Type of Services	**Screening Level Phase I Environmental Site Assessment**
Location	**Santa Clara Downtown Precise Plan Area Santa Clara, California**

SECTION 1: INTRODUCTION

This report presents the results of the Screening Level Phase I Environmental Site Assessment (ESA) performed for the Santa Clara Downtown Precise Plan (SCDPP) area located in Santa Clara, California (Site) as shown on Figures 1, 2A, and 2B. This work was performed for David J. Powers & Associates in accordance with our agreement dated May 12, 2022 (Agreement).

1.1 SITE/PROJECT DESCRIPTION

We understand that David J. Powers & Associates is providing California Environmental Quality Act (CEQA) support to the City of Santa Clara pertaining to the preparation of an Environmental Impact Report (EIR) for the SCDPP.

The SCDPP area is composed of approximately 25 acres bounded by Lafayette Street to the east, Homestead Road to the south, Madison Street to the west, and Benton Street to the north. The Site is currently developed with residential, office and commercial uses, as well as a Santa Clara University (SCU) educational center.

Development within the Downtown Core is currently comprised of approximately 350,000 square feet retail and office space and 190 residential units. The City of Santa Clara 2010-2035 General Plan, adopted November 2010, envisions revitalizing the Downtown Core with a mix of residential and commercial development. The purpose of the SCDPP is to provide guidance for new development to meet the needs of the community. The proposed land use alternative selected by the City of Santa Clara to be studied includes approximately 1,317,600 square feet of housing (up to 1,326 residential units), 669,500 square feet of office/hotel, 197,900 square feet of retail/retail ready/and entertainment, and 44,300 square feet of public space. Buildings in the SCDPP area would range from three stories (approximately 33 feet) to nine stories (approximately 124 feet).

1.2 PURPOSE AND SCOPE OF WORK

The purpose of this investigation was to strive to document, to the extent feasible pursuant to the scope of work presented in the Agreement, Recognized Environmental Conditions at the Site based on readily known historical and current land uses and to provide recommendations to further evaluate or mitigate these Recognized Environmental Conditions. As defined by American Society for Testing and Materials (ASTM) E1527-21, the term Recognized Environmental Condition means 1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; 2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due

to a release or likely release to the environment; or 3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition[1] is not a recognized environmental condition.

As presented in our Agreement, the scope of work performed for this Screening Level Phase I ESA included the following:

- A reconnaissance of the Site to note readily observable indications of significant releases of hazardous materials to structures, soil, soil vapor or groundwater. Our observations were made from public right-of-ways.
- Acquisition and review of a regulatory agency database report of public records for the general area of the Site to evaluate potential impacts to the Site from reported contamination incidents on-Site or at nearby facilities.
- Review of selected documents obtained from the state Geotracker (http://geotracker.-waterboards.ca.gov) and Envirostor (http://www.envirostor.dtsc.ca.gov) databases to obtain information regarding reported on-Site and nearby spill incidents.
- Historical research including review of readily available maps and aerial photographs to help evaluate past and current Site uses.
- Preparation of a written report summarizing our findings and recommendations.

The limitations for the Screening Level Phase I ESA are presented in Section 7.

1.3 ASSUMPTIONS

In preparing this Screening Level Phase I ESA, Cornerstone can neither warrant nor guarantee that records obtained from or prepared by other parties, such as, but not limited to, regulatory agency records, maps, related documents, and environmental reports prepared by others are accurate or complete. Cornerstone relied on the information obtained during this study unless we had actual knowledge that the information was incorrect or unless it was obvious that the information was incorrect based on other information obtained. We have not independently verified the accuracy or completeness of any data received.

1.4 ENVIRONMENTAL PROFESSIONAL

This Screening Level Phase I ESA was performed by Stason I. Foster, P.E. and Kurt M. Soenen, P.E., environmental professionals who meet the qualification requirements described in ASTM E1527-21 and 40 CFR 312 § 312.10 based on professional licensing, education, training and experience to assess a property of the nature, history and setting of the Site.

[1] A de minimis condition is defined by the ASTM Standard as a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

SECTION 2: USER PROVIDED INFORMATION

For the purpose of this Screening Level Phase I ESA, the User is David J. Powers & Associates.

2.1 SPECIALIZED KNOWLEDGE AND/OR COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The ASTM Standard requires that if the User is aware of any specialized knowledge and/or commonly known or reasonably ascertainable information within the local community about the Site that is material to Recognized Environmental Conditions, such as environmental liens, a significantly lower purchase price due to the property being affected by hazardous materials, or other conditions that are material to Recognized Environmental Conditions in connection with the Site, it is the User's responsibility to communicate such information to the environmental professional. We understand that David J. Powers & Associates does not have such specialized knowledge and/or commonly known or reasonably ascertainable information regarding the Site.

2.2 REASON FOR PERFORMING PHASE I ENVIRONMENTAL SITE ASSESSMENT

We performed this Screening Level Phase I ESA to support the David J. Powers & Associates in evaluation of the Site. This Screening Level Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions at the Site.

SECTION 3: RECORDS REVIEW

3.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Cornerstone conducted a review of federal, state and local regulatory agency database records provided by Environmental Data Resources (EDR) to evaluate the likelihood of contamination incidents at and near the Site. The database sources and the search distances are in general accordance with the requirements of ASTM E1527-21. A list of the database sources reviewed, a description of the sources, and a radius map showing the location of reported facilities relative to the project Site are attached in Appendix A.

3.1.1 On-Site Database Listings

A brief summary of selected on-Site database listings is presented below in Table 1. The database listings in Table 1 include reported on-Site spill incidents *(i.e.*, the Cleanup Program Site at 1266 Franklin Mall), as well as other listed on-Site businesses that are typically associated with the use or storage of significant quantities of hazardous materials (*e.g.*, gasoline stations and dry cleaners).

Multiple other on-Site commercial businesses (predominantly medical and dental facilities) were listed in various databases that relate to regulatory filings associated with hazardous material use/storage and generation or disposal of hazardous wastes. Such listings are common for commercial facilities in urban settings, are not indicative of hazardous material releases and are not considered to be indicative of Recognized Environmental Conditions in connection with the Site.

Table 1. Selected On-Site Database Listings

Facility Name and Address	Database Listings*
Sierra Trails Cleaners & Decorating (1971) **Mel's Cleaners (1977-2001)** **Shine Dry Cleaning (2009-2014)** 1260 Benton Street	Listed on EDR's database of former dry cleaning businesses, among other databases
G.W. Settergran (1940) 974 Franklin Street	Listed on EDR's database of former dry cleaning businesses.
Marvel Cleaners (1960) 988-998 Franklin Street	Listed on EDR's database of former dry cleaning businesses.
Holland Cleaners (1960) 1266 Franklin Street	Listed on EDR's database of former dry cleaning businesses.
1266 Franklin Mall 1266 Franklin Mall	Listed as a closed case on the Water Board's Cleanup Program Site (CPS) database.
O.F. Griffin (1940) **F.J. Higgins (1950)** **Barajas Texaco Service (1960)** 1270 Franklin Street	Listed on EDR's database of former gasoline service stations
Franklin Cleaners (current) **Holland Cleaners (1969-1989)** 1280 Franklin Street (a.k.a., Franklin Mall or Franklin Square)	EDR's database of former dry cleaning businesses identifies Holland Cleaners as an occupant from 1969 to 1989. Other database listings include RCRA-SQG, CERS, CA Drycleaners, EMI, HAZNET and/or RCRA NonGen / NLR, among others.
Holliday Cleaners (2001-2014) 1000 Lafayette Street, Suite E	Listed on EDR's database of former dry cleaning businesses.

* A description of the database sources is contained in the EDR database report attached in Appendix A.
Note: Shaw's of San Francisco at 1290 Benton Street was also listed on EDR's database of former gasoline service stations (1969-1970). However, this listing appears to be an error. Shaw's of San Francisco was a candy shop and is listed at 1290 Benton Street as a confectioner in historical city directories.

3.1.2 Nearby Spill Incidents

Based on the information presented in the agency database report, no off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or groundwater beneath the Site. The potential for impact was based on our interpretation of the types of incidents, the locations of the reported incidents in relation to the Site and the assumed groundwater flow direction.

3.2 FURTHER REVIEW OF DATABASE LISTINGS

To obtain additional information regarding the on-Site CPS case at 1266 Franklin Mall, a cursory review of readily available documents obtained from the state Geotracker database (http://geotracker.swrcb.ca.gov) was performed. Geotracker is a database and geographic information system (GIS) that provides online access to environmental data. It tracks regulatory data about leaking underground storage tank (LUST), Department of Defense, Site Cleanup Program and Landfill facilities.

Based on the information reviewed, the 1266 Franklin Mall[2] parcel reportedly was occupied by a dry cleaning business and a gasoline station during the early 1960s. The dry cleaning operation was noted to have operated in a building located adjacent to the gasoline station building. Both the dry cleaning and gasoline station buildings were noted to have been previously demolished. An existing dry cleaning business was reported to occupy the parcel (Piers Environmental, 1997).

Soil sampling conducted in 1997 at the dry cleaning facility identified tetrachloroethene (PCE) in soil at up to 0.770 mg/kg and trichloroethene (TCE) at up to 0.150 mg/kg. These volatile organic compounds (VOCs) were not detected in a groundwater sample that was collected approximately 10 feet down-gradient. Analyses of soil samples collected from three borings at the former gasoline station location did not detect petroleum hydrocarbons. The Water Board requested in 1998 that additional sampling be conducted. In April 1998, soil and groundwater samples were collected from three additional borings. The VOC concentrations detected in soil were lower than those previously reported. TCE at 3 µg/L was detected in one of the three groundwater samples.

For comparison, the Water Board's residential Environmental Screening Levels (ESLs[3]) for PCE and TCE in soil are 0.59 mg/kg and 0.95 mg/kg, respectively. The commercial ESLs for PCE and TCE in soil are 2.7 mg/kg and 6.1 mg/kg, respectively. The current residential and commercial ESLs for TCE in groundwater are 1.2 µg/L and 7.5 µg/L, respectively.

In May 1988, the Water Board issued a no further action letter indicating that no further soil or groundwater investigation was needed.

3.3 HYDROGEOLOGY

Based on information presented in the California Geotracker database, the shallow groundwater beneath the Site is likely present at depths of approximately 10 to 20 feet. A northeasterly groundwater flow direction appears predominant in the Site area.

SECTION 4: HISTORICAL USE INFORMATION

The objective of the review of historical use information is to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions at the property. The ASTM standard requires the identification of all obvious uses of the property from the present back to the property's first developed use, or back to 1940, whichever is earlier, using reasonably ascertainable standard historical sources.

[2] Sanborn maps and city directories reviewed during this study indicate that addresses of 1266, 1270, 1280 and 1290 Franklin Street (or Franklin Mall) have been used for this parcel.

[3] Environmental Screening Levels (ESLs) established by the Water Board (January 2019) are used to screen sites for potential human health concerns where releases of chemicals have occurred. These screening levels are risk-based concentrations derived from standardized equations combining exposure information assumptions with toxicity data. Under most circumstances, the presence of a chemical at concentrations below the corresponding screening level can be assumed not to pose a significant health risk.

4.1 HISTORICAL SUMMARY OF THE SITE

The historical sources reviewed are summarized below. The results of our review of these sources are summarized in Table 2.

4.1.1 Review of Aerial Photographs and Topographic Maps

- **Historical Aerial Photographs:** We reviewed aerial photographs dated between 1939 and 2016 obtained from EDR of Shelton, Connecticut; copies of aerial photographs reviewed are presented in Appendix B.

- **Historical Topographic Maps:** We reviewed USGS 15-minute and 7.5-minute historic topographic maps dated 1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980, 2012, 2015 and 2018; copies of historic topographic maps reviewed are presented in Appendix B.

Table 2. Summary of Historical Aerial Photographs and Topographic Maps

Date	Source	Comment
1889, 1897, 1899	Topographic maps	The Site is shown within the urban developed area of Santa Clara. Multiple small structures are depicted on-Site.
1953, 1961 and 1968	Topographic maps	The Site is shown within the urban developed area of Santa Clara. A post office and City Hall are depicted on-Site.
1973 to 2018	Topographic maps	Most on-Site structures located east of Jackson Street are shown to have been removed by 1973. A few of the existing building are depicted on this portion of the Site on subsequent topographic maps. The remainder of the Site is shown within the urban developed area of Santa Clara.
1939, 1948, 1950, 1956 and 1963	Aerial photographs	The Site is shown to be developed with what appears to be a mix of residential and commercial properties.
1968	Aerial photographs	Former on-Site structures located east of Jackson Street are shown to have been removed. This portion of the Site appears undeveloped except for the existing building at 990 Benton Street. Most former on-Site structures located between Monroe Street and Jackson Street are shown to have been removed and replaced by several of the existing buildings. A few on-Site structures (mainly residences) located east of Monroe Street also appear to have been removed and/or replaced with new buildings.
1974, 1982, 1993, 1998, 2006, 2009, 2012 and 2016	Aerial photographs	By 1974, streets that formerly bisected the Site east of Jackson Street (*e.g.*, Franklin Street, Main Street and Washington Street) are shown to have been removed and a few of the existing commercial buildings were constructed on this portion of the Site. The other existing residential and commercial on-Site structures located east of Jackson Street are shown to have been constructed by the early 1990s. The on-Site area west of Jackson Street appears to have remained generally similar to the 1968 photograph.

4.1.2 Review of City Directories and Sanborn Maps

To obtain additional information regarding past uses of the Site, business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. We additionally reviewed available Sanborn fire insurance maps dated 1887, 1891, 1915, 1950, 1961 and 1966 obtained from EDR and from the Library of Congress.

A summary of selected Site occupants/uses identified in the researched city directories and Sanborn maps is presented in Table 3. The listings included in Table 3 consist of businesses and uses that are commonly associated with releases of hazardous materials such as gasoline stations, dry cleaning facilities, automotive repair shops and a manufactured gasworks facility. These facilities are considered to have the greatest potential to have impacted soil, soil vapor and/or groundwater at the Site. Multiple other commercial businesses also were identified as past Site occupants, some of which likely also used and stored hazardous materials such as painting, printing and photography businesses, blacksmith and machine shops, and medical and dental facilities, etc. Copies of the Sanborn maps, along with the acquired city directory report are attached in Appendix C.

Table 3. Selected On-Site City Directory and Sanborn Map Listings

	1961	965 Monroe Street	Auto services	Sanborn Map
Washington Street				
30	1915	1049 Washington Street	Menzel's Garage and Fire Department. A gasoline UST is shown below the street.	Sanborn Map
	1944, 1945 and 1947	1049 Washington St.	Menzel's Garage	City Directory
	1950 and 1961	1049 Washington St.	Auto repair garage	Sanborn Map

* See Figures 2A and 2B.

Note: Wolverton Oil Company was additionally listed in a 1960 city directory at 991 Main Street. This business appears to have been located within a multi-tenant office building; thus, is not likely to have been a gasoline station.

SECTION 5: SITE RECONNAISSANCE

We performed a Site reconnaissance to evaluate current general Site conditions and to attempt to identify Recognized Environmental Conditions. The results of the reconnaissance are discussed below.

5.1 METHODOLOGY AND LIMITING CONDITIONS

To observe current Site conditions (readily observable environmental conditions indicative of a significant release of hazardous materials), Cornerstone staff Stason I. Foster, P.E. visited the Site on June 13, 2022. Our observations were made from readily accessible public right-of-ways.

5.2 OBSERVATIONS

At the time of our visit, the Site was observed to be developed with a mix of commercial and residential buildings. Observed on-Site businesses that appeared likely to use and store hazardous materials included Shine Dry Cleaning at 1260 Benton Street, Franklin Cleaners at 1280 Franklin Mall, and Holiday Cleaners at 1000 Lafayette Street. Other observed commercial uses included mainly restaurants, retail businesses, office space, a Santa Clara County court house, and Santa Clara University's Ignatian Center for Jesuit Education. No evidence of on-Site hazardous materials spills was readily apparent from public right-of-ways.

SECTION 6: CONCLUSIONS (FINDINGS) AND RECOMMENDATIONS

Cornerstone performed this Screening Level Phase I ESA to support David J. Powers & Associates in evaluation of the Site. Our conclusions and recommendations are summarized below.

6.1 SITE HISTORY

Based on the information obtained during this study, the Site was developed by the late 1800s with a variety of commercial businesses, residences and associated outbuildings. A gradual increase in development density is apparent during the early- and mid-1900s.

The former on-Site structures located east of Monroe Street were demolished during the mid-1960s except for the existing post office building and the building located at 990 Benton Street that currently is occupied by the Ignatian Center for Jesuit Education (Santa Clara University).

By 1968, several new commercial buildings and parking lots were constructed between Monroe Street and Jackson Street; a few on-Site structures (mainly residences) located east of Monroe Street also were removed and/or replaced with new buildings.

By 1974, streets that formerly bisected the Site east of Jackson Street (*e.g.*, Franklin Street, Main Street and Washington Street) were removed and a few of the existing commercial buildings were constructed on this portion of the Site. The other existing residential and commercial on-Site structures located east of Jackson Street were constructed by the early 1990s.

6.2 CHEMICAL STORAGE AND USE

Several prior on-Site businesses and Site uses that are commonly associated with releases of hazardous materials were identified, including gasoline stations, dry cleaning facilities, automotive repair shops and a manufactured gasworks facility. Additionally, three dry cleaning businesses currently occupy the Site. These current and prior on-Site facilities are listed in Table 3 and their locations are shown on Figure 2. These facilities are considered to have the greatest potential to have impacted soil, soil vapor and/or groundwater at the Site. Additionally, two on-Site gasoline USTs were shown on a 1915 Sanborn map; one at 930 Franklin Street and the other located below the street at 1049 Washington Street. USTs also were likely present at the former on-Site gasoline stations. No information regarding the removal of the USTs was identified within the data sources researched during this study.

Multiple other commercial businesses also were identified as past Site occupants, some of which likely also used and stored hazardous materials such as painting, printing and photography businesses, blacksmith and machine shops, and medical and dental facilities, etc.

6.3 REPORTED ON-SITE SPILL INCIDENTS

As summarized in Section 3.2, the on-Site 1266 Franklin Mall parcel is a closed case on the Water Board's CPS database. This parcel formerly was occupied by a gasoline station and a dry cleaning business. Structures formerly associated with these businesses are no longer present. A dry cleaning business also occupies the current building on this parcel.

VOCs (*i.e.*, TCE and PCE) were detected in soil and/or groundwater samples collected in 1997 and 1998. Some of the detected concentrations exceed current residential ESLs; current commercial ESLs were not exceeded. In May 1998, the Water Board issued a no further action letter indicating that no further soil or groundwater investigation was needed.

Prior to redevelopment of this parcel, we recommend that soil vapor sampling be conducted to evaluate if vapor intrusion[4] mitigation measures are warranted for the planned structures.

6.4 POTENTIAL ENVIRONMENTAL CONCERNS WITHIN THE SITE VICINITY

Based on the information obtained during this study, no off-Site spill incidents were reported that appear likely to significantly impact soil, soil vapor or groundwater beneath the Site.

6.5 RECOMMENDED PROPERTY-SPECIFIC STUDIES AND PLANS

Prior to redevelopment of on-Site parcels, a property-specific Phase I ESA should be completed in accordance with ASTM Standard Designation E1527-21 (or most recent version) to identify Recognized Environmental Conditions, evaluate the property history, and establish if the property is likely to have been impacted by chemical releases. Soil, soil vapor and/or groundwater quality studies should subsequently be conducted, if warranted based on the findings of the property-specific Phase I ESAs, to evaluate if remedial measures are needed to protect the health and safety of Site occupants.

[4] Vapor intrusion is the movement of chemical vapors from contaminated groundwater or soil into a nearby building. Vapors primarily enter through openings in the building foundation, such as cracks in the concrete slab and gaps around utility lines. It is also possible for vapors to pass through concrete, which is naturally porous. Once inside the structure, vapors may be inhaled by occupants posing potential health risks.

Prior to the start of earthwork activities (*e.g.*, excavation, trenching, grading, etc.) on properties where contaminants of concern (COC) are identified at concentrations exceeding the lower of the then-current Department of Toxic Substances Control (DTSC), Water Board or US EPA screening levels[5], an appropriate corrective action/risk management plan (*e.g.*, remedial action plan [RAP], removal action workplan [RAW] or Site Management Plan [SMP], etc.) should be prepared that reflects the results of the property-specific investigations. The corrective action/risk management plan should describe remedial measures necessary to protect the health and safety of future Site occupants and establish appropriate management practices for handling and monitoring of impacted soil, soil vapor and/or groundwater that potentially may be encountered during construction activities. The corrective action/risk management plan should be prepared by an Environmental Professional and be submitted to an appropriate overseeing regulatory agency (*e.g.*, County Department of Environmental Health [DEH], DTSC or Water Board) for review. Regulatory agency approval should be obtained prior to commencing earthwork activities. A Health and Safety Plan (HSP) also should be prepared to establish health and safety protocols for construction personnel working at the Site. All remedial measures should be completed under regulatory agency oversight and meet all applicable federal, state and local laws, regulations and requirements. Following completion, a report documenting compliance with the provisions of the corrective action/risk management plan and describing the work completed should be submitted to and approved by the overseeing regulatory agency.

6.6 LEAD-BASED PAINT AND TERMITE CONTROL PESTICIDES

In 1978, the Consumer Product Safety Commission banned lead-containing paints and coatings sold for consumer use. Some lead-containing products, such as industrial coatings, however, are still allowed. Based on the age of some of the existing buildings, lead-containing paint may be present. If demolition is planned, the removal of lead-containing paint is not required if it is bonded to the building materials. However, if the lead-containing paint is flaking, peeling, or blistering, it should be removed prior to demolition. In either case, applicable OSHA regulations must be followed; these include requirements for worker training, air monitoring and dust control, among others. Any debris or soil containing lead must be disposed appropriately.

Additionally, soil adjacent to structures that are painted with lead-containing paint can become impacted with lead as a result of the weathering and/or peeling of painted surfaces. Soil near wood framed structures also can be impacted by pesticides historically used to control termites. No information was identified during this study documenting the use of lead based paint or termite control pesticides on-Site; however, if used, residual pesticide and lead concentrations may remain in on-Site soil. Lead and/or pesticides often are identified in soil near old residences, such as those currently or historically located on many of the Site parcels. Prior to redevelopment of the Site, we recommend that shallow soil at the locations of current and former wood framed structures be evaluated for the possible presence of lead and pesticides.

[5] Note that naturally occurring background concentrations of some metals may exceed their respective screening levels. Regulatory agencies generally do not require cleanup of contaminants in soil to below background levels. Site specific background levels commonly are substituted for the published screening levels.

6.7 ASBESTOS AND OTHER HAZARDOUS BUILDING MATERIALS

Due to the age of many of the on-Site structures, building materials may contain asbestos. Because demolition of the buildings is planned, an asbestos survey is required by local authorities and/or National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines. NESHAP guidelines require the removal of potentially friable asbestos containing building materials prior to building demolition or renovation that may disturb these materials.

Some components encountered as part of a building demolition waste stream may contain hazardous materials. Universal wastes, lubrication fluids and refrigerants should be removed before structural demolition begins. Materials that may result in possible risk to human health and the environment when improperly managed include lamps, thermostats, and light switches containing mercury; batteries from exit signs, emergency lights, and smoke alarms; lighting ballasts which contain PCBs; and lead pipes and roof vent flashings. Demolition waste such as fluorescent lamps, PCB ballasts, lead acid batteries, mercury thermostats, and lead flashings have special case-by-case requirements for generation, storage, transportation, and disposal. Before disposing of any demolition waste, the demolition contractor should determine if the waste is hazardous and ensure proper disposal of waste materials.

6.8 FACILITY CLOSURES

As part of the facility closure process for occupants that use and/or store hazardous materials, the Santa Clara Fire Department typically requires that a closure plan be submitted by the occupant that describes required closure activities, such as removal of remaining hazardous materials, cleaning of hazardous material handling equipment, decontamination of building surfaces, and waste disposal practices, among others. We recommend that facility closures be coordinated with the Fire Department to ensure that required closure activities are completed prior to redevelopment of Site parcels or change in use.

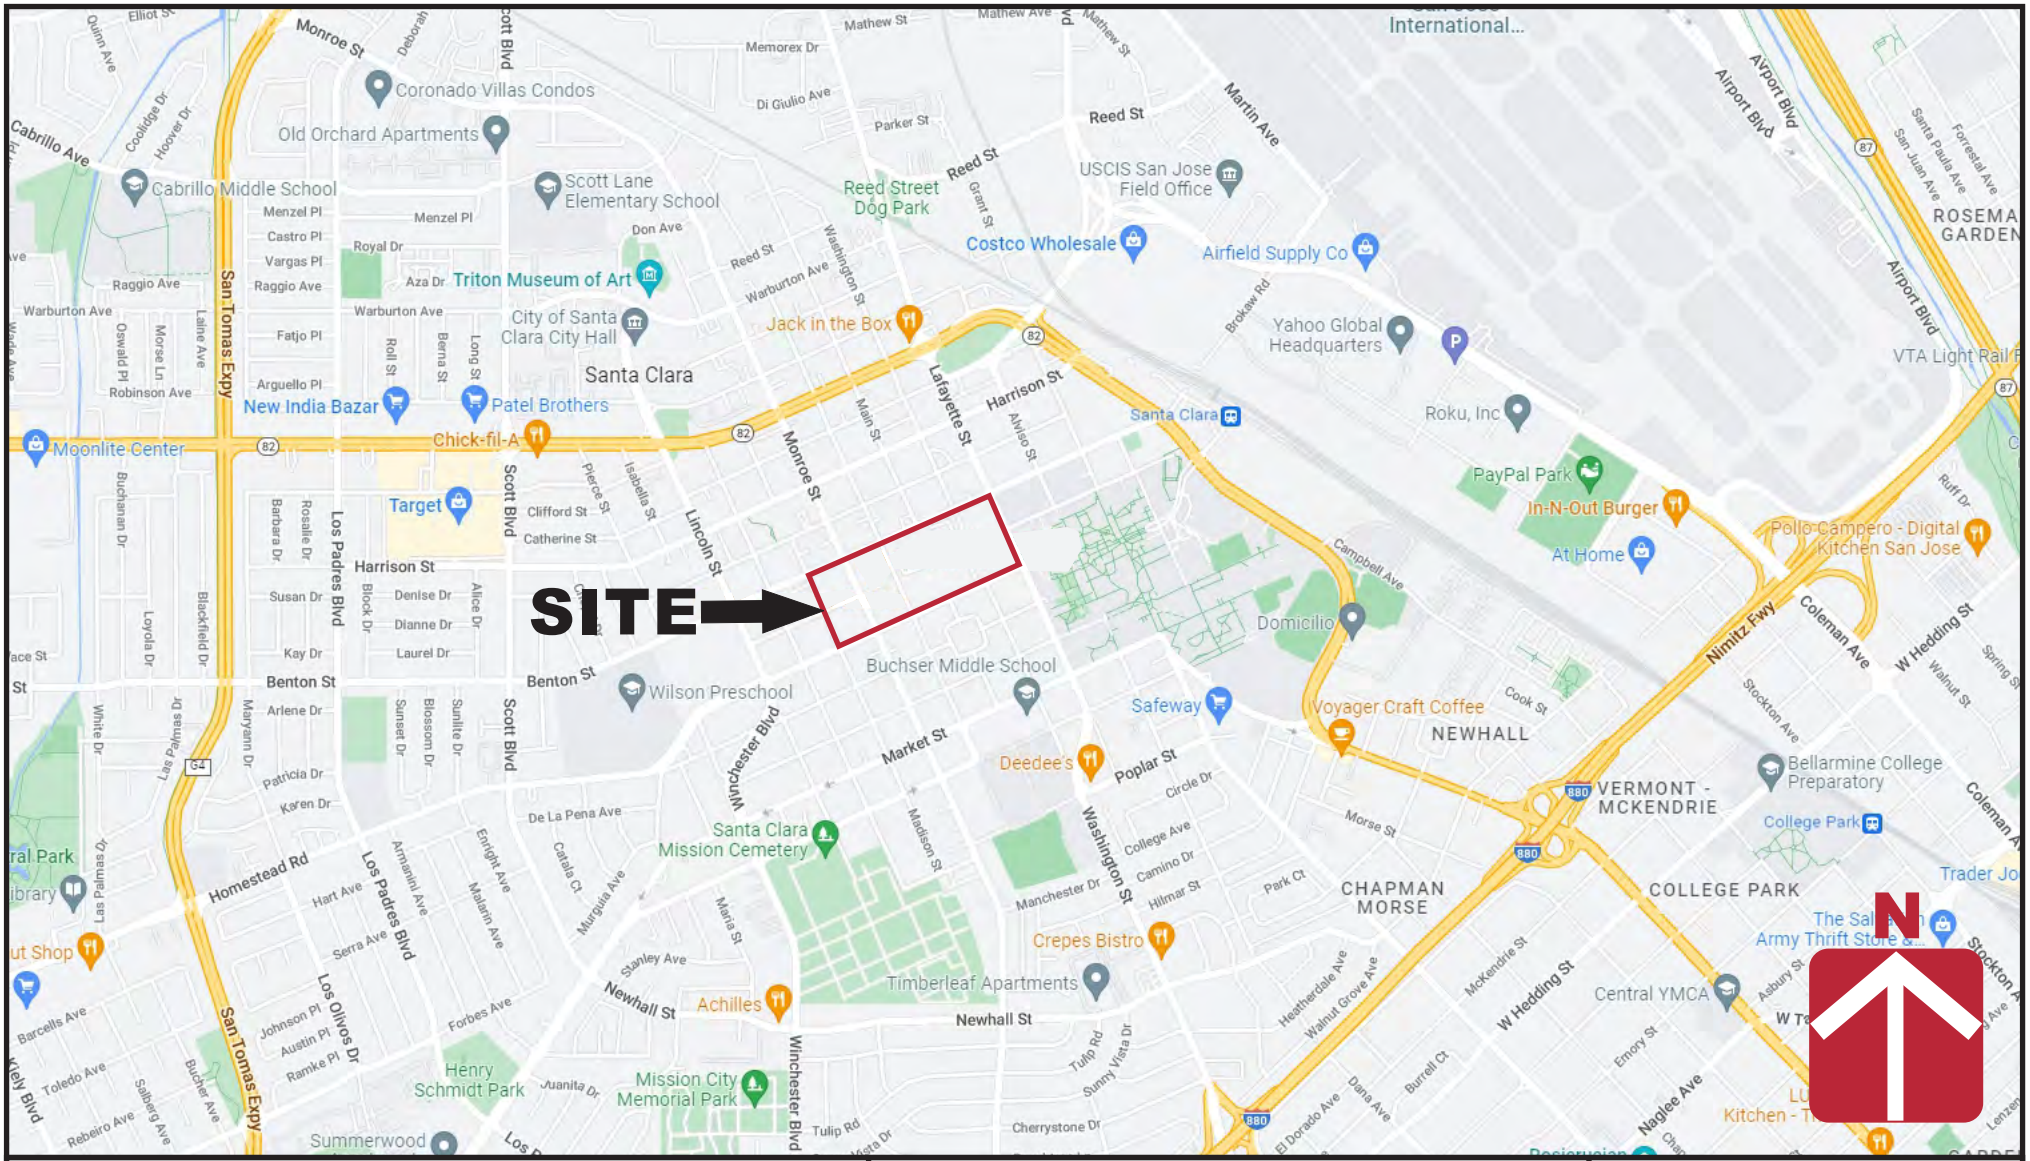
6.9 IMPORTED SOIL

If the planned development will require importing soil for property grading, we recommend documenting the source and quality of imported soil. The DTSC's Clean Fill Advisory (October 2001) provides useful guidance on evaluating imported fill.

6.10 DATA GAPS

ASTM Standard Designation E1527-21 requires the environmental professional to comment on significant data gaps that affect our ability to identify Recognized Environmental Conditions. A data gap is a lack of or inability to obtain information required by ASTM Standard Designation E1527-21 despite good faith efforts by the environmental professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. The following data gaps were identified:

- This Screening Level Phase I ESA is a limited inquiry into the environmental condition of the Site. ASTM E1527-21, *Standard Practice for Environmental Site Assessments*, was used as a guide for development of the project scope. However, this screening level study was not intended to fulfill all requirements of the ASTM standard. Property-specific Phase I ESAs completed in accordance with ASTM E1527-21 (or most recent version) are recommended prior to construction/redevelopment activities.



SECTION 7: LIMITATIONS

Cornerstone performed this Screening Level Phase I ESA to support David J. Powers & Associates in evaluation of the Site. David J. Powers & Associates understands that no Screening Level Phase I ESA can wholly eliminate uncertainty regarding the potential for Recognized Environmental Conditions to be present at the Site. This Screening Level Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for Recognized Environmental Conditions. David J. Powers & Associates understands that the extent of information obtained is based on the reasonable limits of time and budgetary constraints.

Conclusions presented in this report are based on selected, readily available information and conditions readily observed at the time of the Site visit. Screening Level Phase I ESAs are inherently limited because findings are developed based on information obtained from a non-intrusive Site evaluation. In addition, a Screening Level Phase I ESA is not an ASTM Standard Designation E1527-21 compliant Phase I ESA; property specific, ASTM compliant Phase I ESAs are recommended. Cornerstone does not accept liability for deficiencies, errors, or misstatements that have resulted from inaccuracies in the publicly available information. In addition, publicly available information and field observations often cannot affirm the presence of Recognized Environmental Conditions; there is a possibility that such conditions exist. If a greater degree of confidence is desired, soil, groundwater and/or soil vapor samples should be collected by Cornerstone and analyzed by a state-certified laboratory to establish a more reliable assessment of environmental conditions.

Cornerstone acquired an environmental database of selected publicly available information for the general area of the Site. Cornerstone cannot verify the accuracy or completeness of the database report, nor is Cornerstone obligated to identify mistakes or insufficiencies in the information provided (ASTM E1527-21, Section 8.1.3). Due to inadequate address information, the environmental database may have mapped several facilities inaccurately or could not map the facilities. Releases from these facilities, if nearby, could impact the Site.

This report, an instrument of professional service, was prepared for the sole use of David J. Powers & Associates and may not be reproduced or distributed without written authorization from Cornerstone. It is valid for 180 days. Cornerstone makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2022 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.75 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/28/2022 has revealed that there are 2 CORRACTS sites within approximately 1.25 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 3 RCRA-LQG sites within approximately 0.5 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 10 RCRA-SQG sites within approximately 0.5 miles of the target property.

Federal ERNS list

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 12/31/2021 has revealed that there are 4 ERNS sites within approximately 0.251 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there is 1 CA RESPONSE site within approximately 1.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 01/24/2022 has revealed that there are 32 CA ENVIROSTOR sites within approximately 1.25 miles of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.75 miles of the target property.

Lists of state and tribal leaking storage tanks

CA LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA LUST list, as provided by EDR, has revealed that there are 75 CA LUST sites within approximately 0.75 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 23 CA CPS-SLIC sites within approximately 0.75 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 8 CA SWEEPS UST sites within approximately 0.5 miles of the target property.

CA SPILLS 90: Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

A review of the CA SPILLS 90 list, as provided by EDR, and dated 06/06/2012 has revealed that there is 1 CA SPILLS 90 site within approximately 0.251 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 93 RCRA NonGen / NLR sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 11/04/2021 has revealed that there are 45 FINDS sites within approximately 0.251 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 36 CA CUPA Listings sites within approximately 0.5 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2019 has revealed that there are 135 CA HAZNET sites within approximately 0.251 miles of the target property.

CA HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

A review of the CA HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 51 CA HIST CORTESE sites within approximately 0.75 miles of the target property.

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CA CERS list, as provided by EDR, and dated 01/18/2022 has revealed that there are 22 CA CERS sites within approximately 0.251 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
PG AND E GAS PLANT S	COR BENTON AND RAILR	0 - 1/8 (0.000 mi.)	B29	77

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 28 EDR Hist Auto sites within approximately 0.375 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 11 EDR Hist Cleaner sites within approximately 0.375 miles of the target property.

EXECUTIVE SUMMARY

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

CA RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the State Water Resources Control Board in California.

A review of the CA RGA LUST list, as provided by EDR, has revealed that there are 36 CA RGA LUST sites within approximately 0.251 miles of the target property.

Target **900 LAFAYTTE ST.** **N/A**
Property **SANTA CLARA, CA 95050**

Site 2 of 68 in cluster A

Actual: **87 ft.**

TSCA:

Company Name:	SUMITOMO PLASTICS AMERICA INC.
TSCA Address:	900 LAFAYTTE ST.
TSCA Name:	SUMITOMO PLASTICS AMERICA
Manuf./Importer Status:	I

SUMITOMO PLASTICS AMERICA (Continued) **1005932537**

Reporting Year: 1998

Chemical Details:
Chem. substance definition: This category encompasses the various chemical substances manufactured in the production of inorganic glasses. For purposes of this category, "glass" is defined as an amorphous, inorganic, transparent, translucent or opaque material traditionally for
EPA inventory flag: Not reported
Former CAS #: 94551-77-6
Preffered CA index name: Glass, oxide, chemicals
Molecular Formula: Unspecified
CAS #: 65997-17-3
Submitter: Glass; Glass enamel 19 E 110; Glassy sodium phosphate; Lead borosilicate glass enamel flux; Phosphorus furnace slag; Sodium calcium magnesium polyphosphate; Sodium calcium magnesium silica polyphosphate; Sodium calcium polyphosphate; Sodium calcium z
UVCB flag: UVCB

Aggregate Prod Volume Ranges:
CAS #: 65997173
Chemical Name: Glass, oxide, chemicals
Range 02: 10K - 500K
Range 86: >1M - 10M
Range 90: >1M - 10M
Range 94: 10K - 500K
Range 98: >500K - 1M

Company Name: SUMITOMO PLASTICS AMERICA INC.
TSCA Address: 900 LAFAYTTE ST.
TSCA Name: SUMITOMO PLASTICS AMERICA
Manuf./Importer Status: I
Reporting Year: 1998

Chemical Details:
Chem. substance definition: Not reported
EPA inventory flag: Not reported
Former CAS #: 11103-67-6; 15978-33-3; 56549-34-9; 74734-16-0; 91773-48-7
Preffered CA index name: 1,3,5,7-Tetraazatricyclo[3.3.1.13,7]decane
Molecular Formula: C6H12N4
CAS #: 100-97-0
Submitter: Not reported
UVCB flag: Not reported

Aggregate Prod Volume Ranges:
CAS #: 100970
Chemical Name: 1,3,5,7-Tetraazatricyclo[3.3.1.13,7]decane

Environmental Interest/Information System:
TSCA SUBMITTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

Environmental Interest/Information System:
HAZARDOUS AIR POLLUTANT MAJOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

ALAN L FRAME DDS (Continued) **1016423406**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Site Name:	Fire Station 1
Violation Date:	08-24-2018
Citation:	23 CCR 16 2711(a)(8) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2711(a)(8)
Violation Description:	Failure to submit or maintain a current facility plot plan.
Violation Notes:	Returned to compliance on 08/16/2019. Plot plan does not include the locations of leak detection. Submitted new map under UST site map on 8/16/19
Violation Division:	Santa Clara City Fire Department
Violation Program:	UST
Violation Source:	CERS,

Site ID:	30268
Site Name:	Fire Station 1
Violation Date:	08-04-2021
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Owner/operator did not acknowledge the monthly DO inspections on 3/2021 and 6/2021 within 48 hours of receiving the report. Submit a copy of the August DO monthly inspection with a signed acknowledgement by the owner/operator regardless of if compliance issues were observed.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill

FIRE STATION 1 (Continued) **S121760086**

prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 07/08/2019. Note- OPV couldn t be tested for diesel tank as TEC technician unable to take out the fill tube.

Environmental Interest/Information System:
AIR EMISSIONS CLASSIFICATION UNKNOWN
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Registry ID: 110065234981

Environmental Interest/Information System:

SANTA CLARA UNIVERSITY (Continued) **1024615117**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Agency:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1W02K02f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	A previous Fuel Leak Case (07S1W02K01f) was opened at this site. This case was associated with the removal of 4 underground storage tanks (USTs) at a former gasoline retail station in 1986 and 1994. The case was closed on 10/23/00. At the time of closure, residual contamination remained in soil (4,700 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg), 3.5 ppm Benzene, 50 ppm Toluene, 25 ppm Ethylbenzene, and 260 ppm Xylenes) and groundwater (1,200 parts per billion (ppb) TPHg, 24 ppb Benzene, 3.3 ppb Toluene, 38 ppb Ethylbenzene, and 99 ppb Xylenes) at the site. 2003 In May, a 1,000-gallon UST was found onsite and removed. 4 soil samples (P-1 through P-4) were collected from the excavation; 2 from each end at 6-inches and 2 feet below the bottom of the UST. The soil samples were analyzed for TPHg, TPH as Diesel (TPHd), TPH as Motor Oil (TPHmo), Oil and Grease (O&G), Pesticides, Polychlorinated Biphenyls (PCBs), LUFT Metals, Volatile Organic Compounds (VOCs) and Semi-Volatile Organic Compounds (SVOCs). The maximum concentrations reported were 5,900 ppm TPHg, 1,400 ppm TPHd, 81 ppm Ethylbenzene, 32 ppm Toluene, 44 ppm Naphthalene, 500 ppm Trichlorofluoromethane, 390 ppm 1,2,4-Trimethylbenzene, 120 ppm 1,3,5 trimethylbenzene, 46 ppm n-Propylbenzene, 3.7 ppm p-isopropyl benzene, 22 ppm 2 Methylnaphthalene, 1.6 ppm Cadmium, 38 ppm Chromium, 67 ppm Lead, 60 ppm Nickel, and 37 ppm Zinc. All other constituents were not reported

SANTA CLARA UN PROPERTY (Continued) **S103473165**

to be present above the laboratory reporting limits. In June, 6 hand auger borings (B1 through B6) were advanced between 13 and 16 feet below the ground surface (ft bgs). Two soil samples were collected from each boring at varying depths and were analyzed for TPHg, TPHd, TPHmo, VOCs, SVOCs and LUFT Metals. Maximum concentrations reported were 11,000 ppm TPHg, 1,200 ppm TPHd, 55 ppm Ethylbenzene, 48 ppm Naphthalene, 510 ppm 1,2,4-Trimethylbenzene, 170 ppm 1,3,5-Trimethylbenzene, 45 ppm n-Butyl Benzene, 76 ppm n-Propyl Benzene, 26 ppm p-Isopropyl Benzene, 0.34 ppm Tert-butyl Benzene, and 4.7 ppm 2-Methylnaphthalene. Metals were detected at similar levels to the previous soil samples. All other constituents were not reported to be present above the laboratory reporting limits. Groundwater was encountered in the borings and grab groundwater samples were collected from each open boring and analyzed for TPHg, TPHd, TPHmo, VOCs, SVOCs, and LUFT Metals. The maximum concentrations reported were 38,000 ppb TPHg, 13,000 ppb TPHd, 3,500 ppb Benzene, 4,200 ppb Ethylbenzene, 450 ppb Toluene, 11,000 ppb Xylenes, 580 ppb n Butylbenzene, 760 ppb Isopropylbenzene, 540 ppb p-Isopropylbenzene, 720 ppb Naphthalene, 1,500 ppb n-Propylbenzene, 9,100 ppb 1,2,4-Trimethylbenzene, 2,700 ppb 1,3,5 Trimethylbenzene, 51 ppb 2-Methylnaphthalene, 22 ppb Benzoic Acid, 210 ppb Cadmium, 2,600 ppb Chromium, 730 ppb Lead, 3,900 ppb Nickel, and 3,500 ppb Zinc. All other constituents were not reported to be present above the laboratory reporting limits. 2004 In July, 4 groundwater monitoring wells (MW-1 through MW-4) were installed onsite. 5 soil samples were collected from each boring at various depths. Soil samples were reported to have up to 150 ppm TPHg, 21 ppm TPHd, 0.3 ppm Benzene, 1.9 ppm Ethylbenzene, 32 ppm Toluene, 1.6 ppm Naphthalene, 8.9 ppm Trichlorofluoromethane, 0.26 ppm Isopropylbenzene, 7.6 ppm 1,2,4-Trimethylbenzene, 2.1 ppm 1,3,5-Trimethylbenzene, 0.8 ppm n-Propylbenzene, 0.26 ppm p-Isopropyl Benzene. Metals were reported at similar concentrations as previous soil samples. All other constituents were not reported to be present above the laboratory reporting limits. Quarterly groundwater monitoring began at this site in July 2004 and continued through February 2006. In July, the maximum concentrations reported in groundwater were 2,000 ppb TPHg, 480 ppb TPHd, 11 ppb Benzene, 54 ppb Ethylbenzene, 96 ppb Xylenes, 0.71 ppb 1,2-Dichloroethane (DCA), 8.6 ppb sec-Butylbenzene, 13 ppb Isopropylbenzene, and 17 ppb n-Propylbenzene. 2006 In February, groundwater samples collected at the site during the last groundwater monitoring event were reported to have up to 700 ppb TPHg, 190 ppb TPHd, 2.2 ppb Benzene, 14 ppb Ethylbenzene, 6.9 ppb Xylenes, 1 ppb DCA, 4.4 ppb sec-Butylbenzene, 4.7 ppb Isopropylbenzene, and 3.7 ppb n-Propylbenzene. 2007 In October, a soil vapor study was completed and the groundwater monitoring wells were sampled. Maximum concentrations reported for groundwater were 930 ppb TPHg, 260 ppb TPHd, 260 ppb Benzene, 52 ppb Ethylbenzene, 5.9 ppb Toluene, 0.71 ppb DCA, 5 ppb sec-Butylbenzene, 6.5 ppbIsopropylbenzene, and 1.8 ppb n-Propylbenzene. The constituents detected in the soil gas did not exceed the Environmental Screening Levels.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

City,State,Zip:	SANTA CLARA, CA 95050
Region:	STATE
Facility Status:	**Open - Remediation**
Status Date:	08/07/2019
Global Id:	T10000008392
Lead Agency:	SAN FRANCISCO BAY RWQCB (REGION 2)
Lead Agency Case Number:	Not reported
Latitude:	37.35292
Longitude:	-121.93953
Case Type:	Cleanup Program Site
Case Worker:	MBR
Local Agency:	SANTA CLARA, CITY OF
RB Case Number:	43S1197
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), Diesel, Gasoline, Heating Oil / Fuel Oil
Site History:	The Irvine Company s Mission Town Center is currently on hold and inactive. The proposed project is located on an approximately 5.7-acre project site at the intersection of Benton Street and El Camino Real in the southeastern portion of the City of Santa Clara. The site is presently occupied by a mix of land uses, including light industrial uses such as a self-storage complex and auto repair shop, single and multifamily residential uses, office, and a restaurant. The applicant proposed to demolish the existing buildings on the project site and construct a mixed-use residential development project that would consist of 385 apartment units, approximately

MISSION TOWN CENTER (Continued) **S118504780**

10,000 square feet of conditioned amenity and leasing space, three distinct private open space areas, and about 27,000 square feet of ground floor retail. Parking would be provided in a 6 story parking structure, with one story below grade. The residential building would be slab-on-grade construction, while the commercial building would be podium construction with wood framing above. The project included a General Plan Amendment (to Santa Clara Station Very High Density Residential), a rezoning to Planned Development, and vacation of two streets (Sherman and Fremont). The project Environmental Impact Report was scheduled to be distributed for review in mid November 2015 with approval obtained in early January 2016. The project would then go to Planning Commission in early February 2016 with City Council approval scheduled for February 23, 2016. Project construction was scheduled to begin demolition on August 1, 2016 with project completion in February 2019. The project includes improvements to off-site utilities, including construction of 12 and 24-inch water mains in The Alameda and Harrison Street; rerouting a storm drain around the project site to the east along Benton Street and then to the north along El Camino Real. The new segment of storm drain would be upsized as part of the proposed project to 72 inches to maintain prior capacity. Finally, the project would extend the 8 inch recycled water main approximately 500 linear feet within Fremont Street from the intersection of Fremont and Alviso Street to the project frontage on the east side of the intersection of The Alameda and Fremont Street.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Site improvements consist of an active auto body repair shop, a single-story residential building, and paved parking. The surrounding area is utilized for residential and commercial uses (Figure 1). This report documents our findings and was prepared for the exclusive use and sole reliance of the client On January 31, 1985, two 500-gallon and two 250-gallon gasoline underground storage tanks (USTs) were removed from the Site by JW Construction of San Jose, California. Subsurface soil was reportedly excavated to a depth of 20 feet,

ESTATE OF CARMEN LAHERRAN (Continued) **S101304269**

aerated, and placed back into the excavation during removal of the former USTs. Groundwater monitoring has been conducted at the Site since 1990. Based on historical analytical results, chemicals of concern (COC s) beneath the Site include total petroleum hydrocarbons as gasoline (TPH-g), benzene, toluene, ethylbenzene, and total xylene (BTEX), and methyl tert-butyl ether (MTBE). According to a review of historical documentation, two 500-gallon and two 250-gallon gasoline underground storage tanks (USTs) were removed from the Site on January 31, 1985, by JW Construction of San Jose, California. During excavation activities soils beneath the USTs were screened with a combustible gas detector. Soil beneath one of the USTs contained concentrations greater than 15,000 parts per million (ppm) of petroleum hydrocarbons. The soil was excavated to a depth of 20 feet below ground surface (bgs) where concentrations greater than 15,000 ppm of petroleum hydrocarbons were encountered. A post excavation soil sample collected from the bottom of the excavation (20 feet) directly below one of the USTs contained 2,400 ppm petroleum hydrocarbons. No sample was collected from under the other three tanks. Based on fuel pump inspection stickers, it did not appear that fuel had been delivered to the site since the mid 1950 s. Analytical results from subsequent site and remedial investigations confirmed the soil and groundwater in the vicinity of the USTs were impacted with petroleum hydrocarbons. In September 1990, three groundwater monitoring wells (MW-1, MW-2 and MW-3) were installed by On-Site Technologies, Inc. (OST) to assess the extent of petroleum hydrocarbons at the site. Petroleum hydrocarbons were detected in soil and groundwater at all three well locations. Light Non-Aqueous Phase Liquid (LNAPL) was measured to be 0.34 feet thick in monitoring well MW-2. On January 31 and February 1, 1991, two soil borings (SB-1 and SB-2) and two groundwater monitoring wells (MW-4 and MW-5) were completed to further define the lateral and vertical extent of impact to the soil and groundwater beneath the Site.In an attempt to complete the delineation of impacted soil and groundwater at the Site, OST installed two additional monitoring wells (MW-6 and MW-7) and advanced one additional soil boring (SB-3) between December 1991 and January 1992. According to the March 4, 1992 OST Remedial Investigation Report, soil and groundwater analytical results from this phase of the investigation indicated that impacts to soil and groundwater had been delineated. The soil analytical data indicated that the gasoline-impacted soil appeared to be limited to a radius of approximately 50 feet and 25 feet deep from the center of the source area. An extraction well, EW-1, was installed on October 27, 1992, and pump tests were subsequently performed to evaluate the aquifer characteristics. Results from the pump tests indicated that use of dual phase extraction (DPE) was a viable option for remedial measures. The treatment system selected utilized the three shallow soil vapor extraction wells (VE-1 through VE-3) and three groundwater extraction wells (EW-1, COEX-1, and COEX-2) which were installed in October 1995. The extracted vapor was treated using thermal oxidation before discharge to the atmosphere. The extracted groundwater was treated using granular activated carbon (GAC) filtration prior to discharge to the storm drain. The remediation system was installed and began operating at the Site full time in December 1996 until August 31, 2002. On August 31, 2002, the soil vapor extraction system was shut down (but groundwater extraction continued to operate) by ATC and the Santa Clara Valley Water District (SCVWD) as the hydrocarbon concentrations in the extracted soil vapor had decreased

ESTATE OF CARMEN LAHERRAN (Continued) **S101304269**

significantly and operation of the system was deemed ineffective. As a preliminary step towards the evaluation of the site for closure, the groundwater extraction and treatment was discontinued on May 22, 2003. Two groundwater sampling events were performed to evaluate rebound of contaminant concentrations. Laboratory analytical results from groundwater samples collected during these events indicated that benzene concentrations in groundwater rebounded significantly in the extraction wells EW-1, COEX-1, and COEX-2. Due to the rebound of benzene in groundwater and a rise in groundwater elevations, the system was converted to a dual phase extraction system utilizing stingers and restarted on November 17, 2003. The system operated periodically until September 2005 when it was decommissioned and removed from the Site. Over the course of the active remediation phase, approximately 3 million gallons of groundwater with 440 pounds of petroleum hydrocarbons and over 150 million cubic feet of soil vapor with 4,500 pounds of hydrocarbons have been removed from subsurface. In an attempt to further evaluate the vertical and horizontal extent of petroleum impacted soil and groundwater, ATC installed four shallow groundwater monitoring wells adjacent to the existing deeper monitoring wells (MW-1 through MW-4) in November 2008. However, groundwater was not encountered in these boring, therefore wells were not installed. Analytical results from soil samples collected at these borings (ATC-1 through ATC-4) confirmed that past operation of vapor extraction wells (VE-1 through VE-3) had significantly reduced hydrocarbon concentrations in vadose zone soil. In November 2000, MW-7 was destroyed when the northern adjacent property was redeveloped into a city park. Prior to its destruction, low levels of petroleum constituents had been detected in groundwater samples collected from the well.

Click Here:

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
