Former Citation: Not reported

ENVIROSTOR:
Name: DELTA PLATING, INC.
Address: 818 SOUTH STANISLAUS STREET
City,State,Zip: STOCKTON, CA 95206
Facility ID: 71003777
Status: Inactive - Action Required
Status Date: 11/04/2020
Site Code: 550006
Site Type: Tiered Permit
Site Type Detailed: Tiered Permit
Acres: 0.5
NPL: NO
Regulatory Agencies: SMBRP
Lead Agency: SMBRP
Program Manager: Gregory Ruiz
Supervisor: Fernando A. Amador
Division Branch: Cleanup Sacramento
Assembly: 13
Senate: 05
Special Program: Not reported
Restricted Use: NO
Site Mgmt Req: NONE SPECIFIED
Funding: Not reported
Latitude: 37.94576
Longitude: -121.2793
APN: 147-294-12
Past Use: METAL PLATING - OTHER
Potential COC: Chromium VI Copper and compounds Cyanide (free Nickel
Confirmed COC: Chromium VI Copper and compounds Cyanide (free Nickel
Potential Description: SOIL
Alias Name: 147-294-12
Alias Type: APN
Alias Name: CAD068845254
Alias Type: EPA Identification Number
Alias Name: 110021363576
Alias Type: EPA (FRS #)
Alias Name: 102371
Alias Type: Project Code (Site Code)
Alias Name: 550006
Alias Type: Project Code (Site Code)
Alias Name: 71003777
Alias Type: Envirostor ID Number

AMERICAN SAVINGS BANK (Continued) **S106230418**

Potential Media Affected: Not reported
Potential Contaminants of Concern: Not reported
Site History: From 1917 to 1956, the Site was used as an automotive repair facility which also dispensed gasoline. State Savings and Load constructed a two-story office building at the Site in 1961 and operated it as a bank until 1982. American Savings and Loan used the building from 1984 to 1988. The building is currently vacant. There are no records of a tank at the Site. The tank was likely excavated during construction of the building in 1961.

Click here to access the California GeoTracker records for this facility:

RB Case Number:	390586
Local Agency:	Not reported
File Location:	Local Agency
Local Case Number:	1042
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	July 1997 groundwater contamination containing MtBE was noted at a non-operating Shell Station site located down-gradient from the ARCO station. February 1999 three 12,000 gallon underground storage tanks removed, contamination was noted under the tanks. The site investigation began after this with the installation of four groundwater monitoring wells. Between June 2000 and May 2004 additional groundwater monitoring wells, both shallow and deep, were installed. The site is defined; the problem area is around the MW-4/MW-8M/MW-8D/MW-12 cluster of wells located near the former dispenser island area. The EHD has requested interim remediation of these wells to lower contaminant concentrations. Quarterly batch extractions began in third quarter 2008. The EHD sent notification to the Regional Water Quality Control Board on 6/10/10 of their intent to close the site. In preparation for closure, destruction of all groundwater monitoring wells began on 10/18/10.

Local Agency: Not reported
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: One 1000-gasoline UST removed in Site Case #1 area. 8 MWs were installed, remedial wells installed, and active SVE/IAS was conducted. Post remediation monitoring evaluation conducted, soil vapor samples collected post remediation which pass ESLs and CHHL's. This site will be evaluated for NFAR, but this case is linked to on-site Case 2 C.F. reimbursement.

File Location:	Regional Board
Local Case Number:	1166
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	**********START Public notes********** Two USTs removed 10-22-1990. Contamination noted in laboratory soil samples. Site enters LOP February 5, 1993. Eight monitoring wells installed from Sept 1995 to April 2003. Soil vapor extraction remediation conducted Dec 2005 to Third Quarter 2006. EHD requires additional remediation. IAS tested by not feasible. GWE tested June 2009. Results pending. Ground water extraction/treat/discharge currently being pilot tested, October, 2009. 3-8-2010: Receive and review report of GWE pilot test. 5-27-10: EHD comment letter of report of GWE-require Feasibility Study by June 30, 2010. Review NOT submitted as of 12-08-2010. April 21, 2011: EHD directive letter to submit many missing Geotracker submittals by May 27, 2011. July 1, 2011: Many, but NOT all Geotracker submittals uploaded by consultant on June 2, 2011-Work plan for two GW extraction wells and addn'l pump test submitted also. July 13, 2011: EHD approves workplan to continue GWE pilot and requires schedule for all activities to be submitted by July 29, 2011. July 29, 2011: Upgradient consulting submits schedule. Aug 3, 2011: EHD recieves WP addendum to already approved GWE workplan and reduces all work/wells. Aug 5, 2011: EHD approves GWE WPaddn and directs multiple dates for all activities to be completed with report of findings and feasibility study due Nov 18, 2011. Reports not submitted, work not done, monitoring not continuing-site referred to CVRWQCB in letter dated Jan 13, 2012. <<<<<<<<<<<<<<<END of public notes>>>>>>>>>>>>>

Local Agency:	Not reported
File Location:	Local Agency
Local Case Number:	Not reported
Potential Media Affect:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Gasoline
Site History:	December 3, 2004- One underground storage tank (UST), located in the city of Stockton right-of-way under the west sidewalk, was removed. Soil samples were collected from beneath the tank. Analytical results of the soil reported petroleum hydrocarbon impact. January 2005- The tank pit area was excavated to try and dig out the contamination; they did not, deeper soil samples more highly impacted than the shallow ones. February 19, 2008- Soil boring SB-1 was advanced within the former tank pit to 50 ft. below surface grade (bsg). Analytical results yielded 590,000 micrograms per liter (a%g/L) of total petroleum hydrocarbons as diesel (TPH-d) in groundwater sampled at 34 ft. bsg. TPH-d was also detected in 4 soil samples collected within SB-1 between 20-48 ft. bsg; the highest concentration being 4,500 milligrams per kilogram (mg/kg) at 29.5 ft. bsg. (Report dated 3/24/2008) November 12 and 13, 2008- CPT borings were advanced up to 100 ft. bsg. CPT-1 (4 separate borings) yielded as high as 3,600 a%g/L TPH-d in groundwater sampled at 61 ft. bsg and yielded as high as 3,500 mg/kg TPH-d in soil sampled at 60 ft. bsg. CPT-2 (3 separate borings) yielded 5,800 a%g/L TPG-d in the sole groundwater sample taken from 41 ft. bsg and yielded as high as 4,600 mg/kg TPH-d in soil sampled at 35 ft. bsg. CPT-3 (one boring) has no available chemical analytical data. (Report dated 1/5/2009)

Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: Site is located on the southwest corner of California Street and East Miner Avenue in Stockton, in the parking lot for the building at 242 Sutter Street. The location is the site of a former Chevron facility; at least two generations of tanks are documented at the site, but there are no records of the tank removals. Site investigation activites were initiated by the current property owner, Sutter Office Center, in May 2000 with the installation of geoprobe soil borings. Soil and grab groundwater samples were collected for analysis and confirmed there are petroleum hydrocarbons in the subsurface soil and groundwater. Groundwater monitoring wells were first installed in 2001; CPT borings in 2003; additional groundwater monitoring wells in 2005, 2007 and 2009; additional borings in 2007. Chevron was named a responsible party and took over the site investigation in 2006.

Potential Media Affect: Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern: Gasoline
Site History: January 2008- One underground storage tank was removed from beneath the sidewalk (City of Stockton right-of-way) near the corner of Minor Street and Hunter. Soil samples were collected; laboratory analytical results reported petroleum hydrocarbon impact to the samples. June

CANCUN RESTAURANT (Continued) **S108996997**

2008- A site investigation began with the installation of four geoprobe soil borings; soil and grab groundwater samples were collected; laboratory analytical results confirmed the petroleum hydrocarbon impact to both soil and groundwater. July through August 2010- Five monitoring wells were installed (MW-1A, MW-1B, MW-2B, MW-3B, MW-4B). December 2013 through January 2014- In-Situ Chemical Oxidation (ISCO) pilot study was conducted.

Completed Sub Area Name:	Not reported
Completed Document Type:	Phase 1
Completed Date:	07/07/1994
Comments:	Pursuant to the MOU, DTSC has reviewed a Phase I Environmental assessment report and a preliminary asbestos survey for the Channel Street Clinic. The property, owned by the Agricultural Workers' Health Centers, Inc. (AWHC), contains two vacant connected buildings which previously housed a children's day care center. AWHC is proposing to remodel the buildings to accommodate the relocation of thier current Stockton health clinic. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property, there is no contamination on the property.

Completed Date: 01/27/1999
Comments: 5YEAR -- A FIVE YEAR REVIEW AND RE-EVALUATION HAS BEEN COM- PLETED. SITE CONTAMINANTS (LEAD AND ZINC) REMAIN STABILIZED UNDER AN ASPHALT CAP WITH NO CONTAMINANT MIGRATION DETECTED BELOW THE STABILIZED MATERIAL. DUE TO DETERIORATION, THE ASPHALT CAP REQUIRED REPAIR AND THREE GROUNDWATER MONITORING WELLS REQUIRED DESTRUCTION. THESE REPAIR ACTIVITIES HAVE BEEN COMPLETED UNDER DTSC OVERSIGHT AS A FOLOWUP TO THE 5 YEAR REVIEW.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: 5 Year Review Reports
Completed Date: 01/27/1999
Comments: 5YEAR -- A FIVE YEAR REVIEW AND RE-EVALUATION HAS BEEN COM- PLETED. SITE CONTAMINANTS (LEAD AND ZINC) REMAIN STABILIZED UNDER AN ASPHALT CAP WITH NO CONTAMINANT MIGRATION DETECTED BELOW THE STABILIZED MATERIAL. DUE TO DETERIORATION, THE ASPHALT CAP REQUIRED REPAIR AND THREE GROUNDWATER MONITORING WELLS REQUIRED DESTRUCTION. THESE REPAIR ACTIVITIES HAVE BEEN COMPLETED UNDER DTSC OVERSIGHT AS A FOLOWUP TO THE 5 YEAR REVIEW.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction
Completed Date: 08/17/1989
Comments: Restriction related to Area A described on attached map. Use shall not be for residences, hospitals, schools for persons under age 21, day-care centers or permanently occupied human habitation, including hotels or motels which are used as a permanent residence by employees. No excavation and removal off-site of any soils from underneath the overlying asphalt cap. No use of the property shall be allowed that may disturn the integrity of the final cap.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Operation & Maintenance Order/Agreement
Completed Date: 12/26/1990
Comments: The Enforceable Agreement is for Operation and Maintenance of the Cap.

Longitude:	-121.296301511917
Case Type:	Cleanup Program Site
Case Worker:	Not reported
Local Agency:	Not reported
RB Case Number:	SLT5S028
File Location:	DTSC
Potential Media Affected:	Under Investigation
Potential Contaminants of Concern:	Other Metal
Site History:	ACME Galvanizing Co., Inc. operated at the site from 1968 to 1982 producing galvanized metal parts. Two know spills of hazardous materials occurred during operations. The site is located within an area marked by light/medium industry and residential dwelling. located within three blocks west of the site is Hazelton School. Washington School and Edison High School are within one mile radius. The area features numerous schools within a three mile radius. Stockton State Hospital is located one and one half miles northeast of the site, The site is flanked on the west by Interstate 5.

Alternate Address:	540 WEST SCOTTS AVENUE
Alternate City,St,Zip:	STOCKTON, CA 95203
Background Info:	Lead and zinc contaminated soil was excavated to heath based soil cleanup levels, chemically stabilized, and redisposed onsite into a trench and capped with asphalt. Acidic soil was also neutralized. A deed restriction and O & M Agreement for continued maintenance of the cap have been recorded. The site was certified in January 1991.
Comments Date:	12011985
Comments:	Sample Results: Zinc 18,000 mg/kg; Lead 440 mg/kg; Low PH.

CA BOND EXP. PLAN:
Reponsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company: Acme Galvanizing Company, Inc.
Project Revenue Source Addr: 1655 17th Street
Project Revenue Source City,St,Zip: Oakland, CA 94607
Project Revenue Source Desc: DHS has budgeted $50,000 for related direct costs. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with remedial investigations and cleanup activities. The property owner is funding the site characterization and remedial action at the site. State Bond funds may be expended for oversight activities.
Site Description: Acme Galvanizing was in operation prior to February, 1982. A molten zinc dip bath was used to coat metal objects that were cleaned using sulfuric acid and caustic. The site was closed when the zinc bath developed a leak and caused molten zinc to spill onto the ground.
Hazardous Waste Desc: Acid soil, lead and zinc are the principle contaminants at this site.
Threat To Public Health & Env: The soil is contaminated to at least 12 feet. Ground water may be affected, but has not been sampled. Ground water contamination would provide the most likely pathway for human contact in the area.
Site Activity Status: A preliminary investigation indicated high levels of zinc and lead contamination in the soil. DHS issued the final RAO on November 17, 1987. A RI/FS work plan was submitted to DHS on February 1, 1988. A revised RI/FS work plan was approved on August10, 1988.

Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline

J.C. TRUCKING (Continued) **S101592890**

Site History: May 1992- Four underground storage tanks were removed from the site, the tanks were located in two separate tank pit locations. Soil samples for analysis were collected from the tank pits; laboratory results reported petroleum hydrocarbon impact to the soil. August 1997- A site investigation began with the installation of geoprobe soil borings. Soil and grab groundwater samples were collected for analysis, petroleum hydrocarbon impact was confirmed. April 1999-May 2001- Additonal soil borings and groundwater monitoring wells were installed both on and offsite. December 2004- Site remediation of the impacted groundwater by ozone infusion was started. June 2009- Soil vapor samples were collected for analysis and review of potential for vapor intrusion from remaining contamination. A Closure Report was submitted on November 16, 2009; A concurrance request was submitted to the Regional Water Quality Control Board on November 19, 2009. Concurrence was received on December 21, 2009. Monitoring and remediaion wells were destroyed in April 2010. No Further Action letter issued June 9, 2010.

Lead Agency: SAN JOAQUIN COUNTY
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0607700081
Global Id: T0607700081
Latitude: 37.9563709
Longitude: -121.2950425
Status: Completed - Case Closed
Status Date: 02/20/2013
Case Worker: Not reported
RB Case Number: 390110
Local Agency: Not reported
File Location: Local Agency
Local Case Number: 1163457
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: May 1986- Three underground storage tanks were removed from the site. The site is one of several properties located on West Fremont Street and currently owned by the City of Stockton; it is the location of the Stockton Area and Stockton Ballpark. The site has undergone investigation, and some remediation prior to the city redevelopment project but the monitoring wells have not yet been reinstalled.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

LUST:
Name: CRYSTAL CREAM & BUTTER
Address: 404 FREMONT ST W
City,State,Zip: STOCKTON, CA 95203
Lead Agency: CENTRAL VALLEY RWQCB (REGION 5S)
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0607700029
Global Id: T0607700029
Latitude: 37.9565269
Longitude: -121.2977805
Status: Open - Verification Monitoring
Status Date: 10/16/2018
Case Worker: VJF
RB Case Number: 390041
Local Agency: Not reported
File Location: Local Agency
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: The site is currently owned by the City of Stockton; it is located on West Fremont Street near the area of the Waterfront Hotel, Stockton Arena and Stockton Ballpark. September 1986- One underground storage tank was removed, petroleum hydrocarbon contamination was noted in the soil beneath the tank. October 1986- A site investigation began with the installation of soil borings and groundwater monitoring wells. Some overexcavation of the tank pit area was done. January + July 1987- Additional overexcavations were conducted, final depth of tank pit area 22 feet bsg. January 1991-February 2002- additional borings, groundwater monitoring wells and remediation wells were installed. Site work was halted for the City redevelopment project, and should resume.

Status: Open - Remediation
Status Date: 09/15/2010
Case Worker: VJF
RB Case Number: 390675
Local Agency: Not reported
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: May 1991- Four underground storage tanks, three product and one waste oil, were removed from the site. Soil samples for analysis were collected from beneath the tanks. Laboratory reported petroleum hydrocarbon contamination under the product tank #3 North. February 2000- Site assessment began with the installation of geoprobe soil borings; soil and grab groundwater samples were collected. May 2000 thru March 2008- Groundwater monitoring wells, geoprobe soil borings, CPT soil borings were installed both on and off site to define the plume. The site is not defined. Site remediation has been directed since 2007. Soil Vapor Extraction system began operation 9/10.

File Location:	Local Agency
Local Case Number:	1061
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Gasoline
Site History:	12/27/1991, four USTs removed. 2/18/1992, UAR and Prop 65 notifications completed. 3/25/1992, seven soil borings, TH-1 through TH-7, advanced on site. 4/2/1992, NOR issued to Frank Morita. 9/29,30/1992, MW-1, MW-2 and MW-3 installed. Between 9/1999 and 12/2003 16 additional monitoring wells installed (19 total MWs). 3/31/1993 and 5/17/1993, two phases of overexcavation of former tank pit. 4/29/2008, Risk evaluation and soil &soil gas investigation report issued. 2/05/2009, the EHD concurred that the risk and hazard of vapor intrusion was minimal. 5/20/2009, the EHD the site status to Regional Board for possible closure consideration. 9/10/2009, site consultant issued Site Closure Summary Report recommending site closure. 10/29/2009, the EHD sent the 30-day notification of site closure to the Central Valley Regional Water Quality Control Board. 11/18/2009; the Reional Board issued a concurrence letter for site closure. 12/01/2009, the EHD issued letter notifying the RPs that site closure was pending, directing destruction of the site monitoring wells, and requesting an updated certification of Record Fee Title Owners. 4/24/2010 through 4/28/2010; EHD witnessed destruction of 17 groundwater monitoring wells. Two wells were transferred to RP for the 749 E. Charter Way site. 8/16/2010; the EHD received by email a properly signed hazardous waste manifest for disposal of investigation derived wastes. 8/18/2010; the EHD issued a No Further Action Required Letter closing the site and updated GeoTracker.

File Location:	Regional Board
Local Case Number:	Not reported
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Xylene
Site History:	All workplans, monitoring reports, and associated remedial reports are submitted to ARCO site as CPA combined reports by ARCO, 441 W. Charter Way for Former Texaco, 440 W. Charter Way; Columbo/Toscana, 1444 S. Lincoln St.; and Chevron, 508 W. Charter Way. See 441 W. Charter Way for electronic copy. This site operated as a retail gasoline station until 1995. The underground storage tanks were removed in 1996, petroleum contamination was noted in the soil beneath the tanks. A site investigation began in July 1991; groundwater monitoring wells and soil vapor extraction wells were installed through 2006. SVE remediation was conducted from January 1997 through February 1998; estimate was that 1,600 gallons of petroleum hydrocarbons were removed. During 2005 nearly all groundwater and remediation wells were destroyed to allow for redevelopment of the site, and reinstalled in different locations. Additional air sparging wells were also installed. Soil vapor extraction/air sparging remediation was started in October 2006; in March 2009 pulse operation began, two weeks on two weeks off.

Case Worker:	AMB
RB Case Number:	390268
Local Agency:	Not reported
File Location:	Regional Board
Local Case Number:	Not reported
Potential Media Affect:	Aquifer used for drinking water supply
Potential Contaminants of Concern:	Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Xylene
Site History:	All workplans, monitoring reports, and associated remedial reports are submitted to ARCO site as CPA combined reports by ARCO, 441 W. Charter Way for Former Texaco, 440 W. Charter Way; Columbo/Toscana, 1444 S. Lincoln St.; and Chevron, 508 W. Charter Way. See 441 W. Charter Way for electronic copy. October 1988- Soil contaminated with petroleum hydrocarbons was discovered during dispenser replacement activities. Minor overexcavation was performed. May 1989-May 1990- Soil borings and groundwater monitoring wells were installed. April 1992- Soil vapor extraction wells were installed and a vapor extraction pilot test was performed. September 1993- Additional groundwater montoring wells were installed. June 1999- Four underground storage tanks were removed from the site. Nov 2000, Nov 2001+ Sept 2004- Cone penetrometor test borings were installed. August 2002- Deep groundwater montioring wells were installed. 3/4/2010- Case transferred to Regional Board for commingled plume account. October 2005- Additional deep groundwater monitoring wells were installed. October 2007- Additional shallow and deep groundwater monitoring wells were installed. The site is still not defined; a work plan for additional investigation was approved for implementation by the EHD on March 24, 2009. Shell is trying to get offsite access.

- Potential Media Affect: Aquifer used for drinking water supply
- Potential Contaminants of Concern: Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Other Petroleum, Toluene, Xylene
- Site History: The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

APNS: 155-070-01, 15507001
Description: The 1.35 acre site was previously used for the refurbishing of helicopter rotor blades. The results of the Preliminary Endangerment Assessment indicate that elevated metals (primarily Lead) are present in shallow soils on the site in the vicinity of an area that appears to have received rinse water from cleaning of rotor blades. Additionally, elevated lead concentrations were detected in shallow soils on the site near the property boundaries near the rinse area. Additional investigation in 2007 indicated that lead is present above screening levels in the unpaved areas of the Site and a Removal Action Work Plan (RAW) was approved in 2008 which called for capping the unpaved areas of the Site for a remedy. The current owner is unable to fund the RAW at this time and thus it is still pending. However, a Land Use Covenant has been placed on the property to ensure safety in the interim.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2021

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

NEW LIFE MENS FACILITY
429 S. SAN JOAQUIN STREET
STOCKTON, CA 95203

TARGET PROPERTY COORDINATES

Latitude (North):	37.948629 - 37° 56' 55.06''
Longitude (West):	121.286367 - 121° 17' 10.92''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	650566.6
UTM Y (Meters):	4201294.5
Elevation:	17 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640424 STOCKTON WEST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

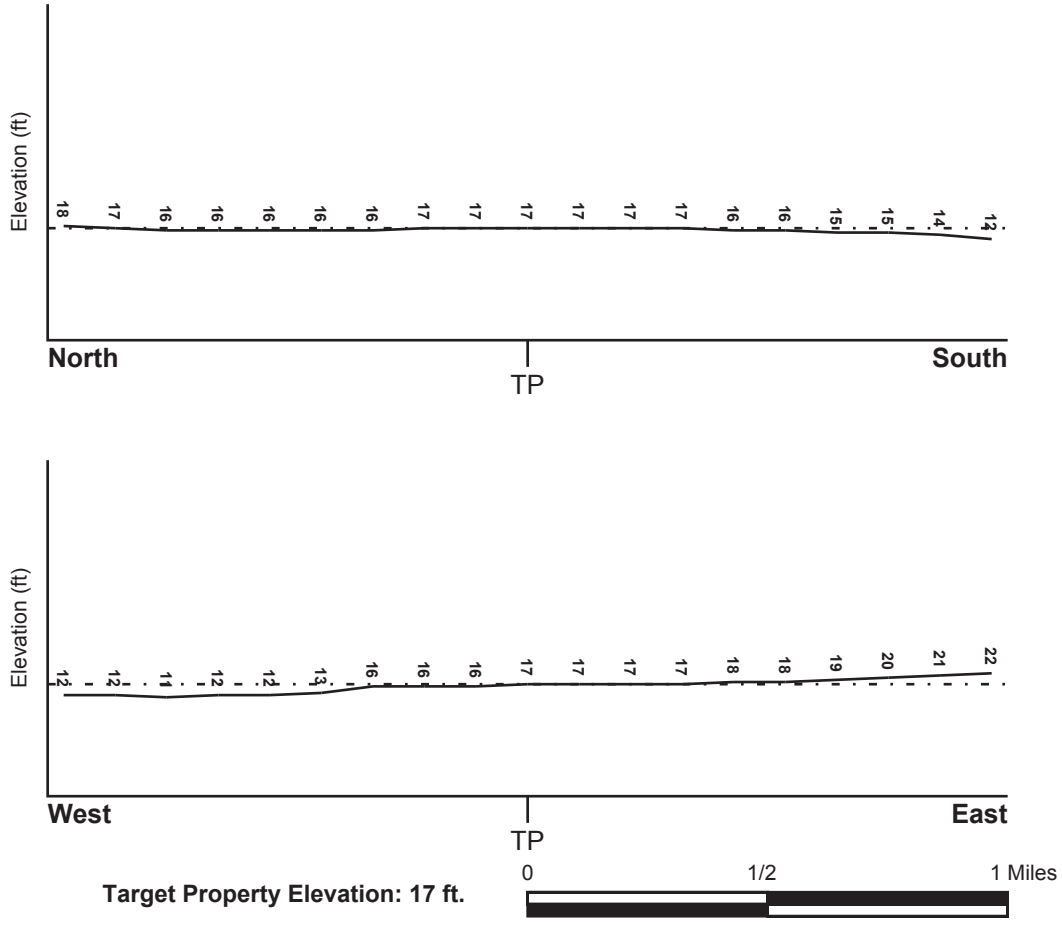
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 17 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06077C0460F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06077C0470F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
STOCKTON WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles West
Site Name:	Mccormick & Baxter Creosoting Co
Site EPA ID Number:	CAD009106527
Surficial Aquifer Flow Dir.:	East
Measured Depth to Water:	16 feet to 40 feet.
Hydraulic Connection:	The surficial aquifer recharges the lower aquifer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: YELLOWLARK

Soil Surface Texture: gravelly loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:
2	7 inches	38 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:
3	38 inches	46 inches	very gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:
4	46 inches	53 inches	gravelly clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
5	53 inches	59 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:
6	59 inches	61 inches	cemented	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: 0 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: JACKTONE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 152 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	22 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Condor Earth Technologies, Inc were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Condor Earth Technologies, Inc were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1906 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX E

ALL APPROPRIATE INQUIRY (AAI)
PHASE I ENVIRONMENTAL SITE ASSESSMENT (ESA)
USER QUESTIONNAIRE

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user of the Phase 1 ESA must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in determination that "all appropriate inquiries" is not complete.

I. GENERAL INFORMATION

Site Name: New Life Men's Facility Phase I ESA

Address: 429-431 and 435-437 South San Joaquin Street, Stockton, CA

Person Completing Questionnaire: Wayne Richardson

Company Name/Title: Gospel Center Rescue Mission

Telephone Number: 209-320-2312

Date of Completion: August 18, 2021

II. REQUIRED INFORMATION

1. Environmental liens that are filed or recorded against the *property* (40 CFR 312.25)

Did a search *of recorded land title records* (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state, or local law? Note 1: In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and Activity Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

None.

2. Activity and land use limitation that are in place on the *property* or that have been filed or recorded against the *property* (40 CFR 312.26(a)(1)(v) and (vi)).

Did a search of *recorded land title* records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?

None.

3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the property or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

None other than noted by the Environmental Professional.

4. Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

Not applicable as there is no change in ownership and, therefore, no purchase price.

5. Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the *property*?
(b.) Do you know of specific chemicals that are present or once were present at the *property*?
(c.) Do you know of spills or other chemical releases that have taken place at the *property*?
(d.) Do you know of any environmental cleanups that have taken place at the *property*?

None other than noted by the Environmental Professional.

6. The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of releases at the *property*?

None.

III. ADDITIONAL REQUESTED INFORMATION

The following information is intended to assist the environmental professional in preparing the Phase 1 ESA but is not necessarily required to qualify for one of the LLPs.

1. State the reason why this Phase 1 ESA is required/requested:

Owner requests demolition of the two properties

2. State the type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.

Residential property purchase.

3. State the complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful, if not already provided):

   429-431 and 435-437 South San Joaquin Street, Stockton, CA APN: 149-066-070

4. State the scope of services desired for the Phase 1 ESA, including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of an AAI Phase 1 ESA are to be considered:

   None other than ASTM E 1527-13 Phase I ESA.

5. Identify all parties, if known, who will rely on the Phase 1 ESA Report:

   None.

6. Identify the site contact and how the contact can be reached:

   Myself or the Environmental Professional

7. List any special terms and conditions which must be agreed upon by the *environmental professional*:

   None.

8. Provide any other knowledge or experience with the *property* that may be pertinent to the *environmental professional*, for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition:

   None.

Please return your completed questionnaire to:

PHASE I ENVIRONMENTAL SITE ASSESSMENT
HAZARDOUS MATERIALS QUESTIONNAIRE

This questionnaire has been prepared by Condor Earth Technologies, Inc. (Preparer) by request of the prospective purchaser of the property. You are receiving this questionnaire because your property is being evaluated for potential hazardous materials pursuant to the due diligence process. In order to determine if hazardous materials may be present in soil, groundwater, or in building materials, all reasonably obtainable information must be solicited from persons knowledgeable about the history of the property. Hazardous materials include agricultural chemicals, petroleum products (oils and fuels), and unknown chemical spills. The questionnaire is voluntary on your part, as part of the customary practice we are conducting. Please respond to the best of your ability at your earliest convenience. When responding in the affirmative please circle or indicate property or adjoining property. To provide additional information, please describe reason for any affirmative answers on a separate sheet of paper. If you have questions, please contact Alex Dewitt at (209) 601-4631. Thank you for your attention to this matter.

	QUESTION	OBSERVED DURING SITE VISIT	OWNER	OCCUPANTS
1.	To the best of your knowledge, has the *property* or any *adjoining property* used for an industrial use presently or in the past?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
2.	To the best of your knowledge has the *property* or any *adjoining property* been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
3.	Are there currently, or to the best of your knowledge have there been previously, any damaged or discarded automobile or industrial batteries, or pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the *property* or at the facility?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____

Initials: LBC

	QUESTION	OBSERVED DURING SITE VISIT	OWNER	OCCUPANTS
4.	Are there currently, or to the best of your knowledge have there been previously, any industrial *drums* (typically 55 gal [208 L]) or sacks of chemicals located on the property or at the facility? **Empty 55-gallon drums used for trash cans.**	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
5.	Has *fill dirt* been brought onto the property that originated from a contaminated site or that is of an unknown origin?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
6.	Are there currently, or to the best of your knowledge have there been previously, any *pits, ponds, or lagoons* located on the *property* in connection with waste treatment or waste disposal?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
7.	Is there currently, or to the best of your knowledge have there been previously, any stained soil on the *property*?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
8.	Are there currently, or to the best of your knowledge have there been previously, any registered or unregistered storage tanks (above or underground) located on the *property*?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
9.	Are there currently, or to the best of your knowledge have there been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the *property*?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
10.	Are there currently, or to the best of your knowledge have there been previously, any flooring, drains, or walls located within the facility that are stained by substances other than water or are emitting foul odors?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____

Initials: LBC

	QUESTION	OBSERVED DURING SITE VISIT	OWNER	OCCUPANTS
11.	Are there currently, or to the best of your knowledge have there been previously, any wells pipes open to the subsurface, or sumps located on the property.	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
12.	Does the *owner* or *occupant* of the *property* have any knowledge of *environmental liens* or governmental notification relating to the past or recurrent violations of environmental laws with respect to the *property* or any facility located on the *property*?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
13.	Has the *owner* or *occupant* of the *property* been informed of the past or current existence of *hazardous substances* or petroleum *products* or environmental violations with respect to the *property* or any facility located on the *property*?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
14.	Does the *property* discharge wastewater on or adjacent to the *property* other than storm water into a sanitary sewer system?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
15.	To the best of you knowledge, have any *hazardous substances* or *petroleum products*, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the *property*?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____
16.	Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCB's on the *property*?	Yes _____ No ___X___ Unknown ____	Yes _____ No ___X___ Unknown ____	Yes _____ No _____ Unknown ____

The **preparer** of this form must complete the following required information.

This questionnaire was completed by:

Name: Luke Castle

Title: Associate Geologist

Firm: Condor Earth

Address: 188 Frank West Circle, Stockton, CA 95206

Phone Number: 209.536.7379

Date: 8/18/2021

If the preparer is different than the user, complete the following:

Name of User: _____

Address of User: _____

Phone Number of User: _____

Relationship of Preparer to Site: _____

Relationship of Preparer to User

_____ Principal
_____ Employee
_____ Agent
_____ Consultant
_____ Other: _____

Preparer represents that to the best of his/her knowledge the above statements and facts are true and correct and to the best of his/her actual knowledge no material facts have been suppressed or misstated.

Date: 8/18/2021 Name: Luke Castle

Title: Associate Geologist

APPENDIX F

Proposal and Scope of Work
PHASE I ENVIRONMENTAL SITE ASSESSMENT

NEW LIFE MEN'S FACILITY
429 S. SAN JOAQUIN STREET
STOCKTON, CALIFORNIA

July 7, 2021
CET # 8639

INTRODUCTION

Condor Earth (Condor) will perform a Phase I Environmental Site Assessment (ESA) on property located at 429 S. San Joaquin Street, Stockton, California. The Phase I ESA will be conducted for Base Camp Environmental, Inc. (Client). The subject property is designated as Assessor's Parcel Number (APN) 149-066-07 (Site). Condor will follow the guidelines set forth in Practice E 1527-13, *Standard of Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process,* published November 2013, by the American Society for Testing and Materials (ASTM), hereinafter referred to as "the Standard." After completion, Condor will deliver a comprehensive Phase I ESA report to the Client for the Site.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

The purpose of each ASTM Phase I ESA is to assist the Client with appropriate inquiry into the previous ownership and uses of the property to satisfy this element of the *innocent landowner, contiguous property owner,* or *bona fide prospective purchaser* limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability: "*landowner liability protections*" or "*LLPs.*" It should be understood that a Phase I ESA is a preliminary investigation of the Site. In the event that hazardous substances are found during the course of a Phase I ESA, or if any conditions suggesting the possibility that such substances exist, Condor recommends that a Phase II ESA be performed to further investigate existing or potential contamination. Condor will perform the four tasks listed below, which include an historical research and records review, Site reconnaissance, limited interviews, and report preparation.

Task 1. Historical Records Review

The history of the Site will be reviewed to learn about permits granted, citations issued, uses of the Site, and properties immediately adjacent to the Site. Reasonably obtainable topographic maps, real estate maps, and aerial photos will also be reviewed to assess land uses at and near the Site. If the above records are not obtainable at a reasonable cost, Condor will inform the Client of their unavailability.

Records retained by federal, state, and local agencies for properties within an approximate minimum search distance (MSD) will be reviewed for potential environmental liability. Parallel with the Standard, only non-confidential, reasonably obtainable, and practically reviewable records will be reviewed.

Client's (User's) Responsibilities

According to the Standard, it is the end user's responsibility to identify the reason why the user wants to have the Phase I ESA performed; to report to Condor any identified activity and use limitations (AULs) or environmental liens (reasonably ascertainable Title and Judicial records); and to communicate any actual knowledge and/or any commonly known or reasonably ascertainable information of environmental liens or AULs, and any specialized knowledge or experience, in regards to recognized environmental conditions, the user is aware of **before** the site reconnaissance.

Provision of Helpful Documents
According to the Standard, the property owner, the key site manager, and/or the user shall make known to Condor if any helpful documents (listed below) are reasonably available (and any other documents applicable/relating to the current and historical environmental and use conditions of the site) for review **prior** to the site reconnaissance. The following list is not totally inclusive:

- Environmental site assessment and compliance audit reports;
- Environmental permits (wastewater, hazardous waste disposal, NPDES, etc.);
- Registrations for underground and aboveground storage tanks;
- Registrations for underground injection systems;
- Material safety data sheets;
- Community right-to-know plans;
- Safety and/or prevention plans;
- Hydrogeologic reports;
- Driller/well reports;
- Notices or correspondence from any governmental agencies in regards to violations of environmental laws or liens;
- Hazardous waste generator notices/reports;
- Geotechnical studies;
- Risk assessments; and
- Recorded activity and use limitations.

Task 2. Site Reconnaissance

A visit to the Site will be made and a current description of the Site, including existing observable structures, roads, potable water supply systems, sewage disposal systems, and uses of the Site will be developed. Observations will be made on the Site, along the periphery of the Site, along the periphery of all structures on the Site, and in all areas common to the Site and adjacent properties, to assess if conditions suggest that hazardous substances are present on, or might migrate to the Site. Consistent with the Standard, the observations made during the Site visits will be limited to visual and/or physical observations in these areas where practical and/or unobstructed. Obvious terrain characteristics of concern, such as areas of distressed vegetation, ground stains, landfills, and depressions will also be identified. If accessible, the interior of any structures on the Site will also be inspected. Observations of the properties located immediately adjacent to the Site will be made from the Site and from public right-of-ways to assess whether there exists on such properties, potential sources of regulated materials that could lead to adverse environmental impacts to the Site.

Upon request by the Client, Condor will orally report specific areas of environmental concern where testing and/or subsurface investigations are required or recommended.

Task 3. Interviews

Interviews will be conducted, if reasonably possible, with present and past owners of the Site, operators, and occupants (as applicable) familiar with the Site, to evaluate the nature and extent of current and past activities on the Site and on the properties in the vicinity of the Site. The Client will be responsible for securing permission for Condor to interview the aforementioned persons. If Condor is unable to contact the aforementioned persons for any reason, Condor will inform the Client. If reasonably obtainable, interviews will also be held with representatives of state and/or local agencies.

Task 4. Evaluation and Report Preparation

Condor will provide a summary of the key issues and observations to the Client in the form of an oral report, upon request. A written report of the findings of the assessment will be prepared upon completion of Tasks 1 through 3 for the Site. The report will include information to support the conclusions reached by Condor that relate to the environmental condition of the Site, and to the potential environmental liability, if any, imposed by the Site or by neighboring properties within the search area. The deliverables will include up to one hard copy and one electronic copy of the report. Additional hard copies can be included for additional fees if requested.

EXCLUSIONS FROM SCOPE OF WORK

Chain of Title

This scope of work excludes research into the title history of the Site. Condor has learned that its clients are better served by engaging a professional title company to complete research into the title history of a property. Condor will review the title history of the Site, if provided by the Client, as part of the Site use histories. In order to fully comply with the Standard, the Client should review reasonably ascertainable recorded land title records and lien records for environmental liens or activity and use limitations.

Other Non-CERCLA Considerations

There may be risks associated with some potential hazards at some properties that parties to a real estate transaction may elect to assess, even though the hazards are not included in CERCLA's definitions of hazardous substances and are not subject to incurrence of response costs under CERCLA. Those substances include, but are not necessarily limited to:

1. Asbestos,
2. Mold,
3. Radon, and
4. Lead-based paint

The scope of work for this assessment specifically recognizes that evaluation of these non-CERCLA substances is excluded from consideration. Condor is, however, willing to negotiate a modified scope of work and cost for this investigation if an evaluation for these substances is required.

SITE ACCESS AND SITE CONDITIONS

The Client will grant or obtain free access to the Site for all equipment and personnel necessary for Condor to perform the work set forth in this Scope of Work. The Client will notify any and all possessors of the project Site that the Client has granted Condor free access to the Site.

DISCOVERY OF UNANTICIPATED HAZARDOUS MATERIALS

Condor agrees to notify the Client when unanticipated hazardous materials or suspected hazardous materials are encountered. The Client agrees to make any disclosures required by law to the appropriate governing agencies. The Client also agrees to hold Condor harmless for any and all consequences of disclosures made by Condor or the Client, which are required by governing law. In the event the project Site are not owned by the Client, the Client recognizes that it is the Client's responsibility to inform the property owner of the discovery of unanticipated hazardous materials or suspected hazardous materials.

Notwithstanding any other provision of this Scope of Work, the Client waives any claim against Condor and, to the maximum extent permitted by law, agrees to defend, indemnify, and save Condor harmless from any claim, liability, and/or defense costs for injury or loss arising from Condor's discovery of unanticipated hazardous materials or suspected hazardous materials, including, but not limited to, any costs created by delay of the project and any costs associated with possible reduction of the property's value.

LIMITATIONS

The purpose of a Phase I ESA is not to prove that no hazardous materials are present at the Site, but it is intended to assist the Client with appropriate inquiry into the previous ownership and uses of the property to satisfy this element of the *LLPs* to Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability. The use of an environmental professional will minimize and manage the risk of environmental difficulty, but it cannot completely eliminate the risk.

Condor will not warrant or certify that the Site is free of contaminants, because it is impossible to know if such a condition exists. Contaminants may be present in areas that are not accessible for inspection or sampling. Contaminants can migrate later into areas that are inspected or sampled during the ESA. A prudent and professional consultant can only supply an opinion and cannot certify that certain conditions exist when it is impossible to know that such conditions exist.

ESTIMATED SCHEDULE

Condor will commence Site assessment activities upon receipt of a signed contract for this work. Condor will complete the Scope of Work within seven weeks. Every effort will be made to complete the assessment report as soon as possible.

APPENDIX G

GLOSSARY OF TERMS AND ACRONYMS

abandoned property – *property* that can be presumed to be deserted, or an intent to relinquish possession or control can be inferred from the general disrepair or lack of activity thereon such that a reasonable person could believe that there was an intent on the on the part of the current *owner* to surrender rights to the *property*.

activity and use limitations – legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the *property*, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or *engineering controls*, are intended to prevent adverse impacts to individuals or populations that may be exposed to *hazardous substances* and *petroleum products* in the soil, soil vapor, groundwater, and/or surface water on the *property.*

actual knowledge - the knowledge actually possessed by an individual who is a real person, rather than an entity. Actual knowledge is to be distinguished from constructive knowledge, that is, knowledge imputed to an individual or entity.

adjoining properties - any real *property* or properties the border of which is contiguous or partially contiguous with that of the *property*, or that would be contiguous or partially contiguous with that of the *property* but for a street, road, or other thoroughfare separating them.

aerial photographs – photographs taken from an aerial platform with sufficient resolution to allow identification of development and activities of areas encompassing the *property*. *Aerial photographs* are often available from government agencies or private collections unique to a local area.

all appropriate inquiry – that inquiry constituting "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined in CERCLA, 42 USC § 9601 (35)(B) that will qualify a party to a *commercial real estate transaction* for one of the threshold criteria for satisfying the *LLPs* to CERCLA, (42 USC §9601(A) and (B) and 9607(b)(3), §9607(q); and §9607(r)) liability assuming compliance with other elements of the defense.

antecedent environmental liabilities - Liabilities that arise from a problem that is solely the result of a previous third party's activities, and yet attach to a subsequent owner and/or operator of a property.

approximate minimum search distance – the area for which records must be obtained and reviewed pursuant to Section 8 subject to the limitations provided in that section. This may include areas outside the *property* and shall be measured from the nearest *property* boundary. This term is used in lieu of radius to include irregularly shaped properties.

bona fide prospective purchaser liability protection – (42 USC §9607(r)) – a person may qualify as a bona fide prospective purchaser if, among other requirements, such person made "all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices." Knowledge of contamination resulting from *all appropriate inquiry* would not generally preclude this liability protection. A person must make *all appropriate inquiries* on or before the date of purchase. The facility must have been purchased after January 11, 2002.

Brownfields Amendments – amendments to CERCLA pursuant to the Small Business Liability Relief and Brownfields Revitalization Act, Pub. L. No. 107-118 (2002), 42 USC §§9601 *et seq*.

building department records – those records of the local government in which the *property* is located indicating permission of the local government to construct, alter, or demolish improvements on the *property*.

business environmental risk – a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of *commercial real estate*, not necessarily limited to those environmental issues required to be investigated.

commercial real estate - any real *property* except a *dwelling* or *property* with no more than four *dwelling* units exclusively for residential use (except that a *dwelling* or *property* with no more than four *dwelling* units exclusively for residential use is included in this term when it has a commercial function, as in the building of such *dwellings* for profit). The term includes but is not limited to undeveloped real *property* and real *property* used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; *property* used for residential purposes that has more than four residential *dwelling* units; and *property* with no more than four *dwelling* units for residential use when it has a commercial function, as in the building of such *dwellings* for profit.

commercial real estate transaction – a transfer of title to or possession of real *property* or receipt of a security interest in real *property*, except that it dos not include transfer of title to or possession of real *property* with respect to an individual *dwelling* or building containing fewer than five *dwelling* units, nor does it include the purchase of a lot or lots to construct a *dwelling* for occupancy by a purchaser, but a *commercial real estate* transaction does include real *property* purchased or leased by persons or entities in the business of building or developing *dwelling* units.

Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) – the list of sites compiled by EPA that EPA has investigated or is currently investigating for potential *hazardous substance* contamination for possible inclusion on the *National Priorities List*.

construction debris – concrete, brick, asphalt, and other such building materials discarded in the construction of a building or other improvement to *property*.

contaminated public wells – public wells used for drinking water that have been designated by a government entity as contaminated by *hazardous substances* (for example, chlorinated *solvents*), or as having water unsafe to drink without treatment.

contiguous property owner liability protection – (42 USC §9607(q)) – a person may qualify for the *contiguous property owner liability protection* if, among other requirements, such person owns real *property* that is contiguous to, and that is or may be contaminated by *hazardous substances* from real *property* that is not owned by that person. Furthermore, such person conducted *all appropriate inquiry* at the time of acquisition of the *property* and did not know or have reason to know that the *property* was or could be contaminated by a release or threatened release from the contiguous *property*. The *all appropriate inquires* must not result in knowledge or contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the *contiguous property owner liability protection*.

controlled recognized environmental condition – a *recognized environmental condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property* use restrictions, *activity and use limitations*, *institutional controls*, or *engineering controls*).

CORRACTS list – a list maintained by EPA of *hazardous waste* treatment, storage, or disposal facilities and other RCRA-regulated facilities (due to past interim status or storage of *hazardous waste* beyond 90 days) that have been notified by the US Environmental Protection Agency to undertake corrective action under RCRA. The *CORRACTS list* is a subset of the EPA database that manages RCRA data.

data failure – a failure to achieve the historical research objectives even after reviewing the *standard historical sources* that are *reasonably ascertainable* and likely to be useful.

data gap – a lack or inability to obtain information required despite *good faith* efforts by the *environmental professional* to gather information. *Data gaps* may result from incompleteness in and of the activities required by this practice, including, but not limited to *site reconnaissance* (for example, an inability to conduct the *site visit*), and *interviews* (for example, an inability to interview the *key site manager*, regulatory officials, etc.).

de minimis condition – a condition that generally does not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not *recognized environmental conditions* nor *controlled recognized environmental conditions.*

demolition debris – concrete, brick, asphalt, and other such building materials discarded in the demolition of a building or other improvement to *property*.

drum – a container (typically, but not necessarily, holding 55 gal (208 L) of liquid) that may be used to store *hazardous substances* or *petroleum products*.

dry wells – underground areas where soil has been removed and replaced with pea gravel, coarse sand, or large rocks. *Dry wells* are used for drainage, to control storm runoff, for the collection of spilled liquids (intentional and non-intentional) and *wastewater* disposal (often illegal).

due diligence - the process of inquiring into the environmental characteristics of a parcel of *commercial real estate* or other conditions, usually in connection with a *commercial real estate* transaction. The degree and kind of *due diligence* vary for different properties and differing purposes.

dwelling – structure or portion thereof used for residential habitation.

engineering controls (EC) – physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the *property*. *Engineering controls* are a type of activity and use limitation (AUL).

environmental compliance audit – the investigative process to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations. This term should not be

used to describe this practice, although an *environmental compliance audit* may include an *environmental site assessment* or, if prior audits are available, may be part of an *environmental site assessment*.

environmental lien – a charge, security, or encumbrance upon title to a *property* to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of *hazardous substances* or *petroleum products* upon a *property*, including (but not limited to) liens imposed pursuant to CERCLA 42 USC §§9607(l) & 9607(r) and similar state or local laws.

environmental professional – a person meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b). The person may be an independent contractor or an employee of the *user*.

environmental site assessment (ESA) - the process by which a person or entity seeks to determine if a particular parcel of real *property* (including improvements) is subject to *recognized environmental conditions*. At the option of the *user*, an *environmental site assessment* may include more inquiry than that constituting *all appropriate inquiry* or, if the *user* is not concerned about qualifying for the *LLPs*, less inquiry than that constituting *all appropriate inquiries*. An *environmental site assessment* is both different from, and less rigorous than, an *environmental compliance audit*.

***ERNS** list* – EPA's emergency response notification system list of reported CERCLA *hazardous substance releases* or spills in quantities greater than the reportable quantity, as maintained at the National Response Center. Notification requirements for such *releases* or spills are codified in 40 CFR Parts 302 and 355.

Federal Register, (FR) – publication of the United States government published daily (except for federal holidays and weekends) containing all proposed and final regulations and some other activities of the federal government. When regulations become final, they are included in the Code of Federal Regulations (CFR), as well as published in the *Federal Register*.

fill dirt – dirt, soil, sand, or other earth, that is obtained off-site, that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real *property*. It does not include material that is used in limited quantities for normal landscaping activities.

fire insurance maps – maps produced for private fire insurance map companies that indicate uses of properties at specified dates and that encompass the *property*. These maps are often available at local libraries, historical societies, private resellers, or from the map companies who produced them.

good faith – the absence of any intention to seek an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one's obligations in the conduct or transaction concerned.

hazardous substance - a substance defined as a hazardous substance pursuant to CERCLA 42 USC §9601(14), as interpreted by EPA regulations and the courts: "(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to 9602 of this title, (C) any *hazardous waste* having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 USC §6921) (but not including any waste the regulation of which under RCRA (42 USC §§6901 *et seq.*) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under section 112 of the Clean Air Act (42 USC §7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a

hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

hazardous waste - any *hazardous waste* having the characteristics identified under or listed pursuant to Section 3001 of RCRA, as amended, (42 USC §6921) (but not including any waste the regulation of which under RCRA (42 USC §§6901 – 6992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines *hazardous waste*, at 42 USC §6903, as: "a solid waste, or combination of solid wastes, which because of it's quantity, concentration, or physical, chemical, or infectious characteristics may - (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating illness; or (B) pose a substantial present or potential hazard to human health or environment when improperly treated, stored, transported, or disposed of, or otherwise managed."

hazardous waste/contaminated sites – sites on which a release has occurred, or is suspected to have occurred, of any *hazardous substance*, *hazardous waste*, or *petroleum products*, and that *release* or suspected *release* has been reported to a government entity.

historical recognized environmental condition – a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, *property* use restrictions, *activity use limitations, institutional controls,* or *engineering controls*).

IC/EC registries – databases of *institutional controls* or *engineering controls* that may be maintained by a federal, state or local environmental agency for purposes of tracking sites that may contain residual contamination and AULs. The names of these may vary from program to program and state to state, and include terms such as Declaration of Environmental Use Restriction database (Arizona), list of "deed restrictions" (California), environmental real covenants list (Colorado), Brownfields site list (Indiana, Missouri) and the Pennsylvania Activity and Use Limitation (PA AUL) Registry.

innocent landowner defense – (42 USC §9601(35) and §9607(b)(3)) – a person may qualify as one of three types of innocent landowners: (i) a person who "did not know and had no reason to know" that contamination existed on the *property* at the time the purchaser acquired the *property*; (ii) a government entity which acquired the *property* by escheat, or through any other involuntary transfer of acquisition, or through the exercise of eminent domain authority by purchase or condemnation; and (iii) a person who "acquired the facility by inheritance or bequest." To qualify for the innocent landowner defense, such person must have made *all appropriate inquiries* on or before the date of purchase. Furthermore, the *all appropriate inquiries* must not have resulted in knowledge of the contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the *innocent landowner defense*. There are other necessary requirements that are beyond the scope of ASTM E1527-13.

institutional controls (IC) – a legal or administrative restriction (for example, "deed restrictions," restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to *(1)* reduce or eliminate potential exposure to *hazardous substances* or *petroleum products* in the soil or groundwater on the property, or *(2)* to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An *institutional control* is a type of *Activity and Use Limitation (AUL).*

interviews – those portions of this practice that address questions to be asked of past and present *owners, operators*, and *occupants* of the *property* and questions to be asked of local government officials.

key site manager – the person identified by the *owner* or *operator* of a *property* as having good knowledge of the uses and physical characteristics of the *property*.

landfill - a place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term *solid waste disposal site* and is also known as a garbage dump, trash dump, or similar term.

Landowner Liability Protections (LLPs) – *landowner liability protections* under CERCLA; these protections include the *bona fide prospective purchaser liability protection, contiguous property owner liability protection*, and *innocent landowner defense* from CERCLA liability. See 42 USC §§9601(35)(A), 9601(40), 9607(b), 9607(q), 9607(r).

local government agencies – those agencies of municipal or county government having jurisdiction over the *property*. Municipal and county governments include but are limited to cities, parishes, townships, and similar entities.

local street directories – directories published by private (or sometimes government) sources that show ownership, occupancy, and/or use of sites by reference to street addresses. Often *local street directories* are available at libraries, or historical societies, and/or local municipal offices.

LUST sites – state lists of leaking *underground storage tank* sites. RCRA gives EPA and states, under cooperative agreements with EPA, authority to clean up *releases* from UST systems or require *owners* and *operators* to do so (42 USC §6991b).

major occupants – those tenants, subtenants, or other persons or entities each of which uses at least 40% of the leasable area of the *property* or any anchor tenant when the *property* is a shopping center.

material safety data sheets (MSDS) – written or printed material concerning a *hazardous substance* which is prepared by chemical manufacturers, importers, and employers for hazardous chemicals pursuant to OSHA's Hazard Communication Standard, 29 CFR §1910.1200.

material threat – a physically observable or *obvious* threat which is reasonably likely to lead to a *release* that, in the opinion of the *environmental professional*, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a *hazardous substance* and which shows evidence of damage. The damage would represent a *material threat* if it is deemed serious enough that it may cause or contribute to tank integrity failure with a *release* of contents to the *environment*.

Migrate/migration – for the purposes of ASTM E1527-13 "migrate" and "migration" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in subsurface.

National Contingency Plan (NCP) – the National Oil and Hazardous Substances Pollution Contingency Plan, found at 40 CFR Part 300, that is the EPA's blueprint on how *hazardous substances* are to be cleaned up pursuant to CERCLA.

National Priorities List (NPL) – list compiled by the EPA pursuant to CERCLA 42 USC §9605(a)(8)(B) of properties with the highest priority for cleanup pursuant to EPA's Hazard Ranking System (40 CFR Part 300).

obvious – that which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer while visually or physically observing the *property*.

occupants - those tenants, subtenants, or other persons or entities using the *property* or a portion of the *property*.

operator – the person responsible for the overall operation of a facility.

other historical sources – any source or sources that are credible to a reasonable person and that identify past uses of the *property*. The term includes, but is not limited to: miscellaneous maps, newspaper archives, internet sites, community organizations, local libraries, historical societies, current *owners* or *occupants* of neighboring properties, and records in the files and/or personal knowledge of the *property owner* and/or *occupants*.

owner - generally the fee *owner* of record of the *property*.

petroleum exclusion – the exclusion from CERCLA liability provided in 42 USC §9601(14), as interpreted by the courts and EPA: "the term (*hazardous substance*) does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as the *hazardous substance* under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

petroleum products - those substances included within the meaning of the *petroleum exclusion* to CERCLA, 42 USC §9601(14), as interpreted by the courts and the EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a *hazardous substance* under the Subparagraphs (A) through (F) of 42 USC §9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosene, diesel oil, jet fuels, and fuel oil, pursuant to Standard Definitions of Petroleum Statistics) (American Petroleum Institute, Fourth Edition, 1995.)

physical setting sources – sources that provide information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of a *property*.

pits, ponds, or lagoons – man-made or natural depressions in a ground surface that are likely to hold liquids or sludge containing *hazardous substances* or *petroleum products*. The likelihood of such liquids or sludge being present is determined by evidence of factors associated with the pit, pond, or lagoon, including, but not limited to, discolored water, distressed vegetation, or the presence of an *obvious wastewater* discharge.

practically reviewable - information that is *practically reviewable* means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the *property* without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the *user* can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the *property* or a geographic area in which the *property* is located

are not generally *practically reviewable*. Most databases of public records are *practically reviewable* if they can be obtained from the source agency by the county, city, zip code, or other geographic area of the facilities listed in the record system. Records that are sorted, filed, organized, or maintained by the source agency only chronologically are not generally *practically reviewable*. Listings in *publically available* records which do not have adequate address information to be located geographically are not generally considered *practically reviewable*. For large databases with numerous records (such as RCRA hazardous waste generators and registered *underground storage tanks*), the records are not *practically reviewable* unless they can be obtained from the source agency in the smaller geographic area of zip codes. Even when information is provided by zip code for some large databases, it is common for an unmanageable number of sites to be identified within a given zip code. In these cases, it is not necessary to review the impact of all of the sites that are likely to be listed in any give zip code because that information would not be *practically reviewable.* In other words, when so much data is generated that it cannot be feasibly reviewed for its impact on the *property*, it is not *practically reviewable*.

property - the real *property* that is the subject of the *environmental site assessment* described in this practice. Real *property* includes buildings and other fixtures and improvements located on the *property* and affixed to the land.

property tax files – the files kept for *property* tax purposes by the local jurisdiction where the *property* is located and may include records of past ownership, appraisals, maps, sketches, photos, or other information that is *reasonably ascertainable* and pertaining to the *property*.

publicly available - information that is *publicly available* means that the source of information allows access to the information by anyone upon request.

RCRA generators – those persons or entities that generate *hazardous wastes*, as defined and regulated by RCRA.

RCRA generators list – list kept by EPA of those persons or entities that generate *hazardous wastes* as defined and regulated by RCRA.

RCRA TSD facilities – those facilities on which treatment, storage, and/or disposal of *hazardous wastes* takes place, as defined and regulated by RCRA.

RCRA TSD facilities list – list kept by EPA of those facilities on which treatment, storage, and/or disposal of *hazardous wastes* takes place, as defined and regulated by RCRA.

reasonably ascertainable - information that is *(1) publicly available*, *(2)* obtainable from its source within reasonable time and cost restraints, and *(3) practically reviewable*.

recognized environmental conditions – the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property:* (1) due to release to the environment; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of future *release* to the *environment. De minimis conditions* are not *recognized environmental conditions.*

recorded land title records – records of historical fee ownership, which may include leases, land contracts, and AULs on or of the *property* recorded in the place where land title records are, by law or custom, recorded for the local jurisdiction in which the *property* is located. (Often such records are kept by a municipal or county recorder or clerk.) Such records may be obtained from title companies or directly from the local government agency. Information about the title to the *property* that is recorded in a

US district court or any place other than where land title records are, by law or custom, recorded for the local jurisdiction in which the *property* is located, are not considered part of *recorded land title records*.

records of emergency release notifications EPCRA – (42 USC §11004) – requires *operators* of facilities to notify their local emergency planning committee (as defined in EPCRA) and state emergency response commission (as defined in EPCRA) of any *release* beyond the facility's boundary of any reportable quantity of any extremely *hazardous substance*. Often the local fire department is the local emergency planning committee. Records of such notifications are "Records of Emergency Release Notifications" (42 USC 11004).

records review – that part that is contained in Section 8 of ASTM E1527-13 that addresses which records shall or may be reviewed.

report – the written *report* prepared by the *environmental professional* and constituting part of a "*Phase I Environmental Site Assessment*," as required by this practice.

site reconnaissance – in connection with the *site visit*. The *site reconnaissance* includes, but is not limited to, the *site visit* done in connection with such a *Phase I Environmental Site Assessment*.

site visit – the visit to the *property* during which observations are made constituting the *site reconnaissance*.

solid waste disposal site - a place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term *landfill* and is also known as a garbage dump, trash dump, or similar term.

solvent – a chemical compound that is capable of dissolving another substance and may itself be a *hazardous substance*, used in a number of manufacturing/industrial processes including but not limited to the manufacture of paints and coatings for industrial and household purposes, equipment clean-up, and surface degreasing in metal fabricating industries.

standard environmental record sources – those records specified in 8.2.1 of ASTM E1527-13.

standard historical sources - those sources of information about the history of uses of property specified in the Records Review Section of the *Phase I Environmental Site Assessment* report.

standard physical setting source – a current *USGS 7.5 Minute Topographic Map* (if any) showing the area on which the *property* is located.

Standard practice – the activities set forth in ASTM E1527-13.

standard sources – sources of environmental, physical setting, or historical records.

state registered USTs – state lists of *underground storage tanks* required under Subtitle I, Section 9002 of RCRA.

sump – a pit, cistern, cesspool, or similar receptacle where liquids drain, collect, or are stored.

TSD facility – treatment, storage, or disposal facility.

underground injection – the emplacement or discharge of fluids into the subsurface by means of a well, improved sinkhole, sewage drain hole, subsurface fluid distribution system or other system, or groundwater point source.

underground storage tank (UST) – any tank, including underground piping connected to the tank, that is or has been used to contain *hazardous substances* or *petroleum products* and the volume of which is 10% or more beneath the surface of the ground.

user – the party seeking to use Practice E1527 to complete an *environmental site assessment* of the *property.* A *user* may include, without limitation, a potential purchaser of *property*, a potential tenant of *property*, an *owner* of *property*, a lender, or a *property* manager. The *user* has specific obligations for completing a successful application of this practice.

USGS 7.5 Minute Topographic Map – the map (if any) available from or produced by the United States Geological Survey, entitled "*USGS 7.5 Minute Topographic Map*," and showing the *property*.

visually and/or physically observed – during a *site visit* pursuant to this practice, this term means observations made by vision while walking through a *property* and the structures located on it and observations made by the sense of smell, particularly observations of noxious or foul odors. The term "walking through" is not meant to imply that disabled persons who cannot physically walk may not conduct a *site visit*; they may do so by the means at their disposal for moving through the *property* and the structures located on it.

wastewater - water that *(1)* is or has been used in an industrial or manufacturing process, *(2)* conveys or has conveyed sewage, or *(3)* is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. *Wastewater* does not include water originating on or passing through or adjacent to a site, such as stormwater flows, that has not been used in industrial or manufacturing processes, has not been combined with sewage, or is not directly related to manufacturing, processing, or raw materials storage areas at an industrial plant.

zoning/land use records – those records of the local government in which the *property* is located indicating the uses permitted by the local government in particular zones within its jurisdiction. The records may consist of maps and/or written records. They are often located in the planning department of a municipality or county.

Other Acronyms:

AST – Aboveground Storage Tank

AULs – *Activity and Use Limitations*

CERCLA - Comprehensive Environmental Response Compensation and Liability Act of 1980 (as amended, 42 USC §§9601 *et seq.*)

CERCLIS – Comprehensive Environmental Response, Compensation and Liability Information System (maintained by EPA)

CFR – Code of Federal Regulations

CORRACTS – facilities subject to Corrective Action under RCRA

DTSC – Department of Toxic Substances Control – California EPA

EPA – United States Environmental Protection Agency

EPCRA – Emergency Planning and Community Right to Know Act ((also known as SARA Title III), 42 USC §§11001-11050 *et seq.*

ERNS – emergency response notification system

ESA – Environmental Site Assessment (different than an *environmental compliance audit*)

FOIA – US Freedom of Information Act (5 USC §552 as amended by Public Law No. 104-231, 110 Stat.)

FR – Federal Register

ICs – *Institutional Controls*

LLP – Landowner Liability Protections under the *Brownfields Amendments*

LUST – Leaking Underground Storage Tank

MSDS – Material Safety Data Sheet

NCP – National Contingency Plan

NFRAP – former CRECLIS sites where no further remedial action is planned under CERCLA

NPDES – National Pollutant Discharge Elimination System

NPL – National Priorities List

PCBs – polychlorinated biphenyls

PRP – Potentially Responsible Party (pursuant to CERCLA 42 USC §9607(a))

RCRA – Resource Conservation and Recovery Act (as amended, 42 USC §§6901 *et seq*.)

SARA – Superfund Amendments and Reauthorization Act of 1986 (amendment to CERCLA)

TSDF – *hazardous waste* treatment, storage or disposal facility

USC – United States Code

USGS – United States Geological Survey

UST – Underground Storage Tank

***P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)
435-437 S. San Joaquin Street is a two-story, wood-frame multiple-family residence that was built around 1904 in a mixture of Queen Anne and Colonial Revival styles. It is located on a 9,150-square-foot lot on the west side of S. San Joaquin Street between E. Sonora Street and E. Church Street. The building is located on the same parcel as 429-431 S. San Joaquin Street, a second multiple-family residence that was built at the same time in a similar architectural style. The building has a rectangular footprint and a moderately pitched front-gabled roof that is clad with composition shingles. The building is clad with wood lap siding and has a concrete foundation. Typical windows consist of wood sash windows with molded wood trim.

Figure 1. Aerial photograph of 435-437 S. San Joaquin Street. Subject parcel outlined orange. Source: Google Earth 2019, edited by Page & Turnbull.

Northeast Façade
The primary, northeast façade features a projecting front-facing gable that is decorated with alternating carved wood modillions and dentils along the cornice (**Figure 2**). The gable end has a small rectangular window. A full-width porch projects from the first story of the building and has a flat roof with overhanging eaves that are decorated with wood modillions and dentils to match those of the roof above. The roof of the porch is supported by three wood Tuscan columns that are mounted on top of solid wood railings; the railings are clad with wood lap siding that has been covered with a brick veneer wall (**Figure 3**). At the south end of the façade, a set of poured concrete steps lead up to the porch and main entry. The entry consists of a pair of wood panel doors with integrated glazing set behind wood screen doors. A grouped window, consisting of two tall, narrow wood sash windows on each side of a wider wood sash window, completes the fenestration on the first story. On the second story, two wood sash windows frame a door opening that appears to have been filled in with plywood. The wood trim of these windows is more elaborate than those of the first story and has a projecting lintel decorated with dentils.

Southeast Façade
The southeast façade is partially obscured behind an adjacent one-story brick building at 445 S. San Joaquin Street (**Figure 4**). The façade has a molded wood drip course that separates the crawl space from the first floor above. Six windows are visible, three in the first floor and three in the second floor. The four windows at the west end of the façade have been altered; those in the first floor have been covered with plywood, while those in the second floor have been replaced with vinyl sash windows with flat wood trim. Sets of paired windows adjacent to the brick building appear to retain their original wood sashes (**Figure 5**). A small brick chimney is visible on the roof above.

Southwest Facade
The rear (southwest) façade features two stacked recessed entries, one above the other, on the first and second stories at the north end of the facade (**Figure 6**). The first-story entry consists of a wood panel door that is set at the back of a small recessed porch with poured concrete steps and solid wood railings (**Figure 7**). Hinges and an infilled transom indicate that the porch was once enclosed by an additional door. The second-story entry above is located at the top of a long, angled wood staircase with flat wood railings, wood support beams, and one intermediate landing. It contains a wood door with an infilled transom. Fenestration consists of two plywood access doors at the crawl space and a small rectangular wood sash window next to a taller rectangular

window on both the first and second stories. The taller window at the first story has been infilled with plywood and an air conditioning unit, while the bottom sash of both of the second-story windows have been replaced with vinyl sliders. Pipes and utility meters are attached to the south end of the façade. Four cylindrical metal chimneys are visible on the roof above.

Northwest Façade

The northwest façade begins with the northwest walls and supports of the front porch (**Figure 8**). At the main section of the façade, a molded wood drip course divides the crawl space from the first floor. A hinged access door has been cut into the crawl space siding at the east end of the façade, while a second crawl space opening has been covered with wire mesh and partially filled with bricks at the west end. The first and second stories feature identical window configurations. From left to right, they consist of a single wood sash window, followed by paired wood sash windows, and a shorter wood sash window. At the far west end of the façade, four unglazed openings open to the rear, first-story porch, while a set of paired wood sash windows open to the enclosed second-story entry above.

Site Features

As previously mentioned, the subject building is one of two multiple family residences on the parcel. The second, addressed as 429-431 S. San Joaquin Street, appears to have been constructed at the same time as the subject building and is located directly to the northwest (**Figure 9**). The narrow space between the two buildings has been paved with concrete (**Figure 10**). Landscaping in front of the building consists of a small front yard with a lawn and small concrete patio that is enclosed by a tall metal fence along the front and northwest property lines (**Figure 11**). A concrete walkway extends from the sidewalk to the building's front entrance, and a narrow strip of brick pavers leads to a second concrete walkway that separates the subject building from the adjacent building on the lot. The rear portion of the lot is also paved with concrete, except for a small space immediately to the rear of 429-431 S. San Joaquin Street, in which trees have been planted. An outdoor seating area with wood picnic tables and a wood lattice covering is located at the southwest corner of the lot. The rest of the rear portion of the lot is used as a driveway and parking lot for the complex (**Figure 12**).

Figure 9. The subject property (left) and 429-431 S. San Joaquin Street, view northeast.

Surrounding Site Context

435-437 S. San Joaquin Street is located on the block bounded by S. San Joaquin Street to the northeast, E. Church Street to the southeast, S. Hunter Street to the southwest, and E. Sonora Street to the northwest in the heart of the original street grid of Stockton and one-and-one-half blocks south of the California State Route 4 highway. The surrounding area is characterized primarily by a mix of two- to three-story residential buildings and a few brick commercial buildings that appear to have been built around the turn of the twentieth century. 429-431 S. San Joaquin Street was constructed in the same style as the subject property around 1904 (**Figure 13**). The Gleason House, located directly to the northwest of the subject parcel at 423 S. San Joaquin Street, is a Queen Anne style house constructed in 1895 (**Figure 14**). 420 S. San Joaquin Street, directly across from the subject property, is a two-story, Queen Anne style house built in 1905 (**Figure 15**). Next door, 430 S. San Joaquin is a two-story vernacular style foursquare that was built in 1900 (**Figure 16**).

BUILDING, STRUCTURE, AND OBJECT RECORD

***NRHP Status Code** 3S, 3CS, 5S2
***Resource Name or #** 435-437 S. San Joaquin Street

B1. Historic name: Wills House
B2. Common name: 435-437 S. San Joaquin Street
B3. Original Use: Multiple Family Residence
B4. Present use: Multiple Family Residence
***B5. Architectural Style:** Queen Anne/Colonial Revival
***B6. Construction History:** (Construction date, alterations, and date of alterations)

The parcel on which 435-437 S. San Joaquin Street is located was owned by Bee Hoult by 1900. Two earlier wood frame buildings that were present on the site at the time burned down in a fire that spread from the Agricultural Pavilion building, located two blocks north on Lafeyette Street between S. Hunter, and destroyed nearly six city blocks in September 1902.[1] The 1904 Stockton city directory records that Hoult's husband, David, was living at the adjacent building at 431 S. San Joaquin Street, indicating it had been completed by this time to replace the buildings that had been destroyed by the fire.[2] It is likely that the subject building was constructed at the same time. The 1917 fire insurance map by the Sanborn Map Company shows the building as a two-story wood frame building that consisted of two flats over a basement (**Figure 17**). It had a two-story porch that spanned the front façade and an angled exterior rear staircase. The 1950 Sanborn fire insurance map shows that by 1950, the building had been reconfigured into a two-and-one-half-story building, likely by converting the basement into livable space. No other changes are visible. (**Figure 18**). Aerial photographs from the 1930s and 1970s indicate that the overall footprint of the building has remained relatively unchanged over time (**Figure 19** and **Figure 20**). (See Continuation Sheet, page 8)

City of Stockton
Native American through Early American Period:
Numerous Native American groups called the Central Valley home for thousands of years before the arrival of European and American settlers. The Stockton area was settled by the Yatchicumne, a group of the Northern Valley Yokuts people whose villages were established across a vast expanse of California from the confluence of the Sacramento and San Joaquin rivers as far as the Tehachapi Mountains, 250 miles to the south. At least two Yatchicumne villages were located in the Stockton area, including one called Pasasimas, situated on a mound near the Stockton Channel in present-day Downtown Stockton. (See Continuation Sheet, page 9)

Google Street View images show that there was a balcony above the front porch in 2012. Sometime between 2012 and 2015, a railing around this balcony was removed, and a door opening that led from the second story interior to the balcony was infilled. Building permits on file at the City of Stockton Permit Center document repairs to the building's foundation and plumbing and electrical work. Additional alterations that are not documented in permits include window replacements, the addition of brick veneer cladding on the northwest façade, removal of the second-story balcony railing, and alterations to the rear porch.

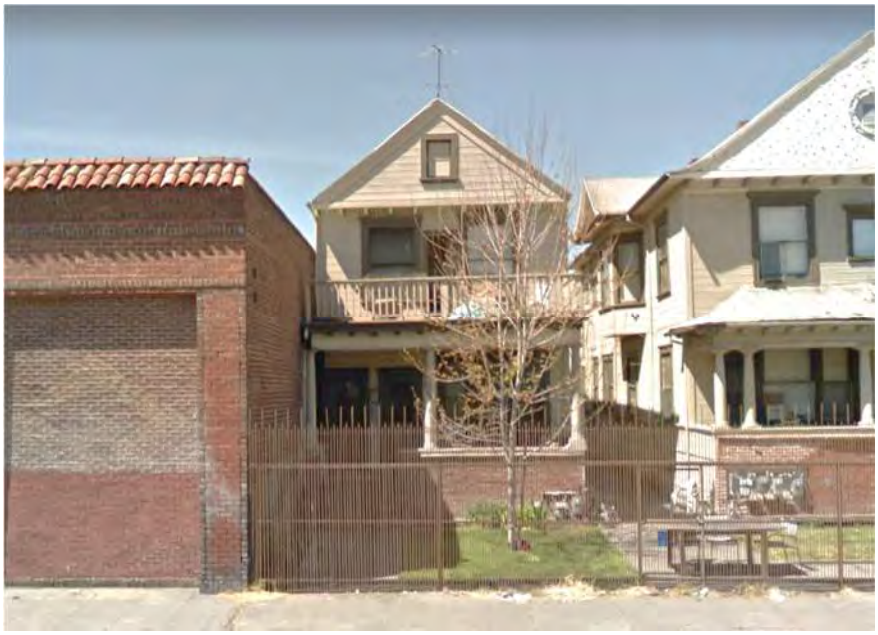

Figure 21. The northwest facade in April 2012. Source: Google Street View, 2012.

***B10. Significance: (continued)**

Local rivers and streams provided an abundant source of food for the native population and also attracted European and American fur trappers to the area, who began exploring the area in the early nineteenth century in search of beaver and otter pelts.[3] These early explorers included Jedediah Strong Smith, who established a base camp to the southeast of present-day Stockton in 1827, and Alex McCleod, a fur trapper from the Hudson's Bay Company, whose camp near McCleod Lake gave the lake its name.[4] While the fur trappers reaped the benefits of the region's rich natural resources, they also brought diseases with them that led to the decimation of much of the local Native American population.[5]

The presence of French-Canadian fur trappers provided the inspiration for the name of the Mexican land grant that encompassed the present-day site of Stockton and its immediate vicinity during the Mexican period, after Mexico achieved independence from Spain in 1821. Rancho Campo de los Franceses, as the grant was known, was filled with numerous waterways, grassy hills, and oak trees. It was this landscape that German immigrant Captain Charles Maria Weber, founder of the city of Stockton, experienced when he traveled through the area on his way to San Jose in 1842.[6] Recognizing the area's potential, Weber and his business partner, Guillermo (William) Gulnac, acquired roughly 55 square kilometers of Rancho Campo de los Franceses on the east side of the San Joaquin River from the Mexican governor in 1843. Weber eventually bought Gulnac out of the land and built his first

structures on the site in 1847.[7] The first survey of the settlement, initially known as Tuleberg, was completed by Jasper O'Farrell the same year.[8]

Formation of Stockton

Like many cities in Northern California, Stockton grew from a small, rural outpost into a booming city as a result of the Gold Rush. When gold was discovered at Coloma in 1848, one year after Weber established the settlement of Tuleberg, he initially joined the fervor and spent months mining in the goldfields. He soon realized, however, that he had a better chance of making his fortune by selling goods and supplies to the floods of miners who were traveling into the area.[9] Advantageously located at the head of the Stockton Channel, a tributary of the San Joaquin River, Weber's settlement emerged as the gateway to and major supply center for California's southern mining areas as ships traveling from San Francisco brought streams of miners to the area (Error! Reference source not found.).[10]

As the settlement's population grew, so did urban development. In 1849, Major R. P. Hammond completed a second survey that laid out the first street grid between Weber Avenue, Center Street, Main Street, and Commerce Street.[11] In 1850, the same year the California achieved statehood, the settlement was officially incorporated as a city and renamed Stockton, after Commodore Robert F. Stockton, the American Navy officer who drove the last Mexican forces out of California in 1848.[12] Over the next five years, the city's population swelled from 1,000 to roughly 7,000. By the 1890s, it had exploded to approximately 23,000 residents.[13]

The streets between El Dorado Avenue, Main Street, Commerce Street, and Levee (now Weber) Avenue formed the core of the city's commercial area in the nineteenth century. The first residential districts, meanwhile, developed to the southwest and north. Floods were common in the winter months due to the city's location near miles of waterways that made up the Sacramento-San Joaquin River Delta.[14]

After the Gold Rush ended in the mid-1850s, the Central Valley's rich soil and temperate climate contributed to the development of Stockton into a major center for agricultural industries. Wheat and grains were the area's largest crop in the nineteenth century and spurred the construction of grain warehousing facilities and flour mills in the area, including the Sperry Flour Company. By the early twentieth century, fruit orchards, nuts, vegetables, potatoes, and other crops were also grown on the farms around the city.[15] Surrounded by this abundance of agricultural wealth, the city's economy developed around businesses that processed, cultivated, and transported agricultural goods. Several of Stockton's most prominent businesses, including Matteson & Williamson and Holt Brothers Manufacturing Company, made names for themselves as the manufacturers of agricultural tools and equipment that increased the productivity of the area's farms.

Stockton's location along a variety of important transportation corridors—including the Stockton Channel, with its deep water shipping access, and the Central Pacific Railroad—contributed to Stockton's industrial development and emergence as a regional transportation hub.[16] Shipyards, iron foundries, warehouses, and factories were established along the channel and its tributaries.[17]

Burgeoning with economic activity and a growing population, Stockton experienced a building boom from the 1880s until the 1930s, during which the majority of buildings in the city's downtown and nearby residential areas were constructed. In the late nineteenth century, many of the city's downtown commercial buildings were constructed of locally produced red brick, inspiring one of the Stockton's nicknames, "The Brick City."[18] Five high rises were constructed between 1910 and 1917 alone.[19] Two- and three-story masonry residential hotels were also constructed during this period in order to provide affordable, temporary housing for the large population of migrant laborers who worked on the surrounding farms. These residential hotels, many of which had commercial retail spaces on the first floor and exhibited Classical architectural detailing, became a common building type in downtown Stockton as a result.[20] The downtown area was also home to the largest Chinatown in California, as many Chinese families relocated from San Francisco after the 1906 earthquake.[21]

Other immigrant groups, in addition to the Chinese, made up a large portion of Stockton's population. After the passage of the Chinese Exclusion Act in 1882, Filipino, Japanese, and Sikh immigrants gradually replaced the Chinese as the main labor force in the city's packing houses, farms, and domestic industries. By the 1920s, Filipino men and women made up the majority of Stockton's agricultural labor force, giving the city the nickname, the "Manila of California."[22] From the late nineteenth century to the 1920s, Italians also arrived in Stockton in large numbers, during a wave of migration that took place after the unification of Italy around 1861.[23]

Construction during the late nineteenth and early twentieth centuries also included civic and institutional establishments. A San Joaquin County Courthouse was completed on a public square a short distance from the channel in 1854 and was replaced in 1890. In 1924, the University of the Pacific relocated from San Jose to Stockton, bringing one of the city's most influential and long-standing establishments to the city.[24]
Infrastructural improvements further enhanced Stockton's continuing development. Electric trolleys began service in the last decades of the nineteenth century. As the automobile became increasingly popular and affordable at the start of the twentieth century, an auto row developed at El Dorado Street and Miner Avenue.[25] In 1911, a new diverting channel was completed to address issues with frequent flooding.[26]

Stockton's varied economy, based on the agricultural industry and other industries centered around the shipping channel, helped soften the impact of the Great Depression. Starting in 1927, work to expand and deepen Stockton Channel provided employment for hundreds of workers. The new Port of Stockton opened in 1933 as the largest inland port in California at the time. Opportunities for work in the region's surrounding farms, meanwhile, attracted families from the Midwest and large populations of immigrant workers to the area.

World War II to the Present
The outbreak of World War II and the resulting demand for war-related goods stimulated Stockton's local industries. Shipbuilding, based at the city's many shipyards, became the largest source of employment, while the opening of an Army Air Force base at Old Stockton Field and the Stockton Naval Supply depot created new job opportunities. The war also created an agricultural labor shortage. Mexican workers, sponsored by the federal Bracero Program, filled the void and became part of the city's rich multicultural makeup.[27]

The postwar period reshaped the city. Stockton struggled to maintain its status as a major shipping center because the Stockton Channel was not large or deep enough to accommodate the increasing size of shipping vessels. In response, the local economy began to shift toward warehousing and the production of farming machinery and commercial boats. The completion of new residential neighborhoods, shopping malls, and of the Crosstown and Interstate 5 freeways, as well as the migration of affluent residents outside of the city center, diverted economic and commercial activity away from Stockton's historic downtown core. By the 1950s, the area was considered blighted. In the 1960s, the area became the target of urban renewal efforts, which resulted in the demolition of all but three buildings on nine square blocks of downtown. Longstanding residents, many of whom were of Chinese or Filipino descent, were displaced during the redevelopment.[28]

In the 1980s, Stockton's downtown began to experience a resurgence of development. Activity around the canal refocused around recreation-related uses and building projects. Boats plied its waters, and restaurants, a shopping mall, and housing developments were constructed along the waterfront.[29]

In the 2010s, agriculture remains important to the city's economy. Asparagus, cherries, tomatoes, walnuts, and almonds have replaced wheat and grain as the area's major crops. In spite of the changes that have taken place over time, Stockton continues to be characterized by its agricultural industry, the Stockton Channel, its history of brick buildings downtown, and a diverse, multi-cultural population.[30]

The Queen Anne Style: Free Classic Subtype
The Queen Anne style was a popular architectural style among the elite during the Victorian era of the late nineteenth century. First

used in England, this style referred back to the reign of Queen Anne (1702-1714) when craftsmanship and simplicity of construction were emphasized in the architectural vernacular.[31] One of the main innovators and architects of this style was Richard Norman Shaw, who popularized the Queen Anne style in England with his half-timbered designs that borrowed from late Medieval buildings from the Elizabethan and Jacobean periods. American architects introduced this style into the mainstream during the late 1870s and soon added subtypes of the style with spindlework and classical architectural elements. By the 1880s, the Queen Anne style had become the leading architectural style for the Victorian elite and upper to middle classes.

The Queen Anne style is characterized by its variety of features and combination of ornamentation. Typical features of the Queen Anne style include steeply pitched roofs, irregular rooflines, gable projections, cutaway bay windows, asymmetrical compositions, and swag and garland appliqués.[32] The result of this fusion of ornamentation and composition was a highly textured and varied residence, which achieved the elegance and grace desired by the people of this era. Commonly, other architectural styles, such as Eastlake and Stick, were combined with the Queen Anne style to produce asymmetrical and varied compositions.

Approximately 35 percent of Queen Anne houses are considered to be a subtype of the style called Free Classic. The style became common after 1890, with a peak from 1900 until 1910, and shares some features with early Colonial Revival houses, which became the dominant architectural style in the years afterward. The Free Classic subtype is characterized by its use of classical columns that are typically grouped together in units of two or three. Other classical features – such as cornice-line dentils, swags, garlands, or Palladian windows – are also common.[33]

Owner and Occupant History

The sequence of owners and occupants of the subject property, developed from records maintained at the San Joaquin Recorder-County Clerk's offices, historic city directories, census records, and historical newspaper articles is summarized in Table 2. Brief biographies of long-term or notable owners and occupants follow the table.

Table 2. Owners and Occupants of 435-437 S. San Joaquin Street, Stockton

Year(s)	Owner[34]	Occupant[35]

The Hoult Family, Owners and Occupants, ca. 1900-1949

As previously mentioned, the subject building appears to have been originally owned and constructed for Bee Hoult and her family around 1904, after a fire destroyed earlier buildings on the lot. Born Bee Delia O'Brien in Ireland around 1861, Bee immigrated to the United States in 1883. In 1887, she married David James Hoult, a foreman of Houser & Haines Manufacturing Co.[36] The couple had one child, a son named Urban.[37] The family lived together at the adjacent house on the lot at 431 S. San Joaquin Street in 1910 through at least 1915.[38] As an adult, Urban worked for the firm of Radcliffe & Hoult, publishers of the *Mercury Sun* newspaper in Merced. He died of pneumonia in 1924 at the age of 35. David died just four years later at the age of 65.[39] Bee continued to own the subject property after their deaths and moved to the subject building at 435 S. San Joaquin Street until her own death sometime around 1949, after which the property passed to her niece, Ila H. Stevenson. Research did not uncover any additional information about the life or contributions of Bee, David, or Urban Hoult. City directories do not list Stevenson as a resident of the subject property.

Gospel Center Rescue Mission, Inc., Owner, 1989-2019

Gospel Center Rescue Mission (GCRM) is a faith-based non-profit that serves the homeless and addicted of San Joaquin County. The non-profit was founded in 1940 in Ripon, California out of a concern for the post-Depression era homeless population. Over time, GCRM added programs to provide food, shelter, clothing, addiction treatment, and medical care to the homeless.[40] Today, the agency serves over 1,000 men, women, and children at its Stockton campus each day and offers eight programs, including the only Homeless Recuperative Care Program and non-profit payee service in San Joaquin County.[41]

Significance Evaluation: National Register of Historic Places and California Register of Historical Resources

The subject property at 435-437 S. San Joaquin Street is not currently listed in the National Register of Historic Places (National Register) or the California Register of Historical Resources (California Register). The building is included in the California Historical

Resources Information System (CHRIS) as of 2012 with the status code, "5S2," indicating that the property has been identified as an "Individual property that is eligible for local listing or designation."

In order for a property to be eligible for listing in the National Register, it must be found significant under one or more of the following criteria:

Criterion A (Event): Properties associated with events that have made a significant contribution to the broad patterns of our history.

Criterion B (Person): Properties associated with the lives of persons significant in our past.

Criterion C (Design/Construction): Properties that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant distinguishable entity whose components lack individual distinction.

Criterion D (Information Potential): Properties that have yielded, or may be likely to yield, information important in prehistory or history.

In order for a property to be eligible for listing in the California Register, it must be found significant under one or more of the following criteria:

Criterion 1 (Events): Resources that are associated with events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California.

Criterion 2 (Persons): Resources that are associated with the lives of persons important to California history.

Criterion 3 (Architecture): Resources that embody the distinctive characteristics of a type, period, region, or method of construction, or represent the work of a master, or possess high artistic values.

Criterion 4 (Information Potential): Resources or sites that have yielded or have the potential to yield information important to the prehistory or history of California.

The following section examines the eligibility of the building at 435-437 S. San Joaquin Street for *individual* listing in the National Register or California Register.

Criterion A/1 (Events)
The subject property does not appear to be eligible for individual listing under Criterion A/1 for association with events that have made a significant contribution to the broad patterns of local, state, or national history. The multi-family house was constructed around 1904, more than fifty years after Stockton was incorporated in 1850, and, thus, it is not significant for being one of the first or earliest residential buildings constructed in the city. Rather, it was constructed at a time when Stockton was experiencing a building boom that lasted from the 1880s until the 1930s. This building boom, however, is most closely associated with commercial and institutional development in Stockton's urban core and the city's emergence as a transportation hub and center for agricultural industries. Although residential development occurred during the same period, the subject building is not an exceptional example of a residential building constructed during the period and does not appear to have had an impact on the development of the surrounding area. Therefore, the building is not considered to be a notable representative of Stockton's development in the early twentieth century and does not appear to rise to the level of significance necessary to be individually eligible for listing on the California Register or National Register under Criterion A/1.

Criterion B/2 (Persons)
The subject property does not appear eligible for individual listing under Criterion B/2 for association with the lives of persons important to local, state, or national history. Bee Delia Hoult owned the property from at least 1900 until 1949, and the subject building appears to have been constructed for Hoult and her family around 1904 after a fire in 1902 destroyed earlier buildings on the site. Hoult appears to have lived in the subject building after the deaths of her husband and son from approximately 1920 until her death around 1949. Research did not reveal information about Bee Hoult's occupation or shed any further light on the activities or contributions of the Hoult family to Stockton or the surrounding area. From 1960 to 1985, the building was owned by a number of individuals that appear to have been associated with the Fong family. City directories do not list these owners as residents of the building or of Stockton, and research did not uncover the occupations or activities of these individuals necessary to evaluate their contributions to history. As a multi-family residence, a large number of people have lived at the subject building over time. Throughout its history, residents appear to have primarily been working class individuals employed in a number of industries.

Through the 1960s, city directories list a blacksmith, welder, mechanic, bartender, dry goods merchant, driver, shoe repairer, and saleswoman as residents of the house. Starting in the 1970s, residents were primarily farm workers and retired individuals. Research did not indicate that any of these individuals gained notable importance within their professions. Therefore, none of the owners or occupants that were identified during research for this report appear to have made significant contributions to local, state, or national history in a manner that rises to the level of significance necessary to merit designation under Criterion 2.

Criterion C/3 (Architecture)
The subject property does appear eligible under Criterion C/3 as a resource that embodies the distinctive characteristics of a multi-family house built in the Queen Anne style. More specifically, the house is an example of the Free Classic subtype of Queen Anne style houses. The building was originally constructed around 1904, during the peak period of popularity of Free Classic Queen Anne houses in the United States; however, a scan of the area surrounding the subject building suggests that this style was relatively uncommon in Stockton or that few examples survive in the city today. The subject building exhibits many of the defining characteristics of the style, including a dominant front-gabled roof and full-width front porch, that are representative of the broader Queen Anne style, as well as the use of Tuscan columns as porch supports and cornice-line carved wood modillions and dentils that are indicative of the Free Classic subtype. The building also has surviving original window trim and doors with decorative carved dentils. The subject property, therefore, appears to be significant under Criterion C/3.

The property's period of significance under Criterion C/3 is 1904, when the building was originally constructed.

Criterion D/4 (Information Potential)
The subject property does not appear to be individually eligible under Criterion D/4 as a building that has the potential to provide information important to the prehistory or history of the City of Fremont, state, or nation. It does not appear to feature construction or material types, or embody engineering practices that would, with additional study, provide important information. Page & Turnbull's evaluation of this property was limited to age-eligible resources above ground and did not involve survey or evaluation of the subject property for the purposes of archaeological information.

Evaluation (Integrity)
In order to qualify for listing in any local, state, or national historic register, a property or landscape must possess significance under at least one evaluative criterion as described above and retain integrity. Integrity is defined by the California Office of Historic Preservation as "the authenticity of an historical resource's physical identity evidenced by the survival of characteristics that existed during the resource's period of significance," or more simply defined by the National Park Service as "the ability of a property to convey its significance."[42] Established integrity standards are outlined by the *National Register Bulletin: How to Apply the National Register Criteria for Evaluation*. Seven variables, or aspects, that define integrity are used to evaluate a resource's integrity: location, setting, design, materials, workmanship, feeling, and association. A property must retain integrity under most or all of these aspects in order to retain overall integrity. If a property does not retain integrity, it can no longer convey its significance and is therefore not eligible for listing in local, state, or national registers.

1. *Location* is the place where the historic property was constructed.
2. *Design* is the combination of elements that create the form, plans, space, structure and style of the property.
3. *Setting* addresses the physical environment of the historic property inclusive of the landscape and spatial relationships of the building(s).
4. *Materials* refer to the physical elements that were combined or deposited during a particular period of time and in a particular pattern of configuration to form the historic property.
5. *Workmanship* is the physical evidence of the crafts of a particular culture or people during any given period in history.
6. *Feeling* is the property's expression of the aesthetic or historic sense of a particular period of time.
7. *Association* is the direct link between an important historic event or person and a historic property.

435-437 S. San Joaquin Street retains all seven of the aspects of integrity. The building has not been moved since its construction and, thus, retains integrity of location. Although the surrounding area has changed over time, a number of single- and multi-family houses and commercial buildings also dating to the late nineteenth and early twentieth centuries remain at their original locations directly next to or across from the subject property on S. San Joaquin Boulevard. As a result, the subject property retains its integrity of setting. Although the second-story balcony has been altered and brick veneer cladding has been added to the front façade and alterations to windows on the side and rear facades are evident, the building's essential exterior features and materials that convey its significance as a multi-family house constructed in the Free Classic subtype of the Queen Anne style – including prominent front gable with cornice line modillions and dentils, full-width front porch, Tuscan column porch supports, original wood

[42] California Office of Historic Preservation, *Technical Assistance Series No. 7: How to Nominate a Resource to the California Register of Historical Resources* (Sacramento: California Office of State Publishing, 4 September 2001), 11; U.S. Department of the Interior, National Park Service, *National Register Bulletin: How to Apply the National Register Criteria for Evaluation* (Washington, D.C.: National Park Service, 1995), 44.

windows and doors, and wood lap siding – remain intact. Integrity of design, materials, workmanship, feeling, and association have also been retained.

Based on this analysis, 435-437 S. San Joaquin Street retains sufficient integrity to convey its significance under Criterion 3/C and, therefore qualifies for listing on the National and California Registers.

Character-Defining Features
For a property to be eligible for national, state, or local designation, the essential physical features (or character-defining features) that enable the property to convey its historic identity must be evident. To be eligible, a property must clearly contain enough of those characteristics, and these features must also retain a sufficient degree of integrity. Characteristics can be expressed in terms such as form, proportion, structure, plan, style, or materials. The character-defining features of 435-437 S. San Joaquin Street include:

- Projecting front-facing gabled roof
- Cornice with wood modillions and dentils
- Full-width front porch with Tuscan column supports mounted on solid wood railing
- Wood lap siding
- Wood panel doors and sash windows with molded wood trim, some with decorative carved dentils
- Entries to multiple units at front and rear façades

Significance Evaluation: City of Stockton Landmark, Historic Site, or Structure of Merit
The subject building is not included in the Downtown Stockton Historic Resources Survey (2000) and is not located within a local historic district or zoning overlay or listed as a City of Stockton Landmark, Historic Site, or Structure of Merit. It is therefore not currently listed locally as a historic resource.

Landmarks
According to the Stockton Municipal Code Section 16.220.070, "In considering an artifact, natural feature, or structure for designation as a Landmark, the Board shall apply any or all of the following criteria:

1. **Archaeological Interest.** Its potential for yielding significant information of archaeological interest;
2. **Architectural Craftsmanship**. Its embodiment of elements demonstrating outstanding attention to architectural and/or engineering craftsmanship, design, detail, or materials;
3. **Architectural Style.** Its exemplification of a particular architectural style or way of life important to the City, the State, or the Nation;
4. **Architectural Type.** Its exemplification of the best remaining architectural type in the City;
5. **Historic Event.** Its location as a site of a significant historic event;
6. **Heritage.** Its character, interest, or value as a significant part of the heritage of the City, the State, or the Nation;
7. **Visual Feature.** Its unique location or singular physical characteristic representing an established and familiar visual feature of the City;
8. **Relationship to Another Landmark.** Its relationship to any other landmark, if its preservation is essential to the integrity of that landmark;
9. **Significant Person.** Its identification with a person(s) who significantly contributed to the culture and development of the City, the State, or the Nation;
10. **Work of a Significant Person.** Its identification as the creation, design, or work of a person(s) whose effort has significantly influenced the heritage of the City, the State, or the Nation; or
11. **Natural Environment.** Its integrity as a natural environment that strongly contributes to the well-being of the people of the City, the State, or the Nation."[43]

Historic Sites & Structures of Merit
Historic Sites and Structures of Merit are designated by the same criteria. According to the Stockton Municipal Code Sections 16.220.090 and 16.220.100, the criteria for designating Historic Sites and Structures of Merit are the following:

1. **Archaeological Interest.** Its potential for yielding significant information of archaeological interest;
2. **Heritage**. Its character, interest, or value as a significant part of the heritage of the City, the State, or the Nation;
3. **Visual Feature of the City**. Its unique location or singular physical characteristic representing an established and familiar visual feature of the City;
4. **Way of Life.** Its exemplification of a particular way of life important to the City, the State, or the Nation;

[43] Stockton Municipal Code: 16.220.070, "Landmarks," accessed July 9, 2019, https://qcode.us/codes/stockton/view.php?topic=16-7-16_220-16_220_070&frames=on.

5. **Historic Event.** Its location as a site of a significant historic event regardless of its current configuration, development, or use;
6. **Significant Person**. Its identification with a person(s) who significantly contributed to the culture and development of the City, the State, or the Nation; or
7. **Significant Person of a Specific National Origin.** Its identification with a person(s) representative of a specific national origin who have contributed to the culture and development of the City, the State, or the Nation."[44]

As evidenced in the previous evaluation, 435-437 S. San Joaquin Street appears to be significant at the local level under Criterion C/3 of the National Register and California Register and possesses sufficient integrity to be eligible for listing. The City of Stockton's criteria for the designation of Landmarks, Historic Sites, and Structures of Merit correspond approximately with those of the National Register and California Register; however, they do not appear to include an integrity requirement. In particular, criteria 2, 3, and 4 above for listing as a City of Stockton Landmark appear to correspond with Criterion C/3 of the National Register and California Register. Thus, the above evaluation for National Register and California Register Criteria C/3 can be extended to local designation under the corresponding criteria for listing as a City of Stockton Landmark, and the property appears to merit local designation as a City Landmark.

Conclusion

435-437 S. San Joaquin Street does appear to be eligible for individual listing in the National Register under Criterion C, the California Register under Criterion 3, and as a City of Stockton Landmark under Criteria 2, 3, and 4. The subject building was constructed in 1904 and embodies the distinctive characteristics that are representative of a multi-family house that was built in the Free Classic Queen Anne style. As such, the California Historical Resource Status Codes (CHRSC) of "3S," "3CS," and "5S2" have been assigned to the property, meaning that it has been found eligible for the National Register and California Register as an individual property through survey evaluation.[45]

***P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)
429-431 S. San Joaquin Street is a two-story, wood-frame multiple-family residence that was built around 1904 in a mixture of Queen Anne and Colonial Revival styles. It is located on a 9,150-square-foot lot on the west side of S. San Joaquin Street between E. Sonora Street and E. Church Street. The building is on the same parcel as 435-437 S. San Joaquin Street, a second multiple-family residence that was built at the same time in a similar architectural style. The building has a roughly rectangular footprint and a moderately pitched front-gabled roof with flared overhanging eaves and composition shingle cladding. The building is clad with wood lap siding and has a concrete foundation. Typical windows consist of wood sash windows with molded wood trim.

Figure 1. Aerial photograph of 429-431 S. San Joaquin Street. Subject parcel outlined orange. Source: Google Earth 2019, edited by Page & Turnbull.

Northeast Façade

The primary, northeast façade features a prominent front-facing gable with flared, broadly overhanging eaves that are decorated with alternating carved wood modillions and dentils (**Figure 2**). The gable end has a rectangular metal air vent with a circular wood surround carved in a wreath-like design and is clad with stucco, possibly decorated to imitate swallows' nests. A full-width porch projects from the first story of the building and displays a shallow hipped roof with overhanging eaves that are decorated with wood modillions and dentils to match those of the roof above. The roof has been altered and is cut out above the entry to the porch. The roof of the porch, itself, is supported by paired wood Tuscan columns that are mounted on top of solid wood railings clad with wood lap siding to match the building's exterior cladding, except at the far north end, where the railing has been covered with brick veneer cladding. A set of poured concrete steps with a metal handrail leads up to the porch at the north end of the façade (**Figure 3**). The porch entrance is framed by a wood lap fascia and vertical wood support beams. Fenestration on the first story consists of, from left to right, a wood panel door with an integrated lite, set behind a wood screen door that is grouped together with two wood sash windows; a set of paired wood sash windows; and a second wood panel door and screen door at the far north end. On the second story, two wood sash windows frame a smaller, fixed wood frame window. The wood trim of these windows is more elaborate than those of the first story and has a projecting lintel decorated with dentils. Windows on both the first and second stories have been altered to accommodate air conditioning units.

Southeast Façade

The southeast façade, from left to right, consists of the southeast walls and wood supports of a recessed rear porch at the southwest corner of the building followed by a number of windows in the main portion of the building. The walls immediately above the porch opening are clad with narrow vertical wood siding and wood lap siding that matches the rest of the building above (**Figure 4**). At the main portion of the building, a molded wood drip course visually separates the crawl space from the first floor. The walls above the drip course contain a number of windows of varying sizes and configurations (**Figure 5**). From left to right, windows on the first floor consist of one small wood sash window followed by a taller wood sash window, a set of paired wood sash windows, and two additional single wood sash windows. On the second floor, a small aluminum slider window with flat wood trim is followed by a larger rectangular window with decorative wood trim that has been replaced with an aluminum slider (**Figure 6**). To the right, a set of paired wood sash windows and a single wood sash window flank a canted, cutaway bay window. The bay is capped by a small, gabled roof with flared eaves like those of the northeast façade. Pipes, conduits, and electrical fixtures have

been attached to the walls in various locations. Cylindrical metal chimneys, metal equipment, and a small brick chimney are visible on the roof above.

Southwest Facade
The rear (southwest) façade features a projecting rectangular bay that contains a recessed first-story porch at its southwest corner (**Figure 7**). The roof over the bay has wide projecting eaves with exposed rafter tails. A wood staircase with flat wood handrails and wood beam supports offers access to the porch before continuing along the façade to a second entry in the second story. As at the southeast façade, the walls above the porch opening are clad with narrow vertical wood siding, with wood lap siding above to match the exterior cladding of the rest of the building. To the left, a small wood access door offers access to the crawl space. Windows on the façade consist of three aluminum sliders with flat wood trim, two of which are located at the north end of the façade and the third of which is centered in the rectangular bay. Siding next to this window has recently been replaced with new wood lap siding.

Northwest Façade
Like the southeast façade, the northwest façade has a molded wood drip course that divides the crawl space from the first floor (**Figure 8**). The façade also features two additional entries. At the east end, a wood staircase with flat wood handrails and wood beam supports lead to a door at an intermediate level between the first and second stories, possibly at an interior stair landing (**Figure 9**). A transom and window above this door, as well as a larger rectangular opening to the left, have been infilled. The second entry, located in a small cut out at the west end of the façade, consists of a wood panel door with integrated glazing. This door is accessed via a small uncovered porch, also with flat wood handrails and supports. A small access door has been cut into the wood siding to the right, and several areas of the adjacent walls have been replaced with new wood alternative siding. The majority of windows on this façade consist of replacement aluminum slider windows with flat wood trim, some of which appear to have replaced larger, original window openings.

Site Features

As previously mentioned, the subject building is one of two multiple family residences on the parcel. The second, addressed as 435-437 S. San Joaquin Street, appears to have been constructed at the same time as the subject building and is located directly to the southeast (**Figure 10**). The narrow space between the two buildings has been paved with concrete (**Figure 11**). Landscaping in front of the building consists of a small front yard with a lawn and small concrete patio that is enclosed by a tall metal fence along the front and northwest property lines (**Figure 12**). A concrete walkway extends from the sidewalk to the building's front entrance, and a narrow strip of brick pavers lead to a second concrete walkway that separates the subject building from the adjacent building on the lot. The rear portion of the lot is also paved with concrete, except for a small space immediately to the rear of the building, in which trees have been planted. An outdoor seating area with wood picnic tables and a wood lattice covering is located at the southwest corner of the lot. The rest of the rear portion of the lot is used as a driveway and parking lot for the complex (**Figure 13**).

Surrounding Site Context

429-431 S. San Joaquin Street is located on the block bounded by S. San Joaquin Street to the northeast, E. Church Street to the southeast, S. Hunter Street to the southwest, and E. Sonora Street to the northwest in the heart of the original street grid of Stockton and one-and-one-half blocks south of the California State Route 4 highway. The surrounding area is characterized primarily by a mix of two- to three-story residential buildings and a few brick commercial buildings that appear to have been built around the turn of the twentieth century. 435-437 S. San Joaquin Street was constructed in a similar architectural style around 1904 (**Figure 14**). The Gleason House, located directly to the northwest of the subject property at 423 S. San Joaquin Street, is a Queen Anne style house constructed in 1895 (**Figure 15**). 420 S. San Joaquin Street, directly across from the subject property, is a two-story, Queen Anne style house built in 1905 (**Figure 16**). Next door, 430 S. San Joaquin is a two-story vernacular style foursquare that was built in 1900 (**Figure 17**).

***Resource Name or #** 429-431 S. San Joaquin Street

B1. Historic name: Wills House
B2. Common name: 429-431 S. San Joaquin Street
B3. Original Use: Multiple Family Residence
B4. Present use: Multiple Family Residence
***B5. Architectural Style:** Queen Anne/Colonial Revival
***B6. Construction History:** (Construction date, alterations, and date of alterations)

The parcel on which 429-431 S. San Joaquin Street is located was owned by Bee Hoult by 1900. Two earlier wood frame buildings that were present on the site at the time burned down in a fire that spread from the Agricultural Pavilion building, located two blocks north on Lafeyette Street between S. Hunter, and destroyed nearly six city blocks in September 1902.[1] The 1904 Stockton city directory records that Hoult's husband, David, was living at 431 S. San Joaquin Street, indicating that the subject building had been completed by this time to replace the buildings that had been destroyed by the fire.[2] It is likely that Bee was living there at the time, as well, as she is listed as residing at the same address with her husband and son in the 1910 federal census.[3] The 1917 fire insurance map by the Sanborn Map Company shows the building as a two-story wood frame building that consisted of two flats over a basement (**Figure 18**). It had a one-story porch that spanned the front façade, a canted bay on the southeast façade, and an agglomeration of one- and two-story porches at the rear. The second-story rear porch appears to have been accessed by a long exterior staircase. A few subsequent alterations are apparent in the 1950 Sanborn map (**Figure 19**). By this time, the building had been subdivided into four flats, and an additional one-story porch had been added at the south end of the northwest façade. The configuration of the porches and stairs at the rear façade also appear to have been altered. These changes are not clearly visible in aerial photographs from the 1930s and 1970s; however, they indicate that the overall footprint of the building has remained relatively unchanged over time (**Figure 20** and **Figure 21**). (See Continuation Sheet, page 8)

City of Stockton
Native American through Early American Period:
Numerous Native American groups called the Central Valley home for thousands of years before the arrival of European and American settlers. The Stockton area was settled by the Yatchicumne, a group of the Northern Valley Yokuts people whose villages were established across a vast expanse of California from the confluence of the Sacramento and San Joaquin rivers as far as the Tehachapi Mountains, 250 miles to the south. At least two Yatchicumne villages were located in the Stockton area, including one called Pasasimas, situated on a mound near the Stockton Channel in present-day Downtown Stockton. (See Continuation Sheet, page 9)

Figure 22. The northwest facade in April 2012. Source: Google Street View, 2012.

Google Street View images show that the front porch entry had a different configuration and was in a deteriorated condition in 2012 (**Figure 22**). This does not appear to have been the original porch entry and was replaced with the existing configuration sometime between 2012 and 2015.[4] Building permits on file at the City of Stockton Permit Center document repairs to the building's foundation, electrical work, and repairs from fire damage. Additional alterations that are not documented in permits include the addition of a porch and stairs on the northwest façade; window replacements, additions, and removals; alterations to the front and rear porches; and re-roofing.

***B10. Significance: (continued)**

Local rivers and streams provided an abundant source of food for the native population and also attracted European and American fur trappers to the area, who began exploring the area in the early nineteenth century in search of beaver and otter pelts.[5] These early explorers included Jedediah Strong Smith, who established a base camp to the southeast of present-day Stockton in 1827, and Alex McCleod, a fur trapper from the Hudson's Bay Company, whose camp near McCleod Lake gave the lake its name.[6] While the fur trappers reaped the benefits of the region's rich natural resources, they also brought diseases with them that led to the decimation of much of the local Native American population.[7]

The presence of French-Canadian fur trappers provided the inspiration for the name of the Mexican land grant that encompassed the present-day site of Stockton and its immediate vicinity during the Mexican period, after Mexico achieved independence from Spain in 1821. Rancho Campo de los Franceses, as the grant was known, was filled with numerous waterways, grassy hills, and oak trees. It was this landscape that German immigrant Captain Charles Maria Weber, founder of the city of Stockton, experienced

when he traveled through the area on his way to San Jose in 1842.[8] Recognizing the area's potential, Weber and his business partner, Guillermo (William) Gulnac, acquired roughly 55 square kilometers of Rancho Campo de los Franceses on the east side of the San Joaquin River from the Mexican governor in 1843. Weber eventually bought Gulnac out of the land and built his first structures on the site in 1847.[9] The first survey of the settlement, initially known as Tuleberg, was completed by Jasper O'Farrell the same year.[10]

Formation of Stockton

Like many cities in Northern California, Stockton grew from a small, rural outpost into a booming city as a result of the Gold Rush. When gold was discovered at Coloma in 1848, one year after Weber established the settlement of Tuleberg, he initially joined the fervor and spent months mining in the goldfields. He soon realized, however, that he had a better chance of making his fortune by selling goods and supplies to the floods of miners who were traveling into the area.[11] Advantageously located at the head of the Stockton Channel, a tributary of the San Joaquin River, Weber's settlement emerged as the gateway to and major supply center for California's southern mining areas as ships traveling from San Francisco brought streams of miners to the area (Error! Reference source not found.).[12]

As the settlement's population grew, so did urban development. In 1849, Major R. P. Hammond completed a second survey that laid out the first street grid between Weber Avenue, Center Street, Main Street, and Commerce Street.[13] In 1850, the same year the California achieved statehood, the settlement was officially incorporated as a city and renamed Stockton, after Commodore Robert F. Stockton, the American Navy officer who drove the last Mexican forces out of California in 1848.[14] Over the next five years, the city's population swelled from 1,000 to roughly 7,000. By the 1890s, it had exploded to approximately 23,000 residents.[15]

The streets between El Dorado Avenue, Main Street, Commerce Street, and Levee (now Weber) Avenue formed the core of the city's commercial area in the nineteenth century. The first residential districts, meanwhile, developed to the southwest and north. Floods were common in the winter months due to the city's location near miles of waterways that made up the Sacramento-San Joaquin River Delta.[16]

After the Gold Rush ended in the mid-1850s, the Central Valley's rich soil and temperate climate contributed to the development of Stockton into a major center for agricultural industries. Wheat and grains were the area's largest crop in the nineteenth century and spurred the construction of grain warehousing facilities and flour mills in the area, including the Sperry Flour Company. By the early twentieth century, fruit orchards, nuts, vegetables, potatoes, and other crops were also grown on the farms around the city.[17] Surrounded by this abundance of agricultural wealth, the city's economy developed around businesses that processed, cultivated, and transported agricultural goods. Several of Stockton's most prominent businesses, including Matteson & Williamson and Holt Brothers Manufacturing Company, made names for themselves as the manufacturers of agricultural tools and equipment that increased the productivity of the area's farms.

Stockton's location along a variety of important transportation corridors—including the Stockton Channel, with its deep water shipping access, and the Central Pacific Railroad—contributed to Stockton's industrial development and emergence as a regional transportation hub.[18] Shipyards, iron foundries, warehouses, and factories were established along the channel and its tributaries.[19]

Burgeoning with economic activity and a growing population, Stockton experienced a building boom from the 1880s until the 1930s, during which the majority of buildings in the city's downtown and nearby residential areas were constructed. In the late nineteenth century, many of the city's downtown commercial buildings were constructed of locally produced red brick, inspiring one of the Stockton's nicknames, "The Brick City."[20] Five high rises were constructed between 1910 and 1917 alone.[21] Two- and three-story masonry residential hotels were also constructed during this period in order to provide affordable, temporary housing for the large population of migrant laborers who worked on the surrounding farms. These residential hotels, many of which had

commercial retail spaces on the first floor and exhibited Classical architectural detailing, became a common building type in downtown Stockton as a result.[22] The downtown area was also home to the largest Chinatown in California, as many Chinese families relocated from San Francisco after the 1906 earthquake.[23]

Other immigrant groups, in addition to the Chinese, made up a large portion of Stockton's population. After the passage of the Chinese Exclusion Act in 1882, Filipino, Japanese, and Sikh immigrants gradually replaced the Chinese as the main labor force in the city's packing houses, farms, and domestic industries. By the 1920s, Filipino men and women made up the majority of Stockton's agricultural labor force, giving the city the nickname, the "Manila of California."[24] From the late nineteenth century to the 1920s, Italians also arrived in Stockton in large numbers, during a wave of migration that took place after the unification of Italy around 1861.[25]

Construction during the late nineteenth and early twentieth centuries also included civic and institutional establishments. A San Joaquin County Courthouse was completed on a public square a short distance from the channel in 1854 and was replaced in 1890. In 1924, the University of the Pacific relocated from San Jose to Stockton, bringing one of the city's most influential and long-standing establishments to the city.[26]
Infrastructural improvements further enhanced Stockton's continuing development. Electric trolleys began service in the last decades of the nineteenth century. As the automobile became increasingly popular and affordable at the start of the twentieth century, an auto row developed at El Dorado Street and Miner Avenue.[27] In 1911, a new diverting channel was completed to address issues with frequent flooding.[28]

Stockton's varied economy, based on the agricultural industry and other industries centered around the shipping channel, helped soften the impact of the Great Depression. Starting in 1927, work to expand and deepen Stockton Channel provided employment for hundreds of workers. The new Port of Stockton opened in 1933 as the largest inland port in California at the time. Opportunities for work in the region's surrounding farms, meanwhile, attracted families from the Midwest and large populations of immigrant workers to the area.

World War II to the Present
The outbreak of World War II and the resulting demand for war-related goods stimulated Stockton's local industries. Shipbuilding, based at the city's many shipyards, became the largest source of employment, while the opening of an Army Air Force base at Old Stockton Field and the Stockton Naval Supply depot created new job opportunities. The war also created an agricultural labor shortage. Mexican workers, sponsored by the federal Bracero Program, filled the void and became part of the city's rich multicultural makeup.[29]

The postwar period reshaped the city. Stockton struggled to maintain its status as a major shipping center because the Stockton Channel was not large or deep enough to accommodate the increasing size of shipping vessels. In response, the local economy began to shift toward warehousing and the production of farming machinery and commercial boats. The completion of new residential neighborhoods, shopping malls, and of the Crosstown and Interstate 5 freeways, as well as the migration of affluent residents outside of the city center, diverted economic and commercial activity away from Stockton's historic downtown core. By the 1950s, the area was considered blighted. In the 1960s, the area became the target of urban renewal efforts, which resulted in the demolition of all but three buildings on nine square blocks of downtown. Longstanding residents, many of whom were of Chinese or Filipino descent, were displaced during the redevelopment.[30]

In the 1980s, Stockton's downtown began to experience a resurgence of development. Activity around the canal refocused around recreation-related uses and building projects. Boats plied its waters, and restaurants, a shopping mall, and housing developments were constructed along the waterfront.[31]

In the 2010s, agriculture remains important to the city's economy. Asparagus, cherries, tomatoes, walnuts, and almonds have replaced wheat and grain as the area's major crops. In spite of the changes that have taken place over time, Stockton continues to

be characterized by its agricultural industry, the Stockton Channel, its history of brick buildings downtown, and a diverse, multi-cultural population.[32]

The Queen Anne Style: Free Classic Subtype

The Queen Anne style was a popular architectural style among the elite during the Victorian era of the late nineteenth century. First used in England, this style referred back to the reign of Queen Anne (1702-1714) when craftsmanship and simplicity of construction were emphasized in the architectural vernacular.[33] One of the main innovators and architects of this style was Richard Norman Shaw, who popularized the Queen Anne style in England with his half-timbered designs that borrowed from late Medieval buildings from the Elizabethan and Jacobean periods. American architects introduced this style into the mainstream during the late 1870s and soon added subtypes of the style with spindlework and classical architectural elements. By the 1880s, the Queen Anne style had become the leading architectural style for the Victorian elite and upper to middle classes.

The Queen Anne style is characterized by its variety of features and combination of ornamentation. Typical features of the Queen Anne style include steeply pitched roofs, irregular rooflines, gable projections, cutaway bay windows, asymmetrical compositions, and swag and garland appliqués.[34] The result of this fusion of ornamentation and composition was a highly textured and varied residence, which achieved the elegance and grace desired by the people of this era. Commonly, other architectural styles, such as Eastlake and Stick, were combined with the Queen Anne style to produce asymmetrical and varied compositions.

Approximately 35 percent of Queen Anne houses are considered to be a subtype of the style called Free Classic. The style became common after 1890, with a peak from 1900 until 1910, and shares some features with early Colonial Revival houses, which became the dominant architectural style in the years afterward. The Free Classic subtype is characterized by its use of classical columns that are typically grouped together in units of two or three. Other classical features – such as cornice-line dentils, swags, garlands, or Palladian windows – are also common.[35]

Owner and Occupant History

The sequence of owners and occupants of the subject property, developed from records maintained at the San Joaquin Recorder-County Clerk's offices, historic city directories, census records, and historical newspaper articles is summarized in Table 2. Brief biographies of long-term or notable owners and occupants follow the table.

Table 2. Owners and Occupants of 429-431 S. San Joaquin Street, Stockton

Year(s)	Owner[36]	Occupant[37]
ca. 1900-1949	Bee Hoult	429 S. The Hoult Family, Owners and Occupants, ca. 1900-1949

As previously mentioned, the subject building appears to have been originally owned and constructed for Bee Hoult and her family around 1904, after a fire destroyed earlier buildings on the lot. Born Bee Delia O'Brien in Ireland around 1861, Bee immigrated to the United States in 1883. In 1887, she married David James Hoult, a foreman of Houser & Haines Manufacturing Co.[38] The couple had one child, a son named Urban.[39] The family lived together at 431 S. San Joaquin Street in 1910 through at least 1915.[40] As an adult, Urban worked for the firm of Radcliffe & Hoult, publishers of the *Mercury Sun* newspaper in Merced. He died of pneumonia in 1924 at the age of 35. David died just four years later at the age of 65.[41] Bee continued to own the subject property after their deaths and moved to the neighboring house at 435 S. San Joaquin Street until her own death sometime around 1949, after which the property passed to her niece, Ila H. Stevenson. Research did not uncover any additional information about the life or contributions of Bee, David, or Urban Hoult. City directories do not list Stevenson as a resident of the subject property.

Gospel Center Rescue Mission, Inc., Owner, 1989-2019
Gospel Center Rescue Mission (GCRM) is a faith-based non-profit that serves the homeless and addicted of San Joaquin County. The non-profit was founded in 1940 in Ripon, California out of a concern for the post-Depression era homeless population. Over time, GCRM added programs to provide food, shelter, clothing, addiction treatment, and medical care to the homeless.[42] Today, the agency serves over 1,000 men, women, and children at its Stockton campus each day and offers eight programs, including the only Homeless Recuperative Care Program and non-profit payee service in San Joaquin County.[43]

Significance Evaluation: National Register of Historic Places and California Register of Historical Resources
The subject property at 429-431 S. San Joaquin Street is not currently listed in the National Register of Historic Places (National Register) or the California Register of Historical Resources (California Register). The building is included in the California Historical Resources Information System (CHRIS) as of 2012 with the status code, "5S2," indicating that the property has been identified as an "Individual property that is eligible for local listing or designation."

In order for a property to be eligible for listing in the National Register, it must be found significant under one or more of the following criteria:

Criterion A (Event): Properties associated with events that have made a significant contribution to the broad patterns of our history.

Criterion B (Person): Properties associated with the lives of persons significant in our past.

Criterion C (Design/Construction): Properties that embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant distinguishable entity whose components lack individual distinction.

Criterion D (Information Potential): Properties that have yielded, or may be likely to yield, information important in prehistory or history.

In order for a property to be eligible for listing in the California Register, it must be found significant under one or more of the following criteria:

Criterion 1 (Events): Resources that are associated with events that have made a significant contribution to the broad patterns of local or regional history, or the cultural heritage of California.

Criterion 2 (Persons): Resources that are associated with the lives of persons important to California history.

Criterion 3 (Architecture): Resources that embody the distinctive characteristics of a type, period, region, or method of construction, or represent the work of a master, or possess high artistic values.

Criterion 4 (Information Potential): Resources or sites that have yielded or have the potential to yield information important to the prehistory or history of California.

The following section examines the eligibility of the building at 429-431 S. San Joaquin Street for *individual* listing in the National

Register or California Register.

Criterion A/1 (Events)
The subject property does not appear to be eligible for individual listing under Criterion A/1 for association with events that have made a significant contribution to the broad patterns of local, state, or national history. The multi-family house was constructed around 1904, more than fifty years after Stockton was incorporated in 1850, and, thus, it is not significant for being one of the first or earliest residential buildings constructed in the city. Rather, it was constructed at a time when Stockton was experiencing a building boom that lasted from the 1880s until the 1930s. This building boom, however, is most closely associated with commercial and institutional development in Stockton's urban core and the city's emergence as a transportation hub and center for agricultural industries. Although residential development occurred during the same period, the subject building is not an exceptional example of a residential building constructed during the period and does not appear to have had an impact on the development of the surrounding area. Therefore, the building is not considered to be a notable representative of Stockton's development in the early twentieth century and does not appear to rise to the level of significance necessary to be individually eligible for listing on the California Register or National Register under Criterion A/1.

Criterion B/2 (Persons)
The subject property does not appear eligible for individual listing under Criterion B/2 for association with the lives of persons important to local, state, or national history. Bee Delia Hoult owned the property from at least 1900 until 1949, and the subject building appears to have been constructed for Hoult and her family around 1904 after a fire in 1902 destroyed earlier buildings on the site. Hoult appears to have lived in the subject building with her husband, David, and son, Urban, from roughly the time of its construction until around 1915. David worked as a foreman for Houser & Haines Manufacturing Co., while Urban worked for the firm that published the *Mercury Sun* newspaper in Merced. Research did not reveal information about Bee Hoult's occupation or shed any further light on the activities or contributions of the Hoult family to Stockton or the surrounding area. From 1960 to 1985, the building was owned by a number of individuals that appear to have been associated with the Fong family. City directories do not list these owners as residents of the building or of Stockton, and research did not uncover the occupations or activities of these individuals necessary to evaluate their contributions to history. As a multi-family residence, a large number of people have lived at the subject building over time. Throughout its history, residents appear to have primarily been working class individuals employed in a number of industries. In the first half of the twentieth century, city directories list restaurant workers, blacksmiths, machinists, and agricultural workers as residents of the house. From the 1940s to the 1960s, clerks, salesmen, cannery workers, and laborers from other industries resided there. Starting in the 1960s, residents were primarily farm workers and retired individuals. Research did not indicate that any of these individuals gained notable importance within their professions. Therefore, none of the owners or occupants that were identified during research for this report appear to have made significant contributions to local, state, or national history in a manner that rises to the level of significance necessary to merit designation under Criterion 2.

Criterion C/3 (Architecture)
The subject property does appear eligible under Criterion C/3 as a resource that embodies the distinctive characteristics of a multi-family house built in the Queen Anne style. More specifically, the house is a representative example of the Free Classic subtype of Queen Anne style houses. The building was originally constructed around 1904, during the peak period of popularity of Free Classic Queen Anne houses in the United States; however, a scan of the area surrounding the subject building suggests that this style was relatively uncommon in Stockton or that few examples survive in the city today. The subject building exhibits many of the defining characteristics of the style, including a dominant front-gabled roof; one-story, full-width front porch; a side bay window; and asymmetrical composition, that are representative of the broader Queen Anne style, as well as the use of paired Tuscan columns as porch supports and cornice-line carved wood modillions and dentils that are indicative of the Free Classic subtype. The building also has some additional notable design features, including flared overhanging eaves and surviving original window trim and doors with decorative carved dentils. The subject property, therefore, appears to be significant under Criterion C/3.

The property's period of significance under Criterion C/3 is 1904, when the building was originally constructed.

Criterion D/4 (Information Potential)
The subject property does not appear to be individually eligible under Criterion D/4 as a building that has the potential to provide information important to the prehistory or history of the City of Fremont, state, or nation. It does not appear to feature construction or material types, or embody engineering practices that would, with additional study, provide important information. Page & Turnbull's evaluation of this property was limited to age-eligible resources above ground and did not involve survey or evaluation of the subject property for the purposes of archaeological information.

Evaluation (Integrity)
In order to qualify for listing in any local, state, or national historic register, a property or landscape must possess significance under at least one evaluative criterion as described above and retain integrity. Integrity is defined by the California Office of Historic Preservation as "the authenticity of an historical resource's physical identity evidenced by the survival of characteristics that existed during the resource's period of significance," or more simply defined by the National Park Service as "the ability of a property to

convey its significance."[44] Established integrity standards are outlined by the *National Register Bulletin: How to Apply the National Register Criteria for Evaluation*. Seven variables, or aspects, that define integrity are used to evaluate a resource's integrity: location, setting, design, materials, workmanship, feeling, and association. A property must retain integrity under most or all of these aspects in order to retain overall integrity. If a property does not retain integrity, it can no longer convey its significance and is therefore not eligible for listing in local, state, or national registers.

1. *Location* is the place where the historic property was constructed.
2. *Design* is the combination of elements that create the form, plans, space, structure and style of the property.
3. *Setting* addresses the physical environment of the historic property inclusive of the landscape and spatial relationships of the building(s).
4. *Materials* refer to the physical elements that were combined or deposited during a particular period of time and in a particular pattern of configuration to form the historic property.
5. *Workmanship* is the physical evidence of the crafts of a particular culture or people during any given period in history.
6. *Feeling* is the property's expression of the aesthetic or historic sense of a particular period of time.
7. *Association* is the direct link between an important historic event or person and a historic property.

429-431 S. San Joaquin Street retains all seven of the aspects of integrity. The building has not been moved since its construction and, thus, retains integrity of location. Although the surrounding area has changed over time, a number of single- and multi-family houses and commercial buildings also dating to the late nineteenth and early twentieth centuries remain at their original locations directly next to or across from the subject property on S. San Joaquin Boulevard. As a result, the subject property retains its integrity of setting. Although some exterior alterations to the front porch, gable end, and rear and side windows are evident, the building's essential exterior features and materials that convey its significance as a multi-family house constructed in the Free Classic subtype of the Queen Anne style – including prominent front gable, wide flared eaves with cornice line modillions and dentils, full-width front porch, paired Tuscan column porch supports, original wood windows and doors, and wood lap siding – remain intact. Integrity of design, materials, workmanship, feeling, and association have also been retained.

Based on this analysis, 429-432 S. San Joaquin Street retains sufficient integrity to convey its significance under Criterion 3/C and therefore qualifies for listing on the National and California Registers.

Character-Defining Features

For a property to be eligible for national, state, or local designation, the essential physical features (or character-defining features) that enable the property to convey its historic identity must be evident. To be eligible, a property must clearly contain enough of those characteristics, and these features must also retain a sufficient degree of integrity. Characteristics can be expressed in terms such as form, proportion, structure, plan, style, or materials. The character-defining features of 429-431 S. San Joaquin Street include:

- Prominent front-facing gabled roof with wide, flared eaves
- Cornice with wood modillions and dentils
- One-story full-width front porch with paired Tuscan column supports mounted on solid wood railing
- Side cutaway bay window with gabled roof with flared eaves
- Wood lap siding
- Wood panel doors and sash windows with molded wood trim, some with decorative carved dentils
- Entries to multiple units at front and rear façades

Significance Evaluation: City of Stockton Landmark, Historic Site, or Structure of Merit

The subject building is not included in the Downtown Stockton Historic Resources Survey (2000) and is not located within a local historic district or zoning overlay or listed as a City of Stockton Landmark, Historic Site, or Structure of Merit. It is therefore not currently listed locally as a historic resource.

Landmarks

According to the Stockton Municipal Code Section 16.220.070, "In considering an artifact, natural feature, or structure for designation as a Landmark, the Board shall apply any or all of the following criteria:

1. **Archaeological Interest.** Its potential for yielding significant information of archaeological interest;
2. **Architectural Craftsmanship**. Its embodiment of elements demonstrating outstanding attention to architectural and/or engineering craftsmanship, design, detail, or materials;

[44] California Office of Historic Preservation, *Technical Assistance Series No. 7: How to Nominate a Resource to the California Register of Historical Resources* (Sacramento: California Office of State Publishing, 4 September 2001), 11; U.S. Department of the Interior, National Park Service, *National Register Bulletin: How to Apply the National Register Criteria for Evaluation* (Washington, D.C.: National Park Service, 1995), 44.

3. **Architectural Style.** Its exemplification of a particular architectural style or way of life important to the City, the State, or the Nation;
4. **Architectural Type.** Its exemplification of the best remaining architectural type in the City;
5. **Historic Event.** Its location as a site of a significant historic event;
6. **Heritage.** Its character, interest, or value as a significant part of the heritage of the City, the State, or the Nation;
7. **Visual Feature.** Its unique location or singular physical characteristic representing an established and familiar visual feature of the City;
8. **Relationship to Another Landmark.** Its relationship to any other landmark, if its preservation is essential to the integrity of that landmark;
9. **Significant Person.** Its identification with a person(s) who significantly contributed to the culture and development of the City, the State, or the Nation;
10. **Work of a Significant Person.** Its identification as the creation, design, or work of a person(s) whose effort has significantly influenced the heritage of the City, the State, or the Nation; or
11. **Natural Environment.** Its integrity as a natural environment that strongly contributes to the well-being of the people of the City, the State, or the Nation."[45]

Historic Sites & Structures of Merit
Historic Sites and Structures of Merit are designated by the same criteria. According to the Stockton Municipal Code Sections 16.220.090 and 16.220.100, the criteria for designating Historic Sites and Structures of Merit are the following:

1. **Archaeological Interest.** Its potential for yielding significant information of archaeological interest;
2. **Heritage**. Its character, interest, or value as a significant part of the heritage of the City, the State, or the Nation;
3. **Visual Feature of the City**. Its unique location or singular physical characteristic representing an established and familiar visual feature of the City;
4. **Way of Life.** Its exemplification of a particular way of life important to the City, the State, or the Nation;
5. **Historic Event.** Its location as a site of a significant historic event regardless of its current configuration, development, or use;
6. **Significant Person**. Its identification with a person(s) who significantly contributed to the culture and development of the City, the State, or the Nation; or
7. **Significant Person of a Specific National Origin.** Its identification with a person(s) representative of a specific national origin who have contributed to the culture and development of the City, the State, or the Nation."[46]

As evidenced in the previous evaluation, 429-431 S. San Joaquin Street appears to be significant at the local level under Criterion C/3 of the National Register and California Register and possesses sufficient integrity to be eligible for listing. The City of Stockton's criteria for the designation of Landmarks, Historic Sites, and Structures of Merit correspond approximately with those of the National Register and California Register; however, they do not appear to include an integrity requirement. In particular, criteria 2, 3, and 4 above for listing as a City of Stockton Landmark appear to correspond with Criterion C/3 of the National Register and California Register. Thus, the above evaluation for National Register and California Register Criteria C/3 can be extended to local designation under the corresponding criteria for listing as a City of Stockton Landmark, and the property appears to merit local designation as a City Landmark.

Conclusion
429-431 S. San Joaquin Street does appear to be eligible for individual listing in the National Register under Criterion C, the California Register under Criterion 3, and as City of Stockton Landmark under Criteria 2, 3, and 4. The subject building was constructed in 1904 and embodies the distinctive characteristics that are representative of a multi-family house that was built in the Free Classic subtype of the Queen Anne style. As such, the California Historical Resource Status Codes (CHRSC) of "3S," "3CS," and "5S2" have been assigned to the property, meaning that it has been found eligible for the National Register and California Register as an individual property through survey evaluation.[47]
