Kleinfelder Project No. 20221076.001A

Costco Wholesale
999 Lake Drive
Issaquah, WA 98027

Attention: Ms. Kim Katz
Director of Real Estate Development

SUBJECT: Phase I Environmental Site Assessment
Proposed Costco Wholesale Warehouse
Westgate West Shopping Mall
Northeast of Lawrence Boulevard and Prospect Road
San Jose California
CW20-0355-01 San Jose, CA (Westgate West)

Dear Ms. Katz:

Enclosed is the Phase I Environmental Site Assessment (ESA) report for the above-referenced property. We trust the information presented in this report meets your needs at this time.

An executive summary is provided. However, we recommend that the report be read in its entirety for a comprehensive understanding of the items contained therein.

We appreciate the opportunity to provide these services to Costco Wholesale. If you have questions regarding this report or if we can be of further service, please do not hesitate to contact Paolo Dizon at 949.727.4466 or Andy Franks, Kleinfelder's Client Account Manager for Costco, at 480.650.4905.

Sincerely,

KLEINFELDER

Paolo Dizon
Project Manager

1 EXECUTIVE SUMMARY

This report documents a Phase I Environmental Site Assessment (ESA) performed by Kleinfelder, Inc. (Kleinfelder) for Costco Wholesale Corporation (Costco / Client), of the property located northeast of the intersection of Lawrence Expressway and Prospect Drive, south of Graves Avenue in the City of San Jose, California (the Site; see Figure 1). The Site consists of approximately 9.5 acres land currently developed as the Westgate West Shopping Mall (see Figure 2). Kleinfelder understands that the Client plans to lease the property for the construction of a Costco Warehouse.

This report was prepared using the ASTM International Designation E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (the "Standard Practice"), the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Revitalization Act (the Federal Brownfields Law), and Costco's Development Requirements, Version 2018, revised October 26, 2018. The Phase I ESA findings include the following:

- The Site is located within the City of San Jose, northeast of the intersection of Lawrence Expressway and Prospect Drive, south of Graves Avenue. The Site is situated on approximately 9.5 acres of land consisting of portions of the following parcels:

  - Assessor's Parcel Number (APN) 381-36-028, address 5289 Prospect Road;
  - APN 381-36-029, address 5347 Prospect Road;
  - APN 381-36-014, address 5353 Prospect Road; and
  - APN 381-36-021, address 5287 Prospect Road.

  Other addresses associated with the Site are 5365 Prospect Road, 5281 Prospect Road, and 5285 Prospect Road. The Site is part of the Westgate West Shopping Center and is currently developed with two commercial buildings and associated parking lots. The western commercial building is currently vacant, and the eastern commercial building is currently occupied by a Goodwill, Ethan Allen store, and Smart and Final store.

- Historically the Site was developed with orchards and farm structures (located in the north central portion of the Site) from at least 1939 through 1968. By 1968, the eastern portion of the Site was developed with the existing warehouse building. By 1974, the western portion of the Site was developed with the existing commercial structure. These structures were expanded to the existing configuration by 1998. Occupants of the Site have included Builders Emporium (circa 1973-1986) and Orchard Supply Hardware (OSH) (circa 1991-

Copyright 2021 Kleinfelder

2014) in the western commercial building; Firestone (circa 1977-1985) and Midas Muffler (circa 1985-2012) in the southwest portion of the eastern commercial building; Payless Drugs (1966-1991), Longs Drugs (circa 1992-2009), Albertsons (circa 1968), CVS (circa 2009-2011), Ethan Allen (circa 1991-present), and Smart and Final (circa 2000 - present) in the eastern portion of the eastern commercial building.

- Midas Muffler, located on Site, was listed as having a leaking underground storage tank (LUST) case which was closed on September 25, 1997 by the Santa Clara Valley Water District (SCVWD, 1996). A leak was discovered during removal of a steel 250-gallon or 280-gallon (the volume varied in reports) waste oil tank on July 1, 1996. One soil sample was collected from approximately 9.5 feet below ground surface (bgs) (beneath the former UST). Excavated material was stockpiled and sampled. After sampling, the excavation was lined with plastic sheeting, and the stockpiled material was placed back in the excavation. Soil sample analytical results indicated that benzene, toluene, ethylbenzene, xylenes (BTEX), leachable lead, volatile organic compounds (VOCs), and total petroleum hydrocarbons (TPH) diesel were not detected in the soil sample from beneath the UST above their respective laboratory reporting limits. TPH gasoline was present in the soil sample from beneath the UST at a concentration of 0.055 milligrams per kilogram (mg/kg). A concentration of oil and grease was present at 26 mg/kg. Poly-chlorinated biphenyls (PCBs), VOCs, and TPH were not detected in the stockpile soil sample above their respective laboratory reporting limits. Based on these results, the case was closed by the SCVWD (1996). Based on Kleinfelder's review of this listing, the potential residual concentrations remaining in soil appear to be low and the closed LUST case for the Midas UST is considered an historical recognized environmental condition (HREC).

- Kleinfelder reviewed previous environmental investigations for the Site including a 2019 shallow soil investigation performed by Converse Consultants (Converse, 2019a and 2019b) for a proposed 24-Hour Fitness in the eastern half of the western commercial building on Site. In 2019, Converse collected shallow soil samples in from 2 feet bgs. Soil samples were analyzed for organochlorine pesticides (OCPs) and metals. The OCPs chlordane, dichlorodiphenyltrichloroethane (DDD), dichlorodiphenyldichloroethene (DDE), dichlorodiphenyltrichloroethane (DDT), dieldrin, and endrin and were present above their laboratory reporting limits in one or more of the soil samples. Maximum concentrations reported were 4.97 micrograms per kilogram (µg/kg) for chlordane, 29.2 µg/kg for DDD, 286 µg/kg for DDE, 203 µg/kg for DDT, 2.09 µg/kg for dieldrin, and 17.4 µg/kg for endrin. The reported concentrations of these six compounds do not exceed

Copyright 2021 Kleinfelder

the current 2019 San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) commercial, construction worker and/or gross contamination Environmental Screening Levels (ESLs) for soil (2,200 µg/kg, 14,000 µg/kg, and 23,000 µg/kg for chlordane; 12,000 µg/kg, 81,000 µg/kg, and 65,000 µg/kg for DDD, 8,300 µg/kg, 57,000 µg/kg, and 29,000 µg/kg for DDE, 8,500 µg/kg, 57,000 µg/kg, and 5,600 µg/kg for DDT, 160 µg/kg, 1,100 µg/kg, and 24,000 µg/kg for dieldrin, and 290,000 µg/kg, 74,000 µg/kg, and 30,000 µg/kg for endrin, respectively). Converse also collected composite soil samples from a proposed excavation area along the northern Site boundary. These soil samples were analyzed for metals, TPH, OCPs, PCBs, semi-volatile organic compounds (SVOCs), and VOCs. Metals did not exceed their hazardous waste thresholds of Total Threshold Limit Concentration (TTLC), Toxicity Characteristic Leaching Procedure (TCLP), nor Soluble Threshold Limit Concentration (STLC) criteria. DDD was reported in one composite soil sample at a concentration of 4.09 µg/kg (Converse, 2019b). TPH, PCBs, VOCs, and SVOCS were not detected above their respective laboratory reporting limits. As detected concentrations did not exceed commercial screening levels, and groundwater is present between 97 and 99 feet bgs and is unlikely to have been impacted by OCPs and metals, Kleinfelder does not consider these residual OCP and metals concentrations a REC. Note the sampling performed by Langan was not Site-wide. To further evaluate Costco's risk, it would be necessary to perform sampling and analysis of the surficial soils across the Site.

- Converse also prepared a Phase I ESA and Limited Phase II ESA in 2016 for the Westgate West Shopping Center (which includes the Site but also some surrounding areas to the south). In their Phase I ESA, Converse identified the former Midas as an environmental concern because it wasn't clear whether the hydraulic hoists or oil water separator had been removed or just abandoned in place. Converse also identified a former Goodyear (located south of the Site) that had a historical LUST case as an environmental concern. Converse recommended that an actual closure letter be received for the Goodyear property. Converse identified Holiday Cleaners, a dry cleaner that operated in the Westgate shopping center (south of the Site) as an REC. Converse performed a Limited Phase II ESA to assess the identified RECs. The Holiday Cleaner findings and subsequent investigations are discussed in the following bullet. Converse advanced 12 soil bores to 20 feet bgs in the vicinity of the Midas hydraulic hoists. Results of the soil samples collected at the Midas indicated no PCBs were present. The maximum TPH diesel concentration was 380 mg/kg and the maximum TPH oil range concentration was 6,410 mg/kg. The detected TPH concentrations were present in the 10 foot bgs soil

Copyright 2021 Kleinfelder

samples, and were vertically assessed in each bores. The TPH diesel concentration was reported to not exceed the commercial ESL for diesel (1,200 mg/kg), the construction worker ESL for diesel (1,100 mg/kg) nor the gross contamination ESL for diesel (1,000 mg/kg) The TPH oil range concentration did not exceed the commercial ESL for motor oil (180,000 mg/kg) or the construction worker ESL for motor oil (54,000 mg/kg) and was slightly above the gross contamination ESL for motor oil (5,100 mg/kg). Converse concluded that there was no significant contamination at the Midas Mufflers property. However, based on Kleinfelder's review, a parts cleaner was used at the Midas. One of the inspection reports indicated that solvent leakage was observed under the parts cleaner, as Converse did not analyze soil samples for VOCs or collect soil vapor samples in the former Midas, Kleinfelder considers the potential for spills from use of solvents at the Midas to have impacted the Site's subsurface a REC.

- Holiday Cleaners, located at 5309 Prospect Road, adjoining the Site to the south, has an open Cleanup Program case. This case was opened in April 2017. Holiday Cleaners has operated as a drycleaner from 1985 and had been reported to have used tetrachloroethylene (PCE)-based cleaning agents until 2009/2010. After 2010, the drycleaner switched to a hydrocarbon-based cleaning machine. Based on Kleinfelder's review of previous environmental investigations prepared by Converse for this facility, PCE concentrations were present in soil samples with a maximum concentration of 180 µg/kg. Other VOCs, TPH diesel or oil concentrations were not detected in soil. TPH gasoline was reported at a maximum concentration of 0.23 mg/kg. These concentrations did not exceed the SFBRWQCB commercial ESLs. However, PCE in soil vapor was detected at a maximum concentration of 987,000 micrograms per cubic meter (µg/m^3), which does exceed the SFBRWQCB commercial ESL for soil vapor. Subsequent indoor air sampling indicated that VOCs detected in soil vapor were also present in indoor air. Based on these results, Converse concluded that there is a vapor intrusion hazard. Supplemental investigations assessed the VOC impact in soil vapor to a radius of 50 feet laterally around the drycleaner, and up to 40 feet bgs. Groundwater wells were installed to depths between 105 and 120 feet bgs and groundwater was encountered between 97 and 99 feet bgs, with a flow to the northeast. VOCs were not present in groundwater. After assessing the extent of impact, Converse performed a soil vapor extraction (SVE) pilot test in 2017 and identified SVE as a suitable remediation method for the Site. It appears that SVE remediation was approved, though not yet implemented. Based on the review of the soil vapor data, it appears to be limited to be essentially only under the footprint of the building of the former dry cleaning facility. As the soil vapor plume is

Copyright 2021 Kleinfelder

assessed and does not appear to extend beneath the Site, has not impacted groundwater, and PCE is no longer used at the drycleaner, in Kleinfelder's opinion this is not an REC. However, as this facility remains an open cleanup case under remediation, Kleinfelder recommends periodic review to assess future risk to Costco given the proximity to the Site.

- Based on review of the Environmental Data Resources, Inc. (EDR) database report, no off-Site facilities were identified as RECs to the Site.

This assessment has revealed no evidence of RECs or controlled RECs (CRECs) in connection with the Site, with the exception of the following:

- The potential for vapor impacts resulting from solvent use at the former Midas facility is considered a REC.

Although not considered a REC, residual pesticide and TPH concentrations (at the former Midas) have been documented to be present in soil samples collected at the Site. Concentrations are less than regulatory action levels, and the potential for further action to be required to address these concentrations is low. However, the presence of these low concentrations may impact future construction activities and disposal of excavated soil, Kleinfelder recommends preparation of a Soil Management Plan (SMP) prior to construction activities.

Deviations and *de minimis* findings are discussed in Section 8 of this report. This report is subject to the limitations in Section 2.5.

Copyright 2021 Kleinfelder

2 INTRODUCTION

This report is a summary of work performed using the guidelines set forth in the Standard Practice, the AAI section of the Federal Brownfields Law, and Costco's Development Requirements, Version 2018, revised October 26, 2018. This report also generally conforms to the Standard Practice's suggested table of contents. Minor format modifications have been made to the Standard Practice's suggested table of contents to assist in better reading and understanding the report findings.

2.1 PURPOSE

The purpose of this Phase I ESA is to identify, to the extent feasible pursuant to the scope of the Standard Practice and limitations discussed in this report, RECs and other environmental issues related to the Site.

As defined in the Standard Practice, an REC is:

> *"The presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."*

As defined in the Standard Practice, a *de minimis* condition is:

> *"A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."*

As defined in the Standard Practice, a CREC is:

> *"… a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."*

Copyright 2021 Kleinfelder

As defined in the 2013 Standard Practice, a HREC is:

> *"…a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to environmental controls."*

The final decision regarding whether a past release is an HREC rests with the environmental professional (EP), and will be influenced by the current impact (if any) of the past release to the Site.

This report describes Kleinfelder's assessment methodology and documents its findings, subject to the limitations presented in Section 2.5 of this report.

2.2 DETAILED SCOPE OF SERVICES

The following sections describe Kleinfelder's work scope:

- Section 2, **Introduction**, includes a discussion of the purpose/reason for performing the Phase I ESA, additional services requested by the Client (e.g., an evaluation of business environmental risk factors associated with the Site), significant assumptions (e.g., property boundaries if not marked in the field), limitations, exceptions, special terms and conditions (e.g., contractual), and user reliance parameters.

- Section 3, **Site Description**, is a compilation of information concerning the Site location, legal description (if provided by the Client), current and proposed use of the Site, a description of structures and improvements on the Site at the time of Kleinfelder's assessment, and adjoining property use.

- Section 4, **Records Review**, is a compilation of Kleinfelder's review of several databases available from Federal, State, and local regulatory agencies regarding hazardous substance use, storage, or disposal at the Site; and for off-Site facilities within the search distances specified by the Standard Practice. Records provided by the Client are summarized, and copies of relevant documents are included in the appendices of this report. Physical setting sources (including topography and soil and groundwater conditions) and typical Client-provided information (e.g., title records, environmental liens, specialized knowledge, valuation reduction for environmental issues, and owner, property

Copyright 2021 Kleinfelder

manager, and occupant information) are also summarized. Other interviews with people knowledgeable about the Site (including the Client) are included in Section 7.

- Section 5, **History of the Site**, summarizes the history of the Site and adjoining properties. This Site history is based on various sources, which may include a review of historical aerial photographs, Sanborn Fire Insurance Maps, city or suburban directories, historical topographic maps, building department records, and results of previous Site assessments (if any and reasonably ascertainable).

- Section 6, **Site Reconnaissance**, describes Kleinfelder's observations during the Site reconnaissance. The methodology used and limiting conditions are also described.

- Section 7, **Interviews**, is a summary of telephone and personal interviews performed with "Key Site Managers" that may include the Site owner/manager, occupants/tenants, local government officials, and the Client. Additional interview sources may be contacted if Key Site Managers were not available prior to production of this report, and may include adjoining landowners and people with historical knowledge of the area.

- Section 8, **Evaluation**, is a presentation of findings and opinions regarding the information provided in Sections 3 through 7, and presents the conclusions regarding the presence of RECs connected with the Site, and Kleinfelder's recommendations.

- Section 9, **References**, is a summary listing of the resources used to compile this report.

A statement of qualifications of the signatories of this report is provided in Appendix A of this report, and pertinent documentation regarding the Site is included in Appendices B through D.

2.3 ADDITIONAL SERVICES

Kleinfelder's scope of services as part of this Phase I ESA did not include Standard Practice non-scope evaluations of cultural, historic, paleontological and archaeological resources; environmental regulatory compliance; wetlands and surface water; and threatened, endangered, and other protected species that may be required for a Phase I ESA pursuant to Costco's Development Requirements publication (revised October 26, 2018). In addition, the Phase I ESA does not include an assessments for asbestos containing materials (ACMs), radon, lead based paint (LBP), lead in drinking water, molds and mildews, indoor air quality, industrial hygiene, health and safety, and other Standard Practice non-scope considerations not described herein.

Copyright 2021 Kleinfelder

2.4 SIGNIFICANT ASSUMPTIONS

Kleinfelder does not guarantee the accuracy of information supplied by its sources, but reserves the right to rely on the information in forming a professional opinion regarding the potential for contamination at the Site. It is assumed the Client provided Kleinfelder all applicable and available environmental records and specialized knowledge in its possession regarding the Site. Kleinfelder has not made other significant assumptions during the performance of this Phase I ESA.

2.5 LIMITATIONS AND EXCEPTIONS

Phase I ESAs are non-comprehensive by nature and may not identify all environmental problems, and will not eliminate all risk. This report is a qualitative assessment. Kleinfelder offers a range of investigative and engineering services to suit the needs of its clients, including more quantitative investigations. Although risk can never be eliminated, more detailed and extensive investigations yield more information, which may help the Client understand and better manage risks. Since such detailed services involve greater expense, Kleinfelder asks its clients to participate in identifying the level of service that will provide them with an acceptable level of risk. Please contact the signatories of this report if you would like to discuss this issue of risk further.

Kleinfelder performed this Phase I ESA consistent with the guidelines set forth in the Standard Practice; Costco's Development Requirements, Version 2018 (revised October 26, 2018); and the proposed scope of services subsequently approved by Costco. No other warranty, either express or implied, is made. Environmental issues not specifically addressed in this report were beyond the scope of Kleinfelder's services and not included in the evaluation.

This report may be used only by Costco and only for the purposes stated within a reasonable time from its issuance, but in no event later than one year from the date of the report. Land or facility use, on- and off-Site conditions, regulations, or other factors may change over time, and additional work may be required with the passage of time. Since Site activities and regulations beyond Kleinfelder's control may change at any time after the completion of this report, the observations, findings, and opinions provided herein are considered valid only as of the date of the Site visit. Pursuant to Section 4.6 of the Standard Practice, this report should not be relied upon after 180 days from the date of its oldest component. Any party other than the Client who wishes to use this report shall notify Kleinfelder of such intended use. Based on the intended use of the report, Kleinfelder may require that additional work be performed and that an updated report be issued. Non-compliance with any of these requirements by the Client or anyone else will release

Copyright 2021 Kleinfelder

Kleinfelder from any liability resulting from the use of this report by any unauthorized party, but only to the extent of any such non-compliance by the Client.

The Phase I ESA has been conducted in accordance with and conforms to the Costco Wholesale Development Requirements Document and the latest edition of ASTM E 1527. This assessment has been prepared for the sole use of Costco Wholesale Corporation. Its contents should not be relied upon by other parties without the express written consent of Costco Wholesale Corporation.

2.6 SPECIAL TERMS AND CONDITIONS

No special terms and conditions were agreed to by the Client and Kleinfelder.

Copyright 2021 Kleinfelder

3 SITE DESCRIPTION

The Site description is presented in this section and describes the condition of the Site at the time of the Phase I ESA. The Site location is shown on Figure 1. Tables 3-1 through 3-4 summarize the physical characteristics of the Site and adjoining properties.

3.1 LOCATION AND LEGAL DESCRIPTION

The information presented in Table 3-1 denotes the physical location and legal description of the Site. This information was obtained from review of various maps (such as topographic maps and tax assessor maps), aerial photographs, public records at City and/or County offices, interviews, and/or information provided by the Client.

TABLE 3-1
Location and Legal Description

PARAMETER	INFORMATION/COMMENTS
LOCATION	The Site is located northeast of the intersection of Lawrence Boulevard and Prospect Drive, south of Graves Avenue in the City of San Jose, California (see Figure 1).
LEGAL DESCRIPTION	The legal description of the Site parcel is presented in the *EDR Environmental Lien and AUL Search* report (EDR, 2021a) provided in Appendix C.
ASSESSOR'S PARCEL NUMBER	The Site is situated on approximately 9.5 acres of land consisting of portions of the following parcels: - APN 381-36-028, - APN 381-36-029, - APN 381-36-014, and - APN 381-36-021.
ADDRESS(ES)	The above-listed parcels are associated with the following addresses: - APN 381-36-028, address 5289 Prospect Road; - APN 381-36-029, address 5347 Prospect Road; - APN 381-36-014, address 5353 Prospect Road; and - APN 381-36-021, address 5287 Prospect Road. Other addresses associated with the Site include 5365 Prospect Road, 5281 Prospect Road, and 5285 Prospect Road.
SECTION, TOWNSHIP, AND RANGE	Township 7 South, Range 1 West, Section 29, Mount Diablo Baseline and Principal Meridian.

Copyright 2021 Kleinfelder

3.2 CURRENT / PROPOSED USE OF THE PROPERTY

Land use in the general vicinity appeared to be generally commercial and residential at the time of Kleinfelder's assessment. Current and proposed Site uses are described in Table 3-2.

TABLE 3-2
Current and Proposed Uses

PARAMETER	GENERAL OBSERVATIONS
CURRENT USE	Westgate West Mall Shopping Center. The commercial building on the western half of the Site is vacant. The commercial building on the eastern half is currently occupied by a Goodwill store, Ethan Allen store, and a Smart and Final store.
PROPOSED USE	Costco Wholesale Warehouse.

3.3 DESCRIPTION OF STRUCTURES / IMPROVEMENTS

Structures and/or improvements observed on the Site at the time of Kleinfelder's reconnaissance are described in Table 3-3.

TABLE 3-3
Structures and Improvements

PARAMETER	GENERAL OBSERVATIONS
STRUCTURES	Two commercial buildings are present on Site.
IMPROVEMENTS	Utility infrastructure is present on the Site. Driveways and parking lots surround the commercial structures. Overhead lighting and landscaping are present in the parking lots.

3.4 CURRENT USES OF ADJOINING PROPERTIES

Kleinfelder performed a brief drive-by survey of the properties immediately adjoining to the Site on June 25, 2021. A summary of the observations regarding the surrounding properties is presented in Table 3-4 and shown on Figure 2, Site Vicinity Map.

Copyright 2021 Kleinfelder

TABLE 3-4
Adjoining Properties

DIRECTION	LAND USE DESCRIPTION
NORTH	Graves Avenue then residential homes.
EAST	West Valley Professional shopping center.
SOUTH	Commercial retail stores, including Trader Joes, Bikram Yoga, Yao Yong dance, Domino's Pizza, UPS Store, Taco Bell, and parking lots.
WEST	Lawrence Expressway, and then residential homes.

Hazardous materials and petroleum products were not observed to be stored on the properties adjoining the Site. No other environmental conditions were apparent on the adjoining properties at the time of Kleinfelder's Site reconnaissance. Based on our observations, the adjoining properties are unlikely to adversely affect the Site.

Copyright 2021 Kleinfelder

4 RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

The purpose of the records review is to obtain and review records that would help to evaluate RECs in connection with the Site and bordering properties. Federal, State, and local regulatory agencies publish databases or “lists” of businesses and properties that handle hazardous materials or hazardous waste, or are the known location of a release of hazardous substances to soil and/or groundwater. These databases are available for review and/or purchase at the regulatory agencies, or the information may be obtained through a commercial database service. Kleinfelder contracted a commercial database service, EDR, of Shelton, Connecticut, to perform the government database search for listings within the appropriate Standard Practice minimum search distance of the Site, and the distances set forth in Costco’s Development Requirements, Version 2018, revised October 26, 2018. Kleinfelder provided EDR with a Site map to incorporate the search distances from the Site boundary. Included in the EDR Radius Map™ Report (EDR, 2021b) is a listing of specific databases outlined by the Standard Practice. A listing of the search distances, databases evaluated, dates the databases were last updated, and types of information contained in each database are included in the regulatory database search report provided in Appendix B of this report.

EDR utilizes a geographical information system to plot the locations of reported spills, leaks, incidents, etc. Kleinfelder reviews this information to help establish if the Site or nearby properties are listed in the databases and lists. Each of the listings was reviewed by Kleinfelder to assess whether the corresponding property details included in EDR’s report revealed a potential environmental impact to the Site. Many listings in the report were concluded not to have the potential to impact the Site based on the following, or a combination thereof:

- The listed property is located at a distance where the facility is unlikely to impact the Site based on Kleinfelder’s evaluation of the relevant data in EDR’s report and knowledge of the Site vicinity.
- The listed property is located in a down-gradient or cross-gradient direction from the Site, based on the anticipated direction of groundwater flow at the property being evaluated, and is located at a distance such that it is unlikely to impact the Site. Note that groundwater flow direction, based on review of available information, is generally to the northwest. Judgements as to down- or cross-gradient direction are best made if groundwater flow direction information is available for a specific property.

Copyright 2021 Kleinfelder

- The listed property is identified in the underground storage tank (UST) or Small Quantity Generator (SQG) databases and does not immediately adjoin the Site. The property is furthermore not listed in other databases that report a release of a hazardous substance or petroleum product and/or is not listed as having environmental violations. The listing of a facility in these databases alone is not indicative of an unauthorized release.
- The listing for the facility suggested a short-term release occurred (e.g., from incidental traffic accidents or involving limited quantities of chemicals from illegal drug labs found at residences), with associated response actions completed.
- The quantity of the hazardous substances or petroleum product released from an off-Site, non-adjoining facility was not judged to have resulted in contamination above the most stringent criteria requiring regulatory action. Therefore, no impact to the Site is anticipated.
- The listed property record indicates that the property was characterized, the reported release affected soil only, the listed property was not on or adjacent to the Site, and the release was not recognized as indicative of area-wide conditions or was characterized as a soil removal action only.
- The listed property record indicates that contamination on the property is limited to relatively non-mobile contaminants, including polyaromatic hydrocarbons (PAHs) and metals, in soil only, on a non-adjacent property.
- The listed property record indicates that the case for the property has been closed to the satisfaction of the designated lead regulatory agency, and residual contamination, if present, is not considered likely to affect the Site based on one or more of the criteria mentioned in the bulleted items above (a condition referred to by the Standard Practice as an HREC).

Based on these criteria indicating no material threat of a release that affected the Site and/or no release that could require future regulatory agency oversight, the listings concluded not to have the potential to impact the Site were not evaluated further and are not discussed in the following sections.

4.2 RESULTS OF DATABASE SEARCH

The remaining property listings were reviewed to assess whether these properties had environmental releases that may have resulted in RECs in connection with the Site. Listed properties for which a reported release may have resulted in a REC in connection with the Site were further assessed by performing a review of agency files available through the GeoTracker™

Copyright 2021 Kleinfelder

website (https://geotracker.waterboards.ca.gov/) operated by the State Water Resources Control Board (SWRCB), and/or review of other relevant regulatory agency websites, to evaluate whether the listed release represents a potential impact to the Site.

4.2.1 Site Listings

The following Site facilities were listed in databases searched by EDR.

"Midas Muffler" "Bridgestone Firestone Inc" "Midas Auto Service Experts" "Cosmic Holdings LLC (Midas)" "Westvalley Properties" (5287 Prospect Road, which is associated with APN 381-36-021) – The Site address was listed in the Facility Index System (FINDS), RGA LUST, CUPA Listings, HWTS, HAZNET, and HAZMAT databases as managing, storing, and generating hazardous waste. The CUPA listings indicated that this facility generated greater than 100 kilograms but less than 5 tons of hazardous waste per year. Midas was listed in HAZNET as generating waste oil and mixed oil waste in 1990, 1991, and 1996; liquids with halogenated organic compounds in 1997, 1998, and 1999; aqueous solution with total organic residues less than 10 percent and unspecified organic liquid mixture in 2000. Bridgestone was listed as disposing of empty containers in 1996. Westvalley Properties was listed as generating unspecified oil-containing waste in 2006.

The Midas facility was also listed as having a LUST case that was opened July 17, 1996 and closed September 25, 1997. Based on review of available closure documentation on Geotracker, a waste oil leak was discovered during removal of a 250-gallon UST. Waste oil was reported to have impacted soil. Following removal of the UST, approximately 29 cubic yards of soil were excavated and temporarily stockpiled. A soil sample was collected from beneath the former UST from approximately 9.5 feet bgs. A stockpile sample was collected from the excavated soil. The UST cavity was then lined with plastic sheeting, and the stockpiled soil was used to backfill the UST cavity. The UST confirmation soil sample was analyzed for TPH diesel/gasoline, VOCs, BTEX, and oil and grease. Concentrations were not detected with the exception of the following: TPH GRO was present at 0.055 mg/kg, oil and grease were present at 26 mg/kg. The stockpile sample was analyzed for PCBs, metals, VOCs, TPH diesel, TPH gasoline, and oil and grease. Concentrations were not detected with the exception of the following: oil and grease were present at 88 mg/kg.

"C P 6 WW LLC" (5289 Prospect Road Suites C, D, E, F) – The Site address was listed in the HWTS and HAZNET databases. Asbestos containing waste was reported to have been generated in 2011.

Copyright 2021 Kleinfelder

“Kids Care Dental and Orthodontics DBA Reeves and L” “Kincos” (5253 Prospect Road) – The Site address was listed in the HWTS database in 2004, and as inactive in 2004, and in the RCRA Nongen /NLR database in 2021 as not a generator of hazardous waste. No violations were listed.

“Orchard Supply Hardware #280” (5365 Prospect Road) – The Site address was listed in the FINDS, ECHO, ERNS, HWTS, HAZNET, HAZMAT, CUPA Listings, and RCRA NonGen/NLR databases. The CUPA listings indicated that this facility generated greater than 100 kilograms but less than 5 tons of hazardous waste per year. This facility was listed in the HWTS database between 2013 and 2019, when it was listed as inactive. This facility was listed in HAZNET as generating the following waste types between 2014 and 2018: other inorganic solid waste, unspecified solvent mixture, liquids with pH less the 2, alkaline solution without metals pH greater 12.5, off-speciation, aged or surplus organics. The ERNS database listing indicated that an electrical transformer leak was discovered in 1997. This facility was listed as a non-generator in 2019.

4.2.2 Off-Site Listings

Multiple facilities in the Site vicinity are listed in various databases searched by EDR, but are not considered RECs based on one or more criteria outlined in Section 4.1. Facilities further reviewed to assess the potential for impacts to the Site are summarized in Table 4-1.

Copyright 2021 Kleinfelder

TABLE 4-1
Off-Site Facilities of Potential Concern

FACILITY OR PROPERTY NAME	ADDRESS	DIRECTION/ PROXIMITY TO SITE	COMMENTS
Holiday Cleaners / Westgate Cleaners	5309 Prospect Road	146 feet southwest	This facility is listed in the Historical Cleaner database as a dry-cleaning plant from 1997 through 2014. This facility was listed as a small quantity generator in 1996 (RCRA-SQG) and was also listed as hazardous waste generator in the CERS Haz Waste and HAZNET databases as generating liquids with halogenated organic compounds (including chloroform, methyl chloride, and perchloroethylene) in 1999 through 2003. Off-speciation, aged, or surplus organics were also generated in 2001 through 2003. The facility was listed as active in the CERS database in 2014. A permit inspection report from September 11, 2019 indicated that the permit investigation was requested by the previous facility owner, Mr. John Miller, to close out the permit in the Santa Clara County Department of Environmental Health Hazardous Waste Generator Program. The inspection report indicated that the facility had one dry cleaning unit using DF 2000 solvent and that 160-gallons of solvent was observed. A 30-gallon drum was also observed for spent hydrocarbon waste. Notices of violation included failure to complete business plan on CERS in 2015. A CPS-SLIC was opened for this facility on May 21, 2019. Air, soil, and soil vapor have been impacted with PCE, trichloroethylene (TCE), and vinyl chloride. This case is currently open and under remediation. This facility was listed in the CUPA Santa Clara database as Westgate Cleaners and in the Drycleaners database as Holiday Cleaners in 2015 and Westgate Cleaners in 2020. Holiday Cleaners was listed in the EMI database as having BAAQMD permits as early as 1990 through 2001. Westgate Cleaners was listed a non-generator in 2020.

Copyright 2021 Kleinfelder

TABLE 4-1 (Continued)
Off-Site Facilities of Potential Concern

FACILITY OR PROPERTY NAME	ADDRESS	DIRECTION/ PROXIMITY TO SITE	COMMENTS
Dean's Goodyear / Bill Deane Goodyear Inc	5291 Prospect Road	354 feet south-southwest	This facility has operated as Goodyear from 1970 through 2009 and was listed in the HWTS and HAZNET databases as generating unspecified organic liquid mixtures, oxygenated solvents waste, other empty containers, and waste oil waste between 1989 through 1993. This facility has a closed CPS-SLIC case. Soil had potentially been impacted by a release from a sump which was removed in 1992. Based on the maximum oil and grease concentration was 810 mg/kg, and that VOCs were detected. The case was closed October 27, 2017. Based on the low concentrations present in soil, the soil only impact, and the closed case status, this facility is not considered an REC.
West Valley Cleaners	5211 Prospect Road	386 feet south-southeast	This facility was listed in EDR's Historical Cleaner database as operating from 1970 through 2000. Based on no releases reported, and this facility is located cross-gradient to the Site, this facility is not considered an REC.
Youmis Alteration & cleaners	18478 Prospect Road	554 feet south southwest	This facility was listed in EDR's Historical Cleaner database as operating from 1992 through 2014. Based on no releases reported, this facility is not considered an REC.
Westgate Classic Car Wash	18560 Prospect Road	715 feet south southwest	This facility has a closed LUST case where soil had been impacted with gasoline. The case was closed May 15, 1996. During removal of a 10,000-gallon UST in 1994, confirmation soil samples indicated that TPH-g, BTEX concentrations were present at low concentrations. In 2001, a soil bores was advanced to 90 feet bgs to assess soil and groundwater for VOCs. Groundwater was reported to be present at 85 feet bgs. Low TPH-g and BTEX concentrations were present in the soil samples collected at 40, 45, and 60 feet bgs. Groundwater monitoring wells were installed and groundwater monitoring performed in 2004. TPH-g was reported to be present at a maximum concentration of 7,300 micrograms per liter (µg/l), benzene was reported at 100 µg/l, toluene at 46 µg/l, ethylbenzene at 490 µg/l, and xylenes at 690 µg/l. MtBE was not detected. Groundwater was reported to flow northward (ATC, 2005). This second LUST case was closed May 23, 2012. Based on the low concentrations, and closed case status, this facility is not considered an REC.

Copyright 2021 Kleinfelder

4.2.3 Orphan List

Facilities not plotted by EDR due to poor or inadequate address information are referred to as orphan facilities. There were two orphan facilities listed in EDR's report (EDR, 2021b). Based on Kleinfelder review, the two listed facilities are not located in the Site vicinity and are unlikely to have impacted the Site.

4.3 OTHER RECORDS REVIEWED / AGENCIES CONTACTED

The following additional sources of environmental records were reviewed during this Phase I ESA for the purposes of meeting the Standard Practice. Local regulatory agencies were contacted for reasonably ascertainable and practically reviewable documentation regarding RECs present at the Site and adjoining facilities. Summaries of interviews with local regulatory agency representatives, when performed, are included in Section 7 of this report (with interview documentation included in Appendix C). Information was obtained or reviewed from the following agencies:

☒ .....Pipeline and Hazardous Materials Safety Administration (PHMSA), National Pipeline Mapping System (NPMS)
☒ .....California Department of Conservation, Geologic Energy Management Division (CalGEM)
☒ .....City of San Jose Clerk
☒ .....Bay Area Air Quality Management District (BAAQMD)
☒ .....County of Santa Clara, Consumer and Environmental Protection Agency
☒ .....State Water Resources Control Board, GeoTracker™
☒ .....Department of Toxic Substances Control (DTSC)

Information/responses from the agencies contacted and agency databases reviewed is presented below:

4.3.1 Pipeline and Hazardous Materials Safety Administration, National Pipeline Mapping System

Pipeline information is available at the PHMSA's online NPMS website (https://www.npms.phmsa.dot.gov). Based on Kleinfelder's review of the NPMS website, no mapped natural gas transmission pipelines or hazardous liquid pipelines are located on-Site. The nearest pipeline is a natural gas transmission pipeline, operated by Pacific Gas and Electric, located approximately 1,000 feet east of the Site. A copy of the NPMS map is included in Appendix C.

Copyright 2021 Kleinfelder

4.3.2 California Department of Conservation, Geologic Energy Management Division

Kleinfelder searched the State of California Department of Conservation, Geologic Energy Management Division (CalGEM) website (http://www.conservation.ca.gov/calgem), for wells at the Site or in the Site vicinity (Appendix C). No oil wells were located at the Site or in the Site vicinity.

4.3.3 City of San Jose Clerk

Kleinfelder submitted a records request to the City of San Jose on June 18, 2021 for any building permits or environmental records pertaining to the Site.

The City of San Jose Environmental Services Department indicated in an email, dated on July 1, 2021, that it had no records for the Site.

The City of San Jose also responded in an email dated June 22, 2021, that there was an open Code Enforcement Division case on the property and that available open or closed records could be downloaded at their website, http://csjpbce.sanjoseca.gov/cets/index.asp. A second email from the City of San Jose supplied a link to building records the city's website where building permits could be viewed: sjpermits.org. Some of the available records are summarized below:

5287 Prospect Road:

- Firestone plans, dated July 28, 1977, show Building Emporium and rental units in the western commercial building (5365 Prospect Road), and a Homeyardage store at 5285 Prospect Road, Payless Drugs (5281 Prospect Road), and Albertson's (5275 Prospect Road) in the eastern commercial building. A Goodyear and bank were shown south of the eastern half of the Site. Plans show a 280-gallon waste oil UST located northwest of the auto service building. Six auto hoists were shown in the service area. One alignment pit was located on the northern wall of the service area. A drywell was shown in the alignment pit. A sediment trap was shown west of the southernmost auto bay.
- Building permit for retail auto sales and services, 5287 Prospect Road, dated January 30, 1978.
- Fire Prevention Plan Correction Sheet for Firestone, dated February 16, 1978.
- Electrical permit for walls at Firestone, 5287 Prospect Road, dated April 24, 1978.
- Electrical permit for retail auto sale service, 5287 Prospect Road, dated September 19, 1978.
- Mechanical permit for Firestone, 5287 Prospect Road, dated October 27, 1978.

Copyright 2021 Kleinfelder

- Midas plans, dated February 5, 1985, to move wall and toilet.
- Building permit for Midas Muffler, retail auto sales and services, 5287 Prospect Road, dated April 8, 1985.
- Certificate of Occupancy for retail auto sale building at 5287 Prospect Road dated June 28, 1985.
- Electrical permits for Midas, 5287 Prospect Road, dated April 4, 1985, April 15, 1992.
- Building permit for renovation for Midas, 5287 Prospect Road, dated February 11, 1992.
- Midas plans for sign permits, dated September 1, 1999, show Oriental Market north of Midas and Ethan Allen Store east of Midas.
- Sign permits for Midas Muffler Shop. 5287 Prospect Road, dated October 19, 1999, March 10, 2000.
- City of San Jose, Department of Planning, Building, and Code Enforcement – Covenant of Easement for parking on a 19.97- gross acres northeast corner of Prospect Road and Lawrence Expressway, Westgate West Shopping Center, dated September 19, 2017.

5253 Prospect Road

- Fire Prevention Inspections for EPR Kids Care Dental Office, 5253 Prospect Road, dated October 2, October 8, October 23, December 16, and December 23, 2020.
- Fire Protection and Special Systems Permit Application for Kids Care San Jose, 5253 Prospect Road, dated July 14, 2020.

5281 Prospect Road

- Electrical Permit for Albertsons dated April 8, 1968.
- Multiple building plans for Smart & Final dated October 27, 2000.
- General Plan for Smart & Final dated October 18, 2000.
- Fire Department Plan check comments for Smart & Final dated September 18, 2000.
- Grading Plan dated May 23, 2005.

5365 Prospect Road

- Building permit for retail sales dated April 2, 1973.
- Electrical Permit for Home Yardage dated June 1, 1973.

Copyright 2021 Kleinfelder

- Plumbing and gas permit for Buildings Emporium dated May 17, 1973.
- Electrical permits for Builders Emporium dated May 1, 1973, July 5, 1973.
- Plumbing and Gas Permit for Consumers Dist Co. dated August 28, 1973.
- Mechanical permit for retail store Builders emporium dated August 29, 1973.
- Electrical permit for Builders Emporium parking lot lighting dated September 13, 1973.
- OSH plans dated October 3, 1986.
- Electrical permit for Orchard Supply Hardware dated October 22, September 16, 1986.
- San Jose Fire Department Plan Corrective Directive for OSH rack installation plans dated October 23, 1986.
- Mechanical permit for OSH dated September 6, 1986.
- Plumbing and gas permits for OSH dated September 16, October 10, 1986, January 10, 1989.
- Building permits for Orchard Supply Hardware dated August 29, October 17, 1986.
- Building permit for garden nursery dated September 2, 1988.
- Electrical permit for nursery area addition for Orchard Supply Hardware dated February 27, 1989.
- Sign permit and plans to replace OSH sign dated March 9, 2004.
- Electrical permit for new sign for OSH dated March 16, 2004.
- Permit to re-roof retail store dated April 1, 2004.
- Electrical permit dated March 14, 2007.
- OSH development permit/plan dated October 20, 2009.
- OSH permit adjustment for Christmas tree promotion at OSH dated October 11, 2013.
- Planning submittal set Building “H” partial building demolition dated March 2019. This submittal includes ALTA survey for the Westgate West shopping center.

5285 Prospect Road

- Soil Investigation Report for Payless Drug Store Extension, prepared by Gribaldo, Jacobbs, Jones and Associates, dated February 1968. This report indicates that the subject property

Copyright 2021 Kleinfelder

was an orchard area west of the existing Payless Drug store building. Soil was clayey silt and silty sand.

- Plans for Payless Drug Store extension dated 1968.
- Building permit for Payless Clothing and warehouse dated April 10, 1968.
- Building permit for Payless Drugs dated June 28, 1968.
- Plumbing and Gas Permit for Skaggs Drug Store dated April 19, 1968, July, 18, 1968.
- Electrical permit for Skaggs Payless Drug dated April 26, 1968.
- Plumbing and Gas Permit for Payless dated May 14, 1973.
- Building Permit for Retail Sale Yardage dated May 9, 1973.
- Electrical Permit for Payless Drugs dated August 11, 1981.
- Payless Drug Store plans dated 1984.
- Building permit for Payless Drugs trash enclosure dated December 11, 1984.
- Electrical permits for Payless Store dated February 20, 1985, November 10, 1988, October 16, 1989.
- Mechanical permits for Payless Stores dated April 4, 1985, October 5, 1988/
- Building permits for retail store remodel dated December 20, 1988/
- Payless Drug Store plans 1989/
- Plumbing and Gas permit for Payless Drug Store dated February 23, 1989, March 16, 1989, May 18, 1989, August 4, 1989/
- Building permit for restroom space “F” dated December 31, 1991. Attached inspection notices for Ethan Allen between Payless and Midas dated March 11, 1992/
- Mechanical permit for Ethan Allen dated December 19, 1991/
- Electrical permit for Ethan Allen dated December 13, 1991/
- Plumbing and gas permit for Ethan Allen dated December 4, 1991/
- Building permit for Ethan Allen dated May 8, 1992.
- Certificate of Occupancy issued to Foster Group Partnership (Ethan Allen) dated June 4, 1992.
- Air Conditioner permit for Thrifty/Payless dated May 5, 1995.

Copyright 2021 Kleinfelder

- Tenant Improvement for Payless Drugs dated May 29, 1996, July 10, 1996, September 19, 1996.
- New sign permit for Rite-Aid dated January 15, 1998.
- New sign permit for Longs Drugs dated October 21, 1999, September 21, 1999.
- Smart and Final Plans dated November 21, 2000.
- New sign permit dated November 21, 2000.
- Electrical permit for signs for CVS Pharmacy dated May 7, 2009.
- Permit for sign for the Beauty business inside CVS dated July 9, 2010 (the CVS permits appear to have been withdrawn December 23, 2013).
- Sign permit for Goodwill dated October 9, 2019.

4.3.4 Bay Area Air Quality Management District

Kleinfelder contacted the BAAQMD for available files pertaining to the Site addresses: 5253 Prospect Road, 5287 Prospect Road, 5347 Prospect Road, and 5289 Prospect Road. The AAQMD responded on June 21, 2021, that they have no records for the Site. Kleinfelder submitted a second request for addresses 5365 Prospect Road, 5281 Prospect Road, and 5285 Prospect Road. The BAAQMD responded on July 13, 2021 that they have no records for these addresses. A copy of this response is included in Appendix C.

4.3.5 County of Santa Clara, Consumer and Environmental Protection Agency

Kleinfelder submitted a written records request to the County of Santa Clara for UST, aboveground storage tank (AST), hazardous materials, and site mitigation documents pertaining to the Site on June 21, 2021. CEPA responded in an email dated June 22, 2021, with a link to the following available records.

- Midas Auto Systems Experts Hazardous Materials Compliance Division (HMCD) application, dated March 4, 2010. This application was to close the account.
- A Midas County of Santa Clara Department of Environmental Health inspection notice dated January 21, 2009, indicated waste coolant container was observed open, Safety Kleen manifests were not available for waste shipments after March 2007, and spill kit locations were not posted. The inspection also indicated that lids should be added to the two 55-gallon drums containing oil filters. The inspection also indicated that the operator stated that the

Copyright 2021 Kleinfelder

saturated solvent rags in the parts washer is recycled. The inspector indicated that saturated rags can't be recycled and must be disposed of as hazardous waste.

- An inspection from September 26, 2001 identified violations with waste labeling.
- An inspection dated December 1, 1999 identified that the waste oil tank and waste oil drain were unlabeled, the 55-gallon waste brake fluid drum was open, and there were solvent leaks under the parts washer. Additional violations included missing receipts and manifests for the waste oil filters and waste brake fluid, and missing emergency coordination information. Operator was also reported to recycle antifreeze onsite and did not have hazardous materials business plan. Debris and liquid were observed in secondary containment of recycled antifreeze.
- A hazardous waste generator permit application, dated July 15, 1997, for Midas listed 65-gallons used brake fluid was shipped off Site.
- A certificate of compliance, dated December 9, 1992, indicated that violations had been corrected.
- A letter from Midas to Santa Clara County Health Department listed that the following violations were corrected in an inspection December 9, 1992. A 55-galon waste brake fluid drum was labeled and sealed when not in use; training records were kept on site; and emergency response plan included details. Missing manifest found.
- Hazardous Materials Management Plan for Midas dated December 21, 1992.
- Hazardous Waste generator – Survey Sheet, dated December 9, 1992, for Midas indicated 75-gallson brake fluid and water and 120-gallon Safety Kleen waste solvent.
- Hazardous Waste Generator Permit Application for Midas, dated April 24, 1991. Waste generated included paint waste, asbestos on brake shoes, and waste oil.
- Inspection, dated July 5, 2011, noted that the facility failed to mark a hazardous waste tank, personnel were not adequately trained, training records were incomplete, facility increased waste oil generation and is now a large quantity generator, waste oil was observed in the secondary containment, tank was left open.
- Inspection dated February 26, 2010 indicated ownership changes occurred in January 2010 and business has not obtained a hazardous waste generator permit. Violations included improper labeling and a used oil drum was open.

Copyright 2021 Kleinfelder

- Hazardous Waste Generator Permit Application for Midas, dated April 26, 2010. Waste generated included 2400 gallons used oil/brake fluid, 250 gallons used coolant, 120 gallons used parts washer, and 55 gallon used absorbent.
- An application coding and Computer Input Document indicated that Midas was closed July 13, 2013.
- Business Owner/Operator Identification dated April 22, 2010. A hazardous material inventory included motor oil, transmission fluid, antifreeze coolant, acetylene, argon carbon dioxide, oxygen, and automotive lead acid batteries. Waste inventory included waste motor oil, drained oil filters, used coolant, spent lead acid automotive batteries.
- Official Notice of Inspection, dated July 5, 2011.
- Official Notice of Inspection m dated July 23, 2013. No violations were observed.

4.3.6 State Water Resources Control Board

Kleinfelder visited the SWRCB GeoTracker™ database for information pertaining to the Site and adjoining properties on June 25, 2021. The following case was present at the Site.

Midas Muffler was listed as having a LUST case which was closed on September 25, 1997. Based on review of a Tank Closure Report prepared by Handex Environmental, Inc (Handex), dated September 11, 1996, and a Underground Storage Tank removal Report, prepared by Handex and dated September 11, 1996, a leak was reported July 17, 1996. A steel 250-gallon or 280-gallon (the volume varied in reports) waste oil tank was removed July 1, 1996. One soil sample was collected from 21 inches into native from beneath the UST (approximately 9.5 feet). Excavated material was stockpiled and sampled. After sampling, the excavation was lined with plastic sheeting, and the stockpiled material was placed back in the excavation. Soil sample analytical results indicated that BTEX, TCLP lead, VOCs, and diesel were not detected in the soil sample from beneath the UST. TPH gasoline was present in the soil sample from beneath the UST at a concentration of 0.055 mg/kg. A concentration of oil and grease was present at 26 mg/kg. PCBs, VOCs, and TPH were not detected in the stockpile soil sample. Based on these results, the case was closed. Based on Kleinfelder's review of this listing, the potential residual concentrations remaining in soil appear to be low and the closed LUST case for the Midas UST is considered an HREC.

Two properties located south of the Site were listed in databases maintained by the SWRCB.

Copyright 2021 Kleinfelder

Dean's Goodyear, located at 5291 Prospect Road, was listed as a closed cleanup program site, with the case closed as of October 27, 2017. An oil and grease concentration of 810 ppm was present in a soil sample collected after removal of a sump in 1992. Oil and grease concentrations were also present in soil samples from the wash rack (52 ppm), and waste oil storage (41 ppm). Low boiling point hydrocarbons were not detected. Benzene, toluene, and ethylbenzene were also not detected. The maximum high boiling point hydrocarbon concentrations was detected in the sump sample at 11 ppm. Xylenes were present in one soil sample at a concentration of 0.0060 ppm. No further action was required at the time of the sump removal. In 2017, the SFBRWQCB reopened the case. After reviewing the data, a No Further Action letter was issued October 27, 2017. Based on Kleinfelder's review of the available analytical data, this facility is not an REC.

Holiday Cleaners, located at 5309 Prospect Road, has an open Cleanup Program case. This case was opened in April 2017. In 2016, Converse Consultants (Converse) performed a Limited Phase II Environmental Site Assessment at this facility (Converse, 2016b). At the time of this investigation the facility was operating as a dry cleaner using hydrocarbon-based cleaning agents. The drycleaner was reported to have been in operation since 1985 and had formerly used PCE-based cleaning agents until 2009/2010. Converse advanced four soil bores to 15 feet bgs and collected soil vapor samples from each bore from 5 and 15 feet bgs. PCE concentrations were present in 8 of the 12 soil samples with a maximum concentration of 180 micrograms per kilogram (µg/kg). No other VOC concentrations were reported. TPH diesel and oil were not detected. TPH gasoline was reported at a maximum concentration of 0.23 mg/kg. Concentrations did not exceed the SFBRWQCB Tier 1 ESLs. However, PCE in soil vapor was detected at a maximum concentration of 987,000 micrograms per cubic meter (µg/m3), which does exceed the SFBRWQCB Tier I ESL for soil vapor. Concentrations were also observed to increase with depth.

Converse performed an Indoor Air assessment as a follow up investigation to the Limited Phase II ESA (Converse, 2016c). Indoor air sampling was performed at Holiday Cleaners and six neighboring suites, and one outdoor location. VOCs were present in the air samples. VOCs that exceeded screening values in one or more indoor air samples included benzene, 1-3 butadiene, 1,2-dibromoethane, 1,4-dichlorobenzene, naphthalene, vinyl chloride, and PCE. VOC concentrations were consistent with the soil vapor samples suggesting that vapor intrusion was occurring.

Converse performed two Supplemental Phase II ESA's (Converse, 2016d, 2016e). Multiple soil vapor probes were installed between 5 and 44 feet bgs at 8 locations in the first assessment. PCE was detected in soil samples, however, none of the results exceeded the previous PCE detection

Copyright 2021 Kleinfelder

of 0.180 mg/kg. The maximum PCE concentration in soil vapor was 765,000 µg/m3. During the second supplemental assessment, Converse installed three groundwater monitoring wells to depths of 105, 110, and 120 feet bgs, Groundwater was encountered between 97 and 99 feet bgs. Groundwater was reported to flow to the northeast. VOC concentrations were not detected in groundwater samples. In addition to the groundwater wells, deep soil vapor probes were installed at 50, 65, and 85 feet bgs. Soil vapor sample results for these deeper probes indicate that PCE concentrations decrease with depth below 37 feet bgs. PCE concentrations in soil vapor were assessed to a 50-foot radius around the cleaners and up to 40 feet bgs.

In 2017, Converse installed two nested soil vapor extraction (SVE) wells and performed a SVE pilot test (Converse, 2018). Approximately 200 pounds of PCE were removed during the pilot test. Based on these results, Converse proposed SVE remediation at this facility. Upon review of Converse's SVE pilot test report and Remedial Action Plan (Converse, 2019), the Santa Clara County Department of Environmental Health (SCCDEH) approved the plan and recommended the installation of horizontal SVE wells (SCCDEH, 2019). No further reports were available on GeoTracker™ regarding operation of the SVE system.

Based on Kleinfelder's review of the available site assessment information for Holiday Cleaners, the soil vapor impact appears to be assessed, is essentially limited to be under the footprint of the former dry cleaners building and does not appear to extend beneath the Site. As PCE is no longer used by the cleaner, the impact is confined to soil and soil vapor and assessed to within 50 feet of the cleaners, Kleinfelder does not consider this facility a REC. A copy of the GeoTracker™ search results is included in Appendix C.

4.3.7 Department of Toxic Substances Control

Kleinfelder visited the DTSC's EnviroStor website (https://www.envirostor.dtsc.ca.gov/public/) for available files pertaining to the Site and adjoining properties. The Site and adjoining properties were not listed on the EnviroStor website. A copy of the EnviroStor search results is included in Appendix C.

4.4 PHYSICAL SETTING SOURCE(S)

Table 4-2 presents information concerning the physical setting of the Site. The information was primarily obtained from published maps.

Copyright 2021 Kleinfelder

TABLE 4-2
Physical Setting

DATA	GENERAL INFORMATION
USGS TOPOGRAPHIC QUADRANGLE	Based on the United States Geological Survey (USGS) San Jose East Quadrangle 7.5-Minute Series (Topographic) Map, dated 2012, the Site elevation is approximately 250 feet above mean sea level. The Site slopes gradually to the northeast.
SOIL TYPE	Based on subsurface investigations performed at a property adjoining the Site to the south, subsurface soils consist of silty sands and clayey silts to 15 to 20 feet bgs, then silty sands and gravelly sands to 44 feet bgs (Converse, 2016d).
OIL AND GAS WELLS	Information concerning oil and gas fields was obtained by Kleinfelder on July 8, 2021 from the CalGEM Well Finder online database (http://www.conservation.ca.gov/calgem). Based on Kleinfelder's review, no oil or gas wells are located within the immediate vicinity of the Site. A copy of the Well Finder search results is presented in Appendix C.

Table 4-3 presents information concerning regional geology and hydrogeology. The information was obtained from published maps and other sources.

TABLE 4-3
Regional Geology and Hydrogeology

PHYSICAL PARAMETER	INFORMATION/COMMENTS
REGIONAL PHYSIOGRAPHY AND GEOLOGY	The Site is located within the Coast Range geomorphic province, a discontinuous series of northwest-southeast-trending mountain ranges and ridges with intervening valleys and characterized by complex folding and faulting. The geology of basement rocks in the region consists of a combination of granitic rocks to the west and a mixture of highly deformed marine sedimentary, submarine volcanic and metamorphic rocks to the east that both are typically Jurassic to Cretaceous in age (205 to 65 million years old) (Jennings et al., 2010).
REGIONAL HYDROGEOLOGY	The Site is located within the Santa Clara Valley Groundwater Basin, Santa Clara Subbasin (California Water Board GAMA groundwater information system, (https://gamagroundwater.waterboards.ca.gov). The Santa Clara Subbasin is characterized by the San Andreas and Hayward/Calaveras northwest trending fault zones, which upthrust the Santa Cruz and Diablo Mountain Ranges to the west and east of the Subbasin, respectively. The Santa Clara Subbasin is a depression filled by Holocene and Pleistocene unconsolidated alluvium underlain by the Franciscan bedrock. Unconsolidated sediment ranges from 150 feet near the Coyote Narrows to 1,500 feet in the interior of the Subbasin (Kassab, B. and Cook, G., 2016).
DEPTH TO GROUNDWATER DIRECTION OF ANTICIPATED FLOW [1]	An environmental investigation performed in 2016 at an adjoining property, Holiday Cleaners, located south of the Site, encountered groundwater between 97 and 99 feet bgs and reported a flow direction towards the northeast (Converse, 2016d).

Copyright 2021 Kleinfelder

TABLE 4-3 (Continued)
Regional Geology and Hydrogeology

PHYSICAL PARAMETER	INFORMATION/COMMENTS
REGIONAL GROUNDWATER QUALITY PROBLEMS	There are no known regional groundwater contaminated plumes (EDR, 2021b) and 95-percent of the Santa Clara county wells meet drinking water standards (Cook, G, Gurdak, J, and V. Garcia, 2020).
WATER SUPPLY	The Site is connected to municipal water.
FLOOD ZONE DESIGNATION	According to The EDR Radius Map™ Report with GeoCheck®, the Site is not located within a special flood hazard area or a 0.2 percent annual chance flood hazard area (EDR, 2021b).

[1] Groundwater flow direction is based on regional information sources. Site-specific conditions may vary due to a variety of factors including geologic anomalies, utilities, nearby pumping wells (if present), and others.

4.5 USER PROVIDED INFORMATION

According to the Client, the purpose for performing this Phase I ESA is to evaluate the potential for RECs at the Site prior to acquiring the Site. Information regarding the current owners/occupants of the Site is summarized in Table 4-4.

TABLE 4-4
Owner and Occupant Information

ENTITY	NAME
OWNER	According to an EDR Environmental Lien and AUL Search report (EDR, 2021a), the owner of the Site parcels is DS Westgate West LP.
OCCUPANT(S)	The western commercial building at the Site is vacant and unoccupied. The eastern commercial building was occupied by a Smart and Final store, a Goodwill store, and Ethan Allen store.

Summaries of interviews of key individuals with knowledge of the Site (“Key Site Managers”) are provided in Section 7. The following sections present information provided to Kleinfelder by the Client.

4.6 TITLE RECORDS

Chain-of-title information was not provided by the Client. Therefore, a review of a chain-of-title report was not reviewed as part of this Phase I ESA.

4.7 ENVIRONMENTAL LIENS AND USAGE LIMITATIONS

According to information provided in EDR’s regulatory agency database search report (EDR, 2021b), there are no liens pertaining to the Site listed in the Federal superfund liens list maintained

Copyright 2021 Kleinfelder

by the US EPA, nor known recorded land-use environmental deed restrictions pertaining to the Site listed in the State Liens Database. Kleinfelder's review of the *EDR Environmental Lien and AUL Search* report (EDR, 2021a) indicated no environmental liens or activity and use limitations (AULs) are associated with the Site.

4.8 VALUE REDUCTION

As part of the Standard Practice process, information is to be gathered regarding the prospective purchase price of the Site relative to its fair market value. If there appears to be a value reduction, that reduction must be identified with respect to whether the difference may be attributed to environmental degradation of the property. However, the Site is proposed to be leased.

4.9 OTHER INFORMATION / DOCUMENTS PROVIDED

Other information and documents pertaining to the Site are summarized below.

Converse, 2016, Phase I Environmental Site Assessment, Westgate West, Prospect Road and Lawrence Expressway, 5253-5399 Prospect Road, San Jose, California, August 15.

Converse performed a Phase I assessment of the Westgate West property, which included the Site and the adjoining properties to the south. This property was developed with nine retail buildings occupied by 39 tenants. Tenants include Orchards Supply Hardware, CVS drug store, Trader Joe's, and Holiday Cleaners. The property had been developed for residential use from 1889 to 1899 and for agricultural use from 1939 through 1968. The eastern portion of the property was developed with the existing commercial building in 1968, and the western portion of the property was developed with the existing commercial building by 1973. Additional building in the southern portion of the property were developed between 1980 and 2012.

Converse reported that a former Midas Muffler operated at the Site. Converse indicated that it was unclear whether the clarifier and hydraulic lifts had been removed or abandoned in place. Soil sampling conducted in 2001 did not find any significant contamination. Converse recommended no further action at the time of this Phase I ESA.

A former Dean's Goodyear located south of the Site was also identified as having an open-inactive LUST case related to a leak from a sump. The reported oil and grease concentration in soil did not exceed screening levels. Converse recommended obtaining a closure letter for the sump.

Converse's Phase I ESA identified that the active dry cleaner, Holiday Cleaners was an REC as PCE was used between 1985 and 2009/2010.

Copyright 2021 Kleinfelder

Converse summarized a previous Phase II ESA performed by National Assessment Corporation (NAC) in 2001 (NAC, 2001). NAC identified the Holiday Cleaners, Midas Muffler oil water separator and in-ground hoists, and former Dean's Goodyear as being of concern, and recommended subsurface investigations. Three soil bores were advanced to 30 feet bgs at the dry cleaners, three soil bores were advanced to 20 feet bgs at the Midas, and two soil bores were advanced to 20 feet bgs at the former Goodyear. Soil samples collected at the dry cleaners were analyzed for VOCs; soil samples collected at the Midas and former Goodyear were analyzed for VOCs, TPH, BTEX, Methyl tertiary Butyl Ether (MtBE), cadmium, chromium, nickel, lead, and zinc. No organic concentrations were detected and metals concentrations were reported to be within background levels.

Converse summarized a NAC Phase I ESA from 2004 (NAC, 2004). This Phase I ESA noted that the Holiday Cleaners used a machine that utilized PCE. The machine had a metal drip pan underneath the unit, however, two drums containing PCE did not have secondary containment. The dry cleaner was identified as an REC. No other RECs were identified.

Converse summarized a LandAmerica Assessment Corporation (LAC) Phase I ESA from 2005 (LAC, 2005). This Phase I ESA identified that the Midas oil/water separator and floor drains are a potential conduit for contaminants. LAC recommended removal of the oil water separator. The LAC also indicated that asbestos containing material identified in a 2001 report should be maintained or replaced.

Converse summarized an Environmental Document review performed by Eckland Consultants, Inc. (Eckland) in 2006 (Eckland, 2006). Eckland summarized the documents mentioned above as well as the Midas Tank closure Report and closure permit application. In summary a 280-gallon waste oil UST was removed on July 1, 1996. Two soil samples were collected, one from 9.5 feet bgs (below the UST) and one from the excavated stockpiled material. The UST bottom sample contained an oil and grease concentration of 26 mg/kg and a xylene concentration of 0.055 mg/kg. The stockpile sample contained an oil and grease concentration of 88 mg/kg. The LUST case was closed in 1997. Eckland recommended that a formal case closure letter be obtained for the Goodyear and that a Phase II ESA be performed at the Midas Muffler and Holiday Cleaners.

Converse summarized a post abatement asbestos observations and air sampling report, prepared by Professional Services Industries (PSI), dated April 1, 2011 (PSI, 2011). This report summarized removal of ACM from the Westgate West Shopping center, address 5289 Prospect Road. No additional actions were recommended.

Copyright 2021 Kleinfelder

Kleinfelder reviewed Converse's City directory summary for information regarding additional addresses associated with the Site. Converse indicated the following in their review:

5253 Prospect Road – Occupied by FedEx Office and Kinos in 2008 and 2013.

5281 Prospect Road – Occupied by Payless Grocery in 1966; Payless Drug Store and Albertsons in 1970; Yardage fair from 1975 through 1986; Payless Drug Store and House of Fabrics in 1991; Ethan Allen Galleries, and M&S Jewelry and Watch Report in 1966; Ethan Allen and Longs Drugs in 2008; and CVS Pharmacy and Ethan Allen in 2013.

5287 Prospect Road – Occupied by Firestone in 1980 and Midas Muffler from 1985 through 2013.

5365 Prospect Road – occupied by Builders Emporium from 1975 through 1986; and Osh from 1991 through 2013.

Kleinfelder reviewed Converse's site reconnaissance and interview sections. Converse observed containers of paint, automotive oils, coolants, transmission fluid, aerosol pesticides, and cleaning agents for sale at OSH. A large 250-gallon plastic lined cardboard container for paint waste was located in the rear of the OSH space. No leaking or staining was observed. Six in-ground hydraulic hoists filled with concrete were observed in the former Midas space. A three-stage clarifier filled with concrete was also observed in the Midas area. Midas was reported to vacate the property in 2012. CVS was reported to have multiple hazardous waste storage areas in the rear of the store. No leaking or staining was observed during Converse site reconnaissance. Ethan Allen was reported to be a furniture show room and no paints, thinners or stains were stored at the property.

In summary, converse identified the dry cleaner, Holiday cCeaners, as an REC and the former Midas Muffler closed LUST case was identified as an HREC.

Converse Consultants, 2016, Supplemental Phase II Environmental Site Assessment, Westgate West, Prospect Road and Lawrence Expressway, San Jose, California, November 15.

This report summarized assessment activities performed at the Westgate Shopping Center to assess RECs identified in Converse's Phase I ESA. Assessment was performed at the Holiday Cleaners and the former Midas Muffler. At the Holiday Cleaner facility, Converse advanced 8 soil bores to 44 feet bgs and installed soil vapor probes at 4 depths (5 feet, 15 feet, 30 feet, and 44 feet bgs). Converse attempted to bore to 100 feet bgs in two locations, however, refusal was encountered at 34 and 37 feet bgs. At the Midas, converse advanced 12 bores to 20 feet bgs in the vicinity of the former hydraulic hoists. Soil samples at the dry cleaners were analyzed for

Copyright 2021 Kleinfelder

VOCs. Soil samples at the Midas were analyzed for TPH and PCBs. PCE was the only VOC detected in soil samples collected at the Holiday Cleaner property. The maximum concentration detected was 0.0794 mg/kg. A previous Limited Phase II ESA performed by Converse in August 2016 (summarized in section 4.3.6), reported a maximum PCE concentration of 0.180 mg/kg. These PCE concentrations were reported to not exceed Tier 1 ESLs. PCE concentrations were present in soil vapor samples at the Holiday Cleaners, with the maximum concentration of 765,000 µg/m3 in a 15-foot soil vapor sample. PCE concentrations decreased with distance from the cleaners and were assessed at 50 feet radius around the cleaners.

Results of the soil samples collected at the Midas indicated no PCBs were present. The maximum TPH diesel concentration was 380 mg/kg and the maximum TPH oil range concentration was 6,410 mg/kg. The TPH diesel concentration was reported to not exceed the Tier 1 ESL for diesel. The TPH oil range concentration exceeded the Tier 1 ESL for odor nuisance. Based on these results, converse concluded that there was no significant contamination at the Midas Mufflers property.

Converse Consultants, 2018, Soil Vapor Extraction Pilot Test Report, Westgate West, holiday Cleaners, 5309 Prospect Road, San Jose, California, March 28.

This report summarized a SVE pilot test performed at the Holiday Cleaners. PCE concentrations were between 260,000 and 987,000 µg/m3 in the upper 15 feet bgs beneath the dry cleaner. Concentrations decrease with depth and lateral distance from the dry cleaner and appeared to be limited to a 50-foot radius around the dry cleaner and a depth of up to 40 feet bgs. Groundwater wells had been installed and groundwater samples indicated that groundwater had not been impacted. The Holiday Cleaners had been enrolled in the voluntary cleanup program in 2017. Converse installed dual-nested SVE wells at two locations and conducted a 96 hour SVE pilot test. A radius-of-influence of 35 feet was estimated and approximately 200 pounds of PCE was calculated as having been removed during the pilot test. This report concluded that SVE remediation was a feasible for the Holiday Cleaners property.

Converse Consultants, 2019a, Hazardous Materials Soil Screening Report, Westgate West -24 Hour Fitness Pad, 5365 Prospect Road, San Jose, California 95129, May 8.

Converse prepared this letter report summarizing analytical results from soil samples collected from the proposed 24-hour fitness building pad location (eastern half of the western commercial building on the Site). Converse collected shallow soil samples in April 2019 from 2 feet bgs at four locations. Soil samples were analyzed for OCPs and metals. OCPs chlordane, DDD, DDE, DDT,

Copyright 2021 Kleinfelder

dieldrin, and endrin were present above laboratory reporting limits in one or more of the soil samples. Maximum concentrations were 4.97 µg/kg, 29.2 µg/kg, 286 µg/kg, 203 µg/kg, 2.09 µg/kg, and 17.4 µg/kg, respectively. Reported concentrations of OCPs and metals were less than their respective commercial screening levels.

Converse Consultants, 2019b, Waste Disposal Soil Profile Screening Report, Westgate West - 24 Hour Fitness Pad, 5365 Prospect Road, San Jose, California 95129, May 8.

Converse advanced three soil bores to 4 feet bgs in an area of future excavation along the northern Site boundary. Two composite soil samples were analyzed for metals, TPH, OCPs, PCBs, SVOCs, and VOCs. Metals did not exceed hazardous waste thresholds. OCP DDD was reported in one soil sample at a concentration of 4.09 µg/kg. TPH, PCBs, VOCs and SVOCS were not reported.

Kleinfelder 2017, Geotechnical Investigation Report, Proposed Orchard Downsizing and New Building Pad, Westgate West Shopping Center – Phase II, Lawrence Expressway and Prospect Road, San Jose, California, July 20.

Kleinfelder performed a geotechnical study in preparation of demolishing the eastern portion of the existing western commercial structure and constructing a new building. Two bores were advanced as part of this study. Lean sandy and gravelly clays were encountered to 15 feet bgs.

Kleinfelder 2017, Geotechnical Investigation Report, Proposed Commercial Building at Westgate West Shopping Center – Pad D, 5925 Prospect Road, San Jose, California, June 2.

Kleinfelder performed a geotechnical study at a property located south of the Site, along Prospect Road. Two bores were drilled as part of this study. Sandy lean clay and gravel were encountered to 14 feet bgs, underlain by poorly graded sands with clay and clayey sand present to approximately 30 feet bgs.

Other documents provided included the following:

- A Covenant of easement for the Westgate West Shopping Center.
- A map showing the Westgate West existing utilities.
- A traffic study prepared by Hexagon Transportation consultants, Inc, dated January 4, 2019.

Copyright 2021 Kleinfelder

5 SITE HISTORY

The history of the Site was researched to identify obvious uses. Historical land use was researched to the first developed use, or back to 1940, whichever was earlier or readily available. Table 5-1 summarizes the availability of information reviewed during this assessment.

TABLE 5-1
Historical Information Sources

SOURCE	YEARS REVIEWED	SOURCE / AVAILABILITY

PREVIOUS ASSESSMENT(S)	See Section 4.9	See Section 4.9

5.1 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps provide historical land use information for some metropolitan areas and small, established towns. Kleinfelder requested EDR to search its library of Sanborn Fire Insurance Maps for maps of the Site. EDR responded that Sanborn Fire Insurance Maps were not available for the Site (EDR, 2021c).

5.2 AERIAL PHOTOGRAPHS

A review of historical aerial photography may indicate past activities at a property that may not be documented by other means or observed during a reconnaissance visit. The effectiveness of this technique depends on the scale and quality of the photographs and the available coverage. Aerial photographs were obtained from several historical photograph collections through EDR (2021d), and span a period of 77 years. A tabulation of the aerial photographs reviewed by Kleinfelder is presented in Table 5-2. Copies of the aerial photographs provided by EDR are included in Appendix D.

Copyright 2021 Kleinfelder

TABLE 5-2
Historical Aerial Photographs Reviewed

YEAR	APPROXIMATE SCALE	SUMMARY
1939 1948 1950 1956 1963	1”=500’	**Site:** From 1938 through 1956, the Site appears to be mainly developed with orchards. Three structures, likely the farm residence and associated outbuildings, were also located in the north central portion of the Site. **Surrounding Area:** The Site vicinity was also developed with orchards. A dirt road adjoined the Site to the north. Farmhouses and farm structures were located on the property north-northwest of the Site, and north northeast of the Site. The 1950 and 1956 aerial photographs show that the property north of the northeast portion of the Site, then the property north of the central portion of the Site was cleared of orchards.
1963	1”=500’	**Site:** The Site appears generally the same. **Surrounding Area:** Orchards remain present to the south of the Site. The road north of the Site appears to have been paved and the properties further to north have been developed with residential buildings. Beyond a thin sliver of land that remained orchard to the east of the Site, the property has been developed with commercial structures. Beyond a sliver of land that remained orchard to the west of the Site, were residential homes, and then vacant land.
1968	1”=500’	**Site:** The Site western half of the Site remains developed with orchards. The farmhouse and associated buildings also appear to remain in the north central portion of the Site. The eastern half of the Site, however, appears to have been developed with a large commercial warehouse-type building and associated parking lots. **Surrounding Area:** The property to the north remains generally the same. A highway appears to be present west of the Site, with residential and commercial structures present west of the highway. of the Site. Orchards remain south of the western half of the Site. A large parking lot and a commercial building are present south of the eastern half of the Site. The property east of the Site remains developed with commercial structures, with new commercial structures and parking lots now present to the southeast of the Site.
1974	1”=500’	**Site**: The eastern half of the Site remains the same. The western half of the Site has been developed with a large commercial structure and parking lot. The area between the two buildings is graded. **Surrounding Area:** The property to the north and west of the Site remain generally the same. The property south of the Site has been developed with parking lot and a couple commercial buildings further to the south. Two graded lots adjoin the Site.

Copyright 2021 Kleinfelder

TABLE 5-2 (Continued)
Historical Aerial Photographs Reviewed

YEAR	APPROXIMATE SCALE	SUMMARY
1982 1998	1”=500’	**Site**: The Site appears to have been developed to its current configuration. The formerly graded lot between the commercial buildings has been developed with a building expansion connected to the eastern commercial warehouse-type building by 1982. An expansion was also added to the eastern portion of the western commercial building by 1998. **Surrounding Area:** The adjoining properties remain generally the same, except that the one of the former dirt lots adjoining the southwest portion of the Site has been developed with parking lot and a commercial building by 1982, and the other dirt lot south of the central portion of the Site was developed with a commercial building by 1998. Trees were also present throughout the parking lots by 1998.
2016	1”=500’	**Site**: The Site remains generally the same. **Surrounding Area:** The adjoining properties remain generally the same, except that the property south of the southwest portion of the Site appears have been redeveloped with a different commercial structure.
Note: Aerial photographs only provide information concerning indications of land use, and no conclusions regarding the release of hazardous substances or petroleum products can be drawn from the review of photographs alone.		

In summary, the Site has been developed with orchards and a farmhouse between at least 1938 and 1968. By 1968, the eastern portion of the Site was developed with the existing warehouse building. By 1974, the western portion of the Site was developed with the existing commercial structures. These structures were expanded to the existing configuration by 1998.

5.3 CITY DIRECTORIES

City directories provide information regarding property occupants by address. EDR provided *The EDR-City Directory Abstract* (EDR, 2021e), which included a review of city directories for select years available from 1922 through 2017.

The Site addresses had the following listings.

5253 Prospect Road – no listings

5287 Prospect Road – Firestone Westgate (1980- 1985), Masakos Hair Salon (1980-1991), Midas Muffler & Brake Shop (1985- 2006), The Huddle (1985- 2006), Sandy S LA Mirage for Hair (1985), JP S Hair Special Ties (1985), Galaktican I / L Galaktican Arcade (1985, 1986, 1996), Olan Mills Portrait Studio (1986 - 1991), Hair Styling by Susan (1986), Nails by Les

Copyright 2021 Kleinfelder

(1991), Westgate West Next to Payless Drags (1991), Monterey Highway near Seoter Road (1991), Milptas (1991), Marios Show Repair (1991), Japantown Foods (1991), I Na Msi by Minh (1991), F Hanarum Market (1996), Fencing Academy (2006), Bikram Yoga (2006).

5347 Prospect Road – Prock Enterprises (1980), No current listing (2000), /occupant unknown (2006)

5289 Prospect Road - Masakos Hair Salon (1980-1991), The Huddle (1985- 2006), Sandy S LA Mirage for Hair (1985), JP S Hair Special Ties (1985), Galaktican I / L Galaktican Arcade (1985-1996), Olan Mills Portrait Studio (1986 - 1991), Hair Styling by Susan (1986), Nails by Les (1991), Marios Show Repair (1991), Japantown Foods (1991), I Na Msi by Minh (1991), F Hanarum Market (1996), Fencing Academy (2006), Bikram Yoga (2006).

5365 Prospect Road – Builders Emporium (1975 - 1986), Orchard Supply Hardware (1991 – 2014).

5285 Prospect Road – no listings.

5355 Prospect Road – Westgate Villa (1980), Swafford Custom Drapery (1985-1986), Miller Custom upholstery (1985).

The following listings were identified for adjoining properties south of the Site.

5301 Prospect Road - Teachers Helper Inc (1991), Sylvan Learning Center (2000), memories Live (2004 – 2006), Scrapbook (2006), TW Holdings (2014).

5309 Prospect Road - Holiday Cleaners (1991 – 2017).

5313 Prospect Road - Dominos Pizza (1991 – 2017).

5317 Prospect Road - Royal Touch Nail Boutique (1991), Masakos Hair Nails (1994-2000), Thuy Hoang Manicurist (1994 – 2009), Clerk Barbara (1996-2009), Yamashiro Sofia (1996-1999), Stylesby sylvia (2000), Marima Beauty Care (2004), Hair by Irene (2000- 2009), Stelianas Spar & Hair Salon (2004 – 2009), Edible Arrangements (2014 – 2017).

5325 Prospect Road – Akrotec Inc (1986), La Petite Boulangerie (1991-1994), Vintage hardware store (2000- 2017), Dolce Bella Chocolate café (2014-2017).

5333 Prospect Road – Sylvan Learning Center (1996-2006), Ansa Learning Center (2017).

Copyright 2021 Kleinfelder

5339 Prospect Road – Excelsior Building Maintenance Co and Cartwright Commercial Construction (1991), Mail Boxes Etc (1994-2000), West Coast Management Inc (2004), Parsa Construction (2004), Pro Print Shop (2004), Aspen Landscape (2004), Gen2 Ventures (2004), The Surplus Connection (2004), Metascope (2004), Bell Machine Technology (2004), UPS Store (2004 -2017), Bail Bonds Brinkley (2017), Wiq Garage Doors & gates (2017).

5343 Prospect Road – Shroeders (1991-2017).

5353 Prospect Road – Prospect Auto Supply (1980-1991), Teachers Helper Inc (1991-2006).

5357 Prospect Road – Frostline Kits (1980), Winchestor Auto Stores (1994-2017), Little Gym Inc (2004-2009).

5361 Prospect Road – Consumer Distributing (1975-1985).

In summary, Holiday Cleaners was located south of the Site from 1991 to 2017. The presence of a dry cleaners with a long period of operation adjoining the Site represents an REC.

5.4 HISTORICAL TOPOGRAPHIC MAP REVIEW

Kleinfelder obtained information regarding historical topographic maps of the Site vicinity from EDR (2021f). The topographic maps reviewed for this assessment are listed in Table 5-3 and copies of the maps are included in Appendix D.

TABLE 5-3
Historical Topographic Maps Reviewed

YEAR	SCALE	SUMMARY
1889 1897 1899	1:62,500 1:62,500 1:62,500	**Site:** A structure is present in the southcentral portion of the Site. **Surrounding Area:** Three structures are present adjoining the Site to the south. No other structures are in the immediate Site vicinity. A road, extending east to west, is present further to the south.
1902 1943 1947 1948	1:125,000 1:62,500 1:50,000 1:62,500	**Site:** The Site is not shown. **Surrounding Area:** The immediate Site vicinity is not shown. Only the topographic map west of the Site is shown. The road extending east to west, south of the Site, is labeled as Prospect Road. The 1948 topographic map shows that the general Site area, at least to the west, is developed with orchards.

TABLE 5-3 (Continued)
Historical Topographic Maps Reviewed

YEAR	SCALE	SUMMARY
1953	1:24,000	**Site:** A structure is present in the north central portion of the Site. The Site is developed as an orchard. **Surrounding Area:** Adjoining properties are developed as orchards. A road adjoins the Site to the north. Two structures are present adjoining the Site to the northwest, and north of the northeast portion of the Site. Prospect Road is present further to the south. Saratoga Road is present further to the east.
1961	1:24,000	**Site:** The Site remains generally the same. **Surrounding Area:** The road north of the Site appears to be labeled as Graves Avenue. The property north of the road is shown as residential communities. The property to the west and south remains developed as orchards. A dirt road is also present extending north to south, through the property west of the Site. The property east and southeast of the Site has been developed with two commercial structures.
1968	1:24,000	**Site:** The western half of the Site remains developed as an orchard. The farmhouse remains present in the north central portion of the site. The eastern half of the Site has been developed with a large commercial structure. **Surrounding Area:** The property north of the Site remains the same. The property east of the Site has a new commercial complex adjoining the Site. The property south of the western half of the Site remains an orchard. A commercial building is south of the central portion of the Site, adjoining Prospect Avenue. A four-lane highway adjoins the Site to the west.
1973	1:24,000	**Site:** The eastern half of the Site remains as a commercial building. The western half of the Site is now shown to also be developed with a commercial building. The old farmhouse structures is also still present. **Surrounding Area:** The adjoining properties appear generally the same.
1980	1:24,000	**Site:** The eastern half of the Site remains as a commercial building. The building on the western half of the Site has been expanded. The old farmhouse is no longer present. **Surrounding Area:** The adjoining properties are generally the same except that two additional commercial structures are now shown south of the southwest corner of the Site, near the intersection of the four-lane highway and Prospect Avenue.
1995	1:24,000	**Site:** The Site is not shown. **Surrounding Area:** The adjoining properties are not shown.
2012	1:24,000	**Site:** The 2012 map depicts physical features (e.g., roads and surface water), but no structures. Thus, no structures are depicted on the Site. **Surrounding Area:** Roads in the surrounding area are shown, including Prospect Road and the highway west of the Site (unlabeled). No structures are depicted on the topographic map.

5.5 BUILDING PERMITS

EDR provided a Building Permit Report, included in Appendix D, (EDR, 2021g). The following building permits were identified for the Site addresses.

- 5253 Prospect Road – Electrical permit for Kids Care Dental Office sign, dated April 1, 2021. Building electrical plumbing mechanical permit for Dental office, dated September 24, 2020. Interior demo permit dated January 23, 2020, tenant improvement permit dated January 21, 2020, sign permits dated May 1, 2014 and October 25, 2012 for FedEx, Tenant improvement permit dated September 20, 2012, demo existing façade permit dated August 20, 2012, remove existing FedEx Kinkos Sign and install new FedEx sign dated July 28, 2009, install new sign dated April 19, 2005.

- 5287 Prospect Road – Permit to reroof dated August 3, 2018, retail extension tenant improvement permit dated March 8, 2018, reroof Westgate shopping Center dated October 23, 2015.

- 5289 Prospect Road – Permit to reroof dated August 3, 2018, reroof Westgate shopping Center dated October 23, 2015, install sign dated May 22, 2013, Tenant Improvement for Beauty salon dated February 5, 2013, Sign permit for Bikram Yoga dated November 8, 2011, tenant improvement permit for construction of yoga studio dated September 7, 2011, tenant improvement, demo walls, dated April 19, 2011, mechanical improvement for fans in utility room and laundry room dated January 2, 2003, plumbing permit for bathroom, washer, dryer dated December 9, 2002, bathroom alterations dated December 3, 2002, gas test permit dated November 15, 2002, exhaust fan installation dated September 4, 2001, remodel to create bathrooms dated July 6, 2001.

- 5347 Prospect Road – roof permit dated September 1, 2011.

- 5281 Prospect Road – Remove and replace roof dated October 16, 2014, Shelving and racking permit for Smart N Final dated July 25, 2013, parking stall restripe, canopy lighting, trash enclosure, interior demo and relocate break room, checkstands, install new refrigeration casing and floor drains, and other tenant improvements dated February 28, 2013, install Smart & Final sign dated February 20, 2013, install racks dated December 21, 2000, remodel convert Longs Drugs to Smart and Final dated October 27, 2000.

- 5285 Prospect Road – Replace roof dated September 14, 2016, create beauty space within CVS store dated March 8, 2010, tenant improvement conversion of Longs Drugs to CVS

Copyright 2021 Kleinfelder

dated September 4, 2009, CVS Pharmacy sign permit dated May 7, 2009, exit corridor remodel dated July 5, 2001, electrical permit for exit corridor dated April 17, 2001, exit corridor remodel dated April 16, 2001, exit corridor remodel dated March 28, 2001.

- 5365 Prospect Road – Install signs for OSH dated April 2, 2012, Electrical permit for signs for exhibits, displays, miscellaneous electrical for paint department, and receptacles for garden department dated March 14, 2007, roof permit dated April 1, 2004, sign permit dated March 16, 2004.

5.6 PREVIOUS ASSESSMENTS

Previous assessments documents are summarized in Section 4.9.

Copyright 2021 Kleinfelder

6 SITE RECONNAISSANCE

Kleinfelder's Phase I ESA activities included a Site reconnaissance. This section summarizes the findings from the Site reconnaissance.

6.1 METHODOLOGY AND LIMITING CONDITIONS

Mr. Sathya Prabu and Mr. Bob Howarth of Kleinfelder performed a Site reconnaissance on June 25, 2021. The Site reconnaissance included a visual inspection of the Site to assist in identifying the presence or likely presence of hazardous substances or petroleum hydrocarbons under conditions that indicate an existing release, a past release, or threat of release into structures, soil, groundwater, or surface water at the Site (i.e., RECs). Observations of readily-apparent environmental conditions are summarized in Table 6-1, and color photographs of the Site are presented on Figures 3 through 6. The approximate Site boundaries are shown on Figure 2.

6.2 GENERAL SITE SETTING

The Site is located northeast of the intersection of Prospect Road and Lawrence Expressway, at the Westgate West Shopping Center, in the City of San Jose, Santa Clara County, California (Figure 1).

6.3 SITE OBSERVATIONS

Kleinfelder's Site observations are summarized in Table 6-1.

TABLE 6-1
Site Observations

GENERAL OBSERVATIONS	REMARKS	OBSERVED	NOT OBSERVED
Current use	The Site is developed with two commercial buildings separated by a driveway. A vacant warehouse-type building was present in the western half of the Site. A second commercial building with retail stores was present on the eastern half of the Site. Retail stores consisted of a former Midas Auto care center (inactive), Smart and Final (active), a Goodwill Store (active), and Ethan Allen furniture store (active). Driveways and associated parking lots surrounded the commercial structures.	X

TABLE 6-1 (Continued)
Site Observations

GENERAL OBSERVATIONS	REMARKS	OBSERVED	NOT OBSERVED
Current use likely to indicate RECs	None.		X
Past use	A former Orchard Supply Hardware store on the western side of the Site maintained a chemical storage area in the northwest portion of the building. A former Midas Auto Care center was located in the southwest portion of the eastern commercial building. Prior to development with the commercial buildings, the Site had been developed with orchards and farm structures.		X
Past use likely to indicate RECs	The former Midas maintained a UST and underground hydraulic lifts, which have been removed. A LUST case had been opened for the UST but was subsequently closed. Residual pesticides and metal concentrations may be present in soils from the former use of the Site as an orchard. However, as the Site has been developed, it is likely that any residual pesticides or metals in shallow soils has been disturbed and graded.		X
Structures	Two commercial buildings.	X	
Roads	Driveways and parking lots are present surrounding the commercial buildings.	X	
Topography of Site and surrounding area	Topography of the Site and surrounding area is generally flat.	X	
Interior and exterior observations or environmental conditions that may involve the use, storage, disposal or generation of hazardous substances or petroleum products.		**Observed**	**Not Observed**
ASTs			X
Below grade vaults			X

Sumps and clarifiers	An abandoned three-stage clarifier was present adjoining the former Midas.	X	
Surface water			X
UST(s) (including heating oil tanks)	A former Midas Auto Care center had an UST storing motor oil which was removed in 1997.		X
Unidentified substance containers			X
Waste water discharge			X
Water supplies (potable and process)	Water lines were observed across the northern, southern, and eastern portion of the property's parking lot.	X	
Wells (irrigation, monitoring, or domestic)			X
Wells (dry)			X
Wells (oil and gas)			X

6.4 RESULTS OF SITE RECONNAISSANCE

The Site is currently developed for commercial use. The areas surrounding the Site are developed as residential properties (to the north and west) and commercial buildings (to the east and south). Waterline manholes, Sewer manholes, storm drain manholes, a transformer and below ground electrical vaults, asphalt parking lot, were observed. Unique concrete patches on the sidewalk besides the former Midas Auto Center indicate the location of a removed underground storage tank and a three-stage clarifier. Unique concrete patches were observed over the floor of the primary work area inside the former Midas Auto Center unit which indicate the locations of the removed hydraulic lifts. Staining was observed over the concrete floor at the southernmost side of the former Midas storage room. Evidence of discolored water, stressed vegetation, wells, or lagoons was not observed on the Site during the reconnaissance.

Copyright 2021 Kleinfelder

7 INTERVIEWS

Key Site Managers are contacted to obtain current and historical environmental information concerning the Site. The following sections highlight information revealed during the interviews.

7.1 INTERVIEW WITH CLIENT/OTHERS

Kleinfelder submitted an interview questionnaire to Ms. Kim Katz of Costco on June 11, 2021. Ms. Katz responded on July 14, 2021 that she has no additional knowledge of the Site.

7.2 INTERVIEW WITH OWNER/MANAGER

On June 8, 2021, Kleinfelder participated in a teleconference with Mr. Henry Avila of Donahue Schriber Realty Group (owner representative) and the owner representative's environmental consultant, Mr. Michael Van Fleet of Converse Consultants. Mr. Avila indicated the following:

- There are no environmental issues present on the Site.
- Holiday Cleaners, located within Westgate West Shopping Center but south of the Site, has an agency-approved remediation plan. Furthermore, the release at Holiday Cleaners has not resulted in impacts to the Site.
- There are closed regulatory cases associated with a Midas facility and a Goodyear facility within the Westgate West Shopping Center.

During the teleconference, Mr. Van Fleet indicated Converse has previously performed soil sampling to assess the Site's former agricultural use, and indicated pesticides were a non-issue. Mr. Van Fleet subsequently provided environmental reports to Kleinfelder, summaries of which are provided in Section 4.9.

7.3 INTERVIEW WITH OCCUPANT(S)

The Site is developed as a commercial property in which most units are vacant. An interview with the onsite security in charge and the janitor on June 25, 2021 revealed that all units on the western building and the western most units on the eastern building have been vacant for nearly two years.

7.4 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

Kleinfelder spoke with Ms. Jessica Lowry (City of San Jose) on June 21, 2021, regarding environmental and building records such as permits or violations for the Site. In addition,

Copyright 2021 Kleinfelder

Kleinfelder requested UST, hazardous material, and/or any clean up records for the Site. After describing the Site to Ms. Lowry, she indicated that the Environmental Services Department would respond with available records in email. Agency responses are summarized in Section 4.3.

Copyright 2021 Kleinfelder

8 EVALUATION

Kleinfelder performed this Phase I ESA of the Site in conformance with the scope and limitations of the Standard Practice, and in accordance with Costco Wholesale Development Requirements, Version 2018, Revised October 26, 2018. The following sections describe Kleinfelder's findings and provide general background information about the Site. Findings address RECs, HRECs, CRECs, and notation of *de minimis* quantities, as applicable to the Site. In summary, Kleinfelder's assessment revealed the following information concerning the Site:

8.1 BACKGROUND

The following is a summary of the Site background information:

- The Site is located within the City of San Jose, northeast of the intersection of Lawrence Expressway and Prospect Drive, south of Graves Avenue. The Site is situated on approximately 9.5 acres of land consisting of portions of the following parcels:

  - Assessor's Parcel Number (APN) 381-36-028, address 5289 Prospect Road;
  - APN 381-36-029, address 5347 Prospect Road;
  - APN 381-36-014, address 5353 Prospect Road; and
  - APN 381-36-021, address 5287 Prospect Road.

  Other addresses associated with the Site are 5365 Prospect Road, 5281 Prospect Road, and 5285 Prospect Road. The Site is part of the Westgate West Shopping Center and is currently developed with two commercial buildings and associated parking lots. The western commercial building is currently vacant, and the eastern commercial building is currently occupied by a Goodwill, Ethan Allen store, and Smart and Final store.

- Historically the Site was developed with orchards and farm structures (located in the north central portion of the Site) from at least 1939 through 1968. By 1968, the eastern portion of the Site was developed with the existing warehouse building. By 1974, the western portion of the Site was developed with the existing commercial structure. These structures were expanded to the existing configuration by 1998. Occupants of the Site have included Builders Emporium (circa 1973-1986) and Orchard Supply Hardware (OSH) (circa 1991-2014) in the western commercial building; Firestone (circa 1977-1985) and Midas Muffler (circa 1985-2012) in the southwest portion of the eastern commercial building; Payless Drugs (1966-1991), Longs Drugs (circa 1992-2009), Albertsons (circa 1968), CVS (circa

Copyright 2021 Kleinfelder

2009-2011), Ethan Allen (circa 1991-present), and Smart and Final (circa 2000 - present) in the eastern portion of the eastern commercial building.

8.2 FINDINGS AND OPINIONS

The following is a summary of findings and opinions for the Site:

- Midas Muffler, located on Site, was listed as having a LUST case which was closed on September 25, 1997 by the (SCVWD, 1996). A leak was discovered during removal of a steel 250-gallon or 280-gallon (the volume varied in reports) waste oil tank on July 1, 1996. One soil sample was collected from approximately 9.5 feet bgs (beneath the former UST). Excavated material was stockpiled and sampled. After sampling, the excavation was lined with plastic sheeting, and the stockpiled material was placed back in the excavation. Soil sample analytical results indicated that BTEX, leachable lead, VOCs, and TPH diesel were not detected in the soil sample from beneath the UST above their respective laboratory reporting limits. TPH gasoline was present in the soil sample from beneath the UST at a concentration of 0.055 mg/kg. A concentration of oil and grease was present at 26 mg/kg. PCBs, VOCs, and TPH were not detected in the stockpile soil sample above their respective laboratory reporting limits. Based on these results, the case was closed by the SCVWD (1996). Based on Kleinfelder's review of this listing, the potential residual concentrations remaining in soil appear to be low and the closed LUST case for the Midas UST is considered an HREC.

- Kleinfelder reviewed previous environmental investigations for the Site including a 2019 shallow soil investigation performed by Converse Consultants (Converse, 2019a and 2019b) for a proposed 24-Hour Fitness in the eastern half of the western commercial building on Site. In 2019, Converse collected shallow soil samples from 2 feet bgs. Soil samples were analyzed for OCPs and metals. The OCPs chlordane, DDD, DDE, DDT, dieldrin, and endrin and were present above their laboratory reporting limits in one or more of the soil samples. Maximum concentrations reported were 4.97 µg/kg for chlordane, 29.2 µg/kg for DDD, 286 µg/kg for DDE, 203 µg/kg for DDT, 2.09 µg/kg for dieldrin, and 17.4 µg/kg for endrin. The reported concentrations of these six compounds do not exceed the current 2019 SFBRWQCB commercial, construction worker and/or gross contamination ESLs for soil (2,200 µg/kg, 14,000 µg/kg, and 23,000 µg/kg for chlordane; 12,000 µg/kg, 81,000 µg/kg, and 65,000 µg/kg for DDD, 8,300 µg/kg, 57,000 µg/kg, and 29,000 µg/kg for DDE, 8,500 µg/kg, 57,000 µg/kg, and 5,600 µg/kg for DDT, 160 µg/kg, 1,100 µg/kg, and 24,000 µg/kg for dieldrin, and 290,000 µg/kg, 74,000 µg/kg, and

Copyright 2021 Kleinfelder

30,000 µg/kg for endrin, respectively). Converse also collected composite soil samples from a proposed excavation area along the northern Site boundary. These soil samples were analyzed for metals, TPH, OCPs, PCBs, SVOCs, and VOCs. Metals did not exceed their hazardous waste thresholds of TTLC, TCLP, nor STLC criteria. DDD was reported in one composite soil sample at a concentration of 4.09 µg/kg (Converse, 2019b). TPH, PCBs, VOCs, and SVOCS were not detected above their respective laboratory reporting limits. As detected concentrations did not exceed commercial screening levels, and groundwater is present between 97 and 99 feet bgs and is unlikely to have been impacted by OCPs and metals, Kleinfelder does not consider these residual OCP and metals concentrations a REC. Note the sampling performed by Langan was not Site-wide. To further evaluate Costco's risk, it would be necessary to perform sampling and analysis of the surficial soils across the Site.

- Converse also prepared a Phase I ESA and Limited Phase II ESA in 2016 for the Westgate West Shopping Center (which includes the Site but also some surrounding areas to the south). In their Phase I ESA, Converse identified the former Midas as an environmental concern because it wasn't clear whether the hydraulic hoists or oil water separator had been removed or just abandoned in place. Converse also identified a former Goodyear (located south of the Site) that had a historical LUST case as an environmental concern. Converse recommended that an actual closure letter be received for the Goodyear property. Converse identified Holiday Cleaners, a dry cleaner that operated in the Westgate shopping center (south of the Site) as an REC. Converse performed a Limited Phase II ESA to assess the identified RECs. The Holiday Cleaner findings and subsequent investigations are discussed in the following bullet. Converse advanced 12 soil bores to 20 feet bgs in the vicinity of the Midas hydraulic hoists. Results of the soil samples collected at the Midas indicated no PCBs were present. The maximum TPH diesel concentration was 380 mg/kg and the maximum TPH oil range concentration was 6,410 mg/kg. The detected TPH concentrations were present in the 10 foot bgs soil samples, and were vertically assessed in each bores. The TPH diesel concentration was reported to not exceed the commercial ESL for diesel (1,200 mg/kg), the construction worker ESL for diesel (1,100 mg/kg) nor the gross contamination ESL for diesel (1,000 mg/kg) The TPH oil range concentration did not exceed the commercial ESL for motor oil (180,000 mg/kg) or the construction worker ESL for motor oil (54,000 mg/kg) and was slightly above the gross contamination ESL for motor oil (5,100 mg/kg). Converse concluded that there was no significant contamination at the Midas Mufflers property. However, based on Kleinfelder's review, a parts cleaner was used at the Midas. One of

Copyright 2021 Kleinfelder

the inspection reports indicated that solvent leakage was observed under the parts cleaner, as Converse did not analyze soil samples for VOCs or collect soil vapor samples in the former Midas, Kleinfelder considers the use of solvents at the Midas and the potential for spills to have impacted the Site's subsurface a REC.

- Holiday Cleaners, located at 5309 Prospect Road, adjoining the Site to the south, has an open Cleanup Program case. This case was opened in April 2017. Holiday Cleaners has operated as a drycleaner from 1985 and had been reported to have used PCE-based cleaning agents until 2009/2010. After 2010, the drycleaner switched to a hydrocarbon-based cleaning machine. Based on Kleinfelder's review of previous environmental investigations prepared by Converse for this facility, PCE concentrations were present in soil samples with a maximum concentration of 180 µg/kg. Other VOCs, TPH diesel or oil concentrations were not detected in soil. TPH gasoline was reported at a maximum concentration of 0.23 mg/kg. These concentrations did not exceed the SFBRWQCB commercial ESLs. However, PCE in soil vapor was detected at a maximum concentration of 987,000 µg/m^3, which does exceed the SFBRWQCB commercial ESL for soil vapor. Subsequent indoor air sampling indicated that VOCs detected in soil vapor were also present in indoor air. Based on these results, Converse concluded that there is a vapor intrusion hazard. Supplemental investigations assessed the VOC impact in soil vapor to a radius of 50 feet laterally around the drycleaner, and up to 40 feet bgs. Groundwater wells were installed to depths between 105 and 120 feet bgs and groundwater was encountered between 97 and 99 feet bgs, with a flow to the northeast. VOCs were not present in groundwater. After assessing the extent of impact, Converse performed a SVE pilot test in 2017 and identified SVE as a suitable remediation method for the Site. It appears that SVE remediation was approved, though not yet implemented. Based on the review of the soil vapor data, it appears to be limited to be essentially only under the footprint of the building of the former dry cleaning facility. As the soil vapor plume is assessed and does not appear to extend beneath the Site, has not impacted groundwater, and PCE is no longer used at the drycleaner, in Kleinfelder's opinion this is not an REC. However, as this facility remains an open cleanup case under remediation, Kleinfelder recommends periodic review to assess future risk to Costco given the proximity to the Site.

- Based on review of the EDR database report, no off-Site facilities were identified as RECs to the Site.

Copyright 2021 Kleinfelder

- Although not considered a REC, residual pesticide and TPH concentrations (at the former Midas) have been documented to be present in soil samples collected at the Site. Concentrations are less than regulatory action levels, and the potential for further action to be required to address these concentrations is low. However, the presence of these low concentrations may impact future construction activities and disposal of excavated soil.

8.3 DEVIATIONS AND ADDITIONAL SERVICES

The scope of this Phase I ESA does not incorporate Standard Practice non-scope considerations, such as ACM, radon, LBP, lead in drinking water, industrial hygiene, health and safety, ecological resources, indoor air quality/vapor intrusion, and high-voltage power lines. No additional services were provided by Kleinfelder for this Phase I ESA.

8.4 CONCLUSIONS

Kleinfelder has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-13 of the property located northeast of the intersection of Lawrence Expressway and Prospect Road, at the Westgate West Shopping Center in the City of San Jose, Santa Clara County, California. Any exceptions to, or deletions from, this practice are described in Section 8.3 of this report. This assessment has revealed no evidence of RECs or CRECs in connection with the Site, with the exception of the following:

- The potential for vapor impacts resulting from solvent use at the former Midas facility is considered a REC.

8.5 RECOMMENDATIONS

Kleinfelder recommends a Limited Phase II ESA be performed at the former Midas facility to assess the presence of volatile organic vapors in the subsurface.

Kleinfelder recommends preparation of a SMP prior to construction activities due to the documented presence of residual pesticide and TPH concentrations (at the former Midas) in soil samples collected at the Site.

8.6 DATA GAPS

Data gaps (data failures), which may affect the identification of hazardous substances or petroleum products for the evaluation of RECs at the Site, include the following:

Copyright 2021 Kleinfelder

- CEPA response to the records request for Site addresses 5365 Prospect Road, 5281 Prospect Road, and 5285 Prospect Road.

Based on the available historical information for the Site, this is not considered significant data gaps.

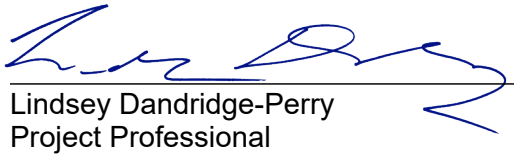
STATEMENT OF QUALIFICATIONS

Copyright 2021 Kleinfelder

STATEMENT OF QUALIFICATIONS

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in CFR Part 312.



Lindsey Dandridge-Perry
Project Professional

Robert Howarth, PG #5925
Principal Geologist

The resumes of above-listed environmental professionals performing this Phase I ESA are on file at the Kleinfelder office and are available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 6 SWEEPS UST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 26 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/03/2021 has revealed that there are 55 FINDS sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 85 CUPA Listings sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical

Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 8 EDR Hist Cleaner sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: SALLY BEAUTY SUPPLY #842
Address: 5279 PROSPECT RD
City,State,Zip: SAN JOSE, CA 95129
Site ID: 367529
CERS ID: 10665547
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 367529
Site Name: SALLY BEAUTY SUPPLY #842
Violation Date: 02-26-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes: Returned to compliance on 03/13/2018. The un-labeled hazardous waste container and the corrosive bases hazardous waste container do not fully close, because their latches are broken/unable to seal. Ensure that hazardous waste containers are able to close when waste is not being added or removed.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 367529
Site Name: SALLY BEAUTY SUPPLY #842
Violation Date: 02-26-2018
Citation: 40 CFR 1 265.177 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.177
Violation Description: Failure to separate incompatible wastes from the same container, nearby containers, or unwashed containers which previously contained incompatible waste or materials.
Violation Notes: Returned to compliance on 03/13/2018. 1) A glittery nail polish labeled as "flammable" is commingled in the oxidizer container with high concentration and low concentration cream developers that have hydrogen peroxide as the primary ingredient (SDS identified as strong oxidizers). 2) 20 volume cream developer (labeled as a strong oxidizer) was observed in the aerosol/flammable/combustible container and commingled with flammable nail polishes, flammable hair sprays, and acetone-containing items. Ensure that oxidizers (e.g. hydrogen peroxide cream developers) and flammable wastes (e.g. nail polishes, hair sprays) are separated as described below.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 367529
Site Name: SALLY BEAUTY SUPPLY #842
Violation Date: 02-26-2018

SALLY BEAUTY SUPPLIES (Continued) **S119002662**

Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 03/13/2018. With exception of the most recent hazardous waste pick-up (manfiest #01736738JJK), no Uniform Hazardous Waste Manifests from the past 3 years have been retained. It is of note that the missing manifests are from pick-ups occurring prior to this store manager.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	367529
Site Name:	SALLY BEAUTY SUPPLY #842
Violation Date:	02-26-2018
Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes:	Returned to compliance on 03/13/2018. Facility failed to demonstrate that a material is not a waste. -- Items are "damaged out" of inventory by scanning the items' barcodes. The scanner prompts the employee to either manage the item as hazardous waste or send the item back to Sally Reno Distribution Center in Reno, NV. Employees stated that the scanner does not prompt the employee to describe the condition of the item (e.g. spilling, leaking, damaged, usable, etc) when the determination as to whether the item should be sent to the distribution center is made. Employees stated that they do not know how the scanner decides what items are to be managed as hazardous waste vs. shipped to Reno's distribution center. The items are shipped to the reverse distribution items in a cardboard box when the box becomes full (i.e. on an as-needed basis). Observed one hand basket accumulating items that have been damaged out of the system, placed in plastic bags, and are waiting to be shipped Sally Reno Distribution [Truncated]
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	367529
Site Name:	SALLY BEAUTY SUPPLY #842
Violation Date:	02-26-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 03/13/2018. 1) The partially labeled hazardous waste containers (corrosive acid, corrosive base, oxidizer, aerosol/flammable/combustible) are not labeled with the generator name (e.g. Sally Beauty #842). They are only labeled as "842." 2) Observed

SALLY BEAUTY SUPPLIES (Continued) **S119002662**

one un-labeled hazardous waste container accumulating non-RCRA "state toxics" and ignitable hazardous wastes. Per the store manager, the tote is not usually used to accumulate hazardous waste, but the standard containers are too full and the un-labeled container is being used until a hazardous waste pick-up occurs. 3) The hazardous properties are incorrectly identified on all partially labeled hazardous waste containers identified below, because each container is marked with a hazardous waste label, as well as a permanently affixed hazardous property label that does not match the actual hazardous property of the wastes. Actual Hazardous Property & Hazardous Waste Label Information (Additional, Incorrect Hazardous Properties [Truncated]

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-26-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site for a routine hazardous waste inspection. The facility is a retail beauty supply store that generates hazardous wastes from items breaking in store and during transport, unsaleable returns, and off-specification or otherwise unsaleable items removed from inventory. Spills are collected with absorbent pads, placed into a sealed plastic bag along with the contaminated container, and immediately managed as hazardous waste. Non-spilled waste items are immediately removed from inventory, placed into sealed plastic bags, and stored in the hazardous waste containers. All employees are trained on proper hazardous waste management, but the manager inspects all waste items to ensure proper waste identification and management. The following hazardous waste tote containers were observed during inspection: - one "corrosive acids" tote: containing curling creams and other acidic hair care items - one "aerosols, flammables, and combustibles" tote: containing flammable nail [Truncated]

SMART & FINAL #433 (Continued) **S114555330**

Mailing Address: PO BOX 512377

Year: 2019
Gepaid: CAL000378264
TSD EPA ID: CAD008364432
CA Waste Code: 122 - Alkaline solution without metals pH >= 12.5
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.02250

Year: 2019
Gepaid: CAL000378264
TSD EPA ID: IDD073114654
CA Waste Code: 122 - Alkaline solution without metals pH >= 12.5
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 0.00800

Year: 2019
Gepaid: CAL000378264
TSD EPA ID: IDD073114654
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H132 - Landfill Or Surface Impoundment That Will Be Closed As Landfill(To Include On-Site Treatment And/Or Stabilization)
Tons: 0.00200

Year: 2019
Gepaid: CAL000378264
TSD EPA ID: NVD980895338
CA Waste Code: 214 - Unspecified solvent mixture
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.00500

Year: 2018
Gepaid: CAL000378264
TSD EPA ID: NVD980895338
CA Waste Code: 352 - Other organic solids
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.00050

Year: 2018
Gepaid: CAL000378264
TSD EPA ID: CAD008364432
CA Waste Code: 122 - Alkaline solution without metals pH >= 12.5
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.03600

Year: 2018
Gepaid: CAL000378264
TSD EPA ID: AZR000515924
CA Waste Code: 331 - Off-specification, aged or surplus organics
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.01650

SMART & FINAL #433 (Continued) **S114555330**

Year:	2018

Eval Notes: A physical walk-through and paperwork review was conducted on this date. Facility has one reportable chemical; DF-2000 5 x 5 gallon containers plus 3 X 40 gallon tanks.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 09-11-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to conduct a permit investigation for the Hazardous Waste Generator (HWG) program. This permit investigation was requested from Mr. John Miller (the previous owner) to close out current permits and notify Santa Clara County Department Environmental Health (DEH) about change in ownership. Facility has one dry cleaning unit on-site utilizing DF 2000 solvent. The following was observed above the HMBP reporting thresholds during the walk-through: -1 X 160 Gallons (gals) unit of DF 2000 hydrocarbon solvent Note: Mrs. Kothuri has stated that facility's change of ownership occurred approximately three months from today(9/11/2019). Facility legal owner name is CHOKSH LLC. observed a 30 gallon drum that is used to store spent hydrocarbon waste. Per owner, facility has not generated waste in the last three months. Based on observations, facility will be permitted for hazardous materials business plan program (BP01 1-3 Reportable Chemicals) and hazardous waste [Truncated]

Name: YONG XU DDS
Address: 5150 GRAVES AV 12F
City,State,Zip: SAN JOSE, CA 95129
Site ID: 86902
CERS ID: 10353604
CERS Description: Hazardous Waste Generator

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-15-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Facility generates fixer and developer waste from x-rays. Fixer is picked up annually by Barnette for silver recycling. Amalgam waste is mailed back to Solmatex. Facility uses lidocaine carpules completely. Facility does not generate any wastes associated with tooth whitening, tartar and stain removal, cold sterilization, tray cleaning (disposable only), or pharmaceuticals. Birex spray is used to clean counters and instruments are cleaned with steam autoclave. Ultrasonic bath had a pH of 10 and generator manages it as non-hazardous. Facility has adequate emergency postings, fire extinguishers, and hazardous waste training. Unresolved issues: 1.) Provide receipts to show that lead bite wings are properly recycled. 2.) Provide a Safety Data Sheet, or more information about the developer used (manufacturer, product name, etc).

Site Name: QUALITY DENTAL
Violation Date: 12-13-2016
Citation: HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description: Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes: Returned to compliance on 01/26/2017. Facility uses undiluted Heraens Dri-Clave VK4 tartar and stain remover, containing sulfamic acid, and disposes of material to the drain. SDS indicated material has a pH between 0.3-and 0.7. Begin collecting this hazardous waste in a closed, labeled container and retain receipts for all disposal.
Facility was given a label for the material at the time of inspection.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Other/Unknown
Eval Date: 07-23-2013

QUALITY DENTAL (Continued) **S121788752**

Violations Found:	No
Eval Type:	Other, not routine, done by local agency
Eval Notes:	Facility relocated from unit 11A to unit 11D. ACCID was completed to change billing address.
Eval Division:	Santa Clara County Environmental Health
Eval Program:	HW
Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	12-13-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility uses glutaraldehyde and neutralizes batches with glycine before disposing to the sanitary sewer system. Other instruments are sterilized with steam autoclave. The ultrasonic bath uses non-hazardous enzymatic tablets and, though facility mostly uses disposable impression trays, they retain some non-hazardous tray cleaner on-site for occasional use. Amalgam is mailed back to solmetex and facility retains receipts. Facility uses only digital x-ray. Surfaces are disinfected with non-saturated wipes. Lidocaine is disposed of in accordance with medical waste regulations and facility does not dispense pharmaceuticals of do any tooth whitening on-site. First aid kits are mailed back to HealthFirst before expiration. Fire extinguishers are annually serviced and employees are trained. The following violations were corrected at the time of inspection: G211 Emergency Information Posted: Facility posting did not include emergency contact numbers. Posting was corrected at [Truncated]

Region:	STATE
Facility Status:	**Completed - Case Closed**
Status Date:	10/27/2017
Global Id:	T0608591683
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.2926333044897
Longitude:	-121.995333447566
Case Type:	Cleanup Program Site
Case Worker:	UUU
Local Agency:	Not reported
RB Case Number:	43S0765
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Other Chlorinated Hydrocarbons, Benzene, Diesel, Ethylbenzene, Gasoline, Toluene, Xylene
Site History:	The Regional Water Board proposed site closure with a Notice of Intent (NOI) letter. The proposed closure is based on a City of SJ Inspection Report that noted no discoloration under one of the potential source areas. From the sump and other suspected/potential sources areas, soil analytical showed non-detectable soil-CVOC, non-detectable to trace soil-BTEX, and soil-O&G less than 5,100 mg/kg. The Regional Water Board approved no further action on October 27, 2017.

Address: 5205 PROSPECT RD
City,State,Zip: SAN JOSE, CA 95129
Site ID: 416629
CERS ID: 10405204
CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-05-2017
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 5/4/17 with a facility walk-through and concluded today. Facility is a grocery store that periodically generates hazardous waste in the form of returned, damaged, expired, or other non-saleable merchandise. Waste merchandise is stored in small plastic tote bins on a shelf located in the rear warehouse. Tote bins are designated according to their respective hazard category. At time of inspection the following waste was observed: -"Aerosols, Flammables, Combustibles": 1 x plastic tote bin According to the store manager, Mr. Victor Guiterrez, this hazardous waste management program has been in-place approximately 2 months. RTV is no longer utilized for waste merchandise that meets hazardous waste criteria. A donation program does exist however pursuant to Sprouts internal policy no returned items or damaged containers may be donated. The following violation was corrected at time of inspection: -G020, the accumulation start date and waste [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: 22 CCR 15 66265.194 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.194
Violation Description: Failure to maintain the following general tank operating requirements: a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank, its ancillary equipment, or the secondary containment system to rupture, leak, corrode, or otherwise fail. b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or secondary containment systems. These include at a minimum: 1) Spill prevention controls (e.g., check valves, dry discount couplings); 2) Overfill prevention controls (e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank); and 3) Maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation. Uncovered tanks shall be operated to ensure at least 60 centimeters (2 feet) of freeboard, unless the tank is equipped with a containment structure (e.g., dike or trench), a drainage control system or a diversion structure (e.g., standby tank) with a capacity that equals or exceeds the volume of the top 60 centimeters (2 feet) of the tank.
Violation Notes: THE USED OIL TANK WAS DISCOVERED TO HAVE USED OIL IN THE SECONDARY CONTAINMENT TANK AND ON THE FLOOR BELOW AND AROUND THE TANK. IMMEDIATELY REMOVE ALL SPILLED OIL FROM THE SECONDARY CONTAINMENT AND THE FLOOR AND MANAGE PROPERLY.

Site Name: O'REILLY AUTO PARTS #3469
Violation Date: 07-16-2013
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Operations/Maintenance - General
Violation Notes: Noted absorbent on floor of stock area and tank top and behind tank. Need to sweep up this material as soon as it has been used.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-16-2013
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility now accepts oil and filters from public. -oil to 185 gallon rolling tank -filters to 55 gallon drum 55 gallon drum used absorbent/oil contaminated materials. Bucket program for breakage and returns -Noted that logs available for review did not include most of buckets/materials noted onsite (3 items on log, none note which bucket, two RED buckets full with no log sheets available and GREEN bucket with 6 aerosols but none on log) --GREEN: 6 aerosol cans, no incompatible materials --RED(1): full, all compatible --RED(2): full, all compatible Noted bags of filters tat were being held in order to remove excess oil from bottom of filter drum from placing in drum undrained filters. Noted manifest of 1000 lb of waste (Flam liquids, 4x55 drums) in May 2013. Per Ms. Delgado, drums generated from "hot load" of oil which had to be transferred to drums and rinsate from cleaning tank prior to next use. Reviewed manifests and receipts of pick up of waste for past 2 [Truncated]

Eval Source:	CERS
Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-19-2017
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	Facility is a retail establishment that also accepts used oil adn filters from public as a Used Oil Collection Center. Both activities utilize EPA ID CAL000393238 RETAIL: Store generates waste from spill clean up, return of merchandise, universal waste, abandoned waste Waste collected in buckets, segregated generally by DOT haz class. Currently have waste in GREEN (1 &2) and RED (1&2) buckets. Observed 5x1 gal containers of unknown/ potentially contaminated oils on shelving and floor near oil tank. Also 1 gal container in bag within saturated box directly in front of roll up door. Manager not aware of location of 4 gallons. UW batteries were noted as being stored on shelving in ziploc bags and misc boxes. Recommend placing in single rigid sided container like a bucket. Reviewed 2017 manifest and training records on Team Net ER and map posted. DIY: DIY activities are SQG, noting shipment approximately 200 gal/month. Accept used oil and filters from [Truncated]

WESTGATE CLASSIC CAR WASH (Continued) **S111711409**

Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Benzene, Gasoline
Site History: 2001 - requested information on the presence of fuel oxygenates at the previously closed fuel leak case and open gas station. Monitoring wells were installed in 2004. Impact primarily found in well MW1 located adjacent to the USTs.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

RB Case Number:	14-703
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1W29K03f
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	Previous site assessment activities have been performed by Gettler-Ryan Inc. (G-R) of Dublin, California and SAIC. In December 1998, G-R removed a 1,000-gallon used oil UST during station UST upgrade activities. Two soil samples were collected from the former used oil tank location. At the request of the RWQCB, 1 boring, designated B-1, was drilled and sampled in July 2003 to determine if MTBE or other fuel oxygenates were present beneath the site. Concentrations of 8,200 micrograms per liter ("g/l) MTBE, 520 "g/l tert-amyl methyl ether (TAME) and 910 "g/l tertbutyl alcohol (TBA) were detected in the ground water grab sample collected from Boring B-1. Soil samples were not collected from B-1 during this investigation. Details of this investigation are documented in an SAIC report entitled Results of Environmental Monitoring, dated August 19, 2003. In January and February 2004, G-R performed UST, product piping and dispenser removal activities at the site, including additional over-excavation at the UST location. During the UST removal and overexcavation event, SAIC collected compliance soil samples, designated T-1 through T-6, PD-1 through PD-6, and P-1 through P-8. Soil sample T-2, collected from the southern portion of the UST pit at a depth of approximately 12 feet below ground surface (bgs), contained the highest concentrations of total petroleum

EL PASEO CHEVRON (Continued) **U001602983**

hydrocarbons as gasoline (TPHg), benzene, and MTBE at 10,000 milligrams per kilogram (mg/kg), 4 mg/kg, and 10 mg/kg, respectively. Approximately 500 cubic yards (cy) of soil, comprised of pea gravel, were removed from the UST pit during the January 2004 UST removal event. Based on the results of the compliance soil sampling event, an additional 400 cy of soil were over-excavated from the southern portion of the UST pit in February 2004. Petroleum hydrocarbon concentrations decreased to 4,200 mg/kg TPHg, 0.76 mg/kg benzene, and 0.76 mg/kg MTBE in the area of soil sample T-2B, collected from the southern portion of the UST pit at a depth of approximately 24 feet bgs. Details of these activities are presented in a March 17, 2004 SAIC report entitled Underground Storage Tank Removal, Over Excavation, and Soil Sampling Activities. In June 2004, SAIC advanced one exploratory boring, designated B-2, and installed one ground water monitoring well, designated MW-1, to further evaluate the extent of petroleum hydrocarbons in soil and ground water beneath the site in the vicinity of the former UST complex. Concentrations of up to 99,000 "g/l TPHg, 9,700 "g/l total petroleum hydrocarbons calculated as diesel (TPHd), 35,700 "g/l TRPH, 790 "g/l benzene, 17,000 "g/l MTBE, and 590 "g/l TBA were detected in the ground water samples collected from Well MW-1 and Boring B-2. The petroleum hydrocarbons in soils beneath the former UST complex appeared to attenuate significantly at depths below 45 feet bgs. TPHg, benzene, and MTBE in soils were vertically delineated to concentrations of 1.8 mg/kg, 0.009 mg/kg, and 0.2 mg/kg, respectively, in the location of Boring B-2 at 80 feet bgs. SAIC also completed a well survey to identify active and abandoned water-supply wells within a \\%-mile radius of the site. Two ground water monitoring wells, designated 07S01W29Q003 and 07S01W29Q004, were identified within a \\%-mile radius of the site. These wells are located greater than 880 feet from the Chevron site in the crossgradient direction relative to the direction of local ground water flow, and are used as monitoring wells for the Shell service station at 1804 Saratoga Avenue in San Jose. Details of this investigation are presented in the SAIC Site Assessment Report, dated September 17, 2004. In November and December 2004, SAIC installed groundwater monitoring wells MW-2 through MW-4, and soil vapor monitoring wells SVE-1 and SVE-2 to further delineate petroleum hydrocarbons in soil and groundwater beneath the site and to determine the local groundwater flow direction. The highest concentration of 1,200 mg/kg TPHg was detected in the soil sample collected from Well Boring SVE-2 at a depth of 14.5 feet bgs. Benzene and MTBE were detected at the highest concentrations of 0.01 mg/kg and 5.6 mg/kg, respectively, in the soil sample collected from Well Boring SVE-1 at a depth of 54.5 feet bgs. Groundwater elevation data collected during the investigation, indicated groundwater flow beneath the site to be toward the southeast at a moderate hydraulic gradient. The distribution of dissolved petroleum hydrocarbons at the site was consistent with the southeasterly groundwater flow direction, with the highest dissolved petroleum hydrocarbon concentrations being detected in downgradient Well MW-2. Concentrations of 72,000 "g/l TPHg, 4,700 "g/l TPHd, 10,600 "g/l TRPH, 2,700 "g/l benzene, 130,000 "g/l MTBE and 1,700 "g/l TBA were detected in the groundwater sample collected from Well MW-2. Details of this investigation are presented in a January 28, 2005 SAIC report entitled Results of Additional Site Assessment. In June 2005 - 3 groundwater monitoring wells (MW5 through MW7) were installed to 88-95 ft bgs and 2 soil vapor extraction wells (SVE3 and SVE4). The

EL PASEO CHEVRON (Continued) **U001602983**

highest concentrations of 1,400 mg/kg TPHg, 11 mg/kg toluene, 23 mg/kg ethylbenzene, and 130 mg/kg total xylenes were detected in the soil sample collected from Well Boring SVE-4 at a depth of 79 feet bgs. Benzene was detected at the highest concentrations of 0.010 mg/kg in the soil sample collected from Well Boring SVE-4 at a depth of 69.5 feet bgs. The highest concentration of 1,200 mg/kg MTBE was detected in the soil sample collected from Well Boring SVE-4 at a depth of 49.5 feet bgs. The Soil Vapor Extraction and Treatment (SVET) System began operation on October 16, 2008 following receipt of electrical power from PG&E. A start-up report, including system process instrumentation diagrams, SVE well construction information and preliminary mass removal rates, was submitted to the Bay Area Air Quality Management District (BAAQMD) and Santa Clara Department of Environmental Health (DEH) on November 20, 2008. July 2017 - Recent site data indicate that the residual contamination meets the criteria for case closure under the Low-Threat Closure Policy. Review case closure documents for additional information.

Violation Date:	02-10-2015
Citation:	HSC 6.7 25290.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(e)
Violation Description:	Failure to maintain the interstitial space under constant vacuum, pressure, or hydrostatic such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment. (Product Tight)
Violation Notes:	Returned to compliance on 02/10/2015. The regular fill sump sensor did not function properly when first tested in water. After cleaning, the sensor functioned as required. No further corrective actions required.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	UST
Violation Source:	CERS

Site ID:	104936

Violation Program:	UST
Violation Source:	CERS
Site ID:	104936
Site Name:	CHEVRON STATION #91325
Violation Date:	02-02-2017
Citation:	HSC 6.7 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e)
Violation Description:	Failure to maintain secondary containment (e.g. failure of secondary containment testing).
Violation Notes:	Returned to compliance on 08/08/2017. As noted above, the interstitial monitoring fluid level in the 87 STP Sump Annular was quite low. Additional Sensor L4 alarms were recorded in the TLS-350 Alarm History on 11/25/2016 and 11/20/2016. The 91 STP Sump Annular interstitial fluid level was also low enough to require replenishment yesterday (level was close to the bottom of the reservoir for Sensor L3). No released interstitial fluid was observed inside any of the sumps, but the loss of interstitial monitoring fluid indicates that the secondary containment is not product tight. Investigate to determine if failure of secondary containment has occurred and report your findings to HMCD.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	UST
Violation Source:	CERS
Site ID:	104936
Site Name:	CHEVRON STATION #91325
Violation Date:	02-02-2017
Citation:	HSC 6.7 25290.1(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(e)
Violation Description:	Failure to maintain the interstitial space such that a breach in the primary or secondary containment is detected before the liquid or vapor phase of the hazardous substance stored in the UST tank is released into the environment, i.e., vapor, pressure, hydrostatic (VPH) monitoring.
Violation Notes:	Returned to compliance on 01/31/2018. Interstitial communication for the vacuum zone monitored by Sensor S6 was tested by inducing a vacuum leak in the secondary 91 vent line inside the vent line transition sump. Even after the vacuum in the zone was completely released, none of the vacuum sensors registered any change in vacuum readings. All 5 vacuum sensors were confirmed as operational and this zone was under vacuum when testing began, so it is not clear if this issue is the result of the zone being completely isolated from the leak detection system or obstruction of the vacuum tubing leading to the leak detection system. Investigate the source of this problem and have a qualified UST Service Technician restore interstitial communication between the far end of the 91 vent line secondary containment Sensor S6 and document restoration of leak detection functionality and interstitial communication. According to the TLS-350 Alarm History Report reviewed yesterday, Sensor L4 (87 STP Sump Annular) had been in [Truncated]

Violation Date: 01-31-2018
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 02/06/2018. The interstitial space sensor (Veeder Root 304) in the 87-STP sump alarmed for low liquid in March and August. On both occasions the alarm was addressed to adding more brine. An in-depth investigation as to the cause of the numerous low liquid alarms must be completed by a qualified technician. It is anticipated that the sump will be drained of all interstitial fluid and then will be integrity (vacuum or pressure) tested per the manufacturer. Failure to conduct integrity testing and implement corrective action regarding the this alarm condition will result in an escalation of this violation and may result in enforcement action by

Violation Date:	04-09-2018
Citation:	HSC 6.7 25290.1(d) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(d)
Violation Description:	Failure of a UST system installed on or after July 1, 2004 to be designed and constructed with a monitoring system capable of detecting the entry of the liquid or vapor-phase of the hazardous substance stored in the primary containment into the secondary containment and capable of detecting water intrusion into the secondary containment.
Violation Notes:	Flexible vacuum supply tubing runs between the 87 UST Submersible Turbine Pump (STP) Sump and the 87 UST Fill Sump and between the 91 UST STP Sump and the 91 UST Fill Sump within double-wall chase pipes. During the course of today's monitoring equipment testing, it was observed that the chase pipes are not monitored. The primary chase pipe is open to the sump interiors. Secondary containment for the chase pipes must be monitored in accordance with California Health and Safety Code section 25290.1(d). Obtain a UST Minor Retrofit/Repair permit from HMCD PRIOR TO BEGINNING WORK and correct this deficiency as soon as possible.

Violation Date:	02-02-2017
Citation:	23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description:	Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes:	Returned to compliance on 04/09/2018. The 91 Fill Sump Annular interstitial fluid observed in the reservoir for Sensor L9 and its corresponding manometer is nearly colorless rather than the standard pink hue. This indicates that "topping off" of monitoring fluid using water or other unapproved fluid may be occurring. Have a qualified UST Service Technician replace the interstitial monitoring fluid in the 91 Fill Sump. Ensure that all VPH monitoring systems are properly maintained. Interstitial communication for the vacuum zone monitored by Sensor S5 could not be confirmed because no vacuum release valves are currently installed on the flexible tubing connected to the bottoms of the 4 under dispenser containment (UDC) sumps and there is no way to release vacuum in a controlled way. Have a qualified UST Service Technician install valves on the tubing and document confirmation of interstitial communication. (Note: Since the UDC vacuum supply is provided via the Vapor Recovery line secondary containment, [Truncated]

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violations:
Site ID: 149191
Site Name: ROTTEN ROBBIE #45
Violation Date: 03-07-2017
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description: Failure to maintain secondarily contained piping to allow liquid to flow into the sump in the event of a leak (i.e., failure to remove test boot).
Violation Notes: Returned to compliance on 10/25/2017. The secondary containment test boot on the diesel piping is still affixed to the secondary piping with the schrader valve pointed up at the 12 o'clock position. This violation was noted on the previous inspection on 3/9/16.

Violation Description:	Failure to maintain secondary containment (e.g., failure of secondary containment testing).
Violation Notes:	The following components failed when they were tested during this inspection; - 87 & 89 STP sump failed when they were hydrostatically tested with the accelerated INCON tester. Further investigate where the failures are coming from and retest the failed components. A permit from our office may be required for any repairs made to the STP sumps.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	UST
Violation Source:	CERS
Site ID:	149191
Site Name:	ROTTEN ROBBIE #45
Violation Date:	03-07-2017
Citation:	23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description:	Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes:	Returned to compliance on 03/07/2017. Prior to testing the UDC float assembly located at dispenser 1/2 for Diesel fuel I observed that the float was buoyant but had not tripped the shear valve. The service technician removed the diesel fuel, adjusted the chain assembly and retested; the float and chain assembly functioned as required. The diesel piping at the shear valve was wet with diesel fuel and requires maintenance.

Violation Description:	Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.

ROTTEN ROBBIE #45 (Continued) **U001603006**

Violation Notes:	Returned to compliance on 03/06/2018. The Veeder-Root 794390-420 sensor failed to produce an audible/visual alarm at the monitoring panel when tested in water. The sensor was disassembled, cleaned and reassembled. The cleaned sensor was retested in water and functioned as required. The violation was corrected during today's inspection, no further action is required.

Violation Description:	Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes:	Returned to compliance on 03/06/2018. The Veeder-Root 794380-205 sensor failed to shutdown the 91-grade turbine when tested in water. The sensor was replaced with a Veeder-Root 794380-208. The replacement sensor was tested in water which produced an audible/visual alarm at the monitoring panel and shutdown of the STP. This violation was corrected during today's inspection. See additional comments below.

Eval Notes: On-site to witness the pressure test of the secondary diesel product line that was replaced. The repair was due to a cracked secondary containment pipe in the diesel STP. The repair and pressure test were completed by Brian York from Armer/Norman & Associates, Inc. Verified Mr. York's ICC and Mfg certifications during the primary testing on 7/14/17. Verified the installation of secondary containment Red Thread IIA 3-inch piping joint outside the STP sump and Diversified Products Mfg. (DPM) test boot RA 3.0x2.5. Inspected the OPW EBF-030 STP sump penetration fitting while the sump was under lake testing. No liquid was observed outside the sump. Witnessed the pressure test (5-psi for 60-minutes) of the diesel secondary containment piping with no loss of pressure: PASS. The repaired section was sprayed and inspected with a mirror, no soap and no bubbles were observed. Witnessed a 1-hr. lake test of the diesel STP sump that was filled with water above the STP piping [Truncated]

Violation Description: Failure to maintain secondary containment (e.g., failure of secondary containment testing).
Violation Notes: The following components failed when they were tested during this inspection; - 87 & 89 STP sump failed when they were hydrostatically tested with the accelerated INCON tester. Further investigate where the failures are coming from and retest the failed components. A permit from our office may be required for any repairs made to the STP sumps.

Violation Date: 03-07-2017
Citation: 23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes: Returned to compliance on 03/07/2017. Prior to testing the UDC float assembly located at dispenser 1/2 for Diesel fuel I observed that the float was buoyant but had not tripped the shear valve. The service technician removed the diesel fuel, adjusted the chain assembly and retested; the float and chain assembly functioned as required. The diesel piping at the shear valve was wet with diesel fuel and requires maintenance.

All spill buckets were hydrostatically tested with 5-gallons of water for 60-minutes with no drop in liquid. All tanks were equipped with mechanical overfill devices (flapper valves). All STP sump sensors were tested with water and produced an audible and visual alarm at the monitoring panel as well as positive shutdown of the turbines. All annular sensors were tested with water and produced an audible and visual alarm at the monitoring panel. All fill sump sensors were tested with water and all produced an [Truncated]

Eval Notes: On-site to oversee SB989 testing that took place today. Testing was conducted by; Michael (Tony) McCarter ICC#8819839 exp., 10/15/2021; FFS#1019623710 exp., 09/24/2020. The following components were tested and passed during this inspection; - 4 annular spaces for 87, 89, 91, and Diesel were tested at 7.0 " Hg for 60 minutes and passed. - Secondary product line for 87, 89, 91 and Diesel were tested at 5.0 p.s.i for 60 minutes and passed. - 91 and Diesel STP's Sumps were hydrostatically tested using the accelerated INCON tester. - 4 Fill Containment Sumps were hydrostatically tested using the accelerated INCON tester. - Tested secondary vapor return line. Notes; 1) Prior to testing all of the components technician had to replace test boots inside Diesel STP sump. Technician had to wait for the adhesive to cure prior to testing. 2) I did not witness testing the testing of 4 UDC's. 3) Vent lines are single wall lines therefore these were not subject to [Truncated]

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site ID:	130349
Site Name:	LENSCRAFTERS #5785
Violation Date:	03-26-2018
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 04/23/2018. Uncured lens coat overspray waste is accumulated in a small plastic container for approximately one month before being cured. The plastic container remains open, even when hazardous waste is not being added or cured.
Violation Division:	Santa Clara County Environmental Health

Eval Date:	03-26-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	REMINDERS TO FACILITY: 1) Ensure that monthly inspection logs (safety inspections and waste treatment machine inspections) and waste treatment operator logs are maintained on-site for 3 years [HSC 25201.5(d)(5)]. On-site for a routine hazardous waste treatment inspection. The facility UV cures LTI-SUN-400B overspray waste from Stratum coater machine. The uncured overspray waste accumulates in a plastic container and is then UV cured when the container is full, approximately monthly. Per facility staff, the Stratum coater generates either 2 ounces or 4 ounces of overspray waste each session. The following documents were reviewed during inspection: - On-site Hazardous Waste Treatment Notification (CERS ID:10588117) - Safety inspection and waste treatment machine inspection schedule and logs for 2018-2017. - Written operating instructions and a record of the dates, amounts, and types of waste treated for 2018-2015. Noted several lapses in the operating records, [Truncated]

Eval Notes:	On-site for a routine hazardous waste inspection. The facility is a total eye care service provider. Activities include conducting eye exams and eye glass fittings, creating custom eye glasses, and selling eye care products. The following wastes are generated: - LTI-SUN-400B lens coat overspray waste is generated from Stratum coater. The overspray waste has been determined to be a non-RCRA hazardous waste, due to aquatic toxicity. The overspray waste is UV cured monthly and managed as non-hazardous waste. - Per the laboratory technician, only air filters require changing in the stratum coater and are managed as non-hazardous waste. - Spent UV bulbs from lens coat machine are collected and managed as universal waste via a mailback program. - Luxottica spent dry wash solution has been tested and determined to be non-hazardous. - Waste dyes have previously been determined by corporate to be non-hazardous. Noted that the Neutralizer HC Clear Plus dye has an NFPA [Truncated]

Name: LENSCRAFTERS #5785
Address: 1620 SARATOGA AV
City,State,Zip: SAN JOSE, CA 95129
Site ID: 130349
CERS ID: 10588117
CERS Description: Hazardous Waste Onsite Treatment

Violations:

Site ID: 130349
Site Name: LENSCRAFTERS #5785
Violation Date: 11-25-2014
Citation: HSC 6.11 25404.1.1 - California Health and Safety Code, Chapter 6.11, Section(s) 25404.1.1
Violation Description: Failure to obtain/maintain an active hazardous waste treatment permit.
Violation Notes: Returned to compliance on 12/22/2014. Ignore the corrective action below. Notification of treatment activities must be done using the California Environmental Reporting System (CERS). Store has CERS ID 10588117 but has not submitted any information to date.
Violation Division: Santa Clara County Environmental Health
Violation Program: CE
Violation Source: CERS

Site ID: 130349
Site Name: LENSCRAFTERS #5785
Violation Date: 11-25-2014
Citation: HSC 6.5 25201.5(d)(6) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.5(d)(6)
Violation Description: Failure of the generator to prepare and maintain onsite, for a period of three years, the following: (1) compliance records of all pretreatment and discharge records to the POTW; (2) records of the dates, concentrations, amounts, and types of waste treated; and (3) operating instructions.
Violation Notes: Returned to compliance on 12/22/2014. Records of the dates and amounts of waste treated in the Gerber Stratum Coater are not being maintained.
Violation Division: Santa Clara County Environmental Health
Violation Program: CE
Violation Source: CERS

Site ID: 130349
Site Name: LENSCRAFTERS #5785
Violation Date: 03-26-2018
Citation: 40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

LENSCRAFTERS #5785 (Continued) **S113663267**

Violation Notes:	Returned to compliance on 04/23/2018. Uncured lens coat overspray waste is accumulated in a small plastic container for approximately one month before being cured. The plastic container remains open, even when hazardous waste is not being added or cured.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	130349
Site Name:	LENSCRAFTERS #5785
Violation Date:	03-26-2018
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 04/23/2018. Uncured LTI-SUN-400B overspray waste accumulates in a small plastic container until the container is filled. The overspray waste is then cured approximately monthly. The uncured overspray waste container is not labeled with required information. A sample hazardous waste label was provided at the time of inspection.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	130349
Site Name:	LENSCRAFTERS #5785
Violation Date:	11-25-2014
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 12/22/2014. 1 gallon bottle of waste "dry wash" was noted beneath the Stratum Coater and was lacking any markings. Mr. Cevallos could not identify why the set-up was as noted with one feed and one waste container. If waste is hazardous please ensure tha tit is fitted with lid that prevents spillage and is properly marked/labeled.
Violation Division:	Santa Clara County Environmental Health

Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-26-2018
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	REMINDERS TO FACILITY: 1) Ensure that monthly inspection logs (safety inspections and waste treatment machine inspections) and waste treatment operator logs are maintained on-site for 3 years [HSC 25201.5(d)(5)]. On-site for a routine hazardous waste treatment inspection. The facility UV cures LTI-SUN-400B overspray waste from Stratum coater machine. The uncured overspray waste accumulates in a plastic container and is then UV cured when the container is full,

LENSCRAFTERS #5785 (Continued) **S113663267**

approximately monthly. Per facility staff, the Stratum coater generates either 2 ounces or 4 ounces of overspray waste each session. The following documents were reviewed during inspection: - On-site Hazardous Waste Treatment Notification (CERS ID:10588117) - Safety inspection and waste treatment machine inspection schedule and logs for 2018-2017. - Written operating instructions and a record of the dates, amounts, and types of waste treated for 2018-2015. Noted several lapses in the operating records, [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-26-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site for a routine hazardous waste inspection. The facility is a total eye care service provider. Activities include conducting eye exams and eye glass fittings, creating custom eye glasses, and selling eye care products. The following wastes are generated: - LTI-SUN-400B lens coat overspray waste is generated from Stratum coater. The overspray waste has been determined to be a non-RCRA hazardous waste, due to aquatic toxicity. The overspray waste is UV cured monthly and managed as non-hazardous waste. - Per the laboratory technician, only air filters require changing in the stratum coater and are managed as non-hazardous waste. - Spent UV bulbs from lens coat machine are collected and managed as universal waste via a mailback program. - Luxottica spent dry wash solution has been tested and determined to be non-hazardous. - Waste dyes have previously been determined by corporate to be non-hazardous. Noted that the Neutralizer HC Clear Plus dye has an NFPA [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all

CELLCO - WESTGATE (Continued) **1012312977**

Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: The following chemicals observed on site were not reported in the HMBP submitted to CERS on 12/13/2015: -2 x 750 gallons of CO2
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-17-2015

CAMPBELL UNION HSD PROSPECT HIGH (Continued) **1000345684**

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine Hazardous Materials Business Plan (HMBP) and Hazardous Materials Storage inspection began on 11/12/2015 and concluded on 12/17/2015. CERS ID# 10348222 A CERS submittal for HMBP reporting was made on 12/13/2015. This submittal cannot be accepted due to incorrect ownership information. Update CERS to include "Campbell Union High School District" as the Owner and resubmit the HMBP. Hazardous materials observed: -2 x 750 gallon CO2 tanks -500 gallon tank of 12.5% sodium hypochlorite -Approximately 20 gallons of latex paint outside Theater *The tank label on the sodium hypochlorite tank is fading. Update this label so that it clearly identifies this chemical.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-17-2015
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Routine Hazardous Waste inspection began on 11/12/2015 and concluded on 12/17/2015. EPA ID# CAD981430846 (Active) Wastes generated: -Asbestos during building renovation -Universal Waste (PCB ballasts, fluorescent light tubes, batteries, electronic waste) -Latex paint as needed -Lab wastes as needed (Flinn Scientific method used, which reportedly generates zero waste) *Manifests observed on DTSC's Hazardous Waste Tracking System for 2015 disposal of mastic solvent and PCBs. These manifests are not observed in facility records. *Bill of Lading documents observed for paint recycling and universal waste management.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-11-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to perform a routine Hazardous Waste Generator inspection. Nordstrom Rack is a conditionally exempt small quantity generator (CESGQ) that generates hazardous waste in the form of broken items and inventory returns. Wastes include but are not limited to lotions, fragrances, electronic items, etc. A walk-through of the back storage

SAFEWAY #1217 (Continued) **S121474552**

area was conducted with Inventory Manager, Sharon Jimenez. Observed the following. > A tote bin system is in place for segregating hazardous wastes. The bin categories are: - Flammable Liquids (2) - Batteries - Oxidizing Materials - Aerosols - Corrosive Acids - Corrosive Caustics - Light Bulbs > Per Ms. Jimenez, employees accumulate the items in a central bin and fill out an inventory adjustment form for each item. Ms. Jimenez and the receiver are trained in hazardous waste management and sort the hazardous wastes into the correct bins, daily, via illustrated guides posted on each bin. > Spill control is readily [Truncated]

Violation Date: 07-17-2015
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees within the first six months after the date of their employment, or assignment to the facility, or to work unsupervised, or to a new position at a facility with hazardous waste training to ensure employees are competent in the following areas: hazardous waste management procedures (including contingency plan implementation) relevant to the positions in which they are employed, emergency response and emergency equipment, and procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment. In addition, the owner/operator shall ensure facility personnel take part in an annual review of the initial training and training records training records on current personnel shall be kept until closure of the facility. Training records on former employees shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 07/21/2015. Observed universal waste bulbs and guinea pig medication co-mingled with the corrosive wastes in hazardous waste bin in back of shop.

Violation Description: RCRA Large Quantity Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 09/13/2017. DOCUMENTATION A MATERIAL IS NOT A WASTE No logs available for review identifying non-credit worthy pharmaceutical returns and the reason for the failure of these pharmaceuticals to receive a credit. Provide this documentation to support the claim that the material is not a waste. Claims that a certain material is not a waste or is conditionally exempt from regulation, must be supported by documents demonstrating that there is a known market or disposition for the material, and that they meet the terms of the exclusion or exemption. Demonstration includes providing appropriate documentation supporting the claim that a material is not a waste, or is exempt from regulation. [CCR 66261.3(g)]. NOTE: Violation escalated to class II violation due to a chronic failure to provide this documentation.

Local Case Number:	07S1W29Q01f
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	1995 In January, product line piping was replaced as part of the site upgrade. Soil samples were collected from beneath the product piping. Up to 3,100 milligrams per kilo grams (mg/kg) of total petroleum hydrocarbons as gasoline (TPHg) and 5.3 mg/kg of benzene were

SERVICE STATION - SAP 135994 (Continued) **1004677616**

detected in a soil sample collected at 3.5 feet below grade (fbg) from beneath the Western pump island. Soil analytical results are presented in Attachment 3. Upon receipt of the soil analytical results, Shell filed an underground storage tank (UST) unauthorized release report (URR). In September, subsurface investigations were conducted to assess whether hydrocarbons were present in the subsurface in the vicinity of the Western pump island one soil boring was drilled to 90.5 fbg and collected soil and groundwater samples for analysis. Concentrations of 4.6 mg/kg TPHg and 0.21 mg/kg benzene were detected in soil samples from the boring. Concentrations of 4,800 micrograms per liter (ug/L) TPHg, and 900 ug/L benzene were detected in the grab groundwater sample collected from the soil boring. Groundwater monitoring and analytical results are presented in Attachment 4. 1996 In June, three groundwater monitoring wells were installed. Up to 1,110 mg/kg TPHg, 0.048 mg/kg benzene, and 1.2 mg/kg methyl tertiary-butyl ether (MTBE) were detected in analyzed soil samples from the borings. Up to 16,000 ug/L of TPHg, 330 ug/L benzene, and 4,300 ug/L MTBE were detected in a grab groundwater sample collected from the soil boring for MW-2 prior to completion as a monitoring well. 1998 In October, two groundwater monitoring wells were installed offsite. Depth discrete groundwater samples were collected at two different depths in each of the well borings. No TPHg, benzene, toluene, ethylbenzene, xylenes, or MTBE was identified in soil samples collected from the borings. MTBE was detected at concentrations of 100 ug/L at 69 fbg and and 6.8 ug/L at 78 fbg in groundwater samples collected from well boring MW-4. 2001 In January, two CPT borings (CPT-1 and CPT-1A), and in February one hollow-stem auger boring (SB-1) were advanced to assess possible MTBE contamination from the former Mobil service station located in at the western corner of Saratoga Avenue and Quito Road. No TPHg, BTEX or MTBE was detected in soil or groundwater samples collected from these borings. Groundwater monitoring well MW-6 was installed down-gradient of potential source areas located on the Shell site and down-gradient of the existing well MW-4. No TPHg, BTEX, or MTBE were detected in soil samples collected from MW-6. MTBE was detected in a groundwater sample at a concentration of 14 ug/L. No TPHg, BTEX or other analytes were detected. 2007 In September, based on a possible underground storage tank leak discovered on September 6, 2007, Shell filed a URR September 7, 2007. 2009 In January, three 18,000-gallon single-wall fiberglass gasoline USTs, for dispensers, and associated piping were excavated and removed from the service station. Soil samples were collected from the excavations. After reviewing the initial analytical data, additional soil over excavation in the UST excavation area was conducted on two occasions. MTBE and TAME were not detected in any of the soil samples. Confirmation soil samples collected beneath the dispenser locations and the initial samples from the UST excavation except samples T-2-N did not contain TPHg or BTEX. The confirmation soil sample T2NA-30 collected from the UST excavation at 30 fbg contained up to 24,000 mg/kg TPHg, 67 mg/kg benzene, 1,800 mg/kg toluene, 450 mg/kg, ethylbenzene, and 2,800 mg/kg xylenes. The maximum concentration of 48.9 mg/kg lead was detected in dispenser sample D-2-8.5. 2010 In April, an investigation was conducted in order to collect additional soil data from the area below the former UST complex and to obtain grab groundwater samples from first encountered groundwater near monitoring wells and MW 2 and MW 3. Soil impacts were minimal and vertically defined beneath the former tank and the over excavation area. Based on the soil

SERVICE STATION - SAP 135994 (Continued) **1004677616**

analytical results, no further soil delineation was necessary. Groundwater sample collected from CPT-3 at 90 fbg contained 17,000 ug/L TPHg, 39 ug/L benzene, 2,600 ug/L toluene, 320 ug/L ethylbenzene, 4,000 ug/L total xylenes, 210 ug/L MTBE and 470 ug/L TBA. TPHg, and TEX concentrations in this groundwater sample exceeded the RWQCB ESLs. 2011 In June, five soil vapor probes were installed to a depth of five fbg at the site. In July, soil vapor samples were collected from the probes. The samples were analyzed for BTEX by EPA Method 8260B, and for helium by ASTM D Method 1946 (M). Ethylbenzene and xylenes were detected in all of the soil vapor samples, with the highest detections in SVP-1 at concentrations of 210 and 260 micrograms per cubic meter, respectively. Benzene and toluene were not detected in any of the soil vapor samples. 2011-2012 Semi-Annual groundwater monitoring with the most recent sampling event occurring on July 3, 2012. 2012-2015 Groundwater monitoring was suspended while the case was being prepared for closure. In May 2014, during the notification of proposed case closure public comment period, a limited Phase II site assessment was performed at the site which reported a subsurface anomaly thought to be an orphaned UST. The DEH required investigation into the anomaly, and through pot-holing, was discovered to be a 1,000 gallon oil-water separator (OWS) which was attached via piping to a large dry well chamber. The OWS was removed on January 16, 2015 and the dry well chamber was removed on February 18, 2015. Soil samples from beneath the OWS and dry well chamber reported low detections of petroleum hydrocarbons consistent with the historical soil data collected at the site. The DEH required no additional action subsequent to the OWS and dry well chamber removal.

Violations:

Site ID:	151159
Site Name:	SARATOGA DENTAL ASSOCIATES
Violation Date:	03-01-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Returned to compliance on 03/06/2017. Per facility, Defend Tartar and Stain Remover is diluted with water in the tartar and stain removal process. Spent solutions of Defend Tartar and Stain Remover are discarded down the drain. SDS review show this product containing <10% sulphamidic acid. Make a hazardous waste determination for the spent solution and if determined to be hazardous manage accordingly. Per facility, spent solutions of CA Dental Products Sonic Power Ultrasonic Cleaning Solution are discarded in the drain. Unable to locate SDS for CA Dental Products Sonic Power Ultrasonic Cleaning Solution online. Facility does not have SDS for this product. Make a hazardous waste determination for this product and if determined to be hazardous manage accordingly.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2021
Date Data Arrived at EDR: 05/03/2021
Date Made Active in Reports: 05/19/2021
Number of Days to Update: 16

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 10/05/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991

West Map:	5640178 CUPERTINO, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

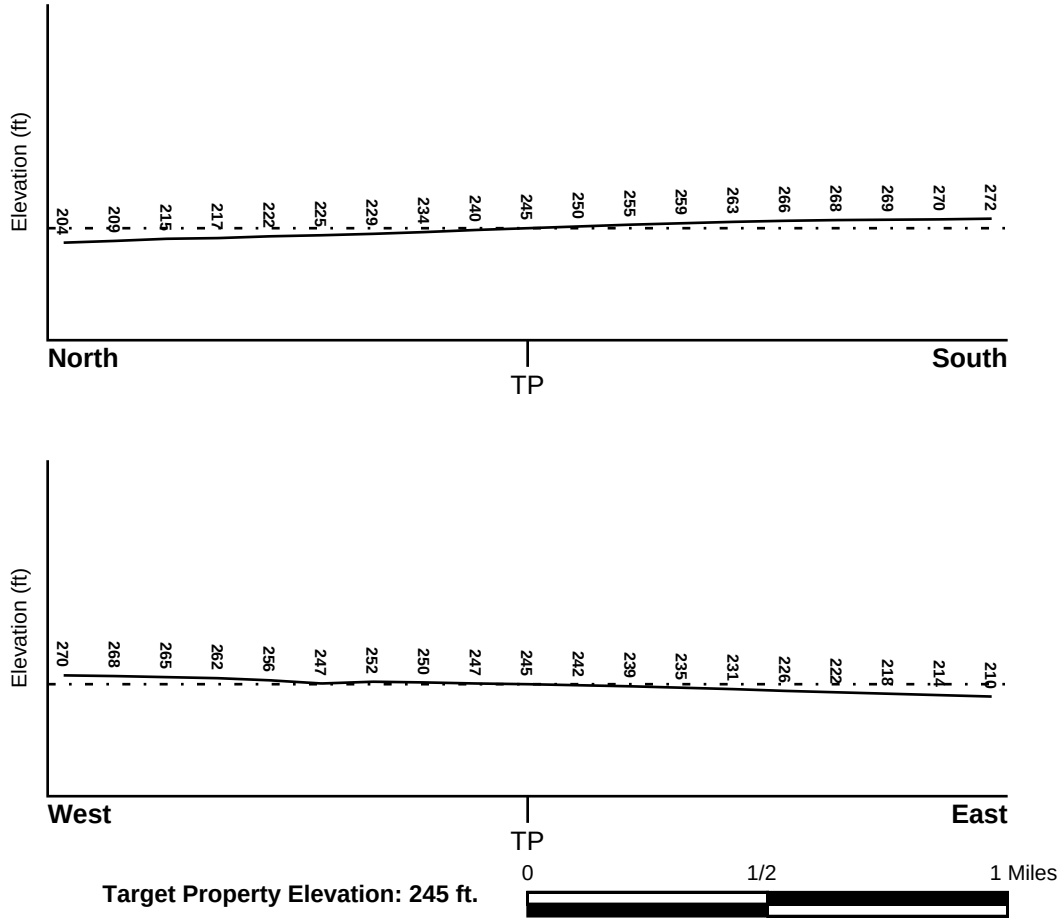
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06085C0236H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06085C0217H	FEMA FIRM Flood data

06085C0238J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
SAN JOSE WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EXHIBIT "A"

LEGAL DESCRIPTION

Real property in the City of San Jose, County of Santa Clara, State of California, described as follows:

PARCEL ONE:

PARCEL ONE-A:

PARCEL "B" AS SHOWN ON THE PARCEL MAP FILED MAY 27, 1977 IN BOOK 397 OF MAPS AT PAGE 44 OF SANTA CLARA COUNTY RECORDS.

EXCEPTING THEREFROM AND THEREOUT THAT PORTION DESCRIBED AS FOLLOWS:

BEGINNING AT THE SOUTHEAST CORNER OF PARCEL "A" AS SHOWN ON SAID MAP (397 MAPS 44); THENCE SOUTH 08° 11' 38" WEST, 25.00 FEET; THENCE NORTH 81° 48' 22" WEST, 84.00 FEET; THENCE NORTH 08° 11' 38" EAST, 10.00 FEET; THENCE NORTH 81° 48' 22" WEST, 112.57 FEET TO THE EASTERLY LINE OF LAWRENCE EXPRESSWAY; THENCE NORTHERLY ALONG SAID EASTERLY LINE NORTH 02° 22' 34" EAST, 15.08 FEET TO THE SOUTHERLY LINE OF PARCEL "A"; THENCE ALONG SAID SOUTHERLY LINE SOUTH 81° 48' 22" EAST, 198.10 FEET TO THE POINT OF BEGINNING.

THE LEGAL IS MADE PURSUANT TO THAT CERTAIN CERTIFICATE APPROVING A LOT LINE ADJUSTMENT, RECORDED JUNE 21, 1990, AS INSTRUMENT NO. 10565231, IN BOOK L395, PAGE 350 OFFICIAL RECORDS.

PARCEL ONE-B:

PARCEL 1 AS SHOWN ON THAT CERTAIN MAP ENTITLED "PARCEL MAP BEING A PORTION OF LOTS 9, 10 AND 11, AS SHOWN ON THE MAP OF THE SUBDIVISION OF GRAVES TRUST, FILED SEPTEMBER 24, 1889 IN BOOK D OF MAPS, PAGE 145 OF SANTA CLARA COUNTY RECORDS", WHICH MAP WAS FILED FOR RECORD IN THE OFFICE OF THE RECORDER OF THE COUNTY OF SANTA CLARA, STATE OF CALIFORNIA ON APRIL 5, 1973 IN BOOK 320 OF MAPS, PAGE 29.

PARCEL ONE-C:

EASEMENTS FOR PEDESTRIAN AND VEHICULAR INGRESS AND EGRESS AND PARKING GRANTED IN THAT CERTAIN DECLARATION ESTABLISHING RECIPROCAL PARKING RECORDED APRIL 21, 2005 AS INSTRUMENT NO. 18335996, OFFICIAL RECORDS.

PARCEL TWO:

PARCEL TWO-A:

BEGINNING AT THE POINT OF INTERSECTION OF THE NORTHERLY LINE OF PROSPECT ROAD, AS ESTABLISHED BY THE DEED FROM THOMAS NEWTON FOSTER, ET AL, TO CITY OF SAN JOSE, DATED FEBRUARY 24, 1956, RECORDED AUGUST 3, 1956 IN BOOK 3567 OF OFFICIAL RECORDS, AT PAGE 595, SANTA CLARA COUNTY RECORDS, WITH THE WESTERLY LINE OF PARCEL NO. 1, AS SAID PARCEL NO. 1 WAS DESCRIBED IN THE DEED FROM Y. ARCHIBALD TO THOMAS N. FOSTER, ET UX, DATED MAY 19, 1964 AND RECORDED MAY 29, 1964 IN BOOK 6522 OF OFFICIAL RECORDS, PAGE 458, SANTA CLARA COUNTY RECORDS; RUNNING THENCE ALONG SAID

NORTHERLY LINE OF PROSPECT ROAD NORTH 81° 50' WEST, 150.00 FEET; THENCE LEAVING SAID LINE AND RUNNING PARALLEL TO SAID WESTERLY LINE NORTH 8° 10' 57" EAST, 202.29 FEET; THENCE LEAVING SAID PARALLEL LINE AND RUNNING PARALLEL TO SAID NORTHERLY LINE OF PROSPECT ROAD, SOUTH 81° 50' EAST 150.00 FEET TO A POINT IN SAID WESTERLY LINE OF THE FOSTER PARCEL HEREINABOVE REFERRED TO; RUNNING THENCE ALONG SAID LAST NAMED LINE SOUTH 8° 10' 57" WEST, 202.29 FEET TO THE POINT OF BEGINNING AND BEING A PORTION OF LOTS 9 AND 10, AS SAID LOTS ARE SHOWN UPON THE MAP OF THE SUBDIVISION OF THE GRAVES TRACT IN THE QUITO RANCHO, WHICH SAID MAP WAS FILED FOR RECORD IN THE OFFICE OF THE RECORDER OF SAID COUNTY ON SEPTEMBER 24, 1889 IN BOOK "D" OF MAPS, AT PAGE 145, SANTA CLARA COUNTY RECORDS.

PARCEL TWO-B:

EASEMENTS FOR PEDESTRIAN AND VEHICULAR INGRESS AND EGRESS AND PARKING GRANTED IN THAT CERTAIN DECLARATION ESTABLISHING RECIPROCAL PARKING RECORDED APRIL 21, 2005 AS INSTRUMENT NO. 18335996, OFFICIAL RECORDS.

PARCEL THREE:

PARCEL THREE-A:

A PORTION OF LOTS 9 AND 10, AS SHOWN ON THE MAP OF THE SUBDIVISION OF THE GRAVES TRACT IN THE QUITO RANCHO, FILED SEPTEMBER 24, 1889, BOOK D OF MAPS, PAGE 145, SANTA CLARA COUNTY RECORDS, DESCRIBED AS FOLLOWS:

BEGINNING ON THE NORTHERLY LINE OF PROSPECT ROAD, AS ESTABLISHED BY DEED TO CITY OF SAN JOSE, RECORDED AUGUST 3, 1956, OFFICIAL RECORDS, PAGE 595, AT THE EASTERLY LINE OF SAID LOT 9; THENCE FROM SAID POINT OF BEGINNING ALONG SAID EASTERLY LINE OF LOT 9, NORTH 8° 10' 57" EAST, 860.54 FEET TO THE SOUTHERLY LINE OF GRAVES AVENUE, AS ESTABLISHED BY SAID DEED TO CITY OF SAN JOSE; THENCE ALONG SAID LINE, NORTH 81° 49' 06" WEST, 454.50 FEET; THENCE SOUTH 8° 11' 12" WEST, PARALLEL WITH SAID EASTERLY LINE OF LOT 9 A DISTANCE OF 366.48 FEET; THENCE SOUTH 81° 49' 06" EAST AND PARALLEL WITH SAID LINE OF GRAVES AVENUE, 70 FEET; THENCE SOUTH 8° 11' 12" WEST AND PARALLEL WITH SAID EASTERLY LINE OF LOT 9, A DISTANCE OF 115 FEET; THENCE NORTH 81° 49' 06" WEST, PARALLEL WITH SAID LINE OF GRAVES AVENUE, 77.87 FEET; THENCE SOUTH 8° 10' 57" WEST PARALLEL WITH SAID WESTERLY LINE OF LOT 9, A DISTANCE OF 176.89 FEET TO THE SOUTHERLY LINE OF PARCEL OF LAND CONVEYED TO THOMAS N. FOSTER, ET UX, BY DEED RECORDED JANUARY 19, 1967, BOOK 7617, OFFICIAL RECORDS, PAGE 726; THENCE SOUTH 81° 50' EAST ALONG SAID LINE, 98.87 FEET, MORE OR LESS, TO THE SOUTHEAST CORNER THEREOF; THENCE SOUTH 8° 10' 57" WEST, PARALLEL WITH THE SAID EASTERLY LINE OF LOT 9, A DISTANCE OF 202.65 FEET TO SAID NORTHERLY LINE OF PROSPECT ROAD; THENCE SOUTH 81° 50' EAST, 369.5 FEET TO THE POINT OF BEGINNING.

PARCEL THREE-B:

EASEMENTS FOR PEDESTRIAN AND VEHICULAR INGRESS AND EGRESS AND PARKING GRANTED IN THAT CERTAIN DECLARATION ESTABLISHING RECIPROCAL PARKING RECORDED APRIL 21, 2005 AS INSTRUMENT NO. 18335996, OFFICIAL RECORDS.

PARCEL FOUR:

PARCEL FOUR-A:

PARCEL D OF PARCEL MAP FILED MAY 27, 1977 IN BOOK 397 OF MAPS, PAGE 44, SANTA CLARA COUNTY RECORDS.

PARCEL FOUR-B:

EASEMENTS FOR PEDESTRIAN AND VEHICULAR INGRESS AND EGRESS AND PARKING GRANTED IN THAT CERTAIN DECLARATION ESTABLISHING RECIPROCAL PARKING RECORDED APRIL 21, 2005 AS INSTRUMENT NO. 18335996, OFFICIAL RECORDS.

PARCEL FIVE:

A NON-EXCLUSIVE EASEMENT AND RIGHT-OF-WAY IN PERPETUITY, CREATED APPURTENANT TO PARCELS ONE, TWO AND THREE ABOVE IN THE DEED TO THOMAS N. FOSTER, ET UX, RECORDED AUGUST 4, 1964, BOOK 6608, OFFICIAL RECORDS, PAGE 266, FOR INGRESS, EGRESS AND REGRESS OVER A PORTION OF LOT 8, AS SHOWN ON THE MAP OF THE SUBDIVISION OF THE GRAVES TRACT IN THE QUITO RANCHO, FILED SEPTEMBER 24, 1889 IN BOOK D OF MAPS, PAGE 145, SANTA CLARA COUNTY RECORDS, DESCRIBED AS FOLLOWS:

BEGINNING ON THE NORTHWEST LINE OF SARATOGA AVENUE, AS WIDENED BY THE DEED TO THE CITY OF SAN JOSE, RECORDED AUGUST 3, 1956, BOOK 3567, OFFICIAL RECORDS, PAGE 595, AT THE SOUTHERLY LINE OF CERTAIN PARCEL OF LAND CONVEYED TO STEVEN CREEK BOWL, INC., A CORPORATION, BY DEED RECORDED JULY 12, 1957, BOOK 3842, OFFICIAL RECORDS, PAGE 200; THENCE FROM SAID POINT OF BEGINNING ALONG THE SOUTHERLY LINE OF SAID PARCEL OF LAND SO CONVEYED TO STEVENS CREEK BOWL, INC., AND THE WESTERLY PROLONGATION THEREOF, NORTH 81° 49' 06" WEST, 881.11 FEET TO THE WESTERLY LINE OF SAID LOT 8; THENCE ALONG SAID LINE, SOUTH 8° 10' 57" WEST 70 FEET TO THE INTERSECTION THEREOF WITH THE WESTERLY PROLONGATION OF THE NORTHERLY LINE OF THAT CERTAIN PARCEL OF LAND CONVEYED TO H. S. SCOTT, BY DEED RECORDED AUGUST 2, 1957, BOOK 3859, OFFICIAL RECORDS, PAGE 29; THENCE SOUTH 81° 49' 06" EAST AND ALONG SAID PROLONGED LINE AND ALONG THE NORTHERLY LINE OF SAID LAND SO CONVEYED TO H. S. SCOTT, 833.13 FEET TO THE NORTHEAST CORNER THEREOF IN SAID NORTHWEST LINE OF SARATOGA AVENUE; THENCE ALONG SAID NORTHWEST LINE OF SARATOGA AVENUE, NORTH 42° 36' 42" EAST, 84.87 FEET TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM THAT PORTION OF SAID EASEMENT CONVEYED BY THAT CERTAIN QUITCLAIM DEED RECORDED OCTOBER 30, 1989 IN BOOK L145, PAGE 545, OFFICIAL RECORDS.

PARCEL SIX:

PARCEL SIX-A:

PARCEL C, AS SHOWN UPON THE PARCEL MAP FILED MAY 27, 1977 IN BOOK 397 OF MAPS, PAGE 44, SANTA CLARA COUNTY RECORDS.

PARCEL SIX-B:

EASEMENTS FOR PEDESTRIAN AND VEHICULAR INGRESS AND EGRESS AND PARKING GRANTED IN THAT CERTAIN DECLARATION ESTABLISHING RECIPROCAL PARKING RECORDED APRIL 21, 2005 AS INSTRUMENT NO. 18335996, OFFICIAL RECORDS.

PARCEL SEVEN:

PARCEL SEVEN-A:

ALL OF PARCEL 2 AS SHOWN ON THAT CERTAIN PARCEL MAP FILED FOR RECORD ON APRIL 5, 1973 IN BOOK 320 OF MAPS, PAGE 29.

PARCEL SEVEN-B:

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

GRANT DEED

DUE TO LOT LINE ADJUSTMENT

The Undersigned Declare(s):

DOCUMENTARY TRANSFER TAX/CITY TRANSFER TAX/SURVEY MONUMENT FEE: $-0- The Grantor and the Grantee in this conveyance are comprised of the same parties who continue to hold the same proportionate interest in the Property. Revenue & Taxation Code section 11923, subd. (d).

[ ] computed on the consideration or full value of property conveyed, OR
[ ] computed on the consideration or full value less value of liens and/or encumbrances remaining at time of sale,
[ ] City of San Jose

FOR VALUE RECEIVED, DS WESTGATE WEST LP., a Delaware limited partnership ("Grantor"), grants to DS WESTGATE WEST LP., a Delaware limited partnership ("Grantee"), all that certain real property situated in the City of San Jose, County of Santa Clara, State of California, described on Schedule 1 attached hereto and by this reference incorporated herein (the "Property").

SUBJECT TO the following: (a) all liens, encumbrances, easements, covenants, conditions, restrictions and other matters of record; (b) all matters which a correct survey of the Property would disclose; (c) all matters which could be ascertained by a physical inspection of the Property; (d) interests of parties in possession; (e) a lien not yet delinquent for taxes for real property and personal property, and any general or special assessments against the Property; and (f) building and zoning ordinances and regulations and any other laws, ordinances, or governmental regulations restricting, regulating or relating to the use, occupancy or enjoyment of the Property.

This Grant Deed may be executed in any number of counterparts, each of which shall be deemed an original and all of which shall constitute one and the same document with the same effect as if all parties had signed the same signature page.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

My response is for records from the Code Enforcement Division only. Your original request submitted through the Open Government Manager was forwarded to multiple departments. Each department will respond to your request.

There is currently an open case on this property. The inspector handling this case is Kevin Hirabayashi, you can contact him at 408 794 - 7488 or at Kevin.Hirabayashi@sanjoseca.gov

Here is the link to search for any open/closed Code Enforcement cases for any property in San Jose.
In the search field only type the street number or the street name not both.

Licensed Contractors Declaration: I hereby affirm *under penalty of perjury* that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect. Date: 10/19/99 Contractor Signature: Alan Ford

Owner-Builder Declaration: I hereby affirm *under penalty of perjury* that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5 Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for the permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9, (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars ($500):

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractor License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or herself or through his or her own employees, provided that the improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he or she did not build or improve for the purpose of sale).
☐ I, as owner of property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for the project with a contractor(s) licensed pursuant to the Contractors License Law).
☐ I am exempt under Sec. _____, B & P.C. for this reason _____

Date: _____ Owner Signature: _____

Workers' Compensation Declaration: I hereby affirm *under penalty of perjury* one of the following declarations:

☐ I have and will maintain a certificate of consent to self-insure for workers' compensation. as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.
☒ I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

CARRIER: Cal Comp Insurance POLICY NO. W99 4174-744

(This section need not be completed if the permit is for one hundred dollars ($100) or less.)

☐ I certify that, in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers' compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 10/19/99 Applicant Signature: Alan Ford

WARNING: Failure to secure workers' compensation coverage is unlawful, and shall subject an employer to criminal penalties and civil fines up to one hundred thousand dollars ($100,000), in addition to the cost of compensation, damages as provided for in Section 3706 of the Labor Code, interest, and attorney fees.

Construction Lending Agency Declaration: I hereby affirm *under penalty of perjury* that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097. Civ. C.).

Lender's Name: _____ Lender's Address: _____

I Certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

1. THE CONTRACTOR SHALL CHECK AND VERIFY ALL DIMENSIONS AND CONDITIONS AT THE SITE BEFORE LAYING OUT ANY WORK AND NOTIFY THE ARCHITECT OF ANY DISCREPANCIES BEFORE STARTING WORK. HE SHALL BE RESPONSIBLE FOR ANY ERRORS RESULTING FROM HIS FAILURE TO DO SO.
2. ALL CONSTRUCTION SHALL COMPLY WITH ALL APPLICABLE MINIMUM REQUIREMENTS OF THE LOCAL BUILDING CODE.
3. THE STRUCTURE IS DESIGNED AS A STABLE UNIT WHEN ALL COMPONENT PARTS OF THE STRUCTURE ARE IN PLACE. THE CONTRACTOR SHALL PROVIDE ALL NECESSARY BRACING, BRACING, ETC. REQUIRED TO INSURE STABILITY OF EACH AND ALL PARTS DURING CONSTRUCTION PROCEDURE. ANY DAMAGE TO THE STRUCTURE BECAUSE OF FAILURE TO DO SO, SHALL BE REPAIRED OR REPLACED AS REQUIRED AT CONTRACTORS EXPENSE.
4. ALL FRAMING MEMBERS SHALL BE SO ARRANGED AND SPACED SO AS TO PERMIT INSTALLATION OF PIPES, ELECTRICAL WORK, DUCTS, ETC., WITH A MINIMUM OF CUTTING.
5. DIMENSIONS TAKE PRECEDENCE OVER SCALE, DO NOT SCALE DRAWINGS. EXTERIOR WALL DIMENSIONS ARE TO FACE OF CONCRETE OR FRAMING. INTERIOR WALL DIMENSIONS ARE TO CENTER LINE OF FRAMING, UNLESS NOTED OTHERWISE.

CONCRETE

1. CEMENT SHALL CONFORM TO ASTM C-150-69T, TYPE I OR II.
2. AGGREGATE SHALL CONFORM TO ASTM C-33&6 WITH 1½" MAXIMUM SIZE.
3. READY MIX CONCRETE SHALL CONFORM TO ASTM C-9A.
4. CONCRETE MIX SHALL DEVELOP A MINIMUM COMPRESSIVE STRENGTH OF 2000 P.S.I. AT THE END OF 28 DAYS.
5. PRIOR TO POURING OF CONCRETE, THIS CONTRACTOR SHALL MAKE CERTAIN THAT ALL EMBEDDED ITEMS AND MATERIALS ARE IN PLACE AND SECURELY ANCHORED.
6. CONCRETE SHALL BE PLACED IN SUCH A MANNER AS TO INSURE AGAINST SEGREGATION, FORMATION OF VOIDS AND ROCK POCKETS.
7. ALL MINIMUM FOOTING DEPTHS SHALL BE MEASURED FROM NATURAL GRADE OR APPROVED COMPACTED FINISH GRADE.
8. FOUNDATION BOLTS SHALL BE ⅝"x10" AT 3'-0" O.C., UNLESS OTHERWISE NOTED, SET WITHIN 12" OF CORNERS OR END OF PLATES. ALL ANCHOR BOLTS SHALL BE EMBEDDED A MINIMUM OF 7" INTO CONCRETE, UNLESS OTHERWISE NOTED. ALL NON-BEARING WALL PLATES MAY BE FASTENED TO CONCRETE WITH ½" REMINGTON #S-410-4D OR EQUAL SHOTS WITH #10 D WASHERS AT 48" O.C. UNLESS OTHERWISE NOTED.

MASONRY

1. ALL CONCRETE BLOCKS SHALL BE GRADE 'A', CONFORMING TO ASTM C-90, 1500 P.S.I.
2. ALL CELLS CONTAINING REINFORCING AND BELOW FINISH GRADE SHALL BE GROUTED SOLID.
3. PROVIDE BOND BEAM BLOCK FOR ALL HORIZONTAL REINFORCING.
4. BLOCKS SHALL BE EMBEDDED IN MORTAR WITH FULL HEAD JOINTS
5. MORTAR SHALL CONSIST OF ONE PART CEMENT, 4 PARTS SAND AND ¼ PART HYDRATED LIME AND SHALL CONFORM TO ASTM C-270-52, TYPE S, 1800 P.S.I.
6. GROUT SHALL CONSIST OF ONE PART CEMENT, 3 PARTS SAND AND 2 PARTS PEA GRAVEL WITH SUFFICIENT WATER TO ALLOW GROUT TO FLOW INTO ALL JOINTS AND VOIDS, WITH A MIN. COMPRESSIVE STRENGTH OF 2000 P.S.I. AT THE END OF 28 DAYS.
7. PROVIDE EXTRA REINFORCING BARS AROUND ALL OPENINGS AS NOTED ON DRAWINGS (IF NOT NOTED PROVIDE A MINIMUM OF 2 #4 BARS).
8. ALL REINFORCING, BOLTS, ANCHORS, INSERTS, ETC., SHALL BE IN PLACE BEFORE ANY GROUT IS POURED.
9. CLEANOUT OPENINGS SHALL BE PROVIDED AT THE BOTTOM OF ALL CELLS CONTAINING VERTICAL REINFORCING.
10. ALL ANCHOR BOLTS SHALL BE EMBEDDED A MINIMUM OF 6" WITH 2" HOOK.

REINFORCING STEEL

1. ALL REINFORCING STEEL SHALL BE GRADE 40 IN ACCORDANCE WITH ASTM A615. ELECTRIC WELDED WIRE MESH SHALL CONFORM TO ASTM A185-61T.
2. BARS NOTED "CONT.", TYPICAL WALL REINFORCING AND VERTICAL COLUMN REINFORCING SHALL HAVE A MINIMUM SPLICE OF 30 BAR DIAMETER LAP IN CONCRETE AND 40 BAR DIAMETER LAP IN MASONRY, SPLICED IN ADJACENT HORIZ. WALL BARS SHALL BE STAGGERED 48" MINIMUM, UNLESS OTHERWISE NOTED. WELDED WIRE MESH SHALL BE LAPPED ONE MESH SPACE MINIMUM.
3. LOW HYDROGEN WELDING RODS SHALL BE USED FOR ALL WELDING TO REINFORCING BARS.
4. PROVIDE DOWELS IN FOOTINGS THE SAME SIZE AND NUMBER AS VERTICAL WALL OR COLUMN REINFORCING, DOWELS SHALL HAVE A MINIMUM PROJECTION EQUAL TO STANDARD LAP SPLICE, UNLESS OTHERWISE NOTED.
5. ALL REINFORCING SHALL BE SECURED IN PLACE PRIOR TO PLACING OF CONCRETE OR GROUTING MASONRY.
6. PROVIDE THE FOLLOWING MINIMUM PROTECTIVE COVERING OF CONCRETE: BELOW GRADE (UNFORMED) 3" CLEAR; BELOW GRADE (FORMED), 2" CLEAR; WALLS, 1" CLEAR; COLUMNS & BEAMS, 1½" CLEAR AND STRUCTURAL SLABS ABOVE GRADE, ¾" CLEAR.

STRUCTURAL STEEL

1. STRUCTURAL STEEL SHALL CONFORM TO ASTM A-36.
2. PIPE COLUMNS SHALL CONFORM TO ASTM A53, GRADE B.
3. ALL BOLTS FOR STEEL MEMBERS SHALL CONFORM TO ASTM A307, UNLESS OTHERWISE NOTED.
4. DETAILING, FABRICATION AND ERECTION SHALL CONFORM TO THE LATEST AISC SPECIFICATION FOR THE DESIGN, FABRICATION AND ERECTION OF STRUCTURAL STEEL FOR BUILDINGS.
5. WELDING SHALL BE BY THE ELECTRIC SHIELDED ARC PROCESS PER ASTM A233, LATEST EDITION, DONE BY A CERTIFIED WELDER APPROVED BY THE BUILDING DEPARTMENT. ALL WELDING SHALL BE IN ACCORDANCE WITH THE AMERICAN WELDING SOCIETY STANDARDS.
6. SEQUENCE OF PLACING WELDS SHALL BE SUCH TO AVOID DISTORTION OF MEMBERS.
7. WHERE FINISH MATERIALS ARE ATTACHED TO STRUCTURAL STEEL MEMBERS, PROVIDE ½" BOLT HOLES AT 48" O.C. FOR THE ATTACHMENT OF NAILERS.

WOOD

1. ALL FRAMING LUMBER SHALL COMPLY WITH GRADING RULE NO. 16 AS SPECIFIED BY THE WEST COAST LUMBER INSPECTION BUREAU.
2. ALL FRAMING LUMBER SHALL BE GRADE MARKED DOUGLAS FIR OF THE FOLLOWING GRADES, UNLESS OTHERWISE NOTED:

REPETITIVE USE MEMBERS: STUDS, JOIST, PLATES, RAFTERS.		
STUDS		925#
2x4 TO 4x4 INCLUSIVE	NO.2	1060#
2x6 TO 3x16 INCLUSIVE	NO.2	1450#
SINGLE USE MEMBERS - BEAMS		
4x	NO.2	1250#
6x AND LARGER	NO.1	1350#
4x4 AND SMALLER	NO.2	1060#
POST AND MULLIONS.		
4x4 AND LARGER	NO.2	1250#
6x6 AND LARGER	NO.1	1200#
MISC. LUMBER.		
BLOCKING & FURRING	NO.3	825#

3. ALL LUMBER ON CONCRETE OR MASONRY IN DIRECT CONTACT WITH EARTH SHALL BE PRESSURE TREATED DOUGLAS FIR OR FOUNDATION GRADE REDWOOD.
4. STRUCTURAL PLYWOOD SHALL BE STRUCTURAL II, GROUP I (EXTERIOR GLUE) UNLESS NOTED OTHERWISE CONFORMING TO PS-1-66.
5. UNLESS OTHERWISE NOTED, ALL WALL FRAMING SHALL BE 2x4 STUDS AT 16" O.C.
6. PROVIDE 1x4 LET-IN BRACES FOR EACH 25 LINEAL FEET OF WALL AND AT EACH CORNER, LAID AT 45° ANGLE AND SHALL CONNECT TO AT LEAST 4 STUDS.
7. ALL NAILING SHALL COMPLY WITH THE LATEST ADOPTED LOCAL BUILDING CODE.
8. PROVIDE 2-2x4 STUDS OR 4x4 POST UNDER ENDS OF ALL BEAMS, HEADERS & WALLS OR AS NOTED.
9. WINDOW SILLS 8'-0" AND OVER SHALL BE DOUBLED.
10. LAP ALL TOP PLATES 4'-0" MINIMUM & NAIL WITH 8-16d STAGGERED OR AS NOTED.
11. PROVIDE DOUBLE JOIST UNDER ALL PARALLEL NON-BEARING PARTITIONS.
12. ALL BEAMS AND HEADERS SHALL HAVE 1½" MINIMUM BEARING.
13. PROVIDE SOLID BLOCKING AS FOLLOWS:
    2" SOLID FIRE BLOCKING AT ALL SOFFITS, FURRED CEILING AND ALL STUD WALLS OVER 9'-0" HIGH AT MID-HEIGHT.
    BLOCK OR BRIDGE 2x8 & LARGER CEILING JOIST AT 10'-0" MAX. INTERVALS.
    BLOCK OR BRIDGE 2x8 & LARGER FLOOR JOIST AT 8'-0" MAX. INTERVALS.
    SOLID BLOCK ALL FLOOR JOIST AT SUPPORTS.
    2" BLOCKING AT 24" O.C. FOR VERTICAL SIDING.
    PROVIDE 2x6 FLAT SOLID BLOCKING FOR BATHROOM ACCESSORIES, WARDROBE TRACKS, FINISH HARDWARE, ETC. AS REQUIRED.
14. PROVIDE ¢ NAILERS ATTACHED TO STRUCTURAL STEEL WITH ½" BOLTS OR STUDS AT 48" O.C. FOR ATTACHMENT OF FINISH MATERIALS NOTED OR SHOWN ON DRAWINGS.
15. HOLES FOR BOLTS SHALL BE DRILLED 1/32" TO 1/16" LARGER THAN BOLT SIZE.
16. ALL JOIST HANGERS FOR FLUSH CONSTRUCTION SHALL BE SIMPSON TYPE "U" AND ALL BEAM HANGERS SHALL BE SIMPSON TYPE "HUTF", UNLESS OTHERWISE NOTED.
17. PROVIDE CERTIFICATES OF INSPECTION BY AN APPROVED LABORATORY FOR EACH GLUE-LAMINATED MEMBER AND SUBMIT TO THE BUILDING DEPARTMENT FOR APPROVAL PRIOR TO ERECTION.
18. END STUD OF ALL WALLS AGAINST CONCRETE OR MASONRY SHALL BE BOLTED WITH ½" ANCHOR BOLTS AT 4'-0" O.C. & WITHIN 6" OF TOP & BOTTOM OF STUD.
19. PROVIDE WASHERS FOR ALL BOLTS BEARING ON WOOD, A MINIMUM OF 2" LARGER THAN BOLT SIZE.

NOTE!
SEE DETAIL THIS SHEET FOR POURING CONCRETE FOOTING AFTER WRAPPING CYLINDER

PROTECTION OF HOIST CYLINDER, RESERVOIR TANK & PIPING

1. HOIST CYLINDER, AIR/OIL TANK, AIR AND OIL PIPING & FITTINGS BELOW GRADE SHALL BE WRAPPED WITH PROTECTIVE TAPE SCOTCHWRAP 50 AS MFG. BY THE 3M CO OR APPROVED EQUAL. TAPE IS FURNISHED WITH THE HOISTS - SEE SPECIFICATIONS, SECTION "U"
   1. COVER ALL PLUGS WITH THREE LAYERS OF TAPE.
   2. COVER THE BOTTOM (BORE PLATE) OF THE CYLINDER FIRST WITH (2) COMPLETE LAPS, THEN SPIRAL UP OVERLAPPING AT LEAST 50% ON EACH LAP. PULL TAPE TIGHT AS YOU WRAP. THE CYLINDER EXCEPT FOR THE LAST TWO TURNS. THESE LAST TWO TURNS SHALL BE MADE WITHOUT STRETCHING TAPE.
   3. NONE OF THE STEEL CASING, AIR/OIL TANK, OR PIPING SHALL BE LEFT EXPOSED.
   4. EXTREME CARE SHALL BE TAKEN SO AS NOT TO CUT, NICK, OR MAR THE CORROSION PROTECTION TAPE AFTER CYLINDER IS WRAPPED. ANY HOLES IN THE TAPE WILL ACCELERATE CORROSION IN THE EXPOSED AREA, AND MUST BE AVOIDED.

ISOMETRIC SHOWING PROTECTIVE WRAPPING APPLICATION FOR CYLINDERS, TANK & PIPING

NOT TO SCALE

GENERAL NOTES

1. SEE FLOOR PLAN FOR FINISH FLOOR ELEVATION & TWO PLUNGER HOIST LOCATION
2. DETAILS FOR TWIN POST FULL HYDRAULIC HOIST INSTALLATION SHALL BE IN ACCORDANCE TO LATEST MANUFACTURER'S INSTALLATION INSTRUCTIONS, SPECIFICATIONS, AND LOCAL, STATE, AND NATIONAL CODES WHICH APPLY.
3. CYLINDERS, AIR-OIL TANK, AIR, AND OIL CONTROL VALVES WILL BE FURNISHED BY FIRESTONE AND INSTALLED BY CONTRACTOR. ALL PIPING AND FITTINGS SHALL BE FURNISHED AND INSTALLED AS REQUIRED BY CONTRACTOR.
4. PROTECTIVE TAPE SHALL BE APPLIED TO ALL UNDERGROUND CYLINDERS, AIR-OIL TANK, PIPING, AND FITTINGS AS PER MANUFACTURER'S SPECIFICATIONS.
5. EACH PISTON SHALL BE FILLED WITH CLEAN WASHED SAND TO SERVE AS A BALLAST.
6. NOMENCLATURE: HOISTS ALSO CALLED LIFTS, CYLINDERS ALSO CALLED JACKS, PISTON ALSO CALLED PLUNGER.

FRONT [redacted] CONTROLS

NOTE!
THIS DRAWING IS FOR REFERENCE ONLY. ACTUAL INSTALLATION SHALL BE IN STRICT ACCORDANCE WITH MANUFACTURER'S LATEST INSTALLATION MANUAL AND INSTRUCTIONS WHICH SHALL BE FURNISHED WITH THE HOIST.
SEE FLOOR PLAN FOR CYLINDER SETTING RING ELEVATION

CITY OF SAN JOSE—MEMORANDUM

TO: Frank Brown, Building Department

FROM: S. A. Haugen

SUBJECT: 3-000, DEVELOPMENT CLEARANCE

DATE: February 28, 1985

APPROVED

DATE 4/30/85

5287 Prospect Rd.

Effective immediately, Area Fees applicability will be determined in Room 340. Certain categories of project need no area fee review and these exemptions are:

1. New single-family residence in Tract No. , Lot .
2. Room additions and accessory structures in residential Tract No. , Lot .
3. Patio covers, screen rooms and decks, carports.
4. Re-roofing.
5. Interior alterations (except existing specified buildings-shells) unless there is an addition to commercial or industrial plumbing or change in use in which cases Public Works review is needed.
6. Fire damage repair (replacement, no additional floor area).

Area Fee review is necessary in all other cases. New single family construction or additions, if they are on existing lots, will be determined and cleared directly in Room 340.

All other cases require a DEVELOPMENT CLEARANCE which includes area fee review. In these cases, please refer the applicant to Room 340 with instructions to bring a copy of the approved Planning Department permit and the Assessor's Parcel Map that includes the site. A sample Development Clearance is attached.

If you have any questions please call Tom Boardman at X5161.

EXCEPTION FROM HANDICAPPED LAW COMPLIANCE

The Building Department is permitted to grant exceptions from the State of California Title 24 accessibility standards where a finding of unreasonable hardship is made. In order to process your request for an exception, the following information is needed.

Applicant's Name (print or type) Warren Jacobsen - Architect.

Project Address 5287 Prospect Road, San Jose Plan Check No. 31054.

1. The cost* of access features(s) is ~~$4,000.00~~ $200.00.
2. The cost of all construction contemplated is $24,000.00.
3. (a) The access feature increases the cost of construction by 16 %.
   (b) The impact of proposed improvements on feasibility of the project is _____.
4. The accessibility feature(s) which would be gained or lost is:
   One bathroom would comply with 1979 UBC and Title 24 rather than 1972 UBC.
5. Type of facility under construction is Midas Muffler Shop. It is used by the general public for the purpose of replacing mufflers and brakes.

Applicant's signature Warren Jacobs Date 5-8-85

This Section is to be filled in by the Building Department:

The determination of unreasonable hardship and this documentation do not allow a blanket exemption from the access requirements. The exception provided for by this form applies to the following item of the project:

_____.

As Specified by Title 24, (check one):

50074 1483

1. Equivalent facilitation will be provided as specified in Section _____.
2. Equivalent facilitation will be provided, as determined by this enforcing body. See Section _____.
3. No provision of equivalent facilitation is necessary. See Section _____.
4. The approval of the Code Enforcement Appeals Commission is necessary to ratify the determination of unreasonable hardship. See Section _____ and Section 2-105(b) 11D.

Approved: _____ Date: 5/16/85.

(if applicable) Action of Appeals Commission Item # _____ Date _____.

*The actual cost of access should be computed, not the total cost of the feature proposed to be excepted. For instance, the cost to provide 32" clear openings on the doorway should not include the entire cost of a door if a new door is to be provided anyway.

COVENANT OF EASEMENT
(Government Code sec. 65871;
SJMC Ch. 20.110, Part 1)

WHEREAS, Donahue Schriber Realty Group, LP, a Delaware limited partnership ("OWNER") is the owner of all that real property described in Exhibit "A" attached hereto and incorporated herein by reference ("PROPERTY"); and

WHEREAS, the CITY OF SAN JOSE, a municipal corporation ("CITY") has required that a non-exclusive easement be provided for parking pursuant to the provisions of Government Code sections 65870-65875 and Part 1 of Chapter 20.110 of the San Jose Municipal Code; and

WHEREAS, OWNER intends to comply with the above-described condition of approval by creating the required easement on the PROPERTY.

NOW, THEREFORE, OWNER grants to the CITY a non-exclusive easement for parking on the PROPERTY described herein in Exhibit "A." Said easement is more particularly described as in Exhibit "B."

This Covenant of Easement shall be recorded in the office of the Santa Clara County Recorder. Upon recordation, the burdens of the Covenant shall be binding upon all successors in interest to the real PROPERTY described in Exhibit "A."

[document continues on following page]

This Covenant of Easement shall not be modified or released without the prior approval of the CITY in the manner required by applicable law.

EXHIBIT "A"
COVENANT OF EASEMENT
LEGAL DESCRIPTION

all that certain real property situated in the City of San Jose, County of Santa Clara, State of California, being more particularly described as follows:

Parcel One-A, Parcel One-B, Parcel Two-A, Parcel Three-A, Parcel Four-A, Parcel Six-A, Parcel Seven-A, Parcel Eight-A and Parcel Nine-A, as said parcels are described in the Grant Deed to DS WESTGATE WEST LP, recorded in the office of the Recorder of Santa Clara County on September 20, 2016 as Document No. 23437545.

EXCEPTING THEREFROM the following described portion of said Parcels One-A, One-B and Eight-A:

COMMENCING at the Southeast corner of said Parcel One-B;
Thence, along the southerly boundary of said Parcel One-B, the following two (2) courses:
(1) North 81°50'00" West, 20.03 feet;
(2) North 70°29'13" West, 39.24 feet to the **POINT OF BEGINNING**;
Thence, continuing along said southerly boundary of said Parcel One-B, the following two (2) courses:
(1) North 70°29'13" West, 38.71 feet;
(2) along a tangent curve to the right, having a radius of 71.00 feet, through a central angle of 44°15'24", with an arc length of 54.84 feet;
Thence North 09°30'15" East, 113.04 feet;
Thence North 43°55'23" West, 7.76 feet;
Thence North 04°43'46" East, 76.11 feet;
Thence North 03°58'36" East, 159.17 feet;
Thence along a tangent curve to the right, having a radius of 18.00 feet, through a central angle of 92°49'18", with an arc length of 29.16 feet; thence South 83°12'06" East, 40.33 feet; thence South 02°56'41" West, 156.21 feet;
Thence South 81°29'38" East, 27.53 feet;
Thence South 07°59'50" West, 88.61 feet;
Thence South 82°04'02" East, 2.90 feet;
Thence South 08°20'24" West, 165.56 feet to the **POINT OF BEGINNING**.

ALSO EXCEPTING THEREFROM the following described portion of said Parcels One-A, and Seven-A:

COMMENCING at the Northwest corner of said Parcel Seven-A;
Thence, along the westerly boundary of said Parcel Seven-A, South 02°08'27" West, 34.30 feet to an angle point in said westerly boundary;
Thence South 80°57'09" East, 9.82 feet to the **POINT OF BEGINNING**;

Thence South 81°45'04" East, 360.06 feet;
Thence South 08°08'54" West, 37.36 feet;
Thence South 81°30'44" East, 77.75 feet;
Thence South 08°13'04" West, 172.52 feet;
Thence North 81°51'12" West, 426.96 feet;
Thence North 05°15'39" East, 211.25 feet to the **POINT OF BEGINNING**.

ALSO EXCEPTING THEREFROM the following described portion of said Parcels Six-A, and Seven-A:

COMMENCING at the Northeast corner of said Parcel Six-A;
Thence North 51°09'33" West, 45.86 feet to the **POINT OF BEGINNING**;
Thence South 08°50'26" West, 219.91 feet;
Thence North 81°50'00" West, 112.66 feet;
Thence North 08°07'29" East, 219.78 feet;
Thence South 81°53'21" East, 115.41 feet to the **POINT OF BEGINNING**.

ALSO EXCEPTING THEREFROM the following described portion of said Parcels One-A, Six-A, and Nine-A:

COMMENCING at the Southwest corner of said Parcel Nine-A;
Thence North 05°17'11" East, 41.24 feet to the **POINT OF BEGINNING**;
Thence North 08°28'39" East, 130.67 feet;
Thence South 81°31'21" East, 75.84 feet;
Thence North 08°28'39" East, 16.00 feet;
Thence South 81°31'35" East, 69.46 feet;
Thence South 08°28'39" West, 146.76 feet;
Thence North 81°28'28" West, 20.52 feet;
Thence North 08°28'39" East, 18.06 feet;
Thence North 81°31'21" West, 53.00 feet;
Thence South 08°28'39" West, 18.00 feet;
Thence North 81°31'02" West, 71.78 feet to the **POINT OF BEGINNING**.

ALSO EXCEPTING THEREFROM the following described portion of said Parcels One-A, Two-A, and Three-A:

COMMENCING at the Southwest corner of said Parcel Two-A;
Thence North 01°06'57" East, 68.35 feet to the **POINT OF BEGINNING**;
Thence North 08°01'40" East, 87.31 feet;
Thence South 81°52'29" East, 7.83 feet;
Thence North 08°15'39" East, 33.79 feet;
Thence South 81°51'06" East, 163.97 feet;

Thence South 07°59'36" West, 121.04 feet;
Thence North 81°52'20" West, 172.02 feet to the **POINT OF BEGINNING**.

ALSO EXCEPTING THEREFROM the following described portion of said Parcels One-A, Three-A and Four-A:

COMMENCING at the Northeast corner of said Parcel One-A;
Thence South 62°34'12" West, 76.12 feet to the **POINT OF BEGINNING**;
Thence South 81°51'40" East, 291.50 feet;
Thence South 08°07'42" West, 52.73 feet;
Thence South 81°36'31" East, 116.51 feet;
Thence South 08°09'53" West, 274.63 feet;
Thence North 81°50'48" West, 261.71 feet;
Thence North 08°50'18" East, 40.08 feet;
Thence North 81°47'37" West, 147.47 feet;
Thence North 08°17'52" East, 287.55 feet to the **POINT OF BEGINNING**.

ALSO EXCEPTING THEREFROM the following described portion of said Parcel Three-A:

COMMENCING at the Southeast corner of said Parcel Three-A;
Thence North 13°18'59" West, 29.16 feet;
Thence North 82°38'56" West, 95.98 feet;
Thence North 08°14'09" East, 181.53 feet;
Thence North 41°26'40" East, 39.65 feet to the **POINT OF BEGINNING**;
Thence North 08°13'14" East, 218.20 feet;
Thence South 81°36'38" East, 79.84 feet;
Thence South 08°07'58" West, 83.82 feet;
Thence South 80°25'16" East, 41.02 feet;
Thence South 08°08'08" West, 133.30 feet;
Thence North 81°43'14" West, 121.17 feet feet to the **POINT OF BEGINNING**.

ALSO EXCEPTING THEREFROM the following described portion of said Parcel Three-A:

COMMENCING at the Southeast corner of said Parcel Three-A;
Thence North 13°18'59" West, 29.16 feet to the **POINT OF BEGINNING**;
Thence North 82°38'56" West, 95.98 feet;
Thence North 08°14'09" East, 181.53 feet;
Thence South 82°00'42" East, 96.34 feet;
Thence South 08°21'10" West, 180.46 feet to the **POINT OF BEGINNING**.

The above described easement is graphically depicted on Exhibit "B" attached hereto and made a part hereof.

This description was prepared by me or under my direction pursuant to the California Professional Land Surveyor's Act.

2nd Installment:	$58,767.28, Open
Exemption:	$
Land:	$7,594,920.00
Improvements:	$884,340.00
Personal Property:	$
Bill No.:	none shown

Prior to close of escrow, please contact the Tax Collector's Office to confirm all amounts owing, including current fiscal year taxes, supplemental taxes, escaped assessments and any delinquencies.

3. The lien of supplemental or escaped assessments of property taxes, if any, made pursuant to the provisions of Chapter 3.5 or Part 2, Chapter 3, Articles 3 and 4 respectively (commencing with Section 75) of the Revenue and Taxation Code of the State of California as a result of the transfer of title to the vestee named in Schedule A; or as a result of changes in ownership or new construction occurring prior to date of policy.

4. **Easement(s)** for the purpose(s) shown below and rights incidental thereto as granted in a document.

Granted to:	Pacific Gas and Electric Company and the Pacific Telephone and Telegraph Company, a California corporation
Purpose:	public utility easement
Recorded:	July 5, 1955, Book 3214, Page 218, of Official Records
Affects:	As follows:

A strip of land 5 feet wide lying contiguous to and Southerly of the Northerly boundary line of premises, land extending from the Westerly boundary line of the state highway commonly known as Oakland Road, Westerly 280 feet.

Reference is hereby made to said document for full particulars.

5. **Easement(s)** for the purpose(s) shown below and rights incidental thereto as delineated or as offered for dedication, on the map of said tract.

Purpose:	Public Service Easement
Affects:	As shown on the Recorded map

6. **Easement(s)** for the purpose(s) shown below and rights incidental thereto as granted in a document.

Granted to:	Pacific Gas and Electric Company, a California corporation
Purpose:	Underground and aboveground facilities
Recorded:	November 1, 1984, Book J008, Page 262, of Official Records
Affects:	As follows:

1. A strip of land of the uniform width of 10 feet lying contiguous to and Westerly of the Westerly boundary line of the street known as Oakland Road and extending from the Northerly boundary line of said lands Southerly to the Southerly boundary of said lands.

2. A strip of land of the uniform width of 10 feet lying contiguous to and Northerly of the Southerly boundary line of said lands and extending from the Westerly boundary line of said Oakland Road Westerly to the Westerly boundary line of said lands.

3. A strip of land of the uniform width of 10 feet lying 5 feet on each side of a line which begins at a point in the Southerly boundary line of said lands and extending Northerly from the Northerly boundary line of said Strip 2 and runs thence North 0° 52' West 58.0 feet to a point within said lands; said point of beginning bears South 89° 08' West 236.3 feet distant from the Southeast corner of said lands.

4. A strip of land of the uniform width of 10 feet lying 5 feet on each side of a line which begins at a point in the Southerly boundary line of said lands and extending Northerly from the Northerly boundary line of said Strip 2 and runs thence North 0° 52' West 58.0 feet to a point within said lands; said point of beginning bears South 89° 08' West 650.1 feet distant from the Southeast corner of said lands.

Reference is hereby made to said document for full particulars.

7. Any Rights, Interests or Claims which may exist or arise by reason of the following facts shown by a survey made by Kier & Wright Civil Engineers & Surveyors, Inc., dated October 10, 2007, last revised January 17, 2008, Job No. A06169-1, and inspections of said land, excepting therefrom matters subsequent to said date:

(A) the fact that a face of wall encroaches onto the PG&E and PT&T easement recorded in 3214 OR 218 along the northerly boundary.

(B) the fact that a fence gate encroaches 1.4' onto the PG&E and PT&T easement recorded in 3214 OR 218 along the northerly boundary.

(C) the fact that a sign located along the easterly boundary near the northeast corner encroaches onto the 10.0' PG&E easement recorded in J008 OR 262.

(D) the fact that a trash enclosure located along the southerly boundary encroaches onto the 10.0' PG&E easement recorded in J008 OR 262.

(E) the fact that a face of wall encroaches over the southerly boundary and also onto the PG&E easement recorded in J008 OR 262 between 0.1 and 0.9'.

Entitled:	State of California Notice of Non-Reponsibility
Lessor:	Kostick & Wang, LLC, a California limited liability company
Lessee:	Reel Solar
Recording Date:	February 29, 2012
Recording No.:	21555818 of Official Records

The present ownership of the leasehold created by said lease and other matters affecting the interest of the lessee are not shown herein.

13. The Company will require the following documents for review prior to the issuance of any title assurance predicated upon a conveyance or encumbrance from the entity named below:

Limited Liability Company: Kostick & Wang, LLC, a California limited liability company

a) A copy of its operating agreement, if any, and any and all amendments, supplements and/or modifications thereto, certified by the appropriate manager or member

b) If a domestic Limited Liability Company, a copy of its Articles of Organization and all amendments thereto with the appropriate filing stamps

c) If the Limited Liability Company is member-managed, a full and complete current list of members certified by the appropriate manager or member

d) If the Limited Liability Company was formed in a foreign jurisdiction, evidence, satisfactory to the Company, that it was validly formed, is in good standing and authorized to do business in the state of origin

e) If less than all members, or managers, as appropriate, will be executing the closing documents, furnish evidence of the authority of those signing.

The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

14. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the Public Records.

The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

15. Matters which may be disclosed by an inspection and/or by a correct ALTA/ACSM Land Title Survey of said Land that is satisfactory to the Company, and/or by inquiry of the parties in possession thereof.

16. The Company will require that an Owner's Affidavit be completed by the party(s) named below before the issuance of any policy of title insurance.

Party(s): Kostick & Wang, LLC, a California limited liability company

The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit.

17. The transaction contemplated in connection with this Report is subject to the review and approval of the Company's Corporate Underwriting Department. The Company reserves the right to add additional items or make further requirements after such review.

END OF ITEMS

Note 1. There are NO conveyances affecting said Land recorded within 24 months of the date of this report.

Note 2. The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land commercial property, known as 2219 - 2223 Oakland Road, San Jose, California, to an Extended Coverage Loan Policy.

Note 3. Your application for title insurance was placed by reference to only a street address or tax identification number. Based on our records, we believe that the legal description in this report covers the parcel(s) of Land that you requested. If the legal description is incorrect, the seller/borrower must notify the Company and/or the settlement company in order to prevent errors and to be certain that the correct parcel(s) of Land will appear on any documents to be recorded in connection with this transaction and on the policy of title insurance.

Note 4. Note: If a county recorder, title insurance company, escrow company, real estate broker, real estate agent or association provides a copy of a declaration, governing document or deed to any person, California law requires that the document provided shall include a statement regarding any unlawful restrictions. Said statement is to be in at least 14-point bold face type and may be stamped on the first page of any document provided or included as a cover page attached to the requested document. Should a party to this transaction request a copy of any document reported herein that fits this category, the statement is to be included in the manner described.

Note 5. Any documents being executed in conjunction with this transaction must be signed in the presence of an authorized Company employee, an authorized employee of an agent, an authorized employee of the insured lender, or by using Bancserv or other approved third-party service. If the above requirement cannot be met, please call the Company at the number provided in this report.

END OF NOTES

OFFICE OF COUNTY ASSESSOR — SANTA CLARA COUNTY, CALIFORNIA
