PHASE I ENVIRONMENTAL SITE ASSESSMENT REPORT

11733 Florence Avenue
Santa Fe Springs, California 90670

Report Date: November 9, 2020
Partner Project No. 20-284848.1

Prepared for:

Melia Homes
8951 Research Drive, Suite 100
Irvine, California 92618

PARTNER
Engineering and Science, Inc.

November 9, 2020

Mr. Chad Brown
Melia Homes
8951 Research Drive, Suite 100
Irvine, California 92618

Subject: Phase I Environmental Site Assessment
11733 Florence Avenue
Santa Fe Springs, California 90670
Partner Project No. 20-284848.1

Dear Mr. Brown:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (949) 481-9818.

Sincerely,

Robert Vaughn
National Client Manager

E□ECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Melia Homes for the property located at 11733 Florence Avenue in Santa Fe Springs, Los Angeles County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Melia Homes with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the northern side of Florence Avenue within a mixed residential and recreational area of Los Angeles County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address:	11733 Florence Avenue, Santa Fe Springs, California
Property Use:	Commercial
Land Acreage (Ac):	3.02 Ac
Number of Buildings:	One
Number of Floors:	One
Gross Building Area (SF):	16,847 SF (Total)
Net Rentable Area (SF):	130,740 SF (Total)
Date of Construction:	1964
Assessor's Parcel Number (APN):	8008-017-014
Type of Construction:	Wood-Framed, Pitched Roof, Slab-on-Grade, Asphalt Paved Parking Lot
Current Tenants:	Church of Jesus Christ Latter Day Saints
Site Assessment Performed By:	Louis Mowers of Partner
Site Assessment Conducted On:	October 29, 2020

The subject property is currently occupied by the Church of Jesus Christ – Latter Day Saints for commercial use. The subject property is currently unoccupied and no onsite operations are being conducted. In addition to the current structure, the subject property is also improved with a large asphalt paved parking area, a separate tool shed, gated exteriors, concert paved walkways, and associated landscaping.

According to available historical sources, the subject property was formerly undeveloped from as early as 1896 to 1928; developed as agricultural land between 1938 and circa 1947; developed as agricultural land with a farmstead/farm structures from 1953 to circa 1963; and developed with the current structure in 1964. Tenants on the subject property have included Church of Jesus Christ of Latter Day Saints (1994-Present).

The immediately surrounding properties consist of the Lake Center Athletic Park to the north; Crystal Property Management and St. Pius X Catholic Church to the south across Florence Avenue; Los Angeles

Christadelphian Church and multi-family apartments to the east; and single-family residential housing to the west.

According to the State Water Resources Control Board (SWRCB) online database GeoTracker, a previous subsurface investigation conducted on a nearby property (10515 South Pioneer Boulevard and Case T0603704049) and topographic map interpretation, the depth of groundwater in the vicinity of the subject property is inferred to be approximately 70 to 72 feet below ground surface (bgs) and groundwater flow is inferred to be toward the south-southwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any RECs during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any CRECs during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any HRECs during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Partner observed two (2) monitoring wells on the western section of the subject property. These wells are connected to a 2004 renovation conducted on the subject property structure. The probes were installed in conjunction with the construction of a church addition in October of 2004. The subject property is not located within a "Methane Zone" as designated by the City of Santa Fe Springs. Quarterly monitoring of the gas probes were initiated by GeoKinetics on May 14, 2007. From as early as May 14, 2007 until the most recent December 21, 2011 reading, the methane (CH4) readings within the three probes has stayed at a constant 0.0 detection percentage. Based on the analytical results and the nature of the equipment, the presence of the

monitoring wells is not expected to represent a significant environmental concern. However, prior to redevelopment activities, all onsite monitoring wells should be decommissioned according to federal and local regulations.

- Due to the age of the subject property building, there is a potential that asbestos-containing material (ACM) are present. Readily visible suspect ACMs were observed in good condition. Should these materials be replaced, the identified suspect ACMs would need to be sampled to confirm the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 11733 Florence Avenue in Santa Fe Springs, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends the following:

- Prior to the disturbance of any suspect ACM at the subject property, a comprehensive survey, designed to determine if the suspect materials are regulated, is recommended. If such materials are identified and need to be disturbed, repaired or removed, a licensed abatement contractor should be consulted. Suspect ACM can also be managed under the auspices of an Operations and Maintenance (O&M) plan.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 11733 Florence Avenue in Santa Fe Springs, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential

exposure to hazardous substances or petroleum products in the soil or groundwater on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Melia Homes engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Melia Homes. Either verbally or in

writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of the AAI User Questionnaire from the Report User. This information was not provided at the time of the assessment.
- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Partner submitted Freedom of Information Act (FOIA) requests to Santa Fe Springs Building Department for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 11733 Florence Avenue in Santa Fe Springs, California is located on the northern side of Florence Avenue. According to the Los Angeles County Assessor, the subject property is legally described as "RANCHO SANTA GERTRUDES SECTIONS TOWNSHIP AND RANGE LOT COM E 796.09 FT AND N 441.69 FT AND E 290.65 FT FROM SE COR OF TR NO 17672 TH E 315.73 FT TH S 416.69 FT TO N LINE OF FLORENCE AVE TH W THEREON 315.73 FT TH N TO BEG PART OF NE 1/4 OF SE 1/4 OF SEC 1 T 3S R 12W", and ownership is currently vested in Corp of the Presiding Bishop of Santa Fe Springs Ward.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by the Church of Jesus Christ – Latter Day Saints for commercial religious use. The subject property is currently unoccupied and no onsite operations are being conducted. The subject property consists of one, one-story building on the south-central side of the property. In addition to the current structure, the subject property is also improved with a large asphalt paved parking area, separate tool shed, gated exteriors, concert paved walkways, and associated landscaping.

The subject property is designated for commercial public facility development by the City of Santa Fe Springs.

The subject property was identified as a Hazardous Waste Tracking System (HWTS) and a HAZNET site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial and recreational area of Los Angeles County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property:

Immediately Surrounding Properties

North: Lake Center Athletic Park (11641 Florence Avenue)

South: East Florence Avenue beyond which is Crystal Property Management and St. Pius X Catholic Church (11730 East Florence Avenue and 10827 Pioneer Boulevard)

East: Los Angeles Christadelphian Church and multi-family apartments (10721 and 10705 Pioneer Boulevard)

West: Single-family residential housing (10726-10714 Lake Center Park Lane)

No adjacent properties were identified in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) *Whittier, California* Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 120 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the southwest.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater flow in the vicinity of the subject property is inferred to be toward the south. The nearest surface water in the vicinity of the subject property is the San Gabriel River located approximately 1.09-miles to the west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by the Santa Fe Springs Department of Public Works and Engineering serves the subject property vicinity. The sources of public water for Santa Fe Springs are surface water from the California State Water Project, the Colorado River, and water purchased from the Metropolitan Water District (MWD).

According to the State Water Resources Control Board (SWRCB) online database GeoTracker, a previous subsurface investigation conducted on a nearby property (10515 South Pioneer Boulevard and Case T0603704049), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 70 to 72 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is located within the western portion of the Coastal Plain of Los Angeles County, a deep northwest trending depositional basin bounded to the northeast by the Puente Hills and Whittier Fault, to the southwest by the folds and faults of the Newport-Inglewood structural zone, and to the southeast by the Santa Ana Mountains.

According to the *Soil Survey of Los Angeles County, CA*, issued by the United States Department of Agriculture, Soil Conservation Service, dated December 1969, the soils at the subject site are classified as Perkins-Rincon association, 0 to 15 percent slopes. Perkins soils are over 60 inches deep, are well drained and have slow subsoil permeability. They have brown, medium acid, gravelly loam surface layers about 12 inches thick. Rincon soils are over 60 inches deep, are well drained and have slow subsoil permeability. They have dark grayish-brown, mildly alkaline silty clay loam surface layers about 13 inches thick. The subsoil is brown, moderately alkaline and very strongly calcareous silty clay loam.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06037C1837F, dated September 26, 2008, the subject property appears to be located in Zone X, an area with reduced flood risk due to levee.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1896-1928	Topographic Maps	Undeveloped
1938-1947	Aerial Photographs, Topographic Maps	Agricultural land
1953-1963	Aerial Photographs	Agricultural land and a farmstead
1964-Present	Aerial Photographs, City Directories, Interviews, Onsite Observations	Commercial; Church of Jesus Christ of Latter Day Saints (1994-Present)

Tenants on the subject property include Church of Jesus Christ of Latter Day Saints (1994-Present).

The subject property parcel was historically used for agricultural purposes. There is a potential that agricultural chemicals: pesticides, herbicides, and fertilizers; may have been used and stored onsite. However, no specific areas of concern related to onsite agricultural chemical storage and usage have been identified during the course of this assessment. It has been Partner's experience with similar agricultural properties that there is a low potential for soil contamination at concentrations in excess of regulatory thresholds as a result of the past use of persistent pesticides/herbicides from normal crop application. Additionally, during activities preparing the lot for future development, near surface soils (where residual agricultural chemical concentrations would have most likely been present, if at all) were generally mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the lot development activities. Furthermore, it is likely that residual agricultural chemicals (if any) would have significantly degraded since the site was last utilized for agricultural purposes. Based on these factors, the previous agricultural use of the subject property is not expected to represent a significant concern.

No other potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR). The following was observed on the subject property and adjacent properties during the aerial photograph review:

Date: 1928		***Scale: 1"=500'***
Subject Property:	Appears to be vacant/fallow land	
North:	Appears to be developed as agricultural land	
South:	Appears to be undeveloped land across Florence Avenue	
East:	Appears to be developed with a farmstead and agricultural land	
West:	Appears to be developed as agricultural land	

Date: 1938, 1947		***Scale: 1"=500'***
Subject Property:	Appears to be developed as agricultural land	

Date: 1938, 1947	***Scale: 1"=500'***
North:	Appears to be developed as agricultural land
South:	No significant changes visible
East:	No significant changes visible
West:	Appears to be developed as agricultural land

Date: 1953	***Scale: 1"=500'***
Subject Property:	Appears to be developed with a farmstead with associated storage structures in the center of the property and agricultural land surrounding the structures
North:	Appears to be vacant land followed by multiple commercial structures for use as a school
South:	No significant changes visible
East:	No significant changes visible
West:	No significant changes visible

Date: 1963	***Scale: 1"=500'***
Subject Property:	Appears to be undeveloped/fallow land with one small structure on the southwestern corner of the property
North:	Appears to be developed with additional classroom structures
South:	No significant changes visible
East:	No significant changes visible
West:	Appears to be undeveloped/fallow land

Date: 1972	***Scale: 1"=500'***
Subject Property:	Appears to be developed the current commercial structure on the center of the property and asphalt paved parking areas surrounding the structure
North:	No significant changes visible
South:	Appears to be developed with several large structures and an asphalt paved parking area with multiple small structures to the southeast across Florence Avenue
East:	Appears to be vacant land
West:	Appears to be developed with multiple structures in a rectangular configuration

Date: 1979, 1981	***Scale: 1"=500'***
Subject Property:	No significant changes visible
North:	No significant changes visible
South:	No significant changes visible
East:	Appears to be developed with one small structure and two larger structure to the northeast with a large parking lot area
West:	No significant changes visible

Date: 1989	***Scale: 1"=500'***
Subject Property:	No significant changes visible
North:	Appears to be developed with a large dirt-paved track and field for recreational area as part of a school
South:	No significant changes visible
East:	No significant changes visible

Date: 1989		*Scale: 1"=500'*
West:	No significant changes visible	

Date: 1994		*Scale: 1"=500'*
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	Appears to be developed with vacant land undergoing grading	

Date: 2002, 2005, 2009, 2012, 2016		*Scale: 1"=500'*
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	Appears to be developed with multiple residential structures	

Copies of the aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner contracted with EDR to search for Sanborn Map coverage of the subject property. Sanborn map coverage was not available for the subject property.

A copy of the *Certified Sanborn Map Report* is included in Appendix B.

3.3 City Directories

Partner reviewed historical city directories obtained from EDR for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 11733 Florence Avenue (Subject Property)	
Year(s)	**Occupant Listed**
1994	Church of Jesus Christ of Latter Day Saints (11733 Florence Avenue)
2006	Church of Jesus Christ of Latter Day Saints (11733 Florence Avenue)
2014	Church of Jesus Christ of Latter Day Saints (11733 Florence Avenue)

According to the city directory review, the subject property has been occupied by the Church of Jesus Christ of Latter Day Saints from as early as 1994 until at least 2014. Based on the city directory review, no environmentally sensitive listings were identified for the subject property address.

City Directory Search for Adjacent Properties	
Year(s)	**Occupant Listed**
1994	Metropolitan Little League, Lake Center Senior Service (11641 Florence Avenue); Perez Michael, Tena Carlos (11730 Florence Avenue); St. Pius X Church (10827 Pioneer Boulevard); Christadelphian Church (10721 Pioneer Boulevard); Romo G (10705 Pioneer Boulevard); Single-Family Residential (10714-10726 Lake Center Park Lane);
1999	Santa Fe Springs City of Parks and Recreation, Metropolitan Little League (11641 Florence Avenue); Adrian Balcazar, Ahmed Saad, Alex Armendariz, Amy Lowy, Carso Castillo, Carlos Sanchez, Cesar Robles, David Lagos, Doan Nguyen, Elizabeth Allicotti, Elmer Monzon,

	Avenue); Alex Armendariz, Andrew Cuestas, Anna Leon, Carlos Castillo, Carlos Nava, Carlos Sanchez, Elisa Alcazar, Elmer Monzon, Fernando Barrios, Fernando Lopez, Gerardo Vazquez, Guillermina Rodriguez, Ivan Balcazar, Jenner Monge, Julie Delgado, Julio Gonzalez, Leslie Oblea, Linday Gonzalez, Manuel Rosas, Mildred Austin, Robert Villegas, Ronald Ethridge, Santa Fe Springs, Steven Gilbert, Veronica Lopez, Yolanda Garnica (11730 Florence Avenue); St. Pius X Church (10827 Pioneer Boulevard); Christadelphian Church (10721 Pioneer Boulevard); Gonzalo Romo, Juan Barragan, Karla Torres, Nghi Bui, William Bujanda, Roger Lopez, Daniel Munden, Carly McClure, D Derbyshire (10705 Pioneer Boulevard); Single-Family Residential (10714-10726 Lake Center Park Lane);

According to the city directory review, the adjacent properties have been occupied by various residential and commercial entities from as early as 1994 until at least 2014. Based on the city directory review, no environmentally sensitive listings were identified for the adjacent property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from EDR. The following was observed on the subject property and adjacent properties during the topographic map review:

Date: 1896, 1899, 1902	
Subject Property:	Depicted as undeveloped land
North:	Depicted as undeveloped land
South:	Depicted as undeveloped land across Florence Avenue
East:	Depicted as developed with one structure to the northeast beyond which is S.P.R.R. Railroad Line
West:	Depicted as undeveloped land

Date: 1923, 1925, 1942, 1943, 1947	
Subject Property:	No significant changes depicted
North:	Depicted with undeveloped land and one oil well to the northwest
South:	No significant changes depicted
East:	Depicted with several small structures beyond which is the S.P.R.R. Railroad Line
West:	No significant changes depicted

Date: 1949, 1951	
Subject Property:	No significant changes depicted
North:	Depicted as undeveloped land beyond which are several small structures
South:	Depicted as undeveloped land across Florence Avenue
East:	Depicted as developed with two small structures
West:	Depicted s undeveloped land

Date: 1965	
Subject Property:	No significant changes depicted
North:	Appears to be developed with several commercial structures farther to the north
South:	No significant changes depicted
East:	No significant changes depicted
West:	Depicted as developed with multiple rectangular structures in a rectangular configuration

Date: 1972	
Subject Property:	Depicted with the current commercial structure in the south-center of the property
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	No significant changes depicted

Date: 1981	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	Depicted with shading indicating development across Florence Avenue
East:	Depicted as undeveloped land and a rectangular shading indicating development
West:	No significant changes depicted

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data	
Name of Agency:	California Environmental Protection Agency (Cal/EPA)
Point of Contact:	CalEPA Regulated Sites Portal
Agency Address:	https://siteportal.calepa.ca.gov/nsite/ 1001 I Street, Sacramento, California 95814
Agency Phone Number:	(916) 323-2514
Date of Contact:	November 2, 2020
Method of Communication:	Online Database
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the Cal/EPA.

4.1.2 Public Works Department

Regulatory Agency Data	
Name of Agency:	Los Angeles Public Works Department (LAPWD)
Point of Contact:	N/A
Agency Address:	900 South Fremont Avenue, Alhambra, California
Agency Phone Number:	(626) 458-5100
Date of Contact:	November 2, 2020
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the LADWP.

4.1.3 Fire Department

Regulatory Agency Data	
Name of Agency:	Santa Fe Springs Fire Department (SFSFD)
Point of Contact:	https://www.santafesprings.org/cityhall/fire_rescue/operations/default.asp
Agency Address:	11300 Greenstone Avenue, Santa Fe Springs, California 90670
Agency Phone Number:	(562) 944-9713
Date of Contact:	November 2, 2020 and November 5, 2020
Method of Communication:	Online/In-Person
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the SFSFD. Additionally, while onsite Partner observed two (2) monitoring wells on the western section of the subject property. These wells are connected to a 2004 renovation conducted on the subject property structure. The probes were installed in conjunction with the construction of a church addition in October of 2004. The subject property is not located within a "Methane Zone" as designated by the City of Santa Fe Springs. Quarterly monitoring of the gas probes were initiated by GeoKinetics on May 14, 2007. From as early as May 14, 2007 until the most recent December 21, 2011 reading, the methane (CH4) readings within the three probes has stayed at a constant 0.0 detection percentage. Based on the analytical results and the nature of the equipment, the presence of the monitoring wells is not expected to represent a significant environmental concern. However, prior to redevelopment activities, all onsite monitoring wells should be decommissioned according to federal and local regulations.

4.1.4 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Air Quality Management District (AQMD)
Point of Contact:	FINDS Database
Agency Address:	21865 Copley Drive, Diamond Bar, California 91765
Agency Phone Number:	(909) 396-2000
Date of Contact:	November 2, 2020
Method of Communication:	Online (http://www.aqmd.gov/home/tools/public/find)
Summary of Communication:	No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the AQMD.

4.1.5 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	GeoTracker database
Agency Address:	320 West 4th Street, Suite 200, Los Angeles, California 90013
Agency Phone Number:	(213) 576-6600
Date of Contact:	November 2, 2020
Method of Communication:	Online (http://geotracker.waterboards.ca.gov/)
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.6 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	EnviroStor and Hazardous Waste Tracking System (HWTS)
Agency Address:	1001 I Street, Sacramento, California 95814
Agency Phone Number:	(800) 728-6942
Date of Contact:	November 2, 2020
Method of Communication:	Online (http://www.envirostor.dtsc.ca.gov/public/) (http://hwts.dtsc.ca.gov/report_search.cfm?id=5)
Summary of Communication:	The Church of Latter Day Saints, identified under EPA ID: CAC002585640, listed 25.345-tons of asbestos containing waste and 0.35-tons of polychlorinated biphenyls and malts in 2005. These wastes were disposed of with no identified notices of violation or undocumented releases associated with them. Additionally, in 1993, 2.53-tons of asbestos containing waste was generated and disposed of at the subject property, during an interior renovation of the subject property.

4.1.7 Building Department

Regulatory Agency Data	
Name of Agency:	Santa Fe Springs Building Department
Point of Contact:	https://www.santafesprings.org/cityhall/planning/building/
Agency Address:	11710 East Telegraph Road, Santa Fe Springs, California 90670
Agency Phone Number:	(562) 868-0511
Date of Contact:	November 2, 2020
Method of Communication:	Online Request
Summary of Communication:	As of the date of this report, Partner has not received a response from the SFSBD for inclusion in this report. However, Partner was able to review building plans in the Santa Fe Springs Fire Department which revealed the 1970 structure has only undergone light interior renovations.

4.1.8 Planning Department

Regulatory Agency Data	
Name of Agency:	Santa Fe Springs Planning Department
Point of Contact:	https://www.santafesprings.org/cityhall/planning/default.asp
Agency Address:	11710 East Telegraph Road, Santa Fe Springs, California 90670
Agency Phone Number:	(562) 868-0511
Date of Contact:	November 2, 2020
Method of Communication:	Online Request
Summary of Communication:	According to records reviewed, the subject property is zoned PF for commercial public facility development by the City of Santa Fe Springs.

4.1.9 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Geologic Energy Management Division (CalGem)
Point of Contact:	Well Finder
Agency Address:	5816 Corporate Avenue, Suite 200, Cypress, California 90630
Agency Phone Number:	(714) 816-6847
Date of Contact:	November 2, 2020
Method of Communication:	Online (http://www.conservation.ca.gov/dog/Pages/Wellfinder.aspx)
Summary of Communication:	No oil wells are depicted on the subject property; however, based on the review of CalGem records, DeL'eua 1 (API: 037-15453) was depicted on the north adjacent property, approximately 150-feet north of the subject property. This well is identified as plugged and abandoned. Abandoned oil wells have the potential to pose environmental concerns if 1) the drill cuttings were stored on the subject property and 2) if the emission of methane and hydrogen sulfide gases is likely to impact the subject property. During oil well drilling of this type, it was common practice to deposit the drilling cuttings in a large excavation near the location of the well. The drilling cuttings could potentially contain elevated levels of crude oil, petroleum hydrocarbons and metals. An additional issue of concern with oil wells is the potential emission of methane and hydrogen sulfide gases. These gases can migrate through geologic materials and/or through pathways such as old oil wells, fissures, and fractures in underlying geologic formations. The emitted gases have the potential to accumulate within building interiors or basements and adversely affect human health. No oil wells were formerly located on the subject property, and no evidence of oil well development (cuttings pits, tanks, piping) was observed onsite in the historical aerial photographs reviewed. Based on this information, the presence of the abandoned oil well on the adjacent property is not

Regulatory Agency Data	
	expected to represent a significant environmental concern at this time.

4.1.10 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Los Angeles County Assessor
Point of Contact:	Parcel Viewer (http://maps.assessor.lacounty.gov/)
Agency Address:	500 West Temple Street, Room 225, Los Angeles, California
Agency Phone Number:	(213) 974-3211
Date of Contact:	November 2, 2020
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 808-017-014 and is currently owned by Corp of the Presiding Bishop of Santa Fe Springs Ward. The current building was constructed in 1964 and total(s) approximately 16,847 square feet on a 3.02 acre lot.

Copies of pertinent documents obtained from the above-referenced regulatory agencies are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources was provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	N	N	N
Federal IC/EC Registries	0.50	N	N	N

Radius Report Data				
Database	**Search Radius (mile)**	**Subject Property**	**Adjacent Properties**	**Sites of Concern**

HAZNET	Varies	**Y**	N	N

4.2.2 Subject Property Listings

The subject property is identified as a Hazardous Waste Tracking System (HWTS) and a HAZNET site in the regulatory database report, as discussed below:

- The subject property, identified as LBS Santa Fe Springs Ward Meet House, and Church of Latter Day Saints at 11733 Florence Avenue, reported a hazardous materials producer and operator under EPA ID: CAD028409019. The subject property generated 0.95-tons of asbestos containing waste in 1990, 0.8428-tons of asbestos containing waste in 1991, 2.5284-tons of asbestos containing waste in 1993, and 0.061-tons of asbestos containing waste in 2005. These materials were disposed of via a transfer station. Additionally, the subject property also generated 0.35-tons of PCBs in 2005, which was disposed of via a recycler under EPA ID: CAC002585640. There are no reported notices of violation or documented releases identified for the identified hazardous wastes. Based on the lack of notices of violation, lack of reported release, proper disposal actions of hazardous materials, and the regulatory status, this listing is not expected to represent a significant environmental concern.

4.2.3 Adjacent Property Listings

The adjacent properties are not identified in the regulatory database report.

4.2.4 Sites of Concern Listings

The property to the east is identified as NPL, and SEMS sites in the regulatory database report, as discussed below:

- The property, identified as Omega Chemical Site at 12504-12512 East Whittier Boulevard, is located approximately 0.21-mile to the east of the subject property, and situated hydrologically cross-gradient. This site was identified as an NPL facility. The Omega Chemical Corporation facility was a refrigerant and solvent recycling, reformulation and treatment facility that operated from approximately 1976 to 1991. Drums and bulk loads of waste solvents and other chemicals from various industrial activities were processed at the facility. As a result of the operations and spills and leaks of various chemicals, the soil and groundwater beneath the former Omega property became contaminated with high concentrations of tetrachloroethylene (PCE), trichloroethylene (TCE), Freons 11 and 113 and other contaminants. Contaminated groundwater extends four and one-half miles downgradient (south/southwest) of the former Omega facility. In January 1999, EPA placed the Omega Chemical Corporation Superfund Site (Omega Site) on its National Priorities List. EPA manages the Omega Site as three operable units (OUs): OU-1 includes the contaminated soil and groundwater at and in the immediate vicinity of the former Omega property; OU-2 is composed of groundwater contamination outside and generally downgradient (south-southwest) of OU-1; and OU-3 addresses vapor intrusion from the Omega Site that has occurred in several buildings on and in close proximity to the former Omega facility. Numerous subsurface investigations were performed from the 1980s to the present. Groundwater within the OU-2 area is used as a source of drinking water by several municipal and private water purveyors. Most of the drinking water wells located in the OU-2 area draw water primarily from deeper portions of the aquifer from depths at or greater than 200 feet below ground surface (bgs) and are not currently impacted by groundwater contamination. However, a few drinking water wells in the area draw water at about the 200 feet bgs level and have had some contaminants detected. These wells are currently equipped with wellhead treatment units which are comprised of granular activated carbon (GAC) filters. The GAC filter removes the contaminants from the water to ensure that it meets drinking water standards. Drinking water for the Cities of Whittier, Santa Fe and Norwalk is tested regularly prior to distribution to the public, and all tap water meets State and Federal drinking water standards. In September 2008, EPA issued a Record of Decision (ROD) selecting a soil cleanup remedy for OU-1. The remedial action selected in the ROD consists of a soil vapor extraction (SVE) system to remove and treat the chemical vapors in the soil within OU-1. EPA oversees OPOG's OU-3 work. In August 2010, EPA completed an OU-2 RI/FS, which evaluates the nature and extent of OU-2 groundwater contamination, assesses the potential risks posed by this contamination to human health and the environment, and develops and evaluates alternative remedial actions to address the contaminated groundwater. In August 2010, EPA issued a Proposed Plan that identifies its preferred interim groundwater containment remedy. EPA will continue to periodically sample the groundwater monitoring wells and will evaluate the data as part of this ongoing investigation.

  EPA continues to investigate and notify other PRPs. A review of the listed potential responsible parties (PRP) provided by the EPA Superfund website did not list the subject property as a PRP for this NPL. In addition, the subject property was not identified on the list of former PRPs that have been issued a No Further Action (NFA) letter regarding cleanup activities associated with this NPL

site. Due to the fact that the EPA is currently taking action at this site, it is unlikely that the owner of the subject property would be financially responsible for the remediation of any contamination associated with the Omega Chemical Site. Therefore, no further investigation is recommended on behalf of the subject property owner. Additionally, based on the estimated depth to groundwater (over 100 feet), this NPL listing is not expected to represent a significant vapor migration concern to the subject property at this time.

Based on the findings, vapor migration is not expected to represent a significant environmental concern at this time.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Melia Homes (User of this report).

User Responsibilities				
Item	**Provided By User**	**Not Provided By User**	**Discussed Below**	**Does Not Apply**
AAI User Questionnaire			**X**	
Title Records, Environmental Liens, and AULs			**X**	
Specialized Knowledge			**X**	
Actual Knowledge			**X**	
Valuation Reduction for Environmental Issues			**X**	
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports		**X**		
Other				**X**

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property identified as Corp of the Presiding Bishop of Santa Fe Springs Ward, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User.

5.1.3 Interview with Key Site Manager

A key site manager was not provided to be interviewed at the time of this assessment.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was provided with a Commitment for Title Insurance for the subject property dated September 21, 2020 and issued by Fidelity National Title Company for review as part of this assessment. According to the report, title is vested in Corporation of the Presiding Shop of the Church of Jesus Christ of Latter-day Saints, a Utah corporation sole. No environmental liens were identified for the subject property. The title search did not identify any environmentally noteworthy matters.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Louis Mowers
Site Assessment Conducted On:	October 29, 2020

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 11733 Florence Avenue (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Mr. Chad Brown	Key Site Manager	(949) 759-4367	No

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property.

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the northeastern section the subject property near the tool shed. An independent solid waste disposal contractor, Republic Services, removes solid waste from the subject property. According to property personnel, only household trash is collected in the on-site solid waste dumpsters. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of Santa Fe Springs services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system.

The subject property does not appear to be a designated wetland area, based on information obtained from the United States Department of Agriculture; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface

impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Southern California Edison and the Southern California Gas Company. The mechanical system is comprised of a split system with a central unit and interior air-handler and an exterior condenser/rooftop-mounted packaged electric/natural gas split HVAC units. Hot water is provided by individual hot water boilers.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental

Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;*" 2) 50 ppm-500 ppm – "*PCB-Contaminated;*" and, 3) Greater than 500 ppm – "*PCB-Containing.*" The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Two pole-mounted transformers were observed on the subject property. The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

Partner observed two monitoring wells on the subject property. One monitoring well was identified on the western side of the subject property within the asphalt paved parking spaces. The second monitoring well is located on the southwestern side of the subject property within the landscaping areas. These features are further discussed in Section 4.1.3.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain

construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are "presumed asbestos-containing material" (PACM).

The subject property building was constructed in 1964. A limited, visual evaluation of accessible areas for the presence of suspect ACMs at the subject property was conducted. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACMs:

Suspect ACMs

Suspect ACM	Location	Friable Yes/No	Physical Condition
Drywall Systems	Throughout Building Interior	No	Good
Floor Tiles	Throughout Building Interior	No	Good
Floor Tile Mastic	Throughout Building Interior	No	Good
Spray-Applied Acoustical Material	Throughout Building Interior	Yes	Good
Stucco	Throughout Building Exterior	Yes	Good

The limited visual survey consisted of noting observable materials (materials which were readily accessible and visible during the course of the site reconnaissance) that are commonly known to potentially contain asbestos. This activity was not designed to discover all sources of suspect ACM, PACM, or asbestos at the site; or to comply with any regulations and/or laws relative to planned disturbance of building materials such as renovation or demolition, or any other regulatory purpose. Rather, it is intended to give the User an indication if significant (significant due to quantity, accessibility, or condition) potential sources of ACM or PACM are present at the subject property. Additional sampling, assessment, and evaluation will be warranted for any other use.

According to the US EPA, ACM and PACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition. Prior to any disturbance of the construction materials within this facility, a comprehensive ACM survey is recommended.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Due to the non-residential nature of use of the subject property, LBP was not considered within the scope of this assessment.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the Santa Fe Springs Department of Public Works and Engineering serves the subject property vicinity. The sources of public water for the City of Santa Fe Springs are surface water from the California State Water Project, the Colorado River, and water purchased from the Metropolitan Water District (MWD). According to the Santa Fe Springs and the 2019 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property building for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises.

6.4.1 PCBs

At least two pole-mounted transformers and one pad-mounted transformer was observed on the adjacent properties. No staining or leakage was observed in the vicinity of the transformers. Based on these observations, the presence of adjacent transformers is not expected to represent a significant environmental concern.

No additional items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any RECs during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any CRECs during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any HRECs during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- Partner observed two (2) monitoring wells on the western section of the subject property. These wells are connected to a 2004 renovation conducted on the subject property structure. The probes were installed in conjunction with the construction of a church addition in October of 2004. The subject property is not located within a "Methane Zone" as designated by the City of Santa Fe Springs. Quarterly monitoring of the gas probes were initiated by GeoKinetics on May 14, 2007. From as early as May 14, 2007 until the most recent December 21, 2011 reading, the methane (CH4) readings within the three probes has stayed at a constant 0.0 detection percentage. Based on the analytical results and the nature of the equipment, the presence of the monitoring wells is not expected to represent a significant environmental concern. However, prior to redevelopment activities, all onsite monitoring wells should be decommissioned according to federal and local regulations.
- Due to the age of the subject property building, there is a potential that asbestos-containing material (ACM) are present. Readily visible suspect ACMs were observed in good condition. Should these materials be replaced, the identified suspect ACMs would need to be sampled to

confirm the presence or absence of asbestos prior to any renovation or demolition activities to prevent potential exposure to workers and/or building occupants.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 11733 Florence Avenue in Santa Fe Springs, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends the following:

- Prior to the disturbance of any suspect ACM at the subject property, a comprehensive survey, designed to determine if the suspect materials are regulated, is recommended. If such materials are identified and need to be disturbed, repaired or removed, a licensed abatement contractor should be consulted. Suspect ACM can also be managed under the auspices of an Operations and Maintenance (O&M) plan.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 11733 Florence Avenue in Santa Fe Springs, Los Angeles County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Partner Engineering and Science, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

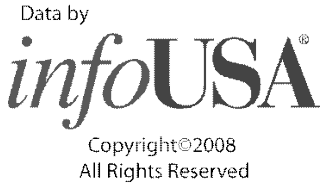

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RE: PRA of October 28, 2020, Reference # H029908-102820.

Dear Partner Engineering and Science, Inc. Louis Mowers,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 11733 Florence Avenue
Santa Fe Springs CA 90670

The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction click here.

Industrial Waste / Underground Storage Tanks / Stormwater

Back

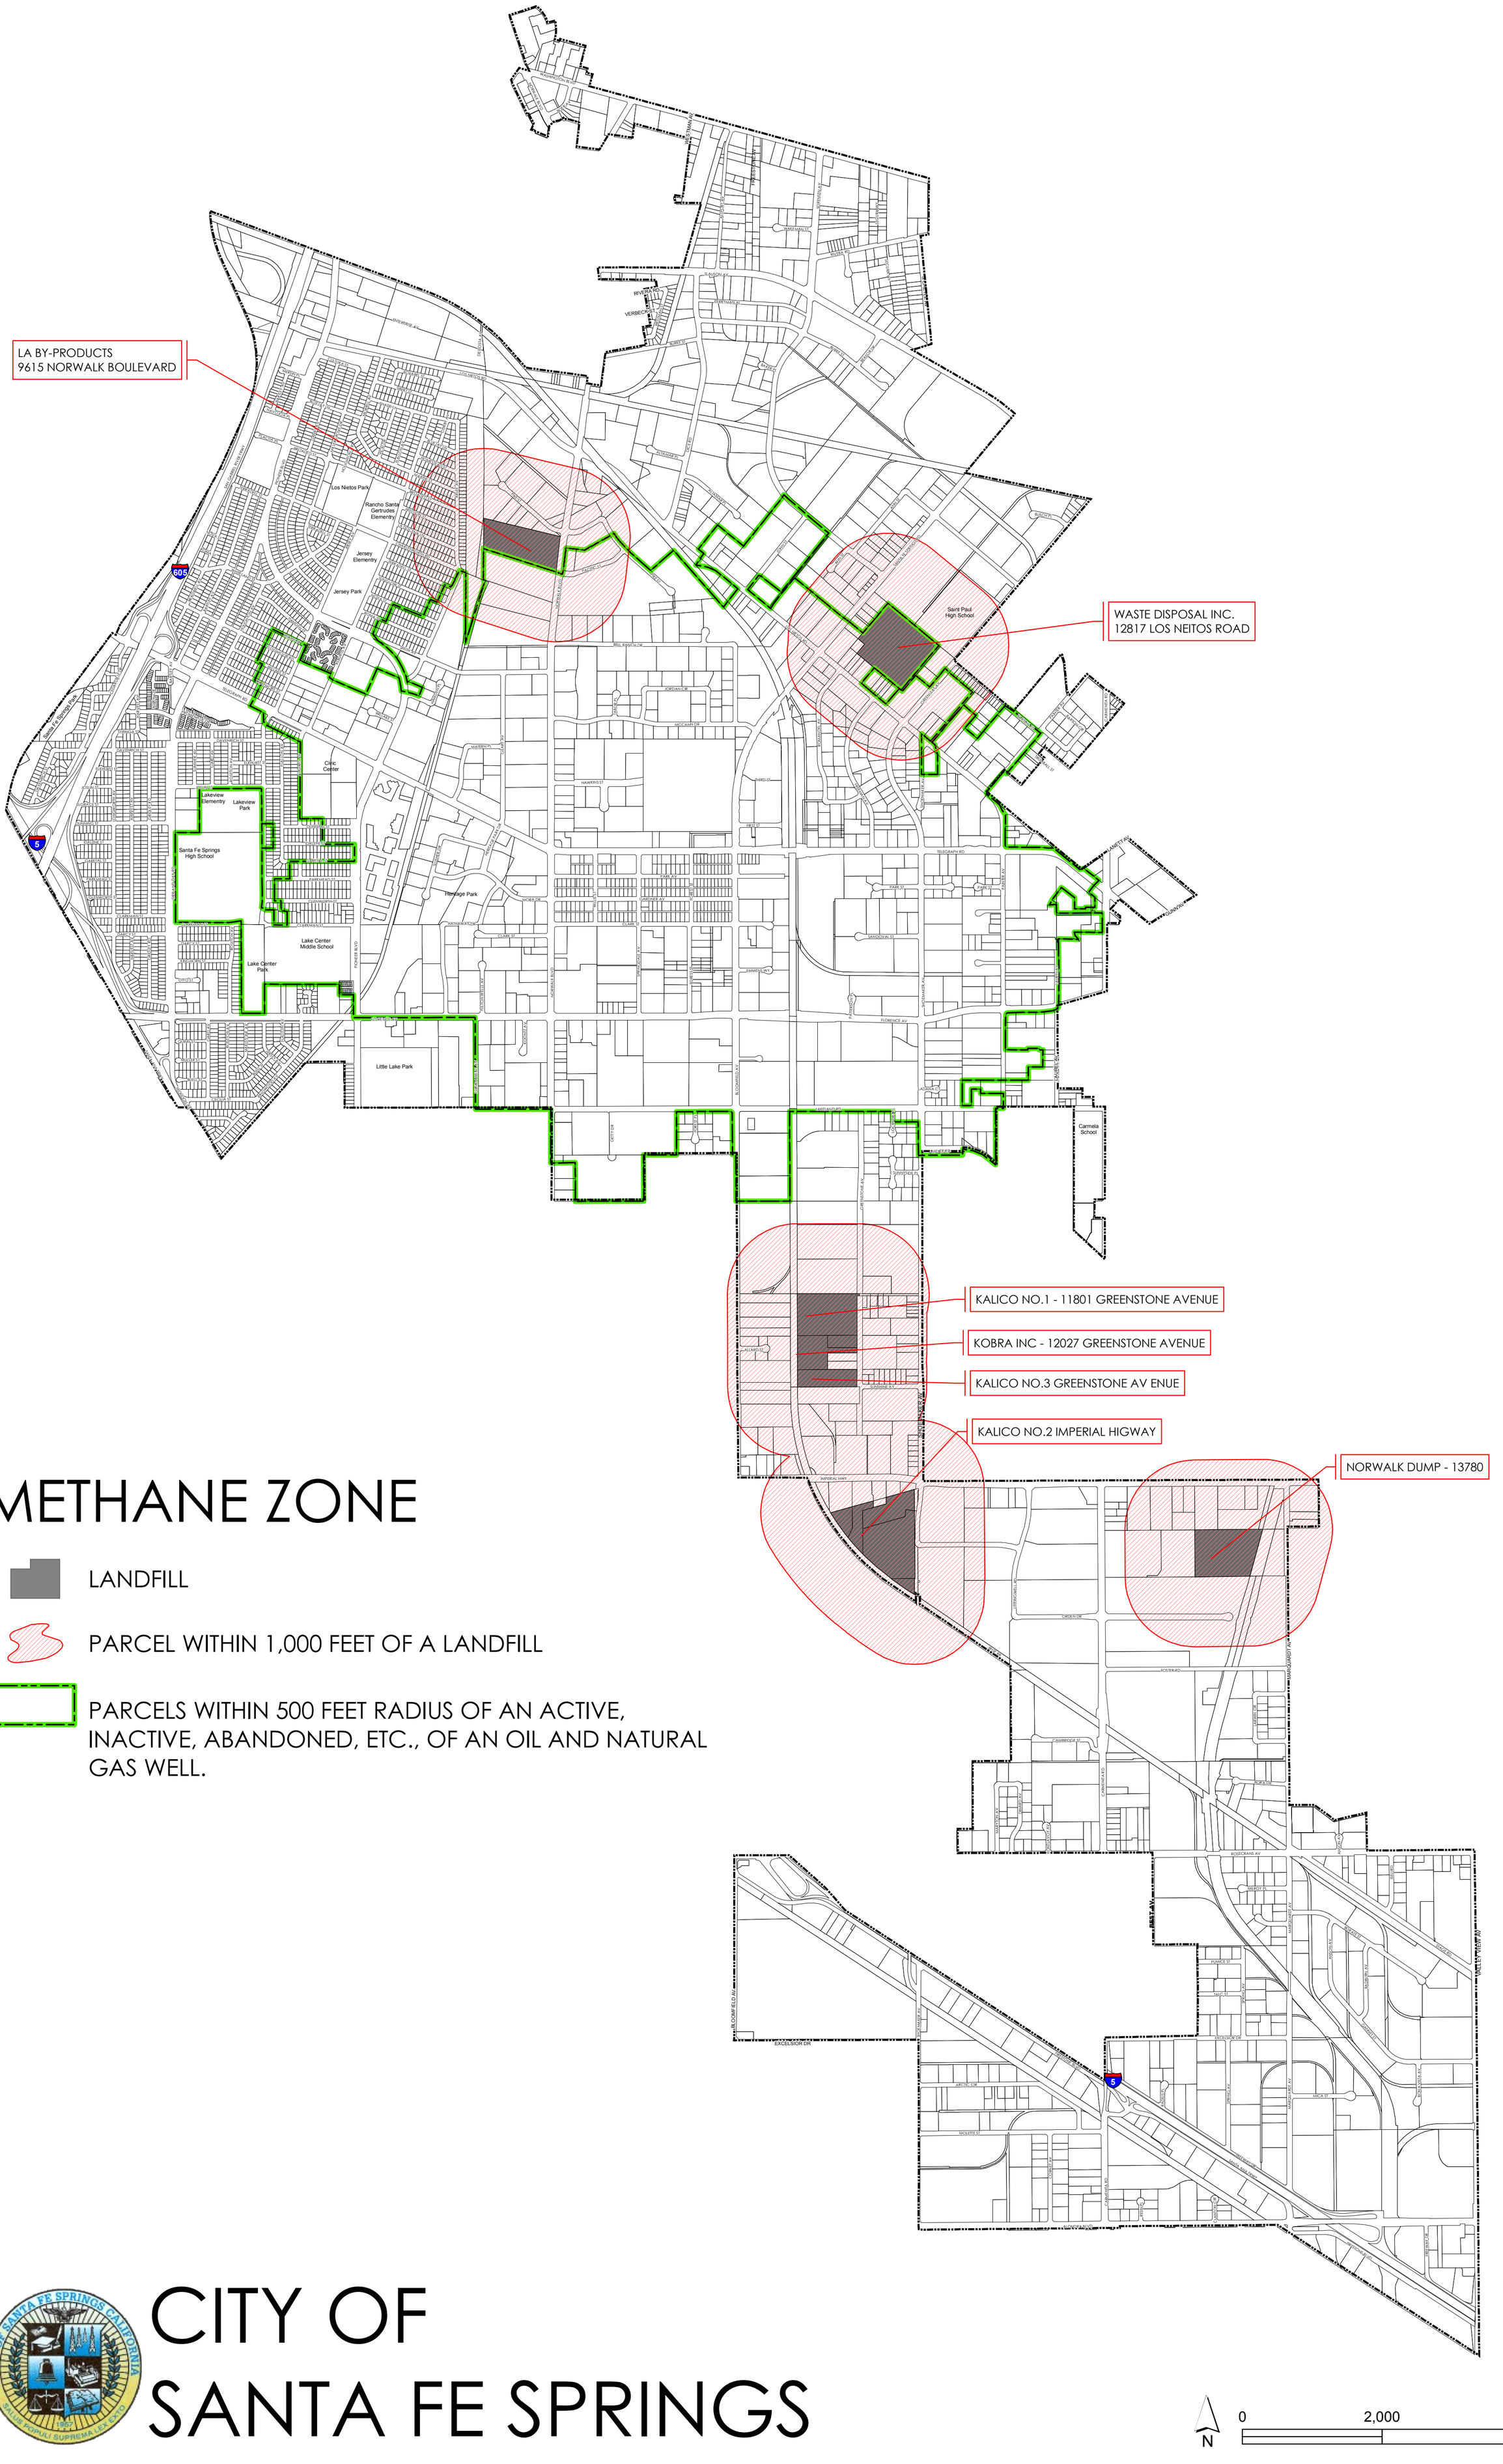

You searched the following address:

Street Number: 11733 Street Name: Florence

Our office does not have any records (related to industrial waste/underground storage tanks/stormwater) for the requested site address.

Please double check the spelling of the street name or search a different address. Both street number and street name must be exact and spelled correctly as they appear for the facility on file. Do not include street direction prefix (i.e. N, S, E, W, etc...) or suffix (i.e. ST, AVE, RD, BLVD, etc...) unless they appear in the street name (i.e. AVENUE K, AVENIDA CESAR CHAVEZ, 10TH ST EAST, CROSSROADS PKWY N, etc...). Do not include any extra spaces after the street number or after the street name.

SECTION 2

If your business is exempt from the reporting requirements, complete this section.

An exemption is claimed for the following reason (check one).

1) ☒ No hazardous materials are handled.
2) ☐ Hazardous materials handled are less than 500 lbs., 55 gal. or 200 cu. ft. (STP) and Acutely Hazardous Materials (AHMs) are handled in quantities less than the Threshold Planning Quantities specified in 40 C.F.R. § 355, Appendix A.
3) ☐ Hazardous materials are for sale to and use by the general public (contained in packages of 5 gallons or less).

If items 2 or 3 were checked please read the following paragraph.

4) ☐ Please check box 4 if you have already contacted the Fire Prevention Division of the Fire Department to determine if a Uniform Fire Code Permit is required. The Uniform Fire Code requires permits for handling hazardous materials as well as operations which are hazardous in nature. Uniform Fire Code Permits may be required for hazardous materials in quantities less than the above disclosable amounts. Common chemical hazard classes which require a permit include: flammable and combustible materials, cryogens, compressed gases, oxidizers, water reactive and unstable materials, carcinogens, toxic and highly toxic materials, explosives, irritants, corrosive and radioactive materials, etc.

SECTION 3

If your business is not exempt, complete this section.

Santa Fe Springs, CA 90670-4619

Murphy
93.03
1003.2.1.1

Dear Mr. Murphy:

I am writing regarding the recent submittal (Plan Check #5610) we made for the Church of Jesus Christ of Latter-day Saints building located at 11733 Florence Avenue. When we met, you mentioned the possibility that the work we were completing could trigger the requirement for the building to be retrofitted with an approved fire-extinguishing system. This was based upon the requirements outlined in Section 1003.2.1.1 of the document you gave to me at the time we met (see attached).

The scope of the work being completed at the building falls into the following three categories:

Maintenance: removal and replacement of existing mechanical equipment, interior painting & staining, removal and replacement of existing millwork, removal of existing asbestos containing material (being done under a separate permit) with repair of damaged surfaces due to remove of the ACM, removal and replacement of flooring materials.

Remodel of existing space: upgrade of existing restroom facilities to provide fully accessible facilities for the disabled, remodel of existing clerks offices.

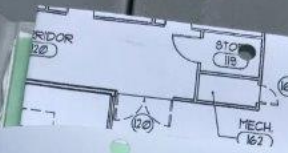

Retrofit: voluntary upgrade of structural system to the current standards for lateral resistance, voluntary upgrade of electrical light fixtures to current energy standards.

The above mentioned document states "when additions, alterations and/or repairs to such building(s) causes the floor area to exceed 5,000 square feet or the height to exceed 40 feet or three or more stories irrespective of height." The work being completed for this project does not "cause" the floor area or height to change in size, so this does not appear to create any requirement for the automatic fire-extinguishing system.

It also states that "in existing building(s) over 5,000 square feet when alterations and/or additions to such building(s) exceeds 25% of the current assessed value of said building(s) in accordance with Los Angeles County

FLORENCE AVENUE

11733

PROJECT
Santa Fe Spgs Bldg
Building Upgrade

COOMBS ARCHITECTURE & PLANNING, INC.

Assessor's records." As stated above, there is no increase in square footage of the building, so the project would not be considered an addition. The other option is when an alteration occurs. In the definitions section of the handout you gave me, an alteration "is any change, addition or modification in construction or occupancy." The occupancy of the building, including any portion of the building, is not changing due to the scope of the project. In addition, the type of construction is not changing. The design of the structural upgrade will be using the same type of construction as is currently in place.

Based upon this information, we hereby request that the determination for this building be made that the installation of an approved automatic fire-extinguishing system will not be required. If you should have any questions, please give me a call.

Sincerely,

Coombs Architecture & Planning, Inc.

Mr. Bruce Fallon
Coombs Architecture & Planning, Inc.
278 Town Center Parkway, Suite 205
Santee, California 92071

SUBJECT: WORK PLAN FOR COMPLETION OF SUBSURFACE METHANE GAS INVESTIGATION AT 11733 FLORENCE AVENUE, SANTA FE SPRINGS, CALIFORNIA

Dear Mr. Fallon,

As requested this represents a work plan for the completion of a subsurface methane gas investigation at the above referenced property in accordance with guidelines prepared by the City of Santa Fe Springs. Based upon the plans you have provided, it is our understanding that interior renovations are being performed on the existing church facility at this address. The location of the property is shown in Figure 1 while a recent aerial photograph of the site is provided as Figure 2. As shown, the church building is located near the center of the 3.38-acre property. The majority of the rest of the parcel consists of paved parking and drive areas.

The presence of methane gas in the subsurface is common within former oil production areas and other locations where organic material - such as grass, leaves, wood, manure, etc. - are present in the soil. Methane is generated by the bacteriological digestion, or biodegradation, of organic matter in the absence of oxygen. Where oxygen is present, carbon dioxide rather than methane is typically produced as a result of the biodegradation of organic material within the soil. Our experience indicates methane gas is common and can be found in the soil beneath a relatively high percentage of properties. Methane is not toxic, however it is combustible and potentially explosive at concentrations above 53,000 ppm in the presence of oxygen. This concentration is referred to as its Lower Explosive Level or LEL. Methane is lighter than air and therefore has a natural tendency to rise to the ground surface where it typically dissipates into the atmosphere. The presence of non-pressurized methane at shallow depths beneath the ground surface is normally not problematic. The rates at which methane is generated and/or migrates towards the ground surface are slow enough such that the gas dissipates naturally under normal circumstances. However, as methane migrates to the ground surface, the potential exists for its accumulation beneath slab-on-grade foundation systems or other relatively impermeable ground coverings. If the gas accumulates to high concentrations, and becomes pressurized, and a crack or other penetration is present in the floor slab of the structure, detectable levels of methane may enter the interior of the building. Improvements - such as sub-

Downey CA Stake
Proj. # 500-3415

slab vent lines or gas membranes - are often installed as a precautionary measure when elevated subsurface gas levels are detected.

GeoKinetics will perform an investigation at the subject site to screen for the presence of elevated subsurface methane gas levels in accordance with City of Santa Fe Springs guidelines. This investigation will involve the installation and monitoring of three subsurface gas probes. Each gas probe will consist of a multi-stage installation with sampling tips located at depths of 5, 10 and 20 feet below ground surface. Each gas tip will be isolated with bentonite seals above and below the sampling interval. Temporary flush-mounted, traffic rated vaults will be installed at the ground surface to protect each installation, as necessary. A schematic illustrating the gas probe configuration is attached as Figure 3. It is our understanding the site is accessible by a truck mounted drilling rig.

Monitoring of the gas probes will be performed on two occasions within one week of completing the installations. The concentration of methane, oxygen and carbon dioxide in each gas probe will be measured and recorded during the monitoring events using an infra-red gas analyzer. The gas probe pressures and the barometric pressure will also be recorded during each monitoring event. The gas probe monitoring results will provide information regarding the general distribution and concentrations of methane gas in the subsurface of the site. A detailed report will be prepared describing the monitoring procedures and associated results. The report will include a discussion of the need for, and potential extent of, gas mitigation improvements based upon City guidelines. It is anticipated the methane gas investigation can be completed and a final report submitted within approximately five days of the completion of the final monitoring event.

Please do not hesitate to contact me if you have any questions or comments.

Sincerely,
GEOKINETICS, INC.

SUBJECT: CHANGE OF OCCUPANCY

LOCATION: 11733 FLORENCE

MIKE NOSRAT CALLED REQUESTING THE FIRE DEPT ACCOMPANY HIM AND BUILDING INSPECTOR TED TO THE ABOVE ADDRESS TO CONFIRM THE CHANGE OF OCCUPANCY FROM A TO E. JIM TURBA REQUESTED THIS INSPECTION. HE HAS RECEIVED SEVERAL COMPLAINTS FROM THE NEIGHBORS ABOUT THE ACTIVITIES AT THIS LOCATION. I SENT SEAN HAS OUR REPRESENTATIVE. THE FINDINGS WERE THAT THE CHURCH WAS BEING USED AS A SCHOOL. UNDER MY DIRECTION SEAN WROTE THE SCHOOL (NEW HARVEST CHRISTIAN FELLOWSHIP) TO CEASE AND DESIST OPERATION IMMEDIATELY. LATER, SERGIO ROMO CALLED ME IN REGARDS TO THE FLSS. I ADVISED HIM THAT HE CANNOT CONTINUE AS A SCHOOL UNTIL THE BUILDING MEETS THE REQUIREMENTS OF AN E-1 OCCUPANCY. AND FOR THE FIRE DEPT REQUIREMENTS THAT IS A FIRE ALARM SYSTEM AND POSSIBLY A SPRINKLER SYSTEM. HE STATED THAT HE WOULD SUBMIT PLAN SOON AND COULD HE OPERATE AS A SCHOOL UNTIL THE UPGRADES ARE DONE. I TOLD HIM THAT WOULD NOT BE ACCEPTABLE. I ALSO TOLD HIM THAT IN AUGUST I TOLD HIM OUR REQUIREMENTS FOR THE CHANGE OF USE OF THE CHURCH TO A SCHOOL. HE SAID AT THAT TIME THEY DECIDED NOT TO USE THE SITE AS A SCHOOL.

JIM TURBA CALLED ME, ABOUT OUR FLSS AND STATED THAT HE WOULD HAVE BUILDING DEPT ALSO SEND A LETTER ADVISING THAT THE CHURCH CANNOT BE USED HAS SCHOOL.

I ADVISED CHIEF SCHNABEL OF THE ABOVE.

Re: Modification Case No. 1019

Cornwall Associates
234 N. El Molino, Ste. 100
Pasadena, California 91101

Gentlemen:

The Planning Commission at its meeting held March 8, 1993 took action on your request for approval of a Modification of Property Development Standards to not provide a portion of the required number of off-street parking spaces on the property located in the PF, Public Facilities zone at 11733 Florence Avenue.

The Commission approved this request subject to the following conditions:

1. That a minimum of 194 off-street parking spaces shall be made continuously available on the subject site at all times as shown on the site plan on file with this case.

2. That the proposed addition shall be developed in substantial conformance with the plot plan, floor plan and elevations submitted by the applicant and on file with this case.

3. That all other requirements of the City Zoning Ordinance, Uniform Building Code, Fire Code, Property Maintenance Ordinance, and all other applicable regulations shall be complied with.

Your attention is called to the fact that this approval is not effective until an affidavit has been signed and notarized to indicate your willingness to accept and abide by the conditions of this approval. Two copies of an affidavit are enclosed for this purposes; one copy is to be returned to this office upon completion -- the other copy is for your files.

You are hereby notified that the time within which judicial review must be sought is governed by the provisions of California Code of Civil Procedure, Section 1094.6.

If you have any questions regarding this matter, please feel free to call.

Very truly yours,

ROBERT G. ORPIN
Director of Planning and Development

Bishop Rae
Church of Latter Day Saints
11721 Florence Avenue
Santa Fe Springs, California 90670

Dear Sir:

During the past months, we have had several fires in your paper storage shed located at the rear of your church. As this building seems to be left open quite often and seemingly constitutes a temptation for some, the Fire Department requests that you install permanent doors on this building and keep them locked at all times so as to prevent unauthorized admittance. It is unfortunate that such a request must be made, but I am sure you can see the reason behind such a request.

Thank you for your consideration of this matter. If we can be of any help to you, please feel free to call.

Very truly yours,

ELMER C. GATES
Fire Chief

Subsurface Methane Gas Investigation at 11733 Florence Avenue Santa Fe Springs, California

Prepared by

GeoKinetics

77 Bunsen
Irvine, CA 92618
Tel 949.502.5353, Fax 949.502.5354

Prepared for

Church of Jesus Christ of Latter-Day Saints

February 1, 2012

1.0 **Introduction:** GeoKinetics has been retained by the Church of Jesus Christ of Latter-Day Saints to perform quarterly methane gas monitoring at three multi-stage gas probes at the property located at 11733 Florence Avenue in the City of Santa Fe Springs, California. The gas probes were installed in conjunction with the construction of a church addition in October of 2004. The subject property is located within a "Methane Zone" as designated by the City of Santa Fe Springs. Post construction quarterly monitoring of the previously installed gas probes is being required by the City of Santa Fe Springs in accordance with Ordinance No. 955. Quarterly monitoring of the gas probes was initiated by GeoKinetics on May 14, 2007. This report presents the results of the most recent quarterly monitoring event.

The project location is shown in Figure 1 while a recent aerial photograph of the site is provided as Figure 2. The property consists of a single lot with an area of approximately 147,000 ft^2 (3.38-acres). A church building is present on the south central portion of the property as shown in Figure 2. The areas along the sides and at the rear of the church are covered by an asphalt parking lot. The area to the front of the building is primarily an open landscaped area.

2.0 **Background:** The presence of methane gas in the subsurface is common within former oil production areas and other locations where organic material – such as grass, leaves, wood, manure, etc. – are present in the soil. Methane is generated by the bacteriological digestion, or biodegradation, of organic matter in the absence of oxygen. Methane may also be present in the surficial soils as a result of its upward migration from deeper-oil bearing zones. Our experience indicates methane gas is common and can be found in the soil at a relatively high percentage of building sites in Southern California. Methane is not toxic, however it is combustible and potentially explosive at concentrations above 55,000 ppm in the presence of oxygen. This concentration is referred to as its Lower Explosive Level or LEL. Methane is lighter than air and may have a natural tendency to rise to the ground surface where it typically dissipates into the atmosphere. The presence of non-pressurized methane at shallow depths beneath the ground surface is normally not problematic. The rates at which the methane is generated and/or migrates towards the ground surface are slow enough such that the gas dissipates naturally under normal circumstances.

3.0 **Monitoring Activities:** Three multi-stage gas monitoring probes were installed at the site in October of 2004. A schematic illustrating the configuration of the gas probes is provided as Figure 3. As shown in this figure, each gas probe consists of a ¼ - inch diameter polyethylene tubing with an attached porous polypropylene tip.

Individual gas sampling tips were installed at depths of 5, 10, and 20 feet below the finished ground surface (bgs) at each installation. Each sampling tip was embedded within a 12-inch interval of washed Monterey #3 sand. Bentonite clay seals were placed above and below each sand interval in order to isolate the gas sampling tip. Gas tight quick connect fittings were installed on the ends of the polyethylene tubing at the ground surface in order to seal the probes between monitoring events.

Quarterly monitoring of the gas probes was initiated by GeoKinetics on May 14th, 2007. A total of eighteen (18) rounds of monitoring have been completed to date – the most recent of which was on December 21, 2011. This report has been prepared to present the results of the most recent monitoring event. The subsurface gas pressure relative to atmospheric, and the concentrations of methane, oxygen, and carbon dioxide, were measured in each of the sampling tips during each monitoring event. The monitoring equipment that was utilized and the associated detection limits, or resolutions, are summarized in Table 1. As indicated, subsurface gas pressures were measured to the nearest 0.1 inches of water prior to each sampling event using a Magnehelic gauge while the barometric pressure was measured and recorded to the nearest 0.1 inches of mercury using a digital barometer. As indicated in Table 1, methane, oxygen, and carbon dioxide concentrations were measured in the field using a portable, methane specific, GA-90 infra-red gas analyzer. A volume of gas equivalent to approximately ten times that of the ¼-inch diameter polyethylene gas probe tube was extracted through the GA-90 during the monitoring process. Steady state readings were generally obtained after approximately two tubing volumes of gas had been extracted. The highest methane reading displayed in each instance was recorded.

The GA-90 was calibrated at the beginning and the end of each day of monitoring using a certified mixture of 15% methane, 15% carbon dioxide, and 70% nitrogen calibration gas (Note: all gas concentrations referred to in this report are on a volumetric basis). A Photovac Flame Ionization Detector (FID) was used to confirm the combustible gas levels at the selected probes where sufficient oxygen was present in the probe to operate the FID. The gas levels measured with both detectors were found to be consistent.

Ambient gas levels in the air four feet above the ground surface were recorded at the site periodically during the monitoring. In each instance, the measured gas level fell within the following range:

Gas	Measured Range
Methane	<0.1%
Carbon Dioxide	<0.1%
Oxygen	20.5% to 21.4%

The pressures and concentrations measured in each of the subsurface gas probes during the monitoring event are summarized in Table 2. As indicated, methane gas has not been detected at any of the three installations during the eighteen monitoring events completed to date. Gas probe pressures were found to range from 0.00 to +0.05 inches of water at the time of the most recent monitoring event. This pressure range is consistent with normal barometric lag. Elevated pressures consistent with subsurface gas generation or seepage were not detected.

The concentration of oxygen in the atmosphere at sea level is approximately 21%. The subsurface oxygen levels measured in conjunction with this investigation were found to be depressed at depth in each of the three installations. The oxygen levels measured to date in the nine sampling tips have averaged approximately 8.2%. The average concentration of carbon dioxide in the atmosphere at sea level is approximately 0.03%. Subsurface carbon dioxide levels were elevated above typical atmospheric levels at all three installations. Carbon dioxide levels were typically lower in the five-foot deep gas probes (averaging approximately 9.1% to date) and higher in the 20-foot deep gas probes (averaging approximately 16.6% to date). The reduced oxygen levels and elevated carbon dioxide levels are consistent with the ongoing aerobic biodegradation of small amounts of organic matter entrained within the soil. The subsurface oxygen and carbon dioxide levels measured at this site are typical and provide no indication of combustible gas seepage.

4.0 Closing: This investigation has been performed with the degree of skill and care ordinarily exercised by engineers practicing in this, and similar, localities. No other warranty, expressed or implied, is given regarding the conclusions or professional opinions presented in this report. The scope of this report is limited to the matters expressly covered herein. This report is presented for the sole use of the Church of Jesus Christ of Latter-Day Saints and may not be relied upon by any other party without written authorization from GeoKinetics.

All recommendations, findings, and conclusions presented in this report are based upon facts and circumstances as they existed at the time this report was prepared. A change in any fact or circumstance upon which this report is based may necessitate re-evaluation and/or modification of the recommendations, findings, and conclusions presented herein. Due to the nature of this type of investigation, uncertainty exists with respect to the subsurface conditions that are present between sampling locations. If the level of inherent uncertainty is unacceptable, additional sampling and/or testing should be considered.

We hope this information is helpful to you. Please do not hesitate to contact the undersigned if you have any questions or comments.

Sincerely,
GEOKINETICS, INC.

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 02/13/2020 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/27/2020 has revealed that there are 14 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

LOS ANGELES CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LOS ANGELES CO LF METHANE list, as provided by EDR, and dated 04/30/2012 has revealed that there is 1 LOS ANGELES CO LF METHANE site within approximately 0.5 miles of the target property.

Summary Details:

Conditions at Proposal September 29, 1998): The Omega Chemical Corporation Omega) site is a former ha ardous waste treatment and storage facility that operated from 1976 to 1991 on a 40,000-square foot property in Whittier, Los Angeles County,California. Omega conducted solvent recovery using an on-site fractionation and distillation process and operated as a storage and transfer facility for various ha ardous waste classifications. Ha ardous wastes stored on site contained mainly chlorinated and aromatic solvents. In June 1995, before removal activities, the Omega site consisted of thousands of drums of ha ardous waste, two roll-off bins of hardened resin material, hundreds of empty but contaminated drums, numerous cylinders with capacities ranging from 15 to 20,000 pounds, and various other smaller containers of waste and/or ha ardous waste. Inside the on-site warehouse there were hundreds more 55-gallon drums that Omega claimed to be product and assorted smaller containers of ha ardous material. Since 1991, the California Department of Toxic Substances Control DTSC) and EPA s Ha ardous Waste Management Division have been actively trying to get the owner/operator to remove the wastes and clean up the site.In March 1995, the site owner/operator plead guilty to two felony counts of illegal storage and disposal of ha ardous wastes. On May 9, 1995, EPA issued CERCLA Administrative Order No. 95-15 to the owner of Omega and to generators of ha ardous waste that had shipped major quantities of material to Omega. During 1995, EPA s Superfund Emergency Response Office oversaw Phase I removal activities, during which contractors to a responsible party group removed all ha ardous materials and wastes from the site. Phase II site activities began in November 1995 and included collection and analyses of subsurface soil and

OMEGA CHEMICAL SITE PRP ORGANIZED GROUP (Continued) **1000232419**

ground water at the site. Analytical results indicated that subsurface soil samples were mainly contaminated with tetrachloroethene PCE), with lesser amounts of trichloroethene, dichloroethene and other chlorinated hydrocarbons, Freons and metals. PCE contamination was detected in soil at concentrations ranging from 1.9 milligrams per kilogram mg/kg) to 510 mg/kg. Ground water samples collected at the site contained PCE up to 86,000 micrograms per liter as well as significant concentrations of other chlorinated hydrocarbons and Freons. Phase II activities documented the presence of PCE in shallow ground water ina plume that extends almost 1 mile downgradient of the site. Although the ground water samples were collected in the shallow regional aquifer of the Lakewood Formation and most of the municipal drinking water wells draw water from the San Pedro Formation, California Department of Water Resources hydrogeologic cross-sections of the Lakewood and Upper San Pedro Formations indicate that aquifers are interconnected within 2 miles of the site. Eight water purveyors draw ground water from 35 wells within 4 miles of the site to supply drinking water to approximately 284,270 people. The nearest well to the site is 1.3 miles to the west. This and nearly two-thirds of the wells within 4 miles draw water from the Lakewood and Upper San Pedro formation aquifers. The San Gabriel River is the nearest surface water body at approximately 2.5 miles from the site. The site is located in a mixed industrial and residential community, with residences located across Whittier Boulevard tothe northeast. Status January 1999): EPA is considering various alternatives for the site. The description of the site release) is based on information available at the time the site was scored. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Benzene, Tetrachloroethylene (PCE), Toluene, Trichloroethylene (TCE), Xylene
Site History:	A natural gas processing plant was located within the southwest portion of the study area and was demolished around 1960 when the area was commercially redeveloped. Environmental assessment and remediation activities, focusing on the former natural gas processing plant were overseen by the County of Los Angeles initially, then later by the City of Santa Fe Springs (SFS) beginning in 2000. By mutual agreement, the SFS had a lead oversight role for the purpose of soil cleanup and closure while the Regional Water Quality Control Board (Regional Board) oversaw site activities with regard to groundwater protection. Four entities agreed in 2002 to participate in a consortium to address environmental issues in what came to be called the Mini-Regional Study Area in the City of Santa Fe Springs. The entities are: the City of Santa Fe Springs (Little Lake Village senior housing project, Consolidated Graphics, Kimmerle Brothers, Inc., and Bemshaw Group (Western Allied Property). The Study Area is bound to the west by Fulton Wells Road, to the east by Koontz Avenue, to the north by Florence Avenue, and extending 610 to 1,240 feet southward from Florence toward Lakeland Road as shown on the attached Figure. Site assessment Soil borings were advanced in February 1988, after it was determined that elevated levels of hydrocarbons were

CITY OF SANTA FE SPRINGS - LITTLE LAKE VILLAGE HOUSING REDEV (Continued) **S118504515**

present (currently this comprised the northern half of LLV) based on a soil vapor survey conducted on the John Alexander & Associates property in December 1987/January 1988. The County of Los Angeles Fire Department and Department of Health Services, oversaw site investigation and remediation activities until 2000. As part of the acquisition of the LLV property, the City of Santa Fe Springs (SFS) retained Alaska Petroleum Environmental Engineering, Inc. (Alaska Petroleum) to perform a Phase I Environmental Site Assessment, Phase II Site Characterization (Phase II), a methane gas survey, and oversee a Human Health Risk Assessment (HHRA), and a hydrocarbon fate-and-transport (FAT) study. The latter two reports were prepared by Enviro-Tox Services, Inc. using Phase II analytical data collected by Alaska Petroleum. The June 2002 HHRA and FAT reports determined that: 1) The installation of subsurface passive venting and/or vapor barriers could result in the reduction of estimated cancer risks to levels below the one-in-a-million cancer health risk, and 2) It will take between 78 and 1,000 years for the petroleum hydrocarbon constituents to reach groundwater, and due to the soil moisture the concentrations, would either most likely fall below current USEPA MCLs and drinking water standards or not reach groundwater at all. The SFS Fire Department reviewed the draft HRA to determine if there would be any requirements pertaining to further investigation, future monitoring or proposed mitigating measures that applied to the City property development. City Fire concluded that no further action was required at this time other than the installation of a subsurface, passive methane venting system (e.g., a vapor barrier) under all residential buildings. However, City Fire also stated that this does not preclude any other requirements imposed by other regulatory agencies such as the Regional Water Board. SFS had no further requirements for the Little Lake Village housing project but continued assessment was required on three adjacent properties (Consolidated Graphics, Kimmerle Brothers and Western Allied) in order to delineate hydrocarbons in the subsurface. Alaska Petroleum subsequently submitted a Phase II workplan for the Mini-Regional study area in January 2004. Site investigation continued through September 2005. The final Mini-Regional Study report was submitted in May 2006. In 2007, soil vapor surveys were implemented on the three remaining properties, after which Consolidated Graphics and Kimmerle Brothers were granted a NFA (soil only) by the City of Santa Fe Springs. Further assessment has been required the City of Santa Fe Springs for either an Indoor Air Quality Study or HHRA at the Western Allied property. Some of the soil vapor and soil matrix samples contained chemicals of concern in concentrations above some of the guidance screening levels. These samples were a small percentage of the total collected and were delineated with no detectable concentrations. As required by the Regional Board, three groundwater monitoring wells were installed. Quarterly sampling was performed on September 10, 2007 and November 21, 2007. The sampling results indicated the primary chemicals of concern in the overlying soil (ex. benzene, ethylbenzene, toluene, and xylenes) were generally not detected in the groundwater or present in concentrations below MCLs. Chlorinated hydrocarbons (TCE, PCE) detected above MCLs in the groundwater were generally not detected in the overlying soil, above the capillary zone. The highest chlorinated hydrocarbon concentrations were detected in the most upgradient well, along the property boundary. The foregoing information indicates the source of the chlorinated hydrocarbons is off-site. The Regional Board has

CITY OF SANTA FE SPRINGS - LITTLE LAKE VILLAGE HOUSING REDEV (Continued) **S118504515**

information regarding several sites in the upgradient direction that have documented chlorinated hydrocarbon impacts to groundwater. Remediation Soil impacted with total petroleum hydrocarbons was removed from the former location of the natural gas processing plant to depths between 10 and 30 feet. A contoured excavation diagram can be used to estimate that approximately 35 tons of soil were removed and treated via bioremediation under the oversight of the County of Los Angeles. Closure Closure is pending for the Consolidated Graphics and Kimmerle Brothers properties

Evaluation:

Eval General Type:	Compliance Evaluation Inspection

CONTINENTAL HEAT TREATING (Continued) **1006079722**

Eval Date:	08-15-2013
Violations Found:	Yes
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Performed a compliance inspection and observed scrapped metal exposed to precipitation. The facility's SWPPP is missing one Pollution Prevention team member, and the SWPPP is not certified. The facility handles several metals on site and is not testing for metals. The submitted annual reports show benchmark exceedances. Testing of Zn, CU, Iron, and Pb was requested

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 06/15/1999
Comments: Completed a Preliminary Assessment for the site. Recommended referral to RWQCB-LA. Preliminary Assessment approved by USEPA. U.S. EPA approved PA which DTSC completed for this site. USEPA determined the site is eligible for an SI.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 12/23/1996
Comments: The PEA Equivalent documented characterization and cleanup conducted between 1991 and 1996. DTSC determined that based on the data presented, "no further action" is required on the "Boneyard" Mobile/Jalk Fee Site, and the hazardous materials remaining do not constitute a threat to human health or the environment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 10/28/1993
Comments: The Department received a notification from PRP alleged that the site's soil contamination originated from an off-site source, Continental Heat Treating, Inc.. Soil at the site is contaminated with crude oil; heavy metals such as lead, mercury, and zinc; and chlorinated hydrocarbons such as PCE, TCE, and 1,2-DCE. Sample results indicate that the concentration of these contaminants exceeding regulatory limits. Due to the evidence of contamination onsite, the Department recommends a PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 03/06/1995

MOBIL - JALK FEE OIL PRODUCTION FACILITY (Continued) **S106386948**

Comments: The Department entered into a Preliminary Endangerment Assessment Agreement for the "Jalk Fee Property".

Case Type:	Cleanup Program Site
Case Worker:	LC
Local Agency:	Not reported
RB Case Number:	203
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Dichloroethane (DCA), Dichloroethene (DCE), Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History:	The Former ExxonMobil Jalk Fee Property (Site) at 10607 Norwalk Boulevard is approximately 9 acres in size and was an oil extraction and production facility from the 1920s to the 1990s. All oil field facilities were removed in the late 1990s. Initial investigations started in the early 1990s and soil impacted with volatile organic compounds (VOCs) and petroleum hydrocarbons was encountered. In 1998 and 2000, chlorinated and petroleum hydrocarbon impacted soil was excavated at the Site and transported to offsite facilities for treatment. In 2001, the Los Angeles Regional Water Quality Control Board (Regional Board) issued a no further action requirement for soil. In 2003, the Site was redeveloped as an industrial business park. Initial groundwater investigations started in 2000, with the installation of 3 shallow single-depth groundwater monitoring wells. VOCs, mostly tetrachloroethene (PCE) and trichloroethene (TCE) were detected in groundwater samples. To further assess groundwater conditions at the Site, three additional multi-depth wells were installed at the Site in April 2011. During this investigation, PCE was detected in soil at concentrations up to 6,600 micrograms per kilogram at approximately 15 feet below ground surface, in the southern portion of the Site. Groundwater samples from the newly installed wells are impacted with PCE at concentrations up to 1,800 micrograms per liter. Based on these results, the Regional Board directed ExxonMobil to conduct additional soil and groundwater investigations; therefore, the 2001 no further action determination for soil is no longer applicable to the Site. Additional investigations (soil vapor, soil, groundwater) were conducted in 2012 and 2014. Off-Site groundwater investigations were conducted in 2014 with the installation of multidepth groundwater monitoring wells. In 2017, indoor air investigations were conducted at two on-Site (10607 Norwalk Boulevard and 10629 Norwalk Boulevard) and one off-Site building (10701 Norwalk Boulevard). Indoor air sampling results were used to conduct evaluations of vapor intrusion into indoor air. The evaluations are being reviewed by the California Office of

MOBIL - JALK FEE OIL PRODUCTION FACILITY (Continued) **S106386948**

Environmental Health Hazard Assessment. Additional indoor investigations are required at an off-Site commercial Building. Additional on-Site and off-Site groundwater monitoring wells were installed in 2019 to further delineate the VOCs plume under the Site and immediate vicinity. In early 2020 a pilot test for soil vapor extraction and air sparge will be conducted at several locations throughout the Site and at the adjacent Continental Heat Treating site. emulsified oil will be conducted at one location.at the Site and the adjacent Continental Heat Treating facility. Folllowing this pilot test, injection of emulsified vegetable oil will be conducted in one on-Site well as a pilot test. Waste Discharge Requirements will obtained/adopted prior to injection activites.

RB Case Number:	0318E
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil
Potential Contaminants of Concern:	Arsenic, Total Petroleum Hydrocarbons (TPH)
Site History:	The Site is a Southern California Edison Substation located on the Former Powerine Oil Co Refinery facility. The Substation area was leased by Edison to provide power for the refinery operations. Edison conducted a limited site assessment in its due diligence to return the leased property to the current owner. Levels of Arsenic and TPH were reported above the established cleanup goals for the Former Powerine Refinery facility.

Name:	FORMER POWERINE OIL CO REFINERY - WESTERN PORTION
Address:	12345 LAKELAND ROAD
City,State,Zip:	SANTA FE SPRINGS, CA 90670
Region:	STATE
Facility Status:	**Open - Remediation**
Status Date:	02/13/2017
Global Id:	T10000005705
Lead Agency:	LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number:	Not reported
Latitude:	33.933150592
Longitude:	-118.0713759
Case Type:	Cleanup Program Site
Case Worker:	EPL
Local Agency:	Not reported
RB Case Number:	0318D
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Benzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating, Xylene
Site History:	Goodman Santa Fe Springs SPE LLC (Goodman) acquired the western 18 acres of the property and will conduct investigation and cleanup activities of soil and groundwater at and below the Site. Goodman has entered into an agreement with the Regional Board pursuant to the California Land Reuse and Revitalization Act of 2004 (CLRRA) (Health & Safety Code 25395.60 et seq.), which provides for specified immunities from liability to qualified persons where the person completes investigation and response actions under the oversight of the Regional Board. Pursuant to that agreement, Goodman has agreed to clean up the Site and to pay the Regional Board s oversight costs. The remaining portions of the property and offsite areas affected by the activities of Powerine will be addressed by other parties.

POWERINE OIL REFINERY/WALKER PROPERTY (Continued) **S106386988**

Longitude:	-118.06820154
Case Type:	Cleanup Program Site
Case Worker:	EPL
Local Agency:	Not reported
RB Case Number:	0318A
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Benzene, Crude Oil, Other Petroleum
Site History:	Oil production and refining activities began at the site in the 1930's and continued until 1995. Assessment of soil and groundwater conditions are ongoing and some above ground structures are being removed to facilitate this. Soil and groundwater are impacted with petroleum hydrocarbons including free phase hydrocarons and dissolved benzene. The impacted groundwater extends southward, beneath adjacent parcels.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020
Date Data Arrived at EDR: 08/03/2020
Date Made Active in Reports: 08/25/2020

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/29/2020

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/29/2020

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2020

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Data Release Frequency: Varies

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/12/2020
Date Data Arrived at EDR: 05/12/2020
Date Made Active in Reports: 07/27/2020

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation:	123 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5633777 WHITTIER, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

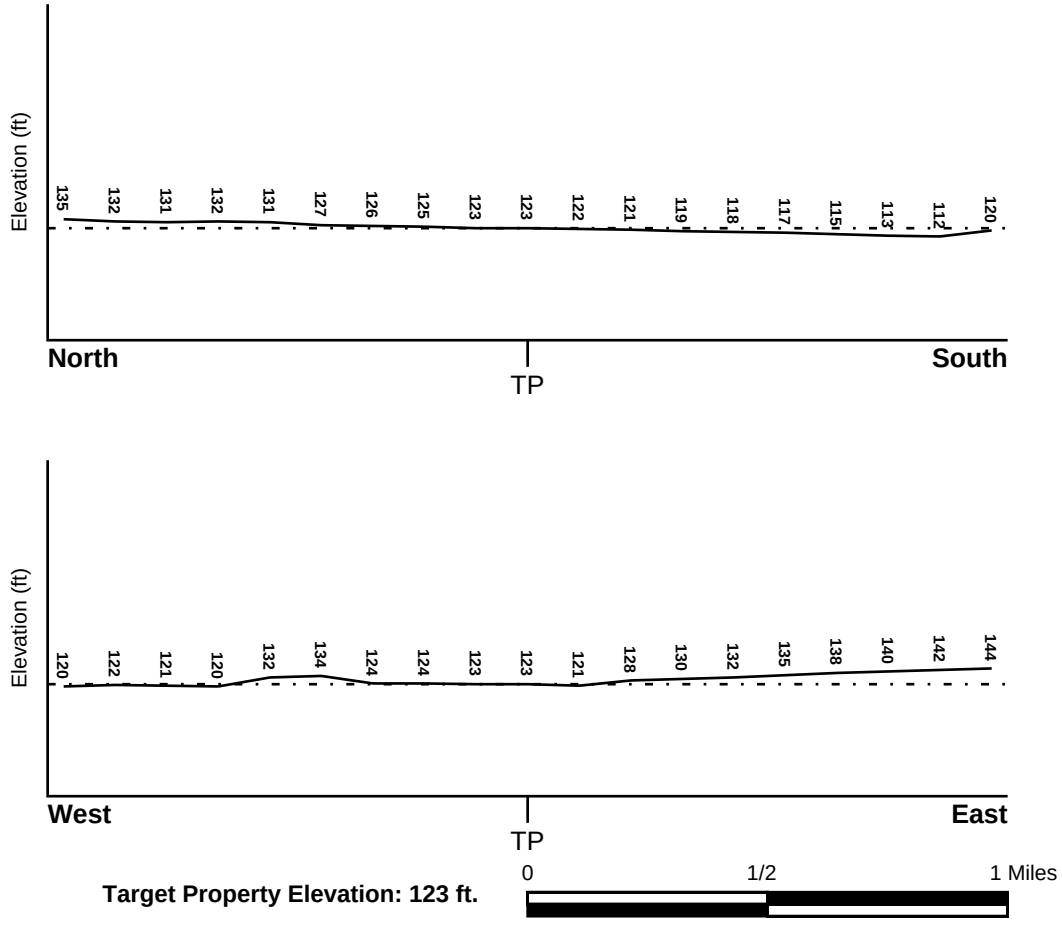

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

WHITTIER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile ESE
Site Name:	Powerine Oil Co
Site EPA ID Number:	CAD008383291
Groundwater Flow Direction:	South
Inferred Depth to Water:	70 to 110 feet in the shallow aquifer.
Hydraulic Connection:	The shallow and deeper aquifers are considered to be hydraulically connected in the site vicinity.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
16	1/2 - 1 Mile East	SSW
1G	1/2 - 1 Mile East	SSW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

APPENDIX D: QUALIFICATIONS

PARTNER

Louis N. Mowers
Environmental Scientist

Education

B.S., Environmental Studies, University of California, Santa Barbara, CA

Highlights

Phase I Environmental Site Assessments
Transaction Screen Assessments
Environmental Desktop Reports

Experience Summary

Mr. Mowers serves as a Staff Assessor for Partner Engineering and Science, Inc. (Partner), to perform Phase I Environmental Site Assessments in accordance with EPA's All Appropriate Inquiry (AAI) and the American Society of Testing and Materials (ASTM). His responsibilities include conducting Freedom of Information Act (FOIA) agency file reviews, detailed site-inspections, in-depth historical reviews, and preparation and submittal of reports.

Outside of environmental consulting, Mr. Mowers has experience with ecological sustainability, environmentally sensitive medical waste disposal, and environmental law proficiency with NEPA, CEQA, ESA, and the CCC. Through his coursework at UCSB, Mr. Mowers was responsible for assisting in the design of aquatic and terrestrial ecologically sustainable models and field data recordings. His skills in research, technical writing, data management, and environmental efficiency have prepared him well for his role as a Staff Assessor.

Project Experience

Mr. Mowers has experience performing due diligence assessments for a variety of property types. For each assessment he reviews the condition of the building structure and systems and develops a thorough report.

Automotive Repair, Costa Mesa, CA. Mr. Mowers performed a Phase I Environmental Site Assessment for a 2,064 square-foot automotive repair center with multiple aboveground and in-ground hydraulic lifts, along with outdoor waste oil, filters, and engine oils storage.

Commercial Retail Center, Hawthorne, CA. Mr. Mowers performed a Phase I Environmental Site Assessment for a 186,434 square-foot commercial retail center with multiple retail stores and a current dry-cleaner.

Commercial Retail Center, Redondo Beach, CA. Mr. Mowers performed a Phase I Environmental Site Assessment for an 18,000 square-foot commercial center with multiple industrial businesses along with a current dry-cleaner, historic railroad, and on-site UST.

Industrial Factory/Office, Los Angeles, CA. Mr. Mowers assisted in completing a Phase I Environmental Site Assessment for a 2,000,000 square-foot industrial facility, with a gas station, multiple AST's and hydraulic components on site.

AHERA Certified Asbestos Building Inspector, AIR030816612N9319
Environmental Management Certificate Program (University of California, Irvine- University Extension)

Training

Asbestos Building Inspector Initial Course

Highlights

8 years in the environmental consulting industry
8 years of experience performing due diligence assessments including Phase I site Assessments, Transaction Screen Assessments and Environmental Desktop Reports

Experience Summary

Ms. Nguyen currently holds the role of a Project Manager and her responsibilities include managing and performing Phase I Site Assessments in line with the American Society of Testing and Materials (ASTM) standard and US Environmental Protection Agency's All Appropriate Inquiry (AAI) as well as customized client formats. In addition, Ms. Nguyen performs limited asbestos surveys, lead-based paint surveys and radon testing as required per scope of work. Ms. Nguyen also serves as a technical reviewer on environmental due diligence assessments.

Ms. Nguyen has been responsible for the completion of Phase I Site Assessments for various properties including gas stations, dry cleaners, manufacturing sites, industrial/warehouse facilities, hotels, office buildings, retail shopping centers, machine shops, auto repair facilities, cell phone data towers and associated land, recycling facilities, and multi-use commercial/residential buildings. Ms. Nguyen has coordinated the completion of various assessments across the United States.

Project Experience

Ms. Nguyen has over eight years of experience performing due diligence assessments for a variety of property types, as detailed above. For each assessment she reviews the condition of the building structure and systems and develops a thorough report.

Phase I Environmental Site Assessment, Gasoline service stations, Nationwide. Ms. Nguyen conducted, managed, and/or reviewed Phase I Environmental Site Assessments on operating and closed gasoline service stations throughout the continental United States and Hawaii. Conducted extensive reviews of subsurface investigations to evaluate the potential for the presence of residual contamination or undiscovered contamination to remain in place.

Phase I Environmental Site Assessment, Various Apartment Complexes, Nationwide. Ms. Nguyen conducted, managed and performed quality control oversight for the completion of numerous Phase I Environmental

Site Assessments in accordance with the Fannie Mae scope of work for various apartment complexes throughout the United States.

Phase I Environmental Site Assessment, Industrial Facilities, Various Locations Throughout Los Angeles and Orange County, California. Ms. Nguyen conducted, managed, and/or reviewed multiple Phase I ESAs for industrial sites of various sizes.

Phase I Environmental Site Assessment, Landfill, Los Angeles and Orange County, California. Ms. Nguyen conducted and reviewed several Phase I ESA for former landfill sites being redeveloped for commercial or residential use.

Phase I Environmental Site Assessment, Hotel, Beverly Hills, California. Ms. Nguyen performed a Phase I ESA for a well-known, five-star, full service hotel with onsite dry cleaning and previous onsite gas station operations.

Phase I Environmental Site Assessments
Phase II Subsurface Soil/Soil Gas Investigations
Property Condition Assessments
Asbestos/Lead-Based Paint Inspections

Experience Summary

Mr. Vaughn currently serves as a National Client Manager with significant environmental and due diligence engineering experience nationwide. Mr. Vaughn's experience includes two former Engineering News-Record Top 500 Design firms and a Fortune 500 firm. His responsibilities include full-phase environmental consulting, national client management, multi-scope contract negotiation/execution, portfolio project management, and technical report quality control. Mr. Vaughn's regional and national expertise compliments the wide variety of Partner projects and client types including prominent fast-food retail chains, attorneys, commercial developers, mortgage bankers, real estate brokers, individual investors, equity/institutional investment groups, and financial lending institutions, including CMBS lenders, SBA lenders, and GSA (Fannie and Freddie) lenders.

Mr. Vaughn has served as an environmental scientist, project manager, or executive senior author on over 20,000 real estate transactions. Mr. Vaughn's due diligence resume includes experience at all levels, advising lenders and real estate investors through the following product types:

- Phase I Environmental Site Assessments
- Phase II Subsurface Investigations
- Phase III Site Characterizations
- Remedial Cost Estimates
- Remediation Design and Implementation
- Environmental Transaction Screens
- Property Condition Assessments
- Probable Maximum Loss Assessments
- Property Condition Evaluations
- Asbestos Surveys
- Lead-Based Surveys

Real estate investors, redevelopment agencies, financial institutions, insurance lenders, and real estate equity funds have come to rely on his advice and judgment to help them with their real estate business decisions. Mr. Vaughn is a dedicated professional who takes pride and pleasure in meeting his client's needs and spearheading and assembling the team with the expertise to handle any issue that may come up during the transaction.

Project Experience

Multi-Site Portfolio, Nationwide. Managed performance and delivery of summary matrix and completed Phase I reports for a 300+-site portfolio of apartments for a large stakeholder group.

Multi-Site Portfolio, Nationwide. Managed a 350+-site portfolio of bank branches for one of the largest bank mergers the mid-1990s.

High Rise Office Building, San Francisco. Worked on one of the largest high rise acquisitions in San Francisco in 2015 to manage pre-acquisition due diligence for equity investor of a high rise office building in downtown San Francisco. Included a Phase I ESA, equity PCA with specialty evaluations of facade, MEP, Fire and Life Safety, Roof, and ADA.

Multi-Site Gas Station Portfolio, California. Managed performance and delivery of complete reports for a 25-site portfolio of gas stations for national lender.

Multi-Site Fast-Food Portfolio, Midwest. Managed the completion of 25 Phase I ESAs located in the Midwest in a 10-business day turnaround.
