Subject: **Phase I Environmental Site Assessment**
439 and 451 South 4th Street
San Jose, California 95112
AEI Project No. 453900
Client Reference No. Job No. 15-083

Dear Shannon George:

AEI Consultants is pleased to provide the *Phase I Environmental Site Assessment* of the above referenced property. This assessment was authorized and performed in accordance with the scope of services engaged.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (408) 829-8679 or TGolino@aeiconsultants.com.

Sincerely,

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by David J. Powers & Associates to conduct a Phase I ESA in conformance with AEI's contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 439 and 451 South 4th Street, San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Pertinent subject property information is noted below:

PROPERTY INFORMATION	
Site Address(es)	439 and 451 South 4th Street, San Jose, Santa Clara County, California 95112
Property ID (APN or Block/Lot)	467-47-058 & 467-47-096
Location	Southwestern side of South 4th Street, bound by East El Salvador to the northwest and East William Street to the southeast
Property Type	Multifamily
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.5/Assessor
Number of Buildings	Three
Building Construction Date(s)/Source	1965 (439 South 4th Street)/Assessor's Office 1984 (451 South 4th Street)/Assessor's Office
Building Square Footage (SF)/Source	18,200/Ownership
Number of Floors/Stories	Three (439 South 4th Street) Two (451 South 4th Street)
Basement or Subgrade Area(s)	None identified
Number of Units	30 (439 South 4th Street) One (451 South 4th Street)
Additional Improvements	Asphalt/concrete-paved parking areas and associated landscaping
On-site Occupant(s)	Residential tenants
Current On-site Operations/Use	Residential and leasing office uses
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	None identified

A chronological summary of historical subject property information is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1884	Unknown use/Data failure; refer to Section 1.6.1	N/A
1884	Mostly undeveloped land, residential on southern portion (assigned addresses of 5-8 and 451 South 4th Street)	Sanborn Map

DRAFT

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
1891-1982	Former residential buildings are present (assigned addresses of 425, 429, 439, 445, 451 South 4th Street) / auto upholstery shop noted at 425 S 4th Street in 1963	Aerial photographs, Sanborn maps, city directories, previous report
1965-Present	Existing apartment buildings at 439 S 4th Street are constructed; occupied by residential tenants (439 South 4th Street)	Aerial photographs, city directories, Sanborn maps, building records, site observation, previous report
1984-Present	Existing single-family residence at 451 S 4th Street is constructed; occupied by residential tenants with exception of "Discount Photo Supply" between 1985 to 1999 and "Online Termite Co." in 2004 (451 South 4th Street)	Aerial photographs, city directories, Sanborn maps, building records, site observation, previous report

The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	South 4th Street followed by: Multi-family residences (414, 430, 452, 460 South 4th Street and a parking lot (442, 448 South 4th Street)	None identified
Southeast	Single-family residence (459 South 4th Street)	None identified
Southwest	Multi-family residences (420, 452 South 3rd Street)	None identified
Northwest	Multi-family residence (405 South 4th Street)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

- AEI did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

DRAFT

- AEI did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

- AEI did not identify evidence of HRECs during the course of this assessment.

Other Environmental Considerations (OEC) warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. A de minimis condition is defined by the ASTM Standard as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

- Due to the age of the subject property buildings, there is a potential that ACMs are present. According to the Client, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain asbestos and/or lead-containing materials.
- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition and worker/ occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.
- AEI observed interior areas of the subject property buildings in order to identify the presence of mold. During the on-site reconnaissance, suspect mold growth was observed in the bathroom and kitchen of 451 South 4th Street. The mold growth appeared limited to the shower area and appeared to be a result of poor housekeeping. Based upon our observations, including the localized nature of the suspect mold, AEI recommends cleaning the affected materials. In addition, improved housekeeping would be prudent.
- The northern apartment building is equipped with a hydraulic elevator. The hydraulic fluid contained within elevator systems can potentially contain toxic PCBs. Based on the construction date of the building (pre-1978), the potential exists that hydraulic fluid

DRAFT

within the equipment may have contained PCBs. The equipment for the elevator is located in sealed wooden closet on the first floor of the eastern portion of the northern subject property building. Access was not provided during the site reconnaissance. According the property manager, the elevator has not been in use since her tenure and when it was sealed there were no observed or reported signs of leaks or staining. Based on the lack of a reported release and relative small quantity of hydraulic oil associated with the power unit, the elevator is not expected to represent a significant environmental concern. However, the elevator unit and surrounding area should be inspected for signs of a release upon its removal.

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 439 and 451 South 4th Street, San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs or CRECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

DRAFT

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment performed in conformance with AEI's contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 439 and 451 South 4th Street, San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

DRAFT

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I Environmental Site Assessment is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, current subject property use, and observations and conditions that existed on the date and time of the property reconnaissance.

DRAFT

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this assessment was limited by the following:

- While additional assessments may have been conducted on the subject property, these documents must be provided for AEI's review in order for the information to be summarized/included in this report. Please refer to Section 6.3 for a summary of previous reports and other documentation provided to AEI during this assessment.
- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.
- On December 27, 2021, San Jose Fire Department (SJFD) was contacted for information on the subject property in order to identify historical tenants/use, property development, and/or hazardous substance/petroleum product handling. Due to the time frame of this assessment, records at the SJFD were not available for review. However, based on the quality of information obtained from other sources including SJBD, this limitation is not expected to significantly alter the findings of this assessment.
- Due to the size of the property, AEI observed a representative sample of interior spaces. AEI observed the following units: 1, 5, 7, 9, 13, 16, 21, 23, 26, 27, 28 and 29 in the 439 South 4th Street building, and all areas of the 451 South 4th Street residence. Due to the residential nature of occupancy, this limited inspection method is expected to be adequate for the purposes of this assessment.
- The northern apartment building is equipped with a hydraulic elevator. The hydraulic fluid contained within elevator systems can potentially contain toxic PCBs. Based on the construction date of the building (pre-1978), the potential exists that hydraulic fluid within the equipment may have contained PCBs. The equipment for the elevator is located in sealed wooden closet on the first floor of the eastern portion of the northern subject property building. Access was not provided during the site reconnaissance. According the property manager, the elevator has not been in use since her tenure and when it was sealed there were no observed or reported signs of leaks or

DRAFT

staining. Based on the lack of a reported release and relative small quantity of hydraulic oil associated with the power unit, the lack of access to this area is not expected to alter the overall findings of this assessment.

- Due to the large volume of materials within portions of the buildings and vehicles parked within exterior areas, direct visual observation of many of the floor and wall areas of the buildings and exterior ground surfaces was not possible. Features may be present that were not observed during AEI's field reconnaissance. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.

1.6 Data Failure and Data Gaps

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was a Sanborn fire insurance map from 1884 indicating that the subject property was developed for residential purposes. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. However, as it is assumed that the subject property would have been previously used for residential purposes, if not undeveloped, this data failure is not expected to significantly alter the findings of this assessment. Historical sources were not obtained at five-year intervals dating back to 1940 or first developed use, (whichever is earlier). However, based on consistent or presumed property uses, this data failure is not expected to significantly alter the findings of this assessment.
Information/Sources Consulted	Aerial photographs, city directories, Sanborn fire insurance maps, agency records, previous report, interview

1.6.2 Significant Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

DRAFT

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of David J. Powers & Associates. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors or assigns. Reliance is provided in accordance with AEI's contract and Terms and Conditions executed by David J. Powers & Associates on December 22, 2021. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

DRAFT

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

PROPERTY INFORMATION	
Site Address(es)	439 and 451 South 4th Street, San Jose, Santa Clara County, California 95112
Property ID (APN or Block/Lot)	467-47-058 & 467-47-096
Location	Southwestern side of South 4th Street, bound by East El Salvador to the northwest and East William Street to the southeast
Property Type	Multifamily
SITE AND BUILDING INFORMATION	
Approximate Site Acreage/Source	0.5/Assessor
Number of Buildings	Three
Building Construction Date(s)/Source	1965 (439 South 4th Street)/Assessor's Office 1984 (451 South 4th Street)/Assessor's Office
Building Square Footage (SF)/Source	18,200/Ownership
Number of Floors/Stories	Three (439 South 4th Street) Two (451 South 4th Street)
Basement or Subgrade Area(s)	None identified
Number of Units	30 (439 South 4th Street) One (451 South 4th Street)
Additional Improvements	Asphalt/concrete-paved parking areas and associated landscaping
On-site Occupant(s)	Residential tenants
Current On-site Operations/Use	Residential and leasing office uses
Current Use of Hazardous Substances	None identified
REGULATORY INFORMATION	
Regulatory Database Listing(s)	None identified

2.2 On-Site Utilities

Utility	Source/System Information
Heating System	Natural gas
Cooling System	N/A
Potable Water	City of San Jose
Sewage Disposal/Treatment	City of San Jose

Utility source/system information listed in the table above is provided by Nelly Amas, Owner, unless otherwise noted above.

DRAFT

2.3 SITE AND VICINITY CHARACTERISTICS

The subject property is located in a mixed residential and commercial area of San Jose, California. The immediately surrounding properties consist of the following:

Direction	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	South 4th Street followed by: Multi-family residences (414, 430, 452, 460 South 4th Street and a parking lot (442, 448 South 4th Street)	None identified
Southeast	Single-family residence (459 South 4th Street)	None identified
Southwest	Multi-family residences (420, 452 South 3rd Street)	None identified
Northwest	Multi-family residence (405 South 4th Street)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.4 PHYSICAL SETTING

Geologic Unit: Description/Source	Qa (surficial sediments): Dissected gravel, sand, silt, and clay, deposited in an alluvial environment represents undifferentiated stream alluvium in drainages and younger alluvial fan deposits at base of slopes and on fan areas, undeformed, age Holocene/USGS and United States Department of the Interior
Soil Series: Description/Source	Urban Land-Elpaloalto Complex: the Urban Land designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures; due to the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property/USDA Soil Survey/USDA Soil Survey
Groundwater Flow Direction/Source	Predominantly north-northeast/Cumulative groundwater monitoring for nearby site (498 South 4th Street, located approximately 210-feet east-southeast of subject property), via GeoTracker
Estimated Depth to Groundwater/ Source	11.5 to 36 feet bgs/Cumulative groundwater monitoring for nearby site (498 South 4th Street, located approximately 210 feet east-southeast of subject property), via GeoTracker
Surface waters on the subject property or adjoining sites	None

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description and Occupancy (Historical Addresses)	Source(s)
Prior to 1884	Unknown use/Data failure; refer to Section 1.6.1	N/A
1884	Mostly undeveloped land, residential on southern portion (assigned addresses of 5-8 and 451 South 4th Street)	Sanborn Map
1891-1982	Former residential buildings are present (assigned addresses of 425, 429, 439, 445, 451 South 4th Street) / auto upholstery shop noted at 425 S 4th Street in 1963	Aerial photographs, Sanborn maps, city directories, previous report
1965-Present	Existing apartment buildings at 439 S 4th Street are constructed; occupied by residential tenants (439 South 4th Street)	Aerial photographs, city directories, Sanborn maps, building records, site observation, previous report
1984-Present	Existing single-family residence at 451 S 4th Street is constructed; occupied by residential tenants with exception of "Discount Photo Supply" between 1985 to 1999 and "Online Termite Co." in 2004 (451 South 4th Street)	Aerial photographs, city directories, Sanborn maps, building records, site observation, previous report

DRAFT

According to available historical sources, the subject property was identified to consist of predominantly residential land spanning back to 1884. A former generation of residential buildings occupied portions of the subject property from 1884 to approximately 1982. A former tenant of one of those buildings was listed as an auto upholstery shop at the 425 South 4th Street address in 1963. The existing apartment complex and single-family residential building were constructed in 1965 and 1984, respectively. These buildings have been occupied by residential tenants with the exception of 451 South 4th Street, which was occupied by "Discount Photo Supply" between 1985 to 1999 and "Online Termite Co." in 2004. No evidence of use or storage of hazardous materials was identified as part of these reported former commercial operations, nor were any releases reported. Based on this notion, these former commercial operations are not expected to represent a significant environmental concern.

The known address range of 425-451 South 4th Street (odds) was identified to be associated with the subject property. This range was searched during the course of this assessment.

If available, copies of historical sources are provided in Appendix D.

3.1 AERIAL PHOTOGRAPHS

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjoining Site Descriptions
1939	Five former buildings appearing residential in nature and associated outbuildings are visible	NORTHEAST: Road is visible, followed by several former buildings appearing residential in nature SOUTHEAST: What appears to be existing residence is visible SOUTHWEST: Several former buildings appearing residential in nature are visible NORTHWEST: Former buildings appearing residential in nature and undeveloped/vacant land are visible
1948, 1950*	No significant changes	NORTHEAST: No significant changes visible SOUTHEAST: No significant changes visible SOUTHWEST: Several former buildings appearing residential in nature and vacant land are visible NORTHWEST: No significant changes visible
1956	No significant changes	NORTHEAST: Road is visible, followed by a mixture of existing and former buildings appearing residential in nature SOUTHEAST: No significant changes visible SOUTHWEST: No significant changes visible NORTHWEST: Existing apartment building is visible
1963	No significant changes	NORTHEAST: Road is visible, followed by a mixture of existing and former buildings appearing residential in nature and vacant land SOUTHEAST: No significant changes visible SOUTHWEST: Existing apartment buildings are visible NORTHWEST: No significant changes visible
1968	Existing apartment buildings are visible on northern and central portions, a former building appearing residential in nature and associated outbuildings are visible on southern portion	NORTHEAST: Road is visible, followed by a mixture of existing and former buildings appearing residential in nature and vacant land SOUTHEAST: No significant changes visible SOUTHWEST: No significant changes visible NORTHWEST: No significant changes visible

DRAFT

Year(s)	Subject Property Description	Adjoining Site Descriptions
1974, 1982	No significant changes visible	NORTHEAST: Road is visible, followed by existing buildings and parking lot SOUTHEAST: No significant changes visible SOUTHWEST: No significant changes visible NORTHWEST: No significant changes visible
1993*, 1998, 2006, 2009, 2012, 2016	Existing apartment buildings are visible on northern and central portions, existing building is visible on southern portion	NORTHEAST: No significant changes visible SOUTHEAST: No significant changes visible SOUTHWEST: No significant changes visible NORTHWEST: No significant changes visible

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the aerial photograph review.

*Due to poor image quality and/or scale, detailed observation of site features was not possible in various images.

3.2 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1884	What appears to be a former residential building with associated outbuilding depicted on the southeastern portion, a portion of a shed is depicted on southern corner, remainder is depicted with undeveloped land (assigned addresses of 5-8 and 451 South 4th Street)	NORTHEAST: South 4th Street and Southern Pacific Railroad right of way are depicted, followed by residences, a cattle corral, a glass conservatory, and associated outbuildings SOUTHEAST: Residence with associated outbuildings are depicted SOUTHWEST: Residences and associated outbuildings are depicted NORTHWEST: Residences and associated outbuildings are depicted
1891	Five former separate residences with associated outbuildings are depicted (assigned addresses of 425, 429, 439, 445, 451 South 4th Street)	NORTHEAST: South 4th Street and Southern Pacific Railroad are depicted, followed by residences with associated outbuildings SOUTHEAST: Existing residence with associated outbuilding is depicted SOUTHWEST: Increase in residential density is depicted NORTHWEST: No significant changes depicted

DRAFT

Year(s)	Subject Property Description (Listed Address)	Adjoining Site Descriptions
1915	No significant changes depicted	NORTHEAST: No significant changes depicted SOUTHEAST: No significant changes depicted SOUTHWEST: No significant changes depicted NORTHWEST: Residences, a building used for housekeeping, and a vacant lot are depicted
1950	A former two-apartment building, four other former separate residences, and former associated outbuildings are depicted (assigned addresses of 425, 429, 439, 445, 451 South 4th Street)	NORTHEAST: South 4th Street and Southern Pacific Railroad are depicted, followed by residences with associated outbuildings and a vacant lot SOUTHEAST: No significant changes depicted SOUTHWEST: A vacant lot, an existing apartment building, a residence, and associated outbuildings are depicted NORTHWEST: Vacant land is depicted
1969	Existing apartment buildings on the northern and central portions are depicted, each listed with 15 apartments, vacant land is depicted on southern portion (assigned addresses of 439, 451 South 4th Street)	NORTHEAST: South 4th Street and Southern Pacific Railroad are depicted, followed by two existing residences, vacant lots, an existing residence used as a "V.F.W. Hall", and associated outbuildings SOUTHEAST: No significant changes depicted SOUTHWEST: Existing apartment building are depicted NORTHWEST: Existing apartment building is depicted
1984	Existing apartment structures on northern and central portions are depicted, each listed with 15 apartments, the existing southern building on southern portion is depicted as occupied by an unspecified commercial tenant (assigned addresses of 439, 451 South 4th Street)	NORTHEAST: South 4th Street is depicted, followed by no coverage SOUTHEAST: No significant changes depicted SOUTHWEST: No significant changes depicted NORTHWEST: No significant changes depicted

DRAFT

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the Sanborn map review.

3.3 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. Directories were reviewed in approximate five-year increments from 1922 to 2017. The first listing for the subject property appeared in 1922. The following table summarizes the results of the city directory search.

Year(s)	Address - Occupant Listed
1922, 1925	425 South 4th Street - Residential tenant(s) 429 South 4th Street - Residential tenant(s) 439 South 4th Street - Residential tenant(s) 445 South 4th Street - Residential tenant(s) 451 South 4th Street - Residential tenant(s)

Year(s)	Address - Occupant Listed
1930	425 South 4th Street - Residential tenant(s) 429 South 4th Street - Residential tenant(s) 445 South 4th Street - Vacant 451 South 4th Street - Residential tenant(s)
1940, 1945, 1950	425 South 4th Street - Residential tenant(s) 429 South 4th Street - Residential tenant(s) 439 South 4th Street - Residential tenant(s) 445 South 4th Street - Residential tenant(s) 451 South 4th Street - Residential tenant(s)
1955	425 South 4th Street - Residential tenant(s) 429 South 4th Street - Residential tenant(s) 439 South 4th Street - Residential tenant(s) 445 South 4th Street - Residential tenant(s)
1957	425 South 4th Street - Bill Smith 439 South 4th Street - Residential tenant(s) 445 South 4th Street - Residential tenant(s) 451 South 4th Street - Residential tenant(s)
1960	425 South 4th Street - Residential tenant(s) 429 South 4th Street - Residential tenant(s) 445 South 4th Street - Residential tenant(s) 451 South 4th Street - Residential tenant(s)
1963, 1966, 1970, 1975	425 South 4th Street - Bill Smith Auto Upholstery Shop (only listed in 1963) 439 South 4th Street - Residential tenant(s) 445 South 4th Street - Residential tenant(s) 451 South 4th Street - Residential tenant(s)
1980	439 South 4th Street - Residential tenant(s)
1985	439 South 4th Street - Residential tenant(s) 441 South 4th Street - Residential tenant(s) 451 South 4th Street - Discount Photo Supply
1986	439 South 4th Street - Residential tenant(s), St Marks Episcopal Church 451 South 4th Street - Discount Photo Supply
1991, 1994, 1996, 1999	439 South 4th Street - Residential tenant(s) 441 South 4th Street - Residential tenant(s) 451 South 4th Street - Discount Photo Supply
2000	429 South 4th Street - No current listing 439 South 4th Street - Residential tenant(s) 451 South 4th Street - Discount Photo Supply
2004	439 South 4th Street - Residential tenant(s) 451 South 4th Street - Online Termite Co., residential tenant
2006, 2009, 2014, 2019	439 South 4th Street - Residential tenant(s)

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

Discount Photo Supply and Online Termite Co. were associated with the address of 451 South Fourth Street from 1985 to 2000 and in 2004, respectively, and an auto upholstery shop business was listed at 425 South Fourth Street in 1963; refer to Section 3.0 for further discussion.

DRAFT

3.4 HISTORICAL TOPOGRAPHIC MAPS

Based on the quality of information obtained from other sources, historical topographic maps were not reviewed as a part of this assessment.

3.5 CHAIN OF TITLE

Based on the quality of information obtained from other sources, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Environmental Health Department (SCCEHD)	December 27, 2021	Website/ Email	Ms. Melissa Belloso	No hazardous substances records on file

4.2 FIRE DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Fire Department (SJFD)	December 27, 2021	Email	Ms. Loretta Worthy	Response pending, refer to Section 1.5

4.3 BUILDING DEPARTMENT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Building Department (SJBD)	December 27, 2021	Website	N/A	Records discussed below

Records Summary

Year(s)	Owner/Applicant	Description of Permit and Building Use
1960	Charles Lane/Charles Lane Construction Co.	Building permit application for the construction of a 3-story 60-room hotel building; this permit was listed as canceled out
1965	Charles Lane/Charles Lane Construction Co.	Building permit application for the construction of a 3-story 30-unit apartment building with attached carport
1983	Discount Camera	Electrical permit for retail sales; changed from SFR to commercial (451 S 4th)
2004	Not specified/JNSJ Roofing Inc.	Apartment re-roof permit
2005	Not specified/SJ Construction	Electrical sub-panel alterations
2007	Not specified/Mills Mechanical	Water heater-related plumbing alterations
2007	Not specified/CNBA Residential Home Care	Application for Alternate Materials or Methods of Construction relating to the conversation of existing 30 unit apartment building to a residential

DRAFT

Year(s)	Owner/Applicant	Description of Permit and Building Use
		care home for CMBA Residential Care Home, fire sprinklers were proposed to be installed as part of this application
2012	Not specified/Alex Lopez	Apartment re-roof permit
2019	Not specified/Nelly Amas	Water heater-related plumbing alterations
2020	Not specified	Structural retrofit/repair for garage
2020	Not specified	Environmental Impact Report (under review)
2021	Not specified	Land Use Verification

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the SJBD.

Additionally, various permits/planning entries for redevelopment (residential high rise with commercial) were on file from the late 2010s.

4.4 Planning Department

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
San Jose Planning Department (SJPD)	December 27, 2021	Website and Telephone	Staff	No evidence indicating the existence of AULs on file for the subject property

4.5 Assessor's Office

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
Santa Clara County Assessor's Office	December 27, 2021	Website and Telephone	Staff	Information obtained is discussed below

Records Summary

APN	467-47-058 & 467-47-096
Acreage	0.5 acres
Construction Date	467-47-058: 1984 467-47-096: 1965
Building Square Footage	Not provided
Current Owner	Nelly Amas

4.6 Other Agencies Searched

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA State Water Resources Control Board (SWRCB) GeoTracker	December 27, 2021	Website	N/A	No records on file
SWRCB GeoTraker Historical Hazardous Substance Storage Information	December 27, 2021	Website	N/A	No records on file

DRAFT

Agency	Date Contacted	Method of Contact	Name & Title of Contact	Agency Response
CA Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)	December 27, 2021	Website	N/A	No records on file
CA DTSC EnviroStor	December 27, 2021	Website	N/A	No records on file
Bay Area Air Quality Management District (BAAQMD)	December 27, 2021	Website and Telephone	Rochele Henderson	No records on file
Valley Water (VW)	December 27, 2021	Website	N/A	No well records or historical release records on file

4.7 Oil and Gas Wells

Agency	Date Referenced	Resource	Oil or gas wells located within 500 feet of the subject property
California Geologic Energy Management Division (CalGEM)	December 27, 2021	CalGEM Map	No

4.8 Oil and Gas Pipelines

Agency	Date Referenced	Resource	Pipelines located within 500 feet of the subject property
National Pipeline Mapping System (NPMS)	December 27, 2021	NPMS Public Map Viewer	No

4.9 State Environmental Superliens

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens.

4.10 State Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state property transfer laws.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted EDR to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report, which includes detailed descriptions of the databases noted below, is included in Appendix C of this report.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

Regulatory database listings associated with the subject property, adjoining site(s) and/or nearby sites of concern that were determined to warrant additional discussion are identified and further discussed in Section 5.1.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Listings Within Search Distance	Subject Property	Adjoining Site(s)	Other Nearby Sites of Concern

STATE/TRIBAL LUST	0.5	66			✔
STATE/TRIBAL EC and IC	SP	0			
STATE/TRIBAL VCP	0.5	1			
STATE/TRIBAL BROWNFIELD	0.5	1			
ORPHAN	N/A	1			
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	0			

Facility Name	Super Gas & Mart
Address	498 South 4th Street, San Jose
Distance & Direction	Approximately 210 feet east-southeast of subject property
Hydrologic Position	Cross- to down-gradient
Databases Listed	LUST, HIST LUST, CERS HAZ WASTE, SWEEPS UST, HIST UST, CERS, CERS TANKS, CUPA LISTINGS, CORTESE, HIST CORTESE, EMI, HAZMAT, CERS, HWTS, EDR HIST AUTO, UST, RCRA NONGEN/NLR
Comments	The site is the location of an active retail fueling station and a petroleum hydrocarbon LUST case which was granted closure in December 2016. According to information available on the SWRCB GeoTracker online database, four gasoline and one diesel USTs were removed from the site in June 1998. An unauthorized release of petroleum hydrocarbons was reported in April 1989. As part of investigative activities, a total of 21 on/off-site groundwater monitoring and four on-site extraction wells were installed and monitored. Cumulative groundwater monitoring reported predominantly northerly and northeasterly groundwater flow directions. As part of remedial efforts, approximately 500 cubic yards of impacted soil was removed from the site between 1998 and 1999. Between the period of the UST removal and 2002, more than 50 gallons of free product was removed. Soil vapor extraction conducted between 2003 and 2007 removed 679 pounds of Total Petroleum Hydrocarbons (TPH) as gasoline (TPHg). Groundwater extraction was performed between 2002 and 2007 and removed 13,000,000 gallons of impacted groundwater. At the time of the final groundwater monitoring event performed in the First Quarter 2015, TPHg and benzene were reported in shallow groundwater at maximum concentrations of 4,700 micrograms per liter (ug/L) and 710 ug/L, respectively. TPHg and benzene were not reported in the deeper-zone groundwater monitoring wells screened from 26 to 35 feet bgs. Review of First Quarter 2015 TPHg and benzene iso-concentrations maps indicate that the dissolved hydrocarbon plume is not encroaching onto the subject property but trending off-site in the easterly-northeasterly direction.

DRAFT

	Based on the regulatory status of the LUST case coupled with the reported groundwater flow in the opposite direction of the subject property, the LUST-related listings are not expected to represent a significant environmental concern to the subject property. Another release appears to have been reported in December 1988; however, this release predates the 2016 closure and it is expected that this release would have been included as part of investigative and remedial efforts. This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

Facility Name	The Firestone Mixed-Use Development
Address	477 South Market Street, San Jose
Distance & Direction	Approximately 1,210 feet west-southwest of subject property
Hydrologic Position	Up- to cross-gradient
Databases Listed	CPS-SLIC, LUST, HIST LUST, SWEEPS UST, CORTESE, CUPA LISTINGS, NPDES, HAZMAT, CIWQS, CERS, HWTS, HIST CORTESE, RCRA-SQG, FINDS, ECHO, RCRA NONGEN/NLR
Comments	The site is the location of an open SLIC described as "Open - Site Assessment as of 7/22/19." According to information available on the SWRCB GeoTracker online database, this site is undergoing redevelopment into a mid-rise residential building with one deep basement level with parking pits. To evaluate groundwater and soil vapor entering into and existing the construction area, twelve dewatering wells and two permanent soil vapor wells were installed along the perimeter in 2020. Sampling of the dewatering wells reported benzene and 1,2-dichloroethane were detected in one groundwater sample at a concentration of 1.3 ug/L and 4.1 ug/L, respectively. No other VOCs were detected. Based on the distance from the subject property and the minor concentrations of VOCs reported in groundwater, the SLIC-related listings are not expected to represent a significant environmental concern to the subject property. This facility was also listed on other database(s) as noted above; however, as these listings are not associated with a release, the radii prescribed by the ASTM E5127-13 standard does not require that these listings be specifically discussed. Notwithstanding, based on our review of available information, none of these listings appears to pose a significant environmental concern in connection with the subject property at this time.

DRAFT

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

DRAFT

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 OWNER AND KEY SITE MANAGER

Relation to Property	Name	Date Interviewed	Method of Contact	Year First Associated w/ Property	Notes
Owner, Key Site Manager and Property Manager	Ms. Nelly Amas	January 20, 2022	In Person	2005	Interviewed; see Interview Summary table below

Interview Summary

Question	Owner (Representative) Response/Comment	Key Site Manager Response/ Comment
Do you have any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features?	No	No
Do you have any knowledge of previous environmental investigations conducted on site?	No	No
Do you have any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products?	No	No
Are you aware of any known plans for site redevelopment or change in site use?	Yes; "New 24 stories multifamily residential building with 210 units"	Yes; "New 24 stories multifamily residential building with 210 units"
Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?	No	No
Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?	No	No

DRAFT

Question	Owner (Representative) Response/Comment	Key Site Manager Response/ Comment
Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products?	No	No
Are you aware of any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality?	No	No
Additional information provided:	Ms. Amas stated that there were only nine (9) occupied units at the subject property on the date of the site reconnaissance. Ms. Amas was unaware of any prior hazardous substance spill/release incidents, water intrusion issues or mold at the subject property.	N/A

6.1.2 Past Owners, Operators, and Occupants

AEI did not attempt to interview past owners, operators, and occupants of the subject property because information from these sources would likely be duplicative of information already obtained from other sources.

6.1.3 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this report.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

Question	Response/ Comment
1. Environmental liens that are filed or recorded against the property (40 CFR 312.25)	Information not provided

DRAFT

Question	Response/ Comment
Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	
2. Activity and use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26(a)(1)(v) and vi)). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	Information not provided
3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28). Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	Information not provided
4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29). Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	Information not provided
5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30). Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (a) Do you know the past uses of the property? (b) Do you know of specific chemicals that are present or once were present at the property? (c) Do you know of spills or other chemical releases that have taken place at the property? (d) Do you know of any environmental cleanups that have taken place at the property?	Information not provided
6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31). Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?	Information not provided

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI by the client during this assessment. A summary of this information follows:

Draft Phase I Environmental Site Assessment (439 and 451 South Fourth Street, San Jose, Santa Clara County, California 95112), prepared by AEI Consultants (September 30, 2015)

DRAFT

AEI prepared this report on behalf of David J. Powers & Associates. Pertinent information contained in this report is summarized below:

- At the time of the 2015 assessment, the subject property was occupied by residential tenants.
- According to the AEI report, the subject property was identified to consist of prior residential structures. Circa 1965, the current residential apartments structures were developed at 439 South 4th Street; a small residential structure was also present in the southeastern portion. By 1969, the residential structure was removed from the southeastern portion of the subject property. Circa 1990, the current residential structure was developed at 451 South 4th Street. Occupants at the subject property have included multiple residential tenants, as well as a commercial photography supply operation at 451 South 4th Street from approximately 1990-2010.
- No current or former ASTs or USTs were identified on the subject property.
- AEI did not identify the use and/or storage of significant quantities of hazardous materials nor evidence of a release or violations threatening a release.
- AEI identified OECs regarding ACM and LBP based on the age of the buildings and recommended a pre-demolition asbestos survey and consultation with a certified lead risk assessor.

AEI identified no RECs, CRECs, or HRECs and recommended no further investigation at the time.

A copy of the report is included in the appendices.

6.4 Environmental Lien Search

In accordance with our approved scope of services, an environmental lien search was not performed as part of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	January 20, 2022
AEI Site Assessor(s)	Christopher Olsen
Property Escort(s)/ Relationship(s) to Property	Ms. Nelly Amas, Owner and Property Manager
Units/Areas Observed	Interior areas: Representative residential units, leasing office, maintenance shop, laundry room and mechanical equipment rooms. Exterior areas: All exterior areas were accessed.
Area(s) not accessed and reason(s)	Interior areas: Elevator equipment room Exterior areas: None Refer to Section 1.5 for discussion of limiting condition(s).
Other Physical Constraints	None

Reconnaissance Findings Summary

Feature	Observed on Subject Property (see Section 7.1)	Observed on Adjoining Property (see Section 7.2)
Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use		
Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)		
Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

DRAFT

7.1.1 Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Elevator

The northern apartment building is equipped with a hydraulic elevator. The hydraulic fluid contained within elevator systems can potentially contain toxic PCBs. Based on the construction date of the building (pre-1978), the potential exists that hydraulic fluid within the equipment may have contained PCBs. The equipment for the elevator is located in sealed wooden closet on the first floor of the eastern portion of the northern subject property building. Access was not provided during the site reconnaissance. According the property manager, the elevator has not been in use since her tenure and when it was sealed there were no observed or reported signs of leaks or staining. Based on the lack of a reported release and relative small quantity of hydraulic oil associated with the power unit, the elevator is not expected to represent a significant environmental concern. However, should the subject property undergoing redevelopment, the feature and surrounding should be inspected for signs of a release upon its removal.

7.1.2 Interior Stains or Corrosion

Minor paint staining was observed in the 439 South 4th Street apartment complex maintenance room. The staining was located on concrete and no drains were observed in the vicinity. Based on the small size and surficial nature of the staining, it is not expected to represent a significant environmental concern.

7.1.3 Drains, Sumps, and Clarifiers

Multiple storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.1.4 Stained Soil and Pavement

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

DRAFT

7.1.5 OTHER

The subject property is currently occupied by residential tenants. Small amounts of cleaning supplies, maintenance supplies, as well as several 1-gallon containers of paints were observed on site. No signs of inappropriate material handling were observed. Based on the nature of these materials, the presence or use of these materials at the subject property is not expected to represent a significant environmental concern.

AEI noted several boring locations on the southwestern and southeastern sides of the subject property, which were associated with a geotechnical investigation that was previously conducted at the property. Three 55-gallon drums of soil cuttings were observed on the southwestern side of the 439 South 4th Street building. No apparent environmental concerns were identified in connection with the borings and drums of soil cuttings.

7.2 ADJOINING PROPERTY RECONNAISSANCE FINDINGS

During the site reconnaissance, AEI observed the items listed in the above Reconnaissance Findings Summary table, which are further discussed below.

7.2.1 ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR, Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing." Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing. Multiple pole-mounted transformers were observed on the adjoining sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

7.2.2 DRAINS, SUMPS, AND CLARIFIERS

Several storm drains were observed in the parking areas of the adjoining properties and adjoining roadways. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

DRAFT

8.0 NON-ASTM SERVICES

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900s and peaked in the period between 1940 and into the 1970s. Common ACMs include pipe-covering, insulating cement, insulating block, refractory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the United States EPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980s. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

Due to the age of the subject property buildings, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

DRAFT

Material Type	Location
Plaster (acoustical and smooth)	Walls and ceilings
Ceiling tile	Ceiling systems
Thermal systems insulations, packings, and gaskets	Heating systems, cooling systems, domestic and heating and cooling piping, ductwork, and other equipment
Floor tile and associate mastics, flooring felts, and papers (under hardwood/other)	Floors
Vinyl sheet flooring and adhesives	Floors
Cove base and associated mastics	Walls
Ceramic tile adhesives and grouts	Walls, floors, and ceilings
All adhesives	Mirrors, wall coverings, construction, etc.
Grout and caulking	Windows and doors
Gypsum board, tape, and joint compound	Wall and ceiling systems
Insulation materials	Walls, ceilings, and attic spaces
Roofing materials (felts, rolled, shingle, flashings, adhesives, tar, and insulations)	Roof and parapet wall systems
Brick and block, mortars	Walls

According to the client, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment.

8.2 Lead-Based Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X," defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard," although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

Under OSHA, lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. Therefore, all LBP is considered LCP. Conversely, LCP may not meet the criteria to be considered LBP in accordance with HUD guidelines or some states' definition of LBP.

DRAFT

It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present; however, some paints utilized after 1978 will be LCP under OSHA. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 MOLD

Molds are simple microscopic organisms which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth may occur, particularly if the moisture problem remains undiscovered or unaddressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials, including drywall,

DRAFT

wallpaper, baseboards, wood framing, insulation, and carpeting, often play host to such growth. Mold spores primarily cause health problems through the inhalation of spores or the toxins they emit when they are present in large numbers. This can occur when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Potential areas of mold growth, such as in pipe chases, HVAC systems, and behind enclosed walls and ceilings, were not observed as part of this limited assessment.

AEI observed interior areas of the subject property buildings in order to identify the presence of mold. During the on-site reconnaissance, suspect mold growth was observed in the bathroom and kitchen of 451 South 4th Street. The mold growth appeared limited to the shower area and appeared to be a result of poor housekeeping. Based upon our observations, including the localized nature of the suspect mold, AEI recommends cleaning the affected materials. In addition, improved housekeeping would be prudent.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/20/2021 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 10/20/2021 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 5 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: CAD982481996

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/22/2021 has revealed that there are 10 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 15 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 15 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 21 CA CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
SAN JOSE GAS WORKS	E. SAN FERNANDO AND	NNW 1/4 - 1/2 (0.362 mi.)	U111	630

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 9 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 8 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal October 15, 1984): Lorent Barrel Drum Co. recycles drums at a plant in San Jose, Santa Clara County, California. The 5-acre site is surrounded by residential, industrial, and business areas. On-site monitoring wells are contaminated with trichloroethane, trichloroethylene, 1,1-dichloroethylene, and tetrachloroethylene, according to analyses conducted by a consultant to Lorent . Contamination is believed to have resulted from overflowing sumps and spills. About 250,000 people obtain drinking water from wells within 3 miles of the site. Lorent is working with the California Regional Water Quality Control Board CRWQCB) to determine the extent of ground water contamination. The board issued a Cleanup and Abatement Order to the company in August 1983. The plant received Interim Status under Subtitle C of the Resource Conservation and Recovery Act RCRA) when the company filed Part A of a permit application. On March 25,1981, EPA removed the facility as a treatment, storage, or disposal facility because it was not engaged in ha ardous waste activities. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status February 1986): In March 1985, EPA and the California Department of Health Services CDHS) discovered over 300 drums containing phenols, methylene chloride, and PCBs stored on the Lorent property. In responseto action by the Santa Clara District Attorney, the company removed the drums. CRWQCB is overseeing the Lorent investigation to determine the extent of ground water contamination. CDHS will oversee the investigation of soil contamination.On February 7, 1986, the Santa Clara County District Attorney filed a complaint against the company for violation of State ha ardous waste laws. The facility has been shut down until procedures for compliance are developed. Status June24, 1988): EPA is proposing to place this previously proposed RCRA site on the final NPL. The company is classified as a non-filer. Hence, it satisfies a component of EPA s NPL/RCRA policy. In July 1987, the owner of the Lorent site was ordered to shut it down permanently, sentenced to 2 years in jail, and fined 2.04 million. Recent sampling by CDHS consultants has shown extensive contamination in soil and ground water, both on- and off-site. In addition to the chlorinated organics identified earlier, pesticides, metals, and PCBs are present. On December 1, 1987, EPA took over as lead agency for a remedial investigation/feasibility study RI/FS) at the site. In February 1988, CDHS completed an expedited response action consisting of excavating soil with high concentrations of PCBs. In March 1988, EPA and CDHS completed removal of 1,000 drums of ha ardous materials. All materials were transported to regulated disposal facilities. The site was then graded and the surface sealed to control drainage. In May 1988, EPA completed an engineering evaluation cost analysis for systems to pump and treat shallow contaminated ground water. Status October 4, 1989): EPA has placed this site on the NPL. EPA completed the RI/FS. Following a period of public

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

comment, a Record of Decision was signed in September 1988 finali ing the remedy as treatment of ground water with an o one ultraviolet light oxidation system. EPA is currently designing an off-site extraction system and an on-site treatment facility. EPA is also investigating the extent of the contamination in soils and on structures and expects to complete an RI/FS for the overall site in early 1990.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision - Amendment
Completed Date: 03/10/1998
Comments: US EPA approved a ROD amendment for groundwater treatment process.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision w/ESD
Completed Date: 05/21/1998
Comments: US-EPA approved an ESD for soil remediation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 09/28/1998
Comments: Preliminary close-out report finalized. Report documents completion of construction activities for OU1 and OU2. Remaining response consists of operation and maintenance of groundwater treatment system, soil vapor extraction system, and cap.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/15/1998
Comments: Cap design completed. Design calls for 229,000 square feet of 3" asphalt concrete pavement with 6" layer of aggregate base.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/15/1998
Comments: Remedial design report approved. Report outlines plans for design, installation, and O&M of SVE system and asphalt cap.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 09/30/1994
Comments: EPA completed 3 separate removal actions: (1) Removal of 5 buildings and the process equipment and scrap within including 17 sumps, 7 tanks and several debris stockpiled. At the end of this RA, 1033 tons of industrial wastes, 15 tons of liquid hazardous was and 73 tons of solid hazardous waste was shipped off-site for disposal. (2) Removal of 1200 drums, 150 drums containing solvents, 350 drums containing debris, and 23 drums containing ash and liquids. Removal of tanks, vats, sumps, and process equipment. Removal of 1.18 tons of asbestos containing building materials. (3) Paving of previously and newly exposed surface soil resulting from the above removal actions. Paving

Completed Date: 10/15/1993
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 08/26/1993
Comments: EPA issued ROD for soil operable unit. The ROD addresses soil/source remediation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/22/1993
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/30/1992
Comments: Shallow groundwater treatment system completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/28/1991
Comments: Remedial design for groundwater completed.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 09/30/1988
Comments: EPA issued a ROD for the shallow groundwater operable unit. The remedy includes extraction/treatment of shallow groundwater and discharge of treated water to the storm sewer.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 08/30/1988
Comments: Completed EE/CA for shallow groundwater expedited response action. Groundwater pump-and-treat system was determined to be an effective method for remediating the shallow groundwater.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/30/1988
Comments: Implemented an Expedited Response Action (ERA). The ERA consisted of the following activities: drum inventory; construction of decontamination facilities; removal of polychlorinated biphenyl (PCB) contaminated pits, which were later backfilled with clean soil and

DRAFT

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

capped; removal, recycling, or treatment of thousands of gallons of processed plant liquids; removal of 15 tons of contaminated scrap; and design of a surface water control plan, which was submitted to EPA for implementation. EPA installed a chip seal over approximately two thirds of the five-acre site. Demobilization occurred at the end of March 1988. A total of 21,286 drums, 1,330 tons of scrap metal, and 2,982 cubic yards of contaminated soil were removed from the site.
Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Participation Plan / Community Relations Plan
Completed Date: 05/30/1987
Comments: Completed Public Participation Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 02/13/2004
Comments: Public notice announced lodging of proposed consent decree.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Public Notice
Completed Date: 01/27/2004
Comments: Public notice announced lodging of proposed consent decree.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 05/15/1998
Comments: SVE system design completed. Design includes submersible pumps, equalization tank, air-water separator, centrifugal transfer pump, positive displacement blower, air-to-air heat exchanger, liquid phase GAC, and vapor phase GAC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Investigation Report
Completed Date: 07/27/1990
Comments: Remedial Investigation Report approved. Nature and extent of contamination in surface soils, subsurface soils, groundwater, surface water, air, and structures evaluated. Fate and transport of PCBs, pesticides, VOCs, base/neutral and acid extractable compounds, metals, and dioxins/furans discussed. Current and future exposure pathways included in baseline risk assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/01/1987
Comments: Preliminary Site Assessment completed. Report summarizes site characteristics, site history, known soil and groundwater conditions, hydrogeology, surface hydrology, and risks to nearby receptors.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

DRAFT

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

Completed Document Type:	Remedial Investigation Report
Completed Date:	06/19/1992
Comments:	Six addenda to the Remedial Investigation include: report of monitoring well installations in Zone B, C, and D aquifers; results of shallow soil investigation on Recycled Fibers, Inc. property; update to the risk assessment for soils; results of the investigation of four conduits near the leading edge of the plume; results of soil sampling; results of installation and sampling of a monitoring well in the Zone C aquifer.
Completed Area Name:	Newark Group property
Completed Sub Area Name:	Not reported
Completed Document Type:	Operations and Maintenance Plan Amendment
Completed Date:	08/01/2006
Comments:	Soil investigation concluded that pesticides, PCE, TCE, and metals including arsenic were present in soil, however, all contaminants were present at concentrations below human health screening levels (or established background). The proposed design for the repairs includes removal of 1,424 square feet of concrete and asphalt, replacement of the cap in these areas with slab and AC over 12" of aggregate, and sealing of 4,000 linear feet of less severe cracks with joint sealant.
Completed Area Name:	Shallow Groundwater
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	12/27/2007
Comments:	2007 GW monitoring report reviewed by DTSC and found to be adequate.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	5 Year Review Reports
Completed Date:	09/21/2010
Comments:	DTSC reviewed the 5-year report and did not have any comments and concurs with the USEPA recommendations in the report and the finding that the selected remedy continues to be protective in the short-term. Not reported
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	07/30/2010
Comments:	DTSC have reviewed the shallow groundwater treatment monitoring report and has no comments. This is a USEPA and WaterBoard lead site.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Feasibility Study Workplan
Completed Date:	12/19/2011
Comments:	The USEPA has approved the feasibility study workplan for Lorentz Barrel and Drum. The draft Sampling and Analysis Plan and the draft Quality Assurance Project Plan is due January 4th, 2012.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Monitoring Report
Completed Date:	12/20/2011

DRAFT

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

Comments: Lorentz Barrel and Drum submitted the 2011 Annual Groundwater Monitoring Report No. 43.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 01/31/2012
Comments: Groundwater treatment report for September 2011 - December 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 12/16/2011
Comments: Annual groundwater monitoring report from December 1, 2010 through November 30, 2011.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision w/ESD
Completed Date: 11/22/2013
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 09/01/2015
Comments: The Fourth Five-Year Review Report identified as a remedy performance issue that the migration of 1,4-dioxane may not be controlled and there is continued diffusion of contamination from the A/B aquitard to Zone A soil vapor and Zone B groundwater. The remedies for OU-1 and OU-2 were determined to be protective of human health and the environment; however, in order for the remedies to be protective in the long-term, the Focused Feasibility Study needs to be completed in order to evaluate the current remedies for both OU-1 and OU-2 and make recommendations to modify the existing remedies or select new remedies for both OUs. .

Completed Area Name: Newark Group property
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 08/12/2019
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 01/27/2004
Comments: Consent decree signed to recover DTSC response costs from the primary large quantity generators.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 05/23/1995
Comments: Administrative order on consent signed for de minimis settlement. The settlement pertains to 89 parties, each contributing less than 1% of the drums recycled at the facility.

DRAFT

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 09/23/1996
Comments: Administrative consent order signed for the 2nd round of cost recovery de minimus settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 09/16/1997
Comments: Administrative consent order signed for the 3rd round of the cost recovery de minimus settlement. Settling parties contributed less than 1% of total drums recycled at the site.

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 01/23/2002
Comments: DTSC signed Prospective Purchaser Agreement with 10th Street Land Management. Property will be used as a long-term storage yard for commercial and construction vehicles. Settling respondent to maintain site cap and enter into a land use covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 01/16/2008
Comments: Not reported

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 11/16/2006
Comments: Site inspection found compliance with land use covenant on 10th Street Land Management property.

Completed Area Name: 10th Street Land Management property
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 03/06/2002
Comments: Deed restriction recorded for property owned by 10th Street Land Management. Residences, hospitals, day care facilities, food cultivation, and groundwater extraction are prohibited at the site. Interference with site cap and remediation system are also prohibited. Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Decree
Completed Date: 10/07/1992
Comments: Seven respondents signed agreement to conduct a limited removal action at the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

DRAFT

LORENTZ BARREL & DRUM CO INC (Continued) **1000208886**

Completed Document Type: Consent Decree
Completed Date: 09/30/1989
Comments: EPA issued a Consent Decree with 11 PRPs to implement the groundwater remediation recommended by the ROD. In May 1989, EPA conducted an investigation, identifying approximately 200 companies who had delivered drums and barrels to the former drum recycling facility.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 06/30/1987
Comments: Determined noncompliance with the RAO issued in February 1987.

Completed Area Name: Newark Group property
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 11/16/2006
Comments: Site inspection found compliance with land use covenant on Newark Group property.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Unilateral Order (I/SE, RAO, CAO, EPA AO)
Completed Date: 02/23/1987
Comments: DTSC issued RAO for soil and groundwater contamination resulting from drum reconditioning business.

Completed Area Name: Newark Group property
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 06/10/2005
Comments: Deed restriction recorded for property currently owned by the Newark Group. Residences, hospitals, day care facilities, food cultivation, and groundwater extraction are prohibited at the site. Cap interference is also prohibited.

Completed Area Name: Newark Group property
Completed Sub Area Name: Not reported
Completed Document Type: Consent Settlement - Administrative
Completed Date: 04/22/2005
Comments: Consent Order signed. The Newark Group argeed to pay response costs incurred by DTSC and to abide by the terms of the site deed restriction.

Environmental Interest/Information System:
SUPERFUND NPL
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DRAFT

SUPER GAS & MART (Continued) **U001602644**

Site Name:	Super Gas & Mart
Violation Date:	10-15-2018
Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 09/10/2019. Overfill prevention inspection was not conducted by 10/13/2018.

Citation:	23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)
Violation Description:	Failure to have an approved UST Monitoring Plan.
Violation Notes:	Returned to compliance on 10/31/2018. Facility must make the following corrections to monitoring plan uploaded in CERS for it to be approved: Tank 1 and Tank 2 Tank information pages lists G yesG to audible and visual overfill protection. This box must be checked G noG for each tank. Tank 2 must check G yesG for Fill Tube Shut-off Valve, G yesG to Spill Buckets and Striker Plate/ Bottom Protector, and G noneG to Vent Piping Transition Sumps. Tank 1 Monitoring plan lists G yesG to Monthly Statistical Inventory Reconciliation, Weekly Manual Tank Gauge, and Tank Integrity Testing. Pipe monitoring section lists G yesG to Electronic line leak detector section. These items must be marked as G NoG . Tank 2 Monitoring plan incorrectly lists sump leak sensor as G Veeder Root 794390420G . Sensor must be listed as G 794380208G . A marked-up copy of CERS printout was provided.

Site Name: Super Gas & Mart
Violation Date: 10-15-2018
Citation: HSC 6.7 25284 - California Health and Safety Code, Chapter 6.7, Section(s) 25284
Violation Description: Failure to obtain a valid permit to operate from the UPA including but not limited to unpaid permit fees.
Violation Notes: Returned to compliance on 09/26/2019. Facility owner has not been issued a permit to operate. Permit application listed in CERS lists the operator as Eric Ahuja while financial responsibility documents list the operator as Super Gas & Mart. Correct this discrepancy in CERS and resubmit. Then provide documentation of corrective actions for all violations listed in this report. In order for a permit to operate to be issued, all violations must be addressed and all required information on CERS must be complete.

Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).
Violation Notes: Returned to compliance on 12/03/2018. The last SB989 (secondary containment testing) was conducted on 11/07/2016. On the Secondary Containment Testing Report it was noted that secondary product line for the 87 tank failed when tested at the Hex nut O ring at UDC 3/4. Technician recommended that this be repair and or replace. Additionally, a violation was also issued for this same problem on the inspection report issued on 11/07/2016 by an inspector from our Department. At this time there are no records to show that this issue has been resolved. Provide to our office in writing an explanation how this issue will be resolved. Repair permits will be required by our Department to make the necessary repairs.

Violation Description:	Failure to maintain secondary containment (e.g., failure of secondary containment testing).
Violation Notes:	Returned to compliance on 12/03/2018. Secondary containment testing conducted on 11/07/16 demonstrated that secondary product line for the 87 tank failed when tested at the Hex nut O ring at UDC 3/4. This violation was also issued on Notices of Inspection issued on 11/07/2016 and 10/12/2017. Mr. Ahuja was first notified of this violation on 10/12/17. There are currently no records on-site showing a repair or replacement of this equipment. Provide to our office in writing an explanation of how this issue will be resolved. Repair permits will be required by our Department to make the necessary repairs.

of Afforda-A-Test. Dave has a current ICC Service Technician certification #5263373, exp. 3/5/14; VMI/Vaporless #2528, exp. 11/10/13; Veeder-Root Level 4 B349975, exp. 2/13/14; LDT-890 leak detector tester is calibrated and valid. The following components were tested today: -UST annular sensor for the 15k split tank was operational with audible/visual alarm. -2 UST STP sump sensors for the 87 and 91 were operational with audible/visual alarm and positive shutdown. -The sensor out and power out simulated was demonstrated for Fail Safe feature. -The 87 and 91 spill buckets were tested hydrostatically today for 1 hour and passed. -The 87 and 91 Vaporless Leak detectors were tested for 3.0gph at 10psi leak and passed. Note: The 87 leak detector initially failed and was adjusted today, then passed. -The monthly DUSTO inspection records are in good order and up to date -The Emergency Shutoff was [Truncated]

RB Case Number:	14-049
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E17B03f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern:	Benzene, Toluene, Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	The Site is located at the north corner of the South Fourth Street and East William Street intersection within the City of San Jose . A small convenience store occupies the north portion of the Site and a remediation treatment plant occupies the east portion of the Site. Total petroleum hydrocarbons as gasoline (TPHg) and diesel fuel (TPHd) were initially detected in soil and groundwater beneath the Site during investigation activities in 1989. Since 1989, corrective action work including soil and groundwater investigations and remediation work has been performed under the direction of the local oversight agency (currently Santa Clara County Department of Environmental Health) and the Site has been assigned Fuel Leak Case No. 14-049. Investigation and remediation work completed to date include drilling of more than 40 soil borings, installation of 24 groundwater monitoring/extraction wells, and construction and operation of a remediation system. Investigative results indicate that the fuel leak originating from the Site contained a mixture of fuel-related compounds, including TPHg and methyl tertiary butyl ether (MTBE). While this mixture of dissolved TPHg and MTBE has advected down-gradient to the north-northeast, a TPHg plume without MTBE has been detected up- and cross-gradient to the southeast and east. The up- and cross-gradient TPHg contamination was attributed to Fuel Leak Case No. 14-049 and the local oversight agency required several stages of investigation work to characterize its lateral extent. At least six borings and nested wells MW-7A and MW-7B were installed southeast and east of the Site in order to characterize up- and cross-gradient contamination, and groundwater extraction well EW-4 was installed in order to control further migration of these cross-gradient contaminants. Possible Up-Gradient Source of Petroleum Hydrocarbon Contamination In 2004, Allterra hypothesized that the up- and cross-gradient hydrocarbon contamination did not originate from the Site, but from an unidentified leaking UST located somewhere east to southeast of the Site. To evaluate the hypothesis, Allterra performed a historical survey of the area immediately southeast of

DRAFT

SPARTAN GAS STATION (Continued) **S104162848**

the Site, as documented in Allterras March 31, 2005 Corrective Action Plan. A brief description of the rationale for this hypothesis is as follows: Up- and Cross-Gradient Groundwater Data: The fuel oxygenate MTBE is listed as a chemical of concern for Fuel Leak Case No. 14-049. As expected, MTBE has been detected in borings and wells down-gradient of the Site (north to northeast). However, while the TPHg-MTBE plume has migrated down-gradient, analytical data for up- and crossgradient samples indicate high levels of TPHg and non-detect levels of MTBE. A Gas Station Formerly Operated at 502 South Fourth Street: Interviews with residents in the surrounding neighborhood indicated that the apartment complex located at the east corner of the South Fourth Street and East William Street intersection (502 South Fourth Street) had been the former location of gasoline service station up until about 1960. The operation of a gas station at 502 South Fourth Street was verified after a review of (1) Polk Directories from 1940 and 1942 (Bob and Teds Station), (2) an 1954 aerial photograph, and (3) a 1950 Sanborn Map. Comparing the location of the former gas station at 502 South Fourth Street with the available groundwater data suggests that the TPHg contamination east and southeast of the Site originated from the former gas station. However, before proceeding with possible enforcement action, an additional stage of investigation was appropriate. Up-Gradient Source Investigation Activities The following is a discussion of investigation activities up-gradient of the Site, that included a series of five Geoprobe soil borings advanced through the sidewalk area along East William Street. The purpose of the investigation was to further characterize up- and cross-gradient hydrocarbon contamination that is suspected to be migrating from the former gas station located at 502 South Fourth Street. Rationale for Boring Locations Five Geoprobe borings, designated UB-1 through UB-5, were advanced through the sidewalk along the southeastern side of East William Street. The borings were aligned in a transect that began at the east corner of South Fourth and East William Streets and extended northeast toward South Fifth Street. Exact boring locations were determined in the field based on three considerations: 1) locations suspected to be directly down-gradient of the former gas station; 2) locations that would fill-in gaps in historical data; and 3) locations where drilling equipment was not constrained by physical barriers. An encroachment permit (Permit No. 3-16984) was obtained from the City of San Jose for installing borings in the public right-of-way. Soil and groundwater samples were submitted, under chain-of-custody protocol, for chemical analysis to McCampbell Analytical, Inc., of Pacheco, California, a state of California certified laboratory (ELAP #1644).

MISSION PAINTING (Continued) **1000382488**

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS HAZ WASTE:

Name:	NOTRE DAME HIGH SCHOOL
Address:	596 S 2ND ST
City,State,Zip:	SAN JOSE, CA 95112
Site ID:	138958
CERS ID:	10354351
CERS Description:	Hazardous Waste Generator

Violations:

Site ID:	138958
Site Name:	NOTRE DAME HIGH SCHOOL
Violation Date:	11-22-2016
Citation:	22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)
Violation Description:	Failed to meet the conditions of satellite accumulation regulations, including but not limited to the following: G accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator G the container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first.
Violation Notes:	Returned to compliance on 12/01/2016. The last disposal of photo-processing chemicals was 6/30/14. Per facility, photo-processing chemicals are disposed of every 2 years. Using point of generation rules, ensure that wastes are picked up at least once per year.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

DRAFT

NOTRE DAME HIGH SCHOOL (Continued) **1005441306**

Site ID: 138958
Site Name: NOTRE DAME HIGH SCHOOL
Violation Date: 11-22-2016
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: Returned to compliance on 12/01/2016. Per the biology teacher, BioCorporation specimens are packed in preservative liquid are rinsed off used specimens and discarded in the sink. The used specimens are shipped back to Biocorporation. Safety data sheets from BioCorporation's website show their "embalming fluid" to have 1.8% formalin and their "pail packing fluid" to contain 3% formalin. Facility is unsure which is used for their samples as safety data sheets for their specimens on site were not available for review. Make a hazardous waste determination for the waste fluids off specimens and if determined to be hazardous manage accordingly.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 138958
Site Name: NOTRE DAME HIGH SCHOOL
Violation Date: 11-22-2016
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 12/01/2016. 2 x 10 gallon containers of spent photo-processing chemicals was missing the accumulation start date and the generator information
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-22-2016
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Areas inspected include the chemistry labs, biology labs, photo-processing lab, and the custodial storage area. Observed the following wastes on site: 2 x 5 gallon containers of zinc chloride containing wastes (point of generation) 2 x 10 gallon containers of spent photo-processing chemicals (point of generation) Fire extinguishers have had annual maintenance Spill kit is available on site Eye wash stations are located in the storage rooms for chemistry and biology labs Disposal records were reviewed and in good order EPA ID# CAR000117705 is active The following violations were corrected on site: 2 x 5 gallon containers of zinc chloride containing wastes were missing hazardous waste markings. Markings were added during inspection.
Eval Division: Santa Clara County Environmental Health

CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-06-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On-site to perform a routine Hazardous Materials Business Plan (HMBP) inspection. Facility handles liquid carbon dioxide above HMBP State-reportable thresholds for their soda machines. Observed the following: - 1 liquid carbon dioxide dewar (approx. 50 gal) Business last submitted a complete HMBP on 7/24/2018 via the California Environmental Reporting System (CERS), CERS ID: 10467058. This was ACCEPTED. Facility information and inventory obtained during inspection accurately reflect what was electronically submitted. On the next annual HMBP certification, ensure that the liquid carbon dioxide is reported in gallons vs. cubic ft. Notes: - Per Store Manager, Farhan Malik, employees have been trained in HMBP emergency response procedures. - Mr. Malik also stated that 7-Eleven has taken care of providing the HMBP Property Owner notification. - Upon re-inspection, Mr. Malik was informed to have these documents

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08P02f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Heating Oil / Fuel Oil
Site History:	Underground heating oil tank located within the basement of the building. In 1992, a water main/line ruptured near this building and flooded the basement. The flooding caused the product to come out of the tank. The tank was taken out of service and the tank was left in place. Subsurface investigation conducted in 2010 found soil and groundwater contamination. The UST will be properly closed in place.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Status:	Open - Site Assessment
Status Date:	02/21/2011
Case Worker:	GOR
RB Case Number:	14-225
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E17G02f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	The first soil borings were drilled onsite in may 1993. 5 soil borings (B1 through B5) were drilled near the former dispenser islands, gasoline USTs and the "unknown featur" at the reas of the building. Petroleum hydrocarbons were detected in both soil and groundwter samples from the soil borings. In August 1994, 7 additional soil borings (SB1 through SB7) were advanced onsite. 4 were completed as groundwater monitoring wells (MW1 through MW4). TPHg was reported in groundwater from well MW1 at 50,000 ppb. In July 1999, 9 geoprobe borings (GP1 through GP9) were advanced for the collection of soil and groundwater samples. In December 2000, 4 wells (MW5 through MW8) were installed on and offsite. In October 2004, a two-phase extraction system (TPET) was installed at the site. In the fourth quarter 2008, the TPET system was replaced with a new dual-phase extraction and treatment (DPET) system. Remediation and monitoring are ongoing.

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	CNWTRS
Waste Type2:	Not reported
Waste2:	Contaminated Ground Water
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.

DRAFT

598 S. 1ST. ST. (SS#21-1286) (Continued) **S106203321**

Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided

DRAFT

ROBERT F PECKHAM FEDERAL BLDG (Continued) **S111217077**

the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 08/28/2019. Mechanical overfill prevention valve failed inspection on 1/17/2019. Apply for a UST Minor Repair Permit and replace the valve as soon as possible.

components were tested during this inspection; - 1 Diesel STP sump was hydrostatically tested using the accelerated INCON tester and passed. - 1 Supply and 1 Return line were tested at 5.0 p.s.i for 60 minutes without any loss of pressure. Observed the gauge returned back down to zero. Notes; 1) Within 30 days provide a copy of today's testing report to my office.

Eval Type: Other, not routine, done by local agency
Eval Notes: Underground storage tank (UST) retrofit inspection associated with replacement of Incon UST leak detection monitoring console. All UST monitoring equipment was tested today by UST Service Technician Steven Parmenter of Service Station Systems, Inc. and functioned properly. Mr. Parmenter has current ICC California UST Service Technician certification (exp. 3/19/2017) and Franklin Fueling Systems (Incon) Level 1 & 2 certification (Level 1 exp. 9/23/2016, Level 2 exp. 10/13/2016). Both sensors were tested using water and triggered audible and visual alarms on Incon TS-1001 automatic tank gauging (ATG) console. ATG probe was visually inspected. TS-1001 is programmed to perform 0.2 g.p.h. ATG tests each day at midnight. Retrofit is complete. Final HMCD project sign-off is granted. Submit a copy of the completed Monitoring System Certification form within 30 days.

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	07-25-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On-site to conduct a UST compliance inspection of 1 x 3000 gallon single-walled emergency generator tank system. Annual monitoring system certification and spill bucket test performed by Mr. Michael Stromecki (certifications current) of Advanced Fuel Services. Mr. Stromecki had all of the required certifications. During testing the following was observed: -Sump and day tank (piping) sensors tested and provided audible and visible alarms. -Overfill protection is provided in all tanks by a flapper valve in the fill riser. -The spill bucket is direct buried and was hydrostatically tested for one hour with no loss. The following documents were reviewed on-site: -Incon alarm panel set-up and alarm history, monthly Designated UST Operator inspections, DUSTO training log (DUSTO training 9/19/16) and maintenance & monitoring records (including tank test records). The following CERS submittal elements dated 7/25/17 were reviewed: -Owner/Operator Identification, UST [Truncated]

Eval Notes:	On site to witness annual monitoring system certification performed by Michael Stromecki of Advanced Fueling Services. Verified Mr. Stromecki's ICC (expires 3/19/20), and Incon (expires 12/28/18) certifications. Tank is single walled and part of an emergency generator system. The following components were tested and functioned as required: Piping sump sensor Day tank sensor Mechanical overfill valve located in fill riser Spill bucket is direct buried and was tested hydrostatically for 60 minutes with 5 gallons of water Verified that all equipment tested today matched equipment listed on the CERS submittal dated 12/12/17. Reviewed the site set-up and alarm history tape. DUSTO monthly reports, annual employee training, copies of testing reports and maintenance documentation were reviewed and current. Note: Observed approximately 1/4 gallon, .25" of diesel in the day tank secondary containment. Ensure that this area is kept clean of fuel at all [Truncated]

SJSU-CENTRAL PLANT (4) (Continued) **S103473126**

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/11/2020. The inventory submitted to CERS reports 2 x acetylene cylinders although only 1 was observed on-site. Additionally, the volume of the hydrogen cylinder disclosed appears to be lower than what was observed on-site. Lastly, the lab chemicals observed in the laboratories are classified by hazard classification (corrosive acid, corrosive base, poison, flammable, etc.). Ensure all lab chemical hazard classifications are disclosed to CERS.
Violation Division: Santa Clara County Environmental Health
Violation Program: HMRRP
Violation Source: CERS

Site ID: 68189

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-06-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 3/4/20 and concludes today with issuance of the Notice of Inspection. On-site with Yoni Fajardo of Santa Clara County HMCD to conduct a routine hazardous materials business plan (HMBP), hazardous materials storage, and hazardous waste inspection. Facility handles below-HMBP quantities of lab chemicals and HMBP-quantities of hydrogen in the nutrition food science laboratories. NOTES: -A current HMBP (ID: 10343617) was submitted and reviewed by our agency. -Emergency response equipment and posting were observed. -Monitoring plan was submitted to CERS. -Inspection logs were available for review.
Eval Division: Santa Clara County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-06-2020
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility generates very small quantities of lab chemical waste that are consolidated in Room 216 before being picked-up by Mr. Griffith and transported to the campus central hazardous waste storage area.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-01-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: There was no hazardous waste accumulated at this location during the inspection. Hazardous waste manifests for the past 3-yrs were inspected and documented under the Natural Science building: FA0205225. Area employees receive annual training in conjunction with the site's Emergency Contingency Plan for emergency procedures, chemical handling & hazardous waste management.

Eval Notes: On-site with Matt Nymeyer, David Griffith and Neill Peters to conduct a hazardous materials business plan (HMBP) and hazardous materials storage ordinance (HMSO) inspections. This inspection began on 10/15/18 and concluded on 10/18/18 with the delivery of this report. The following rooms/areas were inspected within the Engineering Building: 101, 103, 105, 106, 107, 109, 113, 114, 115, 123, 125, 129B, 130, 130C, 131, Courtyard, Rocket Assembly Tent (courtyard), 186, 188, 190, 201, 203, 207, 221, 223, 225, 227, 228, 228-B, 233-I, 235, 294, 311 and 393. The university is currently implementing CSU-wide corrective actions from a recent audit by the Joint Legislative Audit Committee. The final report titled California State University: It Has Not Provided Adequate Oversight of the Safety of Employees and Students Who Work With Hazardous Materials, Report 2017-119, was published on April 24, 2018 and available at https://www.bsa.ca.gov/pdfs/reports/2017-119.pdf. Eval Date: 03-06-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: This facility does not generate hazardous waste and therefore the permit will be inactivated.
Eval Division: Santa Clara County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-01-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: There was no hazardous waste accumulated at this location during the inspection. Hazardous waste manifests for the past 3-yrs were inspected and documented under the Natural Science building: FA0205225. Area employees receive annual training in conjunction with the site's Emergency Contingency Plan for emergency procedures, chemical handling & hazardous waste management. Notes: Per David Krack, SJSU will not classify any accumulation area as Point of Generation accumulation. All areas where hazardous waste is accumulated will be inspected at least weekly and disposed within 180 days of waste generation.

materials business plan (HMBP) and hazardous materials storage ordinance (HMSO) inspections. This inspection began on 10/15/18 and concluded on 10/18/18 with the delivery of this report. This inspection confirmed the most recent submittal on CERS that all hazardous materials stored are below HMBP threshold levels. The permit will be downgraded from a BP11 ($398.00) to 2502 ($294.00). Area inspections are being completed as required. Spill equipment and emergency equipment such as fire extinguishers and emergency eyewash/showers were current and recently inspected. For questions regarding this report, contact Ray Maiden at ray.maiden@cep.sccgov.org or at 408-918-1980 (mon-thurs).

Violation Source:	CERS
Site ID:	402301
Site Name:	SJSU-CENTRAL PLANT (4)
Violation Date:	09-19-2019
Citation:	HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2
Violation Description:	"Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "
Violation Notes:	The spill bucket was not tested today due to an uncorrected failure observed during spill bucket testing in 2018. Within 30 days, make arrangements to have the spill bucket repaired and note that a repair permit will be required.

Citation:	23 CCR 16 2636(f)(1) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(1)
Violation Description:	Failure of the double-walled pressurized piping to be continuously monitored with a system that activates an audible and visual alarm or stops flow at the dispenser when a leak is detected.
Violation Notes:	Returned to compliance on 09/13/2016. The Ronan LS3 annular failed to activate the audible and visual alarm when tested in water. The LS3 sensor was replaced with another LS3 sensor and tested to confirm functionality as well as create an audible and visual alarm at the monitoring panel. This violation was corrected during today's inspection, no further action is required.

Violation Date: 09-15-2014
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes: Returned to compliance on 09/15/2014. Mechanical overfill prevention valve was removed to facilitate testing of spill bucket. Valve was found to be coated with sludge sufficient to impede proper operation of the floats. Valve was cleaned to ensure free movement of the floats and all other mechanical components and reinstalled in the tank fill opening today. No permit or other corrective action is required.

Violations:
Site ID: 64623
Site Name: SAN JOSE MARRIOTT
Violation Date: 03-20-2017
Citation: HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description: Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes: _____ Diesel was observed to be pooling the piping sump and pipe transition sump during todayG s inspection. In aggregate, approximately 0.5 gallons of diesel was removed from the piping sump and pipe transition pump. Diesel has previously been observed in the pipe transition sump during the 3/23/2015 and 3/22/2016 inspections and in the piping sump during the 3/23/2015 inspection. Per maintenance records and Ms. WalkerG s statements, no repairs or corrective actions have been taken to repair the piping. IMMEDIATELY begin investigating the source of the fuel leak and submit a work plan for any necessary repairs to HMCD for review. Depending on the scope of work necessary, a permit from HMCD may be required for the repairs. THIS IS A CONTINUOUS, REPEAT, AND UNCORRECTED CLASS I VIOLATION FROM THE OFFICIAL NOTICE OF INSPECTION REPORT ISSUED ON 3/22/2016 AND A CONTINUOUS, REPEAT, AND UNCORRECTED CLASS II VIOLATION THE [Truncated]

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Inspection of overfill prevention equipment was due by 10/13/2018 and was not done until 3/20/2019. The next every-36-month inspection is due no later than October of 2021. Recommend you schedule it to occur at the time of the March 2021 monitoring system certification testing.

DRAFT

SAN JOSE MARRIOTT (Continued) **S108219554**

Citation:	HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286
Violation Description:	Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes:	This is an uncorrected violation. Permit application information submitted via CERS on 3/13/2018 still identifies the UST Operator as San Jose Marriott, which appears to be an unregistered fictitious business name, not the name of a legal entity. Property records identify the owner of the real estate on which the hotel is located as CWI 2 San Jose Hotel LP / Ryan LLC since 5/10/2013 when the property was purchased from PR SJM Hotel LLC. Correct and resubmit the UST Facility Information in CERS. Along with your written response to this Notice of Violation, include an explanation of the current and historic relationships between Marriott International Inc., CWI 2 San Jose Hotel LP, CWI 2 San Jose Hotel GP LLC, Ryan LLC, SP6 San Jose Hotel Owner LLC, SP6 San Jose Hotel Lessee LLC, and SP6 TRS LLC (i.e., parent/subsidiary and/or partnership relationships, and exactly who currently owns and operates the hotel and the UST).

Violation Date:	03-18-2021
Citation:	HSC 6.7 25293 - California Health and Safety Code, Chapter 6.7, Section(s) 25293
Violation Description:	Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.
Violation Notes:	The February 2021 DUSTO report had the incorrect date listed as the date of the inspection. The overfill prevention test date is missing from all DUSTO reports. This date this was performed 3/20/2019. The owner acknowledgment signature is missing from the October, November, December, January and February DUSTO reports.

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	The 55 gallon drum in the Generator Room marked G Diesel 55 gallons 9-4-12G has been labeled in accordance with Hazardous Waste requirements and with an accumulation start date of 3/20/2017 (should be 9/4/2012) as of 3/27/2019 had not been shipped for recycling or disposal. As a small quantity generator your accumulation time limit

DRAFT

SAN JOSE MARRIOTT (Continued) **S108219554**

is 180 days. Ship this hazardous waste for recycling/disposal as soon as possible and submit a copy of the hazardous waste transportation documentation with your response to this notice of violation.

Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes: One black 55 gallon drum labeled only as G Diesel 55 gallons 9-4-12G was observed next to the day tank in the emergency generator room on the 27th floor. Ms. Walker stated that she was unsure of the drumG s contents. A hazardous waste determination must be conducted on the drumG s contents. Determine if the contents are still usable or a waste. If determined to be a waste, determine whether the contents are a hazardous waste using generator knowledge or through laboratory testing as outlined below. If determined to still be usable contents, adequately label the container within 10 days. Provide documentation of the waste and hazardous waste determinations to HMCD for review.

Violation Date:	03-14-2018
Citation:	HSC 6.7 25291(a)(1) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(a)(1)
Violation Description:	Failure to construct, operate, and maintain primary containment as product-tight.
Violation Notes:	This is a violation originally cited on 3/20/2017, 3/22/2016 and 3/24/2015. Secondary piping pressure test ports for supply line and return line have had their valve cores removed as required to allow drainage of the secondary lines into the monitored sump, but valves for both lines appeared to be in the closed position at the time of inspection, isolating them from the fuel in the UST. Ms. Walker stated during the inspection that repairs have been made, but no records are available to document any repairs. Submit documentation showing how, when, and by whom any repairs to these lines were made. (Note: No work plan was submitted as directed in the 3/20/2017 Official Notice of Inspection.)

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection began on 3/13/2018 and finished today. On site yesterday with Greg Breshears of HMCD to witness the annual monitoring system certification performed by Brent Bowen of Tanknology Inc. Verified Mr. Bowen's ICC (#8211862, expires 6/23/19), and Veeder Root (#B48215, expires 4/26/19). 1 tank : Diesel The UST systemG s piping is a conventional suction system. Observed testing of the following components yesterday: - 1 Annular space sensor (Veeder-Root (VR) 794390-420) - 1 Piping Sump sensor (VR 794380-208) - 1 Piping Transition Sump sensor (VR 794380-208) - 1 Pump Room sensor (VR 794380-208) All sensors listed above provided audible and visual alarms when tested. The spill bucket was tested using Tanknology's Vacuum testing apparatus. The spill bucket held at 30" water column for 60 seconds without loss. The diesel tank uses mechanical overfill prevention valve in the drop tube. The unburied fuel piping connected to the emergency generator tank [Truncated]

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-22-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site to witness the annual monitoring system certification and spill bucket test performed by Mr. Michael Gathright (certifications current) of Petro-Analytical. UST is a conventional suction system for an emergency generator. The annular and 3 sump sensors (piping sump, transition sump from loading dock down to pump room and pump room floor containment) were tested in water and provided audible and visible alarms. The spill bucket was hydrostatically tested for one hour with no loss. Observed the schrader valves removed from all of the test boots and brass connections. Observed the reducer fitting on the supply line removed at the transition sump. A copy of the 3/24/2015 Notice of Inspection was delivered with this report. Reviewed DUSTO Monthly Reports, DUSTO Training records, testing reports and maintenance documentation and daily Emergency Generator Tank System unburied piping inspection logs. NOTE: Secondary containment (SB989) testing is due in [Truncated]

Eval Notes: On-site to observe UST secondary containment testing. All tests were completed by Service Technician Justin Williams from Confidence UST Services, Inc. Mr. Williams' ICC Service Technician and Incon tester certifications were verified to be current. Annular Space Tests: The diesel tank (Joor) annular was placed under 10-in of vacuum for 60-minutes with no loss of vacuum; PASS. Piping Sump could not be tested due to a torn sump wall penetration fitting. The sump wall fitting must be repaired and the sump hydrostatically tested. Provided that the sump wall penetration fitting can be replaced from within the sump a UST Repair Permit is not required. Transition sump: The transition sump filled with water over the highest point of the secondary piping penetration. The liquid level was tested with a Incon TS-STS Sump Test System for 10-minutes with no loss of liquid; PASS. Secondary Containment Piping: All secondary containment piping (OMEGA & Enviroflex) were [Truncated]

Case Type: Cleanup Program Site
Case Worker: UUU
Local Agency: Not reported
RB Case Number: 43S0322
File Location: All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected: Aquifer used for drinking water supply, Other Groundwater (uses other than drinking water), Soil, Soil Vapor
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Diesel, Gasoline, Stoddard solvent / Mineral Spriits / Distillates, Total Petroleum Hydrocarbons (TPH)
Site History: This case is associated with the following two cases: T10000008312 Expert Cleaners (Non-case) T0608502083 Griffin Property (closed) Case Closure/No Further Action: On January 20, 2016, the Regional Water Board required a site history report for Expert Cleaners located at the site address. The response received on January 26, 2016 indicated soil and groundwater investigations were conducted previously at the property under the case name Griffin property and a copy of the Regional Water Board case closure letter dated January 7, 2002 was provided. In April 2017, the Regional Water Board issued a rescission of the January 20, 2016 site history report request. See Expert Cleaners, Global ID # T10000008312, for the rescission letter. Site History: Expert Dry Cleaners operated at this site (724 South first street) for twenty years (1959-1979) . Orvill Griffin purchased the property (718 and 724 South First Street) in June 1979 and operated an auto parts and repair facility. The city of SJ Fire Dept required owner to remove the USTs (one gasoline and one stoddart solventand) and associated piping (URF dated 08/29/1991). The owner discovered four more USTs during excavation. The owner removed all six USTs on July 9, 1991. The USTs are listed below: UST #1 1,500 Gallons diesel UST #2 250 Gallons stoddard solvent UST #3 500 Gallons stoddard solvent UST #4 250 Gallons stoddard solvent UST #5 100 Gallons stoddard solvent UST #6 200 Gallons stoddard solvent Approximatley 600 tons of soil surrounding the USTs and beneath the former dry cleaner building was excavated and removed. The excavation was

DRAFT

ELECTRIC BATTERY AND CARB (Continued) **S120762566**

backfilled and the surface was paved for parking and storage. The main contaminats of concern detected in soil were TPHg, TPHd, and PCE. PCE or other VOCs were not detected in groundwater after USTs were removed in July 1991 and soil overexcavated in August 1991.

Potential Contaminants of Concern:	* Petroleum - Automotive gasolines, * Solvents, Stoddard solvent / Mineral Spriits / Distillates
Site History:	Development of site is in two phases. Phase I is complete. About one half of the site is included in Phase 1. Phase 1 was excavated to 30-40 feet and dewatered during construction. Contaminated soil and groundwater were handled in accordance with an approved RAP. An nfa letter was issued for the Phase 1 portion of the site. Phase 2 is currently a parking lot. A RAP was being developed for Phase 2 prior to the elimination of the redevelopment agency. Currently the site R.P. for the Phase 2 portion of the site is the Sucessor Agency to the San Jose Redevelopment Agency.

- Site History: The "Block 2 - City of San Jose Parking Lot Site" is located at 8 East San Fernando Street, between South First Street and South Second Street, in downtown San Jose. This 1-acre parcel has been used as a

DRAFT

BLOCK 2 CITY OF SAN JOSE PARKING LOT (Continued) **S108937591**

paved parking lot since at least 1980. Prior to 1980, the Site was occupied by several small stores and the OB Hale and Company Department Store. Prior to 1900, the Site operation included a paint shop. Block 3, an adjacent lot, has similar land use histories and has detected VOCs and TPHs in soil and groundwater. A former coal gasification plant was formerly located about 300 feet away. The Redevelopment Agency of the City of San Jose (the Agency) is currently planning to construct a new mixed-use building complex and underground parking structure. Specifically, the planned development includes excavation of the entire site to a depth of about 40 feet below the current surface to accommodate a three-level, underground parking structure. The space above the parking structure at ground level is planned for commercial use. The space above the commercial area is planned for hotel and residential use. To date, three rounds of site investigation have been conducted to study Site soil, groundwater, and soil gas. Investigation results were used in a Human Health Risk Evaluation and compared to screening levels such as CHHSL, ESLs and PRGs for the proposed exposure scenarios. Overall, the Site data compare favorably to these screening levels. Exceedances of those screening levels were found in only one soil sample for mercury (21 mg/kg vs. 18 mg/kg) and in soil gas samples for 1,3-butadiene (16.0 vs. 4.85 ug/cubic meter). However, the targeted exposure pathway may not even be complete when considering the proposed land use scenario (i.e., with the underground parking) and construction method.

Local Agency: SANTA CLARA COUNTY LOP
File Location: All Files are on GeoTracker or in the Local Agency Database
Local Case Number: 07S1E09N01f
Potential Media Affect: Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern: Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History: Investigation at this site began in April 1986, when gasoline-contaminated soil and groundwater were sampled by Soil Tech Engineering (STE) while installing three monitoring wells in the vicinity of the former fuel tank area. Four underground tanks were removed from the site in January 1992, and soil samples from beneath the tanks confirmed that they were the source of the gasoline contamination. A soil gas survey in June of that year provided further evidence of underground contamination. The next phase of investigation took place in March 1993. STE drilled eleven soil borings and detected gasoline in five of eleven samples collected at a depth of 15 feet. STE later excavated and disposed of 100 yards of this contaminated soil. Four additional monitoring wells were drilled in December 1996 and January 1997. STE prepared a Corrective Action Plan in August 2003. Data collected during January and February 2002 were used to examine the feasibility of using soil vapor extraction, groundwater extraction, and other potential technologies to mitigate the contamination. However, because the extent of the contamination problem was not fully defined, no corrective action has been implemented. Enviro Soil Tech Consultants (ESTC) extended the investigation beyond the property boundaries beginning in October 2002, when thirty-two (32) additional borings were drilled. The borings confirmed that very elevated concentrations of gasoline were present in groundwater north of the site along the east side of 10th Street, and wells were installed in August 2006 to monitor this contamination and better define its extent. In the third quarter of 2006, ESTC recommended moving forward with site remediation, and suggested that air sparging be tested to determine its potential in cleaning up the groundwater. The regulatory agency approved that recommendation in early 2008.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Contaminants of Concern:	Tetrachloroethylene (PCE)
Potential Media Affected:	Aquifer used for drinking water supply, Indoor Air, Other Groundwater (uses other than drinking
Site History:	Portola Cleaners appears to have two address: 130 West Virginia St., San Jose and 805 State Street, San Jose. Dry cleaning solvents released from dry cleaning operations and the related UST. The SCVWD transferred the case to the Regional Water Board on April 1, 1996. SJ Fire Dept. recommended collecting samples from the tank slurry and soil, closing the UST by filling it in place. (MS) No soil, soil gas and groundwater sampling data in the file.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date:	09-11-2018
Citation:	HSC 6.5 25144.6 (b) - California Health and Safety Code, Chapter 6.5, Section(s) 25144.6 (b)
Violation Description:	Failure to properly manage reusable soiled textile materials prior to being sent for laundering.
Violation Notes:	Returned to compliance on 11/01/2018. Mr. Fahri stated that he collects his soiled shop rags in a plastic bag and gives them to a friend who works at Cordial Auto, Inc. in Santa Clara. Immediately cease this practice. Hire a commercial launderer for your shop rags or combine them with your oily absorbent wastes.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 11/01/2018. Per Mr. Fahri, the used coolant drum has not been picked up since 2015. Make arrangements to have this picked up by a registered hazardous waste hauler and keep disposal receipts for 3 years.

RB Case Number: 43S0300
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Other Petroleum, Stoddard solvent / Mineral Spriits / Distillates
Site History: See also file for Deluxe Cleaners. Civic Plaza incorporates the former Deluxe Cleaners parcel. The Deluxe Cleaners site had a release of stoddard solvent to soil and groundwater. The whole site was excavated as part of redevelopment into the Civic Plaza Parking Garage.

RB Case Number:	06-030
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E17K01f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	Based on information provided in the May 15, 2009, Quarterly Report #45, 2nd Quarter 2009 Discharge of Treated Groundwater to Storm Drain prepared by Western Geo-Engineers for the groundwater extraction and treatment system at the site; groundwater extraction commenced at the site in 1991, approximately 4 million gallons of groundwater have been treated, and approximately 37 gallons of TPHg have been removed. However, the system was shut down on May 7, 2009, due to the relatively low petroleum hydrocarbon mass removal rate; deactivation of the system was approved by SCCDEH in an April 21, 2009 letter. Groundwater sampling procedures consist of initially measuring and

DRAFT

REGAL #423 (Continued) **S105256211**

documenting the water level in the well and checking the well for the presence of separate-phase hydrocarbon (SPH) using an oil/water interface probe or a clear Teflon bailer. If the well did not contain SPH, it was purged a minimum of three casing volumes or until dry. During purging, well stabilization parameters (temperature, pH, and electrical conductivity) were monitored and recorded. After 80% recovery of the water level, groundwater samples were collected with a new disposable polyethylene bailer or pre-cleaned reusable Teflon bailer and placed into the appropriate EPA-approved containers. Reusable sampling equipment was cleaned with trisodium phosphate solution and clean water between uses. The samples were labeled, logged onto chainof-custody documents, and transported on ice to the laboratory using appropriate chain-of-custody documentation. Groundwater samples were submitted to a California state-certified laboratory, and analyzed for TPHg, benzene, toluene, ethylbenzene, xylenes (collectively BTEX), methyl tertiary butyl ether, and tertiary butanol EPA Method 8260B. The results of the current monitoring event indicate that since shut down of the groundwater extraction and treatment system, dissolved concentrations of petroleum hydrocarbons, MtBE and TBA remain relatively stable and/or within historic ranges, except at wells MW07 and MW08. Continued evaluation of the concentrations will be conducted during ensuing monitoring events; the next event is scheduled for the second half of 2011.

Primary Waste: CNWTRS
Waste Type2: Not reported
Waste2: Contaminated Ground Water
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 12/27/1991
Comments: Completed Site Screening. In January 1989, additional sampling was conducted at the site. Soil boring results detected total oil and grease (TOG) and total petroleum hydrocarbons as diesel (TPHd) in excess of 1000 ppm. Lead was detected at 938 ppm. In May 1989, two groundwater monitoring wells (MW-1 and MW-2) were installed at the property. Lead was detected in groundwater at a concentration of 0.181 ppm. In May 1989, contaminated soil was removed from the previous sampled area. Final soil sample results indicated only one sample contained TOG at 780 ppm and lead at 191 ppm. The sample that contained the TOG and lead was collected beneath the foundation of the building. The excavations were backfilled with clean, imported fill.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/20/2021

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/20/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

DRAFT

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

DRAFT

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2012

DRAFT

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

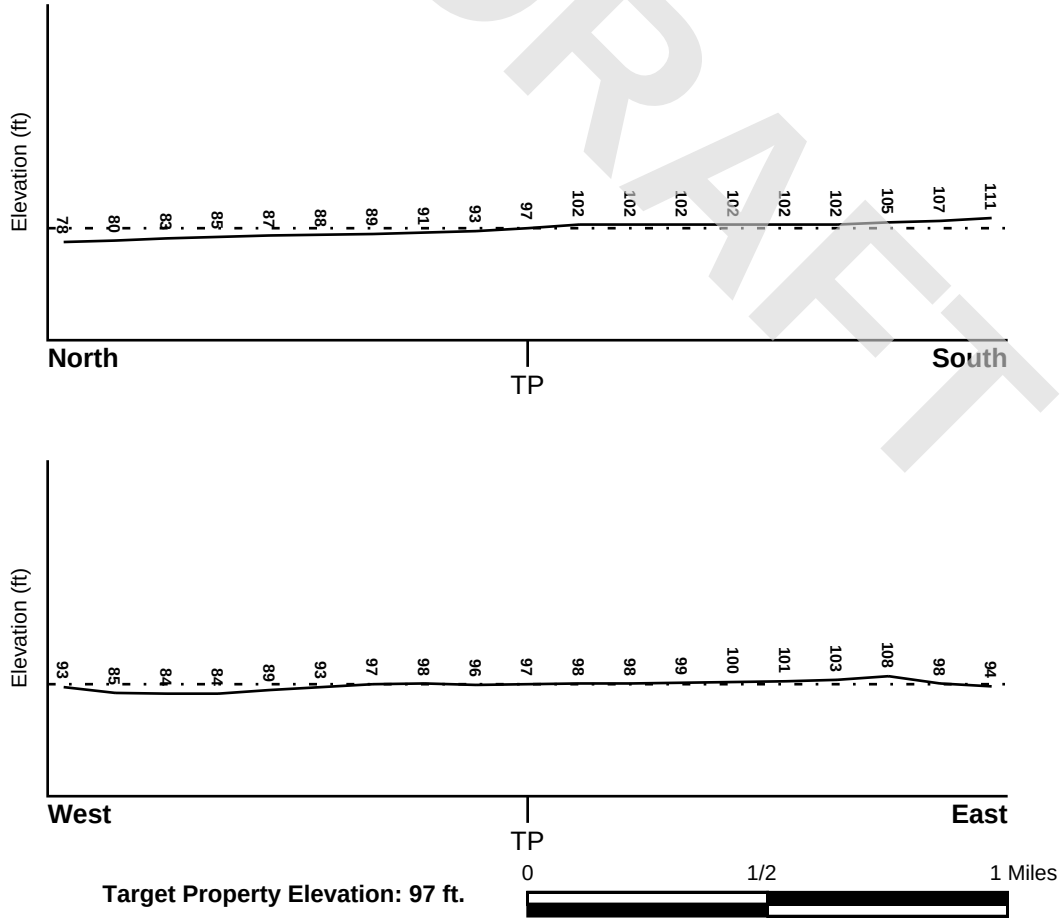

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

DRAFT

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 97 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

SAN JOSE WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile West
Site Name:	River Park Development-Lincoln Props
Site EPA ID Number:	CAD981676430
Surficial Aquifer Flow Dir.:	SW. THIS FLOW APPLIES TO THE "A" AQUIFER.
Measured Depth to Water:	approximately 22 feet in the surficial "A" aquifer and approximately 95 feet in the underlying "B" aquifer.
Hydraulic Connection:	A silty clay layer separates the "A" and "B" aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

DRAFT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

DRAFT

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

TRA DET. MAP 115

LAWRENCE E. STONE – ASSESSOR
Cadastral map for assessment purposes only.
Compiled under R. & T. Code, Sec. 327.
Effective Roll Year 2021–2022

Record request #22-2 has been closed. The closure reason supplied was:

Good morning, Chris.

Thank you for your recent record request received on 01.03.22 for the following addresses in SAN JOSE:

439 and 451 South 4th Street

We have no records for these locations. However, additional electronic documents may be found on the following websites:

- Local Oversight Program (LOP)
- GEOTracker (GT)
- Spill Reports Website – California Office of Emergency Services (Cal OES):

Please be advised that in some cities, other participating agencies may be responsible for maintaining the type of files you requested. This link may be of assistance in determining who will have the documents you are looking for in the future:

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by David J. Powers & Associates to conduct a Phase I ESA in conformance with our proposal and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property referenced in the table below. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

PROPERTY DESCRIPTION

PROPERTY INFORMATION	
Property Name	South Fourth Street Mixed Use Project
Street Address(es)	439 & 451 South Fourth Street
City	San Jose
State	California
Location	Southwestern side of South 4th Street
Vicinity Characteristics	Residential and commercial
Approximate Site Acreage/Source	0.5/Santa Clara County Assessor
Property Type	Residential
Subject Property Use(s)	Multi-family residential
Assessor Parcel Number(s)	467-47-058 & 467-47-096
SITE AND BUILDING INFORMATION	
Number of Buildings	Three
Year(s) of Construction	439 South 4th Street - 1965 451 South 4th Street - 1990
Number of Floors/Stories	439 South 4th Street - Three 451 South 4th Street - Two
Basement or Subgrade Area(s)	None identified
Number of Units	36
Building Area (SF)/Source	18,188/Santa Clara County Assessor
Building Description(s)	One three-story and one two-story residential apartment structures, each with presumed slab foundation and no subgrade areas
Building Occupant(s)	Multiple residential tenants
Additional Improvements	Associated landscaping, asphalt-paved parking areas
Current On-site Operations	Residential activities
Current Use of Hazardous Substances	None identified
UTILITY PROVIDER INFORMATION	
Natural Gas Provider	Pacific Gas & Electric (PG&E) per Ms. Nelly Amas/Property Manager
Electricity Provider	PG&E per Ms. Nelly Amas/Property Manager
Heating System Fuel Source	Electricity per Ms. Nelly Amas/Property Manager
Cooling System Power Source	N/A per Ms. Nelly Amas/Property Manager
Potable Water Provider or Source	San Jose Water Company per Ms. Nelly Amas/Property Manager
Sewage Disposal Provider or Treatment System	City of San Jose per Ms. Nelly Amas/Property Manager

DRAFT

REGULATORY INFORMATION	
Regulatory Database Listings	None identified
Institutional Controls	None identified
Engineering Controls	None identified
Environmental Liens	None identified

Based on a review of historical sources, the subject property was identified to consist of five separate residential structures with associated private auto garages and outbuildings in 1891. Residential structures remain in a 1915 Sanborn map. By at least 1950, a small residential apartment structure was developed in the northwestern portion of the subject property in addition to the previous structures, while one of the residential structures in the central portion was converted into a store (located within the footprint of the current 439 development). Circa 1965, the current residential apartments structures were developed at 439 South 4th Street; a small residential structure was also present in the southeastern portion. By 1969, the residential structure was removed from the southeastern portion of the subject property. Circa 1990, the current residential structure was developed at 451 South 4th Street. Occupants at the subject property have included multiple residential tenants, as well as a commercial photography supply operation at 451 South 4th Street from approximately 1990-2010.

The following historical addresses were associated with the subject property: 425-451 South 4th Street. These addresses were also researched as part of this assessment.

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	South 4th Street followed by residences (414-452 South 4th Street)	None identified
Southeast	Residence (459 South 4th Street)	None identified
Southwest	Residences (420-452 South 3rd Street)	None identified
West	Residential apartments (418 South 3rd Street)	None identified
Northwest	Residential apartments (405 South 4th Street)	None identified

None of the adjacent sites were listed in the regulatory database.

Based upon information obtained from groundwater monitoring data for a nearby site, 498 South 4th Street (220 feet southeast) on the Regional Water Quality Control Board's (RWQCB) GeoTracker database, the direction of groundwater flow beneath the subject property is inferred to be to the northeast. Based on information obtained from the same source, groundwater is presumed to be present at an estimated depth of 11-36 feet bgs.

FINDINGS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. AEI's assessment has revealed the following RECs associated with the subject property or nearby properties:

DRAFT

- AEI did not identify evidence of on-site RECs during the course of this assessment.

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. AEI's assessment has revealed the following CRECs associated with the subject property or nearby properties:

- AEI did not identify evidence of on-site CRECs during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. AEI's assessment has revealed the following HRECs associated with the subject property or nearby properties:

- AEI did not identify evidence of on-site HRECs during the course of this assessment.

Other Environmental Considerations warrant discussion, but do not qualify as RECs as defined by the ASTM Standard Practice E1527-13. These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property. AEI's assessment has revealed the following other environmental considerations associated with the subject property or nearby properties:

- According to the Client, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain asbestos and/or lead-containing materials.

- Due to the age of the subject property buildings, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

DRAFT

CONCLUSIONS, OPINIONS, AND RECOMMENDATIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) of 439 & 451 South Fourth Street in the City of San Jose, Santa Clara County, California, the *subject property*. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

AEI did not identify evidence of RECs in connection with the subject property during the course of this assessment. AEI recommends no further investigation for the subject property at this time.

DRAFT

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I ESA performed in conformance with the proposal and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 439 & 451 South Fourth Street in the City of San Jose, Santa Clara County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 SCOPE OF WORK

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal, and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

1.2 ADDITIONAL SERVICES

Other environmental considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 SIGNIFICANT ASSUMPTIONS

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

DRAFT

1.4 LIMITATIONS

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

DRAFT

1.5 LIMITING CONDITIONS/DEVIATIONS

The performance of this Phase I ESA was limited by the following:

- AEI inspected a representative sample of interior units: 9, 12, 22, and 25. In addition, AEI inspected common and exterior areas of the property, including list the laundry rooms and manager's office. Based on the nature of property occupancy, this method of assessment is presumed to be appropriate due to the size of the subject property.

- AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall Findings of this assessment.

- The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

1.6 DATA GAPS AND DATA FAILURE

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 DATA FAILURE

The following data failure was identified during the course of this assessment:

Data Failure	The earliest historical resource obtained during this assessment was a Sanborn map from 1891. The lack of historical sources for the subject property dating back to first developed use represents historical data source failure. In the 1891 Sanborn map, the subject property was developed with several residences. Thus, it is assumed that prior to 1891, the subject property would have been used for residential purposes, if not undeveloped. Therefore, this data failure is not expected to significantly alter the Findings of this assessment.
Information/Sources Consulted	Sanborn maps, historical topographic maps, aerial photographs, city directories, agency reviews, interviews

DRAFT

1.6.2 DATA GAPS

The following significant data gap was identified during the course of this assessment:

Data Gaps	Historical sources were not obtained at five-year intervals dating back to 1940 or first developed use, whichever is earlier. AEI was not able to track the history of the subject property between the years 1891 and 1950 as none of the historical sources utilized as part of this assessment covered this time period. In the 1891 Sanborn map, the subject property appeared to consist of several residential structures. In the 1950 Sanborn map the subject property also appeared to consist of several residential structures. Thus, it is assumed that during the 1891 and 1950 time period the subject property would have been used for residential purposes, if not undeveloped. Therefore, this data failure is not expected to significantly alter the Findings of this assessment.
Information/Sources Consulted	Sanborn Fire Insurance maps, aerial photographs, city directories, agency reviews, interviews

1.7 RELIANCE

All reports, both verbal and written, are for the benefit of David J. Powers & Associates. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors, or assigns. Reliance is provided in accordance with AEI's Proposal and Standard Terms and Conditions executed by David J. Powers & Associates on September 10, 2015. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

Potable Water Provider or Source	San Jose Water Company per Ms. Nelly Amas/Property Manager
Sewage Disposal Provider or Treatment System	City of San Jose per Ms. Nelly Amas/Property Manager
REGULATORY INFORMATION	
Regulatory Database Listings	None identified
Institutional Controls	None identified
Engineering Controls	None identified
Environmental Liens	None identified

DRAFT

Refer to Appendix A: Figures and Appendix B: Property Photographs for site location and description.

2.2 SITE AND VICINITY CHARACTERISTICS

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
Northeast	South 4th Street followed by residences (414-452 South 4th Street)	None identified
Southeast	Residence (459 South 4th Street)	None identified
Southwest	Residences (420-452 South 3rd Street)	None identified
West	Residential apartments (418 South 3rd Street)	None identified
Northwest	Residential apartments (405 South 4th Street)	None identified

None of the adjacent sites were listed in the regulatory database.

2.3 PHYSICAL SETTING

Geology: According to information obtained from the USGS, the area surrounding the subject property is underlain by disturbed and human transported material. Based on a review of the USDA Soil Survey for the area of the subject property, the soils in the vicinity of the subject property are classified as the Urban Land El Palo Alto complex. Soils from this series are characterized as slightly decompressed plant material from 0-8 inches bgs, clay loam from 8-17 inches bgs, and silty clay loam from 17-94 inches bgs. these types of soils generally have a moderately high permeability and a depth to water table of more than 80 inches.

USGS Topographic Map:	San Jose West, California Quadrangle
Nearest surface water to subject property:	Guadalupe River/2,615 feet southwest
Gradient Direction/Source:	Northeast/Information obtained from groundwater monitoring data for nearby site, 498 South 4th Street (220 feet southeast) on RWQCB GeoTracker
Estimated Depth to Groundwater/Source:	11-36 feet bgs/Information obtained from groundwater monitoring data for nearby site, 498 South 4th Street (220 feet southeast) on RWQCB GeoTracker

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

DRAFT

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

3.1 HISTORICAL SUMMARY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description/Use	Source(s)
1891	Five separate residential structures, each with an associated private auto garage and outbuildings	Sanborn maps, city directories
1950	Residential apartment structure developed in northwestern portion of subject property in addition to previous structures, one residence in central portion converted into a store	Sanborn maps, city directories, aerial photographs
1965	Current residential apartment structures developed at 439 South 4th Street, small residential structure present in southeastern portion of subject property	Sanborn maps, aerial photographs, city directories, agency reviews
1969	Residential structure removed from southeastern portion of subject property	Sanborn maps, aerial photographs
1990-Present	Current structure developed at 451 South 4th Street	Aerial photographs, city directories, agency reviews, site visit

Based on a review of historical sources, the subject property was identified to consist of five separate residential structures with associated private auto garages and outbuildings in 1891. Residential structures remain in a 1915 Sanborn map. By at least 1950, a small residential apartment structure was developed in the northwestern portion of the subject property in addition to the previous structures, while one of the residential structures in the central portion was converted into a store (located within the footprint of the current 439 development). Circa 1965, the current residential apartments structures were developed at 439 South 4th Street; a small residential structure was also present in the southeastern portion. By 1969, the residential structure was removed from the southeastern portion of the subject property. Circa 1990, the current residential structure was developed at 451 South 4th Street. Occupants at the subject property have included multiple residential tenants, as well as a commercial photography supply operation at 451 South 4th Street from approximately 1990-2010.

The following historical addresses were associated with the subject property: 425-451 South 4th Street. These addresses were also researched as part of this assessment.

AEI did not identify potential environmental concerns in association with the current or historical use of the subject property.

DRAFT

3.2 AERIAL PHOTOGRAPH REVIEW

AEI reviewed aerial photographs of the subject property and surrounding area. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1939	What appear to be several residential structures	**Northeast:** Road (current South 4th street) followed by residential structures **Southeast:** Residential structures **Southwest:** Residential structures **West:** Residential structures **Northwest:** Residential structures
1956	No significant changes	**Northeast, southwest, west, northwest:** No significant changes **Southwest:** Vacant land
1965, 1974, 1982*, 1993*	Current residential apartment structures developed in central and northwestern portions of subject property, smaller residential structure present in southeastern portion	**Northeast, southeast, west:** No significant changes **Southwest:** Current residential apartment structure developed **Northwest:** Current residential apartment structure developed
1998, 2005, 2014	Current residential structure developed in southeastern portion of subject property	**Northeast:** Current residential apartment structures developed beyond South 4th Street **Southeast, southwest, west, northwest:** No significant changes

*Interpretation of structures and uses at the subject property and adjacent properties was not possible due to poor image quality.

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the aerial photograph review.

If available, copies of historical aerial photographs are provided in the report appendices. However, it should be noted that the 2005 and 2014 aerial photographs were reviewed using *Google Earth* and due to copyright reasons cannot be included in the report appendices.

DRAFT

3.3 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the ERIS collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjacent Site Descriptions
1891, 1915	Five separate residential structures, each with an associated auto garage and outbuildings Addresses identified: -425, 429, 439, 445, 451 South 4th Street	**Northeast:** South 4th Street followed by residences with associated outbuildings **Southeast:** Residence with associated outbuildings **Southwest:** Residence with associated outbuildings **West:** Residence with associated outbuildings **Northwest:** Residence with associated outbuildings
1950	Residential apartment structure developed in northwestern portion of subject property in addition to previous structures, one residence in central portion converted into a store Addresses identified: -425, 429, 439, 445, & 451 South 4th Street	**Northeast, southeast, west:** No significant changes **Southwest:** Small private auto garage and vacant land **Northwest:** Vacant land
1969	Current residential apartment buildings developed in central and northwestern portions of subject property, southeastern portion is vacant land Addresses identified: -439 & 451 South 4th Street	**Northeast:** South 4th Street followed by residential apartment structures and vacant land **Southeast:** Current residential structure **Southwest:** Current residential apartment structures **West:** Current residential apartment structure **Northwest:** Current residential apartment structure

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the Sanborn map review.

If available, copies of historical Sanborn maps are provided in the report appendices.

DRAFT

3.4 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing San Jose Public Library. The following table summarizes the results of the city directory search.

City Directory Search Results

Year(s)	Address - Occupant Listed
1915, 1920, 1925	425 South 4th Street - Residential tenant 429 South 4th Street - Residential tenant 439 South 4th Street - Residential tenant 445 South 4th Street - Residential tenant 451 South 4th Street - Residential tenant
1930	425 South 4th Street - Residential tenant 429 South 4th Street - Residential tenant 445 South 4th Street - Vacant 451 South 4th Street - Residential tenant
1935, 1940, 1945, 1949-1950, 1955, 1960	425 South 4th Street - Residential tenant 429 South 4th Street - Residential tenant 439 South 4th Street - Residential tenant 445 South 4th Street - Residential tenant 451 South 4th Street - Residential tenant
1965	425 South 4th Street - Residential tenant 429 South 4th Street - Residential tenant 451 South 4th Street - Residential tenant
1970, 1975	439 South 4th Street - Various residential tenants 451 South 4th Street - Residential tenant
1981	439 South 4th Street - Multiple residential tenants 451 South 4th Street - XXXX
1985, 1990-1991, 1995-1996	439 South 4th Street - Multiple residential tenants 451 South 4th Street - Discount Photo Supply
2000-2001	439 South 4th Street - Multiple residential tenants 451 South 4th Street - Residential tenant
2005	439 South 4th Street - Multiple residential tenants
2010	439 South 4th Street - Multiple residential tenants 451 South 4th Street - Discount Photo Supply
2014	439 South 4th Street - Multiple residential tenants 451 South 4th Street - XXXX

If listed above, XXXX indicates that the address is valid but there is no occupancy information available.

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review. It should be noted that no commercial listings were noted in the 1950 city directory, as was shown in the 1950 Sanborn map. Therefore, it is apparent that the subject property has only been used for residential purposes.

If available, copies of historical city directories are provided in the report appendices.

DRAFT

3.5 HISTORICAL TOPOGRAPHIC MAPS

In accordance with our approved scope of services, historical topographic maps were not reviewed as a part of this assessment.

3.6 CHAIN OF TITLE

In accordance with our approved scope of services, a chain of title search was not performed as part of this assessment.

DRAFT

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 LOCAL ENVIRONMENTAL HEALTH DEPARTMENT AND/OR STATE ENVIRONMENTAL AGENCY

On September 15, 2015, AEI contacted the Santa Clara County Environmental Health Department (SCCDEH) via email for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems.

AEI spoke with Ms. Raquel Duenas, Senior Office Specialist, who indicated that evidence of current or prior use or storage of hazardous substances was not on file for the subject property with the SCCDEH.

In addition, AEI searched the Santa Clara County Local Oversight Program's (SCCLOP) LUSTOP database for information regarding possible releases of hazardous substances at the subject property.

The subject property was not listed on the SCCLOP's LUSTOP database.

4.2 FIRE DEPARTMENT

On September 22, 2015, AEI visited the San Jose Fire Department (SCFD) for information on the subject property to identify any evidence of previous or current hazardous substance usage, and/ or for any historical information available for the subject property.

According to the SJFD's internal database, no information indicating current or prior use or storage of hazardous substances was on file for the subject property.

4.3 BUILDING DEPARTMENT

On September 22, 2015, AEI visited the San Jose Building Department (SJBD) for information on the subject property in order to identify historical tenants, features of concern and property use.

Please refer to the following table for a listing of permits reviewed:

Building Permits Reviewed

Year(s)	Owner/Applicant	Description of Permit / Building Use
1965	None listed (439 South 4th Street)	Building Permit/Construct 30 unit apartment building
2004	None listed (451 South 4th Street)	Building Permit/Reroof

DRAFT

Year(s)	Owner/Applicant	Description of Permit / Building Use
2007	None listed (439 South 4th Street)	Building Permit/Additions and alterations to apartment building
2012	None listed (439 & 451 South 4th Street)	Building Permit/Reroof

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the San Jose Building Department.

4.4 PLANNING DEPARTMENT

On September 22, 2015, AEI contacted the San Jose Planning Department (SJPD) via telephone for information on the subject property in order to identify AULs associated with the subject property.

AEI spoke with a representative of the SJPD, who indicated that evidence indicating the existence of AULs was not on file for the subject property with the San Jose Planning Department.

4.5 COUNTY ASSESSOR OFFICE

On September 28, 2015, AEI contacted the Santa Clara County Assessor via telephone for information on the subject property in order to determine the earliest recorded date of development and use.

According to the Santa Clara County Assessor, the current building at APN 467-47-058 was constructed in 1990 and the current building at APN 467-47-096 was constructed in 1965.

4.6 OIL AND GAS WELLS/PIPELINES

On September 25, 2015, AEI reviewed the California Division of Oil, Gas & Natural Resources (CA DOGGR) maps concerning the subject property and nearby properties. The maps contain information regarding oil and gas development.

According to the CA DOGGR map, oil or gas wells are not located within 500 feet of the subject property. AEI did not identify evidence of environmental concerns during the map review.

4.7 OTHER AGENCIES SEARCHED

On September 15, 2015, AEI accessed the **California State Water Resources Control Board (SWRQB) GeoTracker database**, a data management system for managing sites that impact groundwater, especially those requiring groundwater cleanup [USTs, Department of Defense, Site Cleanup Program] as well as permitted facilities such as operating USTs and land disposal sites.

- No information indicating any release of hazardous materials from the subject property was found on the GeoTracker website.

On September 15, 2015, AEI accessed the **California Department of Toxic Substances Control (DTSC) EnviroStor database**, which contains information of investigation, cleanup,

DRAFT

permitting, and/or corrective actions that are planned, being conducted or have been completed under DTSC oversight.

- No information indicating any release of hazardous materials from the subject property was found on the EnviroStor website.

On September 16, 2015, AEI contacted the **Bay Area Air Quality Management District (BAAQMD)** for information regarding any records of PTO, NOV, or NTC issued to occupants of the subject property and associated with air emission equipment primarily related to stationary sources of air pollution, such as dry cleaning machines, boiler, and/or underground storage tanks.

- No information indicating the existence of any PTOs, NOVs, or NTCs was on file for the subject property with the BAAQMD.

On September 16, 2015, AEI contacted the **Santa Clara Valley Water District's (SCVWD) Wells Division** via email for information regarding registered wells at the subject property. AEI also searched the **SCVWD's Fuel Leaks & Solvents** database for information regarding possible releases of hazardous substances at the subject property.

- According to Ms. Barbara Murray, Hydrologic Systems Analyst II, no registered wells exist at the subject property.

- The subject property was not listed on the SCVWD's Fuel Leaks & Solvents database.

On September 25, 2015, AEI accessed the **California Department of Toxic Substances Control (DTSC) Hazardous Waste Tracking System (HWTS)** online database for information pertaining to hazardous waste disposal associated with the subject property. The HWTS generates reports on hazardous waste shipments for generators, transporters, and treatment, storage or disposal facilities (TSDFs).

- No information indicating the generation of hazardous wastes was on file for the subject property with the DTSC HWTS.

4.8 State Environmental Superliens and Property Transfer Laws

In accordance with our approved scope of services, AEI did not assess whether the subject property is subject to any state environmental superliens and/or property transfer laws.

DRAFT

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted Environmental Risk Information Service (ERIS) to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by ERIS into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by ERIS, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report is included in Appendix C of this report.

The subject property was not identified in the databases reviewed.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

DRAFT

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	Recognized Environmental Condition or Other Environmental Consideration (Yes or No)
NPL	1	No	0	
DELISTED NPL	0.5	No	0	
CERCLIS	0.5	No	0	
CERCLIS NFRAP	0.5	No	0	
RCRA CORRACTS	1	No	0	
RCRA-TSDF	0.5	No	0	
RCRA LQG, SQG, CESQGs, VGN, NLR	SP/ADJ	No	0	
US ENG CONTROLS	SP	No	0	
US INST CONTROLS	SP	No	0	
ERNS	SP	No	0	
STATE/TRIBAL HWS	1	No	11	No
STATE/TRIBAL SWLF	0.5	No	0	
STATE/TRIBAL REGISTERED STORAGE TANKS	SP/ADJ	No	0	

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	Recognized Environmental Condition or Other Environmental Consideration (Yes or No)
STATE/TRIBAL LUST	0.5	No	33	No No, based on review of a groundwater monitoring report for nearby LUST case located at 498 4th Street, the closest well is non-detect for all COCs and groundwater is flowing away from the subject property.
STATE/TRIBAL EC and IC	SP	No	0	
STATE/TRIBAL VCP	0.5	No	1	No
STATE/TRIBAL BROWNFIELD	0.5	No	0	
ORPHAN	N/A	No	9	No; none of the identified orphan sites are located in the immediate vicinity (500-feet) of the subject property, and/or based upon the distance and relative gradient, the sites are not expected to represent a significant environmental concern.
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	No	0	

DRAFT

5.2 VAPOR MIGRATION

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 INTERVIEWS

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 INTERVIEW WITH OWNER

AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall Findings of this assessment.

6.1.2 INTERVIEW WITH KEY SITE MANAGER

The key site manager, Ms. Nelly Amas, was contacted in person on September 22, 2015. Ms. Nelly Amas has been associated with the subject property since approximately 2005. Ms. Nelly Amas stated that she was unaware of the development dates of the subject property buildings but she did state that occupants have been purely residential in nature as far as she can remember. Ms. Nelly Amas was asked if she was aware of any of the following:

	Yes	No
Any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features.		✔
Any knowledge of previous environmental investigations conducted on site.		✔
Any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products.		✔
Any known plans for site redevelopment or change in site use.		✔
Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.		✔
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.		✔
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		✔
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.		✔

6.1.3 PAST OWNERS, OPERATORS, AND OCCUPANTS

In an attempt to interview past owners, operators and occupants regarding historical on-site operations, AEI requested the contact information for these entities from the current subject property key site manager, Ms. Nelly Amas. Ms. Amas was unable to provide the contact information for the past owners, operators, and occupants. Other methods of researching the contact information for past owners, operators, and occupants are performed by AEI when a data gap is encountered and/or if an item of environmental concern is identified for the subject property, which include reviewing historical agency records and/or online research. None of these additional research methods provided AEI contact information for past owners, operators, and

DRAFT

occupants. As such, interviews with past owners, operators, and occupants regarding historical on-site operations were not reasonably ascertainable.

6.1.4 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

6.3 Previous Reports and Other Provided Documentation

No prior reports or other relevant documentation in association with the subject property was made available to AEI during the course of this assessment.

DRAFT

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	September 22, 2015
AEI Site Assessor(s)	Mr. Max Martinez
Property Escort(s)/Relationship(s) to Property	Ms. Nelly Amas/Property Manager
Units/Areas Observed	Representative portions of the interiors of the three buildings on site including common areas, laundry rooms, maintenance room, and units 9, 12, 22, and 25 (11% of total units).
Area(s) not accessed and reason(s)	See above
Weather	Sunny, hot

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

Yes	No	Observation
✔		Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
	✔	Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)
	✔	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✔	Unidentified Substance Containers
✔		Electrical or Mechanical Equipment Likely to Contain Fluids
	✔	Interior Stains or Corrosion
	✔	Strong, Pungent, or Noxious Odors
	✔	Pools of Liquid
✔		Drains, Sumps, and Clarifiers
	✔	Pits, Ponds, and Lagoons
✔		Stained Soil or Pavement
	✔	Stressed Vegetation
	✔	Solid Waste Disposal or Evidence of Fill Materials
	✔	Waste Water Discharges
	✔	Wells
	✔	Septic Systems
	✔	Biomedical Wastes
✔		Other

The subject property is currently occupied by various residential tenants. On-site operations consist of residential activities.

DRAFT

REGULATED HAZARDOUS SUBSTANCES/WASTES AND/OR PETROLEUM PRODUCTS IN CONNECTION WITH PROPERTY USE

Regulated Hazardous Substances/Wastes (size/ quantity)	Location	Operations Associated with Material	Secondary Containment	Staining / Spills
Gasoline (5-gallons/1 container)	Maintenance room	Maintenance equipment fueling	No	No

No drains or other subsurface conduits were observed in this area. Based on the small quantities present, the lack of subsurface conduits and the good housekeeping observed, the presence of these materials is not expected to represent a significant environmental concern.

ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Elevators

The subject property building is equipped with a hydraulic elevator. The hydraulic fluid contained within elevator systems can potentially contain toxic PCBs. Based on the construction date of the building (pre-1978), the potential exists that hydraulic fluid within the equipment may have contained PCBs. The equipment for the elevator is located in a closet on the first floor of the eastern portion of the northern subject property building. No evidence of stains or leaks was observed at the base of the equipment during the site inspection. Based on the good condition and regular maintenance of the elevator is not expected to represent a significant environmental concern.

DRAINS, SUMPS, AND CLARIFIERS

Multiple storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

STAINED SOIL AND PAVEMENT

Minor amounts of oily surface staining were observed in the parking area. The staining appears to be from leaking vehicles and is surficial in nature. Based on the small size and the surficial nature of the staining, it is not expected to represent a significant environmental concern.

DRAFT

OTHER

The subject property is currently occupied by residential tenants. Small amounts of cleaning supplies, maintenance supplies, as well as several 1-gallon containers of paints were observed on site. No signs of inappropriate material handling were observed. Based on the nature of these materials, the presence or use of these materials at the subject property is not expected to represent a significant environmental concern.

7.2 ADJACENT PROPERTY RECONNAISSANCE FINDINGS

Yes	No	Observation
	✔	Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
	✔	Aboveground/Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)
	✔	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✔	Unidentified Substance Containers
✔		Electrical or Mechanical Equipment Likely to Contain Fluids
	✔	Strong, Pungent, or Noxious Odors
	✔	Pools of Liquid
✔		Drains, Sumps, and Clarifiers
	✔	Pits, Ponds, and Lagoons
	✔	Stained Soil or Pavement
	✔	Stressed Vegetation
	✔	Solid Waste Disposal or Evidence of Fill Materials
	✔	Waste Water Discharges
	✔	Wells
	✔	Septic Systems
	✔	Other

DRAFT

ELECTRICAL OR MECHANICAL EQUIPMENT LIKELY TO CONTAIN FLUIDS

Transformers

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Multiple pole-mounted transformers were observed on the adjacent sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

DRAINS, SUMPS, AND CLARIFIERS

Multiple storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

8.0 OTHER ENVIRONMENTAL CONSIDERATIONS

8.1 ASBESTOS-CONTAINING BUILDING MATERIALS

Asbestos is the name for a group of naturally occurring silicate minerals that are considered to be "fibrous" and through processing can be separated into smaller and smaller fibers. The fibers are strong, durable, chemical resistant, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos was considered an ideal product and has been used in thousands of consumer, industrial, maritime, automotive, scientific, and building products.

At the federal level, asbestos is primarily regulated by the USEPA primarily through the EPA's NESHAP (Standard 40 CFR Chapter 61, Subpart M), the OSHA through the General Industry Standard, and the Construction Industry Standard (29 CFR 1926.1101 and 29 CFR 1910.1001). Many states have regulations in place for the inspection, management, and remediation of asbestos including company and individual licensing requirements for all activities relating to asbestos. Under both federal and state regulations building owners and employers may be required to perform certain activities related to the in-place management of asbestos, and prior to renovations or demolition activities (i.e. asbestos inspections or remediation) that may disturb building materials suspected of containing asbestos.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state, or local regulations in regards to ACM.

Due to the age of the subject property building at 439 South 4th Street, there is a potential that ACMs are present. A limited list of typical suspect ACMs is included in the following table:

Typical Suspect ACMs

Material Type	Location
Plaster (Acoustical and Smooth)	Walls and Ceilings
Ceiling Tile	Ceiling Systems
Thermal Systems Insulations, Packings, Gaskets	Heating Systems, Cooling Systems, Domestic and Heating and Cooling Piping, Ductwork, Other Equipment
Floor Tile and Associated Mastics, Flooring Felts, Papers (under hardwood/other)	Floors
Vinyl Sheet Flooring and Adhesives	Floors
Cove Base and Associated Mastics	Walls
Ceramic Tile Adhesives and Grouts	Walls, Floors, and Ceilings
All Adhesives	Mirrors, Wall Coverings, Construction, etc.
Grout and Caulking	Windows and Doors
Gypsum Board, Tape, and Joint Compound	Wall and Ceiling Systems
Insulation Materials	Walls, Ceilings, Attic Spaces
Roofing Materials (Felts, Rolled, Shingle, Flashings, Adhesives, Tar, Insulations)	Roof and Parapet Wall Systems
Brick and Block, Mortars	Walls

DRAFT

According to the Client, demolition of the subject property buildings is planned for the near future. Regardless of building construction date, the EPA's NESHAP requires that a thorough asbestos survey be performed prior to demolition or renovation activities that may disturb ACMs. This requirement may be enforced by federal, state and local regulatory agencies, and specifies that all suspect ACMs be sampled to determine the presence or absence of asbestos prior to any renovation or demolition activities which may disturb them to prevent potential exposure to workers, building occupants, and the environment. Similarly, OSHA regulations require that specific work practices be implemented when handling construction materials and debris that contain asbestos and/or lead-containing materials.

8.2 LEAD-BASED PAINT

LBP is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

LCP is defined as any paint with any detectable amount of lead present in it. It is important to note that LCP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LCP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LCP.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the age of the subject property building at 439 South 4th Street, there is a potential that LBP is present. AEI understands that demolition activities of the subject property buildings are planned. AEI recommends that the property owner consult with a certified Lead Risk Assessor to determine options for control of possible LBP hazards. Stringent local and State regulations may apply to LBP in association with building demolition/renovations and worker/occupant protection. It should be noted that construction activities that disturb materials or paints containing any amount of lead may be subject to certain requirements of the OSHA lead standard contained in 29 CFR 1910.1025 and 1926.62.

DRAFT

8.3 RADON

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 DRINKING WATER SOURCES AND LEAD IN DRINKING WATER

The San Jose Water Company supplies potable water to the subject property. The most recent water quality report (2014) states that lead levels in samples obtained from the area's water supply were non-detect. Therefore, lead levels are well within standards established by the US EPA.

8.5 MOLD/INDOOR AIR QUALITY ISSUES

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI observed interior areas of the subject property buildings in order to identify the significant presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold, nor did AEI observe obvious indications of significant water damage. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to mold appears to be warranted at this time.

DRAFT

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems, and behind enclosed walls and ceilings, may be present on the subject property.

DRAFT

9.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Document Type: Site Screening
Date Completed: 12/27/1991
Comments: Completed Site Screening. In January 1989, additional sampling was conducted at the site. Soil boring results detected total oil and grease (TOG) and total petroleum hydrocarbons as diesel (TPHd) in excess of 1000 ppm. Lead was detected at 938 ppm. In May 1989, two groundwater monitoring wells (MW-1 and MW-2) were installed at the property. Lead was detected in groundwater at a concentration of 0.181 ppm. In May 1989, contaminated soil was removed from the previous sampled area. Final soil sample results indicated only one sample contained TOG at 780 ppm and lead at 191 ppm. The sample that contained the TOG and lead was collected beneath the foundation of the building. The excavations were backfilled with clean, imported fill.

DRAFT

Area Name:
Sub Area:
Document Type: Land Use Restriction - Site Inspection/Visit
Date Completed: 5/30/2012
Type Title: Completed Activities
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Area Name:
Sub Area:
Document Type: Land Use Restriction - Site Inspection/Visit
Date Completed: 9/30/2010
Type Title: Completed Activities
Comments: The Site is the location of a sports arena, adjacent park, and parking lot. Upon inspection, soil covered, concrete and asphalt surfaces appeared to be in good condition. There was no evidence of any activities prohibited by the Deed Restriction. No major cracks were observed on the concrete surfaces, just minor cracks.

Document URL: https://www.envirostor.dtsc.ca.gov/public/final_documents2.asp?global_id=43730007&enforcement_id=6012841

Area Name:
Sub Area:
Document Type: Site Screening for San Jose Sports Arena
Date Completed: 6/27/2003
Type Title: Completed Activities
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Document URL: https://www.envirostor.dtsc.ca.gov/public/final_documents2.asp?global_id=43730007&enforcement_id=5002394

Area Name:
Sub Area:
Document Type: Land Use Restriction
Date Completed: 5/23/2003
Type Title: Completed Activities
Comments: A Deed Restriction limiting future use of property including the material encapsulation areas which requires no disturbance of the encapsulated areas and the slurry wall. If the areas are disturbed, DTSC is to be notified, a health and safety plan prepared, the material from the encapsulation area will be handled properly, and repairs to the area will be done as quickly as possible.

DRAFT

Map Key	Number of Records	Direction/ Distance mi	Elevation ft	Site	DB

Sub Area:
Document Type: Removal Action Completion Report
Date Completed: 6/28/1991
Type Title: Completed Activities
Comments: Completion of Phase I Construction Documentation Report. Required a deed restriction to be filed. PNA contaminated soil from a former PG&E site was excavated and encapsulated into a nearby parking lot. Gasoline contaminated soil was also excavated and stockpiled on a nearby lot for vapor extraction treatment. The excavated areas were backfilled with clean soil. The volume of excavation for PNA contaminated soil was approximately 23,000 cubic yards. The volume of excavation for gasoline contaminated soil was approximately 17,000 cubic yards. Groundwater treatment was performed under San Francisco RWQCB's requirements. Current files at the RWQCB list the site closed on 06/20/97.

Document URL: https://www.envirostor.dtsc.ca.gov/public/final_documents2.asp?global_id=43730007&doc_id=5002395

Area Name:
Sub Area:
Document Type: Preliminary Endangerment Assessment Report
Date Completed: 6/20/1991
Type Title: Completed Activities
Comments: Report of Completion of Interim Remedial Measure/Removal Action (IRM/RA). Polynuclear aromatic hydrocarbons (PAHs) contaminated soil (23,000 cubic yards(CY)) resulting from a former PG&E gas manufacturing site was excavated and encapsulated into the nearby parking lots. Gasoline contaminated soil (17,000 CY) was also excavated and stockpiled nearby for vapor extraction treatment. The excavated area was backfilled with clean fill.

Area Name:	
Sub Area:	
Document Type:	Removal Action Completion Report
Date Completed:	3/1/2013
Comments:	The Report documents the removal action, which consisted of excavating soil contaminated with arsenic and total petroleum hydrocarbons in the first two feet of soil, backfilling with clean imported fill, and confirmation soil sampling. Since residual soil contamination above levels that allow for unrestricted land use remains deeper than two feet below the ground surface, the remedy includes a Land Use Covenant restricting sensitive land uses on the site and requiring a soil management plan if soil deeper than two feet is disturbed.

Appendix: Database Descriptions

Ecolog Environmental Risk Information Services Ltd (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

DRAFT

Federal

National Priority List: NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Jun 3, 2015

National Priority List - Proposed: PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Jun 3, 2015

Deleted NPL: DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Jun 3, 2015

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS- Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Mar 10, 2015

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Mar 10, 2015

DRAFT

RCRA Generator List: RCRA GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10).

Government Publication Date: Mar 10, 2015

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Mar 10, 2015

Federal Engineering Controls-ECs: FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jul 30, 2014

Federal Institutional Controls- ICs: FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Jul 30, 2014

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the The National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting all oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the The National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting all oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

DRAFT

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports controlled by the The National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting all oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jul 9, 2014

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jul 16, 2014

DRAFT

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jul 30, 2014

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Aug 14, 2015

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: May 08, 2015

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: May 19, 2015

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jul 16, 2015

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Aug 31, 2015

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: May 8, 2014

Delisted Leaking Storage Tanks: DLST

This database contains a list of leaking storage tank sites that were removed from the GeoTracker is the State Water Resources Control Board's (SWRCB) data management system.

Government Publication Date: Aug 31,2015

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Aug 6, 2014

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Jul 16, 2015

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jul 20, 2015

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Aug 11, 2014

DRAFT

GeoTracker Cleanup Sites Data: CLEANUP SITES

A list of cleanup sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Aug 31, 2015

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands: INDIAN LUST

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Aug 28, 2014

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Aug 28, 2014

County

Alameda County LOP Sites List: ALAMEDA LOP

A list of Leaking Underground Storage Tanks (LUST) facilities in Alameda County. This list is made available by Alameda County Department of Environmental Health (ACEH). ACEH implements a Local Oversight Program (LOP) under contract with the State Water Resources Control Board to provide regulatory oversight of the investigation and cleanup of soil and groundwater contamination from leaking petroleum USTs.

Government Publication Date: Aug 12, 2014

Alameda County UST List: ALAMEDA UST

A list of all registered Underground Storage Tanks (USTs) in the County of Alameda. The list is made available by Alameda County Department of Environmental Health.

Government Publication Date: Aug 12, 2014

Amador County CUPA List: AMADOR CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Amador County. This list is made available by Amador County Environmental Health Department which is the CUPA for Amador County and administers a consolidated hazardous materials program.

Government Publication Date: Mar 9, 2015

Butte County CUPA List: BUTTE CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Butte County. This list is made available by Butte County Public Health Department, Environmental Health Division which was certified by the California Environmental Protection Agency as the CUPA for Butte County.

Government Publication Date: May 28, 2015

Calaveras County CUPA Facilities List: CALAVERAS CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Calaveras. This list is made available by Calaveras County Environmental Health Department which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Jun 19, 2015

Calaveras County Landfills List: CALAVERAS LF

A list of landfills in Calaveras County. This list is made available by Calaveras County Environmental Health Department which has been designated as the CUPA for the County.

DRAFT

Government Publication Date: Jul 21, 2014

Calaveras County UST Remediation Sites: CALAVERAS LUST

A list of Leaking Underground Storage Tank (LUST) facilities in Calaveras County. This list is made available by Calaveras County Environmental Health Department. Local Implementing Agency (LIA) provides oversight of site remediation with soil contamination while CalEPA - California Regional Water Quality Control Board - Central Valley Region oversees remediation of sites with groundwater contamination.

Government Publication Date: Aug 13, 2014

Colusa County CUPA List: COLUSA CUPA

A list of facilities associated with Business Plan and Hazardous Generator programs in the County of Colusa. This list is made available by Colusa County Environmental Health which was certified by the California Environmental Protection Agency as Certified Unified Program Agency for Colusa County.

Government Publication Date: Sep 12, 2014

Contra Costa County CUPA List: CONTRACO CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Contra Costa. This list is made available by Contra Costa County which has been certified by CalEPA to implement the Unified program as a CUPA.

Government Publication Date: Jun 15, 2015

Del Norte County CUPA Facility List. DELNORTE CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Del Norte County. This list is made available by Del Norte County Environmental Health Division which is the designated CUPA for the county.

Government Publication Date: May 19, 2015

El Dorado County CUPA Facility List: ELDORADO CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in El Dorado County. This list is made available by El Dorado County Department of Environmental Management - Hazardous Waste Division which is approved by CalEPA as CUPA for El Dorado County.

Government Publication Date: Aug 20, 2014

Fresno County CUPA/Solid Waste Programs Resource List: FRESNO CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Fresno County. This list is made available by Fresno County Department of Environmental Health Division which is approved by Cal-EPA as CUPA for the County.

Government Publication Date: Apr 30, 2015

Humboldt County CUPA Facility List: HUMBOLDT CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Humboldt County. This list is made available by Humboldt County Division of Environmental Health which is approved by the State Secretary for Environmental Protection as CUPA for the County.

Government Publication Date: May 28, 2015

Imperial County CUPA Facility List: IMPERIAL CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Imperial County. This list is made available by the California Department of Toxic Substances Control (DTSC) which is appointed as CUPA for Imperial County.

Government Publication Date: Jul 14, 2014

Inyo County CUPA Facility List: INYO CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Inyo. This list is made available by the Inyo County Environmental Health Services Department which has been certified by CalEPA to implement the Unified program as a CUPA.

DRAFT

Government Publication Date: Jul 16, 2014

Kern County CUPA List: KERN CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Kern. This list is made available by Kern County Environmental Health Services Department which has been certified by CalEPA to implement the Unified program as a CUPA for Kern County.
Government Publication Date: May 19, 2015

Kern County UST List: KERN UST
A list of all registered and inactive Underground Storage Tanks in the County of Kern. The list is made available by Kern County Environmental Health Division.
Government Publication Date: May 19, 2015

Kings County CUPA Facility List: KINGS CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Kings County. This list is made available by Kings County Department of Public Health which is appointed as CUPA for the county.
Government Publication Date: May 26, 2015

Lake County CUPA Facility List: LAKE CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Lake County. This list is made available by Lake County Division of Environmental Health which is CUPA for the entire county.
Government Publication Date: Jun 9, 2015

Los Angeles County - El Segundo City Underground Storage Tanks List: ELSEGUNDO UST
A list of all registered Underground Storage Tanks (USTs) in the City of El Segundo of Los Angeles County. The list is made available by El Segundo City Fire Department.
Government Publication Date: Jul 24, 2014

Los Angeles County - Torrance City Underground Storage Tanks: TORRANCE UST
A list of registered Underground Storage Tank (UST) sites in Torrance City of Los Angeles County. This list is made available by Torrance City Office of Clerk.
Government Publication Date: May 07, 2015

Los Angeles County HMS List: LA HMS
This list contains sites that have or had permits for Industrial Waste, Underground Storage Tanks, or Strom water in the County of Los Angeles. This list is made available by the County of Los Angeles Department of Public Works.
Government Publication Date: Jun 22, 2015

Los Angeles County Long Beach UST List: LA LONGB UST
A list of all registered active Underground Storage Tanks in the City of Long Beach of Los Angeles County. The list is made available by Long Beach Certified Unified Program Agency.
Government Publication Date: Jun 18, 2015

Los Angeles County Solid Waste Sites: LA SWF
List of permitted solid waste facilities, closed landfills, historical dumpsites and other solid waste sites in Los Angeles County, made available by the Department of Public Works in Los Angeles County.
Government Publication Date: May 19, 2014

Madera County CUPA Facility List: MADERA CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Madera County. This list is made available by Madera County Environmental Health Department which is CUPA for the entire county.
Government Publication Date: Aug 1, 2014

Marin County CUPA List: MARIN CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Marin. This list is made available by Marin County which has been certified by CalEPA to implement the Unified program as a CUPA.

DRAFT

Government Publication Date: May 26, 2015

Merced County CUPA Facilities List: MERCED CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Merced. This list is made available by Merced County which has been certified by CalEPA to implement the Unified program as a CUPA for the entire county.
Government Publication Date: May 19, 2015

Mono County CUPA Facility List: MONO CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Mono County. This list is made available by Mono County Environmental Health Department which has been certified by CalEPA to implement the Unified program as a CUPA for the entire county.
Government Publication Date: Jul 15, 2014

Monterey County CUPA Facility List: MONTEREY CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Monterey County. This list is made available by Monterey County Hazardous Materials Management Services which is designated as the CUPA in Monterey County.
Government Publication Date: Jun 17, 2015

Napa County UST List: NAPA UST
A list of all registered active Underground Storage Tanks (USTs) in the County of Napa. This list is made available by Napa County Environmental Health Division.
Government Publication Date: Jul 16, 2014

Nevada County CUPA Facility List: NEVADA CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Nevada County. This list is made available by Nevada County Department of Environmental Health which is the CUPA for all cities and unincorporated areas within Nevada County.
Government Publication Date: Jul 17, 2014

Orange County Aboveground Petroleum Storage Tank Listing: ORANGE AST
A list of Aboveground Petroleum Storage Tank (APST) facilities inspected by Orange County Certified Unified Program Agency (CUPA) Under the Aboveground Petroleum Storage Act (APSA). This list is made available by the Environmental Health Division of Orange County Health Care Agency.
Government Publication Date: May 1, 2015

Orange County Underground Storage Tanks Listing: ORANGE UST
A list of registered Underground Storage Tank (UST) sites in Orange County. This list is made available by Orange County Health Care Agency (OCHCA), Environmental Health Division which oversees the underground storage tank inspection program in most of the cities of Orange County, with the exception of Anaheim, Fullerton, and Orange.
Government Publication Date: May 1, 2015

Placer County CUPA Facilities List: PLACER CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Placer County. This list is made available by Placer County Environmental Health which is designated CUPA for all areas of the county except for the City of Roseville.
Government Publication Date: Aug 7, 2014

Riverside County Local Oversight Program List: RIVERSIDE LOP
A list of Leaking Underground Storage Tank (LUST) facilities in Riverside County. This list is made available by Riverside County Department of Environmental Health. Environmental Cleanup Program provides oversight of assessments and cleanups at properties that have been, or may have been, contaminated with hazardous substances from LUSTs or releases associated with other commercial/industrial use.

DRAFT

Government Publication Date: Jun 10, 2015

Riverside County Underground Storage Tanks List: RIVERSIDE UST

A list of registered Underground Storage Tank (UST) sites in Riverside County. This list is made available by Riverside County Department of Environmental Health. The Hazardous Materials Management Branch (HMMB) regulates and oversees the inspections of constructions, repairs, upgrades, system operation and removal of UST systems.

Government Publication Date: Jun 10, 2015

Sacramento County Master Hazardous Materials Facility List: SACRAMENTO HAZ

A list of Hazardous Materials Facilities in Sacramento County. This list is made available by Sacramento County Environmental Management Department which has been designated as the Certified Unified Program Agency (CUPA) for the County.

Government Publication Date: Feb 2, 2015

Sacramento Toxic Site Cleanup List: SACRAMENTO TOX

Sacramento County Environmental Management Department (EMD)'s Toxic Site Cleanup List includes sites where unauthorized releases of potentially hazardous materials have occurred. The EMD's Site Assessment & Mitigation Program, also referred to as Toxic Site Cleanup Program, provides mandated regulatory oversight of the assessment and remediation of properties on which there has been a release of hazardous materials to soil and/or groundwater.

Government Publication Date: Feb 2, 2015

San Bernardino County CUPA List: SANBERN CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Bernardino County. This list is made available by San Bernardino County Fire Department which is the CUPA for all areas of the County except the city of Victorville.

Government Publication Date: Jun 30, 2015

San Diego County Hazardous Materials Management Division Database: SANDIEGO HAZ

A list of facilities with Unified Program Facility Permit in San Diego County. This list has been made available by County of San Diego Environmental Health.

Government Publication Date: May 25, 2015

San Diego County Site Assessment and Mitigation Investigation Sites: SANDIEGO SAM

List of sites which have undergone a Site Assessment and Mitigation investigation. This list is made available by the County of San Diego Department of Environmental Health.

Government Publication Date: Jul 14, 2014

San Diego County Solid Waste Facility List: SANDIEGO SWF

A list of open and closed Solid Waste Facilities in the County of San Diego. The list is made available by San Diego County Department of Environmental Health.

Government Publication Date: Feb 18, 2015

San Francisco County Aboveground Storage Tanks List: SANFRAN AST

A list of Aboveground Storage Tanks (ASTs) facilities inspected by San Francisco Department of Public Health's (SFDPH) Hazardous Materials and Waste Program. Aboveground storage containers or tanks include oil-filled equipment (such as hydraulic systems/reservoirs and heat transfer systems) which have a petroleum storage capacity of 55 gallons or greater.

Government Publication Date: Aug 12, 2014

San Francisco County CUPA Facilities List: SANFRAN CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Francisco County. This list is made available by San Francisco County Hazardous Materials and Waste Program which is the CUPA for all areas of the County.

Government Publication Date: Aug 8, 2014

DRAFT

San Francisco County LOP Sites: SANFRAN LOP

A list of Underground Storage Tank (UST) release sites in the County of San Francisco. This list is made available by San Francisco County Department of Public Health Environmental Health Protection Branch.

Government Publication Date: Aug 12, 2014

San Francisco County UST List: SANFRAN UST

A list of all registered Underground Storage Tanks (USTs) in the County of San Francisco. This ist is made available by San Francisco County Environmental Health Division. The Hazardous Materials and Waste Program provides regulatory oversight for the construction, operation, repair and removal of USTs in San Francisco.

Government Publication Date: Aug 12, 2014

San Joaquin County Aboveground Tank List: SANJOAQUIN AST

A list of Aboveground Storage Tanks (ASTs) inspected by San Joaquin County Environmental Health Department (SJCEHD) under Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Jun 5, 2015

San Joaquin County UST List: SANJOAQUIN UST

A list of all registered Underground Storage Tanks in the County of San Joaquin. The list is made available by San Joaquin County Environmental Health Division.

Government Publication Date: Jun 05, 2015

San Joaquin Hazardous Waste Facilities: SANJOAQUIN HW

A list of Hazardous Waste Facilities in San Joaquin County. This list is made available by San Joaquin County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Jun 5, 2015

San Mateo County CUPA Facilities List: SANMATEO CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Mateo County. This list is made available by San Mateo County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: May 28, 2015

San Mateo County LOP List: SANMATEO LOP

A list of Leaking Underground Storage Tank (LUST) facilities in San Mateo County. This list is made available by San Mateo County Environmental Health Services Division.

Government Publication Date: May 27, 2015

Santa Clara County CUPA Facilities List: SANTACLARA CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: May 26, 2015

Santa Clara Local Oversight Program Listing: SANTACLARA LO

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jul 22, 2014

Santa Cruz County CUPA Facility List: SANTACRUZ CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Cruz County. This list is made available by Santa Cruz County Environmental Health Services (EHS) Division which has been designated as the CUPA for the County.

DRAFT

Government Publication Date: May 27, 2015

San Luis Obispo County CUPA Facilities List: SANLUISOB CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in San Luis Obispo County. This list is made available by County of San Luis Obispo Environmental Health Services Division which has been designated as the CUPA for the County.
Government Publication Date: May 27, 2015

Shasta County CUPA Facility List: SHASTA CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Shasta County. This list is made available by Shasta County Environmental Health Division which has been designated as the CUPA for Shasta County by CalEPA.
Government Publication Date: Jun 12, 2015

Solano County CUPA List: SOLANO CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the County of Solano. This list is made available by Solano County Environmental Health Division which has been certified by CalEPA to implement the Unified program as a CUPA.
Government Publication Date: Aug 5, 2014

Solano County Local Oversight Program List: SOLANO LOP
A list of Leaking Underground Storage Tank (LUST) facilities in the Solano County. This list is made available by the Solano County Environmental Health Services. Since April 1993, the State Water Resources Control Board has contracted with the County of Solano to provide regulatory oversight for the cleanup of LUSTs under Local Oversight Program (LOP) contract.
Government Publication Date: Jun 19, 2014

Solano County Underground Storage Tanks List: SOLANO UST
A list of all registered Underground Storage Tanks (USTs) in the County of Solano. The list is made available by Solano County Environmental Health Services Division. There are an estimated 190 facilities throughout the county that are subject to the regulatory requirements of the UST program.
Government Publication Date: Aug 5, 2014

Sonoma County CUPA Facilities List: SONOMA CUPA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sonoma County. This list is made available by Sonoma County Hazardous Materials (HazMat) Division which has been designated as the CUPA for the County.
Government Publication Date: May 28, 2015

Sonoma County LOP Site List: SONOMA LOP
A list of Leaking Underground Storage Tank (LUST) facilities in Sonoma County. This list is made available by Sonoma County Department of Health Services. Sonoma County Local Oversight Program (LOP) oversees the investigation and cleanup of fuel releases from underground storage tanks in all areas of the County with the exception of the Cities of Santa Rosa and Healdsburg.
Government Publication Date: Apr 1, 2015

Sonoma County Petaluma City CUPA Facilities: SONOMA PETAL
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Petaluma City. This list is made available by Petaluma Fire Prevention Bureau which is the CUPA for Petaluma City in Sonoma County.
Government Publication Date: May 21, 2015

DRAFT

Sutter County CUPA List: SUTTER CUPA

A list of facilities associated with Aboveground Petroleum Storage Tank (APSA) regulation, Hazardous Materials Business Plan (HMBP) Program and Underground Storage Tank (UST) regulation of Certified Unified Program Agency (CUPA) programs in Sutter County. This list is made available by Sutter County Enviornmental Health Division which has been designated as the CUPA for the County.

Government Publication Date: May 06, 2015

Tuolumne County CUPA Facility List: TUOLUMNE CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Tuolumne County. This list is made available by Tuolumne County Environmental Health which is the CUPA for all areas of the County.

Government Publication Date: Aug 13, 2014

Ventura County CUPA Facilities List: VENTURA CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Ventura County. This list is made available by Ventura County Environmental health Division.

Government Publication Date: Apr 27, 2015

Ventura County City of Oxnard CUPA Facility List: OXNARD CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Oxnard City. This list is made available by Oxnard City Fire Department which is the CUPA for Oxnard City in Ventura County.

Government Publication Date: Jul 24, 2014

Ventura County Inactive Underground Storage Tanks Sites: VENTURA INUST

A list of inactive Underground Storage Tank (UST) sites in Ventura County. This list is made available by Ventura County Environmental Health Division.

Government Publication Date: Apr 27, 2015

Ventura County Leaking Underground Fuel Tanks - Historic: VENTURA HLUFT

A historical list of cleanup oversight of the Leaking Underground Fuel Tank (LUFT) program provided by Ventura County Environmental Health Division. All new and existing underground fuel storage tank releases are now referred to the Los Angeles Regional Water Quality Control Board.

Government Publication Date: May 31, 2008

Yolo County UST List: YOLO UST

A list of registered Underground Storage Tank (UST) sites in Yolo County. This list is made available by Yolo County Environmental Health Department which regulates the construction, operation, repair and removal of USTs throughout Yolo County.

Government Publication Date: May 25, 2015

Yuba County CUPA Facilities List: YUBA CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Yuba County. This list is made available by Yuba County Environmental Health Division which is the CUPA for all areas of the County.

Government Publication Date: May 27, 2015

City of Bakersfield CUPA List: BKRSFIELD CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in the City of Bakersfield. This list is made available by the City of Bakersfield Fire Department.

Government Publication Date: Jun 19, 2015

Additional Environmental Record Sources

Federal

DRAFT

Facility Registry Service/Facility Index: FINDS/FRS

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

Government Publication Date: Aug 16, 2014

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: 1987-2013

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Feb 24, 2015

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Feb 4, 2014

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA of the Act) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified ongressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Jun 30, 2014

DRAFT

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: 2006

State

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Aug 24, 2015

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Feb 27, 2015

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Aug 8, 2014

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Aug 18, 2014

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Tribal

No Tribal additional environmental record sources available for this State.

County

DRAFT

Los Angeles County Site Mitigation List: LA SML

A Site Mitigation List in the County of Los Angeles. The list is made available by Los Angeles County Fire Department. Site mitigation is handled by the Site Mitigation Unit (SMU) which facilitates completion of site clean-up projects of contaminated sites in an expeditious manner in all cities of the Los Angeles County except El Segundo, Glendale, Long Beach, Santa Fe Springs, and Vernon.

Government Publication Date: Jun 23, 2015

Riverside County Disclosure Facility List: RIVERSIDE HZH

A list of facilities disclosed to Riverside County Department of Environmental Health (DEH). This list is made available by Riverside County DEH which has been designated as the CUPA for the County. A business is required to establish and submit a Business Plan if the facility handles hazardous material equal to or greater than 55 gallons, 500 pounds or 200 cubic feet at any time during the year.

Government Publication Date: Jun 10, 2015

Riverside County Hazardous Waste Generator Sites List: RIVERSIDE HWG

A list of Hazardous Waste Generator Sites in the County of Riverside. This list is made available by Riverside County Department of Environmental Health which has been designated as the CUPA for the County.

Government Publication Date: Jun 10, 2015

San Joaquin County Hazardous Materials Facilities List: SANJOAQUIN HM

A list of Hazardous Materials Facilities in San Joaquin County. This list is made available by San Joaquin County Environmental Health Department which has been designated as the CUPA for the County.

Government Publication Date: Jun 05, 2015

Ventura County Inactive Hazardous Waste Sites: HW INACTIVE

A list of Inactive Hazardous Waste Sites in Ventura County collected by Ventura County's Environmental Health Division.

Government Publication Date: Jun 26, 2015

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: June, 2015

DRAFT

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries". All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and were included as reference.

Response to Records Request #091515G

Duenas, Raquel <raquel.duenas@deh.sccgov.org> Wed, Sep 16, 2015 at 4:03 PM
To: "MMARTINEZ@AEICONSULTANTS.COM" <MMARTINEZ@aeiconsultants.com>

Good afternoon,

Thank you for your recent record request received on 9/15/15 for the following addresses in San Jose:

439 – 451 S 4th St

We have no records for these locations. However, additional electronic documents may be found on the following websites:

Local Oversight Program (LOP) website at http://lustop.sccgov.org/

GEOTracker (GT) website at https://geotracker.waterboards.ca.gov/default.asp

Please be advised that in some cities, other participating agencies may be responsible for maintaining the type of files you requested. This link may be of assistance in determining who will have the documents you are looking for in the future:

UNIDOCS – Who regulates what in Santa Clara County

Subject: Well Location Request

Good afternoon Barbara,

I would like to know if there are any registered wells located at APNs 467-47-058 and/or 467-47-96.

Thanks,

Max Martinez <mmartinez@aeiconsultants.com>

Public Records Request Number. 2015-09-0194

publicrecords@baaqmd.gov <publicrecords@baaqmd.gov> Wed, Sep 16, 2015 at 4:19 PM
To: mmartinez@aeiconsultants.com

Dear Max Martinez:

We have received your public records request of 9/16/2015 4:19:24 PM PST. We have assigned 2015-09-0194 as your Request Number in order to track your request. You requested the following:

Facility Information
Facility Name: no name
Facility Street: 439 & 451 South 4th Street
Facility City: San Jose
Facility State: CA
Facility Zipcode: 95112
Period Covered: all

Print Outs Requested

Other Requests: Not Recorded

Within 10 days we will determine whether you have requested disclosable records. If we need more time to make that determination, we will let you know within 10 days. If your request is unclear we will also contact you within the 10 days.

If you have requested disclosable records, and your request is simple, we may respond within 10 days by providingyou with the records requested or with our finding tht we have no records. If you have requested disclosable records and your request is more complicated, we will notify you promptly of our determination and provide your with our estimate of when the records will be made available.

If you have requested records that are exempt from disclosure, we will explain why the records are being withheld.

You can follow our progress in responding to your request by using the PRA Login webpage.

Sincerely,
Rochelle Henderson Reed
Public Records Section

San Jose Water Company

2014 ANNUAL WATER QUALITY REPORT

Proudly serving you since 1866

How the Drought Impacts Water Quality

As San Jose Water Company (SJWC) approaches its 150th anniversary of providing high quality water to its customers, California is in its fourth year of a drought. The changing water supplies available during the drought present new challenges to maintaining water quality and require the company to make adjustments in the operation of its water system. These adjustments include more frequent monitoring of the distribution system, mitigating disinfection byproducts, and boosting of disinfectant residuals where needed.

As a result of SJWC's participation in the Distribution Partnership for Safe Water Program, we are well prepared to respond. Our response includes the adoption of goals and the implementation of programs that improve overall system reliability and operational flexibility resulting in exceptional customer service.

To ensure safe disinfectant residuals, SJWC is going above and beyond what is required by collecting and analyzing over 800 samples monthly throughout its distribution system. This additional effort provides a timely and accurate representation of the disinfection residuals, nitrite, and ammonia in the water supply. It also allows SJWC to detect small changes in water quality that allow SJWC to carefully manage operations to ensure that water quality is continuously maintained. Other efforts undertaken by SJWC to maintain water quality include:

- Installing automated disinfectant boosting devices at remote sites in the distribution system
- Performing studies to optimize the cleaning methods and frequency of cleaning of its tanks
- Deploying a zero waste water main flushing system
- Enhancing the maintenance of its watershed while protecting the environment
- Employing a Trihalomethanes Reduction System at a key water supply reservoir

Together, these initiatives ensure that SJWC will continue to be an industry leader in managing and providing water that not only meets but also surpasses all water quality regulatory requirements.

As the drought continues to impact the traditional supplies of water available for treatment and distribution, customers may notice changes in the water that include higher mineral content and a more pronounced chlorine or metallic taste. While noticeable, these changes are aesthetic in nature and do not represent a health risk. The water remains safe for all uses and meets all Federal and State regulatory requirements.

SJWC remains committed to ensuring high quality water is delivered to its customers and will continue to pursue continuous improvements in the ways we manage this precious commodity.

DRAFT

Water Quality Guidance

Source Water Assessment

An assessment of the drinking water sources for SJWC's water system was completed in December 2002. SJWC's wells are considered most vulnerable to one or more of the following activities, which have not been associated with any contaminants detected in the water supply: dry cleaners, automobile gas stations and repair shops, and underground storage tanks. Some of SJWC's wells are also considered vulnerable to metal plating and finishing, photo processing/printing, electrical/electronics manufacturing, chemical/petroleum processing/storage, known contaminant plumes, and plastics/synthetics producers. SJWC's surface supplies are considered most vulnerable to low density septic systems. Imported surface water purchased from Santa Clara Valley Water District (SCVWD) is considered most vulnerable to a variety of land use practices, such as agricultural and urban runoff, recreational activities, livestock grazing, as well as residential and industrial development. In addition, local sources are vulnerable to potential contamination from commercial stables and historic mining practices. Although these activities exist in areas near one or more of SJWC's or SCVWD's sources, physical barriers, treatment systems, and monitoring programs are in place to ensure that water supplied to our customers is not adversely affected. Customers seeking additional information may view a copy of the assessment during normal business hours at SJWC's offices at 110 West Taylor Street, San Jose.

Special Populations

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, persons with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. USEPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline at 1-800-426-4791. Additional information is available from the California Department of Public Health (CDPH) Division of Communicable Disease Control at (510) 540-2566 or the Santa Clara County Department of Environmental Health at (408) 918-3400.

Drinking Water Regulation

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA's Safe Drinking Water Hotline at 1-800-426-4791. The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides, that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, that are by-products of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.
- Radioactive contaminants, that can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency (USEPA) and the California Department of Public Health (Department) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. Department regulations also establish limits for contaminants in bottled water that must provide the same protection for public health.

Turbidity

Turbidity is a measure of cloudiness in the water. We monitor it because it is a good indicator of the effectiveness of our filtration system.

Nitrate

Nitrate in drinking water at levels above 45 mg/L is a health risk for infants of less than six months of age. Such nitrate levels in drinking water can interfere with the capacity of the infant's blood to carry oxygen, resulting in a serious illness; symptoms include shortness of breath and blueness of the skin. Nitrate levels above 45 mg/L may also affect the ability of the blood to carry oxygen in other individuals, such as pregnant women and those with certain specific enzyme deficiencies. If you are caring for an infant, or you are pregnant, you should ask advice from your health care provider. Nitrate levels in SJWC water sources are shown in the enclosed table. In 2014, SJWC did not detect nitrate at or above 45 mg/L in any sources.

Fluoride

For information on fluoride in your drinking water please visit our website at www.sjwater.com

DRAFT

2014 SJWC Annual Water Quality Report

SJWC tests your water supplies for over 200 possible contaminants. Only those contaminants that were detected in any of our water sources appear in this table. Primary standards relate to public health, while secondary standards relate to aesthetic qualities such as taste, odor, and color. CDPH allows us to monitor for some contaminants less than once per year because the concentrations do not change frequently. Some of the data reported, although representative, are more than one year old. Data for radionuclides, microbiological, turbidity, secondary standards, and inorganic and organic chemicals are all from testing performed in 2014.

Primary Standards — Mandatory Health-Related Standards

PARAMETER	UNITS	MCL	PHG or (MCLG)	GROUNDWATER AVERAGE	GROUNDWATER RANGE	IMPORTED SURFACE WATER AVERAGE	IMPORTED SURFACE WATER RANGE	MOUNTAIN SURFACE WATER AVERAGE	MOUNTAIN SURFACE WATER RANGE	TYPICAL SOURCES*
INORGANIC MATERIALS										
Aluminum	ppm	1	0.6	ND	ND - 0.16	ND	ND - 0.85	ND	ND - 0.17	1,4
Barium	ppm	1	2	0.10	ND - 0.30	ND	ND	ND	ND	8, 10
Chromium	ppb	50	(100)	0.35	ND - 11	ND	ND	ND	ND	1
Fluoride	ppm	2	1	ND	ND - 0.17	ND	ND - 0.10	ND	ND	1
Hexavalent Chromium	ppb	10	0.02	1.92	ND - 3.1	ND	ND	ND	ND	8, 10
Nitrate (as NO_3)	ppm	45	45	13	2.3 - 31	ND	ND - 5.0	2.0	ND - 7.0	1, 2
RADIONUCLIDES										
Gross Alpha Activity	pCi/L	15	15	1.7	ND - 6.1	ND	ND	ND	ND - 0.09	1
Combined Radium	pCi/L	5	0	0.24	ND - 0.94	ND	ND	ND	ND	1
VOLATILE ORGANIC CHEMICALS										
1,1- Dichlorethylene	ppb	6	10	ND	ND -0.76	ND	ND	ND	ND	7
1,1,1-Trichlorethane	ppb	200	1000	ND	ND - 1.6	ND	ND	ND	ND	8
CLARITY						**LEVEL FOUND**		**LEVEL FOUND**		
Turbidity	NTU	TT = 1 NTU	none	NA		0.21		0.22		11
	NTU	TT= 95% of samples ≤ 0.3 NTU	none	NA		100%		100%		
MICROBIOLOGICAL				**SJWC DISTRIBUTION SYSTEM**						
				RANGE		**HIGHEST LEVEL DETECTED**				
Coliform Bacteria	%	> 5% positive of monthly samples	(0)	0 - 0.27%		0.27%				10
				UNTREATED IMPORTED SURFACE WATER						
				AVERAGE		**RANGE**				
Cryptosporidium	L	TT	(0)	ND		ND - 0.1				11
LEAD AND COPPER		AL	PHG	**SJWC AT THE TAP SAMPLING (2014)**						
				90th PERCENTILE LEVEL		**# OF SITES ABOVE AL**				
Lead	ppb	15	0.2	4.5		0 of 51				1, 14
Copper	ppm	1.3	0.3	0.46		0 of 51				1, 14
DISINFECTION BYPRODUCTS		MCL	MCLG	**COMPLIANCE LEVEL**		**RANGE**				
Total Trihalomethanes	ppb	80	none	62.3		1.4 - 100.6				9
Haloacetic Acids	ppb	60	none	44.6		0.0 - 66.1				9
DISINFECTION		MRDL	MRDLG	**SJWC DISTRIBUTION SYSTEM RUNNING ANNUAL AVERAGE**						
Total Chlorine	ppm	4.0 as Cl_2	4 as Cl_2	0.84 ppm						

DRAFT

Secondary Standards — Aesthetic Standards

PARAMETER	UNITS	MCL	PHG or MCLG	GROUNDWATER AVERAGE	GROUNDWATER RANGE	IMPORTED SURFACE WATER AVERAGE	IMPORTED SURFACE WATER RANGE	MOUNTAIN SURFACE WATER AVERAGE**	MOUNTAIN SURFACE WATER RANGE	TYPICAL SOURCES*
Color	Units	15	none	ND	ND - 5	ND	ND	ND	ND	11,12
Odor—Threshold	TON	3	none	ND	ND - 2	1	1 - 2	ND	ND	12
Hardness(as $CaCO_3$)	ppm	none	none	307	172 - 506	141	109 -178	162	162 - 162	1
Chloride	ppm	500	none	47	21 - 81	100	69 - 167	32	32 - 32	3, 6
Iron	ppb	300	none	ND	ND - 230	ND	ND	ND	ND	3, 5
Manganese	ppb	50	none	ND	ND - 33	ND	ND	ND	ND	3
Sodium	ppm	none	none	33	15-73	53	ND - 121	25	25 - 25	1
Sulfate	ppm	500	none	57	34 -86	63	50.7- 112	47	47 - 47	3, 5
Total Dissolved Solids	ppm	1000	none	460	270 - 780	387	312 - 540	300	300 - 300	3
Conductivity	umho/cm	1600	none	703	460 - 1000	694	552 - 964	500	500 - 500	6, 13

Typical Sources of Chemical Constituents

1. Erosion of natural deposits 2. Runoff and leaching from fertilizer use 3. Runoff and leaching of natural deposits 4. Residue from some surface water treatment processes 5. Industrial waste 6. Seawater influence 7. Discharge from industrial chemical factories 8. Discharge from metal degreasing sites and other factories 9. By-product of drinking water disinfection 10. Naturally present in the environment 11. Soil erosion and stream sediments 12. Naturally occurring organic materials 13. Substances that form ions when in water 14. Internal corrosion of household plumbing systems

**Single measurement performed in 2014

Unregulated Contaminant Monitoring Rule 3

PARAMETER	UNITS	GROUNDWATER		IMPORTED SURFACE WATER		MOUNTAIN SURFACE WATER	
		AVERAGE	RANGE	AVERAGE	RANGE	AVERAGE	RANGE
1,4-Dioxane	ppb	ND	ND - 0.12	ND	ND	ND	ND
Chlorodifluoromethane	ppb	ND	ND - 0.12	ND	ND	ND	ND
Chromium VI	ppb	1.1	0.37 - 1.7	ND	ND	0.46	0.38 - 0.54
Molybdenum	ppb	1.0	1.0 - 1.0	ND	ND - 2.0	ND	ND
Strontium	ppb	432	300 - 480	ND	ND	205	150 - 280
Vanadium	ppb	2.4	2.0 - 3.3	ND	ND - 4.0	1.5	1.4 - 1.6

Unregulated contaminants do not have a drinking water standard set by USEPA. The purpose of monitoring for these contaminants is to help EPA decide whether the contaminants should have a standard.

DRAFT

Important Definitions

Public Health Goal (PHG): The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs are set by the U.S. Environmental Protection Agency.

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.

Maximum Residual Disinfectant Level (MRDL): The level of a disinfectant added for water treatment that may not be exceeded at consumer's tap.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Primary Drinking Water Standard (PDWS): MCLs and MRDLs for contaminants that affect health along with their monitoring and reporting requirements, and water treatment requirements.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

Regulatory Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

One part per million (ppm): is the same as one milligram per liter (mg/L). One ppm corresponds to a single penny in $10,000 or one minute in two years.

One part per billion (ppb): is the same as one microgram per liter (ug/L). One ppb corresponds to a single penny in $10,000,000 or one minute in two thousand years.

Detection Limit for Purposes of Reporting (DLR): The lowest level of a constituent that the Department of Public Health requires to be reported.

Nephelometric Turbidity Units (NTU): This is a measure of the cloudiness of the water.

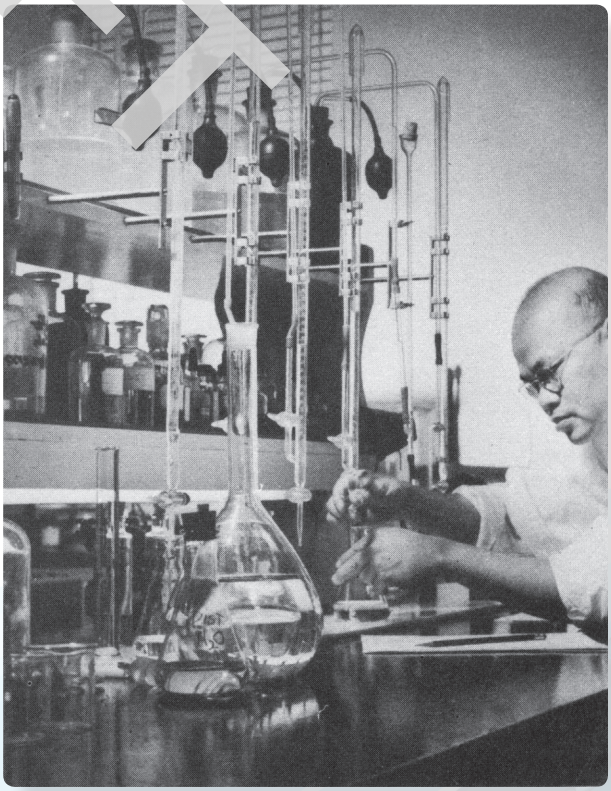

Not Detected (ND): If a constituent is not measured at or above a DLR, it is reported as ND.

Not Analyzed (NA): Source designated non-vulnerable or testing not required.

TON: Threshold Odor Number, a measure of odor.

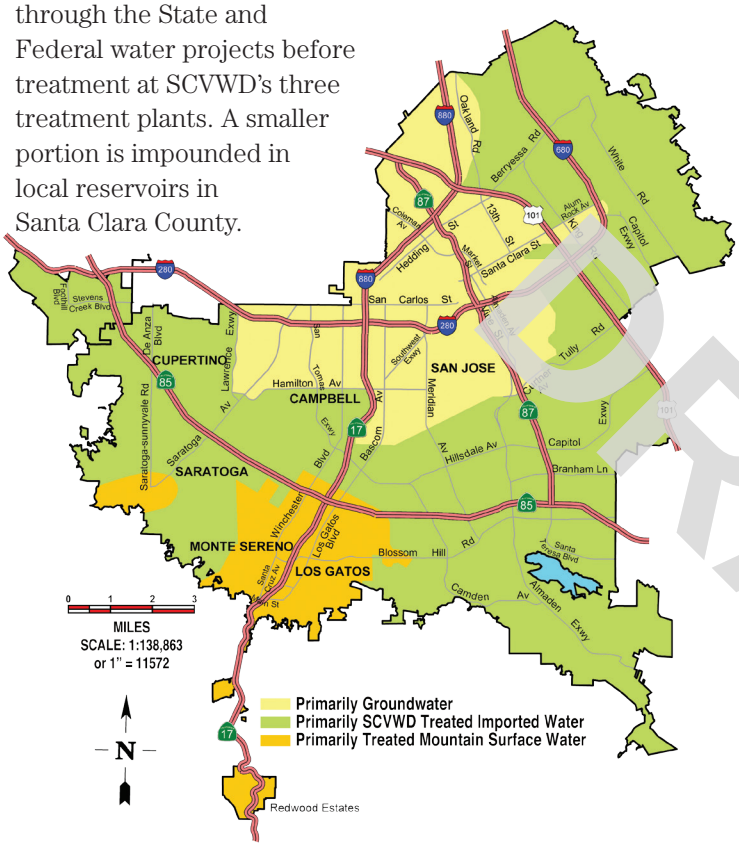

umho/cm: micromho per centimeter, a measure of electrical conductivity.

pCi/L: picocuries per liter, a measure of radioactivity

SJWC Service Area and Water Supply Sources

SJWC provides water from three major sources. The first source is groundwater, which is pumped from over 100 wells that draw water from the Santa Clara Groundwater Subbasin. The second source is local mountain surface water, which is collected in our watershed in the Santa Cruz Mountains and treated at our two treatment plants. The third source, imported surface water, is provided by the Santa Clara Valley Water District (SCVWD), our wholesale supplier. A majority of imported water originates as Sierra snowmelt and travels through the State and Federal water projects before treatment at SCVWD's three treatment plants. A smaller portion is impounded in local reservoirs in Santa Clara County.

Reminder for Dialysis Patients and Aquarium Owners

Chloramine and chlorine may be present in the water provided by SJWC. These chemicals are used to protect public health by destroying disease-causing organisms. Except for a slight chlorinous taste or odor, these disinfectants will not cause any problems for the general public. However, home dialysis patients and aquarium owners must take special precautions before the water can be used in kidney dialysis machines or aquariums. Please consult your doctor or dialysis technician to be sure your home equipment is adequate and proper tests are being performed every time it is used. Before filling an aquarium or fish pond, the disinfectant must be removed. Your local tropical fish store can help determine the best water treatment for your fish.

Your drinking water is continually tested to ensure compliance with state and federal standards for quality and safety. This annual report summarizes the results of more than 17,000 water quality tests conducted throughout the year. If you have any questions about your water quality, service, or the information contained in this report, please call us at (408) 279-7900 during normal business hours (Monday through Friday between 8:00 a.m. and 5:30 p.m.). Or, you may contact the USEPA Safe Drinking Water Hotline at 1-800-426-4791 for additional public information about the SafeDrinking Water Act or USEPA's drinking water regulatory programs.

United States Environmental Protection Agency:

http://water.epa.gov/drink/

This brochure provides a snapshot of last year's water quality data for SJWC. Included are details about where your water comes from and how your water quality compares to State standards. As you can see, in 2014, as in years past, your tap water met all USEPA and State primary drinking water health standards.

QUALIFICATIONS

DRAFT

Max Martinez – Project Manager, Due Diligence Services

B.S. Environmental Studies, University of Southern California
LEED Green Associate

Mr. Martinez has one year of experience in the environmental field. His past experience includes indoor environmental inspection and testing for various commercial and residential properties as well as working on sustainability planning for multifamily developments.

Project experience for Mr. Martinez includes:

- Phase I Environmental Site Assessments
- Regulatory Database Reviews
- Historical Records Review
- Environmental Transaction Screens

Prior to joining AEI, Mr. Martinez assisted professors at the University of Southern California with research of anthropogenic impacts to coral reefs and with the monitoring of impacted sites. He also worked as a sustainable development intern while receiving his undergraduate degree. His education includes course material regarding environmental laws and regulations, sustainable development, natural sciences, as well as natural resource management.

DRAFT

Katie Hindt – Client Manager

B.A. – Environmental Studies, University of California, Santa Cruz

Registered Environmental Property Assessor (REPA)

Ms. Hindt has over eight years of experience in the environmental service industry and provides project management to ensure ASTM compliance and satisfaction of client requirements for Phase 1 Environmental Site Assessments, Environmental Transaction Screens, Environmental Transaction Analyses, Records Research with Risk Assessments, Regulatory Database Reviews and Historical Records Reviews. She has completed assessments on a variety of residential, agricultural, commercial and industrial sites. Ms. Hindt is familiar with all aspects of Due Diligence Property Assessments and the requirements of many reporting standards including, ASTM, AAI, HUD and client-specific formats.

Project experience for Ms. Hindt includes:

- Phase 1 Environmental Site Assessments (Phase 1 ESA)
- Environmental Transaction Screens (ETS)
- Environmental Transaction Analyses (ETA)
- Records Search with Risk Assessment (RSRA)
- Regulatory Database Reviews
- Historical Records Reviews
- Project Coordination and Setup

As a Client Manager, Ms. Hindt provides senior author services and client management. Additional responsibilities include managing projects and staff mentorship.

In addition, prior to joining the environmental service industry, Ms. Hindt spent four years studying a broad range of environmental disciplines including: National environmental law, policy and economics, restoration ecology, California environmental history and California freshwater policy/issues.

PRE-SURVEY QUESTIONNAIRE (Environmental)

Instructions: Please complete the following questionnaire to the best of your knowledge.

SITE INFORMATION			
Street Address(es)/Location: 439 & 451 South 4th Street			
City: San Jose	County:	State: CA	Zip: 95112
Parcel Number(s): 467-47-096 & 467-47-058			
Contact	**Name**	**Phone Number**	**Yrs. Associated w/Site**
Owner:	Nelly Ames	408-993-9268	
Site Contact:	Nelly Ames		
Key Site Manager:	Nelly Ames		
Previous Owners, Operators and/or Occupants:			

PROPERTY USE AND SPECIFICATIONS	
☐ Residential ☐ Office/Retail ☐ Industrial ☐ Vacant Land ☐ Agricultural ☒ Other: Apartment_____	
Provide all known current/former addresses and/or parcel numbers: 467-47-096 & 467-47-058	
Are there any plans for site redevelopment or change in use? ☐ No ☒ Yes If yes, describe: New 24 stories multifamily residential building with 210 units	
Total Property Size (acres):.52	Electricity Provider: pg and e
Number of Buildings: 2	Heating System Fuel Source(s): gas
Building Size(s) (SF):	Gas Provider: water heater
Original Construction Date(s):	Cooling System Power Source: none
Date(s) of Renovation(s):	Potable Water Source/Provider: city
Number of vacant units: 21	Sanitary Sewer Provider: city
Any waste water discharge at the site? ☐ Septic Tank/Leachfield ☐ Sanitary Sewer ☐ Other ☐ None	

PROPERTY HISTORY		
Current and Previous Occupant(s)	**Years of occupancy**	**Brief description of on-site operations**

Has the subject site ever been occupied by the following? no
☐ Dry Cleaner ☐ Gas Station ☐ Printing Facility ☐ Manufacturing Facility
If yes, provide years of occupancy:

Have any previous investigations been performed at the subject property? ☒ No ☐ Yes
If Yes, are copies available? ☐ No ☐ Yes
If Yes, what type: ☐ Phase I ESA ☐ Phase II ☐ Asbestos Survey ☐ Lead Paint Survey ☐ Radon Sampling
☐ Other: _____

ON-SITE ENVIRONMENTAL CONDITIONS			
Are you aware of any of the following environmental conditions, **either current or former**, on the subject site?			
Environmental Condition / Issue	**Response**	**Environmental Condition / Issue**	**Response**
Aboveground Storage Tanks (ASTs)	☒ No ☐ Yes	Polychlorinated Biphenyls (PCBs)	☒ No ☐ Yes
Underground Storage Tanks (USTs)	☒ No ☐ Yes	Electrical Transformers	☒ No ☐ Yes
Hazardous/Toxic Substances/Chemicals	☒ No ☐ Yes	Hydraulic Lifts	☒ No ☐ Yes
Chemical Spills/Releases	☒ No ☐ Yes	Elevators	☐ No ☒ Yes
Dump Areas/Landfills	☒ No ☐ Yes	Asbestos	☒ No ☐ Yes
Waste Treatment Systems	☒ No ☐ Yes	Lead-Based Paint	☒ No ☐ Yes
Wastewater Discharges	☒ No ☐ Yes	Oil/Gas Wells	☒ No ☐ Yes
Floor Drains, Sumps, Clarifiers/Oil Water Separators	☒ No ☐ Yes	Flooding, Leaks, Other Water Intrusion	☒ No ☐ Yes
Pits, Ponds, Lagoons	☒ No ☐ Yes	Environmental Permits	☒ No ☐ Yes
Stained Soil, Stressed Vegetation	☒ No ☐ Yes	Environmental Cleanups	☒ No ☐ Yes
Pesticide/Herbicide Use	☒ No ☐ Yes	Water Damage, Mold	☒ No ☐ Yes

OTHER ENVIRONMENTAL CONDITIONS

Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? ☒ No ☐ Yes If yes, provide brief explanation.

Are you aware of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? ☒ No ☐ Yes If yes, provide brief explanation.

Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? ☐ No ☐ Yes If yes, provide brief explanation.

SIGNATURE INFORMATION

Person completing questionnaire: NELLY AMAS

Title/Affiliation to property: OWNER

Number of years associated with property: 2005

Date: I./10/2022

SITE VISIT INFORMATION

- A person knowledgeable of current property use/business operations should be present during the site visit.
- Access to a percentage of units should be provided as requested by the field professional.
- Access to the following areas should be provided: all common areas, storage areas, and utility areas; all underground features and chemical storage/disposal areas.
- The following documentation should be provided for review if applicable: all hazardous waste manifests, environmental permits, and any previous environmental reports.

QUALIFICATIONS

DRAFT

Christopher Olsen – Associate Consultant

Education:

BA Environmental Studies, UC Santa Barbara
MBA Santa Clara University, Leavey School of Business

Training/Licenses/Registrations:

AHERA, Asbestos Building Inspector

Summary of Professional Experience:

Mr. Olsen has had experience in the environmental consulting, property disclosure, and real estate due diligence industry since 1994. Mr. Olsen has performed several thousand Phase I Environmental Site Assessments (ESAs) including Fannie Mae, Freddie Mac, HUD and FDIC scopes of work. Mr. Olsen has performed asbestos, lead-based paint, radon, and mold sampling on hundreds of Phase I ESA projects. He has completed Phase I ESA projects on all property types, including heavy and light industrial, commercial office and retail, hospitality, multifamily, mobile home parks, hospital and skilled nursing facilities, resort properties, automotive service facilities, and waste processing facilities. Mr. Olsen has several years' experience reviewing Phase I ESA reports, and conducing "desk reviews" of Phase I ESAs as a third-party reviewer. Mr. Olsen has completed approximately 50 Property Condition Assessments.

Select project experience for Mr. Olsen includes:

- **Oakridge Shopping Center, San Jose, CA** - This 1.14M SF shopping center was constructed in 1971. HRECs were identified in connection with a former auto service facility which was on site. Mr. Olsen recommended an ACM O&M plan.
- **Garaventa Transfer Station, Pittsburg, CA** - This 11.05-acre site is a recycling and solid waste transfer station. RECs were identified, and an ACM O&M plan was recommended as well as continued groundwater monitoring and remediation per RWQCB requirements.
- **Embassy Suites, South Lake Tahoe, CA** - Embassy Suites is a resort hotel. No RECs were identified; however, Mr. Olsen recommended an ACM O&M plan.
- **Durkee Industrial Facility, Richmond, CA** - This 6.32-acre commercial/industrial property was found to have multiple RECs due to historic industrial uses. Groundwater contamination was reported. Mr. Olsen recommended continued groundwater monitoring and remediation per RWQCB requirements.
- **Office Tower, 100 Van Ness Ave, San Francisco, CA** - This 29-story office tower constructed in 1973 was undergoing a complete interior renovation for conversion to residential use. Several RECs were identified due to the operation of vaulted tanks without permits or tank testing documentation.
- **Mixed-use Property, Oakland, CA** - This 2.45-acre site consisted of ten office and retail buildings constructed between 1868 and 1881. RECs were identified in connection with undocumented former onsite contaminated soil removal. Additionally, an adjacent open SLIC case (groundwater contamination) was reported.
- **Portfolio of five multifamily residential facilities, San Francisco, CA** - No RECs were found while reviewing this portfolio of multifamily residential properties in San Francisco. Mr. Olsen recommended both ACM and LBP O&M plans for these properties.

DRAFT

Megan Salcido – Senior Project Manager, Due Diligence

BA- Environmental Studies, Brown University, Providence, RI

EPA Accredited Asbestos Building Inspector

Mrs. Salcido has worked the environmental service industry since 2014. She provides senior project management and project review to ensure ASTM compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Environmental Transaction Screens, Regulatory Database Reviews, and Historical Records Reviews.

Project experience for Mrs. Salcido includes:

- Phase I Environmental Site Assessments
- Limited Environmental Site Assessments
- Environmental Transaction Screens
- Historical Records Review
- Records Research with Risk Assessments
- Regulatory Database Reviews
- ACM, Radon, LBP, and drinking water sampling

In addition, prior to joining the environmental consulting industry, Mrs. Salcido spent four years studying a diverse range of environmental disciplines including: environmental health, coastal ecology and conservation, environmental statistics, ecology, conservation biology, environmental law and policy, and science communications.
