The subject property is described as the Fox Hills Plaza having street addresses of 6201-6299 Bristol Parkway in Culver City, California. Also, the site is identified by three Los Angeles County Assessor's Parcel Numbers (APNs)[1] of 4134-018-004 (0.79-ac), -005 (5.73-ac), and -006 (0.52-ac). In addition, the site is within a small portion of the South Half of the Northwest Quarter of Section 19; Township 2 South, Range 14 West of the San Bernardino Base & Meridian System (SBB&M). The subject 7.04-acre development is bordered to the north by Green Valley Circle, to the east by Bristol Parkway, and to the west and south by hotels.

The current property owner is identified as:

Bristol Parkway Investors, LLC
5862 West 3rd Street
Los Angeles, CA 90036

6.2 Current Use of the Property

The subject property is developed with a shopping center described as the Fox Hills Plaza. The shopping center includes numerous commercial tenant spaces that have been occupied by a mixture of commercial, retail, professional services, and food service tenants; the majority of the tenant spaces are currently vacant.

6.3 Past Uses of the Property

The subject property consisted of undeveloped native ground prior to 1923. By 1928, the subject property was part of the Fox Hills Golf Course; the golf course operated into the 1960s and then closed shortly after Fox Hills was annexed in 1964. According to a review of building permits, the property was proposed for commercial development by the early 1970s and a site plan review was completed in 1972. Two buildings were constructed during 1974 by the owner at the time, Ramada Inns, Inc./Ramada Development Company.

The larger building along the west boundary has been occupied by various commercial, retail, professional services, and food service tenants since development including a Marshalls department store at 6221 Bristol Parkway from the early 1990s until 2020, a dry cleaner (Fox Hills Plaza Cleaners) at 6223 Bristol Parkway from 1975 to 2021, a photo processing shop (Photo Fast) at 6247 Bristol Parkway from the early 1990s to 2004, California Roll & Sushi restaurant at 6251

Bristol Parkway from the early 2000s until 2023, Quiznos Sub restaurant at 6257 Bristol Parkway from approximately 2005 until 2023, Mandarin Dish restaurant at 6271 Brisol Parkway from the early-1990s until around 2020, a dentist office at 6281 Bristol Parkway from at least 1980 until around 2014, a liquor store (Regal Liquors) at 6295 Bristol Parkway from 1975 to around 2014, and CVS Pharmacy at 6299 Bristol Parkway from the early 1990s until 2022.

The building at 6201 Bristol Parkway in the northeast portion of the property was originally a two-story structure occupied by Bank of America and then during 1986, it was converted to a medical facility/urgent care (Centinela Medical Center) in 1986. During 2013, the building was demolished and Chase Bank constructed a new one-story building in its place which still exists today; however, the building has been vacant since approximately 2020.

6.4 Current and Past Uses of Adjoining Properties

Adjoining properties primarily consisted of undeveloped native ground with some agricultural production of irrigated row/cover crops during the early 1920s. By 1928, the immediately adjoining properties were part of the Fox Hills Golf Course along with the subject property. Commercial development commenced to the north and west as early as 1947 and the Hillside Memorial Park Cemetery was also developed to the southeast by this time. By 1977, the eastern adjoining apartment complex was developed, the Westfield Shopping Mall had been constructed to the north, and hotels had been developed to the west and south of the subject property.

North: Green Valley Circle borders the property to the north followed by the Westfield Shopping Mall and a social services building (Westside Regional Center).

South: The southern adjoining property is the Courtyard by Marriott Hotel.

East: Bristol Parkway adjoins the property to the east followed by the Parkway Plaza Apartments.

West: The western adjoining property is the Four Points by Sheraton Hotel.

7.0 SITE AND VICINITY CHARACTERISTICS

7.1 Physiographic Setting

The subject property is in Culver City, California and approximately 0.5-miles west of the Baldwin Hills within the southwest portion of Los Angeles County. The Baldwin Hills represent a surface expression of the Newport/Inglewood Fault, formed over the past several million years. West of the Baldwin Hills, the Ballona Escarpment, created over time by erosional activity of Ballona Creek which generally forms the southern edge of the Ballona Creek Watershed. (Los Angeles County Public Works, Ballona Creek Watershed Management Plan, 2004)

The subject property is within the Coastal Plain of Los Angeles County. The Coastal Plain is generally of mild slope and contains relatively few depressions or natural ponding areas. The slopes of main river systems crossing the Coastal Plain, such as the San Gabriel River, Los Angeles River, and Ballona Creek, range from 4 to 14 feet per mile. The groundwater basins in the Coastal Plain are divided by geological features into the Central (includes the Montebello and Los Angeles Forebays), West Coast, Santa Monica, and Hollywood Basins. The subject property is within the West Coast Basin which is the second largest basin underlying the Coastal Plain. (Los Angeles County Public Works, Hydrologic Report, 2022-2023).

The nearest body of surface water is the concrete-lined, westward flowing Centinela Creek, located approximately 300 feet southwest of the subject property. Groundwater was encountered at the subject property during a 2022 Phase II investigation (Roux Associates, Inc.) at approximately 60’

• ENVIRONMENTAL CONCEPTS WITH DESIGN IN MIND •
220 E. TRUXTUN AVENUE BAKERSFIELD, CA 93305 661/395-1646 FAX 661/395-1616

below ground surface (bgs). AEC's recent sampling of MW-1 and MW-2 on September 4, 2024 and subsequent sampling of October 14, 2024 indicated a depth to water of around 52' to 53' bgs. Also, prior reports prepared by AEI Consultants during 2007 describe groundwater flow direction beneath the site to be toward the west-southwest. However, according to a Site Conceptual Model/Closure Request prepared by Blaes Environmental dated October 27, 2017 at the nearby Mobil service station (6100 Sepulveda Boulevard), "groundwater flow direction has historically been to the southeast with a nearly flat horizontal gradient; however, in the recent years, the flow direction had been changing to north, northeast (2014 -2017)". The latest Groundwater Monitoring Report prepared for the Mobil service station prior to case closure is dated May 7, 2018; this report calculated flow direction to the northwest.

The subject property has an average elevation of 62-feet above mean sea level with a topographic gradient to the west.[2]

8.0 SITE DESCRIPTION AND INSPECTION

An inspection of the Property and reconnaissance of the surrounding area was conducted on September 4, 2024 by Jonathan Buck, Principal Geologist, of Advanced Environmental Concepts (AEC). The subject property is developed with a shopping center described as Fox Hills Plaza consisting of two buildings, a large asphalt-paved parking lot, and landscaped areas. The larger building (approximately 60,268-square feet) is along the west boundary of the site and has current addresses of 6221 to 6299 Bristol Parkway; this building was constructed between 1973-1974 and consists of wood and steel framing with masonry block walls. The interior finishes vary by tenant but generally consist of bare concrete, ceramic tile and/or carpet flooring, painted drywall walls, and acoustical ceiling tiles. The smaller stand-alone building (approximately 4,275-square feet) has an address of 6201 Bristol Parkway and is at the northeast corner of the property. A two-story building was previously developed in the northeast portion of the property during 1973-1974; however, it was demolished during 2013 and replaced with the existing single-story building. This building is constructed with wood and/or steel framing with a stucco exterior. The interior finishes consist of ceramic tile and carpet flooring, painted drywall walls, and acoustical ceiling tiles. Near each building are dumpster enclosures and pad-mounted electrical transformers.

8.1 Hazardous Substances

There were no visual indications of the presence of hazardous materials located within the limits of the subject site during the property inspection associated with an identified or unidentified use.

There are historical tenants that have used hazardous substance and generated hazardous waste. These tenants include the Fox Hills Dry Cleaners which used PCE, Photo Fast which generated waste silver, and the medical facilities/pharmacies that developed X-rays and handled/disposed of biohazardous waste.

Several subsurface investigations have been conducted related to the historical use of PCE at the subject property and are discussed throughout this report. Also, there is no indication that the photo processing solution, X-rays development fluids, and/or biohazardous waste were handled inappropriately at the subject property.

8.1.1 Storage Tanks

There were no fill tubes, vent lines, dispensers, islands, or other visual indications of the existence of underground or aboveground storage tanks observed within the limits of the subject property at the time of AEC's site inspection.

8.1.2 Stains or Corrosion

AEC did not identify any obvious stains or corrosion during this site assessment that would be considered greater than a de minimis concern.

220 E. TRUXTUN AVENUE BAKERSFIELD, CA 93305 661/395-1646 FAX 661/395-1616

8.2 Natural Drainage

Natural drainage mirrors the topographic gradient of the site and flows generally to the west and then enters the municipal stormwater collection system.

8.3 Disturbed Areas

The subject property is improved with the footprint of the two buildings, asphalt-paved parking lots, and landscaped areas.

8.4 Hydraulic Equipment

No in-ground hydraulic equipment was observed on the subject property.

8.5 Electrical Equipment

Pad-mounted electrical transformers were observed adjacent to the two buildings. Regional electrical transformers are owned and operated by Southern California Edison (SCE).[3] According to information obtained from SCE, all transformers within the SCE power distribution network suspected of containing PCBs in concentrations exceeding 50 parts per million were removed and replaced by 1987. Manufacture of PCB-containing electric power transformers was discontinued in 1984.

Testing of transformers for the presence of PCBs is not included within the scope of this assessment; however, testing is not recommended based on the absence of a leaking transformer.

8.6 Wastewater

There were no current indications of industrial wastewater disposal at the subject site. Historically, there was tenant at 6247 Bristol Parkway (Photo Fast) that developed and printed photos. Installed in the tenant space was a silver recovery unit that electrolytically removed silver from the photoprocessing solution, then the solution would pass through metal exchange filters to reduce silver concentrations to below 5 parts per million (ppm), so that it could be discharged into the municipal sewer system.

8.6.1 Sewage Disposal Systems

The subject property is connected to the municipal sewage disposal system. No septic systems were identified during AEC's site assessment.

8.6.2 Pools of Liquid

AEC did not identify any areas of standing surface water during this site assessment.

8.6.3 Pits, Ponds, or Lagoons

AEC did not identify any onsite pits, ponds, or lagoons during this site assessment.

8.6.4 Drains and Sumps

AEC did not identify any drains or sumps during this site assessment. However, there are/were three floors sinks and a sample box at 6247 Bristol Parkway associated with the film rinse disposal process. Review of Los Angeles County Fire Department indicate the facility operated a silver recovery unit that electrolytically removed silver from the photoprocessing solution, then the solution would pass through metal exchange filters to

reduce silver concentrations to below 5 parts per million (ppm) so that it could be discharged into the sewer system.

8.7 Solid Waste Disposal

When generated, solid waste is placed in the dumpsters adjacent to each of the buildings and disposed on a scheduled basis by the local solid waste contractor.

8.8 Water Supply

Currently, there are no domestic and/or irrigation wells at the subject property. Water is supplied by the local municipal provider.

8.9 Designated Wetlands

Under the U. S. Army Corps of Engineers regulations, wetlands[4] are defined as "those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Wetlands generally include swamps, marshes, bogs and similar areas such as sloughs, prairie potholes, wet meadows, river overflows, mud flats, and natural ponds.

Based on review of the subject site, there are no areas on the subject or nearby property that would be defined as Designated Wetlands Areas.

8.10 Asbestos-Containing Materials (ACMs)

Asbestos Containing Materials (ACMs) were commonly used in a wide variety of building products such as roofing shingles, composite siding, linoleum flooring, acoustic ceiling tiles, furnace and water heater exhaust piping and insulation, glues and mastics, stucco, joint compounds, and composite wallboard prior to 1980; however, use of ACMs post 1980 is known to have occurred at many locations. ACMs can be divided into material considered friable (easily crumbled or reduced to powder) and non-friable. Friable ACMs are regulated as hazardous materials due to the elevated long-term risk of developing lung cancer upon respiratory exposure and must be properly removed prior to renovation or demolition of any structure containing these materials. Also, ACMs have also been found in 'Transite' irrigation piping commonly used in many agricultural areas of California. No indications of Transite irrigation piping were noted within the subject property during this assessment. Based on the construction date of the larger building along the west boundary (1974), ACM is suspected. The smaller building at 6201 Bristol Parkway was constructed during 2013; therefore, ACM is not suspected at this structure.

In addition, a review of the EDR Radius Map indicates that Marmaxx Group disposed of asbestos during 1997-1998 from 6221 Bristol Parkway.

Asbestos sampling and laboratory analyses are beyond the scope of this site assessment conducted by AEC; however, sampling is recommended prior to demolition and/or renovation at the larger building.

8.11 Radon

Radon[5] is a colorless, odorless, tasteless, naturally occurring radioactive gas formed by the decay of uranium in soil and bedrock. Because uranium and radon occur naturally in varying amounts within rocks and soils found throughout the United States, radon is present in all the air that we breathe. Long-term exposure to elevated concentrations of radon in confined areas has been associated with an increased risk of lung cancer. The present action levels require exposure to

concentrations of at least four picocuries/liter (4 pCi/L) of radon over an extended period of time. The State of California Department of Health Services conducted radon surveys across portions of Los Angeles County, during 1990. Los Angeles County has been classified as Zone 2 which has a predicted average indoor radon screening level between 2 and 4 pCi/L. Sampling in the area of the subject property (Zip Code 90230) indicated that 6 out of 43 tests exhibited concentrations higher than 4 pCi/L.

Radon sampling and laboratory analysis is beyond the scope of this assessment; however, based on the results of prior testing in the vicinity of the subject property, it is the opinion of AEC that radon sampling is not necessary.

8.12 Lead

According to information published by the United States Department of Housing and Urban Development (HUD),[6] approximately three out of every four pre-1978 buildings contain lead-based paint and/or lead plumbing components. Based on the construction date of the larger building along the west boundary (1974), lead-based paint or plumbing is suspected. Also, the tenant space at 6281 Bristol Parkway was occupied by a dentist office that performed X-rays from at least 1980 until around 2014; there may be lead-lined walls at this address that would shield radiation. The smaller building at 6201 Bristol Parkway was constructed during 2013; therefore, lead-based paint is not suspected at this structure.

Lead sampling and laboratory analyses are beyond the scope of this site assessment; however, sampling for lead-based paint is recommend prior to demolition and/or renovations at the larger building. Also, if lead-lined drywall is identified during demolition, the lead sheeting should be disposed at a recycling facility.

8.13 Odors

Strong, pungent, or noxious odors were not identified at the subject property during this site assessment.

8.14 Heating and Cooling

There are roof-mounted HVAC (Heating, Ventilation, and Air Conditioning) units at the both buildings.

8.15 Stressed Vegetation

AEC did not observe any areas with stressed vegetation during this site assessment.

9.0 INTERVIEWS, DATA GAPS, AND PRIOR REPORTS

9.1 Interviews

9.1.1 Interview with Owner and/or Site Representative

On September 19, 2024, AEC conducted an interview with the Property Manager, Ms. Loren Garcia of Spectrum Commercial Real Estate, Inc. According to Ms. Garcia, they have only managed the property for a few years and when they took over management, the majority of the tenant spaces were already vacant; therefore, her knowledge of prior tenants is limited. She said that the property has sold twice since they have managed it and the owners are investors that are not familiar with daily onsite operations. She also indicated that there are four spaces that are still being rented; however, the businesses are

inactive and only being used for storage with the exception of the Jiu Jitsu space which remains open for business. In addition, she had no knowledge of any former or current presence of underground storage tanks (USTs) at the site and was unaware of any releases of hazardous substances at the subject property.

9.1.2 Interview with User

As the prospective purchaser of the subject property, the User, Mr. Nate Johnson of Reda Residential, LLC would only be aware of environmental concerns if disclosed. The User is aware that PCE and TCE have been identified onsite during the various subsurface investigations due to the former presence of a dry cleaner onsite. Also, Mr. Johnson completed the Site Questionnaires which are attached in Appendix I.

9.1.3 Interview with Local Government Officials

AEC contacted the Culver City Building Safety Division, Culver City Fire Department, Los Angeles County Fire Department (LACoFD), Los Angeles Public Works Department, South Coast Air Quality Management District, and Regional Water Quality Control Board. Email and letter responses were received from these agencies; however, telephone interviews were not conducted. Refer to Section 11.3 for details on the file reviews.

9.2 Data Gaps

A data gap is generally defined as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may include insufficient historical information, the inability to interview person(s) with direct site knowledge, or lack of access to all areas during the investigation.

AEC did not inspect the interior of all tenant spaces and did not receive records from the RWQCB which constitutes a data gap. Also, AEC is aware that a prior investigation was conducted onsite during 2007 by Geomatrix; however, AEC was not able to find the reports, only the well logs were available for review. Although there are reporting data gaps, AEC does not identify the absence of reports as significant since the majority of the missing documents (with the exception of the Geomatrix report) are referenced in background sections of the various other reports reviewed by AEC. Therefore, it is the opinion of AEC that there are no significant data gaps that would alter the conclusion and recommendations presented in this report.

9.3 Prior Reports

AEC was provided with multiple reports that have been prepared for the subject property. These reports include the following:

- Phase I Environmental Site Assessment; prepared by AEI Consultants; dated July 9, 2007: AEI conducted a Phase I ESA and identified the following recognized environmental condition (REC):

  - "During the onsite investigation, AEI noted the presence of a dry cleaning facility known as Fox Hills Dry Cleaners in Building 2. According to historic information, this site has operated as a dry cleaning facility since at least 1975 (approximately 32 years). The current store owner, Mr. Sang Son, has reportedly owned the dry cleaners for approximately 6 years. Dry cleaning operations typically use chlorinated solvents, particularly tetrachloroethylene (PCE), during the dry cleaning process. These solvents, even when properly stored and disposed of, can be released from these facilities in small, frequent releases through floor drains, cracked concrete, and sewer systems. Chlorinated solvents are highly mobile chemicals that can easily accumulate in soil. AEI observed one (1) 55-gallon drum used to store waste PCE solvent adjacent to the dry cleaning machine. No secondary containment

is utilized by the waste PCE drum. Additionally, multiple small-quantity containers of solvent were observed next to a spotting table on the west side of the dry cleaning machine. The cement floor appeared to utilize an epoxy covering, however evidence of staining was observed on the floor below the spotting table. According to the most recent waste manifest on-site, United Fabric Care Supply, a licensed transporter of hazardous waste, collects the spent PCE solvent approximately every 1 month. Additionally, a previous Phase II Environmental Investigation completed in 1990 by Ralph Stone and Company, Inc. (RSC) was provided by the report user, Mr. Reuben Berman. This report states that the following contaminants were detected in a boring placed next to the former location of a PCE waste drum: 160 parts per billion (ppb) of PCE at 1 foot; 96 ppb of PCE at 2 feet; and 8.5 ppb of Trichlorethylene (TCE) at 2 feet. All levels found were below action levels and therefore RSC recommended no further action for the site other than sealing the floor and floor cracks. Refer to Section 4.2.5 for additional information regarding previous environmental investigations. Based on the known minor release in 1990 as well as the length of time the dry cleaners has occupied the subject property since the last subsurface investigation, the presence of Fox Hills Dry Cleaners represents; a recognized environmental concern."

Based on this finding, a Phase II Subsurface Investigation was conducted by AEI which is discussed below.

AEI's Phase I ESA also identified the following environmental concerns that warranted discussion but did not qualify as recognized environmental conditions:

- "Based upon aerial photographs, the subject property was developed with a golf course from as early as 1928 until as late as 1962. Onsite operations associated with golf courses typically involve the application, storage, and mixing of pesticides and herbicides at the subject property to service the golf greens/fairways. Based on the duration of use as a golf course and the tendency of these constituents to remain in near surface soils, the use and storage of pesticides and herbicides at the subject property may have impacted the subject property. However, the entire area of the subject property is either paved over or covered by improvements that make direct contact with any potential remaining concentrations in the soil unlikely. Furthermore, the subject property is developed and used for commercial purposes and thus no further action related to the former golf course is warranted at this time. If redevelopment of the subject property is planned for residential use, the owner/user of the report should contact the local planning department to determine whether sampling relating to the former golf course is required."

  It is the opinion of AEC that since the site has already been significantly disturbed when graded and subsequently developed with the Fox Hills Plaza, collecting soil samples to be analyzed for agricultural chemicals is not warranted.

- "A former tenant, Arnold Jewelers, occupied Building 2 from as early as 1976 until as late as 1986 (approximately 10 years). Onsite operations typically involve the use of hazardous materials including acids and bases presumably in small quantities. No hazardous material types were listed in the regulatory database, and no records indicating storage violations or spills were reviewed by AEI at the Air Quality Management District (AQMD) or South Coast Regional Water Quality Control Board (RWQC). Due to the calcium carbonate component of concrete flooring and the basic properties of clay in the soil, any spilled acids are neutralized upon contact with the concrete and/or clay. Based on a lack of records indicating a past release or spill and the presumed small quantities of hazardous materials likely used at the subject property, the historic storage and use of these hazardous materials at the subject property is not expected to represent a significant environmental concern."

  AEC concurs that no further investigation is warranted regarding the former jeweler operations at the subject property.

- "Photo Fast, a former tenant of the subject property, occupied Building 1 from as early as 1986 until as late as 1991 (approximately 5 years). Photo developing facilities are known to store small quantities of hazardous materials onsite including photo fixer and developer as part of the day-to-day operations. This site was listed on the governmental database as a small-quantity generator of hazardous waste. In addition, inspection reports dated between 1983 and 2002 were on file with the Los Angeles Department of Public Works (DPW). The inspection reports state that a former sample box located in the Photo Fast tenant space was closed in place and received closure status on December 26, 2002. No further details were available. Based on the lack of a documented release and the small quantities of hazardous materials typically associated with photo developing facilities, the former presence of this facility does not represent a significant environmental concern."

  AEC concurs that no further investigation is warranted regarding the former photo processing operations at the subject property.

- Phase II Subsurface Investigation; prepared by AEI Consultants; dated August 8, 2007: Based on AEI's findings during their Phase I ESA, they conducted a Phase II Subsurface investigation to determine whether or not additional releases have occurred from the dry cleaners. The scope included advancing six soil borings (AEI-BI through AEI-B6) to varying depths ranging between 12' bgs and 19' bgs. Soil samples were collected at four to five depths from each boring (2', 5', 10', 12', 15', 16', and/or 19'). A discussion of the results presented by AEI is as follows:

  "Laboratory reportable levels of PCE were found in 23 of the soil samples with a peak concentration of 11,900 µg/kg. Laboratory reportable levels of trichloroethene (TCE) were found in nine of the soil samples with a peak concentration of 1,300 µg/kg. Laboratory reportable levels of cis-1,2-dichloroethene (DCE) were found in 16 of the soil samples with a peak concentration of 2,040 µg/kg. Laboratory reportable levels of trans-1,2- DCE were found in two of the soil samples with a peak concentration of 18.2 µg/kg. A laboratory reportable level of vinyl chloride was found in one of the soil samples at 3.2 µg/kg. Laboratory reportable levels of 1,2,4-trimethylbenzene (TMB) were found in two of the soil samples with a peak concentration of 18.2 µg/kg. A laboratory reportable level of acetone was found in one of the soil samples at 140 µg/kg. Additionally, soil sample AEI-B1-10' contained laboratory reportable levels of benzene at 2.2 µg/kg; toluene at 4.5 µg/kg; ethylbenzene at 87.3 µg/kg; total xylenes at 129 µg/kg; isopropylbenzene (lPB) at 9.2 µg/kg; n-propylbenzene (n-PB) at 40.8 µg/kg; 1,3,5-TMB at 19.8 µg/kg; n-butylbenzene at 14.3 µg/kg; and naphthalene at 20.8 µg/kg. Please sec Figure 4 for the distribution of select detected contaminant concentrations."

  AEI compared the analytical results to the Preliminary Remediation Goals (PRGs) and Site-Specific Screening Levels (SSLs) and made the following conclusion:

  "During this investigation, six soil borings were advanced throughout the subject property in the area of the current dry cleaners. A total of 26 soil samples were analyzed for VOCs.

  "PCE was detected in most of the soil samples with concentrations in 10 samples above the residential PRG, five samples above the industrial PRG, and 21 samples above SSLs. TCE, a PCE breakdown product, was detected in 12 of the soil samples with concentrations in five samples above the residential PRG, four samples above the industrial PRG, and nine samples above SSLs. Additionally, cis-1,2-DCE; trans-1,2-DCE; and vinyl chloride (also PCE breakdown products) were detected in 21, 5, and 3 of the analyzed soil samples, respectively. A total of 11 samples containing cis-1,2-DCE were above SSLs, though cis-1,2-DCE was not detected above residential or industrial PRGs. One sample containing vinyl chloride was above SSLs, though vinyl chloride was not detected above residential or industrial PRGs. None of the remaining target contaminants were detected above residential and industrial PRGs or SSLs.

  "The results of this investigation indicate that a release of PCE has occurred from the current on-site dry cleaning operations. The detected contaminant concentrations are significantly

elevated and the release point appears to be in the vicinity of the dry cleaning machine. The PCE release appears to be degrading based on the detectable concentrations of TCE and other degradation products. Based on the significantly elevated contaminant concentrations and the continued on-site dry cleaning activities to potentially add to the release, AEI concludes that the detected subsurface contamination appears to represent a significant environmental concern. AEI recommends further investigation to determine the extent of the contamination beneath the subject property and determine if groundwater has been impacted."

- Monitoring Well Installation, conducted by Geomatrix, October, 2007: Although no information was provided to AEC regarding the onsite monitoring wells, AEC identified Well Log Reports for the installation of four groundwater monitoring wells onsite (see Appendix H). The Well Log Reports indicate that MW-1, MW-2, MW-3, and MW-4 were drilled by Layne Christensen Company between October 4-15, 2007. Boring logs and a map prepared by Geomatrix are attached to each of the Well Log Reports and indicate that MW-1 was drilled to a total depth of 61.5' bgs and screened from 46.9'-61.3' bgs; this well is located in the parking lot east of the northern portion of the western building. MW-2 was drilled to a total depth of 59.5' bgs and screened from 43.9'-58.3' bgs; this well is located east of the southern portion of the western building. MW-3 was drilled to a total depth of 56' bgs and screened from 40'-54.4' bgs; this well is depicted west of the southern portion of the western building. Lastly, MW-4 was drilled to a total depth of 56.5' bgs and screened from 41' to 55.5' bgs; this well is depicted south of the western building. As previously stated, AEC has not received any reports regarding this investigation and sampling conducted by Geomatrix during 2007. AEC identified two of these monitoring wells (MW-1 and MW-2) during our September 4, 2024 site inspection and collected water samples. Also, the other two monitoring wells (MW-3 & MW-4) were identified and sampled during a site visit on October 14, 2024. The analytical results are discussed in the Executive Summary of this report.

- Geotechnical Engineering Exploration; prepared by Byer Geotechnical, Inc.; dated June 6, 2017: This report was prepared based on the proposed construction of a seven-story mixed-use building over one to three subterranean parking levels. A hollow stem auger drill rig equipped with an electronic piezocone penetrometer (CPT) was used to advance six borings and two CPT sounds to depths of 31 to 71.5' bgs at the property, the soil collected during the geotechnical investigation was analyzed from an engineering standpoint. Groundwater was encountered in one of the borings at 52' bgs and another boring at 28' bgs. The findings presented by Byer Geotechnical indicated that the proposed development is feasible.

- Report on Review and Updating Previous Phase I Environmental and Phase II Assessments; prepared by Ralph Stone and Company, Inc. (RSC); dated January 31, 2018: This report was prepared to update the tenant listings and Environmental Data Review of the subject property; the address of 6201 Bristol Parkway was excluded from this 2018 assessment report. It also provided a list of additional investigations/reports that were prepared by RSC and others. The prior reports prepared by RSC are listed below; however, they were not provided to AEC for review.

  - Phase I Inspection of the property in 1990 (report dated November 5, 1990). This investigation included testing of building materials for asbestos.
  - Phase II Limited Soil Investigation at Unit 6223 in October 1990.
  - Phase I Update of the property in 1996 (report dated November 15, 1996).

  RSC stated that the condition of the property during their 2018 assessment is as follows:

  "There have been several beauty parlor/spas for people and pets at the property since 2006. These types of businesses are considered low concerns.

"No high concern tenants, other than the dry cleaners, are listed between 2006 and 2017. No high concern tenants, other than the dry cleaners, was noted during the RSC site inspection conducted on January 26, 2018.

"The flooring within the dry cleaners unit (6223) shows signs of cracking and the floor coating has been removed in large patches throughout the unit. Currently, RSC estimates that up to 30% of the floor coating is no longer present. The dry cleaning machine was set on a secondary containment pan."

The 2018 RSC Update concluded: "There have been no significant potential environmental impact changes since the AEI 2007 Phase I and Phase II Investigations.

"Concerning the dry cleaners, the house-keeping practices appears to not have changed since the 1996 RSC inspection. Based upon the current site conditions and the previous reports, RSC agrees with the 2007 AEI reports and recommendations and would also state that the levels of PCE in soil would require disclosure to DTSC and/or RWQCB and remedial actions would likely be necessary.

"An asbestos survey was conducted in 1990 and asbestos was found on the property. No abatement reports were presented to RSC at the time of this report, and therefore, it should be assumed the ACMs are still present on the property.

"No other areas of concern were noted during this Review.

"No nearby known listed contaminated site is likely to have a negative environmental impact the property.

"The structures located on the property were constructed prior to the bans on PCBs, Friable Asbestos Containing Building Materials (FACBMs) and Lead-Based Paints (LBP) and therefore they likely to be present on the property."

- Phase II Soil and Groundwater Investigation, prepared by Ramboll; dated July 22, 2020: AEC was not provided with this report, however, summary tables of VOCs identified in soil vapor, soil, and groundwater between January 2020 to May 2020 investigation was provided along with a map that depicts the sample locations.

  The soil vapor sample results (Table 1) indicate that PCE was detected at all eleven locations and at every sample depth (between 5' and 25'). Also, multiple soil vapor samples exhibited concentrations of VOCs that exceed the DTSC-recommended screening levels presented by Ramboll for a commercial/industrial property. The VOCs detected in soil vapor that exceed the comparative criteria consisted of benzene, bromodichloromethane, chloroform, dibromochloromethane, cis-1,2-dichloroethene, trans-1,2-dichloroethene, PCE, TCE, and vinyl chloride.

  The soil sample results (Table 2) indicate that out of the twenty-six multi-depth soil samples collected by Ramboll, PCE was detected in ten of them; TCE was detected in three of the samples and cis-1,2-dichloroethene was detected in seven of the samples. One PCE detection (225 ug/kg), one TCE detection (23.6 ug/kg), and five cis-1,2-dichloroethene detections (ranging from 16.1 ug/kg to 82.6 ug/kg) exceeded the selected screening criteria.

  The "grab" groundwater sample results (Table 3) indicate that PCE was detected in all three water samples, TCE was detected in two water samples, cis-1,2-dichloroethene was detected in one water sample, and dibromochloromethane was detected in one water sample. PCE was detected above the Maximum Concentration Levels (MCLs) at one location (GW-3); this location exhibited the most VOC detections.

220 E. TRUXTUN AVENUE BAKERSFIELD, CA 93305 661/395-1646 FAX 661/395-1616

- Additional Delineation Letter Report; prepared by Roux Associates, Inc.; dated October 13, 2022: This report was prepared following an investigation and sampling by Roux in April and May 2022, presented in the Phase II Subsurface Investigation Letter Report dated May 16, 2022 (note that AEC was not provided a copy of this report). Roux indicated that the investigation "confirmed that a release occurred beneath the former dry-cleaner suite with resulting impacts to soil vapor Concentrations of VOCs in soil did not exceed applicable screening levels (SLs). Groundwater, which was encountered at approximately 60 feet below ground surface (bgs) during the Phase II investigation, exhibited PCE concentrations only slightly above the Maximum Contaminant Level, and consistent with previous findings, indicated on-Site releases had not significantly impacted groundwater."

  Therefore, Roux performed an additional investigation during September 2022 to further define the lateral and vertical extents of the PCE soil vapor plume ahead of soil vapor extraction (SVE) pilot testing which included the installation of eleven new permanent multi-nested soil vapor probes at the subject property. A triple-nested extraction well (SVE-1) was also installed during this investigation.

  During this investigation, sixty-six soil samples were collected by Roux and analyzed for VOCs. PCE, TCE and cis-1,2-dichloroethene were detected in multiple samples. The maximum concentration of PCE in the soil samples during this investigation was 62 µg/kg in sample SV-4-25, which was collected in the sidewalk area outside and immediately east of the former dry-cleaner suite. None of the maximum reported concentrations exceeded DTSC Commercial/Industrial Screening Levels (SLs) or USEPA Industrial Regional Screening Levels (RSLs).

  Also, sixty-one soil vapor samples were collected by Roux and analyzed for VOCs. The soil vapor samples indicated detections of multiple VOCs, many of which were also previously detected by Ramboll. The results of this additional delineation by Roux indicated PCE and TCE are present in soil vapor at concentrations that exceed their respective USEPA Industrial RSLs and/or DTSC Commercial/Industrial SLs.

  Based on the results of the September 2022 investigation, Roux made the following conclusions:

  1. "PCE was the primary VOC detected in soil. Concentrations of VOCs in soil, including PCE, did not exceed applicable SLs. Consistent with past findings, VOCs in soil were detected only at locations proximate to the former dry cleaner suite."

  2. "The highest concentrations of VOCs in soil vapor are centered beneath the former dry cleaner suite. The maximum PCE concentrations were detected between 15 to 25 feet bgs beneath or immediately adjacent to the former dry cleaner suite."

  3. "Soil vapor PCE concentrations attenuated with depth."

  4. "The soil vapor PCE plume is well defined vertically and laterally."

  5. "Previous groundwater data in addition to soil and soil vapor data collected during this investigation confirm that PCE has not significantly impacted groundwater."

- Soil Vapor Extraction Pilot Test Technical Memorandum; prepared by Roux Associates, Inc.; dated October 17, 2022: A Soil Vapor Extraction (SVE) pilot study was performed by Roux on October 4 and 5, 2022 to confirm the applicability of the remedial technology to reduce concentrations of VOCs, specifically PCE, in soil and soil vapor at the subject property. Roux had previously installed a triple-nested vapor extraction well during September 2022. The well (SVE-1) was constructed with three screen intervals set from 5 to 15 feet bgs (shallow), 25 to 35 feet bgs (middle), and 45 to 50 feet bgs (deep). Roux conducted an SVE stepped-rate test

at extraction well SVE-1 using different applied vacuums and flow rates at each of the individual well depths to determine the most effective approach for extracting the contaminant mass. Following completion of the pilot test, Roux concluded that the subject property is an excellent candidate for remediation using SVE technology.

- Letter Regarding Status of the Contamination at the Property; prepared by Kenneth A. Ehrlich of Elkins Kalt Weintraub Reuben Gartside LLP; dated October 18, 2022: Following completion and review of the SVE pilot test, Kenneth Ehrlich, Attorney with Elkins Kalt prepared a letter addressed to Laurie Lustig-Bower of CBRE. AEC reviewed this letter and prepared responses for the prospective purchaser on July 23, 2024; AEC's responses to Mr. Ehrlich's statements are also included below in *italics*.

  Mr. Ehrlich stated: "To date, multiple Phase I Environmental Site Assessments (non-invasive), at least four (4) rounds of invasive environmental assessment (including soil, soil vapor, and groundwater sampling), and a Remediation Pilot Study have occurred at the Property. The reports are encouraging as they confirm a variety of points regarding the existing contamination:"

  1. "The PCE contamination is relatively localized under the former dry cleaner between 15' and 25' below ground surface."

  AEC response: The higher concentrations of PCE/TCE are identified in an approximately 60' x 60' area beneath the footprint of the former cleaners between 5' & 25' bgs. However, there are no soil vapor results below 25' bgs. Also, the plume appears to currently have an areal extent of approximately 250' x 250' although the margins have not been defined to the extent practical. The attached Table 1 presents VOC concentrations in soil vapor.

  2. "The PCE contamination has not spread to groundwater; appreciable amounts of contamination do not exist lower than 25' below ground surface and groundwater lies at approximately 60' below ground surface."

  AEC response: The attached Figure 1 presented by Ramboll, dated 7/22/2020, along with the groundwater results indicates the following VOC concentrations in groundwater. In downgradient monitoring well GW-3 there is 9.8 ug/L of PCE; 4.8 ug/L of TCE; 1.37 ug/L of cis-1,2-DCE and 1.43 ug/L of Dibromochloromethane. The Dibromochloromethane can be attributed as a byproduct of chlorinated drinking water that has permeated the subsurface. There are only three groundwater wells onsite and it is unknown to AEC their current status and accessibility. Since monitoring well GW-3 indicates the highest VOC concentrations, it is the opinion of AEC that the groundwater plume has not been adequately defined. **Note: AEC discovered at a later date that these were "grab" groundwater samples collected from a Geoprobe drill rig, not from dedicated monitoring wells.**

  3. "The contamination is in the exact location where our consultants thought it would be based on prior testing— no phantom plume(s)."

  AEC response: Duly noted, the data supports that the contamination is from the dry cleaners.

  4. "The soil and soil vapor beneath the site are quite porous and provide a near-perfect medium for soil vapor extraction remediation."

  AEC response: The subsurface soil is reported to be permeable, therefore, conducive to vapor extraction. Obviously, the soil vapor is not "quite porous". AEC concurs that vapor extraction is the recommended treatment option.

  5. "Generally homogenous, permeable soils beneath the site— further justifying a soil vapor extraction remedy."

AEC response: Duly noted.

6. “Nothing indicates a migration of the contamination off-site in any direction.”

AEC response: The higher PCE/TCE concentrations in groundwater in GW-3 indicates the potential for offsite migration to the west.

“Roux conducted a vapor extraction pilot study during October 2022 and concluded the following:

“Based on the results of the SVE pilot test, SVE was confirmed as an effective technology for remediation of VOC-impacted soil vapor at the Site.

- “The estimated ROI at 5 feet bgs was approximately 140 feet.
- “The estimated ROI at 15 feet bgs was approximately 143 feet.
- “The estimated ROI at 25 feet bgs was approximately 106 feet.
- “The estimated ROI at 40 feet bgs was approximately 118 feet.
- “The estimated ROI at 50 feet bgs was approximately 118 feet.

“These ROIs are considered adequate for full-scale design and application of SVE technology. The SVE blower would be expected to be operated at a vacuum of approximately 60 in-w.c. with a corresponding flow rate of approximately 144 CFM in SVE-1-S, 47 CFM in SVE-1-M, and 112 CFM in SVE-1-D.”

It is the opinion of AEC that the Radius of Influence (ROI) is very good at this site regardless of depth and that vapor extraction is a viable treatment option. However, due to the conversion of land-use at this property from commercial to residential, AEC recommends presenting the prior report data to either the DTSC or the RWQCB and enter into the selected-agency Voluntary Cleanup Program. Once the selected agency has reviewed the previously prepared reports, AEC will know if additional investigation is going to be required (most likely groundwater-related) or if the site can go directly to vapor extraction remediation.

10.0 SITE HISTORY

10.1 Aerial Photograph and Topographic Map Review

Historical aerial photographs and USGS Topographic Maps of the site were reviewed by an AEC representative who noted the following observations:

Map Date: 1896 **Quad: Redondo/Santa Monica** **Scale: 1"=5,208'**

The subject property and surrounding area are primarily undeveloped and depicted in an area described as Mesmer. Railroad tracks are nearby to the south followed by Centinela Creek.

Flight Date: 1923 **Flyer: FAIR** **Scale: 1"=630'**

The subject property and adjoining properties consist of undeveloped native ground. The outlying areas appear to be in agricultural production of irrigated row/cover crops. There are some rural structures visible in the general area.

Map Date: 1924/1925 **Quad: Inglewood et al.** **Scale: 1"=2,000'**

Again, the subject property and surrounding area are primarily undeveloped. Centinela Road is now depicted nearby to the south along with the City of Los Angeles boundary line, railroad tracks, and Centinela Creek.

Flight Date: 1928 **Flyer: FAIR** **Scale: 1"=595'**

By 1928, the subject property and immediately adjoining properties to the north, south, east and west are part of a golf course. There are no structures developed onsite at this time. The clubhouse associated with the golf course is evident to the northeast. Some of the outlying areas still appear to be in agricultural production of irrigated row/cover crops and scattered rural structures remain visible in the general area.

Map Date: 1930/1934 **Quad: Inglewood et al.** **Scale: 1"=2,000'**

The subject property and surrounding area are still primarily undeveloped; however, based on a review of aerial photographs, the subject property is part of the Fox Hills Golf Course by this time. The Fox Hills Country Club is now evident to the north along Slauson Avenue. Centinela Road is now depicted nearby to the south along with the City of Los Angeles boundary line, railroad tracks, and Centinela Creek. Culver City is encroaching on the subject property from the west.

Flight Date: 1938 **Flyer: USDA** **Scale: 1"=630'**

Again, the subject property and immediately adjoining properties to the north, south, east and west are part of a golf course. There are still no structures developed onsite. The clubhouse associated with the golf course remains evident to the northeast. A small area to the southeast still appears to be in agricultural production of irrigated row/cover crops and the area north of the subject property has been improved with roads in preparation of structural development.

Flight Date: 1947 **Flyer: FAIR** **Scale: 1"=630'**

The subject property and immediately adjoining properties to the north, south, east and west are part of a golf course. There are still no structures developed onsite. The clubhouse associated with the golf course remains evident to the northeast. A cemetery is now visible to the southeast and commercial properties are being developed in the area north of the subject property. Also, west of the subject property a freeway has been constructed and development is occurring along the east and west sides of the freeway.

Map Date: 1950 **Quad: Beverly Hills et al.** **Scale: 1"=2,000'**

The subject property and immediately surrounding area are still most likely part of the Fox Hills Golf Course. A significant increase in development has occurred to the west and south including airports, schools, residential neighborhoods. Multiple freeways have been constructed to the north, south, east and west of the subject property. The Hillside Memorial Park Cemetery is now depicted to the southeast.

Flight Date: 1952 **Flyer: USDA** **Scale: 1"=630'**

The subject property and immediately adjoining properties to the north, south, east and west are still part of a golf course. There are still no structures developed onsite. The clubhouse associated with the golf course remains evident to the northeast and the cemetery is still visible to the southeast. Commercial development is increasing in the general area and the nearby property to the west now appears to be used as a parking lot for large recreation vehicles/trailers or busses.

Flight Date: 1963 **Flyer: USGS** **Scale: 1"=630'**

As before, the subject property and immediately adjoining properties to the north, south, east and west are part of a golf course. There are still no structures developed onsite. The clubhouse associated with the golf course remains evident to the northeast and the cemetery is still visible to the southeast. Commercial development is increasing in the general area and the nearby property to the west that was used as a parking lot for large recreation vehicles/trailers or busses has been demolished and is now improved with the Centinela Creek Channel and the 405 Freeway.

Map Date: 1964/1966 **Quad: Beverly Hills et al.** **Scale: 1"=2,000'**

The subject property and immediately surrounding area remain part of the Fox Hills Golf Course. Development continues to increase in the general area. Multiple freeways continue to surround the property and now include the 405 Freeway. The Centinela Creek has now been channeled and trends along the freeway to the southwest of the subject property. The Hillside Memorial Park Cemetery remains depicted to the southeast.

Flight Date: 1970 **Flyer: EDR Proprietary Brewster Pacific** **Scale: 1"=630'**

Although the subject property still appears to be part of a golf course, the golf course is no longer operational and portions have been removed and are in the process of being developed, specifically to the south and east. Bristol Parkway has now been constructed and forms the east boundary to the subject property. Development continues to increase in the general area.

Map Date: 1972 **Quad: Beverly Hills et al.** **Scale: 1"=2,000'**

The subject property remains undeveloped; however, the Fox Hills Golf Course no longer appears to be operating as development of a hotel has occurred on the western adjoining property and an apartment complex on the eastern adjoining property. Bristol Parkway now borders the property to the east and Green Valley Circle forms the north boundary to the subject property. Development continues to increase in the general area. Multiple freeways continue to surround the property. The Hillside Memorial Park Cemetery remains depicted to the southeast.

Flight Date: 1977 **Flyer: EDR Proprietary Brewster Pacific** **Scale: 1"=615'**

By 1977, the property has been improved with a large shopping center building along the west boundary, an asphalt-paved parking lot, and another building at the northeast corner. Green Valley Circle has been constructed along the north boundary and across the road, the Westfield Shopping Mall has been developed. An apartment complex has been developed east of Bristol Parkway and hotels have been developed to the west and south of the subject property. The area to the northeast remains undeveloped.

Map Date: 1981 **Quad: Beverly Hills et al.** **Scale: 1"=2,000'**

By 1981, the subject property has been developed with a large building along the west boundary. Bristol Parkway borders the property to the east and Green Valley Circle forms the north boundary to the subject property. Commercial development has increased to the north, south and west of the subject property and the apartment complex remains evident to the east. Multiple freeways continue to surround the property and the Hillside Memorial Park Cemetery remains depicted to the southeast.

Flight Date: 1989 **Flyer: USDA** **Scale: 1"=630'**

The subject property continues to be improved with a large shopping center building along the west boundary, an asphalt-paved parking lot, and another building at the northeast corner. Green Valley Circle forms the north boundary and across the road is the Westfield Shopping Mall. The apartment

complex remains visible east of Bristol Parkway along with the hotels to the west and south. The area to the northeast has now been developed with commercial offices buildings. The cemetery remains evident to the southeast.

Flight Date: 1994 **Flyer: USGS/DOQQ** **Scale: 1"=615'**

The subject property and surrounding area appear similar to the previous photograph and no significant change is noted.

Flight Date: 2003 **Flyer: Google** **Scale: 1"=125'**

As before, the subject property is improved with a large shopping center building along the west boundary, an asphalt-paved parking lot, and another building at the northeast corner. Green Valley Circle forms the north boundary and across the road is the Westfield Shopping Mall. The apartment complex remains visible east of Bristol Parkway along with the hotels to the west and south. The area to the northeast has now been developed with commercial offices buildings. The cemetery remains evident to the southeast.

Flight Date: 2009 **Flyer: Google** **Scale: 1"=125'**

Again, the subject property is improved with a large shopping center building along the west boundary, an asphalt-paved parking lot, and another building at the northeast corner. Green Valley Circle forms the north boundary and across the road is the Westfield Shopping Mall. The apartment complex remains visible east of Bristol Parkway along with the hotels to the west and south. The area to the northeast has now been developed with commercial offices buildings. The cemetery remains evident to the southeast.

Map Date: 2012 **Quad: Beverly Hills et al.** **Scale: 1"=2,000'**

Structural details are not depicted on this map. The subject property continues to be bordered by Bristol Parkway to the east and Green Valley Circle to the north. Multiple freeways remain evident in the general area.

Flight Date: 2016 **Flyer: Google** **Scale: 1"=125'**

The subject property and surrounding area appear similar to the previous photograph. The most significant change is the original building at the northeast corner of the property has been demolished and the existing building in that area has been constructed in its place.

Map Date: 2021/2022 **Quad: Beverly Hills et al.** **Scale: 1"=2,000'**

As before, structural details are not depicted on this map. The subject property continues to be bordered by Bristol Parkway to the east and Green Valley Circle to the north. Multiple freeways remain evident in the general area.

Flight Date: 2024 **Flyer: Google** **Scale: 1"=125'**

The subject and surrounding property generally appear as it does today.

11.0 ENVIRONMENTAL DATABASE AND AGENCY FILE REVIEW

11.1 Review of Federal, State, Tribal, and Local Government Databases

AEC contracted Environmental Data Resources (EDR)[7] to perform database searches of readily available Federal, State, and Local database information systems for the purpose of identifying

known recognized environmental conditions present on nearby properties which have the potential to adversely impact the site being assessed in this study.

A database search for sites listed on various federal, state, tribal, and local databases in the area around the Property was obtained. A description of each of the databases searched is included in the report, which is attached as Appendix B. Among the databases included in the EDR report are NPL (federal, tribal, and state-equivalent), proposed and delisted NPL, CORRACTS (RCRA facilities subject to corrective actions), hazardous waste sites identified for investigation or remediation (CERCLIS, State CERCLIS, VCP, Brownfields, Calsites, etc.), LUST, sites with engineering controls, former CERCLIS (NFRAP), RCRA and state hazardous waste generators, ERNS, SWLF, USTs, and Toxic Pits.

The review of the records satisfies all requirements as set forth in 40 CFR Section 312.26 (b) and (c) with regard to the review of federal, tribal, and state government records of databases of such government records and local government records and databases of such records pertaining to both the subject property and the nearby or adjoining properties. Further, the search distances for each particular database are as specified in 40 CFR 312.26.

Any known or suspected contaminated sites included on these lists within 0.25-miles of the Property are discussed in the following text. As a general rule, sites beyond 0.25-miles are not anticipated to impact a site significantly. Any sites beyond 0.25-miles with a high potential to impact the Property are also discussed. (Please note: the distances and directions listed in this report have been field verified and might not always match those in the EDR report.)

Sites such as TSD facilities, hazardous waste generators, HAZNET, FINDS, SQGs, LQGs, USTs, HIST UST, RCRA violations, and TRIS facilities with toxic chemical releases (generally in accordance with permitting requirements - into the air, water, or land as reported under SARA Title III) use or store hazardous materials and thus may pose a potential problem in the event of a spill or leak. However, unless these sites also appear in an agency list of contaminated sites, there is no evidence of any problems at this time. Therefore, sites on these lists will not be discussed unless on or in close proximity to the Property.

A review of the EDR Radius Map Report indicates that the subject property (6201-6299 Bristol Parkway) is listed under the following names and addresses:

- Centinela Med Ctr Fox Hills and Centinela Fitness Institute (6201 Bristol Parkway): This address is listed as a physician’s office that historically recycled/disposed of hazardous waste (metal sludge, alkaline solution).

- Safeway Market, Marmaxx Group, and Marshalls (6221 Bristol Parkway): Safeway Market was previously enrolled with Los Angeles County for hazardous materials management (Facility ID 006923-I07158) and Marshalls is listed for handling/disposing of hazardous waste (off-specification, aged, or surplus organics). Marmaxx Group is described for disposing of asbestos containing waste between 1997-1998.

- Fox Hill Dry Cleaners, Fox Hills Plaza Cleaners, Sang Y Son DBA, Lee Kim DBA (6223 Bristol Parkway): This facility is listed as a dry-cleaning facility that previously used perchloroethylene (PCE). They also reported pollutant air emissions to the South Coast AQMD and recycled/disposed of hazardous waste (halogenated solvents such as chloroforms, methyl chloride, perchloroethylene, etc. and hydrocarbon solvents such as benzene, hexane, Stoddard, etc., and other liquid wastes).

- Photo Fast (6247 Bristol Parkway): This address is listed for historically conducting photofinishing operations, being enrolled with Los Angeles County for hazardous materials management (Facility ID 006962-I07200) and for recycling/disposing of hazardous waste (metal sludge, alkaline, solution and photochemicals/photoprocessing wastes).

- David F Fong DDS (6281 Bristol Parkway): This facility is listed for being enrolled with Los Angeles County for hazardous materials management (Facility ID 036660-067889) and for disposing of hazardous waste (unspecified organic liquid mixture and oxygenated solvents such as acetone, butanol, ethyl acetate, etc., and other inorganic solid waste).

- CVS Pharmacy (6299 South Bristol Parkway): This address is listed for disposing of hazardous waste (unspecified solvent mixture, pharmaceutical waste, alkaline solution without metals, off-specification, aged, or surplus inorganics).

In addition, there are numerous offsite properties with 0.25-miles of the subject property that store, generate, and/or dispose of hazardous substances. Also, there are multiple offsite properties listed for operating USTs. Four of these sites within 0.25-miles of the subject property that currently or historically operated USTs have had releases.

The Circle K/Mobil at 6100 Sepulveda Boulevard is a gasoline service station that had a gasoline release identified during piping and dispenser upgrades in 2001. The site was investigated and remediated to the satisfaction of the applicable regulatory agencies and case closure was issued on October 25, 2018.

The Ramada Hotel at 6333 Bristol Parkway had a gasoline release identified during the UST removal process in 1990. The release apparently affected soil only and after it was investigated to the satisfaction of the applicable regulatory agency, case closure was issued on August 1, 1991.

Also, there are two sites described as H & H Property at 6530 Sepulveda Boulevard and Howard Hughes Prop Lot #2 at 6540 Sepulveda Boulevard (both Howard Hughes properties) that were investigated and received case closure on July 17, 1996. The EDR Radius Map also indicates that a second closure letter was issued on March 14, 1997 and included both of these addresses (6530 & 6540 Sepulveda Boulevard).

There is no indication that the subject property has been adversely impacted by these offsite releases.

Below is a listing of the databases researched.

Databases Reviewed	Search Distance (SD)	Number of Sites Within SD
Federal National Priorities List (NPL) Site List	1-Mile	0
Federal Delisted NPL Site List	1-Mile	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	1/2-Mile	0
Federal CERCLIS No Further Remedial Action Planned (NFRAP) Sites	1/2-Mile	5
Federal RCRA CORRACTS List	1-Mile	0
Federal RCRA non-CORRACTs TSD List	1/2-Mile	0
Federal RCRA Generators List	1/4-Mile	16
Federal Institutional/Engineering Control Registries	1/2-Mile	0
Federal ERNS List	On-Site	0
California and Tribal Lists of NPL Equivalent Hazardous Waste Sites Identified for Investigation and/or Remediation	1-Mile	0
California and Tribal Lists of CERCLIS Equivalent Hazardous Waste Sites Identified for Investigation and/or Remediation	1-Mile	7
California and Tribal Landfills or Solid Waste Facilities List	1/2-Mile	1
California and Tribal Leaking Underground Storage Tank (LUST) Facility List	1/2-Mile	27
California and Tribal Registered Storage Tank Facility List	1/4-Mile	10

Databases Reviewed	Search Distance (SD)	Number of Sites Within SD

11.3 Regulatory Agency Records

11.3.1 Culver City Building Safety Division[8]

The Culver City Building Safety Division maintains records of building permits issued for construction undertaken in the incorporated areas of Culver City. AEC requested building permits for the subject property on August 29, 2024 (#24-597) and identified numerous building permits for the subject property. The documents date back to 1972 when the plan review for the subject buildings occurred. Both buildings were constructed during 1974 by the owner at the time, Ramada Development Company. The building at 6201 Bristol Parkway was originally a two-story structure occupied by Bank of America and then during 1986, it was converted to a medical facility/urgent care (Centinela Medical Center). During 2013, the building was demolished and Chase Bank constructed a new one-story building. The larger building along the west boundary has been occupied by various tenants and there are numerous permits for tenant improvements. One of the tenant improvements was for a dry-cleaners during 1975. The building permits are attached to this report in Appendix D.

11.3.2 Culver City Fire Department[9]

The Culver City Fire Department (CCFD) maintains records of hazardous materials releases from underground storage tanks and/or emergency responses. AEC requested records for the subject property on August 29, 2024 and on September 9, 2024 AEC was provided with the following records for 6223 Bristol Parkway.

- **6223 Bristol Parkway:** The records included Hazardous Materials Business Plans from 1993, 1995, and 1996 for Fox Hills Dry Cleaners.

  Also, there is an Emergency Chemical Information Form that is to be used during incidents involving hazardous substances. This form was completed on three occasions (dates are not listed) for the dry cleaning chemical perchloroethylene. Next to the line on the form for "amount of chemical spilled or released" is a handwritten note indicating "100-gallons" on one occasion, "80-gallons" on another occasion, and "50-gallons" on the third incident.

  In addition, there is an Order to Comply dated August 17, 1998 requesting that the Fox Hills Dry Cleaners provide a Hazardous Materials Business Plan. Another Order to Comply was issued at the dry cleaners for extension cords and wiring on April 24, 2006; there is also a note to check if hazardous materials are stored onsite because their file indicates that the business has been inactive since December 31, 1998.

11.3.3 Los Angeles County Public Works Department[10]

The Los Angeles County Public Works Department manages Water Resources, Transportation, Environmental Services, Municipal Services, and Construction Management throughout the County. AEC requested records for the subject property on August 29, 2024 and AEC was provided with the following records:

- **6221 Bristol Parkway:** There is an Application for an Industrial Waste Permit at 6221 through 6299 Bristol Parkway under the name Ramada Inns, Inc. dated December 4, 1972. The application indicates that the liquid wastes will include condensate from air conditioning units and a garbage disposal that will be diluted with cold tap water and discharged to the sewer system. An inspection report dated November 8, 1985 indicates that Safeway had vacated the building and the garbage grinder had been removed.

- **6247 Bristol Parkway:** There is an Application for an Industrial Waste Permit at 6247 Bristol Parkway under the name Photo Fast dated April 21, 1982. The application indicates that the liquid wastes will include film processing solution from the photo development and printing process. A survey indicates that the pretreatment facilities consisted of three floors sinks and a sample box that were constructed according the approved plans with the exception of one location which was corrected after a notice to comply in 1983. Review of Los Angeles County Fire Department indicate the facility operated a silver recovery unit that electrolytically removed silver from the photoprocessing solutions, then the solution would pass through metal exchange filters to reduce silver concentrations to below 5 parts per million (ppm), and then eventually discharge to the sewer system. There are inspection reports for the facility during 1999, 2000, and 2002. The latest inspection on October 23, 2002 indicates that the sample box was "closed in place".

11.3.4 Los Angeles County Fire Department[11]

The Los Angeles County Fire Department (LACoFD) – Health Hazardous Materials Division maintains records of hazardous materials releases from underground storage

tanks and/or emergency responses. AEC requested records for the subject property on August 29, 2024 (#H066419-082924) and on August 30, 2024, AEC received records for 6221, 6223, 6247, and 6299 Bristol Parkway. The records provided for each of these addresses are described below:

- **6221 Bristol Parkway:** The Marshalls department store was enrolled with the LACoFD CUPA (Facility ID FA0045718 / CERS ID 10486609) as a hazardous waste generator. Inspection reports were provided to AEC for 2013, 2014, 2016 and 2020. There was a violation during the 2013 inspection and Marshalls was required to provide receipts/manifests for hazardous waste disposal. Also, the last inspection on July 28, 2020 did not identify any violations and indicated that Marshalls was no longer in business at the subject property.

- **6223 Bristol Parkway:** There are hazardous waste documents dating back to 1983 for the former dry-cleaning plant that operated at this address. The dry cleaning business, Fox Hills Cleaners, was owned/operated by Mr. Edward Noe (Facility ID 408360) during 1983. Mr. Kyu Lee (Facility ID 566994) began operating onsite as Fox Hills Dry Cleaners during 1990. There is a Notice of Violation dated July 6, 1994 for 5-gallon containers of waste oil having oily labels that were unreadable; the violation was corrected the same month. Another violation was issued on October 3, 1997 for improper labeling, storage, and timely disposal of Perc waste; this violation was correction on November 1, 1997. Mr. Lee ceased operations in 1999. Sang Youl Son took over the business, operating under the same name Fox Hills Dry Cleaners during the early 2000s. He was enrolled with the LACoFD CUPA (Facility ID FA0005704 / CERS ID 10300183) as a hazardous waste generator. Inspection reports were provided to AEC for 2004, 2007, 2010, 2013, 2014, 2016, 2019 and 2021. There was a violation during these inspections. Also, the last inspection on March 30, 2021 indicated that the dry-cleaning business closed in February 2021. The dry cleaning machine had been returned to its manufactures and all hazardous waste was disposed prior to the facility closure.

- **6247 Bristol Parkway:** Photo Fast was enrolled with the LACoFD CUPA (Facility ID FA0005703) as a hazardous waste generator (silver only). The facility operated a silver recovery unit that electrolytically removed silver from the photoprocessing solutions, then the solution would pass through metal exchange filters to reduce silver concentrations to below 5 parts per million (ppm), and then eventually discharge to the sewer system. Inspections were conducted at the facility during 1997 and 2000; a violation was issued during the 2000 inspection and requested that Photo Fast properly document the waste silver management. The business was inactive effective November 2004. Also, there is a Facility Information Report for California Roll & Sushi at this same address from 2006 regarding the use of propane heaters; however, the restaurant owners were informed that Culver City Fire Department would manage the storage of propane.

- **6299 Bristol Parkway:** The CVS Pharmacy was enrolled with the LACoFD CUPA (Facility ID FA0045092 / CERS ID 10301791) as a hazardous waste generator. Inspection reports were provided to AEC for 2016, 2019, and 2022. There is a CERS submittal from 2016 that indicates the facility generated hazardous waste. Also, the last inspection on June 28, 2022 did not identify any violations and indicated that CVS Pharmacy was no longer in business at the subject property.

11.3.4 South Coast Air Quality Management District[12]

The South Coast Air Quality Management District (SCAQMD) maintains records of permits related to pollutant air emissions for facilities located throughout the SCAQMD. AEC reviewed the online database on August 29, 2024 and identified Fox Hills Dry Cleaners at

6223 Bristol Parkway as an inactive facility (ID 14056) for the operation of the dry cleaning equipment. No violations or notices to comply were identified in the database.

11.3.5 California Department of Conservation – Geologic Energy Management Division (CalGEM)[13]

According to the CalGEM (formerly DOGGR) Map No. W1-5, no oil wells have been drilled at the subject property. Also, the subject property is not within the Administrative Boundary of an Oil or Gas Field.

11.3.6 Los Angeles Regional Water Quality Control Board[14]

The Los Angeles RWQCB maintains similar records of underground storage tanks (USTs) and incidents of unauthorized releases of hazardous materials from underground storage tanks at the subject site and surrounding areas. A review of RWQCB GeoTracker records contained no reference to past or present underground storage tanks or monitoring wells related to the subject site under review. Also, AEC submitted a request for records to the RWQCB on August 29, 2024. The email response on September 9, 2024 indicates that there are potential records regarding a trash complaint for 6299 Bristol Parkway. However, the RWQCB needed additional time to review the records for privilege; therefore, AEC was unable to receive the records prior to the completion of this report. Since AEC was not provided records prior to completion of this report, this constitutes a data gap; however, it is the opinion of AEC that the absence of this file review will not alter the conclusions and recommendations presented in this report.

In addition, there are four offsite properties identified in the GeoTracker database within 1,000-feet of the subject property. The Circle K/Mobil at 6100 Sepulveda Boulevard is a gasoline service station that had a gasoline release identified during piping and dispenser upgrades in 2001. The site was investigated and remediated to the satisfaction of the applicable regulatory agencies and case closure was issued on October 25, 2018.

The Ramada Hotel at 6333 Bristol Parkway had a gasoline release identified during the UST removal process in 1990. The release apparently affected soil only and after it was investigated to the satisfaction of the applicable regulatory agency, case closure was issued on August 1, 1991.

Also, there are two sites described as H & H Property at 6530 Sepulveda Boulevard and Howard Hughes Prop Lot #2 at 6540 Sepulveda Boulevard (both Howard Hughes properties) that were investigated and received case closure on July 17, 1996. The EDR Radius Map also indicates that a second closure letter was issued on March 14, 1997 and included both of these addresses (6530 & 6540 Sepulveda Boulevard).

There is no indication that the subject property has been adversely impacted by the releases at these offsite properties.

11.3.7 Office of the State Fire Marshal Pipeline Safety Division[15]

AEC located the subject property on the National Pipeline Mapping System and determined that there are no natural gas or hazardous liquid pipelines wither bordering or traversing the subject property.

12.0 VAPOR ENCROACHMENT SCREENING

ASTM Standard E 2600-22 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions (VES) was used as guidance for conducting a VES for the subject property. The purpose of the screening is to determine whether a Vapor Encroachment Condition (VEC) exists from chemicals of concern (COC) that may migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the subject property. The screening involves a two-tiered approach to assessing VEC risk as described below.

12.1 VES Tier I

12.1.1 Search Distance Test/Chemicals of Concern Test

The search distance test is conducted in conjunction with the Phase I ESA using ASTM E1527 and involves a review of the regulatory database report and available historical records to make a determination if any *known or suspect potentially contaminated* properties exist within the Area of Concern (AOC). High risk sites are typically current and former gas stations, former and current dry cleaners, manufactured gas plants, and industrial sites (Brownfields). The AOC is defined by the approximate minimum search distance of 1/3-mile surrounding the target property or 1/10-mile for petroleum hydrocarbon products. Note: the default AOC may be expanded or reduced by AEC using experience and professional judgement based on consideration of groundwater flow direction, subsurface characteristics, surficial features and/or man-made features.

If no known or potentially contaminated sites with Contaminants of Concern (COCs) exist within the AOC, a VEC does not exist and no further inquiry is necessary. If the contamination is evident at the known site, or the potentially contaminated site within the AOC consists of COCs, then a Vapor Encroachment Condition (VEC) exists and Tier II is recommended.

12.2 VES Tier II

12.2.1 Data Collection

Tier II applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to provide greater certainty to whether or not a VEC exists using non-invasive and invasive data collection. The non-invasive investigation includes review of available regulatory files to identify the source of contamination and the migration pathway of the COC. If this information is not accessible, invasive data collection can be conducted and may include sampling of soil, soil gas, and/or groundwater on the target property, target property boundary, and/or offsite.

12.2.2 Plume Test

The Plume Test assesses whether or not a plume is close enough to the property to result in a VEC using information obtained from non-invasive data collection.

1. Critical Distance Determination – Determine lineal distance from property to edge of plume in any direction (vertical, horizontal, lateral).

2. VEC exists if a plume of volatile organic compounds (VOCs), semi-volatile organic compounds (S-VOCs), or Volatile Inorganic compounds or free petroleum product accumulating above water table within 100-feet of the property or if a plume of dissolved volatile petroleum hydrocarbons within 30-feet of the property.

It is the opinion of AEC that a Vapor Encroachment Condition exists based on the former presence of the dry cleaner from 1975 to 2021 and as validated using empirical data from multiple subsurface investigations. Soil Vapor Extraction is the recommended treatment option.

13.0 USER PROVIDED INFORMATION

Specific information provided by the User is discussed below.

13.1 Title Records

A chain-of-title report was not provided to AEC for review.

13.2 Environmental Liens or Activity and Use Limitations

No information pertaining to environmental liens or activity/use limitations filed against the Property was provided by the User or identified by AEC during this assessment.

13.3 Specialized Knowledge

The User provided AEC with the various reports outlined in Section 9.3 of this report.

13.4 Valuation Reduction for Environmental Issues

No information pertaining to Property valuation was provided by the User.

14.0 FINDINGS AND CONCLUSION

The results of this investigation have identified no *de minimis conditions,* one *recognized environmental condition (REC),* no *controlled recognized environmental conditions*, and no *historical recognized environmental conditions.*

Recognized Environmental Condition

- The space at 6223 Bristol Parkway was formerly occupied by a dry cleaner from 1975 to 2021. The dry cleaner was operated by several different individuals, but has primarily been under the same business name of Fox Hills Plaza Cleaners. The former use of a dry-cleaning plant incorporating tetrachloroethylene (PCE) as the dry-cleaning solvent has initiated several subsurface investigations at the subject and surrounding property. See Section 9.3 of this report for a discussion of the various investigations and reports prepared for the subject property.

  In short, Volatile Organic Compounds (VOCs) including PCE and trichloroethylene (TCE) have been identified in soil, soil vapor, and groundwater at the subject property. The concentrations in soil and soil vapor exceed multiple screening criteria for residential and/or commercial/industrial-use properties. The higher concentrations of PCE and TCE are identified within an approximately 60' x 60' area in subsurface soil beneath the footprint of the former cleaners between 5' and 25' below ground surface (bgs). However, there are no appreciable soil vapor results below 25' bgs. Also, the plume appears to currently have an areal extent of approximately 250' x 250' although the margins have not been defined to the extent practical.

  Based on the concentrations that have been identified onsite, a Soil Vapor Extraction (SVE) pilot study was performed by Roux Associates, Inc. (Roux) on October 4 and 5, 2022 to confirm the applicability of the remedial technology to reduce concentrations of VOCs, specifically PCE, in soil and soil vapor at the subject property. Roux had previously installed a triple-nested vapor extraction well during September 2022. The well (SVE-1) was constructed with three screen intervals set from 5' to 15' bgs (shallow), 25' to 35' bgs (middle), and 45' to 50' bgs (deep). Roux conducted an SVE stepped-rate test at extraction well SVE-1 using different applied vacuums and flow rates at each of the individual well depths to determine the most effective approach for extracting the contaminant mass. Following completion of the pilot test, Roux concluded that the subject property is an excellent candidate for remediation using SVE technology. AEC concurs that vapor extraction is a viable treatment option.

  During AEC's site inspection on September 4, 2024, water samples were collected from two groundwater monitoring wells observed in the parking lot east of the large shopping center building. One well was labeled MW-2 and is located approximately 100-feet east of the Jiu Jitsu unit (6295 Bristol Parkway) and southeast of the vacant Quiznos Sub (6257 Bristol Parkway). Another well was observed approximately 75-feet east of the northern portion of the former Marshalls (6221 Bristol Parkway); however, this well was not labeled. A subsequent review of a prior Well Log Report identified during this site assessment indicates this well is MW-1. Although no information was provided to AEC regarding the onsite monitoring wells, AEC identified Well Log Reports for the installation of four groundwater monitoring wells onsite (see Appendix H). The Well Log Reports indicate that MW-1, MW-2, MW-3, and MW-4 were drilled by Layne Christensen Company between October 4-15, 2007. Boring logs and a map prepared by Geomatrix are attached to each of the Well Log Reports and indicate that MW-1 was drilled to a total depth of 61.5' bgs and screened from 46.9'-61.3' bgs. MW-2 was drilled to a total depth of 59.5' bgs and screened from 43.9'-58.3' bgs. MW-3 was drilled to a total depth of 56' bgs and screened from 40'-54.4' bgs. This well is described on the figure in the area of the dumpster enclosure along the west side of the southwest portion of the building, however, this well was not identified by AEC during the site inspection. Lastly, MW-4 was drilled to a total depth of 56.5' bgs and screened from 41' to 55.5' bgs; this well is depicted along the south side of the building; again, AEC did not identify this well during the site inspection. As previously stated, AEC has not received any reports regarding this investigation and sampling conducted by Geomatrix during 2007 and only identified this monitoring well information through the Groundwater Ambient Monitoring & Assessment program (GAMA) website under the Well Completion Report Map Application section.

The two water samples collected by AEC from MW-1 (identified in the field by AEC as MW-??) and MW-2 were analyzed for Volatile Organic Compounds (VOCs) by EPA Method 8260B. The water sample collected from MW-2 exhibited non-detectable concentrations of all VOCs analyzed. However, the water sample from MW-1 exhibited detections of Chloromethane (2.4 ug/L), Dichlorodifluoromethane (0.20 J ug/L), PCE (8.4 ug/L), and TCE (1.3 ug/L). Also, AEC re-visited the site on October 14, 2024 and identified the location of MW-3 (west of, and adjacent to the dumpster enclosure wall associated with the former CVS Pharmacy building) and MW-4 (in the asphalt-paved access drive near the south wall of the former CVS-occupied building). AEC measured depth to groundwater (approximately 51.5' bgs); collected samples of groundwater from both wells; and transported the samples to Pace Analytical Laboratories for analysis of VOCs by EPA Method 8260B. The analytical results indicated no detectable concentrations of any VOCs, including the contaminant of concern PCE.

However, the concentrations of PCE in MW-1 exceed multiple screening criteria when compared to the January 2019, Revision 2 San Francisco Bay Regional Water Quality Control Board Environmental Screening Levels (SFBRWQCB ESLs) for a direct exposure risk level and groundwater vapor intrusion risk levels for a residential and/or commercial property. TCE also exceeds two of these criteria for a direct exposure tapwater cancer risk and a residential cancer risk from groundwater vapor intrusion. (See attached Table 1 in Appendix C).

It is the opinion of AEC that the groundwater plume has not been adequately defined to the east and west of the footprint of the former dry cleaners. Also, due to the conversion of land-use at this property from commercial to residential, AEC recommends presenting the prior report data to either the DTSC or the RWQCB and enter into the selected-agency Voluntary Cleanup Program. Once the selected agency has reviewed the previously prepared reports, AEC will know if additional investigation is going to be required (most likely groundwater-related) or if the site can go directly to vapor extraction remediation.

AEC has conducted this Phase I Environmental Site Assessment at the Fox Hills Plaza having street addresses of 6201-6299 Bristol Parkway in Culver City, California (the Property) in conformance with the scope and limitations of ASTM Standard E1527-21. Any exceptions to, or deletions from this practice are described in Section 5.0 of this report. This assessment has revealed evidence of a recognized environmental condition in connection with the subject property. Therefore, based on the results of our assessment, AEC recommends further investigation is warranted for the subject property.

16.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

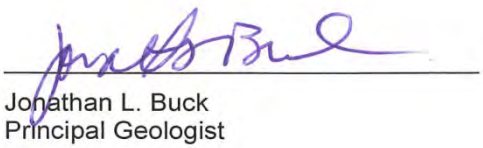
Advanced Environmental Concepts, Inc. appreciates the opportunity to provide our professional assistance to Reda Residential, LLC on this project. If you have any questions regarding this assessment or if AEC can be of further service, please call us at (661) 395-1646.

In addition, I declare to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 Code of Federal Regulations (CFR) 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject site. I have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

Sincerely,

Advanced Environmental Concepts, Inc.

This report has been prepared by:



Jonathan L. Buck
Principal Geologist

6201-6299 Bristol Parkway

17.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

AEC staff is composed of three primary environmental professionals that perform Phase I Environmental Site Assessments on a routine basis. Qualifications profile for these individuals is provided in the following section.

Jonathan L. Buck

Mr. Buck received a Bachelor of Science degree in Geology from the University of California, Santa Barbara, in 1981 and was professionally engaged in the petroleum industry in various capacities through 1985. Mr. Buck joined the environmental industry in 1985 and formed **Advanced Environmental Concepts Inc.** in 1989. Since its inception, **AEC** has been a full service environmental consulting firm specializing in Phase I Environmental Site Assessments, UST programs, and soil and groundwater assessment and cleanup programs. Mr. Buck is a State of California Registered Geologist (#7468) and has performed numerous ESAs on diverse properties throughout California, Arizona, Oregon, and Washington.

April J. Saceaux

Ms. Saceaux joined AEC in June 2008 and is in her fourteenth year as a Project Manager preparing Environmental Site Assessments under the direct supervision of a California Registered Geologist.

Anthony R. Buck

Anthony Buck has three years of experience as a Project Manager under the direct supervision of a California Registered Geologist. His environmental industry experience entails soil and groundwater characterization studies, removal of soils impacted with petroleum hydrocarbons, groundwater monitoring well construction, sampling and analysis as well as conducting Phase I Environmental Site Assessments.

Fox Hills Plaza
September 4, 2024

1. View north along Bristol Parkway which forms the east boundary to the subject property.

2. At the southeast entrance drive is tenant signage.

3. View northwest along the access drive at the southeast corner of the subject property.

4. View north across the eastern portion of the asphalt-paved parking lot.

5. View of the building south of the breezeway that has an address of 6299 Bristol Parkway. This portion of the structure was most recently occupied by CVS.

6. Interior view of the large southern space previously occupied by CVS in the building having an address of 6299 Bristol Parkway.

7. At the northeast corner of the south building is the LA Jiu Jitsu Academy with an address of 6295 Bristol Parkway.

8. West of the Jiu Jitsu unit are two unoccupied units having addresses of 6285 and 6287 Bristol Parkway.

9. The south portion of the central building in the breezeway was most recently occupied by a Quiznos Sub having an address of 6257 Bristol Parkway.

10. View along the units at the west end of the breezeway having addresses of 6245, 6249, 6271, and 6281 Bristol Parkway.

11. The northern portion of the central building was most recently occupied by California Roll & Sushi restaurant at 6251 Bristol Parkway.

12. The south portion of the large building north of the central building and breezeway was occupied by the Fox Hills Drycleaners at 6223 Bristol Parkway.

13. Interior view of the unoccupied drycleaners at 6223 Bristol Parkway.

14. View north along a series of multi-depth soil vapor probes and multi-depth soil vapor extraction wells installed in the loading area east of the drycleaners.

15. The drycleaning plant and boiler were installed in the northern portion of the building and the rooftop vents are still evident.

16. View west at the larger northern portion of the northern building having an address of 6221 Bristol Parkway. This portion of the building was occupied by a Marshalls Department Store.

17. Interior view of the unoccupied Marshalls at 6221 Bristol Parkway.

18. View of a monitoring well (MW-1) approximately 75’ east of the northern portion of 6221 Bristol Parkway (Marshalls).

19. View north across the northeast portion of the parking lot.

20. View across the northern parking lot with additional soil vapor probe installations.

21. View of the monitoring well in the south parking lot. This well is approximately 100’ east of the Jiu Jitsu unit and southeast of the Quiznos. On the concrete apron around the well box lid is etched MW-2.

22. View east along the north side of the building.

23. View north along the west side of the building. In the asphalt drive are vapor probe installations. Also, there are dumpster enclosures and a pad-mounted transformer enclosure.

24. View of the dumpsters at the southwest corner of the building that are outside their enclosure.

25. View of the interior of the southwest dumpster enclosure.

26. View of the tenant signage along the north entrance from Green Valley Circle.

27. At the northeast corner of the property is a stand-alone building having an address of 6201 Bristol Parkway. This building is not occupied, but was most recently a Chase Bank.

28. View of the south and west sides of the unoccupied building.

29. Interior view of the unoccupied former bank building.

30. At the southeast corner of the former bank building is a pad-mounted transformer.

31. View of a stormwater collection drain along the south boundary of the former bank building.

32. Along the south boundary of the former bank building is a dumpster enclosure.

Fox Hills Monitoring Wells
October 14, 2024

1. View of monitoring well MW-4 near the south wall of the south building.

2. View of MW-3 west of the masonry block-constructed dumpster enclosure.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/24/2024 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/03/2024 has revealed that there are 12 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/22/2024 has revealed that there are 7 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 10 UST sites within

approximately 0.25 miles of the target property.

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there are 7 CA FID UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there are 67 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/01/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 16 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 3 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 42 E MANIFEST sites within approximately 0.25 miles of the target property.

LA CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LA CO LF METHANE list, as provided by EDR, and dated 04/13/2023 has revealed that there is 1 LA CO LF METHANE site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto

sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Waste Code:	P042
Waste Description:	1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine
Waste Code:	P075
Waste Description:	Nicotine, & Salts (Or) Pyridine, 3-(1-Methyl-2-Pyrrolidinyl)-,(S)-, & Salts
Waste Code:	P081
Waste Description:	1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)
Waste Code:	P188
Waste Description:	Benzoic Acid, 2-Hydroxy-, Compd. With (3as-Cis)-1,2,3,3a,8,8a-Hexahydro-1,3a,8-Trimethylpyrrolo[2,3-B]Indol-

CVS PHARMACY # 9573 (Continued) **1016140103**

5-Yl Methylcarbamate Ester (1:1) (Or) Physostigmine Salicylate

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U010
Waste Description: Azirino [2',3':3,4]Pyrrolo[1,2-A]Indole-4,7-Dione, 6-Amino-8-[[(Aminocarbonyl)Oxy]Methyl]-1,1a,2,8,8a,8b-Hexahydro-8a-Methoxy-5-Methyl-, [1as-(1aalpha, 8beta, 8aalpha, 8balpha)]- (Or) Mitomycin C

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U034
Waste Description: Acetaldehyde, Trichloro- (Or) Chloral

Waste Code: U035
Waste Description: Benzenebutanoic Acid, 4-[Bis(2-Chloroethyl)Amino]- (Or) Chlorambucil

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U058
Waste Description: 2h-1,3,2-Oxazaphosphorin-2-Amine, N,N-Bis(2-Chloroethyl)Tetrahydro-, 2-Oxide (Or) Cyclophosphamide

Waste Code: U059
Waste Description: 5,12-Naphthacenedione, 8-Acetyl-10-[(3-Amino-2,3,6-Trideoxy)-Alpha-L-Lyxo-Hexopyranosyl)Oxy]-7,8,9,10-Tetrahydro-6,8,11-Trihydroxy-1-Methoxy-, (8s-Cis)- (Or) Daunomycin

Waste Code: U070
Waste Description: Benzene, 1,2-Dichloro- (Or) O-Dichlorobenzene

Waste Code: U072
Waste Description: Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene

Waste Code: U089
Waste Description: Diethylstilbesterol (Or) Phenol, 4,4'-(1,2-Diethyl-1,2-Ethenediyl)Bis, (E)-

Waste Code: U122
Waste Description: Formaldehyde

Waste Code: U129
Waste Description: Cyclohexane, 1,2,3,4,5,6-Hexachloro-, (1alpha, 2alpha, 3beta, 4alpha, 5alpha, 6beta)- (Or) Lindane

Waste Code: U132
Waste Description: Hexachlorophene (Or) Phenol, 2,2'-Methylenebis[3,4,6-Trichloro-

Waste Code: U150
Waste Description: L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan

Waste Code: U151

CVS PHARMACY # 9573 (Continued) **1016140103**

Waste Description: Mercury

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U165
Waste Description: Naphthalene

Waste Code: U188
Waste Description: Phenol

Waste Code: U200
Waste Description: Reserpine (Or) Yohimban-16-Carboxylic Acid, 11,17-Dimethoxy-18-[(3,4,5-Trimethoxybenzoyl)Oxy]-, Methyl Ester, (3beta, 16beta, 17alpha, 18beta, 20alpha)-

Waste Code: U201
Waste Description: 1,3-Benzenediol (Or) Resorcinol

Waste Code: U204
Waste Description: Selenious Acid (Or) Selenium Dioxide

Waste Code: U205
Waste Description: Selenium Sulfide (Or) Selenium Sulfide Ses2 (R,T)

Waste Code: U206
Waste Description: D-Glucose, 2-Deoxy-2-[[(Methylnitrosoamino)-Carbonyl]Amino]- (Or) Glucopyranose, 2-Deoxy-2-(3-Methyl-3-Nitrosoureido)-,D- (Or) Streptozotocin

Waste Code: U210
Waste Description: Ethene, Tetrachloro- (Or) Tetrachloroethylene

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

EXXONMOBIL OIL CORPORATION #11296 (Continued) **S113043630**

Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 01/29/2022. OBSERVATION: Uniform Hazardous Waste Manifests for used oil filters and used oil were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for used oil filters and used oil and submit copies to the CUPA.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 100239
Site Name: Paredes Auto Repair
Violation Date: 05-16-2014
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: Haz Waste Generator Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 09/08/2014. OBSERVATION: Observed soiled shop towels. CORRECTIVE ACTION: Provide receipts for soiled shop towels.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 100239
Site Name: Paredes Auto Repair
Violation Date: 12-30-2021
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/29/2022. OBSERVATION: One 55 gallon drum of used oil filters located between service station 1 and station 2 was observed without the accumulation date on the label. CORRECTIVE ACTION: Submit photos to the CUPA demonstrating that the container listed above has been properly labeled.

Description:	The unknown cleaning product is either rust remover or fabric softener. Caller responded to call at a hotel, reporting a maid had mixed liquids. This mixture caused people to complain of red itchy eyes. There were 5 people who complained of sympttoms and were asymptomatic within an hour of the event. The building was evacuated of it's 350 occupants, evacuations are over, all have returned to the hotel.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS Description: Chemical Storage Facilities

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Christopher Sakoda, Laboratory Manager
Eval Division: Los Angeles County Fire Department
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-26-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A. Domanski, consent by Angela Castillo and Chris Sakoda. Initial inspection for HMBP. All items take care of and all elements extremely proficient - only reportable items are bulk liquid nitrogen and small farm of C02. Biohazard in several locations and minor flammable, acids and bases. Site map accurate for lab area and training is above average. No issues.

INDI MOLECULAR INC (Continued) **S124918322**

Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-29-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Chris Sakoda. Review of business plan. Lab space with majority of storage being biohazard. Only reportable hazmat is liquid nitrogen and carbon dioxide. No issues.
Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-31-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Christopher Sakoda & Edmund Kim. Reviewed HMBP with expansion into unit 100 at the location. Mostly office space but a small amount of compressed and liquified gasses stored in the area. No issues with business plan as suite map, inventory, response plan and training were all accurate. No issues.
Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Site ID: 388874
Site Name: CA HIGHWAY PATROLWest Los Angeles
Violation Date: 10-15-2020
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 10/22/2020. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the

CHP FACILITY (Continued) **S101587251**

required due date. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the required due date. Need to submit 2020 submittal.
Violation Division: Culver City Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 388874
Site Name: CA HIGHWAY PATROLWest Los Angeles
Violation Date: 06-19-2014
Citation: HSC 6.95 25504(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25504(a)
Violation Description: Failure to complete and/or submit hazardous material inventory forms for all reportable hazardous materials on site.
Violation Notes: Returned to compliance on 03/19/2015. Please submit chemical inventory to CERS
Violation Division: Culver City Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 388874
Site Name: CA HIGHWAY PATROLWest Los Angeles
Violation Date: 11-22-2023
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 01/19/2024. OBSERVATION: Uniform Hazardous Waste Manifests for used oil filters and used oil were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for used oil filters and used oil and submit copies to the CUPA.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	01-21-2014
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain and/or maintain an Active EPA ID.
Violation Notes:	Not reported

HOLLISTER CO 30698 (Continued) **S121691140**

Violation Division:	Los Angeles County Fire Department
Violation Program:	HW
Violation Source:	CERS,
Site ID:	36713
Site Name:	Hollister Co 30698
Violation Date:	11-25-2020
Citation:	22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description:	Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes:	Returned to compliance on 08/08/2022. OBSERVATION: Uniform Hazardous Waste Manifests for past retail hazardous waste disposals (Colognes and perfumes) were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for the retail hazardous waste and submit copies to the CUPA.

Site Name: PETNET PHARMACEUTICALS INC
Violation Date: 05-26-2016
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 01/31/2017. OBSERVATION: Copies of hazardous waste disposal records for 2014, 2015 and 2016. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 06/26/16.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-26-2016

PETNET SOLUTIONS INC (Continued) **S113176391**

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Justin Arias
Eval Division: Los Angeles County Fire Department
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-30-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Long and Chris Nguyen. Routine high-risk hazmat inspection. Low quantities of hazmat, mostly compressed gasses and some below threshold liquids - but radioactive machine in main room. All elements of HMBP accurate and up to date, no issues.
Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-04-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Long Ngygen, Pharmacy Manager
Eval Division: Los Angeles County Fire Department
Eval Program: HW
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-28-2021
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Armando Sotelo and Long Nguyen. Reviewed all elements of HMBP, inventory is accurate - only applicable items are compressed gasses. Site map correctly shows where all items located, employee training and emergency response plan is current. Only minor threat is machine in main laboratory that contains small amounts of radiation. NOV issued for fire alarm system in trouble mode.
Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-11-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspected by: J. Luna / T. MacTavish Consent by: Keith Higa
Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-29-2023
Violations Found: No
Eval Type: Routine done by local agency

PETNET SOLUTIONS INC (Continued) **S113176391**

Eval Notes: Inspection by A.Domanski, consent by Long Nguyen. No changes since last year, no issues.
Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Other/Unknown
Eval Date: 01-31-2017
Violations Found: No

Hazardous Waste Summary:

Waste Code:	D000
Waste Description:	Not Defined
Waste Code:	D001
Waste Description:	Ignitable Waste

PETNET PHARMACEUTICALS INC (Continued) **1004678495**

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D022
Waste Description: Chloroform

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).
California's Hazardous Waste Tracking System Data Mart (HWTS-DATAMART) provides information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Eval Notes: Inspector Husband LAFD, on site this date to conduct routine inspection of underground storage tank. Consent to enter, inspect and take photographs was given on this date by SEAN WALSH Monitoring system certification (was) conducted at this time. Monitoring certification was performed by (TIMOTHY CAPEHART - CONFIDENCE UST SERVICES). Tester provided the following certifications: ICC: 8414476 EXP: 2/29/20 Veeder-Root: VMI: Other: The UST monitoring panel showed all functions normal. The monitoring set up and alarm history were provided for review. The sumps and UDCs were opened for inspection and the sensors were observed positioned to detect a leak at the earliest opportunity. The spill buckets were also visually inspected. The Monitoring Plan was compared to the equipment onsite. The operation of the UST system was compared to the conditions of the operating permit. Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Description:	Reporting party states there was an odor complaint and RP responded to the call. RP arrived to the incident location and states there was water bubbling from waste water pipeline spilling onto the soil due to an unknown reason. No waterways impacted. The release has been stopped and contained. RP will investigate to find the source of the problem of the release and conduct cleanup.

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D003
Waste Description:	Reactive Waste
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D028
Waste Description:	1,2-Dichloroethane
Waste Code:	D038
Waste Description:	Pyridine
Waste Code:	F002
Waste Description:	The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent

PSYCHEMEDICS (Continued) **1000247087**

Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P003
Waste Description: 2-Propenal (Or) Acrolein

Waste Code: P005
Waste Description: 2-Propen-1-Ol (Or) Allyl Alcohol

Waste Code: P014
Waste Description: Benzenethiol (Or) Thiophenol

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P028
Waste Description: Benzene, (Chloromethyl)- (Or) Benzyl Chloride

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P067
Waste Description: 1,2-Propylenimine (Or) Aziridine, 2-Methyl-

Waste Code: P087
Waste Description: Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide

Waste Code: P095
Waste Description: Carbonic Dichloride (Or) Phosgene

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P102
Waste Description: 2-Propyn-1-Ol (Or) Propargyl Alcohol

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: P106
Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

PSYCHEMEDICS (Continued) **1000247087**

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS),EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), andToxic Release Inventory (TRI).

Disposal Method: H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons: 0.4

PSYCHEMEDICS CORPORATION (Continued) **S113016539**

Year:	2021
Gepaid:	CAD982476897
TSD EPA ID:	CAD008302903
CA Waste Code:	791 - Liquids with pH <= 2
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.065

Year:	2021
Gepaid:	CAD982476897
TSD EPA ID:	CAD008302903
CA Waste Code:	181 - Other inorganic solid waste
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.18

Year:	2021
Gepaid:	CAD982476897
TSD EPA ID:	CAD008302903
CA Waste Code:	331 - Off-specification, aged or surplus organics
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.175

Year:	2021
Gepaid:	CAD982476897
TSD EPA ID:	CAD008302903
CA Waste Code:	211 - Halogenated solvents (chloroforms, methyl chloride, perchloroethylene, etc)
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.22

Year:	2021
Gepaid:	CAD982476897
TSD EPA ID:	CAD008302903
CA Waste Code:	214 - Unspecified solvent mixture
Disposal Method:	H061 - Fuel Blending Prior To Energy Recovery At Another Site
Tons:	0.27

Year:	2020
Gepaid:	CAD982476897
TSD EPA ID:	TXD982560294
CA Waste Code:	791 - Liquids with pH <= 2
Disposal Method:	H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons:	0.37114

CERS Description: Chemical Storage Facilities

Violations:
Site ID: 59125
Site Name: 1200 Pharma, LLC
Violation Date: 10-18-2021
Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 10/26/2021. OBSERVATION: The business failed to electronically submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities. CORRECTIVE ACTION: Electronically submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities. Inventory need to be added: 200 cu.ft. helium 200 cu ft. argon 200 cu ft. hydrogen 200 cu ft. 02 CORRECTED 10/26/2021
Violation Division: Culver City Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-21-2024
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: TRISTIN ROSE, EH

Eval Program: HW

PSYCHEMEDICS CORPORATION (Continued) **S113016539**

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 10-18-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Tristin Rose. Reviewed HMBP; Tristin is currently working on training for office workers not involved with the lab on site. All hazmat stored in lab areas, 200 cu.ft. of helium, 02, hydrogen, and argon need added to inventory. Noticed chloroform under threshold - checked back in office from EPA list to verify if it needed to be reported. All other items beneath threshold, site map accurate.
Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 08-24-2020
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Tristin Rose. New inspection for 1200 Pharma. HMBP consistent with CERS submittal, changes likely to be made early next year.
Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection

Eval Division: Culver City Fire Department
Eval Program: HMRRP
Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-14-2023
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Tristin Rose. Annual hazmat storage inspection for lab facility. Most items under reporting threshold with exception of spent waste material, some compressed gasses, a liquid nitrogen tank and some EHS. All submittal elements accurate, no issues.
Eval Division: Culver City Fire Department
Eval Program: HMRRP

PSYCHEMEDICS CORPORATION (Continued) **S113016539**

Eval Source: CERS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-21-2022
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: Inspection by A.Domanski, consent by Tristin Rose and Justin Wilf. Reviewed HMBP with Justin - very few areas have above reportable quantities, all are mostly below threshold EHS chemicals in the vented lab space. Main storage items are liquid nitrogen stored inside and outside. Training records, response plan, and permit all with Tristin's office. No violations.

Name: OLD NAVY 3497
Address: 6000 SEPULVEDA BLVD
City,State,Zip: CULVER CITY, CA 90230
Site ID: 562298
CERS ID: 10832503
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 562298
Site Name: Old Navy 3497
Violation Date: 02-15-2023
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 02/24/2023. OBSERVATION: Uniform Hazardous Waste Manifests for cosmetics and/or other consumer products were not available at the time of inspection. CORRECTIVE ACTION: Locate a copy of all manifests for cosmetics and/or other consumer products and submit copies to the CUPA.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
