development, loss of trees, and traffic. This is more important as a wildlife corridor. Sepulveda Wildlife Sanctuary as an example of what our reservoir could become.

I-144

COMMENT RESPONSE

As a longtime Silver Lake resident (over 60 years), I have seen the traffic in our
I-144-1 neighborhood grow increasingly congested. With the proposed development and
addition of recreational facilities and activities, I am extremely concerned that this
will only exacerbate the traffic problem. This, in turn, will severely affect the air
I-144-3 quality, negatively impacting the entire Silver Lake community including, of course,
the wildlife that we're hoping to protect.
I-144-2 Also, parking for soccer games, kayaking and other activities will be a problem,
especially for those homeowners closest to the lake.
It is crucial that these issues be addressed as part of the environmental study.

Thank you,
Mary Ellen K. Shu

I-145

COMMENT RESPONSE

February 5, 2022

Dear BOE:

I am not in support of the current SLRC Master Plan for several reasons. Most importantly for the lack of safe open green spaces and parks in underserved, and more deserving neighborhoods Los Angeles.

Silver Lake is one of the most affluent neighborhoods in the north east area of this city. It's not uncommon for homes to sell $200K to $300K over asking. Mega mansion are replacing lovely iconic Spanish style single family homes for millions of dollars.

Within 2 miles of the SLRC is Griffith Park, Bellevue Park, Elysian Park and Echo Park. We are awash with open green-space, yet dozens of neighborhoods in Los Angeles barely have enough trees to cool down the miles and miles of asphalt blanketing the city.

White people under the age of 65 make up the majority of residents living in Silver Lake. They are comfortably from the middle, upper middle, to the uber wealthy classes. Their children attend some of the most sought after public schools, and
I-145-1 according the LAPD, Silver Lake is the safest neighborhood within the LAPD Northeast Division. Teslas outnumber Prius', and there are no shortages of high end cafes, restaurants, bars, and pilates/yoga studios.

Of all the proposed city improvement projects, and the desperate need for safe open public spaces in L.A., why is there so much attention and money being targeted for a neighborhood that does not need the attention? It makes absolutely no sense. Or is the city pandering to a particular socio-economical class of Angelenos the city finds more appealing and who provide more revenue.

Until more deserving neighborhoods can provide their residents the recreational opportunities that Silver Lake already offers its residents, there will be well funded and expertly organized opposition to the SLRC MP. Residents in opposition plan to use every legal and political tool they may have at their disposal to stop this madness.

Please suspend the SLRC Master Plan.

Sincerely,
Anne Johnson

I-146

COMMENT RESPONSE

The Reservoir Master Plan is very interesting and could be a lovely project.

However, as a longtime resident of Silver Lake owning a house that overlooks the lake, I have a lot of concerns that have not been addressed or answered.

• What will be done to control traffic? The traffic along Silver Lake Blvd. Has gotten much worse over the years that I've lived here. It is often backed up for miles, even on weekends. Assuming this project will attract more people to the area, what plans are there to deal with this?

I-146-1

• What will be done about parking? The area around the lake has very limited parking that is already filled by the current amount of people driving from other areas to walk/run around the lake or picnic in the meadow. The overflow goes on adjacent streets. We live on a very narrow street with very limited parking on only one side. Our street is constantly filled with cars of people who are walking their dogs or otherwise heading to the reservoir. We're sure this is true of other streets around the reservoir. What consideration has been given to parking? Will the adjacent streets be made permit parking only, with permits being given free of charge to residents for the inconvenience?
There was some talk of using the Bank of America parking lot, but would that only be after the bank is closed? Also, that is not very many spots. The parking lot at Whole Foods is already a nightmare, so additional parking there should not be an option.

I-146-2

• How will the homeless problem be controlled? There is already someone living in a hammock adjacent to the meadow. There were also people living in the bushes across the street from the path. We definitely do not want another situation like Echo Park Lake.

I-146-9
I-146-10
I-146-3

• A big concern and question that has yet to be answered is how long the construction will go on for and how long will the reservoirs be emptied? The last time the reservoir was empty, it remained empty for much longer than was projected, causing a lot of dust, dirt, and air pollution, as well as continuous construction vehicles and noise. The streets have never been repaired from the damage of all the concrete and other trucks. The birds and wildlife were chased away and have taken time to recover. Needless to say, the construction will cause major inconveniences for everyone who lives nearby, with street lanes being closed, detours, and construction starting early in the morning. Everyone who lives nearby will have their quality of life disrupted and impacted for many years. Has any of this been addressed?

I-146-4
I-146-5
I-146-6

• There should be permanent fencing with gates to provide safety and security, and daylight access only. Nightime activities would only provide noise and light pollution.

I-146-7

• The Knoll, which provides a large area for wildlife, is being used for an Educational/Community meeting room. Why is this necessary when it duplicates the Rec Center? There should be as much done as possible to maintain the wildlife habitats.

I-146

COMMENT RESPONSE

I-146-8

• Why has a kayak launch site appeared on the plan? As of the last meeting, allowing water activities was not to be allowed at any time, present or future. Any motorized or non-motorized water activities would have potential negative environmental impacts, wildlife impacts, noise impacts, etc.

In conclusion, it appears that the comments by the majority of residents at the various community meetings have been negated and ignored. The reservoir is in the middle of a quiet residential neighborhood of primarily single family houses. That has been totally overlooked in the design of the new plan. The attempt to make it all things for all people is a mistake.

I-147

COMMENT RESPONSE

As a 40-year homeowner in Silver Lake, I have participated in all the community meetings developing the current Master Plan. While many of my neighbors have expressed negative feelings about development, fearing any change to the idyllic nature of this quiet residential neighborhood, I have remained enthusiastic and optimistic about the beautiful designs that have been generated. I look forward to enjoying the proposed amenities.

Throughout the process so far, several practical concerns have been repeatedly expressed, and always deferred or ignored. We were repeatedly told that these concerns would be addressed later, after the designs were developed, and the Master Plan completed. Each step of the way, these concerns get kicked further down the road.

The EIR process seems like the appropriate time to face the realities of the impact the project will have, not only on the environment, but on the community. Among the topics in question are:

I-147-1 • Parking for the large influx of visitors to the new park. Parking in the neighborhood is already at capacity. A token effort will not be acceptable.

I-147-2 • Maintenance, upkeep, and cleaning. Current efforts for maintaining even the existing amenities, such as the paths and meadow, are insufficient. A full plan *with appropriate funding* must be in place.

• Security, as well as plans for preventing homeless encampments, must be planned and funded.

I-147-3 • Traffic is already a significant issue in the Silver Lake area. What will be the impact of the increased traffic for a new popular attraction?

I-147-4 • How long will the community be subjected to disruption during construction? Plans and funding must be in place for mitigating noise, dust, and deterioration of neighborhood streets due to heavy machinery.

I-147-5

I do not think these are insurmountable obstacles to the implementation of the Master Plan, but I firmly believe that solutions to these potential problems *must be an integral part* of the Master Plan.

I cannot endorse <u>any part</u> of the Master Plan until these concerns are taken seriously.

I-148

COMMENT RESPONSE

I-148-1 This past Sunday, February 6, there was no parking available on streets near the reservoir, including the street where I live. We already have a problem with parking, and traffic. Several cars parked in red zones. My neighbor indicated a car tried to park in a spot that would have blocked the driveway. If there will not be additional new parking, the parking and traffic will worsen an already bad situation.

I-149

	COMMENT	RESPONSE
I-149-1	With the addition of the wetlands, I am concerned the wetlands will become breeding areas for mosquitoes. We already have a problem with ANY standing water in birdbaths, potted plant saucers. These mosquitoes breed very fast and are vicious causing infections when bitten requiring medical attention! They are also out day and night and tiny enough to enter screens. The reservoirs have previously had no vegetation in the water. Animals can dig holes producing standing water in surrounding grasses. How will the mosquitos be controlled without harming the birds, animals and humans?	

I-150

COMMENT

RESPONSE

This is a very ambitious plan to transform the reservoirs into a multi-use complex that meets the needs of both residents and the natural habitat that surrounds us.

I-150-1

I applaud the emphasis on replanting with native California flora, but do not see a strategy here for replanting the eucalyptus grove with California native trees; this area currently provides a unique environment for blue herons to nest, and so if there is a sound, biological reason for replanting with eucalyptus, so be it, but if not, I would want the area to host California native trees.

In addition, I have two reservations regarding the dog park strategy. The first reservation is the plan to expand the dog parks, but there is no metric provided for understanding the extent of this expansion. While the provided plan map indicates an expansion, it is impossible from examining the map to determine the additional square footage. The dog park already occupies a sufficient parcel of land at the southern portion of the reservoir, but I do not see the need to expand this use, as it is a zero-sum game, and I do not want to sacrifice the precious space we have for one constituency over the needs of kids and other park users. Is there a metric for determining that the dog park needs expansion, or is this simply an arbitrarily decreed desideratum? In addition, while I appreciate the master plan's emphasis on restoring and replanting with native flora, I reject the deprecation of decomposed granite for the dog park in favor of artificial turf. I would like to see a metric that compares DG and/or replanting with dog-tough native flora vs. artificial turf with regards to carbon footprint and total cost of maintenance. I believe replanting at least some of the dog park surface with dog-tough flora would dovetail better with the master plan's emphasis on ecological sensitivity than covering the area with artificial turf.

Finally, the plan mentions the mid-century modern design ethos that peppers our neighborhood, yet there are older design idioms that are here, too. I appreciate mid-century design, but the proposed buildings do not really reflect that and seem already dated to me.

I-151

COMMENT RESPONSE

Hello,

I am a resident of Edgewater Terrace, where I have lived for the last six years. While I am excited about the possibility of making the Silver Lake Reservoir a more natural space, I have several concerns about the proposed plan.

I-151-1 1. Children's Playground: As a parent of two small children, we often go to to the Silver Lake rec center playground. I applaud the master plan committee for using "Family Friendly" as a guiding principle, but the current plan does not reflect this. Although the dog park will be upgraded, there are currently no plans to upgrade the playground. PLEASE consider children when building this new space and not only improve the playground at the rec center, but also consider adding additional play structures at other areas of the park.

I-151-2 2. Parking: Parking is already a problem in the neighborhood. What is being done to address this in the new plan?

I-151-3 3. Safety: I am concerned that what happened at Echo Park Lake will happen here. What is being done to address overnight encampments?

I-151-4 4. Trash: Edgewater currently has no street sweeping and our trash cans are often the receptacles of people walking by (including their dog poop). Please install and upkeep more public trash cans around the Silver Lake Reservoir.

Thanks you,
Julia Stuart Yilmaz

I-152

COMMENT RESPONSE

I have multiple concerns about this project as projected in this proposal which concerns I would like the EIR to evaluate comprehensively AND include these analyses in the draft report.

I-152-1 1. The potentially very negative impact on reservoir wild life and migratory birds who depend on the undisturbed open water and green areas around the existing reservoir complex.

I-152-2 2. The cost of "improving" an already wonderful facility and directing those funds instead to benefiting and upgrading existing parks in the area or creating more green space for areas deprived of them.

I-152-3 3. The duration of the project and its incumbent noise, dust, pollution, truck traffic and other disruptions that will continue for years and impact all of the community adjoining the reservoir complex in an extremely negative way.

I-152-4 4. The potential for increased crime and transients using a more open complex as an encampment when fences and boundaries are removed.

5. An increase in traffic and many more vehicles in an already congested neighborhood with limited parking further frustrating local residents.

I-152-5 6. An unnecessary "education center" which could be located in the existing recreation center area without intruding on the natural beauty of the reservoir.

7. The absurdity of proposing a "kayak launch" in a body of water that should be dedicated to water fowl and other wildlife, not recreational uses; there are plenty of places to kayak already.

8. Destroying the peaceful, open meadow area with numerous seating areas (we already have grass!) and other "amenities" that will contribute little to what's already there.

9. The worrying potential for commercial development (snack stand? coffee station?) in a peaceful and resoundingly residential neighborhood already blessed with plenty of options for hungry or thirsty visitors and locals.

I-152-6 10. A very real concern that none of these concerns or objections will be listened to since seemingly none of the previous meetings where the overwhelming number of participants opposed much of this proposal have apparently been mostly ignored and disregarded as the city and whomever is putting money into this continue to bulldoze (figuratively for now and possibly literally later) their way into forcing this down the community's collective throat.

While the reservoir complex could use some improvements, it's already a wonderful passive recreation area and important wildlife preserve in the middle of an huge metropolis. Let's keep it that way. It ain't broke so don't try to fix it.

I-153

COMMENT RESPONSE

I-153-1 I do not want seating along the reservoir. I do not want the fence down around the perimeter of the reservoir. I do not want more lighting. I want the gates to continue to be locked at dusk. If the reservoir becomes fenceless -I am afraid of crime and trash. Leave this as a walking path around the reservoir. Keep the meadow as is. I am concerned about the wildlife here.

Spend the money where there are no Rec centers in Los Angeles. We are blessed here with this beautiful open space. Let's keep it the way it is. Please keep these concerns in mind of the EIR study.

Re: Scoping Comments on Silver Lake Reservoirs Complex Master Plan Notice of Preparation

I-155-1

Dear Ms. Steiner,

On behalf of Silver Lake Wildlife Sanctuary (SLWS), we submit the attached scoping comments for environmental review of the proposed Silver Lake Reservoir Complex Master Plan. These comments identify numerous potential adverse impacts associated with development and increased intensity of use of this site that would be allowed under the Master Plan that must be thoroughly analyzed in the environmental impact report ("EIR") for this project.

As an initial matter, SLWS is requesting an extension of the scoping comment period so that adequate public notice can be provided to the many existing users of the Silver Lake Reservoir Complex. Additionally, we urge the City to prepare and circulate an Initial Study regarding this project prior to closing the scoping comment period to allow the public to provide informed comments on the major changes proposed for this open space site.

SLWS have identified several elements proposed for the Silver Lake Reservoir that would have major impacts on bird species, other wildlife, and the surrounding community. These include the modification of fencing around the reservoirs, which would eliminate and/or reduce protections for the public and wildlife, as well as removing prohibitions on human uses within the reservoir. Further, the number and size

I-155

COMMENT RESPONSE

of structures proposed for construction at the Reservoir Complex is unnecessary to achieve the Master Plan's stated goals and would be highly impactful.

SLWS has proposed several alternatives and mitigation measures to the intensive development proposed under the Master Plan that would provide the public with excellent opportunities to interact with nature, maintain needed open space in an area where available open space is quickly diminishing and protect and enhance the habitat for the many wildlife and bird species that rely on the reservoir complex. Open space areas near urban land uses function as a visual amenity, as a passive recreational asset, a groundwater recharge site, and a "storehouse" for natural species populations. We urge you to carefully consider the Reduced Intensity Alternative and the Natural and Open Space Preserve Alternative, as well as mitigation through elimination and modification of proposed project components.

I-155-2

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

Re: Scoping Comments on Silver Lake Reservoirs Complex Master Plan Notice of Preparation

I-155-3

Dear Ms. Steiner,

Silver Lake Wildlife Sanctuary (SLWS) submits these scoping comments on the proposed Silver Lake Reservoirs Complex Master Plan Project ("SLRCMP" or "the Project"). SLWS consists of more than 500 members in the community surrounding the proposed the Project site as well as over 6,800 petitioners from the community-at-large. Based upon the facts that have been represented to us, SLWS has serious concerns regarding the density and intensity of development proposed as part of the Project, as well as the impacts to wildlife and the surrounding community that could result due to the likelihood of increased public traffic to the proposed recreational facilities on the Project site. These issues must be fully addressed in the environmental impact report (EIR) and less impactful alternatives that reduce density and provide a project better suited to this unique and uniquely situated site, must be assessed.

I-155

COMMENT RESPONSE

I. Public Notice Adequate to Inform the Public Must Be Provided.

In this time of pandemic, the Project site (including its perimeter walking path, existing recreation center and outdoor basketball court, dog parks, picnic table areas and the Meadow), has become a major outdoor destination for the citizens of the City of Los Angeles, for recreation, socialization, celebration, exercise and more. SLWS seeks to ensure all those citizens who currently use the Project site have been given proper notice and opportunity to join in this vital process. The most effective way to provide the Project site users with notice is to post notice regarding the request for scoping comments and all other notices at highly visible areas of the Project site. SLWS has confirmed that there are currently no public notices posted at the Project site. We worry that online forums may not have been accessible to all of the existing and future users of the Project site and were inadequate to give notice to the members of the public that will clearly be impacted by the Project. SLWS urges the City to post notices on the Project site and extend the scoping comment period by at least 30 days to ensure all voices are heard.

II. The EIR Must Include an Accurate, Stable and Finite Project Description.

I-155-4

Every EIR must set forth a project description that is sufficient to allow an adequate evaluation and review of the project's environmental impacts. (CEQA Guidelines § 15124.) "An accurate, stable and finite project description is the *sine qua non* of an informative and legally sufficient EIR." (*County of Inyo v. City of Los Angeles* (1977) 71 Cal.App.3d 185, 192 93; accord *San Joaquin Raptor/Wildlife Reserve Center v. County of Stanislaus* (1994) 27 Cal.App.4th 713, 730.) "[O]nly through an accurate view of the project may the public and interested parties and public agencies balance the proposed project's benefits against its environmental cost, consider appropriate mitigation measures, assess the advantages of terminating the proposal and properly weigh other alternatives." (*City of Santee v. County of San Diego* (1989) 214 Cal.App.3d 1438, 1454.)

Thus far, the City has failed to provide a complete project description. The Notice of Preparation ("NOP") does not include an initial study, which severely limits the information available to the public. The three page NOP only provides limited information to the public, omitting several important aspects of the Project that will greatly influence the impacts of the Project. This significantly hinders the public's ability to provide scoping comments. Among the omissions:

- **Fencing**: The most significant safety and wildlife conservation element that is part of the current baseline conditions on the site is the perimeter fencing. (LA Audubon, March 2017, http://laaudubonconservation.blogspot.com/2017/03/statement-on-future-management-of.html, incorporated by reference.) A discussion of the fencing or lack

I-155

COMMENT RESPONSE

thereof under the SLRCMP (Master Plan p. 202) must be included as part of the EIR's project description and any proposed removal or alteration must be thoroughly evaluated and analyzed. (*Western Tanager* Vol. 86 No. 4 March-April 2020 Silver Lake Reservoir Development and Potential Waterfowl Habitat Loss | By Andy Birch, available at https://www.laaudubon.org/blog/2020/3/4/western-tanager-vol-86-no-4-mar-apr-2020, incorporated by reference.) Specific information regarding the height, type and location of any alternate proposed fencing must be included. The impacts associated with the removal of the existing fencing include: biological resources, land use and planning, aesthetics, population and housing, noise, hazards and hazardous materials.

- **Education Center**: The initial study has not clearly defined the proposed Education Center building, variously identifying it as an 'event space' and as a classroom. The implications of an 'event space' might include food or food preparation facilities, the impacts of which must be considered. In addition, the uses of new Multi-Purpose Building/ Community Center located adjacent to the existing Recreation Center in the South Valley are not disclosed. This proposed new building could also function as a potential event space/eatery, both for sports and community events. The EIR must address the full extent of activities and events planned for each part of the Project site.

I-155-5

  - The SLRCMP itself provides conflicting descriptions of the location of the Educational/Meeting (aka Education Center) structure. In the Master Plan, the structure is in the Knoll, while in the NOP document, it is in the Meadow. This is significant because construction in the Knoll will require extensive grading and excavation, which would be extremely harmful to wildlife land habitat. While construction in the Meadow would have its own impacts, it would not require the extensive grading and excavation that building into the Knoll would. The EIR should resolve these conflicting representations and study the structure's biological, land use, air quality and noise impacts in its correct location.

- **Construction Timeline**: There has been no projected definitive timeline for the duration of the complete construction of this Project. The construction timeline greatly affects the impacts the Project will have. At a maximum, with 8 stand-alone projects or phases estimated at 18-24 months construction time each, the timeline would be 16 years and more if there are delays. This would impose construction impacts on the surrounding community for an incredibly significant period of time. If 2 phases at a time were constructed, on the east and west sides of the Complex, the timeline would be 8 years plus delays, but this method of construction could condense the impacts, making them

I-155

COMMENT RESPONSE

more significant. The EIR must include a definitive timeline in the project description and the EIR must study and disclose the effects of varying construction timelines and the disruption they would have on the community and wildlife.

- **Public Water Activities**: The community, in all surveys conducted as a part of this Master Plan process, has consistently voted to deny all public water activities including boating and swimming. Yet SLRCMP states that activities on the water or at the water's edge are still possible goals and that the SLRCMP is simply planning construction of a provisional nature to facilitate water activities in the future, namely the Kayak Launch/ Floating Dock. However, on the map (SLRCMP, Ch. 5, p. 154), they identify the Kayak Launch/ Floating Dock as a site for confirmed active water use: "floating dock (used by environmental education for guided kayak tours of habitat areas)." Not only are these activities unwanted by the community, they also pose the demonstrable risk of people drowning and are detrimental to wildlife, particularly the migratory waterfowl. Water activities, whether boating or swimming, will greatly impact these migratory birds to the extent that the historic large flocks may no longer use the Reservoir. The EIR must clearly identify potential water uses in the project description and analyze all impacts associated with any potential use, including safety impacts and disturbance to wildlife and birds.

I-155-6

- **Nighttime Lighting**: The EIR project description must describe any nighttime lighting proposed for the Project site. This nighttime lighting can have significant impacts on wildlife that must be analyzed.

- **Nighttime Use of Project**: The EIR must describe any nighttime access that will be provided to the Project site, or if no nighttime access is provided, how that access will be controlled.

- **Embankment Enhancements**: The SLRCMP references embankment enhancements for the West Narrows area of the Project site. The EIR must provide a detailed description of these embankment enhancements to allow for a thorough assessment of their impacts.

- **Project Elements Not Identified in NOP**: The project description in the NOP fails to include a number of Project elements that are identified in the SLRCMP. The following omitted elements, which could have significant adverse impacts, must be included in the EIR's project description and analysis.

    - On the Knoll, these elements include the creation of ADA compliant trails, an

I-155

COMMENT RESPONSE

overlook shade pavilion and outdoor classroom, in addition to the floating dock mentioned above. These elements would require extensive regrading of the hillside.

- In the South Valley, the EIR must describe the proposed Multi-Purpose Facility/ Community Center in detail and identify its intended and allowed uses. The impacts of this facility could be made all the more significant due to the existing conditions in the South Valley. This is currently the most congested area of the Reservoir Complex, with the most recreational development. It is also where two major traffic arteries (Silver Lake Boulevard and West Silver Lake Drive) connect with a very short residential street (Van Pelt Place) to form the south end of the Reservoir Complex. The EIR must provide a comprehensive study of the cumulative traffic and transportation impacts of further development in this area of the Project site.

- In the Eucalyptus Grove and elsewhere, details have not been provided about the Promenade extending along the embankment by the water edge for various distances. These details must be included in the EIR's project description so the impacts associated with this Project element can be evaluated.

I-155-7

- At the Ivanhoe Overlook, these elements include substantial new construction of a shade pavilion/outdoor classroom, trails and observation platforms. A description of these elements must be included in the EIR.

- The EIR must also include a detailed description of the intended destruction of the steep concrete embankments and their replacement with naturalized gradually sloping sides.

- The EIR must define and analyze proposed stepped terraces/seating along the Reservoirs. This includes a disclosure and analysis of the materials that would be used, i.e., whether concrete terraces, grassy terraces with wood facing, or other types of terraces are planned.

- The EIR should also disclose and analyze what facilities would be available in the proposed Picnic Groves. Elements such as bbq pits could encourage fire and greatly increase fire hazards at the Reservoir Complex.

Due to lack of adequate information included in the NOP, SLWS urges the City to revise the NOP to provide adequate and accurate information to the public. The scoping process should

I-155

COMMENT RESPONSE

also be continued to allow the public to comment on a revised NOP, preferable one that includes an initial study, and also one that discloses an accurate project description to the public for their comments. As set forth by the CEQA Guidelines, when an agency already has determined it will prepare an EIR, "an Initial Study is not required **but may still be desirable**." (CEQA Guidelines § 15063, subd. (a), emphasis added.)

III. The EIR Must Comprehensively Address All of The Project's Significant Environmental Effects.

To be legally adequate, an EIR must comprehensively identify and address all of the "significant environmental effects" of a proposed project. (Public Resources Code § 21100(b)(1); CEQA Guidelines § 15126.2.) "All phases of a project," including "planning, acquisition, development, and operation," must be addressed. (CEQA Guidelines § 15126.) And both "[d]irect and indirect significant environmental effects" must be analyzed, "giving due consideration to both the short-term and long-term effects." (CEQA Guidelines § 15126.2(a).)

Here, among other significant environmental effects, the Project would dramatically increase traffic congestion, impose significant noise and lighting impacts on the surrounding community and wildlife, and impose noise, traffic and air quality impacts associated with the massive reconstruction and new construction required for the Project. SLWS insists that the EIR comprehensively analyze all of the Project's significant environmental effects, including, without limitation, each of the following:

I-155-8

A. The EIR Must Analyze the Project's Land Use and Planning Impacts.

CEQA Guidelines section 15125, subdivision (d) requires the EIR to analyze and disclose **any** inconsistencies with relevant land use plans. There are several applicable land use plans that apply to the Project site.

1. The EIR Must Evaluate the Project's Consistency with All Relevant Community Plan Policies.

The Silver Lake-Echo Park-Elysian Valley Community Plan applies to the Project site. (See https://planning.lacity.org/plans-policies/community-plan-area/silver-lake-echo-park-elysian-valley, incorporated by reference.) This Community Plan includes a number of policies relating to Open Space and the EIR must evaluate whether there are any inconsistencies with these policies.

The Project site has a land use designation of Open Space under the Community Plan and

meets the Community Plan's definition of open space as "land that is essentially free of structures and serves to provide recreational opportunities" (Silver Lake-Echo Park-Elysian Valley Community Plan, p. 58; https://planning.lacity.org/odocument/3cea4f7c-87a0-41af-bcdf-187b9b0bade9/SLKplanmap.pdf, incorporated by reference.) Objective 5-1, urges the City to "Preserve existing and develop new open space resources." and Policy 5-1.1 requires the City to "Encourage the retention of passive and visual open space which provides a balance to the urban development of the Plan area." As proposed, the Project would be inconsistent with this policy because it would remove existing open space and wildlife habitat even as the urban development of the Community Plan area increases in density. The Project would construct several large buildings on the Project site, eliminating significant amounts of the open space. The EIR must evaluate and consider mitigations.

2. The EIR Must Evaluate the Project's Consistency with the Los Angeles Zoning Code.

The Project site has a zoning designation of Open Space. Under the Los Angeles Zoning Code, there are limited uses allowed in the Open Space zone and no building or structure is allowed except for the following:

I-155-9

(i) Parks and recreation facilities, including: bicycle trails, equestrian trails, walking trails, nature trails, park land/lawn areas, children's' play areas, child care facilities, picnic facilities, and athletic fields (not to exceed 200 seats in park) used for park and recreation purposes.

(ii) Natural resource preserves for the managed production of resources, including, but not limited to, forest lands, waterways and watersheds used for commercial fisheries; agricultural lands used for food and plant production; areas containing major mineral deposits ("G" Surface Mining Districts) and other similar uses.

(iii) Marine and ecological preserves, sanctuaries and habitat protection sites.

(iv) Sanitary landfill sites which have received certificates of closure in compliance with federal and state regulations.

(v) Public water supply reservoirs (uncovered) and accessory uses which are incidental to the operation and continued maintenance of such reservoirs.

(vi) Water conservation areas, including percolation basins and flood plain areas.

(Los Angeles Municipal Code §12.04.05.)

While some of the Project elements are clearly allowed in the Open Space zone, others do not appear to be. The EIR must evaluate whether all of the buildings and structures proposed as

I-155

COMMENT RESPONSE

part of the Project complies with the City's zoning regulations. For example, the proposed Multi-Purpose building does not appear to be an allowable use. The EIR must analyze this and other inconsistencies. Additionally, as discussed below, the Silver Lake Reservoir Complex is a designated Historic Cultural Monument. As such, development on this Open Space requires approval of a conditional use permit. (Los Angeles Municipal Code §12.04.05(B)(1)(b).)

B. The EIR Must Evaluate the Project's Consistency with the Historic-Cultural Monument Designation Given the Silver Lake Reservoir Complex.

The EIR must also carefully evaluate whether the Project would have adverse cultural resource impacts due to inconsistencies with the Historic-Cultural Monument Designation (HCM #422), which the SLRC was given in 1989. This designation was approved and adopted by the City as the vision for this open space of land and waters in order to provide protection against demolition or inappropriate alterations, and to encourage long-term stewardship, as defined under the Los Angeles Cultural Heritage Ordinance and the Secretary of the Interior's Standards for the Treatment of Historic Properties. The EIR must carefully analyze and evaluate this Project against all listed Standards. In particular:

I-155-10

- Standard 1 - *A property will be used as it was historically or be placed in a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships.*
  - Since its 1989 designation, SLRC has been identified as an open space, providing wildlife and bird habitat as well as space for passive human activities.

- Standard 2 - *The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.*
  - SLRC's distinctive feature and spatial relationship is that of sweeping open spaces and views without clutter.

- Standard 6 - *Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.*

  - Mature trees, especially those utilized by nesting birds, must be evaluated in this regard and care taken through consistent well-timed pruning and feeding schedules to repair and maintain, rather than replace.

I-155

COMMENT RESPONSE

- Standard 9 - *New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.*
    - The EIR must evaluate the extent and impacts of all the new construction proposed under this Project. In particular, with the proposal of three new structures, careful analysis must be done of the impacts of each new structure as well as their cumulative impacts upon both the view sheds and the wildlife and birds of the site.

- Standard 10 - *New additions and adjacent or related new construction will be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.*
    - The EIR must analyze whether future removal of any and/or all of the proposed new elements would impact the form and integrity of this historic site. The HCM recognizes the importance of the Reservoir Complex in providing open space and wildlife and bird habitat. The potential impacts associated with construction and later removal of elements on this historic site, and whether these actions could impact wildlife and bird species for which the historic designation recognizes as a sanctuary, such as whether particular species would continue to inhabit or make use of the site and whether regraded habitat would be restored, must be evaluated. This is particularly relevant if any construction is undertaken at the Knoll, where the SLRCMP specifies regrading and excavation for the trails, pavilion and education center. At the Knoll, removal of such new construction would leave the essential form and integrity of the historic property and its environment impaired such that it could not be restored, as grading/tunneling below the bottom of a hillside creates "disturbed earth" which renders it less stable, more subject to erosion and landslide. (Disturbed Soil Properties and Geotechnical Design, Second edition; by Andrew Schofield and Stuart Haigh Published: 2017; https://www.icevirtuallibrary.com/doi/book/10.1680/dspagd.61552#, incorporated by reference; The Landslide Handbook by Lynn M. Highland, United States Geological Survey, and Peter Bobrowsky, Geological Survey of Canada, pp 33, 64; https://pubs.usgs.gov/circ/1325/pdf/C1325_508.pdf, incorporated by reference.)

I-155-11

C. The EIR Must Fully Analyze and Disclose the Project's Biological Impacts.

This open space site, with protected bodies of water is relied upon by numerous species

I-155

COMMENT RESPONSE

of birds and wildlife. The Project includes significant amounts of construction and intensification of uses on the site, which could have significant adverse impacts on these biological resources. The EIR must carefully analyze the biological impacts of the Project, including, but not limited to, the following:

- Use by wildlife and birds is normally time-dependent, both within the course of the day and of the year. Analysis must take these varying needs of each species into consideration.

- The EIR must evaluate whether the Project will include a draining of one or both of the Reservoirs, or parts thereof, and if so, the impacts that draining would have on birds and wildlife. This would include evaluation of the impacts from the use of diversion barriers and cofferdams to enable dry construction in the Reservoirs without draining. (Minutes: Stakeholder Working Group #3, p. 30; https://acrobat.adobe.com/link/review?uri=urn:aaid:scds:US:1aaa56ab-0e13-4e8f-8f55-d499844d58bb#pageNum=26, incorporated by reference.) In particular, risking the permanent loss of iconic bird life must be evaluated, given the experience of a several years' temporary loss of Silver Lake Reservoirs' great blue herons during and after the most recent draining and construction in 2017.

I-155-12

- The EIR must study the possible impacts on land wildlife as well as birds from regrading and construction on the Knoll for proposed structures, as well as regrading and habitat loss required by the creation of walking paths. This will include disruption, noise, poor air quality, and traffic from land-moving and construction equipment. All mitigation must be considered, including eliminating construction on the Knoll.

- The Educational/Meeting (aka Education Center) building: The construction of this building will cause irreparable harm in the Meadow and Knoll by destroying much of the scarce Open Space, that currently exists as wildlife land habitat. The Project also calls for regrading the Knoll as part of the construction process for this building, which will harm both wildlife and habitat. This building will duplicate facilities that currently exist at the Recreation Center, in local schools, and at another proposed new structure in the Project called either the Multi-Purpose Building/ Community Center or the Multi-Purpose Room, in the South Valley.

- The Knoll is also the proposed location for the construction of the Overlook Shade Pavilion/ Outdoor Classroom. As cited above, the Knoll is extremely important as an undeveloped Open Space haven for wildlife, away from intrusion by people and dogs. In

I-155

COMMENT RESPONSE

addition, the Project calls for slope regrading and installation of walking paths to reach the Pavilion, which will displace habitat and encroach upon this last undeveloped area. This proposal must be evaluated by the EIR.

- The Promenade/ Embankment Path will increase human activity around the entire Reservoir and its water edge, with resultant increase in litter, hazardous materials ingested by water birds in particular, noise, and human presence. Water edge or land barrier fences for the Path must be evaluated to be wildlife-permeable. The EIR must evaluate and analyze all these and other considerable impacts.

- The proposed great and sloped lawns extending to the water edge with no barriers encourages both outsized populations of particularly aggressive bird species (such as mallards, Canada geese, American coots) and undesirable human feeding of birds. For the birds and for water quality, any trash, plastic and micro-plastic waste, washed into the water or thrown and discarded into the habitat, pose risks of bird ingestion and thereby immediate or eventual death. Lawns need extensive maintenance labor and surveillance. In an increasingly dry climate, much recycled water will be needed to maintain large areas of grass, which displace existing brush habitat. The EIR must consider and evaluate these impacts.

I-155-13

- The Project's proposed nighttime lighting would adversely impact wildlife on the Project site, in the surrounding neighborhood and in the wildlife corridors that extend from the site to Griffith Park and Corralitas. (https://www.darksky.org/light-pollution/wildlife/, incorporated by reference) Many species depend on darkness for foraging and predator avoidance. The EIR must fully analyze night lighting and its effects upon Biological Resources such as wildlife, birds and light-sensitive flora. It must especially address the well-documented damaging effects of night light on the migrating stream of birds overhead. (https://environmentalevidencejournal.biomedcentral.com/articles/10.1186/s13750-021-00246-8, incorporated by reference; https://theconversation.com/want-to-save-millions-of-migratory-birds-turn-off-your-outdoor-lights-in-spring-and-fall-114476, incorporated by reference.) The increased night lighting of the Project would have an adverse impact on those species, as well as inviting human presence at night whose impact on wildlife must be evaluated.

- Additionally, the Project's proposed removal of multiple trees would eliminate nesting and foraging habitat for numerous species of native and migratory birds dependent upon them, with adverse impacts. Even if replacement trees are provided, the trees will not be

I-155

COMMENT RESPONSE

available during the lengthy construction phase of the Project. Moreover, replacement trees are typically much smaller than the mature trees that would be removed, which would be of significant impact to our larger nesting bird species such as but not limited to the great blue herons, great horned owls, and both red-tailed and red-shouldered hawks. The EIR must analyze and evaluate these impacts.

- Wetland terraces and wetland habitats will be constructed that "would extend from the shoreline embankments and within the reservoir bodies." (NOP, Project Description, p.2) The EIR must assess these habitats for mosquito attraction and breeding, and consider possible mitigations, not including neighborhood spraying of insecticides or other toxins. This is especially important with the arrival of the Aedes mosquito, a daytime feeder. (https://www.sgvmosquito.org/special-report-invasive-aedes-infesting-socal, incorporated by reference.)

- The SLRCMP proposes to replace tall fences along the perimeter of the Reservoir Complex with lower fencing along interior pathways. The removal of the tall perimeter fencing significantly alters the protection and safety afforded wildlife and people within the Complex. (LA Audubon, March 2017, http://laaudubonconservation.blogspot.com/2017/03/statement-on-future-management-of.html, incorporated by reference.) Human presence in excess numbers and at the wrong times is detrimental to wildlife. Tall perimeter fencing is what provides management of human access and density, as well as the timing of human access. A well-designed perimeter fence will not only protect habitat but also maximize wildlife movement and prevent wildlife injuries or mortality. This replacement must be carefully analyzed by the EIR.

I-155-14

D. The EIR Must Analyze the Project's Water Quality, Flooding and Water Recharge Impacts.

The Project would convert areas that are currently unpaved, pervious open space to paved and impervious areas that could increase runoff and pollutant loading. This is especially true for the concrete seating terraces, the pavilion open space, the Ivanhoe Overlook, the Knoll Overlook and the Education Center. The water quality impacts caused by the significant increase in cars and people at the Project site must be assessed, both during construction and Project operation. Pollutant loading from increased Project traffic on roads immediately adjacent to the Project site could cause significant water quality impacts that must be evaluated in the EIR. These roads include Tesla, Armstrong, Silver Lake Blvd, and West Silver Lake Drive.

The impacts of construction activities on water quality must also be evaluated. Runoff

from construction activities can have significant adverse impacts on water quality.

Further, a large open space site such as this provides the City with a unique opportunity to implement important groundwater recharge features, which are necessary to protect the City's water supply. However, the increase in impervious surfaces proposed as part of the Project would inhibit water recharge potential at the Project site. The EIR should carefully evaluate the Project's impacts on water recharge and include features and mitigation measures to enhance instead of restrict the site's ability to achieve necessary groundwater recharge.

E. The EIR Must Analyze the Project's Geotechnical Impacts.

The impacts of all proposed construction, individually and collectively, must be given a thorough geotechnical analysis, given the Project site is located in an area of high seismic activity and a liquefaction zone.

F. The EIR Must Analyze the Project's Traffic Impacts.

1. The EIR Must Evaluate Traffic Congestion and Vehicle Miles Traveled.

I-155-15

The increased intensity of uses at the Project site will increase traffic to and from the site. The City must analyze whether the Project will exceed the City's thresholds of significance for transportation-related metrics, including vehicle miles traveled and vehicle trips. (CEQA Guidelines section 15064.3, subd. (b)(1).) The increases in traffic, coupled with the existing adverse traffic conditions on the streets adjacent to the Project site, may result in impacts to the surrounding neighborhood from cut-through traffic. The EIR must evaluate these impacts.

Further, the EIR must use a baseline for traffic impacts that allows for the most accurate assessment of Project traffic impacts. The baseline must be from times of normal business operations, not during shutdowns required by the current COVID-19 pandemic.

Finally, construction on the Project site could take approximately 8 to 16 years (SLRCMP, 1.8 p. 22), and will require construction-related vehicles and equipment to enter and exit the site on a continuous basis. This will inevitably cause traffic disruption and congestion for the surrounding neighborhood. All possible measures must be taken to mitigate the effects of construction on wildlife and the community. The Complex is in a bowl, surrounded by hills and homes on all sides, causing reverberating sounds and trapping dust from construction, as well as amplifying noise from visitors, to be experienced by residents. The EIR must evaluate and analyze this impact.

I-155

COMMENT RESPONSE

2. The Project Will Result in Inadequate Emergency Access.

With construction on the Project Site anticipated to be for a number of years, the traffic and congestion surrounding the neighborhood will impede emergency services. The EIR must analyze this impact.

G. The EIR Must Analyze the Project's Air Quality.

1. The City Must Analyze and Disclose the Project's Construction Air Quality Impacts.

I-155-16

Construction of the Project may lead to significant air quality impacts, particularly of PM2.5 and PM10, both of which are criteria air pollutants regulated by the South Coast Air Quality Management District and the Federal Clean Air Act. The Project is located in the South Coast Air Basin, which is currently in nonattainment for the California Ambient Air Quality Standard ("CAAQS") PM10 24-hour and annual standards, nonattainment for the CAAQS PM2.5 annual standard, and serious nonattainment for the National Ambient Air Quality Standard ("NAAQS") PM2.5 24- hour and annual standards. (South Coast Air Quality Management District, *National Ambient Air Quality Standards (NAAQS) and California Ambient Air Quality Standards (CAAQS) Attainment Status for South Coast Air Basin*, September 2018, available at http://www.aqmd.gov/docs/default-source/clean-air-plans/air-quality-management-plans/naaqs-caaqs-feb2016.pdf?sfvrsn=14, incorporated by reference.)

The Project will result in increased air emissions. The Project has a possible construction schedule of anywhere from 4 - 16 years or more, which will lead to a sustained period of increased emission of air pollutants from construction in the Project area. Construction of the project may lead to increased fugitive dust arising from grading, excavating, demolition, and other construction operations, which leads to PM10 pollution. Additionally, use of diesel-powered construction equipment and vehicles will lead to PM2.5 pollution, as well as pollution of NOx, another criteria pollutant. The EIR must fully analyze and disclose the impacts from these emissions, as well as apply all feasible mitigation measures.

2. The City Must Connect the Project's Air Quality Impacts to their Likely Health Consequences.

In the recent case *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, the Supreme Court found that lead agencies are required under CEQA not only to identify significant air quality impacts, but to explain the nature and magnitude of these impacts and connect these

I-155

COMMENT RESPONSE

impacts to their consequences on public health. (*Id.* at 521-22.) Thus, the City must comply with this mandate and ensure the Project EIR's air quality analysis contains not only a detailed explanation of significant construction and operational air quality impacts, but also their consequences to public health.

H. The EIR Must Analyze the Project's Greenhouse Gas Impacts.

The Project may have significant greenhouse gas (GHG) impacts due to its increase in traffic to and from the Project site, and the City must thoroughly evaluate these impacts in the EIR. First, GHG emissions from construction vehicles and construction traffic to and from the Project site during the lengthy construction period must be evaluated.

The SLRCMP also calls for a significant increase in the intensity of use of the Project site. This increased intensity of use will generate a significantly increased amount of traffic in the area, increasing vehicle miles traveled and vehicle trips. The City must include in the EIR detailed traffic analyses during event- and non-event conditions, as well as weekday and weekends.

Further, the Project proposes to remove trees from the Project site, with a plan to replace mature removed trees with young saplings. Trees are important carbon sinks and also help to improve air quality, but saplings absorb far less carbon than the existing mature trees. The EIR must evaluate the GHG impacts associated with loss of carbon sequestration.

I-155-17

To reduce the Project's GHG emissions, the Project should include and the EIR should evaluate the following feasible mitigation measures. (*King & Gardiner Farms v. County of Kern* (2020) 45 Cal.App.5th 814, 869 [Lead agencies are required to analyze all feasible mitigation measures].) The City can implement numerous GHG mitigation measures to mitigate the likely significant GHG impacts of the Project. These include:

- Requiring all Project components to be all electric with no plumbing for natural gas. No gas-powered water heaters, or any other gas- powered appliance should be allowed.
- Including photovoltaic solar panels and batteries in the project design to provide the maximum amount of the Project's commercial needs.
- Including electric vehicle charging stations in the Project design to provide charging capacity adequate to service all anticipated vehicles to the Project site.
- Including electric heat pumps in the project design to provide air and water heating and cooling.
- Prohibiting gas-powered landscape maintenance equipment.

I-155

COMMENT RESPONSE

- Seeking increased frequency and access to public transit options to the Project site.
- To mitigate the removal of any unhealthy trees on the Project site, the City must implement a regular schedule of tree maintenance—including pruning, feeding and watering—as approved by a certified arborist.

I. The EIR Must Analyze the Project's Noise and Vibration Impacts.

Excessive noise pollution can cause hearing loss and damage, sleep disturbance, and cardiovascular issues. It is thus crucial that the EIR disclose and analyze the Project's noise impacts, especially during the years-long construction period.

Noise sensitive receptors typically include locales such as residences, parks, schools, places of worship, libraries, and hospitals. The Project site is adjacent to residential neighborhoods on all four sides, and each of these neighborhoods will be sensitive receptors with respect to noise. Wildlife that uses the site are also noise sensitive receptors. The EIR must evaluate the Project's noise impact during wildlife and birds' transitory and permanent presence on the site.

1. The City Must Analyze and Disclose All Project Construction Noise and Vibration Impacts.

I-155-18

The SLRCMP includes a significant amount of construction at the Project site and Project construction will likely have significant noise and vibration impacts. There will be extensive noise and vibration impacts from embankment destruction and regrading of Reservoir slopes as well as regrading for seating terraces and other proposals. Construction will also include clearing activities and haul truck travel. Thus, the Project site will be subject to intense construction over the 8 to 16-year construction phase, generating significant noise and vibration. The EIR must analyze and disclose the noise and vibration impacts of these activities on the surrounding community, trail users and wildlife.

2. The City Must Analyze and Disclose All Project Operational Noise and Vibration Impacts.

Project operation will likely have significant noise and vibration impacts. As described in the traffic section of this letter, the significant increase in the intensity of uses as part of the Project will result in increased traffic to the Project site. This will lead to increased vehicle-related noise in the vicinity of the Project Site.

I-155

COMMENT RESPONSE

The increased number of persons using the Project site will also themselves increase noise levels generated at the site. Noise levels must be evaluated during the allowed hours of operation at the Project site, particularly if the City does not take steps to close the site at night. The EIR must analyze and disclose the noise and vibration impacts of these activities on the surrounding community and wildlife. The EIR must also ensure the Project is compliant with local land use plans and laws that impose restrictions on noise, including the City of Los Angeles General Plan Noise Element and the City of Los Angeles Noise Ordinance, codified at Los Angeles Municipal Code section 111.00 et seq.

J. The EIR Must Analyze the Project's Aesthetic Impacts.

As a matter of law, the EIR must comprehensively address the significant aesthetic effect of the Project. (*See Quail Botanical Gardens Foundation, Inc. v. City of Encinitas* (1994) 29 Cal.App.4th 1597.) The Project adversely alters and removes greenspace areas on the Project site and replaces them with manmade structures. The impact this will cause to existing public views of the open and expansive Project site, with numerous trees and green space must be evaluated. These visual impacts include the removal of mature trees located in the publicly visible public right-of-way, notably the Eucalyptus Grove and the Knoll.

I-155-19

Additionally, with the embankment part of the Promenade, any necessary safety fencing along the edge of the water will visually clutter and spoil the view of the Reservoir. This aesthetic impact could be mitigated by ensuring a buffer zone of 5 feet or more between the water and the fencing.

Increased night lighting impacts would also be aesthetically significant as a loss of the views of dark skies and stars to the surrounding community. These impacts of night lighting must be fully analyzed in the EIR.

Further, the visual impacts of the proposed floating islands interrupt the historic visual sweep of the open waters of the Reservoir, causing significant aesthetic impact. (See *Ocean View Estates Homeowners Assn., Inc. v. Montecito Water Dist*. (2004) 116 Cal.App.4th 396 [aesthetic impacts of cover on reservoir could be significant].)

K. The EIR Must Analyze the Project's Safety Impacts and Impacts on Public Services.

1. Safety Impacts Associated with Changes to Fencing Must Be Evaluated.

The most profound Public Services impact that must be addressed by the EIR is public

I-155

COMMENT RESPONSE

safety for people and wildlife. This must include evaluation of an appropriate perimeter fence, and creation of wildlife-friendly but adequate security fencing at an appropriate distance from the water's edge to prevent accidental drownings and harm to waterbirds. The EIR must carefully study the SLRCMP's proposed removal of the present kind of perimeter fences and its replacement with lower fences that do not protect wildlife and people. (SLRCMP, p. 202.) Unlike the existing fencing, the Project's proposed interior pathway fence materials made of 2 or 3 parallel wooden poles will not protect wildlife from people, children, or dogs, nor will they protect people from accidental drownings. (https://www.theeastsiderla.com/archives/woman-rescued-from-silver-lake-reservoir/article_5f5f025a-07ea-5f84-8f01-dae2c29ea3d7.html#comment-6239668, incorporated by reference; https://www.theeastsiderla.com/neighborhoods/silver_lake/man-suffers-hypothermia-after-swimming-in-the-silver-lake-reservoir/article_ad974356-871d-11e9-8dda-633855a5dffa.html#utm_source=theeastsiderla.com&utm_campaign=%2Fnewsletters%2Flists%2Fdaily-digest%2F%3F-dc%3D1559700008&utm_medium=email&utm_content=headline, incorporated by reference.)

I-155-20

In addition to safety impacts associated with the Reservoir, the impacts changes in fencing will have on public safety must also be evaluated. Such significant alterations of the site fencing will allow night access, at a time when some wildlife is most active, and will pose a danger to both people and wildlife. The potential for increased criminal activity that could result from nighttime access must also be evaluated. This could lead to safety hazards for the public and would require increased police presence.

The current perimeter path is safe because it is readily visible at all times to residents on Silver Lake Boulevard and West Silver Lake Drive. Pedestrians there are protected by the current perimeter fence from any harm arising from within the Reservoirs Complex. Perimeter fencing is what allows management of human access and density, as well as the timing of human access. The existing perimeter fencing protects the Complex's habitat, wildlife, and surrounding communities and including the maintenance of this fencing should be evaluated as part of the Project. The EIR must include an assessment and disclosure of these potential impacts and their mitigation.

2. Increased Intensity of Use Increases Need for Emergency Services.

The Project includes an increase in development at the site and potential increase in intensity of use, which could significantly heighten the need for police and other emergency services. The EIR needs to evaluate this impact on the services, their access, and the effect on the neighborhood.

I-155

COMMENT RESPONSE

3. Additional Safety Impacts Must Be Evaluated.

The SLRCMP proposes the destruction of the concrete embankments and their replacement with naturalized gradually sloping banks. The EIR must evaluate the safety consequences of such naturalized banks as an 'attractive nuisance' to the public, which could increase human activity in the Reservoir and the safety hazards that poses. The Master Plan states that water access should be provided such that people may have "opportunities to be at and on the water." (SLRCMP. p. 147.) The EIR must evaluate the safety consequences of such 'opportunities.'

Fully enforceable mitigation in the form of designating funding for maintenance is required to prevent the proposed project from having significant aesthetic and health and safety impacts. Under CEQA guidelines, the EIR must evaluate this mitigation.

L. The EIR Must Analyze the Project's Cumulative Impacts.

When the possible effects of a project are "individually limited but cumulatively considerable" a finding that the project may have a significant effect on the environment must be made. (Public Resources Code § 21083.) "Cumulatively considerable" means that the increased effects of a project are considerable when viewed in connection with the effects of past, current, and probable future projects. (*Ibid.*) There have been numerous projects in the vicinity of the Project site that have been recently constructed as well as many more proposed for construction, including, but not limited to, projects under consideration along Sunset Boulevard, Silver Lake Boulevard, Glendale Boulevard, Rowena Street and multiple residential renovations in the neighborhood hills surrounding the Reservoir Complex.

I-155-21

CEQA requires the EIR consider the traffic, noise, air quality and other impacts of these multiple projects in conjunction with the impacts of this Project and the cumulative impacts must be mitigated.

IV. The EIR Must Analyze a Reasonable Range of Alternatives and Feasible Mitigation Measures.

CEQA provides that an EIR "shall include a detailed statement of mitigation measures and "[a]lternatives to the proposed project." (*Laurel Heights Improvement Assn. v. Regents of University of California* (1988) 47 Cal.3d 376, 400, citation to Public Resources Code § 21100, subds. (c) and (d).) Section 15126.6 of the CEQA Guidelines requires that an EIR "describe a range of reasonable alternatives to the project, or to the location of the project, which would feasibly attain most of the basic objectives of the project but would avoid or substantially lessen

any of the significant effects of the project, and evaluate the comparative merits of the alternatives . . . even if these alternatives would impede to some degree the attainment of the project objectives, or would be more costly." This discussion must include "sufficient information about each alternative to allow meaningful evaluation, analysis, and comparison with the proposed project," and expressly must address "[t]he specific alternative of 'no project,'" the purpose of which "is to allow decision makers to compare the impacts of approving the proposed project with the impacts of not approving the proposed project."

In light of this legal mandate, SLWS insists that the EIR contain a complete and comprehensive "alternatives" analysis that should include at least the following alternatives and mitigation measures:

A. Reduced Intensity Alternative.

As proposed, the Project would have many significant impacts; thus, the EIR must analyze alternatives that could substantially lessen or avoid some impacts. Many of the Project's impacts result from the SLRCMP's attempt to cram far too much building and too many uses on to this unique and sensitive site. SLWS questions the logic of adding significant amounts of new indoor space when outdoor open space is at a premium due to the increased density of residential neighborhoods, as well as for the protection of public health during the pandemic and moving forward.

I-155-22

In addition to those impacts, the cumulative impact is a resulting clutter that destroys the sense of serenity and peace so expressly voted by the community as their #1 value for the Silver Lake Reservoirs Complex and so greatly needed in a dense urban setting. SLWS requests the EIR analyze a Reduced Intensity Alternative that eliminates and modifies the most impactful components of the SLCRMP. This Reduced Intensity Alternative should include the following:

- Eliminate Ivanhoe Overlook element; construction in this northwest area of the Project site would be determinantal to migratory birds and indigenous herons and hawks.
- Eliminate Education Center/ Community Center building and instead acknowledge all Reservoir land as an open space education area.
- Relocate proposed outdoor covered pavilion proposed for the Knoll's hillside to a flat area in the Meadow that will not require extensive grading.
- Eliminate floating dock/ kayak launch site.

I-155

COMMENT RESPONSE

- Eliminate floating islands.
- Move Promenade area away from the water's edge to protect birds and other wildlife using the Reservoirs.
- Eliminate additional night lighting, other than currently existing and recommended lighting improvements for South end sports facilities, dog park, and Recreation Center. (SLRCMP, 5.6.3.)
- Eliminate the seating terraces on both sides of the East and West Narrows to ensure safe and undisturbed water edges for migratory bird flocks, to retain unpaved, pervious open space.
- Remove only damaged or dying trees as part of the Project. All other mature trees should remain, under a new funded plan for healthy maintenance, including pruning, feeding and watering during drought.
- Ensure the entire complex is protected by a wildlife-friendly perimeter fence as tall as the current fence, with gates and security to allow flexible access.

I-155-23

- Eliminate any potential for night time human access.
- Maintain the historic elements of open space and sweeping views over water and land.

In addition to considering these Project modifications collectively as a Reduced Intensity Alternative, the EIR should also evaluate each of these Project revisions separately as mitigation measures for the Project's adverse impacts.

B. Silver Lake Reservoirs Natural Lands and Open Space Preserve Alternative.

SLWS also urges the City to evaluate a Silver Lake Reservoirs Natural Lands and Open Space Preserve Alternative. This alternative combines a migratory bird sanctuary on the waters of both Reservoirs with the newly designed Master Plan vision of native habitat designed for runoff catchment, filtration and treatment systems to maintain high water quality in the Reservoirs and to assist in achieving State regulatory requirements and water management

I-155

COMMENT RESPONSE

improvement goals through water recharge. It would incorporate the Reduced Intensity Alternative recommendations along with opportunities to create and conserve greenspace and open space, and encourage growth of native plant species to create habitat. Its key features would be the resources of nature and serenity that people seek at the Reservoirs.

As part of this Open Space Preserve Alternative, and for the safety of people and wildlife, a high non-scalable perimeter fence with wildlife access features would be essential. The fencing described in the SLRCMP as the LADWP fencing (MP, 5.6.5 pg. 202) fits this need: *"These spaces will be secured with a 8-foot high, continuous fence with gates as needed for access..... The fence design should follow best practices for wildlife-friendly fence design and be highly visible to birds to minimize risk of collisions. The fence design should provide a minimum 6" clear zone at the bottom for small mammals to pass through. There should be no elements that could injure or trap wildlife."* The fencing described as "Habitat Fencing" at the same page of the SLRCMP does not provide these necessary protections to wildlife and humans.

This Open Space Preserve Alternative envisions the perimeter fencing gates to be designed by local artists such as those that were commissioned along the LA River Trail/ Bike Path. (https://earthiron.net/los-angeles-river-gate, incorporated by reference.) One or all of the Reservoirs' gates should be designed by local indigenous people artists, perhaps some of those who last August created #Tongvaland. The symbolic effect of Tongva gates opening to allow people on to this land, which used to belong to them, is an important historic-cultural connection.

I-155-24

By utilizing some of the Master Plan's less impactful habitat restoration plans without the floating islands, this Open Space Preserve Alternative could provide an expanded range of native habitats necessary to sustain species biodiversity of plants, birds and animals, including open water, marsh, riparian and upland habitats.

This Alternative would retain all current public use facilities while improving heavily used facilities on the south end. It would provide a safe location for educational field trips and bird watching without destroying the resources people come for and without bringing higher density than is optimal for the site and its neighborhood. It would encourage individual strolling with views of green areas of woods and shrubbery with minimal trail creation and grading, and some fencing direction.

This Alternative would prioritize open space and natural areas rather than built-up space. It would seek opportunities to create green gathering spaces and learning opportunities, rather than adding more structures and more concrete to the Reservoir Complex.

The Silver Lake Natural Lands and Open Space Preserve Alternative would provide a

I-155

COMMENT RESPONSE

wildlife corridor within the larger Los Angeles basin, while offering safe passive recreational use for the peoples of Los Angeles. Finally, it would conserve an invaluable open water resource for the migratory birds traversing the Pacific Flyway and an invaluable open water view for the public.

This alternative meets the most important stated goals of the SLRCMP with potentially far fewer negative impacts, by adjusting the balance of use and the number of changes. Those goals are:

- Preserve and enhance the unique character of the SLRC.
- Create a public amenity with safe and varied access.
- Balance active and passive uses.
- Balance wildlife habitat with human uses.
- Create a design that is implementable and can be partially funded through grants.
- Allow for continued LADWP operations, access, and future use.

This less impactful alternative must be analyzed in the EIR.

I-155-25

V. Conclusion

The proposed SLRCMP Project would be located at an important and unique site, which provides some of the last opportunities to preserve publicly accessible open space **and** provide native habitat within the urban neighborhoods of Los Angeles. The impacts of the proposed Project, measures to mitigate impacts, and alternatives to the Project must be carefully reviewed by the City, with broad public participation. We look forward to working with the City to assure that this Project and alternatives to the Project receive the careful review that they deserve.

Thank you for consideration of our views. We incorporate into the administrative record all of the documents that we cited. We request to be placed on the mailing list for any future notices and documents.

Sincerely,

Silver Lake Wildlife Sanctuary

I-156

COMMENT RESPONSE

The Master Plan renderings depict a system of switchback trails with an "observation pavilion" at the top. As the trails must be ADA compliant, and the platform no doubt a hardscape, this constitutes a drastic deformation and
I-156-2 defacement of the most significant Biological Resource (habitat space) in the SLRC. It would occasion years of disruptive construction. Witness the extremely lengthy, intrusive process of installing the much smaller Tesla St. Reservoir pathway.

The EIR must analyze both the long and short term environmental impacts on the
I-156-4 surrounding neighborhood. It must detail the losses of habitat, and driving away of
I-156-3 the birds and animals, the loss of serenity and quiet, the obstructions to traffic this
I-156-5 Knoll construction would impose. It must detail the loss of trees and natural habitat thickets. The EIR findings must be made public.

The EIR should note the problems posed by many trails in Griffith Park, where hikers commonly strike straight off from them and climb the hills across land. They have ground gullies into the hillsides, which then erode and despoil the landscape, and kill many essential plants. Griffith Park is much larger, and thus these impacts somewhat mitigable, but the Knoll cannot withstand this.

The hardscape observation pavilion is redundant. There are trees up there, which would serve as well to create shade, if they were properly maintained. The EIR must consider this alternative. Moreover, the hardscape pavilion itself will displace habitat. Human intrusion will drive away animals and birds, all the way up the proposed pathway and on the pavilion..

I-156-1

An alternative could be a pathway off Armstrong Ave. into a gate (closed at night) leading to a small flat area covered with permeable material that will protect the soil and not seal it off. This would leave the fragile hillside of the knoll an undisturbed habitat for wildlife and plants that have lived there for over a hundred years. The EIR must detail its study of this alternative.

I-157

	COMMENT	RESPONSE
I-157-1	Cada semana vengo a Silver Lake, el lago esta hermoso. No estar de acuerdo que vayan a edificar mas. Se debe mantener tranquilo. Los peros deben tener mejor lugar parque no estan en las areas de personas. No deseo ver islas de cemento ni barcos. Hay mucho transito de auto y tambien falta estacionamento. Debemos protejer los animales y pajaros.	

I-158

COMMENT RESPONSE

Subject: DEIR Education Center, SLRCMP

This proposed project element should be eliminated. The BOE should also study its impacts as an event space/snack establishment, and reflect findings in the EIR. That is what it may well devolve to be, as its use as an education center will no doubt be inadequate to support a building.

Science teachers do not want classrooms or buildings to take students to on field trips; they want untrammeled open Nature space, such that the Reservoir now offers. They have classrooms at their schools, which are far more convenient to them for classroom-appropriate activities. I speak as a career high school teacher.

A similar project was proposed at the Ballona Wetlands. The Annenburg Foundation had pledged funding. Teachers, and residents convinced them that a built facility
I-158-1 was unnecessary and in fact destructive to Nature and counterproductive to nature education. So, the Annenburg Foundation withdrew the grant.

No LAUSD study was done on this project; the Facilities and Operations divisions have not endorsed it. There are no metrics on how many students could use it, or what percentage of the time the Center would be actually used. The site is too small to be a magnet or charter program.

The Audubon Society built a Center in Debs Park intended to support education; a perusal of their schedule (before the pandemic) revealed that educational activities went forth overwhelmingly outdoors, not in the building. The building found a purpose as an Event Space, rented out, to bring in revenue for the organization. The Audubon location could support the parking needs and more intensive use; this Center could not.

The BOE should study and the EIR reflect how seriously and permanently the
I-158-5 education center disfigures the Knoll, part of a City Historic-Cultural Monument, as
I-158-6 it would require excavation.
It would obliterate much of the very scarce habitat its presence purports to study.
The lengthy construction process itself would drive away the animals and birds.
I-158-2

Worse, this building's "classroom" intended use could easily migrate to other, more impactful uses, such as harboring a snack establishment or becoming an event
I-158-3 space. Some advocated for these uses, and they would persist if educational use were insufficient after the building was in hand.

In conclusion, the EIR should enumerate and analyze the heavy environmental costs Education Center imposes against its unproven benefit. The EIR should examine the possibility of a far more impactful, noxious use. This model has been tried in other places, and the space was either subverted to other uses, or defunded and not built at all. Eliminate the Education Center building.

I-159

COMMENT RESPONSE

Hello!
I have been a resident of Silver Lake for 8 years now and I love my neighborhood and those who live in it. As a homeowner and taxpayer, I am extremely concerned with some aspects of the development of the Silver Lake Reservoir into more of a destination. I have attended multiple meetings, but feel that some of my below concerns were never heard.

Here are the issues that I have based on the current plan:

1. Parking and Impact of traffic in an already busy neighborhood.
I live near the meadows and Edgewater Terrace and there is already issues with
I-159-1 residents finding parking in their own neighborhood. The street in front of our house is always full, especially on the weekends.

2. Cost and Duration of the project. Will this raise local residents taxes and who is funding this?

I-159-2

3. Increase in Crime and Overnight encampments, especially if there are bathrooms in the new plan.

4. Increase in Noise and light pollution
I-159-3

5. Impact on the reservoir and wild life in the area
I-159-5

6. Increase in litter and trash. We already are experiencing this on the weekends even in front of our house, due to the influx of people parking and walking to the meadows.
I-159-6

Thank you,
Tiffany

COMMENT

RESPONSE

As you undertake your Environmental Impact Report please consider recent current events in Echo Park. In 2013 Echo Park reopened after a $45MM renovation that improved its public spaces and provided enriched venues for flora and fauna. Sound familiar?

I-160-1 Fast forward several years to March 2021 when Councilman O'Farrell had to close the park <and erect a security fence> after evicting 200 people who had turned the park into a drug riddled camping ground. This after 182 homeless people and activists had to be arrested for failure to disperse and four people had died from overdose in the prior year. So bad were the effects of the encampment that, per the LA Times, a 2-month-long, $600K clean-up was needed to remove in excess of 35 tons of trash, 723 pounds of 'biological waste', 30 lbs. of drug paraphernalia, 3 firearms and an unspecified number of knives and machetes.

Meanwhile, just 2 miles away, Silver Lake Reservoir Complex has maintained its comparatively well-preserved wildlife and neighbor-friendly peace with no encampments, no need for six figure clean-ups and zero overdose deaths. Instead it's been the center of a relatively peaceful and safe environment for residents and wildlife alike.

The key difference between Echo Park and the Silver Lake Reservoir is the tall security fencing that allows the Reservoir Complex to regulate its use. Controlling public access to the site has not only preserved the site and prevented misuse, it's also helped to anchor and preserve the peaceful qualities of the surrounding neighborhood.

I-160-2 In Silver Lake we know from experience that strong fences make for a good neighborhood. The BOE's Environmental Impact Review needs to be grounded in the realities Echo Park exposed and equip the Silver Lake Reservoir with the security fencing that Echo Park lacks. Just opening the reservoir to the public will inflict a monumental change on the surrounding hillside neighborhood. Allowing 24 hour open access would be a long term seismic shock. At minimum, this Master Plan must provide the means to control access and provide a way to close the site to the public during evening hours in precisely the same way that the northwest and southern paths are currently handled.

Currently the Master Plan shows no way to prevent the new park from degrading into an all hours camping ground. If no security fencing is installed and no curfew is enforcable then how long will it be before another park has to be evacuated and encircled in emergency fencing in response to encampments and overdose deaths? I urge the BOE to provide the fencing necessary to preserve the peace and security of my neighborhood, and not create another Echo Park urban planning fiasco.

I-161

	COMMENT	RESPONSE
I-161-1	Se debe mantener los Lagos de Silver Lake natural en vez de darle a gente la oportunidad de destruir lo natural. No se necesita mas autos. La gente que necesita espacio verde lo merece en su comunidad. Deben mejorar el parque de peros. Se debe mantener el Meadows sin pero. Favor de mantener los Lagos sin destruirlos con construcción que no se nesecita aquí. Si esta bien tener a cuarte mas grande en el centro de parques. Favor de reparar la banqueta cerca del centro de parques	

I-162

COMMENT RESPONSE

We have Griffith Park and the Silver Lake reservoir to appreciate nature in it's unencumbered beauty and splendor. For such a heavily populated city it's a privilege to enjoy these large and looming areas to recreate, study nature and take in the great outdoors and that is enough.

I-162-1 Silver Lake reservoir does not need the changes recommended by the masterplan. We do not need more for what is a already a reserve for nature!!! More buildings, educational centers, boats on the lake, visitor planks into the lake, benches right up to the water, cutting down trees, flora and fauna to accommodate more and more people to an area that cannot accommodate more is not in the best interest of nature and it's wildlife. Silver Lake is a large area of land and a large body of water for which we need to allow nature to exist without disturbance and to take in as is. We do not need more. If we do what the Master Plan recommends we run the risk of

I-162-2 damaging the lake's bird and animal population and potentially creating ecological damage.

I-162-3 Enjoy the grand acreage as is; lots of space, a beautiful landscape, land and paths to recreate and creatures to observe living protected. Silver Lake reservoir does not need more people!!! Not more cars, not more buildings, not more plans. We can value and learn from nature's inhabitants by keeping it a place of peace for their future and providing enjoyment for ourselves knowing that we are living with and protecting our wildlife.

I-163

COMMENT RESPONSE

I-163-1 The elimination of the existing Perimeter fence is a glaring omission in the NOP for the SLRCMP. This is specified in the Master Plan documents, but is not specifically described in the NOP. This is a truly frightening proposal. It is imperative that it is thoroughly and comprehensively studied and reviewed in the EIR process, with robust input from all informed community members, from LAPD and LAFD. Public Safety is the absolute bedrock necessity for a livable neighborhood. Vitiating it in any way will destroy the quality of life for residents, the fabric of this longstanding community, and eventually, property values.

I-163-2 The "wildlife friendly barriers" in the Eucalyptus Grove consisting of wooden poles and shrubbery are ludicrously inadequate to prevent muggers and "unauthorized outdoor dwellers" from invading and occupying the spaces around the Reservoir. Any breach of the existing continuous perimeter fence would nullify the rest of it, and allow incursions of people and dogs that would devastate the wildlife within the Reservoir grounds.

I-163-5 Removal of a continuous perimeter fence would gravely endanger people of all ages in the surrounding neighborhood, especially children and the elderly, during all hours of the day and night. The experience of Echo Park established that once these incursions are made, it requires almost superhuman effort and millions of dollars to get them out. It also established the reality of the public nuisances and outright danger posed by mobile vagrants and by encampments. Five people have died in Los Angeles area within the past year, randomly murdered by vagrants. These five higher-profile deaths possibly do not represent the true number. Large areas of Sunnynook Park and the River Bikeways are unusable to most of us because of the vandalism and outright danger posed by criminal elements who seek to take over any unguarded open space.

The existing fence affords a safe walking path around the Reservoir, as whatever happens there is visible and audible to surrounding residents. The existing streetlights provide enough light to walk safely, without disrupting the wildlife within the fence. If the fence were removed or breached, this safety would be utterly and finally destroyed.

Much of the community's objection to the current fence centers on aesthetics - the chain link construction. Many would like to stroll the Reseroir's natural open space. This can be accommodated without compromising community safety.

I-163-3 A reasonable, safe and aesthetic alternative would be a perimeter fence permeable by wildlife, but as high and strong as the present one, with artistically designed gates. I would very, very much like to see the Tongva people honored in the gates' design. Please consider an invitation to native artists to submit designs.

I-163-4 There are also numerous designs for pleasingly-appearing perimeter fencing that provide safety, now being used in other communities. The fence could provide flexible access, open during daylight hours, closed at night. Of course, police or rangers would need to patrol the area during the day, and to ensure that all people were out by the specified closing time at night. So, additional public services would be required.
Not as many, however, than would be necessary if the area were left defenseless against criminal activity.

I-164

COMMENT RESPONSE

I-164-1 We are all for improvements in the area, as long as there are sufficient safeguards to prevent the denigration that happened to Echo Park Lake and MacArthur Park.
Thank you.

I-165

COMMENT RESPONSE

I-165-1	There is no need for a park of this size in this dense residential neighborhood when Griffith Park is so close with better access to public transportation and better parking. The proposed LA river Park also provides a better location for a large public park and water recreation and education.
I-165-2	The out-of town designers that developed the master plan have not addressed the extremely limited parking in the neighborhood, and the public buildings are all located on the west side of the reservoir where there is no street parking. Those consultants rely on public transportation which is inadequate and under utilized in this area.
I-165-3	Our wildlife is stressed by development, loss of trees, and traffic. The reservoir is more important as a wildlife corridor than a public space. Sepulveda Wildlife Sanctuary is an example of what our reservoir could become.

I-166

COMMENT RESPONSE

I join my fellow neighbors in opposing the overdevelopment of the Reservoir. Not enough long-term impact studies have been conducted to address:

I-166-1 1. Impact on traffic in an already congested and parking deprived neighborhood; Silver Lake Boulevard is already a thorough fare from Beverly Blvd over to the 2 and 5 freeways.

I-166-2 2. Increase in crime, homeless encampments, etc., as seen in Echo Park and MacArthur Park;

I-166-3 3. Negative impact on reservoir wild life and migratory animals and human's need for serenity.

I-166-4 4. Noise, trash and light pollution;

I-166-5 5. Unnecessary Cost and duration of the project;• Best use of funds that could benefit residents in park-deprived communities throughout L.A. — or be used to conduct critical repairs and upgrades on existing parks in the area, such as Bellevue Park Rec Center and the Griffith Park Pool.

I-166-6 6. Let's not pit one council district against another. Let's use the funds to create a 1000 Silver Lake like reservoirs across the Southland in all the council districts.

I-167

COMMENT RESPONSE

I join my fellow neighbors in opposing the overdevelopment of the Reservoir. Not enough long-term impact studies have been conducted to address:

I-167-2 2. Increase in crime, homeless encampments, etc., as seen in Echo Park and MacArthur Park;

I-167-3 3. Negative impact on reservoir wild life and migratory animals and human's need for serenity.

I-167-4 4. Noise, trash and light pollution;

I-167-5 5. Unnecessary Cost and duration of the project;• Best use of funds that could benefit residents in park-deprived communities throughout L.A. — or be used to conduct critical repairs and upgrades on existing parks in the area, such as Bellevue Park Rec Center and the Griffith Park Pool.

I-167-7 6. Let's not pit one council district against another. Let's use the funds to create a 1000 Silver Lake like reservoirs across the Southland in all the council districts.

I-168

COMMENT RESPONSE

I-168-1 The EIR should be scoped to consider the impacts on residents outside the immediate half-mile radius of the Reservoirs. There are hundreds of people residing in the new apartment/condominium developments going up along Sunset Blvd. and other major thoroughfares, per the new density allowances. They have a need for Nature and Open Space as well. The huge popularity of the Walking Path around a now-peaceful Reservoir demonstrates this. Serenity and Enjoying Nature were the greatest community desires expressed early in the SLRCMP process.

I-168-2 I-168-3 I-168-4 The SLRCMP contains numerous intensive uses, intrusive buildings, thousands upon thousands of square yards of concrete; and obliterates acres of natural space and wildlife habitat. The historic, calming sweep of water views would be lost to visual intrusion of this new construction. The large flocks of migratory and local birds that enliven the Reservoir may well be driven off by construction and operation of these proposed buildings and uses. This would deny the residents of the larger LA area a much-needed respite from urban congestion and cherished experience of Nature.

The Silver Lake-Echo Park-Elysian Valley Community plan urges consideration of the impacts of local construction on the larger areas within the City. The need for new residences is bringing far more densely built neighborhood standards to the rest of Los Angeles. This needs to be offset by preserving what natural open space exists, and offering the public the chance to enjoy it.

I-168-5 Driving is becoming a prohibitively aversive experience because of traffic congestion; use of bikes and walking is encouraged within the new density code allowances. The Reservoir is walking distance from all the new developments along Sunset, Glendale Blvd. Hyperion, and Rowena Streets. Griffith Park is much farther away. Open natural space at a walkable distance is a cherished advantage of the Silver Lake Reservoirs Complex for hundreds of present and future residents. . The EIR must consider this.

I-168-11 I-168-8 The EIR must detail the impacts of all elements of the SLRCMP in this light. It must view each Project element in light of how much natural open space it subtracts, and how much noise, traffic, and vitiation of air quality it brings to the City as a whole, factored in with that caused by the new density allowances.

I-168-9 The Education Center, the additional embankment and promenade paths, the observation platforms, the structured Knoll trail, the floating islands and terraces, the "educational" elements -- all are unnatural intrusions and the EIR should explore eliminating them.

I-168-10 The Silver Lake Natural Lands and Open Space Preserve Alternative would nourish and maintain the Reservoir area as designated Open Space, as it is now zoned, free of man-made buildings and structural intrusions. The alternative is to spend all available money to cultivate native plants and natural habitat so as to enhance the welfare of the animals and birds who now live in its grounds, for the delight and health of the people of Los Angeles. The EIR must seriously study this alternative.

I-169

COMMENT RESPONSE

I-169-1 I am opposed to all and every part of this development for many reasons.

I-170

COMMENT RESPONSE

I-170-1 I do not want an expanded Rec Center; that part of the reservoir is already taxed with parking headaches and congestion. Getting around the Rec Center during peak hours can be treacherous, especially on Van Pelt.

I-170-2 It's my hope that the present perimeter fence will stay put. Silver Lake wildlife is best protected when we keep the humans at bay.

I-170-3 Finally, I do not want homeless encampments and settlements to become established at the Silver Lake Reservoir complex as they were at Echo Park park, and losing a fence perimeter may make the Silver Lake Reservoir Complex more vulnerable to that type of movement. Echo Park's park encampments were dangerous to the surrounding users.

I-171

COMMENT RESPONSE

I am a Silver Lake resident and long-time enthusiast of the Reservoirs as a runner, walker, dog owner, and parent. I appreciate the process by which the master plan has been created and am supportive of the focus on creating a more supportive
I-171-1 environment for wildlife. However, I am concerned about the size of this investment
I-171-3 ($250M+) without a clear mechanism for paying for it. I would encourage you to
I-171-4 consider a scaled back plan that focuses on improving the habitat and making some improvements to the accessibility for people but perhaps forgoes some of the more
I-171-2 significant costs, such as spending $60M on the Meadow, which is already a lovely public space.

I-172

COMMENT RESPONSE

To City of LA, DWP, and BOE:

We are writing to voice our concerns about the proposed changes to the Silver Lake Reservoir Complex. We attended every meeting and submitted thoughtful, deliberate comments. We, as well as many others who attended all the meetings, are frustrated, disappointed, and worried, as the Board of Engineering (BOE) has not taken into consideration serious concerns raised at these multiple community workshops prior to the pandemic.

Now, as the project is in the beginning stages of the Environmental Impact Report (EIR), we residents have another opportunity to make our voices heard. But will anyone listen?

I-172-1 The area in and around the Reservoirs is terribly congested as is. Every year, we see
I-172-2 more litter, more noise, and more traffic. Our neighborhood cannot sustain more, which the influx of people this project is encouraging will bring.

The people who live here, many like we—long-time residents—respect and support our community. If we see trash on the sidewalk or in the street, we put on a pair of plastic gloves and pick it up. We do not litter the street or the green space between the curb and sidewalk with our dirty baby diapers, beer bottles, dogs' defecation, or cigarette buttes from car ashtrays.

With this in mind, we do not need a bigger Recreation Center. The current one
I-172-5 serves well for community needs—including voting, community meetings, and children's events. Nor do we need an expanded basketball court with seating. The
I-172-6 negative consequences of expansion are obvious—more traffic, less parking, more
I-172-7 crowds, more trash, and more noise. In addition, the proposed construction itself will
I-172-8 negatively impact residents in terms of both noise and air quality pollution. And
I-172-11 where will the construction crews park, or will they take up needed parking space?
I-172-19 The EIR must study these issues and consider the negative impact on the community. The alternative is to keep the Recreation Center and Basketball Court Footprint as is. Van Pelt Place and West Silver Lake Drive at the south end of the Lakes— in front of the Grassy Knoll—(what you have named the Picnic
I-172-12 Area)—cannot sustain any more crowds, traffic, or parking.

An expanded "Picnic Area" will have more of the same negative consequences. We do not want more picnic tables at the south end of the Reservoir. We residents fought long and hard to save this area, "the jewel of Silver Lake" from DWP's original plan to chop them all the trees and install the regulating station here. This is a peaceful, lovely, shaded grassy area used for a variety of purposes—not just
I-172-13 picnicking. People read here, they meditate here; they have weekend birthday parties for their children here. We do not want this beautiful area tuned into an outdoor cafeteria with more garbage, noise, and crowds. The EIR must study this issue and consider the negative impact on the community. The clear alternative is to leave this area as is.

Removing the perimeter fencing will have dire consequences for the wildlife. Please note, the Audubon Society recognizes the importance of the fencing to protect the
I-172-14 birds. The closer people come to the water, the more litter will be deposited in the water. Without perimeter fencing, people will have the freedom to walk within the Reservoir Complex at all hours of the night. This will be detrimental to the wildlife as well as to residents because it will encourage noise and activity after the park is closed. It has the potential to lead to more crime and homeless encampments, as was the case in Echo Park and MacArthur Park. It has the potential to lead to fires as
I-172-15 people smoke in the area. Without fencing, the potential for people falling into the Reservoir or deliberately taking a nighttime swim is great. This could lead to drowning and/or great cost to the city as Emergency Personnel are called to the rescue. The EIR must study this issue and consider the negative impact on the community and its inhabitants—the feathered and four-footed as well as the human.
I-172-20 The alternative is to maintain perimeter fencing, which could be more attractive—as long at is wildlife friendly.

Additional lighting too would have adverse effects. The lights would be visually disturbing to residents and wildlife. The lights would encourage people to walk within
I-172-16 the Reservoir Complex after hours, which would cause disturbing noise—to residents and wildlife. Encouraging people to walk freely in this area after dark has the potential to create more crime. The EIR must study this issue and consider the negative impact on the community. The alternative is to maintain current street
I-172-21 lighting and forget the rest.

Terraced Seating is another potential for negative consequences. Again, the closer people are to the lakes, the more potential for litter in the lake. Even well intentioned people may think feeding the birds is helpful and throw food into the lake, which would, of course be detrimental to the wildlife and to the water itself. Terraced Seating would also give people a place to gather at night and a place to lay down a blanket and go to sleep. Terraced Seating also puts people too close to the water where they can fall into the Lake or deliberately go into the Lake for an swim. This has the same concerns we voiced earlier, potential drowning and/or great cost to the city when Emergency Personnel are called to the rescue. The EIR must study
I-172-18 this issue and consider the negative impact on the community. The alternative is to eliminate the proposal for Terraced Seating or make it much farther from the water.

Throughout the community meetings, the idea of boating was highly disapproved of by the majority of those who submitted comments, yet a Kayak Launch is still included on the Master Plan Project Map. Despite boating's being continually voted down at the meetings, it recurred time after time on subsequent proposals. And still, someone doesn't want to give up on this idea.

Finally, the cost of this project is astronomical. The funds could better be used to benefit residents in communities that do not have a park or a recreation center. These funds could be used for critical repairs for existing parks. These funds could also be used for much needed after school programs. This proposal, with its high
I-172-17 price tag, is an extravagance many in Silver Lake do not want.

Residents of Silver Lake as well as residents from other neighborhoods throughout the city have enjoyed this natural space for decades. This open space is special because it is peaceful, and it is wild. It is special because it is home to a myriad of birds and other wildlife. It is a resting spot for hundreds of migratory birds. The so-called "reimagining" of this space threatens the delicate balance that makes the Lakes and Surrounding areas special and beloved. We respectfully request that you thoroughly study each of the issues we have raised, consider the consequences, and offer appropriate alternatives.

Thank you.

Sincerely,

Caren Singer

I-173

COMMENT RESPONSE

As a resident and homeowner of Silver Lake, I am asking the BOE to study the following items and determine the merits of the given alternatives. Thank you for your time and consideration.

I-173-1 1) The EIR must study the conflicting description of the location of the Educational/Meeting structure. In the Master Plan, the structure is in the Knoll, while
I-173-2 in the NOP document, it is in the Meadow. This is significant because construction in
I-173-3 the Knoll will be extremely harmful to wildlife land habitat.
Environmental Resource Areas: Biological Resources, Land Use and Planning.
I-173-4 Alternatives: Eliminate all construction in the Knoll

I-173-5 2) Perimeter Fences(a): The EIR must study the removing of perimeter fences and constructing fences that do not protect wildlife and people, and that will allow night access, a time when some wildlife is most active, and which poses a danger to both people and wildlife. Further, access to the Complex at night will encourage loitering, vagrancy, litter, and noise.
I-173-6 Perimeter Fences(b): In Section 5.6.5 of the Master Plan states that one of the reasons given for eliminating some of the perimeter fences is the results of a previous survey (http://www.silverlakereservoirs.org/survey-2016). The EIR must research the validity of this survey, as it relies on an extremely small sample size, and does not accurately represent the majority of the residents of Silver Lake.
Environmental Resource Areas: Biological Resources, Land Use and Planning, Aesthetics, Population and Housing, Noise, Hazards and Hazardous Materials.
I-173-7 Alternatives: (a) Leave current perimeter fences at current height. Install gates, open during the day and closed at night, as is done with the Ivanhoe and South Dam pathways. (b) Replace current fence with aesthically pleasing, wildlife-friendly perimeter fence, maintaining the approximate current height, with gates.

I-173-8 3) Effects on residents and wildlife of the entire project: The entire project consisting of 8 construction sites, each conservatively taking two years to complete, the EIR must study the effects of 16 years of disruption on the community and wildlife with respect to noise, traffic, poor air quality.
Environmental Resource Areas: Biological Resources, Land Use and Planning, Aesthetics, Population and Housing, Noise, Hazards and Hazardous Materials.
I-173-12 Alternatives: Eliminate and/or minimize the size and scope of each site.

I-173-13 4) The Knoll: The EIR must study the possible effects on land wildlife from regrading and construction on the Knoll of an unnecessary structure (the Educational/Meeting structure), and walking paths that encroach on habitat. This will include disruption, noise, poor air quality, and traffic from land-moving and construction equipment, affecting the only safe haven for land wildlife remaining in the Complex.
Environmental Resource Areas: Biological Resources, Land Use and Planning, Aesthetics, Population and Housing, Noise, Hazards and Hazardous Materials.
I-173-14 Alternatives: Eliminate all construction on the Knoll.

I-173-15 5) The community voted down swimming and boating, but the Master Plan still states that activities on the water or at the water's edge are still goals. The EIR must address this issue. These activities are detrimental to migratory birds, as well as indigenous birds, and also poses the risk of human drowning.
Environmental Resource Areas: Biological Resources, Land Use and Planning, Recreation.
Alternatives: Eliminate the Kayak Launch and Overlook and create a buffer zone away from the water.

I-173-16 ***Although the following is not a "direct" topic for the EIR, it is extremely important that it is considered by BOE before any construction should begin. Please evaluate:

I-173-17 6) Funds for ongoing maintenance, upkeep, and operations: This project will be enormously expensive and of extreme duration. The EIR must study the legitimate funding sources to complete construction, an entity or entities to manage the entire complex, and determine an ongoing funding source to maintain and operate the facility in perpetuity. Without a guarantee of ongoing funding, the facility will degenerate causing sustainability issues that will harm the wildlife, habitat, and the community.
Environmental Resource Areas: Biological Resources, Land Use and Planning, Aesthetics, Population and Housing, Geology and Soils, Energy, Public Services, Hydrology and Water Quality, Air Quality, Recreation, Utilities and Service Systems.
Alternatives: Eliminate all elements where funds, and an entity, for maintenance, upkeep, and operations, can't be guaranteed.

Thank you very much reading my comments.

I-175

COMMENT RESPONSE

Hello!

I'm on the Housing Committee of the SLNC. I was on the Griffith Park Neigh Council until it disbanded. I also wrote about coyotes and wildlife for the LA Weekly and was a reviewer for a scientific journal. I've been a birdwatcher since I was 7, and I'm a self-taught naturalist.

I have the unique experience of observing evening activity by running around the Silver Lake reservoir for the last 20 years, at 1 AM or later. There might be one or 2 cars and maybe one person a month. It's just me and wildlife.

I know what wildlife was there before DWP turned it into a construction zone for 6 years and drained it: great horned owls, coyotes, bats, skunks, raccoons, mice, herons, canada geese, grebes, geckos...and this is just what I have seen myself at night. I also wrote a blog on what happened there (Including DWP malfeasance with the water) which, in fact, caused the empty lake to be refilled a month before the DWP original date.

In my observations, after the construction and drought, and DWP's failure to keep the reservoirs full, all life is gone. Not a sighting nor a peep.

This is when a qualified naturalist or field manager should step in, before it really is too late. I haven't seen any reptiles in 2 years - LA has reported that they have been missing for a few years, and now they are endangered.. They can't just fly or run away, and they at least did have water here. If you had had an EIR done - as we did for Griffith Park - you would already know this. And as the small animals disappeared, including mice and rats, so do the owls and coyotes and raccoons leave.

I-175-1 This "Master Plan " adds no habitat. Trees planted like an English garden, spaced so
I-175-2 many feet apart don't create shade for people (most common complaint about the Silver Lake Meadow), and don't allow insects to get from one tree to another, or create safety for any small creature. They don't even allow safe places for birds to build nests. Whoops, there goes another songbird, leaving Silver Lake!

Of course, just as importantly, the infrastructure of the Reservoirs as a source of
I-175-3 emergency water for fire management can't be underestimated. For decades, the LAFD has been using the reservoirs for water drop helicopters to tamp out fires in the Burbank and Glendale mountains. Not to mention the destructive Griffith Park fire!! And we shouldn't forget about possible earthquakes...

You already have the perfect test case: Silver Lake Meadow.A complete Fail. No one goes.It's almost empty. Lots of signs for no dogs, but lots of dogs there anyway. Acres of muddy grass, because grass needs so much water, and there's DWP, pouring millions of water into keeping it alive. Let's Go, LADWP! Go there yourself,
I-175-4 and be sure to read the Yelp reports

What we need in LA are green spaces, not extended public sidewalks, which is what all these plans look like. What happened to the wetland plan?

Other observations:
Our honored forefathers built a reservoir in this ravine so the water wouldn't evaporate.That's why it (and the Meadow) are so hot. It's not a good park.
I-175-5 Did you know Silver Lake is part of a Migratory Bird Path? Have you checked with federal protections for waterfowl?
Griffith Park, the 2nd biggest urban park in the country, is 1.2 miles away walking.
I-175-6 Is Silver Lake the next Echo Park for the homeless, with food, bathroom facilities, and lots of empty spaces?
Parking. Parking. Parking.

I-175-7 Don't do this, I beg you. You won't be able to pay, to get everything back that you will lose.

I am available and happy to talk with anyone looking for information and answers about the usability and protection of this area.

I-177

COMMENT RESPONSE

This project with have a HUGE impact on traffic in an already congested area!

Edgewater Terrace is a very narrow street used as a short cut to get from Glendale Blvd to Silver Lake Blvd. We currently have multiple problems with traffic including vehicles traveling at high speeds and parked cars being sideswiped / damaged consistently.

I-177-1 • Parking impact on a parking deprived neighborhood.

Where is the plan for visitor parking other than putting the burden all on surrounding residential streets ? Edgewater Terrace is already heavily impacted by businesses on Glendale Blvd and The Meadow - especially on weekends. The street is narrower than most of the surrounding streets. The impact of congested parking actually makes our street more DANGEROUS for residents who can't get out of their driveways and for visitors that can't navigate a busy car filled street.

I-177-2 • Increase in crime, overnight encampments - WE DON"T WANT ANOTHER ECHO PARK MESS!!!!!!!!!!

I-177-3 • Negative impact on reservoir wild life and migratory animals

I-177-4 • Noise and NUISANCE - We already deal with lots of public nuisance from all the bars on Glendale Blvd and people coming and going to The Meadow all day and at night.

I-177-5 • Increase in litter and trash - WHO WILL CLEAN ALL OF THIS UP? Edgewater Terrace is already a mess with trash from people that go to The Meadow now!

Re: Follow-up Scoping Comments on Silver Lake Reservoirs Complex Master Plan Notice of Preparation

I-178-1

Dear Ms. Steiner,

On behalf of Silver Lake Wildlife Sanctuary (SLWS), we submit these additional scoping comments to supplement the scoping comments we submitted earlier today. The Silver Lake Reservoirs Complex Master Plan (SLRCMP) includes the creation of new habitat in and around the Reservoirs, including artificial floating islands, as Master Plan elements. The environmental impact report (EIR) must fully analyze and disclose the potential biological impacts that would be associated with these project elements.

The commercial development and wider use of artificial floating islands has only been available for approximately two decades. The SLRCMP proposes creating both floating wetland islands out in the Reservoir waters and land-based constructed habitat terrace trays along the Reservoir embankments. The EIR must comprehensively analyze the environmental impacts of this construction including possible hawk predation. Due to the water space needed by the large migratory flocks that inhabit the Reservoirs for much of the year, the EIR must also analyze the impacts of these two new elements on the migratory birds' use of the Reservoir's open waters. The potential for increased access to the Reservoir by more aggressive species of birds, such as Canada geese and mallards, and their impacts on other water fowl species that rely on the Reservoirs must also be evaluated. The potential for these proposed new elements to reduce the water depth of the Reservoirs, and in turn reduce the cooling effects of the Reservoir on the surrounding community.

I-178

COMMENT RESPONSE

The EIR must further evaluate alternatives and mitigation measures to reduce these potential biological impacts, including the elimination of these SLRCMP components.

I-178-2

Thank you for your time and consideration in this matter.

Sincerely,

Amy Minteer

I-179

COMMENT RESPONSE

Thank you for this opportunity to submit these comments. I participated in all but one of the community meeting. I question whether this is a futile effort since the voices expressed during the in person meetings appear to have been ignored.

I-179-1 I first must question the traffic study since I only saw the boxes on the Silver Lake Blvd side and Armstrong. We have a serious traffic problem. In addition I question whether the study included West Silver Lake Drive.
There is only street parking available. Traffic also occurs on the walking path. Often it is so crowded that walkers go into the street posing a safety issue.

The enhancements that have been made in the past such as the Meadows are good because that preserved the natural environment. Relocating the pump from the grassy knoll also was responsive to community.

I-179-2 However, it is going too far talking of concrete islands and kyiak launches. Lets reserve this to the LA River improvements.
Children need to learn in the environment not in a building. Therefore no on the Educational building.

Lets improve the dog park so dog owners will be able to use the dog park rather than dog owners using the people park areas.

I-179-3 Try to preserve areas to the nature environment. We need to protect our birds as well as the wild life.

The Recreation Center can use a larger community room. However the whole area

I-179-4 near the rec center needs to be improved. The adjacent sidewalks are dangerous and yes, I have had to walk on the street where it is safer at least from falling.

I-179-5 The fence needs to stay up
No water activity because water is used during fire seasons.

Lets make small less expensive improvements. If money is raised, please use it in

I-179-6 areas that lack green space.
Thank you.

I-180

I-181

COMMENT RESPONSE

I-181-1

I am extremely concerned about how each proposed feature will impact wildlife habitats and behaviour. I am concerned about the destruction and disruption of existing habitats, especially on the knolls , and behind the knolls. where the lawns, added buildings , terraces, kayaks, etc. are proposed.

I am extremely concerned about the destruction of habitats during the construction process.

The reservoir is part of the Pacific Flyway, and I am concerned that the proposed terraces KAYAKING AND HUMAN INTRUSION ON AND OVER THE RESERVOIR WATERS WILL NEGATIVELY IMPACT THE MIGRATORY BIRDS.

I am concerned that the promenade will bisect the habitat areas in the eucalyptus grove.

I am concerned that the heron nests and fledge areas will be negatively impacted.

I-181-2

I am concerned about the negative impact of taking down perimeter fences, both along the street and the reservoir edges.

I am concerned about the negative impact on traffic and parking.

Thank you.

I-181-3

I-182

COMMENT RESPONSE

I am vehemently against this proposal as written. And, having attended past community meetings, I know I am in the majority of Silver Lake residents who also oppose this blatant exploitation of the neighborhood that we are 100% invested in. We do not just "visit." We LIVE HERE. and our voices should not be silenced or dismissed.

I am a 20+ year Silver Lake resident. I have seen this neighborhood grow and evolve. Some changes have been for the better but certainly not all. This proposed re-development of the majority of the reservoir land is an insult to residents. It is blatant exploitation by parties who are NOT invested in the quality of life of this neighborhood. I have not heard from one resident neighbor in favor of the commercialization of this urban oasis.

By "neighbor," I am referring to someone who actually RESIDES, drives, shops, sends their kids to school, patronizes SL businesses, wrangles the horrors of the
I-182-1 surge in crime (both property and personal) in our Silver Lake neighborhood.
.

This is rape. Rape of a neighborhood. Rape of land. Full blown exploitation of a warm and charming area and its residents.

I-182-2 Aside from the human residents, this will be a disaster to the urban wildlife that make Silver Lake Reservoir their home and sanctuary. We, their human neighbors, love , value and appreciate them. Bringing this additional human activity, traffic,
I-182-3 and over development will harm them.

I-182-4 Kayaks? ABSOLUTELY NO. The Silver Lake neighborhood is already plagued by
I-182-5 excessively heavy traffic and extreme parking challenges.

Thankfully, we are not without "green space" and parks in this area. Griffith Park, one of the largest U.S. urban parks is only 2 miles away.

I-183

COMMENT RESPONSE

Please engage in a comprehensive analysis of the environmental impact concerns of the following concerns regarding proposals within the MP:

I-183-1 The protective perimeter fence must be delineated as no shorter than it is now both for the protection of wildlife and birds and for the community. This has been repeatedly stated by the Audubon society as well as by wildlife agents for LA Co.

I-183-2 The presence of a wide expanse of deep water provides a respite of calm to commuters driving by it each day as well as to walkers and joggers, to coyotes, and other wildlife and an element of safety to water foul resting on the water during their journey on THE PACIFIC FLYWAY. This would be disrupted by overdevelopment of additional structures for study (the existing bldg can be incorporated for the same purpose) , terribly so by permitting any water sports, or commercial ventures to provide them.

I-183-3 Further it is of paramount importance to present definitive plans for maintenance and governance of this revered public space....both as it is within a residential

I-183-4 community , and the geographical area places the lake within a “bowl” that

I-183-5 transmits and exaggerates sound and by nature is located on narrow hillside streets with extremely limited parking.

I-183-6 Overlooks and green terraces invite additional human activity that is not protective of wildlife and require. maintenance. Wildlife are nocturnal .. they arrive when humans leave . ... and in the current situation in Los Angeles the lake area must not become a dangerously unprotected campground . Hours of access need to be enforced.

I-184

COMMENT RESPONSE

What about the coyotes? Be CONSIDERATE of the pack..

Have you assessed what wildlife exists there now? I would like to see that report.

I-184-1 Oaks Oaks Oaks!!!

The plan looks a little too people friendly; not wildlife friendly enough.

Please don't tear up the whole thing at once. Do it in stages.

I-184-2 It needs fencing or patrols at night, at least in portions where people are likely to camp.

Owl boxes, please.

I-184-3 A permanent Monarch garden based on native milkweed, with places to pupate, would be AMAZING. Great place for school field trips. It won't look so good in the Fall and winter, but it would be real.

Thank you for your time and energy.

I-185

COMMENT RESPONSE

I've been a resident of Silver Lake for over 45 years. I reside directly in front of the
I-185-1 meadows. Since the inception of the meadows my neighbors and I have had to deal
I-185-2 increased traffic, parking issues, specifically the blocking of our driveways, trash left
I-185-3 in the parkway, and people partying at night and into the a.m. well beyond the 10
p.m. closing time.Throughout the years I have met with LAPD and the park police to
voice my concerns. My belief is that the further development of the Silver Lake
I-185-4 resivor will only increase the challenges we presently face. Should this plan come to
fruition I would like to know what actions the city would take to mitigate the present
and further impact on the neighborhood. Thank you for your consideration.

I-186

COMMENT RESPONSE

I am in in full support of this project and am so happy to see beautification and revitalization of an underused and unrealized urban jewel. I understand the concerns for parking, but that should not prevent us from creating a beautiful and universally accessible park.

I-186-1

I love the design, the promenade, the islands, the new plantings, the animal access, and the education center. There were lots of people in the community meetings that were in support of the these design elements and I want to make sure our voices are heard as well. We are excited for the designs to move forward.

I-187

COMMENT RESPONSE

I-187-1 Project should be as low impact as possible on the environment, neighborhood, traffic/parking, etc. This neighborhood was not built for, nor designed for a project like this, and there is a perfect alternative in the immediate vicinity, that being Griffith Park.

I-187-2 Plus funding would be better allocated to a neighborhood that desperately needs green space which this area is the opposite of. There's no real need except for creating more protection for the natural environment that has developed over the
I-187-3 past 100+ years. Some educational purposes would be welcome if they could serve the public schools in the area and be integrated into their STEAM education.

Turning the reservoir into a "destination" where folks spend hours and hours of their recreational time will jam up the neighborhood especially in regards to parking. Currently people visit for a relatively short period of time; coming and going within an hour or less.

I-187-4 I haven't seen any plans or options for how parking will be accommodated within the reservoir property so residents will be forced to deal with more traffic, congestion, loitering, and pollution (created by parked and idling cars -- which is already a
I-187-5 problem).

Thank you!

I-188

	COMMENT	RESPONSE
I-188-1	I was told the deadline was 2/7, not 5 pm on 2/7. I don't know what I'm reacting to; don't understand what impact we might have. I know that at the last in-person meeting, we seemed mostly unanimous on less is more and not wanting an education center. But it doesn't seem like our feedback had any impact whatsoever. I've heard nothing about changes that were made based on feedback....?????? I think it's unconscionable that DWP is taking so much space. It makes me nauseated. One of my big concerns is the fence (I would like us not to have one), but that huge and contentious question isn't even addressed in the video. I also think it's terrible that at the forum you held in January the participants couldn't see each other. Why? It feels like just another effort to keep the community weakened. Sorry, but this experience seems so disempowering, by design.	

I-189

COMMENT RESPONSE

I feel like I'm asking the same questions repeatedly... that's because I am and I'm
I-189-10 receiving no answers. Aside from the impact the duration of this project will have on
I-189-11 the neighborhood, and aside from the monumental cost when the millions could be
better spent in working in our homeless crisis & the increase in crime in Silver Lake,
I-189-1 i want to know what plans are being made to handle the influx of cars and visitors to
I-189-2 the new reservoir? Where will they park? Who will provide security? What
department will be responsible for maintenance & garbage collection? How will the
I-189-3 noise pollution & traffic congestion be mitigated during the 8 years of
I-189-5 construction—and afterwards? The police can't handle the increase in crime
now—how will increased police patrols be funded? I've yet to see an environmental
I-189-6 report that adequately & honestly assesses the impact on wildlife that make the
reservoir their home (you're wrong about the ducks; the herons are gone and where
will the coyotes go? The city has been unable to maintain the small areas opened to
the public in Silver Lake Blvd. so forgive me for being skeptical about how the new
Disneyland will be maintained. About a mile from here is a playground that's big
enough for all—it's called Griffith Park. This residential neighborhood will be
I-189-9 impacted in ways you're not addressing—refusing to address. I don't see any sign of
projection designed to protect those of us who will be dealing with the construction,
delays, congestion, pollution, traffic etc. How about some answers? Concrete,
thoughtful answers.

I-190

	COMMENT	RESPONSE
I-190-1	I forgot to add that I used to get emails from you about the project; then they stopped.	

I-191

COMMENT RESPONSE

I am a resident of Silverlake who has a home on the W Silverlake side of the Reservoir complex. I attended all but one of the community meetings and would like to give my feedback to this written document.

1. There is no need for additional concrete construction inside of the fences, especially when they present opportunities to enter the water areas. These areas will turn into places where water accidents will happen. The lake is deep. Drownings are a great possibility.

2. Do not take down the fencing, once again giving opportunity to water accidents and creating an unsafe, unsecured environmen. There would never be enough security to keep the area free from vandalism.

I-191-1

3. Kayak launches? That was not agreed upon by the majority of people attending in-person community meetings. Again, the lake is too deep, and too dangerous for amateur kayaking. It seems like this is a business opportunity for someone outside of the City services- so perhaps it was pushed by non-adjacent residents.

4. No need for an education center. The Silverlake branch of the LA Public Library is within walking distance and has a community room which can be used as a teaching center. Also schools are close by with adequate facilities.

5. Noise. The over construction of this area used by wildlife will be hazardous to them and to residents on both sides of the lake. It is already noisy because the lake and the hills around the lake act as an amphitheater. DWP noise is amplified. Automobile traffic noise is amplified.

I-191-2

6. There is absolutely no way that the adjacent street can handle the overflow parking that will be needed.

I-191-3

7. Keep this oasis intact. Plant more trees. Water the ones that we have. Plant reeds for nesting places. Leave good enough alone.

I-191-4

I-192

COMMENT RESPONSE

Hello LADWP and LA City Team -- Thank you for all your work on this plan. One important comment. I do not think we need to be adding structures to the reservoir complex, particular the shade structure around the Ivanhoe Overlook. If we want shade for an outdoor classroom, large shade trees would make much more sense from an ecological perspective, providing heat absorption along with shade, and more nature for humans and animals. Plus they will be considerably cheaper while providing greater value. These can cover the benches and boardwalk you plan, but my neighbors and I think shade structures are the wrong way to go and would like to express our opposition to them. Thank you.

I-192-1

I-193

COMMENT RESPONSE

NO TO SILVER LAKE RES COMPLEX MASTER PLAN.

I-193-1 I am very concerned about the Silver Lake Reservoir Complex Master Plan. How long will this take and at what expense? After enduring the three year LADWP Bypass Project with endless trucks and dirt and noise I can't imagine another endless interruption of this quiet community. I have lived here over 25 years and I feel the improvements of upgrading the walking path, the meadow and new fencing have been great additions. But this is a neighborhood of small streets and limited

I-193-4 direct access. There are already issues with traffic and parking. The blue herons just

I-193-2 started to come back to nest but that won't last with what looks like an enormous amount of construction. Please reconsider. It is ridiculous to spend this kind of money on a community that doesn't need it and doesn't want it. I imagine that there

I-193-3 are many, many parts of Los Angeles and even Silver Lake that could using this funding for essential improvements. Sincerely. Susan Murphy

I-194

COMMENT RESPONSE

I come to Silver Lake to enjoy the peace and tranquility of the meadows. It is

I-194-5 beautiful knowing that the wildlife is safe. Please keep it that way. Nonsense having

I-194-6 concrete islands and launches. There is too much traffic right now and no place to park. Use the facilities at Griffith Park rather than construct an Educational Building.

I-194-1 How about ensuring equity of green space in Los Angeles rather than spend millions in an area that is perfect.

I-194-4 Do not take the fences down unless you are ok with a tent city. Look what happened to Echo Park lake and Mac Arthur Park lake.

I-194-2 Construction of any kind will jeopardize safety and nesting of wildlife.

I-194-3 One more thing, fire departments use the reservoir when fighting fires in the hills of Glendale, Lake View Terrace and surrounding areas.

Protect what we have.

I-195

COMMENT	RESPONSE

I-195

COMMENT RESPONSE

Public Comment for
Silverlake Reservoirs Complex Master Plan
Environmental Impact Report
Submitted by Dr. Penny Kunitani, Silverlake resident and homeowner

I. We need permanent robust perimeter fencing with gates that can be closed and locked at night. This will help prevent:

1. -disruption to wildlife, much of which is very active at night.
2. -undesirable human activities, such as attacks for robbery, rape, and hate crimes; vandalism; graffiti; theft of public property; camping; etc.
3. -the need to greatly increase security patrols at night.
4. -the need to plan all vegetation and structures with public security in mind.
5. -the need for illuminating all areas with very extensive and bright lights (see more on lighting below).

I-195-4

Please note that other local parks, such as all of Griffith Park, are closed at night with limited access. For example, Griffith Park has all access roads closed and locked after 10 p.m. every night. Thus, it is not unique or unreasonable to close access to our public parks at night.

II. The Knoll provides most of the protected wildlife land habitat that the Complex provides.
However, the Master Plan calls for the regrading and development of portions of the Knoll, and the severe reduction of its open green space. The Educational/Community Meeting building that necessitates this grading would replace wide areas of wildlife habitat, and duplicates existing space in the Recreation Center and in the public schools.

III. Construction, in and around the Complex, has been a common occurrence in our community for years. There needs to be mitigations to construction consequences.
For a time, the Reservoir even lost the herons that had nested within it. Implementation of this MP will cause significant disruptions on our community lasting many years, which includes, for example, noise, traffic, vitiated air quality -- all that happens in a construction zone. There needs to be specific plans to ensure that life around the reservoir will not be hell while we are preparing for the eventual return to our heavenly reservoir environment.

I-195-8

IV. There needs to be increased capacity for transportation, and in particular, parking accommodation. It is *completely unrealistic* to think that Los Angeles residents, as well as tourists, will all come to Silverlake via public transportation. Currently, Silverlake is very difficult to reach by bus, as the one bus line does not go on any major routes, and runs very infrequently. There is no other public transportation serving anywhere within at least two miles of Silverlake, including Metrolines, train, shuttle, etc. Even if bus routes are improved and increased, there is no accommodation for where these buses will be able to stop. As it is, parking near the dog park/basketball court/recreation center is highly impacted every single day. On weekends, traffic is often jammed in this area. The residents who live close to the reservoir will suffer: trash,

I-195

COMMENT RESPONSE

I-195-9
I-195-10
I-195-11

trampled vegetation, perhaps crime, constant parking problems in the vicinity of their homes, exhaust from vehicles roaming for parking spaces, and more. The surrounding streets are extremely narrow, hilly, winding, most often without sidewalks, and often very circuitous, causing one to go up to a half mile just in order to go around the block. It would be dangerous, and a civic nightmare having traffic cruising around these neighborhoods looking for street parking.

V. LIGHTING needs to be adequate for safety, while also minimized and controlled to reduce light pollution.
Light pollution is highly detrimental to wildlife and human life. Migrating birds can be so confused by bright lights that they get lost or mesmerized and die. Animals and plants need darkness at night for their health and well-being. Those that hunt and forage at night need the cover of darkness. Those that sleep at night need darkness to sleep. Humans need darkness for health and for enjoyment of the night sky. There is already enough light pollution in Los Angeles, so let's not make it even worse.

I-195-1

Thus, the lighting needs to be shining *downward only* to a limited area, unless specifically needed to shine upward or outward. The lighting needs to be of *limited lumens*, and not more than necessary for the specific purpose. Using excess lumens is not only creating more light pollution, but it is also a financial waste and a waste of energy, and thus causing more global warming. The lighting needs to be *only where needed* for specific designated purposes. The lighting needs to be of a warm color (color temperature of no more than 3000 Kelvins), and avoid blue light (which is found in most LEDs and compact fluorescent. See International Dark-Sky Association for more information.

VI. Hydrology and Water. There should be native plants used.
This will conserve water, and create environments hospitable for our native animals, such as native bees, butterflies and birds. Further, I suggest a native plant focus, such as a "nature walk" where there could be signs to identify native plants and their benefits.

VI. NO kayak accommodations. Kayaks, other watercraft, swimming, motor craft, and other water activities are highly detrimental to wildlife, and are not desired by the community. Even though, and especially since there is no current plan for kayaking on the reservoir, there should be NO accommodations made for launch sites.

I-195-2

VI. Community input needs to be able to impact this development!
In the past several years, there were at least three very large community meetings. Several of the community speakers at the EIR scoping meeting on January 19, 2022 protested that although they and apparently the vast majority of other community members wanted very limited development, the Master Plan has apparently largely ignored the input from the community. WE DO NOT WANT A RECREATION OR ENTERTAINMENT CENTER WITH A WATER FEATURE. We want a pleasant, peaceful respite from the hectic city around us, where all can enjoy this uniquely beautiful place. Also, we are concerned with the huge financial cost, and that this expenditure will not be located where it can do the most to balance equitable distribution

COMMENT RESPONSE

I-195-3 of city resources for all Los Angeles residents. *Minimal development* is desired by the Silverlake community, including both now and into the future.

I-196

COMMENT RESPONSE

I-196-1 Please analyze and evaluate the potential negative impacts on the existing and future wildlife in the project site and the wildlife in the immediate and greater Silver Lake neighborhood from all the Master Plan proposed new construction and expanded human activities, expanded buildings, observation platforms and living laboratory, overlooks, seating and viewing terraces, expanded running and walking paths and promenades and their materials, items installed in picnic groves, basketball court, playing field, multi-purpose facility/community center, floating dock and kayak launch, overlook shade pavilion and outdoor classroom and environmental education center and the construction materials of these places, the informal play walk, picnic grove and upper lawn and the materials, fitness circuit, restrooms, new hardscape of any kind throughout the project site, anticipated increased human activities during the day, evening or night, anticipated increased automobile, bicycle including electric bikes, skate board, scooter traffic along the perimeter or within the project site, lighting of any kind, noise impacts on wildlife.

I-196-8 Please discuss and compare the percentage of existing hardscape within the entire existing project site and the percentage of proposed new hardscape within the project site.

I-196-2 Please discuss the problems of potential crime, harassment and increased trash from the potential homeless population that will be attracted to the project site because of the proposed restrooms.

I-196-3 Please explain why this plan has so much new construction and human activities when the vast majority or those attending the numerous neighborhood meetings about the proposed project objected to this plan in favor of increasing a native habitat to provide support for our stressed, and dwindling wildlife population.

I-196-4 Please explain why this proposed plan is the opposite of what the vast majority of the neighborhood wants.

I-196-5

I-197

COMMENT RESPONSE

I-197-3 I request the BOE consider extending the Scoping Comment period in order to allow the public more time to review this very important and extensive Project. There has not been enough public outreach, notably no signage at the site itself of the request for public comments during this scoping period in the CEQA process. This signage could incorporate QR codes that can immediately point users to the NOP and the Master Plan itself. This signage would reach people who visit and use the open spaces at the Reservoirs. I also request the City and the BOE consider preparing and sending out an Initial Study, with an additional 30 days' comments period, to give the public more details and allow people to provide informed comments on major changes to their beloved open Reservoirs space. The Project Description in the NOP is altogether too skimpy and leaves out too many changes for the community to be well-informed. Furthermore, this lack of outreach feeds a growing sense in the community that their opinions are ignored or not valued by the City and the BOE.

Please expand the scope of the DEIR as broadly as possible, as community members have requested, to cover evaluation of all elements of this very large and impactful Project. I also request that the EIR evaluate the cumulative impacts in all environmental resource areas should all or a majority of the projects be constructed, including but not limited to Biological Resources, Aesthetics, Land Use and Planning, and Public Services. For instance, what would be the effect on

I-197-1 groundwater recharging if all the concrete platforms, terraces, and buildings were built and the permeable soil covered?

The EIR must consider the impact of any structures which obstruct or clutter the iconic view of the open waters and shorelines. Destroying that view has not only

I-197-2 Aesthetic Impacts but an impact on what beautiful aesthetics give us - peace of mind. Introducing island masses on the water and more concrete on the land would impact that open view, that peace of mind.

For the sake of our diminishing bird species and wildlife, I ask the EIR to evaluate all

I-197-4 the proposals in the MP for their impact especially on our Biological Resources.

I could list every single item proposed for construction in the Master Plan, because in a Plan this large, with this many changes, nothing should be overlooked. I ask the EIR to do just this: evaluate and carefully analyze every item. Only then, will the public and the City know what they're getting and what the future may hold.

I-197

COMMENT

RESPONSE

I-198

COMMENT

RESPONSE

As a 31-year Silver Lake homeowner residing a block from the reservoir, I want to make clear that the Silver Lake Reservoir Complex Master Plan is replete with negative environmental impacts, several of which can only be remedied if the plan is scuttled and the complex is left as it currently is.

The plan also contains what at best is a misstatement about a key area of environmental concern — transportation and traffic. The parking section of the Master Plan 3.8.2 states, "Given the traffic congestion concerns of the community and limited parking availability, making alternate modes of transportation to the Complex plentiful and easy to access is paramount." And then it goes on to claim that County Metro bus service is provided to the reservoir by the #201 bus along West Silver Lake Drive. That bus service was discontinued in June 2021, long before the Master Plan was completed and made public.

As the plan states, there is limited parking and traffic congestion and that plentiful alternate modes are "paramount" to the plan working. Yet the plan contains NO adequate parking (or transportation) solutions and thus should be summarily rejected on environmental grounds because without a decent solution, there will be deleterious impacts on transportation and traffic, on aesthetics, on air quality, on noise, and on the neighborhood's population, among other impacts.

Is there a way to sufficiently mitigate these problems? No, there is not. There is no logical place to add the necessary parking for a project this size and besides, adding that amount of parking would again create negative environmental impacts that could not be mitigated in terms of aesthetics, air quality, greenhouse gas emissions, water quality, land use and planning, noise, transportation and traffic and impact on population and housing. I-198-1

Alternate transportation suggestions in the master plan seem to be two-fold. One is adding bicycle lanes. The problem with that is that comprises motor traffic on streets that are already frightfully narrow and are often made even more narrow by parked vehicles and pedestrians/runners who use the street instead of the walking path. Most Silver Lake side streets don't even have sidewalks because they are so narrow. The few cyclists who use city bike paths in the area would not be much of an "alternate mode" of transportation to alleviate parking and traffic congestion, not to mention reduced neighborhood aesthetics, would have an additional negative environmental impact, including life-threatening consequences due to the inability of fire trucks and other emergency vehicles to access these narrow streets which would be utterly clogged with parked cars of Complex users and additional traffic.

The concept of public transportation may be the biggest joke of all. Has any survey been done of the current users of the reservoir complex to see how many now arrive by public transportation? Does anyone really believe that it's anything more than a miniscule portion? One reason, of course, is that while the planners may tout public transportation, the city and county public transportation has actually ELIMINATED public bus routes in Silver Lake.

Another major negative environmental issue with the plan: it does not provide for maintaining the perimeter fencing that is around the complex now, and which should remain in place in order to protect and enhance the now-abundant wildlife. The plan calls for so-called habitat islands to be floated on the water. But it also makes clear that there will be even more interaction and as a result, interference, by human beings on the water, the Knoll, the Overlook, the Eucalyptus Grove and other areas. The planners also concede in the Wildlife section that the Reservoir already provides "an important year-round resource of fresh water for wildlife, particularly for local and migratory waterfowl." Birds on the Reservoir grounds, according to the master plan CURRENTLY (without 'habitat islands') include "hummingbirds, crows, blackbirds, gulls, herons, egrets and ducks...Great Blue Herons, Great-Horned Owls, Northern Mockingbirds and Red-Tailed Hawks." Observers also see squirrels, rabbits, lizards, bobcats, coyotes, and particularly apt for the creators of this master plan — skunks. I-198-2

It doesn't take a degree in rocket science to know that an area like this without a perimeter fence will prove less comfortable or enticing for wildlife, while making it more enticing for unhoused people who the city has failed to find sufficient assistance for. An open park space like this in the middle of the residential neighborhood (with no major arteries and precious little parking) is a recipe for disaster, creating safety problems for the general public as well as the wildlife.

What kind of joke is it that after having spent so much money on the Echo Park Lake complex that Councilman O'Farrell and other government officials have now found it necessary to put up a chainlink fencing around the entire park due to the tent city that emerged there — yet want to take down the fencing at the Silver Lake complex while asking the public to spend more than $250 million to allegedly 'improve' it while ignoring the environmental impacts? Seems like an awfully big joke - but one that isn't in the least funny.

The need for fencing and the issues of wildlife safety, construction chaos and insufficient parking, were made time and again by a vocal majority of residents and stakeholders who attended the public sessions prior to the master plan being finalized. And time and again, the firms developing the master plan ignored these concerns, making a mockery of the clear desires of the majority, who would now be asked to fund most of this project. Nonetheless, the designers plowed ahead, for God knows what reasons, with a plan that would leave large portions of the complex open to any humans who care to be there - regardless of the welfare and safety of the wildlife or the garnet is now that is one of the few remaining coherent and workable neighborhoods in the city of Los Angeles.

The wildlife that has lived in peace for generations on Silver Lake would be negatively impacted, from the construction through the completion, on the Knoll, the Eucalyptus Grove and the Overlook. And again, without perimeter fences, the public's safety and welfare would likewise be harmed over the long run and short run. I-198-3

Speaking of the short run, the plan also fails to address the negative environmental impact of construction activities to its traffic, hazardous materials, noise , air quality, greenhouse gas emissions, aesthetics and biological resources. Thousands of truck trips would be necessary to cart out the concrete and other materials to change the face of the reservoir complex; and even if the walls were pushed into the existing reservoir area, the same problems, with just as much noise, dirt and other substances, air impact on wildlife etc., would result. Besides the folly of not keeping a reservoir in place in case it's needed again in the long run — or the issue of using as a source to draw water from in order to fight the increasing wildfires and structural fires in the area due to climate change, as the master plan gives lip service to without explaining how — lowering the walls could also cause creating flooding hazards in the neighborhood and in other areas, mainly toward the Echo Park and MacArthur Park districts. Construction and the final results would increase the already overloaded traffic, particularly during rush hours, throughout the neighborhood and the northeast Los Angeles in an area already highly congested.

In a city where tens of thousands of people sleep on the streets and the local government does not have the willpower, money or apparent capability to solve such problems, it's difficult to fathom that limited governmental resources would even be considered for use like this — to address all the negative environmental impacts and the slew of other problems engendered in the Silver Lake Reservoir master plan. Based on the inherent flaws in the plan itself, it is inconceivable that the project would work out as planned, given the lack of adequate environmental and other planning, or that it would be funded sufficiently in the future to avoid the secondary resulting environmental lessening. If any work is undertaken prior to a community vote on taxing itself, as the plan calls for under Measure A, it's not certain to fail in that most residents would be reluctant to agree to spend money to provide increased traffic and parking congestion, safety and welfare hazards not just for themselves but for the wildlife that flourishes at the reservoir, not to mention the lengthy construction chaos and the air, noise, light and traffic environmental issues it creates. I-198-16 I-198-17 I-198-15 I-198-18

Then the negative environmental impact would be all the more profound and leave the city with a huge eyesore in what is one of its most flourishing and diverse neighborhoods.

One of the few things the city has not made worse over the years is the Reservoir Complex — mainly because it has for the most part kept the fence up and kept its mitts off. There is no need to undertake this project - the meadow, the walking path, the recreation area, including the current dog park and the children's playground, already provide for a plethora of human needs and uses. Moreover, as the master plan acknowledges, more than 30 other public parks already exist within a two-mile radius of the Reservoir, including the granddaddy of them all, Griffith Park. I-198-19

I-199

COMMENT RESPONSE

Aesthetics:
I-199-1 The park exterior should be pleasing to public as well as those residents that adjoin the park who has invested in the community and should be no additional buildings and structures along lake front. We strongly against any unnatural elements on water including but not limited to, boats, buoys, kayaks, etc. to be introduced. The people come to the lake to enjoy birdwatching a variety of migratory birds, not anything like giant fake swan puddle boats on Echo Park Lake. Any new fencing should be aesthetically compatible with the urban oasis environment. The should not be any tree removals unless the existing trees are not expected to survive. Public Art projects are welcome, but they should be strategically located and must not interfere the natural setting of the lake and its surroundings.

Air Quality:
I-199-5 Vehicular travels to and from the lake would be substantially increased if more active use of the lake is introduced so as idling vehicles trying to park. Parking on site should be regulated to a reasonable number of spaces based on environmental
I-199-6 factors to be determined in the report.

Biological Resources:
I-199-7 Migratory corridors should be maintained. Added vegetative communities should be consistent with the native species. The addition of fish life is good for the lake but the species must be carefully selected. In order to protect wildlife, introduction of any recreational use on the lake, including but not limited to, boating, kayaking, swimming, fishing, or any other water sports must be prohibited. Otherwise, the
I-199-8 project would significantly impact the biological resources. In addition, any camping, temporary or permanent, or regulated or unregulated would endanger pattern of wildlife.

Greenhouse Gas Emissions:
The Project would potentially impact GHG emissions if traffic is increased due to additional or active use of the lake is introduced. The project should embrace
I-199-2 reduction of emissions of greenhouse gases.

Hydrology and Water:
Stormwater form the community should be piped into the reservoirs as well as the
I-199-9 use of gray water should be encouraged.

Land Use and Planning:
Planners must respect an established community that has enjoyed decades of a peaceful and quiet environment around the reservoirs. Planners should always make
I-199-12 decisions based on the fact that what is implemented may negatively imapct the neighborhood forever.

Noise:
I-199-10 The construction noise shall be minimized by limiting new construction project on the site. Also, see Land Use and Planning above.

Recreation:
I-199-3 All recreation should be passive much like what has currently enjoyed. There should be no water sports or activities at all. This Project should be maintained as a habitat for wildlife enjoy without interacting with the water. Policing water activity would be problematic for a reservoir this size. If restrooms and potable water is proposed, any camping, temporary or permanent, regulated or unregulated must be prohibited, and
I-199-4 City shall maintain the facilities clean and safe.

Transportation:
Introduction of any additional active use of the lake would substantially increase the traffic to and from the area. In addition, it would substantially increase vehicular traffic within the hillside residential neighborhood within a half mile of the lake. The narrow, winding, and steep hillside streets would not be able to accommodate additional vehicular traffic volume. Also, it would accelerate deterioration of the hillside streets which are difficult be repaired by the City's street services. It would substantially impact the City's CIP budget and affect the life of existing residents in the hillside neighborhood.

I-199-11 Street parking should be regulated by implementing preferential parking for 3-4 block radius from the exterior of the Project at the Cities cost with the exception of street parking along Silver Lake Blvd. (east narrows) where homes are adjacent to but are located above the street, directly adjoining the recreation center (South Valley) and along Silver Lake Blvd. West where homes are located above the street. Ride-sharing and bicycling may be encouraged. A designated area should be used for vehicular drop off and pick up.

I-200

COMMENT RESPONSE

The Environmental Impact Report (EIR) is a crucial component in the Silver Lake Master Plan. It is critical that qualified experts conduct a rigorous, scientific examination of how the dramatic changes proposed in the plan would impact the wildlife and wild birds that depend on the reservoirs for substance and habitat — and how the proposed changes will affect the quality of life for people who live in the surrounding residential neighborhood.

I-200-12

I-200-14

Please include the following when preparing the EIR:

I-200-10

1. Consider the impact humans (and dogs) will have on wildlife and migratory birds that depend on the undisturbed open water and undeveloped areas around the existing reservoir complex. Estimate the amount of trash, including human and domestic animal waste, the proposed changes will create.

I-200-1

I-200-13

2. Provide an accurate assessment of how long the project and the accompanying noise, dust, pollution, truck traffic, etc. will last. Evaluate how these disruptions will disturb wildlife and the surrounding community.

I-200-11

3. Examine if creating a large public park, with rest rooms and other facilities, will increase crime and attract transients — especially if fencing is removed. Compare to Echo Park Lake, which became a large, unmanaged and dangerous encampment of unhoused individuals, making it unusable and unsafe for residents, children and visitors.

I-200-5

4. Measure and accurately project how much additional traffic will come to the neighborhood, which is already highly congested.

5. Evaluate how an increased demand for parking will be managed in the surrounding area. Parking is already very limited and public transportation has been recently cut. Please base this assessment on a realistic evaluation, not a hope that people will use public transportation that does not exist.

I-200-6

6. Ask why there should be a "kayak launch" in a body of water that wildlife and wild birds depend on, when kayaks are now permitted on two designated stretches of the nearby Los Angeles River.

I-200-7

7. Question why open spaces need seating and other amenities that contribute little and disturb the environment and wildlife.

8. Evaluate the negative impact of commercial developments, such as snack stands, in an area protected for wildlife — and in a peaceful neighborhood that has numerous options for hungry or thirsty visitors and residents.

9. Ask why we need constructed “viewpoints” when there are already ample views and a stunning walkway across the reservoirs. Provide a detailed evaluation of why an education center is needed. Include cost, number of people served, staffing, goals, etc. Determine if the existing Silver Lake Rec Center could be used for this purpose.

I-200-8

10. Last but not least…Silver Lake is a park-rich and affluent community. Would the millions of dollars it will take to provide unnecessary changes to reservoirs that now function as a wildlife sanctuary be better spent in neighborhoods that have no or little access to parks? Evaluate if a portion of these millions could also be better used to provide much needed improvements to the Bellevue Park Rec Center and the nearby Griffith Park pool. Please provide up-to-date comparisons between park-rich and park-poor communities in Los Angeles.

I-200-9

2/1/22

I have lived in the same Silver Lake front house since 1948. Your plans will ruin the pristine beauty of the lake.

No habitat islands.. People want to see water - not dirt. No bleachers. How are you keep out homeless people?

subject	Silver Lake Reservoir Complex Master Plan Project – Public Scoping Meeting Transcript

Below is a transcript of the verbal comments received during the comment period of the Silver Lake Reservoir Complex Master Plan Project's Notice of Preparation (NOP) public scoping meeting held on January 19, 2022 at 6:00 p.m. via zoom.

Transcript

Comment M-1

Jessica D: Hi my name is Jessica. I've been a resident of Silver Lake for 32 years I live quite near the lake I have to say I've appreciated all of the improvements over the years. I haven't necessarily agreed with them all one-hundred percent, but I think overall it's been great for the area, the one problem we have that I feel has to be addressed and I'm still not hearing anything coming out of any of you about is parking. Where are all these cars going to go? You seem to have these vague ideas about public transportation being used to somehow dis-incentivize people from driving their own personal cars, I think, in view of the pandemic and just in general, the way people live in LA that's unrealistic and we're going to have hundreds of cars and living as close as I do, to the lake. I can tell you, people blocking driveways they do all kinds of things that become really difficult for the residents, so please you got to have a management plan for the parking, and that is a huge environmental concern as well, thank you.

Comment M-2

Debbie Slater: Hello, thank you for the presentation, one of the things I'm hoping, you can answer is to tell us how many people from the public are attending this meeting. You you've talked about how there are a lot of people present, it would be nice for us to know, since we can't look around the room and see how many are there. My name is Debbie Slater I'm very active in the Silver Lake neighborhood Council. I sit on several committees, but the two that I think are important here are. I sit on our resident committee, and I sit on our urban design and preservation committee. I want to emphasize that we specifically named our land use committee to include the word preservation because it's something that's very, very important to this Community. That we hold on to what makes this Community special and important, I want to reiterate the previous attendees comments about traffic

and parking that has been sorely lacking in all of these presentations and won't be addressed my other big concern about this is how much this will cost. As much as I know, this will be a benefit to this city, I think there are other more important things in a city that need to be addressed. That covid is highlighted with, not just in illumination to the nth degree, but also with a fine tooth comb of the issues that that really travel this city and that the money spent on doing this when we already have a very usable space can go to much better efforts, thank you for my time.

Comment M-3

Maryann Kuk: Hi I'm on your Notice of Preparation that went out to some residents, I know some people who haven't yet received it, is there any way for the next Community meeting notice that you could send it out sooner and then secondly, on page two it talks about the project description. 116 acres of the 127 acres Silver Lake Reservoir Complex that's a little deceiving because there's a lot of water in that acreage and I think if you separate out the land use, from the water I know there's some improvements, you want to make on the water but it's inconsequential. One of the comments that I have read was with all that land why don't you just build housing so someone didn't understand that it isn't really 127 acres of land, thank you very much.

Comment M-4

Thomas, Andy: Thank you hi I'm Andrew Thomas. I'm the president of the Silver Lake Resorts Conservancy and I just want to thank the Bureau of Engineering for sponsoring this Master Plan and Herbert Jones for leading it and DWP for providing the funds and environmental sciences, for doing the EIR. We're all very excited about the about the master plan process, especially the creations of the wetlands wildlife habitat in the middle of a major metropolitan area and we're excited about the fact that wildlife habitat will increase biological resources and hopefully in some small way, mitigate greenhouse gas emissions alongside, adding passive recreation, which is much needed in the city and aesthetically the naturalization of the banks and the improvement of the walking and jogging paths are also exciting. To us, and eventually also there's lots of stuff much more native vegetation and then all of that, while providing wildlife through the islands that are inaccessible to people and the wildlife fencing that will protect the wildlife in certain areas of the property so it's all very exciting, we hope that the construction goes very smoothly and fundraising is easy.

Comment M-5

Freda Shen: Hi can you hear me. Hi I'm free to share and I'm speaking as a board member, on behalf of the Silver Lake Wildlife Sanctuary. A lot of what's proposed in the Master Plan looks good but we've got three major concerns to add to the scope of the draft EIR and one overall concern. First, we asked for environmental impact analysis of any lowering or removal of fences, especially the perimeter fence, which should be part of the project description. We support the goal of fencing, which is a safe complex for people and wildlife. The current perimeter fence really mitigates negative environmental impacts, such as occurred to Echo Park, where crime increased, while community use of the park decreased. Instead of lowering or removal, we propose the alternative of creating and installing some new beautifully designed wildlife friendly perimeter fence with flexible gated access to keep Community reservoirs and wildlife safe. We think that this particular item affects almost every single environmental impact in the reservoirs. Second, we asked for detailed analysis of the impacts of the proposed education Center at the Meadow, especially on biological resources and land use. We completely support the goal of environmental education; however, we suggest that the goal can be better served with fewer negative impacts. By the alternative of a natural outdoor setting with a small bathrooms area such as other parks have. This would preserve the little wildlife land habitat the complex has, as well as open land use for all rather than duplicating a school classroom. Third, wherever construction is indicated, we asked for analysis of impacts,

particularly on surrounding community and on wildlife and that all mitigation or elimination efforts be taken. We believe this will further the goal of a better transition period for all, for instance, since no boating activities have been approved for the reservoirs we suggest the alternative. We suggest, sorry, the alternative of eliminating the construction of the kayak launch site. Our overall concern is for the environmental impact on the biological resources wildlife and birds, including their habitat, our concern is that these impacts be widely and carefully analyzed for the draft EIR. Thank you so much, and it's great to see you all.

Comment M-6

Hugh Kenny: Thank you, excellent. At the last public meeting and friendship hall after being fed it, with the exception of donors we were asked to sit at tables and sort out what we wish to see in the master plan. To my delight, most of the Community agreed that we want to lose reduction or disturbance of this scant existing habitat that's what was expected the table, and that was expressed as each table sent a representative to the stage. For example, most found it odd to destroy nature to build a nature Center. As the meeting closed up, I was pleased with the results and I lovingly remark to one of the presenters “looks like there's not gonna be any nature center”.

“We don't know that” was the reply. “But the Community just spoke against it”, I insisted. “It doesn't matter, what matters is the input from the groups withstanding”, I was told. Now here we are assembled again that the day on summer note the noise can check off a pro forma due diligence box that wrapped it up and start signing contracts. The only reason I'm here is that there is some very nice confused people who still believe that you might be influencing to avoid real protection to this small patch of habitat, and I wish to be supportive to them there's a sanctuary group withstanding that I'm not a part of I am not Nice, you know, please listen to them at least. Please listen to them, at least, thank you.

Comment M-7

Stephanie Bartron: Hi, can you hear me okay? Yes, great I'm Stephanie Barton I'm a local garden designer I've lived in the neighborhood for 30 years and I'm on the board of the SRC and I wanted to say I'm so excited about all of the great stuff that's included in this, including capturing the storm water that falls on our hills that we can't capture in our gardens, because our hillside are so deep and actually getting that into the reservoir and making that part of our water cycle, instead of throwing it away. I'm excited about the opportunities to sequester carbon and but the watershed, the wetlands areas and in the soil and the biomass of all of the improvements and most of important and I’m excited about how we can transform this property from a barren wasteland which it is, I mean I don't know why everyone is so excited about preserving the Knoll right now, because it is not a wildlife sanctuary it is basically bare dirt with some dying eucalyptus trees on it and so. I'm excited that this property could be transformed into a national wildlife sanctuary when we start to plant locally native plants we start to restore the water said we provide habitat and food for the birds and safety and forage for the animals, so thank you so much for all of this, and I look forward to the EIR process showing how much soil quality of this property is going to be improved by this proposal, thank you again.

Comment M-8

Penny Kunitani: Thank you very much. Thank you, and I agree with all of this. So far, stated and I have not heard anyone or read anything about camping I'm assuming, of course, it will be no camping allowed and I’m wondering how that's going to be controlled, is the property going to be open for people to access at night and, along with that concern is a nighttime lighting, I am very concerned with lighting in the city of Los Angeles, it has been up. Well let's see increased with new light bulbs everywhere on the streets, which are causing more and more light pollution, so that none of us can really enjoy the night sky anymore even what's left of it in our city,

and so I hope that the lighting will be pointing downwards, or as needed, not in every other direction, where it's not needed, and also that the color and the type of lighting will be considered to diminish the light pollution. And again, I agree with every single stated concerns so far, I am not delighted with the plans, thank you very much.

Comment M-9

Eric Brightwell: Hello America right well I'm 22 years or like 23 years so really. I'm a resident and I'm on the neighborhood Council. I've been following this for a while, I'm really looking forward to the reservoir becoming an improved an amazing public asset. I did miss the first few minutes, so I just want to apologize if I express a concern that's already been addressed tonight, but, as someone that enjoys visiting the complex almost every day, and probably after this meeting. I really enjoy seeing and hearing all the wildlife that already lives in the reservoir like the nesting herons and the great horned owls and the coyotes the waterfowl or the migrating birds and I haven't heard it addressed, often in these meetings that these were natural wetlands before they were a reservoir and I hope that the development can be undertaken in a way that sensitive to the non-human residents that are already in the reservoir not just about making a better in the end because it could be very disruptive if it's done during like nesting season. Okay, thank you.

Comment M-10

Leslie Edmonds: Yes, thank you for the opportunity, I must say that I am very pleased, if I understand the scope correctly that the current situation where we have not enough food or shelter for those birds that are trying to nest. I know every spring we have baby ducks end up in people's pools, because they cannot navigate the current reservoir if they get in there, they can't get out. So, I see the slopes as being a naturalized a benefit for those nesting birds and the fact that the reservoir will have food will increase the viability of the habitat, I would like us all to look at the magic Johnson park in South la that recently opened. That is much larger than ours but has a viable bird population as well as capability for people to walk very close to the edge of the water and it's an excellent example of what we can have here so I'm looking forward to seeing that manifestation in Silver Lake. Thank you.

Comment M-11

Liliana Griego: Hello, good evening everyone, my name is Liliana Griego I am with friends of the LA river so first. Thank you so much for hosting this meeting. I wanted to comment on the water resource report, and specifically the section that's addressing the reservoir refilling. It stated in that report, that the LA river could be a potential water source to refill the reservoir and specifically diverting water from the river during dry weather flows. Which is somewhat of a concern for us, there are several the three reclamation plants that currently discharge water into the river are looking at decreasing that amount of water which can definitely impact, you know water quality and habitat and the various species that depend on the river. Which is why the flow study is being conducted right now looking at what potential impacts that can have in reducing flow and you know, we definitely believe that we need to find a balance between recycling water but also ensuring that we have a healthy river that supports wildlife and recreational activity so.

As this EIR process begins, we just want to make sure that attention is given to what potential impacts can come with diverting water from the river to refill the reservoir, especially given that the three water treatment facilities are already considering reducing flow to the river currently so thank you.

Comment M-12

Sandy Kaye Stakeholder: Can you hear me now. Yes, hi. Environmental impact are you guys high? I'm just gonna lay it out, you know. I have been involved in this stuff I'm a 23 year homeowner I live on the bottom of Duane street and Silver Lake Boulevard so I'm 17 steps from the lake. I'm a pretty cool person and I'm kind of a hippie and I was all for it, I was like yeah let's put a jet ski track in there let's put a Ferris wheel in the middle let's have some concerts. But it's not possible it's not tenable I have no weekend because of the impossibility of the traffic and I'm seeing a severe lack of fiduciary and public service responsibility towards the impossibility of traffic mitigation, and I believe and I'd like to surmise that that's why it hasn't been addressed magically. On a dress nicely I brought visual aids, I understand you can't see them and I'll be more than happy to. To put them in but you don't need me to send in pictures of traffic backed all the way up Duane Street sitting there and who is breathing that stuff are you guys living here you stakeholders living here, are you breathing all this toxic air from backed up traffic all weekends I don't think you are. Because, if you are, you would not be doing this right now, it would be great if we had a different world, but we don't people are selfish and they're obnoxious and they don't care about other people and that's where we're living you guys all know that. So, as somebody trying to make money off of this thing. Is something shady going on? DWP just got busted for that thing you know it's always been shady here, I know that my comments aren't going to mean anything, because I've been talking about this, since 1999 to Jackie Goldberg to Eric Garcetti again I have visual aids letters from them things like that. The unresponsiveness of Mitch O'Farrell's offices its just been just it made me physically sick, which is sad because I'm a nice person I'm a good person and I like people and I love you all, but this thing can't happen, and I use the word can't sadly. It can't because we don't know how to make it right, we don't know how to fix the traffic. I'm sorry, thank you all and I'm sorry.

Comment M-13

Mark McMillan: Oh hello, can you guys hear me okay. Yes, I so I'm a resident of Silver Lake for 22 years I live adjacent to the reservoir. So, the first thing I want to say is over the years I'm very happy with the improvements that have been made with the reservoir. You know it warms my heart to see the meadow full of families, and you know people picnicking on you know Sundays and Saturdays or flying kites oh it's great everything that's been done over the years. Number one I like to make sure that any changes are family friendly, meaning that the space is still open to the public, and it doesn't become sort of a private housing and space for a select few number of people, you know that set up tents or decide to like sleep there overnight, because I think that takes away from the family friendly element, and it makes it so that it's not really open to the public, and it becomes a private space for a handful of people that decided to set up residency there. So I think that safety is very important, I like to be able to see kids be able to ride their bikes around the reservoir I see lots of kids learn to ride bikes for the very first time on that path, and I just wanted to be a very safe space for them. And then, finally I think I've heard a number of people talking about comments of capturing stormwater/rainwater. I'm on a hill right now adjacent to the reservoir and this last round of storms, we had it was just it breaks your heart to see all of that water, you know flow into you know the gutter knowing that it's going to go straight out to the Pacific Ocean and then see the reservoir and such low levels, you know somehow we have to figure out a way to capture some of that storm water, and you know figure out a way we can get back into the reservoir and kind of integrate those two things. So those are my comments thanks you Thank you everybody for your efforts.

Comment M-14

Daniel Weidlein (he/him) -- SLNC Region 7 Rep: Hi Daniel Weidlein here I am on the subway neighborhood Council and also the Co-Chair of the reservoir committee. Thank you all for doing what you're doing I'm excited about anything that leads to the greening of Los Angeles and while I understand that there's a tribal cultural

resources assessment, I think that's what it's called built into the EIR process. It's my hope that it won't just be a box to be checked, but then an earnest conversation will be had with members of the Tongva/Gabrieleño tribe to discuss ways in which redevelopment of natural resources can be done in a way that honors first peoples and potentially ways in which the redeveloped reservoir can offer special access to native peoples to cultivate and responsibly harvest native plants. By no means by no means is it my place to speak on behalf of anybody from the tribe, but I have had numerous conversations with various people who are Tongva descendants, and they have requested exactly this, so I would love to see them brought into the conversation with a meaningful way and not just checking the box to make sure that there wasn't an archaeological site of importance. Thank you.

Comment M-15

Andras K: Can you hear me? Thank you very much for having this meeting, I appreciate having the event having its availability and being able to make comments, I agree with previous speakers, especially for instance Ms. Shen who talked about the importance of having a fence around continuing to be around the reservoir I've lived here for over 20 years I'm very close to that reservoir and I think one of the reasons why it's as well preserved and as relatively safe, as it is compared to the rest of Los Angeles, is because the fence has protected it from people and they're negative effects, you only have to look at, for instance, the dog Park, to see what happens when area is developed around here and not properly maintained. I wonder about how this development would be maintained, who would be responsible, where the budget would come from and what we can rely on going forward once all of this new area is accessible. I support maximizing wildlife friendly improvements, but I do think that it's very important that there be some sort of a, of a daily curfew along the lines of what's there now that makes daytime use of whatever areas that developed, you know be manageable and then minimized and you know, emptied, at the end of the day, so that's my comment, and thank you very much.

Comment M-16

Bob Soderstrom: Hi there can you hear me Nicole? Yes, hey thanks so much hey everybody it's from President of Silver Lake Forward, thank you very much for hosting this meeting tonight, many thanks to BOE and DWP and Hargreaves and all those engaged in the process, on behalf of the city in this ambitious and exciting project. You know that Silver Lake forward is a neighborhood 501(c)(3) we're dedicated to remaking the retired Silver Lake reservoirs and a friendly, sustainable and inspiring way. As a personal note, I live steps from the walking path and use it almost every day with my family and kids and their friends and all of the improvements over the years, like the meadow and the South damn walkway the Ivanhoe pathway they've all increased our quality of life, considerably, especially during this pandemic so thanks to those of you on the call who have helped get those improvements made into reality in the last couple of years, we are really excited about the possibility of this huge renewal project, and this EIR process, we want wildlife to thrive here in the future, especially we don't think wildlife is thriving in the current state. The reservoir is a very large bathtub with concrete walls and there is not enough vegetation or wetlands or food for the birds that already live there, they all have to fly to the river to feed and come back and we think the possibility. Especially the drawings that have been submitted are going to make wildlife thrive in a much larger level than they already do. My next and final point is just that many of our members are parents of children and active in the local schools like Ivanhoe, Franklin, nickel train, and king. Our local middle school, King, is one of the few LAUSD environmental magnet programs, and when we did an outreach with those kids. During the Master Plan process they're so excited to be stewards of the land to grow bees to release tadpoles to plant flowers and more and we're excited about the possibility of reconnecting these children to the land they live by. Thank you very much.

Comment M-17

Betsy Isroelit: Hi and thank you all for your hard work I'm a long time Silver Lake resident I live close to the reservoir and also co-founder of Silver Lake together and might have missed this I've seen a lot of comments and about what happens after the reservoir is possibly changed or turned into a public Park, but I haven't seen anything about the process like what happens to the wildlife. During the construction, what will the reservoir be drained I think you understand my question, I see the EIR deals with the results, but what happens, while it's all being changed. That's my question, thank you.

Comment M-18

Freda Shen: Thank you for the little box, I was just wondering if we put a comment you know, submit a comment online and then later think of more things we want to say, can we have more comments or are we limited to just one comment from each computer.

Nicolle Steiner: No, you can go ahead and submit an additional comment or if something comes up within the comment period that you

Freda Shen: know just wonderful yeah cuz sometimes you know I just don't think fast enough, so thank you very much.

Comment M-19

Penny Kunitani: Thank you very much, I was wondering how will we know what the impact of our comments will be? Will they just be somebody earlier suggested a checkoff box or how will they be considered, because I agree with the gentleman who said at the last meeting, where we read the tables, it seems to be the general consensus that we wanted less development rather than more, and yet it does not seem like those hundreds of people were listened to, thank you very much.

Comment M-20

Sandy Kaye Stakeholder: Got me, am I there. Yes. Hi Sandy Kaye, I did have an organization called the Duane street association when we tried for nine years to get some of the funding that was given to Los Angeles, the Department of Transportation specifically to mitigate some of the traffic a cut through traffic from freeway to on the water through under Duane street to get to Silver Lake. All requests to mitigate the cut through traffic over the past 23 years have resulted in zero dollars spent on Duane St. 00 do you know how insulting that is multimillion dollar Silver Lake Reservoir Project with the brand new nice fence and the whole walking path which I was. I was for okay do it, although I wasn't asked what we do it, but can you can you help us with the traffic. No zero money zero not $1. How about this a free way 2 terminus project? $22 million given to us from the Fed how much was spent on Duane St? 0 dollars, they told me to go pay for a left turn left turn arrow if I wanted it. They told our association, if you want it, you can pay for it that's what DOT said. This is the kind of treatment that we have gotten it's just abhorrent and it makes so much sadness that anything that you do that's going to create happiness is going to be negatively balanced off unless you actually start to say something about the traffic. Stand up, take a stand say something about it address it. Stop being afraid. Yeah that's what I got to say. Thank you for listening.

Comment M-21

Shawn Kiggins: Hi I am I missed the meeting so. I think it's waiting to get lead in so apologies for asking questions information they've been given more of a kind of generally I looked at the documents online I could see

that the Final EIR is scheduled to go to city council. In June of next year I was more wondering like is there what's the funding is that still to be determined? Hi can you hear me. Sorry about that.

Nicolle Steiner: that's okay earlier in the presentation we did mention that this meeting is really focused on taking in input from the public, we are here to collect comments and unfortunately, we're not responding to any questions at this time, so your comment is being recorded and has been added as part of the public record. If you have any additional comments that you would like to provide at this time we can add them as well.

Shawn Kiggins: Got it okay so it's very legal proceeding, I see. Got it okay. All right, thank you.

1.1 Master Plan Scope of Work

The Silver Lake Reservoir Complex (herein referred to as the "Complex" or "SLRC") located in the Silver Lake neighborhood of the City of Los Angeles (herein referred to as "the City" or "LA") was removed from the City's drinking water supply system in 2008 and is being repurposed as a passive public park.

The Silver Lake Reservoir Complex Master Plan (herein referred to as the "Master Plan") provides a bold vision for a new 116-acre park that will blend urban wilderness with community park amenities. The Master Plan includes a physical plan, park activities and uses, park sustainability, funding strategies, park operations and maintenance considerations, a conceptual cost estimate, and a phasing strategy. The Master Plan scope of work has been summarized in the following Master Plan Report chapters and sections:

Chapter 1: Executive Summary
Chapter 2: Project Overview
Chapter 3: Analysis
Chapter 4: Process
Chapter 5: Master Plan
Chapter 6: Park Sustainability
Chapter 7: Capital Funding Strategies
Chapter 8: Park Governance, Operation & Maintenance

1.2 City of Los Angeles Project Team

This Master Plan was initiated by the Council offices of Councilmember Mitch O'Farrell and Councilmember David Ryu. The Los Angeles Department of Water and Power (LADWP) financed the planning effort and worked collaboratively with the Bureau of Engineering (BOE) to define the Master Plan scope. The City Project team was led by the BOE who composed the scope of work, led the effort to hire the consultant team, and managed the Master Plan process. The City project team included staff from Councilmember Mitch O'Farrell, staff from Councilmember David Ryu, staff from the Mayor's office, and staff from the LADWP; with input from staff in the City's Department of Recreation and Parks (RAP), the Office of the City Administrative Officer, LA Sanitation, and others.

CONSULTANT DESIGN TEAM

The Master Plan was completed by a team of local consultants led by Hargreaves Jones, an international landscape architecture and planning firm specializing in the design of urban parks. Hargreaves Jones was selected to lead the Master Plan by the City of Los Angeles through an open RFP / interview process. The Hargreaves Jones Team (herein referred to as the "Design Team") includes local experts in landscape architecture and architecture (Chee Salette), community outreach and engagement (The Robert Group), water resources and civil engineering (CWE), biological and cultural resources (GPA Consulting), park economics (HR&A Advisors), geotechnical and structural engineering (Beyaz & Patel), traffic engineering (JB & Associates), and cost estimating (Leyland Saylor & Associates).

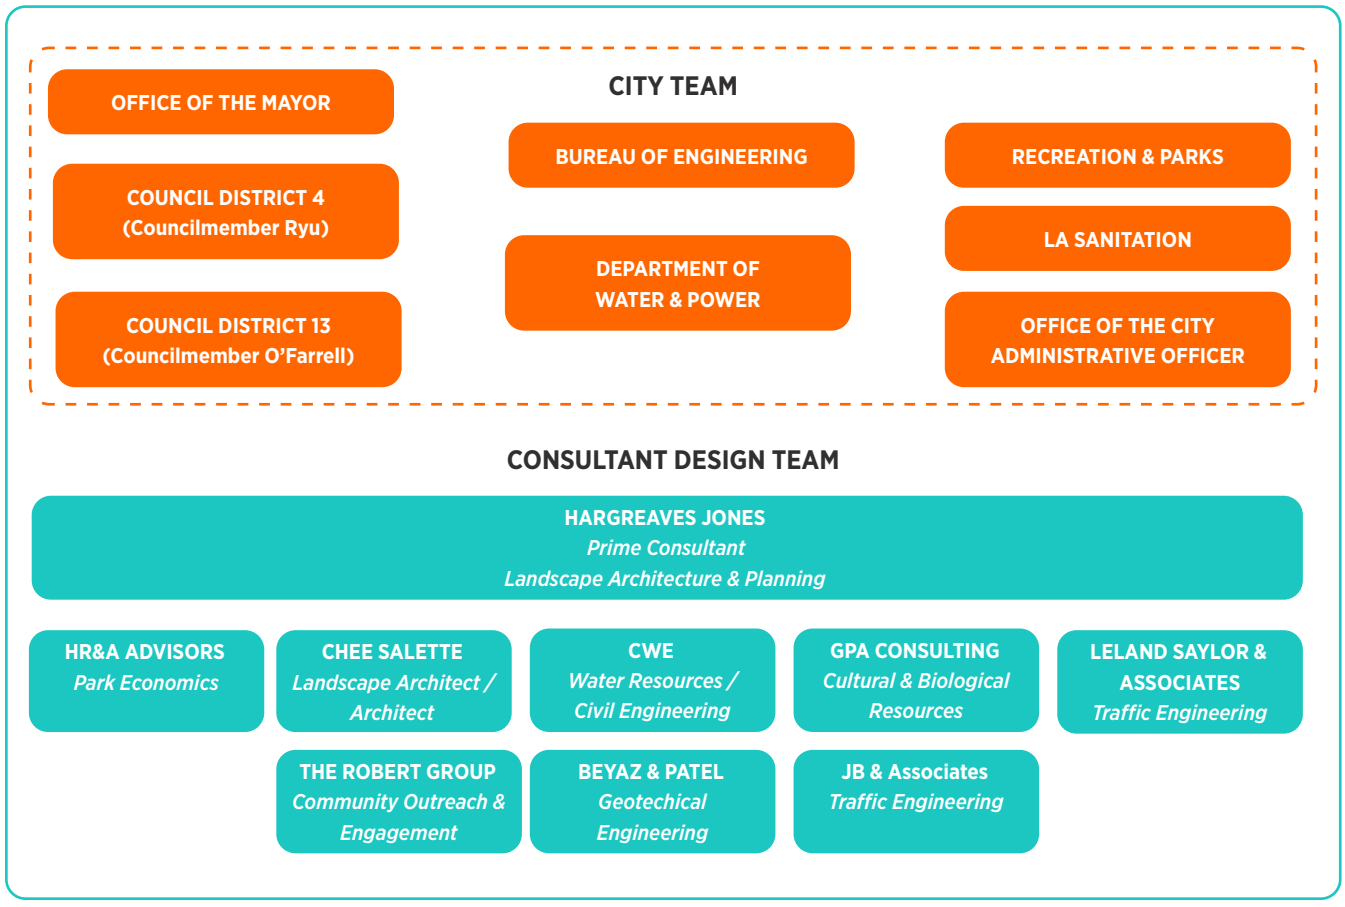

Figure 1-2 Master Plan Project Team

1.3 Project Overview

In response to a federal mandate to phase out open-air drinking water reservoirs in 2006, the LADWP decommissioned Silver Lake and Ivanhoe Reservoirs and removed them from the City of Los Angeles' potable water system. Silver Lake Reservoir was removed from service in 2008, drained in 2015 to construct the Bypass Project, and then refilled in 2017. Ivanhoe Reservoir was removed from the distribution system in 2017 and has been consistently filled with water. Although Silver Lake and Ivanhoe Reservoirs are no longer a potable water source, LADWP has active components at the Silver Lake Reservoir Complex (SLRC) which requires preserving areas of the site for system operations, personnel, and future projects. LADWP offered the majority of the Silver Lake Reservoir Complex property to be used to allow access by the community.

The Master Plan initiative was undertaken to allow the Silver Lake community and City of Los Angeles to consider repurposing this major piece of urban infrastructure for public use. The Master Plan project was officially initiated in March 2018, when the City Council approved a Memorandum of Agreement between the BOE and the LADWP, allowing the BOE to begin the Silver Lake Reservoir Complex Master Plan process. LADWP, in continuing its commitment to the neighborhood, funded the development of the Master Plan. The agreement included LADWP continuing their operational responsibilities, such as maintaining the integrity of the dams and LADWP onsite facilities.

The Master Plan was seen as a unique opportunity to transform this historically significant and iconic urban feature into a community park while addressing LADWP's on-going operational needs. The community was given a chance to determine the future of this 116 acres of land and lay out a shared vision. The proposed Master Plan design is the result of a robust community participation process and partnership between Council Offices, City departments, and consultants. It is a testament to what we can do when we work together.

1.4 Vision & Goals

As habitat continues to disappear in our increasingly urbanized world, reintroducing wildlife back into cities is becoming ever more important. Early in the community engagement process, enhancing and expanding habitat for wildlife was identified as a primary goal for the Master Plan. The Park is envisioned as a hybrid space that balances urban wilderness with human uses; unleashing the power of natural processes to create a healthy ecosystem and of human connections to nature and one another.

The Master Plan creates a foundation for realizing this vision. It conceptually defines the design, construction costs, phasing strategy, and approach to the operation of the Park. It specifies near and long-range strategies for park development and provides a framework for post-construction programming, operations, governance, and long-term financial sustainability.

The project goals listed below guided the development of the Master Plan:

- Create a clear, bold design that repurposes the SLRC into a public park
- Preserve and enhance the unique character of the SLRC
- Create a public amenity with safe and varied access
- Balance active and passive uses
- Balance wildlife habitat with human uses
- Create a design that is implementable and can be partially funded through grants
- Allow for continued LADWP operations, access, and future use

1.5 Community-Based Planning Process

This Master Plan evolved through a uniquely collaborative process integrating extensive community and stakeholder input and frequent progress reviews with City departments and the Council Districts. The 18-month community process included five large Community Workshops and eight focused meetings with the project's Stakeholder Working Group to garner public feedback at all critical stages in the planning and design process: Analysis, Visioning and Programming; Master Plan Alternatives; Preferred Master Plan; and Final Master Plan (Figure 1-4).

The format of the Community Workshops varied from presentations and break out discussions on Thursday evenings and Saturday afternoons to an open reservoir walk at the SLRC. Due to Covid-19, the final Community Workshop was held virtually in the form of online videos and an online questionnaire which was supplemented with paper copies for those without computer access. These diverse approaches maximized opportunities to capture community input as well as give the neighborhood a chance to experience the power of the water bodies inside the fence. Community Workshops were attended by 1,570 community members and generated 8,478 questionnaire responses. The Master Plan reflects the vision and interests of the community who live near the Complex and visit it frequently. An average of 88% of respondents consistently reported living in a zip code within a 2-mile radius of the Complex and are frequent visitors – over 77% of responders visit the reservoirs at least once per week. In the final questionnaire, participants indicated that they would visit the Complex more often when the Master Plan is implemented.

1.6 Master Plan Overview

The new Park is conceived as a hybrid infrastructure that amplifies the use of the reservoir water bodies to attract and sustain wildlife, connect with nature and neighbors, and educate. The Master Plan design was inspired in great part by its rich history and narrative from a freshwater marsh and intermittent pond within Ivanhoe Canyon to a significant and iconic piece of Los Angeles water infrastructure.

As shown in Figure 1-5, the proposed Master Plan design consists of a series of overall park zones stitched together by a 2.5-mile, tree-lined Promenade. These zones include: The Meadow, The Knoll, Ivanhoe Overlook, Eucalyptus Grove, East and West Narrows, and South Valley.

The Park will feature two flexible lawns with shade trees, a picnic grove and ornamental gardens with an informal play area, and an environmental education center along the east edge of Silver Lake Reservoir at the base of The Knoll. At the intersection between the lawns and water, stepped seating terraces give way to wetland terraces interwoven with small footpaths. Two existing areas of woodland, The Knoll and Eucalyptus Grove, are restored to increase their upland habitat value. Extending from the shoreline embankments and within the reservoir bodies is a new ecosystem that reintroduces coastal scrub and wetland habitat to the Complex for the first time in over 100 years in the form of habitat islands and terraces.

Figure 1-5 Silver Lake Reservoir Complex Master Plan

1.7 Park Sustainability

The Master Plan design is founded on principles of sustainability, interweaving systems of ecology, water, and education cohesively. These visible forms of sustainability included in the Master Plan represent the commitment by the Silver Lake neighborhood and the City of Los Angeles to being leaders in freshwater resource management and leaders as stewards of urban wildlife.

During the Master Plan design process, a September 2019 study was published in *Science* magazine that documented a loss of three billion birds in North America, nearly 30% of the total population, since 1970. The study sites habitat loss as a significant factor contributing to this decline. Given the reservoirs' location along the Pacific Flyway and that they are such a large, freshwater resource for local and migratory birds, particularly waterfowl, the Master Plan's habitat recommendations prioritizes these avian species.

HABITAT EXPANSION AND ENHANCEMENT

Until recently, the Complex has been managed as a sterile reservoir to support the drinking water needs of Los Angeles. Its habitat value is moderate, and most significantly, it lacks food resources for birds and small terrestrial species. To remedy this, the Master Plan design focuses on increasing habitat diversity and introducing a food web, particularly for local and migratory waterfowl. The range of habitats proposed in the Master Plan will support an increasingly diverse array of birds, fish, amphibians, invertebrates, and other aquatic species. To provide this biodiversity, the Master Plan design maximizes the habitat value of existing wooded areas and creates new habitat resulting in a combined total 23 acres of dedicated habitat area.

EDUCATION AND INTERPRETATION

Along with the high priority placed on habitat and wildlife in the Master Plan, there is also an inherent responsibility for long-term stewardship. The SLRC has the potential to become an exemplary model of urban wilderness management and citizen stewardship. Through the lens of a living laboratory, the research and maintenance activities required for the long-term success of the proposed ecosystem can be made legible and transparent by increasing environmental and climate awareness across the community. The Master Plan design provides the foundation to develop a myriad of education and interpretation opportunities from organized tours, classes, school field trips, and volunteer programs, to less structured interpretive features and elements.

WATER QUALITY

The proposed water system at the SLRC has been developed to support the wetland and aquatic habitat aspirations of the Master Plan. Key variables of this system are the reservoirs' water replenishment sources (stormwater and Pollock Well), annual evaporation, aeration, recirculation, nutrient loading, and treatment wetlands. During the Master Plan development process, a Water Quality Model study was developed to predict water quality impacts in both Silver Lake and Ivanhoe Reservoirs with the goal of maintaining a level of water quantity and quality that can support the future uses proposed at the site, such as aquatic habitat. The results from the model indicated that the addition of proposed wetlands in the Master Plan, combined with LADWP's planned aeration and recirculation projects, will significantly contribute to reducing nutrients and bacteria to levels safe for sustaining aquatic habitat. This study along with the Park's water system is discussed further in Chapter 06.

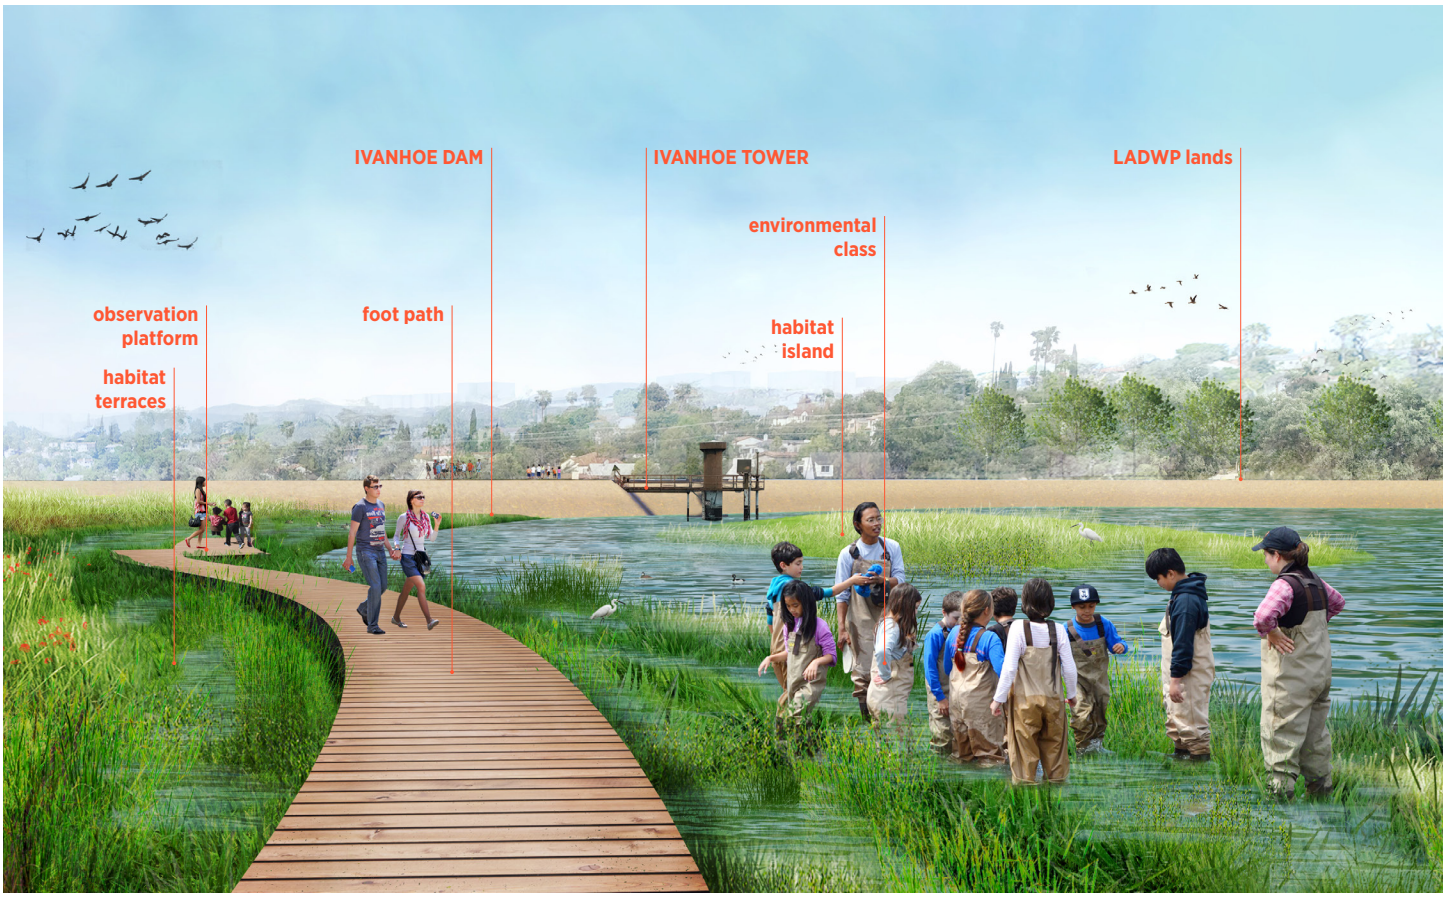

Figure 1-6 Living Laboratory at Ivanhoe Overlook

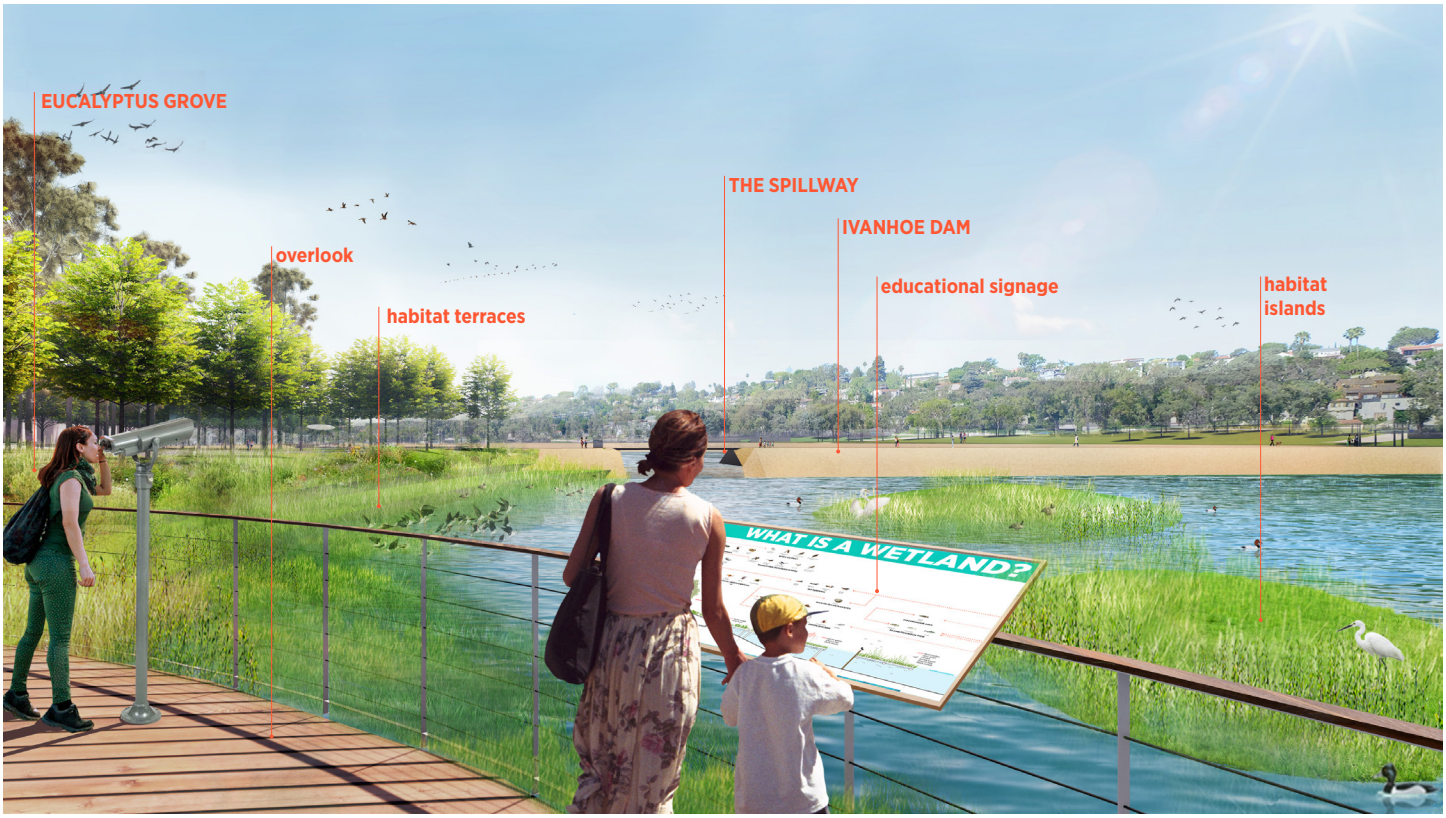

Figure 1-7 Educational Overlook at the Eucalyptus Grove

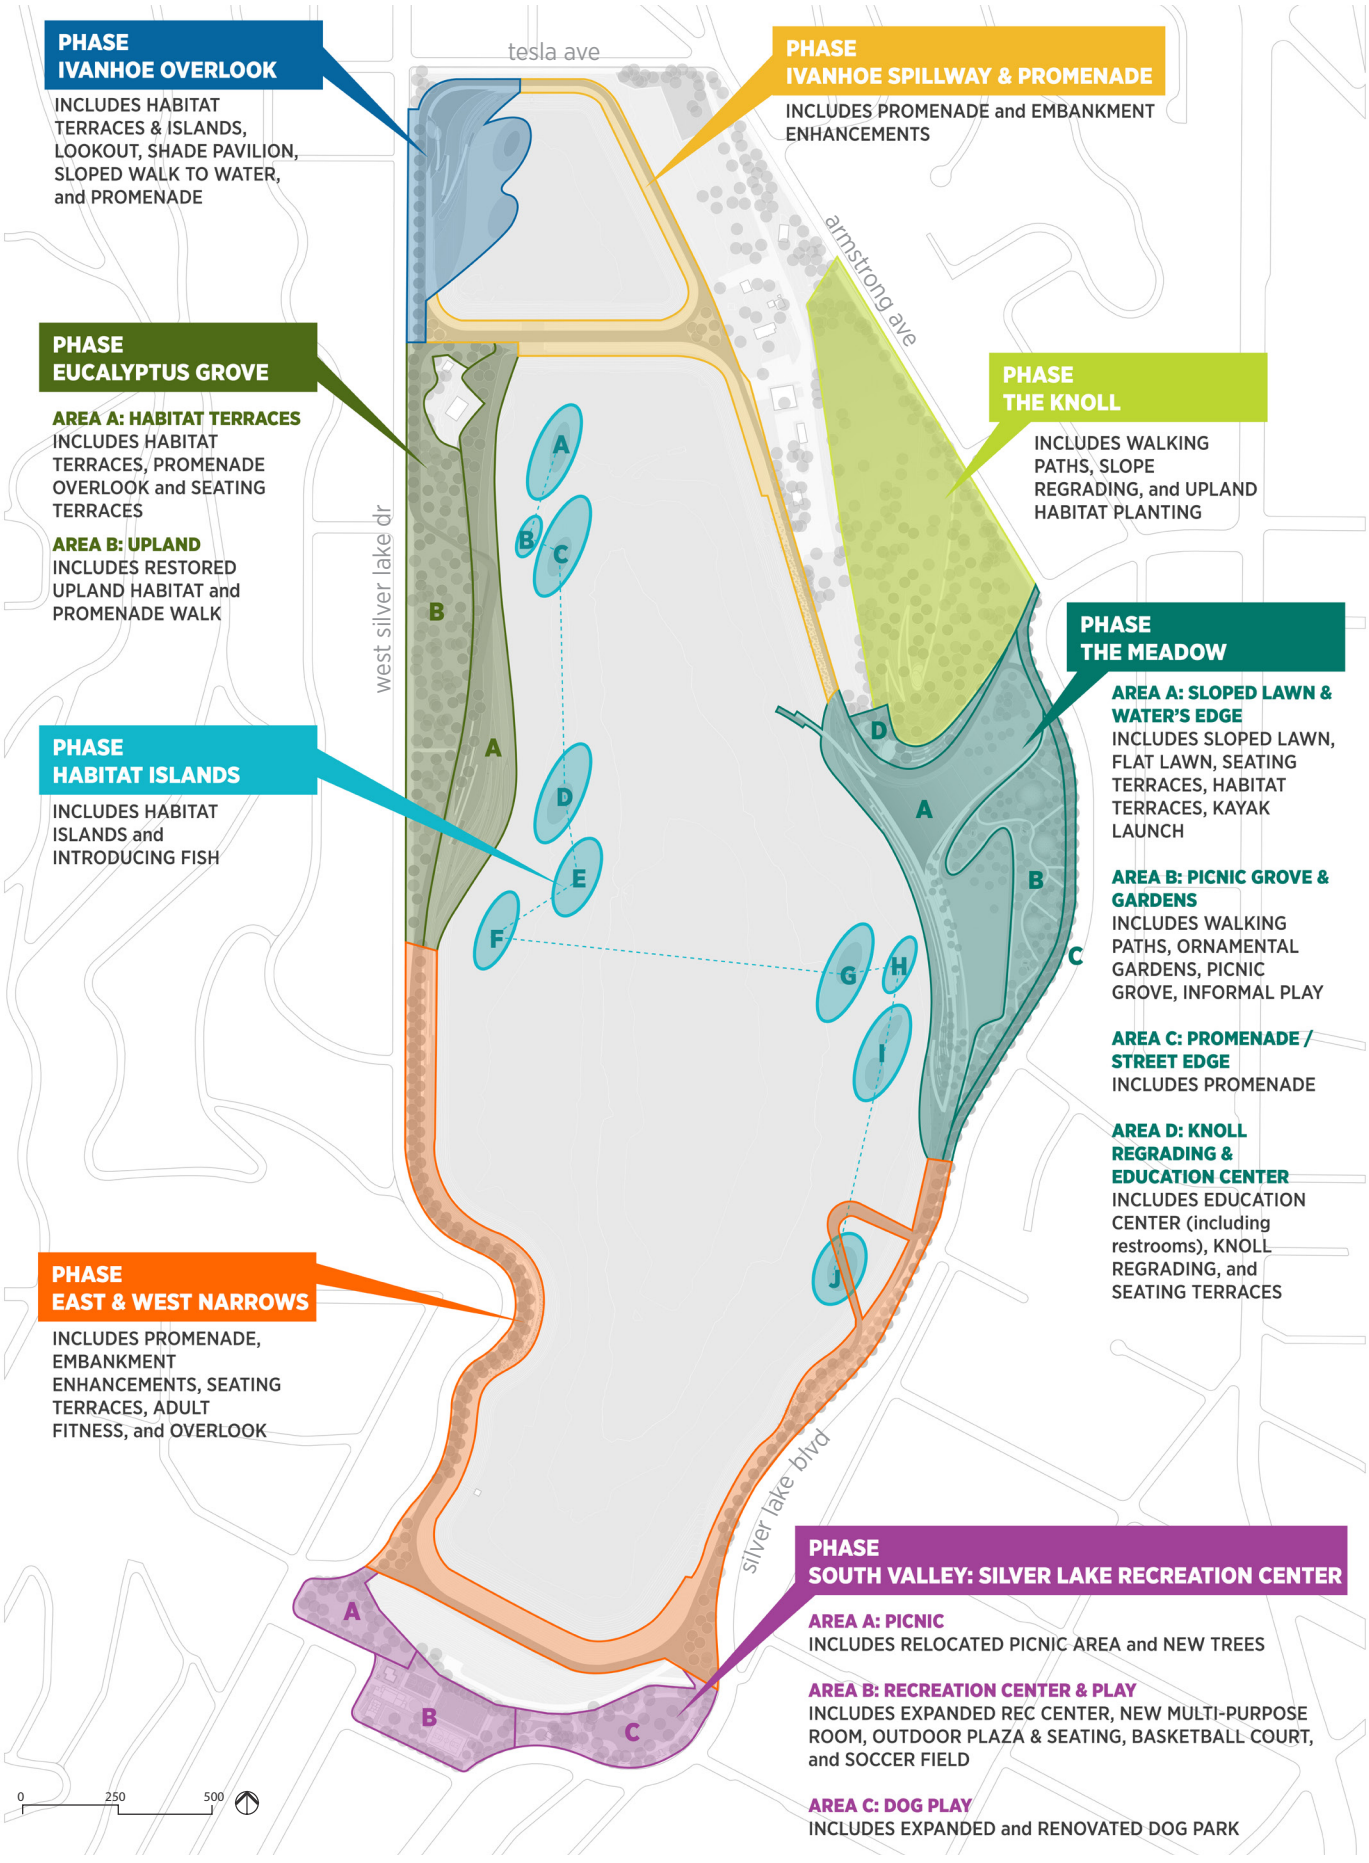
1.8 Park Phasing & Estimated Cost

The project team has identified eight potential stand-alone projects within the Master Plan design for construction phasing and fundraising. They are graphically shown in Figure 1-8 with no implied order of priority. Based on prior experience, the project team estimates each phase will take approximately 18- to 24-months to construct. Depending on funding, these phases can be constructed individually or collectively.



Some of the phases have many interdependent spaces or sub-phases, which require that they be built contiguously and sequentially. For instance, The Meadow design implementation will require cut and fill earthwork in order for the lawns to be excavated and the resulting fill from this work to be used to construct the seating and wetland terraces. This project work should happen first and is indicated as sub-phase A of the Meadow in Figure 1-8. Subsequently, the Picnic Grove and Ornamental Gardens can be completed next (sub-phases B & C), followed by re-grading at the base of The Knoll to install a footpath and build the Education Center (sub-phase D). Similarly, work along the water's edge including the proposed wetland terraces and overlook should be completed in the Eucalyptus Grove prior to restoring the upland habitat. The improvements in the Recreation and Parks area in the South Valley can be broken into three discrete projects: the Dog Park; the Multi-Purpose Facility, play fields and court; and the picnic area and replanting in the Grassy Patch.

The floating wetland Habitat Islands can be implemented all at once or island-by-island. Fish will need to be introduced following the completion of all major in-water construction work and floating wetland islands installation.

The overall conceptual budget for Master Plan implementation is $268.5M. A professional cost estimator, Leland Saylor Associates, provided construction cost estimates for each proposed Master Plan phase shown in Figure 1-8. These estimates include industry assumptions for escalation, contingencies, contractor general conditions, and soft costs. They were also developed based on the assumption that all phases of the Park will be built at the same time and construction would commence in approximately two years following an environmental clearance and design phase. Therefore, this budget is subject to change as timelines are adjusted. As a conceptual estimate, the budget is intended to provide an order of magnitude cost for the Master Plan's construction to assist the City in project budgeting and funding.

Project Phase		
	The Meadow	$60,300,000
	The Knoll	$18,000,000
	Ivanhoe Overlook	$27,400,000
	Ivanhoe Spillway and Promenade	$11,200,000
	Eucalyptus Grove	$67,200,000
	Habitat Islands	$32,800,000
	East and West Narrows	$36,000,000
	Silver Lake Recreation Center	$15,600,000
	Total Conceptual Construction Costs	**$268,500,000**

Figure 1-8 Phasing Diagram

1.9 Park Economics & Governance

CAPITAL AND O&M FUNDING

During the Master Plan development process, HR&A Advisors was retained to provide an analysis of potential public and other mechanisms to fund capital and operating needs of the proposed Park. Six public mechanisms were reviewed including: Community Finance Districts (CFD), Development Agreement Fees, Enhanced Infrastructure Financing Districts, Parcel Taxes, Quimby Fees, and Special Assessment Districts. Additional funding sources identified were Grant Funding and Philanthropic contributions.

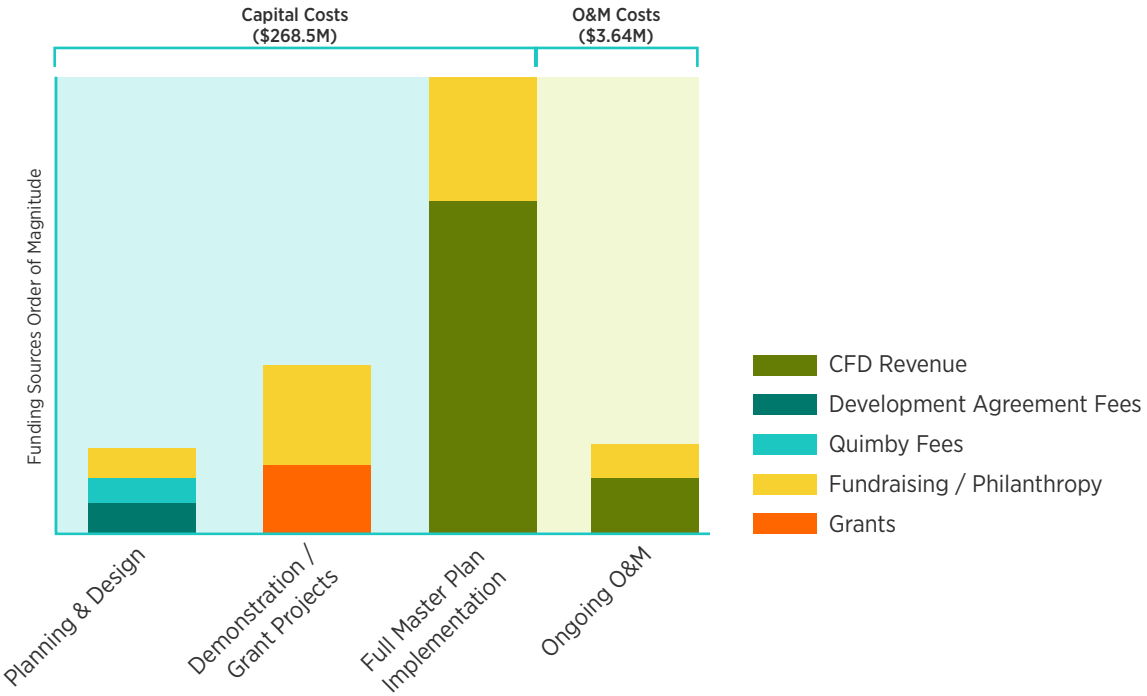
Based on the Park's context, the needs and perspective of City staff, and a review of potential funding mechanisms, the recommended capital funding strategy for the Master Plan relies primarily on the implementation of a Community Facilities District (CFD) to generate revenue for O&M and capital bonds, which would be supplemented by Development Agreement Fees, Quimby Fees, Grants, and Philanthropic contributions.

As outlined in Section 1.8 above, the overall conceptual budget for Master Plan implementation is $268.5M. A conceptual O&M budget of $3.64M annually is anticipated as described in Chapter 08. Figures 1-9 and 1-10 show the range of potential funding that the recommended mechanisms could yield, as well as how these could be applied to various phases of Master Plan implementation and ongoing operations.

GOVERNANCE

To achieve the Master Plan vision, the formation of an independent, special-purpose, non-profit entity named the Silver Lake Reservoirs Park Conservancy (SLRPC) is recommended. This special-purpose entity can be completely new or represent an expanded role for one of the existing non-profit stakeholders in Silver Lake. It can provide the leadership to manage project implementation and long-term operations. It can also fundraise to support capital and operations and maintenance (O&M) costs, with a Board of Directors that is representative of committed project stakeholders. If structured to benefit from dedicated resources and funding outlined in Chapter 07, such an entity would be endowed with the staff and budget capacity necessary to champion a multi-phase implementation process; provide sustainable operations, including maintenance of unique horticulture and wetland spaces to the elevated standard envisioned in the proposed Master Plan; and coordinate revenue allocation generated by one or more CDFs and any philanthropic fundraising.

It is recommended that the SLRPC report regularly to a City Oversight Committee led by representatives from key City departments. The Oversight Committee will ensure that Park capital expenditures and ongoing operations align with the guidelines and goals for a public open space, and will provide accountability for the expenditure of public funds. The Oversight Committee will then report to City Council and the Mayor for decisions that require policy direction.



All these topics are discussed further in Chapter 07 Capital Funding Strategies and Chapter 08 Governance, Operations & Maintenance.

Figure 1-9 Park Funding Matrix

Funding Source	Potential Funding Amount	Notes
Community Facilities District (CFD)	$150M - $200M	Includes annual O&M costs
Quimby & Development Agreement Fees	TBD	Quimby Fees can only be used on RAP lands.
Public Grants	$200k - $6M	
City General Fund	TBD	
Total	$150M to $206M+	
Remaining Capital Funding Gap	$62M - $118M	Range of capital funding needed from fundraising or City General Fund.

Figure 1-10 Master Plan Implementation Funding

Chart shows the order of magnitude expected from each funding source for Master Plan implement

1.10 Near-Term Action Items

As demonstrated during the community outreach and engagement process outlined in Chapter 04, the Master Plan has garnered significant support by the community and City leaders, with the potential to catalyze environmental stewardship for generations to come. Harnessing this potential requires early initiatives to establish appropriate funding vehicles and a governance structure, provide a road map for water resource and wildlife management, and seek environmental clearance. In the near term, the Project Team recommends pursuit of the following implementation tasks listed below. Figure 1-11 provides a conceptual timeline for Master Plan implementation and the relationship and sequencing of key implementation variables.

ENVIRONMENTAL CLEARANCE

Under the State of California Environmental Quality Act (CEQA) this project will be subject to CEQA review and will need to complete an Environmental Impact Report (EIR), the additional project studies necessary for the EIR, and engage the public in the process. While some planning, design, feasibility analysis, and Park governance work can be initiated during the EIR process, none of the Master Plan design elements can be finalized or constructed until an EIR is approved by the City.

FUNDING

As the primary funding source identified for project capital, CFD implementation details should be advanced as soon as possible following Master Plan adoption and should prioritize the following:

- Engagement of a municipal advisor and/or CFD tax consultant to develop and evaluate potential structure(s) and related detailed revenue estimates.
- Engagement of bond counsel to advise on the use of tax revenue.
- Evaluation of potential voter support of the CFD mechanism.
- Identification of a funding source to support CFD formation costs of approximately $500,000, excluding community outreach and engagement.
- Completion of a fundraising feasibility study, to establish and confirm the potential amount that can be raised from among likely donors.

GOVERNANCE

Upon the adoption of the Master Plan by City Council and concurrence of the Mayor, the City should establish a City Oversight Committee for the Park, and participate in the formation of a non-profit entity to lead the effort with the public to fund and operate the Park including the following:

- Identify a project champion who can act as a leader in this effort.
- Assemble an initial Board of Directors.
- Identify a minimum of three years of funding to support the new non-profit entity.

PLANNING

Early planning efforts to set forth the guidelines and requirements of detailed design, construction, O&M, and stewardship related to the environmental aspects of the Park will be critical to its success. These planning initiatives should include development of the following:

- Biodiversity Plan
- Wildlife Management Plan
- Tree Health Assessment
- Tree Succession Plan
- Water Quality Management Plan
- Wetlands Maintenance Plan

2.1 Project Background

In 2006, the Federal Environmental Protection Agency issued new guidelines for water quality that required open reservoirs to be covered, to be removed from service, or for the water to be treated before distribution. In response, the LADWP decided to decommission both the Silver Lake and Ivanhoe Reservoirs and build a new covered water storage facility north of Griffith Park called the Headworks Reservoir.

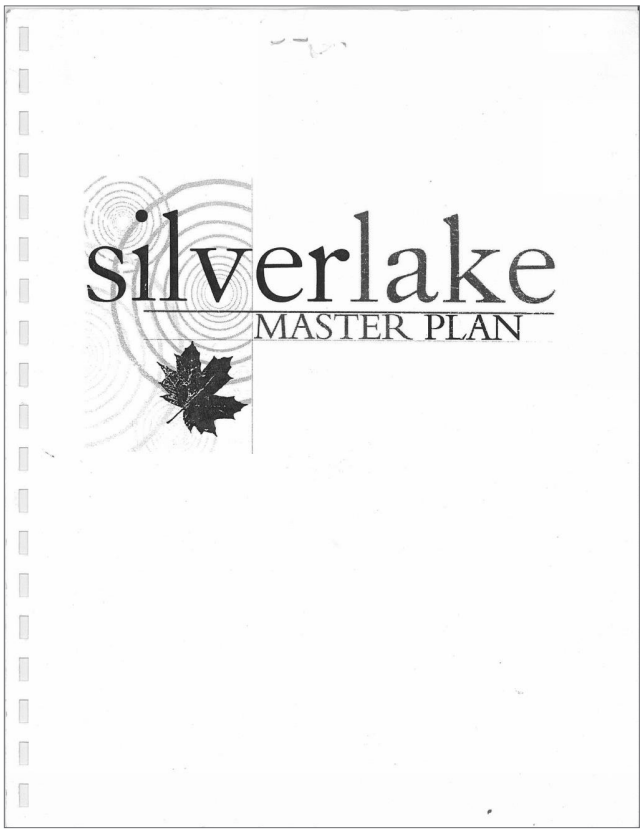
The Headworks Reservoir required the completion of the Silver Lake Reservoir Bypass and Regulator Station Project (Bypass Project). This project involved the installation of a bypass pipeline along the bottom of the Silver Lake Reservoir basin, and a new regulator station to connect the new Headworks Reservoir to the City's water distribution system. The Silver Lake Reservoir was removed from service in 2008, drained in 2015 to construct the Bypass Project, and then refilled in 2017. Ivanhoe Reservoir was removed from the distribution system in 2017 and remains filled with water.

Although Silver Lake and Ivanhoe Reservoirs are no longer a potable water source, LADWP still has active components at SLRC which requires the Master Plan to preserve areas of the site for LADWP system operations, personnel, and future projects.

The Master Plan project originated in March 2018, when the City Council approved a Memorandum of Agreement between the BOE and the LADWP, allowing the BOE to begin the Silver Lake Reservoir Complex Master Plan process. LADWP funded the development of the Master Plan. The agreement included LADWP continuing their operational responsibilities, such as maintaining then integrity of the dams and LADWP onsite facilities.

The Master Plan initiative was seen as a unique opportunity for the Silver Lake community and the City of Los Angeles to consider repurposing a major piece of urban infrastructure while addressing LADWP's on-going operational needs. Goals for the new Master Plan include balancing its historic character; its strategic location within the Silver Lake neighborhood; and its visual impact with its long-term environmental value; its use as a public and community gathering place; and its potential to blend urban wilderness with recreational spaces.

PRIOR INITIATIVES – 2000 MASTER PLAN



A Master Plan was completed on November 1, 2000. It's purpose included defining long-range planning goals for the Silver Lake community and for the LADWP, providing the community with a better understanding of LADWP facilities, operations, and both planned and potential water quality improvement projects, and specifying potential public uses for the SLRC and adjoining property desired by the community including recreational elements and improved pedestrian safety, and serve as a guide to ensure all future improvements identified for public use were compatible with LADWP's operations and mandate to comply with federal and state water quality regulations.

The primary difference between goals of the 2000 Master Plan and those of this 2020 Master Plan is twofold. The 2000 Plan was part of a mitigation document for a proposed Water Quality Treatment Facility at that time. Now, the reservoirs are no longer part of the City's drinking water supply making the vast majority of the SLRC, including both water bodies, available for public use.

Between 2000 and 2018 the following projects identified in the 2000 Master Plan were implemented. These projects involved significant community involvement and many were funded through community efforts:

- **2005** – West Silver Lake Drive Path opens
- **2006** – Armstrong Path opens
- **2008** – Silver Lake Boulevard Path opens
- **2011** – Silver Lake Meadow opens
- **2012** – Tesla Path opens, Pocket Park and Meadow Native Garden are created
- **2015** – Path and Meadow improvements; Armstrong Native Meadow created
- **2018** – South Dam Path opens, inside the fence
- **2019** – Ivanhoe Path opens, inside the fence

Cover of 2000 Silver Lake Reservoir Complex Master Plan Report

2.2 Purpose of a Master Plan

A master plan is a dynamic, long-term planning document that provides a conceptual layout to guide future growth and development. It is based on community goals and aspirations, prior planning initiatives, existing site conditions, physical site characteristics, and social and economic conditions.

Master Plans specify near and long-range strategies for development and provide a framework for post-construction programming, operations, governance, and long-term financial sustainability. A master plan for a park includes neighborhood, site, and systems research and analysis, conceptual design, recommendations for implementation and future studies, and construction and operational budget estimates.

As long-term documents, Master Plans typically guide planning and implementation of community goals for 10 to 20 years. Once adopted by City Council and concurrence of the Mayor, environmental clearance, detailed design, permitting, and project implementation typically occur in phases and in accordance with funding and political will.

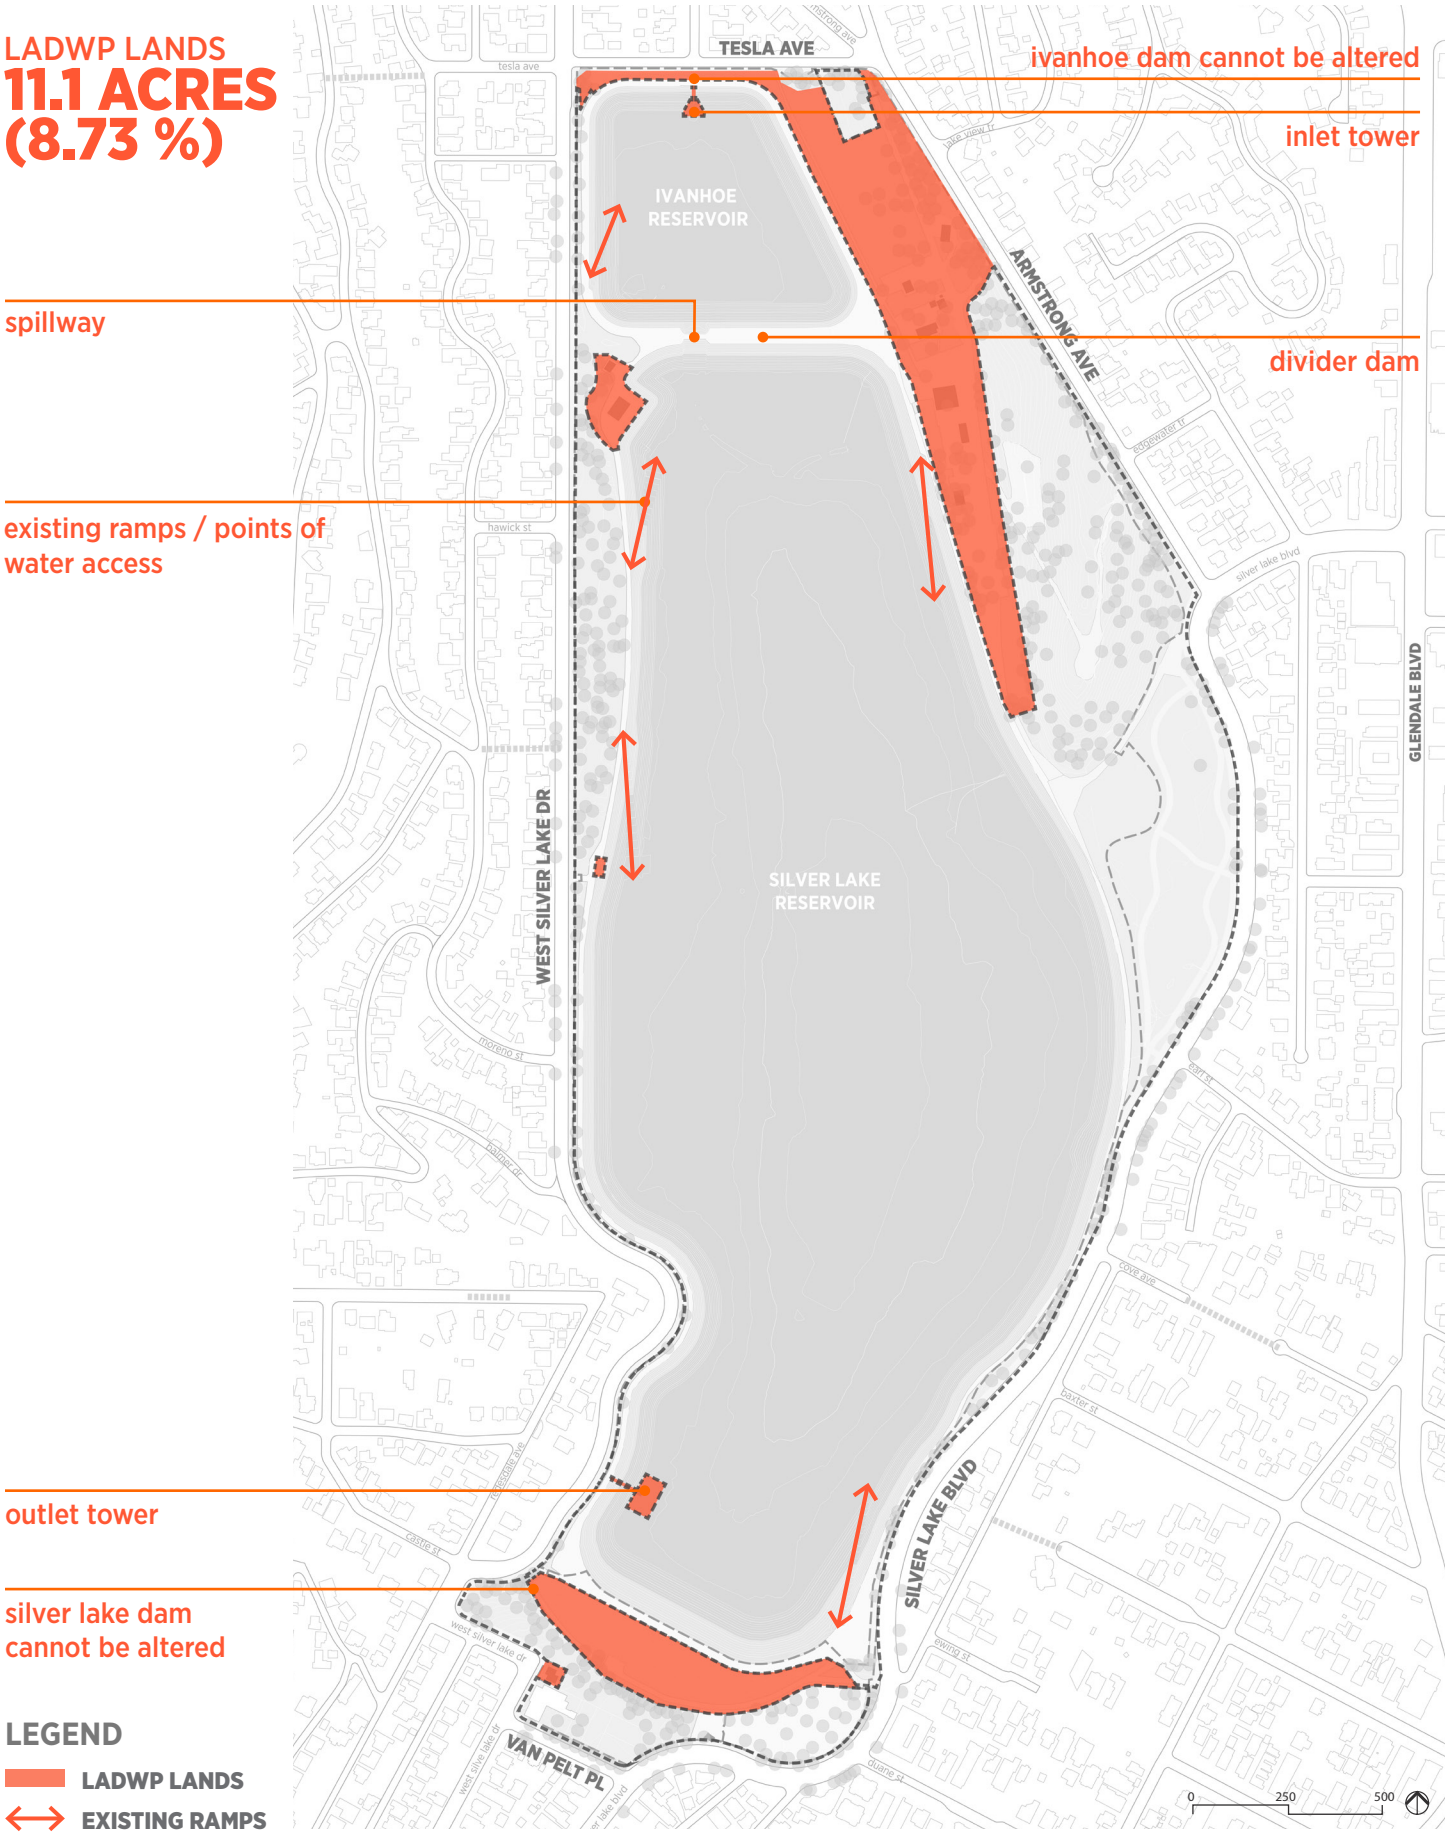
2.3 Master Plan Study Area

The Silver Lake and Ivanhoe Reservoirs, also known as the Silver Lake Reservoir Complex (SLRC), are owned by the LADWP. The SLRC is located on an approximately 127-acre site in the Silver Lake neighborhood of Los Angeles and includes reservoirs, dams, buildings, water and stormwater infrastructure, interior roads, and public recreational facilities.

The SLRC Master Plan Study Area includes approximately 116 acres of land, pathways, and water within the Complex (Figure 2-1). The remaining 11 acres of land at the Complex are restricted for LADWP facilities and infrastructure. LADWP currently leases approximately 3 acres of land to the Los Angeles Recreation and Parks Department (RAP) to operate and maintain the Meadow. Approximately 4 acres of the Complex are owned and operated by RAP for the Silver Lake Recreation Center and a nursery school.

Currently, there are two pathways shared with the public on the west side of Ivanhoe Reservoir and along the top of Silver Lake Dam. Approximately 4 acres of existing paved surfaces around the reservoirs' perimeters and at the base of the Knoll are available for shared public use with LADWP.

Figure 2-1 Master Plan Study Area

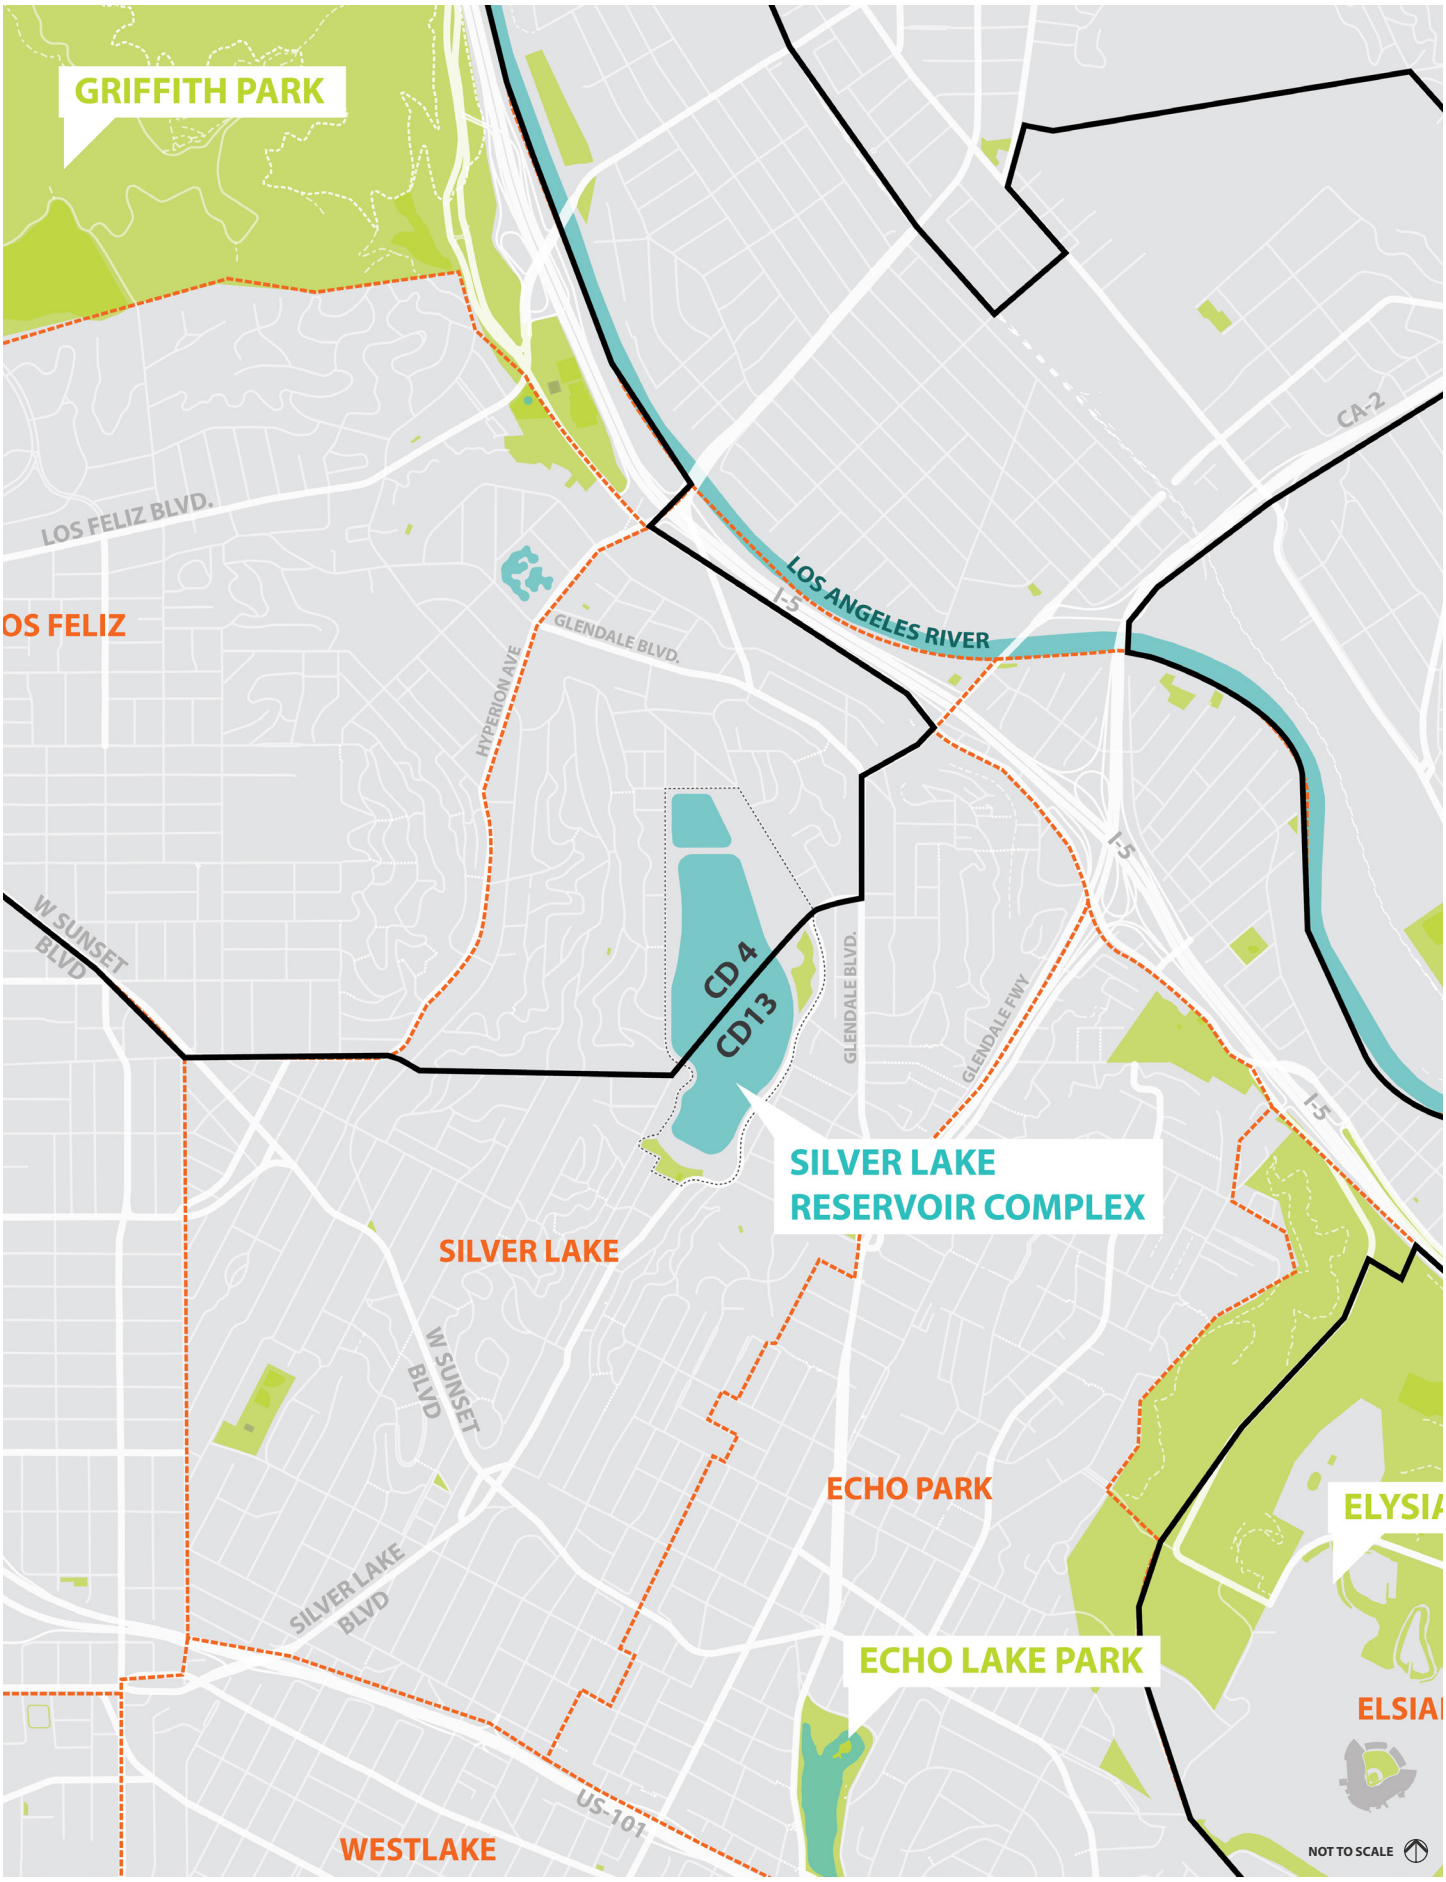


2.4 LADWP Lands & Structures

Within the SLRC, several land areas and structures are excluded from the Master Plan Study Area to enable the LADWP to continue its required operations at the site as shown in Figure 2-2. The largest area outside the Study Area is located on the northeast side of the Complex where LADWP facilities are maintained. The reservoir bodies are bounded by three dams under LADWP responsibility, one on the north side of Ivanhoe Reservoir, one on the south side of Silver Lake Reservoir, and one separating Ivanhoe and Silver Lake Reservoirs which contains a spillway. Additional LADWP structures which must remain in place and operational include pipelines, a regulator station, valves, vaults, equipment, buildings, reservoir structures, power and communication systems, and other supporting infrastructure. These areas will all be fenced.

Future alterations to the SLRC resulting from the Master Plan must also allow access into both reservoirs and provide vehicular access around the reservoirs for LADWP operational use. At a minimum, the Master Plan design must accommodate one ramp into Ivanhoe Reservoir and two ramps into Silver Lake Reservoir. Designated paths for LADWP vehicles must maintain a minimum 15-foot clear width.

Figure 2-2 LADWP Land



2.5 Existing Site Conditions

The Silver Lake Reservoir Complex is located in the Silver Lake neighborhood of the City of Los Angeles (Figure 2-3). Silver Lake is primarily a residential neighborhood with some commercial areas. Under the Los Angeles General Plan, Silver Lake is part of the Silver Lake–Echo Park–Elysian Valley Community Plan Area which establishes policy and land use guidelines. The Complex is zoned as Open Space (OS) for which the Master Plan design is compatible. Additionally, the Complex crosses two Los Angeles political jurisdictions, Council Districts 4 and 13 (CD4 and CD13).

The Silver Lake–Echo Park–Elysian Valley Community Plan identifies several opportunities related to the SLRC Master Plan including the promotion and facilitation of implementing the Master Plan as a valuable community and recreational asset. The Community Plan also supports and encourages creating pedestrian and bike linkages between parks and open spaces with which the SLRC Master Plan proposal is compatible.

Figure 2-3 Silver Lake Reservoir Complex Context

The irregularly shaped site is bounded by Tesla Avenue on the north, Armstrong Avenue and Silver Lake Boulevard on the east, Van Pelt Place, and Silver Lake Boulevard on the south, and West Silver Lake Drive on the west.

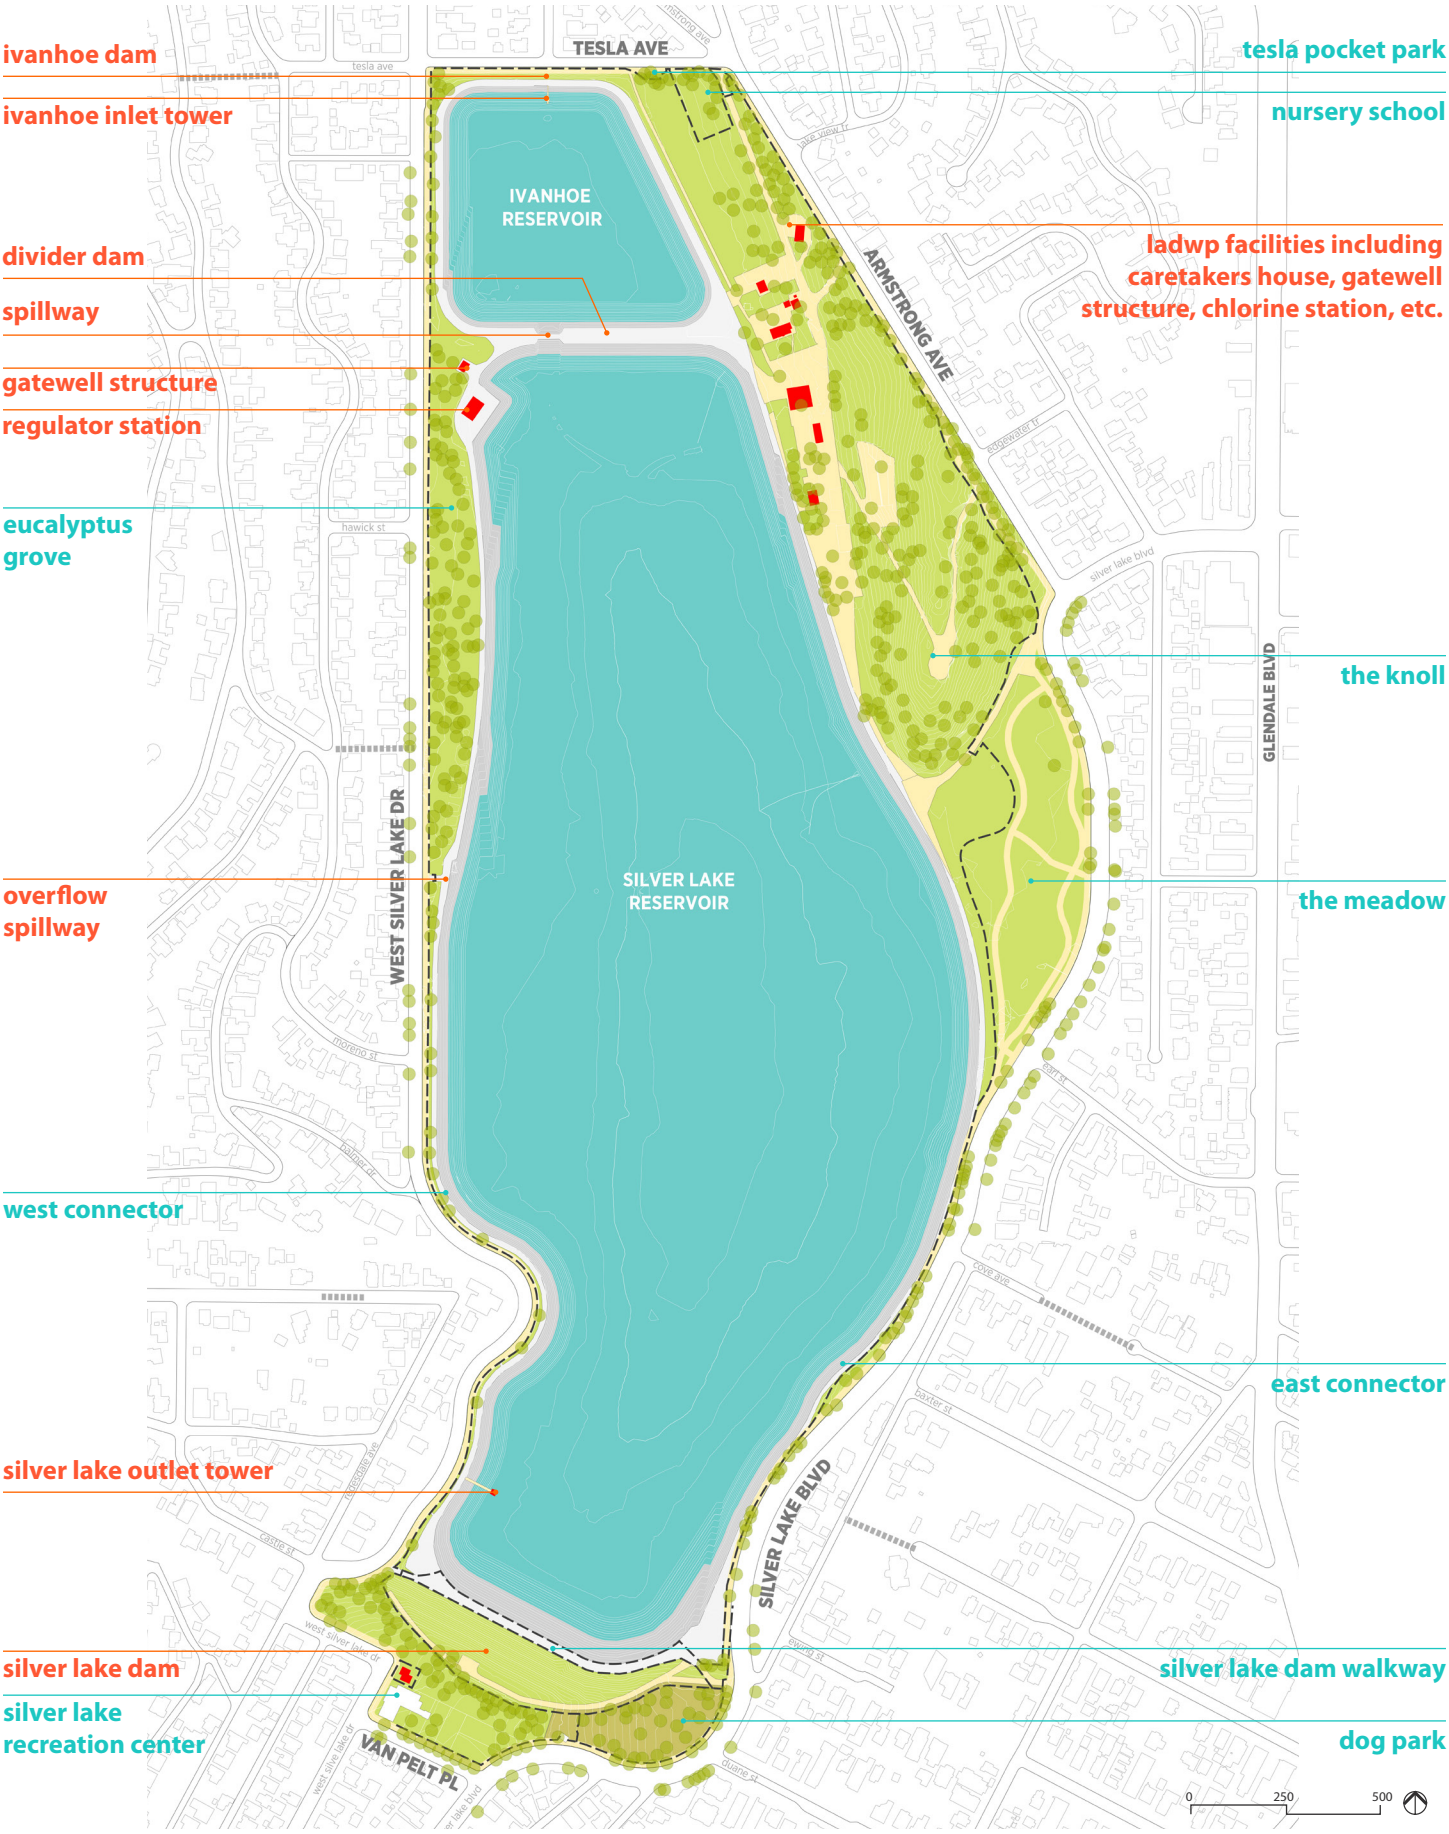
The existing site is organized into a series of spaces surrounding the reservoirs as described below and shown in Figure 2-4.

MEADOW
The Meadow is mostly open lawn with some shade trees and mix of ornamental and native planting with several walking paths. Approximately 3 acres of this space is currently leased by RAP and open to the public during the day and closed at night. This public amenity was identified and implemented as part of the 2000 Master Plan.

KNOLL
The Knoll is a hill approximately 45-feet high north of the Meadow. It's currently restricted to LADWP access only. The Knoll is mostly a woodland mix of Eucalyptus and Pine species with a varied grass and shrub understory. A portion of the Knoll is used by LADWP landscape maintenance for material storage.

SILVER LAKE RECREATION CENTER AND DOG PARK
This Recreation Center is located on the south side of Silver Lake Dam. It includes a Recreation Center building with a small gym and support spaces, tot lot, informal play field, basketball court, fenced dog park, open lawn, and picnic area. The Recreation Center is operated from 9:00 am to 9:00 pm on weekdays, 9:00 am to 5:00 pm on Saturdays, and is closed on Sundays.

EUCALYPTUS GROVE
Along the western side of Silver Lake Reservoir, is a large, wooded space known as the Eucalyptus Grove. It's a mostly flat area dominated by non-native Eucalyptus trees and a monoculture of mostly grasses on the ground plane. Access to the grove is currently restricted to LADWP.



IVANHOE RESERVOIR
Ivanhoe Reservoir is the smaller of the two reservoirs and bounded by a path along the top of its dam. The narrow lands around the water body are currently restricted to LADWP access with the exception of a shared path on the west side that connects to a public sidewalk on West Silver Lake Drive and which allows people to walk along the water's edge before being directed back to West Silver Lake Drive near the Spillway. This shared path is closed to the public at night.

SOUTH SILVER LAKE DAM
At the top of this dam is a shared pathway that connects to sidewalks at West Silver Lake Drive and Silver Lake Boulevard and which allows people to walk along the top of the embankment and take in long views of the water body and San Gabriel Mountains in the distance. This shared path is closed to the public at night.

EAST AND WEST CONNECTORS
The south end of Silver Lake Reservoir is bounded on the east and west sides by narrow areas of land consisting predominantly of a pathway at the embankment edge that connects the Meadow on the east side and Eucalyptus Grove on the west side to the Silver Lake Dam pathway. The width of these spaces vary from roughly 25- to 50-feet and are restricted to LADWP access.

PERIMETER FENCE
The entire reservoir complex is enclosed by a perimeter chain link fence varying in height from 6- to 12-feet. In some areas the fence is topped by three rows of barbed wire. Access gates managed by LADWP are dispersed throughout.

3.1 Analysis Overview

Multiple layers of analyses informed the development of the Silver Lake Reservoir Complex Master Plan. The proposed Master Plan design draws extensively from the site's history, critical cultural and ecological parameters, urban context relationships, recreational needs assessment, and existing site conditions. These analyses were framed as site challenges and opportunities within the community engagement process and used as the basis for developing project goals.

What follows is a summary of key findings of more substantial reports which can be reviewed in the Master Plan Report Appendix.

3.2 Silver Lake History & Cultural Context

Throughout its recorded history, the Silver Lake Reservoir Complex has been integrated into a larger, ever evolving water system – initially it was part of an ecological network of streams and wetlands, and most recently, a significant, man-made component of the City's potable water infrastructure.

A natural depression within the Ivanhoe Canyon of the Santa Monica Mountain Range, the Complex was once a marshy pond historically referred to as a "meadowland" which was plentiful with wildlife. In fact, this abundant wildlife enticed hunters to this area for game. Historic wetlands mapped prior to 1890, for the Historical Ecology of the Ballona Creek Watershed project indicates an intermittently flowing stream from the south end of what is now Silver Lake Reservoir draining into a small wet meadow complex to the south as shown in Figure 3-1. This historic understanding of the site is reinforced by an early United States Geologic Survey map from 1894 as shown in Figure 3-13 at the end of this section. Water continued to flow south to a vast wetland complex called La Cienega, located just north of Baldwin Hills, and eventually drained into Ballona Lagoon. Together, the La Cienega and Ballona Lagoon complexes supported the largest wetland habitat in the watershed.

The SLRC site was selected by the City for its adventitious location in the watershed and ability to be connected to an evolving Los Angeles water system in order to contribute to the storage capacity and stable water supply needed for the growing population of Los Angeles. The site was anticipated to have a flow line at 445 feet above sea level and once constructed, would have a surface area of approximately 129 acres. The land that comprises the Complex was acquired in two transactions. The northern portion of the site, comprising approximately 110 acres, was purchased in 1886. The remaining acreage was purchased in 1903. The Complex was designed and engineered by Los Angeles Water Department Superintendent,

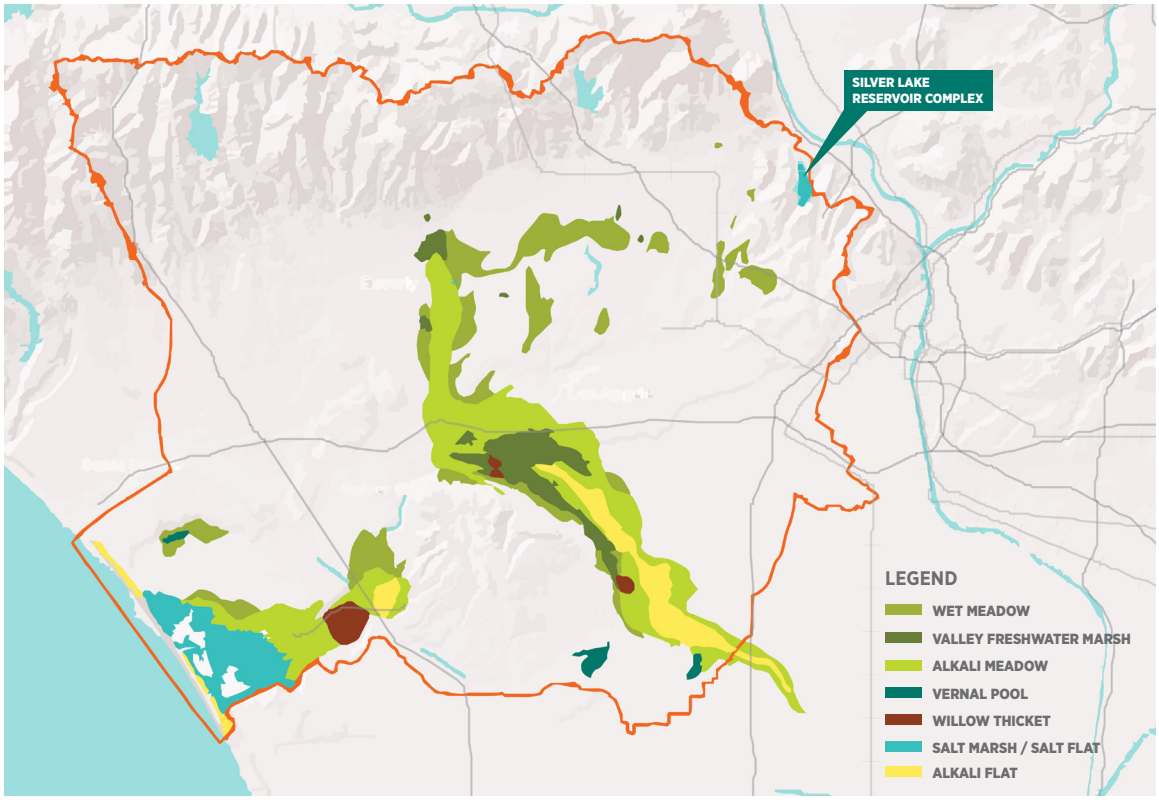

Figure 3-1 Mapping of historic Balona Creek Watershed

Figure 3-2 Historic Photo of Silver Lake Reservoir 1907

Construction of Silver Lake Reservoir in 1907 showing its regional and geomorphological context Source: WRCA LIPP Box 78, Item 141, #115. From the holdings of the Special Collections & Archives, Water Resources Collections, UCR Libraries, University of California, Riverside

William Mulholland. Of historic significance, Mulholland was the first engineer in America to use a method of construction called hydraulic sluicing to build a dam. The Silver Lake and Ivanhoe reservoirs were formed by wagon rolled earthen dams and embankments depicted in Figure 3-2.

Named after the Ivanhoe Canyon, Ivanhoe Reservoir was completed first in 1906, followed by Silver Lake in 1907 which was named after Herman Silver, a member of Los Angeles' first Board of Water Commissioners. According to an article in the LA Times November 25, 1907, Silver Lake would be the largest freshwater lake in the vicinity and destined to become a great City park. Figure 3-3 from this approximate time shows Silver Lake Reservoir with a planted embankment edge.

> *"...it promises also to become a favorite resort for pleasure seekers, because of its delightful surroundings. Its gently sloping banks will be a park of themselves...with the planting of trees and flowers, however, it will be a beauty spot that may dim the glories of Westlake, Eastlake and some of the other parks. One of the means of keeping the water pure will be through the stocking of the lake with black bass."*

Since their completion, Ivanhoe and Silver Lake Reservoirs have been altered to meet the changing needs of the City. Notable alterations include those undertaken in 1920, 1944, 1951–1953, 1975–1976, and 2011–2017. Initially, The Silver Lake Reservoir was used as a source of water for irrigation, while the Ivanhoe Reservoir provided domestic drinking water. However, as a result of rapid population growth and development in the Los Angeles area in the 1910s, the Silver Lake and Ivanhoe Reservoir Complex was modified in 1920 to both supply domestic water to the City's drinking water system. At this time, the embankments of the Silver Lake Reservoir were altered with a steeper slope, increasing the capacity of the reservoir. When they were first completed there was no spillway between the two water bodies as shown in Figure 3-4. They were connected via a gate-controlled 36-inch pipeline. It wasn't until 1944 that the reinforced concrete spillway was constructed.

Figure 3-5 Historic photo of the Ivanhoe Reservoir 1935

In 1907 Ivanhoe Reservoir was covered to protect this domestic water supply. Source: Los Angeles Public Library Photo Collection

During 1951–1953, both reservoirs underwent extensive improvements to meet City water demands as well as government water quality regulations. Silver Lake Reservoir was reshaped, deepened, and its embankments were paved in asphalt. Additionally, a 60-inch bypass line was installed underneath the reservoir. Much of the excess excavated soil from this work was used to fill in the east shore and a lagoon known as the East Cove. East Cove was an area prone to stagnation and algae growth which negatively impacted water quality. Ivanhoe Reservoir was also deepened during this time and its basin and embankments were paved with asphalt. Many of these alternations are visible when comparing aerial photography from 1944 and 1956 as shown in Figures 3-6 and 3-7.

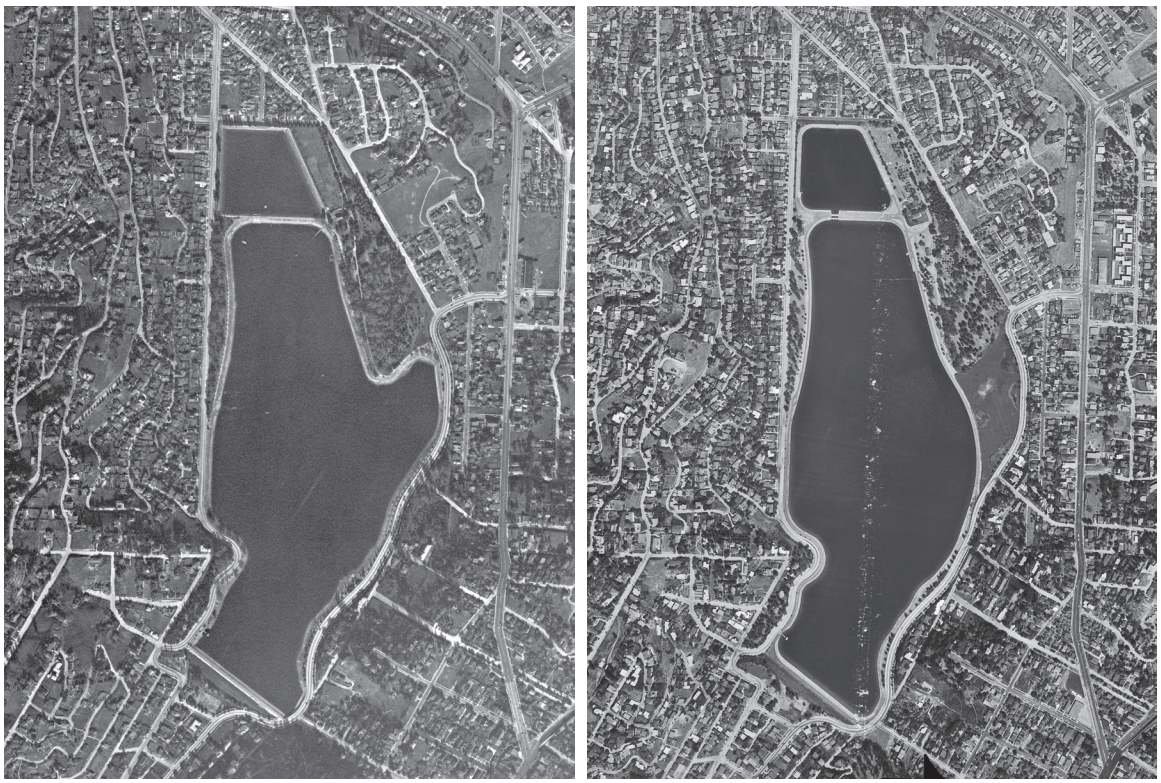

Figure 3-6 (left) Historic aerial photo of the Silver Lake Reservoir Complex from 1944

Figure 3-7 (right) Historic aerial photo of the Silver Lake Reservoir Complex from 1956

Modifications made the reservoirs during the early 1950's can be seen in side-by-side comparisons of aerial photography from 1944 and 1956, including filling in East Cove which is now the Meadow and altering the embankment edges.
Source: UCSB Library, Special Research Collections, University of California Santa Barbara. "FrameFinder Air Photos"

Due to seismic concerns, Silver Lake Dam was completely reconstructed in 1975-1976. The outlet tower was rebuilt, and a new 72-inch pipe was installed. As a result, the southern end of the Silver Lake Reservoir was reshaped to its current configuration.

Since they were completed in 1907, Silver Lake and Ivanhoe Reservoirs have become beloved urban water bodies synonymous with the Silver Lake neighborhood. In the 1920s and 1930s developers, who were encouraged to build in Los Angeles by the City, were attracted To Silver Lake by the hills and the blue jewel focal point that are the Silver Lake and Ivanhoe Reservoirs. The neighborhood attracted an eclectic mix of artists, filmmakers, actors and directors whose homes were designed by great names in architecture, such as Richard Neutra, Harwell Harris, David Hyun, Eric Lloyd Wright, Gregory Ain, John Lautner, Raphael Soriano, Rudolph Schindler, and Rodney Walker.

In 2008 the SLRC was decommissioned and removed from the City's drinking water supply system due to a change in United States federal regulations. Silver Lake Reservoir was taken out of service in 2008, drained in November 2015 to construct a Bypass Project, and refilled in April 2017. Ivanhoe Reservoir was removed from the distribution system in December 2017 and remains filled with water.

Today, the reservoirs remain a locus of the Silver Lake neighborhood and a beloved resource of the community.

Figure 3-8 Historic bird's eye photo of the Silver Lake Reservoir Complex 1924

Early photography from 1924 indicates how the Silver Lake neighborhood grew up around the reservoirs. At this time, East Cove was a prominent feature of the complex and Ivanhoe was covered with a wooden roof. Source: LA Public Library

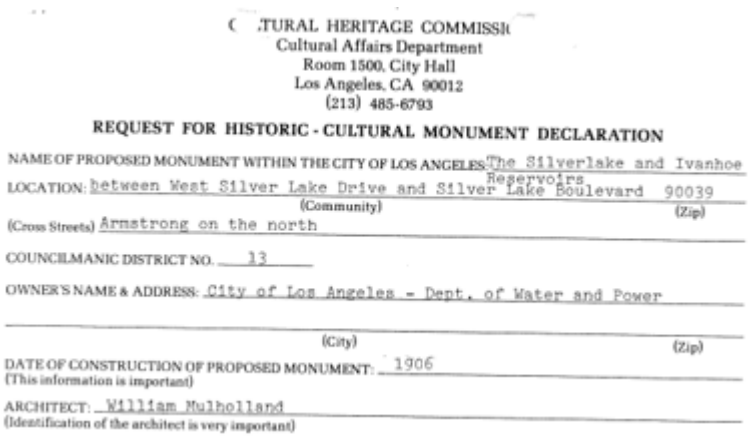
3.3 Historic-Cultural Monument Designation

As designated Los Angeles Historic-Cultural Monument (HCM No. 422), the Silver Lake and Ivanhoe Reservoir Complex is subject to the Los Angeles Cultural Heritage Ordinance. The Ordinance stipulates that the Cultural Heritage Commission (CHC) and Office of Historic Resources (OHR) are responsible for reviewing alterations to historical resources listed under national, state, and local landmark programs. Alterations are reviewed by the CHC and OHR for compliance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards).



The SLRC was designated as a Historic-Cultural Monument primarily for the following:

- Its significant association with the development of the Silver Lake neighborhood
- Its significant association with William Mulholland
- As an early and important example of a hydraulically sluiced reservoir

According to the OHR, the HCM No. 422 boundaries encompass the property owned by the LADWP. The period of significance under this designation has been identified as 1906 to 1953, representing the date of the original construction through the improvement program of the early 1950s.

As a historic cultural landscape, consideration must be given in proposing alterations to its character-defining features. The Standards under which alternations are evaluated are not intended to be prescriptive, but instead provide general guidance. They are intended to be flexible and adaptable to specific project conditions to balance continuity and change, while retaining materials and features to the maximum extent feasible. Not every Standard necessarily applies to every aspect of a project, nor is it necessary to comply with every Standard to achieve compliance.

The Standards are issued by the National Park Service (NPS) and are accompanied by Guidelines for four types of treatments: Preservation, Rehabilitation, Restoration, and Reconstruction. The most common treatment and the one that applies to the proposed Master Plan design is rehabilitation, which is defined by NPS as "the process of returning a property to a state of utility, through repair or alteration, which makes possible an efficient contemporary use while preserving those portions and features of the property which are significant to its historic, architectural, and cultural values."

REQUEST FOR HISTORIC - CULTURAL MONUMENT DECLARATION

NAME OF PROPOSED MONUMENT WITHIN THE CITY OF LOS ANGELES: The Silverlake and Ivanhoe Reservoirs

LOCATION: between West Silver Lake Drive and Silver Lake Boulevard 90039
(Community) (Zip)

(Cross Streets) Armstrong on the north

COUNCILMANIC DISTRICT NO. 13

OWNER'S NAME & ADDRESS: City of Los Angeles - Dept. of Water and Power

(City) (Zip)

DATE OF CONSTRUCTION OF PROPOSED MONUMENT: 1906
(This information is important)

ARCHITECT: William Mulholland
(Identification of the architect is very important)

Figure 3-10 Historic Cultural Monument declaration form from 1989

3.3.1 SLRC Character-Defining Features

The first step in applying the Standards to a historic property is the identification of character-defining features. Character-defining features are the components that contribute to a historic property's sense of time and place. Using the NPS Guidelines for the Treatment of Cultural Landscapes, the design team identified character-defining features of the SLRC.

The primary character-defining features of the SLRC range from natural systems and features and topography to circulation patterns and constructed features. Some of these elements at the complex have been constants since the reservoirs opened, while other more recent ones erased early features. For instance, while the reservoirs were always bounded by embankments since their construction, gentle and planted slopes have given way to steep, paved slopes.

NATURAL SYSTEMS & FEATURES

The primary natural feature of the complex is the Knoll, a 9-acre wooded hill approximately 45-feet in height. Its ridgeline has been altered overtime by Department of Water & Power operations.

Figure 3-11 Historic Photo of the Silver Lake Reservoir Complex 1927

The public perimeter walkway and road in 1927 was at the water's edge. The embankment was still planted. Source: Water and Power Associates

CIRCULATION

Since their construction, the reservoirs have had some form of a perimeter path and road. Early on, there was a single, wide path used by pedestrians and vehicles along the water's edge as shown in Figure 3-11. Over time the public path moved from the water's edge to exterior roads. A perimeter path still exists around the reservoirs which is currently maintained for LADWP operations and not publicly accessible. Additionally, smaller pathways have been removed or erased, such as a historic footpath from what is now the Meadow to the top of the Knoll.

LAND USES

Uses of the SLRC have evolved over time as a result of changing City uses and needs. The largest land use at the Complex is the reservoirs. Additional land use areas dating from the period of significance, are the Knoll and Eucalyptus Grove which are designated as open space, and the Grassy Patch adjacent to the Recreation Center is designated as park land. Approximately 11 acres of land are used for LADWP Maintenance & Operations.

TOPOGRAPHY

Most of the site is flat but there are several areas with significant changes in elevation dating from the period of significance. The reservoirs are deep basins with steep slopes. The Knoll is an approximately 45-foot high hill with varied slopes. The south Silver Lake Dam and the Ivanhoe Dam have steep slopes 40-feet and 10-feet respectively. Lastly, the Grassy Patch adjacent to the Recreation Center consists of a gentle sloped condition.

BUILDINGS AND STRUCTURES

While there are many buildings within the Complex dating from the period of significance, such as the Sunshine House, these are outside the Master Plan Study Area. Within or directly impacting the Master Plan study area are the North and South Ivanhoe Dams.

VEGETATION

There are three areas dating from the period of significance that are considered character-defining features: The Knoll, Eucalyptus Grove, and Grassy Patch. Within these are mature trees such Eucalyptus, Pines, and Sycamores. Large, mature trees within the Complex are considered character defining. Early photography indicates that trees were planted in loose groupings as well as more defined, linear geometries such as the allée shown in Figure 3-12.

CONSTRUCTED WATER FEATURES

The large, open water bodies of Ivanhoe and Silver Lake Reservoirs have been a primary character-defining feature since they were built.

SMALL-SCALE FEATURES

Overtime, several smaller features have been added to the Complex including the low concrete perimeter walls on the east and west edges of the Complex which were constructed to prevent stormwater runoff to flow into the reservoirs and contaminate the water. Additionally, the Ivanhoe Inlet Tower was constructed during the period of significance.

Figure 3-12 Historic Photo of Silver Lake Reservoir 1936

This photo from 1936 shows an allée of trees along the perimeter path on the east side of Silver Lake Reservoir. Source: LADWP

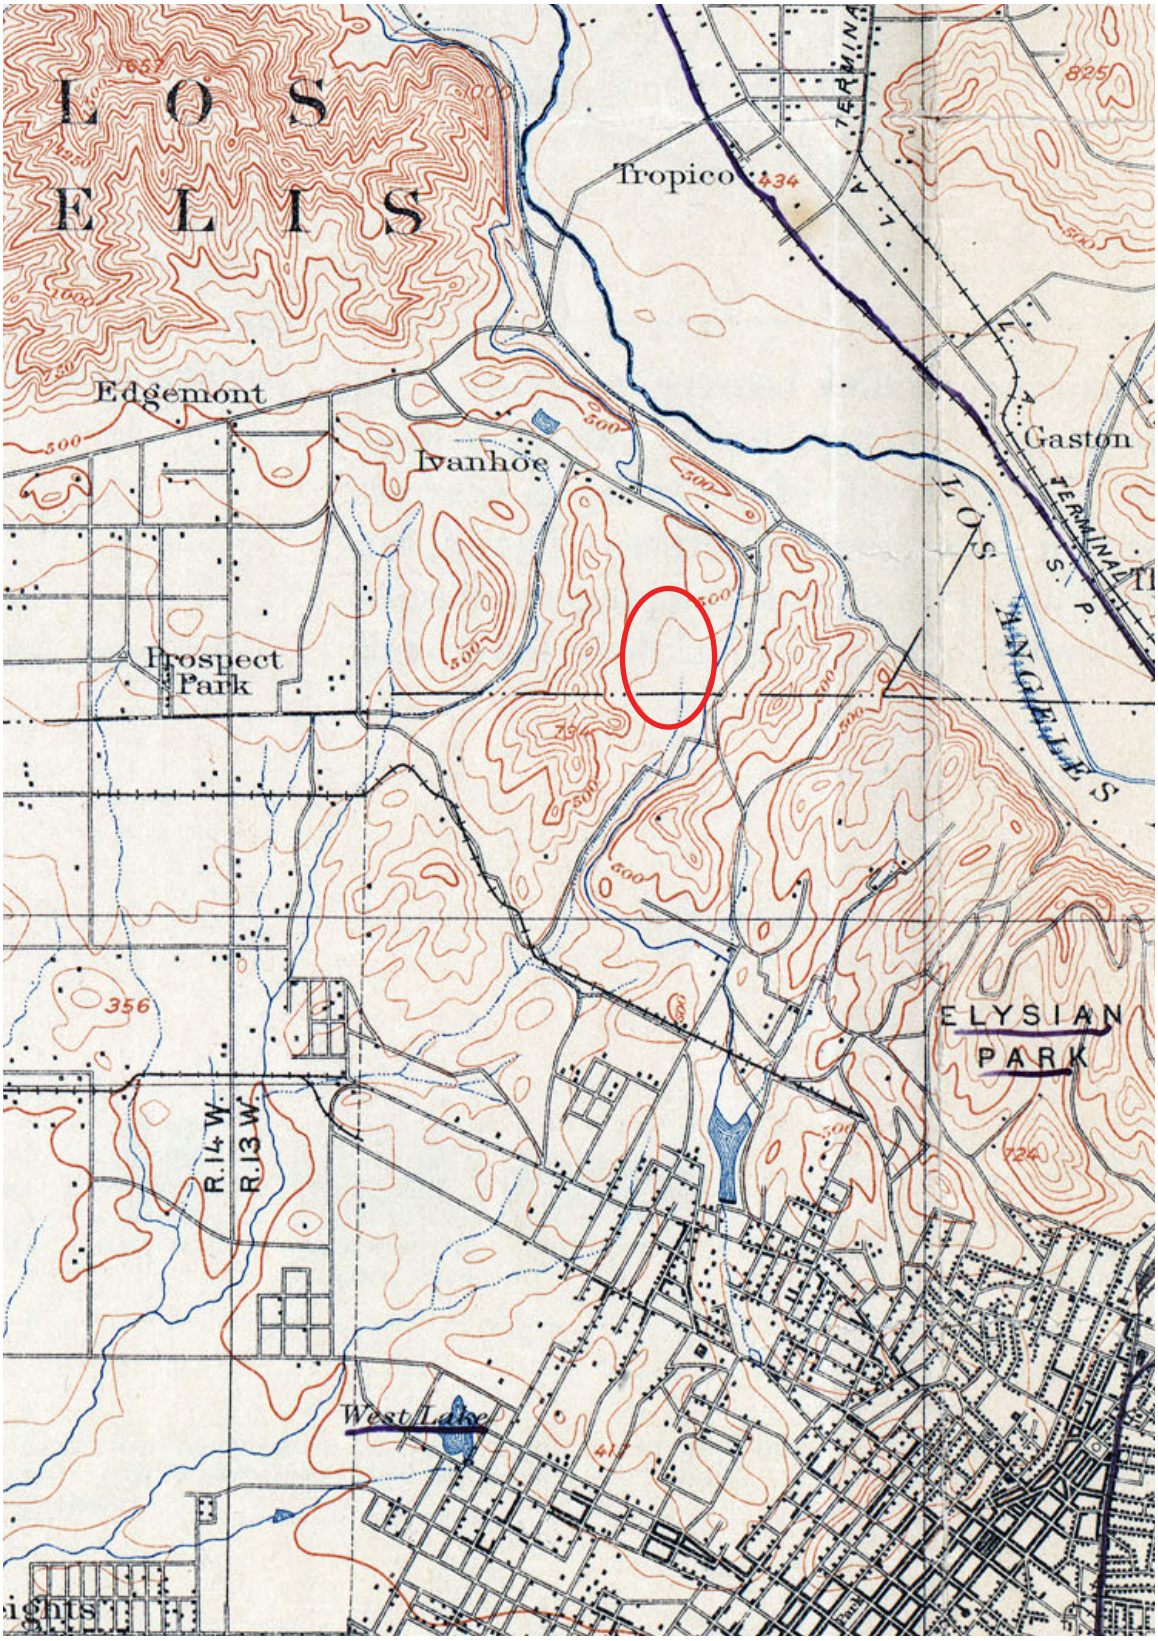

Figure 3-13 Silver Lake and surrounding communities Topographic Map 1894

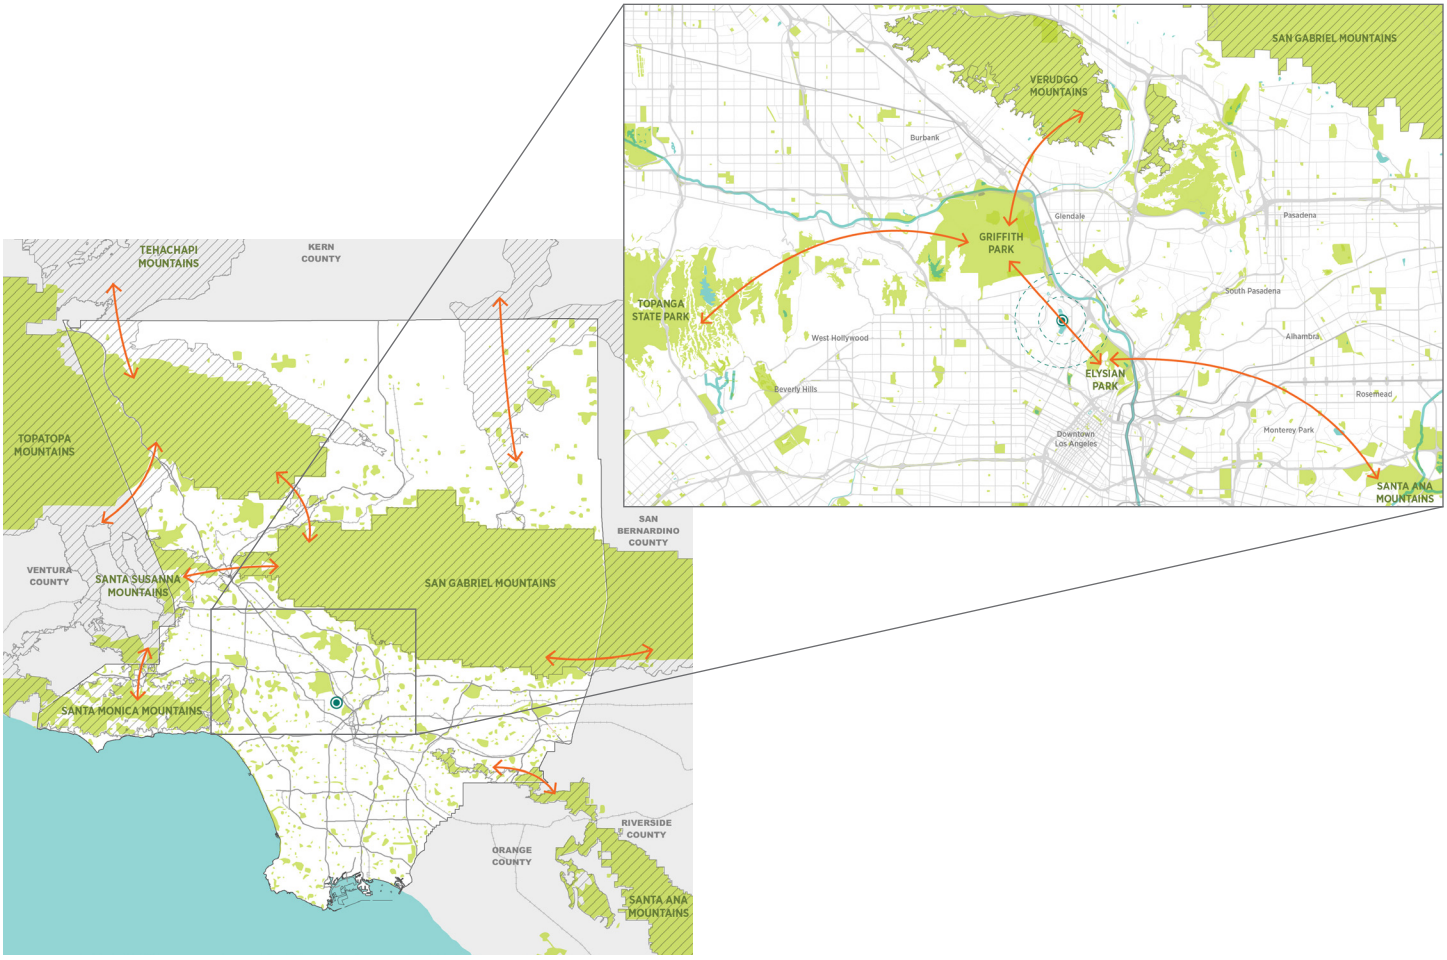
A topographic map by the United States Geologic Survey from 1894 depicts a network of streams in what is now Silver Lake. The approximate location of the SLRC is shown as a red oval. Source: University of Texas Library

3.4 Site Ecology

The SLRC is situated in an urbanized valley within the eastern foothills of the Santa Monica Mountain Range. The site is no longer physically connected to this mountain range. The closest significant ecology to the SLRC is 4,000-acre Griffith Park, with habitat areas characterized by mixed chaparral, mixed scrub, oak-sycamore riparian, oak woodland, and walnut woodland native vegetation types. The Complex's proximity to the Los Angeles River corridor as well as Griffith and Elysian Parks helps make the site a potential habitat link as shown in Figure 3-14.

In urban environments, links to habitat areas are critical to species with wide ranges of movement. These linkages facilitate the movement of organisms and ecological processes, such as native plant pollination, between larger areas of intact habitat. In the Silver Lake vicinity, small to medium sized mammals such as raccoons, fox, and coyote can migrate between Griffith Park and the Los Angeles River. Typically, invertebrates such as native butterflies, bees, and ants, as well as lizards, snakes, frogs, and salamanders have limited migration ability and offspring do not typically disperse far from where they are born. To be considered viable, a habitat linkage must provide adequate vegetative cover, food, and water for a given species. While the SLRC offers fresh water, as a habitat linkage its embankment slopes are steep and potentially difficult navigate. Additionally, vegetation and food resources for terrestrial mammals at the Complex are minimal.



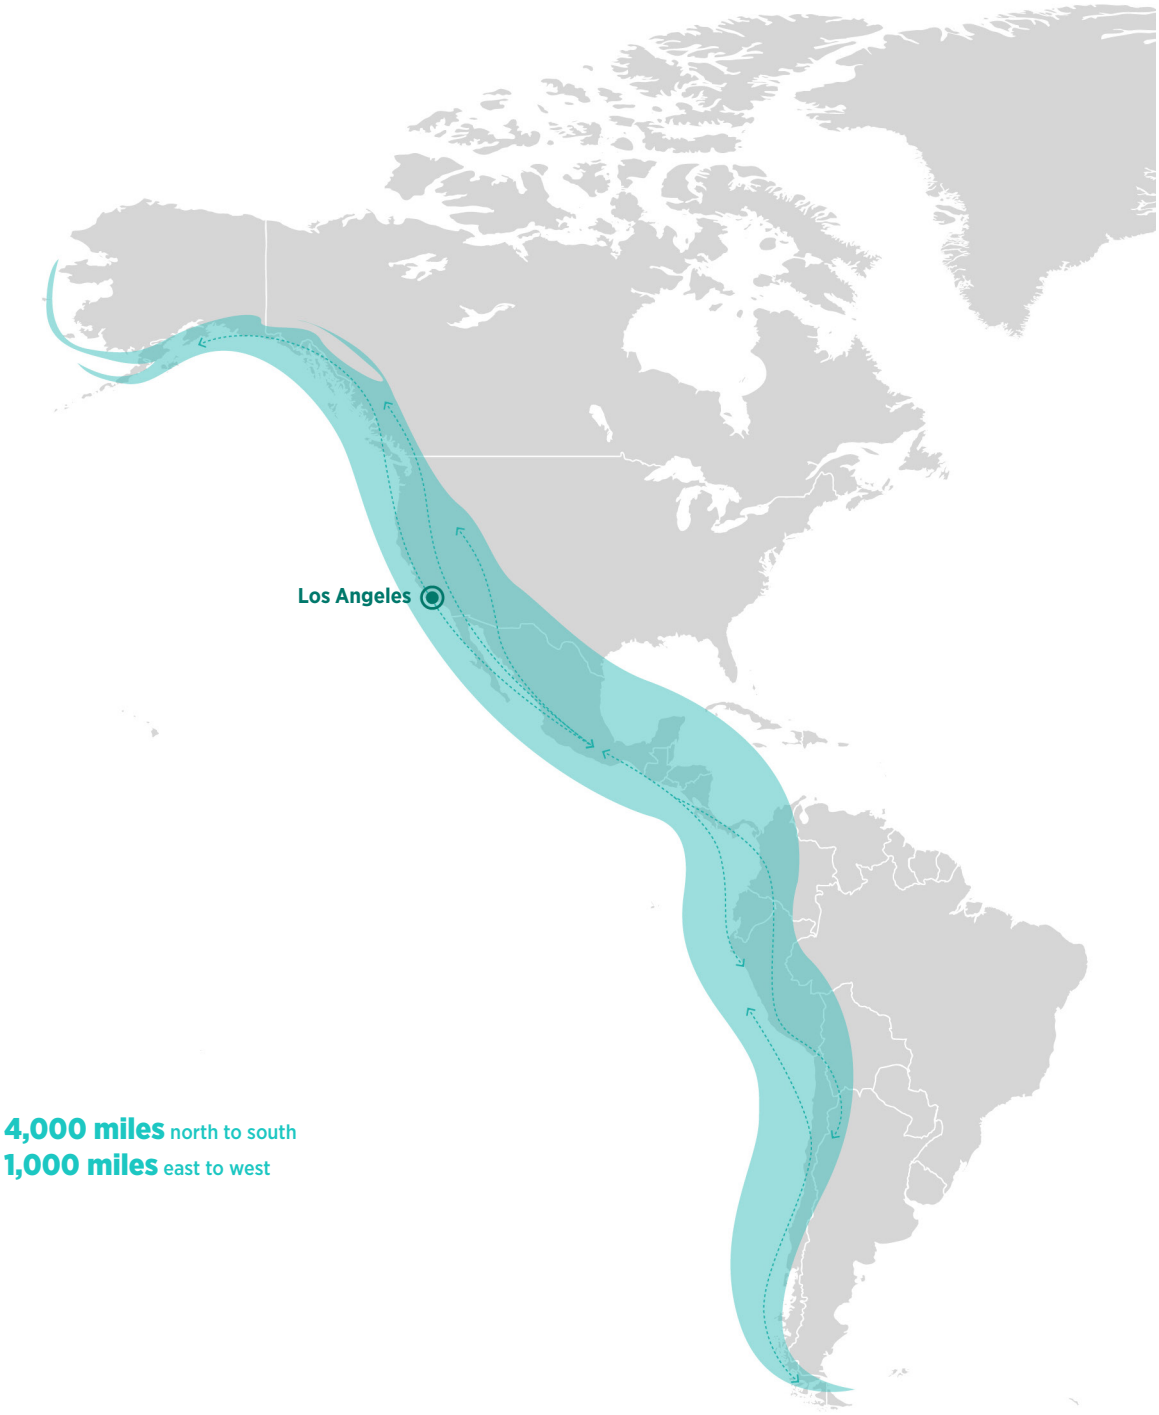


Figure 3-14 Regional habitat linkages and wildlife corridors map
adapted from Los Angeles Department of Regional Planning

Figure 3-15 The Pacific Flyway

Pacific Flyway: The SLRC is also located along one of four major North American migration routes for birds, predominantly waterfowl, known as the Pacific Flyway which extends from Alaska to South America. In California, wetlands provide critical habitat for millions of migratory birds each year, offering a combination of vegetation and open water that provide both cover and food resources. These food resources include fruit bearing trees and shrubs as well as fish and other aquatic species.

While the large water bodies of the SLRC are currently a stopover for migratory birds, the habitat value of the SLRC is limited by its lack of food resources. Since wetland vegetation and aquatic species, such as fish, are absent within the Complex, the site does not provide adequate resources essential for many migratory birds' survival.

3.4.1 Existing Vegetation

Most of the vegetation within the SLRC is comprised of ornamental, non-native vegetation and lawn. However, there are some native species on the border of Silver Lake Meadow and the Knoll, including Coast Live Oak (*Quercus agrifolia*), California Sycamore (*Platanus racemosa*), California Black Walnut (*Juglans californica*), and Blue Elderberry (*Sambucus nigra ssp. caerulea*). The largest existing planted areas within the Complex are the Eucalyptus Grove and the Knoll. Both of these areas are dominated by mature stands of non-native Eucalyptus trees and a mostly non-native understory plant community.

Distrubed / Reuderal
Vegetation community dominated by annual and perennial introduced/non-native, pioneering, herbaceous plants that readily colonize disturbed ground. This plant community is found beneath the Eucalyptus trees in the Eucalyptus Grove and at the south end of the Silver Lake Recreation Center.

Eucalyptus Globus Semi-Natural Woodland
Vegetation community dominated by *Eucalyptus globulus* with a sparse and intermittent understory. Other species associated with this community include pines (*Pinus spp.*) and non-native annual grasses. This plant community is located within the Eucalyptus Grove and at the bottom of the Knoll.

Eucalyptus Sp. Mixed Semi-Natural Woodland
Vegetation community dominated by several different Eucalyptus species. Species may include Red Gum (*Eucalyptus camaldulensis*), Lemon Scented Gum (*Eucalyptus citriodora*), Sugar Gum (*Eucalyptus cladocalyx*), Blue Gum (*Eucalyptus globulus*), Silver Dollar Gum (*Eucalyptus polyanthemos*), Money Tree (*Eucalyptus pulverulenta*), Red Iron Bark (*Eucalyptus sideroxylon*), Forest Red Gum (*Eucalyptus tereticornis*), and Manna Gum (*Eucalyptus viminalis*). Other species associated with this community include pines (*Pinus spp.*), California Black Walnut (*Juglans californica*), Bottlebrush (*Callistemon spp.*), Pepper Tree (*Schinus mole*), Hemlock (*Tsuga spp.*), Deodar Cedar (*Cedrus deodar*), and non-native annual grasses, palm trees. This plant community is located on the Knoll.

Lawn
Lawn is an area of soil-covered land planted with grass and use for aesthetic and recreational purposes which is regularly mown and irrigated. This plant community is found in the Meadow and at the Silver Lake Recreation Center.

Ornamental
Vegetation community dominated by non-native horticultural plants with some native species . This area includes a mix of trees, shrubs, and flowers. Native species in this area include Deergrass (*Muhlenbergia rigens*), California Buckwheat (*Eriogonum fasciculatum*), Grey Rush (*Juncus patens*), Purple Sage (*Salvia leucophylla*), Matilija Poppy (*Romneya coulteri*), Sugar Bush (*Rhus ovata*), Catalina Ironwood (*Lyonothamnus floribundus*), Salt Bush (*Atriplex lentiformis*) and California Poppy (*Eschscholzia californica*). This plant community is located at the Meadow, along the perimeter of the walking path to the south, around the LADWP lands and surrounding the Silver Lake Recreation Center.

Figure 3-16 Existing Vegetative Communities of the Silver Lake Reservoir Complex

3.4.2 Wildlife

Although the SLRC is dominated by ornamental, non-native vegetation, the large reservoir water bodies still provide an important year-round resource of fresh water for wildlife, particularly for local and migratory waterfowl. Based on field observations, most of the wildlife observed within the SLRC are bird species including hummingbirds, crows, blackbirds, gulls, herons, egrets, and ducks. Nesting pairs recently observed at or in close proximity to the Complex include Great Blue Herons, Great-Horned Owls, Northern Mockingbirds, and Red-Tailed Hawks. These observations are consistent with community sightings reported on a citizen science website, https://ebird.org (eBird), as well as multiple, focused surveys conducted at the SLRC between 2004 and 2018. Additionally, California Ground Squirrels, Cottontail Rabbits, and Western Fence Lizards were observed during field visits. The community also reports sightings of bobcats, coyotes, possums, and skunks in the neighborhood.

Bird species observed and/or heard during a field survey by the design team in May 2018 include Allen's Hummingbird (*Selasphorus sasin)*, American Crow (*Corvus brachyrhynchos)*, Anna's Hummingbird (*Calypte anna)*, Black Phoebe (*Sayornis nigricans)*, Brewer's Blackbird (*Euphagus cyanocephalus)*, California Gull (*Larus californicus)*, California Scrub-Jay (*Aphelocoma californica*), California towhee (*Melozone crissalis*), Canada Goose (*Branta canadensis)*, Cliff Swallow (*Petrochelidon pyrrhonota*), Common Raven (*Corvus corax*), Great Blue Heron (*Ardea herodias)*, Great Egret (*Ardea alba)*, Great-Horned Owl (*Bubo virginianus),* House Finch (*Haemorhous mexicanus)*, House Sparrow (*Passer domesticus)*, Killdeer (*Charadrius vociferus)*, Lesser Goldfinch (*Spinus psaltria)*, Mallard (*Anas platyrhynchos)*, Mourning Dove (*Zenaida macroura*), Northern Mockingbird (*Mimus polyglottos)*, Northern Rough-Winged Swallow (*Stelgidopteryx serripennis*), Nuttall's Woodpecker (*Picoides nuttallii*), Phainopepla (*Phainopepla nitens*), Red-Tailed Hawk (*Buteo jamaicensis)*, Ruddy Duck (*Oxyura jamaicensis)*, Scaly-Breasted Munia (*Lonchura punctulata*), Tree Swallow (*Tachycineta bicolor*), Western Bluebird (*Sialia mexicana)*, Western Kingbird (*Tyrannus verticalis*), and Wrentit (*Chamaea fasciata*).

3.4.3 Special Status Species

The US Migratory Bird Treaty Act (MBTA) protects migratory birds, their occupied nests, and their eggs from disturbance and/or destruction. "Migratory birds" include all non-game, wild birds found in the U.S. except for the House Sparrow, European Starling, and Rock Pigeon.

Within the MBTA, is a sub-set of protected species that pose special management challenges for a variety of factors titled Birds of Management Concern (BMC). These species are of concern because of population declines, small or restricted populations, dependence on restricted or vulnerable habitats, or are overabundant to the point of causing ecological and economic damage. The BMC list was cross-referenced with the last 10 years of eBird data to determine which BMC species have been observed at the SLRC (see Figure 3-17). These species should be considered when undertaking improvements at the site.

Several BMC species were observed during the Master Plan field observations including Great Blue Heron, Canada Goose, Great Egret, Ruddy Duck, Nuttall's Woodpecker, and Allen's Hummingbird.

3.4.4 Significant Ecological Area

Significant Ecological Areas (SEA) are officially designated areas with irreplaceable biological resources within Los Angeles County. These areas represent the wide-ranging biodiversity of Los Angeles County and contain some of the county's most important biological resources.

Typically, habitat in SEAs consist of large continuous acreage with few roads and residential development. *No sensitive habitat or SEA's were found within the SLRC.* The nearest SEA area to the Complex is Griffith Park.

Figure 3-17 Silver Lake Reservoir Complex Bird Sightings

Bird species sighted at the SLRC during field observations and/or documented over the last 10 years on eBird, cross referenced with the U.S. Migratory Bird Treaty Act Birds of Management Concern list and U.S. Fish & Wildlife Service Focal Species list.

SILVER LAKE RESERVOIR COMPLEX BIRD SIGHTINGS

BIRDS OF MANAGEMENT CONCERN (BMC)

The BMC list was cross-referenced with the last 10 years of eBird data to determine which BMC species have been observed at the SLRC.

focal species

The U.S. Fish & Wildlife Service maintains a Focal Species list of birds from the larger BMC list. These species are identified as needing investment and attention because they: (1) have high conservation needs, (2) are representative of a broader group of species sharing the same or similar conservation needs, (3) act as a potential unifier for partnerships, and/or (4) have a high likelihood that factors affecting status can be realistically addressed. The following three species have been sighed at the SLRC.

Northern Pintail
Anas acuta

Greater/Lesser Scaup
Aythya marila/affinis

Bald Eagle
Haliaeetus leucocephalus

- **Allen's Hummingbird** *Selasphorus sasin*
- **Blue-Winged Teal** *Anas discors*
- **Band-Tailed Pigeon** *Patagioenas fasciata*
- **Canada Goose** *Branta canadensis*
- **Canvasback** *Aythya valisineria*
- **Cinnamon Teal** *Anas cyanoptera*
- **Common Goldeneye** *Bucephala clangula*
- **Costa's Hummingbird** *Calypte costae*
- **Green-Winged Teal** *Anas carolinensis*
- **Long-Tailed Duck** *Clangula hyemalis*
- **Northern Shoveler** *Anas clypeata*
- **Nuttall's Woodpecker** *Picoides nuttallii*
- **Oak Titmouse** *Baeolophus inornatus*
- **Olive-Sided Flycatcher** *Contopus cooperi*
- **Redhead** *Aythya Americana*
- **Ring-Necked Duck** *Aythya collaris*
- **Ruddy Duck** *Oxyura jamaicensis*
- **Rufous Hummingbird** *Selasphorus rufus*
- **Yellow Warbler** *Setophaga petechia*

- **American Crow** *Corvus brachyrhynchos*
- **Anna's Hummingbird** *Calypte anna*
- **Black Phoebe** *Sayornis nigricans*
- **Brewer's Blackbird** *Euphagus cyanocephalus*
- **California Gull** *Larus californicus*
- **California Scrub-Jay** *Aphelocoma californica*
- **California Towhee** *Melozone crissalis*
- **Cliff Swallow** *Petrochelidon pyrrhonota*
- **Common Raven** *Corvus corax*
- ● **Great Blue Heron** *Ardea herodias*
- **Great Egret** *Ardea alba*
- ● **Great Horned Owl** *Bubo virginianus*
- **House Finch** *Haemorhous mexicanus*
- **House Sparrow** *Passer domesticus*
- **Killdeer** *Charadrius vociferus*
- **Lesser Goldfinch** *Spinus psaltria*
- **Mallard** *Anas platyrhynchos*
- **Mourning Dove** *Zenaida macroura*
- ● **Northern Mockingbird** *Mimus polyglottos*
- **N. Rough-Winged Swallow** *Stelgidopteryx serripennis*
- **Phainopepla** *Phainopepla nitens*
- ● **Red-tailed Hawk** *Buteo jamaicensis*
- **Scaly-breasted Munia** *Lonchura punctulata*
- **Tree Swallow** *Tachycineta bicolor*
- **Western Bluebird** *Sialia mexicana*
- **Western Kingbird** *Tyrannus verticalis*

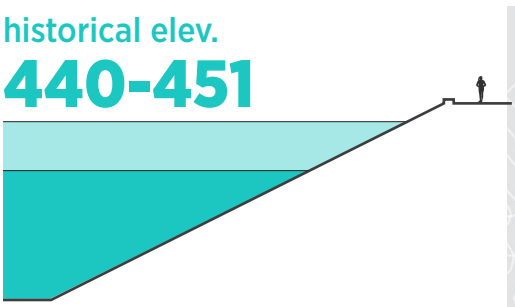
3.5 Water Resources

3.5.1 Current Use and Operations

The Silver Lake Reservoir Complex comprises two reservoir basins totaling approximately 94 acres: Ivanhoe to the north (approximately 9 acres) and Silver Lake to the south (approximately 85 acres). The water bodies are separated systems linked by a spillway at the Divider Dam. Combined, the reservoirs hold approximately 2,200 acre-feet (ac-ft) of water below the lip of the Spillway which is at elevation 451 feet (NGVD29). Even though Silver Lake and Ivanhoe Reservoirs are no longer used for potable water, they are still considered significant neighborhood features that play a major role in defining the neighborhood character. A neighborhood survey from 2016 found that "keeping water in the lake" enjoyed the support of 96% of the Silver Lake community (Silver Lake Reservoirs Conservancy, 2017).

Ivanhoe and Silver Lake Reservoirs are man-made bodies of water by which water can be added, subtracted, or stored via a system of pipes and valves. In this sense they are like many other lakes in the region found within parks, such as Echo Park Lake, MacArthur Park Lake, Lincoln Park Lake, Hollenbeck Park Lake, Peck Road Park Lake, Legg Lake, and many others. Each of these lakes must maintain a water quality balance suitable to recreational use; where these lakes have been identified in the Basin Plan, each has an "existing" or a "potential" REC-1 beneficial use.

The SLRC differs from Echo Park Lake, Lincoln Park Lake, and Hollenbeck Park Lake, to name three nearby examples, because there is currently no stormwater runoff input source. There is currently no external source of stormwater in MacArthur Park Lake, though local stormwater runoff from within the park drains to MacArthur Park Lake. Other lakes, such as Lake Balboa, Legg Lake, and others are fed by tertiary-treated recycled wastewater.



Recent projects have been completed within Echo Park Lake and within MacArthur Park Lake that share similarities with those proposed for the SLRC. The Echo Park Lake project added reservoir recirculation and low-flow stormwater runoff diversion, as well as a wetlands system, to improve water quality. The MacArthur Park Lake project shares similar features with the SLRC plans as well. MacArthur Park Lake currently does not receive stormwater runoff flows, but there is a planned project to incorporate urban stormwater runoff to replace a portion of the potable water used to refill the lake. Lake water is currently used to irrigate landscaping within the park, a change which necessitated the construction of a pressure sand filtration and UV disinfection device in 2016 [LASAN].

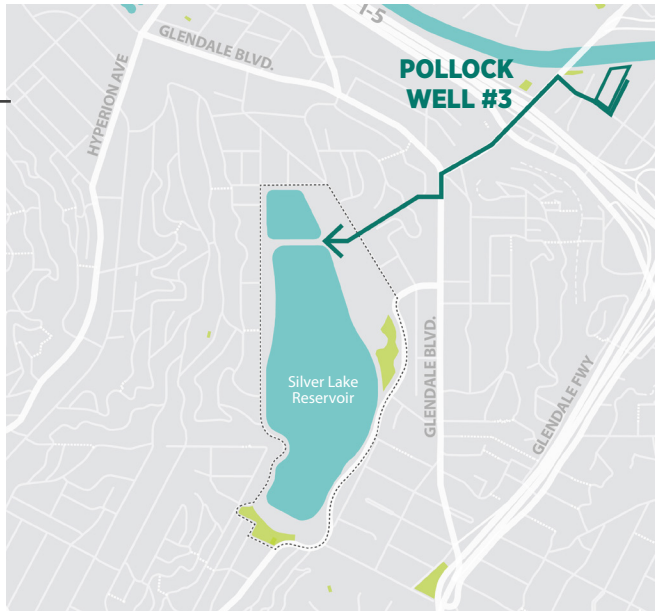


Figure 3-18 Stormwater wetlands at nearby Echo Park

Figure 3-19 (right) Historical Elevation & Evaporation Loss in the Silver Lake Reservoir

Figure 3-20 (far right) Pollock Well Location

REFILLING OPERATIONS

The water level in both reservoirs drops from five to seven feet annually due to evaporation and seepage and thus requires periodic replenishment. The historic operable range of water elevations within the SLRC is between 440 and 451 feet (Figure 3-19). LADWP is currently committed to maintaining the water level at a minimum 440 feet. To refill the reservoirs, LADWP currently relies on pumping water from Pollock Well #3 to the site. Pollock Well #3 is a groundwater well located at LADWP's Ripple Street Yard northwest of the SLRC (Figure 3-20).

Figure 3-21 Fire department helicopters accessing emergency water from the Reservoirs

FIREFIGHTING OPERATIONS

The SLRC is currently used as a source of water for firefighting operations. Under an agreement with LADWP, both the City and County of Los Angeles Fire Departments may use reservoir water storage for firefighting purposes, and both departments have used the water in the past. The Master Plan supports the continued use of the reservoirs for LA firefighting operations.

WATER QUALITY

Existing water quality within the SLRC is generally very good. This is due in part to the limited size of the tributary watershed. The predominant source of water since 2017 has been a mix of potable water and treated groundwater, with very little precipitation. The only stormwater that can currently enter the SLRC comes from precipitation that falls on the SLRC which is generally clean. However, stormwater runoff tends to have more impaired water quality than treated potable water or treated groundwater because as it moves over the surface of the land it picks up sediments and pollutants from the ground surface.

3.5.2 Planned Future Operations

The LADWP is undertaking several initiatives to diversify the source of water used to refill the reservoirs as well as maintain long-term water quality as described below and depicted in Figure 3-22.

PROPOSED LADWP AERATION PROJECT

The aeration project will install new air pumps and piping to introduce twenty small tubes (fourteen in Silver Lake and six in Ivanhoe) that convey air bubbles to diffusers placed in the middle of each water body. The project will support water quality by introducing dissolved oxygen into the water to reduce algae development and minimize potential odors related to anaerobic conditions in the reservoirs. This dissolved oxygen can also help support aquatic organisms in the future.

PROPOSED LADWP RECIRCULATION PROJECT

The recirculation project will utilize an abandoned bypass line to recirculate water from Silver Lake Reservoir to Ivanhoe Reservoir. The project will allow for more thorough mixing and thermal destratification, which also supports water quality. Once implemented, the Ivanhoe Reservoir will fill up to the Spillway elevation of 451 feet and then cascade into Silver Lake Reservoir.

PROPOSED LADWP STORMWATER CAPTURE PROJECT

To help supplement the amount of water used from Pollock Well #3 to refill the reservoirs, a stormwater capture project is planned to divert stormwater from portions of the neighborhood to the Complex. The project will deliver up to 57 acre-feet of stormwater on average per year to the SLRC.

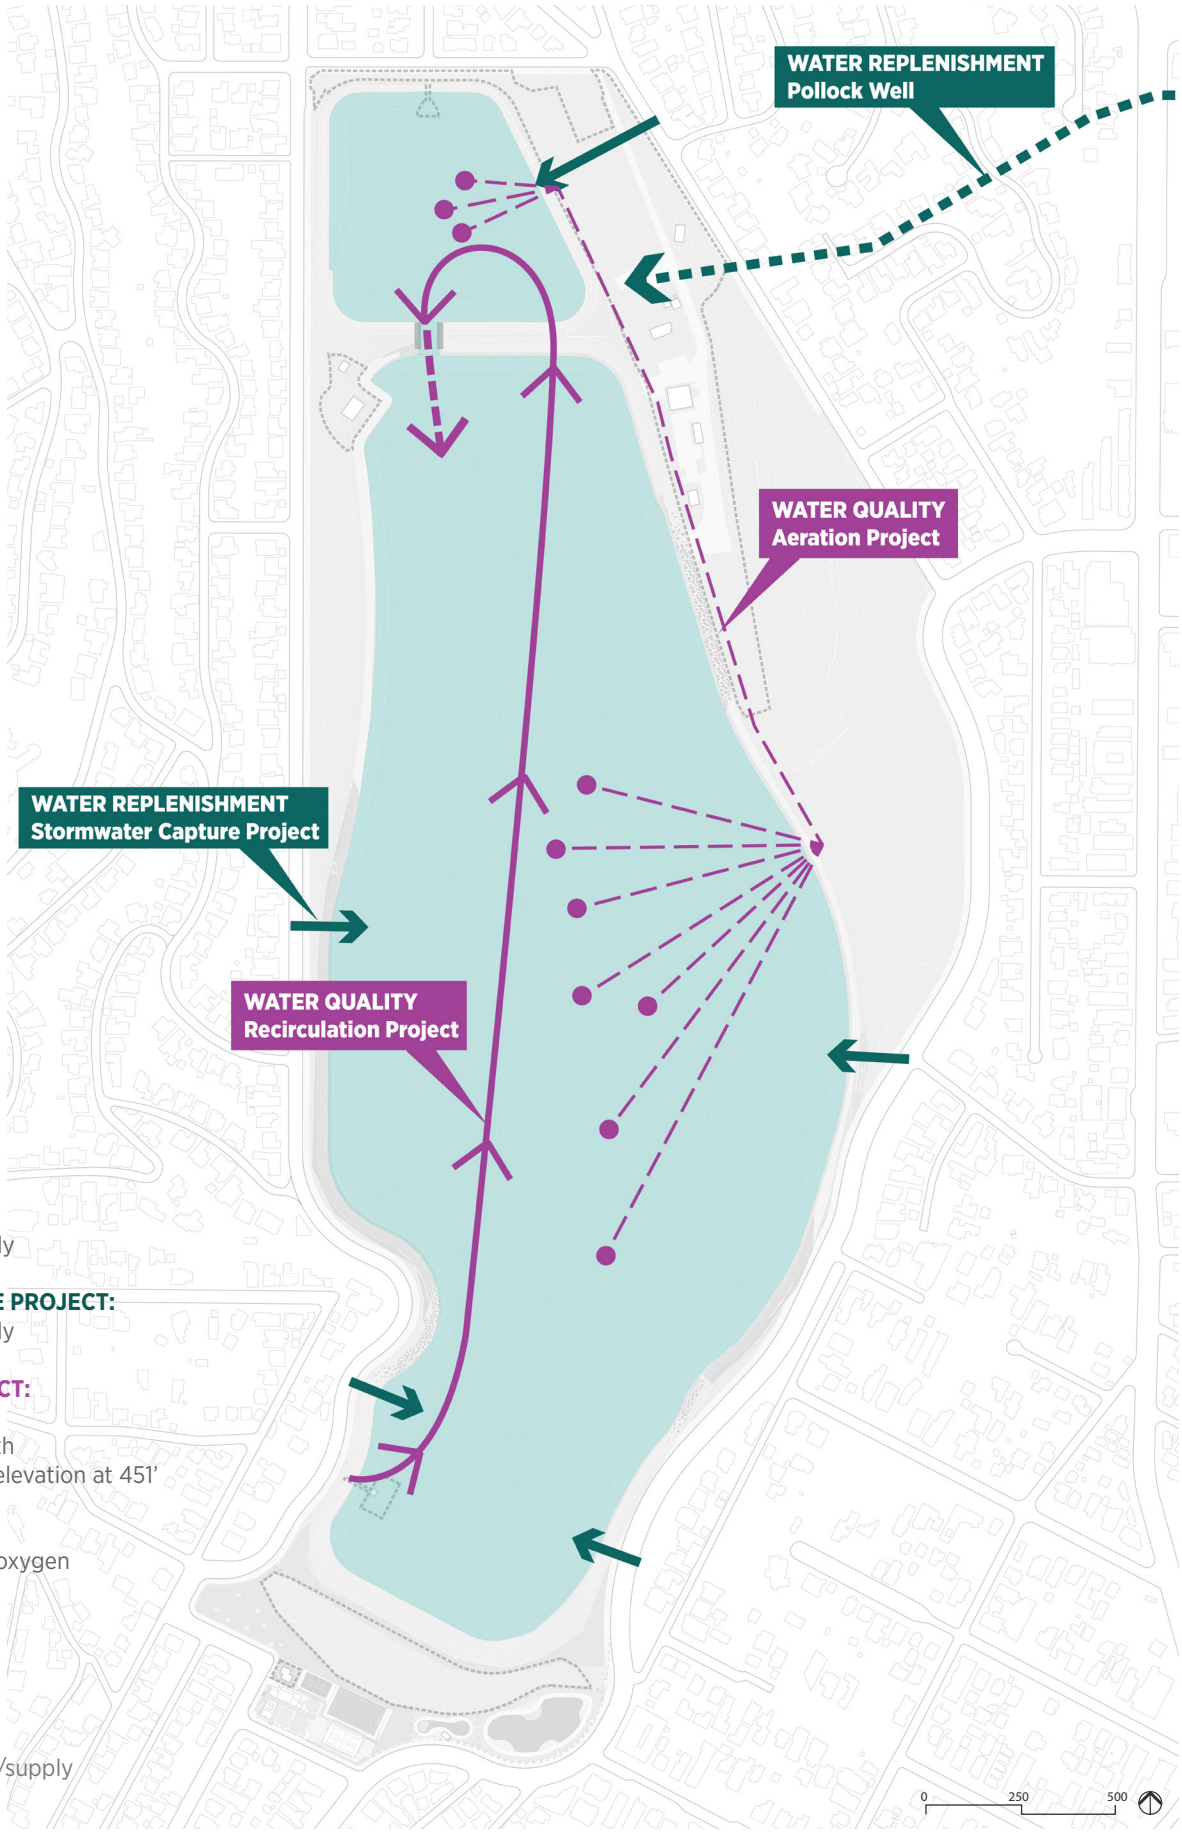
Alternate Sources of Water for Replenishment

The design team also explored other potential non-potable sources of water to refill the reservoirs: the Los Angeles River and recycled water.

Los Angeles River Water

The Los Angeles River is about half a mile northeast of Ivanhoe Reservoir and adjacent to LADWP's Ripple Street Yard. Based on a study by LADWP, it is possible to use Los Angeles River water in the future to refill the SLRC. The pipeline that currently delivers water from Pollock Well #3 is the same pipe that could ultimately also deliver water from the river. However, this would require new infrastructure to be built within the Los Angeles River channel. A new diversion structure would be required within the channel, as well as a pump to get the water from the bottom of the channel to the existing pipes at Ripple Yard.

The new physical infrastructure within the Los Angeles River would present several, multi-year permitting challenges, including the need to secure US Army Corps of Engineers (USACE) Section 408 Permits, Section 401 and 404 permits, a California Department of Fish and Wildlife Section 1602 permit, and a LACFCD flood construction permit.



The use of Los Angeles River water for refill water at the SLRC could also present water quality challenges. The diversion would likely be designed to only take in a portion of the Los Angeles River dry-weather flows during summer months rather than stormwater flows. Dry-weather flows in the Los Angeles River are composed of the effluent from water reclamation plants that tend to be high in nutrients which are damaging to aquatic habitat, and usage of this water in the SLRC would lead to an increase in chlorophyll and algae if no additional treatment processes were used.

Recycled Water

Recycled water could be used rather than groundwater as a source of non-potable water to refill the SLRC. Piping could be installed to connect to an existing recycled water facility in Griffith Park a mile and a half away from the reservoirs. However, currently, all the recycled water from the Los Angeles-Glendale Water Reclamation Plant has been allocated to other uses, so a restructuring of these uses would be necessary for the SLRC to use this water.

If recycled water were to be used instead of groundwater to periodically refill the SLRC, the project would require a new pipeline stretching to the SLRC from existing recycled water pipelines at the Griffith Park facility. This new pipeline could be as long as 1.5 miles and an expensive undertaking. Additional infrastructure would also need to be constructed, such as pump stations, tanks, and possibly a new pressure regulator station. The recycled water pipeline extension project would present challenges such as right-of-way acquisition, utility relocation, and construction traffic management. Recycled water would also present some of the same water quality challenges as using Los Angeles River dry-weather flows. Even though recycled water is very clean, elevated levels of nutrients may lead to an increase in chlorophyll and algae in the SLRC and require additional treatment to be safe for aquatic habitat.

3.6 Precedent Studies

3.6.1 Environmental Education

Fundamental goals of the Silver Lake Reservoir Complex Master Plan are to enrich and expand habitat for wildlife and create the possibility for the park's visitors to interact with the natural world in the heart of Los Angeles. This interaction presents the opportunity for people, and especially children, to learn about biodiversity in an urban environment. To that effect, the entire reservoir complex is meant to become a classroom.

To further enhance this learning experience, including field trips by school children, the Master Plan explored the possibility of creating a small educational facility, as has been done successfully in a number of parks in the Los Angeles area, which is described herein.

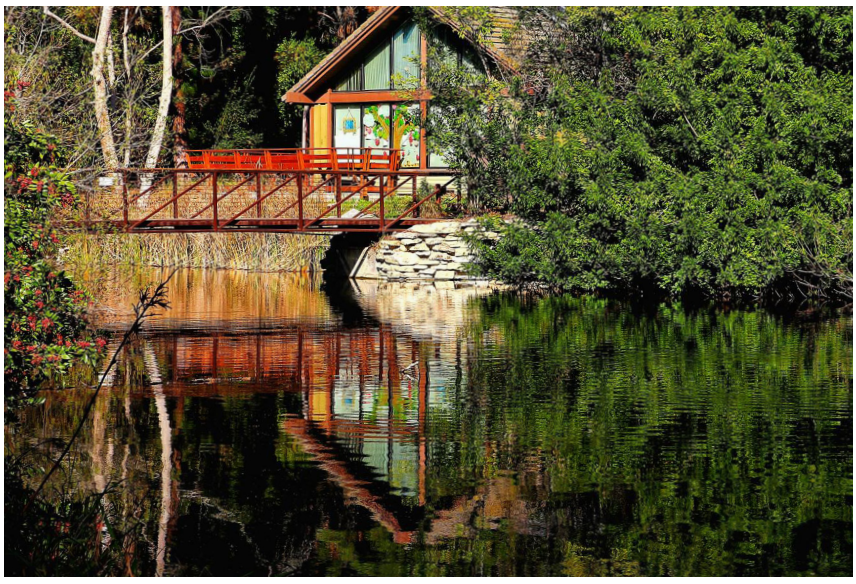
This approach and element were discussed with the community and stakeholder groups and received the support of the majority of respondents to the project's multiple questionnaires, though the Silver Lake residents are generally in agreement that any new construction should be properly measured. To guide the development of an Education Center the design team conducted a precedent study of twelve parks with educational facilities and programs in the Los Angeles region: Lewis MacAdams Riverfront Park, Audubon Center at Debs Park, Augustus Hawkins Natural Park, Stone View Nature Center, Tree People, Eaton Canyon Nature Center, Sooky Goldman Nature Center, Madrona Marsh Preserve and Nature Center, Santa Fe Dam Nature Center, El Dorado Nature Center, George F. Canyon Nature Center, and White Point Nature Education Center.

The three outlined below and described on the following page were determined to be the most relevant examples to inform the approach and development of educational programming, elements, and structures at the SLRC.

LOCATION	PARK SIZE	FACILITY SIZE	CLASSROOMS	ENCLOSED	OFFICE(S)	RESTROOMS	OTHER
Lewis MacAdams Riverfront Park	3.9 acres	4,920 sf	2	No	No	Yes	*200-person capacity*
Stone View Nature Center	5 acres	6,000 sf	2	Yes	Yes	Yes	
El Dorado Nature Center	105 acres	8,800 sf	1	Yes	Yes	Unknown	*Bookstore, Gallery Space, Info Desk*

LEWIS MACADAMS RIVERFRONT PARK

Part of the Los Angeles River Greenway, the 3.9-acre Lewis MacAdams Riverfront Park is located adjacent to a nine-mile section of the 51-mile Los Angeles River known as the Glendale Narrows which has a natural soft bottom instead of a concrete floor within the channel. This section allows native river plants and animals to thrive as if the river were in its natural state. The park provides access to the LA River Bike Path and the Los Angeles River Recreation Zone. With a stellar view of the Verdugo Hills, as well as picnic grounds, grassy areas, and nature-themed children's play equipment, the park also includes restrooms and two outdoor classrooms. The distinctive, open-air pavilion can accommodate more than 200 people for events of all kinds.



STONE VIEW RIVER CENTER

Stoneview Nature Center is 5-acre urban sanctuary nestled in the Blair Hills of Culver City with scenic views of the Los Angeles basin from the Santa Monica Mountains to the Hollywood Hills. As an important node along the five mile "Park to Playa Trail", the facility and surrounding gardens were envisioned as a place for the community to come together and engage both socially and architecturally. An Observation Deck visually connects visitors to the nearly panoramic views of the Los Angeles skyline, while the Outdoor Room offers a central connection point to the facility's lobby, multi-purpose room, demonstration kitchen and gardens beyond.

EL DORADO NATURE CENTER

The 105 acres that make up the El Dorado Nature Center grounds provide sanctuary for animals and plant life. Two miles of dirt trails and a ¼ mile paved trail wind around two lakes, a stream, and forested areas. At the entrance, a wooden bridge spanning the lake leads to a small island that houses the Visitor Center which includes educational displays, an art gallery, and a small gift shop offering environmentally themed books and gifts. The museum contains a small, permanent natural-history display put together with the help of the Natural History Museum of Los Angeles County. Also in the museum is a small gallery that features changing exhibits of art and photography.

3.6.2 Repurposed Reservoirs and Urban Water Bodies

Repurposing reservoirs or other urban water bodies to public parks is not unusual for the City of Los Angeles. Many such examples are in proximity to the SLRC. In the early stages of the Master Plan process, examples (precedents) of these transformations were analyzed to inform optimum planning relationships, programming and uses, as well as spatial organization.

The following page shows a series of examples of nearby reservoirs and water bodies which were repurposed as public space. Each example includes a plan diagram (shown at the same scale as the SLRC outline), notes indicating size and relevant amenities or interest, and a corresponding photograph showing the character of the space.

Echo Park Lake (~26.98 acres)

Amenities/Interest:

- Paddle Boating
- Concession
- Rec Center
- Bird Watching
- Wildlife Habitat
- Family Friendly

MacArthur Park Lake (~31.92 acres)

Amenities/Interest:

- Paddle Boating
- Bird Watching
- Wildlife Habitat
- Walking/Running Path

Lincoln Park Lake (~44.71 acres)

Amenities/Interest:

- Historical Value
- Cultural Landmark
- Popular for Events
- Fishing
- Playgrounds
- Recreation Center
- Restrooms
- Walking/Running Path
- Sports Fields/Courts
- Bird Watching
- Skateboard Park
- Paddle Boating

Lake Balboa (~152.75 acres)

Amenities/Interest:

- Historical Value
- Cultural Landmark
- Picnic/ Playgrounds
- Bird watching
- Skateboard Park
- Paddle Boating
- Bicycle Friendly
- Wildlife Habitat

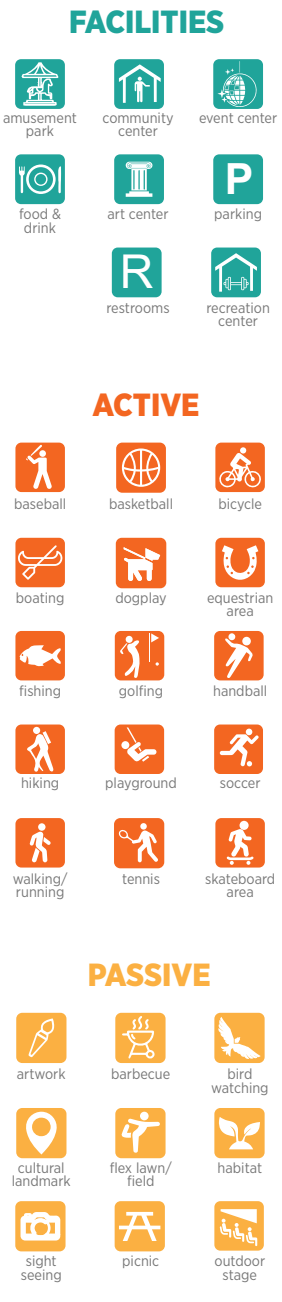
Hollywood Reservoir (~429.68 acres)

Amenities/Interest:

- Historical Value
- Cultural Landmark
- Hiking Loop
- Family Friendly
- Walking/Running Path
- Bird watching
- Sight Seeing

3.7 Park Needs Assessment

Successful parks provide spaces that respond to the unique character of their site as well as community needs and goals. In early stages of the Master Plan process, existing parks within a 2-mile radius of the Silver Lake Reservoir Complex were assessed to understand the amenities and activities they offered. This study was also used to inform a questionnaire developed to access what the community wanted to see and do in the Complex in the future.



One mile to the northwest is 4,000-acre **Griffith Park**, one of the largest municipal parks in the country which offers miles of hiking trails, two golf courses, horseback riding trails, soccer fields, baseball fields, children's playgrounds, a merry-go-round, a zoo and a planetarium, among other amenities. Additionally, a state-of-the-art soccer field, a large public pool, and a newly refurbished playground are all located at the southern edge of the park closest to the SLRC.

The **Elysian Park** complex, located approximately one and a half miles to the southeast, is another major natural park with extensive hiking trails as well as Dodger Stadium. It offers a myriad of sports and cultural amenities ranging from tennis and baseball to outdoor performances and a recreation center

One and a half miles to the south is **Echo Park** which was also once a drinking water reservoir for the City. A smaller urban park, it offers paddle boating and a café as well as walking paths and open lawn with shade trees.

Less than two miles from the SLRC is the **Los Angeles River** which offers a continuous recreational path running along its western bank, where people bike, walk, and observe wildlife in the Glendale Narrows area of the river.

On the eastern bank of the LA River, two and a half miles east of the reservoir complex is the **Rio de Los Angeles State Park** with multiple soccer fields, a large children's playground, and more hiking trails.

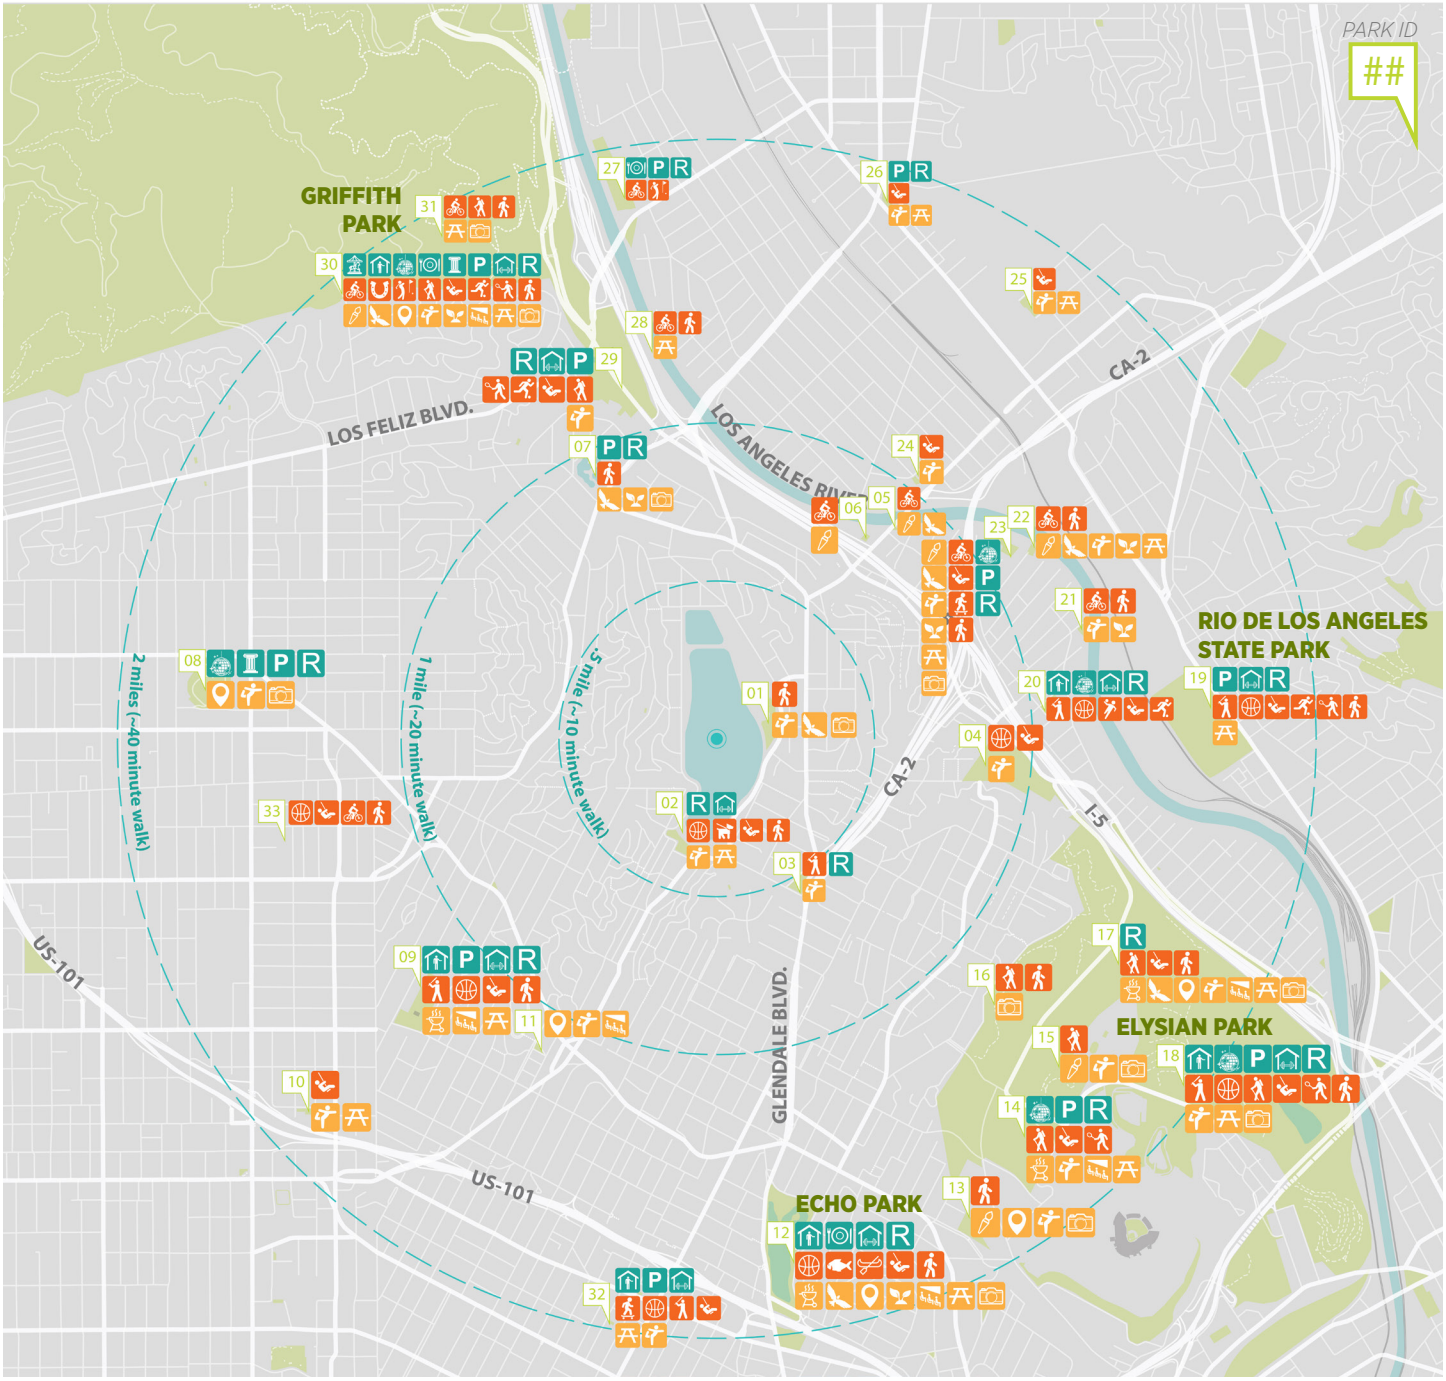

Figure 3-23 Existing Parks within a 2-mile radius around the Silver Lake Reservoir Complex

Within the SLRC there are three primary areas of existing parkland overseen by RAP: The Meadow, Dog Park, and Recreation Center. Amenities and programs offered in these areas are shown in Figure 3-24 below. Linking these spaces together and creating another recreational use is a perimeter path that loops around the complex and is used daily for strolling, dog walking, and running. These neighborhood amenities are part of an extensive network of outdoor and indoor sports and recreation facilities within two miles of the Silver Lake Reservoir Complex.

THE MEADOW

The Meadow park was created in 2011, as envisioned by the 2000 Master Plan, when the fence surrounding the Complex was relocated to open this area to the public. The Meadow is an unstructured open lawn with some clusters of shade trees. It is primarily used for relaxing, picnicking, walking, running, exercising, and playing lawn games. The northern edge of the Meadow features a native plant garden maintained by volunteers. The 3.4-acre park is enclosed by a low fence and closes at 10:30 pm each evening.

THE DOG PARK

This 1.5-acre park consists mainly of a sloped dirt field with minimal vegetation and shade. It has separate areas for small dogs and large dogs, and it is a popular amenity with Silver Lake residents. When interviewed as part of this analysis, RAP, which maintains the facility, would like to upgrade the dog parks in response to user-expressed needs whom have requested new features such as mounds and water play areas as well as replacing the dirt with turf in some areas.

Figure 3-24 Existing Facilities and Recreation within the SLRC

Figure 3-25 Existing Recreation Center Site Plan

THE RECREATION CENTER

The Silver Lake Recreation Center is located at the south end of the Silver Lake Reservoir, just below the South Dam of the Silver Lake Reservoir. It can be accessed from Silver Lake Boulevard and West Silver Lake Drive. The Recreation Center was originally built in the 1930s and was expanded in the mid-1980s. The playground was built in the late-1990s and was recently renovated in 2018.

The Recreation Center consists of a building facility with a small gym, a kitchen, community room, and offices. Within the grounds are a children's playground, an outdoor basketball court, and a play field. The Center is surrounded by lawn and shade trees, including a popular gentle slope called the Grassy Patch and offers some picnic tables. In addition to the play field and court, The Recreation Center offers a wide range of activities throughout the year, including day camps in the summer. Additionally, it serves as a neighborhood polling place for most elections.

RAP operates and maintains the existing facilities with 7 to 10 staff members on site daily, including a full-time director. During an interview for the Master Plan project, the Recreation and Parks department expressed an interest in expanding the facility to better serve the needs of neighborhood residents. The Master Plan presents the opportunity to increase the size of the facility in its existing location or in a new location on the project site. Figure 3-26 below outlines the existing and desired programming and facilities provided by RAP.

With the diversity of park spaces and recreation amenities in proximity, the Silver Lake recreation facilities are scaled to serve the immediate neighborhood. Outside of the immediate needs to expand the Recreation Center and upgrade the Dog Parks, RAP has not identified specific needs in the larger surrounding area that should be addressed by the Silver Lake Reservoir Complex Master Plan.

Figure 3-28 Existing Silver Lake Recreation Center entrance (right)

3.8 Circulation

Access to the Silver Lake Reservoir Complex is available via a network of streets, transit routes, bike lanes, and walkways.

3.8.1 Vehicular Access

Regionally, the neighborhood of Silver Lake is served by the Golden State Freeway (I-5), the Glendale Freeway (SR-2), the Hollywood Freeway (US-101), and Sunset Boulevard. These connect to the roadway network which form the boundaries of the SLRC: Silver Lake Boulevard and Armstrong Avenue on the east, Tesla Avenue on the north, West Silver Lake Drive on the west and Van Pelt Place on the south.

As described below and shown in Figure 3-29, these bounding roadways vary in their classification and widths, the largest of which is Silver Lake Boulevard. This primary thoroughfare is classified as an Avenue II with a roadway width of 50 feet, accommodating two-way traffic and a Class II bike lane in each direction. Silver Lake Boulevard has a 35-mph speed limit.

West Silver Lake Drive which bounds the west side of the complex is a two-way road classified as a Collector with a width of 36 feet and 25-mph speed limit. Similarly, Armstrong Avenue is also a two-lane Collector street with a varying width of 30- to 35-feet and 25-mph speed limit. The remaining roadways, Tesla Avenue and Van Pelt Place, are classified as Local streets. Telsa is one-way in the westbound direction, 24-feet wide, and has a 25-mph speed limit. Van Pelt is 30-feet wide with one lane in each direction and a 25-mph speed limit.

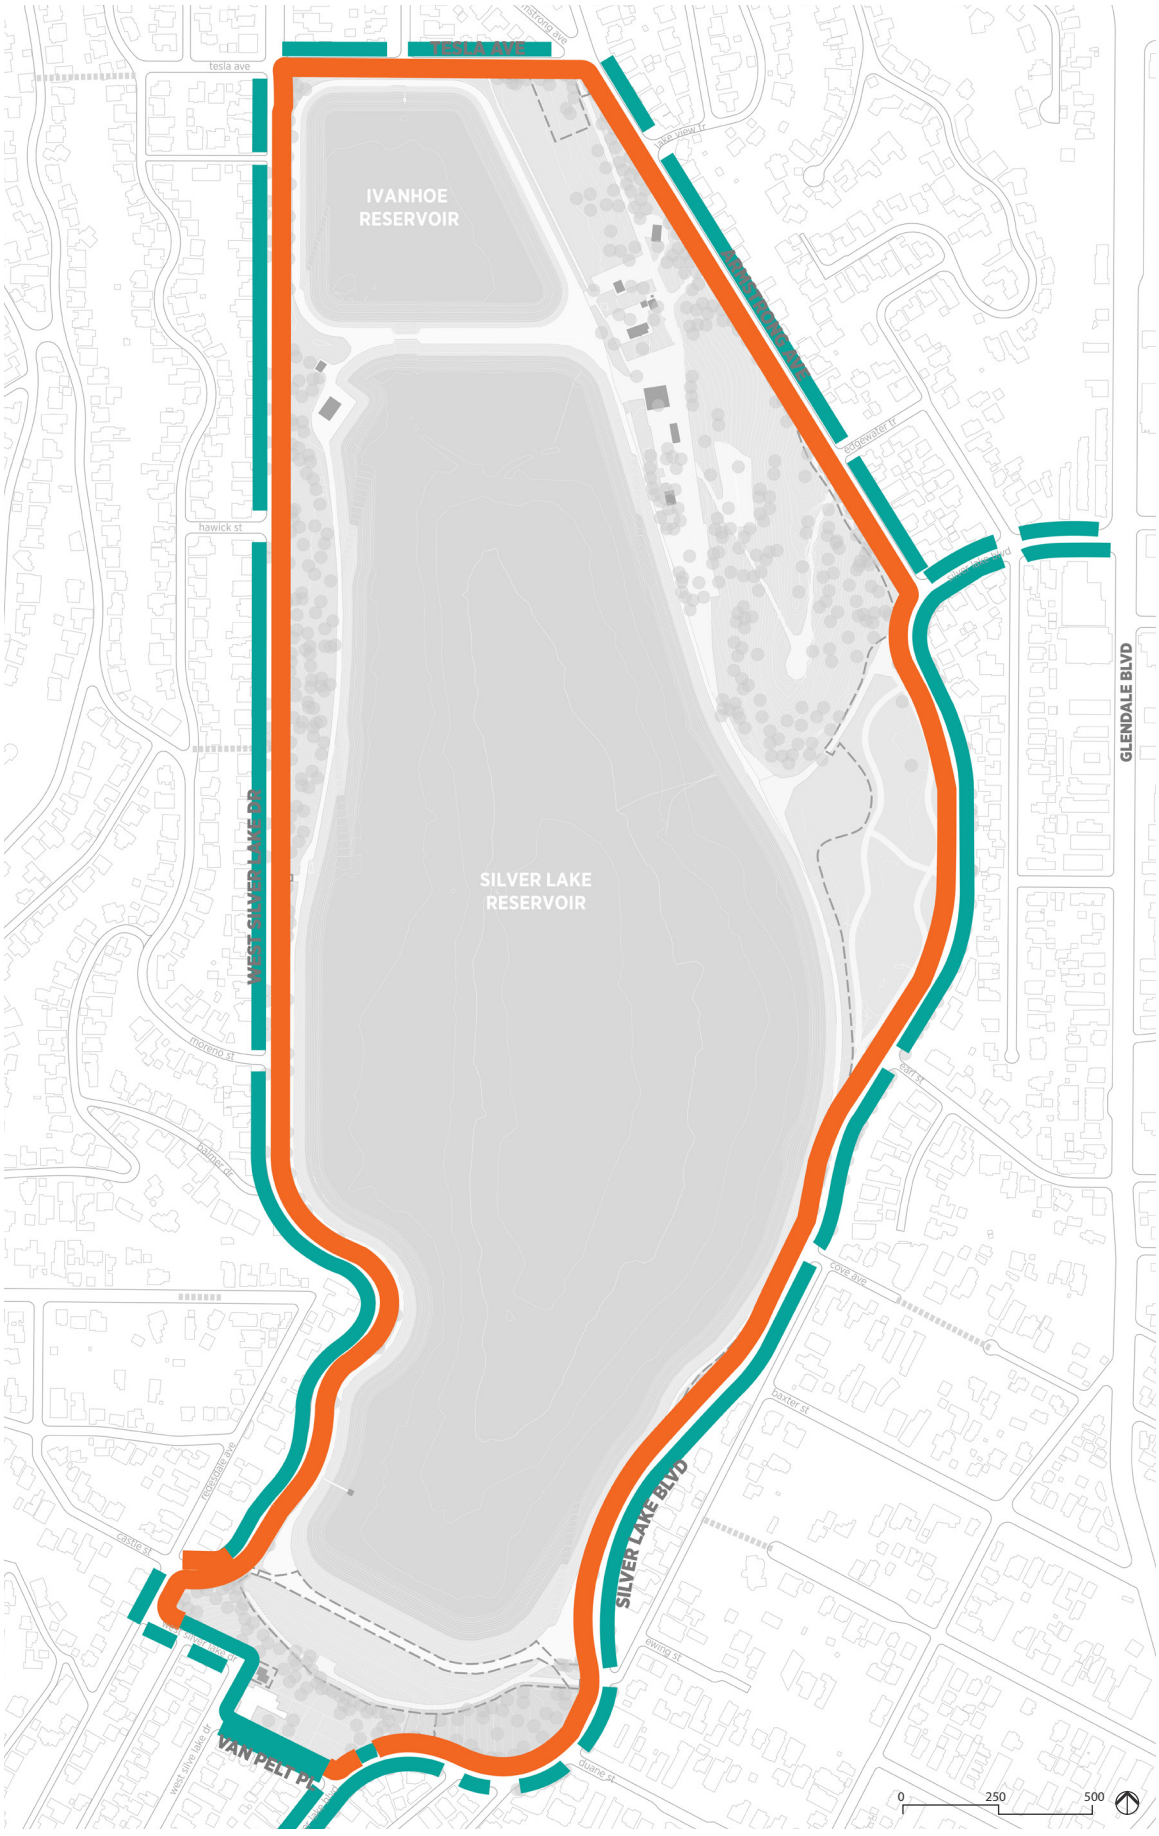

Figure 3-29 Existing road network around the SLRC

3.8.2 Parking

Parking at SLRC is limited. Surface lots within the Complex are restricted to LADWP facility staff and on-street parking is prohibited adjacent to the perimeter of the Complex. On-street parking is permitted on the opposite sides of the Complex's perimeter roads as shown in Figure 3-30. Given the traffic congestion concerns of the community and limited parking availability, making alternate modes of transportation to the Complex plentiful and easy to access is paramount.

Figure 3-30 Existing on-street parking around the SLRC

LEGEND

- no parking
- parking (time limit)

3.8.3 Bicycle Connections

There are two dedicated City bike lanes that currently provide access to the Complex, one on Silver Lake Boulevard adjacent to the Meadow (shown in Figure 3-31) and one on Rowena Avenue which connects to West Silver Lake Drive. Additionally, neighborhood traffic calming elements to improve safety and comfort for people walking and bicycling are also planned as part of the City's Mobility Plan 2035 on West Silver Lake Drive and Armstrong Avenue.

This existing and planned bike connectivity was studied for coordination with the Master Plan design. The following sections on pages 70-73 (Figures 2-32 to 3-35) depict how bicycling can be accommodated in the future within the existing street rights-of-way, creating safe bike and pedestrian circulation to and around the Complex.

3.8.4 Pedestrian Connections

Currently, a perimeter walkway allows for a continuous walking loop around the Complex. A functional perimeter walk should be accommodated by any future design. As shown in Figure 3-31, pedestrian crossings along the perimeter streets around the SLRC occur at multi-way stop signs at the intersections of Tesla Avenue and West Silver Lake Drive and Armstrong Avenue, as well as the intersections of West Silver Lake Drive and Hawick Street, Moreno Drive, and Van Pelt Place. Additionally, there are pedestrian-activated crossings at the intersection of Silver Lake Boulevard and Van Pelt Place, a traffic signal crossing at the intersection of Silver Lake Boulevard and Duane Street and along Silver Lake Boulevard at the Meadow.

3.8.5 Transit Connections

The SLRC is connected to the County Metro bus system via lines #201 that runs West Silver Lake Drive with multiple stops adjacent to the Complex and #92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Complex as shown in Figure 3-31. Connections into the complex from these transit stops are prioritized in the Master Plan design.

3.8.6 Ride Share and Shuttle Bus Drop Off

Currently, there are no designated drop off locations around the perimeter of the Complex for rideshare or shuttle buses. This represents an opportunity to manage potential increased visitors to the complex.

Figure 3-31 Existing bus and bike network around the SLRC

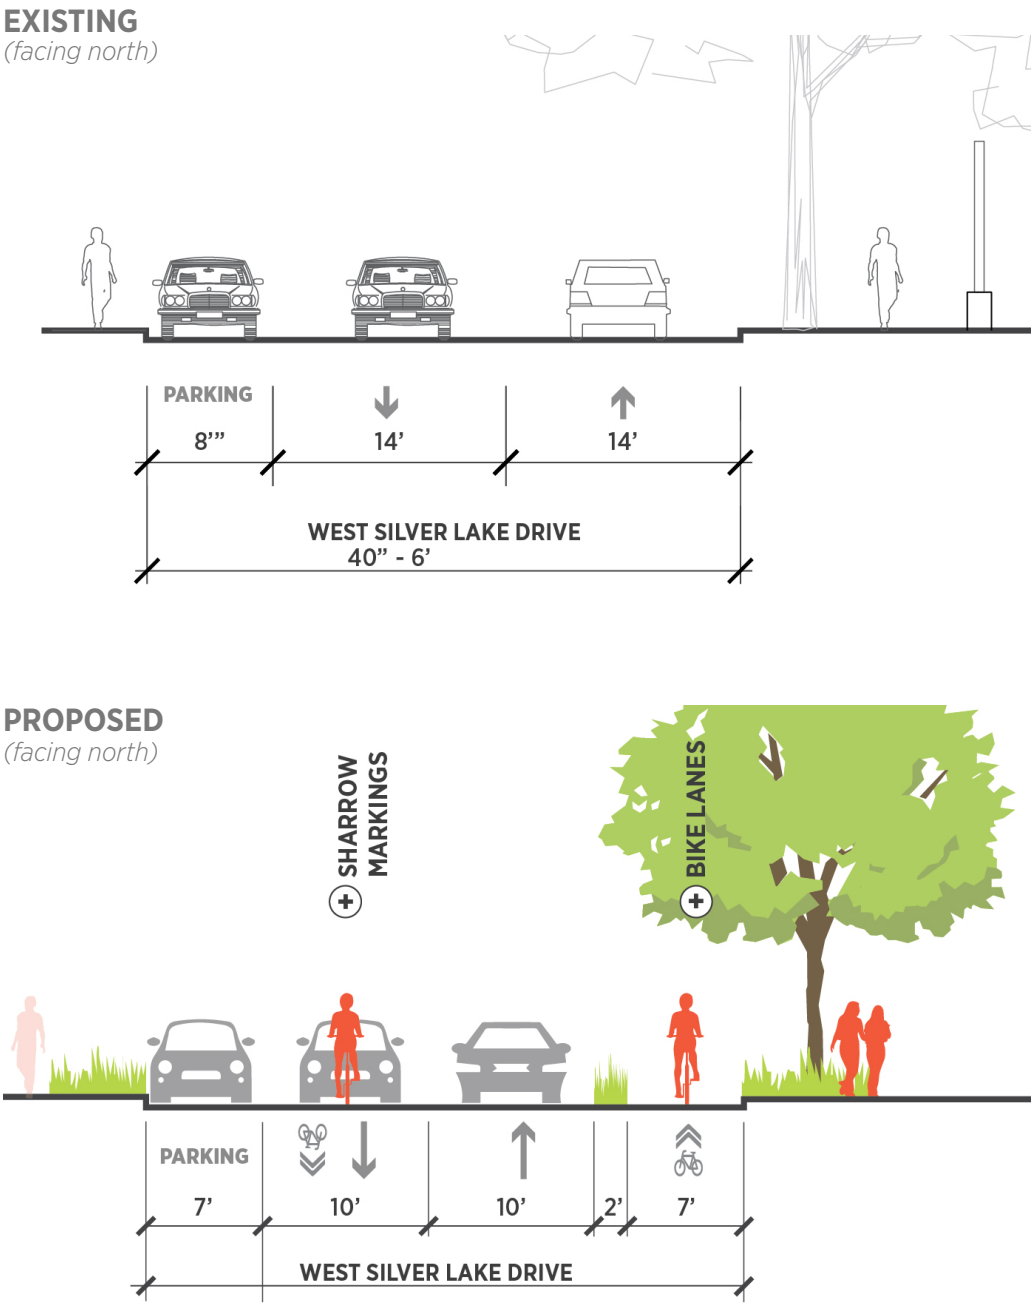
WEST SILVER LAKE DRIVE

Within the existing ROW of West Silver Lake Drive, parking and drive aisles can be reduced to accommodate a dedicated, 7-foot bike lane heading north, and the inclusion of sharrow markings heading south.



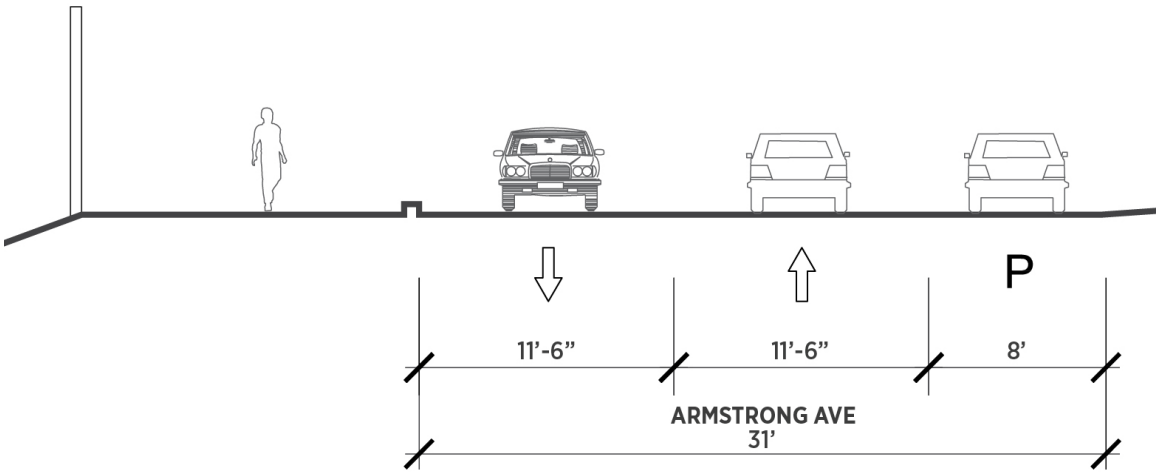


Figure 3-32 Existing & proposed section through West Silver Lake Dr.
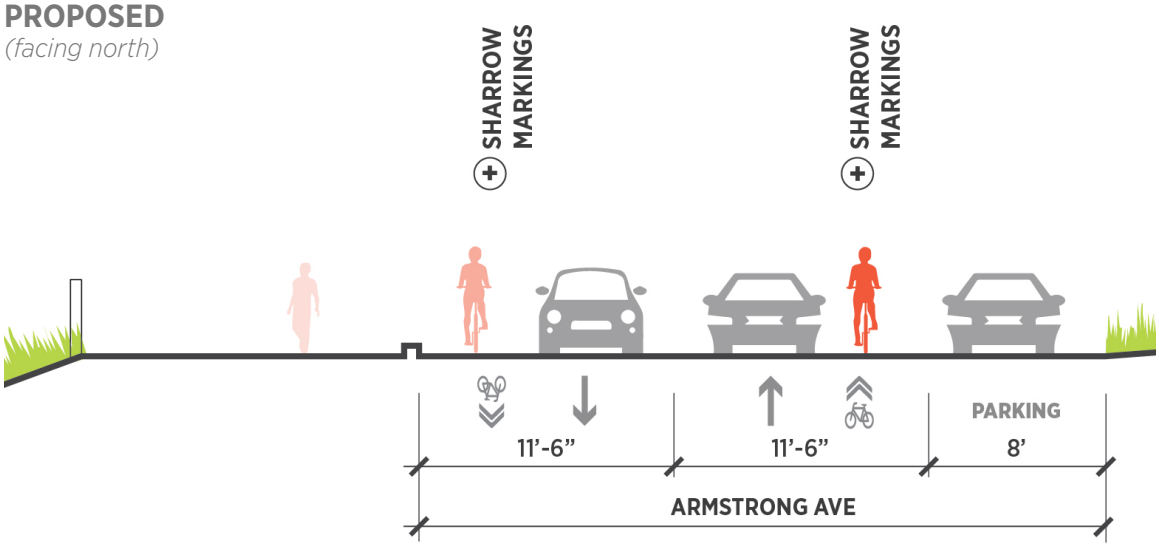
Note: all proposed changes in these studies are conceptual and subject to final DOT approval.

ARMSTRONG AVE

Armstrong Avenue is too narrow to accommodate dedicated bike lanes, however this street can accommodate sharrow markings in each direction.

EXISTING
(facing north)

PROPOSED
(facing north)



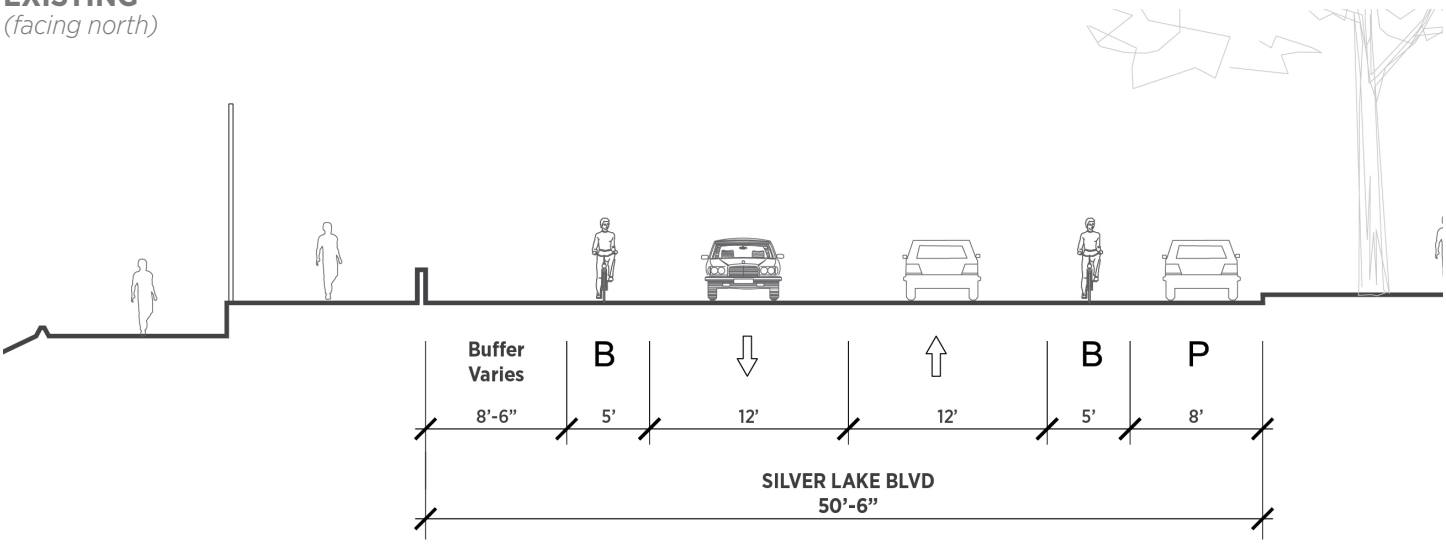


Figure 3-33 Existing & proposed section through Armstrong Ave.
Note: all proposed changes in these studies are conceptual and subject to final DOT approval.

SILVER LAKE BOULEVARD

Drive lanes, buffers, and bike lanes can be reconfigured along Silver Lake Boulevard to accommodate a safer and more pleasant bike route. Drive lanes and parking lanes are narrowed to allow for bi-directional bike traffic along the sidewalk. A large, vegetated buffer is placed between bikers and automobiles.

EXISTING
(facing north)

PROPOSED
(facing north)

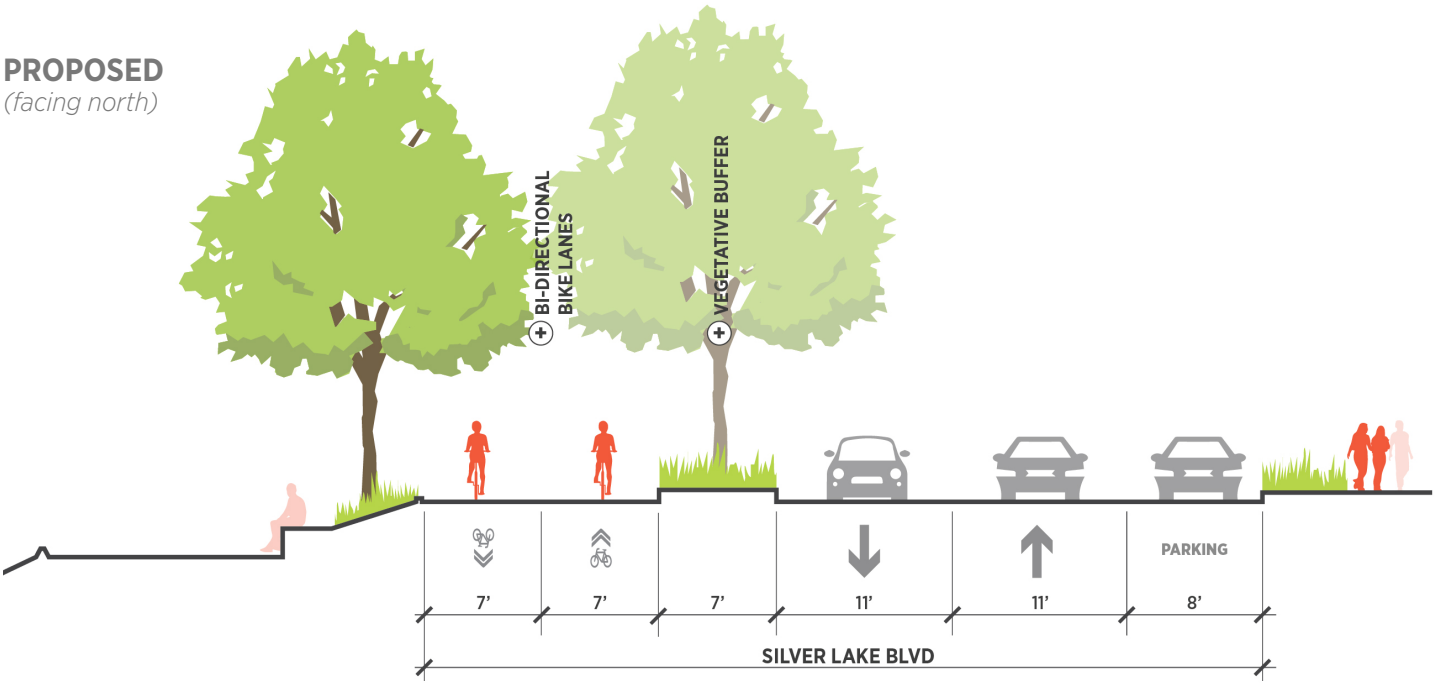

Figure 3-34 Existing & proposed sections through Silver Lake Blvd.
Note: all proposed changes in these studies are conceptual and subject to final DOT approval.

TESLA AVE

Tesla Avenue is a one-way street heading westbound. The drive lane is proposed to be narrowed to allow for a contra-flow bike lane heading east, and sharrow markings are added in the westbound direction.

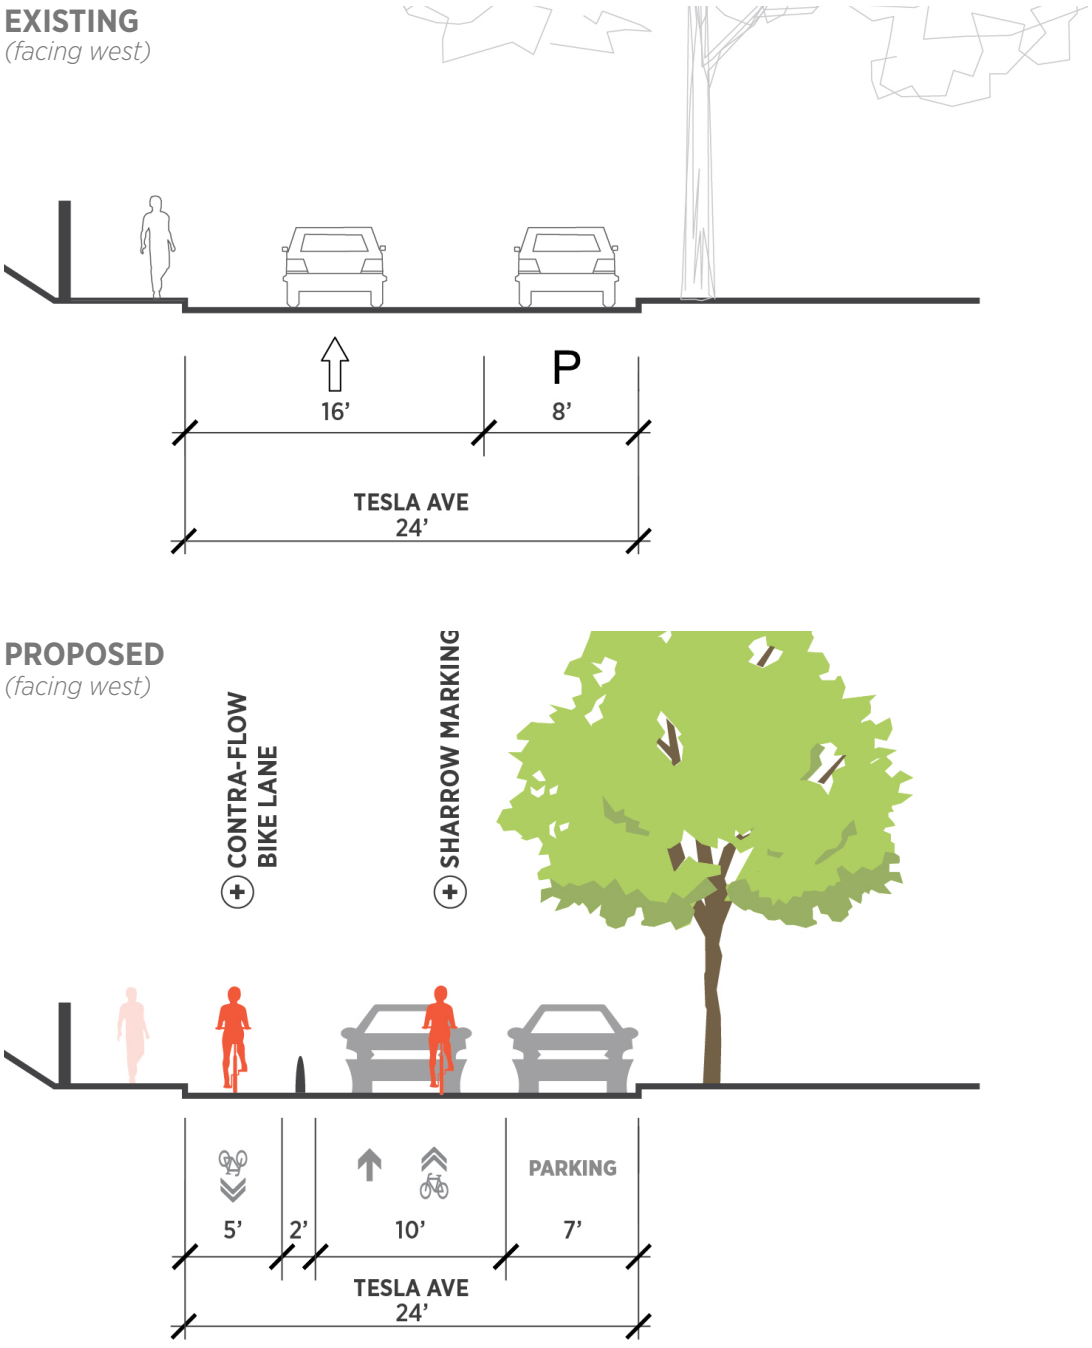

Figure 3-35 Existing & proposed sections through Tesla Ave.
Note: all proposed changes in these studies are conceptual and subject to final DOT approval.

3.9 Dams and Reservoirs

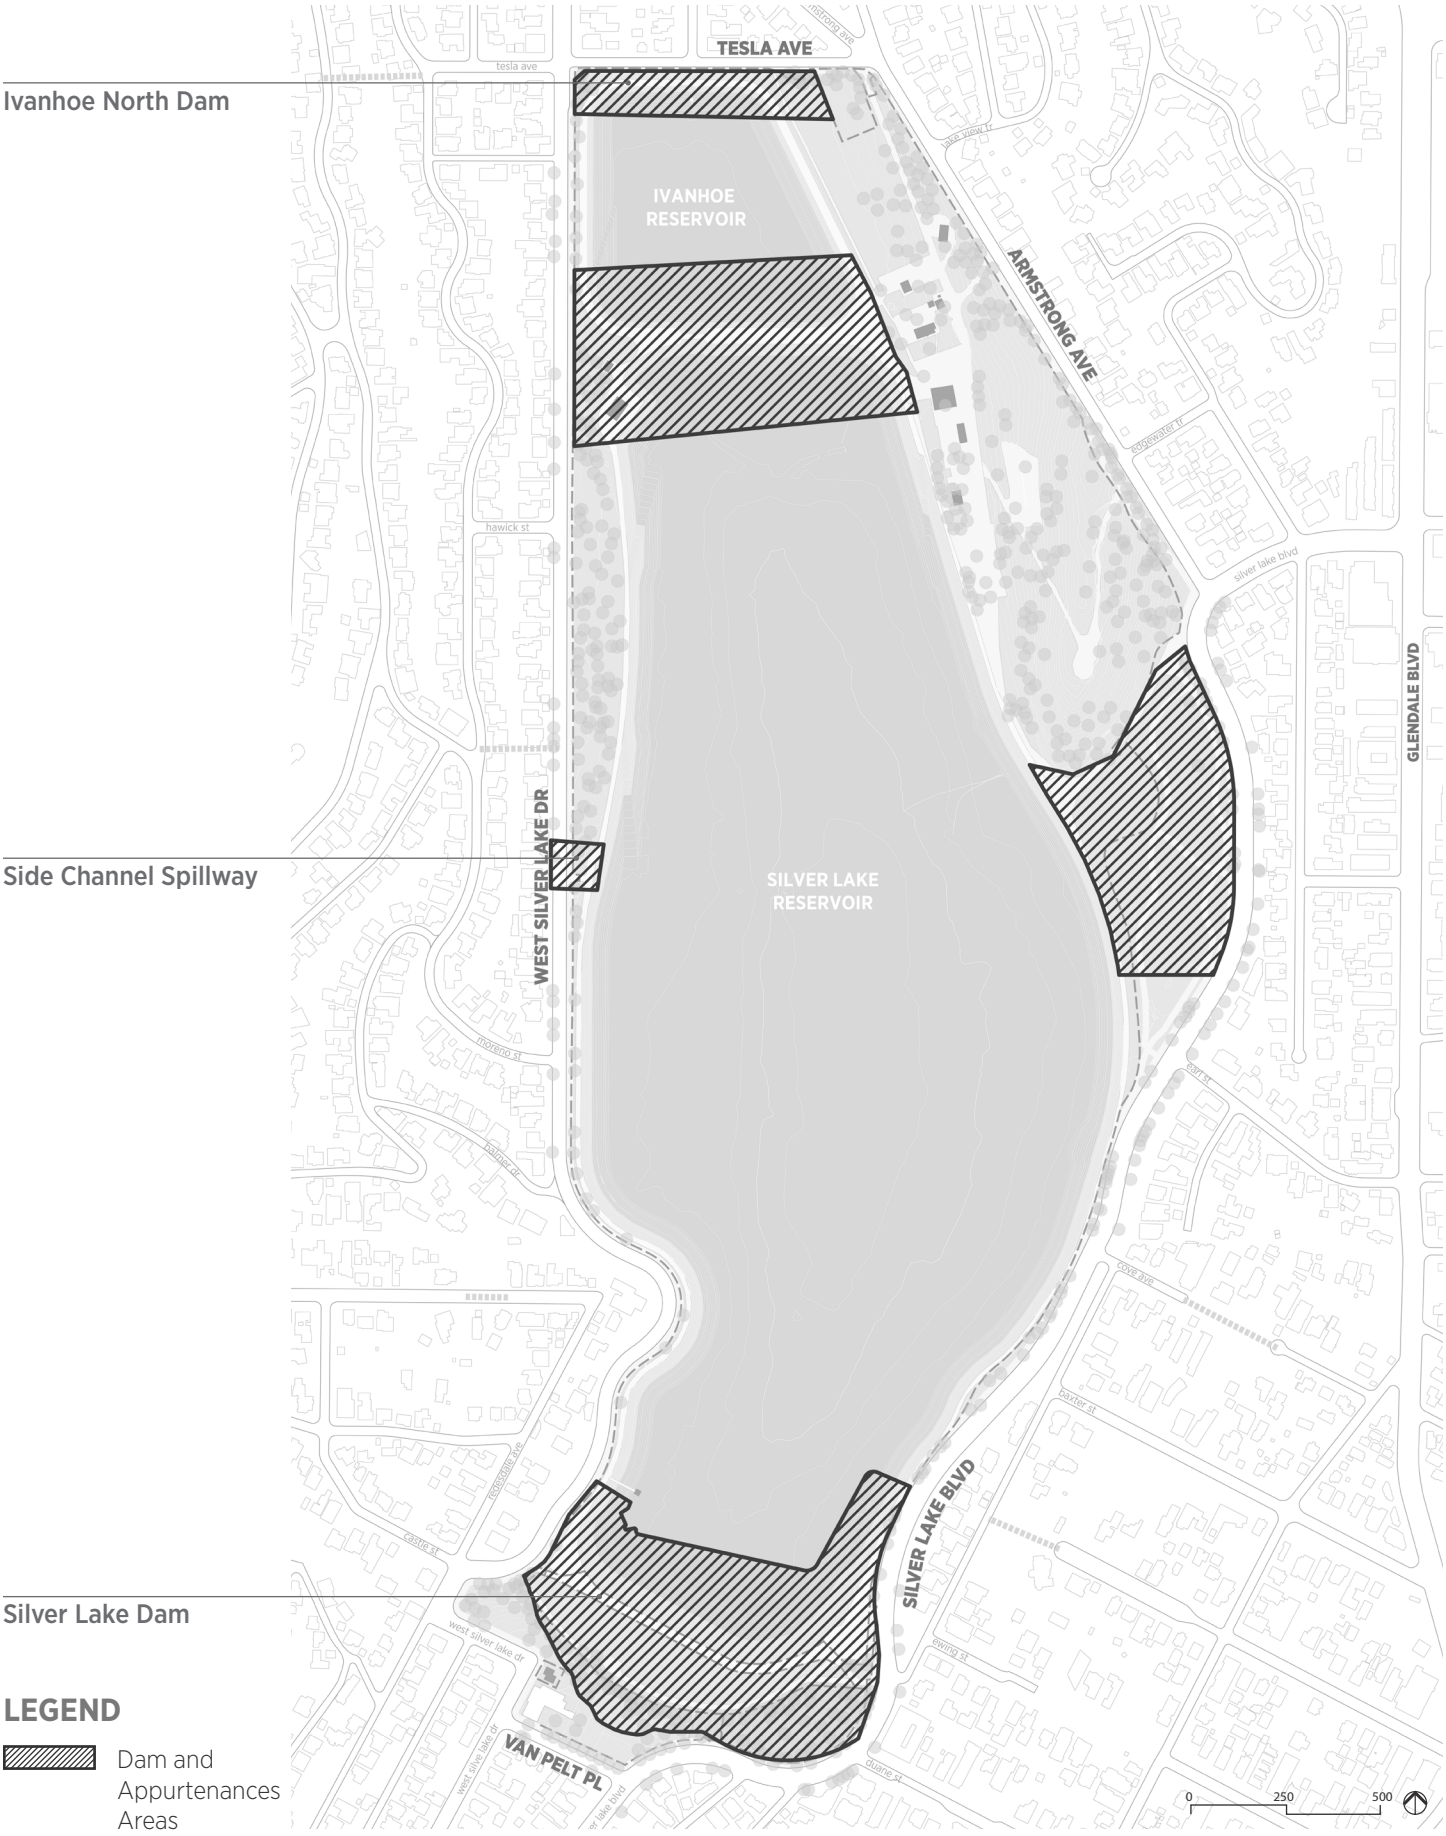
While the Master Plan envisions the reservoir complex being transformed into a public park amenity, Silver Lake and Ivanhoe Dams must remain functional and secure to protect residents and surrounding properties. The dams are located approximately one mile south of the Hollywood-Raymond Hill Fault, 8 miles northeast of the Newport-Inglewood Fault, and 32 miles southwest of the San Andreas Fault.

Ivanhoe North Dam is approximately 450 feet long and was originally constructed of wagon rolled earth filled to a maximum of 25 feet above the original streambed elevation. In 2012, a retaining wall was constructed north of the Ivanhoe North Dam for the installation of a pedestrian sidewalk on Tesla Ave.

Ivanhoe Reservoir is separated from Silver Lake Reservoir by the Divider Dam, a wagon rolled earth embankment constructed to a maximum height of 22-26 feet above the original streambed elevation and approximately 650 feet long. In 1944, a reinforced concrete spillway was constructed through the upper portion of the South Dam enabling the reservoir to be operated at a constant elevation.

Silver Lake Dam was originally constructed to a maximum height of 37 feet above the original streambed elevation by the hydraulic fill method. Due to rapid growth of the city in the 1920s, the dam was raised with wagon rolled earth fill and modifications were made to improve the reservoir for domestic use. In the 1937, a side channel spillway was constructed on the west side of the reservoir which discharged into a tunnel that connects to the storm drain system.

In the 1950s, Silver Lake Reservoir Improvements included: sharpening and deepening the reservoir, blanketing the reservoir slopes, constructing a bypass pipeline, installing reservoir blow off lines, excavating the upstream face of the dam down to bedrock, replacing the upstream face of the dam with compacted fill, and asphalt paving of the interior slopes of reservoir.



In the 1970s after the San Fernando Earthquake, seismic testing indicated the potential for liquefaction – a condition that would likely lead to failure of the dam. Based on this investigation, Silver Lake Dam was reconstructed using modern compaction methods and built on a bedrock foundation. The dam is 45 feet in height and 915 feet long.

3.9.1 State of California Department of Water Resources, Division of Safety of Dams (DSOD) Jurisdiction

Ivanhoe and Silver Lake Reservoirs falls under the jurisdiction of the State of California Department of Water Resources, Division of Safety of Dams. Any dam enlargements, repairs, alterations and removals will require review and approval by DSOD. Improvements that impact areas within the dams' areas of influence are subject to more restrictions and oversight.

Portions of the Master Plan design impacting dams and reservoirs have taken these restrictions into consideration based on a preliminary coordination with the department and a courtesy review by the DSOD. Any future design impacting the dams and reservoirs needs to be reviewed and approved by LADWP and the DSOD.

Figure 3-36 Dam and Appurtenances Areas

3.10 Viewshed

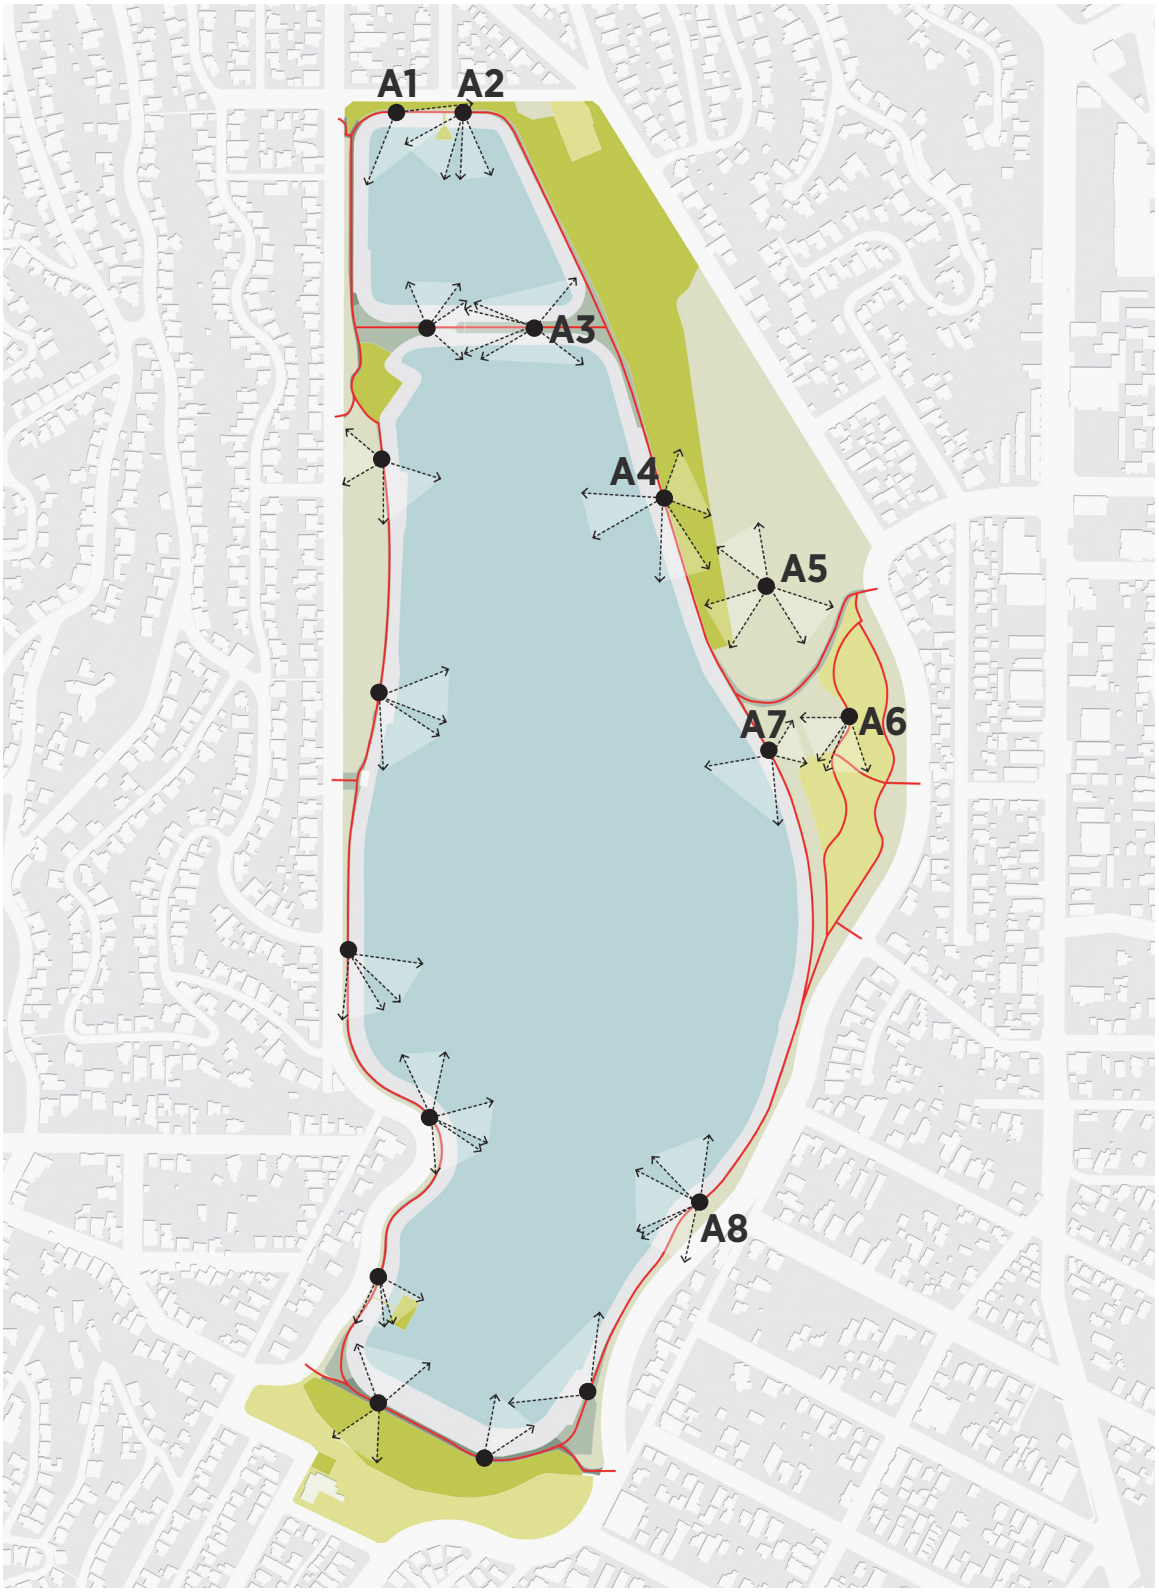
The power of the Silver Lake Reservoir Complex is the iconic singularity of its expression. Yet, because of the sheer scale of the reservoirs, it's challenging to comprehend the Complex all at once. Instead, one understands their magnitude and relationship to the neighborhood and region by moving around these water bodies both inside the Complex as well as outside within the Silver Lake neighborhood.

The reservoirs and Silver Lake neighborhood are synonymous with one another. Constructing the reservoirs within Ivanhoe Canyon was a primary catalyst for the community's growth which rapidly developed on adjacent hillsides. And given the reservoirs' central location within the canyon valley, they became an important focal point in the heart of this Los Angeles neighborhood, affording extraordinary water vistas and a vantage point for views of the regional landscape.

The vast SLRC can be seen, in whole or in part, from the public realm and from many of private residences in the surrounding hills. At the first community workshop June 27, 2019 of this Master Plan effort, it was evident that, while there was a range of different opinions regarding the future use and accessibility of the Complex, there was a strong consensus regarding its essential quality: the water. Many of the defining characteristics expressed by the community at the first workshop evoke this interest: "vistas, serenity; morning sparkle, beauty." This aesthetic quality, cherished by so many people, transcends individual delight; it becomes a shared experience that brings people together.

Figure 3-37 Runner along the South Dam Walkway

Figure 3-38 Inside the reservoir looking north along Silver Lake Blvd.



Within the complex, the scale of the reservoirs create an immense open space that allows unobstructed views of the neighborhood hills, as well as the greater landscape of Griffith Park and the foothills of Glendale and Highland Park. From an existing publicly accessibly walkway along the south Silver Lake Dam are sweeping views across the water to the San Gabriel Mountains in the distance. What unfolds as one moves around the Complex is a layered narrative about the connection between the reservoirs and the Silver Lake community as well as their fundamental place in the region.

The primary task of the Viewshed Study was to document and investigate the array of views from outside the project site looking at the reservoirs, and from within the Complex looking at the surrounding landscape. Its purpose was to gain a better understanding of the breath, depth and meaning of the reservoir views for the Silver Lake community and visitors. These studies informed the Master Plan design from the strategic placement of elements within the Complex to align with important view corridors in the neighborhood to creating moments within the Complex to heighten visitor experience.

4.1 Overview

The Silver Lake Reservoir Complex Master Plan is the result of an inclusive public engagement and participatory planning process led Hargreaves Jones in partnership with the BOE, LADWP, and the Council Districts 4 and 13. Public feedback was solicited and integrated at all critical stages in the planning process: analysis, visioning and programming, Master Plan Alternatives, Preferred Master Plan, and Final Master Plan.

Since the beginning of the project, Hargreaves Jones made over 20 trips to Los Angeles to attend meetings with the City, stakeholders, and the public to discuss specific priorities and objectives for the park, solicit feedback regarding planning work completed to date, and coordinate Park planning and design with City departments and other Los Angeles initiatives.

The overall process for the Master Plan development included the following:

- Bi-weekly meetings with City Staff and Council Districts;
- Multiple focused meetings with City officials and departments regarding project goals and design features;
- 8 (eight) Stakeholder Working Group Meetings held at critical moments throughout the process; and
- 5 (five) Community Workshops with attendance by 1,570 community members and more than 8,400 questionnaire responses. (Note: due to Covid-19, the final Community Workshop was held virtually in the form of online videos and an online questionnaire.)

The complex nature of reimaging the SLRC as a park in the heart of Silver Lake, required Hargreaves Jones to assemble a Design Team of local consultants with detailed knowledge of Los Angeles, existing site conditions, regional ecologies and landscapes, and local construction conditions. Local Design Team consultants also attended community and stakeholder meetings to facilitate seamless communication and comprehension.

4.2 City Coordination Meetings

The Design Team held regular bi-monthly project management meetings with the Client Team, comprised of representatives from the BOE, LADWP, and Council Districts 4 and 13, to brief them on planning progress and solicit feedback.

Input was also gathered from City departments individually, and through multi-disciplinary coordination meetings that focused on the planning implications of concurrent initiatives as well as interrelationships with on-going City operations, such as: the Stormwater Capture project, Aeration and Recirculation projects, water replenishment from Pollock Well #3, Los Angeles Fire Department emergency water access, State of California Department of Water Resources, Division of Safety of Dams requirements, and Recreation and Parks programs.

CITY DEPARTMENT MEETING ATTENDEES

- Department of Public Works, Bureau of Engineering
- Department of Water and Power
- Department of Public Works, Bureau of Sanitation
- Department of Recreation and Parks
- Los Angeles Fire Department
- Department of City Planning, Office of Historic Resources
- State of California Department of Water Resources, Division of Safety of Dams
- Los Angeles Department of Transportation
- Office of the Mayor
- Council District 4
- Council District 13

Four (4) Design Workshops were conducted with the Client Team on August 22, 2019, September 20, 2019, October 10, 2019 and January 8, 2020 to solicit feedback on the direction of the design at critical stages.

DESIGN WORKSHOP ATTENDEES

- Department of Public Works, Bureau of Engineering
- Department of Water and Power
- Department of Recreation and Parks
- Los Angeles Department of Transportation
- Council District 4
- Council District 13

4.3 Stakeholder Working Group Meetings

The Silver Lake community has a long history of organizing around the reservoirs. Today, there are multiple community groups, including formalized non-profit organizations, with missions directly involving the Complex. Early in the Master Plan process, a Stakeholder Working Group (SWG) was formed comprised of members from five (5) active groups representing a diverse range of interests in the community:

- Silver Lake Forward (SLF)
- Silver Lake Neighborhood Council (SLNC)
- Silver Lake Now (SLN)
- Silver Lake Reservoirs Conservancy (SLRC)
- Silver Lake Wildlife Sanctuary (SLWS)

SILVER LAKE FORWARD

Silver Lake Forward is a non-profit organization guided by the principles of Access, Beauty and Conservation. The organization works to activate neighbors and the public agencies that steward the Reservoir to embrace a comprehensive vision. (https://www.silverlakeforward.com/)

SILVER LAKE NEIGHBORHOOD COUNCIL

The Silver Lake Neighborhood Council works to honor diversity, build community, forge bonds with neighboring communities, and promote participation in City governance and decision-making process. Overall, their mission is to improve the quality of life for all Silver Lake Stakeholders. (https://empowerla.org/slnc/)

SILVER LAKE NOW

Silver Lake Now supports a measured and thoughtful discussion on the future of the Silver Lake Reservoirs Complex and a moderate approach where both the wildlife and the community can co-exist in harmony. (https://silverlakenow.com/)

SILVER RESERVOIRS CONSERVANCY

Silver Lake Reservoirs Conservancy is an all-volunteer, non-profit corporation dedicated to preserving and enhancing the historical, aesthetic, ecological, and recreational benefits of Silver Lake's reservoirs and surrounding open space. (http://www.silverlakereservoirs.org/)

SILVER LAKE WILDLIFE SANCTUARY

The mission of the Silver Lake Wildlife Sanctuary is to preserve the open waters of the reservoirs and their surrounding acreage as a sanctuary, our mission is to create a protected habitat for migratory birds and urban wildlife, to be enjoyed by all. (https://www.silverlakewildlifesanctuary.org/)

To initiate the SWG, Hargreaves Jones, along with the BOE and Council Districts, met with each group one-on-one to understand their mission and goals. Each group was then asked to nominate two representatives and one alternate from their organization to participate in the SWG.

The SWG has become an important partner with the project team and a critical component of the engagement process, serving both as sounding board and communications conduit to the broader community. The group has contributed effectively towards balancing differing aspirations for the park, refining the park's design, finding compromises, and ultimately building consensus. The group has also been a tremendous force behind record participation in community workshops and questionnaires.

Throughout the development of the Master Plan, 90- to 180-minute meetings were held in advance of each Community Workshop to capture important feedback relating to the Master Plan design and Community Workshop goals and agenda. These discussions were used to inform the larger Community Workshop programs.

In total, eight (8) SWG meetings were held to elicit feedback about the design and community process at critical stages. Full presentations and minutes for these meetings are available on the City's Website.

SWG # 1, May 22, 2019
focused on introducing the Design Team and the Stakeholder Working Group to each other, reviewing the master plan schedule, Community Workshop 01 planning, and defining the SWG's purpose and goals.

SWG # 2, July 18, 2019
focused on discussing the outcome of Community Workshop 01, planning for Community Workshop 02, and an overview of the research and analysis process.

SWG # 3, September 26, 2019
focused on discussing the outcome of Community Workshop 02 (including questionnaire results), presenting three high level design options and planning for Community Workshop 03.

SWG # 4, October 17, 2019
focused on presenting an update of the design alternatives in preparation for Community Workshop 03.

SWG # 5, December 5, 2019
focused on discussing the outcome of Community Workshop 03 (including questionnaire results), presenting the development of the preferred alternative design, and planning for Community Workshop 04.

SWG # 6, January 8, 2020
focused on presenting an update of the development of the preferred alternative design in preparation for Community Workshop 04.

SWG # 7, March 5, 2020
focused on discussing the outcome of Community Workshop 04 (including questionnaire results), presenting the development of the Draft Master Plan report, and planning for Community Workshop 05.

SWG # 8, June 25, 2020
focused on discussing how to execute the final Community Workshop 05, including creating a video and having a final questionnaire.

In addition to the above meetings, the SWG was invited to attend Research and Analysis presentations by the design team on July 18, 2019 and August 1, 2019. The SWG also participated in on-going correspondence with the project team throughout the Master Plan community engagement process.

4.4 Community Workshops

Community Workshops are a recognized, successful way to solicit public input during Master Plan development. Rather than following standard presentation and open house formats, the Workshops included interactive sessions, facilitated conversations, and site walks. The goal of the Community Workshops was for participants to feel energized about the future of the SLRC and recognize that their input is valued and heard. Once a community member participated in one workshop, the hope was for them to remain engaged in the process with a reason to come back to subsequent Workshops.

The success of the Workshops stemmed from their level of attendance and participation. From the onset, The Robert Group developed an extensive email database to disseminate information about the project to the Community. This database included local community advocacy organizations, business, schools, civic groups, and residents. To the extent possible, special attention was given to ensure the database was culturally, ethnically, and intergenerationally diverse including families, youth, and seniors to capture a full spectrum of input for the Master Plan. Throughout the engagement process, the database was updated regularly by The Robert Group.

In addition to the project's database, the Stakeholder Working Group was also integral in distributing information to their constituents.

To advertise each Workshop, at a minimum, the following outreach methods were employed:

- E-mail – blasts to the project database (three weeks prior with weekly reminders)
- Printed Flyers – over 2,000 (English and Spanish) flyers distributed around the neighborhood by The Robert Group and the Stakeholder Working Group (printed flyers were omitted for Community Workshop 05 due to Covid-19)
- Banners – installed banners at the Silver Lake Dog Park and the corner of West Silver Lake Drive and Tesla Avenue to advertise each workshop
- Social Media – advertised on the BOE Instagram, Facebook and Twitter pages. Additionally, the Stakeholder Working Group actively advertised on their own social media accounts

The Project Team led four (4) in-person and one (1) virtual Community Workshop as outlined in Figure 4-2. These workshops were held on weekday evenings and weekend days to capture a full range of participants. Full questionnaire results for these meetings are available in the Appendix. Presentations and photography from each workshop ,including break-out discussion table maps, are available on the City's project website.

WORKSHOP PARTICIPANTS

As outlined in Figure 4-2, the Master Plan was developed within the framework of strong community participation – over 1,500 members of the community attended the Community Workshops and the Project Team received 8,478 responses to the questionnaires. A vast majority of participants reported that they are frequent visitors to the Complex and live nearby. They also represented a range of age groups.

On four of the five questionnaires, responders were asked to indicate their age group and provide the zip code where they live. Responses to these questions were similar across all four questionnaires. Respondents consistently reported living near the SLRC with 88% of respondents residing in a zip code within a 2-mile radius of the Complex and are frequent visitors, Figure 4-3. The majority of responders – 68% – were between the ages of 26 and 55 as shown in Figure 4-4.

On the questionnaires accompanying Community Workshops 02 and 05, participants were asked how often they visit the SLRC. As shown in Figure 4-5, 77% of responders visit the reservoirs at least once per week. In the final questionnaire, participants were asked how often they would visit the SLRC if the Master Plan is implemented. Respondents indicated they would increase their visits to the SLRC if the design is implemented with 86% anticipating they would visit at least once per week.

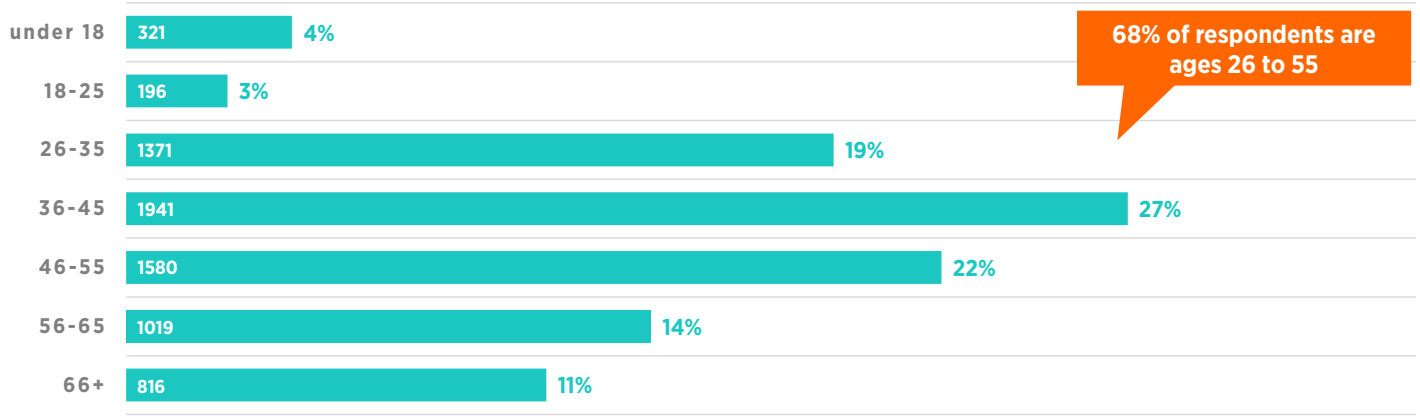

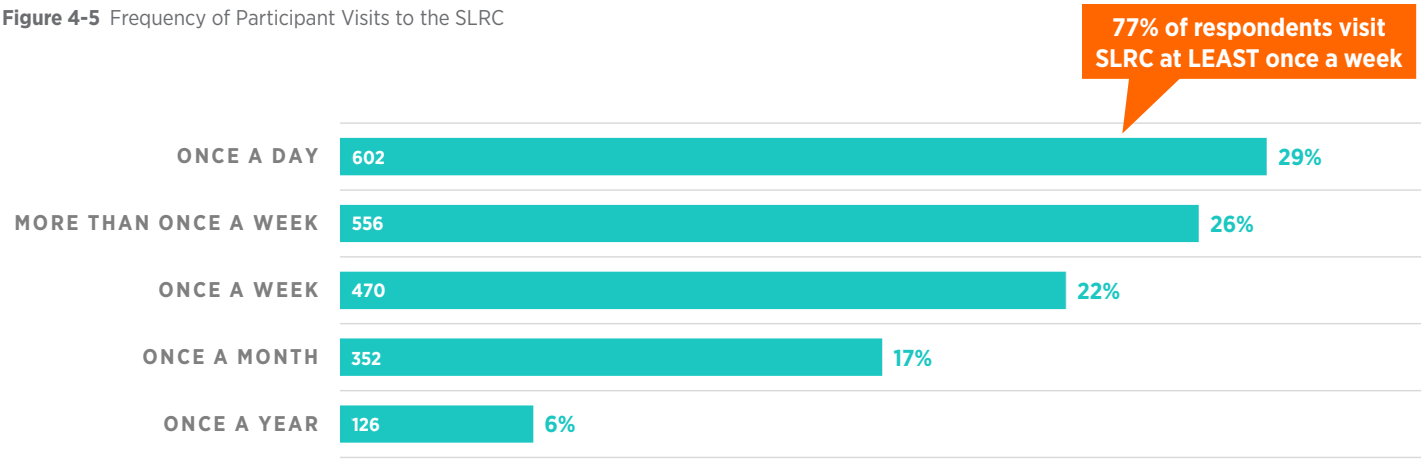

Figure 4-5 Frequency of Participant Visits to the SLRC

4.4.1 Community Workshop 01

Thursday, June 27, 2019
Friendship Auditorium from 6:00 – 8:00pm

Attended by over 230 members of the public, Community Workshop 01 focused on introducing the community to the Design Team, Stakeholder Working Group and presenting the overall project.

Figure 4-6 Community Workshop 01 Photos

WORKSHOP OVERVIEW

The BOE and the design team, led by Hargreaves Jones, introduced the project and shared research and analysis of the site. The design team also discussed their assessment of the challenges and opportunities presented by various aspects of the reservoir complex. The SWG was also introduced and each group was given the opportunity to present their organization's mission and goals for the Master Plan and discuss their work on related issues.

Following the team's presentation, 22 breakout discussions began with approximately 12 participants each, facilitated by members of the project team. Upon check-in, attendees were randomly assigned to tables to have the opportunity to hear from fellow community members whom they may not know. Most participants sat at their assigned tables, though not all. At the breakout table discussions, attendees were asked to provide input as to what they thought were the most significant challenges and opportunities at the SLRC and complete the questionnaire shown in Figure 4-7.

Each table had an enlarged project site plan and post-it notes in two different colors – one for challenges and one for opportunities. Attendees were asked to write down challenges and opportunities on the post-it notes and place these on their site plan. Tables were also asked to identify one primary character-defining feature of the SLRC they could all agree upon. These were written on post-it notes in the shape of a light bulb.

NOTE: The table maps are primarily used as tools to facilitate discussion during the breakout sessions at the workshops prior to responding to the questionnaires, and do not yield empirical information

Figure 4-7 Community Workshop 01 Questionnaire

SLRCMP

SILVER LAKE RESERVOIR COMPLEX **MASTER PLAN**

The challenges & opportunities of the **SLRCMP** were presented in the following five categories:

Now, it's your turn! *Please tell us what you think are the top challenges and opportunities within the site:*

top three **CHALLENGES?**

WE LOOK FORWARD TO SEEING YOU THROUGHOUT THIS PROCESS!

COMMUNITY WORKSHOP 01 FEEDBACK

Workshop Report Back
Each table was asked to identify a table leader who would report back to the entire room at the end of the Workshop, giving a brief, two-minute summary of the challenges and opportunities discussed at their table. Each table also placed their character-defining feature light bulb to a large plan at the front of the room. Attendees were also asked to share what their favorite parks or open spaces are.

During the report back, common themes ranged from balancing human access and wildlife protection to improving habitat and increasing green space as depicted in Figure 4-8. The character-defining features identified by attendees shown below included the vistas, openness, serenity, and the infamous "morning sparkle."

Figure 4-8 Character-Defining Features Identified During Community Workshop 01

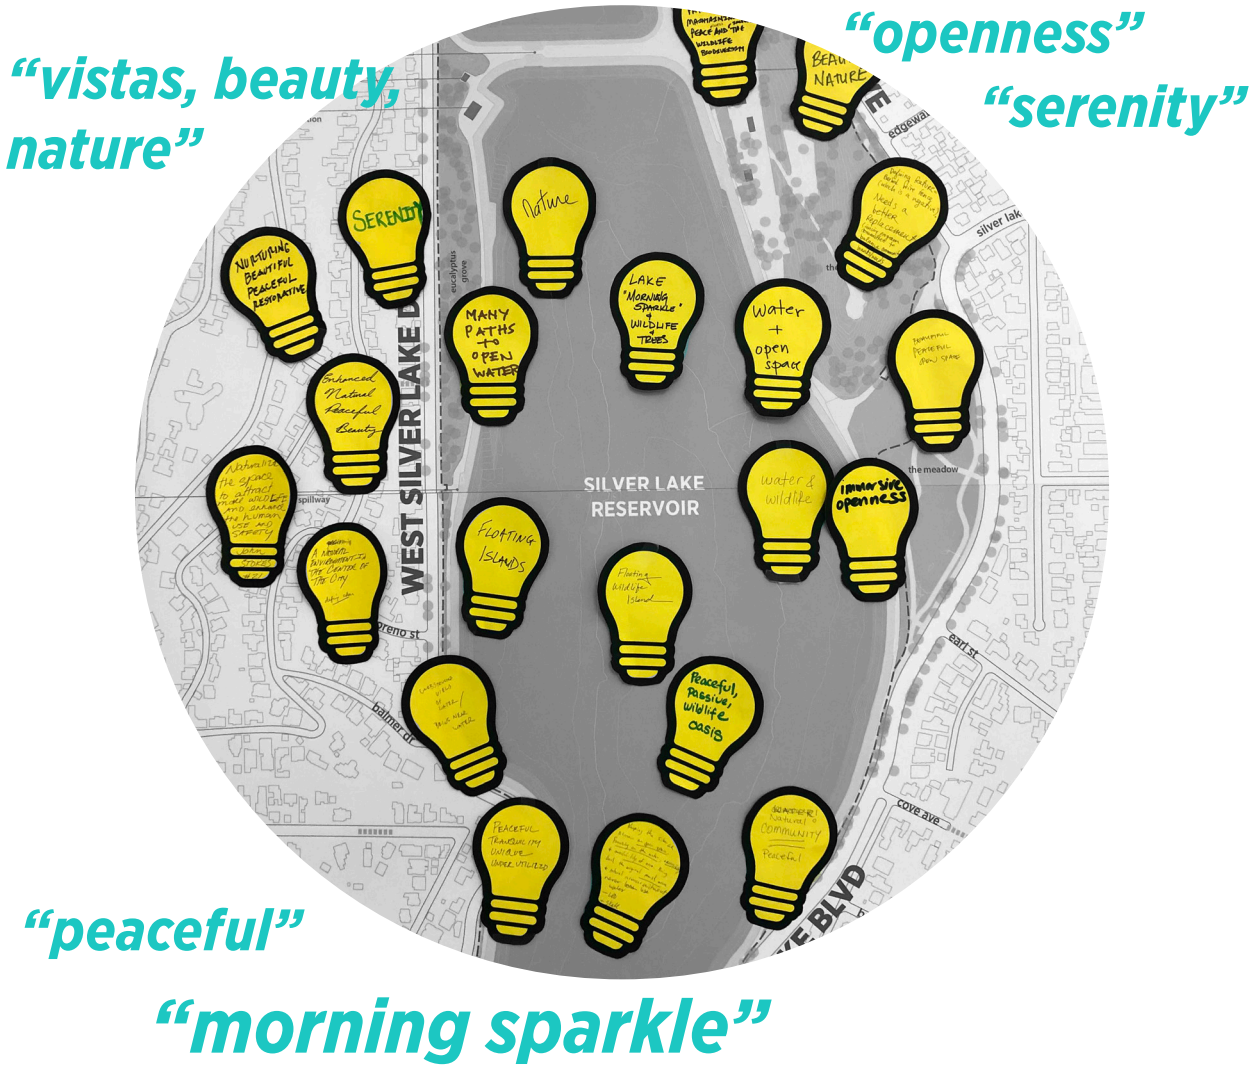

Figure 4-9 Top Challenges and Opportunities from Community Workshop 01

Questionnaire

A questionnaire was distributed to complete during the workshop and to help facilitate discussion during the breakout session (Figure 4-7). The project team received 172 questionnaire responses in total. The questionnaire asked attendees to identify what they thought were the top three challenges and top 3 opportunities for repurposing the SLRC into a public park. It also asked participants to identify their favorite open space worldwide. The questionnaire responses identified balancing human access and active uses, traffic, removing fences, maintenance, and funding as challenges. Opportunities included adding more green space, increasing outdoor activities and recreation, improving pedestrian and bike access, improving habitat for wildlife, and creating more beautiful, serene spaces. Favorite parks ranged from highly urban spaces such as the Highline in New York to more wilderness spaces like Debs Park in Los Angeles.

Synthesis

Input from the community during Workshop 01 and from the questionnaire was used to inform the visioning phase of the project and prepare for Community Workshop 02. Based on the broad range of opportunities and challenges identified by the community, the project team developed eight categories of activities and elements to more specifically access community preferences and aspirations for what they would like to see and do in their future park.

4.4.2 Community Workshop 02

Saturday, August 24, 2019
at the SLRC from 8:00 – 11:00am

Attended by over 600 members of the public, Community Workshop 02 focused on visioning – imagining what the SLRC could become and what people would want to do and see in the future – to assist the design team in developing conceptual design alternatives for the Master Plan.

OVERVIEW

The SLRC is mostly closed to public access with limited moments available to experience the scale and power of the water bodies up close. To help the community understand the project site and catalyze creative thinking and bold ideas about what the park could be, the BOE and design team, in collaboration with LADWP, opened the complex to the community for this second Community Workshop.

The project team created a walking map of the Complex, which also doubled as an Activities & Uses Questionnaire as shown in Figure 4-11. Five different information stations were set up around the SLRC, along the water and at the Knoll, to provide information on the topic areas related to the questionnaire and were staffed by project team facilitators. The goal of the workshop and questionnaire was to empirically solicit and document community priorities regarding park vision and future uses, leading to a better understanding of the desired character of a park that would best serve the community.

Attendees included people who specifically came to participate in the event, as well as others who were walking or jogging around the Complex and joined the workshop spontaneously.

Figure 4-10 Community Workshop 02 Photos

ADDITIONAL QUESTIONS
Please answer the following:

02: What is your favorite park in Los Angeles? Or anywhere? And why?

03: What one word best describes what the Silver Lake Reservoir Complex (SLRC) should be or feel like?

04: How often do you visit the SLRC?
- O Once a day
- O Once a week
- O More than once a week
- O Once a month
- O Once a year
- O Other: _____

05: How do you typically get to the SLRC?
- O Personal vehicle
- O Public Transit
- O Bike
- O Skateboard
- O Other: _____
- O Walk
- O Run

06: How would you like to get to SLRC in the future?

07: Who do you bring with you to the SLRC?
- O Children
- O Parents
- O Friends
- O Other: _____
- O Teams
- O Dogs

Zip-code where you live:

Your age (choose one): O Under 18 O 19-25 O 26-35 O 36-45 O 46-55 O 56-65 O 66+

Figure 4-11 Community Workshop 02 Questionnaire

VISIONING QUESTIONS AND TOPICS

The questionnaire shown in Figure 4-11 asked participants to pick the top three *Activities & Uses* they would like to see in the future across the following eight categories:

Nature and Beauty: included passive activities that are associated directly with natural areas such as birdwatching, enjoying nature, gardening, habitat enhancement/expansion, sunset viewing, treatment wetlands, water conserving native gardens, and water features.

Education: included birdwatching and environmental classes, guided educational tours, outdoor environmental center, outdoor art classes, and youth and school programs.

Support and Mobility: are all features that contribute to the safety, security, access and maintenance of the park. This included bike parking, metro bike share, park information / interpretive signs, park rangers, park rentals, restrooms, security, vehicle parking, vehicle drop-off/ pick up.

Water Activities: included casting ponds, catch/release fishing, human-powered boating, model sailboat racing, rowing, stand up paddle boarding, swimming, viewing areas, decks and overlooks.

Socializing, Gathering, and Eating: included family gatherings, food kiosks / café, food trucks, grilling, local farmers market, outdoor birthdays and weddings, picnics, senior's classes, and volunteer programs.

Arts and Culture: included cultural events such as dancing, music concerts and more informal music like DJs, outdoor movies, or outdoor performances, and art installations such as feature lighting, a sculpture garden, or temporary art, as well as craft and art markets.

Health and Wellness: included active and passive activities that contribute to overall wellness. Active activities include cycling, exercise circuits, roller blading and skating, running and jogging, walking, and workout classes. Passive activities included cloud watching, relaxing, finding peace, sitting, sunning, tai chi / yoga.

Sports, Games and Play: included active and passive recreational activities. Active activities included basketball, dog play (expanded), flexible sports fields, multi-use courts, nature playground, splash pad, skateboarding, and volleyball. More passive activities included bocce and horseshoes, chess and checkers and kit flying.

The questionnaire asked some additional open questions as well:

What is your Favorite Park in Los Angeles?

What one word best describes what the Silver Lake Reservoir Complex (SLRC) should be or feel like?

How often do you visit the SLRC?

How do you typically get to the SLRC?

How would you like to get to the SLRC in the future?

COMMUNITY WORKSHOP 02 FEEDBACK

Questionnaire
Participants were given the opportunity to complete and turn in their questionnaires at the SLRC or complete it online. The questionnaire was open for three weeks and closed on September 14, 2019. The questionnaire was completed by 1,432 participants; 89% of respondents indicated they live in a zip code within a 2-mile radius of the SLRC and 66% reported visiting the SLRC at least once a week, representing significant participation by the Silver Lake Community.

Participants were asked to select their top three activities across each of the eight categories which is summarized in Figure 4-12 below.

In general, a preference towards more passive Activities & Uses was favored with a focus on **Nature and Beauty** [Enjoying Nature (64.5%), Habitat Enhancement / Expansion (40.0%), and Water Conserving Gardens (37.4%)], **Health and Wellness** [Walking (59.5%), Running and Jogging (43.7%), Relaxing and Finding Peace (41.6%)], and **Education** [Environmental Classes (47.3%), Outdoor Environmental Center (40.4%), and Youth / School Programs(40.1%)].

Water Activities were also amongst the high-ranking activities [Viewing Area / Deck / Overlook (49.7%) Human-Powered boating (40.0%) and Swimming (38.3%)]. Being able to get on the water, get in the water, and viewing the water were desirable to most respondents. **Socializing, Gathering, and Eating** showed strong support for Picnics (49.0%) as well as favorable support for Local Farmer's Markets (36.3%) and Family Gatherings (33.4%). **Support and Mobility** uses such as Restrooms (53.6%) received a strong preference, and Bicycle Parking (37.4%) and Park Rentals (34.8%) had moderate support.

Categories that ranked the lowest overall were **Arts and Culture** [Outdoor Movies (35.9%), Temporary Art Installations (30.9%), and Permanent Art / Sculpture Garden (28.8%)] and **Sports, Games and Play** [Nature Playground (35.6%), None of the Above (24.4%), and Splash Pad (23.7%)].

The complete results of the questionnaire are shown in descending order of preference in Figure 4-13. The top three preferences from each category have been color coded to assist in understanding how these related into the overall results. For instance, while some activities were the top three in their category, they were less popular overall against all other activities.

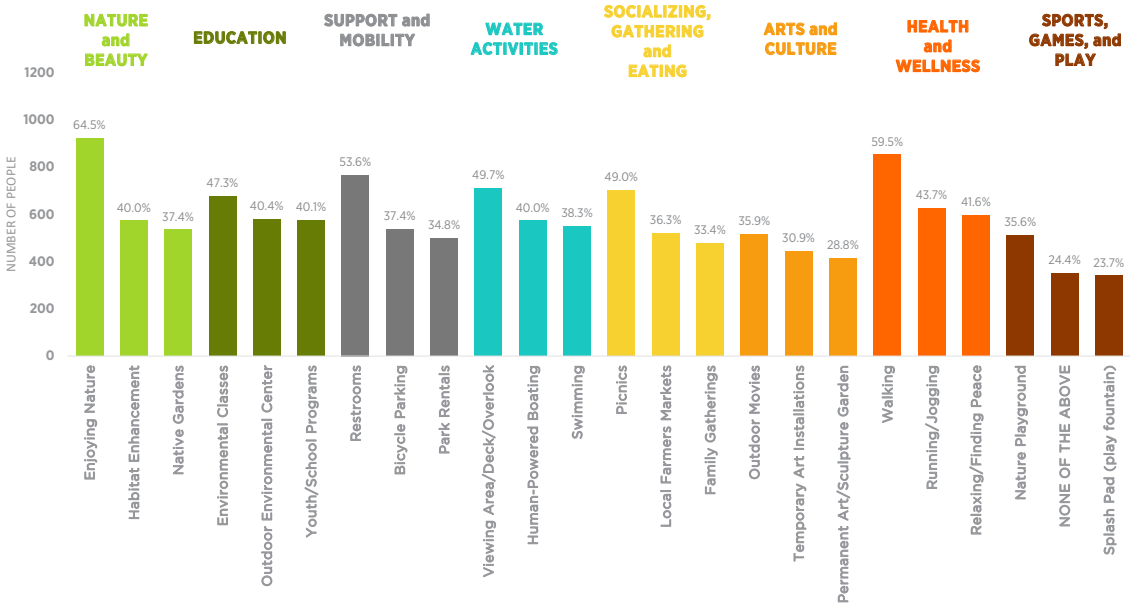

Figure 4-12 Community Workshop 02 Questionnaire Top three Activities & Uses

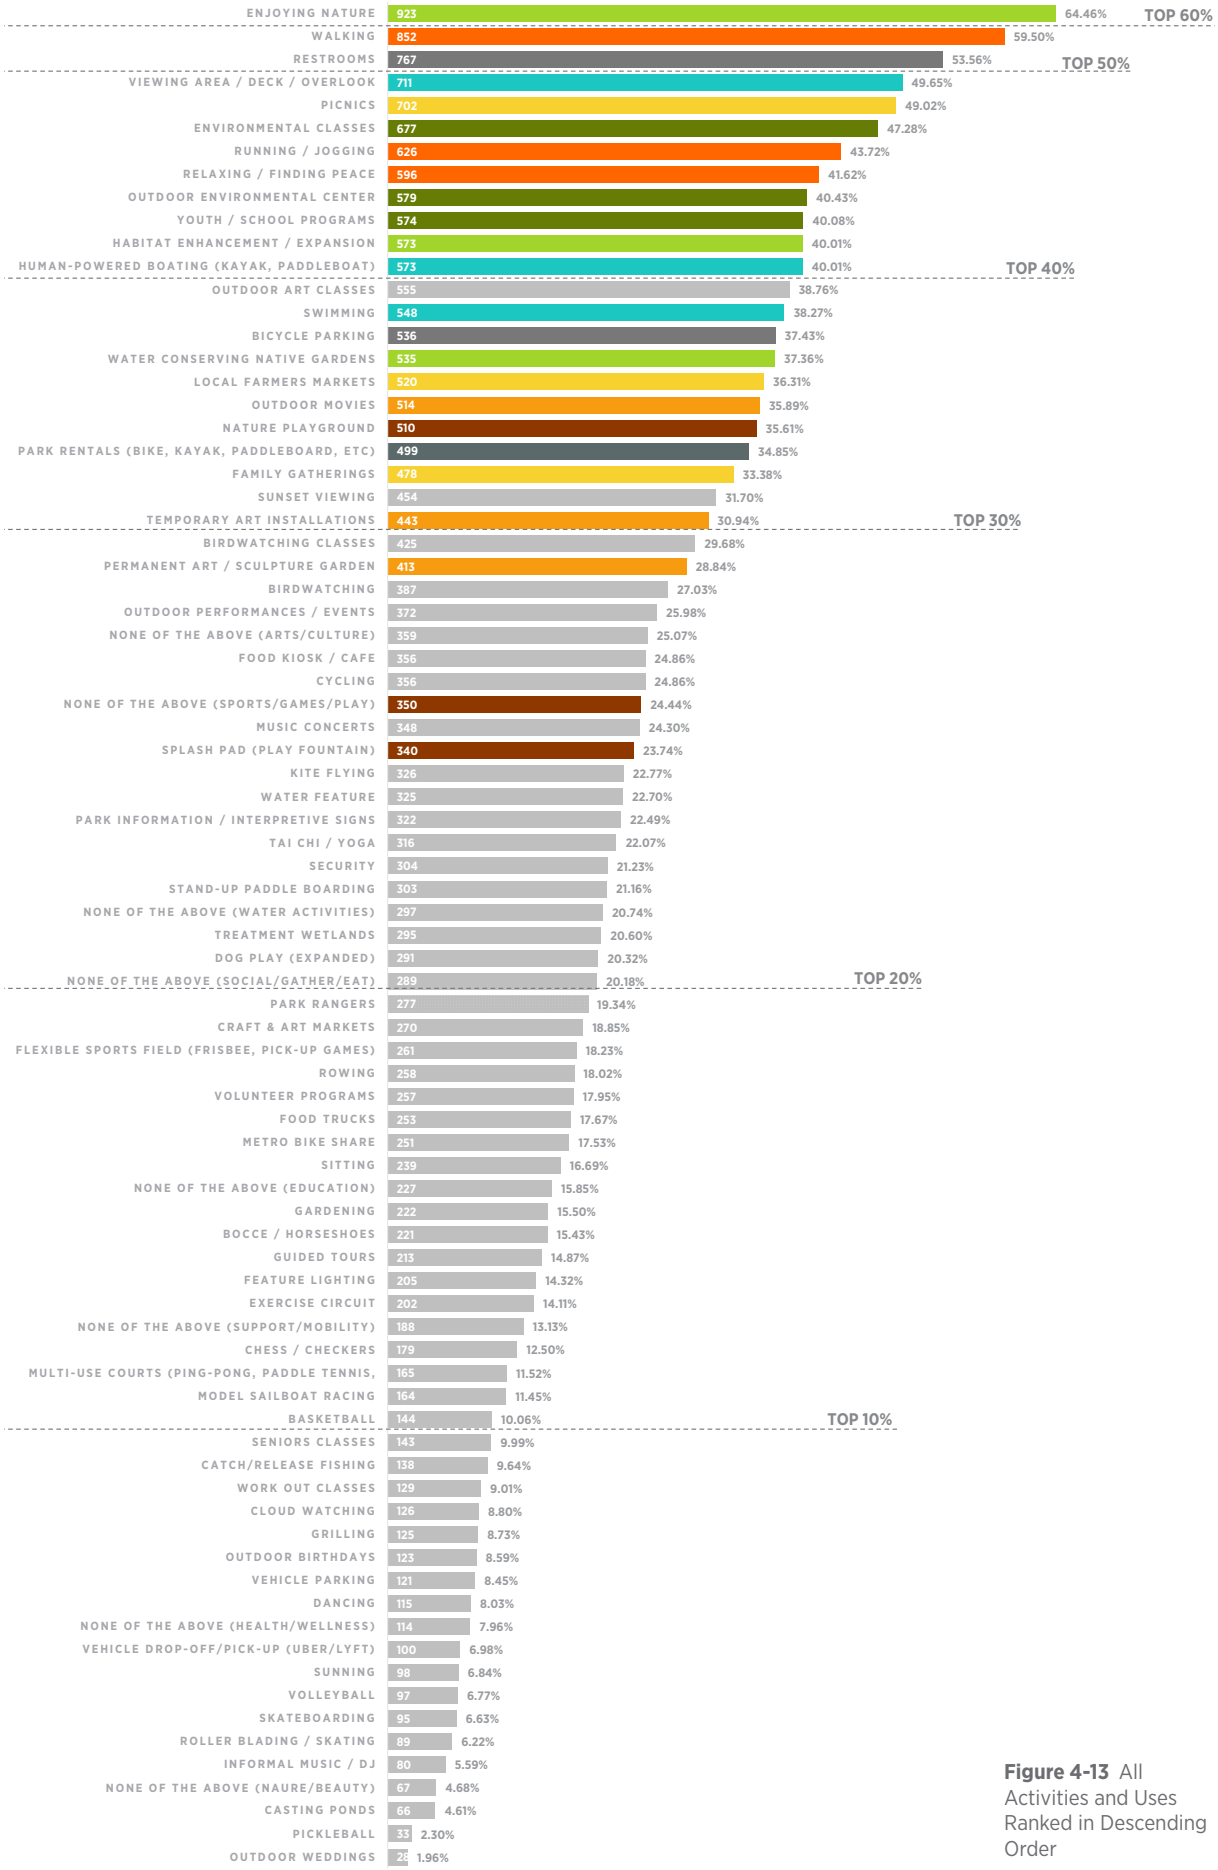

Figure 4-13 All Activities and Uses Ranked in Descending Order

Figure 4-14 Community Workshop 02 Questionnaire Results for Question 2

"What is your favorite park?" *The size of the word in this word cloud represents how many times a park was repeated. This data helps provide a frame of reference to understanding the results of the Activities & Uses questions. Key takeaways included a preference towards more natural, large open spaces (Griffith Park) but also for that of a more active park with human-powered boating (Echo Park). It's also clear that the Silver Lake Reservoir and Meadow are already beloved by the community.*

Figure 4-15 Community Workshop 02 Questionnaire Results for Question 3

"What word or phrase best describes what the Silver Lake Reservoir Complex should be or feel like?" *This word cloud represents the vision the community has for the reservoir complex. As shown, Peaceful, Natural and Nature were among the most frequently used words. Community and Neighborhood were also used frequently. Overall, these show a preference towards creating a balanced, inclusive open space for people and nature.*

SYNTHESIS

The responses to the questionnaire indicated a range of preferences, such as: enjoying nature; habitat enhancement and expansion; overlooks; picnicking; running and jogging; education, including an outdoor education center and youth programs; and accessing the water, including swimming and human-powered boating. These uses and activities were all preferred by 30% or more respondents and were preferred by 40% or more.

The design team used these preferences as a guide for developing three conceptual alternatives that created spaces which tested the physical manifestation of the community's aspirations. Some activities and uses, such as swimming require dedicated facilities, while others only need flexible open spaces. Each alternate was developed to be as inclusive of the community's wishes as possible.

The questionnaire responses were also used to develop six Key Themes, or goals, for the Master Plan design – Enjoying Nature, Wellness, Education, Community, Family Friendly, and Water Access – against which each conceptual alternative was evaluated as it was developed.

During the development of the three alternatives, the design team met with the SWG two times to review the design options and garner feedback.

POP-UP EVENT 01

A week after Community Workshop 02, on August 31, 2019, The Robert Group hosted a pop-up event at the Silver Lake Farmers Market. The purpose of the pop-up was to reach out to additional community members who might not be aware of the project. Maps and boards from the Community Workshop 02 were used to facilitate an open discussion with the public and questionnaires were provided for individuals to complete in-person and/or submit online.

4.4.3 Community Workshop 03

Saturday, November 2, 2019
Marshall High School from 1:00 – 3:30pm

Attended by over 450 members of the public, Community Workshop 03 focused on presenting three Master Plan Alternatives, based on and building upon prior input, for community review and feedback. The design alternates were titled: Island Overlooks, Active Edges, and Blended Spaces.

OVERVIEW:

A formal presentation led by Hargreaves Jones introduced each Alternative and described its unique spaces, design strategies, and the activities and uses it fostered. The presentation was followed by break-out sessions and report backs. Participants included students from King Middle School who were engaging in an environmental education curriculum related to the SLRC Master Plan. They brought drawings showing their own visions for the Complex which were displayed in the room.

Attendees were randomly assigned to tables for the presentation and breakout discussions, which were facilitated by a member of the project team. Attendees were encouraged to sit at their assigned tables to have the opportunity to hear from fellow community members whom they may not know. Fewer people sat at their assigned tables for this meeting, mostly due to the large attendance and tight room configuration which made it difficult to navigate to specific tables. Additionally, due to the high turnout, some attendees had to stand.

At the breakout table discussions, attendees were asked to identify what they perceived as the pros and cons of each design alternative and complete the questionnaire shown in Figure 4-17 . Each table had enlarged site plans of the three design alternatives, red and green post-it notes, and red and green sticky dots. “Green” was used to indicate a “pro” and “red” was used to indicate a “con.” Attendees were encouraged to write down “pros” and “cons” on the post-it notes and place them on their table maps. Attendees were also given five red and five green dots each and encouraged to use these on the maps to indicate a pro or con. Each table was asked to identify a table leader who would report back a brief, two-minute summary of their table’s discussion at the end of the Workshop.

NOTE: The table maps are primarily used as tools to facilitate discussion during the breakout sessions and do not yield empirical information. For instance, it was noted by table facilitators that some participants took more than five green or red dots, and that they sat at more than one table.

Figure 4-16 Community Workshop 03 Photos

SILVER LAKE RESERVOIR COMPLEX **MASTER PLAN**

COMMUNITY WORKSHOP #3 QUESTIONNAIRE

At this stage in the Master Plan development, we have presented three conceptual alternatives. We would like your feedback in order to synthesize these into a single, preferred design. Below is a list of features and elements unique to each alternative. **Please indicate whether you think these are *PROS* or *CONS* of each alternative.**

ALTERNATIVE 1:
Island Overlooks

PRO CON

- **Preserves** existing **embankment** alignment
- **Maximizes** protected **wetland habitat** *(habitat islands)*
- Habitat Islands **break the open water view** of the reservoirs, providing visual interest
- Provides a **single place to access the water** *(at wetland observation platform)*
- Locates an **education center** and **observation platform on west side** of site
- Provides the **least amount of active uses** and spaces
- **Does not** offer **human-powered boating**
- **Does not** offer **swimming**
- Other: _____

ALTERNATIVE 2:
Active Edges

PRO CON

- **Terraces** step down to the water and **provide generous seating and activity** options
- Habitat and people terraces hug the edges to **maximize open water views**
- **Habitat** and **people** spaces are predominantly **separated** *(east vs west side of reservoirs)*
- Provides **most active uses** and space
- Creates a **"Living Laboratory"** at Ivanhoe
- **Facilities** are located within the stepped terraces, **minimizing impact on views**
- **Offers** facilities and floating dock for **human-powered boating** recreation
- **Offers** pool facilities and **swimming pool** embedded within the terraces
- Other: _____

ALTERNATIVE 3:
Blended Spaces

PRO CON

- Open **lawn** gently **slopes to water**
- **Integrates** some **habitat areas** within seating terraces and walkways
- **Maximizes total wildlife** space by combining Habitat islands and habitat terraces
- Provides **most open lawn** with shade trees
- Locates **nature play on west side** of site *(in Eucalyptus Grove)*
- **Integrates** an **education center** at the **base of the Knoll**
- **Offers guided kayak or canoe tours** of wetland habitat led by an ecologist
- **Offers** pool facilities and floating **swimming pool**
- Other: _____

THE SOUTH VALLEY

Help us prioritize improvements in the existing Recreation and Parks area at the South.

Please rank, in order of preference (from 1 - 4) the improvments you would like to see.

_____ Expanding RAP Facilities to include a **new multi-purpose building and indoor play field**

_____ Expanding & Renovating the **dog park**

_____ **Move picnic tables** to west grassy slope

_____ **Reconfigure play field**

The following **KEY THEMES** were expressed by the community during the visioning process:

Enjoying Nature
The park should be a place to sit by the water, walk through a woodland or wetland, and observe wildlife.

Community
The park should be a place where the neighborhood comes together for shared experiences.

Education
The park should have an education center offering a range of classes and outdoor-based programs.

Wellness
The park should be a place to walk, run / jog, but also offer spaces to sit, relax, and find peace.

Family Friendly
The park should create spaces for children to play and learn about their environment.

Water Access
The park should offer opportunities to be at and on the water.

To what extent do you agree each of the conceptual alternatives reflect these ideas or themes?

ALTERNATIVE 1:
Island Overlooks

	Enjoying Nature	Wellness	Community	Education	Family Friendly	Water Access
Agree	○	○	○	○	○	○
Neutral	○	○	○	○	○	○
Disagree	○	○	○	○	○	○

ALTERNATIVE 2:
Active Edges

	Enjoying Nature	Wellness	Community	Education	Family Friendly	Water Access
Agree	○	○	○	○	○	○
Neutral	○	○	○	○	○	○
Disagree	○	○	○	○	○	○

ALTERNATIVE 3:
Blended Spaces

	Enjoying Nature	Wellness	Community	Education	Family Friendly	Water Access
Agree	○	○	○	○	○	○
Neutral	○	○	○	○	○	○
Disagree	○	○	○	○	○	○

We want to hear more! *Please let us know if you have any other comments:*

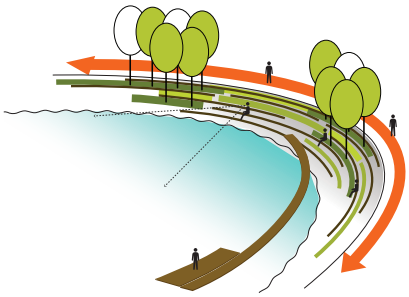
#SLRCMP **#SilverLakeReservoirs**

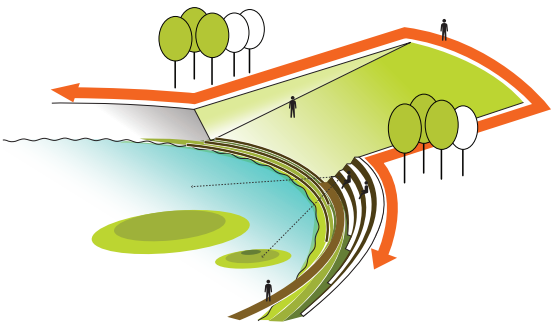
THANK YOU FOR PARTICIPATING IN COMMUNITY WORKSHOP #3, WE LOOK FORWARD TO SEEING YOU THROUGHOUT THIS PROCESS!

Figure 4-17 Community Workshop 03 Questionnaire



DESIGN ALTERNATIVES

Three Master Plan Alternatives were developed in order to illustrate and discuss various approaches to program distribution and design character. The purpose of the alternatives was to test ideas and elements the community showed support for in the previous meetings and questionnaires. For instance, the team consistently saw a strong preference for education based on the feedback from Community Workshop 02, so the three alternatives included educational facilities of differing sizes at various locations around the site. Similarly, the alternatives explored design options for playgrounds, picnic areas, a café, and swimming and human-powered boating, which were all elements and activities supported in the Activities & Uses questionnaires and comments.



ALTERNATE 1: ISLAND OVERLOOKS

- MAINTAINS existing EMBANKMENT
- LESS ACTIVE spaces
- MAXIMIZES protected WETLAND habitat
- LEAST OPEN WATER

ALTERNATE 2: ACTIVE EDGES

- ENGAGES EDGES
- MOST ACTIVE spaces
- LEAST new HABITAT
- MOST OPEN WATER

ALTERNATE 3 BLENDED SPACES

- BALANCES spaces
- MOST ecologically IMMERSIVE
- MOST new HABITAT
- MEDIUM OPEN WATER

ALTERNATIVE 1: Island Overlooks

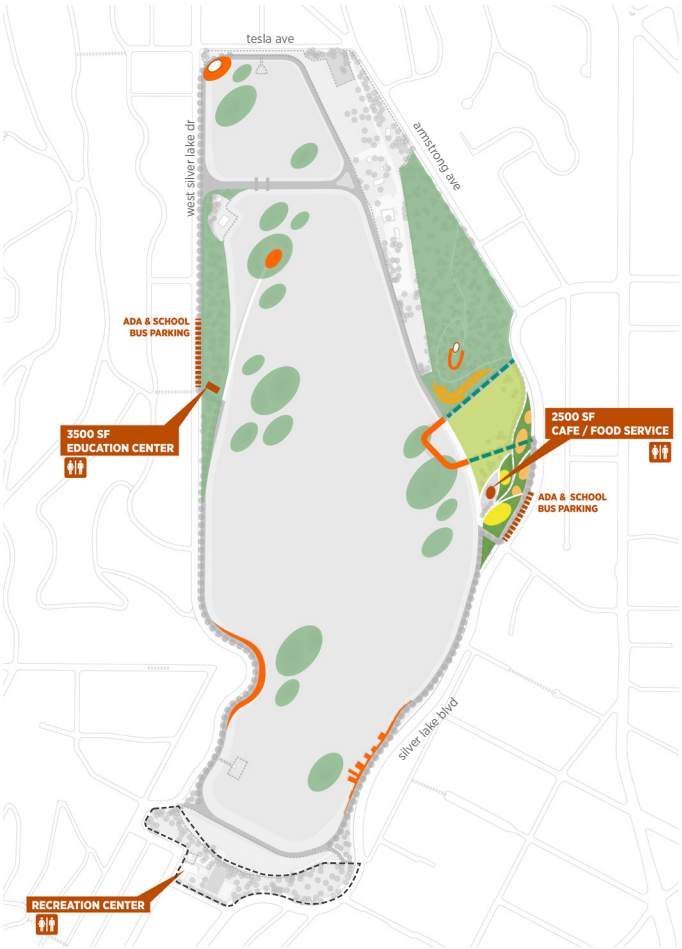
Islands and Overlooks is the most passive alternative with the least amount of active spaces throughout. The design focuses on upland and wetland habitat and provides minimal interaction between people and nature. The existing embankment is preserved in its entirety as a hard edge and floating islands are introduced to create wetland habitat. With the insertion of floating islands within the reservoirs, open water views become altered and varied.

The floating islands are strategically placed throughout the reservoirs to maximize protected wetland habitat and create opportunities for people to observe wildlife. Small overlooks are located along the Promenade within the East and West Narrows. At the Meadow, a large overlook swings out over the water and above the floating islands. The only place where visitors can engage with the wetlands and water is located at the 3,500sf Education Center within the rehabilitated Eucalyptus Grove. Here, a bridge leads to an observational platform within one of the floating habitat islands – creating a highly immersive experience.

Park programming is concentrated in the Meadow and includes a large open lawn, picnic grove and gardens, a small nature playground, and a 2,500sf café at the water's edge. Small trails leading up to the top of the Knoll extend from the edge of the meadow through a restored woodland habitat. At the top, the trail swings out as an overlook to amplify views out and over the water.

To provide additional outdoor learning experiences, two small shade pavilions are located at the Ivanhoe Overlook and at the Knoll.

Figures 4-18 through 4-21 show the proposed plan and breakdown of spaces, circulation, and habitat for the Islands and Overlooks design alternative.



Rendering from the Promenade on the east side of the Complex looking north. Floating islands create wetland habitat for waterfowl. An overlook amplifies water views and wildlife observation. The Knoll is seen in the background with seating terraces at its base.

Figure 4-18 Alternative 1: Islands & Overlooks - Site Plan

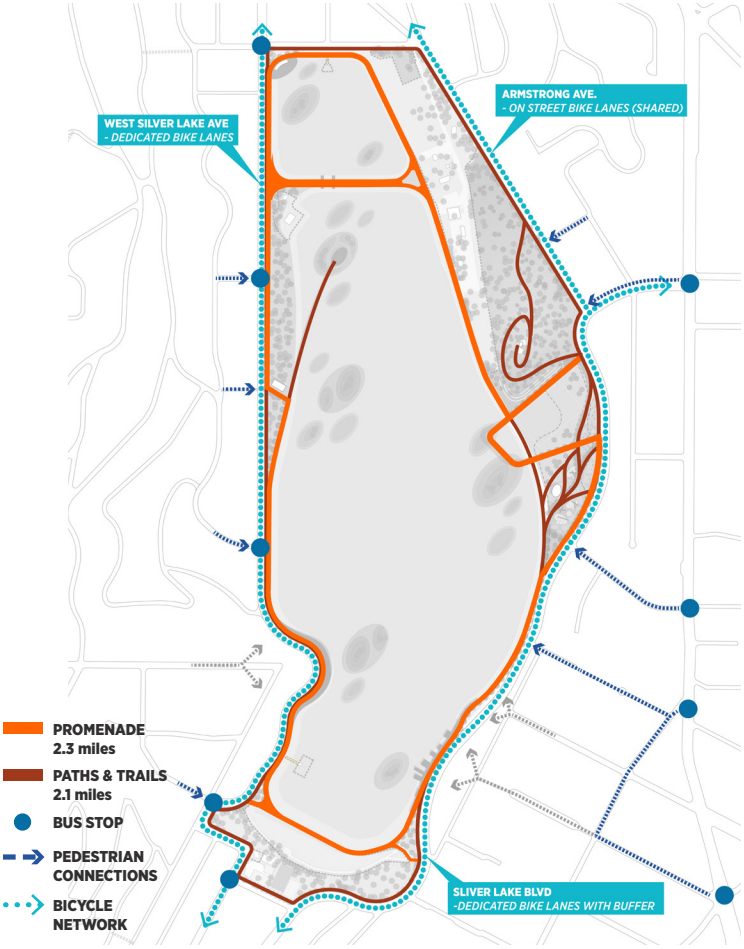
Figure 4-19 Alternative 1: Islands & Overlooks - Spaces Diagram

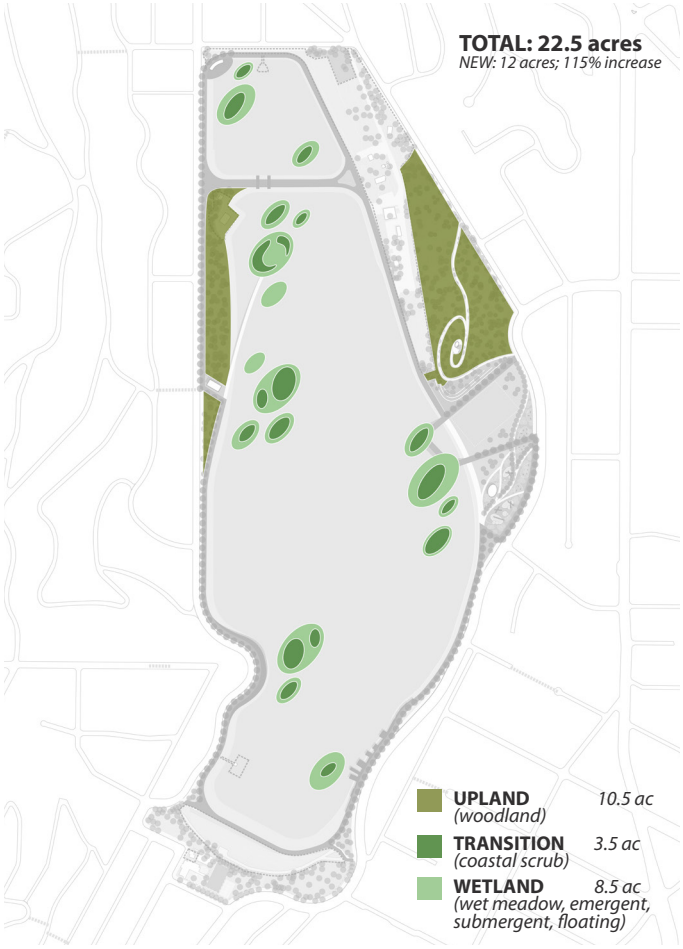
Total Space: **28.5 ac**
Total Recreation: **6 ac**
Increase *(from current meadow)* **3.0 ac; 75%**

- FACILITIES = 9,000 sf
- OVERLOOKS = 35,000 sf
- SEATING TERRACES = 16,000 sf
- GREAT/FLEX LAWN = 3 ac
- PICNIC GROVE = 13,000 sf
- PLAYGROUND = 14,500 sf
- ORNAMENTAL GARDENS = 1 ac
- PROMENADE/FARMER'S MARKET = 21,000 sf
- HABITAT = 22.5 ac
- SWIMMING POOL = 0 sf
- FLOATING DOCK = 0 sf
- SCULPTURE GARDEN = 0 sf
- DOG PLAY = 0 sf

(below) Rendering from the top of the Knoll in Alternative 1: Islands & Overlooks

Figure 4-20 Alternative 1: Islands & Overlooks - Circulation Diagram





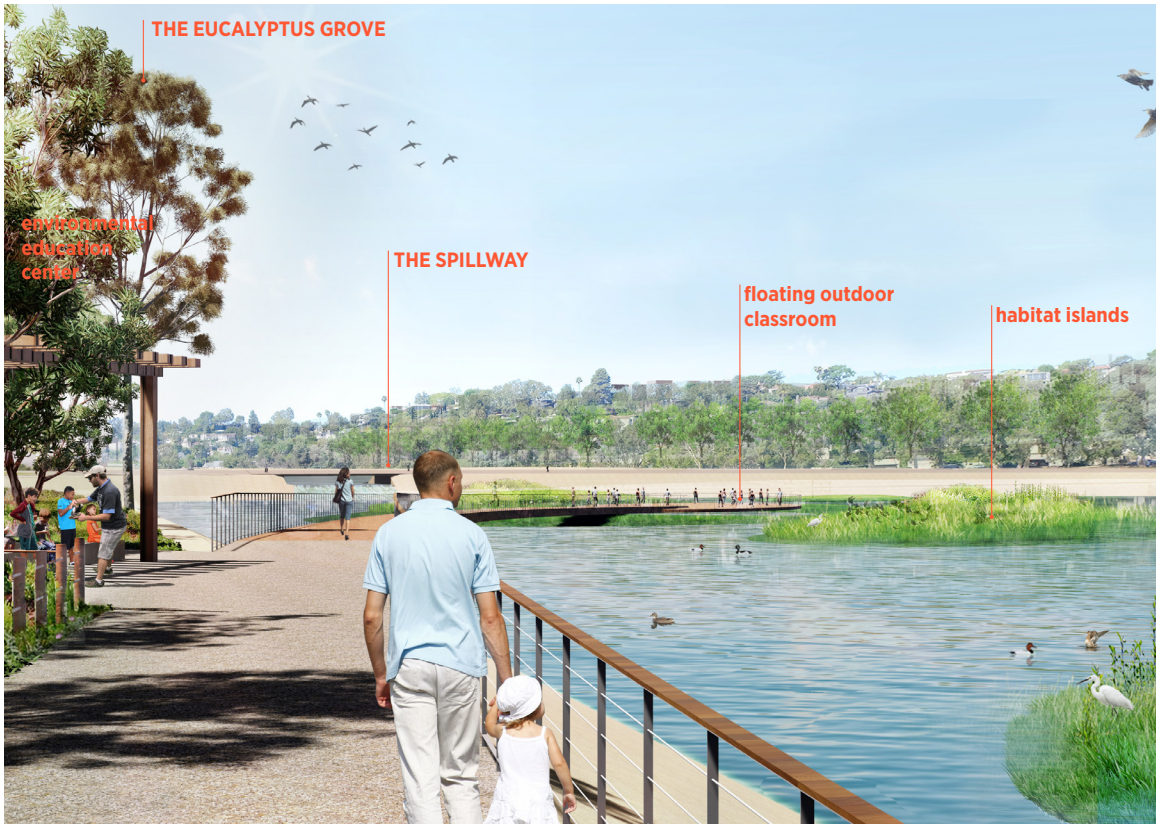


Figure 4-21 Alternative 1: Islands & Overlooks - Habitat Diagram

(right) View from the Promenade looking out past the environmental education center to the floating islands and outdoor classroom in the distance in Alternative 1: Islands & Overlooks

ALTERNATIVE 2: Active Edges

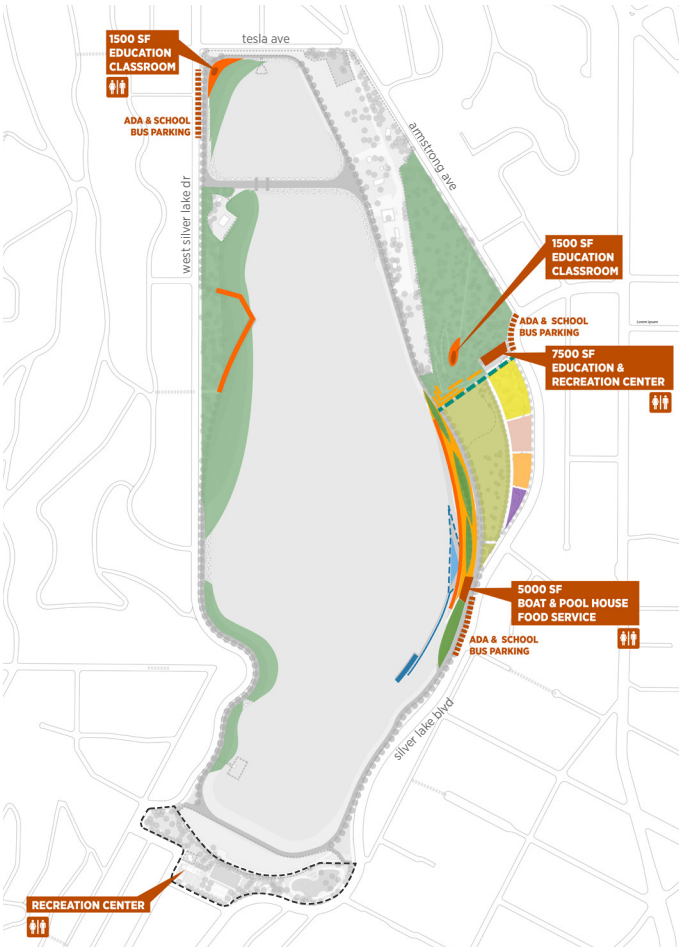
Active Edges is the most actively programmed Alternative and focuses on engaging the edges of the Complex with spaces for people and wildlife. The west edge expands to enhance habitat areas, while the east edge maximizes places for people. This alternative creates the least amount of new habitat and since it does not include any floating wetland islands open water views are maximized.

On the west side of the Silver Lake and Ivanhoe Reservoirs, habitat terraces extend out beyond the existing reservoir edge and provide a gradient of upland, transition, and wetland habitat. At the Eucalyptus Grove, a large overlook extends out over the terraces, offering one point of human/nature interaction. At the Ivanhoe Reservoir, a Living Laboratory is proposed which could be used for research and to test establishing new wetland habitat at the Complex. The Living Laboratory could include education programs as well.

On the east side of the complex next to the existing Meadow, the embankment edge becomes a tapestry of viewing platforms, terraced seating, green edges, and sloped walkways. These ornamental garden and seating terraces step down to the water to an outdoor pool. A 5,000sf boathouse, pool house, and café are integrated into the terraces below the top of the embankment to preserve views from Silver Lake Boulevard into the site. A floating dock provides direct access to the water for human-powered boating, such as kayaking, for recreational purposes. The Meadow includes several actively programmed spaces including a large open lawn, a 40,000sf nature playground, dog play, picnic grove, and a dedicated outdoor sculpture garden.

Conditioned educational classroom structures are located throughout the Complex. These include a large 7,500sf education and recreation center annex located at the base of the Knoll, a 1,500sf indoor/outdoor classroom located at the top of the Knoll and a 1,500sf indoor/outdoor classroom located at the Ivanhoe Reservoir for testing and monitor purposes related to the Living Laboratory.

Figures 4-22 through 4-25 show the proposed plan and breakdown of spaces, circulation, and habitat for the Active Edges design alternative.



Rendering from the Promenade on the east side of the Complex looking north. Seating and garden terraces step down a pool and generous boardwalk along the water's edge. Alternative 2: Active Edges

Figure 4-22 Alternative 2: Active Edges - Site Plan

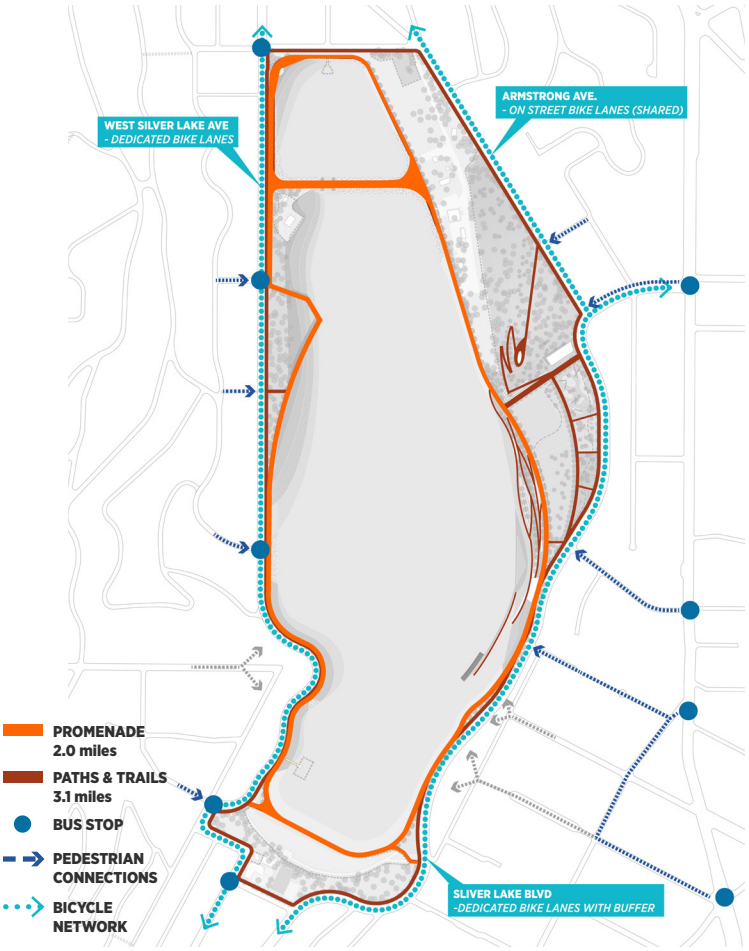
Figure 4-23 Alternative 2: Active Edges - Spaces Diagram

Total Space: **28.0 ac**
Total Recreation: **10 ac**
Increase *(from current meadow)* **6 ac; 185%**

- **FACILITIES = 15,500 sf**
- **OVERLOOKS = 1 ac**
- **SEATING TERRACES = 1.3 ac**
- **GREAT/FLEX LAWN = 3.6 ac**
- **PICNIC GROVE = 15,000 sf**
- **PLAYGROUND = 41,000 sf**
- **ORNAMENTAL GARDENS = 1 ac**
- **PROMENADE/FARMER'S MARKET = 12,000 sf**
- **HABITAT = 18.5 ac**
- **SWIMMING POOL = 6,000 sf water / 16,000 sf total**
- **FLOATING DOCK = 8,000 sf**
- **SCULPTURE GARDEN = 8,500 sf**
- **DOG PLAY = 19,000 sf**

(below) View from the west edge of the Meadow within seating terraces and walkways looking out to the pool and pool facilities in Alternative 2: Active Edges

Figure 4-24 Alternative 2: Active Edges - Circulation Diagram



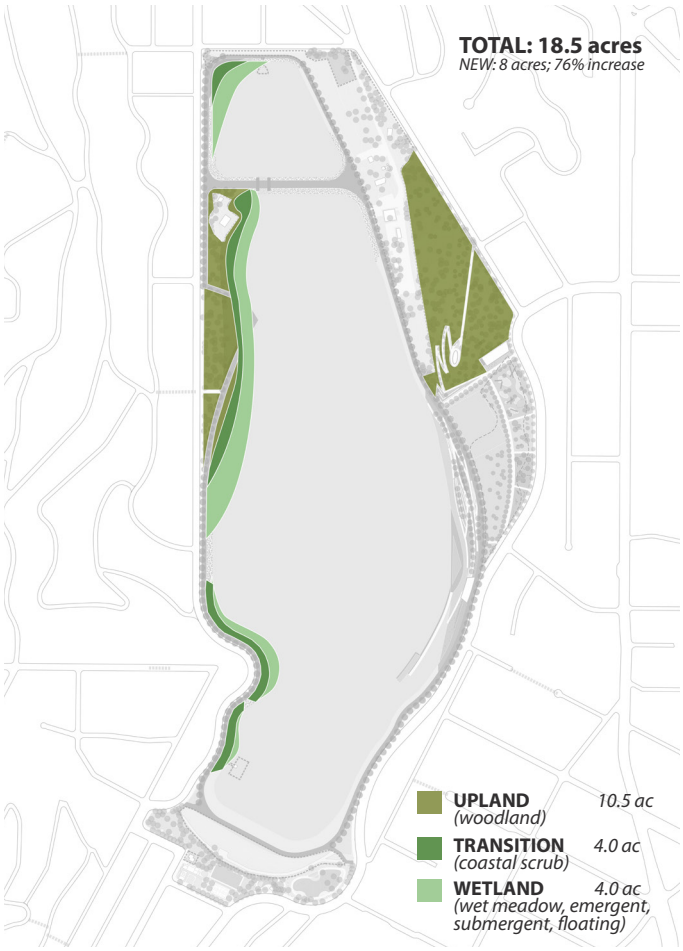


Figure 4-25 Alternative 2: Active Edges - Habitat Diagram

(right) View from Ivanhoe Overlook which is used as a Living Laboratory with educational programming in Alternative 2: Active Edges

ALTERNATIVE 3: Blended Spaces

Blended spaces achieves the most immersive experience between nature and people. The design balances active and passive programming throughout the Complex and is the most ecologically diverse, providing both wetland trays at the embankment edges and floating islands along the shores. Overall, this Alternative provides the most acreage of new habitat and with a modest impact on open water views.

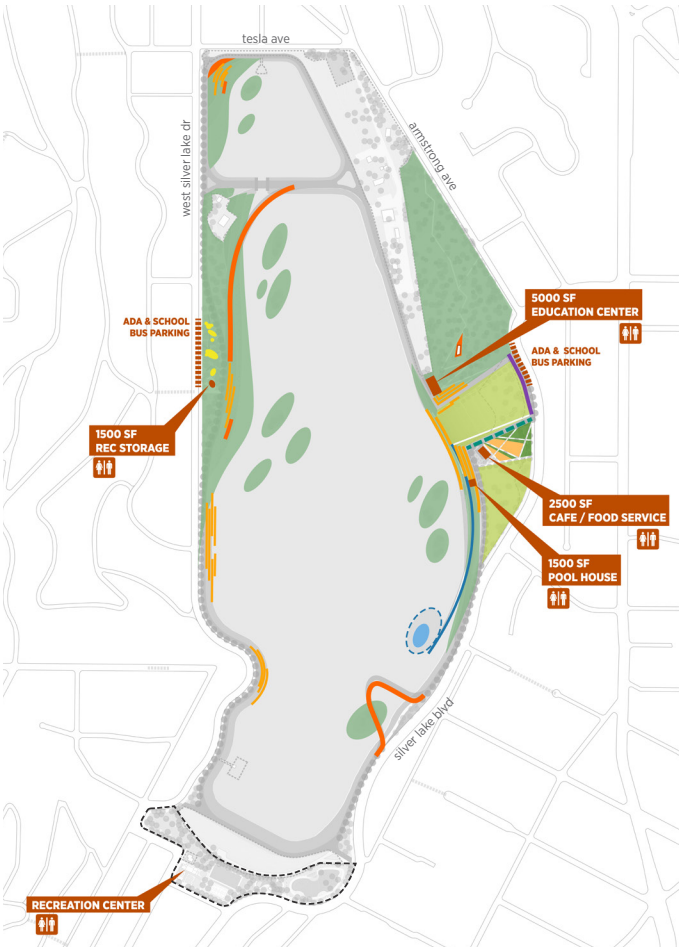
This scheme offers the most open, flexible lawn and shade trees with two distinct lawn spaces. Along Silver Lake Boulevard, a large flat lawn extends to a picnic grove and gardens with a 2,500sf café located at the water's edge. A second lawn at the base of the Knoll gently slopes to the water bringing visitors to a series of seating and wetland terraces and walkways. At this lower edge, visitors can meander through wetland plant communities and learn about this critical ecosystem. A 1,500sf Pool House is nestled into the seating terraces and a floating dock leads down to a floating pool.

At the Eucalyptus Grove, restored upland habitat transitions to wetlands with habitat trays extending from the embankment edge. At an entrance along West Silver Lake Drive, a 1,500sf recreation building and nature playground is completely immersed within the restored habitat of the Eucalyptus Grove. At the base of the building, small terraces lead people closer to the water through the wetland terraces to a small viewing platform. The Promenade connects to an overlook bridge that hovers over these habitat terraces and connects to the Ivanhoe Spillway.

Additional protected wetland habitat is created by floating islands dispersed throughout the reservoirs. At the south end, a large overlook extends out over the water above a floating island to maximize water vistas and observe wildlife. Additionally, small seating terraces and overlooks are located along the reservoir edge to provide people with access to the water as well as interaction with habitat areas.

A 5,000sf environmental education center is incorporated into the base of The Knoll, overlooking the reservoir and a shade pavilion, located at the top of the Knoll, provides space for an outdoor classroom. A universally accessible nature walk connects Armstrong Ave and the Meadow to the top of the Knoll. Where walkways are located within habitat areas, wildlife-friendly fencing is incorporated to protect wildlife and sensitive habitats.

Figures 4-26 through 4-29 show the proposed plan and breakdown of spaces, circulation, and habitat for the Blended Spaces design alternative.



Rendering from the Promenade on the east side of the Complex looking north. Habitat slopes and terraces transition to seating along the water's edge. A floating dock takes visitors through a wetland with floating habitat islands in the background. An Education Center is situated at the base of the Knoll beyond. Alternative 3: Blended Spaces

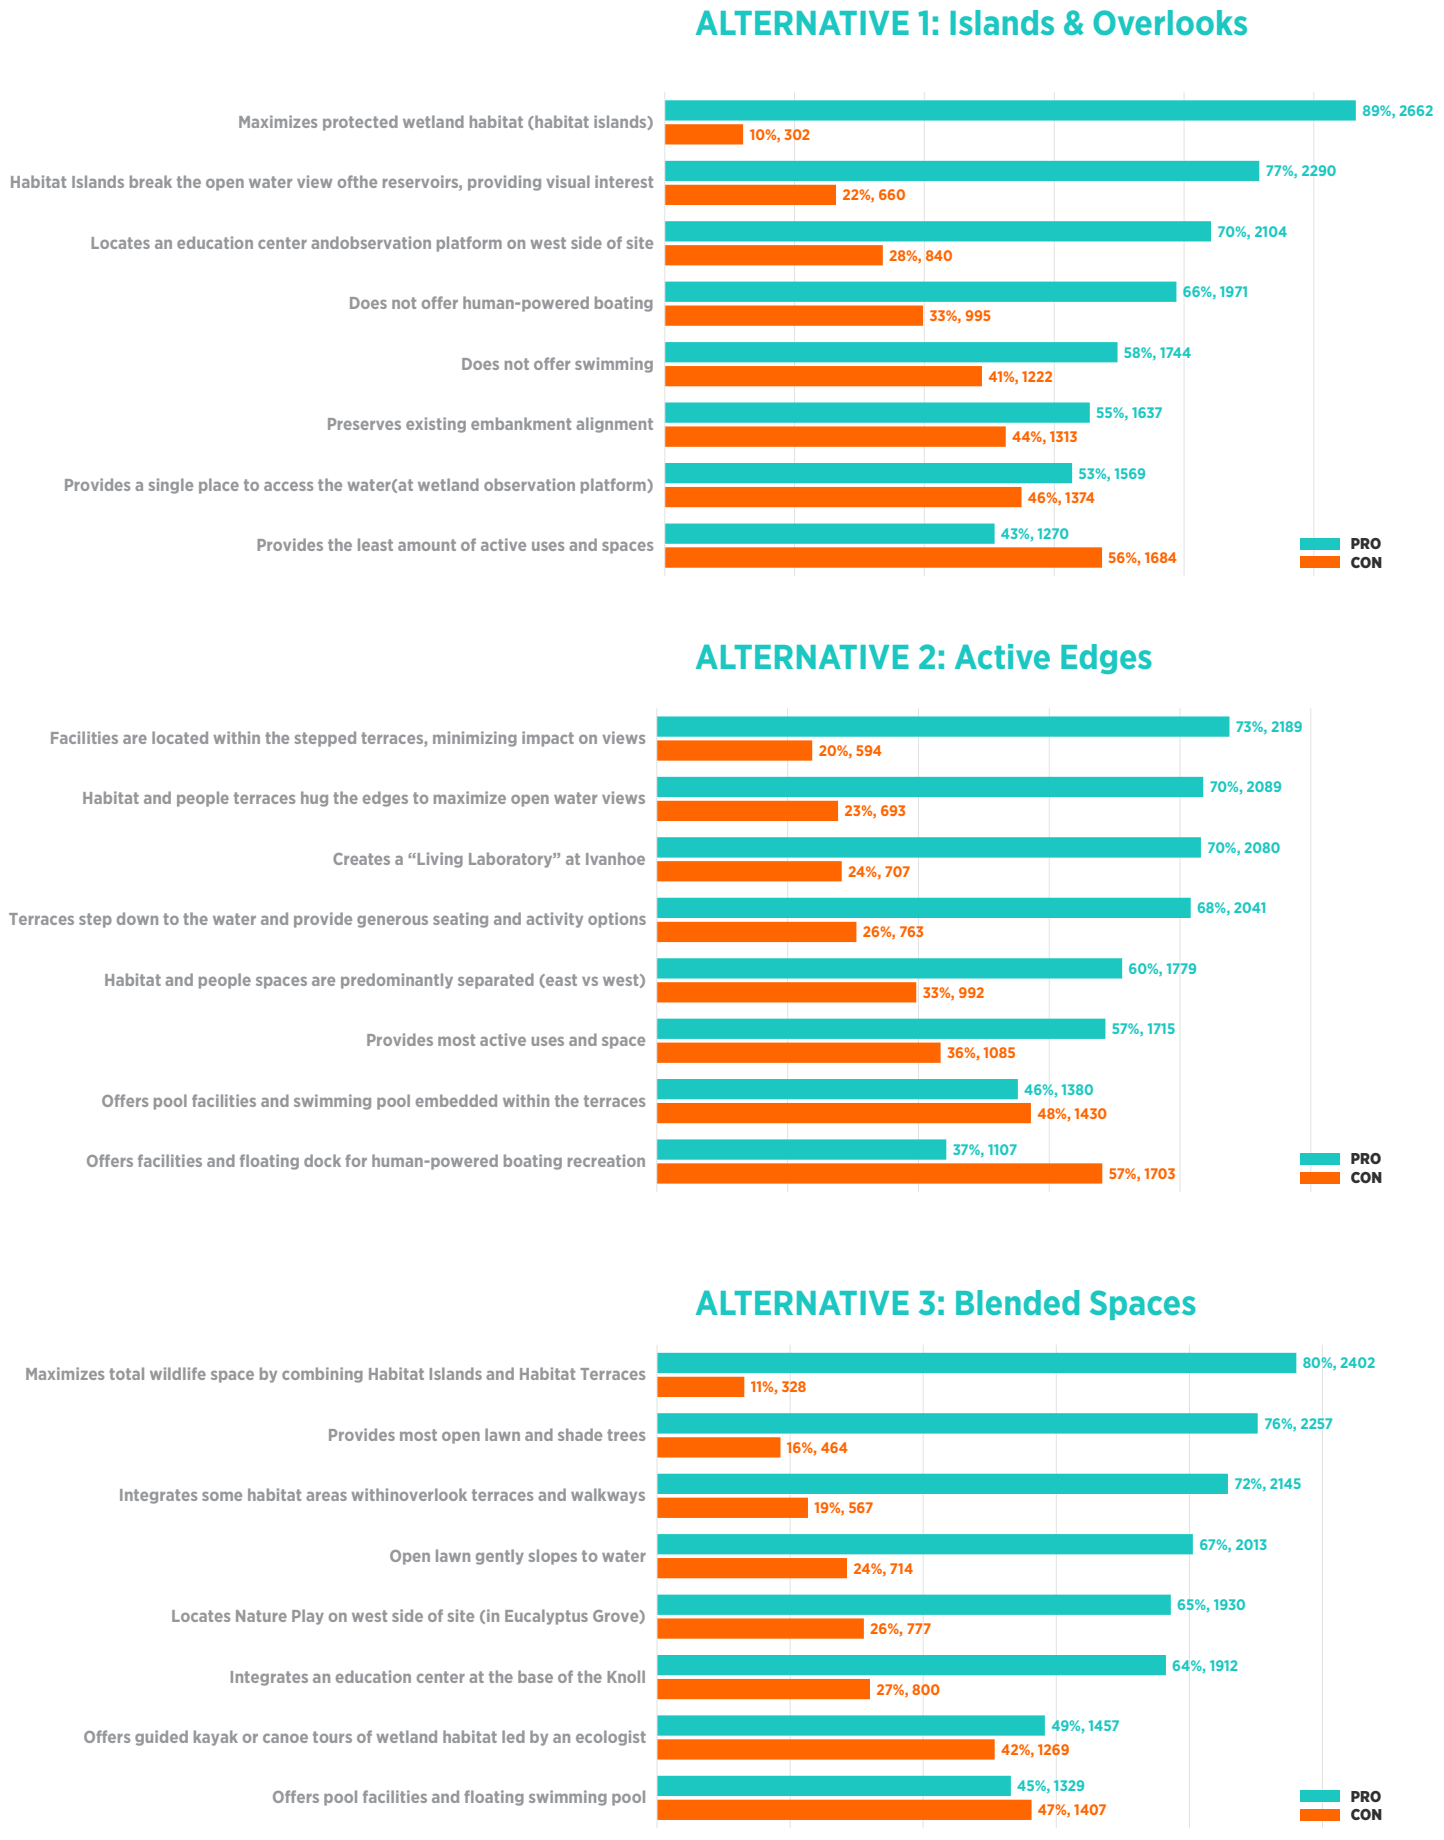
COMMUNITY WORKSHOP 03 FEEDBACK

Workshop Report Back
During the report back, many of the "pros" included support for design ideas that maximized wildlife, created flexible gathering spaces, included education-related structures, allowed for water-based activities such as swimming and human-powered boating, as well as existing recreation center improvements. Many of the "cons" revolved around swimming and human-powered boating, a free-standing café, and several of the proposed education center structures or their proposed location.

Questionnaire
The questionnaire that was distributed for this workshop – to fill out at the meeting or later online – was open for four weeks online and closed on December 1, 2019. The project team heard comments from the community that there was some confusion about some of the questions, so the project team worked with the SWG to modify the format and extended the deadline by one week. The project team received 2,986 questionnaire responses in total which are summarized below and in Figure 4-30.

For **Alternative 1: Islands and Overlooks**, the community strongly supported maximizing protected habitat provided by the habitat islands and incorporating an education center at the Eucalyptus Grove with "Maximizing protected wetland habitat (habitat islands)", "Habitat islands break the open water view of the reservoir, providing visual interest", and "Locates an education center and observation platform on the west side of the site" viewed as pros by over 70% of respondents. Less favorably, 56% of respondents viewed "Having the least amount of active uses and spaces" as a con. Respondents were more neutral towards "Providing a single place to access the water" and "Preserving the existing embankment alignment".



For **Alternative 2: Active Edges**, the community strongly supported maximizing water views and creating a Living Laboratory at Ivanhoe with over 70% of respondents viewing "Facilities are located within the stepped terraces, minimizing the impact on views", "Habitat and people terraces hug the edges to maximize open water views", and "Creates a "Living Laboratory" at Ivanhoe" as pros. Least favorable activities in this Alternative included human-powered boating and swimming with 57% and 46% of respondents viewing these as cons.

Overall, **Alternative 3: Blended Spaces** was seemingly the most favorable with more pros than cons. The community strongly supported maximizing space for wildlife, increasing lawn and shade trees, and blending people and habitat spaces with over 70% of respondents viewing "Maximizes total wildlife space by combining Habitat Islands and Habitat Terraces", "Provides most open lawn and shade trees" and "Integrates some habitat areas within overlook terraces and walkways" as pros. Respondents felt neutral towards swimming with "Offers pool facilities and floating swimming pool" as a 45%/47% (pro/con) split. And while recreational human-powered boating was viewed as a con in Alternate 2, "Offers guided kayak or canoe tours of wetland habitat led by an ecologist" was viewed more favorably (49% pro).

SYNTHESIS
The primary takeaways from the questionnaire results indicated that the Master Plan design should prioritize the following: habitat, water access, open flexible lawn, and some environmental education program as well as some active spaces. Elements that were lower priorities or that many respondents viewed as cons were swimming and human-powered boating. There was, however, some preference for ecological kayak or canoe tours led by an ecologist. In general, respondents indicated that the three schemes were well aligned with the projects "key themes" or goals.

These favored elements and approaches were then synthesized into a Preferred Alternative and presented to the public at Community Workshop 04. During the development of the Preferred Alternative, the design team met with the SWG two times to debrief on Community Workshop 03 and the questionnaire results as well as provide design updates and garner feedback.

Figure 4-30 Community Workshop 03 Questionnaire Results

4.4.4 Community Workshop 04

Thursday, January 23, 2020
Friendship Auditorium from 6:00 – 8:00pm

Attended by approximately 300 members of the public, Community Workshop 04 focused on presenting a single preferred Master Plan design based on synthesized feedback from Community Workshop 03 and to solicit community review and feedback.

OVERVIEW

A formal presentation led by Hargreaves Jones was followed by break-out sessions facilitated by members of the project team where participants were asked which elements and features they supported or opposed about the Preferred Alternative.

At the breakout table discussions, attendees were encouraged to use the questionnaire shown in Figure 4-31 as a guide for discussion. Each table had an enlarged site plan of the preferred Master Plan design and yellow and blue post-it notes. "Blue" was used to indicate "support" and "Yellow" was used to indicate "oppose." Attendees were encouraged to write down the names of elements or spaces they supported or opposed on the post-it notes and place them on their table maps. Each table was also asked to identify one thing they are most excited about and to write this on a star-shaped sticky note which was placed on a single, large site plan mounted to the wall. Each table was also asked to identify a table leader who would report back a brief, 2-minute summary of their table's discussion at the end of the Workshop.

NOTE: The table maps are primarily used as tools to facilitate discussion during the breakout sessions and do not yield empirical information. Also, it was noted by table facilitators that some participants moved to different tables in a coordinated manner during the breakout session, presumably to control the direction of the conversation.

SILVER LAKE RESERVOIR COMPLEX **MASTER PLAN**

SLRCMP

COMMUNITY WORKSHOP #4 QUESTIONNAIRE

Based on prior community input we have identified the following enhancement areas for the Master Plan design. Please help us refine & prioritize these by indicating your level of support for each of them

Strongly Support | Support | Neutral | Oppose | Strongly Oppose

1. THE EMBANKMENT
Replaces asphalt and adds planting, boulders, and small seating terraces.

2. THE PROMENADE (ORANGE LINE)
Creates a continuous loop for walking and jogging around the interior of the Complex including shade trees, seating, and planting.

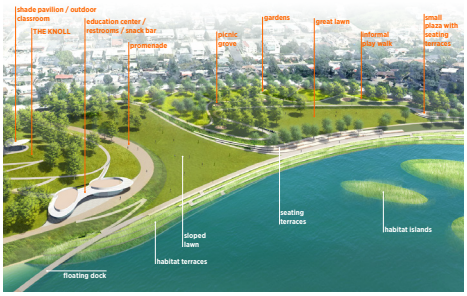
3. THE EDUCATION CENTER
Provides spaces for classes, volunteer opportunities, community gathering, as well as restrooms and a potential snack bar.

4. UPLAND HABITAT (KNOLL & EUCALYPTUS GROVE)
Tree replanting program as well as ground cover planting to increase habitat value at the Eucalyptus Grove and Knoll.

5. THE KNOLL
Small footpaths leading to a shade structure at the top of the Knoll which can be used as an outdoor classroom.

6. GREAT & SLOPED LAWNS
Generous flat and sloped open lawns with shade trees create flexible spaces for a variety of uses and diverse ways to experience the reservoirs.

7. THE PICNIC GROVE, GARDENS & INFORMAL PLAY WALK
Picnic seating under shade trees and drought tolerant gardens are combined with a meandering path and informal play for all ages.



8. WETLAND HABITAT
Floating islands and wetland terraces provide shallow wading habitat for local and migratory birds and enable the addition of fish to the reservoirs.

9. IVANHOE
An overlook, shade structure, wetland terraces and islands, as well as footpaths to an observation platform create an immersive ecological experience and can be used as an outdoor classroom.

10. SILVER LAKE RECREATION CENTER & DOG PARK
Renovating and expanding the dog parks, building a new multi-purpose recreation building, and relocating and upgrading the existing play field and basketball court.

OUT OF THESE TOP 10 ENHANCEMENTS, WHICH ONE ARE YOU MOST EXCITED ABOUT ? _____

Based on your input throughout the Master Plan process we developed six Key Goals or themes for the design. Please indicated how well the Preferred Plan addresses these goals.

Too Much | Just Right! | Not Enough | No Opinion

A. ENJOYING NATURE
With the promenade, overlooks, small seating terraces along the embankment at habitat areas and the enhanced and expanded upland and wetland habitats areas, the preferred plan offers the right balance between connecting people with nature and providing protected habitat.

B. WELLNESS
With the promenade, walking paths and trails, sloped and flat lawns, and expanded recreation center, the preferred plan offers the right amount of open, flexible space to promote wellness-based activities.

C. FAMILY FRIENDLY
The picnic grove, flexible lawns, visitor center (at education facility), restrooms, informal play walk, plus expanded Recreation Center in the preferred plan provide the right amount of spaces for all ages.

D. EDUCATION
The single education facility with indoor / outdoor classroom spaces plus the shade structures and observations platforms which can serve as outdoor classrooms included in the preferred plan are the right amount of education facilities for the park.

E. COMMUNITY GATHERING
The generous, flexible lawns (which can be used for occasional large events), variety of seating areas throughout the park, and centrally located education facility in the preferred plan are an appropriate combination of places to meet and connect with friends and neighbors.

F. WATER ACCESS
With the sloped lawn, seating terraces, and small walkways to observation platforms and floating dock, the preferred plan offers the right amount and variety of opportunities to enjoy the water.

We want to hear more! *Please let us know if you have any other comments:*

Figure 4-31 Community Workshop 04 Questionnaire

Preferred Alternative

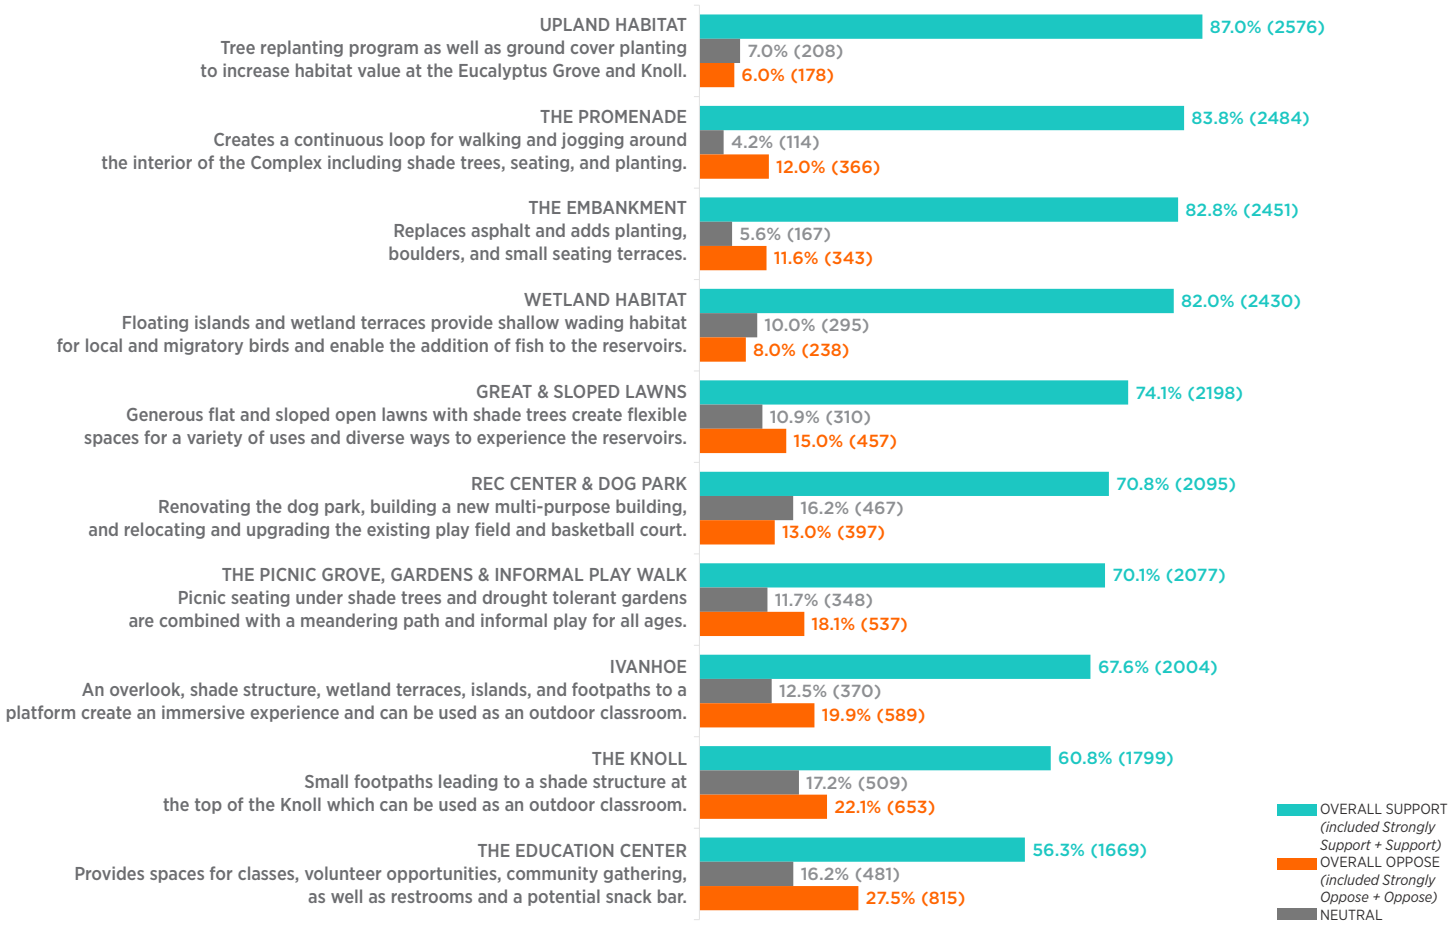
Based on community feedback during the previous workshops, the questionnaires, and in combination with feedback from multiple discussions and emails with the Stakeholder Working Group, the design team created a preferred Master Plan design (Figure 4-32). This new design removed swimming and human-powered boating and scaled back the education center to a single building. Given there was some interest in a café for the previous workshops, the team proposed a modest snack bar to be integrated into the education center. Habitat enhancement and expansion were prioritized on the western side of the site as well as the Knoll, and paths (i.e. human access) within these habitat areas were significantly reduced. In the Meadow area, open lawn with shade trees as well as native gardens and picnic groves were prioritized. This Preferred Alternative was advanced into the final Master Plan design described in detail in Chapter 05.

Figure 4-32 Preferred Alternative - Site Plan

COMMUNITY WORKSHOP 04 FEEDBACK

Workshop Report Back

During the report back, most tables strongly supported habitat enhancement and expansion, as well as the embankment, promenade, flexible lawns, and gardens. Tables were in less agreement about the education center and many strongly opposed it, although they supported using the Complex for environmental education purposes. Some tables were concerned with the education center's size and many were against including a snack bar. Although it was not a question on the questionnaire, many table facilitators indicated the perimeter fence was widely discussed during the breakout session. It was noted by the project team that a few people who spoke during the report back were not table leaders or associated with a table. In general, tables were most excited about increasing habitat, the promenade, and the embankment.



Questionnaire

The questionnaire that accompanied this workshop shown in Figure 4-31 was open for four weeks online and closed on February 21, 2020. The project team received 2,966 questionnaire responses in total.

The questionnaire was developed to assess to what extent community members supported or opposed the design of ten areas or elements within the reservoir complex: the Embankment; Promenade; Education Center; Upland Habitat Areas; Knoll; Great and Sloped Lawns; Picnic Grove, Gardens, and Informal Play Walk; Wetland Habitat; Ivanhoe; and the Silver Lake Recreation Center and Dog Park (Figure 4-33). The questionnaire also assessed how well the design achieved project goals by asking respondents if the elements and spaces were "too much, just right, not enough, or no opinion" relative to each of six Key Themes (Figure 4-34).

Overwhelmingly, the community supported restoring upland habitat in the Knoll and Eucalyptus Grove (87.0%) and re-establishing wetland habitat with the proposed habitat terraces and islands (82.0%). Similarly, the Promenade with its continuous walking and jogging loop, seating terraces, and planting were supported by 83.8% of respondents and replacing the asphalt and adding planting, boulders, and small seating terraces along the Embankment was supported by 82.8% of respondents. The flexible, open Lawns

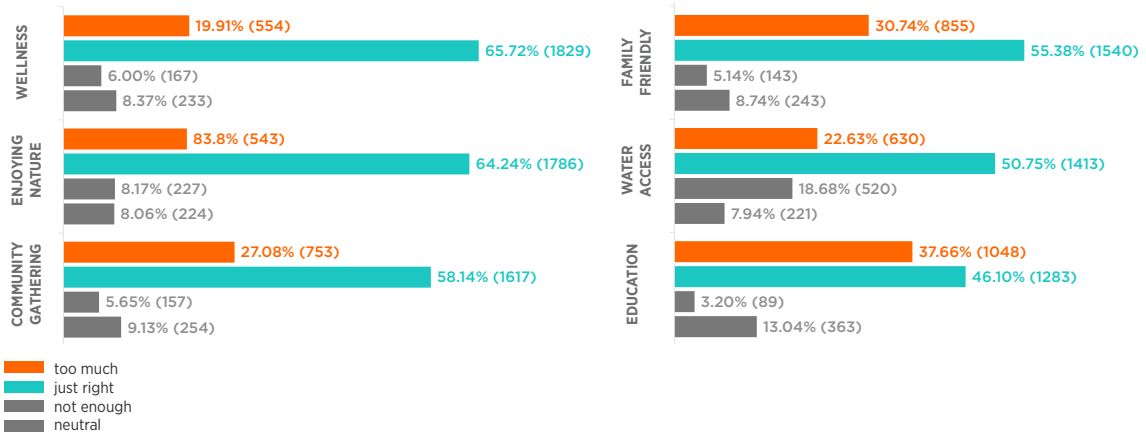


Figure 4-33 Community Workshop 04 Questionnaire Results

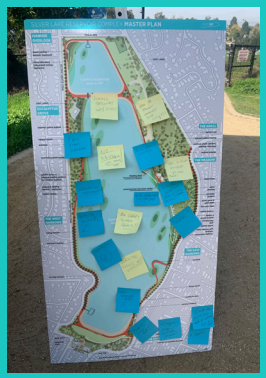
with shade trees (74.1%), Recreation Center and Dog Park Expansion (70.8%), as well as Picnic Grove, Gardens and Informal Play Walk (70.1%) were also tremendously supported. Also strongly supported were the outdoor classroom / shade structure, wetland terraces and islands and observation platform at Ivanhoe Reservoir (67.6%) and the nature trails from the Meadow and Armstrong Avenue to an outdoor classroom / shade structure at the top of the Knoll (60.8%). The Education Center, while receiving the lowest support overall, was still supported by the majority of respondents (56.3%).

The second set of questions were created to assess how well the Preferred Alternative balanced the achievement of Master Plan goals. Overall, respondents indicated that the amount and distribution of design elements were "Just Right" across the project's six Key Themes as shown in Figure 4-34. Out of the six Key Themes, over 50% of the community thought the elements and spaces that support five of them (Wellness, Enjoying Nature, Community Gathering, Family Friendly, and Water Access) were "Just Right." Most (46%) of respondents thought that the features supporting Education goals were "Just Right" but a close second (38%) thought it was "Too Much."

Figure 4-34 Community Workshop 04 Questionnaire Results

SYNTHESIS



Based on the feedback from Community Workshop 04 and questionnaire, as well as the SWG, which supported the Preferred Alternative, the project team proceeded to develop a the Master Plan Report detailing the preferred Master Plan design and revisited the education center, reducing its size and integrating it further into the Knoll to preserve views around the reservoirs.

POP-UP EVENT 02

The following weekend, on Saturday, January 25, 2020, The Robert Group held another pop-up event at The Silver Lake Meadow. A map showing the Preferred Alternative was used to facilitate an open discussion and questionnaires were provided for individuals to complete in-person and/or submit online. Approximately 75 people attended, and sixteen questionnaires were completed at the pop-up booth. Many community members were given copies of the questionnaire to complete online and/or complete on their own and submit via mail or email.

Twenty comments were placed on the map board during the pop-up event and are illustrated below. Approximately 60% of attendees mentioned wanting to remove the perimeter fence around the reservoir complex.

4.4.5 *VIRTUAL* Community Workshop 05

Video Launch on August 21, 2020

This final Community Workshop 05 was planned as a celebration of the final Master Plan design. The project team was unable to hold a final Community Workshop event due to the COVID-19 pandemic. In place of a large public meeting, the team developed two videos to celebrate and present the final Master Plan virtually. The videos describe the Master Plan process, showcase many of the key participants, and provide an overview of the design created in partnership with the community of Silver Lake.

OVERVIEW

The team posted two videos on August 21, 2020. The first video titled "THE PROCESS" is an approximately ten minute compilation of interviews with key participants in the development of the Master Plan including members of the SWG, educators and students, City of Los Angeles leaders, and project team. This video frames the Master Plan project goals and history. The second video titled "THE PLAN" is a narrated overview of the final Master Plan design. The video features "before" photos of the existing Complex paired with "after" artistic renderings of the proposed design. It also highlights key features of the design such as habitat creation. The videos were accompanied by downloadable PDFs files that describe the Master Plan design and project sustainability in more detail.

An online questionnaire also accompanied the videos which asked the community to help the project team prioritize short- and long-term features and elements of the Master Plan for implementation (Figure 4-36). The online questionnaire was supplemented with paper copies for those without computer access.

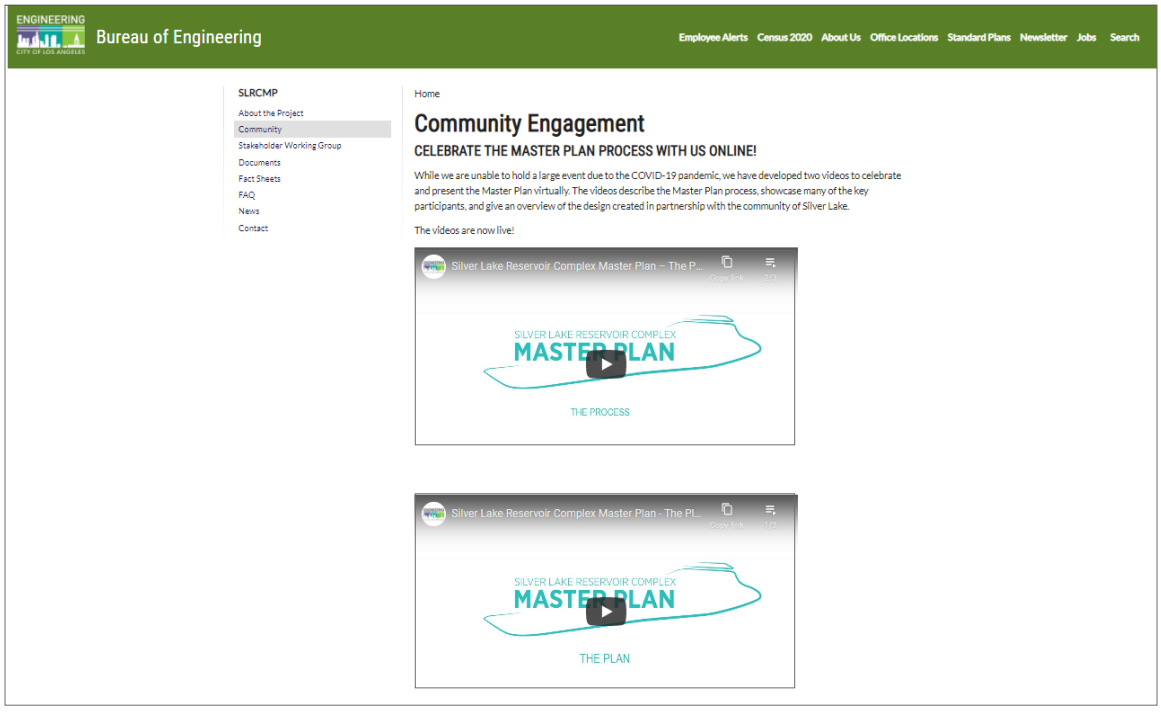


Figure 4-35 Community Workshop 05 Webpage

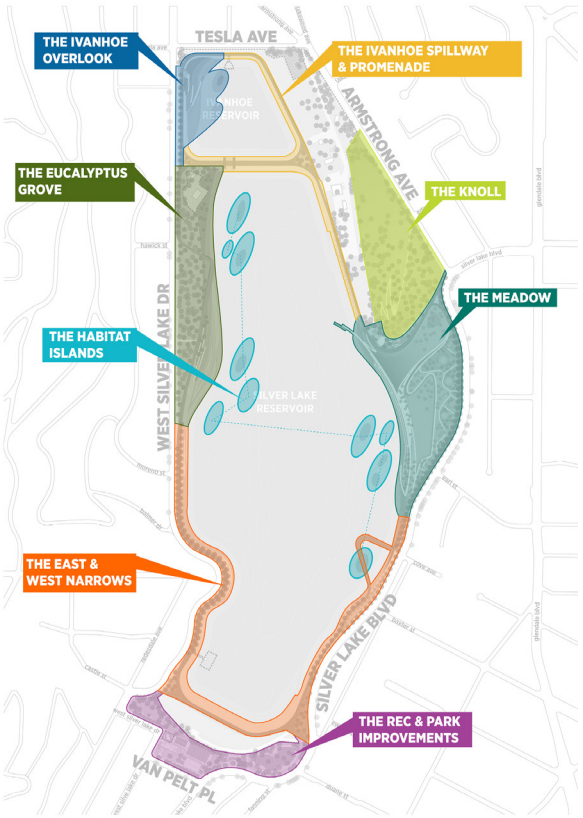
SILVER LAKE RESERVOIR COMPLEX **MASTER PLAN**

SLRCMP

FINAL QUESTIONNAIRE

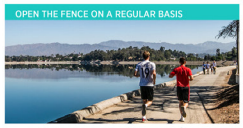


During the Master Plan process, we received many questions about how the design might be implemented. As a first step, the Master Plan design has been broken into smaller projects or phases which could be implemented concurrently or separately as discrete projects. Now we'd like to hear what you would like to see happen first!

QUESTION 1: PRIORITY AREAS

The Master Plan will be implemented as funding and community support allow. A lot will need to happen before construction starts including detailed design, environmental clearance, and permitting which typically takes 2 to 3 years. We estimate each area will take an additional 1.5 to 2 years to construct. Multiple areas could be constructed simultaneously depending on funding.

To assist us in prioritizing projects for implementation, which of the following overall areas of the Master Plan would you like to see implemented first? **Choose your top three priority areas**



- ○ **THE MEADOW** (includes sloped lawn, flat lawn, seating terraces, wetland habitat terraces, kayak launch, picnic grove, walking paths, ornamental gardens, informal play, promenade / street edge education center (including restrooms), and knoll regrading)
- ○ **THE KNOLL** (includes walking paths, slope regrading, upland habitat planting and shade pavilion)
- ○ **THE IVANHOE SPILLWAY AND PROMENADE** (includes promenade and embankment enhancements)
- ○ **THE IVANHOE OVERLOOK** (includes wetland habitat terraces & islands, lookout, shade pavilion, sloped walk to water, and promenade)
- ○ **THE EUCALYPTUS GROVE** (includes wetland habitat and seating terraces, promenade walk and overlook, and restored upland habitat)
- ○ **THE HABITAT ISLANDS** (includes wetland habitat islands and introducing fish)
- ○ **THE EAST AND WEST NARROWS** (includes embankment enhancements, seating terraces, adult fitness, and promenade walk and overlook)
- ○ **THE REC AND PARK IMPROVEMENTS** (includes relocated picnic area and new trees, upgraded rec center, new multi-purpose room, outdoor plaza and seating, basketball court, soccer field and expanded/renovated dog park)
- ○ **NONE OF THE ABOVE** (I don't want anything changed)

QUESTION 2: SMALL PROJECTS

As the City of LA works to take the next steps towards implementing the Master Plan, smaller projects may be possible to implement in the near term as funding sources, like grants, are identified. Some smaller projects could be used to test larger ideas in the Master Plan Vision. Some of these small projects are contingent on having an on-site operator and/or environmental clearance. **To help us prioritize small projects, please choose your top three, including the "other" answer choice.**

○ OPEN THE FENCE ON A REGULAR BASIS

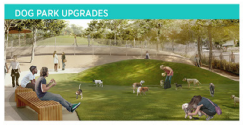
(i.e. monthly) to allow interior walking / jogging around the reservoir

○ CREATE IVANHOE RESERVOIR WALKING LOOP

○ EMBANKMENT PLANTING TEST AREAS

will help to discover which plants grow best on the embankments

○ FLOATING HABITAT ISLAND TEST INSTALLATION



○ CREATE WALKING PATH TO THE TOP OF THE KNOLL

○ DOCENT-LED BIRD WATCHING TOURS / CLASSES

○ DOG PARK UPGRADES

○ OTHER IDEAS

Figure 4-36 Community Workshop 05 Questionnaire

COMMUNITY WORKSHOP 05 FEEDBACK

Questionnaire

The questionnaire that accompanied this workshop shown in Figure 4-36 was open for two weeks online and closed on September 4, 2020. The project team received 922 questionnaire responses in total (4 were submitted as paper copies).

During the Master Plan process, the project team received many questions about how the design might be implemented. As noted in Chapter 01, the Master Plan design was broken into smaller projects or phases which can be implemented concurrently or separately as discrete projects. The questionnaire was developed to assist in prioritizing projects for funding and implementation by asking respondents to chose their top three priority areas for implementation. The questionnaire also assessed community preferences for smaller, initial projects that could be implemented in the near term as funding sources are identified and while the City works towards the next steps of implementing the full Master Plan. These smaller projects can be standalone projects or used to test larger ideas of the Master Plan vision. Respondents were asked to choose their top three preference and were also provided the opportunity to write in other suggestions for near-term smaller projects.

The highest priority Master Plan project identified in the first question was the Meadow with 48.7% selecting it as their top space for implementation as shown in Figure 4-37. The Eucalyptus Grove was also a top priority (42.8%). The third choice was close between the Knoll (34.2%) and improvements proposed at the Silver Lake Recreation Center (32.6%), followed by the Wetland Habitat Islands (28.0%) and Ivanhoe Overlook (24.2%). Participants were also given the opportunity to indicate if they did not want any of the Master Plan spaces implemented and for nothing to change which was selected by only 15.4% respondents.

Top responses to the second question to prioritize smaller, initial projects showed a clear preference to undertake near-term initiatives that allow more access to the SLRC from “Opening the fence on a regular basis” (60.7%), “Creating an Ivanhoe Reservoir walking loop” (42.9%) and “Creating the walking path to the top of the Knoll” (42.5%). Also popular are habitat-focused initiatives such as implementing “Embankment planting test areas” (37.5%) and a “Floating habitat island test installation” (34.0%). Implementing the “Dog Park upgrades” (29.7%) was a popular initiative as well. See Figure 4-38.

Additional ideas that participants suggested included replacing the current fence with a more beautiful, wildlife-friendly fence, installing more garbage cans and having regular pick-up of trash, installing better lighting, opening the fences all the time, monthly full-moon walks with gates open for two hours in the evening, allow swimming, adding a restroom at the meadow, removing the fence entirely, installing a kayak launch and access, introducing pedal boat rentals, installing art, installing picnic tables and game courts, widening the existing running/walking paths, creating a co-op vegetable garden, bringing DASH service to the SLRC to connect to Sunset Boulevard, water access, planting more trees, and fixing the dirt sidewalk on Van Pelt Place.

SYNTHESIS

Primary takeaways from participants responses to this final questionnaire indicated a clear desire to implement the spaces that will have the most impact in terms of creating more public park space as well as supporting habitat creation and wildlife (The Meadow and Eucalyptus Grove). Participants also showed a strong preference for smaller, near-term initiatives that open the Complex up for more access. This feedback will be used by the project team to select two grants to which to apply for funding as well as further funding and planning initiatives after Master Plan adoption by the City.

5.1 Master Plan Overview

From its beginnings as a marshy pond within the natural hydrological system of Ivanhoe Canyon to its transformation into an iconic, man-made urban water body, the evolutionary trajectory of the Silver Lake Reservoir Complex (SLRC) has been that of infrastructure. Building upon this narrative, the Master Plan design envisions the new Park as a hybrid infrastructure that blends urban wilderness with human uses, where traces of its history are made visible in the contemporary expressions of the community's aspirations.

The Master Plan proposes to introduce freshwater wetlands and aquatic habitat for the first time in over 100 years, an ecology that was slowly erased to meet the needs of a growing Los Angeles, and restore remnant woodland habitat from the foothills of the Santa Monica Mountains. Woven within these bold environmental ambitions are places for the community to connect with nature and one another.

The Master Plan design was developed in concert with a robust, year-long community process that included five large Community Workshops and eight focused meetings with its Stakeholder Working Group. Details of this process and development of the Master Plan design can be found in Chapter 04.

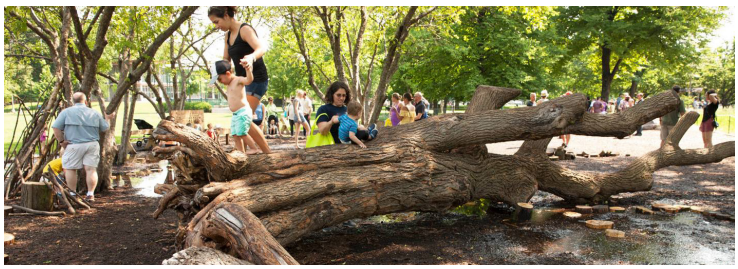
Figure 5-1 Silver Lake Reservoir Complex Master Plan Aerial View

KEY THEMES

The following Key Themes, or goals, were established through the extensive community engagement process and guided the development of the Master Plan.

Enjoying Nature

The park should be a place to sit by the water, walk through a woodland or wetland, and observe wildlife.



Wellness

The park should be a place to walk and run, but also offer spaces to sit, relax, and find peace.

Community

The park should be a place where the neighborhood comes together for shared experiences.

Family-Friendly

The park should create spaces for children to play and learn about their environment.

Education

The park should have an education center offering a range of classes and nature-based programs.

Water Access

The park should offer opportunities to be at and on the water.

5.2 Park Zones

The proposed Master Plan design consists of a series of seven overall park zones stitched together by a tree-lined Promenade as shown in Figure 5-2. These zones include:

- The Meadow
- The Knoll
- The Ivanhoe Overlook
- The Eucalyptus Grove
- The East and West Narrows
- The South Valley

Figure 5-2 Silver Lake Reservoir Complex Master Plan

5.2.3 The Meadow

The Meadow is currently the community heart of the Silver Lake Reservoir Complex. The Master Plan proposes to reconfigure and expand the Meadow's existing open lawn and shade trees. To enhance the unique views of the reservoirs and vary the experiences for people to interact with the water's edge, several elevation changes are incorporated in the new design.

A large, gently sloping lawn, Silver Lake Lawn, extends out from Silver Lake Boulevard and down approximately nine feet in elevation to the water's edge, providing unobstructed, panoramic views out to the water. Terminating at a series of small walkways interwoven within wetland terraces, visitors are offered an immersive experience of the Park's new wetland ecologies. Floating wetland islands are located offshore, supplementing the wetland terraces with protected habitat for waterfowl.

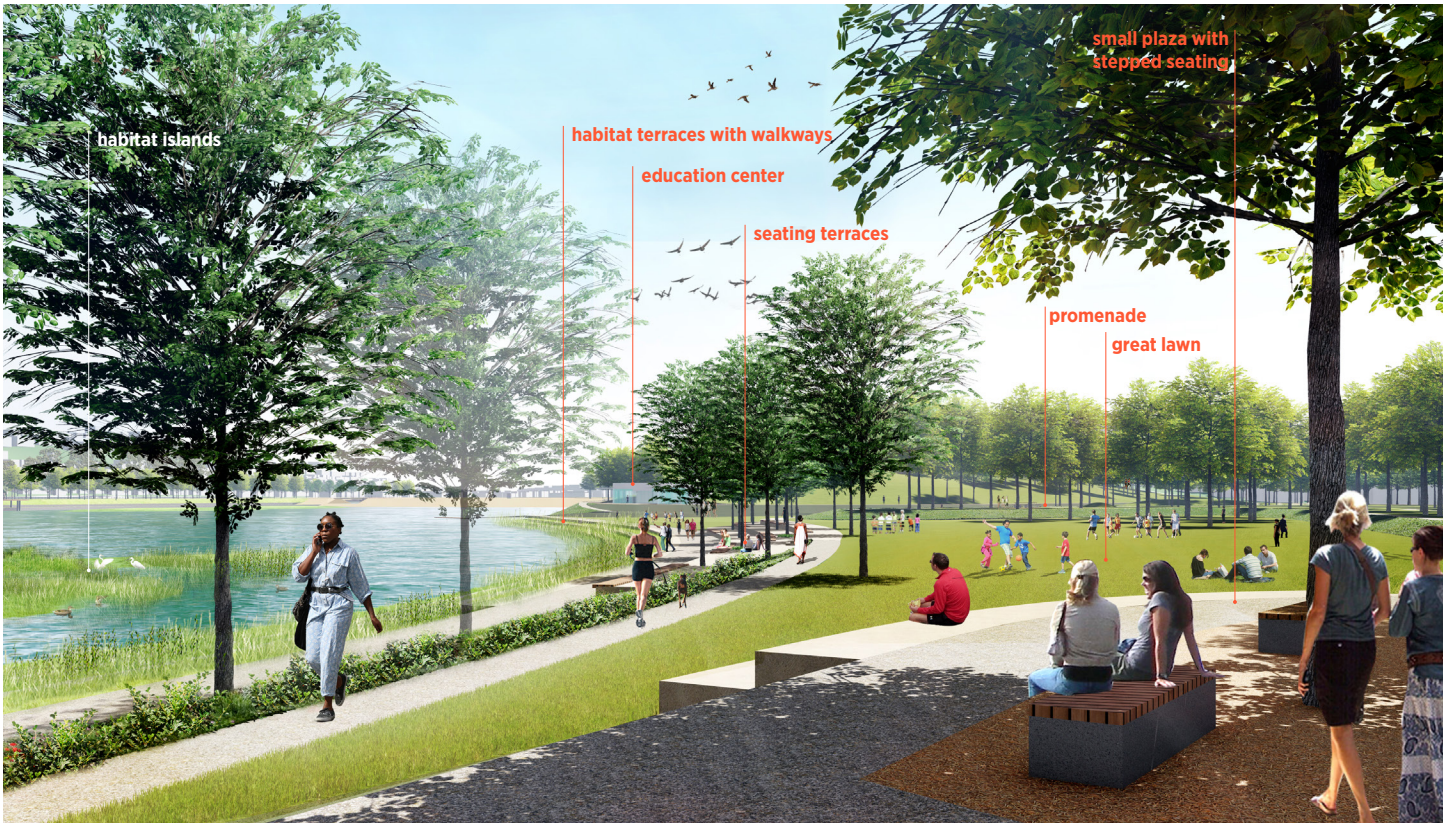
Along Silver Lake Boulevard, a wide, tree-lined Promenade connects to Ornamental Gardens, welcoming visitors into the Meadow with spaces for strolling and sitting. The Gardens will be a mix of native and regionally adapted, water wise (or drought tolerant) plants with an emphasis on pollinator species. Within the gardens are a series of depressions, or dells, which will function as rain gardens during winter months. Adjacent to the Gardens is an expansive Picnic Grove and informal play walk lined with interpretative, integrative elements such as berms and depressions that offer passive spaces for gathering and play.

A second flat, Great Lawn is set 5 feet below the Picnic Grove. This elevation change creates another unique experiential relationship to the reservoir, occupying a liminal zone between the top of the embankment and the water. Generous terraces with shade trees navigate the remaining elevation change between this lawn and the water's edge, providing ample, shaded seating with panoramic views of the open reservoir. These intersect with habitat terraces to the south and a small footpath leading to an observation platform. The design intent is to balance the cut and fill earthworks to execute these elements such that no off-haul or import of soil is required. See Figure 5-4 for a design plan of The Meadow.

Although the Meadow area is shown to be within a DSOD restricted zone, this designation is out of date and proposed improvements will not require additional review and approval.

Figure 5-3 The Meadow Aerial View

Figure 5-4 The Meadow Detailed Plan



view A Right inside the park at Silver Lake Boulevard, a gently sloping lawn with shade trees opens up views to Silver Lake Reservoir and brings visitors down to the water's edge. Sheltered between The Knoll and a grove of trees, Silver Lake Lawn is a perfect place for relaxing, finding peace, and enjoying nature.

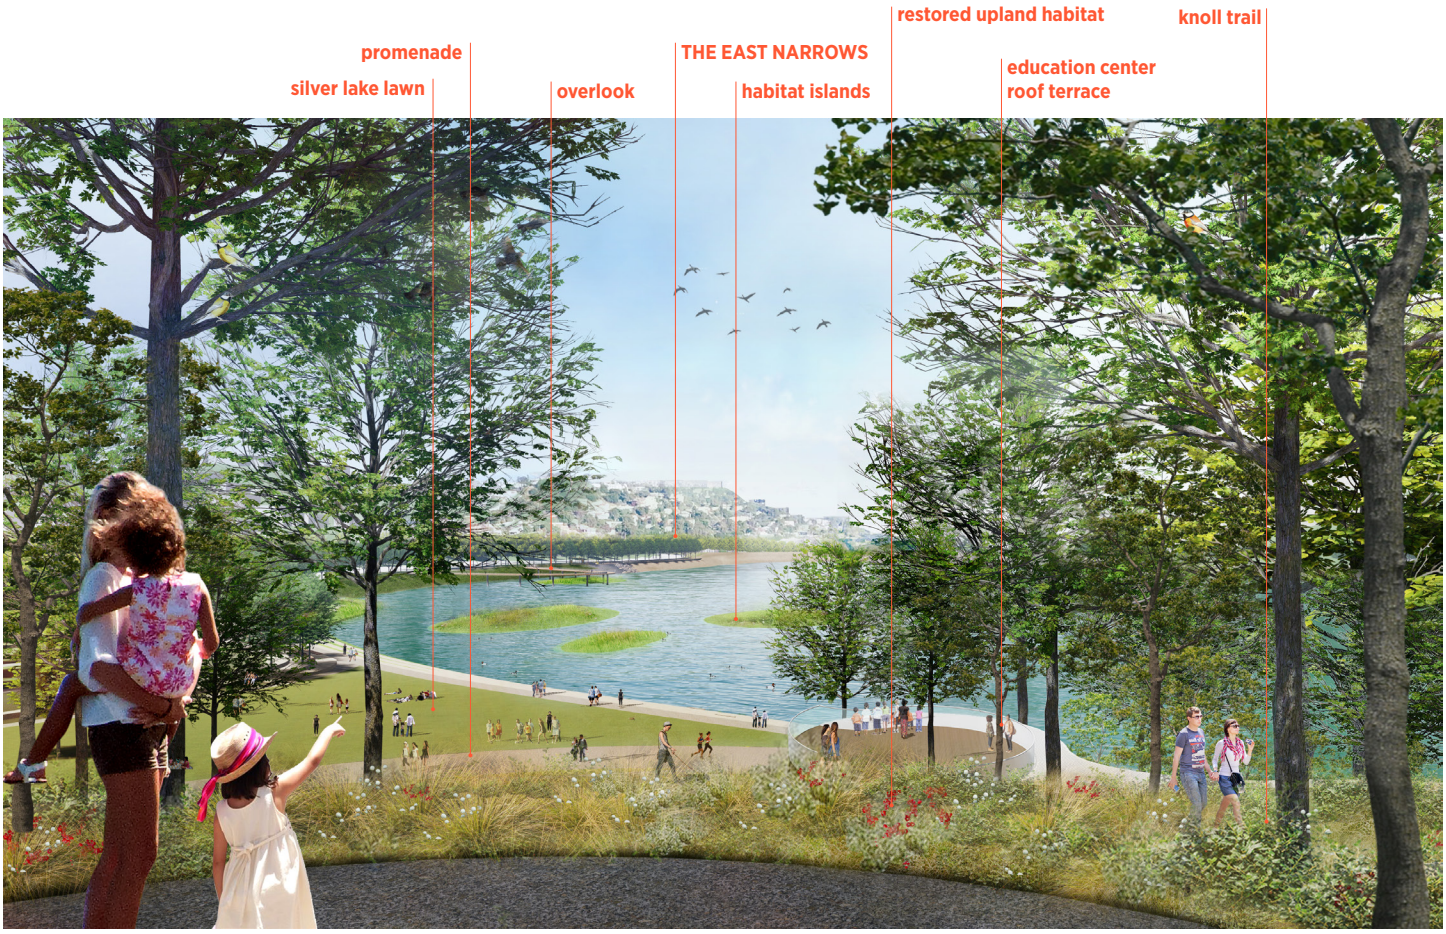
view B An informal play walk featuring berms to climb and hang out on meanders between the Picnic Grove and Ornamental Gardens planted with a mix of natives and species adapted to southern California's climate. The Ornamental Gardens feature plants for pollinators including migratory butterflies.

view C An small entry plaza near the intersection of Silver Lake Boulevard and Earl Street doubles as an overlook onto the Great Lawn and wetland terraces and islands. This shaded area of prospect offers a place for quiet reflection or meeting neighbors for a walk through the park's miles of paths and trails.

view D The end of sloped Silver Lake Lawn gives way to a series of seating platforms perched above wetland terraces and islands. Small footpaths into the wetlands provide moments of immersion to learn about wetland plant communities, amphibians, and the other small aquatic wildlife they support.

5.2.2 The Knoll

The Knoll is a large hill within the Complex and is comprised of 8.3 acres of woodland. The Master Plan proposes to enhance its upland, wooded character by proposing a replanting strategy, implemented over time, to increase species diversity and improve its overall habitat value.



With an elevation change of 45,' The Knoll offers expansive views over the reservoirs. Universally accessible nature trails lead up its slopes from the Meadow and Armstrong Ave to a promontory with small shade pavilion and seating area that offers a peaceful place to rest and enjoy the views. Additionally, this area can be used for educational purposes to host small groups of students. To protect wildlife and keep people out of sensitive areas, habitat fences are provided along all the nature trails. All sensitive habitat areas will be closed at night. See section 5.6.5 and Chapter 06 for more information on habitat fences.

A small portion of The Knoll on its southern face is regraded to heighten its form and accommodate small seating terraces facing the Meadow. The Promenade wraps around its base, connecting the Meadow to the proposed Education Center along its western edge. The Environmental Education Center is tucked into The Knoll landscape overlooking the reservoir. The Center is connected directly to the reservoir via a universally accessible pathway that leading down to a floating dock which allows hands-on education and the possibility for guided kayak or canoe tours by ecologists. See Figure 5-5 for a design plan of The Knoll.

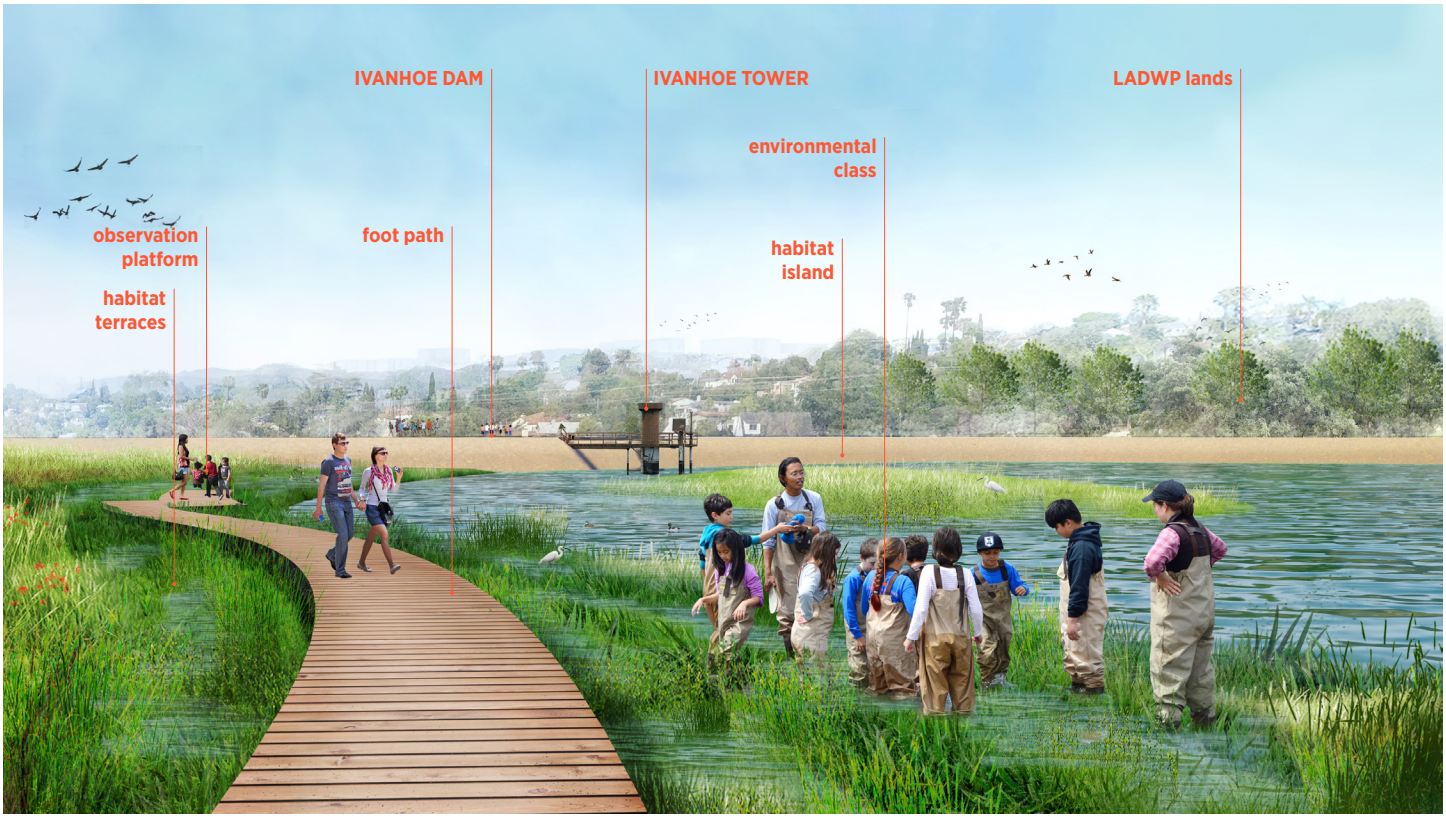
The design intent is to balance the cut and fill earthworks such that execution of these elements requires no off-haul or import of soil.

Figure 5-5 The Knoll Detailed Plan

view A At the top of the Knoll, a small promontory under a shade pavilion creates a moment to pause and enjoy expansive views of the reservoir and park through a restored southern California native woodland and across Silver Lake Lawn to habitat islands. Here, the interwoven ecological and cultural systems of the park are understood. The pavilion will double as an outdoor classroom associated with the Education Center which includes a small roof terrace observation platform.

5.2.1 Ivanhoe Overlook

As a smaller and somewhat isolated water body, Ivanhoe Reservoir presents the opportunity to become a Living Laboratory – a testing ground for establishing new wetland habitat in the Complex and understanding the effectiveness of constructed wetland terraces and islands on water quality and aquatic habitat.



The design of Ivanhoe Overlook takes advantage of open views to the south of the Ivanhoe Reservoir with an observation deck extending out over wetland terraces which step down to the water. Small footpaths through these terraces lead to observational platforms that can be used for on-going monitoring and testing to inform how habitat is managed throughout the Complex. Complimenting the wetland terraces are two floating wetland islands.

A small shade pavilion with integrated seating provides a sheltered space for outdoor education or community gathering. Interpretive signage educates visitors about the operations of the Living Laboratory and its ecologies. See Figure 5-6 for a design plan of this area.

An existing Inlet Tower located on Ivanhoe Dam will remain in place and operational. Construction within the Division of Safety of Dams (DSOD) boundary will require additional review and approval.

Figure 5-6 Ivanhoe Overlook Detailed Plan

view A A small boardwalk brings research and academic collaborators and students through and into wetland terraces where plant community and aquatic species establishment as well as water quality can be monitored and studied.

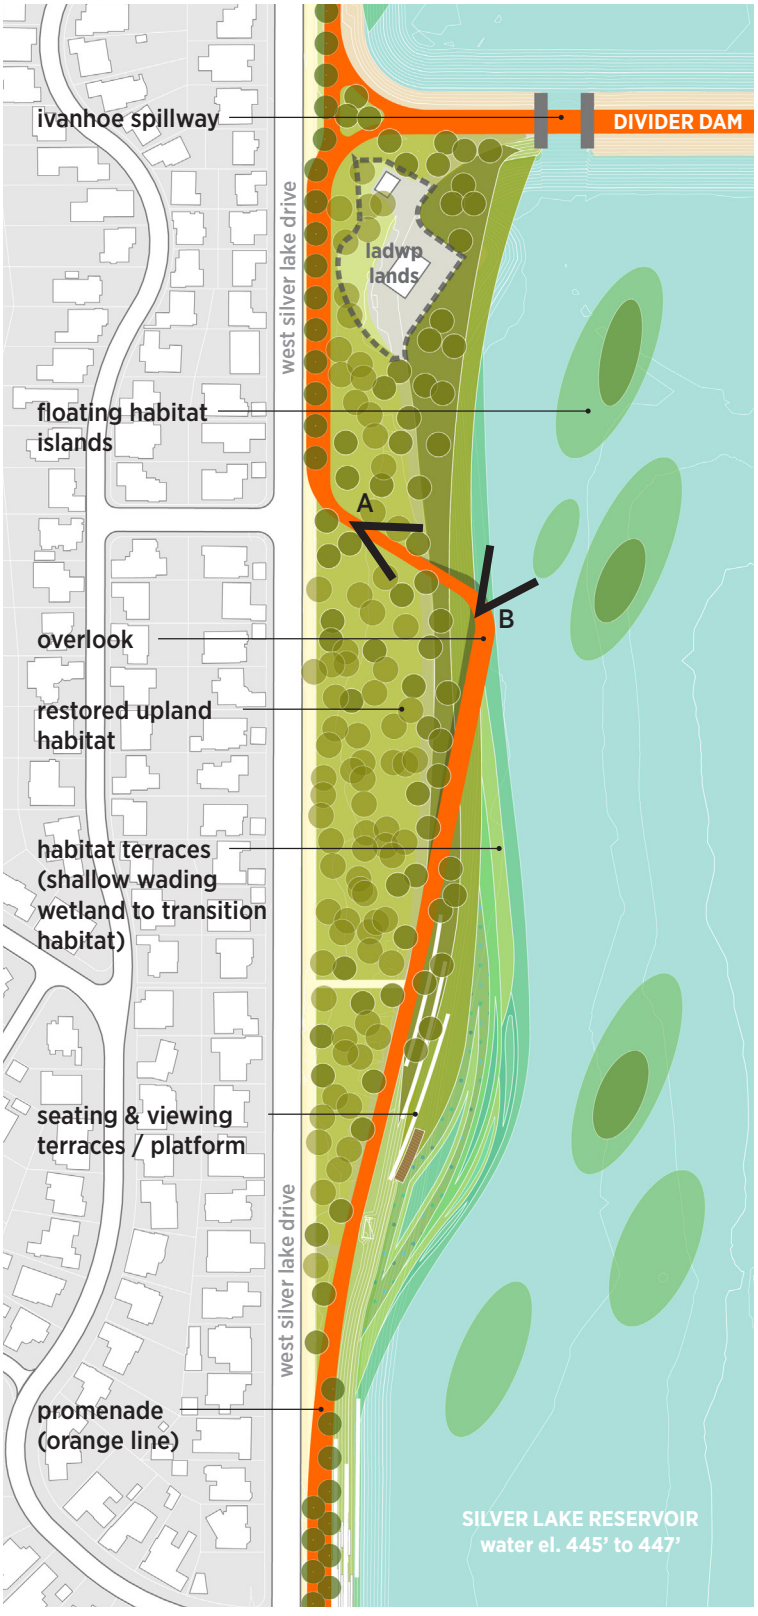
view B A wood deck platform at the northwest edge of Ivanhoe features a shade pavilion and integrated seating which functions as gathering space and outdoor classroom. Interpretative signs will provide information about wildlife and updates on research and monitoring activities, keeping the community connected to the park's ecosystem function and management.

5.2.5 The Eucalyptus Grove

The Eucalyptus Grove is currently a wooded area predominantly planted with Eucalyptus trees of varying age and health. The Master Plan proposes to replant this zone over time to enhance and restore its upland habitat value. All walkways throughout the Eucalyptus Grove will include low habitat fencing to protect sensitive habitat areas. See section 5.6.5 and Chapter 06 for more information on habitat fences.

At the edge of Eucalyptus Grove, habitat terraces stretch out beyond the existing embankment edge creating a gradient of upland, transition, and wetland ecologies. A large overlook extends out over these terraces, offering a unique perspective to observe the new wetland habitat and a prime place for birdwatching. At the overlook, interpretive and educational signage will be included. Floating islands are added adjacent to the Eucalyptus Grove to further enhance this area's biodiversity and provide protected habitat for foraging and nesting. Figure 5-7 provides a design plan of these features and elements.

The design intent of this area is to balance a portion of cut and fill to create the habitat terraces, supplemented by pile supported landscape structures. Within the DSOD area, fill may be required to build the habitat terraces.



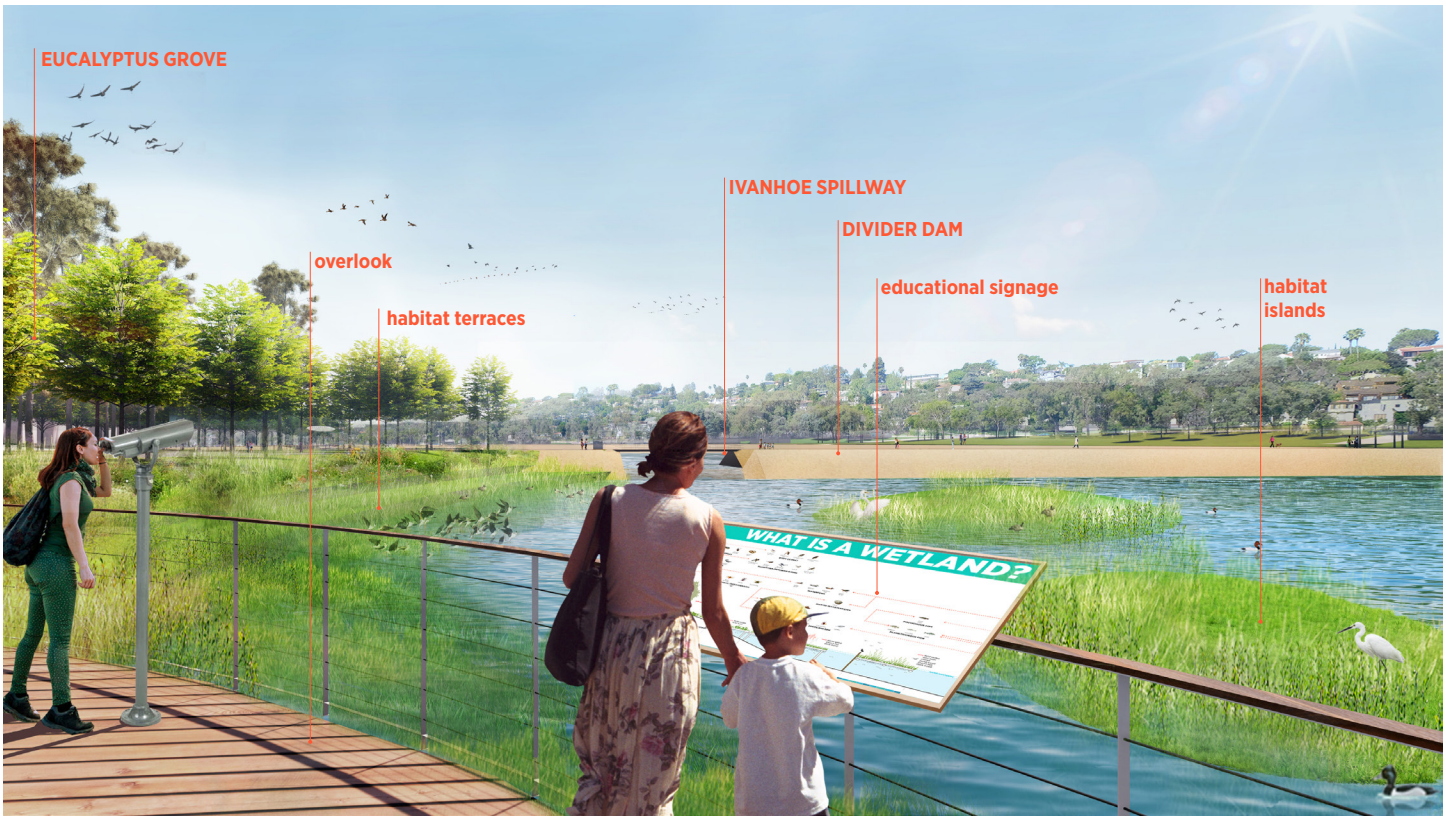


Figure 5-7 The Eucalyptus Grove Detailed Plan

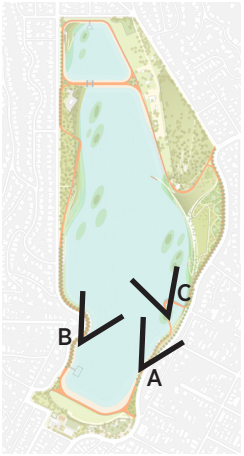
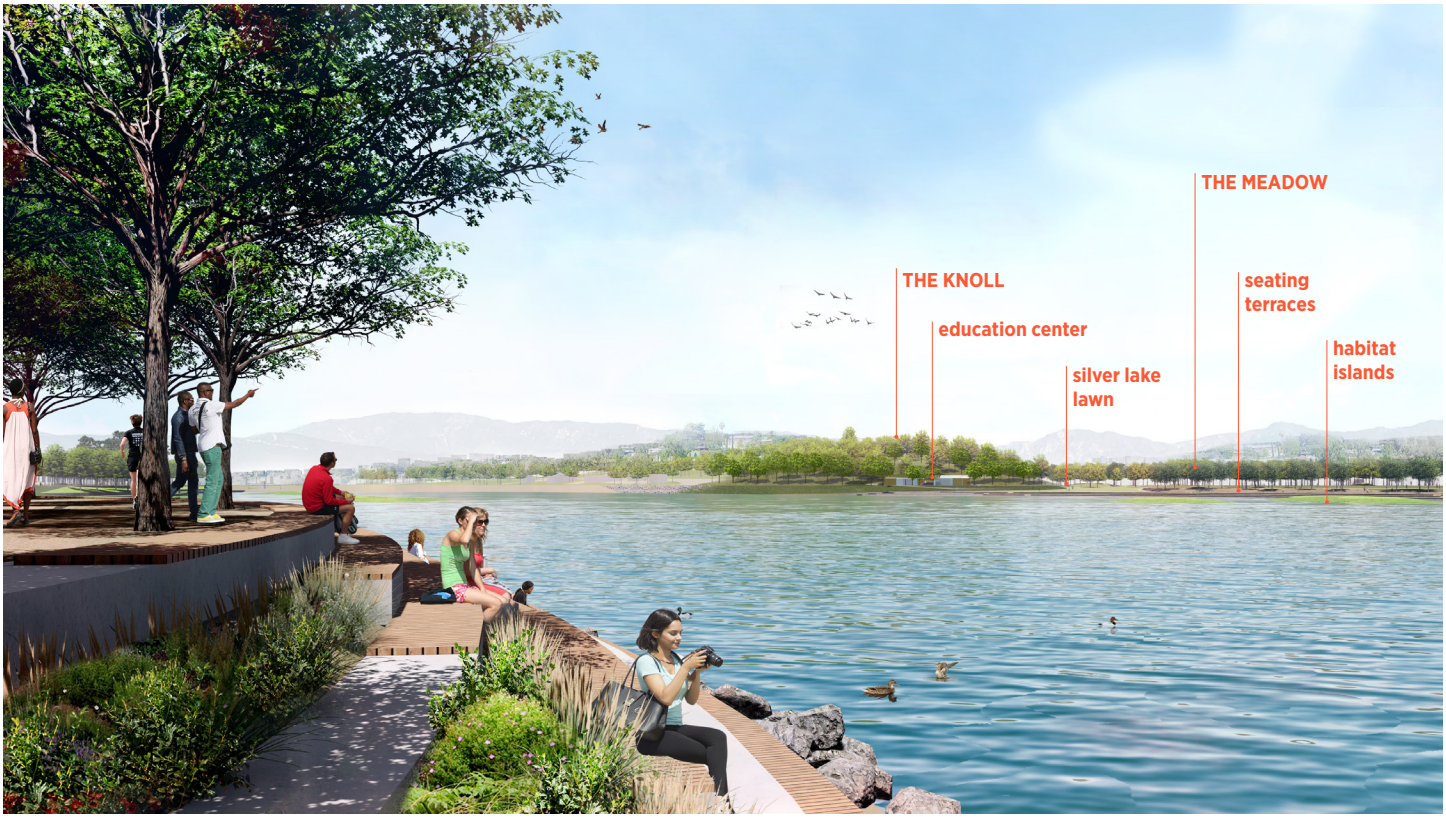


view A The Promenade narrows where the it crosses into the Eucalyptus Grove to minimize its footprint. The walkway is edged with habit fences to protect wildlife and the restored native woodland plant community. It connects to an overlook beyond.

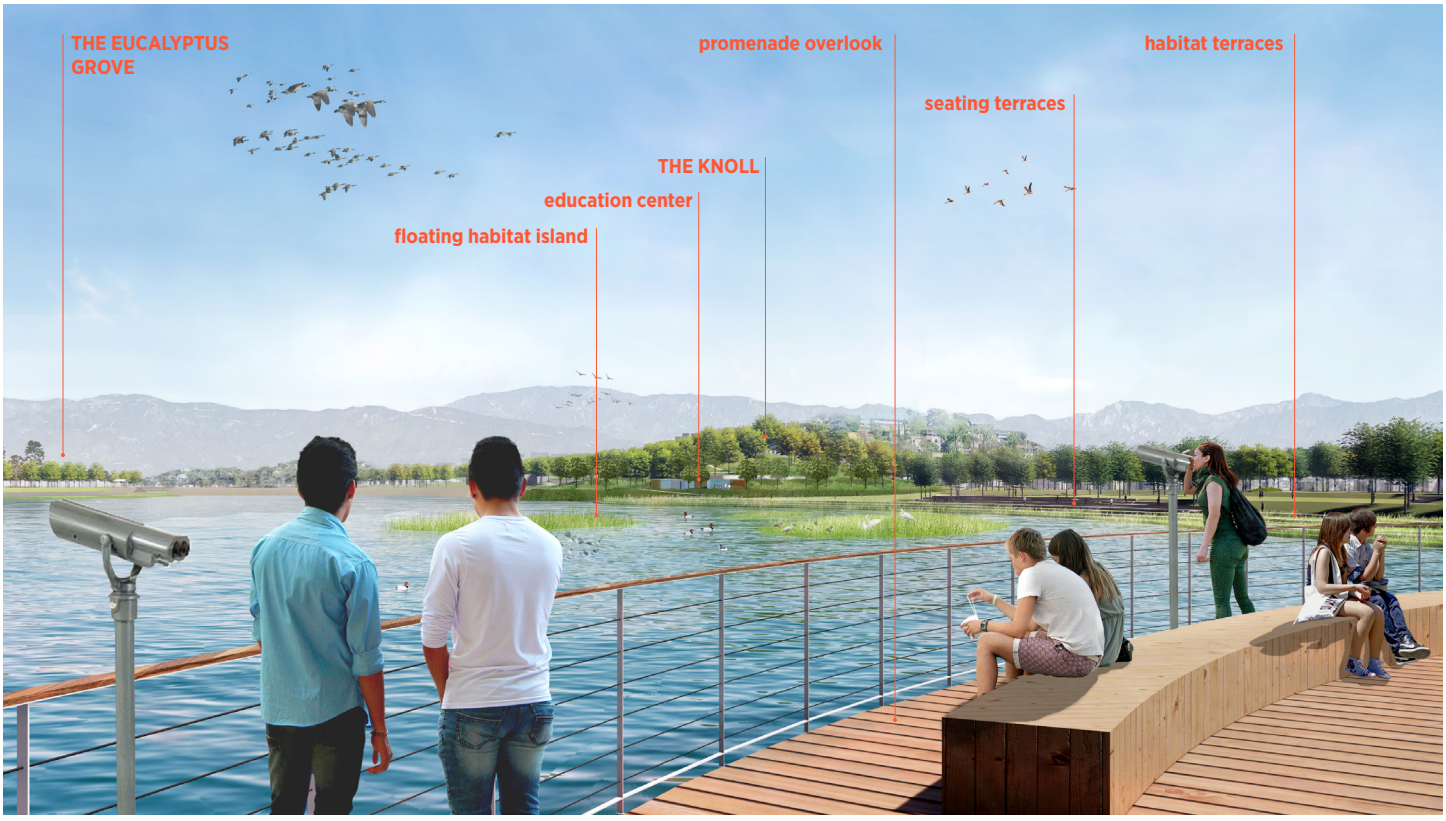
view B At the overlook, both wetland terraces and islands can be observed providing a superb location to learn about their habitat value and water quality function as well as the migratory waterfowl they support. This overlook is also equipped with free telescopes for bird watching and classes.

5.2.4 The East and West Narrows



The East and West Narrows are the narrowest sections of the site and run along the south edges of the Silver Lake Reservoir embankment. The primary feature of these linear corridors is the Promenade which includes overlooks and seating terraces at strategic locations to maximize views out and across the reservoir or to habitat islands.

On the East Narrows (Views A and C) along Silver Lake Boulevard a varying 3- to 4-foot grade separation from the road to the top of the embankment allows for a continuous seat wall to be added to the Promenade. There are also low, historic concrete walls along these road edges which will be recognized and incorporated into the Promenade design. Where the Promenade widens along the East Narrows, a fitness circuit is proposed, creating a connection to the Recreation Center. To amplify views across Silver Lake Reservoir to the San Gabriel Mountains in the distance, an elevated bridge swings out over the water and above a habitat island.



The West Narrows (View B) include seating terraces embedded into the embankment to provide seating for people to get to the water's edge and enjoy the expansive reservoir views. An allée of trees along the Promenade provides much needed shade and shelter.

view A Where the land between the reservoir and Silver Lake Boulevard widens, the Promenade incorporates a fitness circuit which is a connection to and extension of the Recreation Center in the South Valley. Small seating terraces step down the embankment slope creating a perfect perch for taking in amazing views and spectacular sunsets.

view B Stepped seating with coastal scrub gardens along the Promenade at West Silver Lake Boulevard offer sweeping views across the reservoir to the Knoll and Meadow.

view C An overlook bridge projects visitors out over the reservoir, offering views north across the water to the San Gabriel Mountains in the distance. With integrated seat walls and equipped with free telescopes, the overlook offers a great location for bird watching classes as well as observing seasonal migratory patterns.

5.2.6 The South Valley: The Silver Lake Recreation Center

Anchored on the corner of Van Pelt Place and Silver Lake Boulevard, a new Multi-Purpose Building / Community Center, which will house one indoor basketball court, creates a welcoming entrance to the Recreation and Parks area. An outdoor plaza with shade trees and both integrated and movable seating, connects the existing Recreation Center and playground to the new facility. To accommodate this new building, the existing basketball court and playfield are relocated to the north of the Multi-Purpose Facility. The existing picnic area is relocated to the west sloping lawn and additional trees are incorporated to provide shade.

The dog play area is expanded and renovated to include two separate spaces for both small and large dogs. The area is re-graded, and materials are updated from decomposed granite to synthetic turf – a more durable surface to accommodate the high use of these spaces. Integrated seating, benches and shade structures allow dog owners a place to sit and relax while their dogs play. See Figure 5-8 for a design plan of this area.

Minor reconfiguration improvements to the Recreation Center will be included to provide additional office and storage space. Both the new facility and proposed modifications to the existing Recreation Center are discussed further in Section 5.4 Buildings & Structures.

Figure 5-8 South Valley Detailed Plan

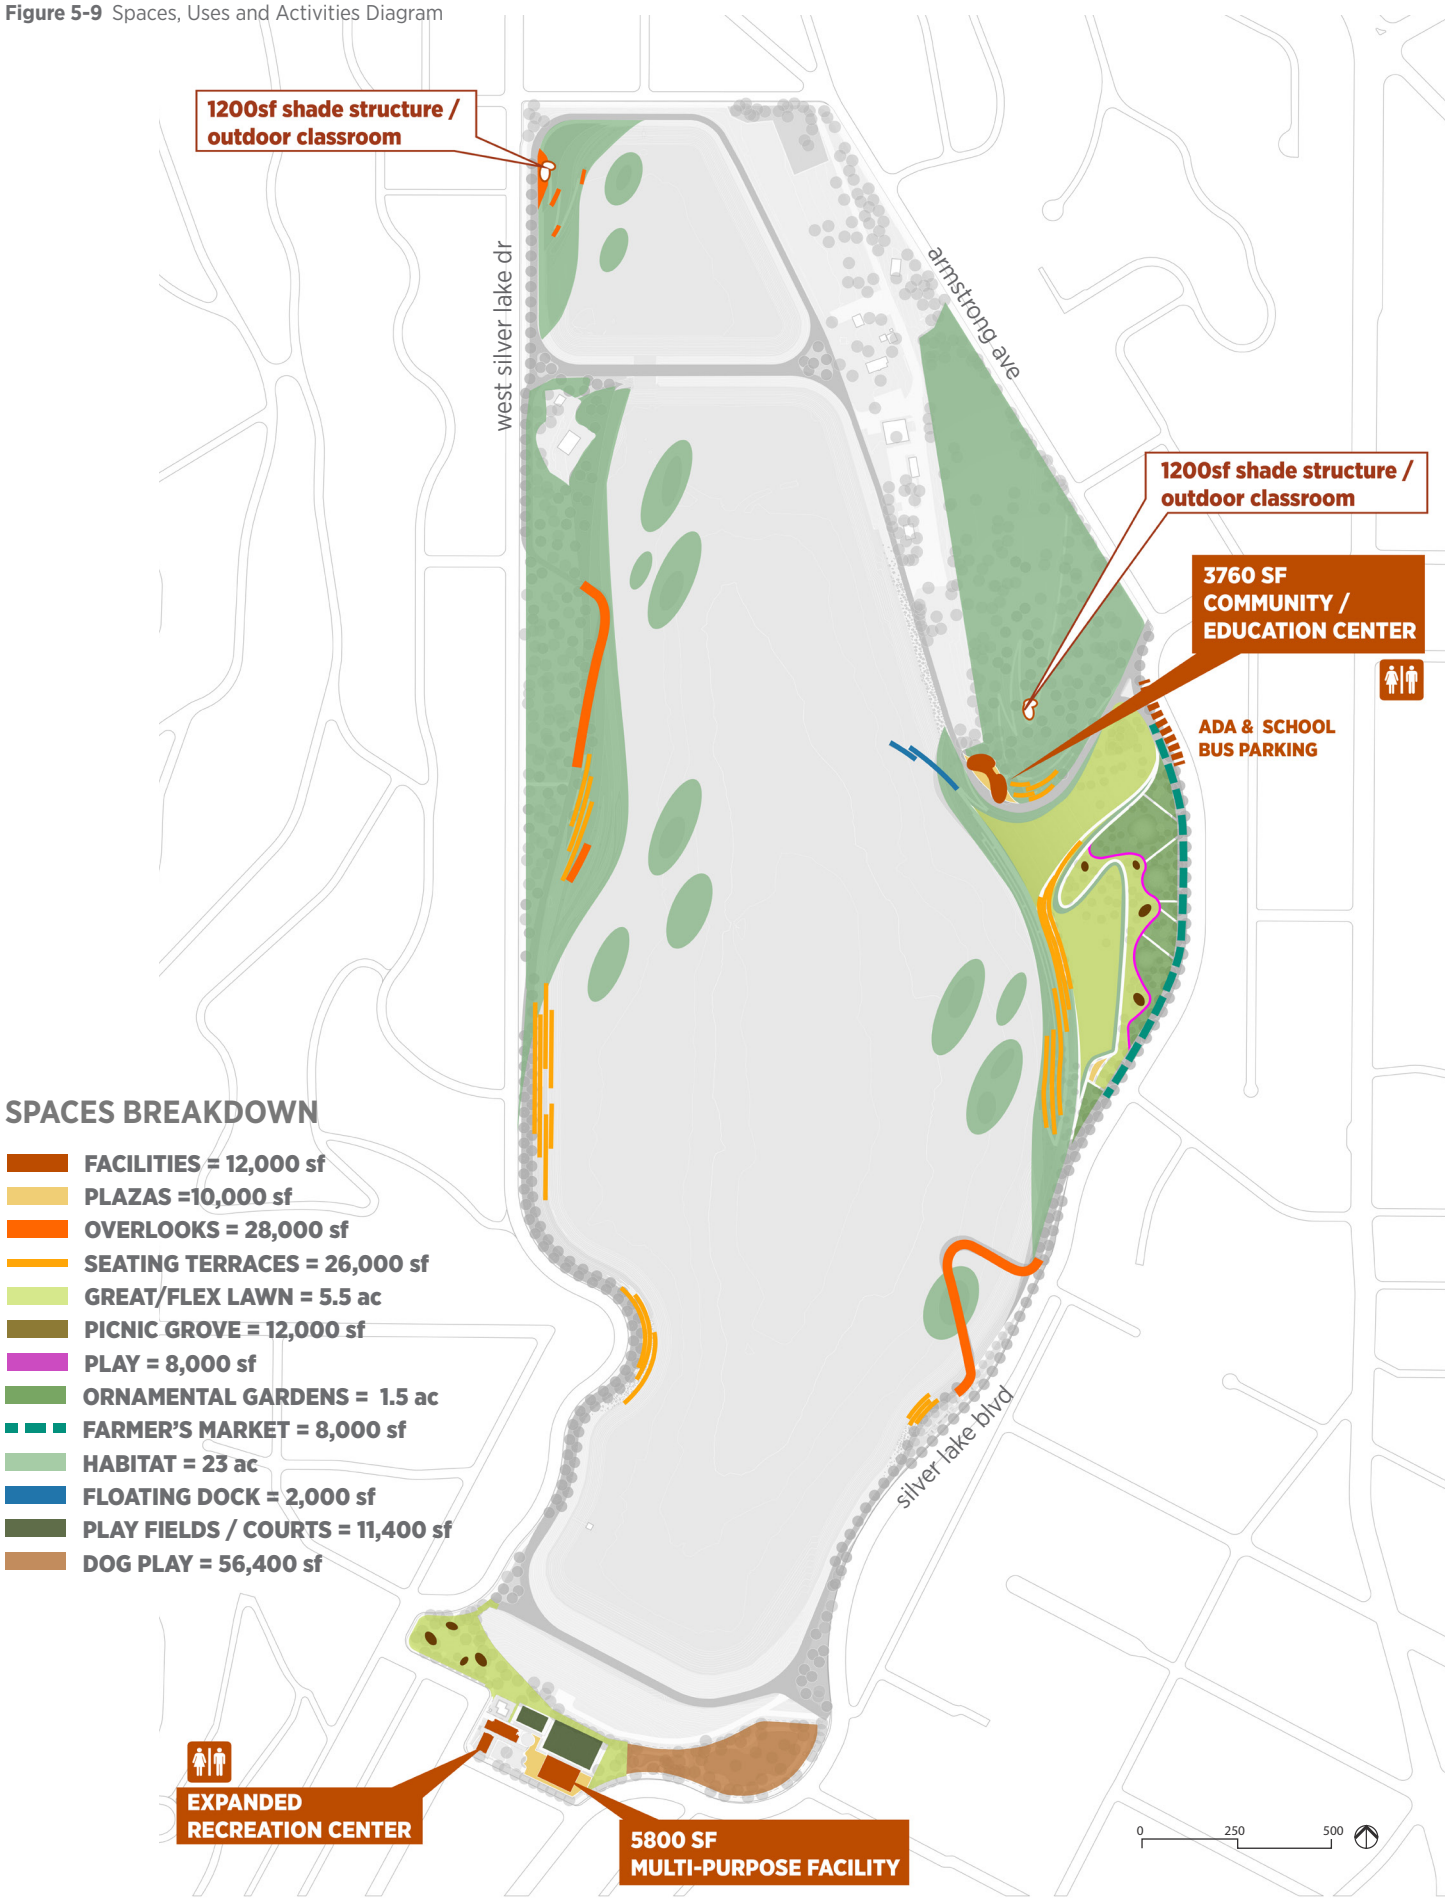
aerial This bird's-eye view shows the new Multi-Purpose Facility which anchors the southeast corner of the Recreation Center and relocated recreation field and basketball court.

view A The existing dog parks for large and small dogs are expanded and receive a major upgrade which includes durable artificial turf with play hills as well as new seating and shade trees and structures.

5.3 Spaces, Uses, and Activities

A balanced combination of spaces is needed to create a successful, multi-functional park. At the SLRC, these spaces will support a range of activities and uses based on the preferences of the community.

The most prominent community space is the Meadow. Here a 3.4-acre area of existing lawn and shade trees has been expanded to approximately 7.5 acres comprised of two lawn areas. These new flexible lawns can support a myriad of activities from the simplicity of cloud watching to large community events such as outdoor movies. At the lawn's edge, 12,000sf of picnic grove spaces provide a focal point for friends and family to gather next to 1.5 acres of ornamental gardens. Along Silver Lake Boulevard 8,000sf of the Promenade can accommodate regular or occasional farmer's markets.



Distributed throughout the Complex, along the water's edge are 26,000sf of seating terraces for wildlife observation, sunset viewing, or spending time with friends and neighbors. Allowing more heightened views of wildlife, the reservoirs, and regional hills and mountains are 28,000sf of overlooks ranging from large bridge-like walkways to small, intimate platforms. To support the educational goals of the Master Plan, a 3,760sf education center and two 1,200sf shade pavilions which can double as outdoor classrooms are located at the Ivanhoe Dam and The Knoll. A small floating dock is proposed next to the education center to facilitate experiential, ecological-focused learning.

At the existing Silver Lake Recreation Center, several new and renovated spaces are planned. To offer more community programs and supplement its sports programs, a new 5,800sf multi-purposed building is proposed along with 11,400sf of relocated play fields and courts and 56,400sf of renovated and expanded dog play.

The largest proposed spaces within the Master Plan design are for habitat and wildlife. A total of 23 acres of the complex are dedicated to the restoration of existing upland and creation of new transition and wetland habitats. A thorough discussion of theses spaces is provided in Chapter 06 Park Sustainability.

In sum, the Master Plan design includes a total of 33 acres of new useable space including 10 acres for active and passive recreation representing a 185% increase over what is currently offered at the Meadow. See Figure 5-9 for a breakdown of the spaces described above.

Figure 5-9 Spaces, Uses and Activities Diagram

5.4 Buildings & Structures

Four modest new structures will be constructed at strategic locations around the new Park to complement the daily activities of the park, provide assembly spaces for specific community activities, and offer shelter from the sun and rain. As visitors walk along the Promenade, these architectural nodes will help orient people and promote a sense of safety in the public open space. A sensible distribution of amenities is allocated to these structures with an emphasis on environmental education. In the South Valley, a new building will address the programmatic needs of a thriving Recreation Center.

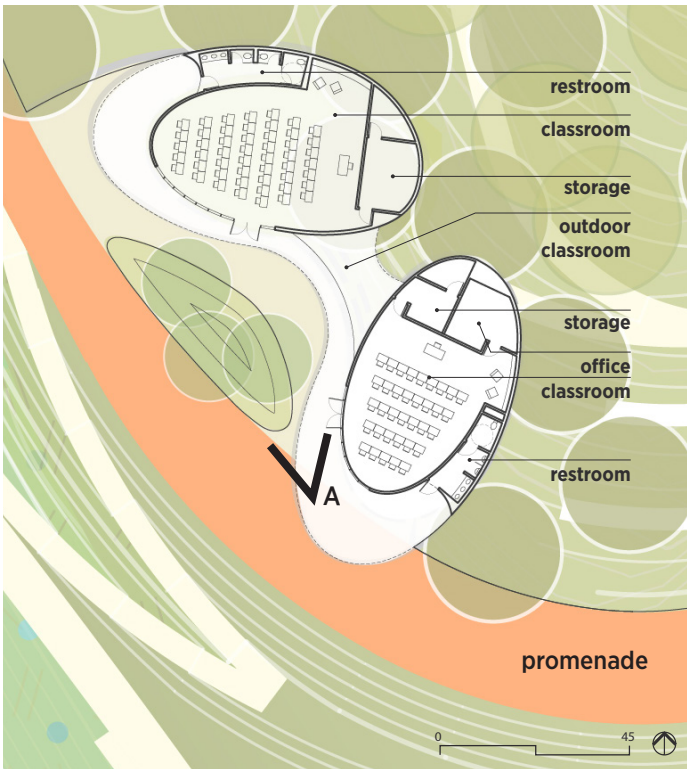
5.4.1 Architecture Concept

The three structures located within the Complex proper, an Education Center and two Shade Pavilions, have been envisioned as an architectural ensemble that relate in form to the new floating habitat islands proposed by the Master Plan and the mid-century modern architecture of the Silver Lake neighborhood. The scale of these structures is tuned to the residential character of the surrounding neighborhood, while their construction is commensurate with durable, long-lasting public facilities. Their architectural expression is contemporary and relies on natural materials to blend into the surrounding landscape. As an ensemble, the three structures add coherency to the hierarchy of the Park, creating places of pause and connection to nature as well as one another.

The goals of the Master Plan include the highest degree of environmental quality. The climate of Los Angeles requires precise sustainable strategies that generate an energy-efficient, cost-effective, and meet City standards.

aerial The Knoll wraps around, over, and through the Education Center creating a seamless transition between landscape and architecture.

Figure 5-10 Education Center First Floor Plan



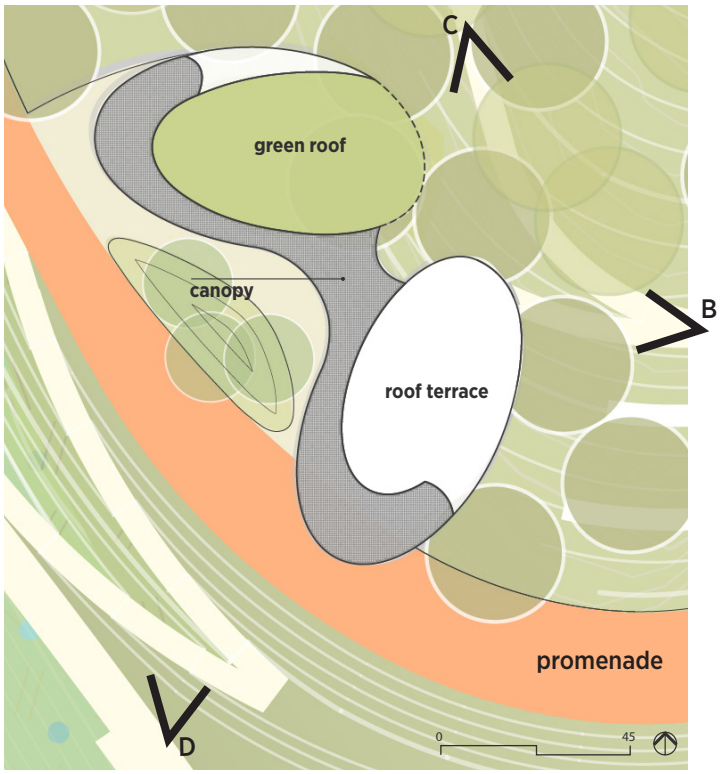


Figure 5-11 Education Center Roof Plan

5.4.2 Education Center

The Master Plan design includes an Education Center at the base of The Knoll, overlooking Silver Lake Reservoir. Located along the Promenade, adjacent to the Silver Lake Lawn, and easily accessible from Silver Lake Boulevard, the Education Center consists of a residential-scale building and seating terraces that are integrated in the topography of The Knoll and oriented to embrace views of the water.

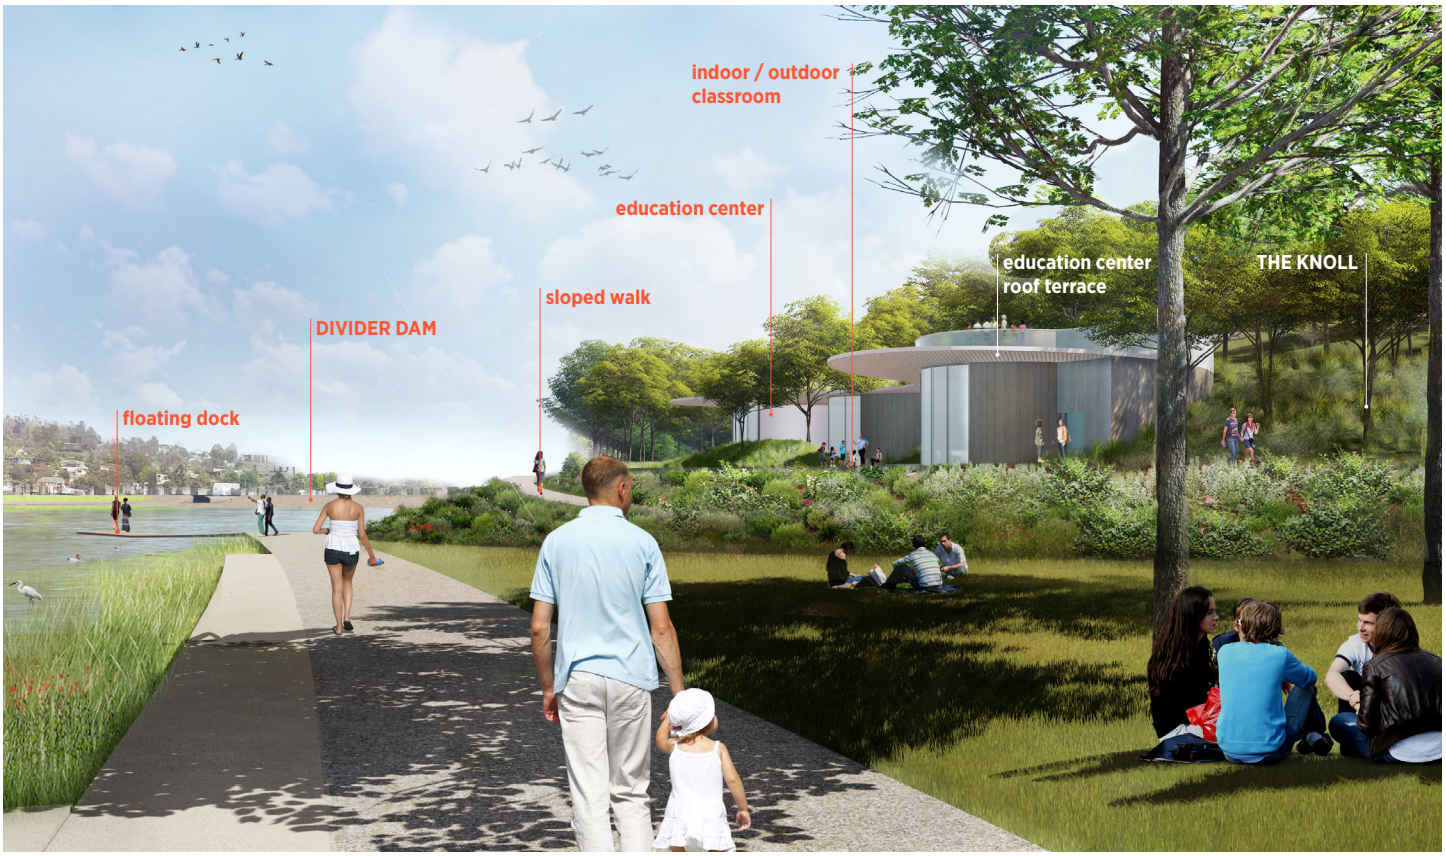
The Education Center design includes small indoor and outdoor teaching and assembly spaces, where the unique opportunity of the Silver Lake Reservoir Complex – the re-establishment and management of a healthy ecosystem within the context of an urban park - can be introduced, discussed, and studied by visitors of all ages. It is meant to complement the educational space that is the Complex itself, a place where people can gather at the start and end of their visit, including school children on a field trip as part their environmental curriculum.

As shown in Figure 5-10, the Center contains two interior classrooms with a view of the water through a partially glazed, operable facade that open the teaching spaces to the exterior. The large classroom is a little over 1,400sf and can sit 50 people. A slightly smaller classroom is approximately 1,000sf with a capacity of 35 people. The Center also contains a 180sf office for staff, and storage rooms of 195 and 100 square feet adjacent to each classroom. Public restrooms, which are directly accessible from the Promenade, serve the Park as a whole.

The roof of the Education Center (Figure 5-11) is both a landing point along the path leading to the top of The Knoll, with a roof terrace overlooking the reservoirs and an extension of the landscape with a green roof connected to The Knoll's western slope. The Knoll envelopes the building, sliding through an opening between the two classrooms, creating a small, shaded amphitheater at the heart of the facility.

A shade canopy protects the amphitheater and extends over a plaza fronting the Education Center, creating a comfortable place for people to congregate on their journey around the Complex. The landscape of The Knoll spills onto the plaza in the form of a berm planted with native woodland trees.

As a education tool and demonstration feature, it is particularly important that the new Center be built to be environmentally sustainable. The building is clad in recycled wood, and optimizes natural ventilation, daylighting, and rainwater harvesting while minimizing heat island effects with shade trees.



view A The architecture provides an indoor/outdoor experience with sliding glass panels that open up to allow the classrooms to extend out into the landscape. The Knoll landscape cascades between the two classrooms with small seating terraces incorporated.

view B Moving up through The Knoll landscape, a path peels off to connect to the roof terrace of the education center providing a place of pause and lookout as well as a gathering space for outdoor education.

view C Moving down from the top of the Knoll, expansive views are framed by a dense tree canopy out and over the education center to the reservoir.

view D From the base of Silver Lake Lawn, a layering of vegetation leads from the waters edge, to the Promenade, and up to The Knoll. The education center sits within The Knoll and blends into the landscape.

5.4.3 Shade Pavilions

At the top of The Knoll, a shade pavilion shelters a promontory with a stunning view of the Silver Lake Reservoir, and a glimpse of the Education Center roof below. This pavilion is an amenity for all visitors climbing to the top of The Knoll, the highest point of the reservoir complex. It is also an extension of the Education Center as an outdoor classroom space for a group of 20 to 30 people providing shade and seating. A second pavilion is located at the Ivanhoe Overlook, another opportune place for visitors and students to gather during their excursion to the Complex. The pavilion is designed and positioned as a gateway to footpaths that descend through new wetland terraces and down to the Ivanhoe Reservoir where visitors will be able to touch the water and observe the flora and fauna up close.

The oval forms and materials of the shade pavilions are born out of the architecture of the Education Center, of which they are satellites.

5.4.4 Multi-Purpose Facility

Master Plan analysis identified a need for expanded facilities at the Silver Lake Recreation Center to better meet the needs of the community. A central piece of the Recreation Center expansion is the addition of a new Multi-Purpose Facility to replace the existing undersized gymnasium, which will become dance and art studios.

The proposed 5,800sf facility is located at the corner of Silver Lake Boulevard and Van Pelt Place and frames a new, intimate plaza at the heart of the recreation campus. Wrapping around the free-standing Multi-Purpose Facility, the plaza provides an inviting entrance from Van Pelt Place at mid-block and at the corner of Silver Lake Boulevard. Large windows face the street and offer views of the activities inside. The building can be entered from the east and the west through wide, glass roll-up doors that can remain open on most days of the year.

Its simple architecture is designed to fit well in the context of the existing recreation center with its traditional Spanish style. The new building has a gabled weathering steel roof with a rust color similar to the clay tiles of the existing building. The facade is clad in wood and the underside of the timber roof structure is exposed inside and outside as it cantilevers over the entry plazas to provide shade and weather protection for continuous seat walls facing the relocated play field to the north and the street to the south. The new building is conceived to be environmentally sustainable by using recycled, renewable, and local materials and optimize natural ventilation and daylighting.

The building is sized to support a variety of programming amenities including an elementary school basketball court of 74 feet by 42 feet. The north side of the court will be lined with three rows of seating risers. Its built-in sports equipment will include retractable basketball hoops, a volleyball net on removable posts doweled into the floor, demountable indoor soccer nets and an electronic scoreboard. In addition to housing youth sports activities, the Multi-Purpose Facility can be used as an assembly space for various community events and as a polling station. See Figure 5-13 for a design plan of the Silver Lake Recreation Center improvements.

Figure 5-13 New Silver Lake Recreation Center Detailed Plan

view A Around the new Multi-Purpose Facility, an outdoor plaza welcomes the community from Van Pelt Place and connects to the existing Recreation Center and Playground.

5.4.5 Existing Recreation Center Upgrades

The existing Recreation Center needs an expansion and remodel to respond to the increasing neighborhood demand for youth activities. The new Multi-Purpose Facility will allow the South Valley to work contiguously with the SLRC in terms of programming and neighborhood life.

The exterior of the existing building will be preserved and repainted while its interior will be remodeled to create new spaces. The windows and doors may have to be replaced to meet current energy code requirements, and the building structure may have to be upgraded to meet current seismic code. Four glass skylights, approximately 4 feet by 8 feet, will be added to the roof of the existing gymnasium in order to be repurposed.

The south wing of the building will be devoted to administrative functions and services. It already contains restrooms, which will be upgraded, and the existing meeting room will be used for staff offices. The north wing will be almost entirely devoted to new and improved activities. With the addition of the larger Multi-Purpose Facility, the existing high-bay gymnasium will be transformed into a series of activity spaces. A mezzanine will be added, served by a new exterior stair and elevator, to house a new Art Studio which will overlook a new two-story tall Dance Studio below, with resilient wood flooring, mirrors and ballet bars. The kitchen will be relocated under the mezzanine and improved with new counters, cabinets and equipment. Next to the kitchen will be to a new Game Room. The space vacated by the kitchen will be converted into a storage room. See Figures 5-14 and 5-15 for conceptual sections of the proposed space reallocations.

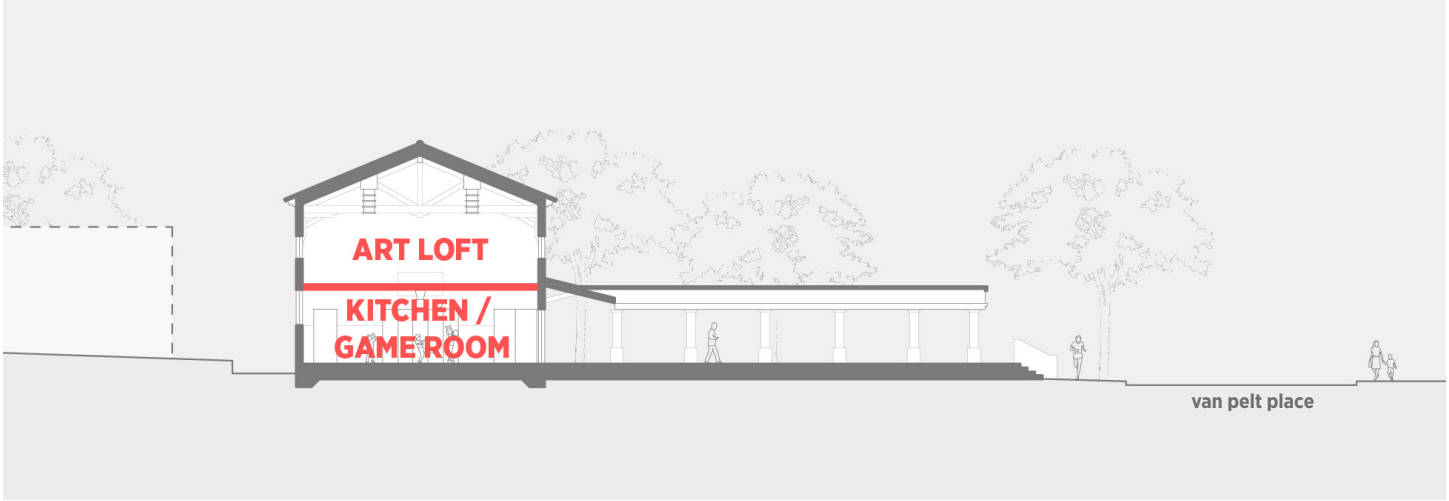


Figure 5-14 Proposed North-South Section through Recreation Center

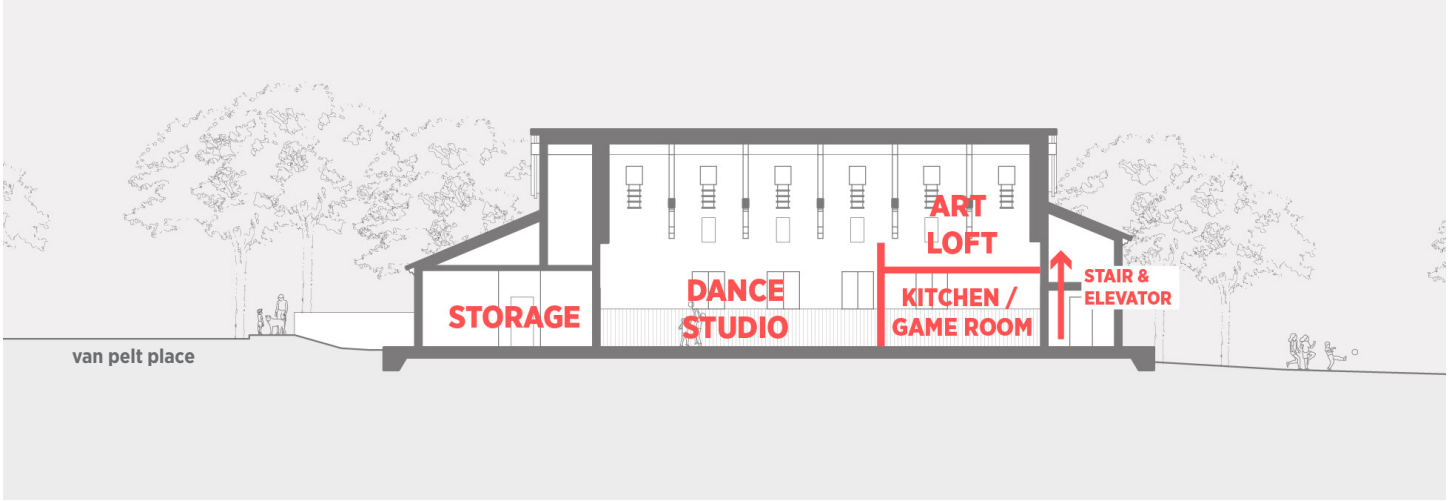

Figure 5-15 Proposed East-West Section through Recreation Center

5.5 Historic-Cultural Monument Designation Analysis

As noted in Chapter 02, the Silver Lake Reservoir Complex is designated as a Los Angeles Historic-Cultural Monument (HCM No. 422) and subject to the Los Angeles Cultural Heritage Ordinance and consequent compliance with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards).

These Standards consider the impact of proposed alternations to a historic property on its character defining features. The proposed Master Plan design was evaluated against the Standards for compliance. Note, not every Standard will apply to every aspect of a given project, nor is it necessary to comply with every Standard to achieve compliance. Below is a summary of a more detailed analysis located in the Master Plan Report Appendices.

Standard 1. ***A property will be used as it was historically or be placed in a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships.***
The proposed site plan complies with Standard #1 because the new use will require minimal change to the defining characteristics of the property and its environment. The reservoirs will remain large open bodies of water and other character defining land uses such as the Knoll and Eucalyptus Grove will be preserved overall. Features and spaces that will be substantially altered do not date from the period of significance and are therefore not character defining. These include the Silver Lake Meadow.

Standard 2. ***The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property will be avoided.***
The proposed site plan complies with Standard #2 because the historic character of the property will be retained and preserved overall. Character-defining features that will be altered as part of the Master Plan design include the embankments and perimeter paths of the Ivanhoe and Silver Lake Reservoirs which will not diminish the historic character of the complex overall.

Standard 3. ***Each property will be recognized as a physical record of its time, place, and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.***
The SLRC Master Plan has developed conceptual designs that comply with Standard #3. New features will be adequately differentiated as new by their design, modern assembly, and hardware. They will not create a false sense of historical development.

Standard 4. ***Changes to a property that have acquired historic significance in their own right will be retained and preserved.***
The proposed site plan complies with Standard #4, as none of the changes to the Complex since 1953 have acquired significance in their own right.

Standard 5. ***Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.***
The proposed site plan complies with Standard #5 because distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize the property will be preserved. Features and finishes that will be removed generally

consist of utilitarian and common materials, such as the concrete and asphalt paving at the embankments and perimeter paths. Although Ivanhoe and Silver Lake Reservoir embankments will be altered, neither is an example of distinctive construction techniques.

Standard 6. ***Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.***

The proposed site plan complies with Standard #6 to the extent feasible. The replacement of missing historic features is not proposed and the only deteriorated historic features that will be removed and replaced are the mature trees located throughout the complex that have reached the end of their natural lifespans.

Standard 7. ***Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.***

The proposed site plan complies with Standard #7 because no treatments that would cause damage to historic materials are proposed.

Standard 8. ***Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.***

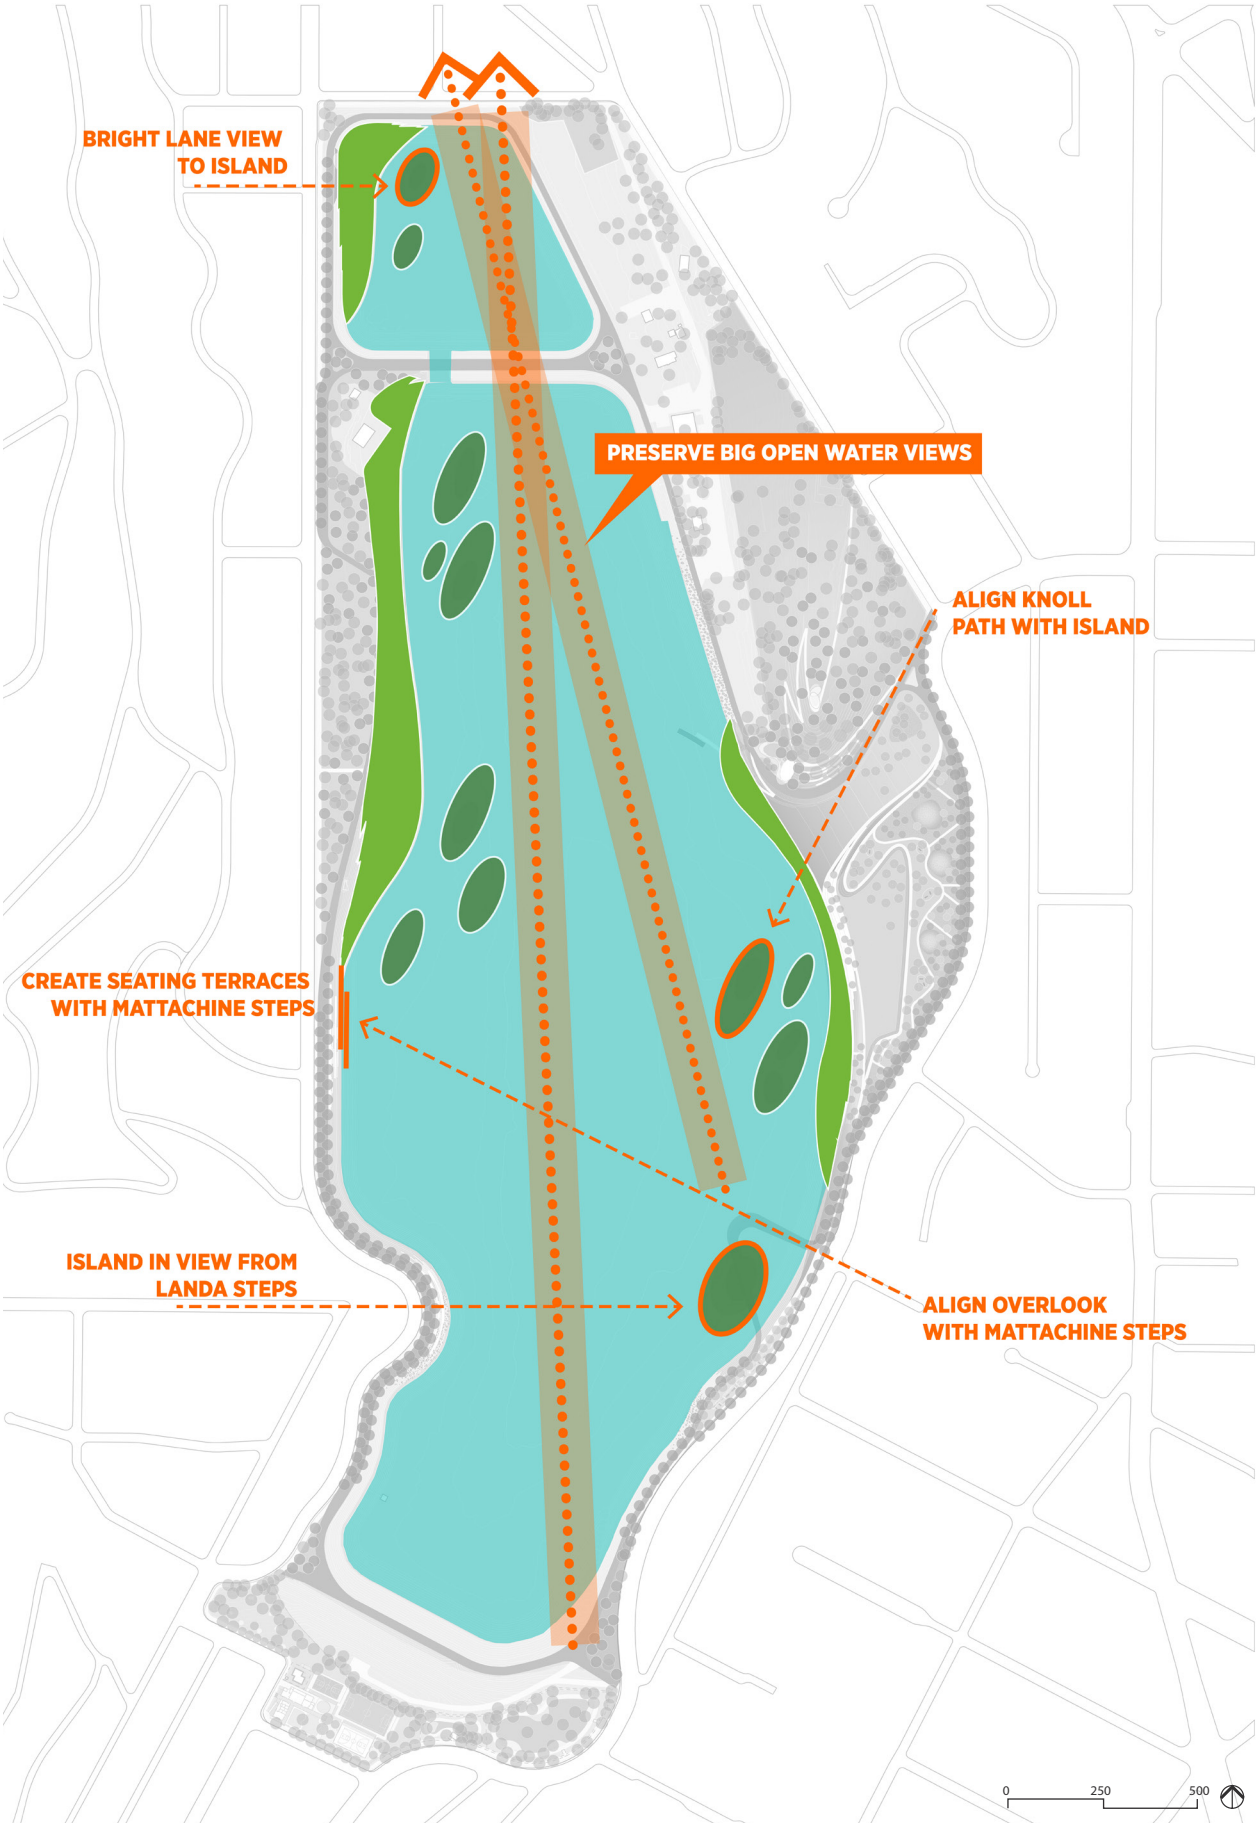
The proposed site plan complies with Standard #8 because there are no known archeological resources within the Complex.

Standard 9. ***New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.***

The proposed site plan complies with Standard #9. New construction is properly located within the complex and because of the variations in the topography and the overall scale of the complex, new features, including three proposed new structures will not dominate the complex's significant view sheds. New features and structures are modest in massing, size, and scale as well as differentiated from the old by their modern design and assemblies.

Standard 10. ***New additions and adjacent or related new construction will be undertaken in such a manner that if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.***

The proposed site plan complies with Standard #10. New additions and related new construction are freestanding. Therefore, if removed at a later date, the essential form and integrity of the Complex and its environment would be unimpaired.



When reviewed against the Standards, the proposed Master Plan design complies with the intent and guidance set forth.

The Master Plan design was inspired in great part by its rich history from a freshwater marsh and intermittent pond within Ivanhoe Canyon to a significant and iconic piece of Los Angeles water infrastructure. It is with measured attention that traces of this evolutionary trajectory are made visible in the contemporary expressions of the complex's vision and future.

PRESERVING VIEWS

As noted in Chapter 03, views within and around the SLRC are varied from small, layered views to large, significant views across the water bodies to the surrounding mountains. Elements in the Master Plan design are located to preserve these big, open water views while creating visual interest and connections between the neighborhood and the proposed park. Two big open water views were identified which should be preserved as shown in Figure 5-16 and for which the floating wetland habitat islands anchorages will need to accommodate. Smaller, but significant relationships between Park elements and the surrounding neighborhood are also depicted in Figure 5-16.

Figure 5-16 View Diagram

5.6 Park-Wide Systems

The Complex will be defined by several overlapping park-wide systems integral to its character and function. These systems create the common threads that link the Park's diverse spaces and landscapes together, and provide a unique overall identity specific to the Silver Lake Community. Frameworks have been developed at a Master Plan level for the following park-wide systems: Planting, Circulation, Lighting, Embankment Edge, and Fencing and Guardrails.

this page is intentionally left blank

5.6.1 Planting

The planting design for the Silver Lake Reservoir Complex is founded on the community's aspirations to connect with nature and maximize habitat for wildlife. It is also aligned with the City's New Green Deal goals of increasing tree canopy and protecting native biodiversity.

The planting palettes in the following pages draw inspiration from the rich riparian and foothill landscapes of Southern California and represent an intersection of four distinct regional ecological zones: southern oak woodland, riparian woodland, coastal sage scrub, and freshwater wetland. The Park's planting approach expresses this rich ecological intersection throughout eight planting zones ranging from gardens within the Promenade, Ornamental Gardens, and the Embankment to habitat areas.

All habitat plant communities will be comprised of native species representative of the above regional ecologies to support wildlife foraging and nesting. The garden areas will be a combination of native and drought tolerant species appropriate to the Los Angeles region to provide visual and seasonal interest within the Park and provide a plant palette adapted to climate change.

In combination, the native and non-native plantings will represent a significant horticultural collection with educational opportunities to foster partnerships with arboreta, botanical gardens, and universities. Lawn is used sparingly and strategically distributed where needed to support multi-function cultural and recreational uses. See Figure 5-16 for a plan of the planned planting zones.

Figure 5-17 Planting Diagram

PLANTING ZONE: Promenade Sample Palette

The design intent for the Promenade planting is to define this corridor as a singular element as it wraps around and through the Park. A single tree species should be specified for this element that provides shade, is native or adapted, uniform in habit, and medium to fast growing. The Promenade trees will be planted in linear rows. The understory of the promenade should be planted with a palette that reflects a native coastal scrub ecology, is pollinator positive, and is suitable as ornamental planting and infiltrating stormwater runoff from the Promenade. A sample palette of plants for the Promenade is provided below.

TREES

Alamo Sycamore
Platanus mexicana 'Alamo'

California Sycamore
Platanus racemosa

Pasadena Oak
Quercus engelmannii

Drake's Chinese Elm
Ulmus parvifolia 'Drake'

SHRUBS & GROUNDCOVER

common name	*scientific name*
Yarrow	*Achillea millefoium*
Tufted Hairgrass	*Deschampsia caespitosa*
Bush Sunflower	*Encelia californica*
Elk Blue California Gray Rush	*Juncus patens 'Elk Blue'*
Dwarf Mat Rush	*Lomandra longifolia 'Breeze'*
Deer Grass	*Muhlenbergia rigens*
White Sage	*Salvia apiana*
Cleveland Sage	*Salvia clevelandii*

PLANTING ZONE: Picnic Grove Sample Palette

Planting for the Picnic Grove should be a simple palette with a mix of medium to large, deciduous and evergreen trees punctuated with a smaller, flowering accent tree. Trees should be planted in loose groupings to create a diversity of sun and shade in this area. The understory is envisioned as a no-mow grass blend tolerant of foot traffic. A sample palette of plants for the Picnic Grove is provided below.

TREES

Coral Gum
Eucalyptus torquata

Modesto Ash
Fraxinus velutina var. glabra

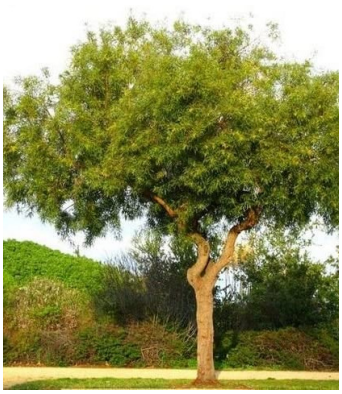
Torrey Pine
Pinus torreyana

SHRUBS & GROUNDCOVER

No mow grass blend

PLANTING ZONE: Ornamental Gardens

The design intent for the Ornamental Gardens is to provide a mix of native and adapted species with high pollinator and wildlife value as well as a seasonal diversity. Trees should be a blend of deciduous and evergreen species of varying size. The understory is proposed as a meadow of drought-tolerant grasses and succulents to provide year round interest. This meadow is punctuated by a series of depressions, or Dells, that will function as rain gardens and planted with native, pollinator positive, flowering species to provide a burst of seasonal color. A sample palette for the Ornamental Gardens is provided below.

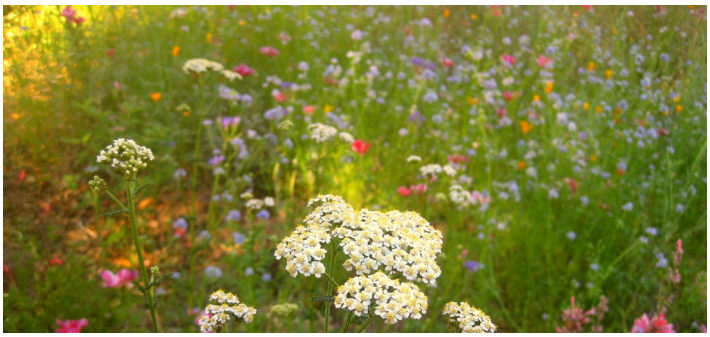


TREES

Arbutus
Arbutus x 'Marina'

Catalina Ironwood
Lyonothamnus floribundus ssp asplenifolius

African Sumac
Rhus lancea



Tipu Tree
Tipuana tipu

Doug Iris	*Iris douglansiana*
Sticky Monkey Flower	*Mimulus aurantiacus*
Hummingbird Sage	*Salvia spathacea*
Woolly Blue Curls	*Trichostema lanatum*

PLANTING ZONE: Lawn

The lawns are intended to be flexible spaces with a mix of sun and shade provided by large shade trees tolerant of some irrigation needed for the lawn grass. Trees should be a blend of medium to large, deciduous and evergreen species chosen for their stature and seasonal color. They should be planted in loose groups of single and mixed species. The lawn species must be suitable to sun and shade conditions, hardy, and tolerant of high foot traffic. A sample palette for the Lawns is provided below.

TREES

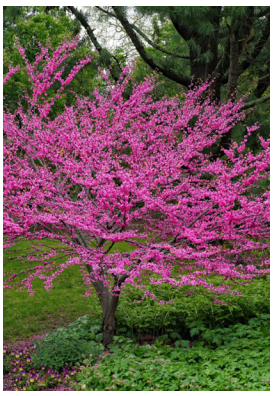
Evergreen Ash
Fraxinus uhdei

Blue Jacaranda
Jacaranda mimosifolia

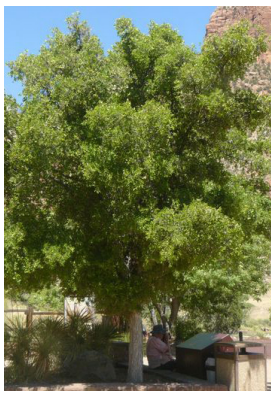
California Sycamore
Platanus racemosa

Big Leaf Maple
Acer macrophyllum

LAWN



turf grass
hybrid bermuda grass



PLANTING ZONE: Upland

Trees in the Upland habitat zone should be a mix a native, deciduous and evergreen trees of varying sizes selected for their wildlife and biodiversity value. The understory is intended to be comprised of a drought-tolerant, native species indicative of a woodland / coastal scrub ecotone. A high proportion of these plants should be fruiting species to provide wildlife food resources as well as nesting habitat. A sample palette for the Uplands habitat zone is provided below.

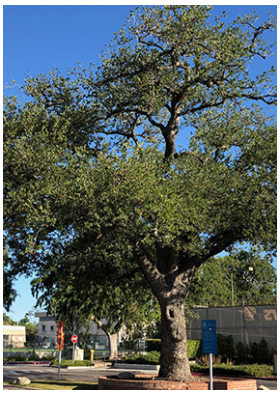
TREES

Western Redbud
Cersis occidentalis

Western Hackberry
Celtis reticulata

Catalina Ironwood
Lyonothamnus floribundus ssp aspleniifolius

California Sycamore
Platanus racemosa



Torrey Pine
Pinus torreyana

Catalina Cherry
Prunus ilicifolia ssp. lyonii

Coast Live Oak

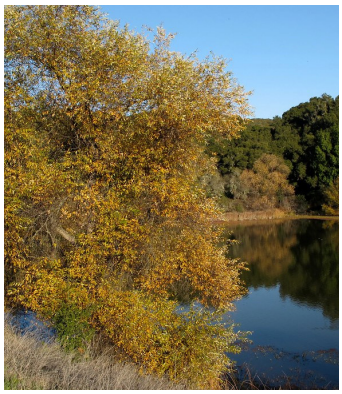
PLANTING ZONE: Transition

Plants in the in the Transition habitat zone should be a blend of native species indicative of an ecotone between upland and wetland ecologies. The trees should be a mix of deciduous and evergreen species of varying sizes selected for their wildlife and biodiversity value. A high proportion of the understory plants should be fruiting species to provide wildlife food resources as well as nesting habitat. A sample palette for the Transition habitat zone is provided below.

TREES



White Alder
Alnus rombifolia

Bigberry Manzanita
Arctostaphylos glauca

Fremont Cottonwood
Populus fremontii

Red Willow
Salix laevigata

Coon's Tail	*Ceratophyllum demersum*
Duck Weed	*Lemna minor*
Pond Weed	*Potamogeton nodosus*

PLANTING ZONE: Embankment / Slopes

Plant species used to replace the existing embankment edge and on other steep slopes in the Park should be native, coastal scrub species suitable for up to 2:1 slopes. These plants should be moderately low-growing and also offer wildlife and pollinator value. A sample palette for the embankment and slopes is provided below.

SHRUBS & GROUNDCOVER

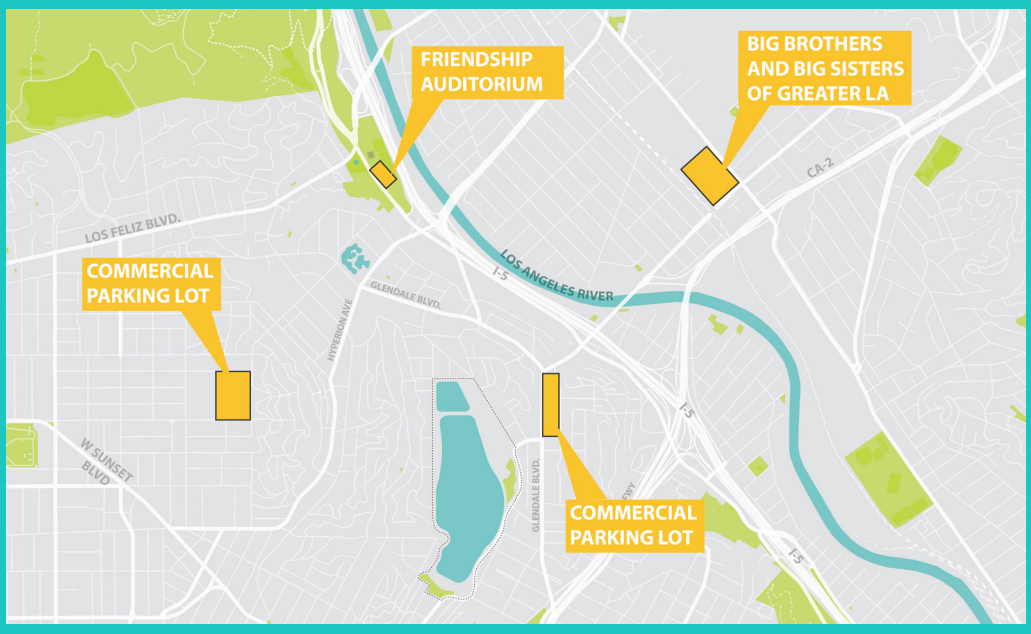
common name	*scientific name*
California Sagebrush	*Artemisia californica*
Dwarf Coyote Bush	*Baccharis pilularis 'Pigeon Point'*
Buffalograss	*Buchloe dactyloides*
California Buckwheat	*Eriogonum fasciculatum*
Hummingbird Sage	*Salvia spathacea*

5.6.2 Circulation

A hierarchy of pedestrian paths provide universal access throughout the Complex which includes: The Promenade, the Primary Paths, and the Secondary Paths. Connections to the Park from the surrounding neighborhood were informed by the existing bus stop locations along West Silver Lake Drive (201) and Glendale Boulevard (92) as well as the existing pedestrian pathways in the neighborhood. This network is depicted by Figure 5-18.

To allow for universal access to park amenities as well as accommodate larger group education programs, an accessible vehicle and bus parking location has been identified at the corner of Silver Lake Boulevard and Armstrong Avenue. To create safe points of entry into the Park, new pedestrian-activated flashing beacon crossings are proposed along Silver Lake Boulevard and West Silver Lake Drive (Figure 5-18). The pathways described below are intended to be pedestrian only with bike circulation around the perimeter.

THE PROMENADE



The Promenade is a 2.5-mile continuous walking / running loop connecting all the park zones to one another and the reservoirs. The Promenade is envisioned as both place and connector. On average, it will be 25-feet wide with generous seating and 5-feet wide ornamental planting bands along its edges. These will double as rain gardens during winter months. At a minimum, the Promenade will maintain a 15-foot clear pathway for LADWP maintenance and operations. See Figure 5-19 and it's related conceptual sections for more information on the Promenade design.

THE PRIMARY PATHS

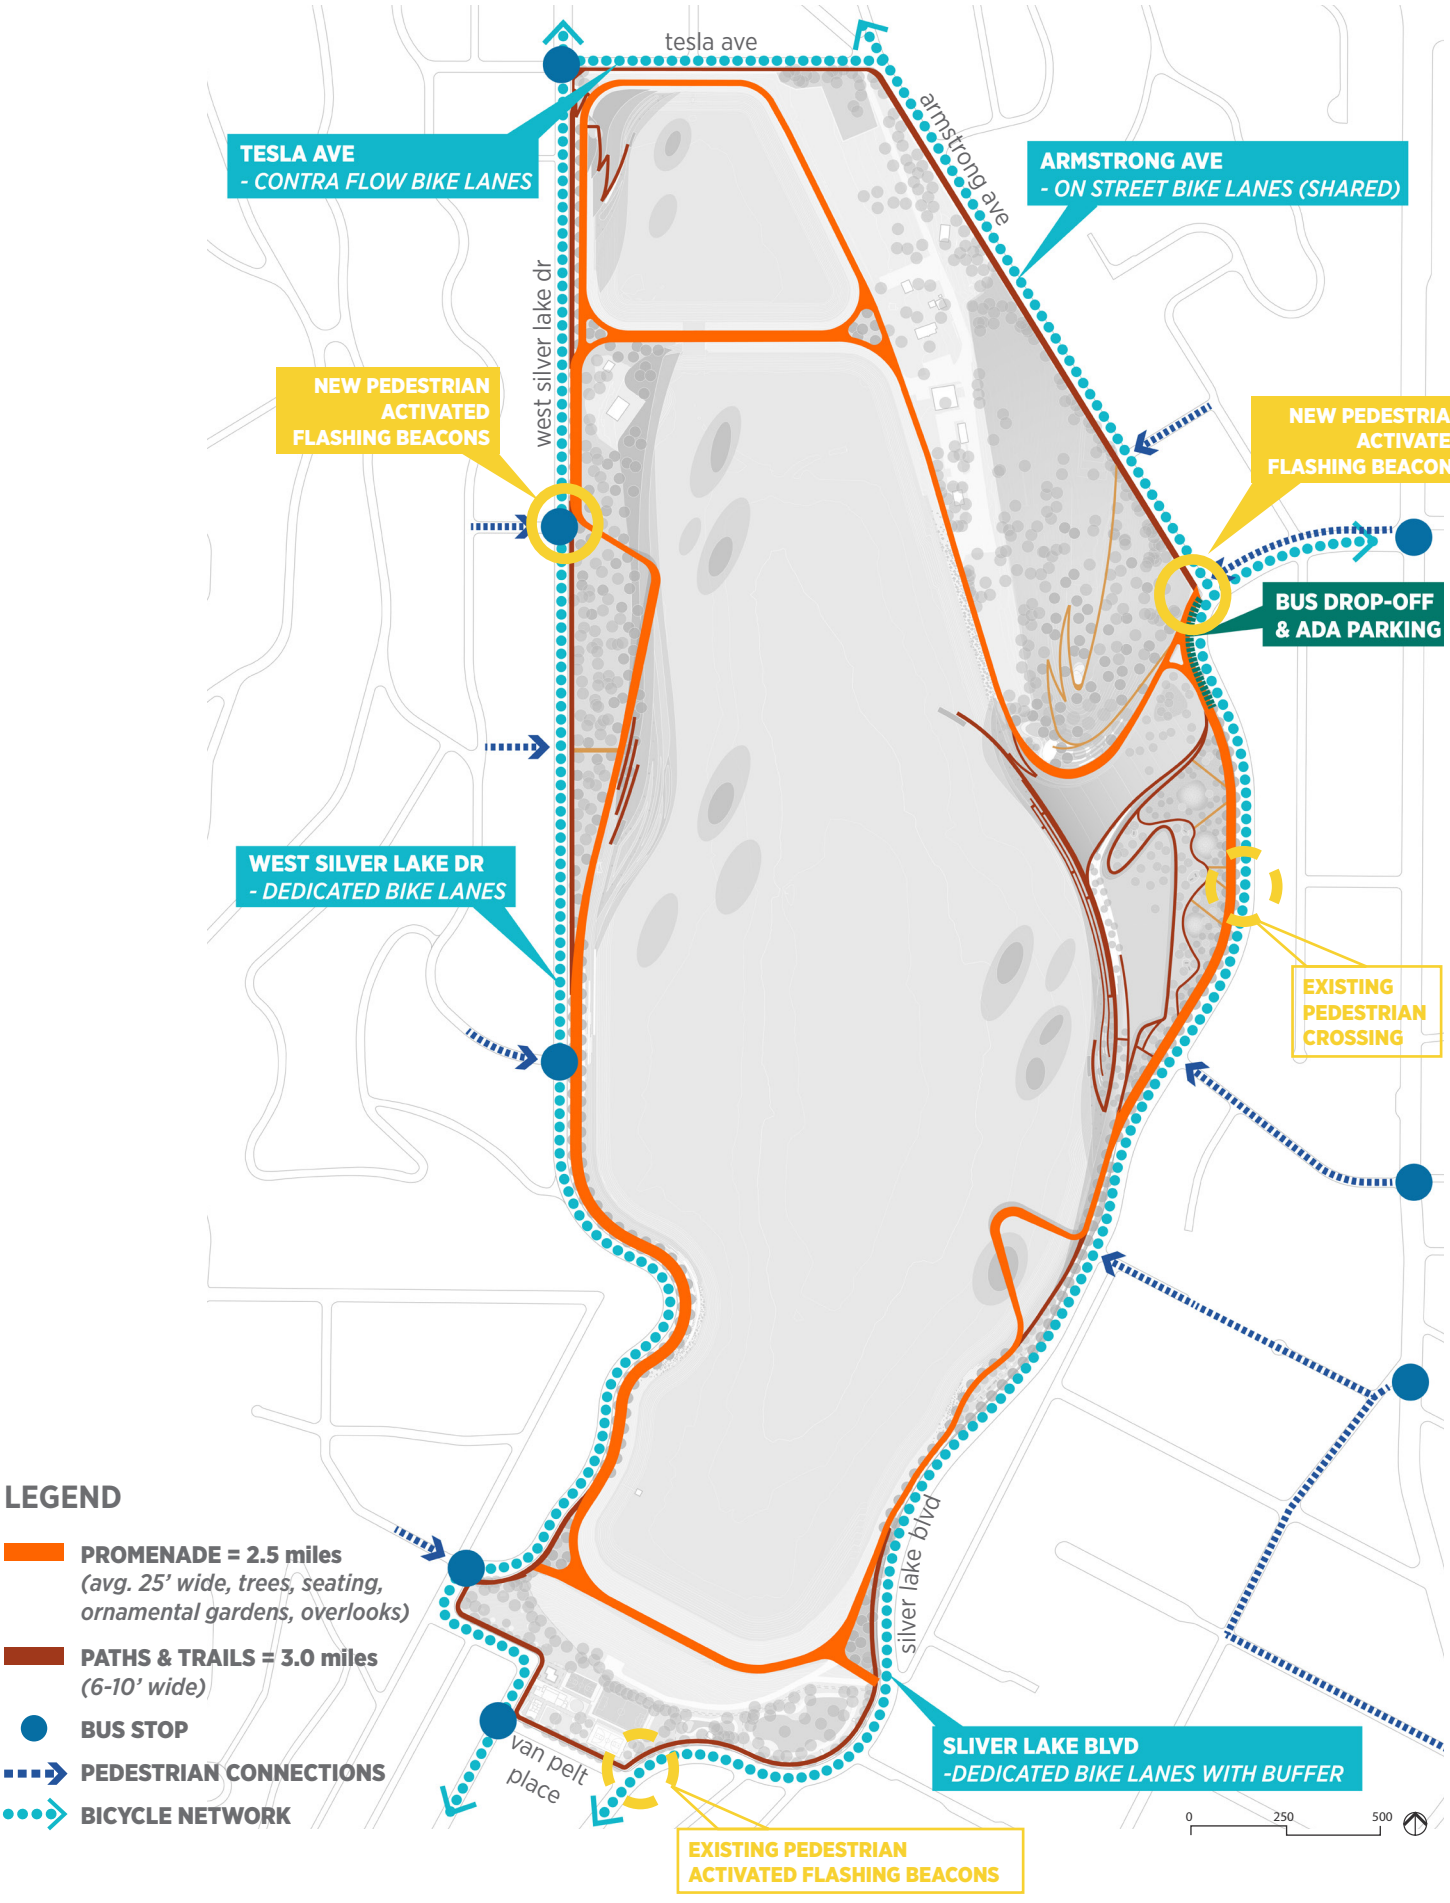
The primary paths are a minimum 10-foot width and connect major destinations and link edges (at street intersections) to the Promenade.

THE SECONDARY PATHS

The smallest pathways at 6-feet in width, secondary paths will provide casual circulation within the gardens, terraces, and habitat areas.

Based on community concern about bus parking at the complex, the design team identified several potential nearby parking lots in which school or education-based buses, or shuttles could wait, including the Friendship Auditorium parking lot. Use of these parking lots as holding areas for buses will need to be negotiated by the City in the future.

Figure 5-18 Circulation Diagram



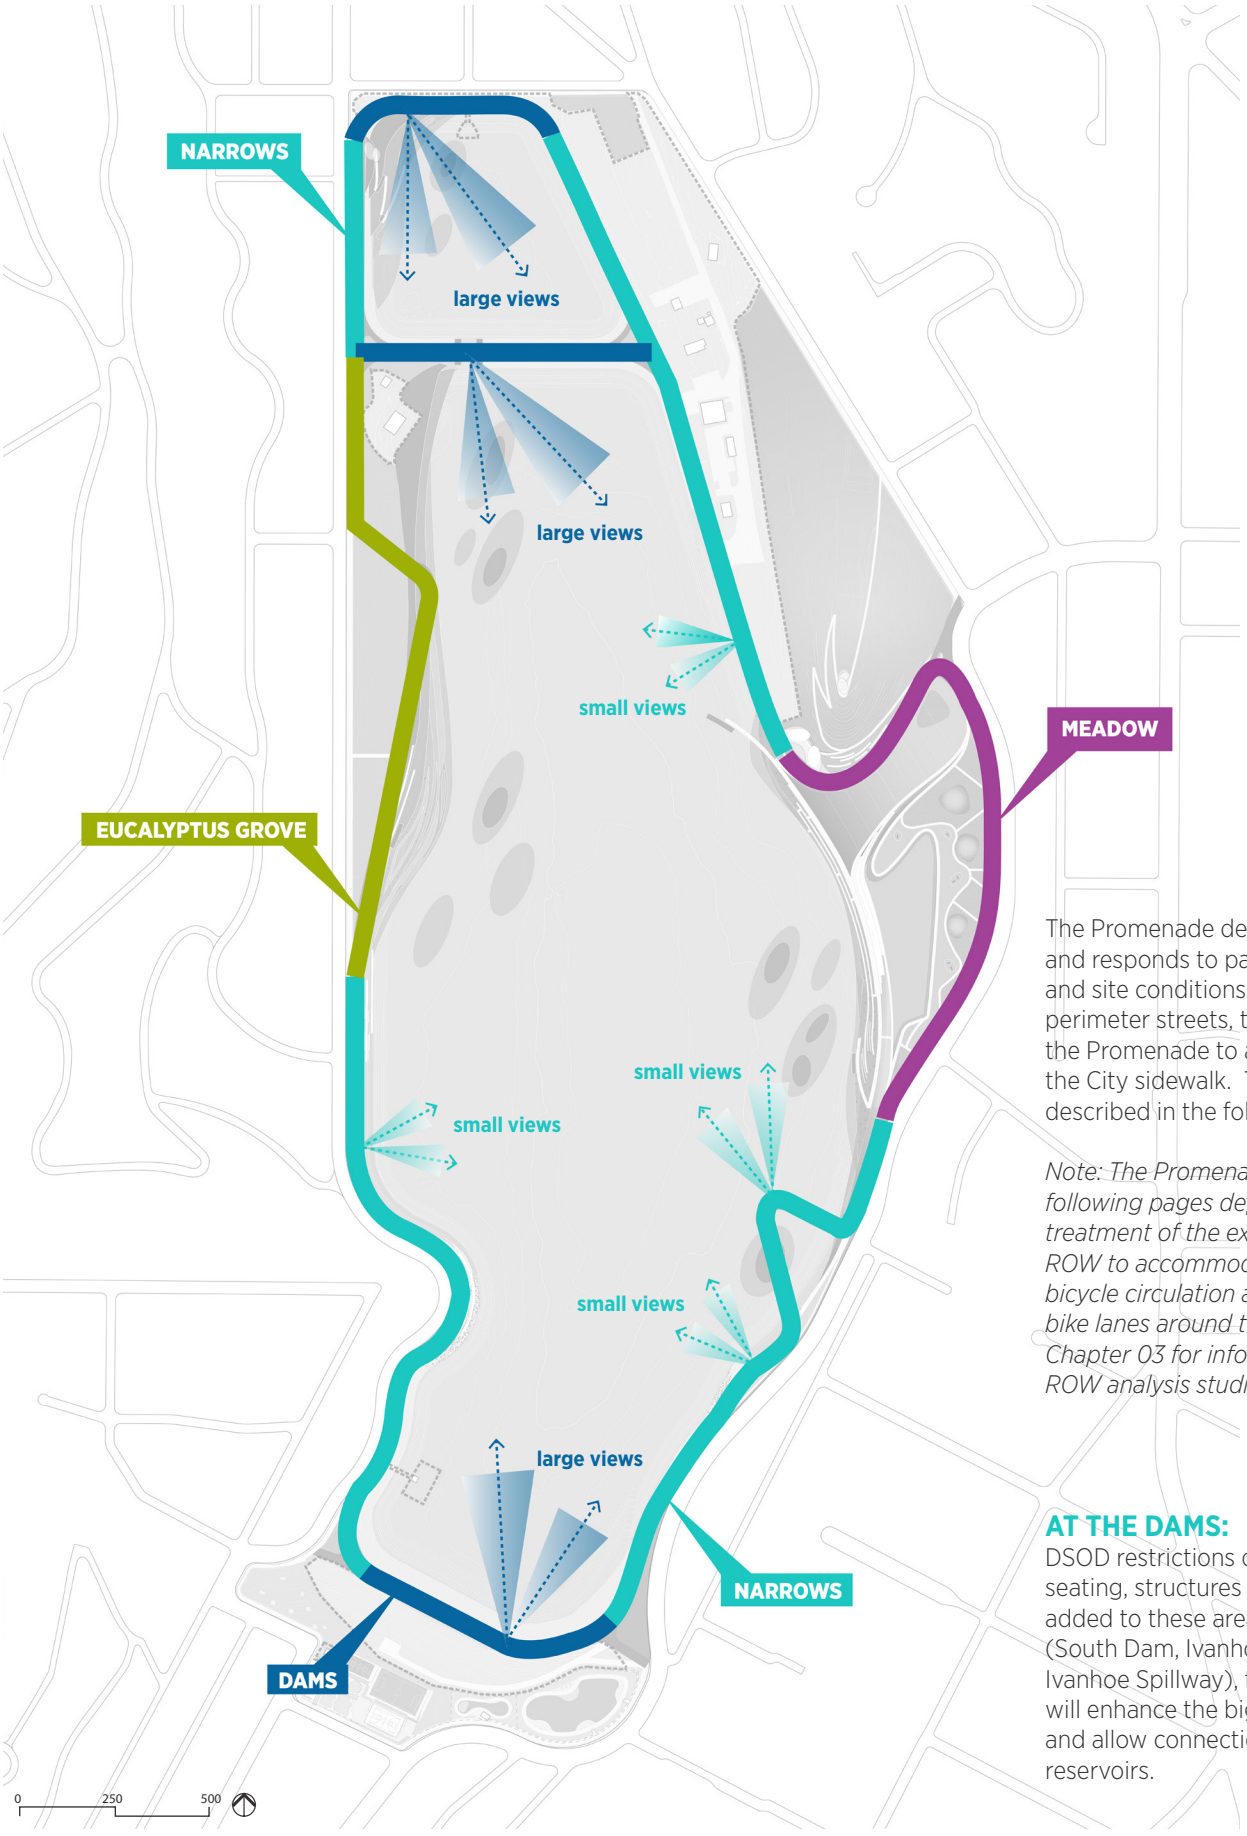


Figure 5-19 Promenade Diagram

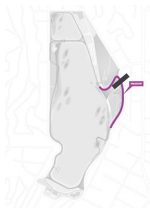
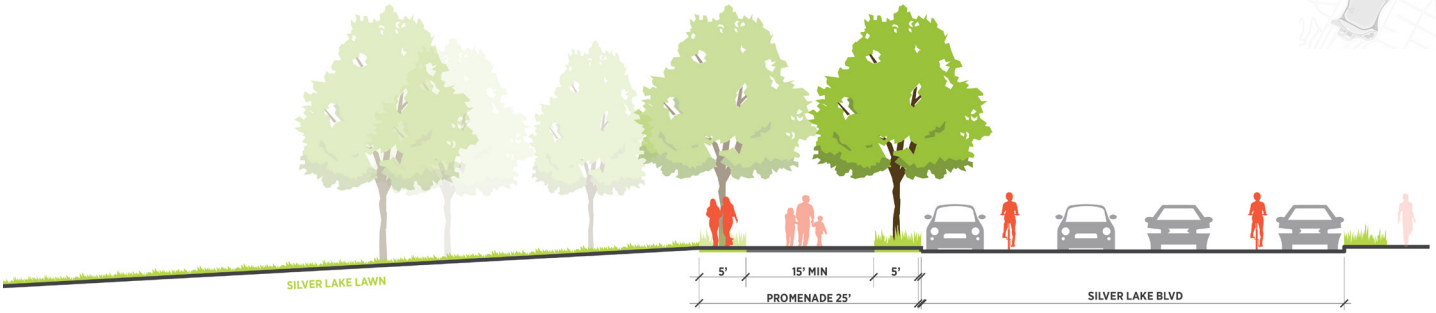
The Promenade design is flexible and responds to park spaces and site conditions. Along the perimeter streets, the intent is for the Promenade to also function as the City sidewalk. These changes are described in the following pages.

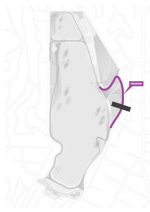


Note: The Promenade sections on the following pages depict an idealized treatment of the existing streets ROW to accommodate improved bicycle circulation and dedicated bike lanes around the complex. See Chapter 03 for information on street ROW analysis studies.

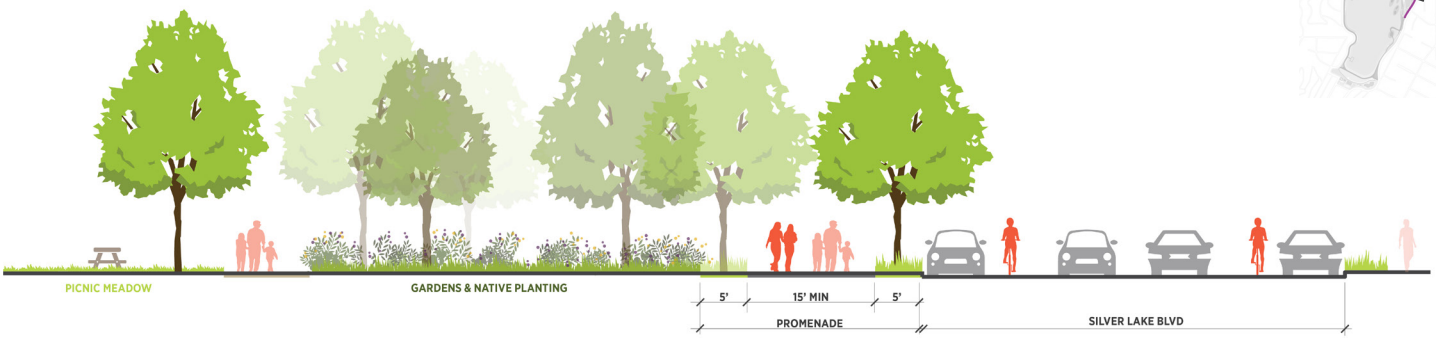


AT THE DAMS:

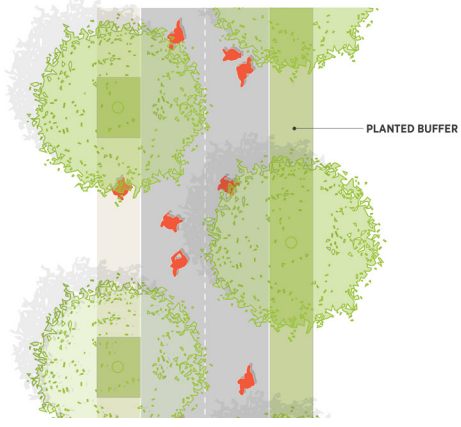
DSOD restrictions do not allow for seating, structures or planting to be added to these areas. At the dams (South Dam, Ivanhoe Dam and the Ivanhoe Spillway), the promenade will enhance the big open views and allow connections across the reservoirs.

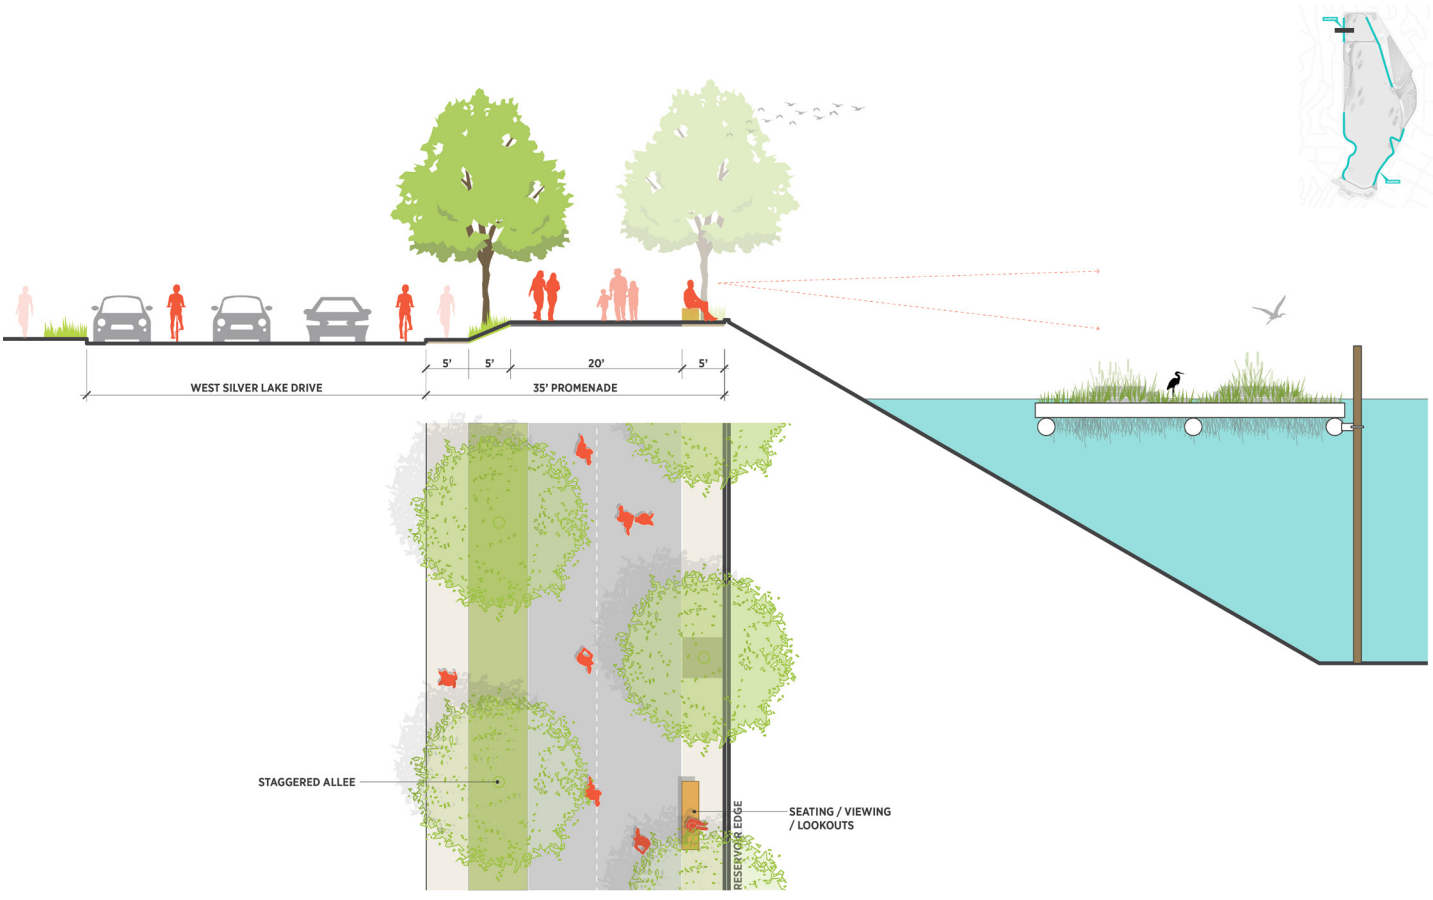


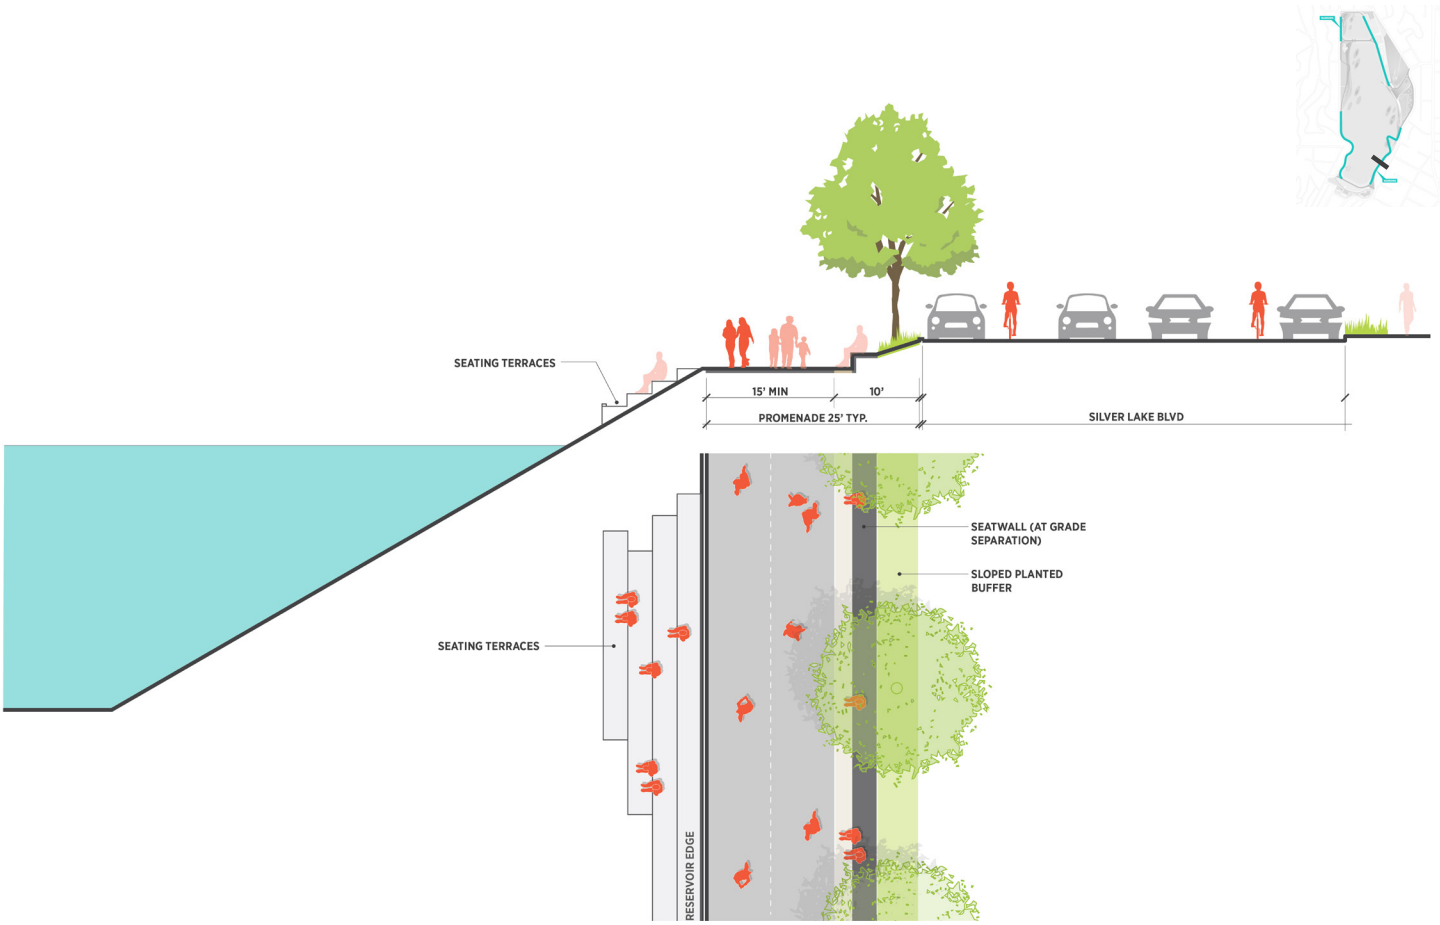
WITHIN THE MEADOW

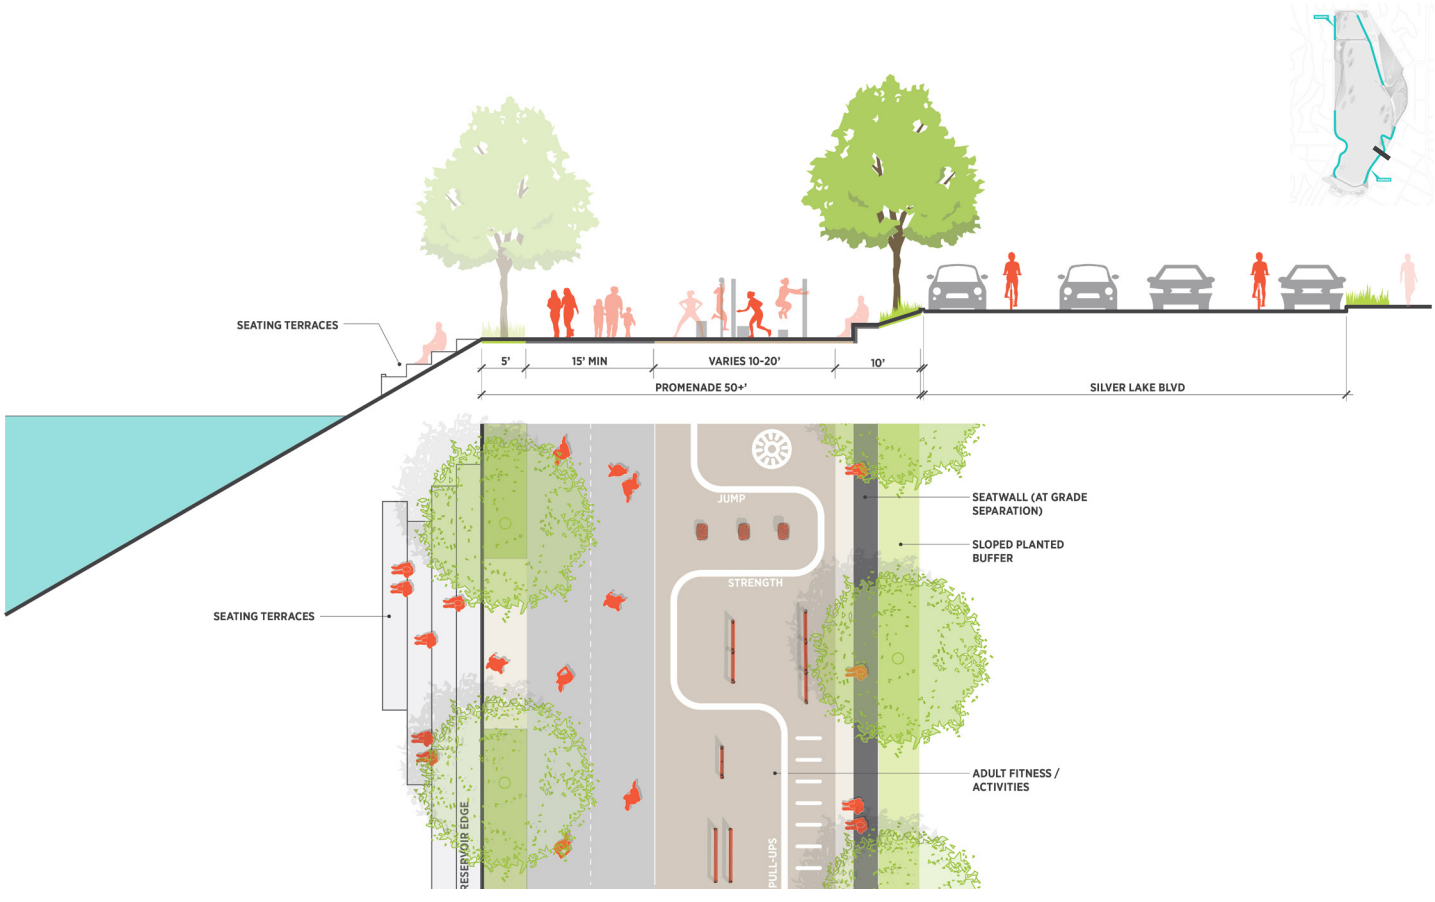


At the Meadow, the Promenade runs along Silver Lake Boulevard before turning west to follow the base of The Knoll. The clear path remains consistent at 15-feet with 5-foot bioswale buffers on either side. An allée of trees planted within the bioswales line both sides of the promenade.









WITHIN THE NARROWS

At the narrowest locations within the site, the Promenade emphasizes inward views of the water and makes space for small overlooks and terraced seating. On the southwest end, a grade change between Silver Lake Boulevard and the reservoir allows for a small seat wall to be integrated acting as a buffer between the Promenade and the road. Where it widens, a small exercise circuit is incorporated. The clear path is 15-feet at its narrowest and 20-feet at its widest in this section.

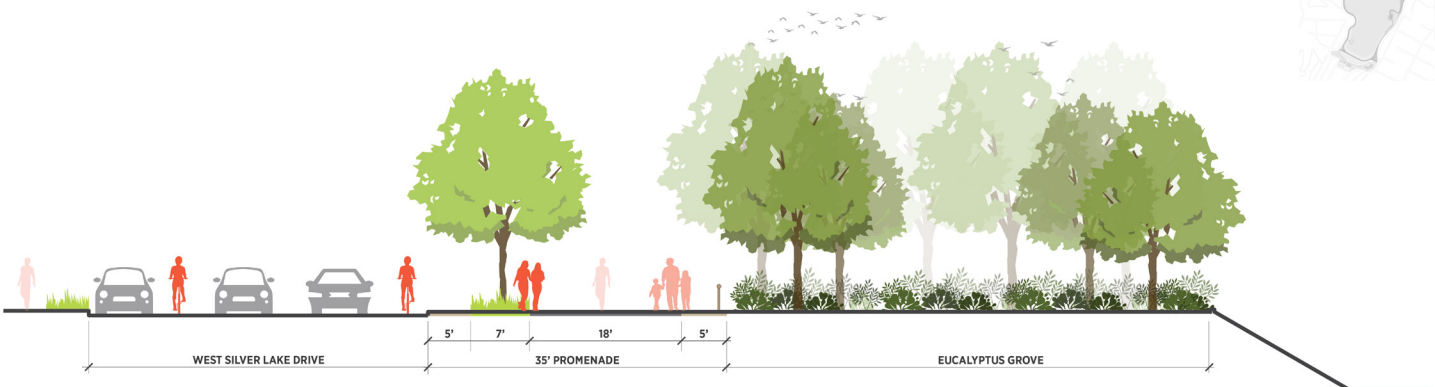
WITHIN THE EUCALYPTUS GROVE



Within the Eucalyptus Grove, the Promenade is designed to have minimal impact on the restored habitat. At the south end of the Eucalyptus Grove, the Promenade leaves the road and follows the embankment edge to an overlook. Here it is 25-feet wide with a seating band which provides a buffer between the Promenade and habitat area. As it returns to the road from the overlook, crossing through the Eucalyptus Grove, it narrows to 15-feet wide with habitat fences on either side to provide maximum protected habitat. At the north end of the Eucalyptus Grove, a 7-foot bioswale planting strip and trees buffer pedestrians from the street.

5.6.3 Lighting

An overall objective for the Master Plan is to create a comfortable, safe and secure nighttime environment.

The intent of the design is to compose a nighttime environment with a lighting system that is appropriate to the site's context-driven pressures and create a desired state of supplemental layered light. The net beneficial impacts include improved visibility, greater sense of security, comfort, reduced glare and light trespass, night sky views, reduced clutter during the day, and conserved energy when maintained by responsive management.

The Park will have a clear hierarchy of lighted spaces and connective paths. High Level lighting (+2 fc) is planned for active recreation areas in the South Valley. A Medium Level of lighting (0.5 fc) is proposed along the Promenade, on select Primary Paths and within the seating terraces at the water's edge. A Low Level of lighting (0.25 - 0.5fc) will be introduced along many of the Primary and Secondary Paths to provide circulation to and between the neighborhood and the Park in areas such as the lawns and picnic grove. No lighting is planned for Secondary Paths within habitat areas or in areas that are not intended to be used at night. Figure 5-20 Lighting Diagram depicts proposed lighting levels for the Park.

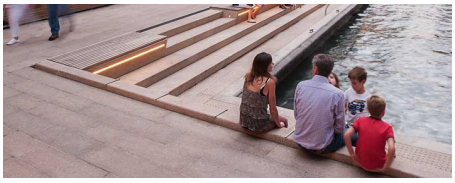
Figure 5-20 Lighting Diagram

5.6.4 Embankment Edge

The embankment edges around the reservoirs have changed significantly over time from gentler unpaved earthen slopes to steep paved surfaces.

Ivanhoe Reservoir was resurfaced 25 to 29 years ago with concrete paving and is in good condition. The edges are smooth, beige in color, and have a small curb at the edge of the embankment. Silver Lake Reservoir is paved with 3-inch asphalt and is in poor condition. Around the reservoir, large cracks have been filled in and repaired over time and sporadic vegetation emerges from within the voids. An inconsistent 6" curb is located along some of the embankment edge.

The Master Plan proposes three different edge treatments for the embankment that respond to site conditions and the proposed design, working together to create a unique visual experience. These are described below and depicted in Figure 5-21.



Resurfacing
Within the DSOD jurisdictional areas, embankment edges will be resurfaced with smooth concrete (similar to Ivanhoe Reservoir).

Green Edge
To soften the embankments, edges outside the DSOD jurisdictional areas and those that are related to habitat terraces are planted with low, native groundcovers over a geoweb on the 2:1 slope. For more information on plant species, refer to Section 5.6.1.

Riprap
Riprap is proposed in the transitional areas between the Green Edge and Resurfacing. Large boulders will be embedded within the 2:1 slope as well.

People Terraces
People terraces are embedded into the embankments at key locations throughout the reservoir including the East and West Narrows and the Eucalyptus Grove.

SAFETY OF EMBANKMENT EDGES:

The proposed design removes the steep, slippery surface of the existing reservoir to the maximum extents possible and replaces it with a combination of soft vegetation, riprap, and seating terraces to minimize risk of people getting in the water.

The Master Plan recommends that a consistent curb of 6- to 12-inches be maintained around the edge of the reservoir to provide a visual barrier between the walking path and edge of slope. Wherever possible, it is also recommended there be a 5-foot buffer between the path and this edge.

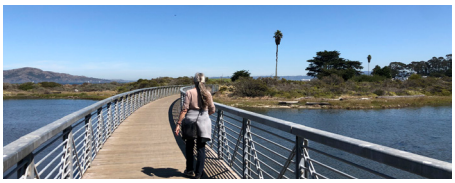
Figure 5-21 Embankment Edge Diagram

5.6.5 Fences and Guardrails

Based on prior neighborhood surveys, recommendations by the design team's biologist, and documented best practices for wildlife management, the project team recommends removing the perimeter fence and strategically replacing it where needed to secure LADWP lands, protect habitat, and protect people. The perimeter fence should be removed overtime in phases and in coordination with future park operations plans as various zones of the park design are constructed. See Figure 5-22 for a conceptual plan of where fences and guardrails are proposed for the Park.

LADWP Fence

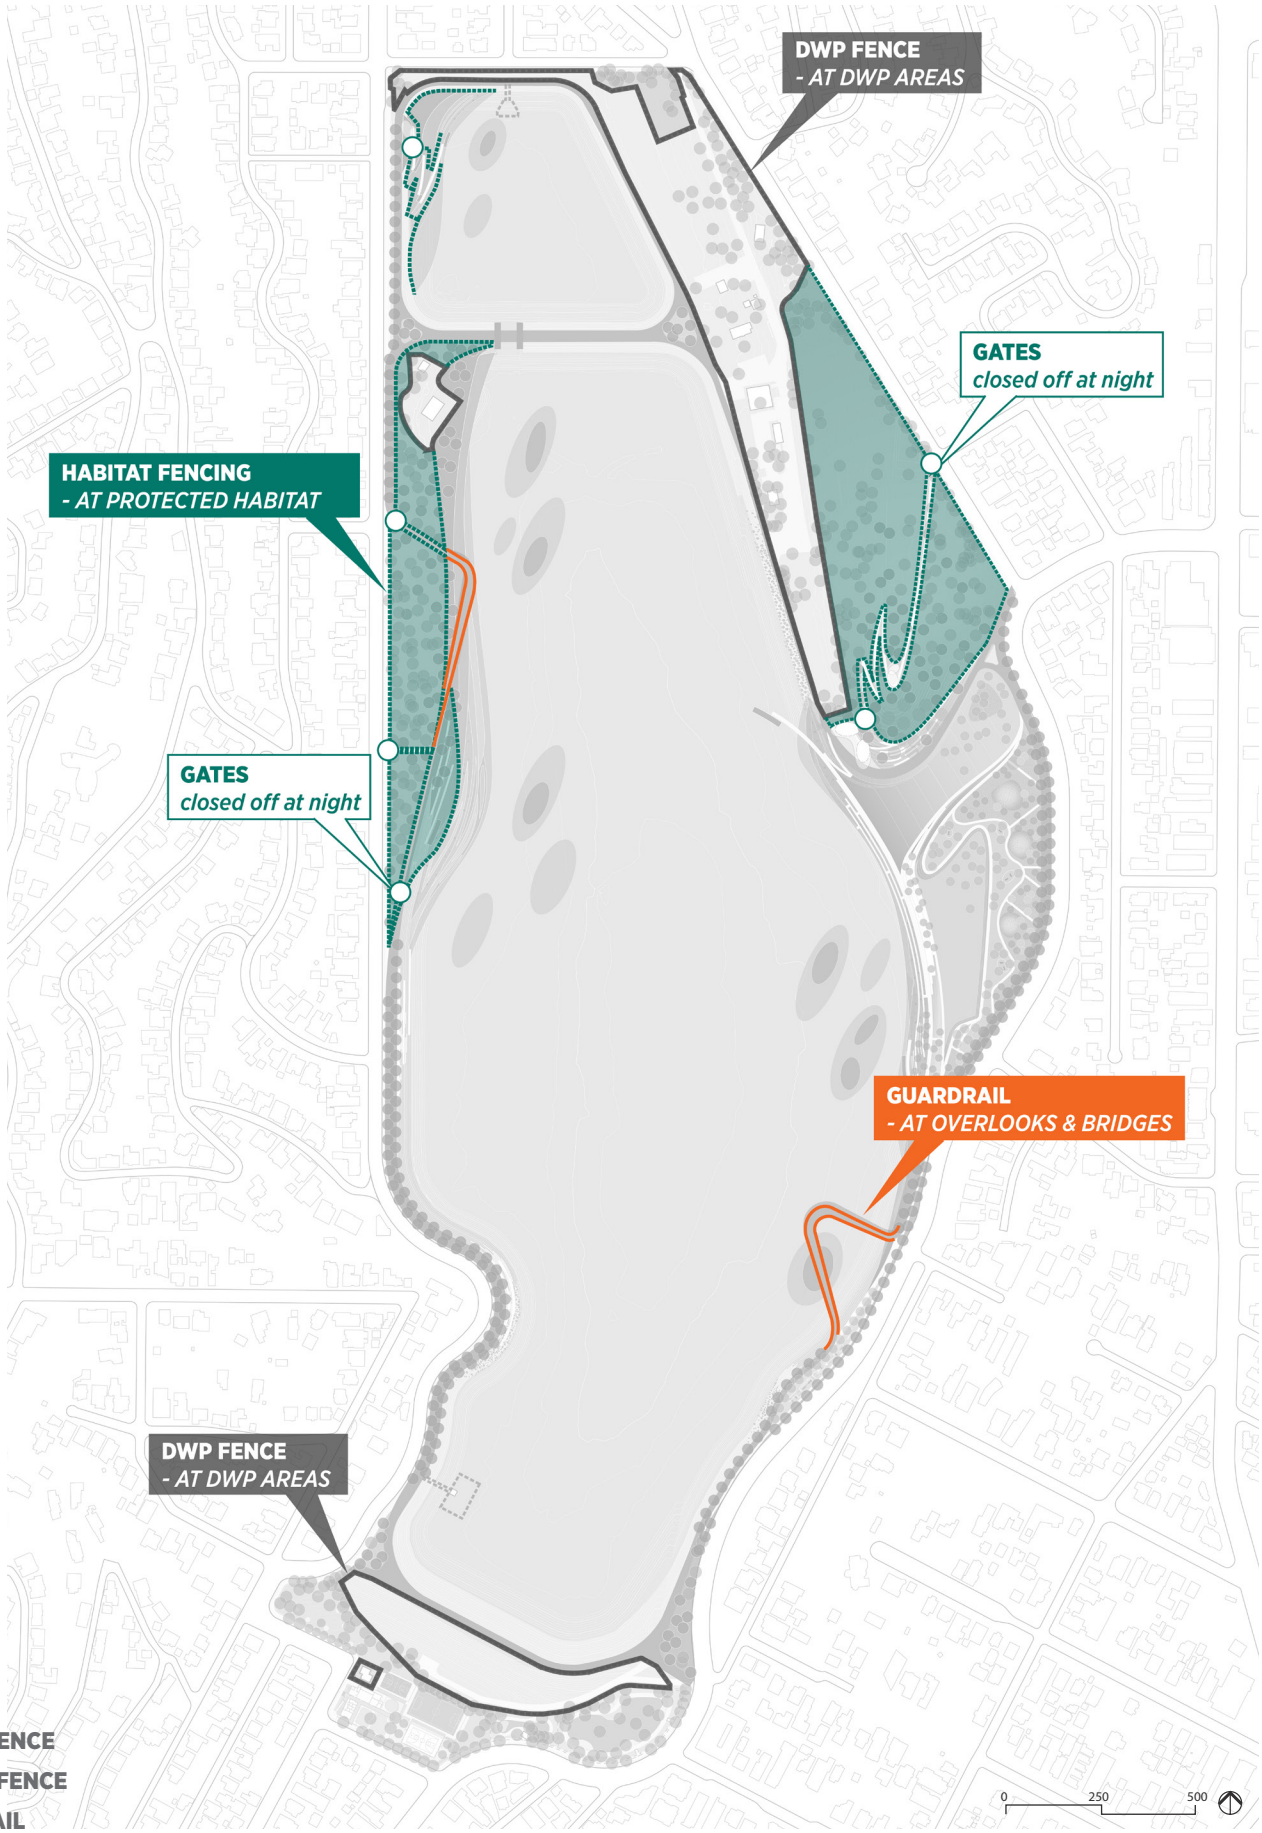
LADWP will need to secure areas around the SLRC for its operations and to ensure safety of the public and employees. These include a large area on the east side of the site in which most of LADWP's facilities and structures are located, north Ivanhoe Dam, Silver Lake Dam, and an area on the west side of Silver Lake Reservoir associated with a gatewell structure and regulator station.



These spaces will be secured with a 8-foot high, continuous fence with gates as needed for access by LADWP. The fence design should follow best practices for wildlife-friendly fence design and be highly visible to birds to minimize risk of collisions. The fence design should provide a minimum 6" clear zone at the bottom for small mammals to pass through. There should be no elements that could injure or trap wildlife.

Habitat Fence

As described in Chapter 06 Park Sustainability, tall fences can be dangerous to wildlife, causing injury or death, and can block wildlife from accessing vital food, nesting, and water resources. The Master Plan recommends installing wildlife-friendly, habitat fences along all pathways within protected habitat areas. The habitat fences will be designed to allow unobstructed travel by birds and mammals to and from the SLRC. The Master Plan recommends a 3-foot high, open rail fence with untreated wood posts and rails. Where walkways enter protected habitat areas, swing gates at each end will be included to close these walkways at night and during nesting season if needed.



Guardrail

Where the two overlooks project out over Silver Lake Reservoir, 42-inch galvanized steel guardrails with wood top rails will be installed according to current California Building Code.

6.1 Park Sustainability Overview

The Master Plan design is rooted in the environmental and social values of sustainable design. Responses to the Park Activities and Uses Questionnaire for Community Workshop 02 demonstrate that the community places a high value on amplifying the power of the reservoirs to attract and sustain wildlife, connect with nature and neighbors, and educate. In subsequent questionnaires from Community Workshops 03 and 04 a clear desire was expressed for a park that balances habitat expansion and enhancement with human uses.

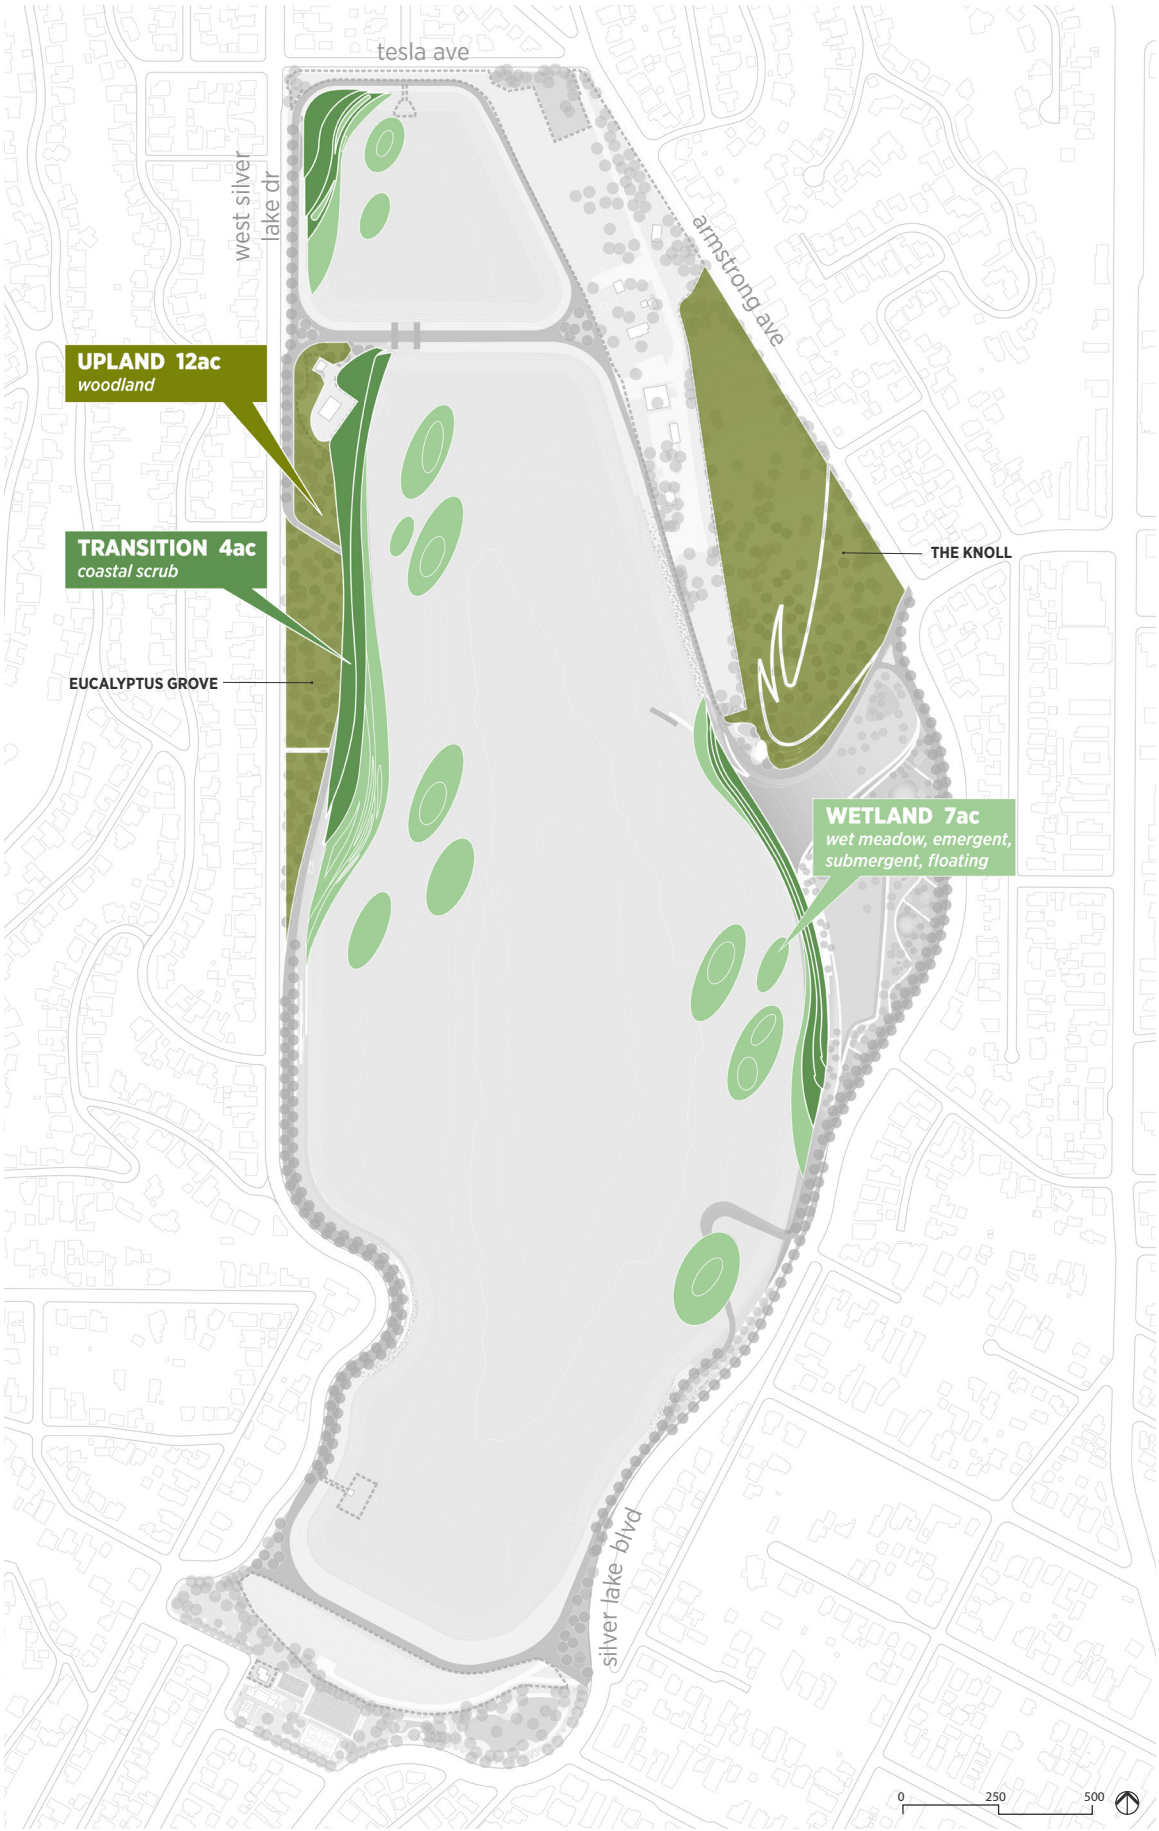
When habitat is disappearing and species populations are diminishing at alarming rates, reintroducing wilderness into our cities offers a means to not only offset habitat losses, but also demonstrate how we can coexist with wildlife in our urban environments. In response, the Master Plan design interweaves systems of ecology, water, and education into a balanced whole. These visible forms of sustainability help portray the Silver Lake neighborhood and the City of Los Angeles as leaders in freshwater resource management and leaders in the stewardship of urban wildlife.

The Master Plan incorporates habitat enhancement and expansion that emphasizes re-establishing wetlands at the site, a water management strategy that supports a healthy aquatic ecosystem, and an education facility and programs that engage the community and teach residents, especially youth, about wildlife stewardship and climate adaptation.

6.2 Habitat Enhancement & Expansion

Today, the SLRC is known to be home to a small group of birds including a nesting pair of herons as well as small terrestrial mammals. Additionally, it's a popular spot for migrating waterfowl along the Pacific Flyway. However, up until recently, the Complex has been managed as a sterile reservoir to support the drinking water needs of Los Angeles. Its habitat value is moderate and most significantly, it lacks food resources for birds and small terrestrial species.

To remedy this, the Master Plan design focuses on increasing habitat diversity and introducing a food web. Many species have complex life cycles and depend on a variety of habitat types for their growth and development. The range of habitats proposed in the Master Plan will support an increasingly diverse array of birds, fish, amphibians, invertebrates, and other aquatic species. To provide this biodiversity, the Master Plan design maximizes the habitat value of existing wooded spaces and creates new habitat resulting in a combined total 23 acres of dedicated habitat area as seen in Figure 6-1.



The Eucalyptus Grove and Knoll are the two primary existing wooded areas in the Complex comprised of large trees, at varying stages of their lifespan, offering some nesting habitat for birds. Together, these woodlands total 12-acres and will be replanted to enhance their habitat value. Expanding from these lands, the reservoir embankments will be altered to create 5 acres of new transition (coastal scrub) and 6 acres of new wetland habitat to increase nesting and foraging resources for birds and terrestrial species. To complete this food web, fish will be re-introduced to the reservoirs.

The Silver Lake community will be connected to natural processes and ecological cycles, while maintaining a balance between public access and sensitive wildlife areas. To achieve this equilibrium, most habitat areas are protected with limited public access along designated pathways, boardwalks over sensitive planting areas, and overlooks and platforms to observe wildlife from a safe distance. Critical to successfully integrating habitat within an urban park is education that fosters an appreciation for conservation and stewardship.

Vibrant ecosystem supporting upland, transition, and wetland habitats.

Figure 6-1 Habit Zones Diagram

6.6.1 Habitat Goals

Measurable goals and objectives are essential for guiding the development and implementation of habitat restoration efforts and establishing a means to measure progress and evaluate success. The following goals were developed during the Master Plan process to support the Park's vision.

Goal No. 1: Improve ecological functions of the reservoir, embankments, and upland areas
To improve the ecological functions of the site, hardscape such as the embankments should be converted to native habitat where feasible, water quality and levels should be maintained to sustain wetland habitat, and an aquatic food web should be introduced.

Goal No. 2: Maximize native biodiversity
To maximize biodiversity within the Complex and with a focus on local and migratory birds, wetland habitat should be reintroduced including floating wetland islands. These wetlands should be designed and planted to meet the year-round foraging and nesting needs of a range of waterfowl species, creating shallow shorelines and water depths that vary between less than eight inches to eighteen inches.

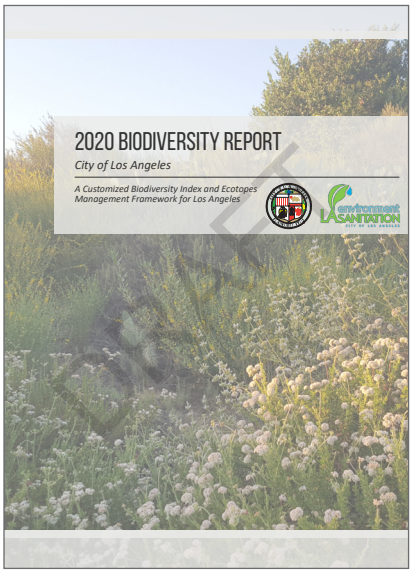
Goal No. 3: Enhance existing native wildlife populations
The habitat value of existing wildlife areas, such as the Eucalyptus Grove and Knoll, should be enhanced via replanting strategies that protect and support existing wildlife. Disturbed habitat should be restored and the spread of non-native, invasive species prevented.

Goal No. 4: Balance wildlife and human uses
To create a park that supports wildlife and human uses, dedicated protected habitat areas and buffers between wildlife areas and active park spaces and pathways should be provided. Ecological education, interpretive signage, and outreach programs should be developed to create a platform for public understanding and support of the Park's habitat goals and objectives.

(source: sciencemag.org)

During the Master Plan design process, a September 2019 study was published in *Science* magazine indicating that the number of birds in the United States and Canada have been in sharp decline over the last half-century. Given that the reservoirs are such a large, freshwater resource for local and migratory birds, particularly waterfowl, the Master Plan's habitat recommendations prioritizes these avian species.

BIODIVERSITY



Definition: The flora, fauna, and ecosystems that enrich and sustain natural and urban areas. (source, LASAN).

In urban areas, biodiversity can be thought of as the variety of flora, fauna, and ecosystems that help maintain the balance of nature and sustain cities. Urban natural areas provide habitat connectivity and support the conservation of numerous sensitive species.

In 2017, the City of Los Angeles passed the City's Biodiversity Motion and in response, LASAN began developing a LA Biodiversity Index, planned for release in 2020. As a initial step and also in 2017, the City of Los Angeles measured itself against an established biodiversity index, the Singapore Index on Cities' Biodiversity. The City of Los Angeles then used the Singapore Index as a starting point for developing a separate index customized for the City's specific setting, the LA Biodiversity Index. The LA Biodiversity Index includes indicators that account for three core themes of urban biodiversity: conservation of native biodiversity; social aspects of biodiversity, with a focus on equity; and governance and management activities. The three themes are divided into eight indicators and 23 metrics that will be used to measure progress on biodiversity issues (Figure 6-2).

The Master Plan team recommends that the City applies this index to the implementation of the proposed Park and develop a SLRC Biodiversity Plan.

DRAFT

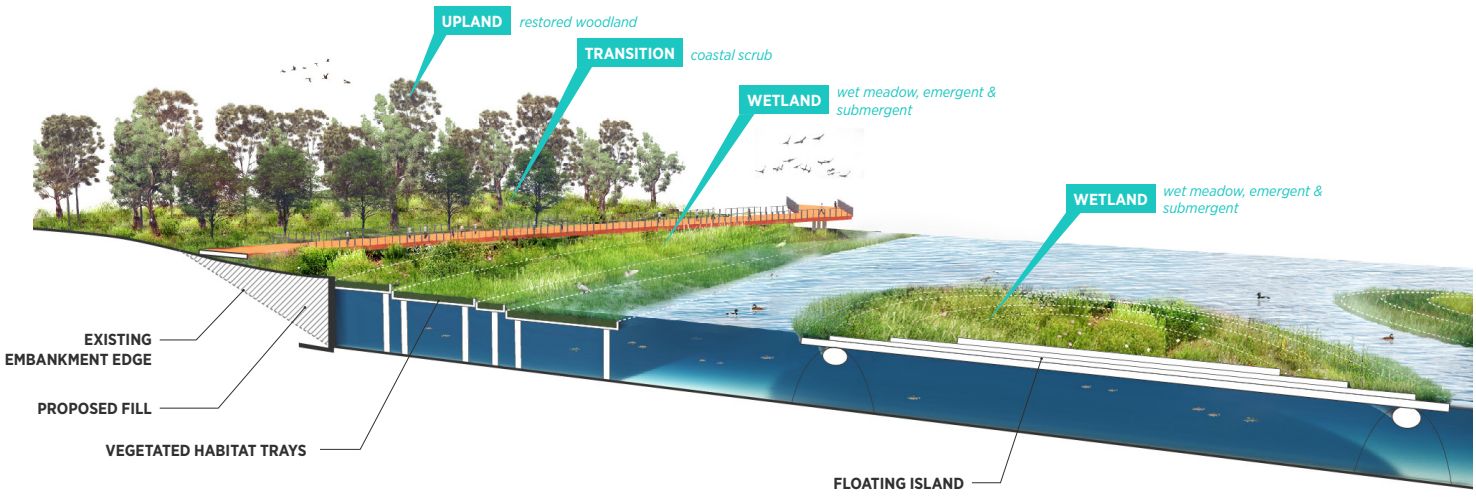
6.2.1 Habitat Typologies

Three primary habitat typologies are proposed for the new Park to support a healthy ecosystem and food web: Upland, Transition, and Wetland habitats as shown in Figure 6-3.

To create this new ecological transect, the existing steep embankments of the reservoirs will be modified to have a more gentle slope in order to introduce a transition habitat zone planted with coastal scrub species; vegetated habitat trays will then be built to create three distinct wetland habitat sub-types: wet meadow, emergent, and submergent. The differences between these wetlands are described in subsequent pages of this section.

To supplement the habitat trays and provide more protected wildlife areas, floating wetland islands will be introduced. The floating islands will be designed to include all three wetland habitat sub-types. In combination, these elements will increase biodiversity and allow the introduction of fish into the reservoirs. Figure 6-4 is a simplified depiction of the proposed ecosystem with the indicative species anticipated to inhabit the Park when it's completed.

Figure 6-3 Proposed Habitat Typologies



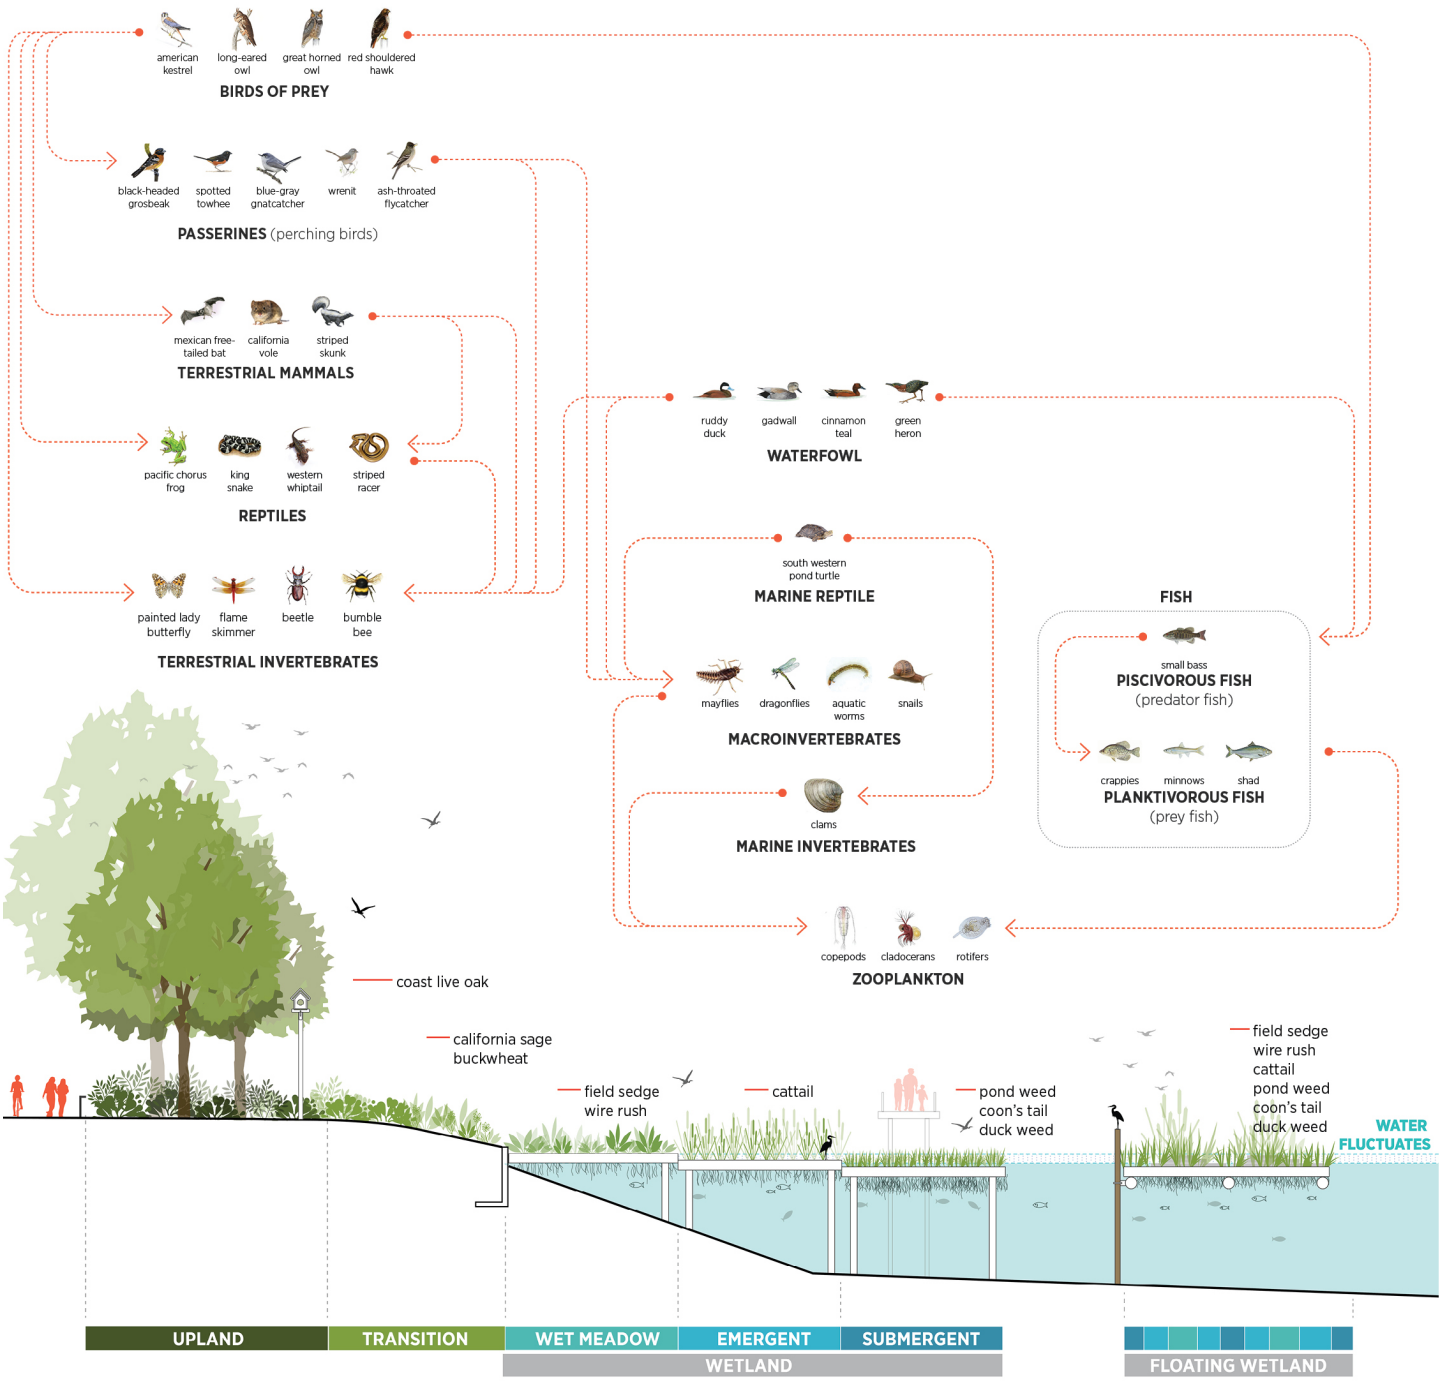


Figure 6-4 Healthy Ecosystem Conceptual Diagram

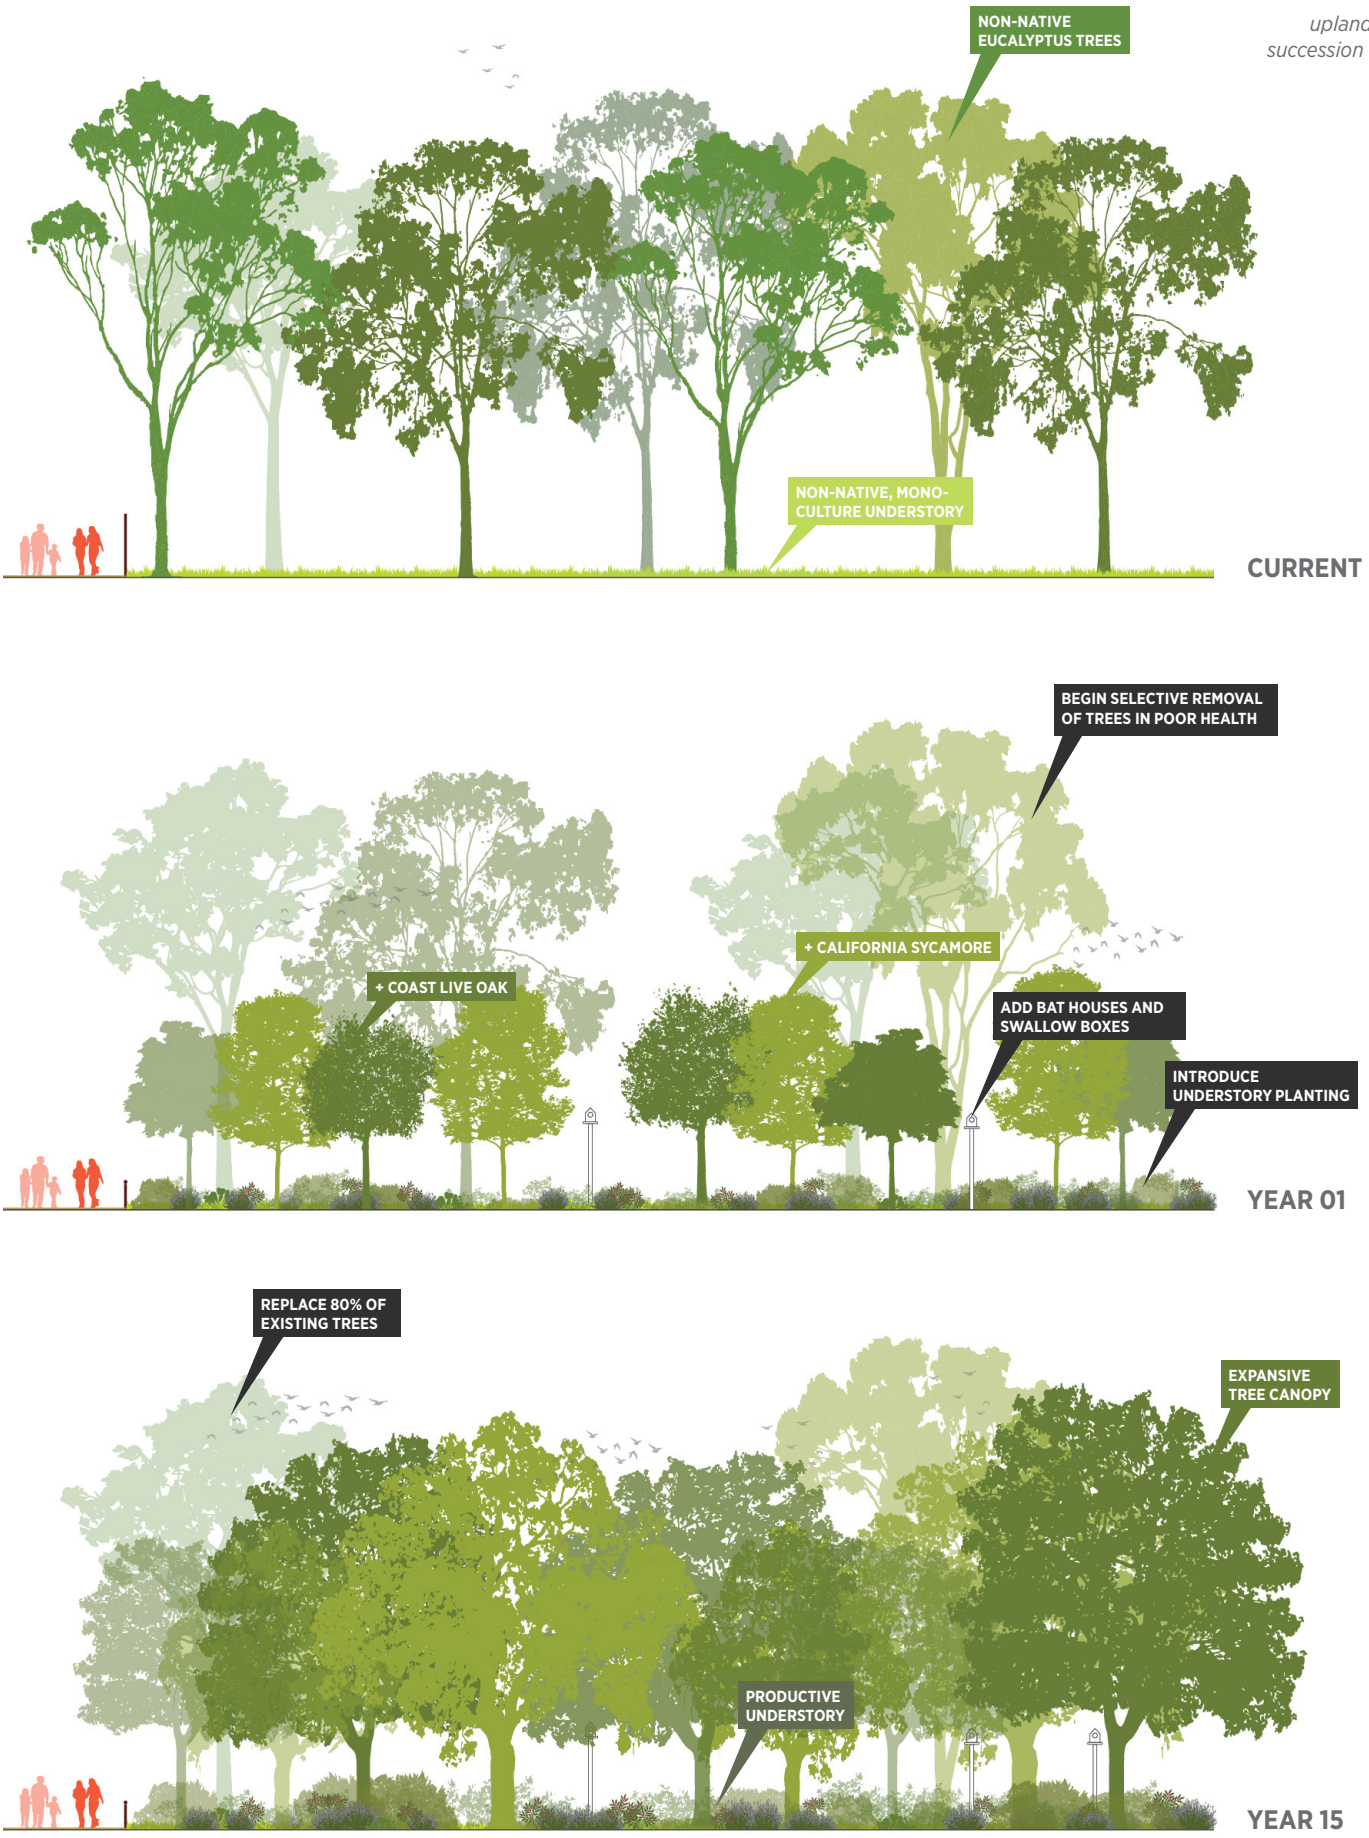
UPLAND HABITAT

Two existing wooded areas, the Eucalyptus Grove and Knoll shown in Figure in 6-1, are dominated by mature stands of non-native Eucalyptus trees and a mostly non-native understory plant community. Based on field observations, many of these Eucalyptus trees appear to be either nearing the natural end of their lives or are of questionable health. While the Eucalyptus trees offer habitat value for bird nesting they offer limited food resources outside of nectar for insects, the birds that feed on them, as well as directly to nectar feeding birds. The Master Plan recommends the development of a tree succession plan to replant these areas with more native species of higher habitat value such as the sample tree palette provided in Chapter 5 which includes species such as Coast Live Oak and California Sycamore.

Prior to developing a tree succession plan, a tree health assessment will be required for the Complex. A tree succession plan should be developed according to the following considerations:

- Selectively remove trees identified as poor in health and/or posing the risk of falling branches or fungal and pest infestation
- Replace 80% of existing trees over a 15-year timeline
- Provide 75% canopy coverage within 20 years

The tree succession plan should also support improving plant species diversity in the understory. Eucalyptus trees are highly competitive with understory plants since they are efficient consumers of available water and nutrients and can shade out and stifle smaller plants with their large canopies and leaf drop. Chapter 5 of this report offers a sample plant palette for improving upland understory habitat value. Figure 6-5 graphically depicts the tree succession strategy over the course of 15 years.



An upland habitat planting strategy for the Eucalyptus Grove and Knoll that priorities plant species diversity and food resources will benefit small mammals such as the Mexican free-tailed bat, California vole, and striped skunk, reptiles, as well as a variety of bird species who nest in large trees, such as the great blue heron and birds of prey such as the great horned owl. Bat houses and swallow boxes are also recommended additions to the upland areas to help control insect populations.

TRANSITION HABITAT

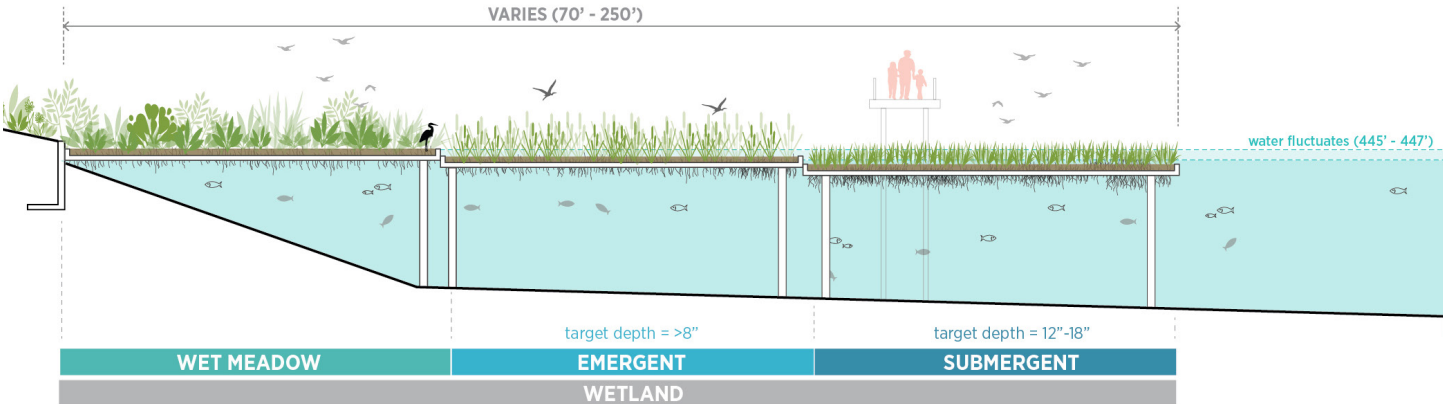
Transition habitat refers to a plant community whose species are adapted to the diverse and varying environmental conditions that occur along the boundary between upland and wetland areas. In Southern California, this zone is characterized by low-growing woody shrubs such as sage and buckwheat species. Transition habitat is a highly productive ecotone and serves a great many wildlife species. It offers food resources as well as cover while they move between aquatic and woodland areas.

A sample planting palette of species recommended for this gradient landscape is provided in Chapter 5. Many are flowering and fruiting shrubs which provide food resources for not only terrestrial mammals and bird species but also terrestrial invertebrates such as pollinators and beetles which are essential to a healthy ecosystem and food web.

Figure 6-5 Sectional Depiction of Tree Succession Strategy

WETLAND HABITAT

Wetlands are areas between terrestrial and aquatic habitats that offer a range of diversity in plant communities and the species which inhabit them. Above the soil surface, wetlands provide cover, food and nesting opportunities for birds, amphibians, turtles, and insects, primarily from vegetation. Below the soil surface, in the root zone, macrophytes (aquatic plants) provide an environment for microorganisms that helps take up nutrients into plant tissue. They are also an indicator species for water quality of the reservoirs.



There are three sub-types of wetlands proposed in the Master Plan, each of which correlates with levels of soil saturation and has a direct relationship to the water table of the reservoirs. These wetland sub-types are described below. Sample plant palettes for the wetlands can be found in Chapter 5. Wetlands are proposed to be implemented via constructed habitat terrace trays and floating islands as depicted in Figures 6-6 and 6-7.

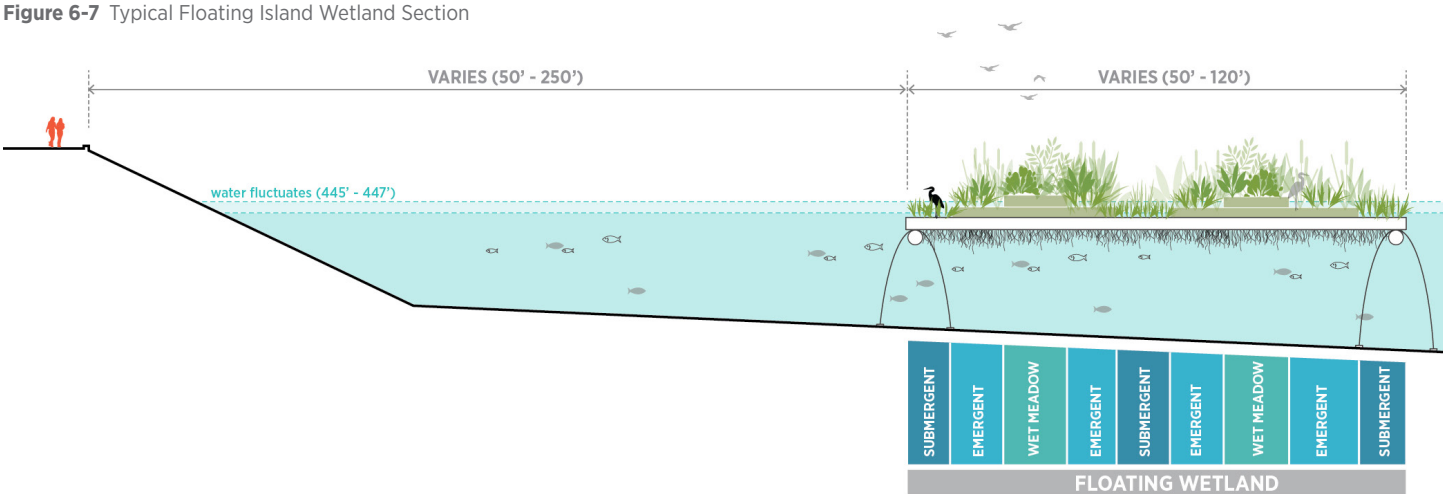
Wet Meadows are wetlands with soils that are saturated for part or all of their growing season. They are often referred to as the "sponge" of the local ecosystem. Unlike other wetland types, a wet meadow does not have standing water present throughout the year except for periods during rainy seasons. In Southern California, wet meadows occur with a great variety of plant species, but several are common such as field sedge and wild rush. As a highly diverse habitat, wet meadows attract large numbers of birds, small mammals, and insects — including many species of butterflies. Waterfowl, especially mallard ducks, frequent wet meadows and yellow-headed and red-winged blackbirds occasionally nest in them as do various frog species.

Fresh **Emergent** wetlands flood frequently and typically have saturated soils that support common cattail and bulrushes. While water depths within emergent wetlands can vary, the target depth for the Master Plan design is about eight inches which is ideal foraging habitat for many migratory waterfowl such as dabbling ducks. This wetland type provides food, cover, and water for numerous mammals, reptiles, and amphibians as well as macroinvertebrates such as dragon flies and snails.

Submergent wetlands are continuously inundated with water. Plants found in this habitat type are either rooted to the soil below the water table or they float. Aquatic plants such as pond weed, coon's tail, and duckweed are typical submergent wetland species. Found along the edges of open water, submergent wetlands provide critical habitat for not only waterfowl and amphibians but also for marine invertebrates and zooplankton, the building blocks of aquatic food webs. The target depth for the proposed submergent wetlands is 12 to 18 inches to not only support biodiversity but to also provide a winter refuge for local and migratory waterfowl such as the great blue heron, ruddy ducks, and cinnamon teals.

Figure 6-6 Typical Constructed Habitat Terrace Tray Wetland Section

6.2.2 Floating Wetland Islands



Floating wetland islands are proposed in the Master Plan design to compliment the land-based, constructed habitat terrace trays along the reservoir embankments. They will be designed with undulating soil profiles to accommodate all three wetland habitat sub-types described above to maximize biodiversity and habitat benefits. Unlike land-based wetlands, floating wetlands create habitat underneath them within their below-water root zone making the water column around floating wetlands a highly ecologically productive area that attracts fish and many other aquatic species. Microorganisms that live within this root zone, include algae, grazing snails, clams, insects (egg and larvae stages only), crustaceans, fish, and amphibians. Floating wetlands provide food for fish and other aquatic organisms, as well as shaded and sheltered spawning habitat. Additionally, they are resilient to water level fluctuations and offer a higher degree of protected nesting habitat from both human disturbance and predation than land-based wetlands.

The value of a given island to birds varies according to its location, size, shape, and surface cover. It is also important for the islands to be designed to provide a balance of feeding and nesting areas. In general, the further an island is from the shore, the more attractive it is likely to be to birds, particularly nesting waterfowl.

Floating wetlands may also be preferred nesting sites by many species of wading birds which often nest in woody vegetation either submerged or surrounded by water. The floating islands proposed in the Master Plan design are intended to be varied in size and set-back from the shoreline to offer a variety of foraging and nesting spaces for waterfowl and other aquatic species. To create additional protection for nesting birds, the density of vegetation on the islands should also be varied to provide areas with high vegetation coverage.

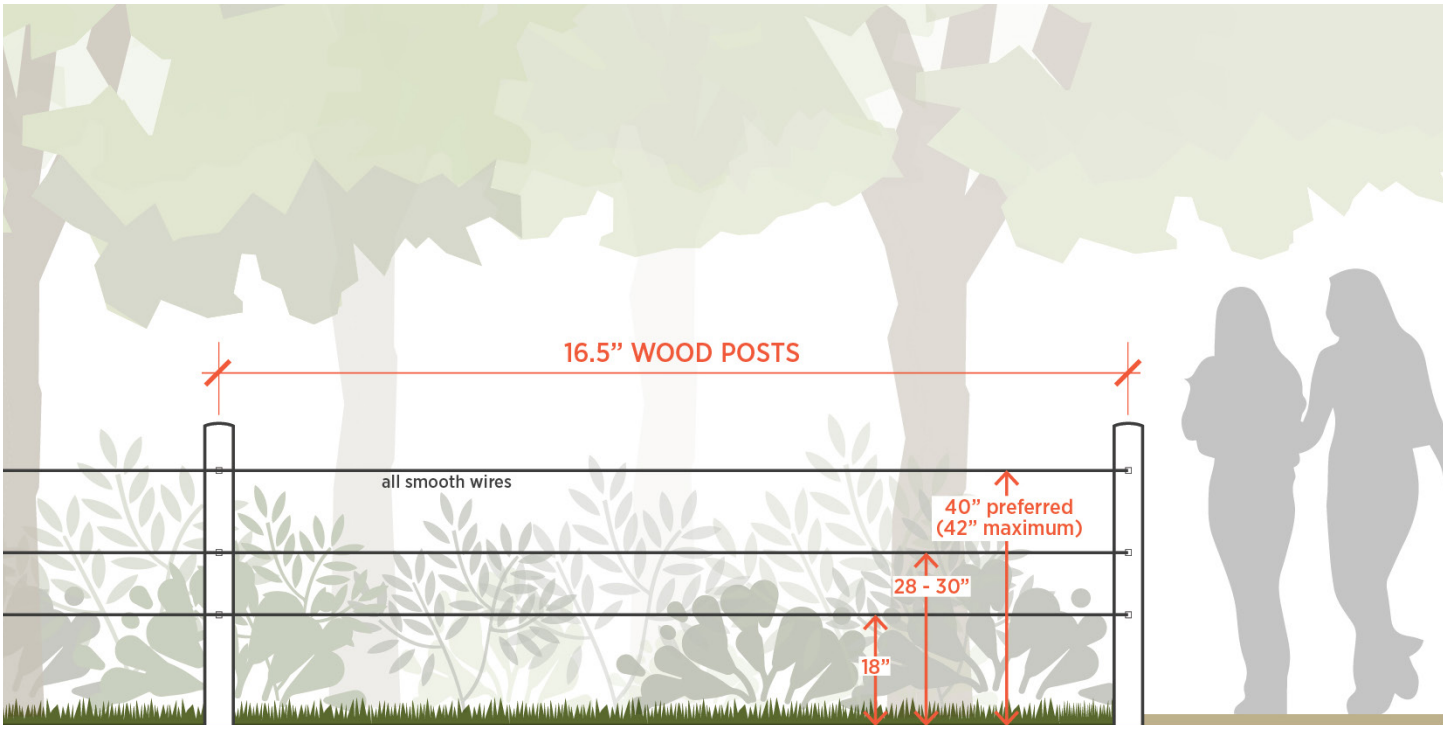
Together, the proposed wetland terraces and islands provide a framework to support a healthy, biodiverse aquatic ecosystem and essential access by local and migratory birds to fresh water and foraging habitat. They provide a variety of beneficial functions and value including water storage, water quality protection, habitat for fish, wildlife, and sensitive plants, as well as the opportunity for education and research.

Figure 6-7 Typical Floating Island Wetland Section

6.3 Wildlife

As habitat continues to disappear in our increasingly urbanized world, introducing wildlife habitat back into cities is becoming ever more critical. In so doing, more opportunities for humans and wildlife to come into contact are created. When designing space for humans and wildlife to coexist, it is important to develop suitable habitat areas and incorporate design elements that enhance human / wildlife benefits.

Research indicates that people are happier and healthier when they can experience nature, but both humans and wildlife need to be safe. Human welfare and safety depend on a thorough understanding of urban wildlife and their interactions with the urbanized landscape. Likewise, wildlife welfare depends on creating large, diverse areas of protected habitat that promote foraging and nesting behaviors. To ensure the sucessfull introduction of wildlife to the Complex, a wildlife management plan should be developed prior to implementing the habitat enhancement and expansion features of the design.



Birdwatching in wetlands.

Wildlife-friendly fence and gate.

Figure 6-8 Ideal Wildlife-Friendly Fence

WILDLIFE PROTECTION AND FENCING

In general, fences are not recommended in habitat areas for a variety of reasons. Fences can severely restrict wildlife movement or create a complete barrier for wildlife to access food and water. Tall chain-link and wooden or metal fences with closely spaced vertical or horizontal pickets are especially unfriendly to wildlife. Large, low-flying birds, may collide with fences and break wings, impale themselves on barbs, or become tangled in wires. Ducks, geese, hawks, and owls are especially vulnerable. Waterfowl fly into fences that run along waterways, and hawks and owls may careen into fences when swooping in on prey.

Designing a fence to provide wildlife with unobstructed travel to important habitat areas and corridors, as well as access to water, is ideal. A fence that is friendly to wildlife allows animals to jump over and crawl under easily without injury and should be highly visible to birds. The Silver Lake community has reported sightings of larger mammals such as bobcats, coyote, skunk, and opossum in the Complex. Post and rail fences as described in Chapter 5 and depicted in Figure 6-8 above are ideal for wildlife. The top of the fence should be low enough for adult animals to jump over, preferably 40" or less, and no more than 42" high.

When combined with education about urban wildlife and limiting human access to designated areas, such as paths and viewing platforms, habitat-friendly fences help protect wildlife while increasing their access to important habitat. The Master Plan design proposes to replace tall fences along the perimeter of the Complex with wildlife-friendly fencing along pathways adjacent to habitat areas to not only protect habitat but also maximize wildlife movement and prevent wildlife injuries or mortality.

INTRODUCING FISH

A key aspect to improving habitat value to local and migratory birds as well as biodiversity at the SLRC is introducing aquatic wildlife. Stocking fish in Silver Lake Reservoir is not a new idea. When it was first constructed, the reservoir was stocked with black bass to help maintain water quality. In addition to introducing marine invertebrates such as fresh water clams, a balance of piscivorous (predator) fish such as small bass and planktivorous (prey) fish such as minnows and crappies should be introduced to the reservoirs at a ratio of three prey fish for every predator fish.

6.4 Education and Interpretation

The Master Plan provides a bold vision to re-establish a wetland-focused ecosystem into the heart of Los Angeles and within the context of a public park. Along with the high priority placed on habitat and wildlife in the Master Plan, there is also an inherent responsibility for long-term stewardship. One of the best ways for humans to carefully and responsibility coexist with urban wildlife is through education.

As outlined in Chapter 04, during the community engagement process, participants placed a high value on educational facilities and programs. The Master Plan design provides the foundation to develop a myriad of education and interpretation opportunities from organized tours, classes, school field trips, and volunteer programs to less structured interpretive features and elements.

The SLRC has the potential to become an exemplary model of urban wilderness management and citizen stewardship. Through the lens of a living laboratory, the research and maintenance activities required for the long-term success of the proposed ecosystem can be made legible and transparent by increasing environmental and climate awareness across the community.

Education-based programs that the Master Plan design allows for range from water resource and wildlife management, tree and plant community succession and maintenance, and climate adaptation strategies to understanding ecosystem functions and services, tracking migratory birds, bird watching, pollinator conservation, and contributing to global wildlife and ecology databases through citizen science initiatives. Potential education and interpretation stations are shown in Figure 6-9.

Many of these education/interpretation activities will require ongoing funding to develop and sustain them. The benefits of this investment are enriching and enhancing the lives of a diverse City by fostering a deep connection to nature and the natural processes that sustain a healthy ecosystem.

POTENTIAL PARTNERSHIPS

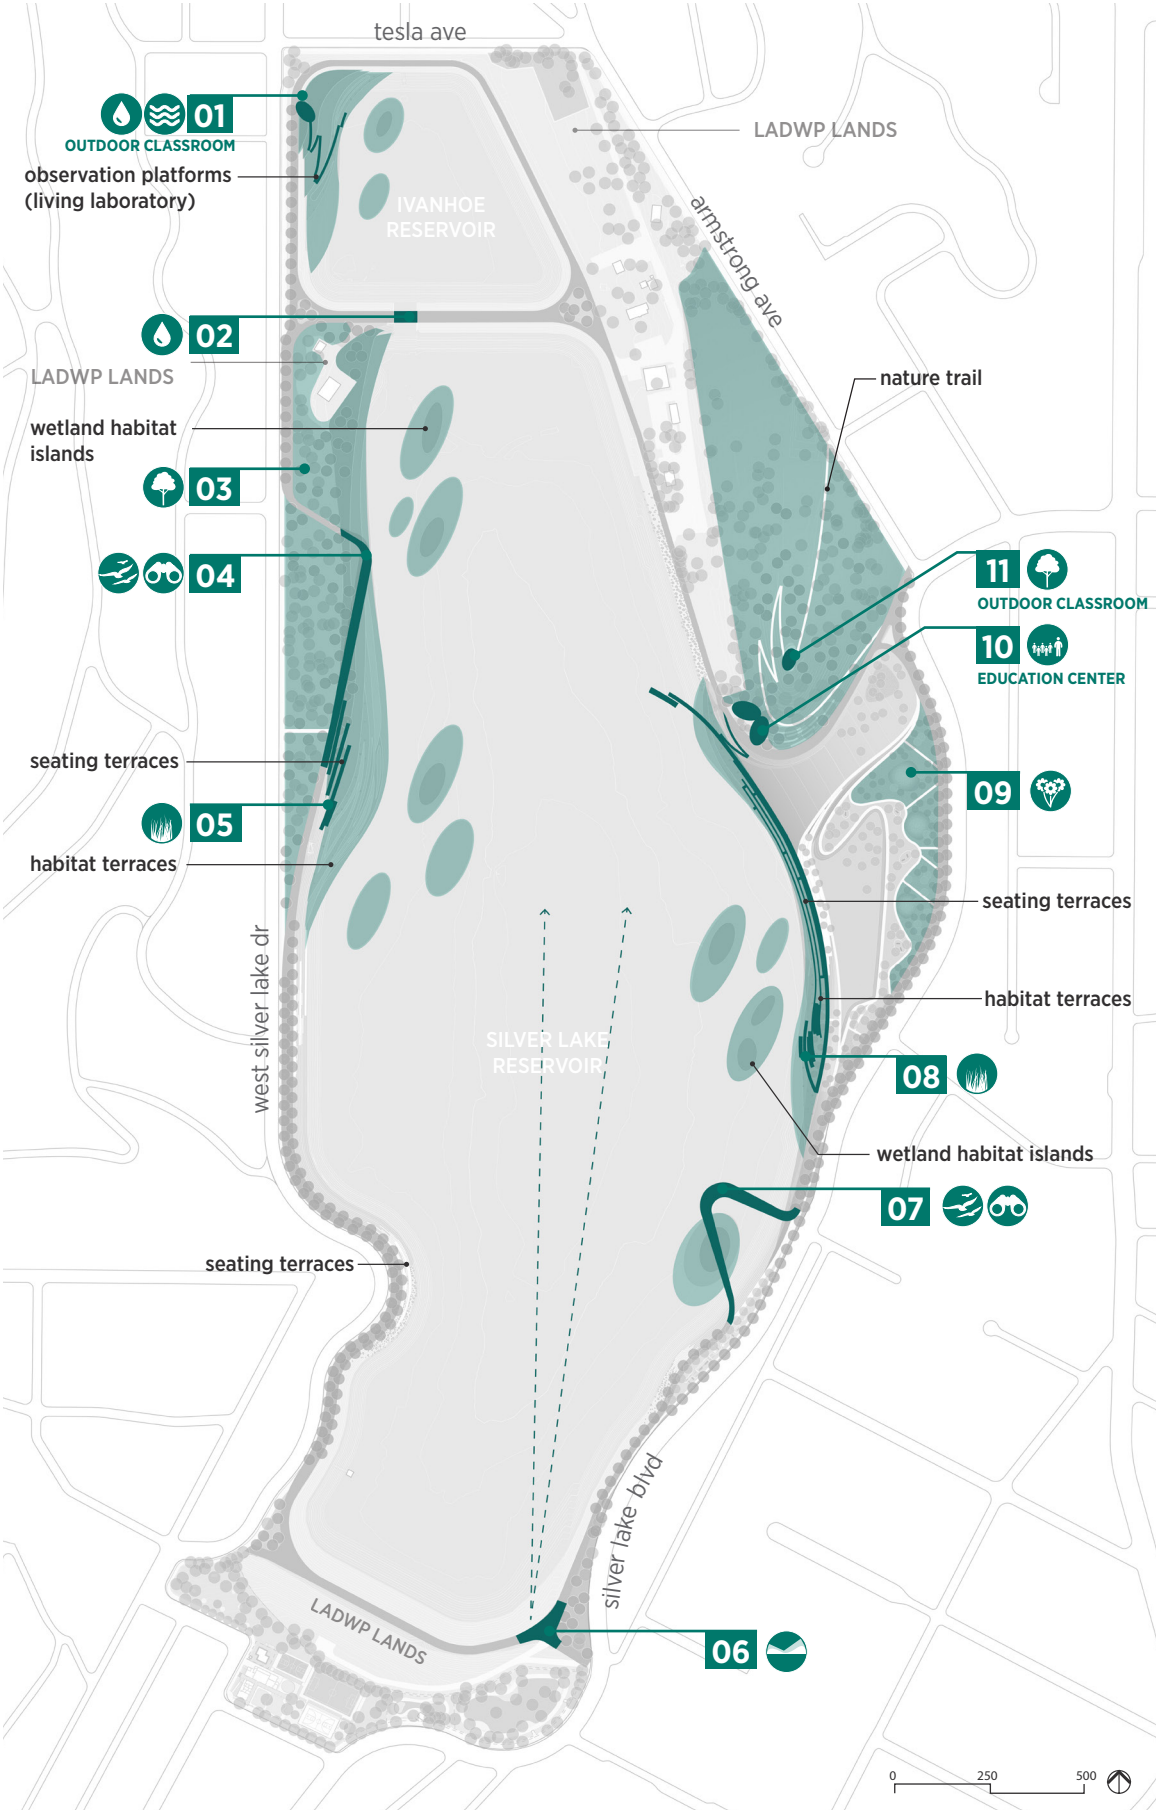
Partnerships with academic institutions, non-profits, and City departments could greatly expand the educational breadth and outreach to the regional population. Examples of potential partnerships are listed below:

PARTNER WITH SCHOOL DISTRICTS

Use the SLRC as a learning opportunity to bring K-12 school groups to the park to learn about different aspects of sustainability, ecology, culture, and history.

PARTNER WITH THE UNIVERSITY OF CALIFORNIA, LOS ANGELES (UCLA)

UCLA has the La Kretz Center for California Conservation Science which funds projects that bring together academics, resource and land policy professionals, and regulatory experts to optimally use the power of genomics in the conservation of California's threatened and exploited species. UCLA also has an Institute of the Environment & Sustainability which connects students with hands-on environmental research and practice opportunities to fuse thesis research with real field work.



PARTNER WITH THE CITY OF LOS ANGELES

Create a living laboratory at the SLRC to allow the City to test and monitor water quality and plant community and maintenance regimes, as well as test the effectiveness of different habitat creation techniques.

PARTNER WITH THE AUDUBON SOCIETY OR NATURE CONSERVANCY

The SLRC is within the Pacific Flyway migration path. With its emphasis on establishing habitat for migratory waterfowl, the proposed Park will be an ideal place for bird-related research or just enjoyable bird watching.

6.5 Water Quality & Park Water Systems

6.5.1 Reservoir Water Quality and Aquatic Habitat

Aquatic invertebrates which include insects, crustaceans, molluscs, arachnids, and annelids, are the building blocks of healthy aquatic ecosystems. They live all or part of their lives in water and their survival depends on water quality. They are also a significant part of the food chain as larger animals, such as fish and birds rely on them as a food source. These various functions aquatic invertebrate species perform are important for maintaining ecosystems services, such as converting live or dead organic material into prey items for larger consumers in complex food webs, while simultaneously providing nutrient cycling and aeration of sediments.

Aquatic invertebrates are used to assess the health of streams, lakes, and wetlands because different species have various tolerances to pollutants. Some species require high dissolved oxygen levels, or clear, non-turbid waters, or they may be predators that require a source of prey. In order to support a diverse array of invertebrates, water quality will need to meet the levels necessary to sustain these species.

6.5.2 Reservoir Water Quality System

The water system at the SLRC has been developed to support the wetland and aquatic habitat aspirations of the Master Plan. Key variables of this system are the reservoirs' water replenishment sources (stormwater and Pollock Well), annual evaporation, aeration, recirculation, nutrient loading, and treatment wetlands.

To understand the Master Plan's impact, such as introducing aquatic habitat, on long-term water quality at SLRC, a Water Quality Model was developed to predict water quality in both Silver Lake and Ivanhoe Reservoirs with the goal of maintaining a level of water quantity and quality that can support the future uses proposed at the site. The full Water Quality Model Technical Memo is available in the Appendix. T

The model, a zero-dimensional mass balance model, was built to mimic the processes that drive water quantity and quality in the SLRC, and it was calibrated against historic water level and water quality data. Four scenarios were constructed for the model as depicted in Figure 6-10. These evaluated isolation baseline conditions without Pollock Well water (Scenario 1), existing baseline conditions including Pollock Well water (Scenario 2), future conditions following the implementation of planned LADWP aeration, recirculation, and stormwater capture projects (Scenario 3), and conditions following the implementation of the Master Plan design which include habitat enhancement and treatment wetlands (Scenario 4). See Chapter 03 for a description of planned LADWP aeration, recirculation, and stormwater capture projects. Impacts to water quality were measured against specific numeric pollutant limits established as water quality goals for the SLRC.

Water Quality Objectives are established by the Los Angeles Regional Water Quality Control Board's Basin Plan for the Coastal Watersheds of Los Angeles and Ventura Counties (Basin Plan), but they can also be established by the United States Environmental Protection Agency (EPA). For the purposes of the model, water quality goal assumptions were based on those established for nearby Echo Park, and are outlined in Figure 6-11. During Master Plan implementation, the Basin Plan may be updated to include revised water quality goals for the Silver Lake and Ivanhoe Reservoirs. In addition to meeting the numerical goals, the SLRC must meet various narrative goals established by the Basin Plan, including minimizing stagnant water, reducing odor, and distributing dissolved oxygen throughout the SLRC.

Figure 6-10 Water Quality Model scenarios

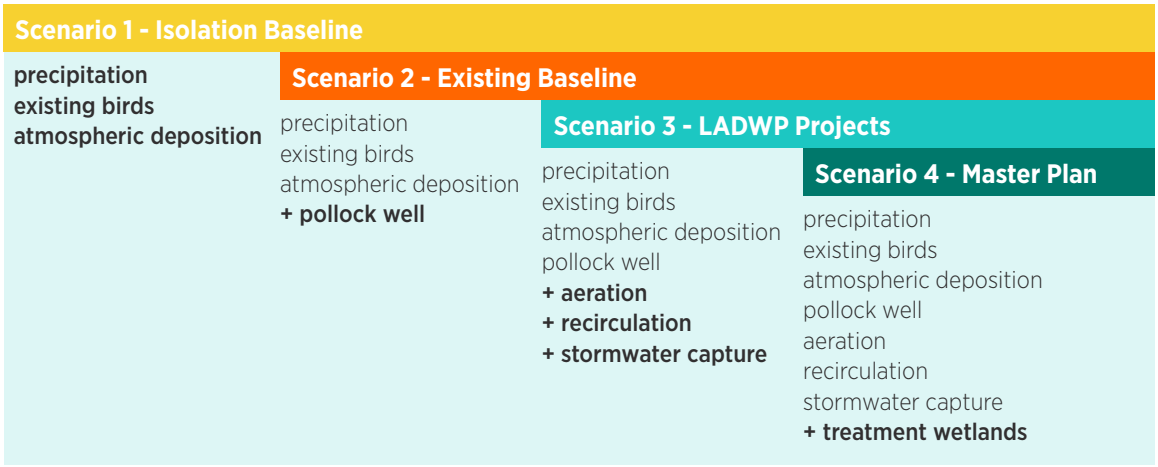

Figure 6-11 Water Quality Model Goals

WATER QUALITY GOALS	
Algae, Ammonia, Eutrophic, Odors	Total Nitrogen: 1 mg/L Ammonia-N: 2.15 mg/L (30-day average) Ammonia-N: 5.95 mg/L (one-hour average) Total Phosphorus: 0.1 mg/L Chlorophyll-a 20 mg/L Dissolved Oxygen: ≥5 mg/L (single sample one foot from bottom)
Copper	22 µg/L
Lead	11 µg/L
pH	6.5 to 8.5
Trash	Zero
Total Coliform	10,000 MPN/100 mL (single sample) 1,000 MPN/100 mL (single sample, Fecal/Total ≥ 0.1) 1,000 MPN/100 mL (geometric monthly mean)
E. coli	235 MPN/100 mL (single sample) 126 MPN/100 mL (geometric monthly mean)
Enterococci	104 MPN/100 mL (single sample) 35 MPN/100 mL (geometric monthly mean)

The results from the model indicated that the addition of wetlands will provide a significant water quality benefit for phosphorus, nitrogen, chlorophyll, and algae. Figures 6-12 and 6-13 show some of the results from the water quality model. Nitrogen peaks which were above the goal of 1 milligram per liter (mg/L) in Scenarios 2 and 3 were reduced to peaks of less than 0.3 mg/L in Scenario 4. Phosphorus, which plays an important role in the generation of chlorophyll-a, was reduced by 87% in Silver Lake Reservoir and by 91% in Ivanhoe Reservoir due to the presence of treatment wetlands. Algae coverage was reduced by 75% in both reservoirs. The model also indicated there would be a meaningful reduction in dissolved solids and in total coliform bacteria due to the treatment wetlands in Scenario 4. Over the twenty-year timespan of the model, total coliform limits were predicted to be exceeded in Ivanhoe Reservoir on fourteen days in Scenario 3 due to stormwater runoff from the future stormwater capture project. This was reduced to just one day in Scenario 4. These reductions in nutrients and bacteria highlight the importance of including wetlands in the SLRC Master Plan design.

6.5.3 Wetlands and Reservoir Water Quality

Constructed wetlands are treatment systems that use natural processes involving wetland vegetation, soils, and their associated microbial assemblages to improve water quality. As water flows through a wetland, many suspended solids, such as sediment, become trapped by vegetation and settle out. Other dissolved pollutants, such as nitrogen and phosphorus are taken up by plants or become inactive. Wetlands also support microorganisms that remove pollutants from the water.

In addition to providing terrestrial and aquatic wildlife habitat, floating wetlands are proposed to enhance water quality. These types of wetlands are considered highly effective since their soil and plant roots are consistently inundated with water and have been shown to reduce a variety of pollutants in water such as nitrogen, phosphorus, total suspended solids, pathogens, and heavy metals.

WETLAND MAINTENANCE

The habitat wetlands proposed in the Master Plan design, can only be considered “treatment wetlands” for water quality if they are maintained properly. Additionally, the water quality benefits derived from treatment wetlands are only achievable over the long term if continuous, comprehensive maintenance is sustained, especially for floating treatment wetlands, which require specialized maintenance. Prior to implementing the wetland elements proposed in the Master Plan, a Wetlands Maintenance Plan will need to be developed. The Wetlands Maintenance Plan should not only describe the maintenance requirements but also specify future funding to guarantee a sustaining source of financial support for wetlands maintenance. A summary of the operation and maintenance requirements for the proposed wetlands is provided in Chapter 08.

6.5.4 Reservoir Water Replenishment

The two sources for reservoir water replenishment are Pollock Well #3 and the Stormwater Capture project as discussed in Chapter 03. To achieve habitat and water quality goals based on the proposed design, the Master Plan recommends establishing an average water elevation of 446-feet in Silver Lake Reservoir with a no greater than a 2-foot fluctuation annually to maintain water levels between 445 and 447 feet. Implementation of this operational change will be coordinated with LADWP and occur when the projects requiring the proposed water elevation are completed. Water levels will require monitoring.

As described in Chapter 03, the operated water elevation for Ivanhoe Reservoir will be at elevation 451 feet once the LADWP Recirculation project is implemented. The proposed wetlands in Ivanhoe Reservoir assume this constant elevation.

Scenario 2 - Existing Baseline
Scenario 3 - LADWP Projects
Scenario 4 - Master Plan

6.5.5 Irrigation Water System

The wetland and transition habitat areas will utilize reservoir water as the primary source of irrigation. Water will be pumped from the reservoirs to the wet meadow habitat zones which will then flow through the emergent wetlands back into the reservoirs. The water will be treated through sedimentation of suspended solids and filtration as it moves through each of the wetland zones. The wet meadows will go through wetting and drying cycles daily as reservoir water is pumped into them and then allowed to drain out. Transition habitat zones will also be irrigated with reservoir water on a separate cycle appropriate for the drought-tolerant, coastal scrub planting palette envisioned there. This water strategy will need to be validated by reservoir water quality testing and soil analysis.

Remaining upland habitat, lawn areas, and ornamental gardens will be irrigated via a potable water supply available from the LADWP distribution system which will require a dedicated meter. If recycled water is available in the future, it could be used to irrigate ornamental planting. Depending on its nutrient and dissolved solids content, future recycled water may not be suitable to irrigate upland habitat areas without additional filtration or treatment.

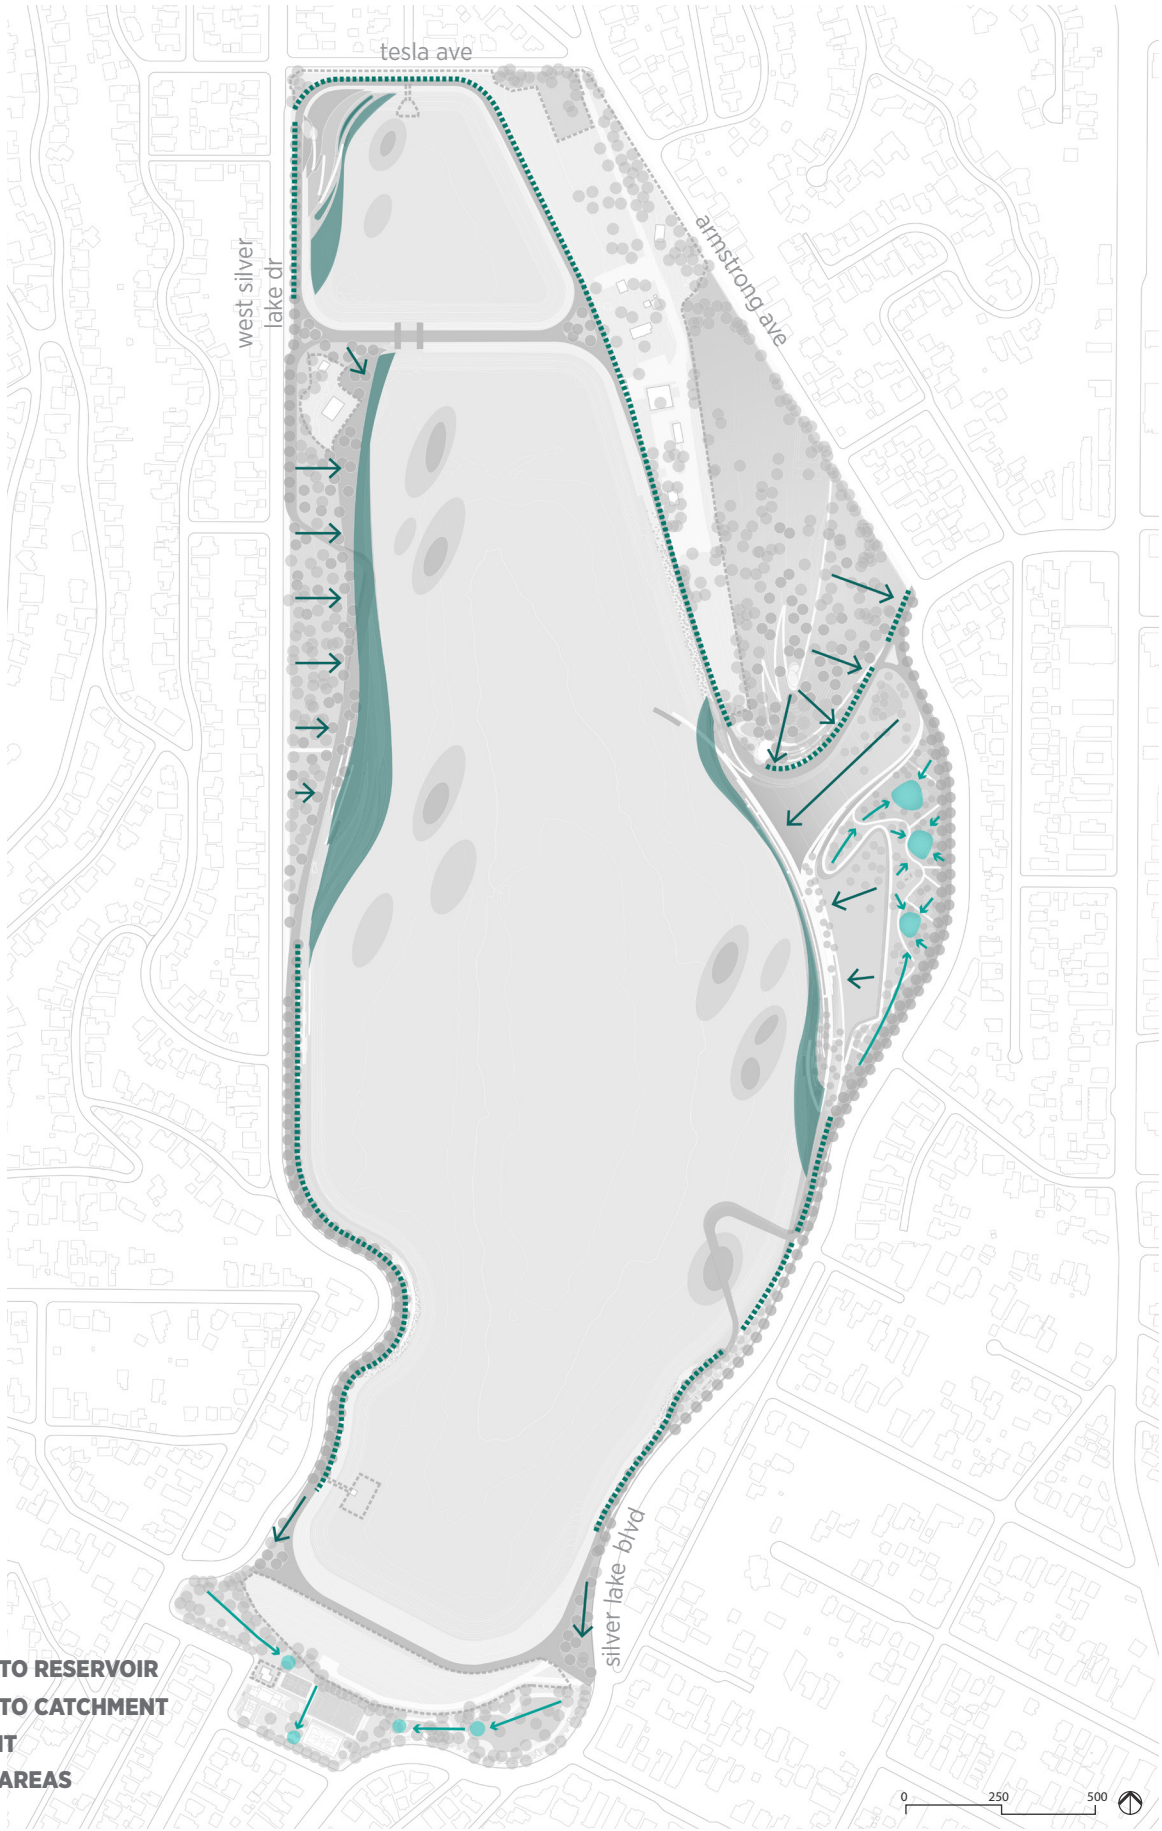

Figure 6-14 Irrigation Concept Diagram

6.5.6 Surface Stormwater Drainage

To protect the reservoir waters from untreated surface runoff within the Complex, a decentralized drainage strategy has been developed. For areas adjacent to treatment wetlands, such as the great lawns and seating terraces, these will be designed for surface runoff to move thorough the wetlands before entering the reservoirs. In other areas, stormwater runoff will be treated by infiltration gardens located throughout the park. For example, the Picnic Grove and Ornamental Gardens will drain to Dells that are depressions in the landscape which will filter stormwater before it's collected and piped into the reservoirs. At the Knoll, runoff from its slopes will be collected in swales adjacent to the Education Center and treated before entering Silver Lake Reservoir. Along the Promenade, biofiltration planting will be incorporated to treat stormwater runoff from its paving surfaces. See Figure 6-15 for a diagram of this drainage concept.

Figure 6-15 Master Plan Drainage Concept Diagram

6.6 Envision Rating

Envision™ is a rating system and best practice resource to help ensure sustainability features and elements are successfully implemented in infrastructure projects. Envision™ measures the sustainability of an infrastructure project from design though construction and maintenance across five categories: Quality of Life, Leadership, Resource Allocation, Natural World, and Climate and Resilience.

The Envision™ Guidelines assign a points value and a level of achievement (LOA) depending on the type and amount of documentation necessary to achieve these points. A City of Los Angeles goal for this project is to achieve Envison's highest rating – Platinum. However, since the Master Plan is a conceptual document, some of the credits necessary to achieve a platinum designation depend on how the project is implemented and requires additional work outside the scope of the Master Plan project. Therefore the project team evaluated the Envision™ credits achievable under two scenarios: Baseline Scenario to achieve an Envision Gold Rating and an Additional Effort Scenario to achieve an Envision Platinum rating as shown in Figure 6-16.

The Baseline Scenario includes LOAs that are achieved through typical minimum required standards for City of Los Angeles public works projects and/or through documentation that is already planned for inclusion during the Master Plan. The Additional Effort Scenario includes LOAs that are achievable by providing additional documentation that is not currently planned, such as a Sustainability Management Plan or modified project specifications and special provisions, but that can be achieved with reasonable effort.

The Envision™ Rating assessment technical memo in the Appendix lists and describes in detail the credits that may be applied to the project to achieve a Gold and Platinum rating.

Envision™ offers four recognition and award levels based on a percentage of points achieved as follows:

Recognition Level	Total Applicable Points (%)
Bronze	20
Silver	30
Gold	40
Platinum	50

Figure 6-16 Envision™ Pre-assessment Checklist

This shows possible points for achieving Baseline and Additional Effort Scenarios.

Under the Baseline Scenario, the project is projected to achieve a Gold rating (42% of applicable points). Under the Additional Effort Scenario, the Master Plan is projected to achieve a Platinum rating (56% of applicable points).

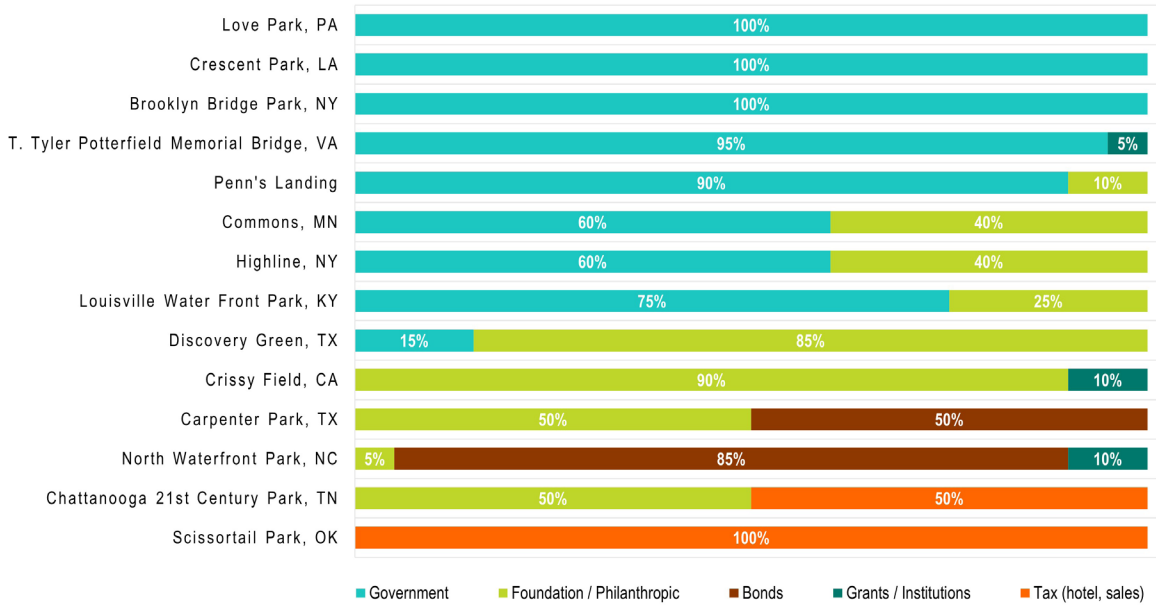
Figure 7-3 Grant Opportunities **237**

7.1 Capital Funding Strategies Overview

Four principal types of funds are generally available nationally for park development efforts, in amounts that depend on local context and park mission:

- Public Funding (financing and/or taxation)
- Value Capture
- Earned Income
- Private (Philanthropic)



Often cities employ a combination of funding methods to develop parks (Figure 7-1). Based on community concern and opposition to revenue-generating features or elements in SLRC, earned income was not considered a viable strategy for the SLRC Park.

During the Master Plan development process, HR&A Advisors was retained to provide an analysis of potential public and other mechanisms that can be leveraged to fund capital and operating needs of the proposed Park. Six public mechanisms were reviewed including: Community Finance Districts (CFD), Development Agreement Fees, Enhanced Infrastructure Financing Districts, Parcel Taxes, Quimby Fees, and Special Assessment Districts. Additional funding sources identified were Grant Funding and Philanthropic contributions.

In addition to capital funds, funding will be needed to support the anticipated on-going operations and maintenance (O&M) needs of the Park which are described in Chapter 08.

Figure 7-1 Park Funding Benchmarking

Chart benchmarks the sources of funding for a variety of parks in the United States.

7.2 Capital Funding Recommendations

Based on the Park's context, the needs and perspective of City staff, and review of potential funding mechanisms, the following describes recommended capital funding sources for the City to explore in greater detail to implement the Master Plan vision. This capital funding strategy relies primarily on the implementation of a Community Facilities District (CFD) to generate special tax revenue to finance a significant portion of capital construction cost as well as O&M costs.

COMMUNITY FACILITIES DISTRICT

The Mello-Roos Community Facilities Act (Act) was enacted in 1982 and provides a method for local governments to fund public infrastructure and certain services, through the formation of "Community Facilities Districts" (CFDs), which provide the legal authority for local governments to levy and collect a special tax and to issue bonds or incur other debt. A two-thirds vote of the qualified electors within the CFD boundaries is required to form a CFD. Given the vote requirement, voters must clearly see the value of the Project and believe that the expected return on investment is reasonable given the proposed taxation.

The special tax may be used to pay directly for facilities and/or services, to pay debt service on bonds or other debt the proceeds of which are used to finance facilities, or for any combination of the above. Additionally, the special tax may be structured so that the tax for facilities has a sunset, and the tax for services may run in perpetuity. The Act provides flexibility in structuring the tax formula. Typically, a special tax consultant is engaged to assist with preparing the Rate and Method of Apportionment, which details the manner in which the tax will be levied.

Mello-Roos bond proceeds can be used to finance the construction, expansion, rehabilitation, or acquisition of any real or other tangible property with an estimated useful life of five years or more, which will be constructed, owned or operated by a public entity. Mello-Roos bonds are payable solely from special taxes levied on property within the boundaries of the CFD. The City is not obligated to pay the bonds from any funds of the City.

As the primary funding source for capital, CFD implementation details should be advanced as soon as possible following Master Plan adoption and should prioritize the following:

- Engagement of a municipal advisor and/or CFD tax consultant to develop and evaluate potential structure(s) and related detailed revenue estimates.
- Engagement of bond counsel to advise on the use of tax revenue.
- Evaluation of potential voter support of the CFD mechanism.
- Identification of a funding source to support CFD formation costs of approximately $500,000, excluding community outreach and engagement.

OTHER FUNDING SOURCES

While a CFD represents a significant funding source for both capital and ongoing O&M costs, its implementation will take time and a funding gap is likely to occur. As CFD implementation planning is underway, other funding sources could be used to support short- and medium-term continued planning, engineering, and design development, as well as supplement capital funding needs.

Development Agreement Fees are one-time payments most suited to supporting capital costs, which can include planning and design costs. During initial planning and detailed design stages, one-off funding opportunities negotiated through Development Agreements, can support early implementation efforts such as detailed design.

Because **Quimby Fees** must go towards park improvements on land controlled by the Board of Recreation & Parks Commissioners and are allocated by the RAP Board, they are only suited to supporting the RAP Improvements phase of the Master Plan such as the Dog Park expansion and renovation and the Multi-Purpose Facility at the Silver Lake Recreation Center.

Grant Funding opportunities to support discrete environmental projects include Federal, State, and Local grants. The full range of grant opportunities varies in size from approximately $25,000 to $10 million; priority grants range in funding potential from $1 million to $6 million.

Philanthropic contributions can be used for Park implementation as well as ongoing O&M costs; however, the experience of major civic and park investments around the country have shown that donors are more willing to contribute to capital needs, even in large amounts, than to support annual operating expenses. Demonstration Projects should be identified within the Master Plan design to generate enthusiasm and secure buy-in and fundraising interest from Park supporters. These projects should play to the singular features of the Park's design, particularly its focus on aquatic habitat restoration, environmental education, and water quality. Elements of the Master Plan design ideally suited as donor-supported Demonstration Projects are the Wetland Habitat Islands and Terraces, Ivanhoe Overlook, and the Education Center. These feature projects are well-positioned to generate interest and support from a range of potential philanthropic donors – whether individual, nonprofit, or corporate contributors. Buildout of these projects will in turn attract greater interest in the Park and serve as proof-of-concept for additional philanthropic capital to support the gap in funding capacity from CFD revenue, Quimby Fees, Development Agreement Fees, and Grants.

City General Fund appropriations from relevant budget areas may also contribute to capital costs if the funds are available. Additional public funding is assumed to be limited, and the owner of the Park, LADWP, will not contribute to capital costs for Master Plan implementation.

Figure 7-2 Parking Funding Matrix

Outline of funding sources and range of potential funding amount each source might provide.

Funding Source	Potential Funding Amount	Notes
Community Facilities District (CFD)	$150M - $200M	Includes annual O&M costs
Quimby & Development Agreement Fees	TBD	Quimby Fees can only be used on RAP lands.
Public Grants	$200k - $6M	
City General Fund	TBD	
Total	$150M to $206M+	
Remaining Capital Funding Gap	$62M - $118M	Range of capital funding needed from fundraising or City General Fund.

7.3 Philanthropy & Grants

PHILANTHROPY

In addition to implementing a CFD structure that considers both capital and O&M needs, confirmation of potential Quimby and Development Agreement Fee grants, and considering Federal, State, and local grant applications, the remaining capital needs result in a gap in funding that requires philanthropic capital, ranging from approximately $60 million to $120 million. Securing commitments for these funds requires the following:

- Identification of project elements/phases best suited for attracting donor support, including naming rights and potential design refinement or illustration of such project components.
- Completion of a fundraising feasibility study, to establish and confirm the potential amount that could be raised from among likely donors.

GRANT FUNDING

During the Master Plan development process, the project team reviewed 28 grant opportunities available from local, state, and national public agencies and non-profit organizations as potential sources for project funding. These were evaluated against five priority categories related to grant mandate, grant size, availability of funds for near-term design and planning costs, availability of funds in the future, and matching requirements. These categories are described below:

Grant Mission
How well does the Master Plan or elements of its design align with the mission of the grant? This takes into account grant function as stated in grant guideline documents, typical previously funded project types, and disadvantaged community (DAC) requirements.

Size of Grant
This factors in the size of the grant. Only grants that will likely fund $1,000,000 or more were prioritized.

Applicable to Planning Work
This factors in the amount of funding that can be spent on near-term planning and detailed design as opposed to construction costs. Grants that are available with no spending caps on design and planning were prioritized.

Future Funds
This category evaluated grants based on the likelihood of funding being available three to four years from now. Grants funded through large pools of ongoing resources were prioritized.

Match Limits
Grants with no requirements for matching funds were prioritized over those that require dollar-for-dollar matching funds.

Based on the above criteria, four grants were identified as priorities to consider for formal application once the Master Plan is adopted. These are briefly summarized in Figure 7-3.

Figure 7-3 Grant Opportunities

Recommended grant funding opportunities for City consideration

Funding Agency	Program	Funding Source	Description
Cal Parks	Regional Park Program	Proposition 68 (2018 Bond Act)	Goals of grant align with recreational features of proposed park. This grant could be used to fund a portion of the following spaces: Ivanhoe Overlook, Knoll, Eucalyptus Grove, Meadow, East and West Narrows, RAP Improvements, Ivanhoe Spillway and Promenade.
Cal Parks	Land and Water Conservation Fund - Outdoor Recreation Legacy Partnership	Land and Water Conservation Fund	This grant tends to fund urban park improvements such as playgrounds, walking paths, and planting. It could be used to fund a portion of the following spaces: Ivanhoe Overlook, Knoll, Eucalyptus Grove, Meadow, East and West Narrows, RAP Improvements, Ivanhoe Spillway and Promenade.
LA County Regional Park and Open Space District	Regional Recreation Facilities, Multi-Use Trails, and Accessibility	Measure A	This grant is intended for regional park and trail improvements. It could be used to fund a portion of the following spaces: Ivanhoe Overlook, Eucalyptus Grove, Meadow, East and West Narrows, Ivanhoe Spillway and Promenade.
LA County Regional Park and Open Space District	Regional Recreational Facilities, Multi-Use Trails, and Accessibility	Measure A	Grant emphasizes habitat creation, improving open space, water resources, and multi-benefit parks. It could be used to fund a portion of the following spaces: Ivanhoe Overlook, Eucalyptus Grove, Wetland Habitat Islands.

GRANTS FOR PUBLIC RIGHT-OF-WAY IMPROVEMENTS

In addition to the grants evaluated as described above, the pedestrian and bicycle elements proposed in the Master Plan that are located within the public right-of-way are eligible for State of California Active Transportation Program (ATP) Grants.

7.4 Governance Considerations

Capital costs and O&M funding will impact both the likely sequencing of project phases and the long-term governance structure of the stewardship entity that will carry the Master Plan forward through implementation. The responsibilities of this governance entity will likely include fundraising for continued planning and design work, grant-writing activities, and potential management of the major capital buildout. Governance is discussed in greater detail in Chapter 08.

Figure 8-8 LADWP Areas of Responsibility **253**

8.1 Park Governance, Maintenance & Operations Overview

The management of urban parks has in recent years included a variety of structures depending on the specific situation in each locale. Identifying the right entity to manage a new urban open space and tailoring this oversight to a specific park's needs is a key step. A crucial component to this management responsibility is ongoing park operations and maintenance (O&M). The Master Plan proposes a diversity of spaces, plantings, and habitat creation which all must be maintained at a high-quality in order to effectively serve its intended purpose. To maintain the proposed urban wilderness, operate an Environmental Education Center and regular programing, as well as upkeep on miles of walking paths, acres of native and ornamental planting, and a healthy aquatic ecosystem, all requires an approach which is effective, creative and nimble.

The Master Plan's recommendation for governance is a strategy centered around the formation of an independent, special-purpose, non-profit entity charged with stewarding the build out and operation of the Park. A special-purpose entity can provide the leadership to manage project implementation and long-term operations. It can also fundraise to support capital and O&M costs, with a Board of Directors that is representative of committed project stakeholders.

The Design Team has worked closely with City departments and representatives of elected officials to develop an O&M plan that reflects the current Master Plan vision and incorporates day-to-day maintenance and operational considerations. Estimated O&M costs take into consideration critical design elements of the Park, stakeholder expectations of maintenance standards, the surrounding communities' goals for Park activation, and implications of a potential contribution of taxpayer funds.

this page is intentionally left blank

8.2 Park Governance and Operating Structure

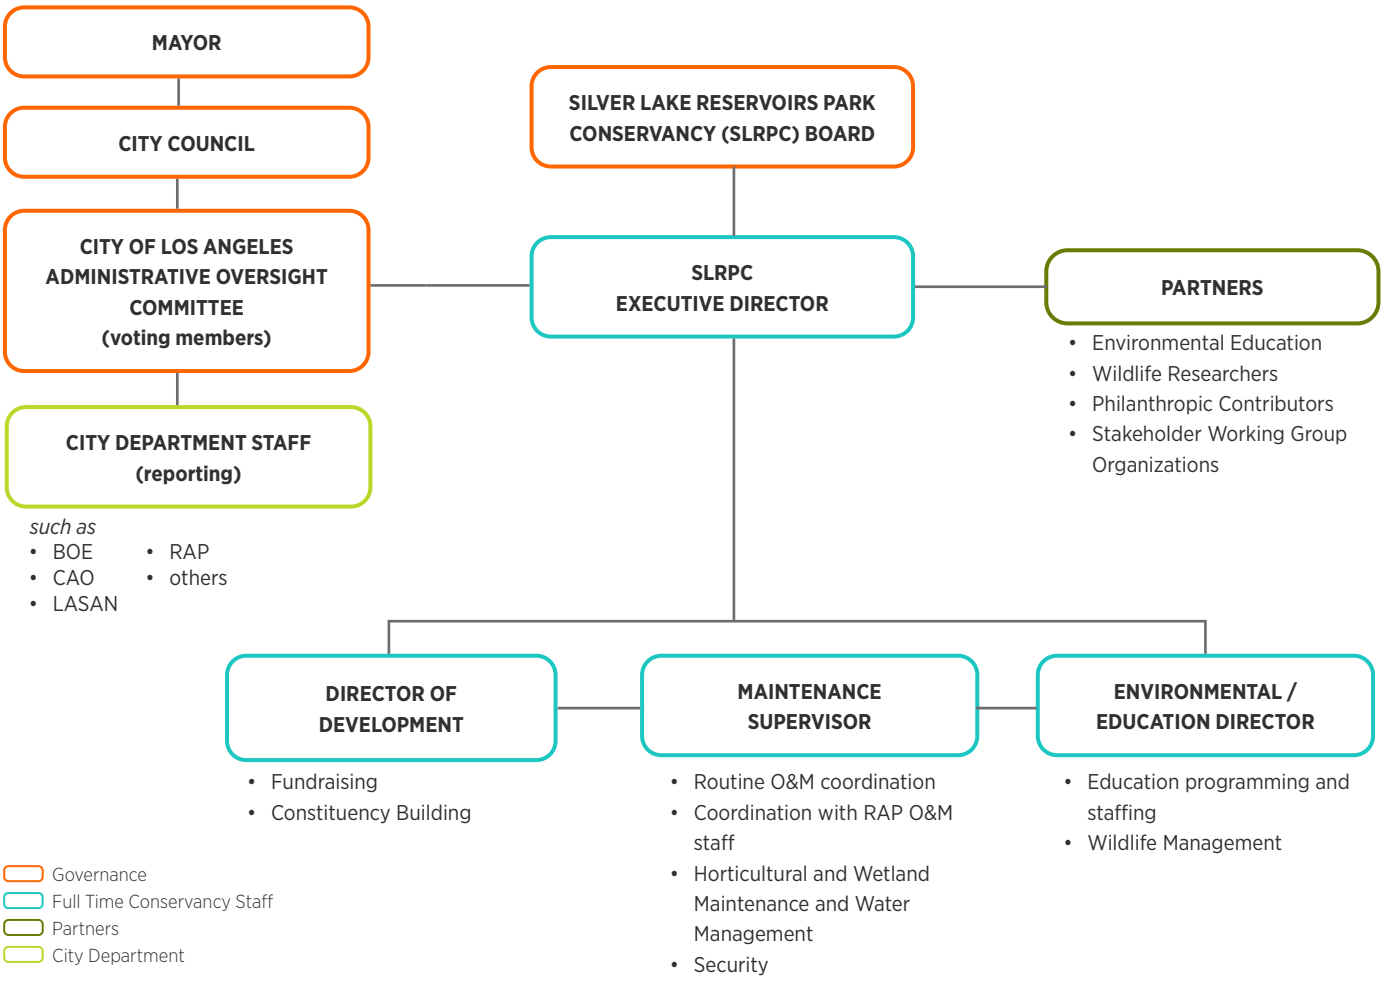
To achieve the Master Plan vision, the formation of an independent, special-purpose, non-profit entity named the Silver Lake Reservoirs Park Conservancy (SLRPC) is recommended. Although LADWP will continue to own the land which comprises the SLRC, LADWP is not structured to operate a public park. Additionally, due to the extensive, specialized environmental aspects of the design, RAP does not anticipate operating the Park outside the confines of the Silver Lake Recreation Center, and as such, would no longer operate what is currently The Meadow.

This special-purpose entity could be a completely new entity or represent an expanded role for one of the existing non-profit stakeholders in Silver Lake. If the City's policy makers choose, the entity could provide the leadership to manage project implementation in addition to long-term operations. It can also fundraise to support capital and O&M costs, with a Board of Directors that is representative of committed project stakeholders. If structured to benefit from dedicated resources and funding outlined in Chapter 07, such an entity would be endowed with the staff and budget capacity necessary to: champion a multi-phase implementation process; provide sustainable operations, including maintenance of unique horticulture and wetland spaces to the elevated standard envisioned in the proposed Master Plan; and coordinate revenue allocation with the City that is generated by one or more Community Facilities District(s) and any philanthropic fundraising.

In addition to the SLRPC, a City Oversight Committee comprised of representatives from key City agencies is recommended to ensure that Park capital expenditures and operations align with the guidelines and goals for the Park, providing accountability for the expenditure of public funds. This would be similar to current oversight committees that provide direction on capital expenditure for City funded projects, and this Oversight Committee would forward to full Council and the Mayor recommendations on the expenditure of City funds for full Council and Mayor review and action.

GOVERNANCE STRUCTURE

The SLRPC will champion the planning and buildout of the Master Plan, fundraise for the balance of capital needs, and oversee Park O&M. The SLRPC should be led by a Board of Directors charged with upholding and advocating for the Park's vision, hiring and evaluating staff who manage contracts, and conducting fundraising on an ongoing basis. Its staff will also coordinate as needed with LADWP, which has a limited set of responsibilities to maintain dam and related infrastructure and to maintain water levels as required. LADWP will not otherwise participate in ongoing O&M of the Park.



The City will provide oversight for the non-profit through an Administrative Oversight Committee. The need for oversight could fit into the City's existing committee structures, with leadership from the CAO, the Mayor, the CLA, RAP, and LADWP. Additionally, the CAO will serve as the District Administrator of the Community Facility District (CFD) on an ongoing basis. Both the Administrative Oversight Committee and CAO administration of the CFD would facilitate accountability for the use of CFD funds for the Park by ensuring the following: that funds are spent appropriately and according to the Master Plan (including with respect to scope and budget, procurement, etc.); that the Park operates to the standards set forth in the Master Plan and as a City-owned public park (including with respect to accessibility, hours of operation, etc.); and that the Park operates in harmony with the needs of the land owner, LADWP.

Upon the adoption of the Master Plan by City Council and the concurrence of the Mayor, the City will participate in the formation of the non-profit, identifying a project champion to act as a leader in this effort, including participating in assembly of an initial Board of Directors acceptable to City overseers. City participation will support development of the non-profit's vision, mission, by-laws, and action plans to advance Project implementation.

The composition of the **Board of Directors** of the governance entity will be crucial to a sustainable, inclusive governance structure that will steward the Park through the implementation and operations phases. Upon the creation of the SLRPC, the Board should be composed of a small number of committed stakeholders. This group will sustain the project's existing momentum to formulate goals, action plans, and fundraising required to advance implementation. In keeping with the community's desire for a balanced, inclusive open space as reflected during the Master Plan's community engagement process, the Board should be representative of the diverse communities that will be impacted by the Park.

The governance structure will evolve as the Project progresses. As the Park begins ongoing operations, the structure will shift as the SLRPC shifts focus to operating and management capacities. Board composition and advisory roles will grow to accommodate new functions such as educational programming and coordination of day-to-day operations. A conceptual organizational structure is shown in Figure 8-1.

Figure 8-1 Conceptual Governance Organizational Structure

GOVERNANCE RESPONSIBILITIES

The non-profit will have the following responsibilities as operator of the Park:

Fundraising: Lead fundraising for capital funding gap and ongoing O&M needs as necessary.

Routine O&M Coordination: Contract for provision of routine O&M. RAP will provide routine O&M on RAP-owned land. There is also potential for one entity to perform O&M for the entire park for economies of scale. This function should be put out to bid, with RAP given the option to pursue along with other park-maintenance contractors.

Horticulture Maintenance, Wetland Maintenance, and Water Management: Manage specialized subcontractors that ensure a high level of care and maintenance for unique park features.

Programming: Manage the Park's Education Center and coordinate additional programming, either directly or through a third party.

Security: Manage security contractor.

8.3 Park Operations & Maintenance

Many elements of the Master Plan design will require careful, dedicated maintenance beyond the standard typical of other City of Los Angeles parks, particularly its emphasis on native plantings and aquatic habitat maintenance, which also includes wetland maintenance. Also note that the communities surrounding SLRC have discouraged intensive programming.

SLRC's budget for O&M developed by consultant HR&A Advisors consists of five main categories:

Routine O&M: Includes the routine cleaning and maintenance of park spaces and park facilities, costs of clearing paths and walkways, trash removal, and cleaning of park facilities such as the Education Center and restrooms. Capital maintenance costs, including capital repairs and equipment purchases, are included in this category. Maintenance staff will have a consistent, daily presence at the park in service of ensuring a high level of care.

Horticulture Maintenance and Water Management: This is a distinct category in keeping with the high level of care and maintenance as well as the extensive Wetland and Upland Habitat zones and Ornamental Gardens envisioned in the Master Plan. Costs will grass cutting and tree pruning, as well as specialized maintenance of plantings and vegetation, including wetland habitats. Water management will include water quality permitting, monitoring, and compliance; and in-lake activities, such as debris removal and maintaining the floating wetland habitat islands.

General Administration: This covers the administration costs of the non-profit entity described above. Costs primarily include staff salaries, materials, office space, and other non-maintenance costs of the operation of facilities such as the Education Center, the programming and operation of which is to be determined.

Security Staff: Security staff will have a daily presence at the Park to provide oversight of the Park's large acreage, address safety concerns related to the reservoir space and unsafe behavior. The conceptual budget described in the following pages accommodates two full-time equivalent security personnel onsite 24 hours a day, 7 days a week.

Constituency Building: The non-profit entity will need to engage in some activities to support annual O&M costs through fundraising efforts. A significant portion of revenue to support annual O&M will come from the proposed CFD funding structure. Therefore, ongoing fundraising will be limited but will have the potential to offset taxpayer burden and provide a rainy-day fund. The conceptual budget described below accommodates one full-time staff person dedicated to Constituency Building.

APPROACH TO O&M CONCEPTUAL BUDGET

Total O&M costs are estimated at $3.64 million per year. HR&A developed this estimate through the methods detailed below and in Figure 8-2.

Routine O&M, Horticulture Maintenance, and General Administration Costs Analysis

HR&A examined the O&M costs of comparable urban parks, with a particular focus on local precedents, and selected precedent parks for each cost category based on the parks' relevance to the Master Plan's proposed program and design. Comparable park costs were normalized on a per acre basis and applied to the proposed Master Plan design acreage. Parks with the following characteristics were considered appropriately comparable:

- Medium-sized, urban park
- Located in a relatively low-density area
- Surrounded by predominantly residential use
- Minimal programming or activation
- Substantial non-profit role in management and operation of the park

The following precedents were selected for examination because they demonstrate at least some of the desired characteristics. Brief descriptions of these parks are included in section 8.4 on page 247.

- Echo Park, Los Angeles, CA
- Scissortail Park, Oklahoma City, OK
- San Francisco Botanical Gardens, San Francisco, CA
- Shelby Farms, Memphis, TN

Security and Constituency Building Costs

These costs were calculated on a per FTE salary basis. Security costs comprise full-time salaries plus benefits for a 24/7 onsite security presence, with two security personnel and three 8-hour shifts per day. Salaries for security personnel are based on the City of Los Angeles salary range for a Security Officer position as of January 2020. Constituency Building costs comprise full-time salary and benefits for one staff member. Salary for Constituency Building personnel is based on the typical range for Directors of Development and Directors of Fundraising at non-profit organizations in the Los Angeles region.

Silver Lake Recreation Center New O&M Costs

Additional O&M costs associated with the proposed design at the Silver Lake Recreation Center were calculated based on existing maintenance and programming costs. The Master Plan proposes expansion of the Recreation Center, a new Multi-Purpose Facility, renovation and expansion of the Dog Park, and other landscape features, which will result in increased operational costs for these RAP parcels. These increased costs were estimated based on current maintenance and programming costs on the RAP parcels. RAP's O&M costs are not included in the total proposed Park O&M cost detailed below, but are noted in order to give a full picture of the operational costs associated with the Master Plan design and for RAP budget planning purposes.

CONCEPTUAL ANNUAL O&M BUDGET

A conceptual annual O&M budget of $3.64 million was estimated based on O&M costs for comparable urban parks and on typical costs for salaries in the Los Angeles region. The use of CFD revenue for specific O&M, administration, and programming services expenditures will need to be reviewed by bond counsel.

Budget Item	Share of Total Budget	Annual Costs
Routine O&M	37%	$1,350,000
Horticulture Maintenance & Water Maintenance	40%	$1,460,000
General Administration	7%	$255,000
Security	13%	$460,000
Constituency Building	3%	$116,000
Total Conceptual Annual O&M Budget		**$3,641,000**
New Annual Programming & Recreation Costs at Silver Lake Recreation Center		$236,000

Figure 8-2 Conceptual Park Annual O&M Budget

8.4 O&M Precedent Parks

ECHO PARK, LOS ANGELES, CA

A 29-acre open space in neighboring Echo Park, owned and maintained by RAP. Like SLRC, Echo Park is anchored by a body of water, Echo Park Lake, and is home to wildlife habitats, walking trails, and recreational facilities. For this analysis, Echo Park's Routine O&M costs were used as a precedent to determine a baseline for Routine O&M costs for SLRC. The costs of maintenance of Echo Park Lake were also used to determine Water Management costs at SLRC.

SCISSORTAIL PARK, OKLAHOMA CITY, OK

An urban park extending from the downtown core of Oklahoma City, Scissortail Park's first phase comprises 36 acres of gardens and woodlands, a lake, and retail and recreational facilities. Also designed by Hargreaves Jones, Scissortail Park's Routine O&M costs were used as a benchmark for this analysis.

SAN FRANCISCO BOTANICAL GARDENS, SAN FRANCISCO, CA

The Botanical Gardens are home to a 55-acre arboretum and gardens, and are located within Golden Gate Park, adjacent to San Francisco's residential Inner Sunset neighborhood. With a mission that focuses on horticulture and specialized landscaping and an emphasis on passive use, the Gardens' horticulture maintenance costs were used a precedent for SLRC.

BUFFALO BAYOU PARK, HOUSTON, TX

Buffalo Bayou Park is comprised of 160 acres of parkland surrounding the Buffalo Bayou waterway that runs through several residential neighborhoods to the northwest of Downtown Houston. Its location and context, as well as its management by the non-profit Buffalo Bayou Partnership in collaboration with the City of Houston supported its use as a precedent for SLRC's General Administration costs.

8.5 Routine Maintenance

Routine maintenance activities will occur year-round on a daily, weekly, monthly, or annual basis. Daily activities include cleaning of park spaces such as the Education Center and restrooms, and litter and trash removal. Weekly activities include equipment inspection and scheduling of repairs, while monthly activities will include minor repairs. Annual activities will involve larger capital replacement projects as needed.

8.6 Horticultural Maintenance & Water Management

Three critical variables effect maintenance work: 1) the nature of the task; 2) skill levels required to performing the task; and 3) the physical setting. For example, cleaning a paved surface is different from horticultural work - in the type of equipment needed, the skills needed and in the time duration to perform the work. Quality maintenance is essential to not only protecting long-term capital investments, but to ensure park success and as a reflection of community values.

The goal for park maintenance is to provide the highest quality maintenance to ensure that the park is clean, attractive and usable for visitors. To achieve the highest levels of service for maintenance, successful parks have dedicated resources to oversee maintenance and some repairs, provide skilled horticultural care, and operational support for special events. With the addition of habitat and wildlife at the SLRC, Park maintenance staff will need to be supplemented by specialty management staff or contracted services.

A list of recommended inspection and maintenance activities are outlined below.

HORTICULTURAL MAINTENANCE

The Master Plan design includes several features that have specific maintenance needs including the following: Upland Habitat, Wetland Habitat, Ornamental Gardens, and the Reservoirs. Below are brief description of their maintenance needs or issues.

Figure 8-3 Horticultural Maintenance Examples

Activities include weeding and pruning.

ORNAMENTAL GARDENS

These gardens will be a mix of native and regionally adapted drought tolerant species. Maintenance needs of these gardens are minimal, however, specific steps must be taken to ensure the landscape flourishes and does not look like an untended, weedy, ragged feature. Maintenance needs of ornamental gardens commonly include:

- Deep waterings in times of drought
- Invasive species removal
- Light applications of compost or fertilizer (optional)
- Selective pruning and annual cut back
- Planting replacement as necessary
- Regular removal of litter and other debris

A major task associated with the maintenance of ornamental gardens is invasive species removal. The removal of unwanted species can be performed by either hand pulling or the spot use of herbicides. This task can be time-consuming for park staff regardless of the weed removal method. These areas must be annually inspected by a trained professional to evaluate their health and development.

UPLAND HABITAT

The Knoll and Eucalyptus Grove will be replanted over time to replace and supplement existing Eucalyptus trees with native species. These areas will also be planted with native shrubs and groundcover. Woodlands typically have low maintenance requirements after establishment, however, any newly planted landscape within an urban park will require regular care. Maintenance needs of woodlands commonly include:

- Deep waterings in times of drought (after establishment period)
- Invasive species removal
- Tree pruning to incrementally open and lift canopy
- Periodic pruning of groundcover plantings
- Plant replacement as necessary

Figure 8-4 Example of Ornamental Garden Plants

WETLANDS

Not only will the proposed wetlands provide critical habitat for wildlife, they are being relied upon to help meet water quality goals as outlined in Chapter 06. To sustain their function as water quality treatment wetlands, they must be maintained properly. The maintenance needs of wetland gardens can be rather intensive. Water quality will have to be regularly monitored and maintained to a minimum standard to support wetland plantings and wildlife.

Frequency	Description
Monthly, or More Frequently	• Look for invasive vegetation and schedule removal. • Check the condition and health of the wetland vegetation and identify areas that require special attention. Schedule replanting as needed. • Remove litter and debris from wetlands. • Removed dead plant material. • During initial plant establishment on the floating treatment wetlands, check the health and development of the plants and note any remedial actions needed. • Ensure floating treatment wetlands are properly anchored • Inspect for trash and debris accumulation in wetlands • Check for algal growth, signs of pollution such as oil sheens, discolored water, or unpleasant odors, and signs of flooding.
Semi-Annual or After Significant Storms	• Perform vector control, if necessary. • Repair undercut areas and erosion to banks or slopes. • Inspect wetland structures and identify needed repairs.
Annually	• Repair and replace wetland structures as necessary.
Once or As Needed	• Work with Greater Los Angeles County Vector Control District. • During initial plant establishment of the floating treatment wetlands, perform any necessary remedial actions, such as replanting bare spots.

Figure 8-5 Recommended Wetland Maintenance Activities.

Figure 8-6 Example of Wetland Maintenance

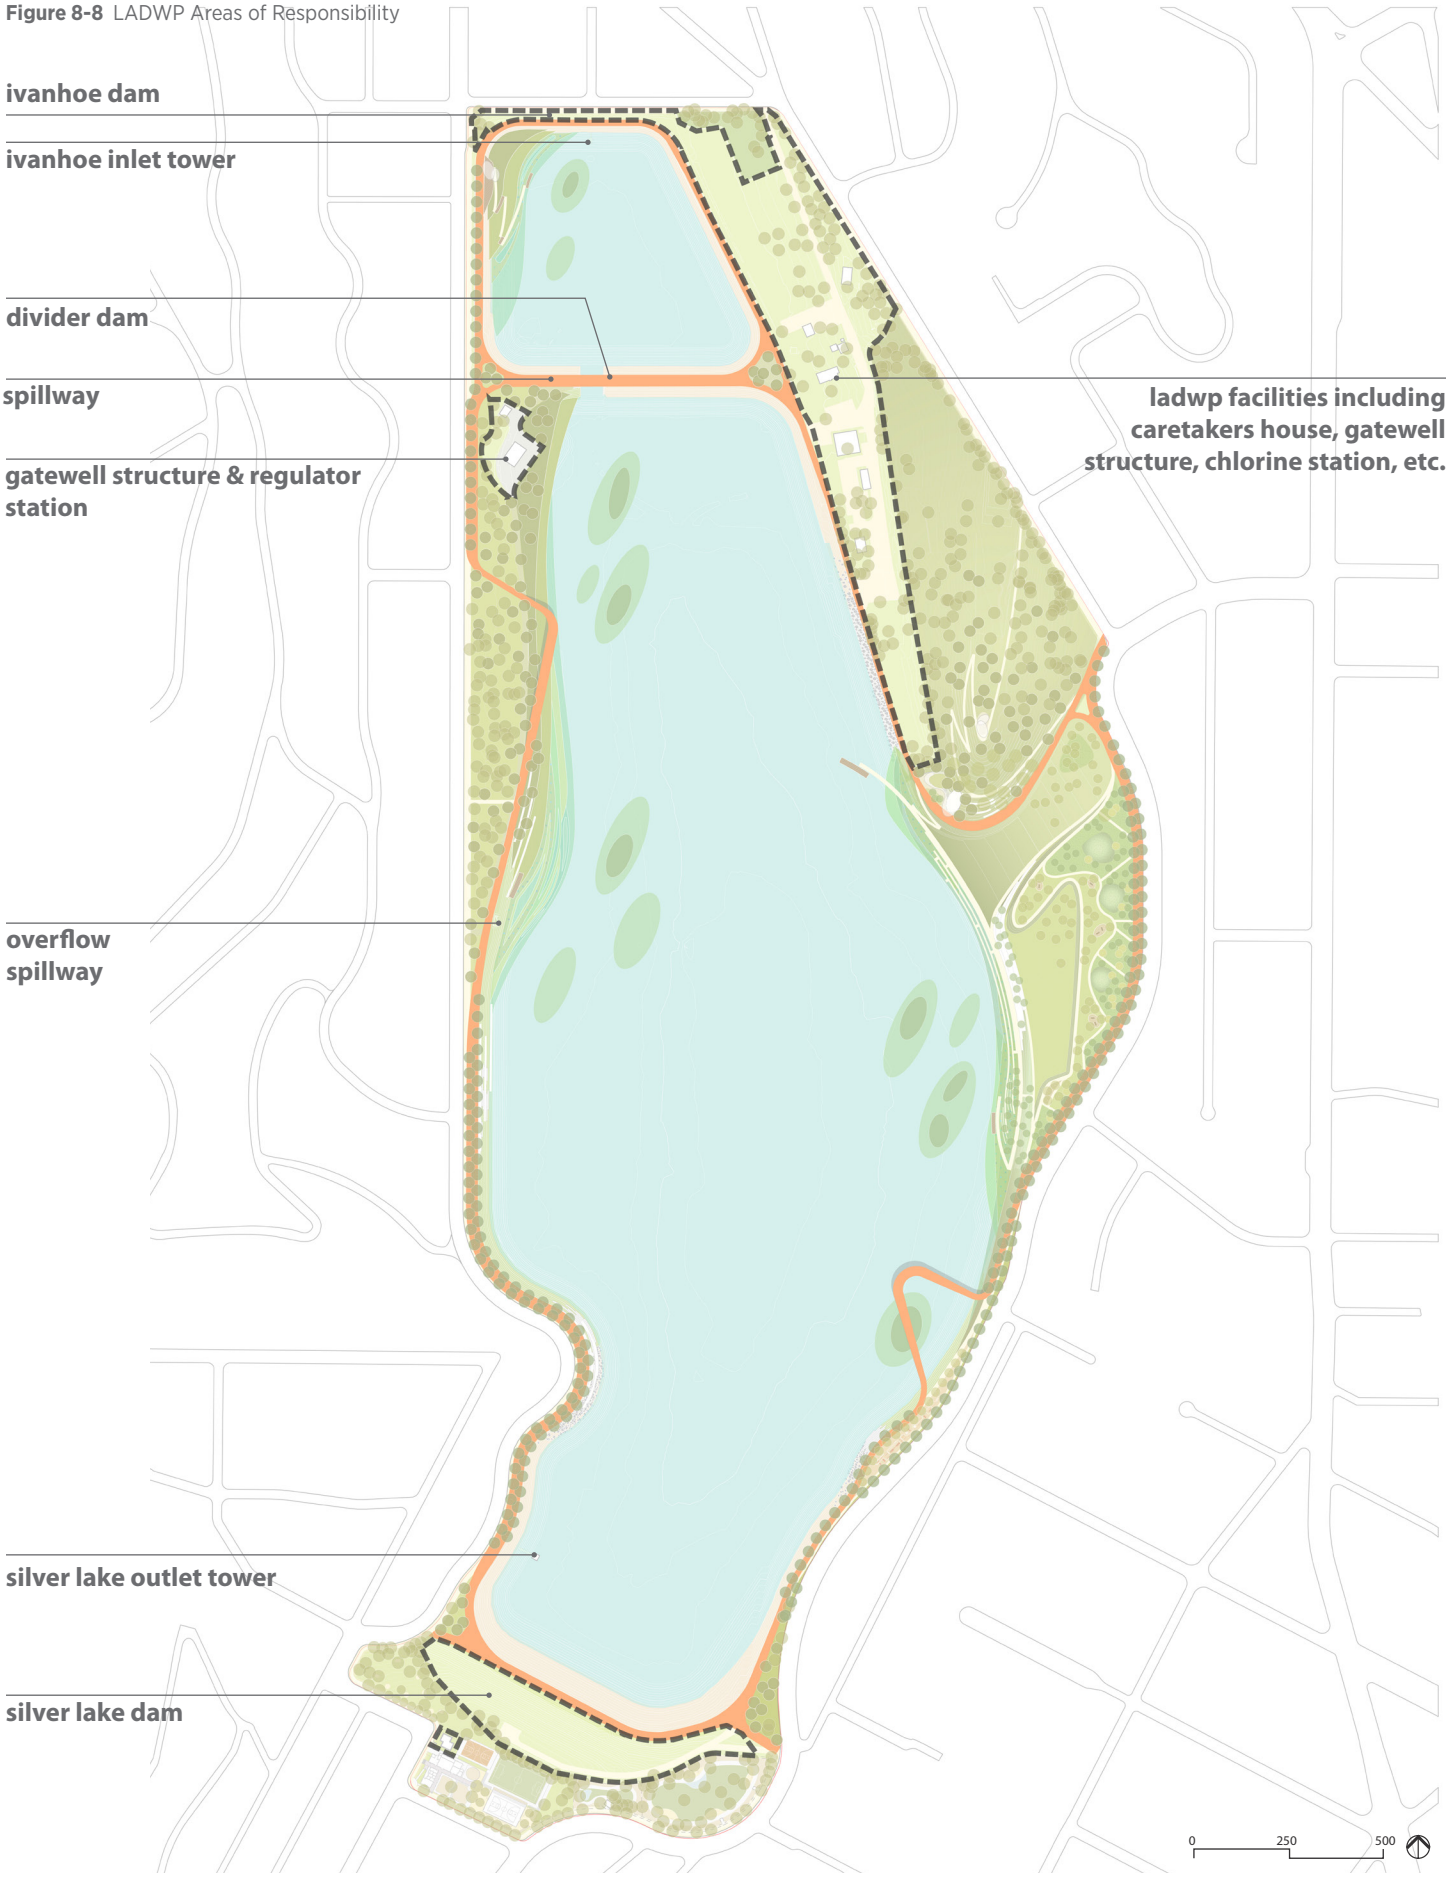
Activities include plant inspection and removal of dead plants

RESERVOIR WATER BODIES

Lake or open water body maintenance can prove to be very intensive and time consuming. LADWP currently uses small boats to routinely inspect structures and maintain the reservoirs. It is anticipated that LADWP will continue to access the reservoirs via boat. Additionally, some of the maintenance required for the proposed wetlands and embankment vegetation will require small boats to perform these tasks. Additional monitoring and maintenance will be required to meet SLRC water quality objectives and support aquatic wildlife. Common and routine maintenance activities include:

- Invasive species removal on vegetated embankments
- Erosion control of vegetated embankments
- Horticultural maintenance (edge plantings, aquatic plantings)
- Floating or submerged debris removal
- Bi-monthly (or after significant storms) water quality sampling and monitoring to ensure water quality goals are being met

Figure 8-7 Example of Wetland Plantings



LADWP MAINTENANCE RESPONSIBILITIES

LADWP will continue to access and use the site for current and future operational needs. The areas reserved for LADWP use are shown in Figure 8-8 and include an active regulator station, pipes underneath and around the reservoirs, equipment, buildings, dams, spillways, and other facilities. These areas will be fenced to ensure public and employee safety. LADWP will require 24/7 access to the site and usage of the road that circumnavigates the site with a minimum 12 feet of road width. LADWP maintenance activities include:

- Water level as stated in approved environmental documents
- Water quality management prior to the SLRC Master Plan implementation
- Dam and spillway brush clearance and other required maintenance as directed by regulatory agencies
- Aeration and recirculation system as originally intended for reservoir water algae management
- Valves associated with the stormwater capture infrastructure
- Buildings and facilities within areas reserved for LADWP use
- Landscape maintenance of the areas reserved for LADWP use
- Gates and fencing intended to secure LADWP reserved areas

LADWP will not be responsible for any SLRC Master Plan improvements or consequent changes, including maintaining reservoir water quality after the addition of wetland habitats.

Figure 8-8 LADWP Areas of Responsibility

ACKNOWLEDGMENTS

acknowledgments

On behalf of the City of Los Angeles and SLRC Master Plan team, we would like to thank the following contributors and collaborators without whom the SLRC Master Plan vision outlined in this report would not have been possible.

THE COMMUNITY

Thank you to the hundreds of community members who attended our four in-person community workshops and over 3,000 who participated in our questionnaires. Your time, dedication, and input were invaluable in crafting the Master Plan design herein. Your continued interest and support will be crucial to realizing this vision.

THE STAKEHOLDER WORKING GROUP (SWG)

A special note of thanks to our SWG team who dedicated a significant amount of their own time to meet with the project team, providing guidance and input on the community workshops and Master Plan design. The record participation in the Master Plan process can be directly attributed to their tireless efforts of support.

Silver Lake Reservoir Complex Master Plan

2. Air Quality and Greenhouse Gas Emissions Methodology

Silver Lake Reservoir Complex Master Plan Project

1. Air Quality and GHG Methodology

1. Introduction

ESA, an environmental consultant for the Los Angeles Department of Water and Power (LADWP), conducted an air quality and greenhouse gas (GHG) emissions analysis for the Silver Lake Reservoir Complex (SLRC) Master Plan Project (Project). Criteria air pollutant and GHG emissions associated with construction and operation of the Project were quantified based on existing project design assumptions. This Technical Appendix describes the methodology used to estimate criteria air pollutant and GHG emissions that would result from construction and operation of the Project. Required mitigation measures are also described herein. This Technical Appendix supports the Draft Environmental Impact Report (EIR) being prepared for the Project.

The proposed Project is located within the Silver Lake neighborhood of the City of Los Angeles and would redesign approximately 116-acres of the 127-acre SLRC with community park amenities. The proposed Project would include a contemporary design of park zones with hybrid infrastructure that blends vegetated areas with public spaces. The proposed Project would be designed to enhance the visual and recreational quality of the area to be consistent with goals and objectives of the Community Plan and provide the opportunity for the public to connect with nature.

The proposed Project area would include approximately 26,000 square feet (sf) of seating terraces for public use along the water's edge. In addition, 28,000 sf of area would be added in the form of overlooks ranging from large bridge-like walkways to small platforms.

As described in Chapter 2.0, *Project Description*, of the Project's Draft EIR, construction of the proposed park zones may occur simultaneously or sequentially. Since construction sequence is currently unknown, for purposes of this environmental analysis, it is assumed that construction of certain park zones would need to occur before other park zones to maximize usage of the proposed Project site. For example, the Ivanhoe Overlook and Eucalyptus Grove would need to be constructed before The East and West Narrows to avoid potential damage to any of the new facilities (e.g., new pathways). For the purposes of the environmental analysis, the following park zones are assumed to be constructed simultaneously within two groupings where the second grouping would be construction sequentially after the first:

1. Ivanhoe Overlook, The Eucalyptus Grove, Habitat Islands, The Knoll, The Meadow
2. The East and West Narrows, The South Valley, and Ivanhoe Spillway and Promenade.

The Project would also include offsite improvements along areas surrounding the SLRC, include the addition parking along the north side of West Silver Lake Drive, and the addition of a bike lane, and the potential addition of a sidewalk and parallel parking for a length of approximately 3,000 feet. Furthermore, offsite improvements include wall openings along the sanitary wall that surrounds the SLRC would be required in order to allow for access points into the proposed Project site. The placement of three strategic wall openings along the western side of the reservoir would be located in areas where neighborhood streets terminate at the reservoir. On the eastern side of the reservoir openings would be created every 100 feet along a 3,000-foot area that between Armstrong Avenue and Duane Street, to allow more entry points into the park. Wall openings would be approximately 5 feet in length at each location (refer to Chapter 2.0, Project Description, of the Project's Draft EIR, for additional details).

In order to analyze the worst-case scenario during proposed Project construction, the analysis within this EIR assumes a two-phased approach as outlined above with the shortest construction duration occurring within an approximately five-year period. **Table 1** lists total construction durations for each proposed park zone.

TABLE 1

TOTAL CONSTRUCTION ACREAGE AND DURATION BY PARK ZONE

Proposed Park Zone	Construction Activity Duration
The Meadow	30 months
The Knoll	18 months
Ivanhoe Overlook	36 months
The Eucalyptus Grove	30 months
The East and West Narrows	24 months
The South Valley	18 months
Habitat Islands	12 months

SOURCE: BOE 2021

The Project's construction schedule is expected to begin in year 2025 and be completed by year 2029, with the first grouping of park zones expected to between 2025 and 2027 and the second grouping would follow sequentially between year 2027 and 2029. Construction work hours would generally range between 7:00 a.m. to 3:00 p.m., Monday through Saturday. Although not anticipated, a noise variance would be obtained through

the City of Los Angeles for any work outside of these hours (e.g., Sundays and any major holidays).

2. Air Pollutant and GHG Emissions Methodology

This section describes the methodology used to calculate emissions resulting from Project construction and operational activities. These emissions were used to evaluate air quality and GHG impacts. Construction activities would generate emissions from heavy-duty equipment usage and vehicle trips traveling to and from the Project construction sites. Long-term operational activities would generate criteria pollutants through vehicle trips, on-site energy usage (electricity for heating and hot water), and area source emissions (e.g., architectural coatings, consumer products, hearths, and landscaping equipment). In addition to the aforementioned operational sources, GHG emissions associated with electricity use, waste and wastewater conveyance, solid waste, and emergency generators are included in the GHG analysis.

a) Emission Inventories

(1) Construction

Project construction activities that would have the potential to create regional air quality impacts include vehicle trips generated by construction workers, vendor trucks, concrete trucks and haul trucks traveling to and from the Project construction sites and building activities such as the application of paint and other surface coatings. The Project's daily regional criteria pollutant emissions during construction were estimated for the Project.

Project construction is estimated to start in 2025, but may commence at a later date. If this occurs, construction impacts would be lower than those analyzed within this memo due to the use of a more energy-efficient and cleaner burning construction vehicle fleet mix, pursuant to State regulations that require vehicle fleet operators to phase-in less polluting heavy-duty equipment. As a result, should Project construction commence at a later date than analyzed herein, air pollutant and GHG emissions would be lower than the emission levels disclosed herein.

The Project's construction emissions were estimated using the California Emissions Estimator Model (CalEEMod) software, version 2020.4.0, an emissions inventory software Project recommended by the South Coast Air Quality Management District (SCAQMD). CalEEMod is based on outputs from the California Air Resources Board's (CARB) on-road vehicle EMissions FACtor (EMFAC) model and CARB's off-road emissions factor model (OFFROAD), which is used to calculate emissions from construction activities, including on- and off-road vehicles. The input values used in this analysis were adjusted to be Project-specific based on equipment types and the construction schedule based on current information provided by LADWP. When information was unknown, CalEEMod defaults were used. Emissions from off-road equipment and off-road vehicles were estimated through CalEEMod, since CalEEMod is based on outputs from the CARB off-road emissions factor (OFFROAD) which is the

emissions estimation model developed by CARB and used to calculate emissions from construction activities, including off-road vehicles. Worker trip, concrete truck, vendor truck, and haul truck trip estimates were provided by LADWP. Excavation, paving, and concrete volumes were also provided by LADWP. Emissions from worker trips, haul truck trips, concrete truck trips, and vendor truck trips were estimated using the CARB EMFAC2021 model.

For demolition and site grubbing/preparation phases, haul truck capacities were modeled with a 10 cubic yard capacity; for mass grading/excavation and drainage/utilities/trenching phases, haul truck capacities were modeled with a 14 cubic yard capacity. Cement truck capacities were modeled with a 9 cubic yard capacity. Consistency with CalEEMod, material supply and vendor trucks were modeled with a fleet mix of 50 percent medium heavy-duty diesel truck (MHDT) and 50 percent heavy heavy-duty diesel truck (HHDT). The construction equipment and phasing assumptions used in the emissions analysis by component type are listed in **Table 2**.

SOURCE: BOE 2021.

Emissions from haul trucks, vendor trucks and concrete trucks were estimated using EMFAC emission factors for haul, vendor and concrete trucks. The maximum number of daily haul truck, vendor truck, and concrete truck trips may vary within each particular construction phase. The varying maximum number of daily haul truck and concrete truck trips within each of the demolition, site grubbing, excavation, drainage/utilities/trenching, foundation/concrete pads, building construction, asphalt paving, architectural coating, landscaping, and waterside construction were accounted for in the EMFAC emissions modeling. The varying trip values were applied to the construction phasing assumptions used in the criteria pollutant analysis to generate criteria pollutant emissions values for each construction activity. Depending on the park zone and construction phase, the Project would import/export different amounts of debris, vegetation, earthwork/soil, and concrete/materials. Emissions from these activities were estimated by construction phase. As stated above, the construction of the Project was assumed to happen over two groupings of park zones where the following park zones are assumed to be constructed simultaneously within two groupings where the second grouping would be construction sequentially after the first, where the first grouping includes the Ivanhoe Overlook, The Eucalyptus Grove, Habitat Islands, the Knoll, the Meadow, and the second grouping includes the East and West Narrows, the South Valley, and Ivanhoe Spillway and Promenade. The maximum daily emissions estimated based on maximum construction activity conditions of construction phases occurring during construction of overlapping park zones for heavy-duty off-road construction equipment and on-road mobile sources and do not represent the emissions that would occur every day during Project construction. The maximum daily emissions were compared to the SCAQMD daily regional thresholds of significance. Refer to the Project modeling inputs provided in this Technical Appendix for additional details.

(a) Emissions from Construction Equipment

(i) Criteria Pollutants

Emissions of volatile organic compounds (VOCs), nitrogen oxides (NO_X), carbon monoxide (CO), sulfur oxides (SO_X), and respirable and fine particulate matter (PM10 and PM2.5) would result from the use of construction equipment such as bulldozers, wheeled loaders, and cranes. Construction emissions can vary substantially from day to day, depending on the level of activity, the specific type of operation and, for dust, the prevailing weather conditions. The assessment of construction air quality impacts considers each of these potential sources.

Truck and construction equipment emissions will vary with engine model years in which newer equipment will emit fewer pollutants. As a conservative assumption, the CalEEMod model uses an emission rate for equipment and trucks which represents an average model year for available equipment within the basin. CalEEMod calculates the exhaust emissions based on CARB OFFROAD methodology using the equation presented below.

Construction Off-Road Equipment:

$$Emissions_{Diesel}\,[g] = \sum_i (EF_i \times Pop_i \times AvgHP_i \times Load_i \times Activity_i$$

Where:

EF_i	=	Emission factor from OFFROAD [g/bhp-hr]
Pop_i	=	Population [quantity of same equipment type]
$AvgHP_i$	=	Maximum rated average horsepower [hp]
$Load_i$	=	Load Factor [dimensionless]
$Activity_i$	=	Hours of operation [hours]
i	=	Equipment Type

The CalEEMod software provides options for specifying equipment, horsepower ratings, load factors, and operational hours per day. Construction equipment lists for each phase of construction activity were provided by LADWP. Equipment operational hours were based on eight hours of usage per day to estimate the Project's maximum daily emissions.

CalEEMod incorporates methodologies to quantify construction-related fugitive dust emissions, which are based on methodologies from the United States Environmental Protection Agency (USEPA) Compilation of Air Pollutant Emission Factors, AP-42. Fugitive dust emissions from construction equipment were estimated within CalEEMod.

The amount of construction equipment used and the duration of construction activity could have a substantial effect upon the amount of construction emissions, concentrations and the resulting impacts occurring at any one time. As such, the emission forecasts provided

reflect a specific set of conservative assumptions based on the expected construction scenario wherein a relatively large amount of construction is occurring in a relatively intensive manner.

(ii) GHG Emissions

Construction of the Project would result in one-time GHG emissions of carbon dioxide (CO_2) and smaller amounts of methane (CH_4) and nitrous oxide (N_2O) from construction equipment. Construction emissions are forecasted by assuming a conservative estimate of construction activities (i.e., assuming all construction occurs at the earliest feasible date) and applying the off-road emissions factors using CalEEMod. The output values used in this analysis are adjusted to be Project-specific based on equipment types and the construction schedule. These values were then applied to the same construction equipment and phasing assumptions used in the criteria pollutant analysis to generate GHG emissions values for each construction year. Construction GHG emissions are generally calculated in CalEEMod as follows:

Construction Off-Road Equipment:

$$Emissions_{Diesel}\ [MTCO_2e] = (\sum_i (EF_i \times Pop_i \times AvgHP_i \times Load_i \times Activity_i) \div 10^6$$

Where:

$MTCO_2e$	=	Metric tons of carbon dioxide equivalents
EF_i	=	Emission factor from OFFROAD [g/bhp-hr]
Pop_i	=	Population [quantity of same equipment type]
$AvgHP_i$	=	Maximum rated average horsepower [hp]
$Load_i$	=	Load Factor [dimensionless]
$Activity_i$	=	Hours of operation [hours]
10^6	=	Conversion factor [g/MT]
i	=	Equipment Type

(b) Emissions from On-Road Trips

(i) Air Quality

Construction activities would generate on-road vehicle exhaust emissions of VOCs, NO_X, CO, SO_X, PM10 and PM2.5, evaporative emissions of VOCs, and fugitive dust emissions of PM10 and PM2.5 from workers and vendors traveling to and from the Project Site, as well as haul trucks and concrete trucks for demolition debris hauling, soil hauling, and supplies/material transport. These emissions are based on the number of trips and vehicle miles traveled (VMT) along with emission factors from EMFAC.

Vehicle running emission factors for exhaust criteria pollutants and PM10 and PM2.5 emissions from tire wear, brake wear, and entrained road dust were obtained from EMFAC on a per VMT basis for each respective vehicle class from the Project's construction year and adjusted for unit conversions to derive emission factors in units of grams per VMT. The emissions from mobile sources were then calculated based on the trip rates, trip lengths, and the EMFAC running emission factors as follows:

Construction On-Road Trips:

$Emissions_{pollutant} = VMT * EF_{running,pollutant}$

Where:

$Emissions_{pollutant}$	=	emissions from vehicle running for each pollutant [g]
VMT	=	vehicle miles traveled [miles]
$EF_{running,pollutant}$	=	emission factor for running emissions [g/mile]

(ii) GHG Emissions

Construction of the Project would generate GHG emissions of CO_2 and lesser amounts of CH_4 and N_2O from workers and vendors traveling to and from the site, as well as haul trucks. The emissions are estimated using the emission factors generated from the EMFAC model, similar to the criteria pollutant analysis. The emissions from mobile sources were then calculated based on the trip rates, trip lengths, and the EMFAC running emission factors as follows.

Construction On-Road Trips:

$Emissions_{pollutant}\ [MTCO_2e] = (VMT \times EF_{running,pollutant}) \div 10^6$

Where:

VMT	=	vehicle miles traveled [miles]
$EF_{running,pollutant}$	=	emission factor for running emissions [g/mile]
10^6	=	Conversion factor [g/MT]

(c) Emissions from Architectural Coatings

VOC off-gassing emissions would result from the evaporation of solvents contained in architectural coatings that would be applied on buildings and other painted surfaces during Project construction. The CalEEMod software calculates the VOC evaporative emissions from application of residential and non-residential surface coatings using the following equation:

Construction Architectural Coating Emissions:

$E_{AC} = EF_{AC} \times F * A_{paint}$

Where:

E = emissions [lb VOC]

EF = emission factor [lb/sqfeet]

A = building surface area [sqfeet].

The CalEEMod software assumes the total surface area for painting of buildings is equal to 2.7 times the floor square footage for residential and 2 times that for nonresidential building square footage. All of the land use information provided by a metric other than building square footage are converted in CalEEMod to square footage using CalEEMod conversions or user defined equivalence.

F = fraction of surface area [%].

With respect to estimating interior and exterior surface coating, the CalEEMod methodology is based on SCAQMD methods used in their coating rules of 75% for the interior surfaces and 25% for the exterior shell.

The emission factor (EF) is based on the VOC content of the surface coatings, as specified in the Project's applicable local air quality management district or air pollution control district rules and is calculated estimated using the equation below:

Construction Surface Coating Emission Factor:

$EF_{AC} = C_{voc} / 454[g/lb] \times 3.785[L/Gal]/180[sqfeet]$

Where:

EF = emission factor [lb/sqfeet]

C = VOC content [g/L]. This varies by location and year

The emission factors for coating categories are calculated using the equation above based on default VOC content provided by the air districts or CARB's Statewide limits. For the Project, SCAQMD Rule 1113 regulates the VOC content for architectural coatings and was used in the analysis.

(d) Emissions from Paving

While there is no specific screen within CalEEMod associated with asphalt paving emissions, CalEEMod estimates VOC off-gassing emissions associated with asphalt paving of parking lots using the following equation:

Construction Paving Emissions:

$E_{AP} = EF_{AP} \times A_{Parking}$

Where:

E = emissions [lb]

EF = emission factor [lb/acre]. The default factor is 2.62 lb/acre.

A = area of the parking lot [acre]

(2) Operations

(a) Air Quality

(i) Area Emissions

The LADWP-operated Project consist of seven new park zones including The Meadow, The Knoll, Ivanhoe Overlook, the Eucalyptus Grove, the East and West Narrows, the South Valley, and the Habitat Islands. Most of the park zones would largely be open spaces with seating and typical park amenities. The Knoll park zone would include an a approximately 3,760-square-foot Education Center and the South Valley park zone would include building a new Multi-Purpose Facility that would be approximately 5,800 sf in size and the proposed architecture would be designed to be compatible with the existing Recreation Center's traditional Spanish style. The proposed Multi-Purpose Facility would house one indoor basketball court and provide an entrance off a new plaza along Van Pelt Place

Area source emissions were calculated using CalEEMod default assumptions for the recreational and parking uses associated with the Project. Area sources include consumer product use, architectural coatings, and landscape maintenance equipment.

Consumer products are chemically formulated products used by household and institutional consumers, including, but not limited to, detergents; cleaning compounds; polishes; floor finishes; cosmetics; personal care products; home, lawn, and garden products; disinfectants; sanitizers; aerosol paints; and automotive specialty products; but does not include other paint products, furniture coatings, or architectural coatings. SCAQMD did an evaluation of consumer product use compared to the total square footage of buildings using data from CARB consumer product Emission Inventory. To calculate the VOC emissions from consumer product use, the following equation was used in CalEEMod:

<u>Consumer Products:</u>

Emissions = EF × Building Area

Where:

EF = pounds of VOC per building square foot per day

The factor is 2.04 x 10-5 lbs/sqft/day for SCAQMD areas.

Building Area = The total square footage of all buildings including residential square footage.

VOC off-gassing emissions from architectural coatings result from evaporation of solvents such as in paints and primers. The methodology for operations is the same as the construction methodology discussed above.

(ii) Energy Emissions (Electricity and Natural Gas)

(a) Natural Gas

With regard to energy usage, in compliance to with the City of Los Angeles' Green New Deal, all new municipally-owned buildings and major building renovation projects will utilize electricity instead of natural gas. Accordingly, natural gas would not be supplied to support proposed Project operation activities related to building energy (see Section 3.6, *Energy*, of the Project's Draft EIR for additional details. The Education Center, updated Recreation Center, and Multi-Purpose Facility would be designed to be all-electric and would eliminate the use of natural gas. While building electrification would result in higher electricity usage, it would result in more sustainable development by eliminating fossil fuel from on-site natural gas combustion and the associated criteria pollutant emissions use for building energy. The proposed Project would not result in installation of any new natural gas infrastructure.

Further, the Project would optimize natural ventilation and daylighting at the new Education Center and Multi-Purpose Facility which would reduce the amount of electricity needed for lighting and heating/cooling. The Education Center would also include shade trees to minimize the heat-island effect and regulate indoor temperatures without the need for additional electrical capacity. The Project would also improve the energy efficiency of the existing Multi-Purpose Facility and would be updated to meet current building energy and safety codes.

(b) Electricity

As stated above, the Education Center, updated Recreation Center, and Multi-Purpose Facility would be designed to be all-electric and would eliminate the use of natural gas. Criteria pollutant emissions are not required to be estimated for electricity provided from the grid. Electricity consumption is analyzed in the Project's Draft EIR as required by the CEQA Guidelines.

(iii) Mobile Source Emissions

CARB's most recent on-road emissions factor model, EMFAC2021, was used to generate emissions factors for operational mobile sources. The model was run in the emissions mode (also referred to as the "Burden" mode) and used to generate South Coast Air Basin-specific vehicle fleet emission factors in units of grams or metric tons per mile, which is the same methodology that was used by CalEEMod to generate emission factors

using the EMFAC2021 model. These emission factors are then applied to the daily VMT to obtain daily mobile source emissions.

Modeling for the Project was conducted using the vehicle fleet mix for South Coast Air Basin as provided in EMFAC2021. Mobile source emissions are generally calculated as follows:

Mobile Source:

$$\text{Emissions} = \left(\sum i \, (\text{VMT} \times \text{EF})i \right)$$

Where: VMT = Vehicle miles traveled

EF = EMFAC Fleet emissions factor [pounds per mile]

i = Summation index

The estimated vehicle trips and maximum daily VMT were estimated based on the Project trip numbers based on its uses in the Project's Transportation Impact Assessment (TIA) and using default trip lengths from CalEEMod for commercial trip type were used to calculate daily and annual VMT for the Project.[1] The SLRC project team generated vehicle occupancy rates assumptions in order to estimate total vehicle trips associated with each peak park everyday use and special events (see the Project's TIA for additional details regarding the vehicle occupancy rate assumptions and trip generation methodology).[2] The EMFAC2021 model was run in the emissions mode (also referred to as the "Burden" mode) and used to generate Air Basin-specific vehicle fleet emission factors in units of grams or metric tons per mile. These emission factors were then applied to the daily VMT to obtain daily mobile source emissions.

Emissions from motor vehicles are dependent on model years and the specific types of vehicles that are used to travel to and from the Project Site. The emissions were calculated using a representative motor vehicle fleet mix for the Air Basin for the opening year of the Project. As discussed above, all vehicle types would visit the Project Site; therefore, the use of the motor vehicle fleet mix for the Air Basin is an appropriate modeling parameter.

(b) Toxic Air Contaminants

The greatest potential for TAC impacts during Project construction would be related to diesel particulate matter (DPM) emissions associated with heavy-duty equipment during demolition, excavation and grading activities. Construction activities associated with the Project would be sporadic, transitory, and short-term in nature. Although Project

[1] Jano Baghdanian & Associates, Transportation Impact Assessment for Silver Lake Reservoir Complex Master Plan Environmental Impact Report.

[2] Jano Baghdanian & Associates, Transportation Impact Assessment for Silver Lake Reservoir Complex Master Plan Environmental Impact Report.

construction would be temporary, construction impacts associated with TACs are addressed quantitatively in a refined health risk assessment (HRA).

Health risk calculations were performed using the Office of Environmental Health Hazard Assessment (OEHHA) methodologies and exposure parameters, and the corresponding SCAQMD guidance documents.[3,4] This analysis calculated the cancer risk and chronic hazard indices to estimate Project-specific health risks for construction emissions using annual average pollutant ambient concentrations modeled by the USEPA's AMS/EPA Regulatory Model (AERMOD) model.

The cancer risk values for DPM considers exposure via the inhalation pathway. The potential exposure through other pathways (e.g., ingestion) requires substance and site-specific data, and the specific parameters for DPM are not known for these pathways.[5] The OEHHA Guidance recommends the incorporation of several factors to quantify the carcinogenic compound dose via the inhalation pathway. Once determined, the dose is multiplied by the compound-specific inhalation cancer potency factor to derive the cancer risk estimate. The dose takes into account the concentration at a sensitive receptor. The cancer potency factor is compound-specific. In performing health risk calculations, carcinogenic compounds are not considered to have threshold levels (i.e., dose levels below which there are no risks). Any exposure, therefore, will have some associated risk. Incremental health risks associated with exposure to carcinogenic compounds is defined in terms of the probability of developing cancer as a result of exposure to a chemical at a given concentration. Under a deterministic approach (i.e., point estimate methodology), the cancer risk probability is determined by multiplying the chemical's annual concentration by its unit risk factor (URF). The URF for DPM recommended by the Scientific Review Panel[6] is 3.0×10^{-4} per microgram per cubic meter ($\mu g/m^3$). This value corresponds to a Cancer Potency Factor (CPF) of 1.1 per milligram/kilogram (body weight) per day (mg/kg(bw)-day). The URF for DPM means that for receptors with an annual average concentration of 1 $\mu g/m^3$ in the ambient air, the probability of contracting cancer over a lifetime of exposure is 300 in 1 million. This approach for calculating cancer risk is intended to result in conservative (i.e., health protective) estimates of health impacts and is used for assessing risks to sensitive receptors. The estimation of health risks is calculated as follows:

Equation 1: $Dose_{RESIDENT}$ (mg/kg/day) = $C_{AIR} \times DBR \times A \times EF \times CF$ where:

3 Air Toxics Hot Spots Program, Guidance Manual for Preparation of Health Risk Assessments. February. Available at: https://oehha.ca.gov/air/crnr/notice-adoption-air-toxics-hot-spots-program-guidance-manual-preparation-health-risk-0. Accessed February 22, 2022.

5 CARB, 1998. Report to the Air Resources Board on the Proposed Identification of Diesel Exhaust as a Toxic Air Contaminant, Part A Exposure Assessment. Available at: https://ww2.arb.ca.gov/sites/default/files/classic/toxics/dieseltac/part_a.pdf. Accessed February 22, 2022.

6 The Scientific Review Panel is charged with evaluating the risk assessments of substances proposed for identification as toxic air contaminants by CARB, OEHHA, and the Department of Pesticide Regulation (DPR), and the review of guidelines prepared by OEHHA.

- C_{air}= concentration in air (µg/m^3)
- DBR= daily breathing rate normalized to body weight (L/kg body weight-day)
- A= inhalation absorption factor (1 for DPM, unitless)
- EF= exposure frequency (unitless) (days/365 days)
- CF= 10^{-6}, correction factor, micrograms to milligrams conversion, liters to cubic meters conversion

Equation 2: $Risk_{INH\text{-}RESIDENT}$ (in one million) = $Dose_{AIR}$ × CPF × ASF × ED/AT × FAH × CCF

where:

- $Dose_{AIR}$= daily inhalation dose (mg/kg-day)
- CPF= cancer potency factor (mg/kg-day) $^{-1}$
- ASF= age sensitivity factor (unitless)
- ED= exposure duration (years)
- AT= averaging time for lifetime cancer risk (years)
- FAH= fraction of time spent at home (unitless)
- CCF= 10^6, cancer conversion factor to represent risk in chances per million

A summary of the exposure parameters used under this methodology are shown in **Table 3**.

TABLE 3
CANCER RISK EXPOSURE PARAMETERS

	Residential			
Parameter	**3rd Trimester**	**0 < 2 years**	**2 < 16 years**	**16<30**

SOURCE: SCAQMD, Risk Assessment Procedures for Rules 1401 and 212, Appendix N, Version 8.1, 2017.

(a) Age Sensitivity Factors

The estimated excess lifetime cancer risks for residential receptors (including the early-in-life exposure) were adjusted using the ASFs recommended in the SCAQMD Risk Assessment Procedures for Rules 1401 and 212.[7] This approach accounts for an "anticipated special sensitivity to carcinogens" of infants and children. Cancer risk estimates were weighted by a factor of 10 for exposures that occur from the third trimester of pregnancy to two years of age and by a factor of three for exposures that occur from 2 to 15 years of age. No weighting factor (i.e., an ASF equal to one, which is equivalent to no adjustment) is applied to ages 16 to 70 years.

(b) Cancer Risk Calculation

Excess lifetime cancer risks are estimated as the upper-bound incremental probability that an individual will develop cancer over a lifetime as a direct result of exposure to carcinogens. The risk is expressed as a unitless probability, and was calculated as the number of cancer incidences per million individuals in the HRA. The cancer risk for each chemical was calculated by multiplying the chemical intake or dose at the human exchange boundaries (e.g., lungs) by the DPM CPF. For cancer risk, the SCAQMD guidance identifies a significant impact if a project would result in an incremental cancer risk that is greater than 10 per million for any receptor.

(c) Chronic Health Impacts

Non-cancer effects of chronic (i.e., long- term) DPM exposures were evaluated using the Hazard Index (HI) approach consistent with the OEHHA guidance. The chronic HI was calculated by dividing the modeled annual average concentration by the Reference Exposure Level (REL). The REL is the concentration at or below which no adverse health effects are anticipated. The REL for DPM was obtained from OEHHA. OEHHA has recommended an ambient concentration of 5 micrograms per cubic meter ($\mu g/m^3$) as the chronic inhalation REL for DPM exhaust. The SCAQMD guidance identifies a significant impact if a project would result in an incremental chronic HI that is greater than 1.0.

The process of assessing health risks and impacts includes a degree of uncertainty. The level of uncertainty depends on the availability of data and the extent to which assumptions must be relied upon in cases where the data are incomplete or unknown. All HRAs rely upon scientific studies to reduce the level of uncertainty; however, it is not

7 SCAQMD, Risk Assessment Procedures for Rules 1401 and 212, Appendix N, Version 8.1, 2017.

possible to completely eliminate uncertainty from the analysis. Where assumptions are used to substitute for incomplete or unknown data, it is standard practice in performing HRAs to err on the side of health protection to avoid underestimating or underreporting the risk to the public. In general, sources of uncertainty that may lead to an overestimation or an underestimation of the risk include extrapolation of toxicity data in animals to humans and uncertainty in the exposure estimates. In addition to uncertainty, there exists "a natural range or variability in measured parameters defining the exposure scenario," and that "the greatest quantitative impact is variation among the human population in such properties as height, weight, food consumption, breathing rates, and susceptibility to chemical toxicants". [8] As mentioned previously, it is typical to err on the side of health protection by assessing risk on the most sensitive populations, such as children and the elderly, by modeling potential impacts based on high-end breathing rates, by incorporating age sensitivity factors, and by not taking into account exposure reduction measures, such as mechanical air filtration building systems. Refer to the Project modeling inputs provided in this Technical Appendix for additional details.

(c) GHG Emissions

Operational GHG emissions for the Project were assessed for a buildout year of 2030. Per SCAQMD methodology, the total Project construction GHG emissions discussed were amortized over a Project lifetime and included as part of the Project's operational GHG emissions. GHG analyses typically assume a 30-year lifetime for residential and commercial land use development projects.

(i) Area Sources

The Project would have limited area source emissions. The emissions for landscaping equipment are based on the size of the Project uses including the recreational park uses, as well as the Education Center and Multi-purpose Building, the GHG emission factors for fuel combustion, and the Global warming potential (GWP) values for the GHGs emitted. Annual GHG emissions from landscaping equipment in units of $MTCO_2e$ are generally calculated in CalEEMod as follows:

Landscaping Equipment:

$$\text{Annual Emissions } [MTCO_2e] = \left(\sum_i (\text{Units} \times EF_{LE} \times A_{LE} \times GWP)_i \right) \div 10^6$$

Where:

Units = Number of land use units (same land use type) [1000 sqft]

EF_{LE} = GHG emission factor [grams (g)/1000 sqft/day]

A_{LE} = Landscaping equipment operating days per year [day/year]

GWP = Global warming potential [CO_2 = 1, CH_4 = 25, N_2O = 298]

8

10^6 = Conversion factor [g/MT]

i = Summation index

CalEEMod uses landscaping equipment GHG emission factors from the CARB OFFROAD model and the CARB *Technical Report: Change in Population and Activity Factors for Lawn and Garden Equipment (6/13/2003)*.[9] CalEEMod estimates that landscaping equipment operate for 250 days per year in the South Coast Air Basin.

(ii) Energy Emissions (Electricity)

(a) Electricity

As stated above, the Education Center, updated Recreation Center, and Multi-Purpose Facility would be designed to be all-electric and would eliminate the use of natural gas Emissions of GHGs associated with operation of the Education Center, Multi-Purpose Building, and park lighting are based on the size of the land use, the electrical demand factors for the land uses, the GHG emission factors for the electricity utility provider, and the GWP values for the GHGs emitted. This assessment also includes electricity-related GHG emissions from the parking lot, which would include lighting electricity.

Emission factors for CO_2 due to electrical generation to serve the electrical demands of the Project were calculated for the full Project Buildout Year of 2030 consistent with SB 100, which was adopted after the 2017 Scoping Plan and represents the State's most current Renewable Portfolio Standard (RPS) law and growth in electricity demand with an emission factor of 469.86 lbs/MWh for year 2030 scaled proportionately based on the future year renewable energy targets at least 60 percent by 2030. Annual electricity GHG emissions in units of $MTCO_2e$ are calculated as follows:

Electricity:

Annual Emissions $[MTCO_2e] = (\sum_i (Units \times D_E \times EF_E \times GWP)_i) \div 2204.62$

Where:

Units = Number of land use units, pump stations and injection/extraction wells (same type) [DU or 1000 sqft, or number]

D_E = Electrical demand factor [megawatt-hour] (MWh)/DU or 1000 sqft/year or annual pump station and injection/extraction energy demand (MWh)]

EF_E = GHG emission factor [pounds per megawatt-hour (lbs/MWh)]

GWP = Global warming potential [CO_2 = 1, CH_4 = 25, N_2O = 298]

9 California Air Resources Board, OFFROAD Modeling Change Technical Memo: Change in Population and Activity Factors for Lawn and Garden Equipment, June 13, 2003.

2204.62 = Conversion factor [pounds/MT]

i = Summation index

(b) Natural Gas

(iii) As stated above, the Education Center, updated Recreation Center, and Multi-Purpose Facility would be designed to be all-electric and would eliminate the use of natural gas Mobile Source Emissions and Maintenance Activities

Operational mobile source GHG emissions associated with the Project were calculated using the estimated trips from the Project's TIA and default commercial trip type trip lengths from CalEEMod. [10] Emission factors were obtained from EMFAC2021, which was run in the emissions mode (also referred to as the "Burden" mode) and used to generate Air Basin-specific vehicle fleet emission factors in units of grams or metric tons per mile. Mobile source emissions are the product of the estimated VMT and the EMFAC2021 emission factors.

Similar to criteria pollutant analysis, the estimated vehicle trips and maximum daily VMT were provided for the Project uses in the Project's TIA for everyday Project use and special events.[11] The Project's annual VMT is based on annualizing the number of trips associated with everyday use and special events and calculating VMT based on the default commercial trip type trip lengths from CalEEMod.[12] The supplemental annual VMT calculations are provided in this Technical Appendix for additional details.

Emissions of GHGs associated with mobile sources from operation of the Project are based on the estimated annual VMT the GHG emission factors for the mobile sources from EMFAC2021, and the GWP values for the GHGs emitted. The types of vehicles that would visit the site include all vehicle types including automobiles, light-duty trucks, delivery trucks, and waste haul trucks. Modeling for the Project was conducted using the vehicle fleet mix for the South Coast Air Basin as provided in EMFAC2021. Annual mobile source GHG emissions in units of $MTCO_2e$ are generally calculated as follows:

Mobile:

Annual Emissions [$MTCO_2e$] = ($\sum_i$ (VMT × EF × GWP)$_i$) ÷ 2204.62

Where:

[10] Jano Baghdanian & Associates, Transportation Impact Assessment for Silver Lake Reservoir Complex Master Plan Environmental Impact Report.

[11] Jano Baghdanian & Associates, Transportation Impact Assessment for Silver Lake Reservoir Complex Master Plan Environmental Impact Report.

[12] Jano Baghdanian & Associates, Transportation Impact Assessment for Silver Lake Reservoir Complex Master Plan Environmental Impact Report.

VMT	=	Annual vehicle miles traveled
EF	=	GHG emission factor [pounds per mile]
GWP	=	Global warming potential [CO_2 = 1, CH_4 = 25, N_2O = 298]
2204.62	=	Conversion factor [pounds/MT]
i	=	Summation index

Emissions of GHGs from motor vehicles are dependent on model years and the specific types of vehicles that are used to travel to and from the Project Site. The emissions were calculated using a representative motor vehicle fleet mix for the South Coast Air Basin for the opening year of the Project. As discussed above, all vehicle types would visit the Project Site; therefore, the use of the motor vehicle fleet mix for the South Coast Air Basin is an appropriate modeling parameter. The CO_2 and CH_4 mobile source emissions were added together, using the appropriate GWP values, to obtain emissions in units of $MTCO_2e$ (emissions of N_2O are negligible and would not affect the total mobile source GHG emissions).

(iv) Solid Waste Emissions

The Project would generate solid waste from day-to-day operational activities, which generally consists of grass clippings, furniture, clothing, bottles, food scraps, newspapers, plastic, and other items routinely disposed of in trash bins. A portion of the waste is diverted to waste recycling and reclamation facilities. Waste that is not diverted is usually sent to local landfills for disposal. waste that is disposed in landfills results in GHG emissions of CO_2 and CH_4 from the decomposition of the waste that occurs over the span of many years.

Emissions of GHGs associated with solid waste disposal for the Project are calculated using the CalEEMod software. The emissions are based on the size of the recreational land uses, the waste disposal rate for the land uses, the waste diversion rate, the GHG emission factors for solid waste decomposition, and the GWP values for the GHGs emitted. Annual waste disposal GHG emissions in units of $MTCO_2e$ are generally calculated in CalEEMod as follows:

Solid Waste:

Annual Emissions [$MTCO_2e$] = ($\sum_i$ (Units × D_W × EF_W × GWP)$_i$) ÷ 1.1023

Where:

Units	=	Number of land use units (same type) [DU or 1000 sqft]
D_W	=	Waste disposal rate [tons/DU or 1000 sqft/year]
EF_W	=	GHG emission factor [tons/ton waste]
GWP	=	Global warming potential [CO_2 = 1, CH_4 = 25, N_2O = 298]
1.1023	=	Conversion factor [tons/MT]

i = Summation index

CalEEMod allows the input of several variables to quantify solid waste emissions. The model requires the amount of waste disposed, which is the product of the waste disposal rate times the land use units. The total amount of waste disposed was reduced by the diversion rate for the City of Los Angeles of 76 percent, according to the most recent data available.[13] The GHG emission factors, particularly for CH_4, depend on characteristics of the landfill, such as the presence of a landfill gas capture system and subsequent flaring or energy recovery. The default values, as provided in CalEEMod, for landfill gas capture (e.g., no capture, flaring, energy recovery), which are Statewide averages, are used in this assessment.

(v) Water Usage and Wastewater Generation Emissions

Water and wastewater generated by the Education Center, Multi-Purpose Building, and various park restrooms would require energy to supply, distribute and treat. The combustion of fossil fuels to produce electricity results in GHG emissions of CO_2 and smaller amounts of CH_4 and N_2O. The electricity generation occurs off-site; therefore, the electricity use from water and wastewater results in GHG emissions that are considered to be indirect. Wastewater also results in emissions of GHGs from wastewater treatment systems (e.g., septic, aerobic, or lagoons) as well as from solids that are digested either through an anaerobic digester or with co-generation from combustion of digester gas.

The emissions of GHGs associated with wastewater treatment process emissions are also calculated using CalEEMod. The emissions are based on the type of treatment (e.g., aerobic, facultative lagoons, septic systems). The emissions are calculating using the default settings in CalEEMod for the type of wastewater treatment. Calculation formulas are described in detail in the *California Emissions Estimator Model User's Guide, Appendix A*.[14] Annual water demand and wastewater GHG emissions due to electricity are generally calculated in CalEEMod as follows for indoor and outdoor water demand:

Water Supply, Treatment, and Distribution; Wastewater Treatment (electricity):

$$\text{Annual Emissions } [MTCO_2e] = \left(\sum_i (\text{Units} \times D_W \times (EI_W \div 1000) \times EF_W \times GWP)_i \right) \div 2204.62$$

Where:

Units = Number of land use units (same land use type) [1000 sqft]

D_W = Water demand factor [million gallons (Mgal)/1000 sqft/year]

EI_W = Electricity intensity factor [kilowatt-hours (kWh)/Mgal]

1000 = Conversion factor [kWh/MWh]

13 City of Los Angeles, Bureau of Sanitation, Zero Waste Progress Report, 2013.

14 California Air Resources Board, CalEEMod User's Guide, October 2017.

EF_W	=	GHG emission factor [pounds/MWh]
GWP	=	Global warming potential [CO_2 = 1, CH_4 = 25, N_2O = 298]
2204.62	=	Conversion factor [pounds/MT]
i	=	Summation index

The CEC's estimate for energy intensity of the water use cycle in Southern California, as provided in the 2006 CEC report *Refining Estimates of Water-Related Energy Use in California*, is used to calculate the energy usage related to water supply, treatment, and distribution and wastewater treatment.[15] The same electricity GHG emissions factors discussed in *(c) Energy Emissions* are used for water and wastewater energy usage.

As stated in the *User's Guide*, the GHGs emitted from each type of wastewater treatment are based on the CARB's *Local Government Operations Protocol* (LGOP),[16] which are in turn based on USEPA methodologies.[17] The default CalEEMod settings for wastewater treatment are: 10.33 percent septic tank, 87.46 percent aerobic, 2.21 percent facultative lagoons and 100 percent anaerobic combustion of gas.

2. Comparison of Project Characteristics to Applicable Plans and Policies

As shown in **Table 4**, **Table 5**, and **Table 6**, the Project's GHG emissions were evaluated by comparing the Project to applicable GHG reduction strategies and local actions approved or adopted by CARB, SCAG, and the City.

TABLE 4
PROJECT COMPLIANCE WITH APPLICABLE
2017 CLIMATE CHANGE SCOPING PLAN ACTIONS AND STRATEGIES

Actions and Strategies	Responsible Party(ies)	Compliance Analysis
Senate Bill 350 (SB 350): The Clean Energy and Pollution Reduction Act of 2015 increases the standards of the California Renewable Portfolio Standard (RPS) program by requiring that the amount	CPUC, CEC, CARB	**Compliant.** The Project would use electricity provided by LADWP, which is required to meet the energy performance standard of 50 percent renewable energy by 2030, along with applicable GHG emissions reductions planning targets in its Strategic Long-Term Resource Plan. The

TABLE 4
PROJECT COMPLIANCE WITH APPLICABLE
2017 CLIMATE CHANGE SCOPING PLAN ACTIONS AND STRATEGIES

of electricity generated and sold to retail customers per year from eligible renewable energy resources be increased to 50 percent by 2030.[a] Required measures include: • Increase RPS to 50 percent of retail sales by 2030. • Establish annual targets for statewide energy efficiency savings and demand reduction that will achieve a cumulative doubling of statewide energy efficiency savings in electricity and natural gas end uses by 2030. • Reduce GHG emissions in the electricity sector through the implementation of the above measures and other actions as modeled in IRPs to meet GHG emissions reductions planning targets in the IRP process. Load-serving entities and publicly owned utilities meet GHG emissions reductions planning targets through a combination of measures as described in IRPs.		legislation also included interim targets of 40 percent by 2024 and 45 percent by 2027. In 2020, LADWP provided 36.7 percent from renewable sources, exceeding the required target 33 percent by 2020 established under previous legislation.[b] As required under SB 350, doubling of the energy efficiency savings from final end uses of retail customers by 2030 would primarily rely on the existing suite of building energy efficiency standards under California Code of Regulations Title 24, Part 6 and utility-sponsored programs such as rebates for high-efficiency appliances, HVAC systems, and insulation. The Project would meet or exceed the applicable requirements of Title 24, Part 6, as well as the California Green Building Standards Code in Title 24, Part 11 as adopted and amended in the City of Los Angeles Green Building Code.
Implement Mobile Source Strategy (Cleaner Technology and Fuels): • At least 1.5 million zero emission and plug-in hybrid light-duty electric vehicles by 2025. • At least 4.2 million zero emission and plug-in hybrid light-duty electric vehicles by 2030. • Further increase GHG stringency on all light-duty vehicles beyond existing Advanced Clean Cars regulations. • Implementation of federal phase 2 standards for medium- and heavy-duty vehicles. • Innovative Clean Transit: Transition to a suite of to-be-determined innovative clean transit options. Assumed 20 percent of new urban buses purchased beginning in 2018 will be zero emission buses with the penetration of zero-emission technology ramped up to 100 percent of new sales in 2030. Also, new natural gas buses, starting in 2018, and diesel buses, starting in 2020, meet the optional heavy-duty low-NO_X standard.	CARB, CalSTA, SGC, Caltrans, CEC, OPR, Local Agencies	**Compliant.** CARB approved the Advanced Clean Cars Program that includes Low-Emission Vehicle (LEV) regulations that reduce criteria pollutants and GHG emissions from light- and medium-duty vehicles, and the Zero-Emission Vehicle (ZEV) regulation, which requires manufacturers to produce an increasing number of pure ZEVs (meaning battery electric and fuel cell electric vehicles), with provisions to also produce plug-in hybrid electric vehicles (PHEV) in the 2018 through 2025 model years. While this action does not directly apply to individual projects, the standards would apply to all vehicles purchased or used by staff and visitors to the Project. The Advanced Clean Truck Regulation has two components, a manufacturer sales requirement and a reporting requirement. The manufacturer component of the regulation requires manufacturers that certify Class 2b-8 chassis or complete vehicles with combustion engines would be required to sell zero-emission trucks as an increasing percentage of their annual California sales from 2024 to 2035. By 2035, zero-emission truck/chassis sales would need to be 55 percent of Class 2b – 3 truck sales, 75

TABLE 4
PROJECT COMPLIANCE WITH APPLICABLE
2017 CLIMATE CHANGE SCOPING PLAN ACTIONS AND STRATEGIES

• Last Mile Delivery: New regulation that would result in the use of low NOX or cleaner engines and the deployment of increasing numbers of zero-emission trucks primarily for class 3-7 last mile delivery trucks in California. This measure assumes ZEVs comprise 2.5 percent of new Class 3–7 truck sales in local fleets starting in 2020, increasing to 10 percent in 2025 and remaining flat through 2030. • Further reduce VMT through continued implementation of SB 375 and regional Sustainable Communities Strategies; forthcoming statewide implementation of SB 743; and potential additional VMT reduction strategies not specified in the Mobile Source Strategy but included in the document "Potential VMT Reduction Strategies for Discussion."	percent of Class 4 – 8 straight truck sales, and 40 percent of truck tractor sales. The reporting component of the regulation requires large employers including retailers, manufacturers, brokers and others would be required to report information about shipments and shuttle services. Fleet owners, with 50 or more trucks, would be required to report about their existing fleet operations.[c] This would be applicable to occasional delivery trucks to the Project Site, which would be subject to this regulation, therefore the Project would benefit from these measures. CARB is also developing the Innovative Clean Transit measure to encourage purchase of advanced technology buses such as alternative fueled or battery powered buses. This would allow fleets to phase in cleaner technology in the near future. CARB is also in the process of developing proposals for new approaches and strategies to achieve zero emission trucks under the Advanced Clean Local Trucks (Last Mile Delivery) Program.[d] GHG emissions generated by transit trips by Project users, would be reduced under this regulation. GHG emissions generated by Project-related passenger, truck, and bus vehicular travel would benefit from the above regulations and programs, and mobile source emissions generated by the Project would be reduced with implementation of standards under the Advanced Clean Cars Program, Advanced Clean Truck Regulation, and Innovative Clean Transit measure consistent with reduction of GHG emissions under SB 32. Mobile source GHG emissions provided in Section 3.8, Greenhouse Gas Emissions, of the Project's Draft EIR, conservatively do not specifically include the numeric reduction in mobile source GHG emissions from the above regulations as the CalEEMod model, which was utilized in the Draft EIR, does not yet fully account for these regulation or programs. SB 375 requires SCAG to direct the development of the RTP/SCS for the region, which is discussed in the Draft EIR. The Project would incorporate physical and operational Project characteristics that would reduce vehicle trips and VMT and encourage alternative modes of transportation for spectators, visitors, students and employees. The Project would support reducing VMT given

TABLE 4
PROJECT COMPLIANCE WITH APPLICABLE
2017 CLIMATE CHANGE SCOPING PLAN ACTIONS AND STRATEGIES

		its location within an established residential community with nearby access to public transportation within 0.25 miles of the Project Site. The Project Site is located near the Los Angeles County Metropolitan Transit Authority (Metro) Line 201 that runs West Silver Lake Drive with multiple stops adjacent to the that runs on West Silver Lake Drive with multiple stops adjacent to the Complex and 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Complex and Metro Line 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Project. As such, the Project would not conflict with the VMT reduction standards of the 2020-2045 RTP/SCS. Thus, the Project would be compliant with, and would not conflict with, applicable 2020-2045 RTP/SCS actions and strategies to reduce GHG emissions.
Increase Stringency of SB 375 Sustainable Communities Strategy (2035 Targets).	CARB	**Compliant.** Under SB 375, CARB sets regional targets for GHG emission reductions from passenger vehicle use. In 2010, the CARB established targets for 2020 and 2035 for each region. As required under SB 375, the CARB is required to update regional GHG emissions targets every 8 years, which have been updated in 2018. As part of the 2018 updates, the CARB adopted a passenger vehicle related GHG reduction of 19 percent per capita for 2035 for the SCAG region. The Project would be consistent with SB 375 as it would be an recreational use development with various transit options. The Project would provide visitors employees with the ability to access nearby public transit and opportunities for walking and biking, which would facilitate a reduction in VMT and related vehicular GHG emissions. In addition, as described in Section 2.5.7, Sustainability Design Features, although the Project is not required to provide any bicycle parking spaces per the LAMC, the Project would also provide on-site bicycle parking spaces and improve existing bike lanes along Silver Lake Boulevard, and the proposed Project would provide drop-off space for micro-mobility initiatives such as Metro Micro (see Section 2.0, *Project Description*, of the Project's Draft EIR, for additional details).As such, the Project would not conflict with the 2020-2045 RTP/SCS goal of reducing daily VMT per capita

TABLE 4
PROJECT COMPLIANCE WITH APPLICABLE
2017 CLIMATE CHANGE SCOPING PLAN ACTIONS AND STRATEGIES

		and proving local community serving uses within an established residential community.
By 2019, adjust performance measures used to select and design transportation facilities. • Harmonize project performance with emissions reductions, and increase competitiveness of transit and active transportation modes (e.g., via guideline documents, funding programs, project selection, etc.).	CalSTA and SGC, OPR, CARB, GoBiz, IBank, DOF, CTC, Caltrans	**Not Applicable.** The Project would not involve construction of transportation facilities. However, the Project would provide visitors employees with the ability to access nearby public transit and opportunities for walking and biking, which would facilitate a reduction in VMT and related vehicular GHG emissions. As such, the Project would not conflict with the 2020-2045 RTP/SCS goal of reducing daily VMT per capita and proving local community serving uses within an established residential community.
Implement California Sustainable Freight Action Plan: • Improve freight system efficiency. • Deploy over 100,000 freight vehicles and equipment capable of zero emission operation and maximize both zero and near-zero emission freight vehicles and equipment powered by renewable energy by 2030.	CalSTA, CalEPA, CNRA, CARB, CalTrans, CEC, GoBiz	**Not Applicable.** The Project land uses would not include freight transportation or warehousing. Therefore, the Project would not interfere or impede the implementation of the Sustainable Freight Action Plan.

TABLE 4
PROJECT COMPLIANCE WITH APPLICABLE 2017 CLIMATE CHANGE SCOPING PLAN ACTIONS AND STRATEGIES

Adopt a Low Carbon Fuel Standard with a CI reduction of 18 percent.	CARB	**Compliant.** This regulatory program applies to fuel suppliers, not directly to land use development. GHG emissions related to vehicular travel associated with the Project would benefit from this regulation because fuel used by Project-related vehicles would be required to comply with LCFS. Mobile source GHG emissions provided in Section 3.8, *Greenhouse Gas Emissions* were calculated using EMFAC, the Project's TIA and CalEEMod default trip length. However, EMFAC does not include implementation of the LCFS into mobile source emission factors. Thus, Project emissions presented in Section 3.8, *Greenhouse Gas Emissions* provides conservatively estimated GHG emissions. On September 27, 2018, CARB approved an amendment to the LCFS regulation to require a 20 percent reduction in carbon intensity from a 2010 baseline by 2030. Reductions in carbon intensity are phased in starting in 2019 with a reduction of 6.25 percent and increases by 1.25 percent each year. Thus, in 2021, LCFS emissions reductions are 8.75 percent reduced carbon intensity relative to the 2010 baseline. Project-related mobile source GHG emissions would be reduced accordingly, and would increase as LCFS compliance increases to 20 percent reduce carbon intensity by 2030 relative to the 2010 baseline year.
Implement the Short-Lived Climate Pollutant Strategy by 2030: • 40-percent reduction in methane and hydrofluorocarbon emissions below 2013 levels. • 50-percent reduction in black carbon emissions below 2013 levels.	CARB, CalRecycle, CDFA, SWRCB, Local air districts	**Compliant.** Senate Bill 605 (SB 605), adopted in 2014, directs CARB to develop a comprehensive Short-Lived Climate Pollutant (SLCP) strategy. Senate Bill 1383 was later adopted in 2016 to require CARB to set statewide 2030 emission reduction targets of 40 percent for methane and hydrofluorocarbons and 50 percent black carbon emissions below 2013 levels.[e] SB 1383 requires various agencies including CARB, California Department of Food and Agriculture (CDFA), the State Water Resources Board (SWRCB) to be responsible for adopting regulations to reduce GHG emissions. These regulations would be applicable to the Project. Therefore, the Project would comply with the CARB SLCP Reduction Strategy, which limits the use of hydrofluorocarbons for refrigeration uses.

TABLE 4
PROJECT COMPLIANCE WITH APPLICABLE 2017 CLIMATE CHANGE SCOPING PLAN ACTIONS AND STRATEGIES

By 2019, develop regulations and programs to support organic waste landfill reduction goals in the SLCP and SB 1383.	CARB, CalRecycle, CDFA, SWRCB, Local air districts	**Compliant.** Under SB 1383, the California Department of Resources Recycling and Recovery (CalRecycle) is responsible for achieving a 50 percent reduction in the level of statewide disposal of organic waste from the 2014 level by 2020 and 75-percent reduction by 2025. The Project would be consistent with AB 341 which requires not less than 75 percent of solid waste generated to be source reduced through recycling, composting, or diversion. This reduction in solid waste generated by the Project would reduce overall GHG emissions. Compliance with AB 341 would also help achieve the goals of SB 1383. In addition, as described in Section 2.5.7, Sustainability Design Features, the proposed Project would include recycling and compost receptacles throughout the park, which would reduce the amount of waste generated by the Project and reduce the number of trips to haul solid waste and therefore reduce the amount of petroleum-based fuels and energy used to process solid waste (see Section 2.0, *Project Description*, for additional details).
Implement the post-2020 Cap-and-Trade Program with declining annual caps.	CARB	**Compliant.** Assembly Bill 398 (AB 398) was enacted in 2017 to extend and clarify the role of the State's Cap-and-Trade Program from January 1, 2021, through December 31, 2030. As part of AB 398, refinements were made to the Cap-and-Trade program to establish updated protocols and allocation of proceeds to reduce GHG emissions. Under the Cap-and-Trade program, entities such as power generation companies and natural gas processing plants would be required to limit or reduce GHG emissions. While the Project itself is not a regulated entity under the Cap-and-Trade Program, it would result in a reduction of GHG emissions associated with the Project's energy usage, since energy supplied to the Project would be from a regulated entity. As the Project would not impede the Program's progress, the Project is considered compliant.
By 2018, develop Integrated Natural and Working Lands Implementation Plan to secure California's land base as a net carbon sink: • Protect land from conversion through conservation easements and other incentives.	CNRA and departments within, CDFA, CalEPA, CARB	**Not Applicable.** This regulatory program applies to Natural and Working Lands, not directly related to development of the Project. However, the Project would not interfere or impede implementation of the Integrated Natural and Working Lands Implementation Plan.

TABLE 4
PROJECT COMPLIANCE WITH APPLICABLE
2017 CLIMATE CHANGE SCOPING PLAN ACTIONS AND STRATEGIES

• Increase the long-term resilience of carbon storage in the land base and enhance sequestration capacity. • Utilize wood and agricultural products to increase the amount of carbon stored in the natural and built environments. • Establish scenario projections to serve as the foundation for the Implementation Plan.		
Establish a carbon accounting framework for natural and working lands as described in SB 859 by 2018.	CARB	**Not Applicable.** This regulatory program applies to Natural and Working Lands, not directly related to development of the Project. However, the Project would not interfere or impede implementation of the Integrated Natural and Working Lands Implementation Plan.
Implement Forest Carbon Plan.	CNRA, CAL FIRE, CalEPA and departments within	**Not Applicable.** This regulatory program applies to state and federal forest land, not directly related to development of the Project. However, the Project would not interfere or impede implementation of the Forest Carbon Plan.
Identify and expand funding and financing mechanisms to support GHG reductions across all sectors.	State Agencies & Local Agencies	**Not Applicable.** Funding and financing mechanisms are the responsibility of the state and local agencies. The Project would not conflict with funding and financing mechanisms to support GHG reductions.

TABLE 6
COMPARISON OF PROJECT CHARACTERISTICS WITH APPLICABLE SCAG 2020-2045 RTP/SCS ACTIONS AND STRATEGIES

Actions and Strategies	Responsible Party(ies)	Consistency Analysis
Land Use Actions and Strategies		
Encourage the use of range-limited battery electric and other alternative fueled vehicles through policies and programs, such as, but not limited to, neighborhood oriented development, complete streets, and Electric (and other alternative fuel) Vehicle Supply Equipment in public parking lots.	Local Jurisdictions, COGs, SCAG, CTCs	**Would Not Conflict.** This action applies to local jurisdictions, COGs, SCAG and County Transportation Commissions (CTCs). While the use of alternative-fueled vehicles is beyond the direct control or influence of the Project, the Project would encourage the use of alternative-fueled vehicles by designating a minimum of 8 percent of on-site non-residential parking for carpool and/or alternative-fueled vehicles.
Support projects, programs, and policies that support active and healthy community environments that encourage safe walking, bicycling, and physical activity by children, including, but not limited to development of complete streets, school siting policies, joint use agreements, and bicycle and pedestrian safety education.	Local Jurisdictions, SCAG	**Would Not Conflict.** While this action applies to local jurisdictions and SCAG, the Project would facilitate pedestrian and bicycle movements by providing a total of approximately 43 acres of new useable space, including approximately 10 acres for active and passive recreation and approximately 5.5 miles of walking paths and trails. In addition, a new Multi-Purpose Facility (building) would be implemented to expand the existing Silver Lake Recreation Center (see Chapter 2.0, *Project Description*, of the Draft EIR for additional details). The Project would locate recreational uses on a Project Site located within a walkable area of Silver Lake with access to public transit. In addition, as described in Section 2.5.7, Sustainability Design Features, although the Project is not required to provide any bicycle parking spaces per the LAMC, the Project would also provide on-site bicycle parking spaces and improve existing bike lanes along Silver Lake Boulevard, and the proposed Project would provide drop-off space for micro-mobility initiatives such as Metro Micro (see Section 2.0, *Project Description*, of the Project's Draft EIR, for additional details).
Update local zoning codes, General Plans, and other regulatory policies to promote a more balanced mix of residential, commercial, industrial, recreational and institutional uses located to provide options and to	Local Jurisdictions	**Would Not Conflict.** While this action applies to local jurisdictions, the Project would support this action/strategy by creating a community serving recreational development that offer employment and other community-serving opportunities. The Project supports the development of a

TABLE 6
COMPARISON OF PROJECT CHARACTERISTICS WITH APPLICABLE SCAG 2020-2045 RTP/SCS ACTIONS AND STRATEGIES

Actions and Strategies	Responsible Party(ies)	Consistency Analysis
contribute to the resiliency and vitality of neighborhoods and districts.		balanced mixed of uses by locating complementary recreational land uses on an Project Site within an established residential community that is in close proximity to existing off-site commercial and residential uses, being located within a quarter-mile of off-site commercial and residential uses, and located in a highly walkable area well served by public transportation. Several transit providers operate service within the immediate vicinity, including The Project Site is located near the Los Angeles County Metropolitan Transit Authority (Metro) Line 201 that runs West Silver Lake Drive with multiple stops adjacent to the that runs on West Silver Lake Drive with multiple stops adjacent to the Complex and 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Complex and Metro Line 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Project.
Support projects, programs, policies and regulations that encourage the development of complete communities, which includes a diversity of housing choices and educational opportunities, jobs for a variety of skills and education, recreation and culture, and a full-range of shopping, entertainment and services all within a relatively short distance.	Local Jurisdictions, SCAG	**Would Not Conflict.** While this action applies to local jurisdictions and SCAG, the Project supports the development of complete communities by co-locating complementary recreational land uses within a quarter-mile of existing off-site commercial and residential uses, and located in a walkable area served by transit. The increases in land use density and mix of uses on the Project Site would reduce vehicle trips and VMT by encouraging walking and non-automotive forms of transportation, which would result in corresponding reductions in transportation-related emissions.
Pursue joint development opportunities to encourage the development of housing and-mixed use projects around existing and planned rail stations or along high-frequency bus corridors, in transit-oriented development areas, and in neighborhood-serving commercial areas.	Local Jurisdictions, CTCs	**Would Not Conflict.** While this action applies to local jurisdictions and CTCs, the Project is a recreational use development in an established residential community that is well served by public transportation. The Project Site is located near the Los Angeles County Metropolitan Transit Authority (Metro) Line 201 that runs West Silver Lake Drive with multiple stops adjacent to the that

TABLE 6
COMPARISON OF PROJECT CHARACTERISTICS WITH APPLICABLE SCAG 2020-2045 RTP/SCS ACTIONS AND STRATEGIES

Actions and Strategies	Responsible Party(ies)	Consistency Analysis
		runs on West Silver Lake Drive with multiple stops adjacent to the Complex and 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Complex and Metro Line 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Project.
Create incentives for local jurisdictions and agencies that support land use policies and housing options that achieve the goals of SB 375.	State, SCAG	**Would Not Conflict.** While this action applies to the State and SCAG, the Project would be consistent with and would not conflict with the goals of SB 375, including the goal to reduce VMT and the corresponding emission of GHGs through infill development. The Project is a recreational land use development located within an established residential community. It co-locates its complementary recreational land uses, which are in close proximity to existing off-site commercial and residential uses. The Project is also located in a highly walkable area served by transit within 1 mile of the Project Site. The increases in land use intensity and diversity and mix of uses on the Project Site would reduce vehicle trips and VMT by encouraging walking and non-automotive forms of transportation, which would result in corresponding reductions in transportation-related emissions.

TABLE 6
COMPARISON OF PROJECT CHARACTERISTICS WITH APPLICABLE SCAG 2020-2045 RTP/SCS ACTIONS AND STRATEGIES

Actions and Strategies	Responsible Party(ies)	Consistency Analysis
Transportation Network Actions and Strategies		
Collaborate with local jurisdictions to plan and develop residential and employment development around current and planned transit stations and neighborhood commercial centers.	SCAG, CTCs, Local Jurisdictions	**Would Not Conflict.** While this action applies to local jurisdictions, SCAG and CTCs, the Project's recreational development would intensify development in an area well served by public transportation. The Project Site is located near the Los Angeles County Metropolitan Transit Authority (Metro) Line 201 that runs West Silver Lake Drive with multiple stops adjacent to the that runs on West Silver Lake Drive with multiple stops adjacent to the Complex and 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Complex and Metro Line 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Project. Furthermore, the Project would provide high-density recreational uses in an area with access to a range of existing entertainment and commercial uses.
Transportation Demand Management (TDM) Actions and Strategies		
Support work-based programs that encourage emission reduction strategies and incentivize active transportation commuting or ride-share modes.	SCAG, Local Jurisdictions	**Would Not Conflict.** While this action applies to local jurisdictions and SCAG, and is not applicable to individual projects, would incorporate pedestrian pathways that connect to the existing sidewalk network, and would provide bicycle parking spaces and facilities.

TABLE 6
COMPARISON OF PROJECT CHARACTERISTICS WITH APPLICABLE SCAG 2020-2045 RTP/SCS ACTIONS AND STRATEGIES

Actions and Strategies	Responsible Party(ies)	Consistency Analysis
Clean Vehicle Technology Actions and Strategies		
Support subregional strategies to develop infrastructure and supportive land uses to accelerate fleet conversion to electric or other near zero-emission technologies. The activities committed in the two subregions (Western Riverside COG and South Bay Cities COG) are put forward as best practices that others can adopt in the future.	SCAG, Local Jurisdictions	**Would Not Conflict.** While this action applies to local jurisdictions and SCAG, as discussed above, while directing the use of alternative-fueled vehicles is beyond the direct control or influence of individual projects, the Project would not interfere with the City's or SCAG's ability to encourage the use of alternative-fueled vehicles through various policies and programs. Specifically, the Project would support a land use pattern that provides increased opportunities to use alternative transportation modes by co-locating complementary recreational land uses within a quarter-mile of existing off-site commercial and residential uses, and within a walkable area served by transit.

SOURCE: ESA, 2022.

TABLE 7
COMPARISON OF PROJECT CHARACTERISTICS TO APPLICABLE CITY OF LOS ANGELES GREEN NEW DEAL GHG EMISSIONS GOALS AND ACTIONS

Target	Project Consistency
Chapter 3: Local Water	
Reduce potable water use per capita by 22.5 percent by 2025; 25 percent by 2035; and maintain or reduce 2035 per capita water use through 2050.	**Would Not Conflict.** While this action primarily applies to the City and LADWP and not to individual projects, the Project would meet this requirement as part of its compliance with the City's requirements, and the CALGreen Code.
Chapter 4: Clean and Healthy Buildings	
Reduce building energy use per square feet for all building types 22 percent by 2025; 34 percent by 2035; and 44 percent by 2050 (from a baseline of 68 mBTU/sqft in 2015).	**Would Not Conflict.** While this action applies to City departments and not to private development, the Project is designed and would operate to meet or exceed the applicable requirements of the CALGreen Code and the Green Building Code.
All new buildings will be net zero carbon by 2030 and 100 percent of buildings will be net zero carbon by 2050.	**Would Not Conflict.** The Project would comply with the State's and City's requirements that are designed to reduce GHG emissions over time, including the LA Green Building Code, Title 24, and other increasingly stringent energy conservation programs. In addition, The Project would help the City move toward a net zero carbon future.
Chapter 5: Housing & Development	
Ensure 57 percent of new housing units are built within 1,500 feet of transit by 2025; and 75 percent by 2035.	**Would Not Conflict.** The Project would reduce VMT as a result of its location within an established residential community well served by public transportation. The Project Site is located near the Los Angeles County Metropolitan Transit Authority (Metro) Line 201 that runs West Silver Lake Drive with multiple stops adjacent to the that runs on West Silver Lake Drive with multiple stops adjacent to the Complex and 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Complex and Metro Line 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Project.
Chapter 6: Mobility & Public Transit	
Increase the percentage of all trips made by walking, biking, micro-mobility/matched rides or transit to at least 35 percent by 2025, 50 percent by 2035, and maintain at least 50 percent by 2050.	**Would Not Conflict.** The Project would facilitate pedestrian and bicycle movements by providing access to and from on-site uses where the primary pedestrian/bicycle entrance to the Project Site would be by providing a total of approximately 43 acres of new useable space, including approximately 10 acres for active and passive recreation and approximately 5.5 miles of walking paths and trails (see Chapter 2.0, *Project Description*, of the Draft EIR for additional details). The Project would locate recreational uses on a Project Site located within a walkable area of Silver Lake with access to public transit. In addition, as described in Section 2.5.7, Sustainability Design Features, although the Project is not required to provide any bicycle parking spaces per the LAMC, the Project would also provide on-site bicycle parking spaces and improve existing bike lanes along Silver Lake Boulevard, and the proposed Project would

TABLE 7
COMPARISON OF PROJECT CHARACTERISTICS TO APPLICABLE CITY OF LOS ANGELES GREEN NEW DEAL GHG EMISSIONS GOALS AND ACTIONS

Target	Project Consistency
	provide drop-off space for micro-mobility initiatives such as Metro Micro (see Section 2.0, *Project Description*, of the Project's Draft EIR, for additional details). Additionally, the Project would locate its complementary recreational land uses, which are in close proximity to existing off-site commercial and residential uses. In addition, the Project Site well served by public transportation. The Project Site is located near the Los Angeles County Metropolitan Transit Authority (Metro) Line 201 that runs West Silver Lake Drive with multiple stops adjacent to the that runs on West Silver Lake Drive with multiple stops adjacent to the Complex and 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Complex and Metro Line 92 which runs on Glendale Boulevard with multiple stops which are a short walking distance from the Project. In addition, as described in Section 2.5.7, Sustainability Design Features, the proposed Project would include recycling and compost receptacles throughout the park, which would reduce the amount of waste generated by the Project and reduce the number of trips to haul solid waste and therefore reduce the amount of petroleum-based fuels and energy used to process solid waste (see Section 2.0, *Project Description*, of the Project's Draft EIR, for additional details).
Reduce VMT per capita by at least 13 percent by 2025; 39 percent by 2035; and 45 percent by 2050.	**Would Not Conflict.** While this action applies to the City and not to individual projects, as indicated in the VMT analysis in Section 3.16, *Transportation*, of the Project's Draft EIR, the results of the analysis show that the Project is projected to generate less than significant impacts on VMT.
Chapter 9: Waste & Resource Recovery	
Increase landfill diversion rate to 90 percent by 2025; 95 percent by 2035 and 100 percent by 2050.	**Would Not Conflict.** While this action applies to the City and not to individual projects, the Project would be served by a solid waste collection and recycling service that may include mixed waste processing, and that yields waste diversion results comparable to source separation and consistent with and would not conflict with Citywide recycling targets.
Reduce municipal solid waste generation per capita by at least 15 percent by 2030, including phasing out single-use plastics by 2028 (from a baseline of 17.85 lbs. of waste generated per capita per day in 2011).	**Would Not Conflict.** While this action applies to the City and not to individual projects, the Project would be served by a solid waste collection and recycling service which would participate in City trash services, including separating trash from recycling through the use of blue and green recycling bins provided by the Bureau of Sanitation.
Eliminate organic waste going to landfill by 2028.	**Would Not Conflict.** The Project consists recreational and athletic facility land uses, which would participate in City trash services, including the participation in the organic waste recycling program once the Citywide residential program is implemented.

TABLE 7
COMPARISON OF PROJECT CHARACTERISTICS TO APPLICABLE CITY OF LOS ANGELES GREEN NEW DEAL GHG EMISSIONS GOALS AND ACTIONS

Target	Project Consistency
Chapter 11: Urban Ecosystems & Resilience	
Reduce urban/rural temperature differential by at least 1.7 degrees by 2025; and 3 degrees by 2035.	**Would Not Conflict.** While this action applies to the City in general, and not specifically to individual private development, the Project would implement A Tree Succession Plan would be developed to gradually remove mature trees to avoid temporary elimination of habitat value within the SLRC and replant areas primarily vegetated with non-native trees with native trees and understory. The plan would be prepared by a qualified arborist. The plan would be implemented over a 15-year period, allowing time for new tree plantings and understory to become well established and maintaining habitat for avian and bat species. The Tree Succession Plan would identify trees to be removed in the initial year of construction giving priority to trees that are dead, in poor health, and/or pose a safety risk to the public, including those with fungal and/or pest infestations. The plan would identify a sequence of phased removals for selected trees on a schedule throughout the 15-year period. Additionally, it would include the replacement of 80 percent of existing non-native trees over a 15-year timeline and the attainment of 75 percent canopy coverage within 20 years (see Section 2.0, *Project Description*, for additional details). The Project includes a total of approximately 43 acres of new useable space, including approximately 10 acres for active and passive recreation and approximately 5.5 miles of walking paths and trails. The Project park uses would be available as open space for public use daily from 5:00 a.m. to 10:30 p.m and the updated Recreation Center would be operated from 9:00 a.m. to 9:00 p.m. on weekdays and 9:00 a.m. to 5:00 p.m. on Saturdays and is closed on Sundays. The Project would be consistent with and would not conflict with the City's goal to reduce the heat island effect, with measures such landscaped open space and the addition of canopy trees
Ensure proportion of Angelenos living within 1/2 mile of a park or open space is at least 65 percent by 2025; 75 percent by 2035; and 100 percent by 2050.	**Would Not Conflict.** The Project's design includes approximately a total of approximately 43 acres of new useable space, including approximately 10 acres for active and passive recreation and approximately 5.5 miles of walking paths and trails. The Project park uses would be available as open space for public use daily from 5:00 a.m. to 10:30 p.m and the updated Recreation Center would be operated from 9:00 a.m. to 9:00 p.m. on weekdays and 9:00 a.m. to 5:00 p.m. on Saturdays and is closed on Sundays (see Chapter 2.0, *Project Description*, of the Draft EIR for additional details).

SOURCE: City of Los Angeles, L.A.'s Green New Deal (Sustainable City pLAn 2019), 2019; ESA, 2022.

In the latest State CEQA Guidelines amendments that went into effect on March 18, 2010, lead agencies are encouraged to make use of programmatic mitigation plans and programs from which to tier when they perform individual project analyses. As discussed in Section 3.8, *Greenhouse Gas Emissions*, of the Project's Draft EIR, the City has established goals and actions to reduce the emission of GHGs from both public and private activities in the L.A.'s Green New Deal (Sustainability pLAn 2019). While the City does not have a programmatic mitigation plan to tier from, such as a Greenhouse Gas Emissions Reduction Plan as recommended in the relevant amendments to the State CEQA Guidelines, the City has adopted the L.A.'s Green New Deal (Sustainability pLAn 2019) and LA Green Building Code, which encourage and require applicable projects to implement energy efficiency measures. In addition, the CCAT Report provides recommendations for specific emission reduction strategies for reducing GHG emissions and reaching the targets established in HSC Division 25.5 and Executive Order S-3-05. As previously stated, the City's the City has adopted the L.A.'s Green New Deal (Sustainability pLAn 2019) and LA Green Building Code, that have GHG reduction goals and actions that are relevant to the project's GHG sources. Thus, since the Project is designed in accordance with these policies and regulations as shown in Table 4, *Project Compliance with Applicable 2017 Climate Change Scoping Plan Actions and Strategies,* Table 5, *Comparison of Project Characteristics with Applicable SCAG 2020-2045 RTP/SCS Actions and Strategies* and Table 6, *Comparison of Project Characteristics to Applicable City of Los Angeles Green New Deal GHG Emissions Goals and Actions*, it would result in a less than significant impact, because it would be consistent with the overarching State regulations on GHG reduction (HSC Division 25.5).
