Research has been conducted in an attempt to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the property. Standard historical sources have been sought in an attempt to document the past uses of the Property as far back as it can be shown that the Property contained structures; or from the time the Property was first used for residential, agricultural, commercial, industrial or governmental purposes.

4.2.1 Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historic fire insurance maps for the Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
	Property:	None	None
	Adjoining:	None	None

A copy of the Certified Sanborn Map Report is attached in Appendix D.

4.2.2 City Directories

An EDR City Directory Abstract report was reviewed for data of former occupants of the Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Property.

Property	
Use(s) / Occupant(s):	**Years**
None identified	

The EDR City Directory Abstract report was also reviewed for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

Adjoining Properties	
Use and/or Occupant(s)	**Years**
Pioneer Mills	1971-1992

A copy of the EDR City Directory report is attached in Appendix D.

4.2.3 Historical Topographic Maps

Historical topographic maps of the Property and vicinity obtained from an EDR Historical Topographic Map report (as attached in Appendix D) have been reviewed. The following interpretation of land usage was made by review of the maps:

Year(s)	Summary	
1893, 1901	**Property:**	No improvements or other special depictions are shown.
	Adjoining:	A structure is adjacent to the northeast and northwest.
1947, 1948, 1949,	**Property:**	A creek runs through the Property.
	Adjoining	Undeveloped, a railroad track to the south and unpaved road to the north. A structure depicted to the southeast.
1968, 1983	**Property:**	No improvements or other specific depictions are shown.
	Adjoining:	Northwest, west, and northeast adjacent properties are depicted with multiple structures.
1996	**Property:**	The Property is shaded, indicating a developed area.
	Adjoining:	The remainder of the adjacent properties are shaded, indicating a developed area.
2012	**Property:**	No improvements or other special depictions are shown.
	Adjoining:	No improvements or other special depictions are shown.

4.2.4 Historical Aerial Photographs

Historical aerial photographs of the Property and vicinity obtained from an EDR Aerial Photo Decade Package report, as attached in Appendix D, were reviewed. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Summary of Interpretation	
1928,1939, 1946,1953	**Property:**	Undeveloped land
	Adjoining:	Small structure depicted to the north. Two lane road depicted to the south.
1964, 1967, 1970, 1979, 1985, 1989, 1990	**Property:**	Undeveloped land
	Adjoining:	Residential homes, commercial structures, vacant land; including industrial uses to the southwest with multiple large ASTs
2005, 2009, 2012, 2016	**Property:**	Undeveloped
	Adjoining:	Residential, commercial, and industrial

4.2.5 EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.3, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings:	Adjoining/Off-Site Listings
Historic Cleaners: (on-site/adjoining only)	None	Continental Cleaners at 1342 W. Mission Road is reportedly adjoining to the south-southwest of the Property. This site is listed as a garment pressing and cleaners' agent in 1994. However, no such structures were adjoining to the south-southwest during the time period when this site was listed as a historical cleaner and may have been mis-mapped. Additionally, there have been no adjoining commercial development adjoining to the Property until the CVS was developed in in the mid-2000s. As such, this site is not considered to be a REC in connection with the Property.
Historic Auto: (on-site/adjoining only)	None	Harms Don Inc at 1290 W. Mission Road is located approximately 382 feet to the southeast and is listed from 1994 to 2014 as a gasoline service station. This site is listed on the LUST database and received regulatory closure on 07/15/2013, based on the regulatory closure received and the cross-gradient position, this site is not considered to be a REC in connection with the Property at this time.

MGP: (1-mile distance)	None	None

4.2.6 Petroleum/Natural Gas Well Review

The historical record sources and the California Geologic Energy Management Division (CalGEM) online mapping application were reviewed for records of historic petroleum and/or natural gas wells at the Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

4.2.7 Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	No additional pertinent historical data was obtained.
Prior Env. Reports: (Section 3.1)	Prior environmental reports reviewed as part of this assessment, as detailed in Section 3.1, did not provide additional pertinent detail of historical site usage.
Site Observations:	Indications of historic uses of the Property or adjoining properties were not observed during the site reconnaissance.
Other Sources:	No additional pertinent historical data was obtained.

4.2.8 Summary of Identified Historic Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Property:

Property	
Date Range	**Use**
1928-2005	Undeveloped land
2009	Graded staging area for construction of the south adjoining CVS
2012-present	Vacant land

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Adjoining Properties	
Date Range	**Use**
1928-1953	Undeveloped land
1964-2005	Vacant land, residential and industrial uses
2009-present	Vacant land, residential, commercial, and industrial uses; including an HVAC and plumping manufacturing facility to the southwest

4.2.9 Historical Records Data Failure

The ASTM E1527-13 standard defines data failure as a failure to achieve the ASTM specified historical research objectives after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions should be sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval.

Objective	Met?	Detail	Significant?
First developed use/date determined?	No	No indication of any prior use or development of the Property was identified.	No
Record sources at 5-year intervals back to 1940 or first developed use?	Yes	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Section 4.2.8.	NA

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

4.2.10 Historic Uses REC Discussion

Multiple large stockpiles of undocumented soil fill material were observed at the southwest boundary of the Property. Due to a concern of undocumented soil piles on the Property, a limited soil sampling and analysis was conducted at the time of the site inspection. Four (4) soil samples were collected from each of the undocumented soil piles, and analyzed for organochlorine pesticide (OCP) via EPA method 8081A, heavy metals, and VOCs. The analytical results indicated only minor detections of OCPs and heavy metals, all below the RSLs for residential use, and no TPH and/or VOCs were detected in any of the soil samples. Therefore, the undocumented soil piles do not indicate a REC with connection to the Property.

The review of historical records did not indicate evidence of a REC in connection with the Property.

4.3 Standard Environmental Record Sources

A regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT was obtained and reviewed. The report provided a search of standard environmental record sources for listings of the Property, adjoining properties and sites within the surrounding area; and has been reviewed for the purpose of identifying listings suggesting a potential impact to the Property due to presence or migration of hazardous substances and/or petroleum products. Additional descriptions of the meaning and significance of the regulatory databases can be found in the regulatory database report in Appendix E. The EDR Radius Map™ Report provided a search of the following database categories in accordance with the requirements of the ASTM Standard E1527-13:

Regulatory Database	Search Distance
Fed. National Priorities List (NPL/a.k.a. "Superfund" sites) & Proposed NPL	1-mile
Fed. Delisted NPL	½-mile
Fed. Superfund Enterprise Management System (SEMS; formerly CERCLIS)	½-mile
Fed. SEMS-ARCHIVE (formerly known as CERCLIS NFRAP)	½-mile
Fed. RCRA Corrective Action Sites (CORRACTS)	1-mile
Fed. RCRA Transport/Storage/Disposal (TSD) sites	½-mile
Fed. RCRA Generators (LQG, SGQ & CESQG)	Site & Adjoining
Fed. Institutional Control/Engineering Control (IC/EC) Registries	Site only
Fed. Emergency Response Notification System (ERNS)	Site only
State/Tribal Hazardous Waste Sites (SHWS)	1-mile
State/Tribal Landfill and/or Solid Waste Disposal (LF/SWF)	½-mile
State/Tribal Leaking Storage Tanks	½-mile
State/Tribal Registered Storage Tanks	Site & Adjoining
State/Tribal IC/EC Registries	Site
State/Tribal Voluntary Cleanup Sites	½-mile
State/Tribal Brownfields	½-mile
Additional Federal, State, Tribal and Local Environmental Databases	Variable

Reported distances for adjoining listings discussed in Section 4.3.4, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients indicated where applicable in Sections 4.3.4 and 4.3.5 have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

4.3.1 Supplemental Database Listings

The regulatory database report was also reviewed for listings on supplemental databases, in addition to the Standard Environmental Record Sources. Any property or adjoining property listings on such databases of significant concern, if identified, is discussed in Sections 4.3.3 and 4.3.4. Otherwise, none of the other supplemental database listings identified by the regulatory database report are considered to be a REC in connection with the Property.

4.3.2 Limited Tier I Vapor Encroachment Screening

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also on elements of "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Property in the up-gradient direction, 365 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Property in the up-gradient direction, 165 feet of the Property in the cross gradient direction and

100 feet of the Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the subject property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Property, if any, are identified and discussed in Sections 4.3.3, 4.3.4 and 4.3.5.

4.3.3 Property Listings

The following listings of the Property were identified:

Name/Address:	None
Database(s):	
Data Discussion:	
REC Discussion:	
VEC Discussion:	

4.3.4 Adjoining Property Listings

The following adjoining property listings were identified. Reported distances, where applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property. The reported gradient has been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Name/Address:	Continental Cleaners/ 1342 W Mission Road				
Database(s):	EDR HIST Cleaners				
Distance in feet:	6	**Direction:**	SSW	**Gradient:**	Down/Cross
Data Discussion:	The site is listed as historic cleaners in 1994. No other pertinent information is provided.				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

Name/Address:	Pioneer Mills/ 1329 W Mission Road				
Database(s):	LUST, SAN DIEGO CO. SAM, San Diego Co. HMMD, SWEEPS UST, HIST UST, CORTESE, HIST CORTESE, San Diego CO LOP and CERS				
Distance in feet:	469	**Direction:**	S	**Gradient:**	Down/Cross
Data Discussion:	It should be noted that EDR incorrectly lists this site as adjoining to the southwest; however, the site was formerly located 469 feet to the south and is now currently vacant land. The UST and LUST listing indicates that the site removed three (3) USTs from the site with a Completed-Case Closed with no further action as of 02/12//1993. The SAN DIEGO CO. SAM listing indicates that drinking water aquifer was affected on-site, with a Completed-Case Closed as of 02/12/1993. The UST listings shows the site was registered with two (2) 2,000-gallon diesel underground storage tanks and was removed in 1988. The SWEEPS/HIST UST listing indicates that the site had two (2) 2,000 USTs containing M.V. Fuel were installed in 1973. The CERS HAZ WATE listing indicates that the site was registered under using Hazardous Waste Generator, with no violations noted. The CERS TANK listing indicates that the site is on the Underground Storage Tank database. The CERS identifies the site as leaking				

	underground storage tank cleanup site. The SAN DIEGO CO LOP listing indicates that the site is on the Local Oversight Program database with a completed status case closed. Due to the closed status and all violations appear to be relatively minor in scale, these listings are not considered to be a REC in connection with the Property.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	CVS Pharmacy/ 1302 W Mission Road				
Database(s):	LQG, FINDS, ECHO, San Diego Co HMMD, CERS HAZWASTE and CERS				
Distance in feet:	127	**Direction:**	SSE	**Gradient:**	Down/Cross
Data Discussion:	The RCRA-LQG identified the Property as a large quantity generator of hazardous waste, no violations were listed. The FINDS listing merely refences the RCRA database. The ECHO database identifies enforcement and compliance history of the Property in the past 5 years, no violations were listed. The SAN DIEGO HMMD listing indicates that the Property name, address, and an EPA ID of CAR000233858. The CERS HAZ WASTE database lists the Property as a hazardous waste generator with several administrative violations that have since achieved compliance. The CERS database listing indicated that the Property is on the Chemical Storage Facilities database, with no violations noted.				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

Name/Address:	Padilla Construction DBA Garris Plastering/ 1390 Armorlite Drive				
Database(s):	RCRA-NonGen / NLR				
Distance in feet:	Adjoining	**Direction:**	SW	**Gradient:**	Down
Data Discussion:	The RCRA-NonGen / NLR lists this site as a non-generator of hazardous waste in 2009, no violations were listed. Based on the absence of reported violations, this listing is not considered to be a REC in connection with the Property.				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

4.3.5 ASTM Search Distance Findings

The following is a discussion of non-adjoining sites identified as located within the ASTM specified search distance surrounding the Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status. Listings for the following databases, if identified, have been discussed above in Sections 4.3.3 and 4.3.4: Registered Storage Tanks, Federal RCRA Generators, Federal and State EC/IC, ERNS. A copy of the full regulatory database report, including available details of all listed sites, is included in Appendix E.

Federal NPL				**# of sites:**	0	**Search Distance:**	1-mile
Notable Listing:	None						
Distance in feet:		**Direction:**		**Gradient:**			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

Federal Delisted NPL				**# of sites:**	0	**Search Distance:**	1-mile
Notable Listing:	None						
Distance in feet:		**Direction:**		**Gradient:**			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

Federal SEMS				**# of sites:**	0	**Search Distance:**	½-mile
Notable Listing:	None						
Distance in feet:		**Direction:**		**Gradient:**			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

Federal SEMS-ARCHIVE				**# of sites:**	3	**Search Distance:**	½-mile
Notable Listing:	Torrey Chemical Company at 217 Las Posas Road						
Distance in feet:	735	**Direction:**	S	**Gradient:**	None, due to hydrologic barrier.		
Data Discussion:	NFRAP-Site does not qualify for the NPL based on existing information.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal CORRACTS				**# of sites:**	1	**Search Distance:**	1-mile
Notable Listing:	Signet Armorlite at 1001 Armorlite Dr						
Distance in feet:	2,184	**Direction:**	SE	**Gradient:**	None, due to hydrologic barrier.		
Data Discussion:	Site is not on a the NPL.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal RCRA-TSD				**# of sites:**	1	**Search Distance:**	½-mile
Notable Listing:	Signet Armorlite at 1001 Armorlite Dr						
Distance in feet:	2,184	**Direction:**	SE	**Gradient:**	None, due to hydrologic barrier.		
Data Discussion:	The site identifies it is not on the NPL.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State HAZARDOUS WASTE SITE				**# of sites:**	0	**Search Distance:**	1-mile
Notable Listing:	Torrey Chemical Company/ 217 Las Posas Road						
Distance in feet:	735	**Direction:**	S	**Gradient:**	Down		
Data Discussion:	The site is a chemical company with 550 gallons above ground storage tanks. The site screening was completed and a NFA was issued as of 10/25/1994.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State SOLID WASTE FACILITY/LANDFILL				**# of sites:**	1	**Search Distance:**	½-mile
Notable Listing:	Benchmark Landscape Inc/ 145 N Pacific Street						
Distance in feet:	793	**Direction:**	SW	**Gradient:**	Down		

Data Discussion:	The site is listed with a Facility ID 37-AA-0986 as a solid waste operation. The CERS listing indicates multiple administrative violations, some violations include failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years that returned to compliance on 09/06/2014.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

State LEAKING STORAGE TANKS				**# of sites:**	20	**Search Distance:**	½-mile
Notable Listing:	Mashburn Waste/ 224 Las Posas Rd S						
Distance in feet:	683	**Direction:**	S	**Gradient:**	Down/Cross		
Data Discussion:	The LUST indicates that soil and groundwater was affected on-site, with a Completed-Case Closed as of 09/16/1992. Geotracker records identified the site is listed with a ECDO Waste and Recycling Services was identified with a second case ID T0607302493 with a case closed status of 1/21/2009.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State VOLUNTARY CLEANUP SITES				**# of sites:**	0	**Search Distance:**	½-mile
Notable Listing:	None

VEC Discussion:							

UNMAPPED/ORPHAN LIST SITES	
	Hillmann has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific search distance or warranting discussion have either been discussed in the preceding tables or are detailed below:
Notable Listings:	None

4.4 Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
EPA MyProperty	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.
EPA Envirofacts	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.
Department of Environmental Health (DEH)	FOI request	No response was received prior to report issuance.
CA DTSC (Envirostor)	FOI request	No response was received prior to report issuance.
CA SWRCB (GeoTracker)	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.
San Diego Air Pollution Control District (SDAPD)	FOI request	No response was received prior to report issuance.
www.realquest.com	On-line search	Basic Property information such as parcel number, date of construction, and building square footages were collected. Pertinent information, where obtained, is referenced in the appropriate sections of this report.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of the Property and improvements, adjoining properties as viewed from the Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares. Building exteriors were observed at ground level, unless otherwise indicated. Where applicable, representative areas of building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Ms. Gabriela Cyrulik
Property Escort/Company:	Unescorted
Inspection Date:	June 8, 2021
Weather Conditions:	Sunny, 78 degrees F

5.1.1 Significant Inaccessible Areas

No significant areas of the Property inaccessible at the time of the inspection were noted.

5.1.2 Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

5.2 General Site Setting

5.2.1 Site and Vicinity Characteristics

Abutting Roadways:	N. Las Posas Road to the north-northeast; West Mission Road to the south
Current Property Use:	Undeveloped
Evidence of Past Property Uses:	None observed
Evidence of Past Adjoining Property Uses:	None observed
Surrounding Area Uses:	Commercial, residential, industrial, undeveloped

5.2.2 Current Adjoining Property Uses

Dir	Street Address	Description
N	N Las Posas Road	Residential
W	-	Undeveloped and residential
E	N Las Posas Road	Residential and commercial
S	1329 W Mission Road	Commercial-CVS Pharmacy

No visual observations indicative of a potential environmental concern were noted on the adjoining properties.

5.2.3 Topographic Characteristics

Terrain:	Flat to gently sloping
Direction of Downward Slope:	Towards the south-southwest
On-site Water Bodies:	None observed
Other Significant Features:	None observed

5.2.4 General Description of Structures

Buildings/# of Floors	N/A
Approx. Building Area:	N/A
Approx. Year Built:	N/A
Ancillary Structures:	None observed
Sources of Heating & Cooling:	NA
Potable Water/Sewage Disposal:	No potable water or sewer services were present at the Property.

5.3 Interior & Exterior Observations

5.3.1 Storage/Usage of Hazardous Substances and Petroleum Products

The following hazardous substances and petroleum products were observed to be stored and used by property occupants:

Occupant	Substance	Qty/Container Type	Storage Conditions
NA	No significant storage or use noted		

5.3.2 Drums

No hazardous substance or petroleum product drums were noted on the Property.

5.3.3 Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted on the Property.

5.3.4 Other Hazardous Substances/Petroleum Products

No other containers of hazardous substances or petroleum products were noted on the Property.

5.3.5 Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/ UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
(none)						

5.3.6 PCBs in Oil Filled Electrical/Hydraulic Equipment

No oil-filled electrical or hydraulic equipment was identified at the Property.

5.3.7 Odors

No strong, pungent or noxious odors were noted at the Property.

5.3.8 Pools of Liquid

No standing water or pools of liquid likely to contain hazardous substances or petroleum products were noted at the Property.

5.3.9 Interior Stains or Corrosion

The following interior stains and/or corrosion due to hazardous substance/petroleum products spills/releases were noted at the Property:

5.3.10 Interior Drains/Sumps

No interior areas were identified at the Property.

5.3.11 Exterior Pits/Ponds/Lagoons

No exterior pits, ponds or lagoons was identified on the Property in connection with waste treatment or disposal.

5.3.12 Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed at the Property.

5.3.13 On-Site Solid Waste Disposal/Fill Material

The following evidence of on-site solid waste dumping/disposal was observed:

Multiple large stockpiles of undocumented soil fill material were observed at the southwest boundary of the Property. Due to a concern of undocumented soil piles on the Property, a limited soil sampling and analysis was conducted at the time of the site inspection. Four (4) soil samples were collected from each of the undocumented soil piles, and analyzed for organochlorine pesticide (OCP) via EPA method 8081A, heavy metals, and VOCs. The analytical results indicated only minor detections of OCPs and heavy metals, all below the RSLs for residential use, and no TPH and/or VOCs were detected in any of the soil samples. Therefore, the undocumented soil piles do not indicate a REC with connection to the Property.

5.3.14 Waste Water

Sanitary sewage generated at the Property is discharged via a connection to the local public sewer system.

Storm water runoff at the Property is discharged off-site to local streams/drainage systems via overland flow.

5.3.15 Septic Systems

No septic systems were identified at the Property.

5.3.16 Wells

No potable, monitoring or other groundwater wells were identified at the Property.

5.3.17 Railroad Spurs

No railroad spurs were identified on the Property.

6.0 INTERVIEWS

6.1 Interviews with Past and Present Owners and Occupants

Subject	Name/Affiliation	Summary
Property Owner / Representative	Ms. Johanna Crooker/ Forward Planning Manager	Ms. Crooker completed an environmental questionnaire and was interviewed during the site inspection. Pertinent information from the interview and questionnaire, where applicable, has been referenced in various sections of this report.
Property Occupants	Not applicable	Property was unoccupied.
Past Owners, Occupants, Operators	Not applicable	Past owners/occupants of the Property were not available for interview at the time of the assessment.
Owners/Occupants of Adjoining or Nearby Properties	Not applicable	The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.

6.2 Interviews with State and/or Local Government Officials

Written and on-line requests for environmental records of the Property from State and Local governmental agencies are detailed in Section 4.4.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as "Non-Scope Considerations"). The ASTM E1527-13 standard defines the term business environmental risk (BER) as, *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

No buildings were present at the Property.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

No residential buildings were present at the Property.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Property is located in an area classified as Zone 3 or 'low risk' area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

As per the contracted scope of work, Hillmann conducted a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth. Given the absence of building structures at the Property, mold/microbial growth is not considered to be a significant environmental concern.

7.5 NWI Mapped Wetlands

As indicated in the Physical Setting Source table of Section 4.1, no NWI mapped wetlands areas were depicted at the Property by the EDR Geocheck-Physical Setting Source Addendum (attached in Appendic E).

The scope of work for this assessment excludes a visual determination of regulated wetlands at the Property. It is emphasized that, regardless of the wetlands data obtained via the EDR Geocheck-Physical Setting Source Addendum, a delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

No potable water service was identified at the Property.

QUESTIONNAIRES/USER PROVIDED DOCUMENTATION

HILLMANN
CONSULTING

ASTM E 1527-13/AAI - USER QUESTIONNAIRE

Instructions: This form should be completed by a representative of the USER of the Phase I ESA report and returned to Hillmann via email or in-person. **The report USER is the entity on whose behalf the assessment is being prepared and that will be relying on the report for liability protections.**

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"),188 the USER must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete. Please complete the following questionnaire and provide any of the referenced information (if available) to Hillmann.

USER Company Name:	MLC Holdings, Inc.	**USER Mailing Address:**	5 Peters Canyon Road Suite 310 Irvine, CA 92606
Respondent Name & Email Address:	Johanna Crooker johanna.crooker@mlcholdings.net	**Date of Completion:**	6/14/2021

Property Address:		**YES**	**NO**	**DETAIL (optional):**
Environmental liens that are filed or recorded against the property: Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?		☐	☑	
Activity and use limitations that are in place on the property or that have been filed or recorded against the property: Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?		☐	☑	
Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		☐	☑	
Relationship of the purchase price to the fair market value of the property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?		☑	☐	

HILLMANN
CONSULTING

Property Address:		**YES**	**NO**	**DETAIL (optional):**
Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? **ANSWER BELOW**				
- Do you know the past uses of the property?		☑	☐	Undeveloped (No previous uses)
- Do you know of specific chemicals that are present or were once present at the property?		☐	☑	None to our knowledge
- Do you know of spills or other chemical releases that have taken place at the property?		☐	☑	None to our knowledge
- Do you know of any environmental cleanups that have taken place at the property?		☐	☑	None to our knowledge
The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?		☐	☑	No obvious indicators
Litigation/Administrative Proceedings/Government Notices As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		☐	☑	None to our knowledge

PHASE I ENVIRONMENTAL SITE ASSESSMENT
VACANT PARCEL
NORTHWEST CORNER OF WEST MISSION ROAD
AND LAS POSAS ROAD
SAN MARCOS, CALIFORNIA

1.0 EXECUTIVE SUMMARY

Krazan & Associates, Inc. (Krazan) has performed a Phase I Environmental Site Assessment (ESA) of the vacant parcel located at the northwest corner of West Mission Road and Las Posas Road in San Marcos, California. (subject site). Krazan conducted the Phase I ESA of the subject site in conformance with the American Society for Testing and Materials (ASTM) E1527-00 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The Phase I ESA constitutes appropriate inquiry designed to identify Recognized Environmental Conditions (RECs) in connection with the previous ownership and uses of the subject site as defined by ASTM E1527-00.

ASTM E1527-00 Section 1.1.1 *Recognized Environmental Conditions* – The term *recognized environmental conditions* means the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, groundwater, or surface water on the *property*.

Krazan's findings of this Phase I ESA revealed no evidence of RECs in connection with the subject site.

2.0 PURPOSE AND SCOPE OF ASSESSMENT

2.1 Purpose

This Phase I ESA is designed to identify the presence of RECs in connection with the subject site through the research of previous and current ownership and uses of the subject site. Additionally, the purpose of the Phase I ESA is to permit the user to satisfy one of the requirements to qualify for what is

commonly known as the "innocent landowner" defense to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability as described by 42 U.S.C. Section 9601 (35)(B).

2.2 Scope of Work

The Phase I ESA includes the following scope of work: a) a review of local regulatory agency records, b) a review of local, state, and federal regulatory agency lists compiled by Environmental Data Resources, Inc. (EDR), c) a review of historical topographic maps and aerial photographs, d) a review of pertinent building permit records and city directories, e) a site reconnaissance of existing on-site conditions and observations of adjacent property uses, and f) interview(s) with person(s) knowledgeable of the previous and current ownership and uses of the subject site. The scope of work for this Phase I ESA conforms to ASTM E1527-00. Krazan was provided written authorization to conduct the Phase I ESA by Ms. Connie L. Fox of World Premier Investments, Inc. on September 25, 2003, in accordance with the scope of work outlined in Krazan's Proposal/Cost Estimate No. PLA03-193 dated September 23, 2003.

3.0 PHYSICAL SETTING

General property information and property use are summarized in Table I. Refer to the Vicinity Map (included in Appendix A).

TABLE I
Summary of Property Information

Topographic Map:	U.S. Geological Survey, 7.5 minute San Marcos, California topographic quadrangle map, dated 1968, photorevised 1983.
Topographic Map Location:	Section 10, Township 12 South, Range 3 West, San Bernardino Baseline and Meridian.
Topography:	Gradual slope to the south; the elevation is approximately 580 feet above mean sea level.
General Location:	Northwest corner of West Mission Road and Las Posas Road, San Marcos, California.
Assessor's Parcel Number:	219-121-10, 11 and 12
Approximate Depth to Groundwater:	Approximately 65-80 feet below ground surface (bgs), San Diego Regional Water Quality Control Board (SDRWQCB).
Regional Groundwater Flow Direction:	Southerly, SDRWQCB.
Existing Use:	Vacant parcel.

3.1 Geology and Hydrogeology

The subject site is located within the Peninsular Ranges Geomorphic Province in north central San Diego County. The site is located on the eastern edge of a belt of mountainous terrain comprised predominately of uplifted granitic rock materials of the Cretaceous age Southern California Batholith. Typically the granitic rock materials range from near surface weathered silty and clayey sands to very dense, unweathered crystalline granitic rock at depth. More recent surficial deposits include alluvium, colluvium and artificial materials. Alluvial and colluvial sediments are generally present near the base of slopes and within the drainage course areas on-site.

Groundwater beneath the site lies within the Escondido Hydrologic Sub-unit of the Carlsbad Hydrographic Unit as designated by the SDRWQCB. Groundwater within this sub-unit is designated by the SDRWQCB as a beneficial use area. Groundwater is contained within the terrace deposits that overlie the relative impermeable sedimentary bedrock. The groundwater is reported to be first encountered at a depth of approximately 65 to 80 feet below ground surface (bgs) with a general direction of flow towards the south. There are no known regional groundwater impairments in the vicinity of the subject site.

4.0 SITE RECONNAISSANCE

A site reconnaissance, which included a visual observation of the subject site and surrounding properties, was conducted by Krazan's environmental assessor on October 8, 2003. The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying Recognized Environmental Conditions, including hazardous substances and petroleum products, in connection with the property (including soils, surface waters, and groundwater).

4.1 Observations

Table II summarizes conditions encountered during our site reconnaissance. A discussion of physical observations follows Table II. Refer to the Site Map (Figure No. 1) and color photographs following the text for the locations of items discussed in this section of the report.

TABLE II
Summary of Site Reconnaissance

Feature	Observed	Not Observed
Structures (existing)		X
Evidence of past uses		X
Hazardous substances and/or petroleum products (including containers)		X
Aboveground storage tanks (ASTs)		X
Underground storage tanks (USTs) or evidence of USTs		X
Strong, pungent, or noxious odors		X
Pools of liquid likely to be hazardous materials or petroleum products		X
Drums		X
Unidentified substance containers		X
Pad-mounted transformer/Pole-mounted transformer		X
Subsurface hydraulic equipment		X
Heating/ventilation/air conditioning (HVAC)		X
Stains or corrosion on floors, walls, or ceilings		X
Floor drains and sumps		X
Pits, ponds, or lagoons		X
Stained soil and/or pavement		X
Stressed vegetation		X
Waste or wastewater discharges to surface or surface waters on subject site (including stormwater)		X
Wells (irrigation, domestic, dry, injection, abandoned, monitoring wells)		X
Septic Systems		X

- The subject site comprises one irregular-shaped parcel of land totaling approximately 9.38-acres. At the time of Krazan's site reconnaissance, the subject site was vacant land, located on the northwest corner of West Mission Road and Las Posas Road in San Marcos, California. The subject site appeared to be recently tilled and was covered in some areas with native grasses and shrubs. Minor amounts of household trash (i.e., paper cups, plastic bags, glass bottles, etc.) was scattered throughout the subject site.

- During the physical observations of the subject site, no hazardous materials/waste were observed on or adjacent to the subject site. Exposed surface soils did not exhibit obvious signs of discoloration. No obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs were noted within the area observed. There was no evidence of any fill material observed on the subject site. No standing water or major depressions were observed on the subject site. No indications of former structures, such as foundations, were observed on the subject site.

- No electrical power lines rated at 69,000 volts or higher were located within 100 feet of the subject site. No pole or pad-mounted transformers were observed on the subject site.

4.2 Adjacent Streets and Property Usage

Table III summarizes the current adjacent roads and site uses observed during the site reconnaissance.

TABLE III
Adjacent Streets and Property Use

Direction	Adjacent Street	Adjacent Property Use
North	None	Residential
East	Las Posas Road	Residential/Gasoline Station
South	West Mission Road	Railroad Tracks
West	None	Residential

Based on the observed uses of the properties located immediately adjacent to the subject site, it is unlikely that significant quantities of hazardous materials are stored at the adjacent properties with the exception of the gasoline service station located on the northeast corner of West Mission Road and Las Posas Road. The adjoining gasoline station was not listed on government databases of known unauthorized releases of hazardous materials to the subsurface and is therefore, deemed to have a low potential to environmentally impact the subject site.

4.3 Asbestos-Containing Building Materials

No structures are located on the subject site. Therefore, asbestos-containing building materials (ACMs) are not an on-site environmental concern at this time.

4.4 Lead-Based Paint

No structures are located on the subject site. Therefore, lead-based paint (LBP) is not an on-site environmental concern at this time.

4.5 Radon

Radon is a radioactive gas that is found in certain geologic environments and is formed by the natural breakdown of radium, which is found in the earth's crust. A radon survey was not included within the scope of this investigation; however, the State of California Department of Health Services (DHS) conducted a statewide radon survey during 1990-1991, which entailed testing of radon in homes in designated geographic areas. Radon detection devices were placed in homes throughout the study region to determine geographic regions with elevated radon concentrations. The U.S. EPA has set the safety standard for radon gas in homes to be 4 pico Curies per liter (pCi/l).

Although the DHS radon survey was conducted in residences and not in commercial properties, the radon concentrations in the geographical region of the subject site average below 4 pCi/l. Therefore, radon is

not anticipated to adversely impact the subject site. However, since radon levels may vary from one area to another, one way to accurately gauge radon levels present on the subject site is to administer a test.

4.6 Potable Water Source

The water purveyor for the subject site is the Vallecitos Water District (VWD). The VWD's water quality monitoring is an on-going program with water samples obtained and a water quality report written on an annual basis. It is the responsibility of the VWD to provide customers with potable water in compliance with the California State Maximum Contaminant Levels (MCLs) for primary drinking water constituents in water supplied to the public.

4.7 Sewage Disposal System

The VWD was contacted regarding historical sewage disposal practices at the site. According to the VWD, no sewer service connection date was available for the subject site. No sewer violations were on file for the subject site, and there were no records of septic systems historically being utilized at the subject site.

5.0 SITE USAGE SURVEY

The property usage survey included assessing property history, and reviewing local, state, and federal regulatory agency records.

5.1 Site History

A review of historical aerial photographs, City of San Marcos Building Department records, Sanborn Fire Insurance Maps (SFIMs), and a Phase I ESA Questionnaire were used to assess the history of the subject site.

Aerial Photograph Interpretation

Historical aerial photographs dated 1946, 1953, 1963, 1976, 1989, 1994 and 2001 were reviewed to assess property history. These photographs were obtained from Environmental Data Resources, Inc. (EDR) in Southport, Connecticut. Aerial photograph coverage for the years prior to 1946 was not reasonably ascertainable or available. The aerial photograph summary is provided in Table IV.

TABLE IV
Summary of Aerial Photograph Review

Year/Scale	Site Use	Site and Adjacent Property Observation
1946 1″ = 655′	Undeveloped	The subject site appears to be undeveloped native land. Undeveloped native land adjoins the subject site to the north. What appears to be a single-lane driveway to a residential structure located northeast of the subject site adjoins to the east, beyond which is vacant land. West Mission Road (two lanes), adjoins the subject site to the south, beyond which is vacant land. Undeveloped native land adjoins the subject site to the west.
1953 1″ = 833′	Undeveloped	The subject site and adjoining properties appear to be developed as observed in the 1946 aerial photograph with the exception of the development of Palomar College approximately one-quarter mile northeast of the subject site.
1963 1″ = 555′	Undeveloped	The subject site and adjoining properties appear to be developed as observed in the 1953 aerial photograph with the exception of single-family residential development approximately one-quarter mile northeast of the subject site and what appears to be a commercial building adjoining the subject site on the south side of West Mission Road.
1976 1″ = 600′	Undeveloped	The subject site and adjoining properties appear to be developed as observed in the 1963 aerial photograph with the exception of an increase in residential development adjoining to the northwest and commercial development south of West Mission Road.
1989 1″ = 666′	Undeveloped	The subject site and adjoining properties appear to be developed as observed in the 1976 aerial photograph.
1994 1″ = 666′	Undeveloped	The subject site and adjoining properties appear to be developed as observed in the 1989 aerial photograph with the exception of the construction of a gasoline station on the northeast corner of West Mission Road and Las Posas Road and increased commercial development south of West Mission Road.
2001 1″ = 690′	Undeveloped	The subject site and adjoining properties appear to be developed as observed in the 1994 aerial photograph.

City of San Marcos Building Department

On October 8, 2003, the City of San Marcos Building Department (SBD) was contacted regarding records for the subject site APN. According to the SBD officials, no records for any structures were on file for the subject site APN and no address has been assigned to the subject site.

City Directories

City Directories were not searched due to the historical and current absence of structures and addresses associated with the subject site.

Sanborn Fire Insurance Maps

Krazan reviews SFIMs to evaluate prior land use at the subject site and adjacent properties. SFIMs typically exist for cities with populations of 2,000 or more, the coverage dependent on the location of the property. On September 25, 2003, Krazan contracted with EDR to provide a Fire Insurance Map Abstract indicating the availability of historic SFIMs for the subject site and adjacent properties as far back as 1867. EDR's search of collections at the Library of Congress, University Publications of America, and various public and local sources revealed no map coverage for the subject site and adjacent properties.

Phase I Environmental Site Assessment Questionnaire

On October 9, 2003, a Phase I ESA Questionnaire was submitted to Ms. Fox, of World Premier Investments, Inc. A completed questionnaire was received from Ms. Fox on October 14, 2003. Ms. Fox has been familiar with the subject site for approximately the past 12 years. According to Ms. Fox, to the best of her knowledge, no on-site treatment and/or discharge of waste; on-site leach fields, dry wells, sumps, or disposal ponds; no use, storage or disposal of hazardous materials; no known existing or former USTs or ASTs; no known on-site hazardous materials spills; buried materials; on-site monitoring, domestic, or irrigation wells; or any other items of environmental concern are associated with the subject site. A copy of the Phase I ESA Questionnaire is included in Appendix B.

5.2 Agricultural Chemicals

Review of the aerial photographs dating to 1946 reveals that the subject site has not been used for agricultural purposes since at least that time. Based upon the length of time since the subject site and adjacent properties may have last been used for agricultural purposes, it is not anticipated that elevated concentrations of environmentally-persistent pesticides would be found in the near-surface soils of the subject site. Krazan's sampling and analysis of surface soils from properties with similar histories has typically yielded non-detectable results for analysis of environmentally-persistent pesticides. Therefore, it is not anticipated that elevated concentrations of environmentally-persistent pesticides would be found in the near-surface soils of the subject site.

5.3 Local Regulatory Agency Interface

A review of the most current local regulatory agency records was conducted to help determine if hazardous materials have been handled, stored, or generated on the subject site and/or the adjacent properties and businesses.

City of San Marcos Fire Department

On October 8, 2003, the City of San Marcos Fire Department (SMFD) was contacted regarding records of historical hazardous/flammable permits, hazardous materials handling, hazardous/flammable incidents, and/or underground storage tanks that are on file for the subject site. According to the SMFD, no records for the subject site were available.

San Diego County Department of Environmental Health

On September 26, 2003, the San Diego County Department of Environmental Health (SDCDEH) was contacted regarding records of historical hazardous/flammable permits, hazardous materials handling, hazardous/flammable incidents, and/or underground storage tanks that are on file for the subject site. According to the SDCDEH, no records for the subject site were available.

5.4 Regulatory Agency Lists Review

Several agencies have published documents that list businesses or properties which have handled hazardous materials or waste or may have experienced site contamination. The lists consulted in the course of our assessment were compiled by EDR and Krazan on September 25, 2003, and represent reasonably ascertainable current listings. Krazan did not verify the locations and distances of every property listed by EDR. Krazan verified locations and distances of the properties Krazan deemed as having the potential to pose an environmental impact to the subject site. The actual location of the listed properties may differ from the EDR listings. Table V summarizes the listed properties located within the ASTM Search Radii. The actual distances of the listed properties (which are summarized in Table V) are based on observations during Krazan's site reconnaissance. No unmapped properties were determined to be located within the search radii specified for each of the following lists. General information for the Regulatory Agency Lists reviewed, the Regional Map, and the EDR report are included in Appendix A.

TABLE V
Listed Properties

EDR Radius Map Summary						
Database	**Type of Records**	**Subject Site**	**<1/8 Mile**	**1/8 to ¼ Mile**	**¼ to ½ Mile**	**½ to 1 Mile**

0 = No sites in radius identified
-- = Not Searched

The subject site was not listed in the EDR-provided government database report. One site with a reported release of hazardous materials to the subsurface was reported within a one-eighth-mile radius of the subject site. The Pioneer Mills facility at 1329 West Mission Road, located approximately 239 feet southwest of the subject site was identified on the leaking UST (LUST) database as having had an unauthorized release of petroleum hydrocarbons in July 1988 that impacted groundwater. The property was remediated to the satisfaction of the lead regulatory agency and a "case closure" designation was issued in February 1993. The adjoining gasoline station (San Marcos Gas) at 1290 West Mission Road, located on the northeast corner of West Mission Road and Las Posas Road was identified on the registered UST database as utilizing four 10,000-gallon gasoline USTs. The San Marcos Gas gasoline station was not listed on government databases of known unauthorized releases of hazardous materials to the subsurface and is therefore, deemed to have a low potential to environmentally impact the subject site at this time.

In general, only potentially hazardous materials released from facilities located approximately up-gradient and within a few hundred feet of the site, or in a cross-gradient direction close to the site, are judged to have a reasonable potential of migrating to the site. This opinion is based on the assumption that materials generally do not migrate large distances laterally within the soil, but rather tend to migrate with groundwater in the general direction of groundwater flow. Therefore, based upon various influencing factors including distance from the subject site, down-gradient location and current regulatory status (case closed), the Pioneer Mills facility LUST site is deemed to have a low potential to environmentally impact the subject site.

The remaining properties within the specified search radius of the subject site, which appear on local, state or federally published lists of sites that use or have had releases of hazardous materials, are of sufficient distance and/or situated cross/downgradient to the subject site, such that impact to the subject site is not likely.

6.0 DISCUSSION OF FINDINGS

The subject site comprises one irregular-shaped parcel of land totaling approximately 9.38-acres. Historically the subject site has been vacant land dating to at least 1946. At the time of Krazan's site reconnaissance the subject site was vacant land located on the northwest corner of West Mission Road and Las Posas Road in San Marcos, California. The subject site is covered by native grasses and shrubs. Minor amounts of household trash were scattered throughout the subject site. However, no hazardous materials or other items of environmental concern were observed on or adjacent to the subject site during the site reconnaissance. Based on the current and historic use of the subject site, the likelihood of an impact to the subsurface of by hazardous materials utilized on the subject site appears to be low.

Visual observations of the subject site revealed that exposed surface soils did not exhibit obvious signs of discoloration. No obvious evidence (vent pipes, fill pipes, dispensers, etc.) of USTs was noted within the area observed. No standing water was observed on the subject site. No structures or any indications of previous or former structures, such as foundations, were observed on the subject site. There was no evidence of any fill material observed on the subject site.

One site with a reported release of hazardous materials to the subsurface was reported within a one-eighth-mile radius of the subject site. However, based upon various influencing factors including distance from the subject site, down-gradient location and current regulatory status (case closed), the Pioneer Mills facility LUST site is deemed to have a low potential to environmentally impact the subject site. Based upon Krazan's field observations of adjacent properties, review of the EDR report and regulatory agency records, the potential for adverse environmental impact to the subject site from adjacent properties including the adjoining gasoline station (San Marcos Gas) appears to be low.

Krazan's research of the subject site facility and area properties of environmental concern for this Phase I ESA did not identify evidence of RECs in connection with the subject site.

7.0 CONCLUSIONS/OPINIONS

We have conducted a Phase I ESA of the subject site in conformance with the scope and limitations of the ASTM E1527-00 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Any deviations from this practice were previously described in this report. This assessment has revealed no evidence of RECs in connection with the subject site.

8.0 LIMITATIONS

This reconnaissance and review of the subject site has been limited in scope. This type of investigation is undertaken with the calculated risk that the presence, full nature, and extent of contamination would not be revealed by visual observation alone. Although a thorough site reconnaissance was conducted in accordance with ASTM Guidelines and employing a professional standard of care, no warranty is given, either expressed or implied, that hazardous material contamination or buried structures, which would not have been disclosed through this investigation, do not exist at the subject site. Therefore, the data obtained are clear and accurate only to the degree implied by the sources and methods used.

The findings presented in this report were based upon field observations during a single property visit, review of available data, and discussions with local regulatory and advisory agencies. Observations describe only the conditions present at the time of this investigation. The data reviewed and observations made are limited to accessible areas and currently available records searched. Krazan cannot guarantee the completeness or accuracy of the regulatory agency records reviewed. Additionally, in evaluating the property, Krazan has relied in good faith upon representations and information provided by individuals noted in the report with respect to present operations and existing property conditions, and the historic uses of the property. It must also be understood that changing circumstances in the property usage, proposed property usage, subject site zoning, and changes in the environmental status of the other nearby properties can alter the validity of conclusions and information contained in this report.

This report is provided for the exclusive use of the client noted on the cover page and shall be subject to the terms and conditions in the applicable contract between the client and Krazan. Any third party use of this report shall also be subject to the terms and conditions governing the work in the contract between the client and Krazan. The unauthorized use of, reliance on, or release of the information contained in

this report without the expressed written consent of Krazan is strictly prohibited and will be without risk or liability to Krazan.

Conclusions and recommendations contained in this report are based on the evaluation of information made available during the course of this assessment. It is not warranted that such data cannot be superseded by future environmental, legal, geotechnical or technical developments.

9.0 QUALIFICATIONS

This Phase I ESA was conducted by Krazan's undersigned environmental professional under the supervision of the undersigned registered engineer. The work was conducted in accordance with ASTM 1527-00 and generally accepted industry standards for environmental due diligence in place at the time of the preparation of this report.

If you have any questions or if we can be of further assistance, please do not hesitate to contact our office at (909) 974-4400.

Respectfully submitted,

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL ASTM STANDARD

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 08/13/2003 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, has revealed that there are 17 HAZNET sites within approximately 0.25 miles of the target property.

RCRIS Corrective Action Summary:

Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.
Event Date: 12/15/1997

Event: Igration of Contaminated Groundwater under Control, Unacceptable migration of contaminated groundwater is observed or expected.
Event Date: 12/15/1997

Event: Stabilization Measures Implemented, Groundwater extraction and treatment (e.g., to achieve groundwater containment, to achieve MCL).
Event Date: 01/01/1996

Event: Stabilization Measures Implemented, Primary measure is source removal and/or treatment (e.g., soil or waste excavation, in-situ soil treatment, off-site treatment).
Event Date: 01/01/1996

Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity at the present time for reasons other than 1) it appears to be technically infeasible or inappropriate (NF) or 2) there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.
Event Date: 01/31/1992

SIGNET ARMORLITE (Continued) **1000314091**

Last Delinquent Letter: Not reported
Last Letter Type: Not reported
Violation Notice Issued: Not reported
Map Code/Business Plan on File: Yes
Business Plan Acceptance Date: 07/12/00
Reinspection Date Y2K Compatible: Dec 2001

HMMD DISCLOSURE INVENTORY:

Chemical Name: CARCINOGEN AND/OR REPRO TOXINS, LESS THAN STATE DISCLOSURE AMTS.
Item Number: D162
Stored at 1 Time: 1.00
Measurement Units 0000000001 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000001
Quantity Stored At One Time: CARCINOGEN
Annual Quantity String: 1.00
Material Safety Data Sheet: Not reported
1st Hazard Category: Not reported
2nd Hazard Category: DELAYD HLTH HAZARD

Chemical Name: POTASSIUM HYDROXIDE : STRIPPER 4C

SIGNET ARMORLITE (Continued) **1000314091**

Item Number: D154
Stored at 1 Time: 1975.00
Measurement Units: 0000006600 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000001975
Quantity Stored At One Time: 1310-58-3
Annual Quantity String: 6600.00
Material Safety Data Sheet: M
1st Hazard Category: Not reported
2nd Hazard Category: DELAYD HLTH HAZARD

Chemical Name: ETHYLENE GLYCOL : ANTICONGELANTE
Item Number: D156
Stored at 1 Time: 110.00
Measurement Units: 0000000220 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000110
Quantity Stored At One Time: 107-21-1
Annual Quantity String: 220.00
Material Safety Data Sheet: M
1st Hazard Category: Not reported
2nd Hazard Category: DELAYD HLTH HAZARD

Chemical Name: BYTECH 12 T-SOAP
Item Number: D157
Stored at 1 Time: 1975.00
Measurement Units: 0000006600 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000001975
Quantity Stored At One Time: MIXTURE
Annual Quantity String: 6600.00
Material Safety Data Sheet: P
1st Hazard Category: Not reported
2nd Hazard Category: DELAYD HLTH HAZARD

Chemical Name: NONYL PHENOL ETHOXYLATE 12-T DETERGENT
Item Number: D169
Stored at 1 Time: 600.00
Measurement Units: 0000003600 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000600
Quantity Stored At One Time: 9016-45-9
Annual Quantity String: 3600.00
Material Safety Data Sheet: P
1st Hazard Category: Not reported
2nd Hazard Category: IMMED HEALTH HAZRD

Chemical Name: SODIUM NITRITE : RI-700 RUST INHIBITOR
Item Number: D158
Stored at 1 Time: 55.00
Measurement Units: 0000000165 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000055
Quantity Stored At One Time: 7632-00-0
Annual Quantity String: 165.00
Material Safety Data Sheet: P
1st Hazard Category: Not reported
2nd Hazard Category: DELAYD HLTH HAZARD

Chemical Name: MICRO SOAP 90: 20% GLYCERINE
Item Number: D020
Stored at 1 Time: 275.00

SIGNET ARMORLITE (Continued) **1000314091**

Measurement Units: 0000001000 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000275
Quantity Stored At One Time: 64-02-8
Annual Quantity String: 1000.00
Material Safety Data Sheet: M
1st Hazard Category: Not reported
2nd Hazard Category: IMMED HEALTH HAZRD

Chemical Name: METHYL METHACRYLATE (MMA)
Item Number: D168
Stored at 1 Time: 110.00
Measurement Units: 0000000330 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000110
Quantity Stored At One Time: 80-62-6
Annual Quantity String: 330.00
Material Safety Data Sheet: M
1st Hazard Category: Not reported
2nd Hazard Category: IMMED HEALTH HAZRD

Chemical Name: OXYGEN, COMPRESSED GAS :
Item Number: D161
Stored at 1 Time: 500.00
Measurement Units: 0000001000 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000500
Quantity Stored At One Time: 7782-44-7
Annual Quantity String: 1000.00
Material Safety Data Sheet: C
1st Hazard Category: Not reported
2nd Hazard Category: OTHER

Chemical Name: DIOCTYL PHTHALATE DAP
Item Number: D163
Stored at 1 Time: 110.00
Measurement Units: 0000000330 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000110
Quantity Stored At One Time: 131-17-9
Annual Quantity String: 330.00
Material Safety Data Sheet: M
1st Hazard Category: Not reported
2nd Hazard Category: DELAYD HLTH HAZARD

Chemical Name: SODIUM BISULFITE DECHLOR 20%
Item Number: D164
Stored at 1 Time: 275.00
Measurement Units: 0000000530 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000275
Quantity Stored At One Time: 7631-90-5
Annual Quantity String: 530.00
Material Safety Data Sheet: A
1st Hazard Category: Not reported
2nd Hazard Category: IMMED HEALTH HAZRD

Chemical Name: ALKYL PHENOL ETHOXYLATE CHEM 6031 DET ADD
Item Number: D165
Stored at 1 Time: 110.00
Measurement Units: 0000000220 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000110

SIGNET ARMORLITE (Continued) **1000314091**

Chemical Name: OIL LUBRICATING PETROLEUM
Item Number: D166
Stored at 1 Time: 55.00
Measurement Units: 0000000165 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000055
Quantity Stored At One Time: 64742-54-7
Annual Quantity String: 165.00
Material Safety Data Sheet: M
1st Hazard Category: Not reported
2nd Hazard Category: FIRE HAZARD

Chemical Name: SODIUM MOLYBDATE CLT 545 WT
Item Number: D167
Stored at 1 Time: 220.00
Measurement Units: 0000001100 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000220
Quantity Stored At One Time: 7631-95-0
Annual Quantity String: 1100.00
Material Safety Data Sheet: M
1st Hazard Category: Not reported
2nd Hazard Category: IMMED HEALTH HAZRD

Chemical Name: ARGON, HELIUM COMPRESSED GAS :
Item Number: D153
Stored at 1 Time: 670.00
Measurement Units: 0000000670 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000670
Quantity Stored At One Time: 7440-37-1
Annual Quantity String: 670.00
Material Safety Data Sheet: C
1st Hazard Category: Not reported
2nd Hazard Category: SUDDN RLSE OF PRES

Chemical Name: SULFURIC ACID 35% :
Item Number: D159
Stored at 1 Time: 55.00
Measurement Units: 0000000165 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000055
Quantity Stored At One Time: 7664-93-9
Annual Quantity String: 165.00
Material Safety Data Sheet: P
1st Hazard Category: Not reported
2nd Hazard Category: IMMED HEALTH HAZRD

Chemical Name: D-LIMONENE
Item Number: D010
Stored at 1 Time: 55.00
Measurement Units: 0000000110 Storage Method: Not reported
Carcinogen: Yes Annual Qty String: 0000000055
Quantity Stored At One Time: 5989-27-5
Annual Quantity String: 110.00

SIGNET ARMORLITE (Continued) **1000314091**

EPA Waste Codes Addendum

Code	Description
D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
D002	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
D006	CADMIUM
D007	CHROMIUM
D008	LEAD
D009	MERCURY
D018	BENZENE
D035	METHYL ETHYL KETONE
D039	TETRACHLOROETHYLENE
D040	TRICHLOROETHYLENE
F002	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F003	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE,

EPA Waste Codes Addendum

Code	Description
	CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
U007	ACRYLAMIDE
U007	2-PROPENAMIDE

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ROD: Records Of Decision
Source: EPA
Telephone: 703-416-0223
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 07/09/03
Database Release Frequency: Annually
Date of Last EDR Contact: 07/07/03
Date of Next Scheduled EDR Contact: 10/06/03

DELISTED NPL: National Priority List Deletions
Source: EPA
Telephone: N/A
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/22/03
Database Release Frequency: Quarterly
Date of Last EDR Contact: 08/04/03
Date of Next Scheduled EDR Contact: 11/03/03

FINDS: Facility Index System/Facility Identification Initiative Program Summary Report
Source: EPA
Telephone: N/A
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 07/25/03
Database Release Frequency: Quarterly
Date of Last EDR Contact: 07/02/03
Date of Next Scheduled EDR Contact: 10/06/03

HMIRS: Hazardous Materials Information Reporting System
Source: U.S. Department of Transportation
Telephone: 202-366-4555
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 03/31/03
Database Release Frequency: Annually
Date of Last EDR Contact: 07/23/03
Date of Next Scheduled EDR Contact: 10/20/03

MLTS: Material Licensing Tracking System
Source: Nuclear Regulatory Commission
Telephone: 301-415-7169
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/23/03
Database Release Frequency: Quarterly
Date of Last EDR Contact: 07/02/03
Date of Next Scheduled EDR Contact: 10/06/03

MINES: Mines Master Index File
Source: Department of Labor, Mine Safety and Health Administration
Telephone: 303-231-5959

Date of Government Version: 06/07/03
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 06/30/03
Date of Next Scheduled EDR Contact: 09/29/03

NPL LIENS: Federal Superfund Liens
Source: EPA
Telephone: 202-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Governme Version: 10/15/91
Database Release requency: No Update Planned

Date of Last EDR Contact: 08/25/03
Date of Next Scheduled EDR Contact: 11/24/03

PADS: PCB Activity Da base System
Source: EPA
Telephone: 202-564- 87
PCB Activity Databas PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are uired to notify the EPA of such activities.

Date of Governme Version: 06/30/03
Database Release requency: Annually

Date of Last EDR Contact: 08/13/03
Date of Next Scheduled EDR Contact: 11/10/03

DOD: Department of De nse Sites
Source: USGS
Telephone: 703-648 20
This data set consists f federally owned or administered lands, administered by the Department of Defense, that have any area equ to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Governme Version: 04/01/03
Database Release requency: Semi-Annually

Date of Last EDR Contact: 08/15/03
Date of Next Scheduled EDR Contact: 11/10/03

US BROWNFIELDS: A isting of Brownfields Sites
Source: Environmen Protection Agency
Telephone: 202-566- 77
Included in the listing brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addresse by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Asses ent Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Unde the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields site throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brow elds Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, olitical subdivisions, territories, and Indian tribes become BCRLF cooperative agreement recipients when they enter in BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a propos and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF co erative agreement for specified brownfields-related cleanup activities.

Date of Governme Version: 07/15/03
Database Release requency: Semi-Annually

Date of Last EDR Contact: 09/15/03
Date of Next Scheduled EDR Contact: 12/15/03

RAATS: RCRA Admini tive Action Tracking System
Source: EPA
Telephone: 202-564- 04
RCRA Administration ction Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major olators and includes administrative and civil actions brought by the EPA. For administration actions after Septe ber 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for h ical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossibl continue to update the information contained in the database.

Date of Governme Version: 04/17/95
Database Release equency: No Update Planned

Date of Last EDR Contact: 09/08/03
Date of Next Scheduled EDR Contact: 12/08/03

TRIS: Toxic Chemical R ase Inventory System
Source: EPA
Telephone: 202-260- 31
Toxic Release Invento System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable antities under SARA Title III Section 313.

Date of Governme Version: 12/31/01
Database Releas equency: Annually

Date of Last EDR Contact: 06/27/03
Date of Next Scheduled EDR Contact: 09/22/03

TSCA: Toxic Substances Control Act
Source: EPA
Telephone: 202-260-5521
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/98
Database Release Frequency: Every 4 Years
Date of Last EDR Contact: 09/02/03
Date of Next Scheduled EDR Contact: 12/08/03

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA
Telephone: 202-564-2501

Database Release Frequency: Quarterly
Date of Last EDR Contact: 06/23/03
Date of Next Scheduled EDR Contact: 09/22/03

SSTS: Section 7 Tracking Systems
Source: EPA
Telephone: 202-564-8008
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/00
Database Release Frequency: Annually
Date of Last EDR Contact: 07/24/03
Date of Next Scheduled EDR Contact: 10/20/03

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Telephone: 202-564-2501
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/15/03
Database Release Frequency: Quarterly
Date of Last EDR Contact: 06/23/03
Date of Next Scheduled EDR Contact: 09/22/03

STATE OF CALIFORNIA ASTM STANDARD RECORDS

AWP: Annual Workplan Sites
Source: California Environmental Protection Agency
Telephone: 916-323-3400
Known Hazardous Waste Sites. California DTSC's Annual Workplan (AWP), formerly BEP, identifies known hazardous substance sites targeted for cleanup.

Date of Government Version: 08/31/03
Date Made Active in EDR: 09/17/03
Database Release Frequency: Annually
Date of Data Arrival at EDR: 09/02/03
Elapsed ASTM days: 15
Date of Last EDR Contact: 09/02/03

CAL-SITES: Calsites Database
Source: Department of Toxic Substance Control
Telephone: 916-323-3400
The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database.

Date of Government Version: 08/31/03
Date Made Active in EDR: 09/17/03
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 09/02/03
Elapsed ASTM days: 15
Date of Last EDR Contact: 09/02/03

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CHMIRS: California Hazardous Material Incident Report System
Source: Office of Emergency Services
Telephone: 916-845-8400
California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 12/31/02
Date Made Active at EDR: 08/07/03
Database Release Frequency: Varies
Date of Data Arrival at EDR: 07/11/03
Elapsed ASTM days: 27
Date of Last EDR Contact: 08/25/03

CORTESE: "Cortese" Hazardous Waste & Substances Sites List
Source: CAL EPA/Office of Emergency Information
Telephone: 916-323-3400
The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

Date of Government Version: 04/01/01
Date Made Active at EDR: 07/26/01
Database Release Frequency: No Update Planned
Date of Data Arrival at EDR: 05/29/01
Elapsed ASTM days: 58
Date of Last EDR Contact: 07/28/03

NOTIFY 65: Proposition 65 Records
Source: State Water Resources Control Board
Telephone: 916-445-3846
Proposition 65 Notification Records. NOTIFY 65 contains facility notifications about any release which could impact drinking water and thereby expose the public to a potential health risk.

Date of Government Version: 10/21/93
Date Made Active at EDR: 11/19/93
Database Release Frequency: No Update Planned
Date of Data Arrival at EDR: 11/01/93
Elapsed ASTM days: 18
Date of Last EDR Contact: 07/23/03

TOXIC PITS: Toxic Pits Cleanup Act Sites
Source: State Water Resources Control Board
Telephone: 916-227-4364
Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/95
Date Made Active at EDR: 09/26/95
Database Release Frequency: No Update Planned
Date of Data Arrival at EDR: 08/30/95
Elapsed ASTM days: 27
Date of Last EDR Contact: 08/04/03

SWF/LF (SWIS): Solid Waste Information System
Source: Integrated Waste Management Board
Telephone: 916-341-6320
Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 06/13/03
Date Made Active at EDR: 07/07/03
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 06/16/03
Elapsed ASTM days: 21
Date of Last EDR Contact: 09/15/03

WMUDS/SWAT: Waste Management Unit Database
Source: State Water Resources Control Board
Telephone: 916-227-4448
Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Date of Government Version: 04/01/00
Date Made Active at EDR: 05/10/00
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 04/10/00
Elapsed ASTM days: 30
Date of Last EDR Contact: 09/12/03

LUST: Leaking Underground Storage Tank Information System
Source: State Water Resources Control Board
Telephone: 916-341-5740
Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 04/02/03
Date Made Active at EDR: 04/25/03
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 04/16/03
Elapsed ASTM days: 9
Date of Last EDR Contact: 07/08/03

CA BOND EXP. PLAN: Bond Expenditure Plan
Source: Department of Health Services
Telephone: 916-255-2118
Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/89
Date Made Active at EDR: 08/02/94
Database Release Frequency: No Update Planned
Date of Data Arrival at EDR: 07/27/94
Elapsed ASTM days: 6
Date of Last EDR Contact: 05/31/94

CA UST:

UST: Active UST Facilities
Source: SWRCB
Telephone: 916-341-5700
Active UST facilities gathered from the local regulatory agencies

Date of Government Version: 04/02/03
Date Made Active at EDR: 04/30/03
Database Release Frequency: Semi-Annually
Date of Data Arrival at EDR: 04/16/03
Elapsed ASTM days: 14

Date of Next Scheduled EDR Contact: 10/20/03

REF: Unconfirmed Properties Referred to Another Agency
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
This category contains properties where contamination has not been confirmed and which were determined as not requiring direct DTSC Site Mitigation Program action or oversight. Accordingly, these sites have been referred to another state or local regulatory agency.

Date of Government Version: 08/31/03
Database Release Frequency: Quarterly
Date of Last EDR Contact: 09/02/03
Date of Next Scheduled EDR Contact: 12/01/03

SCH: School Property Evaluation Program
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 08/31/03
Database Release Frequency: Quarterly
Date of Last EDR Contact: 09/02/03
Date of Next Scheduled EDR Contact: 12/01/03

NFE: Properties Needing Further Evaluation
Source: Department of Toxic Substances Control
Telephone: 916-323-3400
This category contains properties that are suspected of being contaminated. These are unconfirmed contaminated properties that need to be assessed using the PEA process. PEA In Progress indicates properties where DTSC is currently conducting a PEA. PEA Required indicates properties where DTSC has determined a PEA is required, but not currently underway.

Date of Next Scheduled EDR Contact: 12/01/03

HAZNET: Hazardous Waste Information System
Source: California Environmental Protection Agency
Telephone: 916-255-1136
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROP AL DATABASES

EDR Historica **Dry Cleaners:** EDR has searched select national collections of business directories and has collected listing eaner and gas station/filling station/service station sites that were available to EDR researc as limited to those categories of sources that might, in EDR's opinion, include dry cleaning and gas statio ce station establishments. The categories reviewed included, but were not limited to: *gas, gas sta filling station, auto, automobile repair, auto service station, service station, dry cleaner, clea mat, cleaning/laundry, wash & dry, etc.*

This informat st and complement environmental professionals in their conduct of environmental site assessment be a substitute for a full historical investigation as defined in ASTM E1527. The information p etary database may or may not be complete; i.e., the absence of a dry cleaner or gas station/filling s site does not necessarily mean that such a site did not exist in the area covered by this repor

(A note on "c s not possible for EDR to differentiate between establishments that use PERC on-site as a cleaning s nction simply as drop-off and pick-up locations or that are traditional wet cleaning/laundry facilities. Th or environmental professionals to incorporate professional judgment in the evaluation of each site.)

EDR's GeoChe — Source Addendum has been developed to assist the environmental professional with the collectic — source information in accordance with ASTM 1527-00, Section 7.2.3. Section 7.2.3 re — USGS 7.5 Minute Topographic Map (or equivalent, such as the USGS Digital Elevation Mode — requires that one or more additional physical setting sources be sought when (1) condi — fied in which hazardous substances or petroleum products are likely to migrate to or — d (2) more information than is provided in the current USGS 7.5 Minute Topographic M — enerally obtained, pursuant to local good commercial or customary practice, to assess the i — recognized environmental conditions in connection with the property. Such additional phys — enerally include information about the topographic, hydrologic, hydrogeologic, and geologic ch — , and wells in the area.

Assessment of — inant migration generally has two principle investigative components:

1. Groundwate
2. Groundwate

Groundwater fl — npacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and — water flow velocity is generally impacted by the nature of the geologic strata. EDR's GeoCh — ource Addendum is provided to assist the environmental professional in forming an opi — of potential contaminant migration.

GROUNDWATE **)RMATION**

Groundwater f. for a particular site is best determined by a qualified environmental professional using site spec rata data. If such data are not reasonably ascertainable, it may be necessary to rely on other , including geologic age identification, rock stratigraphic unit and soil characteristics by properties and regional soil information. In general, contaminant plumes move more qui velly types of soils than silty-clayey types of soils.

GEOLOGIC INF **L AREA OF TARGET PROPERTY**

Geologic infor ie environmental professional in forming an opinion about the relative speed at which conta e occurring.

EDR Inquiry # 6526060.3	Contact: Gabby Cyrulik

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 3FC0-4E69-8D7B

PO # W Mission Rd & N Las Posas Rd

Project C3-8450

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 3FC0-4E69-8D7B

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Hillmann Environmental Co. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

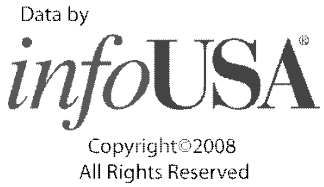
EXECUTIVE SUMMARY



DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no

further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1

RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 9 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/25/2021 has revealed that there are 8 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 2 UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 24 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Hazardous Waste Summary:
Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

CVS PHARMACY #7127 (Continued) **1015753054**

Waste Code: D003
Waste Description: REACTIVE WASTE

Waste Code: D004
Waste Description: ARSENIC

Waste Code: D005
Waste Description: BARIUM

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D007
Waste Description: CHROMIUM

Waste Code: D008
Waste Description: LEAD

Waste Code: D009
Waste Description: MERCURY

Waste Code: D010
Waste Description: SELENIUM

Waste Code: D011
Waste Description: SILVER

Waste Code: D016
Waste Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Waste Code: D018
Waste Description: BENZENE

Waste Code: D022
Waste Description: CHLOROFORM

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: D025
Waste Description: P-CRESOL

Waste Code: D026
Waste Description: CRESOL

Waste Code: D027
Waste Description: 1,4-DICHLOROBENZENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, &

CVS PHARMACY #7127 (Continued) **1015753054**

SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: P042
Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: P081
Waste Description: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

Waste Code: P188
Waste Description: BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U034
Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U035
Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

Waste Code: U070
Waste Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Waste Code: U072
Waste Description: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

CVS PHARMACY #7127 (Continued) **1015753054**

Waste Code: U089
Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U132
Waste Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U188
Waste Description: PHENOL

Waste Code: U200
Waste Description: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

Waste Code: U201
Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U204
Waste Description: SELENIOUS ACID (OR) SELENIUM DIOXIDE

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U206
Waste Description: D-GLUCOSE, 2-DEOXY-2-[[(METHYLNITROSOAMINO)-CARBONYL]AMINO]- (OR) GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR) STREPTOZOTOCIN

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow

PACIFIC BELL SNMCCA11/DB151 (Continued) **U003789294**

to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 01/07/2019. Inspection Sequence ID:6005611;Tank ID:20360;Violation Description:(TCR 9b) Failure to comply with one or more of the following overfill prevention equipment requirements: 1. Alert the transfer operator when the tank is 90% full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30m before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95% of capacity and activate an audible alarm at least 5m before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95% of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. 5. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equip

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Document Type:	Site Screening
Completed Date:	08/13/1991
Comments:	PA Report was reviewed by Region 4 staff. The site is located at 217

TORREY CHEMICAL CO. (Continued) **S101481993**

Las Posas R. between Mission Rd. & Hwy 78 in San Marcos. The area is industrial, but Palomar College is north of Mission Rd. Site includes 4,000 sf bldg., 2 small storage sheds, outdoor drum storage area, and abandoned above ground storage tanks (550 gal.). Chemical company is still operating repackaging and storing various chemical products (Algi-gon pool treatment etc.). No sampling result were considered in EPA's PA. Staff recommends PEARM to de- termine if there is a problem DTSC should address.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

File Location:	Local Agency
Local Case Number:	H05181-004
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	The Site is an active gasoline station and mini-market at 125 North Ranch Santa Fe Road in San Marcos, California. Station facilities consist of four underground storage tanks (USTs), two dispenser islands, a building, parking, and a landscaped area (southern portion of the Site). The USTs, associated dispensers and product piping were replaced in October 1993 and the dispensers and product piping were replaced again in November 2003. Based on the results of soil sampling, Unauthorized Release Case H05181-004 was opened. Soil removed during the 1993 UST removal was placed back in the excavation area for future remediation. In addition, soil was excavated for the current UST area, which is adjacent and to the west of the former USTs. Most of the soil removed was transported off-site for disposal, but 80-100 cubic yards of soil removed between 5 and 15 feet bgs from the southern portion of the current UST area was reportedly used to complete backfilling the former UST area. A total of approximately 1,100 cubic yards (1,479 tons) of soil have been removed from the Site to date. Measurable free product have previously been reported in wells MW-1, MW-2, MW-3, MW-6 and MW-8. LPH was last reported in well MW-1 (sheen detected during well purging) in May 2008. Approximately 132 gallons of LPH have been reportedly removed from Site wells to date using a vacuum truck, petro trap and rubberizer boom, and by hand bailing. An unknown amount has been removed from the use of absorbent socks, previous remedial system operation, and 2003 high vacuum dual-phase extraction (HVDPE) feasibility testing. In March 2011, extraction well EW-1 and injection wells IW-1, IW-2, IW-3 were installed, for use during the feasibility testing. From September 13 through 16, 2011, an in situ chemical oxidation (ISCO) test was conducted, which involved the injection of approximately 1,436 gallons of a 12% solution of sodium persulfate, approximately 15.5 gallons of a 6% solution of hydrogen peroxide into IW-1, IW-2 and IW-3, and approximately 20.5 gallons of a 3% solution of hydrogen

GLENN YOUNG (Continued) **U001572203**

peroxide into wells IW-1 and IW-3. The high vacuum dual-phase extraction (HVDPE) testing involved three events that were performed during three consecutive months, utilizing EW-1 for extraction. A 117-hour event was performed in November, a 90-hour HVDPE event in December 2011 and a 90-hour event in January 2012, resulting in the removal of a total of approximately 2,190 gallons of groundwater and 26 pounds of gasoline range organics (GRO) as vapor. In August 2003, a CAP was submitted, recommending soil vapor extraction (SVE), followed by remediation by natural attenuation (RNA) as the most cost-effective remedial action for the Site. In January 2004, a SVE system was installed at the Site and operation began. Due to asymptotic vapor concentrations from source wells, SECOR discontinued system operation in January 2006. The system removed and treated approximately 2,762 pounds of GRO (also reported as volatile fuel hydrocarbons in previous reports), 1.34 pounds of benzene and 2.9 pounds of MTBE from wells VE-1, VE-2, MW-1, MW-2, MW-3, MW-4, MW-8, and MW-9. In June 2008, four vapor points were installed around the station building, as part of a vapor risk assessment (VRA). Based on the soil vapor sample data, none of the analyzed VOCs that were listed in the VRA model were detected at or above laboratory reporting limits. The excess cancer risk to workers and customers in the existing or possible future buildings on the site was determined to be less than the one-in-a-million level. In March 2003, a high-vacuum dual-phase extraction (HVDPE) feasibility testing was performed using a mobile remediation system. A 24-hour test was performed using MW-2 as the extraction well and a 23-hour test was performed using MW-3 as the extraction well. Based on the testing data, HVDPE appeared to be an effective method to remove subsurface hydrocarbons beneath the site, but the groundwater recovery was slow and inconsistent. Approximately 400 gallons of fluids and 273 pounds of hydrocarbons as vapor were removed during testing, with an average groundwater removal rate of 0.14 gallons per minute (per well). Evaluation of benzene and MTBE concentration trends using linear regression trend lines, consideration of decreasing average benzene and MTBE concentrations, and BIOSCREEN modeling provide converging lines of evidence that RNA is occurring at the site and benzene and MTBE concentrations will reach MCLs through RNA processes. Estimates of the time needed for benzene and MTBE to reach MCLs (derived from estimates based on BIOSCREEN) are less than 50 years for benzene and less than 25 years for MTBE. These appear to correlate well with the estimates for near-source area wells MW-1 and MW-3 from linear regression trend lines with benzene ranging from 6 to 49 years, and MTBE ranging from <1 to 24 years. Based on the pounds of hydrocarbons removed during SVE and the HVDPE test, the estimated hydrocarbon mass remaining in soil is 2,075 pounds.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D003
Waste Description:	REACTIVE WASTE
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D009
Waste Description:	MERCURY
Waste Code:	D011
Waste Description:	SILVER
Waste Code:	D018
Waste Description:	BENZENE

SIGNET ARMORLITE (Continued) **1000314091**

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: D040
Waste Description: TRICHLORETHYLENE

Waste Code: F001
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: P005
Waste Description: 2-PROPEN-1-OL (OR) ALLYL ALCOHOL

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U007
Waste Description: 2-PROPENAMIDE (OR) ACRYLAMIDE

Waste Code: U080
Waste Description: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Waste Code: U112
Waste Description: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

SIGNET ARMORLITE (Continued) **1000314091**

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U236
Waste Description: 2,7-NAPHTHALENEDISULFONIC ACID,3,3'-[(3,3'-DIMETHYL[1,1'-BIPHENYL]-4,4'-DIYL)BIS(AZO)BIS[5-AMINO -4-HYDROXY]-, TETRASODIUM SALT (OR) TRYPAN BLUE

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D003
Waste Description:	REACTIVE WASTE
Waste Code:	D007
Waste Description:	CHROMIUM

SIGNET ARMORLITE (Continued) **1000314091**

Waste Code:	D009
Waste Description:	MERCURY
Waste Code:	D011
Waste Description:	SILVER
Waste Code:	D018
Waste Description:	BENZENE
Waste Code:	D035
Waste Description:	METHYL ETHYL KETONE
Waste Code:	D039
Waste Description:	TETRACHLOROETHYLENE
Waste Code:	D040
Waste Description:	TRICHLORETHYLENE
Waste Code:	F001
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F002
Waste Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	F003
Waste Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Waste Code:	P005
Waste Description:	2-PROPEN-1-OL (OR) ALLYL ALCOHOL
Waste Code:	U002
Waste Description:	2-PROPANONE (I) (OR) ACETONE (I)

SIGNET ARMORLITE (Continued) **1000314091**

Waste Code: U007
Waste Description: 2-PROPENAMIDE (OR) ACRYLAMIDE

Waste Code: U080
Waste Description: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Waste Code: U112
Waste Description: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U220
Waste Description: BENZENE, METHYL- (OR) TOLUENE

Waste Code: U236
Waste Description: 2,7-NAPHTHALENEDISULFONIC ACID,3,3'-[(3,3'-DIMETHYL[1,1'-BIPHENYL]-4,4'-DIYL)BIS(AZO)BIS[5-AMINO -4-HYDROXY]-, TETRASODIUM SALT (OR) TRYPAN BLUE

Potential Media Affected:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Acetone, Benzene, Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Freon, Diesel, Gasoline
Site History:	The Facility is approximately 11.8 acres in size and contains buildings associated with the manufacture, marketing, and distribution of optical lenses. Site assessment activities have been conducted at the Facility since the early 1990s. Investigations revealed the presence of VOCs, including methylene chloride, in soil and groundwater at the Facility. Signet has undertaken four remedial actions at the Facility, as well as subsequent investigation activities to assess the adequacy of the remedial actions. Active remediation has included operation of a multiphase extraction system

SIGNET ARMORLITE (Continued) **1000314091**

(MPE system) from 1995 to 1998 to remove subsurface VOCs from source areas at the Facility. Additionally, three targeted source removal actions have been conducted at the Facility since 1986. Remedial activities have included removal and disposal of contaminated soil and addition of soil amendments to facilitate in-situ degradation. In late 2009, an interim remedial measure to extract VOCs from deep groundwater was evaluated, and the findings of this evaluation are incorporated into the CAP.

Quarterly Update:	WB Lead Agency for corrective action: Signet Armorlite Inc. (SAI) is located at 1001 Armorlite Drive, San Marcos, in northern San Diego County. Land use in the immediate vicinity is industrial. An Interim Status Document was issued to the facility by the U.S. EPA on January 4, 1982, for storage and treatment of these RCRA units: (1) hazardous waste storage unit, (1) elementary neutralization unit, (1) methylene chloride still, and (1) methylene chloride evaporation unit. SAI was classified as a treatment, storage, and disposal facility (TSDF). On November 2, 1984, the Department of Health Services denied SAIs request for hazardous waste reclassification from a TSDF to generator status, due to storage of hazardous waste on-site for longer than 90 days. The primary operations generated waste streams from the manufacturing plastic eyeglass lenses, and included the storage of nonchlorinated waste solvents, sodium hydroxide and water, and chlorinated waste solvents. As a treatment facility, SAI utilized two recovery units: one carbon adsorption unit and one distillation unit. The units were used to recover methylene chloride. The facility was formally clean closed by the U.S. EPA in a letter dated June 30, 1992. Our records indicate that in December 1997, the facility was referred to the Regional Water Quality Control Board (RWQCB) San Diego Region, as the lead agency for corrective action at the facility. In a letter dated October 28, 2005, the DTSC formally acknowledged that the RWQCB is the lead agency for corrective action at the facility.

Longitude:	-117.199069505
Status:	Open - Remediation
Status Date:	11/17/2000
Case Worker:	LT
RB Case Number:	9UT3709
Local Agency:	SAN DIEGO COUNTY LOP
File Location:	Regional Board
Local Case Number:	Not reported
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	Gasoline contaminated soil was discovered during a Phase II Environmental Assessment conducted in 1998. Thirteen soil borings were drilled and soil samples were collected as part of the Phase II investigation. Total petroleum hydrocarbons as gasoline (TPHg)were detected at 1,000 mg/kg and BTEX and MTBE were also detected in soil samples. Groundwater monitoring wells were installed in 2000. TPHg, BTex and MTBE at 1,000 ug/l were detected in groundwater samples. See Environmental Data Tab for additional information.

Status: Completed - Case Closed
Status Date: 07/06/2011
Case Worker: JC
RB Case Number: 9UT3937
Local Agency: SAN DIEGO COUNTY LOP
File Location: Local Agency
Local Case Number: H04814-002
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: The Site is a maintenance/operations facility owned and operated by the County of San Diego. In May 1999, two USTs were removed and soil samples were collected and analyzed under the direction of DEH. Based on laboratory results, case H04814-002 was opened on July 8, 1999. A total of seven groundwater monitoring wells have been installed to investigate the petroleum release at this Site. The wells were monitored and sampled at various times between 2000 and 2009. The sampling events demonstrated that the benzene and MTBE dissolved plumes have not migrated offsite and are localized in the area of the former underground storage tank and dispensers. The consultant, by trend analysis, estimates that benzene in groundwater will reach MCLs by 2015. The consultant estimates that MTBE in groundwater will reach MCLs by 2022. TBA concentrations in some wells have increased due to the breakdown of MTBE; however the plume appears stable and the

CNTY OF SD SAN MARCOS RD STATION (Continued) **S104746029**

residual TBA will not adversely impact human health or the environment. DEH estimates that TBA will attenuate to action levels 10 years beyond the degradation of MTBE or by approximately 2032. The consultant estimates that the volume of petroleum hydrocarbon-impacted soil with Total Petroleum Hydrocarbon concentrations as gasoline above 100 mg/kg is approximately 35 cubic yards. A Corrective Action Plan was prepared and completed its public review period on June 4, 2010. The remedial action chosen was natural attenuation. Additionally, public notification was completed to adjacent property owners. No groundwater production wells are located on, adjacent to or within \\% mile of the Site. The closest surface water body to the Site is approximately 1.14 miles. The residual petroleum hydrocarbons in soil and groundwater do not present a significant risk to human health or the environment. DEH concurs with the recommendation of No Further Action.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Potential Contaminants of Concern: Gasoline
Site History: An underground storage tank was damaged during well installation activities resulting in a subsurface release of approximately 3,200 gallons of unleaded gasoline. Contaminated soil was discovered during the removal of the waste oil tank in April 1991, and the gasoline underground storage tanks and dispensers in June 2003. Quarterly groundwater monitoring has been conducted at the site since August

TEXACO (Continued) **U001572231**

1989. The consultant overseeing this case is also overseeing the Former Chevron Station (H13261-002) and Former Shell Station (H03229-001) that are located on Rancho Santa Fe Road. Groundwater at the three sites is jointly monitored and sampled. See ESI for additional information.

Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Stoddard solvent / Mineral Spriits / Distillates
Site History:	The North County Factory Outlet site is occupied by a single story, high-bay type, office-warehouse-shop building with 106,157 square feet (ft2) of area and an attached 2-story parking garage with associated asphalt parking areas and driveways and surrounding landscaped areas. The Site was undeveloped land until it was developed beginning in 1970 with the new Spanjian Sportswear, Inc. facility. They built the facility and operated there from 1971 to 1985.

Waste Code:	D036
Waste Description:	NITROBENZENE
Waste Code:	F002

MACDERMID PRINTING SOLUTIONS (Continued) **1000344725**

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F008
Waste Description: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

Waste Code: P022
Waste Description: CARBON DISULFIDE

Waste Code: P105
Waste Description: SODIUM AZIDE

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U008
Waste Description: 2-PROPENOIC ACID (I) (OR) ACRYLIC ACID (I)

Waste Code: U037
Waste Description: BENZENE, CHLORO- (OR) CHLOROBENZENE

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U052
Waste Description: CRESOL (CRESYLIC ACID) (OR) PHENOL, METHYL-

Waste Code: U080

MACDERMID PRINTING SOLUTIONS (Continued) **1000344725**

Waste Description: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

Waste Code: U138
Waste Description: METHANE, IODO- (OR) METHYL IODIDE

Waste Code: U147
Waste Description: 2,5-FURANDIONE (OR) MALEIC ANHYDRIDE

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U162
Waste Description: 2-PROPENOIC ACID, 2-METHYL-, METHYL ESTER (I,T) (OR) METHYL METHACRYLATE (I,T)

Waste Code: U196
Waste Description: PYRIDINE

Waste Code: U201
Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U209
Waste Description: 1,1,2,2-TETRACHLOROETHANE (OR) ETHANE, 1,1,2,2-TETRACHLORO-

Waste Code: U213
Waste Description: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

Waste Code: U227
Waste Description: 1,1,2-TRICHLOROETHANE (OR) ETHANE, 1,1,2-TRICHLORO-
